PUBLIC WORKS DEPARTMENT, MADRAS PRESIDENCY.

ADMINISTRATION REPORT

FOR THE YEAR 1918-1919.

PART II—IRRIGATION.

CHAPTER I—GENERAL.

There was no change in the personnel; the Hon'ble Mr. W. J. J. Howley continued as Chief Engineer for Irrigation, and Mr. F. E. Morgan as Assistant Chief Engineer for Irrigation, throughout the year. Personnel.

2. Irrigation works in this Presidency are divided into four classes:—

Class I.—Imperial—Major Productive and Protective works.

Class II.—Provincial—Minor works and Navigation for which Capital and

Revenue accounts are kept.

Class III.—Provincial—Minor works for which neither Capital nor Revenue accounts are kept.

Class IV.—Provincial—Agricultural works.

Classifica-
tion of
works.

3. The total outlay incurred on, and the total revenue derived from, irrigation works during the year under report were Rs. 80,08,840 and Rs. 2,51,49,778 against Rs. 78,99,191 and Rs. 2,75,26,363, respectively in 1917-18. The area charged as irrigated was 6,887,673 acres against 7,358,829 acres in the previous year. Gross
outlay,
revenue
and area
irrigated.

4. (1) There are sixteen works of this class, only one of which, the Toludur project, is still under execution. The canals of the Gōdāvari and the Kistna delta systems and the Kurnool-Cuddapah canal are used both for irrigation and navigation. The remaining class I works are purely irrigation systems. Class I.
Productive
works.
Number of
Works.

Toludur project (South Arcot district).—During the year under review fair progress was made with the construction of the bund. Nearly all the masonry works in the high level channel were completed, while those in other channels were in progress. The excavation of the high level channel was almost completed, and that of the main (low level) channel was in progress. Works under
construction.

More labour than usual was available during the year. The average number of coolies exceeded 1,000 in September and 1,500 in October, in consequence of the want of agricultural employment due to the drought. The expenditure during the year was Rs. 2,41,707 and to the end of the year Rs. 13,82,906; against the estimate of Rs. 32,90,900. The project is expected to come into operation in 1920-21.

(2) The capital outlay (direct and indirect) on productive works during the year was Rs. 7,82,998 against Rs. 7,41,489, the average of the triennium ending 1917-18. The expenditure was incurred mainly on the Gōdāvari and the Kistna delta systems, the Kurnool-Cuddapah canal and the Toludur project. Details of the works carried out are given in Chapter II. The Kurnool-Cuddapah canal and

the Barur tank not having fulfilled the conditions of a productive work, the capital expenditure on these systems is met from Provincial funds. The capital outlay to the end of the year on these two systems from both Imperial and Provincial funds was Rs. 2,35,16,855, excluding indirect charges, as shown below:—

The Kurnool-Cuddapah canal—						Rs.
Imperial	...	...	...	...	...	2,18,63,620
Provincial	...	...	...	...	...	12,33,860
Total						2,30,97,480
The Barur tank—						Rs.
Imperial	...	...	...	...	...	4,02,176
Provincial	...	...	...	...	...	17,199
Total						4,19,375
Grand total						2,35,16,855

Length of canals.

(3) The total length of the main and branch canals of the productive systems at the end of the year was 3,898 miles. Of this length 1,023 miles were for irrigation and navigation combined, and the remainder for irrigation only. The length of distributaries was 8,288½ miles.

Area irrigated.

(4) The total area charged as irrigated (first and second crop) was 3,477,984 acres, or 48,847 acres less than in the previous year and 21,826 acres less than the average of the triennium ending 1917-18. The decrease occurred chiefly under first crop in the Cauvery delta system.

	First crop.	Second crop.
	ACS.	ACS.
1918-19	2,944,606	533,378
1917-18	3,002,950	523,861
Average of the triennium ending 1917-18.	2,998,815	500,495

Revenue.

(5) The gross revenue of the year, including that due to old irrigation, amounted to Rs. 1,58,00,081 against Rs. 1,57,97,998, the average of the previous triennium. Compared with the previous year, the revenue showed a decrease of Rs. 2,66,598, which occurred chiefly under the Cauvery delta system owing to the failure of the monsoon.

