

33664

ADMINISTRATION REPORT
MADRAS EXCISE DEPARTMENT
FOR THE YEAR 1935-36

1 245
93
ADMINISTRATION REPORT

OF THE

MADRAS EXCISE DEPARTMENT

FOR THE YEAR 1935-36.

CHAPTER I.

ESTABLISHMENT.

Personnel.

Mr. J. F. Hall, C.I.E., I.C.S., was in charge of the department during the year.

2. Statement (1) shows the establishment sanctioned and abolished during the year and the strength at the end of the year. The experiment of converting certain circles which were in charge of Inspectors into sub-circles in charge of Assistant Inspectors which was started in 1931-32 was proceeded with during the year.

3. The total number of punishments inflicted on officers of the department was 245 (240). The percentage of punishment to total strength was 6. It was 5 in the previous year. As usual, the majority of punishments consisted of fines and stoppages of pay imposed on menials for absence without leave.

4. One Sub-Inspector in the Waltair subdivision (Bhadrachalam Agency) was convicted under sections 506 (i) and 823 of the Indian Penal Code and was acquitted on appeal.

One Sub-Inspector of the same subdivision was prosecuted under section 211 of the Indian Penal Code but was discharged under section 253 (1), Criminal Procedure Code. In the Bellary subdivision one Sub-Inspector and two peons were prosecuted under sections 161 and 355 of Indian Penal Code. The Sub-Inspector and peons concerned were discharged.

Resignation.

5. One peon resigned his appointment during the year.

CHAPTER II.

COUNTRY SPIRITS.

6. There was no change in the areas for the contract supply of arrack. The excise duty on arrack was reduced by about 25 per cent throughout the Presidency. The rates of duty per proof gallon with effect from 1st April 1935 were Rs. 8 in nine districts and Rs. 6-8-0 in the remaining districts except special tracts.

7. The issue strength of arrack continued to be 35° U.P. throughout the Presidency except in the case of Agency tracts where it was 60° U.P. In the case of cashew arrack the sale of which was permitted in certain parts of South Kanara district the issue strength was 30° U.P. for a part of the year and 35° U.P. for the remaining part. There was no change in the limits imposed on the private possession of arrack without a licence.

8. The number of wholesale depots was 371 (371). The number of shops licensed for the retail vend of country spirits in the areas under the contract distillery system was 5,579 (5,433). There was on an average one shop for 16,299 (16,367) persons in municipal areas, and for 7,752 (7,969) persons in the areas outside municipal limits.

9. During the year the consumption of country spirits amounted to 963,325 proof gallons as against 811,456 proof gallons in 1934-35, the increase amounting to about 19 per cent. The increase was contributed by the majority of the districts and is to be ascribed mainly to the reduction in the excise duty on arrack, though the rigorous measures taken to suppress illicit distillation, where that class of crime was rampant, were no doubt a contributory cause for the increase. The average incidence of consumption per 100 of the population throughout the Presidency was 2.13 (1.80) proof gallons.

10. The total revenue derived from country spirits decreased from Rs. 123.41 lakhs to Rs. 119.60 lakhs. The decrease of Rs. 3.81 lakhs was the result of a decrease of about Rs. 7.19 lakhs under duty and an increase of Rs. 3.38 lakhs under licence fees.

11. There was no change in the system on which liquor was supplied in the Agency tracts. The number of shops sold under the Central Distillery system in the Jeypore and Parvatipur circles was 115 (115). The consumption during the year was 178,824 (141,665) gallons of 60° U.P. mohwa arrack. Under the outstill system 19 (19) combined shops and still licences were sold for Rs. 23,748 (25,032). In the Nugur and Bhadrachalam taluks the Central Distillery system was continued. The contract for the manufacture and supply of mohwa arrack to the two taluks was granted to Messrs. Fraser and Ross, Receivers and Managers of the Nadar Estate, for a period of three years from 1st October 1935. With a view to suppress illicit distillation crime in those taluks and to place licit liquor within the purchasing power of the Agency people the excise duty was reduced from ten annas in 1934-35 lease to three annas per gallon of 60° U.P. mohwa arrack from 1st October 1935 and a maximum retail selling price of six pies per dram in the arrack shops in this area was also imposed from that date. The effect of these measures was a considerable increase in consumption from 1st October 1935 and a reduction of reported crime. The Koyas who used to resort to illicit distillation were reported to have taken to licit arrack in shops as the price charged was within their means. Thirty-six (36) shops were sold for Rs. 8,976 (32,130) and the consumption was 50,767 (20,625) gallons of 60° U.P. mohwa arrack.

CHAPTER III.

TODDY.

12. There was no change in the rates of tree-tax Rates of tree-tax during the year 1935-36. The following rates were in force:—

Districts.	Coconut palms for each half-year.	Sago palms for each half-year.	Palmyra or date palms for the whole year.	Dadasul for the whole year.
	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.
Ganjam, Vizagapatam (except certain villages), South Kanara and Malabar and the Godalur taluk of the Nilgiris district ..	4 8 0	9 0 0	3 0 0	1 0 0
2 Vizagapatam (certain villages) ..	0 12 0	1 8 0	0 8 0	..
3 Vizagapatam (certain Agency villages) ..	3 12 0	7 8 0	2 8 0	..
4 Agency tracts of East Godavari (areas under the tree-tax system) ..	3 0 0	6 0 0	2 0 0	..
5 All other districts ..	5 10 0	11 4 0	3 12 0	..

