6. North of the Nerbudda the Holkar and Neemuch State Railways pass almost entirely through Native States. Speaking generally of these lines, it is stated that railway accommodation is afforded to all large towns and centres of trade in Western Malwa. A good road from Mhow is being made to Dhar, the only place of importance to the west of Mhow. The Agra and Bombay Road passes through Indore and Mhow, and there is also a fair road from Indore to Sehore and Bhopal. His Highness the Maharajah Holkar is also now making a fair weather road from Indore westwards to Dypalpur. A road from Oojein to Augur is also going to be made, and a branch from this to the cantonment of Mahidpur; the Director says, may also be found advisable.

7. The Director adds that some roads leading to Rutlam, Jowra, Mundisore and Neemuch, all in Native States, will doubtless be required, and that the Agent to the Governor General for Central India is about to make some definite proposals.

8. The Chief Commissioner, Central Provinces, hopes to arrange gradually for the construction of the following feeder roads in connection with the Wardha Valley and Holkar State Railways, commencing from 1876-77. Should it, however, be possible, Mr. Morris says, a supplementary grant for some of the roads will be made during the current year:—

List of proposed feeder roads to the Wardha Valley State Railway.

(1) Road to Sonegaon from the Wardha Valley road.
(2) „ to Kawarghât.
(3) „ from Edulabad to Warrora.
(4) „ from Mul to Chanda.
(5) „ from Dhaba to Chanda.
(6) „ from Warnaira to Sonaigaon.
(7) „ from Simoor to Hingunghât or Warrora.

List of proposed feeder roads to the Holkar State Railway.

(1) Road from Sanawad to Mandhata.
(2) „ „ „ to Khanapore.
(3) „ „ „ to Sulgaum.
(4) „ „ „ to Kheri.
(5) „ „ Kheri to Suktapore.
(6) „ „ „ to Atud.
(7) „ „ „ to Dhangaon.
(8) „ „ Atar to Dharwar.
(9) „ „ Sulgaun to Onkar Mandhata.

The Government of India are gratified to hear of these good prospects of the provision of feeder roads both as regards the northern portion of the Holkar State Railway, of the extension to Neemuch, and of the State Railways in the Central Provinces, and they trust that an early commencement will be made of some of the roads mentioned.

9. The Consulting Engineer at Lahore reports that the existing means of access to the stations on the Scinde, Punjab and Delhi Railway from the nearest public roads are sufficient for all purposes. In regard to feeder roads, the following remarks are made in connection with three railway stations in the North-Western Provinces, to which the Government of India invite the attention of that Government:—

(1).—*Sirsawah*—
"The only road leading to this station which, in the opinion of the Civil Officers, requires improvement is the one between Sirsawah and Chilkana. It is a kutcha road like the others, but the Collector recommends that it be metalled."

(2).—*Saharunpore*—
"The road to Dehra is metalled, but the others are unmetalled. The Collector considers that the road to Kurralee *vid* Gungoh, which is an important one, should be metalled throughout. A portion of it has recently been metalled on the recommendation of the district authorities. The roads of access are deemed sufficient for the purpose."

(3).—*Deobund*—
"The existing roads are from Munglour, Bijnour, and Saharunpore. These are good district roads and are considered sufficient for the traffic. The station is connected to the Grand Trunk Road by a metalled approach, and the district roads all lead across this Grand Trunk Road. Should the branch line from Rohilkhund to Roorkee not be constructed, the Collector recommends that the road leading across the Kalee Nuddee to Roorkee be raised and bridged, and the road connecting Roorkee and Nujeebabad in the Bijnour district be completed. At present this latter road exists only as far as Looksir, 13 miles from Roorkee."

In addition however to these, there is little doubt that very much remains to be done to improve the feeder roads in connection with the railway stations on the Scinde, Punjab and Delhi Railway, and this subject is commended to the continued and earnest attention of the Government of the Punjab and of the authorities in Scinde under the orders of the Government of Bombay.

10. The information obtained with regard to feeder roads to the East Indian Railway has been tabulated and will be found attached to this Resolution. The attention of the Governments of Bengal and of the North-Western Provinces is invited to the remarks made by the Railway Company's officers.

11. With reference to the Eastern Bengal Railway a report is being prepared, which will form the subject of a subsequent resolution.

12. The Government of Madras has submitted a list of the feeder roads required for the Madras Railway, and adds that the list has been transmitted to the Local Fund Boards, in whom is vested the responsibility for the construction and maintenance of such roads. A similar list is promised for the South Indian Railway.

13. In conclusion, the Government of India would urge on the Local Governments and Administrations, and upon the Rulers of Native States, the utmost possible efforts in respect to feeder roads. It is known that throughout India, except on certain great highways, the means of communication are of the rudest and most primitive kind, suited in a certain degree to the wants of an agricultural and pastoral community, but very inadequate to assist materially in giving a full impulse to traffic and the exchange of commodities, which it is a main object of railways to foster. It is also known that throughout the vast area of country through which the trunk lines of railway pass it is impossible at once, or even within a moderately short space of time, to complete a perfect system of metalled and bridged roads. But a commencement should be made from railway stations as nuclei by devoting the funds at disposal in laying out roads which shall be fairly traversable in all weathers to the nearest large villages and small towns, not attempting too much in the first instance. It is suggested that in appropriating Provincial funds more should be devoted to roads and less to civil buildings.

In cases where water communication can be made available or extended, that important means of transport should be also carefully considered in connection with railways and feeder roads.

ORDER.—Ordered, that this Resolution be communicated to the Governments of Madras and Bombay, to the Chief Commissioners of Oudh and the Central Provinces, and the Agent to the Governor General for Central India, and to the Consulting Engineers at Calcutta and Lucknow, for information and such action as seems required; also to the Governments of Bengal and the North-Western Provinces for the same purpose, with copies of the tabulated statement referred to in para. 9.

Also to the Government of the Punjab, the Chief Commissioner, British Burmah, the Resident at Hyderabad, the Agent to the Governor General for Rajpootana, the Consulting Engineer at Lahore, and the Director of State Railways, for information.

Also to the Home Department for publication in the Supplement to the *Gazette of India*.

C. H. DICKENS, *Colonel, R. A.,*
Secy. to the Govt. of India.

Remarks.

Ganges Canal.—The canal was closed throughout the month.

Eastern Jumna Canal.—Steady demand up to the 9th, when heavy rain fell over the lower half of the canal and moderate rain in the upper half. The canal was closed from the 10th to 16th and again on the 18th, there being no demand for water.

Dún Canal.—No remarks; but very little irrigation effected during the month.

Agra Canal.—Ditto.

Bundelkhand Canal.—Ditto.

Rohilkhand Canal.—Ditto.

ALLAHABAD,
The 6th October 1875.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th NOVEMBER 1875.

GENERAL REMARKS.—Little or no rain has fallen throughout India during the week, with the exception of Madras, where the N. E. monsoon continues. There have been slight showers in the Southern Mahratta country and Ahmednagar in Bombay, and a scanty fall in Mysore and Coorg: a shower is also reported from Assam; elsewhere the returns are blank. Prospects continue unchanged. Rain is wanted in some of the Deccan districts of Bombay and in Bengal: in the latter province the failure of the late rice crop in some of the Northern districts is reported to be less in extent than was at first anticipated. In most provinces the kharif harvest is progressing with a fair outturn, and preparations for the rabi going on with good promise.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kurnool (Nov. 17th)	...	Good rain in Cumbum and Markapur; none elsewhere; standing crops good; harvest of jonna, sajja, and korra continues; water and pasture abundant; markets moderately supplied; prices steady; fever prevalent; cholera, 32 seizures, 23 deaths; cattle disease in some villages; no water over Sunkésala anicut.
Tanjore (18th)	4·52 at Negapatam.	Rain elsewhere moderate; water in rivers increasing; supply to tanks small; water over lower anicut—north branch 1 inch, south 2 inches; cultivation wet and dry crops; standing crops generally good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; fever and small-pox in some parts, two deaths from former; cholera abating, seizures 54, deaths 38; cattle generally healthy; pasture generally sufficient.
Trichinopoly (17th)	About 1·0 in town; between 1·5 and 3·5 in district.	Water supply sufficient; crops in good order; prices slightly fallen in one or two taluks; elsewhere steady; cholera re-appeared in town; slight in district.
Kistna ...	...	Not received.
Malabar ...	...	Not received.
		General remarks.—General prospects satisfactory.
Bombay— (Nov. 18th)		
Sind.		
Kurrachee (Nov. 17th)	...	No change; rats in Shâhbandar taluka; barani crops in Schwan have suffered from insufficiency of rain.
Hyderabad ...	...	No change.
Shikarpur ...	...	Bad form of fever in Rohri has disappeared; ordinary fever prevalent all over the Collectorate; great preparations for rabi.
Guzerat.		
Ahmedabad ...	...	Rabi crops well.
Kaira ...	...	Rabi sowing progressing; weather not sufficiently cold; public health good.
Surat ...	...	No change.
Broach ...	...	Crops good; fever prevalent.
Khandesh and Nasik.		
Khandesh ...	...	Rabi plants thriving; picking of American cotton over, ginning commenced; ague prevalent.
Nasik	...	Kharif crops middling; rabi sowing commencing, except in some places where it is retarded from want of rain; reaping of kharif continues.
Konkan.		
Tanna ...	...	Kharif reaping nearly completed; rabi sowing progressing; very slight cholera in two villages of Kalyan taluka.
Deccan.		
Poona ...	...	Condition of crops the same as before; rain wanted in some talukas.
Ahmednagar ...	0·2	Total rainfall, 17·86; more rain wanted for rabi crops; kharif harvesting nearly finished; two cholera cases, one death.
Sholapur ...	...	No change.
Satara ...	...	Harvesting of kharif progressing; rabi crops middling, and in some places yet unsown for want of rain; slight cholera in Tasgaon.
Southern Mahratta Country.		
Belgaum ...	0·25	Total rainfall, 56·70; 78 deaths from cholera; early crops being harvested; cotton crops well; cattle disease in Athni.
Dharwar ...	0·55	Total rainfall, 30·51; rice and jowari crops being reaped; cotton good; sowing of late crops completed; cholera decreasing in some places.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kanara ...	...	Weather hot; harvest commenced above Ghât; three cholera cases in Supa taluka.
Kaladgi ...	...	Kharif reaping commenced; rabi and cotton crops thriving; 43 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Kharif harvesting over; cholera continues in Gondal taluka.
Wadhwán ...	...	Crops good; cholera at Limri subsiding, in other places out of 23 cases eight proved fatal.
Baroda ...	...	Operations for rabi crops progressing; cotton crops and public health good.
		General Remarks.—More rain wanted in Nasik, Ahmednagar, Poona and Satara; cholera decreasing in Dharwar and Belgaum; prospects of crops in Guzerat and Khandesh fair; in other districts, moderate.
Bengal—		
Chittagong ...	*Nil*	
Noakhally ...	*Nil*	Cholera has appeared both in the town and out in the district.
Chittagong Hill Tracts...	*Nil*	
Hill Tipperah ...	*Nil*	
Backergunge ...	*Nil*	
Furreedpore ...	*Nil*	Cholera has also appeared in the Goalundo sub-division; measures have been taken for the supply of medicines to the affected localities.
Dacca ...	*Nil*	Sporadic cholera reported from every thana, but not to an extent greater than usual at this time.
Mymensingh ...	*Nil*	Cholera is reported to have broken out in some parts of Kishoregunge and Atea sub-division.
Tipperah ...	*Nil*	
24-Pergunnahs ...	Not received	Isolated cases of cholera reported from Diamond Harbour, Baraset, Busseerhat, and Dum-Dum sub-divisions; fever prevailing at Barripore, Dum-Dum, and Busseerhat.
Jessore ...	*Nil*	
Nuddea ...	*Nil*	Cholera is more or less severe in each sub-division. In the north of Chooadangah it is beginning to abate.
Moorshedabad ...	*Nil*	Fever increasing in Sujagunge; still a few cases of cholera reported from Nowada.
Pubna ...	*Nil*	
Rajshahye ...	*Nil*	Thirty-one cases of cholera reported during the week; four proved fatal.
Bogra ...	*Nil*	
Maldah ...	*Nil*	Thirty-two persons were reported to have been attacked by cholera; ninety have died from the disease during the week; eighty-four of the deaths were in Khurleah thana.
Dinagepore ...	*Nil*	Sporadic cases of cholera in the district.
Rungpore ...	*Nil*	
Cooch Behar ...	*Nil*	
Jalpaiguri ...	*Nil*	There is still a great deal of sporadic cholera in the district; there are but few places where cholera has not appeared, and the greatest proportion of the cases are fatal. The cold weather has not yet set in, and till it does, we cannot expect the cholera to cease.
Darjeeling ...	*Nil*	
Midnapore ...	*Nil*	
Howrah ...	*Nil*	
Hooghly ...	*Nil*	
Burdwan ...	*Nil*	Small-pox has appeared in the east of the district.
Bankoorah ...	*Nil*	Fever is reported from the south-east of the district.
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	*Nil*	
Bhágalpur ...	*Nil*	
Mongbyr ...	Not received	
Purneah ...	*Nil*	Fever still very prevalent and spreading in Arrareeah sub-division; cholera still hangs about in places.
Darbangah ...	*Nil*	
Mozufferpore ...	Not received	
Sarun ...	*Nil*	General health good.
Chumparun ...	*Nil*	
Patna ...	Not received	Health good.
Gya ...	*Nil*	
Shahabad ...	Not received	
Hazáribágh ...	*Nil*	
Lohardugga ...	*Nil*	General health good.
Maunbhoom ...	*Nil*	
Singbhoom ...	*Nil*	District is healthy.
Balasore ...	*Nil*	Fatal cases of cholera reported from several villages.
Cuttack ...	*Nil*	Cholera diminishing, but not yet extinct.
Pooree ...	*Nil*	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal --*continued.*			*General Remarks.*—No rain is reported from any of the districts, excepting a sprinkling in one thana of Maldah. The main rice crop in districts not affected by the drought is doing well, but the crop on high lands is said to be suffering a little from want of rain. The unsatisfactory prospects in North Behar and North Bengal are unchanged. But in some of these districts the failure of the rice crop is now reported to be somewhat less than was at first anticipated. Early amun rice is being harvested in parts of Bengal with fair results. The sowing of the cold weather crops is progressing favourably in most districts, and the rabi is said to be germinating fairly.
N. W. P.—			
Benares	(Nov. 15th)	*Nil*	Nothing of importance to communicate.
Allahabad	17th	...	No change.
Cawnpore	,,	...	Prospects continue most favourable.
Banda	18th	...	No change; prospects good.
Jhansi	,,	*Nil*	Outturn of minor kharif crops good; jowar, cotton and rabi prospects good.
Agra	17th	*Nil*	No change.
Meerut	,,	...	No change.
Moradabad	,,	...	Nothing to report.
Bareilly	,,	...	No change.
Azamgarh	18th	...	Prospects good, but the transplanted rice crop will be somewhat below average.
Punjab—			
Delhi	(Nov. 17th)	*Nil*	Kharif harvested; rabi sowings in progress; health good.
Hissar	,,	*Nil*	Kharif being gathered; rabi sowings favourable; a little fever, but health generally good.
Jullundur	,,	*Nil*	Kharif being reaped; rabi sowings in progress; fever prevails largely.
Lahore	,,	*Nil*	Crops and health good.
Mooltan	,,	*Nil*	Kharif nearly harvested; rabi sowings in progress; slight fever, otherwise health good.
Dera Ismail Khan	,,	*Nil*	Health and harvest prospects good.
Rawal Pindi	,,	*Nil*	Harvest prospects good; slight fever.
Peshawur	,,	*Nil*	Kharif harvested; rabi sowings in progress; cattle disease abating; fever prevalent.
Umballa	,,	*Nil*	Crops and health good. *General remarks.*—Harvest prospects good; health of province generally good.
Oudh—			
Lucknow	(Nov. 17th)	*Nil*	Prospects continue favourable; public health good.
Sitapur	,,	...	
Fyzabad	,,	...	
Central Provinces—			
Upper Godavari	(Nov. 13th)	...	Prospects favourable; two cholera deaths; prices easy.
Sambalpur	...	...	Prospects excellent; health good.
Bilaspur	...	...	Rice cutting; rabi sowings continue; prices steady.
Raipur	(Nov. 14th)	...	Rice cutting; rabi sowings completed; a few cholera cases; prices stationary.
Chanda	...	...	Rice gathering; fever prevalent.
Betul	(Nov. 15th)	...	Kharif harvesting continues; cholera continues; prices steady.
Balaghât	...	...	Kharif cutting continues; fever prevalent; prices risen.
Chhindwara	...	...	Prospects of kharif favourable; health good; prices steady.
Bhandara	(Nov. 16th)	...	Rice harvesting continues; cholera, fever, and small-pox continue; cattle disease abating; prices easy.
Nagpur	(17th)	...	Crops doing well; health good; prices stationary.
Wardha	...	...	Cotton picking; rabi sowings continue.
Nimar	...	...	Prospects favourable; cholera continues; prices fallen.
Hoshangabad	...	...	Outturn of kharif below average; cholera continues.
Jubbulpore	...	...	Kharif harvesting; rabi sowings continue.
Saugor	...	...	Kharif harvesting; rabi sowings continue; prices falling.
Damoh	(Nov. 18th)	...	Rabi sowings progressing; health good; prices stationary.
Mandla	,,	...	*General remarks.*—General prospects continue favourable.
British Burma—			
Arakan Division (*Nov.18th*)		...	Public health good; crop prospects very fair.
Pegu Division—			
Rangoon	... ...	...	Public health good; crops good; cattle disease prevalent in Syriam; slight elsewhere.
Thonkwa	... ..	..	Health good; crops damaged by floods.
Bassein	... ...	...	Health good; crops promising.
Henzada	... ...	...	Health good; crops flourishing; slight cattle disease.
Prome	... ...	...	Health good; crops ripening.
Thayetmyo	... ...	...	Health good; crops flourishing.
Tenasserim Division	...	...	Public health good; crops progressing favourably; slight cattle disease.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg—			
Bangalore (Cantonment)	Nov. 18)	0·34	Seventy deaths by cholera in Bangalore Cantonment during the week, but decreasing during the past 4 days, abating generally in all districts; crops suffering from want of rain both in Mysore and Coorg, and particularly in Chitaldroog District.
Coorg	...	·04	*General remarks.*—Agricultural prospects still unfavorable.
Assam—			
Gauhati	(Nov. 18th)	0·12	Mornings raw and foggy, days clear and cool; salee paddy suffering much for want of rain; no change in the state of other crops and also of tea; public health good.
Sylhet	,,	...	Reaping commenced; rice market steady.
Hyderabad Assigned Districts—			
Umraoti	(Nov. 18th)	...	Crops in excellent condition; picking of cotton in progress.
Rajpootana—			
Sirohi	(8th)	...	Prospects unchanged.
Marwar	(13th)	...	Rabi operations in full force; western horizon cloudy; prospects satisfactory.
Harowtee	(6th)	...	Health and crops good; tanks very low.
Jaipur	(18th)	...	Agricultural prospects continue promising; health good.
Ajmere	(11th)	...	Health and prospects satisfactory.
Central India—			
Indore	(Nov. 17th)	...	Weather fine; health and prospects good.
Gwalior	,,	...	
Neemuch	,,	...	
Rutlam	,,	...	
Sutna	,,	...	
Nepal	(Nov. 10th)	*Nil*	No remarks.

G. A. SEARLE, *Lieut.-Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

FORT WILLIAM,
The 19th November 1875.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 23rd November 1875.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K. C. B., *Senior Member of the Council, presiding.*
His Honour the Lieutenant-Governor of Bengal.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
The Hon'ble J. R. Bullen Smith.
The Hon'ble Sir Douglas Forsyth, C. B., K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna, Bahádur.

NEW MEMBERS.

The Hon'ble D. COWIE and the Hon'ble RÁJÁ NARENDRA KRISHNA, BAHÁDUR, took their seat as Additional Members.

CENTRAL PROVINCES LAWS BILL.

The Hon'ble SIR DOUGLAS FORSYTH moved that the Report of the Select Committee on the Bill to declare and amend the law in force in the Central Provinces be taken into consideration. He said that this Bill, as now presented, was in substance the same as the Bill which was first presented to the Council. There had been no changes made excepting one or two verbal alterations. The Bill had been sent to the Chief Commissioner of the Central Provinces, who was of opinion that the Bill as put before the Committee exactly met the requirements of the province.

The Motion was put and agreed to.

The Hon'ble SIR DOUGLAS FORSYTH also moved that the Bill as amended be passed.

The Motion was put and agreed to.

SPECIFIC RELIEF BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to define and amend the law relating to certain kinds of Relief. He said that the first thing he must do was to apologise to the Council for the want of explicitness in the wording of the motion. He understood that some of his hon'ble colleagues thought he was going to propose a Poor-law, and others that it had reference to the movement of troops. But that was not the case. This Bill had nothing to do with the relief of taluqdárs or other distressed members of the community, nor with the change of sentries, but was intended to deal with that which was well known to lawyers under the technical term of "relief," namely, the remedy which was granted by Courts of justice to suitors. The subject was of considerable complexity and intricacy of detail. But he should be able, he thought, in no great number of sentences, to explain to the Council what was the general nature of it, and the reason why they should pass a law on the subject.

The Council would recollect that there was now pending before them a Bill for the purpose of reforming the Code of Civil Procedure, and it was in connec-

tion with that Bill that MR. HOBHOUSE asked leave to introduce the Bill he was now speaking about. The forms of decrees made by civil Courts of justice would be readily enough recognised as closely connected with the procedure of those Courts, though so far forth as those forms regulated the remedies which a suitor might obtain against his adversary, the subject was connected more with substantive law than procedure. Still, in framing the Code of Civil Procedure, we were constantly coming into contact with the kind of decree which had to be pronounced; indeed, there were some processes, such for instance as interlocutory injunctions, of which it was difficult to say whether they partook most of the nature of procedure or substantive law. Now the framers of the Code of Civil Procedure had confined themselves almost entirely to that which was procedure proper, or to that debatable ground to which he had been referring. But in two instances they had clearly overstepped the boundary, and had passed over into substantive law. These two instances were in section 15 of the Code, which dealt with declaratory decrees, and in section 192, the subject of which was the specific performance of contracts. In the Bill pending before the Council, it was proposed to repeal the whole existing Code excepting those two sections; and those were not dealt with by the Bill because it was intended to confine it to that which was properly procedure, and to keep our hands off substantive law. But it had always been intended, and he thought he had mentioned it before, to supersede the two sections in question by a fresh measure which would deal with the subject of them in a much more full and comprehensive manner.

Now, the remedies which were administered by civil Courts of justice might be divided into two great classes, those by which the suitor obtained the very thing to which he was entitled, and those by which he obtained, not that very thing, but compensation for the loss of it. **The first branch was known as specific relief, and the second was known as, or at all events might be termed, compensatory relief. If A agreed to sell a house to his neighbour and then refused to perform his agreement, his neighbour might** seek relief, either by compelling A to sell the house, or by making him pay damages for not selling the house; and so if A published a piratical copy of his neighbour's writings and invaded his copyright, his neighbour might seek either specific relief by restraining A from so doing, or compensatory relief by making A pay damages for the wrong inflicted by him. It was obvious that the first kind of relief did more exact and complete justice whenever it was applicable. But in the complicated transactions of life that kind of relief was often not applicable, and then more inconvenience and hardship were caused by attempts to carry the contract into effect according to its specific terms, than by the simpler and rougher method of giving compensation for the breach of it. The consequence was that there were very different considerations which regulated the exercise of jurisdiction by way of specific relief, whether in the performance of a contract or in the prevention of wrong, and the exercise of jurisdiction by the simpler and rougher method of giving relief by compensation.

In England that difference had been accentuated in a remarkable manner owing to historical causes. At a very early period in our history the Courts of Common Law refused to accommodate themselves to the growing wants of society, and declined to recognise a great number of transactions which sprung up more and more as society became richer and more civilized. The consequence was that large tracts of natural justice, so to speak, were left vacant and unprovided for, and they were occupied by the Chancellors who assumed the jurisdiction of compelling parties to do justice when the Courts of law refused to do so. Amongst other things, the Courts of law refused to give any remedy by way of specific performance or by way of prevention. If A contracted to sell a field, he could not be compelled by Common Law to do so, but he might be ordered to pay damages for not doing so; or if he encroached upon his neighbour's property, he could not be compelled by Common Law to abstain from doing so, though he might be ordered to pay damages for the wrong actually done. In fact, in all such cases, Courts of Common Law adhered to the rougher and simpler

jurisdiction of compensatory relief. The result was that two important and extensive heads of Equity jurisdiction, in other words, the jurisdiction of the Court of Chancery, became established; namely, the remedy by way of specific performance of contracts, and the remedy by way of injunction for preventing people from doing wrong.

In India we possessed the great advantage of having a single Court for the purpose of administering every kind of justice, by which we were enabled to get rid of many refinements and subtleties which beset this kind of jurisdiction as administered by the Court of Chancery. But still the inherent difference between the two great classes of relief remained, and there remained the fact that the former of these, namely, specific relief, though more exact, was more delicate and more difficult to administer, and that it required more skill and care on the part of the Judge, and that some guidance of the legislature would therefore be acceptable to him.

The Bill he asked leave to introduce did not deal with compensatory relief at all except incidentally and so far as it was either supplementary or alternative to specific relief. Its direct object would be specific relief, and mainly the two subjects he had mentioned, the remedy by way of specific performance, which rested entirely upon contract between the parties, and the remedy by way of injunction, which might rest upon contract or upon the right to have property protected from invasion.

It would be an additional inducement to the Council to accept legislation upon this subject when he reminded them that it formed part of the comprehensive plan which had been so ably laid down by his predecessor Mr. Stephen. He mentioned the matter in one of his latest speeches in Council on the passing of the Contract Act. They had not accomplished any large portion of that plan, because their hands had been quite full of business with reference to matters which were more pressing under the circumstances, or which appeared to them to be more pressing. But they had never lost sight of it, and the Bill for the amendment of the Civil Procedure was an attempt to accomplish one substantial portion of it, and the Bill he now asked leave to introduce was an attempt to accomplish another.

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 7th December 1875.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 23rd November 1875.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

Railway.

DEATH OF Mr. CECIL STEPHENSON, AGENT E. I. RAILWAY Co.

No. 2877 R, dated Fort William, the 26th November 1875.

RESOLUTION—By the Government of India, P. W. DEPT.

The Hon'ble the President in Council has heard with great regret that Mr. Cecil Stephenson, the Agent of the East Indian Railway Company, who was proceeding to England on sick leave, expired on board the S. S. *Poonah*, on Sunday, the 21st November.

Throughout his long career Mr. Stephenson was indefatigable and successful in the discharge of his duties, and the Hon'ble the President in Council considers that by his death the East Indian Railway Company, the Government, and the public have all suffered loss.

ORDERED, that the above be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25th NOVEMBER 1875.