Working expenses.

(6) The gross working expenses of the year, inclusive of old maintenance charges, amounted to Rs. 29,31,461, or Rs. 3,77,564 less than the average of the previous triennium. As compared with the previous year, there was a fall of Rs. 4,80,308, which was due chiefly to the change introduced by the Government of India in the system of distributing the charges for Public Works establishment among the several Public Works major heads.

Financial results.

(7) The net revenue derived and the profit realized, after deducting interest charges, amounted to Rs. 86,20,968 and Rs. 57,51,245, against Rs. 85,08,051 and Rs. 57,39,288, respectively, the averages of the previous triennium.

The profit of the year after deducting interest charges, viz., Rs. 57,51,245, is 6.53 per cent on the capital outlay of Rs. 8,80,20,854. This return would be increased to 11.01 per cent if the Kurnool-Cuddapah canal and the Barur tank, which accounted for a total loss of Rs. 7,56,124, were excluded. The accumulated profits to the end of the year amounted to Rs. 17,33,61,646.

Revenue and working expenses per acre.

(8) The average revenue per acre amounted to Rs. 4.54 on the gross area, and Rs. 5.28 on new irrigation. The working expenses per acre were Rs. 0.84 on the gross area and Rs. 1.24 on new irrigation.

Remissions.

(9) The remissions granted during the year amounted to Rs. 6,55,111 against Rs. 1,92,580 in the previous year.

Value of crops.

(10) The estimated value of crops amounted to Rs. 28,36,21,842 against Rs. 21,94,62,585 in the preceding year.

Class I. Protective works. Number of works.

5. (1) There are four protective works in the Presidency—
- The Rushikulya system in Ganjam.
 - The Bhavanasi tank project in Guntur.
 - The Mopad reservoir project in Nellore.
 - The Venkatapuram tank in Kurnool.

The Rushikulya system and the Venkatapuram tank were in operation. The Bhavanasi tank project was completed during the year, and the Mopad Reservoir project was still under execution.

Mopad reservoir project.—Fair progress was made with the reservoir bund. Works under construction. The excavation of the main channel was completed. A fourth branch channel was also completed. The progress of work during the year was retarded by heavy rains, cholera and influenza. The expenditure during the year was Rs. 1,71,297 and to the end of the year Rs. 20,94,500 against the estimate of Rs. 23,19,000. The project is expected to be completed and brought into operation in 1920-21.

(2) The capital outlay (direct and indirect) incurred during the year was Capital Rs. 2,14,495, against Rs. 3,10,134 the average of the triennium ending 1917-18. outlay. The bulk of the outlay was spent on the Mopad reservoir and the Bhavanasi tank projects.

(3) The lengths of the canals and distributaries of the protective systems at the end of the year were 86 miles and 151 miles, respectively. Lengths of canals.

(4) The area irrigated was 107,845 acres, against 106,676 acres the average Area irrigated of the previous triennium.

(5) The gross revenue including old irrigation revenue and the working Revenue, expenses were Rs. 2,43,728 and Rs. 75,087, against Rs. 2,60,421 and Rs. 66,106, respectively, of the previous year. The net revenue, after deducting interest expenses, charges, showed a deficit of Rs. 1,41,339, against Rs. 1,07,943 in the preceding year. remissions and value of crops. The remissions granted amounted to Rs. 4,099 against Rs. 1,215 in the previous year. The value of the crops raised under this class of works is estimated at Rs. 68,47,281 against Rs. 45,69,312 in the previous year.

6. (1) There are forty works of this class in the Presidency. The following Class Minor Works and Navigation Number of works. five works have not been commenced:—

(v) Rayapuram tank project (Bellary district) ...	95,000

Items (i), (ii), (iv) and (v) have been sanctioned under '33. Famine relief' to be taken up only when the necessity for famine relief arises; while item (iii), although sanctioned under 'Provincial—43. Minor Works and Navigation', is also proposed to be undertaken only under similar circumstances.

The following three works were completed during the year:—

- Yellanur tank project.
- Kocheruvu "
- Siddapur "

The Kaniyampalayam anicut project, in the Coimbatore district, and the Works under Panjapatti reservoir project, in the Trichinopoly district, were still in progress. construction.