13. The limit of private possession of toddy without a licence was half a gallon throughout the presidency except in certain special localities where it was one dram.

14. The total revenue derived during the official year amounted to Rs. 2,21,67,310 (Rs. 2,26,91,845) comprising of Revenue. Rs. 1,24,67,487 (Rs. 1,29,26,569) under rentals, Rs. 96,99,170 (Rs. 97,65,276) under tree-tax and Rs. 653 (nil) under transport duty on Hyderabad toddy.

15. Ten thousand one hundred and forty-six (9,928 *) shops were sold for the lease 1935-36. The following comparative statement shows the number of trees marked during the last three years:—

Toddy year.	Coconuts.	Palmyras.	Dates.	Sagos.	Total.
1933-34 ..	995,741	538,316	627,265	3,333	2,164,655
1934-35 ..	1,003,338	560,919	642,203	3,563	2,209,023
1935-36 (up to July 1936) ..	927,765	528,162	632,789	3,214	2,091,930
1934-35 (up to July 1935)* ..	1,003,163	545,163	606,041	3,554	2,157,923

Reduced to terms of coconuts by the application of the formula, 2 coconuts = 3 palmyras = 3 dates = 1 sago, the consumption for the toddy year 1934-35 is represented by the figure 1,805,879 (1,779,461) and that for the first ten months of the toddy year 1935-36 by 1,708,160 (1,777,742).

16. The number of trees tapped for fermented toddy for domestic consumption was 57,128 (64,926) of which 51,246 (60,006) trees were tapped by the 'Koyas' in the Agency tracts. The decrease in the number of trees tapped by the Koyas is reported to be due to the lack of trees on lands belonging to the 'Koyas' and to the fact that many of the 'Koyas' lost possession of their lands on account of the large

* Revised figures.

arrears of rent which they owed to the Zamindar of Polavaram. The restriction of the concession of tapping by the Koyas to trees standing on lands in the enjoyment of Koyas or belonging to the Government has been temporarily suspended in ten villages in the East Godavari Agency.

17. During the year 3,481 (nil) gallons of toddy were transported from Hyderabad through the Hospet Railway Chowkie for the toddy shop at Kurugodu, Bellary circle. The imports have ceased since January 1936.

18. The number of trees tapped in British territory for the toddy shops in Mysore and Pudukkottai States was 13,272 (10,518). Five thousand two hundred and sixty-eight (5,537) trees were tapped in those States for toddy shops in the British territory. Nobody availed himself of the concession to mark trees in the Cochin State for British shops and vice versa.

19. The sweet juice rules were in force in the East Godavari (ordinary areas and the tree-tax areas of the Agency) and West Godavari districts and in the Repalle and Bapatla taluks of the Guntur district. In those areas licences were issued free of fee to sweet toddy tappers. In the tree-tax areas of the East Godavari Agency the sweet juice industry was carried on only in Polavaram taluk. Sixty-nine (67) licences were issued in that taluk for 4,140 (4,020) trees. The rules relating to sweet toddy worked satisfactorily. In the rest of the Presidency tapping for sweet juice was not under control.

20. During the year the tree-tax system was in force in 39 villages of the Gudum taluk of the Vizagapatam Agency. In the East Godavari Agency it was in force in the whole of Polavaram taluk, 147 villages of Yellavaram, 121 villages of Chodavaram, 44 villages of Bhadrachalam and 17 villages of Nugur taluks.

Two shops were sold under the farming system in the Parlakimedi Maliahs of the Ganjam Agency for Rs. 588 (Rs. 492).

CHAPTER IV.

FOREIGN LIQUOR.

21. The rate of duty on Indian-made foreign spirits remained unaltered at Rs. 21-14-0 per proof gallon. The rate of duty on beer brewed in India was reduced from 12 to 10 annas a gallon with effect from 1st April 1935. On imported beer the standard rate of Rs. 1-2-0 per gallon and the preferential rate of 14 annas per gallon introduced in consequence of the Indian Tariff (Ottawa Trade Agreement) Amendment Act, 1932, continued to be in force. The rate of duty on imported spirits also continued at Rs. 37-8-0 per gallon.

22. A comparative statement showing the consumption of foreign liquor including Indian-made foreign spirits and beer is given below :—

	1912-13.	1934-35.	1935-36.
	GALLONS.	GALLONS.	GALLONS.
Wines (excluding medicated wines) ..	27,265	16,242	15,952
Spirits	146,044	94,976	89,859
Beer	581,465	706,981	678,820
Denatured spirits	19,557	192,829	197,307
Methyl alcohol	..	1,368	1,253

There is a decrease under all the heads except Denatured spirits. The consumption of imported spirits shows a slight increase 65,608 (65,261). The decrease under the other heads is attributed to the general economic depression.

The consumption of beer brewed in India shows a considerable fall 193,133 (218,611). In spite of the reduction of the excise duty from 12 annas a gallon to 10 annas a gallon it has not been able to compete successfully with the cheaper varieties of imported beer—especially Japanese beer—placed on the market. As the reduction in duty did not in any way benefit either the Government or the consumer and as it did not help to replace cheap imported beer by Indian beer, the duty was restored to the old rate of 12 annas a gallon with effect from 1st April 1936.

The increase in consumption of denatured spirits is due to the more extensive use of the spirit for petromax lights and spirit stoves.