GENERAL REMARKS.—No rain has fallen during the week, except in the southern districts of Madras and a slight drizzle at Mooltan. In Madras prospects continue satisfactory. In Bombay and Sind the harvest of the kharif continues, and the rabi promises well, except in the Deccan districts, where rain is wanted. In Mysore want of rain makes the prospects of the crops precarious. In the Central Provinces and Berar prospects are very good, and the same is the case throughout Central India and Rajputana. In Bengal there is no change; in the eastern and central districts, Orissa and Chota Nagpore, the late rice continues to promise well; in the southern districts of Behar the damage from drought is not so great as was feared; extensive failure of the rice crop is confined to Mozufferpore and Durbhunga, and parts of Sarun, Chumparun, Purneah, and Bhágalpur. In the North-Western Provinces, Oudh, and the Punjab the kharif has been generally excellent, and the rabi is coming on well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Nov. 25th)	*Nil*	3 feet 2 inches water over anicut; canal supply insufficient; later dry crops being sown; standing crops generally good; indigo harvested; out-turn fair; markets well supplied locally; prices steady; fever general; small-pox in two taluks; no cholera; cattle dysentery general; pasture sufficient.
Kurnool (24th)	*Nil*	Dry crops being harvested; out-turn fair; markets well supplied; prices falling in two taluks, steady elsewhere; water and pasture abundant; fever prevalent; cholera has re-appeared in Kurnool town, 68 seizures and 24 deaths, including taluks; cattle generally healthy; no water over Sunkesala anicut.
Tanjore (25th)	3·55 at Negapatam; elsewhere moderate.	Water in rivers decreasing; supply to tanks scanty; water over lower anicut, north branch, ·5, south ·5; cultivation wet and dry crops; standing crops generally good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; fever in some localities; cholera slightly increased, 99 seizures, 86 deaths; cattle disease in Shelli, some loss; pasture generally sufficient.
Trichinopoly (24th)	1·0 in two taluks.	Very little rain elsewhere; prices slightly fallen in Kullitalai; cholera prevailing to some slight extent; cattle disease in Museri; no other changes of importance.
Malabar ...	...	Not received. *General Remarks.*—General prospects satisfactory.
Bombay— (Oct. 25th)		
Sind. (Oct. 24th)		
Kurrachee ...	...	Fever prevalent; 5 cases at Keti attended with vomiting and purging, 2 fatal; weather unseasonably warm.
Shikarpur ...	...	Fevers very prevalent; disease among horses in taluka Lárkána; weather close and cloudy, threatening rain.
Hyderabad ...	...	Kharif crops being harvested; cotton picking general; fever bad in Hyderabad and Tanda Bags; rabi cultivation estimated at three-eighths less than last year.
Upper Sind Frontier ...	...	Crops as before; weather cloudy; fever prevalent.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	...	Rabi sowing continues; cotton good; 8 cholera cases in Mátar taluka, 3 deaths.
Surat ...	...	No change.
Broach ...	...	Crops good; fever prevalent.
Khandesh and Nasik.		
Khandesh ...	...	Standing rabi crops flourishing; cotton crop unchanged; market very dull; *ague* prevailing.
Nasik	...	Condition of crops unchanged; rabi crops want rain; 2 cholera cases in one village in Sinnar taluka.
Konkan.		
Tanna ...	...	Kharif reaping completed in Wára and Panwel talukas, and nearly so in other talukas; sowing of rabi in progress.
Deccan.		
Poona ...	...	Standing rabi crops well; more rain anxiously looked for in some talukas.
Ahmednagar ...	...	Rabi crops want rain; kharif harvesting completed in seven talukas; out-turn estimated at 9 annas; 10 cholera cases, 3 deaths.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Sholapur ...	...	Slight cholera and cattle disease in Sangola; rabi well.
Satara ...	...	Kharif harvesting progressing; rabi crops middling; slight cholera in Tásgaon taluka.
Southern Mahratta Country.		
Belgaum ...	...	Cholera gradually decreasing.
Dharwar ...	...	Harvesting of early crops progressing; late crops good; cholera prevalent.
Kanara ...	...	Strong easterly winds; harvest continues above Ghât.
Kaladgi ...	...	Kharif reaping progressing; rabi and cotton crops flourishing; 35 deaths from cholera.
Kattywar.		
Rájkot ...	...	Cholera prevails around Rájkot and Mánakwára, abating in Gondal taluka.
Wadhwán ...	...	State of crops the same as before 173 cholera cases, 59 deaths. *General Remarks.*—Rain wanted in the Deccan; rabi crops flourishing elsewhere; fever in Sind generally; cholera prevalent in Dharwar District, Wadhwán, and about Rájkot and Mánakwára in Kattywar.
Bengal—		
Chittagong (Nov. 25th)	*Nil*	Cholera prevalent in the Futteekcherry Thanna.
Noakhally „	*Nil*	Cholera is raging both in the town and interior of the district.
Chittagong Hill Tracts „	Not received.	
Hill Tipperah „	*Nil*	
Backergunge „	*Nil*	There is a good deal of sickness, particularly fever. Sporadic cases of cholera are reported from the following Thannas, *viz.*, Dowlutkhan, Ferozepore, Backergunge, Nalchittee, and Burrisaul. Cholera still prevails in some parts of the district; towards the south it is reported as assuming a rather malignant type.
Furreedpore „	*Nil*	
Dacca „	*Nil*	Only one case of cholera has occurred up to date.
Mymensingh „	*Nil*	Cholera still prevails in the Atea Sub-division.
Tipperah „	*Nil*	Cholera prevails to some extent, especially in the north of the district.
24-Pergunnahs „	*Nil*	Fever is prevailing at Barripore and Baraset.
Jessore „	*Nil*	
Nuddea „	*Nil*	Cholera is reported all over the district.
Moorshedabad „	*Nil*	Fever still continuing in Sujagunge.
Pubna „	*Nil*	Cholera continues at Chohali, in Serajgunge.
Rajshahye „	*Nil*	Thirteen cases of cholera reported during the week, of which four were fatal. Cholera is bad in Singia Thanna.
Bogra „	*Nil*	
Maldah „	*Nil*	Fifty-three persons have been attacked by cholera during the week, and fifty-five deaths have occurred from that disease. In the Thanna of Gazole seventy-six persons have been attacked by small-pox, and ten have died.
Dinagepore „	*Nil*	A few cases of cholera reported from the interior.
Rungpore „	*Nil*	
Cooch Behar „	*Nil*	
Jalpaiguri „	Not received	Cholera continues.
Darjeeling „	*Nil*	
Midnapore „	*Nil*	
Howrah „	*Nil*	
Hooghly „	Not received	
Burdwan „	*Nil*	
Bankoorah „	*Nil*	General health of the district is good, except a few cases of cholera at head-quarters, and some cases of fever in the south-east of the district.
Beerbhoom „	*Nil*	
Sonthal Pergunnahs „	*Nil*	
Bhágalpur „	*Nil*	Public health good.
Monghyr „	Not received	
Purneah „	*Nil*	Cholera is prevalent in many places, and fever general throughout the district.
Durbhunga „	*Nil*	
Mozufferpore „	Not received	
Sarun „	*Nil*	General health good.
Chumparun „	Not received	
Patna „	Not received	Health of the district is good, and cholera has disappeared from the vicinity of Dinapore.
Gya „	*Nil*	
Shahabad „	Not received	
Hazáribágh ...	*Nil*	
Lohardugga ...	*Nil*	General health good.
Maunbhoom ...	*Nil*	
Singbhoom ...	*Nil*	The district is healthy.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Balasore		*Nil*	Cholera is severe in the south of the district, and 58 deaths have been reported during the first fortnight of November.
Cuttack	...	*Nil*	Cholera still hanging about.
Pooree	...	*Nil*	Cholera is reported to have broken out in different parts of Khoorda sub-division.
			General Remarks.—No rain has fallen in any of the districts during the week under review. The prospects of the *amun* or late rice crop in almost all the districts of the Burdwan, Presidency, Orissa, and Chota Nagpore Divisions, are good, though the high land crops are said to be suffering from want of timely rain. The prospects in the Dacca Division are also generally good. In the Chittagong Division the prospects of the rice crop are not so good as it was considered some weeks back, want of sufficient rain and ravage by insects having caused some loss. In North Behar and North Bengal the unsatisfactory prospects of the main rice crop are unchanged; but in South Behar and in some of the districts of North Bengal the loss will not be so great as was at first estimated. Extensive failure of the rice crop seems to be confined to the districts of Durbhunga, Mozufferpore, and to parts of Sarun, Chumparun, Purneah, and Bhágalpur. Harvesting of the late rice crop is progressing. Sowings of the cold weather crops are generally progressing satisfactorily, except in Durbhunga and Mozufferpore, where there is an insufficiency of moisture in the soil.
N. W. P.—			
Benares	(Nov. 22nd)	*Nil*	Nothing to report.
Mirzapur	(24th)	...	Late rice crop suffered in some places from want of water; general prospects good.
Cawnpore	„	...	Kharif first rate; rabi prospects good.
Banda	(25th)	...	No change; weather favourable.
Hamirpur	„	...	Kharif being cut; rabi coming on well.
Jhansi	„	*Nil*	Prospects unchanged.
Agra, Meerut	(24th)	...	No change.
Bareilly	„	...	No change.
Punjab—			
Delhi	(Nov. 24th)	*Nil*	Health good.
Hissár	„	*Nil*	Kharif harvested; more than average; rabi promising; health good.
Umballa	„	*Nil*	Crops and health good.
Jullundur	„	*Nil*	Crops reaped; sowings in progress; fever prevails largely.
Lahore	„	*Nil*	Weather cloudy; crops and health good.
Dera Ismail Khán	„	*Nil*	Health and harvest prospects good.
Rawal Pindi	„	*Nil*	Health and harvest prospects good.
Peshâwar	„	*Nil*	Kharif gathered; rabi sowings in progress; cattle disease abating; fever prevalent; rain expected.
Mooltan	„	A drizzle.	
			General Remarks.—Agricultural prospects favourable; public health fair.
Oudh—			
Lucknow	(Nov. 24th)	*Nil*	Public health good; agricultural prospects continue favourable.
Sitapur	„	*Nil*	
Fyzabad	„	*Nil*	
Central Provinces—			
Upper Godavari	(Nov. 20th)	...	Weather cloudy; prospects favourable; small-pox continues; prices steady.
Sambalpur	...	...	Weather clear; kharif harvesting; health good.
Bilaspur	...	...	Weather cloudy; rice cutting; rabi sowings continue; fever prevalent; prices steady.
Raipur	(21st)	...	Weather clear; rice harvesting; rabi sowings completed; few cholera cases; prices stationary.
Balaghât	(22nd)	...	Weather clear and cold; kharif harvesting; rabi sowings continue; fever prevalent; prices risen.
Chhindwara	..	...	Weather clear; prospects favourable; health good; prices steady.
Betul	...	...	Weather clear; kharif reaped; prices steady.
Bhandara	(23rd)	...	Weather clear and cool; threshing rice continues; rabi sowings completed; cholera, fever, cattle disease continue; prices easy.
Nagpur	(24th)	...	Crops doing well; health good; prices steady.
Wardha	...	...	Cotton picking; rabi sowings continue.
Nimar	...	...	Kharif reaping; cholera continues; prices stationary.
Hoshangabad	...	...	Outturn of kharif below average; rabi sowings continue.
Narsinghpur	...	...	Rabi sowings completed; prospects good.
Jubbulpore	...	...	Kharif harvesting; rabi sowings completed; cattle disease prevalent; prices falling.
Saugor	...	...	Weather clear; threshing of kharif commenced; rabi promising; health good.
Seoni	...	...	Kharif threshing; rabi promising; health good; prices stationary.
Damoh	...	...	Rain wanted; rabi sowings continue; health good; prices stationary.
Mandla	...	...	Rabi sowings continue; health good; prices stationary.
			General Remarks.—Crops promising; late rains did much good; rabi preparations progress favourably.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg—			
Bangalore	(Nov. 25th)	...	Rain has not fallen throughout Mysore and Coorg; deaths from cholera in Bangalore cantonment during past week 81, almost wholly abated elsewhere, except at Shimoga; condition of dry crops critical everywhere from continued drought.
			General Remarks.—Agricultural prospects unfavourable.
Assam—			
Gauhati	(Nov. 25th)	*Nil*	Cold, misty mornings; cool, clear days; paddy and mustard backward; all other crops and tea doing well; public health good.
Sylhet	„	...	Reaping progresses; cultivation of winter crops commenced; rice market steady.
Hyderabad Assigned Districts—			
Umraoti	(Nov. 25th)	...	Jowarry in ear; rabi crops favourable.
Rajputana—			
Sirohi	(Nov. 15th)	...	Prospects fair; health good.
Marwar	(20th)	...	Prospects quite satisfactory; health good; weather close and cloudy; rain probable.
Harowtee	(13th)	...	Prospects good; fever prevalent.
Jaipur	(25th)	...	Prospects continue favourable; health good.
Ajmere	(18th)	...	Health and prospects good.
Central India—			
Indore	(Nov. 24th)	...	Health and prospects good.
Gwalior	„	...	
Neemuch	„	...	
Rutlam	„	...	
Sutna	„	...	
Nepal	(Nov. 17th)	*Nil*	A good rice harvest is being realized in the hills.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2nd DECEMBER 1875.

GENERAL REMARKS.—Rain has fallen during the week in some quantity in the southern districts of Madras (except Malabar): in Sind there has been a heavy fall in Kurrachee, and general rain elsewhere: more or less rain has also fallen in the western and central districts of the Punjab and in parts of Rajputana. Elsewhere, with the exception of a slight shower at Darjeeling, the returns are blank, though clouds are reported from several places in Bengal. Prospects in Madras continue good. In Mysore the drought still makes the condition of the crops critical. In Sind the rain has benefited the rabi, though not beneficial to the kharif crops. In Bombay rain is wanted in the Deccan: elsewhere the crops promise fairly. Reports are good from the Central Provinces, Berar, Rajputana and Central India. In Bengal there is no change. In almost all districts except those of North Behar and North Bengal a good outturn of the late rice crop is expected: the fears of an extensive failure are limited to the sub-divisions of Madhobani, Sitamarhi and Soopole. In the North-Western Provinces and Oudh prospects continue generally excellent, though rain would be beneficial in some districts. In the Punjab prospects are very good. Reports from Assam and British Burmah are favourable.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Dec. 2nd)	*Nil*	Three feet water over anicut; canal supply insufficient; later dry crops sown; standing crops good; markets well supplied; prices generally steady; cholera 17 seizures, 3 deaths, Bander taluk 2 seizures; Gudwada, fever general; cattle dysentery, epizoötic aphtha in 5 taluks; pasture sufficient.
Kurnool	(1st)	*Nil*	Paddy, jonna, arica, korra, and sajja being harvested; outturn fair; water and pasture abundant; markets well supplied; prices falling in 2 taluks, steady elsewhere; cholera 40 seizures, 20 deaths; cattle disease in some villages; no water over Sunkesala anicut.
Tanjore	(2nd)	4·11 at Negapatam; elsewhere good.	Water in rivers and supply to tanks moderate; water over lower anicut, north branch 2 inches, south 2 inches; cultivation wet and dry crops; standing crops generally good; harvest a few wet and dry crops, yield fair; markets well supplied; prices almost steady; fever in some parts; cholera continues, 125 seizures, 77 deaths; cattle generally healthy; pasture generally sufficient.
Trichinopoly	(1st)	...	Rainfall slight but general, over an inch in town; crops good; rivers low; water-supply sufficient; kar rice being harvested; outturn average; markets well supplied; prices fallen in one taluk, elsewhere steady; cholera prevailing to some slight extent in district, town free; public health otherwise good; pasture ample.
Malabar	(2nd)	*Nil*	Second crop cultivation good; markets well supplied; prices steady; small-pox in Ernad; bowel complaints in 7 taluks, 322 cases, 213 deaths; cattle disease in Walluvanad; pasture good.
			General Remarks.—General prospects satisfactory.
Bombay—	(Dec. 2nd)		
Sind.	(Dec. 1st)		
Kurrachee	...	...	Heavy rain since Saturday at Haband Mugger Peer, probably general, will injure kharif crops already ripened and harvested, but will benefit rabi, and perhaps increase area of rabi sowings; three cases of cholera in Keti Bandar reported on 27th, are probably malarious fever of virulent type, as at Rohri; one case fatal.
Shikarpur	...	·80	A fall of rain on 29th and 30th, general; cattle disease and fever continue.
Hyderabad	...	...	Slight rain since 27th; rather threatens more, which will affect yield of cotton.
Upper Sind Frontier	...	·51	Rain most favourable to rabi crops; kharif as before; fever prevalent.
Guzerat.			
Ahmedabad	...	...	No change.
Kaira	...	...	Rabi crops well; 33 cholera cases in two talukas, 17 deaths.
Surat	...	...	Rabi crops good; 9 cholera cases in Wálod taluka, 4 deaths.
Broach	...	...	Several deaths from fever in Broach; no other change.
Khandesh and Nasik.			
Khandesh	...	...	Rabi crops as before; best cotton Rs. 46 to 48 per pulla; cattle disease in Sháháda taluka.
Nasik	...	...	Kharif reaping in progress; rain required for rabi crops, which are middling; slight cholera in one village in Sinnar taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan.		
Tanna ...	...	Kharif reaping completed in three talukas, and nearly so in the rest of the district; rabi sowing progressing; cholera very slightly prevailing in four villages of Bhiwandi taluka.
Deccan.		
Poona ...	...	Condition of crops the same as before.
Ahmednagar ...	...	Rain wanted for rabi crops; 14 cholera cases, 9 deaths.
Sholapur ...	...	Health good.
Satara ...	...	Kharif harvest continues; rabi crops suffer for want of rain.
Southern Mahratta Country.		
Belgaum ...	...	Reaping of kharif progressing; rabi and cotton crops well; cholera disappearing.
Dharwar ...	...	Harvest of early crops progressing; late crops good; cotton suffering from blight in three talukas; cholera subsiding; fever in all talukas except Nawalgund.
Kanara ...	...	Harvest nearly completed above ghât; ploughing for second crop commenced on coast; 8 cholera cases.
Kaladgi ...	...	Average outturn of kharif will be a little over one-half of the full crop; rabi and cotton crops promise a fair outturn except at Muddebihál; 61 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Cholera still prevalent in villages about Rájkot, Mánakwára and Upleta.
Wadhwán ...	...	Crops good; cholera prevalent, 142 cases, 75 deaths.
Baroda ...	...	Bajri and paddy crops reaped; cotton prospects very fair.
		General Remarks.—Rain fallen generally in Sind favourable to rabi; fever prevalent; rain wanted in the Deccan; cholera still in Southern Mahratta country, and about Rájkot and Wadhwán to some extent; crops generally fair except in the Deccan where they do not promise so well.
Bengal—		
Chittagong (Dec. 2nd)	*Nil*	Cool weather; the crop is still suffering from want of rain, and there is every probability of there being a smaller crop than last year, but there is no prospect of scarcity.
Noakhally ...	*Nil*	Weather fair and cool; cutting of the intermediate *amun* crops has commenced in the churs and high lands; cholera prevalent throughout the district, but not in the town.
Chittagong Hill Tracts...	*Nil*	Very cold nights and mornings; fogs as usual; cotton is being gathered and mustard being sown.
Hill Tipperah ...	*Nil*	Seasonable weather; the reaping of the rice crop has commenced and it is said will give an outturn of about 10 annas; the sowing of the rabi crops continues.
Backergunge ...	*Nil*	Weather cool and fine; state and prospects of the crops are fair, but want of rain has damaged the paddy and stunted its growth; an average crop only is expected; winter harvesting has begun.
Furreedpore ...	*Nil*	Weather cool and dry; owing to the want of rain in October the rice crop is less than it otherwise would have been, but on the whole it is a good crop; the winter cereals promise well.
Dacca ...	*Nil*	Fine weather; state and prospects of the crops are good.
Mymensingh ...	*Nil*	Weather clear and tolerably cool; state and prospects of the crops are favourable; cholera is still prevalent in many parts of the district.
Tipperah ...	*Nil*	Weather fair and cool; there is no material difference since last report; the late rice crop will not have such a good outturn as usual, and there will be a good deal less rice for export; cholera has shown itself in many places.
24-Pergunnahs ...	*Nil*	Seasonable weather; reaping of *amun* commenced, and the cold weather crops doing well; 55 cases of cholera reported from thana Habra at Barasat, and a few cases from Barrackpore and Bassirhat; fever prevailing at the last two places.
Jessore ...	*Nil*	Weather very pleasant; no rain, but heavy dew during the nights; late rice crop is being harvested; a good outturn expected everywhere except on some high lands here and there in the Narail and Sudder sub-divisions; state of winter crops is satisfactory.
Nuddea ...	*Nil*	Weather cool and seasonable; the *amun* harvest will probably be an average one, but in Bongong sub-division it has suffered from drought; the cold weather crops generally promise well, but rain is wanted in Meherpore and Kooshtea sub-divisions; cholera still prevails in many places.
Moorshedabad ...	*Nil*	Seasonable weather; the *amun* harvest has commenced; an average of full 12 annas crop is expected; other winter crops are thriving; common rice almost stationary in price; fever still continuing in Sujagunge and Gorabazar.
Pubna ...	*Nil*	Weather seasonable; state and prospects of the crops are good; cholera is still prevalent, especially in the south of Serajgunge sub-division.
Rajshahye ...	*Nil*	There has been no change in the weather during the week; want of rain is still much felt both for the *rabi* crops and the high-land rice, especially for the latter; the winter rice crop on low lands is reaped in most quarters, and the reports of the expected outturn are generally favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
		Sub-division Nattore.
		The cutting of early dhan is fast going on; the same complaint as in the last week of injury being done by a black worm to paddy on high or rather dry land continues; sugar-making is going on; the present prospect of the *rabi* crops good; cholera is still somewhat prevalent, and in parts of the district there have been several fatal cases.
Bogra ...	*Nil*	Fine weather; no change in the state and prospects of the crops for better or worse.
Maldah ...	*Nil*	Weather clear and cool; no rain has fallen in the district. In the thanas of Maldah and Nowabgunge a 9-anna crop of *haimunti* or late rice is expected if any rain falls; in Gomastapore and Gazole a better outturn is expected; the *amun* is suffering from continued want of rain, and is *not* expected to yield a good return; it is being threshed in one thana, but the outcome has not yet been ascertained; in Shibgunge the *amun* has been attacked by insects; spring rice being sown in parts of the district; rain is still required for the *kulai*, but the return is expected to be very fair; half anna share of the crop has been destroyed by insects in thana Shibgunge; during the week 106 deaths have occurred from cholera; 79 persons have been attacked by that disease during the same period; 19 deaths from fever are also reported during the week.
Dinagepore ...	*Nil*	Fair weather with westerly wind; the crops are now being cut; a moderate outturn only is expected; 3 cases of cholera at Hemtabad and 3 at Peergunge thana; single cases at Ramsunkool and Thakoorgaon thana.
Rungpore ...	Not received	Weather seasonable; there is no change in rice prospects; harvest has commenced in the Korigram sub-division; expected outturn eight annas; cold weather crops promise well.
Cooch Behar ...	*Nil*	Weather fair; no rain; though the *amun dhan* has suffered much for want of rain on high lands, it is generally believed that on the whole the outturn will be about 8 annas, in some places the outturn will fall below, and in others exceed this estimate; the prospects of tobacco and of mustard seeds are reported to be good.
Julpaiguri ...	Not received	No change to report; tobacco going on well; high land paddy is being cut; cholera is still in the district, but is abating.
Darjeeling ...	·33	Cold frosty mornings and bright clear days. *Haimunti dhan* is being reaped in the high lands of the Terai, and although the outturn will fall short of a full crop no distress will result; all the crops in hills have done well on the whole, most of them have been gathered in; the tea prospects are said to be favourable.
Midnapore ...	*Nil*	Weather cold and clear; state and prospects of the crops are good as before; harvest is being got in.
Howrah ...	*Nil*	Weather fine; state and prospects of the crops are very good.
Hooghly ...	Not received	Weather seasonably cold; vegetables, potatoes and other winter crops are doing well at the cost of somewhat unusual labor for water for the time of the year.
Burdwan ...	*Nil*	Reports of the outturn of *amun* and the prospects of the rabi crops are all favourable; cholera is reported in the Culna and Jehanabad sub-divisions.
Bankoorah ..	*Nil*	Weather dry and cool; state and prospects of the crops are good; the *amun*, or the late rice crop, is ripening. Sugarcane and other crops are doing well.
Beerbhoom ...	*Nil*	Weather clear; most of the rice is cut, and sowing of winter crops is in progress.
Southal Pergunnahs ...	*Nil*	Weather cold and dry; over the greater part of the district the rice harvest is beginning, with every prospect of a fair outturn.
Bhágalpur ...	Not received	Rice crops on low lands are generally good; harvesting has begun and prices are falling; report from the south is good; prospects of rabi are everywhere good; public health good.
Monghyr ...	Not received	Weather cold and clear; no change since last week; the Collector and the District Superintendent of Police having seen a large portion of the rice country, agree in thinking that nearly an average rice crop will be reaped; the rabi is coming up, but rain will be wanted after the rice is cut; rain at present would do more harm than good to the rice.
Purneah ...	*Nil*	Weather cool and seasonable; the cutting of the winter rice has commenced; good reports are received from the north and from the Kosi; the crop in Nepal is said to be very good; importation from that country has already begun; the mustard crop promises well, but rain is wanted; pulses are coming on; the wheat, oats, &c., which have been sown have generally germinated.
Darbhanga ...	*Nil*	Weather fine; no change in the state and prospects of the crops; the Collector has just returned from a tour of inspection through the Sudder sub-division, and believes that an eight-anna rice crop will be harvested. There is reason for believing that the outturn of crops in the Madhobani sub-division will be better than that anticipated in the last report; prices show a tendency to decline both at Darbhanga and Madhobani.
Mozufferpore ...	Not received	Weather cold and occasionally cloudy; on the 26th instant it was very cloudy; the prospects of rice and rabi crops in Mozufferpore and Seetamurhee sub-divisions are much the same as reported last

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
			week; the Collector has been on tour in the Hajeepore sub-division during the week ending 26th November; he considers that the previous estimate of an average four-anna rice crop, which is now being cut, will prove correct; the rabi crops in the Hajeepore and Muhana thanas are very much better than he anticipated; in the former thana there is a ten-anna crop now on the ground, and even without rain an eight-anna crop is expected; in the latter thana there is at present an average eight-anna crop on the ground, but without rain only four-anna will probably come to maturity; tobacco and ruhur are both very good, but root crops are not so good as previously reported; the Collector has not recently been over the Lalgunge thana jurisdiction, but hopes to visit it next week. It is the only thana of the Hajeepore sub-division in which any distress may be apprehended.
Sarun	...	*Nil*	Weather fine and seasonably cold; west wind prevailing; no apparent sign of rain; cotton and ruhur pulse are doing well; sugarcane is being manufactured; paddy is being harvested; rabi crops are still doing well; irrigation is being resorted to where practicable; apprehensions are entertained for want of rain; general health good.
Chumparun	..	*Nil* (No rain in the previous week also.)	Weather cloudy now and then; the prospect of the late rice crop is as bad as was anticipated; rabi has been sown; it is not growing well; the sky is overcast.
Patna	...	Not received	Seasonable weather; the late rice crops in low lands are thriving well, but in high lands they are suffering from want of rain; general health good.
Gya	...	*Nil*	Clear weather, cloudless sky, and cool winds; rice crop is being reaped; outturn is better than anticipated, and is estimated at 8, 10 and 12 annas in different parts of the district; the ruhur crops are good; sowings of rabi crops showing fair prospects; general health good.
Shahabad	...	*Nil*	Weather generally dry and clear, pleasant westerly wind; paddy being reaped; rabi doing well; health of the people good.
Hazáribágh	...	*Nil*	The weather has been slightly cloudy during the past week, and not so cold as it should be; the rice crop is being harvested, and the outturn is expected to be better than it was supposed it would be; the cold weather crop of what there is looks well, but it would be premature to calculate what the probable outturn may be.
Lohardugga	...	*Nil*	Seasonable weather; a large portion of the rice crop has now been harvested, and the outturn is excellent; the rabi crops are looking well, but in Palamow only about half the usual area has been sown owing to want of rain; general health good.
Maunbhoom	...	*Nil*	Favourable weather; state and prospects of the crops are favourable throughout the district; the paddy of the Chass thanna jurisdiction has been considerably affected by the blight during the week ending the 27th November.
Singbhoom	...	*Nil*	Seasonable weather; state and prospects of the crops are favourable; general health of the district good, but fever prevailing in some parts.
Balasore	...	*Nil*	Weather fine and harvest of rice is progressing fast; sporadic cholera is general throughout the district, but does not appear to be increasing.
Cuttack	...	*Nil*	Weather cold and fine; early *sarudh* rice crop is being reaped, and late *sarudh* is ripening; state of all crops is excellent.
Pooree	...	*Nil*	Weather fine and cold; the *laghu*, or the first late rice, is being reaped and gathered; *sarad*, or the main late rice, is in flower, and promises well; in Khoordah the prospect is favourable; cholera is still raging in different parts; sugarcane is now ripe.
			General Remarks.—No rainfall is reported from any of the districts, excepting light showers at Darjeeling. The state and prospects of the main rice crop in almost all the districts of the Burdwan, Presidency, Orissa and Chota Nagpore Divisions are good, though the high land crops are reported to be suffering from want of rain; the prospects in the Dacca Division are also good. In the Chittagong Division the crops will yield a moderate outturn. In North Behar and North Bengal it has been ascertained from further local enquiry that the general outturn will be better than was anticipated. The prospects are worst in the sub-divisions of Sitamarhee, Madhobani and Soopool. Harvesting of the late rice is progressing; cold weather crops are generally progressing favourably. Irrigation is being resorted to where practicable.
N. W. P.—			
Benares	(Nov. 29th)	*Nil*	Rabi prospects good; rain would make them first rate.
Mirzapur	(Dec. 1st)	...	Prospects continue good; rabi crops growing well.
Cawnpore	,,	*Nil*	Kharif and rabi prospects continue good.
Hamirpur	(2nd)	...	Kharif nearly reaped; rabi progressing well.
Jhansi	,,	*Nil*	Prospects unchanged.
Agra	(1st)	*Nil*	No change.
Meerut	,,	*Nil*	Prospects unaltered.
Bareilly	,,	...	Weather cloudy; rain would be advantageous.
Banda	(2nd)	...	No change; rain needed for rabi.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—			
Delhi	(Dec. 1st)	*Nil*	Health good.
Hissár	,,	*Nil*	Harvest prospects favourable; health generally good excepting some fever.
Umballa	,,	*Nil*	Crops and health good.
Jullundur	,,	*Some showers.*	Crops gathered; rabi prospects fair.
Lahore	,,	·2	
Mooltan	,,	·4	Crops and health good except a little fever.
Dera Ismail Khán	,,	*Slight rain.*	Health and harvest prospects good.
Rawal Pindi	,,	1·7	Health and harvest prospects good.
Peshâwar	,,	·9	Rabi sowings in progress; slight fever prevalent.
			General Remarks.—Slight falls of rain all over northern and central districts of province; public health and harvest prospects good.
Oudh—			
Lucknow	(Dec. 1st)	*Nil*	Agricultural prospects and public health continue generally good.
Sitapur	,,	*Nil*	
Fyzabad	,,	*Nil*	
Central Provinces—			
Upper Godavari	(Nov. 27th)	...	Rabi promising; health good; prices falling.
Sambalpur	...	...	Kharif harvesting continues; few cases of cholera in South Sonpur.
Bilaspur	...	...	Rice-cutting continues; fever prevalent; prices steady.
Raipur	(Nov. 28th)	...	Prospects unchanged; cholera continues.
Chanda	..	...	Kharif and rabi doing well; cholera, fever and cattle disease continue; prices easy.
Balaghât	(Nov. 29th)	...	Kharif harvesting continues; rabi sowings completed; fever prevalent; prices steady.
Betul	...	...	Kharif harvesting continues; health good; prices steady.
Bhandara	(Nov. 30th)	...	Rice threshing continues; rabi sowings completed; cholera, fever and small-pox continue; prices easy.
Nagpur	(Dec. 1st)	...	Kharif and rabi doing well; health good; prices easy.
Wardha	...	...	Rabi promising; cotton picking continues.
Nimar	...	...	Jowar cutting; rabi sowings completed; cholera lingering; prices stationary.
Hoshangabad	...	...	Prospects of kharif unchanged; rabi good.
Narsinghpur	...	...	Rabi sowings completed; prospects good.
Jubbulpore	...	...	Cattle disease prevalent; prices easy.
Saugor	...	...	Reaping and threshing of kharif continue; health good; prices falling.
Seoni	...	...	Threshing of kharif continues; rabi promising; health good; prices stationary.
Damoh	(Dec. 2nd)	...	Rain wanted; sowings completed; health good; prices stationary.
Mandla	...	...	Rabi sowings continue; health good; prices stationary.
			General Remarks.—Prospects continue good.
British Burma—			
Arakan Division	...	...	Public health good; outturn of crops favourable but will probably be light.
Pegu Division.			
Bassein	...	...	Health and crops good; cattle disease in many places.
Henzada	...	...	Health good; reaping progressing.
Prome	...	...	Health good; harvest progressing.
Thayetmyo	...	...	Health and crops good; reaping commenced.
Thonkwa	...	...	Health and crops good; slight cattle disease.
Tenasserim Division	...	...	Public health good; crops progressing; cattle disease still continues in the Amherst district.
Mysore and Coorg—			
Mysore	(Dec. 2nd)	*Nil*	Crops generally suffering from continued drought; distress beginning to be felt in Chitaldroog and Kolar districts; prices elsewhere steady; cholera severe in Bangalore, but abating again, inconsiderable elsewhere.
Coorg	,,	,,	
Assam—			
Gauhati	(Dec. 2nd)	*Nil*	Mornings cold and foggy, days clear and cool; *sali dhan* being reaped, but it suffered much for want of rain; prospects of all other crops and tea favourable; public health good.
Sylhet	,,	...	Reaping progresses; rice market steady.
Hyderabad Assigned Districts—			
Umraoti	...	...	Jowari nearly ripe; cotton picking commenced; rabi in good condition.
Rajputana—			
Sirohi	(Nov. 22nd)	...	Health good; prospects fair.
Marwar	(27th)	Rain on 21st (more probable).	Prospects promising; health good.
Meywar	(26th)	...	Health and prospects good.
Harowtee	(20th)	...	No change.
Ajmere	(25th)	...	Health and prospects good.
Jaipur	(Dec. 2nd)	...	Prospects favourable; health good; weather cloudy.
Central India—			
Indore	(Dec. 1st)	...	Health and prospects good.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS IN THE NORTH-WESTERN PROVINCES FOR FASL RABI AND YEAR 1874-75.

No. 843A, dated Naini Tal, the 12th October 1875.

RESOLUTION—By His Honor the Lieutenant-Governor, North-Western Provinces.

READ the following papers:—

Resolution by His Honor the Lieutenant-Governor, North-Western Provinces, on irrigation operations for kharif 1874, No. 113A, dated 13th February 1875.

Statements A6, B6, C6, for rabi 1874-75.

Statements A6, B6, C6, for the year 1874-75.

OBSERVATIONS.—The following table shows the areas irrigated and the revenue derived from all sources for the two harvests for the last nine years:—

YEAR.	AREA.		TOTALS.	REVENUE.		TOTALS.
	Kharif.	Rabi.		Kharif.	Rabi.	
1868-69	487,485	957,413	1,444,898	12,19,094	19,27,797	31,46,891
1869-70	501,625	588,048	1,089,673	13,39,811	12,29,981	25,69,792
1870-71	396,399	654,409	1,050,808	12,07,266	13,43,903	25,51,169
1871-72	338,117	519,372	852,489	10,42,814	11,32,919	22,75,733
1872-73	353,619	586,958	940,577	10,07,280	13,05,157	23,12,437
1873-74	401,576	647,736	1,049,312	13,13,634	13,41,210	26,59,844
1874-75	389,706	752,572	1,142,278	13,94,241	15,32,051	29,26,292

The area irrigated for the present year ranks next to the area in the famine year 1868-69, being 302,620 acres less; while the revenue is only less than the revenue of the same year by 2,20,599.

The kharif (1874-75) was one of ample and seasonable rainfall, beginning early in June and extending well into September.

The winter rains were deferred until February, and the season was consequently favourable to canal irrigation for rabi crops.

The following statement shows the increase from year to year respectively in area and revenue for the last three years, which, with the exception of 1873-74—a year of somewhat scanty rainfall—have been years favourable to agriculture:—

YEAR.	INCREASES.	
	Area.	Revenue.
1872-73	88,088	1,36,703
1873-74	108,735	3,47,408
1874-75	92,966	2,66,448
TOTAL INCREASE IN THREE YEARS ...	289,789	7,50,559

These figures show that th prosperity of the canals is steadily increasing.

The following table shows the acreage of the most important crops for the last seven years:—

YEAR.	Sugarcane.	Rice.	Wheat.	Barley.	Bajra, Jawar, &c.	Cotton, &c.	Indigo, &c.	Opium, &c.
1868-69 ...	97,553	111,020	591,783	257,509	143,890	55,369	76,932	5,040
1869-70 ...	104,610	117,545	383,533	132,601	75,178	57,106	130,895	3,640
1870-71 ...	112,141	96,479	461,534	134,192	30,208	37,529	120,651	3,654
1871-72 ...	94,816	76,880	365,950	99,650	19,883	22,082	120,149	5,449
1872-73 ...	102,242	83,956	363,529	160,023	14,761	16,007	131,631	7,994
1873-74 ...	130,554	75,875	402,755	188,581	29,520	18,486	146,420	9,008
1874-75 ...	141,728	58,182	445,970	204,896	36,698	6,852	156,806	10,659

The increase yearly apparent in the more valuable kharif crops has been already reviewed in the Resolution of last February upon that fasl.

It now remains to review the results of the fasl rabi.

The increase in wheat irrigation is 43,215 acres, and in barley and the less valuable cereals, 16,315 and 7,169 acres, respectively.

This increase may be attributed partly to the wider cultivation of the better class of grains, and partly to the lateness of the winter rains, which caused a great demand for irrigation in the Cawnpore and Etáwah districts. The increase of 20,000 acres in pulses (grain), and of nearly 6,000 in the highly-rated garden crops wholly in the district of Gurgáon (to which water has been given for the first time from the Agra Canal), are satisfactory features in the results of the season.

Turning to the Statement No. A7 rabi showing the areas by districts, the increase on all the principal grain crops is seen to be general on the Ganges Canal; the total increase for the canal over last rabi being 95,175 acres, of which 21,151 acres is in Cawnpore district, 16,500 in Mainpurí, 14,071 in Bulandshahr, 11,483 in Aligarh, 11,223 in Etáwah, and 9,582 in Etah; and there has been a general increase in every other district except the two irrigated by the Rohilkhand Canals, which show a decrease of 13,200 acres of rabi cultivation, owing to masonry weirs which are under construction not being ready.

