QUEEN'S MILITARY FUND.

Regulations of a General Military Fund, for the benefit of Widows and Children of deceased Officers in Her Majesty's Service in India, established in India 1820, and revised in 1827.

Under the protection and countenance of the Most Noble the Marquis of Hastings, Commander-in-Chief of India, the above named Fund was established in the year 1820, for the purpose of sending home, in posterity and respectability, the families of deceased Officers in Her Majesty's Regiments, serving in India, who may have been left destitute; and of preventing the painful and degrading practice of appealing to the Public for subscriptions on such occasions; and also of providing relief in such cases as may require it until they can be conveniently sent home. It having since been found advisable to make some alterations in the Rules and Regulations then established, the following revised Regulations, passed with the general consent of the Officers of the Army, have been entered into by His Excellency the Right Honorable Viscount Combermere, Commander-in-Chief in India, who has been pleased to become Patron to the Institution.

1st. That the Committee of General Management formed at Calcutta, shall consist of the following persons for the time being, being Subscribers; viz.—

The Major Generals Commanding the Presidency Division.

The Adjutant General of Her Majesty's Forces in India.

The Quarter Master General of Her Majesty's Forces in India.

The Inspector General of Hospitals.

The Commandant of Fort William.

The Assistant Adjutant General of Her Majesty's Forces in India.

The Paymaster General of Her Majesty's Regiments quartered in Fort William.

Two Senior Subalterns of ditto.

Commandant of Depôt.*

The Military Secretary to the Commander-in-Chief.

The Major of Brigade of Her Majesty's Troops.

The Paymaster of Her Majesty's Troops.

AND

The Paymaster of Her Majesty's Regiment quartered in Fort William.

2d. That a Committee for transacting Sale of Investments connected with this Fund, and for the General Committee, shall be formed at Madras and Bombay, composed as follows, such Officers being Governors:—

The Commander-in-Chief, the Patron.

The senior Officer of Her Majesty's Army at the Presidency.

All Officers of the General Staff.

The two senior Officers of Her Majesty's Regiments stationed at the Presidency.

The two senior Subalterns of ditto. And that the Major of Brigade of Queen's Troops may be good enough to act as Honorary Secretary.

* STAFF.

Commander-in-Chief
Adjutant General
Quarter Master General, Deputy Quarter Master General, Military Secretary, Deputy Military Secretary, Majors and Brigade Majors of Brigade and other Staff.

REGIMENTAL.

Lieutenant Colonels, Captains commanding Stations or Corps, Lieutenants, Majors of Brigade, Adjutants, Quarter Masters, Paymasters, Surgeons and Assistant Surgeons.

Lieutenants, Assistant Surgeons and Cornets.

Cornets, Ensigns, and Veterinary Surgeons.

3d. That every Officer shall pay monthly to the Agents of the Fund, as specified in the Table of Rates annexed, in accordance with his Rank.

4th. That the Paymasters of Corps shall be appointed and required to have those Subscriptions monthly, and shall regularly remit the same to the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, Fort William.

5th. All married Officers shall subscribe to the Fund within three months after joining their Regiments or Stations, and the bachelors within three months after their marriage; any Officer neglecting so to do, shall not at any future time be admitted as a Subscriber, except by the sanction of the General Committee, where paying up arrears from the date of his joining or marriage, (as the case may be) or if in India at the time, from the date of the revision of these Regulations, 1st August, 1827.

6th. That in order to obviate the difficulties which would arise from the occasional remote situations of Her Majesty's Corps serving under the several Presidencies, the Most Noble the Governor General in Council was pleased to order that direct when the Fund was established, that Bills may be granted to the Paymasters of Her Majesty's Regiments by the Governments of Madras and Bombay, on the Government of Bengal, at the exchange of 108 Calcutta Sicca Rupees, for every 116 Madras Rupees, and 325 Calcutta Sicca Rupees for every 350 Bombay Rupees, payable at sight to the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, Fort William, thereby avoiding commission, double Agency, and risks of exchange.

7th. That all grants of assistance from this Fund shall be regulated and assigned by Committees of Subscribers, as herein declared.

8th. That in order to ascertain the circumstances of any Widow or family, who may have become destitute by the death of any Regimental Officer, such Widow shall send in a Memorial or Representation of the case of herself and family, through the Commanding Officer of the Corps, the casualty occurred to, in order to its being brought to the consideration of a Committee, and the Commanding Officer shall, as far as his knowledge will enable him, state his opinion of any case so received.

GENERAL COMMITTEE.

PRESIDENT.

A Field Officer, (if practicable.)
1 Captain, or Surgeon, or Paymaster.
2 Lieutenants or 1 Lieutenant and 1 Quarter Master, 1 Serjeant, or Assistant Surgeon.

9th. That whenever there may be mixed Corps of Her Majesty's Service, or more than one stationed together at the same time, every application for relief from this Fund shall be heard and decided on by a General Committee, composed, as equally as possible of Officers from such Corps present, being Subscribers to the Fund.

10th. As it may often happen that Officers die while the Corps they belong to is stationed by itself, or remotely detached, it shall be in the power of every Commanding Officer of a Regiment so situated to assemble a Committee of any five Officers (being Subscribers) to hear and decide upon the case of any Widows and children so become destitute, and seeking relief from this Fund. It shall also be competent for the Commanders-in-Chief of either Presidency to assemble a Special Committee, to report on the case of any Lady who may become a Widow, whilst the Regiment to which her husband belonged, shall be at another distant Station, or on service beyond Sea.

11th. That such General, Special, or Regimental Committees, as the case shall be, having duly examined into the circumstances of the party seeking relief, shall report their opinion on, and recommend the amount to be granted, whether for passage money or maintenance, strictly in conformity with the Regulations annexed. The opinion and recommendation of such Committees shall be forwarded to the Agent or Agents of the General Committee if in Bengal, or to the Honorary Secretary of the Sub-Committee, or such person as may be appointed by the Commander-in-Chief; if at the Presidency of Madras or Bombay, by the Officer Commanding the Corps in which the casualty may have occurred.

12th. The Sub-Committee at Madras and Bombay will, on satisfying themselves with the accuracy of the statements laid before them, draw upon the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, Fort William, for the amount of the sum which may be awarded; but in the final adjustment of the accounts of such Sub-Committee, the General Committee will consider themselves bound to object to any sum, however trifling, which may be granted in excess of the Rules laid down.

13th. The Sub-Committee will on drawing for any sum on the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, transmit the Report of the Station Committee, as well as their own opinion and explanation of the Award, to a member, and they will afterwards, as soon as possible, transmit the proper Receipt and Certificates, showing that the money has been appropriated in the manner and for the purposes for which it was awarded.

14th. The object of this Fund being clearly confined to sending Home DISTRESSED Families of deceased Officers, with a view of preventing those painful appeals for assistance to the Public, at once so humiliating to respectable individuals and the Queen's Service in India, it is earnestly hoped, that all ranks of Staff, and Regimental Officers will support it.

15th. But to prevent doubts and misconceptions, which might possibly arise hereafter, it is distinctly declared, that no Widow, whose not in distressed circumstances, or no Lady, continuing to reside in this country after the death of her husband, can expect any assistance or pension for herself or children from the Fund, further than is stated in the 4th Clause of the Selection of Awards. It is also declared, that no Widow is entitled to passage money or allowance for travelling, unless she shall actually proceed to Sea or on her journey in the manner for which any allowance may have been drawn, and should she have received such allowance, she will be required to refund; and further, that no Widow, under any circumstances, shall be entitled to any assistance from this Fund, unless the application shall be made in the usual form, within six months after the decease of her husband.

16th. Orphan Children are eligible for the benefits of this Fund, but awards for them must be specially made by a General or Sub-Committee and sanctioned by the Commander-in-Chief of the Presidency, who is requested to appoint some eligible person to take care of them, and provide a passage, &c. &c.

17th. That the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, Fort William, shall furnish an annual Account of the Receipts and Disbursements of this Fund, agreeable to forms annexed, to the Adjutant General of Her Majesty's Forces; and that that Officer be applied to, to circulate the same amongst the Subscribers, and the several Officers of Government at the three Presidencies.

18th. That Commanding Officers of Her Majesty's Regiments be requested to pay particular attention in causing the regular quarterly remittances to be made to the Agent or Agents of the Queen's Military Fund, acting for the Committee of General Management, Fort William, who are requested from time to time to apprise Commanding Officers whenever any Corps may fail in making such remittances.

19th. That no general Rule or Regulation of this Fund shall be altered, except recommended by the General Committee, and approved by a majority of the Subscribers.

20th. In taking the opinion of the Regiments and Staff Officers of Her Majesty's Forces in India, a very general wish has been expressed that all Widows should have their passage to England, &c. &c. defrayed. The Funds will not now admit of it, but should the positive standing balance of the Fund ever amount to forty thousand rupees (4000*l.*) the Committee will again put the question for the sense of the Subscribers, with a proviso that such change should again cease on the balance falling to thirty thousand rupees (3000*l.*) and in that event all married Officers will have a claim on the Fund, their Subscriptions should then be augmented. As an Officer ceases to be a Subscriber on leaving India all claims on the Fund must in the manner cease from the same period, but an Officer going to sea for the benefit of his health, being entitled to his Commutation allowance, will be considered as a subscriber during his absence.