The issue of beer from the two breweries in this presidency was 193,263 gallons against 217,859 gallons in 1934-35. The quantity of beer exported to places outside the presidency was 3,623 (4,451) gallons. The issues of beer to licensed vendors in this presidency from the Bangalore brewery amounted to 13,619 (15,811) gallons. A statement showing the quantity of beer manufactured in the three breweries is appended (Statement E-1).

23. The quantity of foreign liquor imported by sea shows a slight increase 656,834 (681,527).

24. The rate of duty on spirit contained in medicinal preparations, culinary, aerated water and other flavouring essences, extracts, colourings, perfumes and toilet preparations manufactured in bond in this presidency remained unaltered at Rs. 5 per proof gallon. The duty on spirit contained in medicinal preparations and the duty on culinary, aerated water and other flavouring essences, extracts, colourings, perfumes and toilet preparations, manufactured elsewhere in India and imported into this presidency by land or underbond by sea continued to be Rs. 10 and Rs. 17-8-0 per proof gallon respectively. In G.O. Ms. No. 2522, Revenue, dated 25th October 1935, the duty on spirit contained in certain medicinal preparations was raised with effect from 1st November 1935 to Rs. 17-8-0 per proof gallon whether manufactured in bond in this presidency or manufactured elsewhere in India and imported into this presidency by land or underbond by sea, as a precautionary measure against the preparations being used as flavouring essences.

In the pharmaceutical laboratories of Messrs. Spencer & Co., Ltd., Madras, the Karnataka Chemical and Pharmaceutical Works, Limited, Udipi, and the Alumbic Chemical Works Company, Limited, Madras, and in the special bonded warehouse of Messrs. McDowell & Co., Ltd., Madras, work was in progress during the year. Though the licence of the pharmaceutical laboratory of Messrs. A. S. R. Murthy & Sons, Madras, was renewed for the year, there were no issues of spirituous medicinal preparations from the laboratory during the year. The duty realized on the spirituous preparations issued from these manufacturing firms is given below :—

	Spirituous medicinal preparations		Other spirituous preparations	
	1934-35.	1935-36.	1934-35.	1935-36.
	RS.	RS.	RS.	RS.
The Alumbic Chemical Works Company, Limited ..	17,275	22,150	..	..
Messrs. Spencer & Co., Ltd.	4,448	3,472	543	918
The Karnataka Chemical and Pharmaceutical Works, Limited.	1,858	599	..	..
Messrs. McDowell & Co., Ltd.	..	..	2,245	2,527
Messrs. A. S. R. Murthy & Sons ..	221	..	..	..
Total ..	23,802	26,230	2,843	3,445

The amount of duty realized on the preparations manufactured in this presidency has increased. The duty realized on spirituous preparations imported from Bengal and other places undebanded by sea amounted to Rs. 53,978 (53,157).

25. There were 66 clubs which supplied foreign liquor to their members during the year. A sum of Rs. 7,222 (6,879) was realized as fees from them.

26. A licence fee at the rate of 8 annas per gallon of denatured spirit and methyl alcohol consumed continued to be levied during the year. A sum of Rs. 51,572 (50,196) was realized on this account.

27. The number of licences for the sale of foreign liquor for consumption on the licensed premises (E.L. 5 and F.L. 5-a) was 19 (18) and the number of beer shops (F.L. 6 and F.L. 6-a) was 26 (27). The rentals of the taverns increased from Rs. 1,87,209 in 1934-35 to Rs. 1,88,604 in 1935-36 and the rentals of the beer shops increased from Rs. 1,69,416 to Rs. 1,85,544. The number of licences for the retail sale of foreign liquor for consumption off the licensed premises (F.L. 2) was 160 (156).

Two hundred and forty-seven (236) licences were issued during the year for the sale of foreign liquor at entertainments, 251 (269) for the sale of medicated wines and similar preparations, 66 (68) for hotels, refreshment rooms and bars, 79 (77) for railway refreshment rooms and dining cars and 60 (56) for the sale of brandy by chemists (F.L. 3). The number of special and private licences issued was 23 (31). Twenty-two (27) methyl alcohol licences and 1,237 (1,033) denatured spirit licences were issued.

Revenue.

28. A comparative statement showing the revenue derived from the principal kinds of liquor is given below :—

	1934-35.	1935-36.
	RS.	RS.
1. Excise duty—		
Indian made foreign spirits	5,80,739	5,78,312
Beer brewed in India	1,85,671	1,30,051
2. Rentals—		
Foreign liquor taverns and beer shops ..	3,56,077	3,74,148
3. Other—		
Foreign liquor licences, licence fees on denatured spirits, etc.	1,70,098	1,79,292
Total ..	12,92,585	12,61,803

CHAPTER V.

OPIUM.

29. The issue price of opium remained at Rs. 80 per seer. The limit of private possession continued to be one tola in the ordinary tracts and two tolas in the Agency tracts.

30. Five hundred and sixty-three (562) shops were sold for the year for Rs. 9.25 (9.78) lakhs. One hundred and eighty-two (181) shops were working under restriction of supplies.

31. The consumption of raw opium amounted to 28,034 (28,567) seers, i.e., 533 seers less than in 1934-35.

32. Seventeen seers and fifty-two tolas (21 seers and 44 tolas) of raw opium, and opium preparations containing 1 oz. and 44 grains of opium were sold by licensed vendors for veterinary purposes. Opium preparations containing 11 lb. 7 oz. and 125 grs. of opium were used by the officers of the Government Civil Veterinary Department.