The present rabi is signalized as the first irrigating season of the new Agra Canal. The first and second divisions show respectively an irrigated area of 9,453 and 5,677 acres, making an aggregate of 15,130 acres, of which 9,410 acres was in the Gurgáon district, the largest portion being taken for gardens and orchards.

These results are very encouraging, as the cautious official estimate for the past year was limited to 6,000 acres.

Reviewing the results of the whole year, it may be said that the increase in sugarcane and indigo among the kharif crops, and the general increase among all the more valuable rabi crops, amply compensates for the decrease in rice and cotton.

The former crop is regaining its position on the Eastern Jumna Canal; the production of the latter by irrigation appears incompatible with the present low prices.

ORDERED, that copies of this Resolution and connected papers be submitted to the Government of India and circulated to the Officers of the Department, Irrigation Branch, and to the General Department of this Government, and that it be published in the *North-Western Provinces Gazette*.

By order, &c.,

W. H. GREATHED, *Col., R. E.*,

Secy. to Govt., N.-W. P., Irrigation Branch.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

WORKING AND PROGRESS OF DISTRICT SAVINGS BANKS IN THE BENGAL PRESIDENCY DURING 1874-75.

No. 59, dated Calcutta, the 24th September 1875.

From—E. F. HARRISON, Esq., Comptroller General,
To—The Secretary to the Government of India, FINANCIAL DEPARTMENT.

I have the honor to forward, for submission to Government, the fifth annual report on the working and progress of District Savings Banks during the year 1874-75.

2. The system extends to the whole of British India, with the exception of the Presidencies of Madras and Bombay, which have Savings Banks of their own.

3. The total number of Banks open at the end of the past year was 157, which shows that 20 new ones were opened during the year, there having been 137 only in the list of 1873-74. Of the 157 Banks open in the past year, 148 have been actually working, and in the remaining nine no business has as yet been transacted, though some of them have been formally established for three years. The Banks are distributed thus:—

PROVINCES.	1873-74.	1874-75.	New Banks opened.
Bengal	41	43	2
Assam	9	9	...
North-Western Provinces	22	31	9
Oudh	12	12	...
Punjab	15	23	8
Central Provinces	19	19	...
British Burmah	13	13	...
Berar	2	2	...
India	4	5	1
TOTAL ...	137	157	20

4. During the past year 3,171 accounts were opened and 1,533 were closed, the result being an addition of 1,638 depositors to the number, 5,427, existing at the end of 1873-74. The past year accordingly closed with 7,065 depositors, or with an increase of 30 per cent. The following statement shows the percentage of increase in the number of accounts in the several provinces and also the average number of accounts to each *working* Bank:—

PROVINCES.	No. of Banks, 1873-74.	Number of depositors, 1873-74.	No. of Banks, 1874-75.	Number of depositors, 1874-75.	Percentage of increase in number of depositors.	AVERAGE OF DEPOSITORS PER BANK. 1873-74.	1874-75.
Bengal	41	2,531	43	3,176	25·48	62	74
Assam	9	207	9	283	36·71	23	31
North-Western Provinces ...	22	898	30	1,301	44·87	41	43
Oudh	12	298	12	366	22·81	25	30
Punjab	15	488	20	669	37·09	32	33
Central Provinces ...	16	312	16	444	42·30	19	27
British Burmah ...	11	236	11	365	54·66	21	33
Berar	2	104	2	117	12·50	52	58
India	4	353	5	344	2·61 decrease.	88	69
TOTAL ...	132	5,427	148	7,065			

5. The year 1874-75 opened with an aggregate balance of Rs. 11,80,750 and closed with Rs. 16,66,856, so that the gross sum at credit of depositors has increased by Rs. 4,86,106. The increase has been 41 per cent., and the major portion has been contributed by Bengal and the North-Western Provinces, as will appear from the details given below; the proportion of increase is not, however, largest in those provinces:—

PROVINCES.	BALANCE OF DEPOSITS. 1873-74.	1874-75.	Increase.	Percentage of increase.	AVERAGE BALANCE IN EACH BANK WORKING. 1873-74.	1874-75.	AVERAGE BALANCE AT CREDIT OF EACH DEPOSITOR. 1873-74.	1874-75.	PROVINCES.

TOTAL ...	11,80,750	16,66,856	4,86,106						

6. Of the 7,065 accounts noticed in paragraph 4, 5,575 were opened by the natives of the country and 1,490 by European and Eurasian depositors. These two figures include—the former 81 and the latter 199 accounts opened for certain local institutions, which are respectively under Native and European management. The subjoined table shows in detail the accounts held by Native and European and Eurasian depositors, with the amount of deposits and interest at their credit.:—

PROVINCES.	NATIVE DEPOSITORS, INCLUSIVE OF ACCOUNTS FOR LOCAL INSTITUTIONS. No. of accounts.	Amount of deposits.	Amount of interest allowed.	EUROPEAN AND EURASIAN DEPOSITORS, INCLUSIVE OF ACCOUNTS FOR LOCAL INSTITUTIONS. No. of accounts.	Amount of deposits.	Amount of interest allowed.	TOTAL. No. of accounts.	Amount of deposits.	Amount of interest allowed.
Bengal ...	2,853	5,72,882	17,673	323	94,112	2,872	3,176	6,66,994	20,545

India ...	275	46,206	1,575	69	18,541	618	344	64,747	2,193
TOTAL ..	5,575	12,13,065	36,899	1,490	4,53,791	13,998	7,065	16,66,856	50,897

The total sum paid as interest to the depositors has been Rs. 50,897 against Rs. 34,664 in the preceding year, the average allotment on this account to each depositor at the end of last year being about Rs. 7.

7. The depositors are classified thus:—

PROVINCES.	CLASS I. PROFESSIONAL. A. Having fixed incomes.	B. Having variable incomes.	CLASS II. Domestic.	CLASS III. Commercial.	CLASS IV. Agricultural.	CLASS V. Industrial.	CLASS VI. Indefinite or non-productive.	TOTAL.
Bengal	1,903	313	161	127	59	34	579	3,176
Assam	162	18	15	14	8	1	65	283
North-Western Provinces ...	627	44	383	17	9	13	208	1,301
Oudh	264	14	28	4	1	1	54	366
Punjab	424	21	76	13	1	4	130	669
Central Provinces ...	180	18	49	66	7	8	116	444
British Burmah ...	159	75	50	31	...	12	38	365
Berar	72	2	3	2	...	...	38	117
India	83	10	123	17	26	55	30	344
TOTAL ...	3,874	515	888	291	111	128	1,258	7,065
TOTAL OF 1873-74 ...	2,719	392	966	297	131	67	855	5,427
DIFFERENCE Increase ...	1,155	123	...	...	...	61	403	1,638
DIFFERENCE Decrease ...	...	...	78	6	20	...	...	...

The decreases under classes II and IV result from a change in the principle of classification followed.

8. The number of transactions during the year has been 19,760, *viz.*, 14,440 deposits *plus* 5,320 withdrawals, against 15,353 in the preceding year, *viz.*, 11,527 deposits *plus* 3,826 withdrawals. Although the average number of transactions of each depositor does not appear high, yet the books of this office show that some of the accounts opened by the Managers of certain local institutions—the Dispensary and Educational Committees for instance—are constantly operated on as if the *Savings* Banks like other Banks were intended for current accounts for the deposit of floating balances. Steps have been taken to prevent such irregularities on the part of the Treasury Officers.

9. It appears, however, from the above facts and figures that the progress made by the District Savings Banks during the last year has been fair and encouraging. From the fact of the major portion of the accounts being held by the natives of the country of every class, I am led to conclude that the object with which the system has been introduced has to some extent been gained.

10. The following statement showing at one view the progress made by the District Savings Banks during the last five years may be interesting:—

Provinces.	1870-71.		1871-72.		1872-73.		1873-74.		1874-75.	
	No. of accounts.	Balance of deposits.	No. of accounts.	Balance of deposits.	No. of accounts.	Balance of deposits.	No. of accounts.	Balance of deposits.	No. of accounts.	Balance of deposits.

11. In conclusion I may observe that since the establishment of District Savings Banks, there has been only one case of embezzlement, *viz.*, in the Nagpore Bank in the Central Provinces: the amount embezzled has, however, been recovered in full. I am sorry, however, that I must add that the neglect of some officers to submit punctually the very simple returns, and their indifference to repeated calls, while adding greatly to the labor of my office, deprive Government of the defence of prompt check over the accounts.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th DECEMBER 1875.

General Remarks.—In Madras good rain has fallen in the Southern districts, and moderate showers in the Northern. In Bombay there have been light showers in the Deccan: the harvest continues and prospects are fair. More or less rain has fallen in several districts of the Central Provinces, and the rabi crops have been benefited thereby. No rain is reported from Berar or Central India, but in Rajputana there have been good falls at Jeypoor and Ajmere, and slight showers in Marwar. In Bengal only very slight showers are reported from Jalpaiguri, Chumparun and Midnapore, but in several other districts clouds promise a fall. No change is announced in the prospects of the crops. In the North-Western Provinces there has been a good fall of rain at Agra, and lighter falls in Hamirpur, Banda, Jhansi and Bareilly: prospects are excellent. Light showers are said to have fallen in most districts in Oudh, and to have been beneficial. In the Punjab heavy rain has fallen at Rawal Pindi and Peshawar, and showers at Umballa, Dera Ismail Khan and Jullunder: prospects are good. In Mysore no rain has fallen, and the prospects of the crops continue unimproved. Reports from Burmah are good. No report has been received from Assam.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Dec. 9th)	·53 at Masulipatam; none elsewhere.	Rain wanted for later dry crops; 3½ feet water over anicut; later dry crops sown; standing crops generally good; wet paddy requires more water; markets supplied; prices generally steady; cholera 23 seizures, 8 deaths in Bander; fever general; small-pox in two taluks; cattle dysentery and sore-feet in four; pasture sufficient.
Kurnool (8th)	*Nil*	Dry crops and paddy harvest continue; water and pasture abundant; markets well supplied; prices falling in one taluk and steady elsewhere; fever prevalent; cholera decreasing, 29 seizures, 14 deaths; no water over Sunkesala anicut.
Tanjore (9th)	4·0 at Negapatam; elsewhere moderate.	Water in rivers decreasing; supply to tanks scanty; water over anicut none; cultivation wet and dry crops in some parts; standing crops good; harvest a few wet and dry crops, yield fair; markets well supplied; prices almost steady; cholera continues, 107 seizures, 72 deaths; cattle generally healthy; pasture generally sufficient.
Trichinopoly (8th)	Slight rain in Trichinopoly taluk; about an inch elsewhere.	Rivers low; water supply however sufficient; crops good; outturn of Kar rice up to average in two taluks, 25 per cent. below in one, and slightly above in another; markets well supplied; prices slightly fallen in one taluk, steady elsewhere; cholera slightly prevailing in district, one death yesterday in town; condition of cattle good; pasture generally ample.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued,*		
Malabar (9th)	·91	Second crop cultivation good; markets well supplied, prices steady; bowel complaints in six taluks, 523 seizures, 392 deaths; small-pox prevalent in Ernad; cattle disease slight in Walluvanad; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay— (Dec. 9th)		
Sind. (Dec. 8th)		
Kurrachee ...	...	Cholera in Keti and neighbourhood, diagnosis doubtful, 12 cases, 3 deaths; north winds.
Shikarpur ...	...	Late rain has benefited rabi crops, but damaged kharif harvest, which had not been stored; bad fever prevalent, accompanied by diarrhœa; cattle disease in Talukas Mirpur, Ubauro and Sukkur; weather colder and brighter.
Hyderabad ...	...	Cotton picking and rabi sowings continue; weather cold, but no frost; canals not dry yet; fever prevalent.
Upper Sind Frontier ...	...	Fogs during the past week; rabi crops well; kharif being harvested.
Guzerat.		
Ahmedabad ...	...	Rabi crops thriving.
Kaira ...	...	Rabi crops and cotton good; 23 cholera cases in two talukas, 14 deaths.
Surat ...	...	Crops good; four fatal cholera cases in Wálod.
Broach ...	...	Crops good; fever throughout the district; several deaths in Broach and Wágra.
Khandesh and Nasik.		
Khandesh ...	...	Jowari being reaped; grain attacked by insects in Nandurbar; other rabi crops good; ague prevailing; cattle disease in Peta Ráver.
Nasik ...	...	Outturn of kharif crops estimated at 8 annas; sugarcane and ground-nuts full crops; rice 12 to 14 annas, full crop in bagayat lands; rabi sowing retarded from want of rain; prospects consequently not satisfactory; fever in four talukas.
Konkan.		
Tanna ...	...	Kharif reaping completed in 3 talukas; rabi sowing progressing; cholera very slightly continues in 2 villages of Bhiwandi taluka.
Deccan.		
Poona ...	0·59	Total rainfall 34·30; standing rabi crops well.
Ahmednagar ...	0·63	Total rainfall 18·49; harvesting of kharif finished.
Sholapur ...	...	No change.
Satara ...	...	Harvesting of early crops nearly completed; late crops moderate; rain wanted.
Southern Mahratta Country.		
Belgaum ...	...	No change.
Dharwar ...	...	Harvest of early crops almost completed; blight in cotton in four talukas; fever and ague prevalent; cholera decreasing.
Kanara ...	0·04	Total rainfall 108·02; weather cloudy; harvest completed above Ghát; ploughing for second crop on coast; 4 cases of cholera.
Kaladgi ...	...	Kharif harvest progressing; rabi and cotton good; 42 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Rabi crops good; cholera in some places, but is decreasing.
Wadhwán ...	...	Weather cold; crops good; 82 cholera cases, 37 deaths.
Baróda ...	...	No change.
		General Remarks.—Fever prevalent throughout Sind; cholera reported at Keti; cholera in Kattywar and Kaira; fever prevalent in Guzerat, Khandesh and Nasik; slight rain having fallen in the Deccan the prospects of rabi crops are improved.
Bengal— (Dec. 9th)		
Chittagong ...	*Nil*	Weather warmer than it should be; heavy dews at night; no change since last report; the yield will be throughout the district much less than it ordinarily is, and will in some high lands be hardly worth the reaping; the failure will, however, be only one of the surplus which would have been exported elsewhere; there will remain ample for local wants.
Noakhally ...	*Nil*	Weather fair and cold; the evening of the 1st and morning of the 2nd instant were cloudy; reaping of the late rice, and in some places sowing of pulses and chillies, have commenced; cholera prevalent in the interior.
Chittagong Hill Tracts...	*Nil*	Seasonable weather; rice sown by plough cultivators is being harvested, a very poor outturn is anticipated; cotton is being gathered and mustard sown.
Hill Tipperah ...	*Nil*	Cloudy weather off and on, but no rain; the late rice crop is being cut; about Agartolla the outturn is very fair, but not so good to the south, where it has suffered more than elsewhere from want of rain; cotton is being gathered on the jooms; several cases of cholera are reported as having occurred in the hills to the south.
Backergunge ...	*Nil*	All well, save a little cholera and fever in detached localities.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Furreedpore ...	*Nil*	Weather cool and dry; the crops are as reported last week, *viz.*, owing to want of rain in October, the rice crop is less than it otherwise would have been, but on the whole it is a good crop; winter crops are doing well; cholera has appeared in the Sudder Station, two cases having ended fatally up to date; one European was attacked in Goalundo.
Dacca ...	*Nil*	Weather warm for the season; rain wanted for the winter crops, otherwise the state of the crops is good.
Mymensingh ...	*Nil*	Weather fine and cold; late rice harvest is generally very good, the chief exception being in parts of Kishoregunge sub-division; rape seed plants are in flower.
Tipperah ...	*Nil*	Weather fair and cool; no material difference since the last report; the amun rice crop is being reaped in all the places, but the outturn generally will be less than the average, owing to want of rain in October; cholera has made its appearance in many places in the district.
24-Pergunnahs ...	*Nil*	Seasonable weather; amun on late rice crop is being cut; cholera prevalent at Baraset, Barripore and Diamond Harbour; fever continues at Baraset and Bassirhat.
Jessore ...	*Nil*	Weather somewhat warmer than during the past fortnight; no sign of rain; rice crop is being harvested; winter crops require rain.
Nuddea ...	*Nil*	Weather hot and sultry for the time of the year; the amun harvest is generally fair, except on the higher lands, where it has suffered from the drought in October; want of rain is affecting the cold weather crops also, especially kalai, pulse and chillies; cholera is still very prevalent in many parts of the district.
Moorshedabad ...	*Nil*	Much warmer weather than usual at this time of the year; rain wanted for the winter crops in the southern half of the district; in other respects the prospects are the same as in last report, *viz.*, late rice harvest is going on; an average of full 12-anna crop is expected; other winter crops are thriving; fever continuing in Sujagunge and Gorabazar; a few cases of cholera reported from Gorabazar, Dawlatabad, Nowada, Burwa and Bharutpur.
Pubna ...	*Nil*	Seasonable weather; state and prospects of the crops are good; cholera is still prevalent.
Rajshahye ...	*Nil*	There has been no rain; the weather is warm for the time of the year; the prospects of the crops are unchanged since last report; the cutting of the transplanted rice in the Bhurind tract has commenced; the cold weather crops will do well should there be rain soon; cholera has abated, but much fever is reported in parts of the district.
Bogra ...	*Nil*	Fine and seasonable weather; a fair crop is now certain all round, and in some parts the crops will be good; rice is now being extensively cut, and the *rabi* or cold weather crops are coming on well.
Maldah ...	*Nil*	Weather dry; no rain has fallen in the district; sky at times was slightly cloudy. The drought has destroyed 2 annas of the late autumn rice crop in Khurlee thana, 3 annas of the winter rice in Maldah, and 2 annas of the latter crop in Gazole; *amun* crops are being reaped; the yield is not expected to be good; *kalai* pulse is ripening; *haimanta* rice is being reaped in Nowabgunge; the cold weather crops are in general doing well, but have been attacked by insects in Shibgunge; 76 deaths have occurred from cholera during the week.
Dinagepore ...	Not received	Weather fair, cold and cloudy; the rice crops are being cut; a moderate outturn is expected throughout the district; cholera at Thakoorgaon.
Rungpore ...	*Nil*	Cloudy weather; rice is being cut every where; in Kurigram the outturn exceeds the estimate, and is a good one; mustard is generally good.
Cooch Behar ...	*Nil*	Weather fair and cold; there has been no change in the prospects of the crops; the outturn of the late rice crop, as stated before, will not fall below 8 annas; the prospects of tobacco continue favourable.
Jalpaiguri ...	·06	Weather cloudy and hot for the season; no change in the state of the crops; high land rice is being reaped, and tobacco going on well; the season is exceptionally unhealthy, fever being very prevalent; cholera has again broken out in the jail, but only two deaths.
Darjeeling ...	Not received	Bright weather during the early part of the week; a little rain fell on Wednesday night, and ever since it has been very misty, with a sharp, raw cold, threatening rain or snow; the reaping of the *haimanta* rice in the Terai is progressing; the deficiency in the outturn will not materially affect the district; all the crops in the hills have yielded a fair outturn.
Midnapore ...	·02	Weather fair, but rather warm for the season; the rice crop has proved, as was anticipated, a first-rate crop; the cold weather sowings are doing very well.
Howrah ...	*Nil*	Weather good; state and prospects of the crops are very good; the harvest of the rice crop is going on, and promises to be very exceptionably heavy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hooghly ...	Not received	The weather was rather warm as compared with the preceding week; the *amun*, or late rice harvest, has commenced; about one-fourth of the paddy on the high lands has been cut; the outturn looks like an eight-anna crop; the paddy in the low lands will be ripe for cutting about the middle of the month; high and low land rice crops taken together, a thirteen-anna crop may be held promised, as far as can at present be judged; the outturn of the vegetables has been very favourable; potatoe is doing well, and sugarcane tolerably; prospects of *kalai* pulse are not good.
Burdwan ...	*Nil*	No change in the condition and prospects of the crops; reports of the outturn of the *amun*, or late rice, and the prospects of the *rabi* or cold weather crops, are all favourable; cholera reported from Boodbood and Culna.
Bankoorah ..	*Nil*	Weather dry and hotter than usual at this time of the year; *amun*, or late rice crop, is being reaped; outturn good; winter crops are doing well; sporadic cholera prevailing throughout the district.
Beerbhoom ...	*Nil*	The weather is rather warm; harvest of the rice crops is nearly finished; sowing of the winter crops is proceeding; no need of rain at present.
Sonthal Pergunnahs ...	*Nil*	Weather dry and considerably warmer than the previous week; the harvest of rice is going on well.
Bhágalpur ...	*Nil*	The Collector has just returned from a tour in the north of the district, and reports that the rice prospects are very good every where except in the Soopool sub-division; even there all low lands are decidedly good, but the high lands will yield nothing; harvesting is in progress; the *koorthi* pulse and *tori* oilseed crops are indifferent throughout the north of the district, but the *rabi* crops so far promise to be very fine; with an unusually large area sown down, should this harvest be a good one, there will not be much to fear except very locally and over limited areas; prices are falling; general health is very good.
Monghyr ...	Not received	Weather cloudy, with easterly wind, but no rain; an early harvest has commenced all over the rice tracts; the outturn on high lands not irrigated is very poor as expected, but the Collector sees no reason to change his opinion already expressed, that the outturn will be nearly an average one; the *rabi* crops up to the present time are doing well.
Purneah ...	Not received	Weather dry, but not so cold as usual at this time of the year; the state and prospects of the crops remain unaltered; *viz.*, reaping of the winter rice has commenced; good reports are received from the north and from the Kusi; mustard promises well; pulses are coming on, wheat, oats, &c., have generally germinated; rain is much wanted.
Darbhanga ...	*Nil*	No change; in Mudhoobani *rabi* crops where sown are feeling the want of rain; importations reported into Mudhoobani, which has caused a slight fall in prices; the Magistrate has proceeded to investigate the state of affairs in Northern Mudhoobani; crops in Nepal near the frontier vary from 2 annas near Lowkaha to 6 annas near Hurlakhi, same as in British territory; beyond lowest range, 10 miles from the frontier, crops are good.
Mozufferpore ...	Not received	Weather rather warm and occasionally cloudy; the rice harvest has commenced in many parts of the district; the prospects of the *rabi* crops in Mozufferpore and Hajeepore sub-divisions are unchanged, but in Seetamurhee sub-division are daily becoming worse.
Sarun ...	*Nil*	Clear weather, cloudless sky and cool winds; fleeting clouds on Thursday and Friday; there is no material difference in the state and prospects of the crops since last report; late rice crop is being harvested; sugar manufacture is going on; cotton and *ruhar* pulse are doing well; prospects of the *rabi* crops still continue favourable; the heavy dew at night has kept up the moisture in the fields; irrigation is being extensively resorted to; general health good.
Chumparun ...	0·2	Cool at night and hot during the day; the condition of the crops remains as before, *viz.*, the prospect of the late rice crop is as bad as was anticipated; *rabi* has been sown, but is not growing well.
Patna ...	Not received.	Weather much too hot for the time of the year; on more than one occasion it has looked like rain, which must come sooner or later, but still it holds off; the rice crop is now being reaped, and the Collector does not think, on the whole, it will be a bad one; the prospects of the *rabi* crops are fair, but of course would be benefited by rain; health of the district is good.
Gya ...	*Nil*	Weather mostly dry, with westerly winds, and hardly any dew; in the north, forenoons are damp; much warmer than usual at this time, and gradually getting warmer, thermometer reached 86·2; rice is being cut, with prospects as before, *viz.*, outturn 8, 10 and 12 annas in different parts of the district; *rabi* nearly all sown.
Shahabad ...	Not received.	Dry and clear weather; the winter rice crop is being reaped; *rabi* crops are promising well, and are much better than was expected; health of the district is good.
Hazaribagh ...	*Nil*	Weather clear and cloudy alternately, and continues to remain warmer than it should be; the prospects of the crops continue very much the same as reported last week; rain, which would be very beneficial to the cold weather crops, still holds off.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Lohurdugga	...	*Nil*	Weather warmer than in the previous week, and clouds hanging about; the harvesting of the rice crop is now nearly complete; the outturn is reported from all sides to be very good; the *rabi* crops are looking well, but would be benefited by some rain; in Palamow the area sown is very small owing to drought in October; general health good.
Maunbhoom	...	*Nil*	Unusually hot weather; favourable reports of the cold weather crops throughout the district; a little rain is required.
Singhbhoom	...	*Nil*	Weather very warm for the season; state and prospects of the crops are favourable; much fever and dysentery are prevalent.
Balasore	...	*Nil*	Weather fine, but warmer than in the previous week; harvest operations actively going on; rice crop is excellent; cases of cholera are still numerous.
Cuttack	...	*Nil*	Weather cold and fine; early *sarudh* rice crop is being reaped and late *sarudh* is ripening; state of all crops is excellent.
Pooree	...	*Nil*	Weather bright and cold; the *laghu*, or the first late rice, is being reaped and gathered; *sarudh* or the main late rice has commenced to ripen; *chana* (gram), mustard, and *kolthi pulse* are progressing fairly; sugarcane is ripe; prospects of the crops in Khoordah are fair.
			General Remarks.—No rainfall is reported from any of the districts for the week under review, except a very slight fall in Jalpaiguri, Midnapore and Chumparun. The state of the crops in the Bhágalpur, Burdwan, Orissa and Chota Nagpore Divisions *is good.* The prospects of the Dacca Division are also good, but the crops on the high lands would have been bettered by a little rain. In the Chittagong Division the crops will, it is believed, yield a moderate outturn. It has been ascertained on careful enquiry that the general outturn of harvest in North Bengal and Behar will be better than was expected. Winter crops generally promise well but require rain
N. W. Provinces—			
Benares	(Dec. 6th)	*Nil*	Rabi prospects good; signs of rain.
Mirzapur	(8th)	...	Prospects of the rabi crops continue good.
Allahabad	„	*Nil*	*No change; clouds came for two days, but cleared off.*
Hamirpur	(9th)	(Slight shower of rain on 4th doing some good.)	Rabi promises well.
Jhansi	„	(Slight rain on the 6th.)	Weather cloudy, with easterly winds; prospects unchanged.
Agra	(8th)	·5 to 1·4	Rabi crops progressing well.
Meerut	„	...	Prospects very good.
Bareilly	„	(Rain fell in parts of the district on Friday.)	Prospects good.
Banda	„	(Slight sprinkling of rain in Pergunnahs Banda and Chibu.)	
Punjab—			
Delhi	(Dec. 8th)	*Nil*	Health and prospects good.
Umballa	„	·3	Crops and health good.
Jullundur	„	·1	Rabi prospects fair; *fever still prevails.*
Lahore	„	*Nil*	Crops and health good.
Mooltan	„	*Nil*	Crops good; a little fever.
Dera Ismail Khán	„	·3	Health and harvest prospects good.
Rawal Pindi	„	2·5	Prospects excellent; health good.
Pesháwar	„	1·3	Rabi sowings in progress; slight fever prevalent.
			General Remarks.—Harvest prospects good; public health *generally* good.
Oudh—			
Lucknow	(Dec. 8th)	...	The light showers which have fallen in most districts have been beneficial to the rabi crops; prospects and public health continue good.
Sitapur	„	...	
Fyzabad	„	...	
Central Provinces—			
Upper Godavari	(Dec. 4th)	...	Weather cloudy; prospects favourable; health good; prices fluctuating.
Sambalpur	...	...	Weather clear; rice cutting; prospects excellent.
Bilaspur	...	...	Weather cloudy; prospects favourable; fever continues; prices steady.
Raipur	...	...	Kharif harvesting; cholera subsiding; prices risen.
Chanda	...	...	Rice gathered; rabi sowings completed; cattle disease continues; prices fallen.
Chhindwara	(5th)	·80	Weather cloudy; crops favourable; health good; prices steady.
Betul	(6th)	·17	Rain beneficial to rabi crops; kharif harvested; health good; prices steady.
Balaghát	...	...	Weather cloudy; kharif harvesting; rabi sowings completed; fever prevalent; prices steady.
Bhandara	(7th)	...	Threshing and cutting of rice continue; rabi favourable; cholera, fever, cattle disease and small-pox continue; prices easy.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— *continued.*			
Nagpur	(8th)	...	Weather cloudy; crops doing well; health good; prices easy.
Wardha	...	...	Jowar cutting; cotton picking continues; prospects of rabi good.
Nimar	...	...	Few showers on the 5th; jowar cutting; cotton picking; small-pox prevalent; prices stationary.
Hoshangabad	...	...	Weather cloudy; little rain on the 6th; prospects of crops unchanged.
Narsinghpur	...	...	Rain wanted; crops promising; health good.
Jubbulpore	...	·55	Weather cloudy; rabi crops good; cattle disease continues.
Saugor	...	·55	Rain beneficial to rabi crops; threshing of kharif continues.
Seoni	...	·35	Prospects of rabi favourable; health good.
Damoh	...	...	Rain wanted; health good; prices stationary.
Mandla	...	...	Prospects favourable; health good; prices stationary.
			General Remarks.—Prospects continue fair; cloudy weather prevails, and may do some injury if it continues.
British Burma—			
Arakan Divn.	(Dec. 8th)	...	Public health good; agricultural prospects fair; crops a little light.
Pegu Division	„	...	Public health generally good; some cases of cholera in Pegu township; prospects of crop good; reaping going on in Henzada and Thayetmyo; slight cattle disease in the Rangoon and Bassein districts.
Tenasserim	„	...	Public health good; crops progressing.
Mysore and Coorg—			
Mysore	(Dec. 9th)	*Nil*	No change in prospects of the season since last report; cholera rapidly disappearing in Bangalore as well as in the districts.
Coorg	„	·48	
Hyderabad Assigned Districts—			
Umraoti	(Dec. 9th)	...	Cotton picking continued; jowari cutting commenced; rabi in good condition; weather cloudy.
Rajputana—			
Sirohi	(Nov. 29th)	...	Health good; prospects fair.
Marwar	(Dec. 4th)	Cloudy, with spattering of rain.	Health good; prospects favourable.
Harowtee	(Nov. 27th)	...	No change.
Bhurtpore	(Dec. 2nd)	...	Kharif below average; rabi sowing nearly completed; health good; general prospects satisfactory; horizon clouded daily.
Jeypore	(9th)	1·5 inches on the 3rd inst.	Agricultural prospects favourable; weather seasonable; health good.
Ajmere	„	A good fall of rain on the 3rd inst.	Prospects fair.
Central India—			
Indore	(Dec. 8th)	...	Health and agricultural prospects good.
Gwalior	„	...	
Neemuch	„	...	
Rutlam	„	...	
Sutna	„	...

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 7th December 1875.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K. C. B., *Senior Member of the Council, presiding.*
His Honour the Lieutenant-Governor of Bengal.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble J. R. Bullen Smith.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, C. B., K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.

SPECIFIC RELIEF BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill to define and amend the law relating to certain kinds of Specific Relief, and moved that it be referred to a Select Committee with instructions to report in three months.

When he asked for leave to introduce the Bill, he had explained its general objects, and he now had to show the mode in which the Bill carried those objects into effect. The Council knew that the Bill was designed to occupy a middle place between the Civil Procedure Code on the one hand, and the Indian Contract Act on the other hand. All rules relating to the validity or invalidity of contracts, and the legal relations of parties to contracts, were dealt with by the Contract Act; and the technical processes by which parties were to obtain

their remedies were provided for in the Civil Procedure Code. What it was proposed to do in the Bill before the Council was to point out the nature of the remedy to be obtained. Therefore, this Bill was not intended to cover any part of the ground which was already covered by the Contract Act, any more than it covered the ground already covered by the Civil Procedure Code; and if it did trespass on either ground it was by mistake, which ought to be corrected when the Bill was before the Select Committee.

Now MR. HOBHOUSE had mentioned on the last occasion, that the main subjects of the Bill were the remedies by way of specific performance of contracts, and by way of injunction for the prevention of wrong. Any one who looked at the Bill would see that the bulk of it was taken up with these two subjects. There were, however, one or two other subjects of considerably narrower range, with which the Bill attempted to deal, and to which he would first call attention very briefly.

Chapter III dealt with the subject of the rectification of instruments. That, no doubt, was in itself a kind of specific performance, because if there was no contract between parties, there would be nothing to rectify. But it was specific performance of a very peculiar nature, because it involved the alteration of that which the parties to the contract had already settled in a formal way. Therefore it was a subject which needed more strict rules than the other kinds of specific performance.

Chapter IV dealt with the rescission of contracts, a proceeding exactly the opposite of the specific performance of contracts.

Chapter V dealt with the cancellation of instruments, occasions for which arose when one of the parties had got possession of a document, on which he might not indeed be able to found a legal claim in a Court of justice, but which might give him such *primâ facie* right against the other as would expose him to vexatious claims and litigation. In these cases it was just that the aggrieved party should apply to a Court of justice in order to have the instrument destroyed.