The Honorable the Vice President in Council is pleased to direct that the following Paras. (3 to 5) of a Military Letter from the Honorable the Court of Directors No. 97, dated the 6th November 1833, the provisions of which are applicable to the three Presidencies, be published in General Orders:

Para. 3. "We direct that Fees upon Commissions granted by His Majesty to the Company's Officers, shall be hereafter collected by and credited to Government, in the same manner as the Fees on Company's Commissions are now collected and credited, and that the Salary to be hereafter granted to the Military Secretary of the Commander-in-Chief, be Two Thousand Two Hundred and Fifty Rupees, (Rupees 2,250) per month in lieu of Fees and all other Emoluments.

5. We therefore direct, that the Fees on Commissions to be hereafter paid by the Company's Officers shall at all the Presidencies be the same as those charged to His Majesty's Officers of corresponding rank; and that one moiety of those Fees be charged for the Company's and the other moiety for the King's Commissions.

14. Officers Commanding at Stations where detached Officers die, will consider all the foregoing rules relating to the duties and responsibilities of Regimental Commanding Officers, to be equally applicable to themselves.

FURLOUGH.

Officers (of whatever rank) must have passed ten years in India, before they can be entitled to apply for leave of absence to Europe on Furlough, except as specified in their relation to be absent on Invalid, and the Officers of the Medical Department, Assistant Surgeon, and Veterinary Surgeons. The Furlough to be granted by the Commander-in-Chief at each Presidency, with the approbation of the respective Medical Board.

Officers who have not served twenty years in India, but whose presence in England is required on urgent private affairs, may be allowed a Furlough for one year without pay.

A Captain appointed previously to the 1st September 1809, after seven years' residence in India, is allowed to retire from the Service and receive the pay of Major, £328 per annum. Should he come home on Furlough prior to this period of service, he is allowed the pay of Captain only, viz. £182 12s 6d per annum.

If appointed subsequently to 1st September 1809, after seven years' residence in India, the pay of Captain, viz. £182 12s 6d per annum, will be granted to all Invalids, or those home on Furlough prior to that period of service, but should he retire, the pay will be that of Major, viz. £328 per annum.

A Conductor of Stores is allowed furlough pay only in case of coming home from sickness.

Officers coming to England on furlough, are required immediately to report their arrival by letter to the Secretary, stating the name of the ship in which they came, and their address, forwarding at the same time the certificates they received in India.

The period of furlough is three years, reckoning from its date to the day of the return of the Officer to his Presidency.

Officers are required to join the Establishment to which they belong at the expiration of the three years' furlough, unless they shall have obtained an extension of leave from the Court, six months before the expiration of that period. No furlough will be extended, except in cases of sickness, certified in the manner hereafter mentioned, or in cases, in which it shall be proved to the Court that a further residence in Europe is indispensably necessary.

All Officers finding it necessary to submit a further leave of absence on account of sickness, must, if resident in London or its vicinity, appear before the Company's examining Physician, Dr. J. R. Hume, 9, Curzon-street, who will report to the Court of Directors his opinion on the state of such Officers health. And if resident in the country, or any part of the United Kingdom, they must transmit with their request for such leave, a certificate according to the following form, signed by at least two gentlemen, eminent in the medical profession, viz.

I do hereby certify, that I have carefully examined (state the names of the one, two or the same of the party, and I declare, upon my honor, that according to the best of my skill, most and belief ——— is at present unfit for military duty, and that it is absolutely necessary for the recovery of his health, that he should remain at ——— longer in this country.

After previously to such extension of furlough being granted, such further proof shall be adduced by personal examination, or by such other evidence as shall be deemed satisfactory.

Officers abroad in any part of Europe, applying to remain a further time from their duty on account of sickness, are to furnish a certificate of two eminent physicians in the above form, with the attestation of a magistrate, that the persons who signed the certificate are physicians.

Officers having obtained an extension of furlough, to a given period, must at its expiration apply for permission, either to return to their duty, or, to reside a further time in England.

No Officer who has failed to obtain an extension of furlough, will be considered eligible to return to the service after 5 years' absence under the Act of 33, Geo. III. Cap. 52. Sec. 76.

Every Officer upon leaving India, will receive a printed copy of the general order on this subject, published agreeably to the Court's instruction, and the plea of ignorance of the regulations will not be admitted as any justification of the breach of them. Officers therefore, who shall come home on furlough, and who shall not in the time require, so as to effect their return to the Presidency to which they belong, within five periods of three years from the commencement of their furlough will subject themselves to the loss of the service, unless they shall be permitted by the Court to remain further time in Europe.

No Officer on furlough can receive pay for more than two years and a half from the period of his quitting India, until he returns, excepting Colonels of Regiments, and those of the rank of Lieutenant Colonel respectively, when promoted to that of Major General; the latter are then allowed to draw the pay of their Brevet rank beyond the above period.

Para. 39. "There is no regulation which precludes successful Governments from granting the privilege of a second Furlough on private affairs when the Public Service will permit of the indulgence, but the rule which governs an Officer coming on pay when about to Europe on private affairs for a longer period than 3 years, must be fully maintained.

21. The following is a copy of the Regulation as published in the Bengal Code and which is applicable to the other Presidencies also, viz.

"No Officer who has drawn three years furlough pay is allowed pay during any future "furlough, except in cases of certified sickness, until he has not received pay for the "full term, he may during a second furlough on private affairs, be allowed the same for "such a space of time as will complete the three years."

G. O. G. 13th March 1838. No. 76.

The following General Order by the Honorable the Vice-President in Council is published in continuation of a G. O. by this Government dated the 28th of June 1837, and declared applicable to this Presidency.

General Orders by the Honorable the Vice-President in Council.

FORT WILLIAM, 20*th February*, 1832.

In continuation of General Orders by the Right Honorable the Governor General in Council No. 48, under date the 13th of February 1832, the Honorable the Vice President in Council is pleased to announce for general information, that any Military Officer hereafter proceeding beyond Sea, on the limits of this Presidency, for the recovery of his health, who shall remain absent for a period exceeding Two Years, shall be considered on Furlough in like manner as if he had proceeded to Europe, unless he can prove to the satisfaction of Government that no opportunity offered for his returning or embarking on his return to Bengal from the Colony or Settlement at which he was residing, at any time within three months previous to the completion of an absence of two years.

OFFICERS RETURNING TO INDIA.

Regulations as to the charge of Recruits.

Whenever a detachment of Company's Recruits to the extent of thirty men shall be embarked on any one ship, they be placed in charge of the senior Company's Officer, not exceeding the rank of a Field Officer, who shall have obtained permission to return to his duty on the ship, within at least seven days of the period fixed for embarkation: that the Officer proceed with the men from the depôt; and as a remuneration for this duty, be granted the passage money of his rank; payable to the Commander of the ship.

OFFICERS RETURNING TO THEIR DUTY VIA BOMBAY.

Extract from a letter from the Honorable the Court of Directors, dated 18th October 1837, No. 79.

"Referring to our Military Letter of the 16th August last we have now to apprize you that Officers returning to their duty on the Bengal or Madras Establishments via Bombay, will be granted the same advantages as Officers coming to England by the inner route, viz. that when their Regiments shall be stationed at a point nearer to Bombay than to the Capitals of their respective Presidencies, their Indian allowances shall commence from the date of their landing at Bombay, provided that no avoidable delay take place in their joining their Regiments."

Fort St. George, 27th March, 1838.

With reference to G. O. G. 23d January 1838, No. 15, the Right Honorable the Governor in Council deems it necessary for the guidance of the Pay Department to specify a limit beyond which Indian allowances shall not be passed to Officers of this Establishment returning to their duty via Bombay. It is therefore declared that, *except in cases of certified sickness, one month, in addition to the regulated period according to distance* be the utmost extent allowed.

G. O. G. 3d March 1841. No. 42. — "The following Extract of a Letter from the Honorable the Court of Directors to the Government of Bombay, is published for the information of the Army of this Presidency.

Extract Para. 7th of a Letter from the Hon'ble the Court of Directors, No. 79, dated 2d December, 1840.

Regretting that several instances have occurred of Officers of the Bengal and Madras Presidencies arriving at Bombay by the Steamers having, owing to defective arrangements on their part, been detained in Bombay awaiting arrival of the Baggage from England, and suggesting the adoption of certain regulations to guard against similar inconvenience.

Para. 7th. "When we permitted Officers returning to Bengal and Madras, via Bombay, to draw Pay and allowances from the date of their arrival at Bombay, provided the Regiments to which they belonged, was stationed within certain limits, it was our intention that they should have no greater advantage with respect to time of absence after their arrival than would be granted to those arriving direct from England at the Capitals of their respective Presidencies. That advantage is limited to one month on private affairs, and we desire that in no case may Pay and Allowances be granted for a longer period under these circumstances at your Presidency.

6. Gentlemen, who have ceased to belong to His Majesty's Service cannot be allowed the advantages to which they were entitled while in the Army or Navy. It is not, however, proposed to exclude by this rule Officers who desire to quit the service for the express purpose of settling in the Colonies. It is only required that when they resign their Commissions they should apply for a certificate from the General Commanding-in-Chief or from the Lords Commissioners of the Admiralty that they do so, with the view of emigrating; and such certificate if produced to the Governor of any Colony within one year from its date, but not otherwise, will be sufficient warrant for allowing the bearer the same advantages as Officers still in His Majesty's service.

