(d) *Beds*.—The beds provided for in-door patients in hospitals of classes I, III and IV were 10,986 (6,205 men and 4,781 women) in 1936. The need for additional beds was keenly felt in many of the hospitals during the year.

(e) *Out-door patients*.—In all classes of medical institutions 16,032,812 patients were treated consisting of 7,482,765 males, 4,022,425 females and 4,527,622 children as against 16,570,958 (7,788,602 males, 4,015,155 females and 4,767,201 children) in the previous year.

(f) *Daily average*.—The daily average number of in- and out-door patients treated in medical institutions of classes I, III, IV and VII during the year was 11,656.03 and 109,226.04 respectively while the same during the previous year was 11,244.20 and 112,479.96 respectively.

6. *Statement D*.—This statement indicates the diseases treated among in- and out-door patients in all the medical institutions in the Presidency, during the year and the following accounted for the largest number:—

Diseases of the respiratory system other than pneumonia and tuberculosis	1,235,295
Diseases of the digestive system	1,192,351
Diseases of the eye	1,169,367
Ulcerative inflammation	1,138,544
Diseases of the ear	1,124,431
Malaria	999,612
Diseases of the skin excluding tumours	859,021
Scabies	778,461
Diseases of the intestines	740,301
Pyrexia of uncertain origin due to infection	718,102

7. *Statement E*.—The number of operations performed in the medical institutions during 1936 was 614,079 on 599,617 patients. The secondary operations performed on them were 14,462. The number of deaths was 1,549. The ratio of deaths per cent to total operations works out 0.25 as against 0.27 during 1935.

8. *Statement F (Financial)*.—There was an opening balance of Rs. 1,11,135 at the beginning of the year. The excess of Rs. 5,877 over the closing balance of last year is due to some of the private institutions not having correctly classified the balances and deposits in their accounts. The contributions from Government and local bodies were Rs. 52,02,486 and Rs. 16,69,720, respectively during the year under report as compared with Rs. 53,59,870 and Rs. 18,54,639 during 1935. Fees and contributions realized from patients were Rs. 3,61,182 during the year against Rs. 3,67,519 during the previous year. Funds collected by hospital committees, etc., and miscellaneous receipts during the year were Rs. 1,64,316 and Rs. 2,60,407, respectively. In the year 1935, the funds collected by the Hospital Committee, etc., accounted to Rs. 2,08,972 and the other miscellaneous receipts accounted for Rs. 2,76,837. The total receipts for the year 1936 were Rs. 77,69,246 whereas in the year 1935, they were Rs. 81,61,644. The decrease is due to the transfer of certain number of hospitals and dispensaries to the new Province of Orissa.

The total expenditure for the year under report was Rs. 76,46,590 and it was Rs. 80,56,386 in the previous year. The amount spent on salaries to medical officers, nurses and inferior servants were Rs. 18,10,077, Rs. 9,29,120, and Rs. 11,21,162, respectively. The other expenditure on medicines, diet, apparatus, new buildings, repairs to buildings and miscellaneous charges were Rs. 11,83,774, Rs. 10,25,325, Rs. 57,168, Rs. 4,57,506, Rs. 1,29,783 and Rs. 9,32,675, respectively during the year.

9. *Statement G*.—The amount of invested capital at the beginning of the year was Rs. 9,47,863-0-11. A sum of Rs. 14,354-14-0 was invested during the year. The securities withdrawn amounted to Rs. 5,756, leaving a closing balance of Rs. 9,54,461-14-11 at the end of the year.

10. *Labour cases*.—104,171 labour cases were conducted during the year in all classes of medical institutions of which 88,916 were normal and 15,255 were abnormal cases. The number of cases conducted during 1935 were 106,823 (90,910 normal and 15,913 abnormal). The fall in the number of labour cases is evidently due to opening of more Maternity and Child Welfare Centres and appointments of separate midwives by municipalities and district boards for domiciliary work and consequent prohibition of hospital and dispensary midwives from conducting labour cases outside their institutions.

11. *Kala Azar*.—Cases of kala azar treated during the year under report were 1,919 of which 899 were treated in Madras, 573 in Ramnad and 253 in Tinnevely districts.