Chapter VI dealt with the subject of declaratory decrees, and that was a matter of jurisdiction of some delicacy, as to which some direction should be given. MR. HOBHOUSE had previously mentioned that the subject was dealt with in the Civil Procedure Code. That Code embodied the English law on the subject, and merely said that a decree should not be invalid, on the ground only that it was a declaratory decree, but it did not show in what cases a declaratory decree should be made.

Chapter VII dealt with matters which seldom arose, but when they did arise, they were usually of great importance. These were now the subject of the writ of *mandamus*. It was called a chapter for the enforcement of public duties; and the rules here laid down were intended to take the place of the procedure for a *mandamus*, to supply a procedure more simple than the rather intricate and technical procedure which was now in force.

In all of the various matters embraced by the Bill, it was intended almost entirely to follow the present rules of English law; and by English law, he meant that portion of English law which had been imported into India, and which he might also call Indian law. There were some material variances between the law as administered here, and as administered in England, a discrepancy mainly owing to the different conditions which existed in India. The principal one of these differences MR. HOBHOUSE had already mentioned to the Council, namely, that we had not the double jurisdiction which existed in England. We had not to commit our law to a judicial system worked upon the principle of having one set of Courts to do injustice in order that another set might interfere to do justice by way of injunction or in some other way. Owing to that circumstance the process of choosing and seeking a remedy was very much more simple in this country than in England. If a contract was not performed, a plaintiff in India might apply to one tribunal and ask for the whole of the remedies to which he was entitled, instead of being obliged to go backwards and forwards to the two sides of Westminster Hall, perhaps after all obtaining no justice in either.

If the Council would examine section 18, they would see that the Bill contemplated an entire settlement of all disputes arising from the non-performance of a contract.

It ran as follows:—

"Any person suing for the specific performance of an agreement, may also ask for compensation for its breach, either in addition to, or in substitution for, such performance.

If in any such suit the Court decides that specific performance ought not to be granted, but that there is a valid agreement between the parties which has been broken by the defendant and that the plaintiff is entitled to compensation for that breach, it shall award him compensation accordingly.

If in any such suit the Court decides that specific performance ought to be granted, but that it is not sufficient to satisfy the justice of the case, and that some compensation for breach of the agreement should also be made to the plaintiff, it shall award him such compensation accordingly."

So again, in section 28 it was provided that the dismissal of a suit for specific performance of an agreement should bar the plaintiff's right to sue for the breach of such agreement. In England that was not so—or rather, MR. HOBHOUSE was speaking of what was the law in England until a few days ago; for it was possible that the alterations which had just come into effect would make a great difference in the state of the law and bring it nearer to what was expressed in this Bill. But certainly before these alterations were made a man might sue in the Court of Chancery for the specific performance of a contract; after the whole case was gone through, it might be discovered that the appropriate remedy was not specific performance, and the case might accordingly be brought before a Court of law, where the whole subject of dispute would have to be tried over again. Here we had the advantage of a single tribunal, and as was clearly right, the plaintiff might come to it and ask for the whole of the remedies to which he was entitled. He must make up his mind to what remedy he is entitled, whether to specific performance, or to compensation, or to both. And as he could get in one suit all he was entitled to, it was but just that the whole dispute should be concluded in one suit, and that no second suit should be brought.

Another ground of difference was this, that in India the very artificial law known as the Statute of Frauds no longer affected contracts. It had been said by a very great authority that every line of the Statute of Frauds was worth a subsidy. It might however be affirmed with equal truth that every line had cost a subsidy, for there was probably no Statute on the books which had given rise to so much litigation as the Statute of Frauds. The reason was this, that it had introduced an artificial system, and enjoined strict formalities in transactions of every day occurrence between simple people, who were accustomed to use no formalities in them. People went on in their old natural informal way, and then, when a dispute arose, one party would prevent the other from getting justice by insisting on the want of the requisite formality. The Courts, as usually happens in such cases, refined on the Statute to prevent glaring injustice, and thus the points of dispute were largely multiplied. There was no part of the subject of specific performance of contracts which was more subtle or refined than those parts in which the provisions of the Statute of Frauds came under the handling of the Court of Chancery. But the Statute had been repealed in India by the Contract Act, and with it we got rid of a large and troublesome portion of the subject of the measure before the Council.

There was another subject of considerable practical difficulty on which it was almost impossible to lay down rules. That subject was the delay occurring before the institution of a suit. There was no express law limiting the time within which a suit for specific performance should be instituted in the Court of Chancery. But the Court of Chancery laid down the rule that suitors should come quickly to obtain such a remedy, and it was frequently a very difficult question to decide whether a plaintiff had or had not come into Court in time. Here in India, the Limitation Act provided a period of three years in which a suit for the specific performance of a contract should be brought, and as it was not proposed to alter the law upon this point, we were able to avoid treating the difficult question what was or was not delay.

The foregoing were the points on which the conditions of Indian law brought about a variance between the provisions of this Bill, and what would be necessary if a similar Bill were introduced in England. Besides that there were in this branch of law as in others, matters on which authorities differed. Some of these the Bill attempted to settle one way or the other, and in that sense it might be said that it altered the law, by ascertaining what was doubtful, or ruling one way what might possibly be ruled another way in a Court of law. He had followed what he conceived to be the balance of authority, or what appeared to be the clearer and more intelligible rulings in each matter. He would mention the principal of these points.

There was one point of considerable difficulty in the Bill, and that related to the part which made provision for the specific performance of contracts so far as they could be performed, and for compensation so far as it was not possible to perform them. This jurisdiction was a very delicate one, for it amounted to something like making a new contract between the parties, when the person seeking performance was the person in default. Yet it often happened that there was some quite insignificant part of the contract which the party seeking performance was bound to perform but could not. In such a case it was wrong that, because some little thing remained undone, the whole contract should fail.

Among the rules to choose from, the Bill had followed that which was the most restrictive of the jurisdiction. It was expressed in section 14, which ran as follows :—

"Where a party to an agreement is unable to perform the whole of the agreement, but the part which must be left unperformed bears only a small proportion to the whole in value, and admits of compensation in money, the Court may, at the suit of either party, direct the specific performance of so much of the agreement as can be performed, and award compensation in money for the deficiency."

Then section 15 exhibited the different positions held by the party in default and his opponent, when the default is of greater magnitude. It ran as follows :—

"Where a party to an agreement is unable to perform the whole of the agreement and the part which must be left unperformed forms a considerable portion of the whole, or does not admit of compensation in money, the party in default is not entitled to obtain a decree for specific performance, but the Court may, at the suit of the other party, direct the party in default to perform specifically so much of the agreement as he can perform, provided that the party seeking specific performance relinquishes all claim to further performance, and all right to compensation, either for the deficiency, or for the loss or damage sustained by him through the default of the other party."

For both these sections the Bill gave some illustrations to show the more clearly what was meant. MR. HOBHOUSE believed that they were framed in accordance with the most careful decisions. At all events, there was no intention on his part to alter any recognized rule of law.

Another subject of difficulty was connected with the performance of agreements consisting of a number of minute acts, the doing of which the Court could not attend to, as it might attend to the doing of a single act, such as the execution of a lease, giving possession of a house, and so forth. He meant, for example, such a contract as one to repair a house or to cultivate land in a given way. The Bill dealt with such cases in section 20, which set forth certain agreements that could not be specifically enforced. Sub-section (*c*) included among these—

"an agreement which runs into such minute or numerous details, or which from its nature is such, that the Court cannot enforce specific performance of all its material terms."

Then there were some illustrations given of this class of contract. He believed that the sub-section (*c*) and the illustrations represented with fidelity the law administered in England and in India too. If it did not, it was from the difficulty of specifying in concise terms a rule drawn from many decisions.

Another point occurred in the same section, where sub-section (*g*) included among the agreements not capable of specific performance,

"an agreement the performance of which involves the performance of a continuous duty extending over a longer period than five years from its date."

There the Bill endeavoured to fix a term which by the present law was not fixed. The Courts now would not decree the performance of a contract involving

the performance of a continuous duty for a number of years; but the number was indefinite. Whether it was wise to define it, MR. HOBHOUSE had his doubts; and if it was, the length of the term might be a subject of doubt. It was a question which might well be settled in Select Committee. The proposal was put on the face of the Bill in order that it might receive comment, a course often pursued with advantage.

MR. HOBHOUSE was much obliged to the learned Secretary, Mr. Stokes, for reminding him of that which for the moment he had forgotten, namely, that this term of five years was inserted in the draft of the Civil Procedure Code which was settled and published in the year 1865. It was so settled by Sir Henry Maine and Sir Henry Harington, so that it had the authority of two eminent men, one a great jurist, the other the first authority of his day on the subject of Indian procedure.

The foregoing were the only points which occurred to MR. HOBHOUSE to mention on which the Bill attempted to ascertain doubtful or indefinite law. Distinct and conscious alterations of the law he had made none, except one that he would mention immediately.

In section 23, sub-section (*c*), it was provided that a contract for the sale of property should not be enforced by any one who had made a previous voluntary settlement of the same property. And in section 24, sub-section (*d*), a corresponding provision was made with respect to a purchaser who had notice of such a voluntary settlement. By a 'voluntary settlement' the Council must understand a settlement for which no money was paid, or for which no other valuable consideration, such as marriage, was given; as when a man from affection or prudence settled property on his wife or his children. Well, most people would ask what necessity there was of passing a law to this effect; for that, if a man had settled his property, he had parted with it, and how could he sell it? It resulted, however, from some very remarkable decisions on a Statute of Queen Elizabeth's reign passed for the prevention of frauds upon purchasers, that if a man made a voluntary settlement of his property, he might subsequently sell that very property for money, and the purchaser might take it away from the true owners, or, as they were called, the volunteers. He thought most people would say that a Statute of that kind, instead of being one for the prevention of fraud, was one for the commission of injustice; and so it frequently operated. Courts of Equity, however, would not allow the settlor himself to enforce specific performance of his contract in a case where his hands were so very far from clean. But inasmuch as his sale of the property vacated the prior settlement as against the purchaser, the purchaser was allowed to maintain a suit for enforcing the sale, even though he had notice of the settlement before paying his money. The Bill, however, proposed that in such a case the purchaser should not be entitled to specific performance. He might take whatever other remedy he could get on his contract, but he should not take away the property which he knew that the vendor had no moral right to sell to him. On that point the law was altered, and MR. HOBHOUSE thought that the alteration would commend itself to all unsophisticated minds.

There was another point on which the Bill adopted a provision taken from the New York Code which MR. HOBHOUSE did not remember to have observed in any judgment or text-book. Section 12, sub-section (*a*), provided that an agreement might be specifically enforced

"when it has been expressly agreed in writing between the parties to the agreement that specific performance thereof may be required by either party, or that compensation in money shall not be considered adequate relief for its non-performance."

MR. HOBHOUSE had never seen a contract of this kind, but was told that it was one not unlikely to be made in India. No doubt such a provision would have its effect on the discretion of the Court without any specific rule of law on the subject. He hardly knew whether it was an addition to the existing law, but he mentioned it as being something not yet expressed in English or Indian law.

He had now shown how far the Bill was intended to be a mere expression of existing rules, and how far he had consciously altered those rules, or ascer-

tained them when indefinite. As for codifying law without unconsciously producing some alterations, it was a matter of extreme difficulty, if not an impossibility. By codifying law, he meant the reduction to writing of that which was before unwritten. And partly because the lawmakers might err in their conception of what they ought to set down as law, partly because, having a right conception, they might use inappropriate language to express it, partly because their expressions were construed by other minds who might give to them quite a different turn from what they were intended to take, it would be a very wonderful thing if after codification the law remained precisely the same as before. That consideration, however, applied to all attempts at codification; all he could do now was to mention the variations of which he was conscious, and he had done his best to explain to the Council the relations which the Bill bore to existing laws.

Only one other point he had to mention in connection with the chapter on injunctions. The Council would see that the Bill did not meddle with interlocutory injunctions at all, by which term he meant those processes of the Court which were simply intended to preserve the *status quo* pending the decision of the dispute. They were treated as of the nature of procedure, and were dealt with by the Civil Procedure Code. In giving rules about perpetual injunctions it was laid down that the Court should be able to grant mandatory injunctions. The term "injunction" was rather deceptive, for it looked as if designed to enjoin the performance of something, whereas its technical meaning was the prevention of something, and the Courts used to hold that they could not by injunction command an act to be done. That, however, was found inconvenient, and indirectly they assumed the power of commanding a positive act under a negative form; for instance, a man might be restrained from keeping up a wall, thereby being in effect compelled to pull it down. All those circuitous modes of action had their points of weakness, and this Bill went more directly to the required object. In section 52 it was provided that by injunction the Court might not only prevent the breach of an obligation, but compel performance of the requisite acts.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill be published in English in the *Gazette of India*, and in the respective Gazettes of the Local Governments in English and such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

PRESIDENCY BANKS BILL.

The Hon'ble SIR W. MUIR moved for leave to introduce a Bill for constituting and regulating the Banks of Bengal, Madras and Bombay. Hon'ble members were doubtless aware that it had been resolved to alter the relations which existed between the Government and the Banks at the presidencies, and to sever the connection between them and the Government. It was accordingly necessary to introduce a new law for the purpose, and that was what SIR W. MUIR proposed to do if the Council gave him leave, and he would, on the Bill being introduced, explain the subject in detail.

The Motion was put and agreed to.

The following Select Committee was named :—

On the Bill to define and amend the law relating to certain kinds of Specific Relief.—The Hon'ble Messrs. Bullen Smith and Inglis, the Hon'ble Sir Douglas Forsyth, the Hon'ble Messrs. Eden and Hope, the Hon'ble Rájá Narendra Krishna and the mover.

The Council then adjourned to Tuesday, the 14th December 1875.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REMARKS OF THE ARMY SANITARY COMMISSION ON TENTH ANNUAL REPORT OF THE SANITARY COMMISSIONER WITH THE GOVERNMENT OF INDIA.

Dr. Cuningham's report for 1873 contains the usual statistical account of sickness and mortality among British and Native troops and in Jails, together with some details concerning the general population.

The report is followed by further instalments of the cholera inquiry by Drs. Lewis and D. Cunningham, together with an important paper by Dr. Lewis on nematode hæmatozoa, and an account by Dr. D. Cunningham on fungi present in opium blight, two subjects neither of which come within the scope of the Army Sanitary Commission. The volume is concluded by the valuable annual statistics of the Indian Army and Jail population prepared by Dr. Bryden.

1. Perhaps the most important practical fact in the present volume is that the death rate among Her Majesty's British troops in India was 15·30 per 1,000, the lowest rate by upwards of 2 per 1,000 ever recorded in India.

The average strength of British troops during the year 1873 was 58,769, and the deaths in India were 899. But in order to arrive at the true death-rate due to conditions of Indian service we must add the deaths among invalids, of whom 1,747 were received at Netley, where there were 30 deaths.

The total deaths therefore were 929, raising the death-rate to 15·8 per 1,000.

2. It is a striking testimony to the advantages of improved invaliding arrangements that about 600 men shipped in India as invalids were disembarked at Portsmouth in health, not having proceeded to Netley.

Of the 1,747 men who were received at Netley, 606 were finally discharged the service, so that the total permanent loss was as follows:—

Deaths	929
Discharged invalids	606
Total loss	1,535

or 26 per 1,000 from all causes.

3. These results for 1873, when contrasted with the old death-rate of British troops in India which ruled, before the date of the Royal Commission on the sanitary state of the Indian Army, at an average of 69 per 1,000 for many years, no doubt shows great progress; but it must be borne in mind that the old death-rates included losses from cholera often during great epidemics, while the total cholera deaths of 1873 amounted only to 47 for the whole of India, or ·8 per 1,000, so that, deducting cholera, the death-rate in India and at Netley was 15 per 1,000.

4. It is necessary to call attention to this fact, because the state of the British Army in India, so far as regards deaths, is apparently so satisfactory that there may be some danger of concluding that the work has been done.

Such a conclusion can, however, never be predicated of sanitary procedure. The constant tendency with local causes of disease and mortality is to intensify themselves. The battle is never gained unless the ground be kept. Until cholera and fever have ceased to appear as epidemics, it cannot be said that the death-rates of European troops in India have been permanently reduced.

5. Dr. Cuningham gives facts to show that, as regards health, "the favourable results of 1873 were general and not confined to any particular locality."

Thus, in the group of stations situated in Bengal proper, the death-rate in the decade 1860-69 was 25·57 per 1,000. In the three following years the rate was 16·54, 18·72, 18·23, while in 1873 the death-rate was 14·21. But then comes a caution—that during the years preceding 1873 the rate consisted of minima and maxima vibrating between 14·38 and 39·04 per 1,000.

In the Gangetic Provinces and Oude, the ten years' death-rate was 28·59 per 1,000; in 1873 it was 20·25. The lowest death-rate of 1873 was 6·84 at Hazareebaugh; the highest, 23·95, was at Lucknow, of which nearly a fourth was due to cholera.

The group of stations in Meerut and Rohilcund had a death-rate, during the same decennial period 1860-69, of 26·61 per 1,000. In 1873 the death-rate was 15·05 per 1,000. In this group the death-rate attained a maximum of 29·54 at Delhi, while at Bareilly it was only 8·91 per 1,000.

The Agra and Central India group exhibited the same irregularities in rates. During the ten-year periods, the death-rate was 38·48 per 1,000; in 1873 it had fallen to 12·16 per 1,000. The highest rate, 24·92, was in Gwalior citadel; the lowest was 5·08 at Saugor. At Jubbulpore, in this group, the death-rate was 12·66 per 1,000, to which cholera contributed 7·23 per 1,000.

The Punjab stations, with their occupation by above 12,000 men, afford satisfactory statistical evidence of improvement. During the ten-year period the death-rate was 25·24 per 1,000. During the first year of the period, 1860, the death-rate was 14·20 per 1,000, a shade lower than it was in 1873, namely, 14·29. The lowest rate, 7·66, was at Sealkote, the highest, 21·28, at Mecan Meer. The Punjab stations had very high admission rates from fever.

At the ten Himalaya Hill stations the death-rate in 1873 was 9·88 per 1,000, on a seven months' occupation by 4,903 individuals.

The six convalescent depôts had an average occupation of 2,052, and a death-rate of 11·21 per 1,000. The highest ratio, 25·16, was at Murree; the lowest, 2·33, was at Dalhousie. Nearly a third of the mortality was due to hepatitis.

In the Madras and Bombay groups of stations the death-rates lay between 24·08 per 1,000 in Burmah and 12·37 in the Deccan and Nagpore stations. In this group Bangalore and Madras had the very low death-rates of 8·30 and 7·49. Generally the Bombay stations showed large varieties in rates. Belgaum had a death-rate of only 2·82 per 1,000, while other stations gave unfavourable results as concerns general health.

6. The great lesson taught by these statistical data is that little dependence can be placed on one or two years' results, especially when epidemic diseases happen to be dormant. Hence they afford no reason for intermitting sanitary work, but rather the reverse, for they show that, after the great advances which have been made in dealing with general disease causes, the chief danger still lies in the ever possible outbreak of cholera or fever, and that future safety must be sought in searching out and removing every local condition likely to predispose to these epidemics.

The past experience of Fort William affords very valuable data on which to proceed, because its death-rate has not only been very greatly reduced, but the reduction has continued, while other stations were suffering.

Formerly it was about 12 per cent. During the ten years following 1860 it averaged 25·19 per 1,000, arriving in later years at what appears to be a permanent reduction of mortality. In 1873 the death-rate of Fort William was 9·31 per 1,000. Formerly it was the deadliest station in India, now it is perhaps the most healthy.

Of late years even cholera, although committing ravages all around it, has never been able to obtain a footing inside its walls.

It may safely be said that what has been accomplished in Fort William may be done anywhere.

7. Divided among the Presidencies, the death-rates among British troops were in the following ratios:—

	Deaths per 1,000.
Bengal	... 15·40
Madras	... 18·29
Bombay	... 11·72

The following abstract given by Dr. Cuningham shows the causes of death:—

Deaths per 1,000.

Bengal.		Madras.		Bombay.	
1. Hepatitis ...	1·80	Hepatitis ...	4·0	Hepatitis ...	2·35
2. Enteric fever ...	1·53	Dysentery ...	3·65	Apoplexy ...	1·41
3. Heart diseases ...	1·42	Heart diseases ...	2·18	Enteric fever ...	1·31
4. Malarial fevers ...	1·39	Injuries	1·92	Heart diseases ...	1·22
5. Apoplexy	1·37	Cholera	1·22	Phthisis pulmonalis ...	1·03
6. Phthisis pulmonalis ...	1·20	Phthisis pulmonalis ...	1·13	Injuries	·75
7. Respiratory ...	1·15	Apoplexy	·96	Dysentery	·56
8. Injuries	1·09	Enteric fever	·78	Malarial fevers	·56
9. Cholera	·90	Malarial fevers ...	·70	Respiratory	·38
10. Dysentery	·79	Suicidal deaths ...	·44	Suicidal deaths	·28

The next abstract shows the more frequent admission causes, and contrasts strikingly with the deaths:—

Admissions per 1,000.

Bengal.		Madras.		Bombay.	
Malarial fevers	516	Malarial fevers	236	Malarial fevers	486
Venereal diseases ...	167	Venereal diseases ...	152	Venereal diseases ...	181
Respiratory diseases ...	84	Dysentery	91	Respiratory diseases ...	70
Rheumatism	59	Hepatitis	81	Hepatitis	52
Hepatitis	50	Diarrhœa	76	Rheumatism	50
Diarrhœa	49	Respiratory diseases ...	59	Diarrhœa	43
Dysentery	29	Rheumatism	52	Dysentery	27

This abstract shows anew the great importance of malarial diseases to the health of troops.

In former years, admissions from venereal diseases approached closely in numbers to those from fevers. If the nomenclature of venereal diseases is exactly what it was, then this abstract shows considerable diminution in these affections as a whole.

8. The history of cholera in 1873 affords several points of interest. Its degree of prevalence among the civil population is shown in the following abstract:—

Provinces.	Population under registration.	Deaths from Cholera.
Bengal	63,498,831	64,366
North-West Provinces ...	30,769,056	15,268
Punjab	17,487,125	148
Oude	11,185,357	3,961
Central Provinces ...	7,230,700	344
Berar	2,184,945	None.
British Burmah	2,703,424	8,109
Madras	30,287,842	840
Bombay	16,235,611	283

It appears from these figures that epidemic intensity attained a maximum in Bengal, from whence the epidemic shaded off through the North-West Provinces and Oude into the Punjab. Another table showing the monthly attacks of cholera gives data which appear to prove that the epidemic existed in January and onwards in all these Provinces; that the law of progressive increase and maximum followed closely on the course taken by the disease in Bengal; and hence that any appearance of movement of the epidemic was due to increase of intensity, rather than to geographical change of place. This view, however, requires to be modified when the facts of distribution within each Province are examined in detail. It is then found that in Bengal proper there are districts in which the maximum mortality took place in January, during an outbreak which had probably passed over from December 1872, and that the maxima moved north-westwards from the districts in the delta of the Ganges.

The apparent movement was hence not a progression of the disease, but of the maximum. This point, to which attention has been previously called, may eventually furnish a clue to presumed cases of importation of the disease, by showing that apparent spread of cholera from intercourse is, in all probability, due to increase of intensity during which a greater number of persons are attacked in a given time.

The eastern districts of the North-West Provinces, 11 in number, afford further illustration of this point. In January, 4 districts only were attacked; in February, 8; in March, 9; and all were attacked in April. This was the maximum period round Calcutta. But in these North-West districts the maxima were between May and September, when cholera had declined in the delta, clearly showing that there was a movement of the maxima towards the North-West. This law of maximum held good in the North-West Provinces generally, except in Kumaon, where the maximum continued from February to June contemporaneously with the maxima, not in the North-West Provinces, but in the Ganges delta, between which and Kumaon all the other districts of the North-West Provinces and Oude are situated.

The maximum period in Oude districts was the same as in those of the North-West Provinces, in some of them passing on to December.

The Punjab epidemic consisted of scattered cases occurring from January onwards.

There are 21 districts in the Central Provinces, in 7 of which there were deaths from cholera.

The most important outbreak, giving rise to 309 deaths, took place in Sumbulpur district, chiefly in February, March, and April, but also in September and October. The earlier outbreak was supposed to be due to importation. On comparing the dates of this outbreak with the statistical facts in the three adjoining districts of Bengal, it is found that there were two epidemic outbreaks in these districts, Balasore, Cuttack, and Pooree, and that the first of these corresponded in time with the Sumbulpur epidemic, namely, February, March and April.

The outbreaks in Madras and Bombay were so scattered as scarcely to call for remark.

The epidemic in Burmah was a severe one. It corresponded in time and in intensity to the epidemic in Lower Bengal, but it was not continuous with it in space. The three districts of Burmah nearest Bengal escaped almost entirely, and cholera broke out in its epidemic form in January at Rangoon, and southwards in January, and further north not till February and March. Its first point of attack was about 350 miles from Bengal. Probably it was part of a more extensive epidemic affecting Burmah to the eastwards.

9. The following abstract shows the relation between cholera among British troops and among the civil population of districts within which the stations are situated:—

District.	Date of First Death.	Total Deaths.	Stations.	Date of First Death among Troops.	Total Deaths among Troops.
24-Pergunnahs ... Calcutta ... ... Howrah	January ...	4,830	Fort William ...	June ...	1
Patna	January ...	2,515	Dinapore ...	April ...	1
Benares	January ...	1,738	Benares ...	May ...	2
Fyzabad	March ...	106	Fyzabad ...	November (case) ...	None.
Lucknow	January ...	145	Lucknow ...	September ...	13
Seetapore	April ...	15	Seetapore ...	August (case) ...	None.
Cawnpore	February ...	149	Cawnpore ...	August ...	5
Allahabad	January ...	876	Allahabad ...	June ...	5
Meerut	January ...	53	Meerut ...	October ...	1
Jubbulpore ...	February ...	2	Jubbulpore ...	September ...	4
Umballa	April ...	6	Umballa ...	September (case) ...	None.
Tonghoo	March ...	325	Tonghoo ...	April (case) ...	None.
Thyetmyo	March ...	920	Thyetmyo ...	April ...	12

There were cholera cases at 13 stations of British troops. In every case the disease existed among the surrounding Native population. In two instances (in Burmah), the troops were attacked within a month after the civil population. In one instance, the interval was three months; in three instances, 5 months; in two instances, 4 months; in one, 6 months; in another case, 7 months; in two, 8; and in one the interval was 9 months.

These data show anew that before cholera attacks British troops in any district, it may have existed for months among the surrounding population, and that, as intercourse throughout the districts and stations remained the same as usual, it can scarcely be affirmed that the facts prove importation of cholera into the stations.

Thus far the statistical evidence appears to lead, but it would be very important to inquire more closely into the history of cases at the stations, to show distinctly that there either was or was not a transfer of the disease from people outside to troops affected in barracks.

10. There were 44 deaths from cholera among Native troops serving in Bengal Presidency.

The death-rate was considerably in excess of the death-rate among British troops. Most of the deaths took place at stations in Lower and Eastern Bengal, and the times of attack corresponded closely with the periods of greatest intensity in the districts.

11. Among the jail population cholera attacks exhibited a similar relation in time to attacks among the Native population; but a far larger proportion of jails were attacked than of stations, and the death-rates were very much higher.

Dr. Bryden's tables are confined to the jail population of Bengal Presidency, and the outbreak was confined almost entirely to jails to the eastward and south-eastward of Allahabad.

There are 40 jails in the upper portion of the attacked region, having a population of 23,667. Twenty jails were invaded by cholera, and 95 prisoners died, equal to a death-rate of 4·02 per 1,000.

In Lower and Eastern Bengal 28 jails out of 48 were invaded. The jail population amounted to 16,174, of whom 104 died, equal to a death-rate of 6·44 per 1,000. In this instance also the disease was most severe in those parts where the general cholera death-rate was highest among the civil population.

Of the three groups, *viz.*, British troops, Native troops, and jails, the disease existed in force among the civil population before any of them furnished cases of cholera. It is to be hoped that the jail reports may give detailed accounts of each outbreak, and of the causes to which it ought to be attributed.

Some explanation is wanted of the fact that prisoners in parts of the country where cholera pevailed have suffered so much more than either British or Native troops.

12. Orders were issued for tracing the history of attacks among the troops, but the results as a whole were not deduced at the date of Dr. Cuningham's report. Dr. Cuningham says that, so far as he had had opportunity of studying the history of these attacks, there was an absence of evidence to prove that the disease was due to importation, "nor has a single fact been adduced to support the idea that the disease once introduced spread by contagion."

13. The facts and deductions in Dr. Cuningham's report for 1872 having been called in question by those who have adopted the theory of contagion as affording an adequate explanation of the spread of an epidemic, and to enable any corrections in fact to be made, copies of the report of 1872 were widely circulated, and specially sent to Medical Officers of both British and Indian regiments, "so that errors might be pointed out and rectified." The result, Dr. Cuningham says, "has been very satisfactory; no mistake on any important matter of fact has been brought to notice, nor has any additional information of value been furnished. There is no reason, therefore, to alter the account then given of the epidemic of that year, or to modify the general conclusions which were expressed regarding it."

These conclusions may be briefly summarized as follows:—

(1.) If human intercourse plays any part in disseminating cholera, "it must be a very secondary part."

(2.) That the immunity of attendants on cholera cases and the facts of outbreaks are opposed to the view that this disease is spread from the sick to the healthy.

(3.) That facts cannot be explained on the theory that cholera is due to water tainted by cholera discharges.

(4.) That there is no evidence to support the theory of multiplication of poison in persons attacked with cholera, or that the disease is spread by choleraic excreta.

(5.) That cholera in India appears to be due to certain conditions of air and soil, or both, apparently of local character, "and that the great danger arises from exposure to these conditions, and not to exposure to any emanations from the sick."

(6.) That, even on the assumption that cholera is contagious, the application of quarantine would be impracticable and injurious.

(7.) That the great safeguards against cholera are sanitary improvements, directed not against any one assumed danger (such for instance as keeping choleraic fluids out of water, to the neglect of ensuring that water is kept pure from other putrescing matters), but directed to the removal of all local disease causes.

14. It would have been more satisfactory if the results of the Indian cholera investigation had, at the same time, placed the doctrine in regard to cholera and measures required to cope with the disease on an absolutely scientific basis. This position has not yet been gained, and until it has been gained, and seeing that active measures must be taken to deal with cholera wherever it threatens to come, there is no other safe course to follow than to rely on the results of observation and experience.

These are unquestionably unfavourable to any dependence being placed on internal quarantine. Whatever truth there may be in the theory of cholera communicability, it cannot, from experience gained up to the present time, be made the basis of measures for protecting Indian stations, still less native communities.

The only alternative is to improve the sanitary condition of both troops and people. Every fresh experience tends to show that sanitary measures are the only safe-guards in which any trust can be placed, and that to transfer that trust to cordons would simply be to surrender to the enemy. Further investigations may possibly lead to better knowledge of the development and extension of cholera, but until this result is attained no practical account can be taken of it.

15. During 1873 there were registered 237,835 deaths from small-pox, a number considerably below the truth, as the registration of deaths in Bengal "is still most defective." The mortality to population varied between ·52 and 3·81 per 1,000.

The lowest of these rates was in Burmah, where the registration is allowed to be most defective, but the lowest death-rate in India, namely, ·61 per 1,000, was in Bombay Presidency, where the most complete system of vaccination is in force.

There were 11 small-pox deaths among British troops in India, a mortality of ·19 per 1,000, which may be taken as collateral evidence of the efficiency of vaccination as a preventive measure. The great mortality among the civil population points not only to the necessity for extending vaccination, but for pressing forward sanitary improvements.

16. Deaths from fevers registered among the civil population were 1,647,411; an enormous mortality were it all due to the registered cause. Facts lately brought to light show that many other diseases are classed as fevers in the death returns; but making any reasonable deduction on this account, there can be no doubt of the great loss of life due to malarial causes. What has been often said with reference to these fevers may be here repeated, *viz.*, that they prove the existence of bad land drainage for agriculture, bad culinary water, and general sanitary defects in villages and houses.

There is no remedy for fevers, the scourges of India, except by remedying these evils. As already shown, these malarial fevers are a serious cause of inefficiency in the British Army serving in India.

The admissions from them in 1873 were as follow:—

Bengal Army	...	516 per 1,000.
Madras „	...	236 „
Bombay „	...	486 „
All India	...	456 „

Forty-five and a half per cent. of the British force passed through hospital for malarial fevers in 1873.