Officers who have sold out within the last twelve months preceding the date of this memorandum, will be allowed the usual privileges, notwithstanding their want of the Certificate required by these Regulations, if they present themselves to the Governor of the Colony within a year from the present date. And all Officers who have already been recommended by the General Commanding-in-Chief will be entitled to their privileges without regard to any obstruction which might otherwise be offered by the Regulations now established.

7. Officers cannot be allowed advantages in the acquisition of land in any Colony unless it be their intention to fix their residence in that Colony. In order to ensure the observance of this rule, it has been determined that the titles to lands obtained by Offi-

sons who take advantage of the peculiar regulations existing in their favour, shall be withdrawn for a certain settlement to prove that they have not acquired to their claims for the mere purpose of getting possession of a portion of land and then departing. Two months is the period for which it has been decided that the titles shall be kept back; this delay will be sufficient for the salutary object in view, and will not constitute any serious inconvenience to the bona fide settler.

5. By the foregoing Regulations for the disposal of waste lands it will be observed that the general sales will take place periodically, but in order to prevent inconvenience to Officers who may arrive in the intervals between those sales and to persons at home by enabling all parts of the Colonies are authorized to allow Officers to acquire at any intervals payment of the upset price, lands which have previously been offered for sale at public competition and not been bought.

Officers will thus be relieved from delay at the first of establishing themselves in the Colony. They will also be enabled by this arrangement, which will permit them to obtain their land at a fixed price, to choose such a quantity as shall be exactly equivalent to the amount of the remuneration to which they are entitled, instead of being liable to be called upon to pay a balance, which must be forfeited if they had not funds at a sale by auction.

Towns upon which the Crown Lands will be disposed of in New South Wales, Van Diemen's Land and the New Settlements of Western Australia.

It has been determined by His Majesty's Government that no land shall in future be disposed of in New South Wales or Van Diemen's Land, otherwise than at public sales; and that new towns shall be created for the introduction of settlers throughout the extensive territories of the former Colony in the manner which it has been thought fit to lay down for regulating the sales of land in those Colonies.

1.—A division of the whole territory into counties, hundreds, and parishes is at present in progress, and when that shall be completed, each parish will comprise on an average about twenty square miles.

2.—All the lands in the Colony, not hitherto granted, and not appropriated for public purposes, will be put up to sale. The upset price will of course depend upon the quality of the land, and its local situation, but no land will be sold below the rate of 5s. per acre.

3.—All persons proposing to purchase lands not advertised for sale, shall transmit a written application to the Governor, in a certain prescribed form, which will be delivered at the Surveyor General's Office, to all persons applying for it, at the rate of one shilling per folio.

4.—Those persons who are desirous of purchasing, will be allowed to select within certain specified limits such portions of land as they may wish to acquire. Such intending purchasers will have their selections marked out by the Surveyor General, and will then have their names and the quantity of land selected inserted in the next advertisement for sale.

5.—The land will be sold by auction for ready money, to the highest bidder, provided that such bidding shall not be under the upset price fixed by article 2.

6.—A deposit of £5 per cent. upon the whole value of the purchase must be paid down at the time of sale, and the remainder must be paid within one calendar month from the day of sale, previous to which the purchaser will not be put in possession of the land, but in case of payment not being made within the prescribed period, the said deposit will be considered void and the deposit forfeited.

7.—On payment of the money a grant will be made in fee simple to the purchaser of the land, which will consist of a proper deed, to be executed by the Governor, and countersigned by the Colonial Secretary for preparing the grant, and another fee of five shillings to the Registrar of the Supreme Court for enrolling it.

8.—The land will generally be put up to sale in lots of one square mile, or 640 acres; but persons desirous of purchasing smaller quantities than 640 acres may, under particular circumstances be permitted on application to the Governor in writing, to purchase such smaller quantities of the waste as they may wish to purchase at a similar price.

9.—The Crown reserves to itself the right of making and maintaining such roads and bridges as may be necessary for public purposes in all lands purchased as aforesaid, until the same shall be dedicated to public uses by the orders of the land regulations for the time being in force. The Crown further reserves to itself a right of procuring timber and other materials for making and keeping the said roads and bridges in repair, and for all other public works. The Crown further reserves to itself a right of resuming possession of any land which may be required for the purpose of making any new roads, or for any other public purpose.

With reference to the foregoing Regulations, the Right Honorable the Secretary of State for the Colonies has directed a circular to be addressed to the Governors of the several Australian Colonies, for the general information and guidance of persons who may be desirous of purchasing land in those Colonies, and who may be entitled to claim the benefit of the Military Service Act of the East India Company, may wish to avail themselves of the advantages now extended to them by their Charters Sovereign, will be sufficient to entitle the Officer to claim the benefit of His Majesty's Australian Colonies Act, 1842, and the Military Secretary to Government, on the application of any Officer, will grant a Certificate of his having served the time required by the Act.

No. 20.

Officer Commanding
Mysore Division.

Officer Commanding 2d Madras European Light Infantry acknowledges the receipt of instruction from Adjutant General regarding the preparation of School Returns.

Bangalore, 3d January 1840.

Extract from Court's Letter, dated 9th May, 1800.

G. O. C. 29th Dec. 1840.—51st.—In regard to the second point mentioned in the Commander-in-Chief's minute, all Officers who have served twenty-two years in India (to be computed from the period before mentioned) are permitted to retire on the full pay of their rank—but if after serving that time successively they come to Europe on furlough they are to be subject to the Regulations prescribed in our letter of the 8th January 1796, relative to Officers wishing to retire, *whilst on furlough.*

52d.—With respect to the cases of absentees mentioned in the 38th paragraph, as no Officer who has not served twenty-two years actually in India can be permitted to retire on the full pay of his rank, a declaration to the effect prescribed by the Regulations by such Officers is unnecessary, as they must return to their duty, in order to complete that period of service, to entitle them to retire on full pay, although they may have been twenty-five years or more on the strength of the Army.

Extract from a Letter from the Court of Directors, dated 28th Aug. 1800.

G. O. C. 16th Feb. 1801.—Para. 31.—Having observed that in some instances Officers who had received the benefit of the Regulations respecting furlough, had soon after their return to their duty to India applied for, and obtained further furlough, we directed that the pay to such Officers, should be withheld after three years receipt of such pay, unless in cases of certified ill-health.

32.—As the Regulations do not appear to have been understood by the Governments in India, in the manner above stated, it may seem a hardship in some instances to Officers who have been permitted to come home on a second furlough, under the implied sanction for drawing their pay, if they are not allowed their pay during their second furlough, although the pay altogether drawn, may not exceed three years. But in order to prevent the Regulations from being misunderstood in future, we have resolved that, as Officers who have drawn three years' pay on furlough shall be allowed any further pay on being permitted to come home again on furlough hereafter, unless in cases of sickness under the prescribed certificate.

Extract from Court's Letter, dated 28th August, 1801.

G. O. The following General Orders by the Supreme Government are published for the information of the Army.

No. 67, of 1834.

GENERAL ORDERS BY THE HONORABLE THE VICE-PRESIDENT IN COUNCIL.

Fort William, 27th February, 1834.

The Honorable the Vice-President in Council is pleased to direct that the following Extract (paras 11 to 14) from a Letter from the Honorable the Court of Directors to the Military Department, No. 39, dated the 9th October 1833, be published in General Orders.

Letter dated 2nd January 1833, (No. 12,) 1 to 9.—Since then, from the tenor of the Orders received from time to time, some doubt exists as to the scale of Pensions which the Court are disposed to recognize as claimable from Lord Clive's fund, by Chaplains retiring from ill health before the full period of their Service, and by the Widows of Chaplains, and request to be furnished with fresh and explicit instructions on the subject.

Para. 11. Chaplains who have not served 7 years in India, are admissible to the benefit of Lord Clive's fund in the rank of Captain. After completing a service of 7 years their retiring allowances are provided for independently of Lord Clive's fund, by the Regulations conveyed to you in our Ecclesiastical Letter of 2nd November 1826.

12. As by the Regulations announced in that Letter, Chaplains may retire on the full pay of Lieutenant Colonel after 18 years' Service, (including 3 years for a furlough,) we have considered the Widows of those who die in the Service after completing that period to be eligible to the benefits of Lord Clive's fund, in the rank of Lieut.-Colonel.

13. The Widows of Chaplains who have completed 7 years' actual service in India are admissible in the rank of Major, and those of Chaplains of less service in the rank of Captain, being the ranks the pay of which is receivable by those Classes of Chaplains respectively when on furlough.

14. You will communicate a Copy of these Paragraphs to the Government of Madras and Bombay.

Fort St. George, June 2, 1840.

14. Any Chaplain returning to the Presidency after a Sea [illegible] for the recovery of his health or otherwise, shall (unless the contrary is specially sanctioned by Government) be required to rejoin his Station within the time that may be prescribed for travelling to the Station to which he stands appointed.

15. When a Chaplain proposes to quit his principal Station for the occasion of visiting any of his appointed smaller Stations, or when he intends to apply for temporary leave of absence, he must give timely notice to the Chief Civil and Military resident authorities and state in his application for leave that such has been done, in order that if there be

Fort St. George, December 30th, 1837.