12. *Tuberculosis*.—The number of patients treated for tuberculosis (tuberculosis of the lung and other tubercular disease) in all the medical institutions was 75,279 during the year under report. The deaths were only 1,017 as compared to 1,413 of last year. The Tuberculosis Institute has continued to serve as a centre for after-treatment of cases discharged from Tuberculosis Hospital, Madras, and other hospitals and sanatoria in and outside the Presidency. As a further step in anti-tuberculosis work in Madras City, a tuberculosis clinic on up-to-date lines has been started for the examination of contacts, by the Tuberculosis Sub-Committee of the King George V Thanksgiving (Anti-Tuberculosis) Fund, Indian Red Cross Society, as an adjunct to the Tuberculosis Institute, Egmore, and it is working successfully for the last one year. With a view to provide more accommodation and treatment for such cases, the Government have taken over Dr. Muthu's Sanatorium at Tambaram in Chingleput district. The Coimbatore District Tuberculosis Sanatorium Society has taken steps to establish and maintain a sanatorium at Perundurai. A tuberculosis clinic has been opened at the Government Victoria Caste and Gosha Hospital, Triplicane, as an experimental measure for one year. Observation of the employees of the Government Press continued as usual at the institute. Of the 26 cases sent to the institute for observation, 12 were found to have tuberculosis. Owing to the large demand for admission among patients suitable for hospital treatment, temporary arrangements have been made to provide more beds in the recreation and dining-hall of the hospital. The need for more accommodation for cases of tuberculosis is very great. Some thousands of beds in hospitals and sanatoria and tuberculosis clinics are required.

X-ray Department.—The attendance at the Barnard Institute of Radiology and other Radiological departments in the Presidency showed a marked increase. During the year, two new departments were opened one at Guntur and another at Bellary. More departments are in the course of formation. Some of the older departments required new equipments, etc., but a new apparatus for the Coimbatore X-ray department was an urgent necessity. Apart from the Central Institute there were nine Radiological departments in the Presidency, viz., those at Rayapuram, Vizagapatam, Coimbatore, Cocanada, Ootacamund, Madras, Tanjore, Guntur and Bellary. Owing to the formation of the Orissa Province, the X-ray department at Berhampur has now been taken over by that Government.

The total number of sittings in the Barnard Institute of Radiology and other Radiological departments in the Presidency were 120,729 and 63,000, respectively. The total amount credited to Government for services rendered at the Barnard Institute and other Radiological departments in the Presidency during the year was Rs. 38,595-3-5. Arrangements are in progress in the Barnard Institute of Radiology for preparing and distributing "radon" (the emanation of radium) to other city hospitals and to selected hospitals in the mufassal.

Anti-rabic treatment.—The total number of patients treated during the year was 14,441 in the Presidency. Last year it was 13,322. During the year, 31 new anti-rabic treatment centres were opened in the Madras Presidency. Only two medical officers were trained at the Pasteur Institute, Coonoor, in the technique of anti-rabic treatment. Persons bitten by rabid animals are now seeking treatment in large numbers on account of a large number of treatment centres opened in recent years and the propaganda carried on by the Public Health department in collaboration with the Director, Pasteur Institute, Coonoor, Southern India.

Leprosy.—The number of leprosy clinics functioning at the end of the year was 445 wherein about 70,000 injections are given every month. Several Government and Local Fund medical institutions in the Presidency have leprosy clinics attached to them. The purpose of leprosy clinics is to bring treatment within easy reach of every affected individual and the necessity for erection of separate leprosy sheds was keenly felt in many clinics where the attendance was high. With a grant-in-aid from Silver Jubilee Fund, special clinics for the study of leprosy and its epidemiology will soon be established at Rayapuram, Saidapet, Vellore, Cuddalore and Tanuku. The Silver Jubilee Committee have sanctioned grants to provide increased accommodation in the Leper Asylums at Salur, Kodur, Narsapur, Bapatla, Chingleput, Kumbakonam, Manamadurai and Mangalore. It is now necessary to carry on the work with greater efficiency and to organize special investigation units for intensive study of the disease particularly in children.

Venereal diseases.—The Venereal department of the General Hospital, Madras, was shifted into the new building which is fully equipped for up-to-date methods of treatment. The number of cases treated during the year was 8,402 (6,665 males and 1,737 females) and the average daily attendance was 153. Six medical officers were trained in the department during the year of which two were women doctors. The treatment given to patients in the District Headquarters Hospitals continued to be satisfactory, but requires extension.