33. The revenue derived from opium amounted to Rs. 32.42 (34.52) lakhs, of which Rs. 9.25 (9.78) lakhs represented shop rentals. The sale-proceeds of opium amounted to Rs. 23.10 (24.60) lakhs.

34. There were no issues of opium to Mysore during the year under report. The issues of opium to Travancore were 2,000 (4,000) seers, to Cochin 1,300 (1,300) seers and to Pudukottai 80 (60) seers. The issues to French establishments were 207 (220) seers. Ten (14) seers of opium were issued to Coorg.

35. The retail selling price of opium in the Agency tracts of Ganjam, Vizagapatam and East Godavari districts continued to be Re. 1-2-0 per tola or Rs. 90 per seer. In the ordinary tracts the retail price varied from Re. 1-4-11 to Rs. 2-6-7 per tola or Rs. 104-10-8 to Rs. 192-14-0 per seer.

Practice of administering opium to children—adoption of new measures to check or discourage.

36. No new measures were adopted by the Education or Health Department during the year to check or discourage the practice of administering opium to children.

COCAINE.

37. The transactions in cocaine and its preparations were conducted under M-1 and M-2 licences. Two hundred and fifty-seven (257) licences were issued. The total sales amounted to 2 lb. 14 oz. and 29 grs. (3 lb. 1 oz. and 388 grs.). The retail sales were 1 lb. 4 oz. and 91 grs. and the wholesale sales 1 lb. 9 oz. and 372 grs.

CHAPTER VI.

HEMP DRUGS.

38. The cultivation of ganja was restricted to Santaravur in the Guntur district where 71 (40) licences were issued for cultivation on 310 acres and 5 cents (173 acres) of land. The outturn was 1,404 maunds, 23 seers and 65 tolas of ganja and 190 maunds of bhang, giving an average outturn of 4.5 (4.6) maunds of ganja per acre.

39. The botanical investigation which was started in 1928-29 but which was suspended during 1934-35 was conducted in the year under report in the Santaravur centre. During the year no new scheme of scientific work was undertaken, and the investigation was confined mainly to local cultural problems. The results of the investigation conducted during a period of seven years have clearly established the fact that the hemp plant responds best to intensive methods of cultivation as an 'irrigated dry' crop.

40. The rates of duty on ganja and bhang continued to be Rs. 27-8-0 and Rs. 12-8-0 per seer respectively during the year. The limits of private possession also remained unaltered.

41. Four hundred and sixty-two (460) shops were sold for the year, of which 157 (156) shops were sold subject to restrictions on supplies. One shop in the Tanjore district the supply to which was restricted could not be disposed of in auction and was worked for a part of the year on a commission basis.

42. The consumption of ganja and bhang and their preparations amounted to 40,340 (44,586) seers. Forty (80) seers of bhang were issued to the Government of Central Provinces and Berar and 9 seers to the shops in the Civil and Military Station, Bangalore. The total revenue derived from hemp drugs amounted to Rs. 18.95 (20.36) lakhs. There was a decrease of Rs. 0.32 lakh under rentals and Rs. 1.10 lakhs under duty.

43. There was no manufacture or sale of ganja and oil or bhang in the Vetapalem store-house during the year.

CHAPTER VII.

REVENUE.

44. The total revenue (demand) [column (3) of Statement A] is compared in the following table with that of the previous year:—

Head of revenue.	1934-35.	1935-36.	Increase.	Decrease.
	RS.	RS.	RS.	RS.
1 Country spirits (including distilleries)	1,23,40,800	1,19,60,083	..	3,80,717
2 Country fermented liquor.	2,26,91,845	2,21,67,310	..	5,24,535
3 Malt liquors	3,54,578	3,15,625	..	38,953
4 Wines and spirits (foreign liquor other than beer, medicated wines and commercial spirits)	9,34,777	9,43,218	8,441	..
5 Commercial spirits (including medicated wines)	3,230	2,960	..	270
6 Hemp drugs	20,36,432	18,94,917	..	1,41,515
7 Opium	34,51,852	32,42,345	..	2,09,507
8 Fines and forfeitures	3,44,589	3,56,408	11,819	..
9 Miscellaneous	1,01,942	97,006	..	4,936
Total	4,22,60,945	4,09,79,872	20,260	13,00,433

The total collection for the year amounted to Rs. 4,10,00,968 (4,22,94,274). A sum of Rs. 65,962 was written off as irrecoverable.

45. The total expenditure during the year amounted to Rs. 35,19,903 (33,74,110) details for which will be found in Imperial Return II. The net percentage of charges to receipts was 8.6 (7.9).

46. The incidence of the total excise revenue per head of population was Re. 0-14-0 (0-14-6).

47. The collection of the abkari and opium revenue in the enclaves of Anjengo and Tangasseri continued to be in the hands of the Travancore Government during the year. An amount of Rs. 7,900 was collected from the Travancore Government as rents for the privilege of collection in the two enclaves and was credited to the accounts of the Madras Government. The details for this sum are to be found in the Imperial Return I.

CHAPTER VIII.

OFFENCES.

48. The total number of cases under the Abkari Act during the year was 24,576 (23,164). The increase was mainly under illicit distillation and kindred offences, unlicensed sales and possession without licence.

49. Five thousand seven hundred and fifteen cases (5,421) of illicit distillation and kindred offences were detected. The increase occurred noticeably in Ganjam 1,087 (745), Cuddapah 445 (426), Anantapur 299 (219), Bellary 836 (257) and Salem 471 (361) and the decrease in East Godavari 216 (426), Guntur 187 (275), Kurnool 342 (373) and South Arcot 91 (135).