The Governor in Council is pleased to notify that, in communication with the Lord Bishop of Calcutta, it has been resolved that no fees shall henceforth be required from Military Persons, or their families, for Sacred Offices, in this Presidency.

E. C. G. 24th June, 1838. No. 91.—The following Extract from a Letter from the Secretaries the Court of Directors to the Military Department, under date the 14th of March 1838, is published for the information of the Army.

Para. 25. "We have to acquaint you that the claims of the Chaplains appointed under the new arrangements, and of their Widows, to the benefits of Lord Clive's Fund, will be adjusted upon the principles laid down in our Letter to the Government of Bengal, dated 5th October 1836, No. 82, paras. 35 and 36."

26. Chaplains who have not served seventeen years in India will therefore be entitled if admitted to the benefits of Lord Clive's Fund, to a Pension of £365-17-0 per annum, and their widows to one county of that sum.

27. The widows of Chaplains who have completed 7 years actual service in India, in addition to the benefits of Lord Clive's Fund, are entitled to Pensions as the Widows of Captains.

28. The Widows of Chaplains who have completed 15 years actual service in India, if admitted to the benefits of Lord Clive's Fund are entitled to Pensions as the Widows of Majors.

29. We are of opinion that Chaplains appointed under the new arrangement should rank as subordinate to the Military Fund as Captains after they have served 15 years in India, and subsequently as Majors."

FURLOUGH AND RETIRING ALLOWANCES OF CHAPLAINS APPOINTED PRIOR TO AUGUST 31, 1836.

Extracts of an Ecclesiastical General Letter from the Honorable the Court of Directors, dated 22d November 1838.

Para. 2. We have lately directed our attention to the Regulations under which Chaplains are permitted to retire from the Service, and feeling anxious duly to provide the respectability and comfort of that class of our Servants we have resolved that the Retiring pay of Chaplains after a service of eighteen years (including three years furlough), be increased from £300 per annum, the Pay of Bishop to £400 per annum, the Pay of Archdeacon Colonel and that in cases of bad health (supplied by conformity with existing Regulations) Chaplains shall be allowed to retire after 17 years actual service upon £300 15s. the half Pay of Lieutenant Colonel instead of £173 7 6, the half pay of Major and upon the production of similar certificates after 14 years actual service upon £173 7 6, the half pay of Major instead of £127 15 0, the half pay of Captain.

3. We have further to acquaint you that we have determined to abolish the distinction of Junior Chaplains and we desire that the Chaplains be hereafter distinguished only by the Title applicable to the Rank of each Chaplain, placed such as Chaplains at the Presidency and District Chaplains.

INCREASE OF CHAPLAINS.

Extracts from a Letter from the Honorable the Court of Directors.

Ecclesiastical Department, *August* 31, 1836.

Para. 1. "Our attention has been drawn by the Government of India, on the suggestion of the Lord Bishop of Calcutta to the necessity of increasing the number of Chaplains, for the purpose of extending the benefit of religious effects, more widely than the present Establishment will admit.

2. While we were fully sensible of the importance of the desired object, and were anxious to promote its success, we felt that we should not be justified in making any addition to the amount of Ecclesiastical Charges, exempted itself from the opposition of an increased number of Chaplains upon the existing scale of remuneration. We determined therefore to make such new arrangements with regard to the Chaplains on the Bengal Establishment as should enable us to add to their number, and thus provide increased spiritual benefit of the Establishment, without any permanent increase of expense. We have resolved to extend the principles of those Arrangements to your Presidency, with the view of accomplishing the same beneficial purpose.

3. We intend that the number of Chaplains under your Presidency shall be increased from 33 to 39. The salaries are to be apportioned as follows:—the two Chaplains of the Presidency will receive the same amount as at present, nine will receive Company's Rs. 700 per mensem, and the remaining 18 Company's Rs. 600 per mensem. These salaries will constitute their entire emoluments from the Company. The payments hereafter made under the name of palanquin money will cease, and we wish on no account to sanction any extra allowances, whatever may be the grounds upon which they may be claimed.

4. The Chaplains receiving the lower amount of 300 Pagodas per mensem will be termed Assistant Chaplains and in future all appointments will be made to this class. The Assistant Chaplains will succeed to the higher rank and the higher rate of salary according to seniority, as vacancies occur in the superior class, after it shall have been reduced by casualties to the prescribed number of nine.

5. As regards the rate they will be supplied in the following manner: on the occurrence of the first vacancy two Assistant Chaplains will be appointed, not the second only one, and on all succeeding vacancies the same principle will be acted upon, viz. that of an alternate appointment of two and one until the establishment attains the full extent of 22, to which we have restricted it after which each vacancy will give rise only to a single appointment.

6. The principle which we have adopted throughout these arrangements requires that the furlough and retiring allowances should be modified so as to meet the intended changes. These allowances will in future be in the following scale.

Furlough Allowances.

After 7 years' residence.....£182 12 6 per annum.....(full pay of Captain)
If compelled by sickness to retire to Europe before completing 7 years' residence.....£137 10 0 per annum.....(half pay of Captain)

Retiring Allowances.

After 15 years' service (including 3 years' furlough).....£365 0 0 per annum.....(full pay of Major)
After 10 years' actual service (if compelled by ill health to quit the service).....£121 7 6 per annum.....(half pay of Major)
After 7 years' actual service do. do.....£137 10 0 per annum.....(half pay of Captain)

The present incumbents will be entitled to the existing scale of allowances as well for service, furlough, and retirement; these regulations being wholly prospective, and only to all appointments made after the date of this despatch.

7. The relations of the Chaplains under these arrangements will be best regulated by reference to the opinion of the Lord Bishop.

When bearers are brought from a distance, the Traveller will only be required to pay the regular hire, and charges of batta.

14. Sets of bearers posted from Madras or out stations, shall receive full hire for the distance they carry the loaded Palankeen, and half hire for proceeding direct post for such part of the road over which they do not return loaded. If the Bearers return backwards and forwards, for the convenience of different Travellers, they shall receive half hire one way and full hire the other, for each time they traverse the road at all places where from local usage and custom this payment has hitherto obtained.

15. When Bearers are sent to a distance, exceeding 40 miles, to bring a Traveller back by stages, they are to receive ½ hire for going out and full hire for returning.

16. In case a set of Bearers which has been posted for any Traveller, and had received hire to such post may be subsequently required for any other Traveller such person shall pay the set the established rate for every mile they carry him, and if the set be detained, he will be liable to the charge for detention specified in para. 10.

17. When a set of Bearers is posted, or a Dawk laid, for a Traveller, either by the Post Master General, or the authorities in the Interior, no other Traveller shall employ them, without the authority or knowledge of the Officer who posted the set, or laid the Dawk, but should any individual so act in violation of the orders of Government, he will be liable, in addition to the regulated hire of the Bearers used, to all and every extra charge incurred by the Traveller for whom the set was originally posted, or Dawk laid.

18. In order to provide Bearers for the convenience of Travellers at Stations where there are now none, and to prevent their being put to the expense of payment of batta, for procuring them from distant stations, 3 Annas per mile will be charged for each set of Bearers. Five Annas or such other sum as may be fixed will be paid to the Bearers and 3 Annas carried to the credit of a fund, from the proceeds of which one set or more of Bearers will be posted at Auxiliary pay in different stages. If more sets are required than those permanently fixed on the Road, the Traveller will be charged only five Annas

per mile for each additional set which may be brought from a distance, together with such batta as they may be entitled to under Rules 13, 13 and 14—it is proposed that only one set of Dawk Bearers be permanently stationed on each road for the present.

19. In order to facilitate the keeping of accounts, all fractional portions of a mile will be struck out. If the fractional parts exceed the half, the Bearers will enjoy the benefit of a full mile, if less than the half, they will not be entitled to any hire for the same.

20. All charges of hire shall be made agreeably to the Table of distances and routes in the Madras Road book.

21. The load for a Cooly or dooley shall not exceed 30 lbs. weight, divided as nearly as possible into two equal portions of 15 lbs. each.

22. It is to be understood, that although Government have directed its Public Servants to pay Dawk Bearers for the conveyance of the Public, and will exact due pains to be taken to ensure regularity and a punctual attendance to all requisitions, yet that neither Government, nor any of its Officers are to be held responsible to the Traveller, for any contingency disappointment he may meet with on his journey, or for the expenses consequent thereof.

23. In cases of an charge, or a charge being made which to the parties complaining appears excessive, it will be the duty of the Post Master General at Madras to investigate the matter with a view to effect redress. The decision by the Post Master General at the Presidency, in all references relative to Dawk Bearers, to be considered final. Absent to be exempted the Bearers are passed by him, or his Deputy, to which case the party considering himself aggrieved will be permitted to appeal to Government.

24. It is to be understood that nothing in the foregoing Rules is intended to interfere with Travellers applying to private individuals to post their Bearers, should they prefer making their own arrangements, without the intervention of the Public Authorities, but that the Public Officer will attend to a requisition until the required deposit indicated in para. 5 is made.

Note.—The rate of hire fixed will be reduced, if after trial such be found practicable.

PROCLAMATIONS REGARDING EXISTING CURRENCY.

Accounts were kept in Madras in Star Pagodas, Fanams and Cash, viz.

80 Cash to 1 Fanam.

42, 44 or 45 Fanams, 1 Star Pagoda.