Buildings.—The most important work under construction is the remodelling of the Government General Hospital, Madras, which is nearing completion. These buildings are intended to provide research facilities for medical officers and students and up-to-date treatment for the patients that seek admission into this premier institution. His Royal Highness the Prince of Wales Hospital for Children was completed and opened during 1936. The construction of the new hospitals at Madura and Cocanada is nearing completion. The Government have accorded sanction for the construction of the Northern Block of the new buildings of the Stanley Medical School as well as the following new buildings:—

- (1) Additional quarters for the nursing staff in the Rayapuram Hospital.
- (2) Additional quarters for the nursing staff in the Headquarters Hospital, Coimbatore.
- (3) Aseptic Block of 52 beds in the Rayapuram Hospital, Madras.
- (4) A Venereal Out-patient department in the Rayapuram Hospital, Madras.
- (5) Additional block in the Mental Hospital, Madras.
- (6) Combined operation and X-ray block in the District Headquarters Hospital at Palamcottah.
- (7) X-ray block in the Headquarters Hospitals at Mangalore and Salem.

Indian Medical Service Officers.—During the year two Indian Medical Service Officers retired from service and three were posted to this department.

Madras Medical Service—Men.—From 1st April 1936, one appointment of Civil Surgeon and six appointments of Civil Assistant Surgeons were transferred to the new Province of Orissa and the incumbents of these appointments continued to serve under the Orissa Government from 1st April 1936. Of these, two Civil Assistant Surgeons were reverted to this department during the year.

Madras Medical Service—Women.—Two women sub-assistant surgeons with higher qualifications were promoted as women assistant surgeons temporarily during the year.

Sub-Assistant Surgeons.—Owing to the formation of the Orissa Province from 1st April 1936, 46 appointments of sub-assistant surgeons were transferred to that Province and the incumbents of these appointments continued to serve under that Government. As vacancies arise, they are reverted to this Presidency.

Sub-Assistant Surgeons—Women.—As vacancies for women sub-assistant surgeons were very few, only five women sub-assistant surgeons were recruited during the year. Three appointments of women sub-assistant surgeons were transferred to Orissa Province from 1st April 1936. Two of the incumbents have been reverted to this department during the year.

Honorary Medical Officers.—Suitable Honorary Medical Officers were appointed in medical institutions where their services were required during the year. Amendments to rules relating to the Honorary Medical Officers were also issued during the year.

Medical education.—There has been an increase in the strength of medical students in both the Colleges during the year. Some new appointments were created in the Medical College, Vizagapatam, as a result of the recommendation of the Indian Medical Council. The record of research work done by the staff of the Medical Colleges was satisfactory. Lieut.-Col. C. Newcomb, I.M.S., who was connected with the Medical College, Madras, for a long time proceeded on leave preparatory to retirement and for his long and distinguished services, the Government conferred on him the title of C.I.F.

Medical schools.—During the year under report, a revised curriculum of studies and syllabus suitable to the extended course of five years was drawn up by a committee and approved by the Government. The general working of the two medical schools and the instructions imparted to the pupils were satisfactory.

Medical Lending Libraries.—The District Medical Lending Libraries had 1,110 members at the beginning of the year and 1,046 at the close. The number of books available for circulation at the end of the year was 8,157 as against 9,190 in the previous year. The total receipts amounted to Rs. 18,379-1-7 during the year and the expenditure was Rs. 5,318-4-0. There was a balance of Rs. 13,060-13-7 at the close of the year.

Inspection.—Inspection of medical institution in each district was carried out regularly and satisfactorily by the respective District Medical Officers and the annual verification of service books of establishments was made as usual. Lieut.-Col. C. Newcomb, I.M.S.,

inspected two City State hospitals, i.e., Government Royapettah Hospital and Tuberculosis Institute and 16 District Headquarters hospitals, 10 outlying hospitals (Government, Local Fund and Municipal combined) and 9 outlying dispensaries. I inspected the Lady Willingdon Leper Settlement, Tirumani, the Government General Hospital, Madras, and His Royal Highness the Prince of Wales Hospital for Children. The Jails at the District Headquarters were also inspected as usual.

General.—Lieut.-Col. H. G. Dyer, R.A.S.C. (Retd.), was appointed as Lay Secretary in the Government General Hospital, Madras, to be in charge of the non-technical organization of the administration of the Government General Hospital, Madras, with a view to suggest the ways and means for effecting economy in the expenditure. As he took charge of his appointment on 11th December 1936, it will be possible to review his work only in the report for the next year.

I have the honour to be,

Sir,

Your most obedient servant,

F. P. CONNOR,

Major-General, I.M.S.,

Surgeon-General with the Government of Madras.