Kaniyampalayam anicut project.—The anicut was almost completely restored. The progress of work was however hampered by floods and influenza. The expenditure during and to the end of the year was Rs. 31,737 and Rs. 80,987, respectively, against the estimate of Rs. 96,744. The project is expected to be completed during 1921-21.

Panjapatti reservoir project.—During the year under review the reservoir bund was practically completed. Though water could be stored in the reservoir up to F.T.L., the water level never rose to more than half a foot above the low level sluice, and consequently no land was irrigated. The expenditure during the year was Rs. 50,026 and to the end of the year Rs. 3,41,242, against the estimate of Rs. 4,04,600. The project is expected to be completed during 1919-20.

The following four works are intended solely for navigation purposes:—

- Chilka lake canal.
- Ganjam-Gopalpur canal.
- Buckingham canal.
- Vedaranniyam canal.

Navigation works.

The Chilka lake canal has been transferred to the Salt Department with effect from 1st April 1919.

Capital outlay. (2) The capital outlay (direct and indirect) during the year was Rs. 1,22,375, against Rs. 2,17,507, the average of the previous triennium. The bulk of the outlay was incurred on the Kaniyampalayam anicut and the Panjapatti reservoir projects.

Length of canals. (3) The total length of main and branch canals at the end of the year was 1,004 $\frac{3}{4}$ miles, of which 304 $\frac{1}{2}$ miles were entirely for navigation purposes and the rest for irrigation. The length of distributaries was 492 $\frac{1}{2}$ miles.

Area irrigated. (4) The area irrigated during the year was 322,783 acres, against 363,541 acres the average of the previous triennium.

Revenue and working expenses. (5) The gross revenue, inclusive of old irrigation revenue, amounted to Rs. 13,21,934, against Rs. 15,17,368 in the previous year and Rs. 14,83,262 the average of the actuals of the triennium ending 1917-18. The decrease occurred mainly under the Ganjam minor rivers, the Sagileru and the Palar anicut systems, besides a general fall under most other systems, all due to the unfavourable character of the season. The gross working expenses of the year, inclusive of old maintenance charges, amounted to Rs. 4,86,451, against Rs. 4,43,077 in the previous year and Rs. 4,17,316 the average of the previous triennium. Most of the increase was due to the large amount of silt clearance done in the Buckingham canal, as the season was favourable for the work.

Financial results. (6) The net revenue due to improvements amounted to Rs. 2,53,880, against Rs. 4,74,045, the average of the previous triennium. This represents a return of 1.22 per cent on the capital outlay of Rs. 2,07,61,400 to the end of the year.

Revenue and working expenses per acre. (7) The average revenue per acre irrigated under this class of works, excluding navigation works, amounted to Rs. 3.82 on the gross area and Rs. 5.68 on new irrigation. The working expenses came to Rs. 0.87 per acre on the gross area and Rs. 2.14 on new irrigation.

Remissions. (8) The remissions granted during the year amounted to Rs. 1,41,639 against Rs. 6,141 in the previous year and Rs. 7,701 the average of the previous triennium. The bulk of the remissions was granted under the Palar anicut system.

Value of crops. (9) The estimated value of the crops amounted to Rs. 2,61,15,974, against Rs. 2,25,63,733 in the previous year.

Navigation canals. 7. (1) Navigation was carried on on the Chilka lake canal, the Dumagudem, Godavari, Kistna, Kurnool-Cuddapah, Buckingham, West Coast and Vedaranniyam canals.

Excluding the Chilka lake and the West Coast canals, for which figures are not available, the total receipts amounted to Rs. 2,85,745 or Rs. 16,705 more than in the previous year. The increase occurred chiefly under the Godavari and the Buckingham canals and was due to the higher revenue realized from licence and raft fees, as the restrictions on railway traffic on account of war conditions continued during the year.

Traffic. (2) The restrictions on railway traffic resulted in an increase in the number of passengers, 'ton mileage' and 'value of goods.'