Government, the Banks, and all the Houses of Agency kept their accounts at 42 Fanams the Star Pagoda. The Shroffs and Bazaars at 44, or 45.

The Star Pagoda exchanged in the Bazar for about 45 Fanams, but it fluctuated according to circumstances.

The Coins in circulation were the Star Pagoda, the Arcot Rupees (3½ = 1 Star Pagoda; it exchanged in the Bazar for 12 Fanams 60 Cash); the double and single Fanam, and the Doodie, 8 of which = 1 Fanam.

There was also a copper coin sent out from England of 20, 10, 5, and 1 Cash value, the latter being worth [illegible] or about the sixth part of a farthing.

This Currency was altered in January 1818 by a Proclamation, which constituted the Silver Rupee the standard [illegible]. To this the public accounts were all converted at an exchange of 350 Rupees per 100 Pagodas; and the new Silver coinage was made to consist of Rupees, Half and Quarter Rupees, Double and Single Annas; the Rupee containing 165 grains of pure Silver and 15 grains of Alloy, and weighing 180 grains, and the other Coins bearing the due proportion to the same.

12 Pice.................................. = 1 Anna.

16 Annas................................ = 1 Rupee.

3½ Rupees............................... = 1 Star Pagoda.

2d. All classes, British and Native, may invest their savings in the "Government Savings' Bank."

3d. The return of the exact sum deposited, together with the interest due thereon at the undermentioned rate, is secured to the Depositor under guarantee of the Government.

4th. The general direction and control of the Bank shall be vested in a Committee of Management to be nominated by the Governor in Council. The Committee shall meet at such stated periods as may be necessary for the due and efficient control of the proceedings of the Bank.

6th. A Register of Deposits will be kept, and generally such other accounts as may be determined on and approved of by the Managing Committee.

7th. Any sum not less than one Rupee will be received in deposit.

8th. Whenever any sum deposited by one individual shall amount to 500 *Company's* Rupees, the same will be transferred from the Bank deposit in the General Treasury and subscribed on account of the Depositor to the 5 per cent Bengal Government Loan, of the 31st March 1841, until further notice, unless an intimation of its withdrawal, or the withdrawal of a portion of it, be given by the Depositor within one month after it has reached that amount; and all Government Securities shall be handed over to the Government Agency at the expiration of 3 months (subject to all the Rules which obtain in that Department) unless counter-instructions be immediately received from the Proprietors.

9th. Interest at 4 per cent. per annum will be allowed on deposits until further notice.

10th. The interest will be calculated on a deposit from the 1st day of the month succeeding that in which it shall be received, and up to the last day of the month preceding that in which it shall be withdrawn. No interest will be allowed for broken periods of a month, nor calculated on fractional parts of a rupee.

11th. The Government reserves to itself the power of lowering or raising the rate of interest, such alteration not to affect deposits above 500 *Company's* Rupees previously invested in Public Securities, and due notice to be given in the *Fort St. George Gazette*, of the intention of Government six months before the alteration shall take effect.

Land is usually measured with Gunter's Chain of 100 links, or with a rod of 10 feet, and reduced to Cawnies, Grounds and Square feet, agreeably to the following Table.
30 Feet long and 40 feet broad, make one ground or Manda containing 1200 square feet.
24 Grounds or Mandas make one Cawnie equal to 57,600 square feet.
1 The Indian Cawnie is in proportion to the English Acre as 36 is to 77, or as 111 is to 240.
—240 Acres — 111 Cawnies, very nearly.
To reduce Indian Cawnies to English Acres, multiply the given number of Cawnies by 240, and divide the product by 111, the quotient will give the number of Acres, and the remainder be the fractional part of an Acre; if multiplied by 2400 and the product divided by 111, the quotient will be the number of Roods, and the remainder the decimal parts of an Acre.

SIGNALS FOR SHIPS OR VESSELS IN THE OFFING.

Signals respecting Ships or Vessels in the Offing, whether Men-of-War or Merchantmen, are made from the Garrison Flag-Staff, a yard slung across the top-mast, the points of which represent the quarter from which the vessels are coming in.

Three classes of vessels are expressed by the signals; vessels of three masts, of two masts, and of one mast.

An ensign, or square National flag, represents a ship of three masts: a national flag, with two points or swallow's tail, represents a Brig or Snow, &c. of two masts: and a broad National Pendant, terminating in one point, represents a Sloop or Cutter of one mast.

If either of these flags is hoisted to the yard above described, the Vessels seen are on the North or South quarters of the compass.

A white Pendant signifies one Ship or Vessel: a red and white Pendant divided horizontally two vessels; a red Pendant pierced with a white circle three vessels; a yellow Pendant pierced with a blue circle four Vessels.—When the number of Vessels exceeds four they are considered a Fleet: on which a Pennant with 6 yellow and blue perpendicular stripes is hoisted.

If the Vessels in sight are Men-of-War in the North or South quarters, one of the numerical Pendants will fly over the National Flag on either side of the yard arm.

If Merchantmen are seen in the North or South quarters, one of the numerical Pendants will fly under the National flag on either side of the yard arm.

If a Fleet is in sight, one Gun will be fired after the signal of the fleet is made, and if there are two Fleets of different Nations, in the same point of the compass, the signal of the first seen Fleet will be lowered after the space of 15 minutes, and a fresh signal hoisted, which is likewise to be accompanied by a Gun.

A Steamer or a packet is also noticed with a blue flag pierced with yellow hoisted to the yard arm, or between the gaff and the main.

The annexed plate represents the flags of all Nations that trade to Madras: and the manner in which the Signals are made, to express Ships or Vessels discovered in the Offing.

The St. George's flag hoisted on either points of the yard arm with a white Pendant over it, announces a British Man-of-War.—The French or Tri-coloured flag of two points or Swallow tail, hoisted with a red and white Pendant over it represents two French armed Brigs or Snows, &c.; a broad American Pendant hoisted with a red Pennant pierced with white flying over it, represents three American armed Cutters, and a Dutch flag hoisted with a yellow Pendant, pierced with a blue over it represents four Dutch Men-of-War.

The St. George's colours are varied according to the colour of the Admiral of the squadron on the station for the time being.

If the numerical Pennant instead of flying over the national colours is hoisted under them they will describe the same class of vessels to be Merchantmen.

On the arrival of the Guard and Staff at the Presidency No. 1 is hoisted at the Fort flag staff with permission to fly until smaller portions of the same are received.

A gun or guns announce a Ship sails to Bay and with packets No. 8 is hoisted at the Fort flag Staff.

The number of a Man-of-War coming in, is shewn at both flag staffs by hoisting a Union Jack with American white border above the numeral flags. This is called a *Mercator's Union*.

By the new Code of 1841, ships shewing the ports they last sailed from, hoist the flag answering under the No. of the place, instead of over as formerly.

Commanders of Vessels are desired by the Master Attendant to hoist the numeral pendant at some other mast head when using the new Signal Code for that year, in order to distinguish it from the old one.

The flags in Marryat's Code are used by Americans, French and other Commercial European nations.

LIGHT HOUSE.

The Light House on the Exchange in Fort St. George was erected by the Exchange Committee, with the sanction of government, in December 1796, and is of essential service to Ships, coming to the roads in the night.

The Light is 90 feet above the level of the Sea at high water, and can be seen from the decks of the H. C.'s Ships about 17 miles, and from their mast heads near 26 miles.

The Supercargo Pollicat Shoal bears from the Light House N. by E. half E. distance 11 miles, and to keep clear of the Shoal the light should always bear to the Westward S. S. W. W.

INSTRUCTIONS RELATIVE TO THE LIGHT HOUSE AT PONDICHERRY.

The Pondicherry Light House is situated on the edge of the sea in 11° 55' 57" N. Lat. and 79° 50' 35" East Long. from Greenwich: It is a light of the 3d magnitude. The illumination is composed of six reflector-lamps, placed on a horizontal circle facing the sea. It was lighted for the first time on the 1st July 1838.

Rules for the management of the Disabled Boatmen's Fund, and also for the support and distribution of a Monsoon Fund.

1. The Disabled boatmen's fund for the relief of decayed and infirm boatmen and their families, being dependent on the amount realized by licence fees, mulcts, and fines, and extra boat hire on Sundays, under the provisions of Act. No. IV. of 1842, and the Rules and Regulations Subsidiary to that Act, shall be distributed after payment of charges for collection and management, as follows:

2. All males and females connected with the boat establishment, who can produce Certificates setting forth their respective claims for relief, will, provided those claims are held good by the Master Attendant, be admitted as Pensioners on this fund, when their names shall be duly registered, and each person shall be entitled to receive a pension in reference to their wants and the circumstances of the fund, payable on the first day of the month, but should either of those days fall on a Sunday, then the pensions will be paid on the 2d day of the month.

3. Should the income on this fund yield an amount beyond the monthly expenditure, the surplus shall be paid into the Government Treasury, in aid of the general fund for the relief of decayed and infirm boatmen and their families.

4. But if the income should be insufficient to meet the demands on it, it will then be necessary to reduce the monthly payment to each Pensioner, in such proportion as may be deemed expedient by the Master Attendant, in conjunction with the boat owners.

5. The monsoon Fund for the relief of boatmen and their respective families, when there is little or no employment for the boats or catamarans, will be dependent on voluntary contributions, and such a portion of boat hire as the Crews thereof may be willing to contribute from their daily earnings, when the boats are employed.