The increase in the Ganjam district was contributed mainly by the Chicacole circle. It is reported that illicit distillation is rampant generally in the Ceded districts and that particularly in Cuddapah district this has become the recognized subsidiary occupation of whole villages. With the help of the special armed staff sanctioned for the two circles in this district, systematic raids were conducted by the Inspectors with good results. It is hoped that the situation will soon be brought under better control. The increase in the number of illicit distillation cases in the Salem district was marked in the Sankari circle 222 (143). Earnest efforts were made in most of these cases to get at the root of the crime by detecting persons in the very act of distillation. The decrease in the other districts is attributed to better control during the previous year.

The increase in the number of cases under unlicensed sales and possession of country spirits was due to the special attention paid to this class of crime in the areas in which they existed.

50. The number of cases detected under illicit manufacture of toddy showed a fall 8,824 (9,153). The decrease was mainly in East Godavari 695 (755), Coimbatore 581 (648), Malabar 1,128 (1,187) and Madras 50 (148). The decrease in Malabar under illicit tapping was chiefly in the Palghat circle 488 (583) which was reported to be due to the late spathing of palmyras and to the deterrent sentences inflicted. In Madras there was no real fall, because the figures of detection under this head rose in 1934-35 owing to an outbreak of illicit tapping in Saidapet range. The decrease in other districts was due to the greater efforts made to check illicit tapping.

Admixture of sweet toddy with fermented toddy was prevalent to a very large extent in Tinnevely and portions of Ramnad and to some extent in south Kanara, Malabar and Coimbatore. In order to safeguard the revenue under the tree-tax, special instructions have been issued to effect closer control of shops, but the admixture of sweet toddy with fermented toddy is so widespread that it will be some time before this form of crime can be suppressed.

51. There was an increase in the number of hemp drug offences 726 (615) chiefly under smuggling 59 (32), unlicensed sales 323 (245) and possession without licence 224 (183). The increase in smuggling occurred mainly in Hosur circle of Salem 37 (14) and Hospet circle of Bellary 10. Smuggling of ganja from Mysore has shown a tendency to increase largely because of the poor quality of Madras ganja. Despite the efforts of the police and the local staff hawking of ganja continued to increase in the City of Madras 145 (101).

52. Cases convicted under the Dangerous Drugs Act are embodied in statement J.I.

53. Enquiry into cases by departmental officers was generally prompt and efficient. In five hundred and fifty-four cases (645) the accused persons were released and in 11,424 (12,504) cases the offences were compounded. Eleven thousand two hundred and forty-eight (9,009) cases were dealt

with by the Magistrates. Convictions were obtained in 9,756 (7,990) cases and 214 (189) cases ended in acquittal. One thousand two hundred and sixty-eight (920) cases were pending with the Magistrates at the end of the year.

54. A sum of Rs. 36,909 (29,435) was paid as rewards during the year.

55. The Excise supplement to the Criminal Intelligence Gazette was regularly issued.

56. Twenty cases of assaults on Excise officers and peons were reported during the year. One of them in the Kasargod circle was of a very serious nature. The Sub-Inspector sustained grievous hurt and his peon succumbed to the injury on the spot. The accused was awarded capital punishment.

CHAPTER IX.

LABORATORY.

57. The total number of samples analysed and articles examined during the year under review was 2,866 (3,007).

58. Seven hundred and seven (869) samples of country arrack were examined during the year. The results of the analysis of the samples of liquor received for periodical examination were found to be generally satisfactory, and in some samples there was a noticeable diminution in the acid content and the extent of copper contamination samples received from 6 out of the 10 pot-still distilleries indicating freedom of the distillate from copper. During the year 598 (771) samples of weak liquor taken periodically from the pot-still distilleries were examined for copper, of which 262 (108) were found to be free from copper; 154 (315) were found to contain copper within the permissible limit of 0.25 grain per gallon, while in 168 (315) there was over 0.25 grain and in 14 (33) over 1 grain of copper per gallon. Excessive copper contamination was noticeable in the samples received from Chowghat, Tachanallur Old and Bhadrachalam Distilleries. Fifteen samples of arrack suspected to be of illicit manufacture were examined, and of these, 4 were declared to be illicit. Forty-two samples of arrack from stocks suspected to be diluted and seized at certain depots and shops were examined and found to be diluted in the majority of cases. A sample of arrack suspected to be an admixture of denatured spirit received from the Inspector, Vellore Circle, was found on examination to be free from denaturants.

59. One hundred and forty-two (135) samples of beer, wort and wash were examined during the year. Of the 18 samples of wort received for periodical analysis from the Breweries, the original gravity of one of the samples was found to have been declared at 1.5°, while that of another at 3.8° higher than the true original gravity. The qualitative analysis of all the samples disclosed a high grade of manufacture. One hundred and nine samples of beer submitted by Inspectors on suspicion of being diluted were examined and 2 samples were found to be free from dilution.

while the other 107, diluted, the extent of dilution exceeding 10 per cent in 22 cases. In one instance, the extent of dilution noticed was 33.4 per cent. To bring home the offence of dilution, as an experimental measure, a comparative analysis is now being made of the samples taken by inspecting officers from beer under sale at shops with samples of the same beer taken from the respective casks at the time of issue from the breweries. A sample of beer received from the Inspector, Dindigul Circle, was found to be highly acid and was declared to be unfit for consumption, while another sample of Japanese beer (Pilsener beer—Star brand) was examined for concoction of material ingredients and it was found to be free from alkaloids and thurst producing agents. Two samples of spent wash taken from two distilleries were examined and found to be free from spirit. Nine samples of wash received from certain distilleries were examined for acidity and except in two cases, the acidity of the samples was found to be normal.