Class III—Minor Works for which neither Capital nor Revenue Accounts are kept. 8. The outlay incurred on the area irrigated under and the revenue derived from this class of works are compared below with the figures of the previous year and the averages of the previous triennium:—

	Outlay incurred.	Area irrigated.	Gross revenue.
	Rs.	Acres.	Rs.
During 1918-19	29,19,918	2,929,061	76,92,072
" 1917-18	28,51,551	3,354,536	95,74,747
Average of the triennium ending 1917-18	26,04,203	3,368,589	96,17,775

Tank Restoration Scheme Works. 9. The area in the Presidency to be investigated under the Tank Restoration Scheme is calculated to be about 103,750 square miles.

The area of minor basins entered upon at the beginning of the year was 88,612 square miles, of which 78,015 square miles had been investigated. During the year under review these areas were increased by 1,207 square miles and 965 square miles respectively, bringing the total to 84,819 square miles entered upon and 78,980 square miles investigated, the remaining 5,839 square miles being under investigation.

In the area completely investigated, works were executed for 72,454 square miles and in progress for 5,703 square miles. For the balance of 823 square miles works were not commenced.

Thus about 76.12 per cent of the total area of 103,750 square miles affected by the scheme had been investigated up to 31st March 1919, leaving at that date a balance of 24,770 square miles. The estimates sanctioned for Tank Restoration Scheme works during the year amounted to Rs. 3,92,128 against Rs. 3,08,624 in the previous year.

The total amount of estimates sanctioned from the beginning of the Tank Restoration Scheme operations up to the end of the year was Rs. 1,44,07,048, against which the total expenditure incurred was Rs. 1,25,71,995, excluding charges for establishment and tools and plant. The expenditure during the year amounted to Rs. 4,31,742.

10. The outlay incurred on, and the revenue derived from, this class of works are compared below with the averages of the previous triennium:—

	Outlay incurred.	Revenue derived.
	Rs.	Rs.
During 1918-19	8,31,413	91,963
During 1917-18	6,69,695	1,05,148
Average of the triennium ending 1917-18	6,64,825	91,098

River conservancy operations were carried on in the Godavari, Kistna, Cauvery, Coleroon and Tambraparni rivers.

11. (1) The estimate for the Cauvery reservoir project was still under the consideration of the Government of India. The Vengalapuram project in the Nellore district, the Velgode project in the Kurnool district and the improvements to the Kurnool-Cuddapah canal were still under consideration.

(2) Plans and estimates for improvements to the Grisola channel in the Small Ganjam district were prepared, and investigation in connexion with improvements to the Jayamangalam channel and the Korathlala Tampara was in progress. The revenue aspect of the Vamsadhara project was still under examination by the local officers. In the Godavari district the estimates for the extension of irrigation to the Coringa and Polavaram islands were still under revision. The plans and estimates for the distribution system of the Pratar pumping scheme in the Guntur district were completed. The plans and estimates for resluicing the Amaravati channels in the Coimbatore district were still under consideration. The detailed investigation of a reservoir project on the Amaravati was approved and the establishment required for it was sanctioned. The readings of gauges in connexion with the Meengarai and the Malapuzha projects in the Malabar district were continued. In connexion with the scheme to render the Nilambur river navigable for the transport of forest produce, an estimate for the construction of an experimental dam in the river was under consideration. The detailed estimate for improvements to the Veeranam tank was under revision by the local officers. Detailed estimates for straightening the Uppanar were prepared. The estimates for works necessary to prevent damage by floods caused by the spill of the Vellar above the Shatiatope regulator and the estimate for widening the Ammapet bridge in connexion with the Chidambaram drainage scheme were held in abeyance owing to the difficulty in procuring steel work. Plans and estimates for improvements to the Vadavar were under the consideration of the Chief Engineer for Irrigation.

12. Neither the south-west nor the north-east monsoon was favourable for agricultural operations, and the rainfall of the year was seriously in defect, which resulted in a general decrease in the area cultivated and in the revenue obtained. The average rainfall for the Presidency was 30.74 inches against 42.09 inches in 1917-18 and 38.94 inches, the average for the five years ending 1917-18.