17. Enteric fever cases occurred in 44 out of 93 stations of British troops scattered all over India. In 1873 there were among British troops in—

	Cases.	Deaths.
Bengal Presidency	144	56
Madras „	49	9
Bombay „	17	14
All India ...	210	79

Calculated on the strength, the ratios of attacks and deaths were as follow:—

	Per 1,000 Strength. Cases.	Deaths.
Bengal	3·9	1·53
Madras	4·2	·78
Bombay	1·6	1·31
All India	3·6	1·34

Enteric fever as a death cause attains a new importance when the losses from it are compared with the losses from cholera in 1873, thus:—

Deaths, 1873.

	Enteric Fever.	Cholera.
Bengal	56	33
Madras	9	14
Bombay	14	None.
India	79	47

Until lately, enteric fever was considered to be a new disease imported into India, but there is every reason to believe that this disease has existed in India in past time, although not separated from other fevers of severe type.

Dr. Cuningham has given a table showing the deaths per 1,000 from fevers for a period of 14 years; but enteric fever does not occur in it as a death cause until the last three years of the series. During the first 11 years the deaths are classified as from intermittent, remittent and continued. Now the average death-rate from these three fevers during these 11 years was 3·59 per 1,000.

The last three years in the returns give the death-rates of four fevers, intermittent, remittent and continued, and enteric, the average for which is 3·42 per 1,000. On comparing this ratio with the ratio 3·59 for the three older fevers, it appears in the highest degree probable that among them there were cases now separated as "enteric."

A similar change has passed over the nomenclature of fevers among Native troops. Formerly natives of India were supposed to enjoy immunity from "typhoid," but since attention has been more closely directed to the subject, this is not found to be the case. In the statistics of 1872 enteric fever first makes its appearance as a death cause in the Native Army, in which year there were seven cases and four deaths. In 1873 the number had risen to 18, and the deaths to 10. Enteric fever has also been detected among the civil population.

There have been difficulties in diagnosis, partly arising from the darkness of the skin among natives. But the fact must henceforth be admitted, and the apparently anomalous circumstance of the existence of causes of enteric fever in great intensity without producing their characteristic effects on local fevers will cease to exist.

The practical result of this discovery is that increased vigilance is required in dealing with all local sanitary defects connected in any way with the presence of putrescing matters in air, earth, or water, and it points also to the absolute necessity of cleansing and improving all bazars and native towns to which British troops have access.

18. There was a lower death-rate in 1873 from sun-stroke and apoplexy, dysentery, and diarrhœa than there was in 1872 among British troops. At the same time, in 1873 no fewer than 217,448 deaths from bowel complaints were registered among the civil population.

The highest ratio, 2·58 per 1,000, was attained in the Central Provinces, the lowest, ·31, in Oude.

One satisfactory circumstance connected with the personal hygiene of British troops serving in India was the reduction of deaths from delirium tremens. There were five deaths from this cause in the whole Indian Army, equal to a death-rate of ·09 per 1,000, but unfortunately the statistics show that eight men died while drunk, and that five were suffocated while drunk. The deaths from drink directly were thus 18, which may be compared with the 47 deaths from cholera during the same year.

If it were possible to separate in the returns deaths indirectly caused or hastened by intemperate habits,—diseases of the heart and blood vessels, hepatic and cephalic diseases,—it would be found that the alcoholic mortality is becoming a more predominant cause of loss than it has been comparatively in past times.

19. Dr. Cuningham gives data to prove that the amount of venereal disease among the British troops in Bengal Presidency had undergone a considerable reduction in 1873.

The admissions per 1,000 for the last five years have been:—

1869 ...	... 200	1872 ...	... 190
1870 ...	... 202	1873 ...	... 167
1871 ...	... 208		

But comparative statistics of lock-hospital stations render it difficult to assign this reduction purely to the influence of these hospitals.

Thus Dr. Cuningham gives the statistics for three groups of stations for 1872 and 1873, distinguishing those stations at which there are no lock-hospitals from those where such hospitals have been in operation, and dividing the stations at which there has been an increase of admissions from those where there has been a reduction.

There are ten stations without lock-hospitals, and, by dividing the sum of admissions per 1,000 by the number of stations, it appears that the average admissions at these ten stations amounted to 148 per 1,000 in 1873, as against 119 per 1,000 in 1872.

There are 45 stations protected by lock-hospitals, at 17 of which there was increase of admissions in 1873 over 1872, while at 28 stations there was a reduction. By applying the same method with these stations, it is found that at the stations showing increase the admissions in 1873 were 198 per 1,000, as against 127 per 1,000 in 1872. At 28 stations showing a decrease, the admissions per 1,000 were 141 in 1873, as against 201 in the preceding year.

On comparing the results for two years at 45 protected stations and 10 unprotected stations, the figures per 1,000 stand as follow:—

	1872.	1873.
45 protected stations	178	163
10 unprotected stations	119	148

The ratios of admissions per 1,000 for the two years would thus be represented by the figures:—

336 for protected stations and
267 for unprotected stations.

The data, although only approximate, appear to show that there is some law of increase and diminution of venereal cases apart from the action of lock-hospitals.

Attention has been called to this point in previous papers as one requiring investigation, but there can be no doubt of the decreased admission rate generally, from whatever causes it may have arisen. The result is, at least, not opposed to the influence of lock-hospitals.

Referring to these reductions, Dr. Cuningham says that, "while the results of 1873 are certainly encouraging, especially in the decided diminution of the graver forms of venereal disease, it must be admitted that much remains to be done in order to render the rules really effective. On this point I have considered the various statements and suggestions which have been made either by medical officers or by the authorities, both civil and military, through whose hands their reports have passed. The great evil to be dealt with is unlicensed prostitution. . . . Detective police have been found useful in one place, while in another they have been discharged as useless. The same may be said of detective dhaies."

But he adds that, on the whole, the authorities have endeavoured to diminish the evil with a considerable measure of success.

20. Experience with new regiments in 1873 suggests a few important practical considerations. Out of an average strength of 4,608 men newly arrived, there were 102 deaths = 22·14 per 1,000. Of these deaths, 38 were due to enteric fever, and probably one or two more;

18 men died of hepatitis, and 10 of apoplexy. The following table, extracted from the report, shows the effect of new arrivals:—

	Deaths per 1,000.	
	Army of India.	New Regiments, 1873.
Enteric fever ...	1·34	8·25
Hepatitis	2·33	3·91
Apoplexy	1·29	2·17

Facts of this class show very clearly the necessity, long understood, of making some provision for acclimatising new arrivals in India, before exposing them to the usual risks of service on the plains.

21. The following abstract shows the invaliding for 1873:—

	Number sent home.		
	For Change.	For Discharge.	Total.
Bengal	976	416	1,392
Madras	498	103	601
Bombay ...	365	76	441
India ...	1,839	595	2,434

As already stated, there were 606 invalids finally discharged at Netley, and a large number of the men sent home had recovered health before arriving in England.

The total loss, permanent and temporary, to the Indian Army is stated by Dr. Cuningham as follows:—

Presidency.	Per 1,000 Average Strength.		
	Died.	Invalided.	Total Loss.
Bengal	15·40	42·16	57·56
Madras	18·29	52·32	70·61
Bombay	11·72	43·67	55·39
India	15·30	44·58	59·88

22. It is very satisfactory to see from the present report that the health of soldiers' families is undergoing improvement, together with the health of troops.

The death-rate among soldiers' wives in 1873 was, for Bengal 22·81, for Madras 14·92, for Bombay 17·11, per 1,000, and for the whole of India 19·92 per 1,000.

The children's death-rate, though still very high, has also undergone marked reduction.

In the whole of India the children's death-rate was, in—

1871	74·21 per 1,000
1872	99·08 „ „
1873	60·29 „ „

The death-rates in the Presidencies during 1873 were, for Bengal 67·97 per 1,000, Madras 51·39, and Bombay 48·50 per 1,000. It appears that of recent years the death-rate of British population in India has been improving generally. Above one-fourth of all the children's deaths in 1873 took place under six months after birth, and before the expiry of 18 months from birth the death-rate was no less than 69 per cent. of the total deaths. Out of the total of 714 deaths among children, 660 took place under five years of age, proving anew the necessity of better management of children in India.

Bad as is the present state of matters, it is better than it used to be; proving that more care had been taken of the children. The simple fact given in the statistics that out of 714 deaths, 35 only were due to children's epidemics, and 433 to dentition convulsions, tabes, mesenterica, diarrhœa, and anæmia, is enough to show how much must yet be done, by careful nursing, feeding, and domestic management, to reduce the present excessive death rate.

23. The death-rates among British Officers in and out of India in 1873 were—

Officers of British Army	10·23
„ Indian „	21·59

The most predominant death causes appear to have been of inflammatory character.

24. There is no reliable statistical record of the health of cantonment population in Bengal Presidency, a deficiency which, it is hoped, will be supplied by more accurate registration.

25. The following account of sanitary progress is given by Dr. Cuningham for the year ending March 31st, 1873 :—

> "At almost every station, works were either in progress or had recently been completed, the object of which was the better health and greater comfort of the European soldier, or the general sanitary improvement of the cantonment. These works were more or less extensive in their character, but chiefly include the completion of barracks and hospitals, the provision of subsidiary buildings, and minor details. In the important matter of water supply progress has not been so rapid as could be desired. In this Presidency, the larger works of Peshawur, Dalhousie, Kohat, and Meean Meer are proceeding, and projects are in hand for Umballa and Delhi."

He states that since 1862-63 the sum of 200,000*l.* has been spent in water supply improvements; not a large amount, considering what has been proved to be the condition of existing water sources at stations of British troops.

The most extensively introduced improvement has been apparently the dry-earth conservancy which has been sanctioned in British regiments as its "superiority has now been established beyond question." In all damp climates, however, the earth has to be dried before use.

26. In Section 2 of Dr. Cuningham's report are discussed the statistics of the Native Army in Bengal Presidency. Dr. Bryden's statement gives the regimental strength of this Army as 44,332; the total deaths, absent and present, as 754, showing a death-rate of 17·01 per 1,000, higher by above 1½ per 1,000 than the death-rate of British troops in Bengal Presidency.

The chief admission causes in all the branches of the Native Army were fevers. These were, for the Regular Army, 676 per 1,000; Central Indian regiments, 306; Punjab Field Force, 875 per 1,000, probably due to the specialities of frontier service; Madras regiments, 384 per 1,000.

In all the branches there was a considerable reduction of admissions from all causes, except in the Madras force.

The highest death-rates were due to respiratory diseases, and to these fever deaths followed next in order.

The following abstract gives the death-rates for the chief diseases in the different branches of the Native Army :—

Diseases.	Deaths per 1,000.			
	Regular Native Army.	Central Indian Regiments.	Punjab Frontier Field Force.	Madras Regiments.
Respiratory diseases ...	3·15	4·50	4·42	1·67
Fevers	2·92	1·80	4·22	1·38
Cholera	1·12	·23	None.	·56
Diarrhœa	1·02	None.	·10	None.
Dysentery	·89	·23	·41	·56
Phthisis	·79	·44	·50	·84
All causes, 1873 ...	**13·92**	**11·26**	**13·87**	**7·53**

On a former occasion attention was called to the apparent relation between deficient clothing, bad and over-crowded huts, and damp subsoil, and the prevalence of respiratory diseases in the Native Army.

These statistics seem to justify further inquiry into the subject. Fevers, the most prevalent of all diseases, may be connected with similar local causes. What is wanted is some account of native stations, and the relation of these to prevalent diseases.

27. The third section of the report, devoted to the sanitary condition of jails, gives a very unfavourable account of this important branch of the public service.

The average strength of prisoners during 1873 was 67,037; the deaths were 2,888=43·08 per 1,000. Out of the 2,888 deaths, 199 were due to cholera, 12 to small-pox, 4 to enteric fever, 42 to typhus, 66 to intermittent fever, 255 to remittent and continued fevers, partly caused by "contagious fever," the existence of which in jails ought to be a matter of urgent inquiry with the view of preventing such a state of things. There were 824 deaths from dysentery, and 291 from diarrhœa. If to these be added 22 deaths from spleen disease, we shall find 1,722 out of 2,888 deaths, or nearly 60 per cent., due to zymotic diseases. Respiratory diseases occasioned 469 deaths, and phthisis 156.

It follows that eight-tenths of the mortality in the jails of Bengal Presidency were due to zymotic and chest diseases.

Dr. Bryden has given an instructive table, showing the ratios of mortality in 161 jails, which reveals facts of very considerable importance, inasmuch as they show that the death-rates varied in an extraordinary degree.

For instance, Ajmere Jail, with an average strength for the year of 339, had only 1 death=2·95 per 1,800. The solitary death was due to some respiratory disease. Etah Jail, with an average population of 252, had 1 death, cause not stated—not zymotic nor respiratory=a rate of 3·97 per 1,000. Furreedpore Jail, 412 prisoners, had 3 deaths=7·8 per 1,000; of these, 1 death was from fever, and 1 from respiratory disease. Etawah Jail, with 291 prisoners, had 1 death from bowel disease, and 1 from spleen disease—2 deaths in all=a rate of 6·87 per 1,000.

A few other jails scattered over Northern and Central India afford death-rates not much above these, but unfortunately they are the exception. In a great number the deaths exceed 25 per 1,000. In many they exceed 50 per 1,000, and in a number of jails the mortality was above 7 per cent.

The following examples will show the rates and their causes in the worst class, beginning with those in which there were no deaths from cholera, and in which the jail population was sufficiently large to enable an approximate death-rate to be deduced.

Delhi Jail, with 316 inmates, shows a death-rate of 56·96 per 1,000, two-thirds of which were due to zymotic and chest diseases.

Umritsur, 701 prisoners, yielded a death-rate of 55·63 per 1,000. Of the 39 deaths, 21 were due to fevers and 10 to chest diseases.

Lahore Central Jail, with 2,224 prisoners, yielded a death-rate of 75·09 per 1,000. There were 167 deaths in all, of which 38 were from fevers, 1 from small-pox, 36 from bowel diseases, 6 from diphtheria, and 79 from respiratory diseases and phthisis, so that, out of 167 deaths, 71 were due to zymotic diseases, and 150 died from these and respiratory diseases conjoined.

Rawulpindee Jail had 963 prisoners of whom 134 died = a death-rate of 13·91 per cent. Fevers occasioned 91 deaths, of which 27 were from "typhus"; nearly 9½ per cent. of the inmates died of fever.

Peshawur Jail, with an average of 533 prisoners, yielded a death-rate of 13½ per cent. Of 72 deaths no fewer than 40 were due to fever, and 6 to bowel diseases.

In none of the jails affected with cholera could it be said that this disease did more than add to an already high death-rate, at least with one or two exceptions, such, for instance, as Rai Bareilly Jail, with 807 inmates, where the death-rate was 37·17 per 1,000, of which cholera supplied 16·11 per 1,000.

Champarun Jail had a death-rate, without cholera, of 110·59; cholera added 36·87 to this raising the mortality to about 14½ per cent.

Gyah Jail had a death-rate of above 13½ per cent. without cholera, to which this disease added about 2 per 1,000. In this case, fevers (3 deaths) and bowel diseases (61 deaths) supplied 64 out of 68 deaths.

Other illustrations of these enormous death-rates could be given, but it may be sufficient to show the great importance of this question to cite the highest death-rate in the returns (except in a very small jail), *viz.*, Bustee, with 444 prisoners, where the death-rate, without cholera, of which there was none, nearly equalled 15 per cent. In this case, out of 66 deaths 46 were due to bowel diseases, and 14 to respiratory diseases.

Dr. Cuningham quotes the opinions of several medical officers on the presumed causes of these death-rates. They resolve themselves mainly into averments that prisoners were unhealthy at the time of admission; "fever-stricken subjects from unhealthy localities"; weeding out young healthy prisoners for transfer, leaving the older and sickly behind; over-crowding of jails; bad site and defective construction of jails.

On reviewing the reports, Dr. Cuningham very properly remarks that "it is not satisfactory to find that, in a year of more than average health throughout the Bengal Presidency, the sickness and mortality among the prisoners have both been higher than in 1869, a year of widespread and severe epidemics. In many jails, they have suffered in common with the general population of the surrounding districts" (which, it may be remarked in passing, ought scarcely to be expected in a properly-constructed jail), "but there is good reason to believe that in others diseases were connected with, or aggravated by, overcrowding and other insanitary conditions. So far as the sanitary administration of jails is concerned, the discovery and removal of these defects—the local disease causes—must be the great object in view."

All this is fully justified by Dr. Bryden's statistics, and it may be added that, after the results obtained from jail improvements in Madras Presidency, mentioned by the Commission on a former memorandum, it would scarcely be fulfilling their duty if the Commissioners did not urge the consideration of the whole subject on the attention of the proper authorities.

27. The concluding section of Dr. Cuningham's report for 1873 is devoted chiefly to the discussion of registration of deaths, which is shewn to be in an unsatisfactory condition. As the Commission has already included this matter in previous papers, it is not necessary to refer to it further than to commend Dr. Cuningham's views to the authorities.

There is, however, one statistical fact to which attention may be directed, namely, that in 1873 no fewer than 21,461 persons died in consequence of snake-bite and the attacks of wild beasts.

The first of these death causes is not given separately, but it may be again suggested whether the proposals of Dr. Fayrer for dealing with this death cause mentioned in other papers might not be tried. Destruction of venomous snakes, and giving the people a pecuniary interest in destroying them, is apparently the only remedy for this scourge.

28. There is only one paragraph in the report, No. 115, devoted to the question of "sanitary progress." It refers to the progress made by municipal bodies, which has been dealt with on other papers; also to the very important works in hand for the more perfect drainage

of canal-irrigated land in the Meerut, Mozuffernugger, and Boolundshuhr districts, for which 45,000*l.* had been allotted.

As a whole, the report shows anew the necessity for sanitary work of a practical character, and it appears at the same time to show that past efforts in this direction have been distinctly followed by improved health.

29. Dr. Cuningham's own report is followed by an Appendix by Drs. Lewis and D. Cunningham, containing further contributions to the cholera inquiry. It consists mainly of an extension and rectification of previous investigations, and the portion of the work to which the present Appendix refers may be said to be tolerably complete.

Sections A and B give the results of a comparative microscopic examination of healthy blood and of blood in cholera. In the latter, the white corpuscles are enormously increased. This will be best seen by placing side by side the columns in two tables describing the amount of white corpuscles :—

Specimen.	Healthy blood.	Blood in cholera.
1	Few	Very abundant.
2	"	" "
3	"	Few.
4	"	Very abundant.
5	"	" "
6	"	" "
7	"	" "
8	"	" "
9	"	" "
10	"	" "
11	"	" "
12	"	Abundant.
13	"	Normal.
14	"	"
15	"	Abundant.
16	"	"
17	"	"
18	"	"

This appears to be the chief element admitting of tabulation. The table from which the third column above is quoted gives the results in 41 specimens of cholera blood taken from 22 cases of cholera, and the second column shows the results in 18 examinations of healthy blood from 10 cases. In two cholera cases only out of 22 did the white corpuscles exist as in normal healthy blood.

In all other instances, they exceeded considerably or greatly the healthy standard. A comparison is given by the reporter between the blood in cholera and in vaccinated persons, which shows that in one case out of five only did the amount of white corpuscles exceed that of healthy blood.

30. The most important modification undergone by the red corpuscles in cholera is a tendency to aggregate in irregular masses, instead of into the normal *rouleaux*, and the ease with which the corpuscles altered their forms on pressure or movement of the fluid. The former of these conditions has been observed in the blood in septicæmia, typhoid, variola, measles, and charbon. The facts appear to point to profound changes in the constitution of the blood in cholera.

31. During these lengthened examinations, lasting over several years, no trace whatever has been found of any organisms in the blood of cholera patients.

The reporters say, in concluding the present inquiry :—"As in all our previous examinations, not the faintest trace of evidence presented itself in favor of the presence of bacteria, or other foreign organisms or germs, in the blood of cholera; all the phenomena observed were ascribable to alterations, relative or absolute, in the normal elements of the blood, not to the presence of any new or extraneous bodies of such a nature as to be detected by microscopical research. We have now examined numerous specimens of blood derived from cases of every degree of severity, and at every stage of the disease, during life and shortly after death, and had the presence of foreign organisms in the blood been essentially related to the disease in one way or other, whether as causes of the diseased condition, or as indications of its existence, it is scarcely conceivable that they should have consistently failed to afford the slightest evidence of their presence. We are well aware that these statements are likely to be received with some incredulity by a very large number of the members of the medical profession, made as they are at a time when views regarding the important, and almost necessary, influence of 'germs,' 'bacteria,' 'microzymes,' &c., in the development of epidemic disease are so widely diffused and so much quoted; but in bringing our examinations of the blood from this point of view to a close we feel bound to state our results and conclusions distinctly."

32. This, then, is the final result of a long and laborious examination of the blood in cholera, extending over a number of years, conducted with great skill, perseverance, and fairness. It disposes once for all of Hallier's and all other cognate theories about the origin of

cholera. Whatever cholera poison may be, it is not an entity which can be brought to light by the most practised observers, armed with the most refined appliances. And this being the case, these theories must henceforth cease to be taken into account as affording any ground for practical action. The hypothetical rice-cholera fungus, which bade so fair to give a clue to preventive measures as to induce the India Office to send the observers to India, is now proved to have been based on no sufficient warrant.

It may be here stated that reports from various regions of India contain detailed observations on Pettenkoffer's theory, which connected cholera with certain conditions of subsoil water. The examination of this theory was also placed in the hands of Drs. Lewis and D. Cunningham by the India Office, but up to the present time the theory has obtained no support from observation. The question, however, is not yet finally disposed of.

33. Besides these two inquiries on account of which Drs. Lewis and Cunningham were specially trained and detailed in India, these gentlemen have continued their investigations on the effects produced on healthy animals by choleraic matters, in order to determine a very important practical point, *viz.*, whether these substances exerted any specific poisonous effect on animals.

In previous reports, a considerable number of observations were recorded which appeared to show that no results were produced by injections of cholera material into the blood and cavities of dogs differing from those caused by similar treatment with healthy excreta.

In one point, however, the experiments were not sufficiently numerous to show the results of injecting perfectly fresh cholera excreta, so as to eliminate from the phenomena everything due to putrescence.

The present report, Part II., supplies the desired information, on the understanding that the question at issue in the experiments is simply whether fresh cholera excreta injected into the blood of animals is capable of producing any appearances which may be fairly classed as choleraic.

Reference must be made to the report for details, and it will be sufficient to give the comparative results of all the experiments hitherto made by the observers, and recorded in the present and preceding reports.

They are all placed together in the following summary table (Table XIX. of the report) :—

Total Experiments on the effect of the introduction of solution of organic substances from various sources into the circulation of Dogs.

Number of Experiments conducted.	Infecting material selected.	Where introduced.	Number affected.	Percentage of affected.
76	Solutions of choleraic evacuations ...	Vein ...	34	44·7
26	Solutions of normal evacuations ...	Vein ...	7	26·9
26	Solutions of various excrementitious matters.	Peritoneum ...	20	76·9
42	Peritonitic exudation	Peritoneum ...	10	18·4

The comparison of most importance to the present object in this table is that showing the proportion of attacks in dogs in which normal and choleraic material were employed. The experiments appear to be sufficiently numerous to show that choleraic material is more potent in its effects than solutions of normal evacuations.

The conclusions drawn from this table by the reporters are as follow :—

"It appears from these results that the dejections of persons suffering from cholera, and also those of persons in good health, when injected into the veins, act in some cases as a poison—have the power of producing a definite effect on the intestinal mucous membrane resulting in a disorganization of its substance.

"The symptoms and pathological changes induced by both varieties of material, the choleraic and non-choleraic, present no differences; but, so far as our experience goes, the proportion of cases in which this result is attained when choleraic fluids are employed is considerably larger than when non-choleraic material is used."

34. An important fact bearing on disinfection by heat is mentioned, *viz.*, that boiling solutions before use did not diminish, if indeed it did not augment, their toxic effect, showat least that heat is no safeguard. The reporters themselves say :—

"Therefore, until it be proved that living substances can withstand immersion in a fluid at a temperature of 212°F. of some minutes' duration, we have no hesitation in stating that the morbid phenomena which we have observed to follow the introduction into the animal economy of strained solutions of choleraic and normal alvine discharges, and of other decomposing animal substances, are not the result of injection with a material the poisonous properties of which are dependent on its possessing vitality."

35. Up to the present stage of the inquiry the toxic effects of these matters have not been connected with the visible presence of any organization.

Search for bacteria in the fluid of mesenteric glands had the following results: 40 specimens were examined, and in 17 bacteria were present, but 10 of these 17 instances were in healthy dogs. Where organisms were present, "a certain interval of shorter or longer duration had elapsed between death and the examination of the glands."

This time relation existed also in the appearance of bacteria on the mucous membranes and in other tissues, but "this condition, as in the previous cases, occurred without reference to the cause of death, no matter whether the animal had died owing to the introduction of organic fluids into the system, or had been killed whilst in perfect health."

36. The reporters have given in Part III. of their report the results of 21 cases of section of the mesenteric nerves on the escape of fluid into the intestines, in continuation of previous experiments, as follows:—

> "It will be seen that a copious secretion of fluid was the almost invariable result of section of the nerves, entirely independent of the detachment of the epithelial covering of the mucous membrane, but sometimes associated with the occurrence of an exudation of bioplasts upon its surface, and that the secretion occurred as well in cases in which the division of the nerves was complete as when it was only partial."

No similar result was found to follow the section of the sphlanchnic nerves.

37. On reviewing the progress made in this important inquiry at the present date, although much has been added to our knowledge of the microscopic pathology of cholera, the efficient cause has hitherto eluded observation. Profound changes in the vital constitution of the blood have been discovered, mainly, as it appears, in the nature of marked departures *in degree* from conditions in themselves normal.

Important pathological changes have been produced in the intestine canal by injecting solutions of healthy and choleraic excreta into the veins of dogs, but these changes partook little of the phenomena of cholera.

The most marked of these phenomena has apparently been imitated or produced by lesions of the mesenteric nerves. The presence of bacteria and other organisms in the cases experimented on appear to have been due mainly to secondary *post mortem* influences.

38. In former memoranda the Commission, in communication with the Director General and the Professors at Netley Medical School, suggested certain directions in which the inquiry might be extended. After following the same course in the present case, we have agreed on the following points:—

(1.) That the relation of ground water to cholera be finally decided.

(2.) That as the microscopic examination of air and water of localities, and of the blood and other fluids and organs of animals submitted to experiment, have led to certain definite results in a particular direction, which, if pursued, might throw light on the nature of the cause of cholera, we recommend that the observers should pursue their inquiries until they have satisfactorily made out the meaning of the peculiar phenomena of the blood, and of the poisonous effects of the dejections on animals, as recorded in their reports.

(3.) But, in addition, we would suggest whether the time has not now come for extending the sphere of their observations, by attempting to track outbreaks of cholera in special localities, and to determine the reasons of its peculiar occasional localization and rapid spread in some cases.

Up to the present time, no report has been made showing that a strictly scientific investigation had been carried out into the history of cholera such as was contemplated in the instructions drawn up by the Army Sanitary Commission, and this being the case, we are desirous of again calling attention to the points raised in these instructions, leaving the method of inquiry to Drs. Lewis and D. Cunningham themselves.

In conclusion, the Commission beg to express their approval of this report, and its tables and appendices, as affording a large amount of useful and suggestive information.

ARMY SANITARY COMMISSION,
War Office, 26th June 1875.

J. J. FREDERICK,
Secretary.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS IN THE PUNJAB OF FASL KHARIF, 1874-75.

No. 4839 I, dated 5th November 1875.

From—Captain W. Broadfoot, R. E., Asst. Secy. to the Govt. of Punjab, P. W. Dept., Irrigation Branch,
To—Secretary to the Government of India, P. W. Dept.

I am desired to forward, for the information of the Government of India, the accompanying Comparative Statements I, II and III of Irrigation Operations in this Province of fasl kharif, 1873-74 and 1874-75. The season of 1874-75 was more favorable, inasmuch as the total result of irrigation, in comparison with the previous year's corresponding crops, shows an increase of 51,871 acres.

2. I am also desired to intimate that in all future Returns Nos. II and III, the total figures under each District and Division for the preceding season will be shown, in order to admit of easy comparison in detail.

STATEMENT No. I.

IRRIGATION OPERATIONS OF FASL KHARIF, 1874-75.

Comparative Abstract of Irrigation and Rainfall in Canal Districts of the Punjab.

Remarks.

Ganges Canal.—The canal opened on the 20th of the month. No demands for irrigation were made during the month except in Cawnpore for rice.

Eastern Jumna Canal.—Canal was closed to the 18th of the month, from which date to the 31st a little water was run for the corn mills.

Dún Canals.—A little irrigation was effected, but for rabi corps only.

Agra Canal.—Ditto.

Rohilkhand.—Nearly as much irrigation was effected this month as in all previous months together of this fasl.

Bundelkhand.—No remarks.

Traffic.—*Nil.* The water was too low for navigation.

Allahabad,
The 2nd December 1875.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., [illegible] Branch.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th DECEMBER 1875.