6. Therefore all Owners of boats and catamarans, and all other persons willing to contribute towards the maintenance of a monsoon fund, are to register their names and subscriptions under their respective signatures, at the Master Attendant's Office, and they are to state for whose benefit such contributions are intended, by inserting the numbers of the boats and catamarans, and the names of their respective Crews, and all persons comprising the Crews of boats and catamarans, who may be desirous of supporting this fund for the benefit of themselves and families, are in the presence of those boat owners in whose service they may be engaged, to declare their willing consent to the Master Attendant, and at the same time they are to signify what portion of their daily earnings they intend to lay by for this purpose, when the numbers of their boats and catamarans, and their respective names shall be duly registered.

7. If any persons herein referred to, subscribe more or less towards the support of this fund, for the temporary support of such boatmen as will be registered against their respective contributions, it will then become necessary to grant relief to the boatmen in such proportion as will be considered equitable by the Master Attendant and the Subscribers. But if any boat owners and their Crews refuse to consolidate towards the monsoon fund, they neither will nor can have any claim for relief or support from the said fund.

8. The distribution of the monsoon fund will commence on the 1st day of November and shall terminate on the 15th day of December, but should either of those days fall on a Sunday then the same will take place on the 16th day of the month. During this interval the Crew of each boat and catamaran whose claims are duly considered and registered as aforesaid, shall receive the amount per day of two ordinary trips per boat as per margin, and of catamaran hire as may hereafter be determined. Should any surplus fund remain at the expiration of the said term, during which relief shall be so granted as aforesaid, the balance thereof shall be paid into the Government Treasury, and will be added to the following year's subscription of the monsoon fund. But in the event of this fund being found inadequate to the above distribution, it will be expedient to reduce the shares, or limit the payment within a shorter period, and should such an event occur, the necessary arrangement shall be adjusted by the Master Attendant in conjunction with the boat owners.

9. Statements exhibiting the amount realized for the maintenance of the Disabled boatmen's fund, and the subscriptions in aid of the monsoon fund, together with a Register of the monthly distribution thereof, will always be open for inspection at the Master Attendant's Office.

1st. Application for the admittance into the General Hospital of any Officer or Seaman is required to be first made either personally, or by the Commanders or Agents of Vessels to the Master Attendant from whom an admission Ticket will be obtained, stating the name of the Vessel to which he belongs, and when discharged, the number of days' victuals such as may belong to any Ship or Vessel, the application will be required to be accompanied by a Certificate of reference for the payment of Hospital charges, &c.

2d. Cases of emergency, &c., will be admitted at the discretion of the Surgeon of the Hospital without reference to this preliminary rule, and due notice of the reception of any Officer or Seaman under such circumstances, will be communicated to the Master Attendant, for the purpose, as the case may be, of the requisite Certificate of reference being obtained.

3rd. The Commander of any Vessel on making application, either Directly or through his Agents, to the Master Attendant for the admission into Hospital of an Officer or Seaman, shall produce, in addition to the required security for Hospital Charges, a Certificate stating to the best of his knowledge, the nature of the disease under which the person has laboured, and if hurt, how, and in what manner such hurt or injury has been received. And should any Officer or Seaman be admitted into the General Hospital maimed or otherwise in a state which may be considered as incurable, without the abovementioned Certificate, the Master Attendant shall be made acquainted therewith, that such security as the law directs, may be obtained for all the expences which may be eventually incurred either for the provision of a passage to England, or to defray funeral charges.

4th. In the event of any Officer or Seaman not being sufficiently recovered to obtain his discharge from the General Hospital when the Ship or Vessel to which he may belong is about to sail, or being discharged from his Vessel while a patient in hospital, the responsibility for his expences, will attach to the party who gave the required security on his entrance until such person is discharged, unless otherwise directed; and of which information will be given by the Master Attendant, to the Surgeon of the hospital for his guidance.

5th. Early intimation will be made to the Master Attendant, of the intended discharge or other removal from the General Hospital of any Officer or Seaman admitted under the above Rules accompanied with a Certificate, stating whether he is fit for immediate service or otherwise. Similar intimation will also be made to the Master Attendant of the decease of any Marine inmate of the hospital, and to obviate the possible inconvenience from delay, the Surgeon of the Hospital will make the customary provision for the burial of the deceased, the charges for the same being certified by him and referred to the Master Attendant for sanction and ultimate recovery.

N. B. In the event of an Officer of a Merchant Vessel being admitted into the General Hospital on emergency, and there dying insolvent before any security for the payment of charges has been obtained, then the funeral of the deceased shall be conducted with as little expence as may be consistent with propriety.

6th. The Surgeon of the General Hospital will furnish to the Master Attendant on the first day of each month, and at intermediate periods on the discharge of an Officer or Seaman, a register shewing the number of days such Officer or Seaman has been in the Hospital, whereby the Master Attendant may be enabled to regulate the period for which payment is to be claimed from the Agents, or other responsible persons.

7th. The Master Attendant shall duly register the names of such Officers and Seamen as may be admitted into the General Hospital, and he shall remit the respective amounts which shall be recovered from the parties liable under such Certificate of reference as is herein before mentioned, to the Commissary General, in order to the final adjustment of all necessary accounts in the usual manner.

8th. When any doubt or difficulty may arise as to the required guarantee, or for the final disposal of any Officer or Seaman, it shall be the Master Attendant's duty to report the case direct to Government, that such measures may seem expedient be adopted, before any Ship or Vessel be question obtains her Port Clearance.

9th. The Master Attendant will submit through the Marine Board, when necessary, for transmission to the Home Authorities, the documents required by Section 87, Act 11. Geo. IV. Cap. 20.

The Directors of this Society have caused investigation to be made with great care into the existing Institutions for Life Assurance, &c. &c., and they trust they have been successful in framing such rules as combine, with some important modifications, the most judicious and satisfactory features both to the Public and the Assured. They request particular attention to the rates, which being founded on the most accurate observations of the duration of human life, are as moderate as is consistent with perfect security.

The plan of this Society is to transact all its business on such terms as to leave, in all human probability, a small but certain excess of profit on the general results of its transactions. A small portion of that profit is set apart as a compensation to the Proprietors who have advanced the Capital necessary for defraying the extraordinary expenses of establishment, and who have to bear the subsequent account of their Capital in order to afford that responsibility which relieves the Assured from any contingency of loss to which they might be liable without the intervention of such a guarantee.

GARDENERS' CALENDAR.

INTRODUCTORY REMARKS.

We can scarcely imagine a more unsatisfactory task to enter upon than that of attempting to compile a Calendar of Gardening for India, owing to the variety of the thing, and the almost total want of local Horticultural records; interposing a variety of difficulties which must be surmounted before we can almost advance a step, and continue, more or less, to impede our progress nearly to the end. We shall briefly notice some of these by way of preface, partly as an apology for the imperfections of our own, but principally in the hope of inducing practical Horticulturists to lend their aid, in enabling us to bring the future annual editions of these notes or memoranda nearer to perfection, by contributing such practical information as they may consider suitable to supply our, no doubt, numerous deficiencies in this first essay at forming a Gardeners' Calendar for Madras; which, we are most anxious to impress on the minds of our readers, is not to be far from considering a finished work, that we look upon it as a mere nucleus or foundation, on which many must build before the edifice can be completed.

In stating the difficulties therefore which beset our path in this first attempt, we may begin by reminding our readers, that it is the business of Almanacs compilers to convey to persons every one, whereas in this department, having no local records to which we can turn with the certainty of finding in the accumulated experience of ages whatever may be required, to enable us to give an epitome of all that is necessary for such a work, we fear we shall not be able to please any one. If we endeavour to compile from European records, the very first step we take leads into almost inextricable confusion, for there, the Gardeners' Calendar commences in January, a season when but little beyond preparation for future operations can be attempted; whereas to us, January is about the conclusion of our active season; a period, after which little can be done on account of the approaching hot season of the year. Hence, if we begin with it, we should be constrained, contrary to the plan we now oppose, of introducing our Calendar with a Preface, to direct at once to *neither* ex and difficulties leave it like a ring without either beginning or end. For these weighty reasons we propose adopting the spirit, while we depart from the letter of European Calendars, and commence ours, as they do theirs, with the season of preparation, as being equivalent to the European winter; gradually advance through the season of action; and rest from our labours during the dog-days, when further application to out-door-work becomes disagreeable; or even liable to injure the health. In this way we hope to conquer our first difficulty. The next is not so easily overcome. The seasons differ in different parts of the country, while we write for the climate of Madras alone. On this point we must solicit those of our up-country readers who select our notes as their Horticultural guide, to exert their ingenuity to adjust them to their respective localities, and to communicate the result for record in future editions, for the advantage of their successors. And lastly comes, what to us is the greatest difficulty of all, we are ourselves but indifferent practical gardeners, having, in the course of our rather prolonged sojourn in India, had but few opportunities of following the bent of our inclinations by engaging freely in that delightful pursuit. This lack of knowledge, combined with the want of written records, already adverted to, from which to compile, give us but too good reason to fear that many of those who consult this portion of our annual will find incorrections necessary on which to exercise us of ingenuity, and even to throw aside our directions as the production of mere pretenders and theorists, sometimes to which, on some occasions we must plead guilty, but trust we will not be denied a patient hearing when it is borne in mind, that practice is the basis of sound theory, and that until practice is reduced to theory it is mere empiricism, which may, perhaps, be successfully repeated so long as circumstances are the same, but cannot explain or guard against the success of failure, or be modified by the empirical practitioner to meet unforeseen contingencies and altered circumstances. On these grounds and under the foregoing conviction that mere practical communings we have ventured to submit the most acceptable prospect we can make to our Horticultural supporters, to see our Calendar with a treatise on the first principles of Horticulture, something after the manner of Dr. Kindley, Secretary to the Horticultural Society of London, very essential to Indian Horticulturists and best writers on all matters appertaining to vegetable Physiology as applied to the establishment of Gardens, or selecting situations, and who we are happy to observe, has it in contemplation to publish a complete Treatise on Horticulture. Judging from his high qualifications for the task he has imposed upon himself, we doubt not it will prove one of the best works extant on the subject.