13. During the year the highest flood in the Godavari was only 9.0 feet on the crest of the Dowlaiswaram anicut (on 18th August 1918) against the recorded maximum of 17.0 feet in 1891 above the then crest level (the present crest is 0.75 feet higher). In the Kistna, the maximum flood level was 8.70 feet on the crest of the Bezvada anicut (on the 23rd September 1918) against the recorded

maximum flood of 23.50 feet in October 1903. In the Tungabhadra the highest reading was 3.30 feet on the crest of the Sunkesala anicut on the 21st September 1918, the recorded maximum being 9 feet on the 17th October 1839. The maximum depth over the Adinimoyapalle anicut across the Penner was 3 feet on the 24th September 1918, the highest recorded being 13.86 feet on the 26th October 1874. The Cauvery rose to 7.88 feet on the Cauvery dam north gauge on the 22nd August 1918 against the recorded maximum of 14.67 feet in July 1911.

Breaches
and acci-
dents.
Ayacut
maps.

14. There were no serious breaches or accidents during the year.

15. The ayacut maps for the Kistna delta and the Kurnool-Cuddapah canal were nearing completion.

CHAPTER II—CLASS I. MAJOR PRODUCTIVE AND PROTECTIVE WORKS.

PRODUCTIVE WORKS.

No. 1. Nagavalli River System.

The expenditure under the head was Rs. 2,568 which was incurred chiefly on the following works:—

(i) *Improvements to the Nagavalli head works* (estimate Rs. 17,300).—The work was completed at a cost of Rs. 9,879. The large saving was due to the fact that well foundations for toe wall originally proposed were subsequently given up.

(ii) *Excavating field distributaries* (estimate Rs. 30,000).—The outlay during and to the end of the year was Rs. 1,362 and Rs. 28,984 respectively.

2. The expenditure under "Extensions and Improvements" amounted to Rs. 14,100 against Rs. 1,941, in the previous year. The expenditure under "Maintenance and Repairs" was Rs. 14,704 against Rs. 14,657, the average of the previous triennium. The increase in the expenditure under "Extensions and Improvements" was due to a large number of estimates for field distributaries, sanctioned under the head, having been executed during the year.

3. The area irrigated was as shown below:—

Crop.		Average of the triennium ending 1917-18.	During 1917-18.	During 1918-19.
First crop		ACS. 19,622	ACS. 20,191	ACS. 20,856
Second crop		9,043	6,289	6,381

The extent of sugarcane cultivation was 210 acres.

4. The gross revenue excluding that due to old irrigation was Rs. 61,157 and the working expenses Rs. 40,303. The net revenue came to Rs. 20,854, which represents a return of 1.23 per cent on the capital outlay, against 1.69 per cent in the previous year.

5. Though the rainfall was below normal, the whole ayacut was sufficiently supplied and good crops were raised. There were no floods of any consequence in the Nagavalli river during the year.

No. 2. Godavari Delta System.

6. The outlay (direct and indirect) was Rs. 1,76,244. The following were the more important works carried out during the year:—

Eastern and Central Deltas.

(1) *Excavating a new approach channel to the Bobberlanka lock* (estimate Rupees 61,200).—The work was completed at a cost of Rs. 61,579.

(2) *Restoring the Kovur-Manjair Junction Canal* (estimate Rs. 1,37,000).—The outlay during the year was Rs. 1,473 and to the end of the year Rs. 38,304.

(3) *Improvements to the mouth of the Tuliabagha drain* (estimate Rs. 31,709).—The work was completed at a cost Rs. 30,542.

(4) *Protecting with steel sheet piles the lower margin of the impervious apron below the Doulaishweram head sluice and constructing a retaining wall below the head sluice* (estimate Rs. 29,948).—The work was completed at a cost of Rs. 28,946.

(5) *Constructing an outfall sluice at 45 miles 2 furlongs 615 feet of the Vasista left bank at Pedatippa* (estimate Rs. 13,900).—The work was completed at a cost of Rs. 10,981.

(6) *Raising the groyne at the left flank of the Bobberlanka undersluice* (estimate Rs. 6,049).—The work was completed at a cost of Rs. 5,498.

(7) *Remodelling the Tossipudi north side channel* (estimate Rs. 69,170).—The outlay during the year was Rs. 6,256 and to the end of the year Rs. 8,963.