GENERAL REMARKS.—In Madras somewhat scanty rain has fallen in the Northern Districts and Tanjore, none in the Southern: prospects are satisfactory. Good rain has fallen in the Deccan districts of Bombay, in Khandesh and Nasik, and in some districts of Guzerat and the Southern Mahratta country, doing great good to the *rabi*: prospects are generally very good throughout the presidency, including Sind. In the Central Provinces slight showers are reported from a few districts: prospects continue good. In Rajputana some quantity of rain fell in the previous week, not before reported; and in Malwa there appears to have been general and beneficial rain during the week. In Bengal slight rain is reported from Midnapore, Sarun and Chumparun: prospects continue unchanged, and the harvest progresses. From the North-Western Provinces, Oudh and the Punjab no rain is reported to have fallen: prospects are good. Some rain has fallen in parts of Mysore, but the condition of the crops is still indifferent. In Assam no rain is said to have fallen.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Dec. 16th)	·26 at Masulipatam; ·40 at Sattanapalli; ·5 at Repalli; none elsewhere.	Rain wanted; 2 feet 9 inches water over anicut; canal supply insufficient; standing crops generally good; markets well supplied; prices steady; cholera 3 seizures, 2 deaths in Bander taluk; fever general; mild type small-pox in three taluks; cattle dysentery and epizootic aphtha general; pasture sufficient.
Kurnool (15th)	·045 in one day.	Slight fall in Markapur; none elsewhere; dry crop and paddy harvest continue; outturn generally fair; water and pasture abundant; markets well supplied; prices steady; cholera disappearing; 15 seizures, 3 deaths; fever prevalent; no water over Sunkesala anicut.
Tanjore (16th)	·21 at Negapatam; elsewhere very scanty and partial.	Rivers low; no fresh supply to tanks; water over anicuts none; cultivation wet and dry crops in few localities; standing crops generally good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; cholera continues, 72 seizures, 63 deaths; cattle disease in some localities, some loss; pasture generally sufficient.
Trichinopoly (15th)	*Nil*	Water supply sufficient; crops good; outturn up to average; markets well supplied; prices of dry grains somewhat fallen in two taluks; cholera slight; condition of cattle good; pasture ample.
Malabar (16th)	*Nil*	Standing crops good, but rain required; markets well supplied; prices steady; bowel complaints in 7 taluks—365 cases, 228 deaths; small-pox, fever and cattle disease slight; pasture good.
Bombay— (Dec. 16th)		*General Remarks.*—General prospects satisfactory.
Sind. (Dec. 15th)		
Kurrachee ...	...	Weather fine; rabi prospects in Sehwan division very favourable; cholera in Keti not spreading—total 13 cases, 7 deaths; usual fevers and colds, also cattle disease; river encroaching on tower of Mánjhand.
Shikarpur ...	...	Fever accompanied by diarrhœa and cramps very prevalent.
Hyderabad ...	...	Fever increasing; weather cold.
Upper Sind Frontier ...	...	Weather mild; prospects of rabi crops good; kharif being harvested; fever decreasing.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	...	Prospects of rabi crops good; 4 cholera cases in Mátar taluka, 3 deaths.
Surat ...	...	Showers of rain at Bárdoli and Mándvi with hail storm; rabi crops good.
Broach ...	...	Slight rain in all talukas except Ankleswar; rabi crops thriving, but slightly injured by rain in Amod and Jambusar; fever continues.
Khandesh and Nasik.		
Khandesh ...	...	Some damage to kharif crops already harvested, and to unreaped cotton caused by rain in the eastern districts; ague still prevalent; cattle disease in Ráver Peta.
Nasik ...	1·61	Rabi crops improving; fever prevalent in three talukas.
Konkan.		
Tanna ...	...	Reaping of kharif and sowing of rabi nearly completed; outturn of kharif fair; cholera very slight in two villages of Wára taluka.
Deccan.		
Poona ...	0·08	Total rain-fall 34·38; rain, which has fallen in all talukas, has done much good to standing rabi crops, the prospects of which are promising.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	0·78	Rabi crops good, except in two talukas.
Sholapur ...	1·12	Total rain-fall 24·67; crops slightly injured in Sholapur; cholera in Mádha—11 deaths.
Satara ...	0·42	Total rain-fall 53·80; fall of rain seasonable and general; outturn of early crops fair; late crops good.
Southern Mahratta Country.		
Belgaum ...	...	Rabi and cotton crops well, except a few cholera cases in Gokák and Sampgaon; cholera has abated.
Dharwar ...	0·10	Total rain-fall 30·61; early crops and public health as before; blight in cotton in Bankápur.
Kanara ...	...	Weather warm; ploughing for second crop continues; 3 cases of cholera.
Kaladgi ...	0·58	Reaping of kharif crops progressing; rabi and cotton crops withering in some places owing to north-east wind; 12 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·62	Cholera slightly raging in villages of Kotra and Rájkot.
Wadhwán ...	...	Weather cool; 51 cholera cases, 31 fatal.
Baroda ...	...	Wheat and cotton prospects fair.
		General Remarks.—Slight cholera in Keti (Sind), Rájkot, Wadhwán, Kaira and Sholapur; decreasing steadily in the Southern Mahratta Country; fever prevalent in Sind, Guzerat, Khandesh and Nasik; rabi crops generally improved by seasonable showers; prospects fair.
Bengal—(Dec. 16th)		
Chittagong ...	*Nil* (no rain in previous week).	Weather warmer than it should be; heavy dews at night; no change since last report; harvesting is going on; the yield will be throughout the district much less than it ordinarily is, and will in some high lands be hardly worth the reaping; the failure will, however, be only one of the surplus which would have been exported elsewhere; there will remain ample for local wants.
Noakhally ...	*Nil*	Weather fair, wind generally northerly; it was cloudy on the 5th instant; the reaping of the *amun*, or the late rice, continues; sowing of pulses, chilies, &c., has commenced in some places; cholera much prevalent in Begumgunge station; in all other parts it is not so dangerous; no cases of cholera in the town.
Chittagong Hill Tracts...	*Nil*	Weather seasonable, very cold at night; cotton is still being collected, and mustard sown.
Hill Tipperah ...	*Nil*	Seasonable weather; no change in the state and prospects of the crops.
Backergunge ...	*Nil*	There is no reason to modify previous reports, which were to the effect that the general crop prospects of the district are good; the cutting of the *amun* or late rice has begun; in the thanas of Mathoria and Ghulsakhali insects have done some damage, but from all other places the crop report is favourable; there is and has been for some weeks a good deal of sickness among the people, fever and cholera being the chief diseases; cholera is reported in a sporadic form from the thanas Kotwali, Backergunge, Gaurnadi, Shampkath, Malbaria, Mirzagunge, Dowlutkhan and Baramdi; cattle disease has disappeared.
Furreedpore ...	*Nil*	Weather getting gradually colder; the paddy crops are being reaped; it is reported from Madareepore that in some places in that subdivision the *amun* or late rice is said to have been attacked by insects; cholera still prevails in all the sub-divisions in the district.
Dacca ...	*Nil*	Weather still warm; state of the crops is good; health improving.
Mymensingh ...	*Nil*	Weather fine and cold; generally a fair harvest throughout the district.
Tipperah ...	*Nil*	Weather seasonable; no difference in the state and prospects of the crops since last report; the *amun* crop is still being reaped; the outturn is not expected to exceed three-fourths in average in the district; winter crops are in a favourable condition; cholera has made its appearance in many places in the district.
24-Pergunnahs ...	*Nil*	Weather cold; slightly cloudy in the early part of the week; harvest of the *amun* or late rice progressing fairly; cold weather crops doing well; fever and cholera are prevailing more or less in every subdivision.
Jessore ...	*Nil*	Cool, with northerly wind, sky occasionally clouded, but still no rain; reaping of late rice continues; rain wanted everywhere for the cold weather crops, which, from the dry state of the ground, are for the most part very stunted, though not altogether failures.
Nuddea ...	*Nil*	The nights are cold, but days often very hot for the time of the year; the *amun* or late rice crop is being harvested everywhere; on the whole it will yield a fair average crop; many of the cold weather crops require rain; cholera is somewhat abating.
Moorshedabad ...	*Nil*	Weather cooler than last week; reaping of the paddy crop nearly completed; prospects of the rubbee crops are fair; a slight fall in the price of common rice; a few cases of cholera reported from Harihurpara, Dowlutabad, Jelunghi, Borwa, Bhurutpore and Shumshergunge; fever is still continuing in Serajgunge.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Pubna ...	*Nil*	Weather seasonable; state and prospects of the crops are good; cholera and fever are still prevalent.
Rajshahye ...	*Nil*	A northerly wind has been blowing during the great part of the week the sky was cloudy on the 11th instant; the cutting of early paddy is fast going on; complaints of some injury caused by a black worm are made; the cold weather crops have not yet suffered materially from absence of rain, two or three days' rain would, however, be very beneficial; the seedlings of *borodhan* in the nurseries, where they are easily watered, are thriving well, and in some places are nearly ready for transplantation; cholera cases are still reported, but not to any considerable extent; there has been a good deal of fever, chiefly in Buragaon.
Bogra ...	*Nil*	Weather fair; no change in the state and prospects of the crops since last report, *i. e.*, a fair crop is now certain all round, and in some parts the crops will be good; rice is now being extensively cut, and the *rabi* or cold weather crops are coming on well.
Maldah ...	*Nil*	Weather cool, occasionally cloudy; *rabi* crop is slightly injured in Sudder station from want of rain; it is attacked by insects in thana Gorgoribah; *kalai* reaping commenced; good outturn is expected; *amun* and *haimanti* reaping continues; fair yield is expected from the latter; cholera decreasing, during the week there have only been 9 deaths from that disease, and 7 fresh attacks reported; 28 deaths have occurred from fever.
Dinagepore ...	*Nil* (No rain in previous week.)	Weather fair; cold and cloudy; the rice crops are being cut generally throughout the district; the outturn will be moderate; cholera in Hemtabad, Bungsibari and Thakurgaon thanas.
Rungpore ...	*Nil*	Foggy mornings; weather seasonable; harvesting of rice is general; outturn is equal to the estimate—8 annas for the whole district; cold weather crops promising; cholera is very prevalent.
Cooch Behar ...	*Nil*	The mornings are beginning to be foggy; two days of the week were cloudy, but there was no rain; no change in the prospects of the crops; the outturn of the late rice crop will, it is believed, turn out to be 8 annas; the prospects of tobacco continue good.
Jalpaiguri ...	Not received	Weather cloudy and hot for the season; no change to report in crops; cultivators are busy in cutting *haimanti* paddy; fever is still prevalent; cholera is abating.
Darjeeling ...	*Nil* (No rain in previous week.)	Frosty mornings and clear, bright days; the harvesting of the *haimanti dhan* is progressing in the Terai; the deficiency in the outturn will not be felt seriously; the crops in the hills have done well on the whole.
Midnapore ...	A shower in the middle of the week. (No rain in previous week.)	Weather has been cooler since the shower of rain; prospects of the crops continue as good as could be desired.
Howrah ...	*Nil*	The weather has at last become seasonably cold; no change in the state and prospects of the crops since last report, save that the reaping of the harvest is now general.
Hooghly ...	*Nil*	Weather seasonable; about three fourths of the *amun* or late rice on the high land has been cut; in other respects no change since the date of the last report.
Burdwan ...	*Nil*	Rice being harvested generally; cold weather crops promising, would be better for more rain; much sporadic cholera.
Bancoorah ..	*Nil*	Weather cooler than last week, but cloudy; rice crop is nearly reaped; an average of 14 annas is expected; the cold weather crops are doing well; cholera is still prevalent
Beerbhoom ...	*Nil*	Unusually warm weather; harvesting of rice is nearly over; outturn excellent.
Sonthal Pergunnahs ...	*Nil*	Weather dry and cool; frequently wind from the north-west; the harvest of rice is going on satisfactorily.
Bhágalpur ...	*Nil*	*Aughani* harvest is progressing; *rabi* prospects are still good; general health is very good; prices are not rising.
Monghyr ...	*Nil*	Weather fair; no change since last week; the rice all over the district is being cut; the outturn on the high lands is very scanty; on the low lands the outturn is good; on the whole, as previously stated, nearly an average crop will be cut; very favourable weather at the beginning of next year will secure a good *rabi* crop.
Purneah ...	*Nil*	Weather warmer during the day time than usual at this time of the year; the state and prospects of the *rabi* crops on the whole are good, though rain is wanted; winter rice is being reaped; the outturn from the low lands is good, that of the up land is generally bad.
Darbhanga ...	*Nil*	Weather cold and dry; the prospects of the crops are much the same as reported last week; *rabi* sowings are much in want of rain.
Mozufferpore ...	*Nil*	Weather is rather warm and cloudy; the rice crop is being rapidly reaped; in the sudder sub-division recent detailed enquiries show that there will be an average 8 annas outturn; in Sectamurhee sub-division the outturn will probably be only 5 annas, certainly not more than 6 annas; in Hazeepore sub-division 4 annas; the rabi crops are doing fairly well in Mozufferpore and Hazeepore sub-divisions generally, but are very poor in Lalgunge thana; in Seetamurhee sub-division *rabi* sowings are being made in moist rice lands, where the crops have been just reaped, and the *rabi* area has been found to be much larger than was expected; though the average outturn for the sub-division is not likely to exceed 3 annas without early rain, it may, under the most favourable circumstances, be as high as 6 annas; the *rahur* has begun to dry up in some places; prices are stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Sarun ...	Slight fall in Gopalgunge.	Weather clear and cold, at times cloudy; west wind prevailing; no change in the prospects of the crops since last report, *cotton* and *rahur* pulse are doing well; sugarcane manufacture is going on; paddy is still being harvested; *rabi* crops are progressing fairly; the heavy dews at night has kept up the moisture in the fields; the crops too are being irrigated where practicable; poppy coming on well; in Gopalgunge, an outpost of thana Burrowli, in the Sewan sub-division, there was a slight fall of rain, which did much good to the crops; general health is good.
Chumparun ...	A slight shower on the 11th (0·2 in previous week.)	Weather mild and cool; cultivators have commenced harvesting the *aughani*, or late rice crop, the outturn of which is as bad as reported before, and there is nothing new to report.
Patna ...	*Nil*	Since last week it looked as if there would be rain, but it cleared off again; mornings exceedingly cold, with heavy dews; prospects of the crops remain unchanged, *i. e.*, the rice crop is now being reaped, and the Collector does not think, on the whole, it will be a bad one; the prospects of the *rabi* crops are fair, but of course would be benefited by rain; health of the district is good.
Gya ...	*Nil*	Mornings cold and seasonable; cloudy weather and indications of rain; the greater part of the rice crop is cut; *rabi* crop growing fairly in some places; in others, though the seed has germinated, rain is much required to bring the plant on; general health is good.
Shahabad ...	*Nil*	Weather cloudy and cool; *rabi* crops continue to promise well; rain is wanted; paddy crop is being harvested; health of the district is good.
Hazaribagh ...	*Nil*	Weather cloudy and sunshine alternately, but colder than the previous week; the condition of the crops remains the same, but would be greatly benefited by rain, which still holds off; the outturn of the paddy, which has now been reaped, is reported to be better than was expected.
Lohardugga ...	*Nil*	Weather cloudy, with every appearance of rain coming; the harvesting of the rice crop is now almost over; this crop has been a very fine one throughout the district; rain is much wanted for the *rabi* crops, particularly in Palamow; general health is good.
Maunbhoom ...	*Nil*	Weather *too dry, but pleasant*—cool in the morning and hot in the day; the state and prospects of the crops are favourable.
Singhbhoom ...	*Nil*	Seasonable weather; state and prospects of the crops are favourable; fever is still very prevalent.
Balasore ...	*Nil*	Weather fine; ryots are still busy in harvesting; outturn of rice crop is good; cholera is still prevalent.
Cuttack ...	*Nil*	No change since last report; crops promising; weather fine; public health improved.
Pooree ...	*Nil*	Weather bright and cold; the *laghu*, or the first late rice, is being reaped and gathered; sarud, or the main late rice, is now ready for the sickle, and in some places is being reaped; the mustard, *rahur*, *kalai*, *moong*, and *kulthi* pulses are promising; in Khoorda the harvesting of the rice crop is in progress; other crops promising; cholera is still raging in parts.
		General Remarks.—No rainfall is reported from any of the districts for the week under review, except a very slight fall in Midnapore and Sarun and in the Chumparun District. There has been no change in the state and prospects of the crops since last report. Harvesting of the main rice crop is progressing. Winter crops generally promise well, but require rain.
N. W. Provinces—		
Benares (Dec. 13th)	...	Rabi prospects good; rain wanted.
Allahabad („ 15th)	...	Weather continues fair.
Jhansi „	*Nil*	Prospects unchanged.
Agra „	*Nil*	Rabi prospects favourable.
Meerut „	*Nil*	Prospects good.
Punjab—		
Delhi (Dec. 15th)	*Nil*	Health good.
Hissar „	*Nil*	
Mooltan „	*Nil*	
Dera Ismail Khán „	*Nil*	
Rawal Pindi „	*Nil*	
		General Remarks.—Prospects of rabi everywhere favourable; fever prevails in Jullundur, Lahore and Peshawár.
Oudh—		
Lucknow (Dec. 15th)	*Nil*	Agricultural prospects and public health continue good.
Sitapur „	*Nil*	
Fyzabad „	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godavari (Dec. 11th)	...	Weather cloudy; prospects favourable; fever prevalent; prices fluctuating.
Sambalpur ...	...	Weather cloudy; rice cutting continues; cholera abating; fever prevalent.
Bilaspur ...	...	Weather cloudy; prospects favourable; fever continues; prices steady.
Raipur ...	...	Harvesting of kharif continues; cholera subsiding.
Chanda (12th)	...	Rabi sowings completed; cattle disease continues.
Chhindwara ...	·55	Prospects favourable; health good; prices steady.
Balaghât (13th)	...	Cutting and threshing of kharif continues; fever prevalent; prices steady.
Betul ...	...	Weather cloudy; prospects favourable; health good; prices steady.
Bhandara (14th)	...	Weather cloudy; prospects favourable; cholera, fever, small-pox and cattle disease continue; prices easy.
Nagpur (15th)	...	Weather cloudy; crops well; health good; prices falling.
Wardha ...	...	Jowar cutting; cotton picking continues; rabi excellent.
Nimar ...	...	Slight rain; prospects favourable; cholera lingering; prices stationary.
Hoshangabad ...	...	Weather cloudy; prospects unchanged.
Narsinghpur ...	...	Prospects of rabi favourable.
Jubbulpore ...	...	Rabi good.
Saugor ...	...	Rabi thriving; health good.
Seoni ...	...	Threshing of kharif progressing; rabi promising; health good.
Damoh ...	·20	Prospects favourable; health good; prices rising.
Mandla ...	...	Prospects favourable; health good; prices stationary.
		General Remarks.—Prospects appear good everywhere.
Assam—		
Gauhati (Dec. 16th)	*Nil*	Raw, foggy mornings, clear and cold days; salee paddy being reaped, good outturn not expected as reported before; other crops and tea doing well; public health good.
Sylhet „	*Nil*	Reaping progressing; rice market steady; cholera still hanging about.
Mysore and Coorg—		
(Dec. 16th) ...	*Nil*	Crops have suffered chiefly in the Mysore, Kolar and Chitaldroog districts; prices have risen generally; cholera at Bangalore nearly extinct, but sporadic cases occur throughout the province; scarcity of water imminent.
	1·5 in Hassan District.	
Hyderabad Assigned Districts—		
Umraoti (Dec. 16th)	...	Kharif cutting continued; expected outturn fair; standing crops in one taluka of Buldana district slightly damaged by rain and hail; rabi in good condition.
Rajputana—		
Marwar (Dec. 11th)	...	Prospects promising; health good.
Meywar (3rd)	·20	Health and prospects good.
Harowtee States—		
Deolee (Dec. 4th)	·2	Health and prospects good.
Tonk „	·4	
Jhallawar „	·2	
Shahpoora „	·1	
Bhurtpore (9th)	1·	Rain beneficial to crops; weather cool and pleasant.
Ajmere	·90	Weather cool; health and prospects good.
Jeypore (16th)	...	Crops promising; weather seasonable; health good.
Central India—		
Indore (Dec. 15th)	...	Health and agricultural prospects generally favourable; hail-storm of great violence fell at Oojein last week, doing some damage; in other parts of Western Malwa rain was beneficial.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...	

N. B.—In the remark column in the statement published in the *Supplement to the Gazette of India* dated the 4th instant, opposite Mysore and Coorg, for "Kolar" read "Kadur."

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*
Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*
No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 14th December 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *Presiding.*
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble J. R. Bullen Smith.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
His Highness Mahárájá Iswaríparshád Náráyan Singh Bahádur, of Benares.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.

NEW MEMBER.

His Highness MAHÁRÁJÁ ISWARÍPARSHÁD NÁRÁYAN SINGH BAHÁDUR took his seat as an Additional Member.

PRESIDENCY BANKS BILL.

The Hon'ble SIR W. MUIR introduced the Bill for constituting and regulating the Banks of Bengal, Madras and Bombay, and moved that it be referred to a Select Committee with instructions to report in two months. He said—

"Your Excellency; when I obtained permission of the Council to introduce the Bill for constituting and regulating the three Presidency Banks,

I stated the occasion of the measure to be that Government had resolved on retiring from its position as a shareholder in the existing Banks, a change which rendered necessary a new Act of incorporation.

"I will trouble the Council now with but a very brief narrative of the circumstances which have led to the present measure. The Bank of Bengal took its origin as the immediate result of an able letter addressed in 1801 to the Government of India by its Accountant General, Mr. Henry St. G. Tucker, in which he showed that a Bank was necessary both in the interests of Government and of the mercantile community. Money was in those days raised by what were called 'Treasury bills.' But although these bore interest, they were liable to depreciation in the market, and by the combination chiefly of Native brokers, were often at a heavy discount. To remove the inconveniences of this arrangement and maintain the credit of Government, Mr. Tucker argued that a bank was indispensable; and that in order to its security, it was necessary that Government should aid it by contributing as a shareholder to its capital, and by sharing in its direction and in the privilege of voting. Upon this footing the Bank of Bengal was opened in 1806, and obtained its charter in 1809. Its capital was then £500,000, of which the State contributed £100,000. The capital was from time to time increased, and now stands at £2,200,000, of which £220,000 belong to Government. Up to 1854, the Secretary was, with one exception, a member of the Civil Service. Thus constituted, the Bank of Bengal has well answered its object. It has proved a useful auxiliary to the State and to the mercantile community, and in seasons of difficulty has often afforded substantial assistance and valuable support to the Exchequer.

"The Presidency Bank of Madras was incorporated by Act IX of 1843, superseding an already existing State Bank. It also has proved, though on a much smaller scale, a useful institution.

"The Bank of Bombay was first constituted by Act III of 1840, but it came to a disastrous ending. As is now matter of history, it suffered severe losses in the wild and excited speculation which followed on the American war, and the rise in the price of Cotton; and in 1868 it was voluntarily wound up. The new Bank of Bombay, Limited, rose upon its ruins, being constituted by Articles of Association under the Indian Companies Act of 1866.

"A Commission was appointed by the Government of India to enquire into the causes of failure of the Bombay Bank, and in 1869 this Commission furnished an elaborate report of the results of the investigation. The majority consisting of Sir Charles Jackson the President, and Mr. Maxwell Melville, were of opinion that Government should retire from its position as shareholder. Major Innes on the contrary considered the position an expedient one. Sir Charles Jackson's argument was that the partnership of Government and its participation in the direction of its business afforded no real security against disaster; and that the Government Directors, having other important duties of their own to perform, had not the leisure (and not always the special qualifications) to enforce an effective and vigilant control. The connection, while thus giving no material protection, was looked upon by the outside world as an all-powerful guarantee; and in the event of failure, the discovery that that guarantee was worth nothing must create wide-spread dissatisfaction, as it really did in the case of the Bombay Bank. In short, there was an apparent, but not any real, responsibility. Further it was urged that the necessity for connection with the State no longer existed; it might have been expedient or even indispensable in the poverty of mercantile resources at the beginning of the century to support the credit of the Bank by Government capital and direction. But this had long ceased to be the case, and there were now abundant materials, altogether apart from the State, for banking upon a secure and independent basis. And even supposing a Bank to be needed for the transaction of the business of Government and the custody of its balances, sufficient security could be obtained by legal checks and restrictions upon a private Bank, without the State becoming itself a shareholder.

"The position thus contended for has been accepted by Her Majesty's Government. Various opinions have prevailed upon it, and much discussion. For my own part, I agree in the conclusion that has been come to as upon the whole the most wise and expedient. But in truth the subject is now beyond the range of discussion. The separation has been deliberately resolved upon by the highest Authority; and it only remains to provide measures for giving effect to it, and for the constitution of new Banks independent of the Government, but on so secure a basis that they can be used by Government for the purposes of the Exchequer.

"Such being the case, it has become necessary to provide for the disposal of the shares of Government and to remodel the Acts of incorporation; and the opportunity is taken to make one Act under precisely the same conditions applying to all the three Banks. Although the State will no longer be a shareholder in the Banks, it will still be a depositor; all payments to or by Government at the several presidencies will be paid by or to the respective Banks, which, as Bankers of the State, will transact the business of Government at the presidencies. The provisions on this head will be found under section 11 of the Bill. These provisions render it necessary that the interests of the public should be secured by certain legal safeguards and restrictions on the kind of business to be transacted by the Bank and the mode of its transaction, by the power of inspection on the part of Government, and by the periodical publication of the state of the Banks' assets and balances. At the same time such relaxations in the existing law as have been found compatible with safety have been admitted.

"The Bill which I now introduce is based upon a draft drawn by the New Bank of Bombay in 1872; and it has been subjected to very careful and anxious revision in the Financial and Legislative Departments. Advantage has been freely taken of the criticisms received from the directors of the three Banks. Further suggestions will no doubt be advanced by the directors and others while the Bill is before the Select Committee; and they will there receive the fullest consideration, with the aid which I trust we shall obtain from my hon'ble friends the mercantile members of the Council. The Bill is in itself much more elaborate and systematic than any of the previous enactments, and it may be hoped will prove well adapted for its object. If passed into law, I have every confidence that it will afford a full security and yet ample liberty of action.

"The chief relaxations in the mode of conducting business are these:—

"The Banks may invest in Railway stock, debentures or shares of Railway or other Companies of which the interest has been guaranteed by Government (section 9, (*a*) clause 3). They may similarly invest in the debentures of legally constituted municipalities (clause 4). The advance of money is no longer restricted to goods 'not of a perishable nature;' it is left in the discretion of the Banks whether the goods are of a nature to warrant advances or not, without any risk of a breach of the law (clause 5). Lastly, branches may be opened anywhere within the respective presidencies at discretion and with no need of Government sanction (section 15).

"In this last section (15) it has been provided that the agency of the Bank of Bengal now in Bombay shall not be disturbed. The Council are aware that much controversy has existed between the New Bank of Bombay and the Bank of Bengal in respect of this agency; and it has been finally decided by Her Majesty's Government not to insist upon its withdrawal. The scope of this agency is limited to what has been hitherto its object, namely, the transaction of the business proper of the Bank of Bengal, and it will not interfere with the functions of the Presidency Bank beyond those limits. The new Bank has flourished notwithstanding the existence of this agency, and there is no reason to apprehend any injury to it from the same cause in the future. I may add that should permission be at any future time given to the Bank of Bombay to establish a corresponding agency in Calcutta, it will be under precisely the same restrictions, for the imposition of which due power has been reserved in section 15.

"Two new restrictions on the scope of the Bank's business may be noticed as having been based on the experience gained from the failure of the Bombay Bank and the suggestions of the commission. One is the prohibition of discounting securities supported by only one name (section 10 (e)), the expediency of which, as bearing on safe banking, needs no illustration. The other is that

advances (other than those upon security authorised by the Bill) are limited in respect of any single person or firm at any one time to Rs. 6,00,000. On this subject Sir Charles Jackson wrote—

"'It would be advisable, considering the pressure brought to bear on Directors in such mercantile communities as Bombay, that the Indian Act should mention some limit beyond which no person, firm or company should be under advance. The limit mentioned in the old Bombay Act (III of 1840) of three Lakhs for individual firms is rather low for these days, and it is clear that the bills of the large Indian Banks might safely be taken for a larger amount.'

"Following this opinion, and after careful deliberation, the amount has been doubled and the limit enlarged to six Lakhs.

"The terms of the contracts between Government and the Banks are still under negotiation; but no difficulty is apprehended in the settlement of such conditions as shall be readily accepted both by Government and by the Banks.

"Among the details which will come before the Select Committee is one which I may here allude to. The shares have been lowered in amount, and it is not improbable that this may have the effect of bringing in a larger number of the holders of small shares. In the schedule of votes, a number of small capitals held separately by different shareholders carry a larger voting power than a much greater capital singly held. It will be considered whether greater weight than at present should not be given in the scale of votes to the larger capitals.

"These are all the remarks which it occurs to me to make upon the Bill. A new era now opens for the Presidency Banks. They emerge from Government control. Only so much inspection is insisted on as will satisfy the Government that the requirements of the Act are being carried out, and that its balances are safe under the Bank's custody. At this juncture it is right that, on the part of Government, I should acknowledge the valuable services which have been rendered by the Banks as heretofore constituted, and specially by the most important of them, the Bank of Bengal, to Government, and likewise the useful position they have occupied in aiding—what really constitutes the prosperity of the State—the interests of the commercial community of India. The Banks have no doubt done good business for themselves, and upon the whole yielded to their shareholders excellent returns on the capital invested. But their good management and their success in this respect is no reason why the State should not acknowledge its obligations for the benefits which it has received from association with them.

"And there is every reason to hope and trust that in the future these benefits will not be lessened, and that, under a more perfect definition of the limits of safe business and of legal responsibilities and obligations, greater liberty of action may be exercised without any reasonable risk of disaster; and the securities of the law prove no bar to financial success."

The Hon'ble MR. BULLEN SMITH said that connected as he was with one of the three Presidency Banks of which Sir William Muir had just been speaking, it would scarcely be possible to allow the motion to pass without expressing the great satisfaction which he felt at the introduction of the Bill, which promised to put an end to a certain amount of anxiety and uncertainty which had for a long, although perhaps unavoidable, period existed as to what were to be the precise relations of Government with the Presidency Banks in future, and the conditions upon which those institutions were to conduct their business. He had listened with great interest to all that had fallen from the hon'ble member as to the rise and progress of these Banks, and although he (MR. BULLEN SMITH) conceived there might be difference of opinion as to whether or not there did exist at the present time a real necessity for the severance of that connection which had so long and with such great advantage subsisted between the Government and these Banks, yet he was for his part somewhat careless to enquire as to the precise need for that severance. The Banks had derived great advantage from that connection in times past, but he thought the moral support which the Government lent to the Banks, besides its material support, was now no longer required. He thought these institutions were now in a position to go on alone, which they were not at the time of their original establishment, and that support, which was in the early days almost necessary, was now no longer required.

As to the Bill itself, he was quite prepared to say that in most particulars he was content with it. There were one or two sections which he thought were too strictly drawn, inasmuch as he believed it would be found that, in regard to the amount of capital available and business transacted, conditions which applied with equity and propriety to one might not with equal equity and propriety apply to others. These, however, would be matters for discussion in Committee, and he was quite sure that anything which might be said from his point of view and that of others would receive the utmost attention.

In conclusion, he desired especially to express his high approval of, and the pleasure with which he had read, section 15 of the Bill, establishing legally the agency of the Bank of Bengal at Bombay. That agency, it was not too much to say, had during several years been assailed with great bitterness and determination. Attempts had been made repeatedly to procure its removal, and assertions made that it was carrying on other than its own legitimate operations. An enquiry was made by the Government of India some time ago into these allegations, and the fact that the agency of the Bank of Bengal had not been prohibited from remaining in Bombay was, he presumed, sufficient evidence that the Government was satisfied that the charges were unfounded, and that the agency was not acting as a branch, but was doing the work for which it was established, and that only. Still he welcomed this section, because its introduction into the Bill seemed to proclaim in a public manner that the Bank of Bengal had not gone to Bombay under false pretences, that it had not asked leave to do one thing and done another, that the agency was acting strictly within its functions as such, and that the Bank had in all loyalty and good faith confined its operations in Bombay to the purposes for which it sought and obtained permission to establish an agency in that city. With these observations he had much pleasure in supporting the motion.

The Hon'ble RÁJÁ NARENDRA KRISHNA BAHÁDUR said that the Bill proposed to confirm the sale of the shares held by the Government in the Banks of Bengal and Madras to the private proprietors of these Banks; or, in other words, the Government wanted to modify materially its connection with them. Since the establishment of these Banks their affairs (he alluded especially to the Banks of Bengal and Madras) had been managed partly by experienced Civilians appointed by Government, and partly by influential members of the mercantile community. The banking business, under their joint management, had generally prospered. The exercise by Government of a healthy control over the Banks had hitherto supplied a firm foundation for the unbounded confidence of Native and European shareholders, as well as of the public at large. The present Bill, by upsetting, to a very great extent, this long existing wise arrangement, would take away a powerful safeguard, unsettle a variety of interests, and seriously affect many existing transactions. He need only specify the existing practice of most Natives, and, he believed of the Europeans, preferring to deposit money in these Banks instead of in other Banks, although the latter allowed a certain interest on the deposits. He might also be allowed to observe that financial schemes of great magnitude in this country, which had not enjoyed the supervision of Government, had generally collapsed. The Government, indeed, had, with a due regard to the principles he had touched upon, made certain salutary provisions, as explained in the concluding paragraph of the Statement of Objects and Reasons of the Bill; but he would suggest the propriety of associating a competent Civilian with the executive functionaries of the Banks, without which, he feared, the existing unlimited confidence of the public in the transactions of the Banks could not remain intact. Although the Government would cease to have any direct pecuniary concern in the Banks, yet, as they would be empowered to act as bankers for the Government, it ought very legitimately to have its own responsible officer to superintend their affairs.

The Hon'ble SIR W. MUIR in a few words expressed his great satisfaction at what had fallen from his friend, Mr. Bullen Smith, and the support he had accorded to the action of the Government: he could only again assure him that every attention and consideration would be given to any suggestions or remarks that might come either from individual members of the mercantile community, or from the Directors of the Banks.

With reference to the remarks of Rájá Narendra Krishna, he trusted that the gloomy apprehensions he had expressed from the Banks not having connection with the State, or Civilians not being in their direction, would be falsified in the result, and that the carefully-drawn provisions of the Act would secure all the protection necessary for, or desired by, the public.

The Motion was put and agreed to.

The Hon'ble SIR W. MUIR also moved that the Bill be published only in English in the *Gazette of India*, the *Calcutta Gazette*, the *Fort St. George Gazette* and the *Bombay Government Gazette*.

The Motion was put and agreed to.

CALCUTTA UNIVERSITY (HONORARY DEGREES) BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to authorize the University at Calcutta to grant Honorary Degrees.

He said that the growth of this University had been such that, independently of any special occasion, it might be proper to consider whether they should not have the power to grant Honorary Degrees. There was however a special occasion which this Bill was intended to meet; namely, the visit of His Royal Highness the Prince of Wales, upon whom it was proposed to confer such a Degree. But the University had no power at present to confer Degrees without examination. The Corporation was established by an Act of this Council passed in the year 1857, and in the preamble of that Act the scope of the Corporation was described as being for the purpose of ascertaining, by means of examination, the persons who had acquired proficiency in certain specified subjects, and of rewarding them by Academical Degrees as marks of honour. In the 11th section of the same Act it was provided that the University should have power, after examination, to confer the several Degrees therein specified. These were the Degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, Licentiate of Medicine, Doctor of Medicine, and Master of Civil Engineering. Those were the provisions of the Act of 1857. It was subsequently found convenient to give the University greater latitude with respect to the Degrees to be conferred; and accordingly, by an Act passed in 1860, it was provided that the University might confer such Degrees as they should appoint by any bye-laws. But it was also provided that all the provisions which were contained in the Act of 1857 with respect to the old Degrees should apply also to the new Degrees to be created under the Act of 1860. Therefore it remained the case that no Degree conferrible under the Act of 1860 could be conferred without examination. Under the powers given by the latter Act, a bye-law was passed establishing the Degree of Doctor in Law. Shortly afterwards, in the year 1862, it was a matter of discussion amongst the University authorities whether or not they should apply for power to confer Honorary Degrees. There was a good deal of difference of opinion at that time, but upon the whole the opinion prevailed that the University was too young a body to confer such Degrees, and that it would be better to wait until it had grown into a larger body before that subject was mooted. Now the growth of the University had been very rapid, and it had taken an important place in the Indian community. And he thought that when a personage in the position of the Prince of Wales came forward and expressed his readiness to be the first recipient of such a Degree, the University need not be very modest in the matter but might consider themselves competent to confer it.