60. The number of samples of toddy analysed during the year was 1,157 (1,069). As in previous years, the Trichinopoly subdivision sent the largest number, 696 (641) or 60 per cent of the total number examined and the West Coast subdivision comes next, having sent 365 (351). The number of samples that contained more than 10 grains of lime per gallon was 760 (791) of which 72 samples contained more than 100 grains of lime per gallon.

61. Nineteen (16) samples of foreign liquor were tested. Of these, 13 samples were found to be weaker than the minimum strength prescribed for the sale of foreign liquor. Five samples of imported foreign liquor were examined for quality and they were found to be immature spirit of inferior quality.

62. The number of samples of opium and its preparations including morphia drugs examined during the year was 91 (82). Of these, 65 samples were prepared opium received for examination in connexion with offences under the *Dangerous Drugs Act*. Two samples of opium seized by the Excise Intelligence Bureau were examined and found to be of Ghazipur manufacture.

63. Thirty-nine (83) samples of ganja and preparations containing Indian Hemp, were received during the year. The fall is due to the fact that no sample was received from the Ganja Special Botanist in connexion with his investigation into the life history of the plant and approved methods of culture. Two lots of ganja cakes taken from 1936 crop, were received and on examination the first lot of 4 cakes was found to be hard and well-pressed and of average quality, while the second of 5 cakes manufactured during a period when the normal operations were interrupted by rains, was comparatively low in resin value. One sample of ganja received from the Inspector, Palghat Circle, was examined and found to be illicit ganja of poor quality. A sample of beedies received from the Assistant Inspector, Namakkal Sub-circle, was found to contain Bhang. Twelve tins containing laghium received from the Second Presidency Magistrate, Georgetown, were examined and Indian Hemp was identified in the contents of each of the tins. Samples of

laghiums were also received from Inspectors, of the Sankari, Villupuram and Madras Town Circles and all of them were found to contain Indian Hemp. It has been found that Beam's test for indicating presence of "*Cannabis Indica*" in the preparations of Indian Hemp, as detailed in standard works of reference, is not quite positive and the reaction in the test not distinct in the case of samples which contain the drug in very small quantities mixed with other drugs similar in their Botanical aspects, oils and fats. A series of experiments conducted in the Laboratory disclosed that the same test can be employed with more definite results in the identification of "*Cannabis Indica*" though present in very small quantities, by modifying the process described, i.e., by passing dry Hydrogen chloride into a Petroleum ether extract of the drug mixed with an equal quantity of absolute alcohol nearly saturated with dry Hydrogen Chloride. By this modification of the method it was noticed, that on passing dry Hydrogen Chloride, the liquid separates into two distinct layers, the bottom layer showing in great relief the cherry red colour, the intensity of colour depending upon the quantity of the active principle of the drug. By this process "*Cannabis Indica*" was identified in a number of samples containing the drug in very small quantities which by the ordinary process could not be definitely identified. Of the two consignments of confiscated ganja received from the Salt and Customs Department for disposal, one weighing 27 lb. and 15½ oz., was found to be illicit ganja and hence it was destroyed. Of the other consignment 549½ tolas were found to be of average quality while 79 tolas were of poor quality which had been subjected to the ravages of moths. The stuff was destroyed as not being fit for consumption.

64. The samples of water received for the two half-years, ending 31st May 1935 and 30th November 1935, from all the Miscellaneous Distilleries, Warehouses and Breweries, were found generally to be free from abnormal impurities, except in the case of the one submitted for the second half-year, from the Cuddapah Warehouse well. As this sample contained a large amount of total solids, it was not passed for use in reducing spirit. Fifty-five dram measures and 23 gallon measures suspected to be short of standard capacity, were tested and of these, excepting 4 dram measures and 2 gallon measures, the others were found to fall short of the standard capacity. Two dram measures received from the Inspector, Nellore Circle, were found to be counterfeit ones. A batch of six grades of paints (red and black) were examined to determine their suitability for marking trees and the best qualities were selected. Two samples of Mohwa flowers received from the Agency Distilleries and a sample of molasses received from the Distillery Officer, Tachanallur New Distillery, were examined and found to be of fairly good quality. Twelve samples of Pyridine and nine samples of Caputchoquine were examined and passed for use as denaturants. Five samples of wood naphtha were also examined and passed for use in the methylation of potable spirit. Five samples of essences to be used in compounding spirits were examined and the proportion in which they should be used in the compounding of Indian-made foreign spirits was fixed in each case. A shrub said to have been soaked in toddy apparently to increase the

intoxicating effect of toddy, received from Inspector, Penukonda Circle, was examined and found to be 'tippatigo' heartleaved moonseed. Two samples of margosa toddy received from the Inspector, Chingleput Circle, on two occasions, were examined, and one of them submitted for test nearly three months after the date of drawing the toddy was found to be free from spirit but highly acid, while the other which was a fresh sample submitted immediately the toddy was drawn, was found to contain 3.7 per cent proof spirit. A packet containing broken seeds and fibrous matter obtained from the residual matter in a sample of toddy was received from the Inspector, Vizianagram Circle, and on examination was found to give reaction for 'saponin' which is found in the fruits of the various species of 'sapindus' or soap-nut tree. Three hundred and ninety-eight (482) instruments (266 Hydrometers, 124 Thermometers and 8 Saccharometers) were received during the year for repairs, test and standardization. Of these 26 Hydrometers, 6 Thermometers and 1 Saccharometer were found to be unserviceable and were condemned.