(8) *Excavating the Nedunur drain* (estimate Rs. 4,800).—The work was completed at a cost of Rs. 4,010.

(9) *Improvements to the Ainapur drain* (estimate Rs. 1,45,300).—The outlay during the year was Rs. 1,610 and to the end of the year Rs. 10,968. The work was kept in abeyance owing to financial restrictions.

(10) *Providing a flood bank along the right side of the Teki drain from below the straight cut to the Tallarevu lock* (estimate Rs. 8,470).—The work was started during the year and the outlay was Rs. 2,847.

Western Delta.

(11) *Improvements to the Yenamadurru drain from the short cut to the Gostanadi infall* (estimate Rs. 3,73,500).—The work was completed at a cost of Rs. 3,69,145.

(12) *Remodelling the Chinchinada channel* (estimate Rs. 51,330).—The outlay during the year was Rs. 10,323 and to the end of the year Rs. 29,069.

(13) *Constructing a lock and regulator on the Kakaraparru canal*.—The outlay to the end of the year was Rs. 35,723 against the estimate of Rs. 47,000.

(14) *Improvements to the Neelacodu and Bondada drains*.—The outlay during the year was Rs. 1,986 and to the end of the year Rs. 3,745 against the estimate of Rs. 13,450.

7. (a) *Extensions and improvements*.—The outlay under this head amounted to Rs. 91,818 against Rs. 40,886 in the previous year and Rs. 38,171, the average of the previous triennium.

(b) *Maintenance and repairs*.—The expenditure was Rs. 3,48,854 against Rs. 3,00,061 in the previous year and Rs. 2,98,071, the average of the previous triennium.

The increased outlay under both "Extensions and improvements" and "Maintenance and Repairs" was due to the write-back to these heads of the expenditure incurred under "Tools and plant," in accordance with the recent orders of the Government of India.

8. The total receipts and maintenance charges amounted to Rs. 1,19,636 and Rs. 1,04,729 against Rs. 1,05,556 and Rs. 93,622 respectively in the previous year. Under 'ton-mileage' the figure was 10,070,073 against 6,055,552 in 1917-18. The value of goods carried was estimated at Rs. 17,00,90,749 against Rupees 11,25,48,109 in the previous year.

9. The area irrigated is compared below with that of the previous year and the average of the previous triennium.

Crop.		Average of the triennium ending 1917-18.	During 1917-18.	During 1918-19.
First crop		ACS. 756,376	ACS. 751,948	ACS. 759,412
Second crop		256,215	273,800	304,536

The increase under both first and second crop was due to the ryots cultivating as much land as possible owing to the high prices prevailing. The extent of sugarcane cultivation was 6,262 acres against 5,798 acres in the previous year.

10. The gross revenue excluding that due to old irrigation was Rs. 44,81,103, against Rs. 42,74,225 of the previous year and Rs. 42,00,763, the average of the previous triennium. Working expenses amounted to Rs. 8,67,417 against Rupees 9,45,550, the average of the previous triennium. The profits after deducting interest

charges amounted to Rs. 31,52,823, which is 20.61 per cent on the capital outlay against 18.70 per cent in the previous year and 18.55 per cent in 1916-17.

General.

11. The supply during the first crop season was generally good, though some difficulty was experienced at the tail end of the Eastern delta on account of scanty rainfall. There was however no failure of crops. In the Central delta, owing to low rainfall lands which are generally submerged during the rains fared well and yielded good crops. The supply during the second crop season was good and the outturn of crops satisfactory. During the second crop season some paddy was transplanted on alluvial and saline lands at an earlier period than usual to find out whether the yield would be affected. On alluvial soil these crops thrived well, but on saline lands they mostly failed.

The following table shows the dates of closure and of re-opening of the canals in the delta :—

No. 3. Kistna Delta System.**Capital outlay.**

12. The capital outlay (direct and indirect) under this head amounted to Rs. 93,324. The following were the more important works carried out during the year :—

Works in progress.