As MR. HOBHOUSE was about to ask His Excellency to suspend the Rules for the Conduct of Business, it would be convenient to go on and state what were the contents of the Bill. The reasons for suspending the Rules were that the time was short, that there were many arrangements to make, and that it was desirable that the University authorities should know in what position they stood. The object of the Bill was one as to which he should hardly anticipate any difference of opinion. The subject-matter was very simple, and the precaution had been taken to submit the draft which the Council had in their hands to the Syndicate of the University. It had been carefully examined by them, and had been approved in the form in which it stood. Therefore it was not likely that we should find errors in the draft if the Council passed it in that form. The nature of the Bill was of the simplest possible kind. It stated briefly that position of things which he had stated to the Council rather more fully, and then it provided that, with the consent of the Chancellor of the University, the Syndicate might grant any Academical Degree to any person without requiring him to undergo an examination. But it provided that the Vice-Chancellor and at least four members of the Syndicate should certify that, by reason of eminent attainments and position, he was a fit person for such Degree. The Council were doubtless aware that the executive powers of the University were managed by a body called the Syndicate, and one of these powers under the bye-laws of the University was to grant Degrees, Honours and Rewards. Therefore it was proposed that the Syndicate should grant any such Degree as the University might think fit to establish under the Act of 1860. They had established the Degree of Doctor of Laws. It was a fit Degree to confer upon His Royal Highness the Prince of Wales, and therefore it was proposed to confer that Degree upon him in the present instance. With respect to the safe-guards provided, it was not thought desirable that any very wide door should be open to persons to come in and ask for an Honorary Degree. It was therefore thought fit that a large number of the Syndicate, and the Chancellor, who stood quite independent of the Syndicate, should agree in the propriety of conferring such a Degree on any person.

His Excellency THE PRESIDENT said:—"As I have the honour, in virtue of my office, to fill the office of Chancellor of the Calcutta University, I wish to state that the object of this Bill has my entire concurrence. In fact it was owing to my own suggestion that the question of conferring an Honorary Degree of the Calcutta University on His Royal Highness the Prince of Wales was considered by the Syndicate. It appeared to me not only to be a proper compliment to offer on behalf of the University to His Royal Highness, but also a fitting occasion upon which His Royal Highness might be brought into connection with the great educational institutions of India which have attained their highest development in Calcutta. It was a matter of surprise to me to find that there was some difficulty with respect to the power of the University to confer an Honorary Degree of this nature, and the Bill which my honourable friend, Mr. Hobhouse, has asked leave to introduce to-day, has been framed simply for the purpose of removing that difficulty.

"The reasons given by my honourable friend, Mr. Hobhouse, amply justify me in suspending the Rules for the Conduct of Business, and asking the Council to pass this Bill to-day."

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE having applied to His Excellency the President to suspend the Rules for the Conduct of Business,

The PRESIDENT declared the Rules suspended.

The Hon'ble MR. HOBHOUSE then moved that the Bill be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill be passed.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Rájá Narendra Krishna Bahádur be added to the Select Committee on the following Bills:—

To consolidate and amend the law relating to Pleaders and Mukhtárs:

To consolidate and amend the laws relating to the Procedure of the Courts of Civil Judicature.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill for constituting and regulating the Banks of Bengal, Madras and Bombay——The Hon'ble Mr. Hobhouse, the Hon'ble Sir A. J. Arbuthnot, the Hon'ble Messrs. Bullen Smith, Hope and Cowie, the Hon'ble Rájá Narendra Krishna and the mover.

The Council then adjourned to Tuesday, the 21st December 1875.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 14th December 1875.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House, on Tuesday, the 21st December 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, C. B., K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
His Highness Mahárájá Iswaríparshád Náráyan Singh Bahádur, of Benares.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna, Bahádur.

INDIAN TELEGRAPH BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill to amend the law relating to Telegraphs in India.

STAMPS AND COURT FEES BILL.

The Hon'ble MR. INGLIS moved for leave to introduce a Bill to consolidate and amend the law relating to Stamps and Court Fees. He said that the main object of this Bill was to consolidate into one compact and clearly expressed enactment the law relating to Stamps and Court Fees, which was now scattered over nine or ten Acts, a large number of notifications of the Government of India, and several decisions of the High Courts—a state of things which was necessarily productive of great inconvenience to the public. At the same time advantage had been taken to settle certain points of doubtful law, and clear up certain difficulties which had been felt in the construction of Act XVIII of 1869. He would not take up the time of the Council by making any further remarks on the present occasion, but would reserve what he had to say in explanation of the provisions of the Bill till he introduced it, if the Council would give him permission to do so.

The Motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR A. J. ARBUTHNOT moved that the Hon'ble Rájá Narendra Krishna be added to the Select Committee on the Bill to provide Reformatory and Industrial Schools. He said it seemed desirable that a Native member of the Council should be on the Committee on that Bill.

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 4th January 1876.

CALCUTTA,
The 21st December 1875.

WHITLEY STOKES,
Secretary to the Government of India,

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd DECEMBER 1875.

GENERAL REMARKS.—Scanty rain is reported from all districts in Madras except Malabar: prospects are satisfactory. No rain has fallen in the Bombay Presidency: the crops are in good condition, except the cotton in Khandesh, Belgaum and Dharwar. No rain has fallen in Berar or the Central Provinces: the rabi crops continue to promise well, but the cotton is here also below the average. In Mysore no rain has fallen except in Kolar district: the prospects of the season remain unchanged. In Central India and Rajputana the rain returns are blank and prospects good. No rain has fallen in Bengal except a slight shower in Lohardugga: prospects continue unchanged, and the rice harvest is being actively got in. No rain has fallen in the North-Western Provinces or Oudh, or in the Punjab except at Dera Ismail Khan, reports from all these provinces are good. In Assam showers have fallen: prospects are good. Reports from Burmah continue to be favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Dec. 23rd)	No rain in Masulipatam; about 0·25 in 3 talukas; none elsewhere	Two feet 9 inches water over anicut; canal supply sufficient; later dry crops sown; standing crops good; wet paddy harvested, outturn about 3ths; markets well supplied locally; prices steady; 6 deaths from cholera; 2 seizures and 2 deaths in Bander taluka; in Nuzid fever general; mild small-pox continues; cattle and foot disease general; pasture sufficient.
Kurnool (22nd)	...	No rain, except a very slight fall in Cumbum; paddy and dry crop harvest continues; white jonna wheat and Bengal gram being sown; markets well supplied; prices steady; water and pasture abundant; cholera, 9 seizures and 3 deaths; ague prevalent; cattle disease in a few villages.
Tanjore (23rd)	...	No rain at Negapatam; elsewhere very scanty and partial; rivers low; no fresh supply to tanks; water over anicuts now; cultivation of wet and dry crops in a few localities; standing crops generally good; harvest of a few wet and dry crops; yield fair; markets well supplied; prices almost steady; fever and small-pox in some parts; cholera continues, 87 seizures and 59 deaths; cattle disease in some talukas, some loss; pasture generally sufficient.
Trichinopoly (Dec. 22nd)	0·25 in Trichinopolly, none elsewhere.	Water supply beginning to fail for irrigation in Udiarpolliam taluk, sufficient elsewhere; crops good in three taluks, slightly suffering from want of rain in two dry taluks; outturn of rice and dry grains generally up to the average; markets well supplied; prices generally steady, somewhat fallen in Kulittalai; cholera has not entirely died out in the district; cattle good; pasture sufficient.
Malabar (23rd)	*Nil*	Standing crops good, but want of rain felt; markets well supplied; prices steady; bowel complaint in six taluks, 247 cases, 196 deaths; small-pox, fever, and cattle disease slight; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay— (Dec. 23rd)		
Sind. (Dec. 22nd)		
Kurrachee ...	...	Cholera in old Ghorabari, 3 cases, 1 death.
Shikarpur ...	...	No change.
Hyderabad ...	...	Weather variable and unseasonable; kharif crops begin threshed; fever bad in Hyderabad and Sakrand talukas.
Upper Sind Frontier ...	...	Weather cold; crops as before.
Guzerat.		
Ahmedabad ...	...	No change.
Surat ...	...	Rabi crops thriving; 15 cholera cases in Bulsar, 8 fatal.
Broach ...	...	Jowar being cut; crops good; fever continues; several deaths in Wagra.
Kaira ...	...	Winter crops and cotton good.
Khandesh and Nasik.		
Khandesh ...	...	Rabi prosperous; cotton crops unsatisfactory; average yield 8 annas; ague prevalent; cattle disease in Rávar Peta.
Nasik ...	...	Rabi prospects improved; fever in four talukas.
Konkan.		
Tanna ...	...	Kharif reaping completed, rabi sowing nearly so; cholera slightly prevailing in 2 villages of Wára taluka, and in 1 village of Karjat taluka.
Deccan.		
Poona ...	...	Standing rabi crops generally well.
Ahmednagar ...	...	No change.
Sholapur ...	...	No change.
Satara ...	...	Rabi crops thriving; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.* *Southern Mahratta Country.*		
Belgaum ...	...	Rabi and cotton crops good, except in Gokák, Athni and Parasgad country, where cotton crop is middling.
Dharwar ...	...	Rain and early crops as before; blight in cotton in Ránibennur; late crops generally promising; fever throughout the district; cholera in five, and cattle disease in six, talukas.
Kanara ...	...	Cultivation of second crop progressing; fever very prevalent; cholera near Goa frontier.
Kaladgi ...	...	Reaping of kharif crops not completed; rabi and cotton middling; 8 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Cholera slightly prevailing in villages under Gondal and Rajkot; rabi crops suffering from want of water in wells.
Wadhwán ...	...	Weather cool; crops good; 33 cholera cases, 12 deaths.
Baroda ...	...	Cotton crops well. *General Remarks.*—Slight cholera in Hyderabad, Sind, Surat, Tanna, Dharwar and Kanara Districts; also about Rajkot and Wadhwan; fever prevalent in Broach, Nasik, Khandesh, Dharwar and Kanara; crops good in Guzerat, Deccan and Southern Mahratta Country, except cotton, which in Khandesh, Belgaum and Dharwar is middling.
Bengal—(Dec. 23rd)		
Chittagong ...	*Nil*	Weather very hot for the season of the year; the *amun* rice crop is being cut all through the district; rain is much wanted for the cold weather crops; cholera prevails at Roajan and Futtickcherry; a few cases of small-pox reported from Puttiah.
Noakhally ...	*Nil*	Weather cold and clear; wind generally northern; mornings of the 13th and 15th were foggy; the reaping of the *amun* or late rice crops, is not yet completed, and the sowings of pulses, chillies, &c., still continue.
Chittagong Hill Tracts...	*Nil*	Weather clear and cold, with heavy dews at night; cotton is being gathered in *jooms;* mustard is coming on well, in some places it is in flower.
Hill Tipperah ...	*Nil*	Weather cloudy, and not so cold as it ought to be; the harvesting of the late rice crop continues; the average outturn is about eight annas; at Koilashur it is said to be only a six-anna crop.
Backergunge ...	*Nil*	Weather cool and fair; the Collector writes from the mofussil that, as far as he has seen, the crops are good, but insects are reported to have done much mischief within Gourmedy and Matbaria station limits, and throughout the Patooakhally sub-division; the Dowlutkhan report is fairly satisfactory; the Perozpore report not so good, but Patooakhally report is to the effect that more than one-eighth of the paddy has been destroyed by insects; cholera and fever are very prevalent just now throughout the district.
Furreedpore ...	*Nil*	Weather colder and dry; the cutting of the paddy crops is progressing; cholera is reported to be gradually disappearing.
Dacca ...	*Nil*	Weather fine, but hot; state and prospects of the crops are good; rain would do good to the crops.
Mymensingh ...	*Nil*	The weather, especially at night, is warmer than it should be at this season; state and prospects of the crops are favourable.
Tipperah ...	*Nil*	Weather cool and seasonable; the *amun* paddy is still being reaped, and outturn is expected not to exceed three-fourths of an average in the district; the winter crops promise well, but want rain; cholera is raging in some parts of the district, but not in a virulent form.
24-Pergunnahs ...	*Nil*	Weather seasonable; harvest of *amun* or late rice crop is well advanced; prospects of cold weather crops are good; cholera and fever still prevailing in the Sub-divisions of Busseerhaut, Barripore, Satkhira, and Diamond Harbour.
Jessore ...	*Nil*	Weather seasonable; the sky was clouded over for a few hours on two days, but no rain fell; cutting of *amun,* or late rice, continues. *Sursa* or mustard crop is very poor, but rain would only injure it now, though other winter crops on high lands require rain very much.
Nuddea ...	*Nil*	Weather generally cool and seasonable; days occasionally cloudy; the *amun* or late rice is nearly harvested in parts; it is poor from want of moisture. In Kooshtea, Bongong, and Chooadangah sub-divisions the *rabi* crops are suffering from want of rain; cholera is still bad in the Meherpore sub-division, and in some villages in the Sudder and Bongong sub-divisions.
Moorshedabad ...	*Nil*	Weather seasonable; price of rice stationary; *haimánti* crops are progressing favourably; fever still continuing in Sujagunge; if any change, there is a slight decrease; otherwise the general health is good.
Pubna ...	*Nil*	Weather clear and fine; state and prospects of the crops are good; cholera and fever are still prevalent.
Rajshahye ...	*Nil*	Fine clear weather, without any sign of rain approaching; cholera has almost disappeared; the cold weather crops are still thriving; the cutting of the winter rice crops is progressing rapidly; public health is generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Bogra ...	*Nil*	Weather fine, with heavy dews and cold nights; days moderately warm; all the crops are doing well; rice crop about half cut.
Maldah ...	*Nil*	Weather fair and cold, and slight fogs; the reaping of *kalai*, pulse, and *haimanti* rice continues; the outturn is very fair; *amun* or late rice is still being reaped; yield is not good; *boro* rice is being sown; eleven deaths from cholera were reported during the week.
Dinagepore ...	*Nil*	Weather fair and cold; the crops are being generally cut; a moderate outturn on all lands, of between 8 and 10 annas, is expected; five deaths from cholera in Putnitola. Single cases of cholera in Thakurgaon and Bungsibari thanas.
Rungpore ...	*Nil*	Weather fair; no change in the state and prospects of the crops; harvest is general; cold weather crops are in fair condition; cholera is abating.
Cooch Behar ...	*Nil*	Weather cold and fair; there has been no change in the prospects of the crops since last week; the outturn of the late rice crop will, it is believed, turn out to be eight annas; the prospects of tobacco continue good.
Jalpaiguri ...	...	Return not received.
Darjeeling ...	*Nil*	Very cold in the early morning and after sunset; bright and clear during the day; in the plains the winter crop has been gathered in to a great extent; the want of rain towards the end of the season will not seriously affect the district; the *kalai* and *teel* crops are ripening; in the hills the young crops of wheat and barley are progressing, but they need rain.
Midnapore ...	*Nil*	Weather cold and clear; reaping of rice crops is going on; outturn of crops is good.
Howrah ...	*Nil*	No change in the favourable condition of the weather and the crops.
Hooghly ...	*Nil*	Weather seasonable; about seven-eighths of the *amun*, or late rice crop, in the high land has been reaped; the harvest of the rice in the low land has just commenced; potatoes and winter crops are doing well; the Collector has found some potatoe plants cut off at the surface of the soil by a grub about two inches long; but it is not common enough to cause trouble; it is spoken of as having no name as yet, but as being known to cultivators.
Burdwan ...	*Nil*	Rice being harvested generally; a very fair crop; state of *rabi* crops is generally favourable; autumnal fever, small-pox, and cholera are prevalent; fever specially.
Bancoorah ...	*Nil*	Weather seasonably cool; state and prospects of the crops are good.
Beerbhoom ...	*Nil*	Weather unseasonably warm; rice is nearly off the ground; prospects of cold weather crops are good.
Sonthal Pergunnahs ...	*Nil*	Weather cool and dry, occasionally cloudy, but no rain as yet; the harvest is progressing very favourably.
Bhágalpur ...	*Nil*	*Aghani* harvest is rapidly progressing; no rise in prices; *rabi* crops are still good; general health is very good.
Monghyr ...	*Nil*	Weather seasonable; nothing new to report; the harvest is general all over the district; and the *rabi* crop so far is doing fairly.
Purneah ...	*Nil*	Weather is getting colder; mornings are very foggy; the harvesting of winter rice is progressing satisfactorily; from Dumdaha the reports are very favourable; all over the district on low lands there is a capital crop; the tobacco, mustard and barley are looking well; new rice is being exported, but not very largely, from the northern pergunnahs and from Nepal; the *kulthi* now being cut is good. The heavy due in the night makes up in some measure for the want of rain.
Darbhanga ...	*Nil*	Weather cold and dry, but sometimes a little cloudy; the paddy crop is everywhere being harvested; in Tajpore it is producing from six to eight annas and in Darbhanga about eight annas; the *rabi* crops are much in need of rain; no alteration in the state and prospects of the crops since last report.
Mozufferpore ...	*Nil*	Weather cold; the Collector, who is on tour in Seetamurhee sub-division, is now satisfied that the average outturn of the rice crop has been only five annas throughout the sub-division; the greater portion of the crop has been cut; the *rabi* crops generally are very backward, and where irrigation is not possible, the crops are getting very thin; the *kulthi* pulse in some places has been injured by caterpillars; *rahur* generally is still very good; prices are nearly stationary, and, contrary to the practice of past years at this season (including 1873) little or no rice is being exported from the sub-division; small quantities of grain are stealthily imported from Nepal, where the order prohibiting exportation remains in force; prospects of Hajeepore and Sudder sub-division are unchanged.
Sarun ...	*Nil*	Weather clear and cold; west wind prevailing; the harvest of *aghani*, or late rice, is almost completed, and the new rice has come into the market in small quantities; the prospects of the *rabi* or cold weather crops continue excellent, but rain is still wanted for their growth; in some places they are being irrigated; poppy plant is everywhere forward, and is looking very well; prices have slightly fallen; general health is good.
Chumparun ...	*Nil*	Weather cool; no rain; the late rice has almost been harvested, and the outturn will be as bad as reported before; rain is very much wanted for the growth of the *rabi* crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Patna ...	*Nil*	All signs of rain have disappeared; the days are bright and clear, and the mornings and evenings are exceedingly cold; no change in the prospects of the crops since last report, *i. e.*, the rice crop is now being reaped, and the Collector does not think on the whole it will be a bad one; the prospects of the *rabi* crops are fair, but of course would be benefited by rain; health of the district continues good.
Gya ...	*Nil*	Weather fine and cool; thermometer reached 76° 4'; rice crop is being cut; the outturn is expected to be as before, *i. e.*, 8, 10, to 12 annas; prospects of *rabi* are good, but want of water is still felt public health is good.
Shahabad ...	*Nil*	Weather bright and cold; no change in the state and prospects of the crops since last report; *rabi* crops continue to promise well; paddy crop is being harvested; rain is much wanted; health of the district is good.
Hazaribagh ...	*Nil*	Weather colder and more seasonable; no change in the state and prospects of the crops since last report, *i. e.*, the condition of the crops remains the same, but would be greatly benefited by rain, which still holds off; the outturn of the paddy, which has now been reaped, is reported to be better than was expected; all indications of rain have disappeared.
Lohardugga ...	*Nil*	Slight rain fell during one day to the south of the district; the rice crop has been harvested, and the outturn has been excellent; rain is much wanted for the rabi crops, particularly in the Palamow sub-division; general health is good.
Maunbhoom ...	*Nil*	The weather has for some time past been too dry; state and prospects of the crops are favourable.
Singhbhoom ...	*Nil*	Weather seasonable; state and prospects of the crops are favourable; fever is still prevailing.
Balasore ...	*Nil*	Weather set fine, the clouds of the last week having cleared off; more than half the rice harvest is completed, and the yield has realized favourable expectations; cases of cholera are still very frequent and very fatal; this disease has caused much mortality in this season.
Cuttack ...	*Nil*	Weather cold and a little windy; early *sarud* crops are reaped with good outturn; cutting of late *sarud* crop has commenced; winter crops are flowering with good prospects.
Pooree ...	*Nil*	Weather seasonable; the *laghu*, or the first late rice, is being gathered. The *sarud*, or main late rice, is now fully ripe; the ryots have commenced to reap it; the mustard, *urhur*, *kalai*, *moong* and *kulthi* pulses, and other winter crops are progressing well; in Khoordah the harvesting of the rice crop is going on; winter crops are progressing; cholera still lingers in different parts of the sub-division.
General Remarks.—No rainfall is reported from any of the districts for the week under review except a very slight fall in the south of the Lohardugga district. The state and prospects of the crops have undergone no change since last week. The winter crops are generally progressing well but little rain would improve on them. The harvesting of the main rice crop is progressing.		
N. W. Provinces—		
Benares (Dec. 22nd)	...	No change; prospects good.
Allahabad „	...	No change.
Jhansi (23rd)	*Nil*	Jowar all cut; outturn poor in Garotha, average in other Parganas rabi looks well.
Agra (22nd)	*Nil*	Rabi prospects specially favourable.
Meerut „	*Nil*	Prospects good.
Bareilly „	...	Rain wanted.
Almora (20th)	...	Weather fair with heavy dews and frosts.
Punjab—		
(Dec. 23rd)	...	No rain during the week, save slight showers at Dera Ismail Khán; rabi crops doing well everywhere; slight fever prevails in Peshawár and Jullundur, otherwise public health good.
Oudh—		
Lucknow (Dec. 22nd)	*Nil*	Prospects continue favourable and public health good.
Sitapur „	*Nil*	
Fyzabad ...	*Nil*	
Central Provinces—		
Upper Godavari (Dec. 18th)	...	Prospects favourable; fever prevalent; prices fluctuating.
Sambalpur ...	...	Harvest nearly completed; fever prevalent.
Bilaspur ...	...	Prospects favourable; fever prevalent; prices falling.
Raipur ...	...	Kharif harvest completed; rabi good; prices easy.
Chanda (Dec. 19th)	...	Weather cloudy; pulses slightly damaged by cloudy weather; fever and cattle disease continue.
Balaghât (20th)	...	Kharif threshing continues; fever prevalent; prices falling.
Betul ...	...	Kharif harvest completed; rabi looks well; health good; prices stationary.
Bhandara (Dec. 21st)	...	Rabi promising; cholera abating; fever prevalent; prices easy.
Nagpur (22nd)	...	Prospects good; fever and cattle disease prevalent.
Wardha ...	...	Rabi promising; picking of cotton and cutting of jowar completed; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Prov.—*continued.*		
Nimar ...	...	Weather cool; cholera continues; prices stationary.
Hoshangabad ...	...	Rabi promising.
Narsinghpur ...	...	Prospects of rabi favourable.
Jubbulpore ...	...	Rabi good.
Saugor ...	...	Rabi good; prices stationary.
Seoni ...	...	Kharif threshing completed; rabi promising; health good; prices stationary.
Damoh ... } Mandla ... }	...	Prospects favourable; health good; prices stationary.
		General Remarks.—Prospects fairly good; cotton crop below average, and jowari light, but rabi crops promise well.
Assam—		
Gauhati (Dec. 23rd)	0·61	Raw, misty mornings; days cold, often overcast; rain storm on night of 21st; salee being reaped; prospects of other crops and tea favourable; public health good.
Sylhet „	0·22	Reaping continues; market steady.
Mysore and Coorg—		
(Dec. 23rd) ...	...	No rain, except in Kolar District, where 1·8 inches fell; prospects of the season remain unchanged from last week; cholera has ceased in Bangalore, but continues sporadically in the districts.
Hyderabad Assigned Districts—(Dec. 23rd)		
Umraoti ...	...	Jowari cutting continued; rabi progressing fairly.
Harowtee States—		
Bhurtpore (Dec. 23rd)	...	No change; prospects continue satisfactory.
Ajmere „	*Nil*	Health and prospects good.
Jeypore „	...	Agricultural prospects favourable; weather seasonable; health good.
Central India—		
Indore (Dec. 22nd)	... }	
Gwalior „	... }	
Neemuch „	... }	**Season favourable; health and agricultural prospects good.**
Rutlam „	... }	
Sutna „	... }	
B. Burma—(Dec. 23rd)		
Arrakan Division ...	...	Public health good; outturn of crops expected to be light.
Pegu Division.		
Rangoon	...	Crops very good; except where damaged by floods; slight fever prevalent; cholera in Pegu and part of Twantay townships; cattle disease declining.
Bassein	...	Cholera in town; cattle disease continues.
Henzada	...	Crops and health good.
Prome	...	Mild small-pox at Shwedoung; health good otherwise; harvest progressing.
Thayetmyo	...	Health good; harvest plentiful.
Tenasserim Division ...	...	Health good, except cholera in Shwegyen; crops favourable; cattle disease still prevalent in portion of Amherst.

EXTRA SUPPLEMENT TO

The Gazette of India.

CALCUTTA, FRIDAY, FEBRUARY 26, 1875. { Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE SCARCITY OF 1873-74.

***EXTRACT** from the Proceedings of the Government of India in the Department of Revenue, Agriculture and Commerce, Nos.* $\frac{1}{89-71}$, *dated the* 18*th February* 1875.

READ—

Letter from the Government of Bengal, of the 24th November 1874, submitting copies of two Minutes regarding the services of Government Officers, and of non-official residents, during the recent scarcity in Bengal and Behar (published in Special Supplement to *Calcutta Gazette* of 28th December 1874).

Letter from the Government of Bengal, of the 8th December 1874, submitting copies of a Minute recorded by the Lieutenant-Governor of Bengal on the scarcity in Bengal and Behar during 1873-74, and the measures taken to alleviate the distress caused by it.

Letters from the Government of the North-Western Provinces, of the 1st, 11th, and 29th of January 1875, forwarding reports on the scarcity of 1873-74 in certain districts of the North-Western Provinces, with a brief narrative of the scarcity so far as it affected those Provinces, and the remarks of the Lieutenant-Governor on the conduct of the civil officers engaged in relief operations. (The letter of January 29th will be published in a separate volume).

Letter from the Government of the North-Western Provinces, of the 11th of February 1875, forwarding the report of the Central Famine Relief Committee, North-Western Provinces.

Letter from the Chief Commissioner of Oudh, of the 16th October 1874, submitting a copy of a letter, with enclosures, from the Commissioner of the Fyzabad Division, together with a summary of the measures taken in the northern parts of the Province of Oudh in order to avert famine. (The letter from the Commissioner of Fyzabad, with the enclosures, will be published in a separate volume).

Preliminary report by Lieutenant-Colonel C. M. MacGregor, Director of Transport, of the 19th of October 1874, on the operations of the Transport Department in Behar (published in the *Gazette of India* of 19th December 1874).

Report by Lieutenant-Colonel F. S. Taylor, R. E., Consulting Engineer to Government for Guaranteed Railways, of the 23rd December 1874, on the traffic operations of the East Indian Railway in 1873-74.

Reports by Major J. Graham, on special duty, of the 1st of August 1874 and 4th of February 1875, on the arrangements made for the receipt, despatch, and sale of Government rice in Calcutta.

Statement showing the quantity of rice (distinguishing table and other kinds), paddy, wheat, gram, and other food-grains exported from the Presidency of Bengal in the 12 months from 1st October to 30th September of the years 1872-73 and 1873-74.

1. The Governor General in Council has read, with all the attention which the importance of the subject deserves, the Minutes of the Lieutenant-Governor of Bengal, the narrative received from the Lieutenant-Governor of the North-Western Provinces, and the letter of the Chief Commissioner of Oudh, giving an account of the measures adopted in consequence of the failure of the winter crop of 1873-74.

2. Sir Richard Temple, in the Minute which he has recorded on the scarcity in Bengal and Behar and the measures taken to alleviate the distress caused by it, has given a clear and full account of the origin of the scarcity, of the manner in which it declared itself, of the general plan of operations, of the measures which were adopted, and of their result. On all these subjects Sir Richard Temple's excellent narrative conveys full and accurate information, and nothing need be added by the Government of India in regard to the history of those transactions.

3. The reports received from the Lieutenant-Governor of the North-Western Provinces and from the Chief Commissioner of Oudh show that the distress in those Provinces was limited in extent, and much less severe than in Bengal and Behar. The observations of the Government of India upon these reports will be separately communicated to the Governments concerned.

4. On November the 7th, 1873, the Secretary of State was informed that "Her Majesty's Government might rely upon the Government of India "using every available means, at whatever cost, to prevent, as far as they "could, any loss of the lives of Her Majesty's subjects in consequence of the "calamity which threatened Bengal." The result has shown that the resources of the country and the energy of those who were entrusted with the conduct of the relief operations have been sufficient, by the blessing of God, to secure success.

5. The measures that have been taken have not only prevented the extensive mortality which must otherwise have occurred, but the general productive power of the country has not been allowed to deteriorate, and there is no reason to believe that any demoralization has followed from the relief operations. The strongest assurances of the gratitude of the people have been received, and it may confidently be expected that the assistance which has been given by the State during a time of calamity will be long remembered and appreciated, not only on the scene of the distress, but throughout the whole of Her Majesty's Indian Empire.

6. The cost of the relief operations cannot as yet be accurately stated; but it may safely be assumed that the total net cost will not exceed the sum of £6,500,000, which was the estimate given in the Budget for the current year.

7. Without further reference, excepting incidentally and by way of illustration, to the history of the past year, it may be profitable to put on record, while the recollection of the circumstances is fresh, some general observations which may serve for future guidance.

8. The Resolution of the Government of India, of the 7th of November 1873, which was mainly founded upon the experience of previous famines in India, embraces the chief subjects upon which general instructions appear to be required at the beginning of a period of scarcity.

9. Recent experience has shown, however, that greater attention should be directed, as soon as the certainty of a serious failure of one of the principal

grain crops has been ascertained, to obtain at once complete reports of its extent, and of the probable consequences upon the food-supply of the people. The admirable series of Minutes written by Sir Richard Temple, when he was deputed to visit the distressed districts, will serve as a model for such reports. The general accuracy of the data supplied to Sir Richard Temple by the Local Officers is remarkable, and illustrates the value of the information which can thus be obtained.

10. The anticipation of the effects of the scarcity was found to be somewhat greater than the reality from two causes. The stock of food in the hands of the people turned out to be larger than was anticipated; and sufficient allowance was not made for the extraordinary exertions which were used by the cultivators to grow a greater quantity than usual of the grain crops which ripen in the autumn. It was impossible to reckon beforehand upon either of these circumstances; but the experience that has now been gained shows, *first*, that where a scarcity follows a fair season, considerable supplies of food will probably be in the possession of the people, and, therefore, sufficient time may be reckoned upon for the purpose of organizing the relief which may ultimately be required; and, *secondly*, that the cultivators of the soil in India are able and willing to make considerable alterations in their agriculture for the sake of increasing the food-supply at the earliest possible moment, by which means the period over which the scarcity would otherwise extend is considerably shortened. The outturn of the autumn crops of 1874 was further increased by the unusual quantity of rain that fell early in the season.

11. It is also important that early assistance should be given, without any hesitation, to the Officers who are employed in districts where the scarcity is known to be imminent, so that they may be left free to move constantly through their districts and to watch the progress of events. Thus accurate information will be secured from the first of the area which is likely to be most severely afflicted, and relief operations may be adjusted accordingly. The critical position of a part of Tirhoot at an early period of the scarcity of last year is mainly to be attributed to the weakness of the staff. This deficiency was promptly supplied, but the lesson should not be forgotten.

12. The experience of former famines with respect to the advantage of opening public works, especially at an early stage of the distress, has been fully confirmed. Large works should be opened at once, smaller local works subsequently, as the necessity for them arises. There should be no hesitation in providing sufficient superintendence. When the distress becomes extensive, it is essential that employment should be available near the usual homes of the people. Sir Richard Temple has justly observed that where very large numbers have to be employed upon public works, piece-work is preferable to other methods for their payment.

13. In dealing with the most distressed districts, it was found that the tests of cooked food and of poor-houses were inapplicable. Such tests can be usefully applied only where the distress is less severe and extensive, and where there is reason to suppose that improper advantage is being taken of the relief offered.

14. Where distress is not great, and where, although it may be great, there is no serious deficiency in the supply of food, relief works, the distribution of gratuitous relief under proper precautions, and advances of money upon sufficient security, will be found (as was the case in the North-Western Provinces, in part of Oudh, and in considerable portions of Bengal) to be sufficient. It is only where there is a great deficiency—and there is also good reason to believe that the traders will be unable to meet that deficiency—that it is right for the State to intervene for the purpose of supplementing the general food-supply. Under such circumstances, however, this is the only means whereby a dearth of food can be prevented; and, during the past year, there can be no reasonable doubt that the measure was imperatively required

in order to prevent a very great mortality. The principal reason of this necessity was the absence of sufficient means of transport by railway or canal. The river communication was but of little use at the time of year when supplies were required, and the carts of the country were not available for ordinary traders in any quantities, and could only be brought out in sufficient numbers by means of an organization which was quite beyond the power of private individuals. As railway communication is extended, the probability of Government being called upon to interfere in this manner with the functions of trade will diminish.