Our Calendar we begin, as formerly, with July, that being the month, most nearly equivalent to Indian Horticulture, in January in Europe. On the present occasion it has been carefully revised and several additions made which, we hope will be found useful in better adapting to supply the objects for which it was originally drawn up.

JULY.

The heat and drought of the preceding two months have so baked, parched, and heated the ground, that it becomes almost impermeable to the showers which, in the course of this as well as the preceding month from time to time cool and refresh the air, not except from influences on the soil, owing to the rapid evaporation which under the circumstances stated, immediately succeeds, hence the benefit that might be derived from them is lost to the Horticulturist, unless he adopts the precaution of previously breaking up the ground he intends for early crops. This operation by freely exposing it to the action of

the air and sun, not only renders it rapidly absorbent of moisture and less retentive of the heat it had previously absorbed, but greatly improves its fertility. When so prepared the first considerable fall of rain cools and pulverizes it sufficiently to suit it for the reception of seed. Generally speaking however, this month is too early to begin gardening to any considerable extent, so that with the exception of a few seed, sown for early crops in well protected beds, full sowing should not commence until the hot land-winds are well over.

The beds first sown require to be protected from both the hot winds and intense heat of the mid-day sun. In England, dwarf peas are sown in frames in January, to protect them from the cold; perhaps, with precautions similar in kind, but for a diametrically opposite purpose we might equally enjoy the luxury of early peas. The method we would recommend to obtain this desideratum, is to sow in ground well sheltered from the wind and shaded from the sun, between rows of plantain trees, for example, previously prepared are by repeated digging and liberal watering, to cool the soil, as much as possible and provide abundance of moisture to supply the excessive transpiration which takes place from the leaves of such tender plants at a season when the air is so exceedingly dry. With these precautions, we might, we think, have peas early in September, if not even in August, and salads all the year round. We shall here observe a rule, which by the way, cannot be too strongly insisted upon; that the principles of forcing, both here and in Europe, are the same, namely, the artificial production of circumstances suited to the support of vegetable life, while the natural condition of the soil and climate are adverse: the processes however, by which this is to be accomplished are directly the reverse in the two countries. There bottom heat and protection from frost, and cold bleak winds are required; here the abstraction of the already excessive bottom heat, and protection from the too intense rays of the sun, and shelter from the hot, dry, parching, land-winds, are demanded. Here, to obtain our ends, trenching, very liberal watering, and shading from the intense heat of the sun, to allow the soil to cool, must in the first instance be resorted to; then enclosing the plots of ground under cultivation with close fences, to exclude the wind, and lastly, shading them for some hours daily from the too powerful rays of the sun. Screens of palmyrah or plaited cocoanut leaves, might suffice to shelter them from the wind, while an awning that would intercept the direct rays of the sun without too much excluding the light, would supply the protection required from above after transplanting from the seed-bed.

For forcing, it is the practice in England, where no expense is spared towards insuring early returns from the garden, to sow the seeds in glazed frames or green houses, and to keep the young plants there until they have attained sufficient size and strength to admit of their being planted out in warm sheltered borders, with the advancing mild season. Paradoxical as it may appear, we have no hesitation in affirming, that horticulture can never be materially advanced, nor really early crops procured until we adopt a similar method (by glazed frames) of protecting our seedlings, only they must be used differently. In England, their object is to obtain an equal temperature higher than that of the open air, ours, to maintain one, if possible lower, but not exceeding that standard, combined with a humid atmosphere in immediate contact with the plants, to prevent their being scorched and dried up by over perspiration. Glazed frames will accomplish these desiderata if we keep the soil within, moderately moist, and the glasses close and shaded during the day. These frames might be made up at very small cost; four planks of the cheapest kind of wood about 18 inches broad joined together and covered, after the manner of melon frames, with glazed sashes like windows, would form very adequate forcing frames. They may be made of any size, but several small ones might answer better. The ground being prepared by repeated digging, liberal watering and shading for some days from the sun, to allow it to cool thoroughly, might then be covered by the frame and the seed sown. The frame should at first be shaded all day from the sun, afterwards only during the heat of the day. In this way a humid atmosphere will be procured for the young plants until, by the extension of their roots, they are able to absorb sufficient humidity to counteract the excessive perspiration caused by the heat of the climate. As this impediment to success, a dry and hot climate, will continue long after the plants are fit for transplanting, the beds into which the young plants are to be transferred require to be prepared with the same care as that for the seed, and protected from the drying winds by enclosing them with well made hurdles and covering them with a thick shade until the plants have taken firm hold of the soil, as it is quite impossible, that tender plants can absorb moisture enough to enable them to support the copious transpiration which would take place from their leaves at such a season, if not prevented by being surrounded by a perfectly still and humid atmosphere. For farther information on this subject we beg to refer to the principles.

With the precautions above stated, all the smaller kitchen vegetables that bear transplanting may be sown in the course of this month, and many even earlier, such as Celery, Beet, Knoll-koll, Cabbage, Cauliflower, Brocoli, Asparagus, Endive, Lettuce, Carrots and Turnips, and advantage should be taken of every shower to dig and prepare portions of ground for future operations. The more lumpy it turns up the better, as it is so much the more freely exposed to the action of the air, which tends greatly to augment its fertility.

If it prove difficult or inconvenient to get the frames we have in preference recommended, the seeds may be sown either in well covered beds or in boxes.

Cabbage, Knoll-koll, Brocoli, and Cauliflower require to be transplanted at least twice—The first time into smaller shaded beds and then into those in which they are to remain. It is recommended to transplant the two last a third or even a fourth time. Both require a very rich soil and moderate supplies of water.

Lettuce and Endive succeed best in a light well manured soil and are improved by being twice transplanted, first into small shaded beds and then into the garden. It

We are [illegible] from having sustained much [illegible] season, which we attribute to the dry and heated [illegible] of affording them the supplies which the [illegible] consequent, rapid transpiration from their surfaces [illegible] vegetables may now be safely sown, and if [illegible] of the preceding season should be transplanted [illegible] for seeds [illegible] and carrots intended for seed [illegible] otherwise the seed will be poor and [illegible] in the [illegible] in the attainment of [illegible] application of [illegible] and the greatest possible [illegible] Having once attained success, by the [illegible] may almost consider those plants naturalized among us, [illegible] habits of complete naturalization; still even partially [illegible] for early crops [illegible] this month at four [illegible] four or three inches between the [illegible] without injury to the roots. prevented: for the same reason, they are best watered by conveying a stream of water along the furrow between the rows, thus watering the roots only, and not the stem and leaves, which do not require it so long as the ground is kept loose and moist. The trenches require to be 3 or 4 feet apart. By pursuing this plan, we shall not only have sound and healthy plants for use, but uninjured ones with abundance of roots for transplanting to stand for seed.

Cucumbers and Melons may still be successfully sown, though this is about the limit of the season for them, as the heavy rains of October generally destroy these plants, which only bring their fruit to perfection during the dry season.

Carrots and Turnips may be sown in this month, with a better prospect of success than if sown earlier. We believe, they will generally be found to succeed better, when sown in rows on ridges, and watered at first by the hand and afterwards by a stream of water conveyed along the furrows between them, than when sown broad cast in small beds, according to the usual native practice, and watered all over. We have even known the thinnings from these beds, when transplanted into ridges afford better produce than those left undisturbed. A principal objection to the native practice is its tendency to cause a great production of roots over the whole tuber, and force the plant to run rapidly to seed, and at the same time making the tuber hard and stringy, an effect which we should by all means try to prevent, as the seeds so produced are seldom good, while the turnip itself is spoiled. To procure good seed transplanting into fresh and highly manured soil is necessary. By the method of culture we propose nourishment is supplied through the long slender roots only, that shoot deep into the soil, to be conveyed to the tuber, where it is stored as in a reservoir for the nourishment of the plant during the period of fructification, which is delayed by limiting the supply of nourishment from without. Our own experience does not yet admit of our advising the whole of the cabbage family to be so treated, but from some trials we have made, we think they will be found to succeed better under ridge cultivation than as now usually planted in furrows and, almost daily, deluged with a copious stream of water.

SEPTEMBER.