65. During the year under review, a quantity of 22 seers of confiscated opium of the value of Rs. 1,760 was repressed into half seer cakes and supplied to the Madras Taluk Office for issue to licensed shops.

66. A Distillery School was held in the year under review and as a part of the course a class was held in the Laboratory for a period of 18 days when the officers under training were instructed with experimental demonstration in Elementary Chemistry with special reference to carbo-hydrates and alcohol, principles of fermentation and distillation, experimental determination of sugar and spirit values, application of results of analysis in Distillery practice, standardization of weights and measures and testing of instruments.

Statement showing the number of samples analysed in the Laboratory, during 1935-36.

	1935-36.	1934-35.
1 Samples of toddy tested for lime	1,157	1,069
2 Samples of foreign liquor	19	16
3 Samples of country arrack	707	869
4 Samples of beer, wort, etc.	142	135
5 Samples of intoxicating drugs, viz., Ganja and its preparations, Cocaine and its preparations	39	83
6 Samples of opium and its preparations including morphine and its salts	91	82
7 Samples of denaturants (Pyridine, Caoutchoucine and wood naphtha)	26	28
8 Instruments repaired and standardised	398	482
9 Dram and other measures tested and standardised.	78	27
10 Miscellaneous samples—Caramel, water, essences, spirituous preparations, etc.	219	216
Total	2,661	3,007

CHAPTER X.

GENERAL.

67. The circumstances which rendered it necessary to reduce the duty on country spirits by about 25 per cent from 1st April 1935 were set out in detail in paragraph 72 of the previous year's report. The

figures of consumption of arrack in the year under report and in the preceding five years were as under:—

Year.	Consumption in proof gallons.
1930-31	1,210,221
1931-32	986,633
1932-33	934,225
1933-34	827,708
1934-35	811,456
1935-36	963,325

The figures for 1935-36 represent an increase of 19 per cent over those for the previous year. The increase was due largely to the reduction in 'excise' and partly also to the general stiffening of control over the work of the preventive staff with special reference to the detection of crime. The consumption of licit liquor would have been greater than it was if the full benefit of the reduction in duty had been passed on to the consumer. This was not the case in some parts of the Presidency, especially in certain large towns where renters continued to maintain the old high prices, thus profiteering at the expense of both the Government and the consumer. There is no doubt, however, that the reduction in duty has arrested the tendency for the consumption of licit liquor to decrease. The financial effect of the reduction was an increase of about Rs. 3 lakhs under rentals in the areas under the contract distillery system and a decrease of Rs. 7 lakhs under duty, or a net decrease of Rs. 4 lakhs in the total arrack revenue under rentals and duty in those areas. Though the reduction in duty may not have had any marked effect on illicit distillation and cognate offences, in some areas there seems no doubt that licit liquor is taking the place of illicit. Nevertheless successful raids conducted by Inspectors in various parts of the Presidency showed only too clearly that crime was still very widespread. The disparity between the prices of the licit and illicit liquor is very great and it is impossible to bring the price of licit liquor anywhere near to that of illicit by reduction of the excise duty. Illicit distillation crime, which has assumed serious proportions in recent years, must be suppressed by continued vigilance on the part of the preventive staff and the close co-operation of the magistracy on whom the department relies to inflict deterrent punishments when cases of excise crime are proved.

68. One of the results of the policy of effecting radical reduction in the number of shops which was pursued in the past has been a change in the class of persons interested in the liquor trade. It is the common experience throughout the presidency that a large number of small shops usually managed by the actual renters have been replaced by a comparatively small number of big shops largely controlled by financiers who have no interest other than a financial one in the working of shops. The disadvantages of such a system which were realized as early as 1926 have been accentuated during the last nine years. Experience of the auction sales of shops held during the year 1935-36 revealed that the shops in several important towns were being worked as a local monopoly and that there was not sufficient competition at the auctions to enable the Government to secure the full rental

value for shops. Lack of competition has also tended to force up the retail prices and encourage illicit practices as a result of which illicit liquor is provided at a much cheaper rate than licit liquor to the detriment of the Government revenue, and licit liquor is provided in illicit places also to the detriment of the Government revenue. In numerous places regularly established illicit shops were brought to light. It became necessary therefore to devise adequate measures to cope with the situation. Steps have now been taken to provide adequate licit sources of supply in areas where their absence was proving a direct incentive to crime, and, with a view to control prices, Collectors have been instructed to reserve one or two arrack shops in important towns as "key" shops for being worked under 'amani' or the 'surcharge' system in case the attempts to dispose of shops by the usual method prove infructuous on account of local monopoly or combination. Such 'key' shops are being worked under the 'surcharge' system in three municipalities in the current year. Failure of the individual auction of toddy shops in the year under report in some parts of the Presidency made it necessary to resort to the system of group sale subject to the condition of marking of a prescribed number of trees to protect the interests of both the Government and the consumer. Experience has shown that there are disadvantages to these group sales, and they are only being resorted to where circumstances make this absolutely essential.