- (1) *Excavating the Lankalakalva Gunta drain.*—The work was completed at a cost of Rs. 5,655 against the estimate of Rs. 8,000.
- (2) *Excavating the Ponnappalli channel and the Nadimpalli drain.*—The work was completed at a cost of Rs. 12,421 against the estimate of Rs. 13,000.
- (3) *Improvements to the Bhattiprolu drain.*—The work was completed at a cost of Rs. 25,599 against the estimate of Rs. 34,000.
- (4) *Remodelling the Donepudi block.*—The outlay to the end of the year was Rs. 18,953 against the estimate of Rs. 23,200. The work was practically completed.
- (5) *Improvements to the drainage of the Murukondapad block.*—(Estimate, Rs. 11,800). The outlay during the year was Rs. 8,413 and to the end of the year Rs. 6,657.
- (6) *Raising and strengthening the right and left flood banks of the Kistna river.* (Estimate Rs. 56,400). The work was completed at a cost of Rs. 56,131.

Working expenses.

13. (a) *Extensions and improvements.*—The outlay was Rs. 26,789 against Rs. 55,481 in the previous year and Rs. 45,734, the average of the previous triennium. In 1917-18 a considerable sum was spent on 'Diverting the right flood bank of the Kistna river at Pratur.'

(b) *Maintenance and repairs.*—A sum of Rs. 3,10,300, was spent under this head against Rs. 2,41,851 in 1917-18 and Rs. 2,61,711, the average of the previous triennium. The reason given in paragraph 7 above under Gōdāvari delta system also holds good for the increase in the expenditure under this head.

Navigation.

14. The total receipts and charges amounted to Rs. 73,439, and Rs. 1,05,927 against Rs. 78,275 and Rs. 75,253 respectively in the previous year. The figure under 'ton-mileage' was 3,730,895 against 5,328,773 in 1917-18. The value of goods carried was Rs. 12,31,83,270½ against Rs. 5,74,89,712 in the previous year. The increase under 'charges' was mainly due to the payment of war allowance sanctioned for the navigation establishment.

Area irrigated.

15. The area irrigated compared with that in the previous year and the average of the previous triennium as shown below :—

Crop.	Average of the triennium ending 1917-18.	During 1917-18.	During 1918-19.
First crop	acs. 722,842	acs. 728,378	acs. 718,018
Second crop	3,384	5,678	6,154

The decrease under first crop was due to the unfavourable character of the season. The extent of sugarcane cultivation was 47 acres against 25 acres in 1917-18.

16. The gross revenue exclusive of that due to old irrigation amounted to Rs. 35,81,226, and the working expenses to Rs. 7,08,770. The profits after paying the interest charges amounted to Rs. 23,35,528, which represents a return of 14.13 per cent on the capital outlay against 14.35 per cent in the previous year and 14.02 per cent in 1916-17.

17. The rainfall during the year was much below normal, the south-west monsoon having almost completely failed. The late freshes in the river led to late transplantation. In spite of the great scarcity of water, the bulk of the ayacut was successfully transplanted. On some of the lowlying lands bordering on the Colair lake a second crop was grown in the latter part of the season.

The following table shows the dates of closure and of re-opening of the canals in the delta :—

Canals.	Date of closure.	Date of re-opening.
Eastern Delta canals	7th April 1919	1st June 1919.
Western Delta canals	16th March 1919	1st " "

No. 4. Divi Pumping System.

18. The capital outlay amounted to Rs. 26,962. The following were the more important works carried out during the year :—

- (1) *Improvements to the drainage channel of the Central basin* (Estimate Rs. 22,000).—The work was completed at a cost of Rs. 20,242.
- (2) *Improvements to the drainage of the Uppukalva basin* (Estimate Rs. 19,500).—The expenditure to the end of the year was Rs. 17,377.
- (3) *Improvements to the Sitapathi tank drainage basin.*—The work was completed at a cost of Rs. 5,630 against the estimate of Rs. 7,964.

19. (a) *Extensions and improvements.*—The expenditure under the head amounted to Rs. 1,806 against Rs. 2,054 in the previous year and Rs. 3,301 in 1916-17.

(b) *Maintenance and repairs.*—The outlay was Rs. 76,734, against Rs. 47,378 in the previous year and Rs. 42,401, the average of the previous triennium. The increased expenditure was mainly due to the large amount of pumping necessitated by the poor rainfall.