Having in the preceding pages endeavoured, we hope successively, to establish general principles, we need in what remains be more concise, as we have no doubt those who practise, and take an interest in horticulture, will easily be able, at whatever season, to apply the simple rules we have submitted for their consideration to the improvement of the productions of their gardens. In the course of this month the same things may be repeated, or the seeds already mentioned might be sown for the first time, with probably a better chance of success, than if sown sooner. It is however desirable that sowings should not be much longer delayed, as the heavy rains of October and November are apt to injure the young plants, unless they have attained considerable strength and size, and it is desirable to have those requiring transplanting sufficiently advanced to admit of advantage being taken of the intervals of fair weather between the falls of rain, as the ground is then in the best state to ensure success.

Beans and Peas. Beans of all kinds may be sown, as the tendency of their roots to penetrate deeply into the earth render them less liable to injury from drought, should the [illegible] whether much better than peas. Peas [illegible] at this season, if a full monsoon is experienced, are apt to suffer, or be altogether [illegible] in October, in ground sufficiently elevated to prevent flooding and stagnation of water, are not exposed to the same risk, as they are not so far advanced as to be destroyed by rough weather, usually experienced in early part of November.

Strawberries. We have as yet had but little experience in the management of Strawberries at Madras, but we believe about the end of this and beginning of next month as the most appropriate season for transferring them from the nursery to the forcing beds.

OCTOBER.

This month in the Indian Horticultural Calendar in many respects resembles April and May in Europe. Here October usually commences with two or three rainy days, then [illegible] and warm till between the 15th and 20th, when North-easterly winds and [illegible] in like manner, April is usually a coarse stormy month in Europe, while May has mild warm days, but often cold frosty nights: with us the nights are agreeably cool though the days are often excessively hot, but upon the whole there is an evident diminution of temperature, towards the end of the month the rainy season commences, [illegible] with occasional intervals until towards the end of November.

[illegible] the time to sow the main crops of most of our esculents and transplant the earlier sown ones. Carrots, Turnips, Cauliflowers, Broccoli, Cabbages, Knoll-kohl, Peas, Beans, Onions, Asparagus and in a word, seeds of all kinds.

Cauliflowers, Cabbages, &c. In the management of Cauliflower but little progress has as yet been made in the plains of India, apparently, owing to the heat of the climate. We would suggest as the most probable means of attaining greater success to sow early, [illegible] and again early in December into similar [illegible] and well manured soil, so as to afford a [illegible] length of the stalk could conveniently allow, loosening and banking up the soil [illegible] without much watering, loosening and banking by the hand and [illegible]. The watering ought to be performed by the hand and [illegible]. This we would recommend rather to refresh the plants than affect the roots, [illegible] that an exuberant vegetation caused by much watering invariably [illegible], while a rich but comparatively dry soil, would supply [illegible] without causing a too great formation of leaf. The same method would [illegible]

[illegible] well with Cabbage, which rarely heart well in the Carnatic [illegible] manageable than Cauliflower, and Broccoli. The system [illegible] has besides a tendency to draw (if I may so say) [illegible] where they are scorched by the sun during the day and [illegible] vicissitudes alike injurious to both plants and animals. [illegible] topes of tall cocoanut trees, supposing such a situation [illegible] affording moderate shade during the day, and by in [illegible] heat during the night would, by moderating the cold [illegible] the range of temperature, and render such precautions less necessary. [illegible] are freely exposed to such vicissitudes, it is incumbent [illegible] counteract their injurious operation, by protecting well the organs [illegible] the health of the plants so materially depend, either by planting [illegible] as the nature of the plants will permit, or by adopting [illegible] covering the ground with litter or any other more appropriate [illegible] may enable us to invent.

Asparagus. The end of this month or the beginning of the next is the season for the first transplanting [illegible] bed. They have not been much cultivated about Madras, [illegible] to admiration in their culture.—The method he [illegible] times, before putting the plant in the spot where it is [illegible] to be planted deep, in a well manured soil, the stem [illegible] a mound and small ditch round the base, and freely watered [illegible] with water.

NOVEMBER.

If the [illegible] the last month have been followed out, little remains to be [illegible] crops; hoeing and keeping the garden clear of weeds, [illegible] sticking peas and beans, transplanting such things as [illegible] and gootteeing such trees and shrubs as we may wish [illegible]

[illegible] removing a ring of bark, from a branch immediately [illegible] of well mixed earth, sand and cowdung tied in gunny [illegible] the whole constantly moist until a crop of young roots [illegible] the branch is then fit to be removed and [illegible] than expeditious method of multiplying fine varieties [illegible] of which we wish to increase our stock. All operations [illegible] by a cool and humid atmosphere, are best performed [illegible] two months.

[illegible] properly we believe towards the latter end of next [illegible] is considered the proper time for opening the [illegible] it appears, that when there are many trees, it would [illegible] succession of crops by pruning so many now for the [illegible] later in December or January for a June crop, after [illegible]. Indeed it seems not improbable, in a country [illegible] and can at all times be kept moving, that we might, [illegible] vines, have grapes from February until October. [illegible] the experiment that flowering creepers can be kept [illegible] standards, by merely cropping their very vigorous shoots [illegible] enough to admit of their lower buds, throwing out fresh [illegible] might be kept constantly throwing out new, fruit- [illegible] protected from the intense heat of the sun by a [illegible] by constant manuring, liberal supplies of water [illegible] the soil over them.

DECEMBER.

[illegible] transplanting for successional crops must still be continued [illegible] advanced, but as the dry season they can scarcely be [illegible] advanced period. Salads of all kinds as well as [illegible] to be used as Brussels Sprouts may [illegible] that if they are not after the last week of November [illegible] to perfection. This rule is not without exceptions [illegible] Madras Market as late as the middle of [illegible] the more general failure is attributable [illegible] of the climate.

[illegible] is dry and free from blight and [illegible] which causes premature decay. Pots [illegible] sufficiently apart to admit of free circulation of [illegible] allow the sun's rays to act on every [illegible]. When running in the opposite direction [illegible] several hours each day, while the confined and warm [illegible] gives rise to the formation of [illegible] to the health of the plants. Transplanting [illegible] must be continued throughout the whole [illegible] diligently pursued; but watering sparingly [illegible] being already sufficiently moist. Towards the [illegible] Cucumbers. These require a rich moist soil and [illegible] Pandals.

MARCH.

of past labours, nor ought we even at this advanced season altogether relax from our Horticultural operations, though we are unable to specify any course that ought in preference to be pursued towards supplying ourselves with fresh vegetables through the months of July and August, the scorching winds of May and June having previously arrested vegetation in nearly in all herbaceous plants. Towards the end of this month and the greater part of the next, Grapes and Pineapples are in season. The latter, we know, may be had nearly the whole year, where there is a large plantation, by opening the roots and manuring successive portions so as to bring them successfully into bearing. These plants require to bring their fruit to perfection, on a rich soil highly manured with decayed vegetable matter, and during the bearing season liberal supplies of water. We have already expressed our belief that the former (Grapes) with proper management might equally be produced through several months perhaps the greater part of the year. Fresh crops of Cucumbers and Melons should be sown.

APRIL.

In the course of this month we believe nothing new can be undertaken in the garden, but those portions which are exhausted or otherwise vacant should be turned roughly up from time to time to give the soil the advantage of free exposure to the air, as well as to prepare it by a following process, for the next season, as to destroy seeds and roots of weeds, which it may contain, by exposure to the sun. The earlier, sown melons should now be arriving at maturity and should be kept up by successive sowings.

MAY.

The same as last: our supplies of vegetables diminishing both in quantity and quality. Mangoes now begin, and Pineapples continue in season. Grapes begin to diminish in quantity or altogether disappear after the heavy rains which usually occur about the beginning of this month, previous to the commencement of the westerly winds, but which, by successional pruning, might be rendered available for procuring of fresh crops of this delighting fruit.

JUNE.

Generally but little can be done in the garden this month; but with the aid of careful protection from the hot land winds and sun we might commence sowing for early crops especially Salads, some Cabbages, Turnips, &c. for transplanting with the precautions mentioned under July.

We here bring these hasty memoranda to a close; not we confess without regret for their numerous and manifest imperfections; but at the same time, not without strong, and we trust well founded hopes, that they may form the basis of a greatly improved calendar at no very remote period. Should any of our readers complain of the numerous omissions in our practical details, we beg to remind them that our professed object at the outset was rather to endeavour to suggest principles than dilate on practice, for which, want of opportunity to carry our ideas into execution, had in a great measure disqualified us. To show however that we have not exaggerated the difficulties attendant on the completion of such a work as the one we have here attempted to sketch, we may state, that nearly two years have elapsed since the "Agricultural and Horticultural Society of India" printed and distributed to every part of India, a circular soliciting the information required to enable them to prepare a work, embodying a brief summary of the principles of Gardening, and a Gardener's Calendar, but which, for want of materials, they were constrained, at least for the time being, to abandon. As that Circular presents a brief but comprehensive summary of what ought to be the character and objects of such a work, as well as of the kind of information required for its completion, we republish it for the benefit of those of our readers who might not previously have had an opportunity of seeing the original; but who might be able to contribute a mite towards supplying this great desideratum to Indian Horticulture, and in the hope, that some at least of the admirers of a flourishing garden, may be induced to commit to paper and publish the results of their experience for the benefit of their less fortunate, though perhaps, not less diligent, fellow-labourers who may have been long striving in vain to attain equal perfection. Papers detailing successful methods of cultivating any of our European or other exotic vegetables which it is desirable to introduce being communicated to the Horticultural Society of India, will always be thankfully received, from whatever quarter they may come, and meet with immediate publicity.