69. In pursuance of repeated representations that a section of the population of the South Kanara district strongly desired cashew arrack, it was proposed to the Government that an experiment might be made by which licit cashew arrack would be put on sale in the Mangalore taluk at much the same price as the licit molasses arrack supplied to that district. The object of the experiment was to test whether there was a real demand for cashew arrack in the Mangalore taluk where, it was understood, the demand was greatest and most constant, and to test the correctness of the claim that cashew arrack was genuinely required by the public more for its inherent qualities than for its cheapness as an illicitly distilled and therefore untaxed article of consumption. The proposal was sanctioned by the Government and it was arranged with Messrs. Parry and Co., the contract suppliers for the district, that they should distil as much cashew arrack as they could during the cashew season, March to May 1935 in the Chowghat distillery and supply it through their warehouse at Mangalore for sale in the arrack shops of Mangalore town and taluk side by side with molasses arrack during the year under report. The issue strength of cashew arrack was prescribed as 30° U.P. and the duty was fixed as Rs. 4-8-10 per gallon of that strength. Under this arrangement a total quantity of 10,917 gallons of 30° U.P. was manufactured by the distillers and made available for sale. The demand for licit cashew arrack was heavy during the early part of April 1935 when it was more or less a novelty, but the demand decreased considerably after that, and the extension of the arrangements for the sale of such arrack to certain other taluks of the same district produced no appreciable effect on the disposal of the large quantity of cashew arrack in stock. The

demand for molasses arrack continued to be as keen as ever and the expectations with which the experiment was undertaken were not realized. With a view to stimulate the sale of cashew arrack by marketing it at the same strength and price as molasses arrack, the issue strength was reduced to 35° U.P. and the duty was fixed as Rs. 3-12-4 per gallon of that strength in the course of the year under report. The demand, however, continued to be poor which rendered it unnecessary to undertake further distillation of cashew arrack during the cashew season of 1936. The consumption in the Mangalore circle which amounted to 1,346 gallons of 30° U.P. in April 1935 decreased to 110 gallons of 35° U.P. in March 1936. The introduction of cashew arrack has also had no effect on illicit distillation crime in the district and there is little prospect that cashew arrack will become so popular as to be preferred to molasses arrack. The sale of such arrack from the old stock is however being continued in the current year.

70. The system of sale of molasses arrack in sealed bottles introduced from 1st April 1933 in Mangalore town cannot be said to have attained as much popularity as was expected. The sale in bottles amounted to 68.25 proof gallons against 77.3 proof gallons in the previous year, which represents but a very small fraction of what was sold on draught in shops. The comparatively high price of a bottle, despite its reduction from 3 to 2½ annas, was mainly responsible for the poor demand for bottled arrack. The system of sale in bottles was adopted for cashew arrack also, but the position was in no way better in respect of that.

71. The experiment of closing arrack shops in toddy-drinking areas was continued in the year under review in the Shiyali and Tiruturaipundi taluks of the Tanjore district and in the Tiruvadanai and Paramakudi taluks of the Ramnad district. No grave crime was noticed in these areas.

72. The orders forbidding the sale of liquor of any kind to any member of the hill tribes on the Nilgiris except on a medical certificate continued to be in force during the year. The consumption in that area, of the various classes of liquor during the last five years is set out below:—

Year.	Country spirits.	Wines.	Spirits.	Beer.
	PROOF GALLONS.	GALLONS.	GALLONS.	GALLONS.
1931-32	10,230	2,304	10,625	133,133
1932-33	8,989	1,876	7,476	102,812
1933-34	9,103	1,844	8,324	99,931
1934-35	9,090	2,024	8,567	99,750
1935-36	9,009	2,014	8,192	116,116

Under the orders of the Government, a detailed investigation was made by the Collector during the year to ascertain whether the experiment had been attended with a sufficient measure of success to justify its continuance. The result of his enquiries among Planters, certain Hindu gentlemen who took the lead in pressing for the introduction of the experiment in 1924, a number of Badaga villagers, etc., only

confirmed what was already evident, namely that prohibition as at present worked had been successful, if at all, only in a minor degree. Drink was easily purveyed through intermediaries to the members of the hill tribes both from Mettupalavam and from the liquor shops in the district—in Ootacamund and Kotagiri and was consumed in tea shops especially in Ootacamund on market days.

Temperance Societies.

73. No temperance work of importance was done by private associations.

74. The number of meetings of the Excise Licensing Boards and Excise Advisory Committees which had to be adjourned for want of quorum was 28 and 38, respectively. The recommendations of these bodies and the action taken thereon are embodied in Statement B. The Excise Licensing Board, Madras, met nine times during the year.

In areas where there were no Licensing Boards or Advisory Committees, the Collectors, either on their own initiative or on the recommendations of the local bodies, etc., ordered the closure of 7 shops and changed the sites of 25 shops.

75. In 19 districts arrack shops were closed during important festivals, fairs and market days. Restrictions on hours of sale were enforced in respect of the arrack and toddy shops in the vicinity of the Buckingham and Carnatic Mills in Madras City.

76. Statement B-1 shows the number of shops newly opened in the localities concerned.

77. There were 7,635 (8,796) convictions for offences of which drunkenness formed a part in places in which the Town Nuisances Act was in force. The number was 2,467 (2,992) in the Madras City.

P. K. R. MENON

Assistant Secretary to the Commissioner of Excise