20. The area irrigated was as shown below :—

Area irrigated.

Crop.	Average of the triennium ending 1917-18.	During 1917-18.	During 1918-19.
First crop	acs. 28,682	acs. 32,139	acs. 31,440
Second crop	4	..	8

The decrease as compared with the previous year is attributed mainly to the prohibition of sivai-jamma cultivation.

21. The gross revenue and working expenses amounted to Rs. 1,58,864 and Rs. 1,12,933 respectively, against Rs. 1,68,415 and Rs. 66,183 in the previous year. The net revenue was Rs. 45,931 which is 2.32 per cent on the capital outlay.

22. The rainfall during the year was very poor being only 18.28 inches, the lowest on record since 1903. In November, however, there was a total fall of 15.51 inches, which saved the crops, as the river was turning brackish at the time, and pumping might therefore have had to be stopped by the 5th November before the crops had fully eared. The first freshes in the river at the pumping station came down on the 25th May and pumping for seed-beds was started on the 5th June. Transplantation commenced on the 4th July and was completed by the 4th September. The level of the river was abnormally low almost throughout the pumping season, which involved, on account of the increased lift, considerable expenditure in liquid fuel. The irrigation season lasted for 152 days against 169 days and 167 days in 1917-18 and 1916-17 respectively. Pumping was necessary for 136 days against

121 days in 1917-18. Owing to the low level of the river there was no direct supply from the river during the season. On 16 days no supply was required for the ayacut.

No. 5. Penner River Canals System.

Capital outlay.

Works in progress.

23. The capital outlay (direct and indirect) amounted to Rs. 11,117, which was incurred chiefly on the following works :—

(1) *Excavating field channels from the branch channel of the Uyyalakalva.*—The work was completed at a cost of Rs. 10,671 against the estimate of Rs. 10,660.

(2) *Excavating a supply channel to the Mudivertipalem tank.*—The work was completed at a cost of Rs. 1,794 against the estimate of Rs. 2,050.

(3) *Constructing a weir in the Nelatur large tank.*—The work was completed at a cost of Rs. 2,154 against the estimate of Rs. 2,150.

(1) *Improvements to the Utukur tank supply channel.*—This work was started during the year under an estimate of Rs. 2,460, the outlay on it being Rs. 1,930.

Working expenses.

24. The expenditure under 'Extensions and improvements' and 'Maintenance and repairs' was Rs. 2,970 and Rs. 60,554 respectively, against Rs. 3,854 and Rs. 56,800 respectively, the averages of the previous triennium.

Area irrigated.

25. The area irrigated compares as shown below :—

Crop.	Average of the triennium ending 1917-18.	During 1917-18.	During 1918-19.
First crop	ACS. 153,637	ACS. 152,694	ACS. 153,384
Second crop	34,637	40,546	38,471

(a) The primary object of the Godavari and Kistna canals is irrigation, from which there is a large revenue besides that from navigation.

Godavari delta .. First crop. 1st June to 30th Nov. Second crop 1st Jan. to 30th April
Kistna delta and Divi Pumping system .. Do. Do.
Pennar river canals .. 1st July to 31st Dec. 1st Jan. to 31st March.
Kurnool-Cuddapah canal .. 1st June to 30th Nov. 1st Dec. to 31st March.
The above information regarding the periods is only very roughly approximate, for there is not any well-marked division between the first and second crops which in many places actually overlap, some of the so-called second crop being planted, while some of the so-called first crop is still on the ground and taking water.
In the case of the Godavari and Kistna deltas the period of irrigation of first crop has been taken to be 183 days though it varied in each delta as below during the year :—
Godavari delta, Eastern Section .. 3rd June to 30th November. Kistna delta, Eastern Section .. 1st June to 31st December.
Do. Central .. 14th May to 30th November. Do. Western .. 1st July to 31st December.
Do. Western .. 1st June to 30th November.
The areas entered in column 7 both seasons are for lands bearing such crops as betel and sugarcane which require irrigation for the greater part of the year. This is included in the areas of first and second crops.