15. The operations for the supply of food by Government on a large scale were novel. The difficulty experienced at first was to arrange that the supplies should reach the people who required them. In fact the Government had, for the time, to fulfil the functions of both wholesale and retail dealers. Every available channel of distribution had to be brought into play. Sir Richard Temple has fully described the method which was adopted. Dealers in grain were assisted in prosecuting their business, which must otherwise have ceased to exist. Advances of grain were freely made to cultivators for the purpose of enabling them to support themselves and to till their land until the next crop should be gathered. This measure was in entire accordance with the customs of the country, and proved very successful.

16. The Lieutenant-Governor of Bengal will be requested to cause the returns which have been received from the Local Officers to be carefully analysed and condensed for the purpose of exhibiting the extent of the failure of the crops in different parts of the country, as compared with the number of people who have been relieved by the State or who have been supported by food imported by the State. In Durbhunga and Mudhobunee, the two sub-divisions of North Tirhoot where the failure of the rice crop was most complete, half of the population was supported for about four months by food imported by the State. It is therefore unlikely that in the event of any failure of crops which is not prolonged for more than one year Government can have to supply a larger quantity of food than would be sufficient to support for about two months the whole population of the area most severely visited. This calculation, however, and others which are likely to be valuable hereafter, will be elaborated by the Government of Bengal.

17. The stores laid in by the State were not brought into the market until the deficiency of supplies in the local markets proved the necessity of doing so. Up to that time they were only used for the benefit of the people who were collected upon the Government works. When sales to the public were authorized, the price was determined by the principle which was adopted during the Irish famine. This principle was that the price should be regulated by that which prevailed at the nearest large mart situated upon one of the main lines of communication, some addition being made to cover the cost of carriage to the place of sale. It was found in Ireland that, under the operation of this principle, the inconvenience attending an interference with trade was reduced to a minimum, because as soon as traders were able to obtain supplies they could resume their business, and the Government could withdraw from the field, without any serious disturbance of prices. The same result was found to follow in Bengal. Moreover, the supplies of grain provided by Government consisted mainly of Burmese rice, to which the people were not accustomed, and which could not compete upon equal terms with Bengal rice when the latter again appeared in the market. It is remarkable that throughout the whole of these operations no complaints came from traders on the spot that they were injured by the action of Government. On the contrary, Sir Richard Temple received assurances from them of their entire concurrence, and he had to refuse applications for an extension of the sales by Government, a compliance with which rightly appeared to him to be contrary to the principle, which had been laid down from the first, that unnecessary interference with trade should be avoided.

18. It will be seen from Sir Richard Temple's Minute that a balance of about 100,000 tons of rice remained after the relief operations had been concluded. To this extent the measures taken have been in excess of the requirements of the case. The responsibility for this excess rests entirely with the Government of India. Having to deal with so vast a population, whose support depended upon many uncertain contingencies, it would have been imprudent not to have been prepared to meet larger demands than those which were actually made upon the Government. If a substantial reserve had not been provided, the success of the relief operations would properly have been attributed rather to good fortune than to foresight. The experience of last year shows the necessity of such a reserve. In the beginning of September 1874 very great apprehensions were felt that the scarcity would be prolonged. This was only averted by a fall of rain at the very last moment when it could have been of use to allow the winter crops to be sown; and, if the rain had not then fallen, the rice in reserve would have been urgently required. It must not be forgotten that on previous occasions it has occurred that a second year of drought has followed the first.

19. The food-supplies of India, including British Burma, proved amply sufficient to meet the demand occasioned by the failure of the rice crop. Out of the total quantity of grain purchased by the Government, which amounted to 479,696 tons, only 54,300 tons were obtained from beyond British India. The rice exported from British Burma in the year 1874 amounted to about 815,000 tons. Of this quantity about 290,000 tons were sent to Bengal, and about 470,000 tons to Europe,—the exports to Europe having been only 33,000 tons less than in the previous year. The import of food-grains by railway from the North-Western Provinces and the Punjab is calculated by Lieutenant-Colonel Taylor to have amounted to 289,000 tons. This large export from Upper India did not greatly affect prices in the producing districts. The total quantity of food-grain carried into the distressed districts can hardly have been much less than 1,000,000 tons.

20. Great advantage was derived from the arrangement made to reduce at once the rates for the carriage of grain by railway, the difference being paid to the Railway Companies by the Government. The effect of this measure was to stimulate the importation of grain by railway into the distressed districts; but, owing to the great distances to be traversed and the necessity to traders of quick conveyance in order to secure the profit offered by the rise of prices, this advantage given to the railways did not materially injure the river trade, which is slow, and, moving in regular course, does not readily adapt itself to a sudden demand.

21. The statistics of the foreign trade in food-grain for the year show that the reasons for which Government determined not to prohibit the export of food-grain, either in whole or in part, were sound. Notwithstanding the home demand, the exports of food-grain from India, including British Burma, were considerable. The return of the quantities of food-grains exported by sea from Bengal during the year ending on September 30th, 1874, shows that the exports were diminished by about one-half owing to the rise of prices. The exports of rice fell from 410,712 tons in 1872-73 to 217,355 tons in 1873-74, of which 121,065 tons were sent to the Colonies and other places to which Natives of India have emigrated, and where, according to official representations which have been received in the course of the year, great evils must have resulted if the usual sources of supply had been suddenly interfered with. Of the remainder, 29,968 tons consisted of the finer descriptions of rice, which are not consumed by the poorer classes. The residue only amounted to 66,332 tons, and thus no bad effects can have followed from an adherence to sound principles, while the foreign trade has been preserved from a shock from which it might not have easily recovered.

22. Some representations were made, urging interference with the distribution of grain between different parts of Bengal. All action, direct or indirect, in this direction was prohibited, and the result of leaving supplies to be adjusted according to the demand has been that prices were equalised in a remarkable manner throughout the whole of Bengal: the effects of the scarcity were thus spread over a large area, and, therefore, were less severely felt in those parts which otherwise would have been most seriously affected. The only exception to this was in Orissa, where, probably owing to the deficiency of the means of communication, the price of rice was, during the whole period, very much lower than elsewhere, notwithstanding a considerable export.

23. The supplies purchased by Government were drawn mainly from sources at a distance from the scene of the scarcity. It was found better to buy by private arrangement with merchants, rather than that the Government should appear openly in the market. The limited experiments made in the latter direction showed that the public action of the Government produced an effect upon prices quite out of proportion to the actual amount of the transactions.

24. The facility with which large supplies of rice were imported from British Burma without any excessive rise of freights proved the value of the arrangements made with the British India Steam Navigation Company whose ships were largely engaged in the operation, as well as the great resources for purposes of transport which are afforded by the magnificent mercantile steam fleet trading to Calcutta. It was also satisfactory to find that the private firm which took the contract for landing the rice in Calcutta were able to carry through a business of considerable difficulty without any check from first to last. The traffic arrangements of the East Indian Railway Company showed the power of the Company to meet the strain of a very large additional traffic within a limited time. It is not too much to say that the relief operations could not have been successful, had it not been for the trunk line of railway which, passing through Behar, unites Calcutta with the Punjab. An additional proof has thus been afforded of the wisdom of the measures for railway construction in India which were commenced by the Marquis of Dalhousie, and have since been steadily prosecuted.

25. The manner in which the grain was conveyed from the railways to the places where it was required has afforded a remarkable instance of the great resources of the country in wheeled conveyance, and of the facility with which they may be brought to bear by the offer of profitable rates of hire. The Government of India entirely approved of the contracts made, at Sir Richard Temple's recommendation, for the transport of rice to North Behar. The cost was great, but the danger was not exaggerated. The immediate superintendence of the transport, when it assumed its full dimensions, was entrusted to Officers of the Army, and the manner in which this duty was performed shows the confidence which may be placed in the efficiency with which such transport would, if necessary, be brought to bear upon military operations.

26. The vast business of distributing relief was most successfully carried on by minutely sub-dividing the country to be dealt with in accordance with its requirements, maintaining the same organization throughout, and leaving great discretion to the Officers in local charge, after the main principles by which they were to be guided were laid down. In carrying out this work, Sir Richard Temple reports that the services of the Native Officers of the Army were found to be particularly useful.

27. The Central Relief Committee, who undertook the duty of distributing the subscriptions which were raised in India and elsewhere for

the relief of the sufferers from the scarcity, have not yet closed their accounts; but their reports, published from time to time, show that the appeal which was made to the liberality of the public has been promptly and liberally answered. The Secretary of State has already taken occasion to express to the Lord Mayor of London the value which is attached by the Government of India to the sympathy exhibited by the people of England towards the sufferers in India, not only on account of the material help which has been afforded, but also because its effect has been to strengthen the bonds of union between Her Majesty's subjects in England and in India. The Princes and Chiefs of India have distinguished themselves by the alacrity with which they have contributed; and liberal subscriptions have been received from all parts of British India, especially from Zemindars and landholders in the distressed districts. The Government of India are satisfied that the assistance which has been bestowed is gratefully acknowledged by those who have benefitted by it, and they desire to take this opportunity of expressing the sincere thanks of the people to all those who have generously contributed to the Famine Relief Fund.

28. The Government of India have already from time to time expressed their approbation of the conduct of some of the Officers of Government and others who have been engaged in the relief operations. The services rendered by Sir George Campbell during the time that he held the office of Lieutenant-Governor of Bengal were acknowledged in April last. The thanks of the Government of India have been conveyed to Mr. Ashley Eden, the Chief Commissioner of British Burma, for the able and successful manner in which the purchases of rice were made under his directions. The Viceroy has taken advantage of the opportunity of addresses which have been presented to him during his visit to Behar and in Calcutta to convey the thanks of the Government of India to the Zemindars and other gentlemen who have rendered active and valuable aid to their neighbours and fellow-countrymen. The Government of India now desire to express their entire concurrence with the Minutes published by Sir Richard Temple, in which he has tendered, in suitable terms, the thanks of the Government of Bengal to the Commissioners and other Officers of Government, civil and military, as well as to the Zemindars and all others who have assisted in different capacities during the time of scarcity. The Lieutenant-Governor of the North-Western Provinces and the Chief Commissioner of Oudh have been requested to accept themselves, and to convey to those who have done good service in those Provinces, the thanks of the Government of India.

29. Early in the month of March of last year, when the pressure of the distress had begun to be felt, but the power to deal with it successfully had not yet been proved, the Government of India expressed their confidence that the Officers engaged upon the relief operations "would perform the "arduous task imposed upon them with the zeal, ability, and self-sacrifice "which had always distinguished the servants of the Crown and of the "East India Company in times of difficulty and danger." This confidence has been entirely justified by the result, and another signal proof of the high qualities of the Civil and Military Services has been afforded by the manner in which their duty has been performed during the past year. His Excellency the Commander-in-Chief, who has given every assistance in his power to the Government of Bengal, will be requested to convey to those Officers, Non-commissioned Officers, and Men under His Excellency's command who have been employed in the distressed districts the thanks which Sir Richard Temple has expressed in his Minute of the 24th of November. Similar communications will be made through the proper channels to those who are serving under Local Governments or Departments.

30. The Government of India desire, in conclusion, to convey to Sir Richard Temple their recognition of the distinguished services which he has rendered to the people of Bengal and Behar during the time of difficulty through which the Province has passed. As a Member of the Council of the Governor General, Sir Richard Temple was from the first intimately associated with the policy adopted by the Government of India in respect to the scarcity. He took a prominent part in carrying that policy into effect under Sir George Campbell's administration; and, since he assumed the office of Lieutenant-Governor of Bengal in April last, he has unremittingly devoted himself to the personal direction and superintendence of the relief operations, which owe their complete success mainly to his exertions.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Government of Bengal, and to the Local Governments and Administrations noted in the margin.

Madras.	Central Provinces.
Bombay.	Burma.
N. W. Provinces.	Mysore and Coorg.
Punjab.	Ajmere.
Oudh.	Assam.

Ordered also, that the Resolution be published in the *Gazette of India*.

MINUTE

BY

THE HON'BLE SIR RICHARD TEMPLE, K.C.S.I.,

LIEUTENANT-GOVERNOR OF BENGAL,

Dated the 31st October 1874.

PREFACE.

The letter of the 3rd October 1874 from the Government of India conveyed a request that a general report on the famine in Bengal and Behar during 1874 may be prepared by the Government of Bengal at the end of October of this year (1874), or as soon after as may be conveniently practicable. In compliance with this request, I make the following report.

The subject seems to me to divide itself into six parts, which will be treated of in successive chapters, namely,—

1*st*.—The origin and manifestation of the calamtiy; the principles on which the Government determined to meet it; the general plan of operations; and the preliminary instructions issued for that end.

2*nd*.—The measures adopted in detail for carrying those principles and instructions into effect according to the development of affairs.

3*rd*.—The statistics of the estimated extent and character of the calamity, and of the means employed by the Government to avert the consequences, together with the estimated expense of the undertaking.

4*th*.—The progress of the relief operations from the setting in of the famine to its culminating point, the actual result being compared with the estimate.

5*th*.—The gradual decline of the famine until its ultimate extinction, and the diminution of the relief operations until their cessation.

6*th*.—General considerations relating to the circumstances described in the previous chapters.

CHAPTER I.

THE cause of the events which occurred in 1874 must be sought for in the scantiness of the rains in 1873 throughout Bengal and Behar. This cause did not operate in Orissa, which consequently escaped misfortune.

In Bengal and Behar, after a season of extraordinary heat during May and June of 1873, the rain did not begin till late, that is in July, and even then was scanty. It lasted more or less, but never abundantly, till the end of August, when it for the most part ceased prematurely. Enough had, however, fallen to secure a fair yield of the crops which are reaped in August and September. Little or none fell during the months of September, October, and November, that is during the whole autumnal season, when heavy showers are indispensable for insuring the maturity of the rice crop of December (the most important of all the crops), and for sowing the crops which are to be reaped in the following spring. As experience shewed that the consequences of drought are sometimes averted by rain even at the last moment, hope was not abandoned till the end of October. Not till then could it be seen whether the apprehension of failure of the crops would be realised or not. By that time, however, it became certain that widespread and heavy loss must occur in the December crops; that the sowing of the spring crop must be short; and that the germinating and growing of what had been sown must be jeopardised. The injury to the December rice harvest was almost irreparable. The injury to the young spring crops might yet be repaired, if rain should fall between the end of December and the beginning of February. Fear was chiefly felt for Behar and for the north part of Bengal, but largely also for all the rest of Bengal—save the eastern part in the basin of the Brahmapootra, and the deltaic region in the south which depends on inundation rather than on rainfall.

On the other hand, it had been ascertained that the September rice crop of Bengal and the August maize and coarser grains of Behar had produced an average yield, sufficient to sustain the people till at least the middle of winter.

Early in October the Lieutenant-Governor of Bengal, Sir George Campbell, had expressed his fear that the drought of September must cause serious scarcity, and had instituted inquiries in every district regarding the actual outturn of the autumn food crops and the apparent promise of the winter crops. On the 22nd October he reported to the Government of India that, owing to the shortness and early cessation of the rains, there was the gravest apprehension of general scarcity throughout the country, and of worse evils in some parts of Behar and north Bengal.

On the 7th November the Governor-General (who had proceeded to Calcutta,) issued a resolution in which the fundamental principles for dealing with the threatened calamity were embodied, namely,—that in circumstances where numbers of persons may be exposed to danger of starvation or to disease from want of food, the Government and its officers should do their utmost to apply the most effectual remedy that might be practicable,—that interference with the trade in grain should be avoided, so far and so long as such avoidance might be possible,—that the Government should afford some facilities for the transport of grain to distressed territories through the energy and enterprise of traders, such

as the reduction of rates on the guaranteed railways,—that public works both imperial and local should be commenced or prosecuted with a view of giving employment to those who might need it,—that wages to the people thus employed should be paid in food-grain wherever desirable or convenient,—that accordingly supplies of food grain should be purchased and laid in by Government,—that the undertaking of public improvements by corporations or other bodies, and of agricultural improvements by individuals, should be encouraged by loans from the public treasury,—that advances of money should be made by Government to private gentlemen, European and Native, who would undertake to import grain from a distance and distribute it at prices to be regulated according to the circumstances of the case,—that wherever and whenever the distress might become severe, the Government should assist in the organisation of a system of relief,—that a central committee should be formed for administering the funds for relief received from private sources, and also if required, the funds received from Government,—that relief committees should be established in the interior of the districts to distribute assistance to the distressed in cash or grain, or prepared food,—that co-operation for the work of relief should be afforded by the commissariat, the medical department, and other branches of the public service,—that emigration from the populous tracts visited or threatened by distress should be encouraged by the Government,—that as the season progressed, advances of money for purchase of seed-grain should be made by the Government to landlords or tenants,—that periodically at short intervals information should be published regarding the state and prospects of the crops, the stock of food, the public works in progress, the relief operations, and all other circumstances relating to the scarcity.

The Lieutenant-Governor of Bengal, who had, during the last days of October, visited the Patna and Bhagulpore divisions, proceeded to give effect to these principles by notifying the tracts in which failure of crops had occurred and scarcity of different degrees was expected; by removing tolls from ferries and roads along the chief routes for grain transport; by issuing instructions to help *bonâ fide* importers of grain with loans of money without interest; by directing the immediate commencement of a number of relief works and the completion of preliminaries for many more; by intimating that wages to labourers might begin to be paid in grain whenever the local price of grain reached something like famine rates; by ordering store-houses for Government grain to be at once constructed on all the chief works; by effecting locally, in the less distressed parts of Bengal, moderate purchases of grain; by despatching the grain so purchased by railway to the distressed districts and so drawing out the means of local transport; by organising and testing the strength of local carriage of the country (mostly bullock carts but partly river boats), and choosing the best routes for transport of Government grain; by prescribing the selection of sites for granaries, relief-houses and relief committees suited to meet different grades of distress; by giving a large money credit from which local officers might make advances to persons who would undertake useful works for embankment, drainage, water-supply and other local improvements; by granting special concessions and privileges to persons who might take such advances; by sanctioning the organisation of such establishments, and preparation of such appliances, as might be required for the transport and custody of grain, for relief works, or for the distribution of charitable relief; and by defining the points on which local officers were to furnish fortnightly reports on the condition of the districts and the people under their care.

The Government of India authorised the vigorous prosecution, under the orders of the Government of Bengal, of the works of the Soane canal and its branches; the construction of embankments on either side of the river Gunduk; the commencement of the Northern Bengal State Railway—all which works would afford employment to those in need.

The opinion of the Government regarding the probable severity of the distress was based mainly on the reports of the local officers, who had made

careful inquiries throughout their districts. But there were not wanting indications that the people themselves, and especially the more intelligent landholders and residents in the interior of the country, had the gravest fears in respect to the impending crisis. The British Indian Association of Calcutta, a society which is mainly composed of the zemindars and landholders of Bengal, early in December represented to the Government their expectation that the famine of 1874 would be more severe and general than the famine of 1866; that special organisation would be required to bring relief to respectable villagers who would not beg and could not work; and that, if the worst came, the task of feeding sixty millions of people might, as an extreme possibility, devolve on the Government. Looking to the position of the Association and their sources of information, the Government deemed their opinion entitled to weight, and invited a fuller statement of the grounds for that opinion. The Association replied on the 24th December by submitting a valuable essay, stating the facts as they believed them to be, offering a full estimate of the position apparently warranted by those facts, and comparing in detail the prospects of the country in December 1865 with the prospects in December 1873. The Association's statement of facts coincided closely with the official reports already before the Government and the public. The important inferences which they drew were that the outturn of the food crops of 1873-74 over the whole of Bengal could hardly exceed two-fifths of the yield of an average year; that the stocks in the hands of the people, together with the December and April crops, would only suffice for six months' consumption for the whole of Bengal; and that widespread suffering and starvation could "be averted only by pouring in "grain into the country sufficient, at any rate, for a three months' supply." The Association contemplated three months' supply for the sixty millions of souls in Bengal outside Assam and Orissa—or, in other words, the importation of 3,750,000 tons of grain. This extreme demand (practically beyond the possibility of supply) was doubtless meant to be hypothetical. But the representations made by the Association show that the most intelligent and the best informed among the native landholders apprehended a calamitous famine unless the Government should step in to help or save the people.

In view of preventing any diminution of the general food-supply of the country, the Government of Bengal proposed that the exportation of food-grains should be prohibited. The Government of India did not accede to this proposal, believing that the supposed advantages of the measure were uncertain, while its disadvantages were certain and serious.

There was a good hope that supplies of food would be sent in ordinary course of trade to central and northern Bengal and to Behar from Orissa, from Chittagong, and especially from the district of Backergunge, which comprises the combined delta of the Ganges and the Brahmapootra, which ordinarily has a large surplus of rice for exportation, and which had providentially not suffered at all from drought,—and from parts of northern, north-western, and central India. As to northern India, there seemed to be justification for this hope, notwithstanding that those portions of the North-Western Provinces and of Oude which adjoin Behar were also suffering from drought, though in a much less degree than Behar itself. In order to encourage and facilitate the transport of grain to Behar and Bengal from other parts of India, the guaranteed railway companies were authorised to reduce by one-half the rates on the carriage of grain, the loss to be made up by the Government.

As regards the grain to be supplied by the State, it was decided that, while purchases to a limited amount (50,000 tons) might be made in Bengal itself, and in the North-Western Provinces by order of the Government of Bengal, all further State requirements must be met by purchases beyond the limits of the failure of the crops in Bengal and Behar, principally in the Madras Presidency, in British Burmah, in Saigon, in Chittagong, made under the direct order of the Government of India. The principle was this, that if very extensive purchases of grain by the State should be needed, they ought to be made in places which were distant from the scene of drought and scarcity, and

from which supplies of food-grain could not be expected in the course of trade. By these means interference on the part of Government in the inland grain trade of India would as far as possible be avoided, and the quantity of grain within Bengal and Behar would be *pro tanto* augmented. In the event of the importation of grain by Government becoming extraordinarily large, reliance was mainly placed on British Burmah, where the rice harvest was known to promise well.

The Government of Bengal, on the 2nd December, reported that 70,000 tons of grain, estimated to be equal to three months' supply of food-grain for 5 per cent. of the population of the distressed districts of Behar and northern Bengal, should be stored by the State in those districts by the end of January 1874 as a preliminary measure, but deferred stating the amount which might probably be required in addition until the result should be known of the rain expected to fall some time after the end of December. The Government of India immediately approved the preliminary measure. At the same time arrangements were made for the purchase of large additional quantities in British Burmah in the event of their being needed.

During the month of December the fears regarding the winter rice crop in Bengal and Behar were realised. In Behar and northern Bengal the rice harvest yielded less than one-third of the average produce, and in central Bengal about one-half. Up to the beginning of January no rain fell, nor was there prospect of any falling. The spring crops, which are considerable in Behar (though inconsiderable in Bengal), had sprung up fairly well; but would probably be lost for the most part if the winter rains should finally fail. Under these circumstances the Lieutenant-Governor of Bengal (Sir George Campbell) reported that 75,000 tons more should be placed in the distressed districts as soon as possible, and a large reserve provided in addition for despatch to those districts according as need might arise. The Government of India had already taken preliminary measures to secure sufficient supplies. The arrangements prepared in British Burmah were concluded; the purchases were settled; and the vessels of the British India Steam Navigation Company were chartered to convey the cargoes of rice according to dates specified. The Government of India further undertook to store in Calcutta the grain brought from beyond sea, and to make over to the Government of Bengal in Calcutta such quantities as it might day by day require for despatch by the "East Indian" and the "Eastern Bengal" railways to the distressed districts.

Thus to the Government of India pertained the task of directing the purchase of the grain from beyond sea, of transporting it to Calcutta, of storing it there. To the Government of Bengal pertained the task of despatching the grain by rail to the frontiers of the distressed districts, of transporting it from the several railway stations to the numerous scenes of distress, and of distributing it among the people.

The first efforts to promote emigration from distressed tracts to the tea districts showed that Government could not interpose in this business save at great cost and with small immediate result. The attempt was therefore abandoned, and the recruiting grounds were, so far as the tea districts were concerned, left clear for the operations of private emigration agents. Towards the end of January 1874 the Government of India made a grant of £50,000 to form a fund for the promotion of emigration to British Burmah, where the population is sparse and an excellent field exists for labour. The Magistrates of distressed districts were directed to act during the season of distress as agents for the engagement of persons willing to emigrate to Burmah, and were to arrange for their despatch to Calcutta, where the Superintendent of emigrants would provide passages to Burmah by the return voyages of steamers which brought Government grain from Burmah to Bengal. It will be seen hereafter that the number of these emigrants, though doubtless an acceptable addition to the strength of the districts where the people were settled, was not enough to make any impression on the aggregate population of the distressed districts.

During January (1874) it became apparent that while the aggregate of loss and of distress in Behar and Bengal would be equal to the worst anticipations, the scarcity would be unequal in its incidence; in other words, the scarcity would be intense and absolute in many extensive tracts, while in others it would be mitigated from various causes. This consideration rendered it necessary to develop some of the principles which had been first laid down for the management of relief. The constitution of the central relief committee and the various district committees was proceeded with. But it became clear that in the extremely distressed tracts, where the whole power of the Government would have to be exerted in order to save the people, the functions of the relief committees would, in practice, merge in the duties of the civil officers. In such tracts the necessity, which had been foreseen from the first, of supplying Government grain to the public when food might not be procurable through the agency of trade, assumed a practical shape. The rule also, which had been originated by the Governor-General in December, began to take shape, to the effect that under such circumstances food-grain might be advanced by the State through the district Collectors to the cultivators of the land, to be repaid without interest after future harvests.

Instructions for the organisation and guidance of relief committees were, after a conference with the Government of Bengal, approved by the Government of India on the 26th January. These rules gave the local authorities power—to establish relief committees and sub-committees in any number and to any extent that might be necessary,—to elaborate this organization of relief to such a degree that all the operations should be inspected once a week at the least,—to arrange that supplies should be regularly distributed in every village where severe distress might exist, so that the congregation of persons for relief at a distance from their homes might be prevented,—to transport food to convenient places for the above purposes and to provide for its storage,—to distribute gratuitous relief to persons needing it and unable to work,—to afford useful employment for those who wanted it,—to provide specially for those whose condition, caste, or usage, precluded them from applying for ordinary relief, but who would be in danger of starvation if not relieved,—to sell Government grain to the public where a serious deficiency in the supply of food might be apprehended, the price of the grain was to be regulated by that of the nearest large mart accessible by rail or river, the sale to be stopped as soon as the local trade might receive supplies, and any competition with such trade to be carefully avoided.

The Government invited the zemindars (landholders) of Bengal and Behar to co-operate in the work of relief either by postponing the collection of rent or by opening relief works, or by making advances of money or food to their tenants. Inasmuch as heavy expenditure of this kind might sometimes make it difficult for zemindars to pay the Government land revenue, discretion was given to the Collectors to postpone the collection of the Government revenue from any landholders who might distinguish themselves by employing labour on land improvements, or by importing grain for distribution, or by sustaining their tenants during the season of difficulty.

As January advanced without sign of rain, anxiety was more and more widely felt. But during the last week of that month heavy showers began to fall in southern Bengal, and rain gradually reached the northern and most distressed districts. These rains caused considerable reduction and contraction of the danger.

Before the end of January the extent and incidence of the scarcity and distress became more and more discernible. As regards Behar, irrigation from the unfinished channels of the Sone Canal had saved the rice and spring crops on 159,500 acres in the districts of Shahabad, Gya, and Patna. The important spring crops were growing well in the basin of the rivers Ganges and Gunduk, in the south of the districts of Tirhoot, of Monghyr, of Bhagulpore, of Purneah; in the tracts south of the Ganges, including the districts of Patna, Shahabad, and Gya—territories having a total population of seven millions—for all which apprehension had been originally felt. In these tracts there was a fair hope that scarcity would not arrive at all, or, if it did come, would be much mitigated.

On the other hand, the realisation of even more than the original apprehensions was threatened in the upper or northern and central parts of the districts of Sarun, Chumparun, Tirhoot, Bhagulpore and Purneah,—in eastern Tirhoot also,—in parts of Sonthalia,—territories having a total population of within millions. In these tracts the main crop, the December rice, had failed, and there were no spring crops adequate to sustain the people. Here, then, was the prospect of dearth of food for several months; and these were the very places least accessible to trade and least likely to receive succour from that source. This prospect was further darkened by the probability of the conterminous tracts of Nepaul being similarly affected. As regards northern Bengal, in the tracts along the left bank of the Ganges and of the Brahmapootra, and in the tracts lying under the Himalayan range, either the December crops had been partly saved or the spring crops were growing well. These tracts comprised large portions of the districts of Maldah, Rajshahye, Pubna, Bogra, Rungpore, and Dinagepore, in all which there was fair hope that scarcity might not arise save in a mitigated form. On the other hand, the winter rice had been lost, and there were no spring crops growing in extensive portions of the districts of Dinagepore and Rungpore, also in some parts of Maldah, Rajshahye, and Bogra—tracts containing a total population of three millions. Here again was the prospect of severe and protracted scarcity. Moreover most of these places had little or no chance of receiving succour from trade.

Extreme failure of the chief food-crop in so many parts of Bengal was the more disastrous, in that the population of these districts was dense, ranging from 778 to 229 persons to the square mile, and averaging fully 500 persons to the square mile over the whole area.

As regards the remainder of the provinces under the Government of Bengal, the December rice harvest had been good nowhere save in Backergunge and Orissa; it had been only moderate in Eastern Bengal; it had been indifferent in Central Bengal and in the Chota Nagpore country; it had been bad in parts of some districts, namely Burdwan, Beerbhoom, Bankoora, Moorshedabad, Nuddea, Manbhoom. The aggregate population of these last-named districts amounted to seven-and-a-half millions.

Further, the scarcity and high prices prevailing in the adjacent parts of Oude and the North-Western Provinces had to be remembered.

The geographical area of extreme scarcity may be described in general terms as extending from the foot of the Himalaya along the frontier of Nepaul, Sikkim, and Bhootan on the north to the river Ganges on the south, and from the river Gunduk on the west to the river Brahmapootra on the east. The area enclosed by the hills and these three rivers is about 330 miles long and, on an average, about 90 miles broad. The distressed tracts of Sarun, situated between the Gunduk and the Gogra, and of Burdwan, Moorshedabad, Chota Nagpore, and Sonthalia, lie outside and apart from this area.

The prices of rice in Bengal generally, and in Behar particularly, had been rising gradually since the middle of October; they had slightly rallied in December as the gathering of the winter harvest brought in some supplies; but they were rising again in January, by the end of which month they were twice as dear as in ordinary years. Where the ordinary rate at this season would be 28* seers for the rupee, the rate was 14 or 15 seers; where the ordinary rate would be 25 seers, the rate was 12 or 13 seers. With the exception of Orissa and Chittagong, those districts which had gathered a fair, though far from abundant, harvest, such as Backergunge, Dacca, Tipperah, also showed high prices, caused by exportation of their spare supplies, or by the anticipation of future demands.

It was the shortness of the harvest, the scantiness of food-supply, the tightness of the grain market, the dearness of prices, in Bengal generally and in all the neighbouring territories, which aggravated the danger of the extremely distressed tracts, enhanced the probability of the scarcity in them deepening into famine, deprived them of the natural and normal succour from trade, and threatened to leave them almost without any resource save the extraneous help that might be afforded by the Government.

* A seer is equal to about two pounds avoirdupois.

In this chapter the narrative has followed affairs to the last week of January. The general character and proportions of the calamity had then declared themselves. The plan of operations for meeting it had been settled; the principles to be borne in mind had been announced; the instructions regarding the procedure had been given. In the next chapter the narrative will shew how these principles, rules, and orders, were carried into effect according to the development and progress of the scarcity.

CHAPTER II.

I HAVE here to explain my own connection with the relief operations. Until nearly the end of January I had been Financial Member of the Governor-General's Council, and had been also in charge (under the Governor-General's direction and control) of the business relating to scarcity and relief which had to be disposed of by the Government of India. On the 21st January I was, with the concurrence of Sir George Campbell, associated with the Government of Bengal and deputed to visit the distressed districts, with full powers to direct the relief operations under the rules laid down by the Governments of India and Bengal, reporting my proceedings to the Lieutenant-Governor of Bengal. I remained on this deputation until the 8th April, when I assumed charge of the Government of Bengal from Sir George Campbell, who had been obliged, under medical advice, to resign charge of duties which he had discharged under failing health with devoted disregard of his own safety. From the end of January, then, my own proceedings form part of the general work of the Government of Bengal, there being entire accord between Sir George Campbell and me.

It should be added that, between the 8th and the 20th March, Sir George Campbell visited Tirhoot and spent several days at Durbhunga, the most important centre of distress in the most distressed district, expediting the local arrangements, perfecting the relief organization which had been set on foot, elaborating the orders and instructions in all details, dealing personally with the first outbreaks of actual famine, and encouraging both the people and the officers by his example. After this visit he recorded an exhaustive minute on the manner in which relief on a large scale should be conducted, which has proved of the utmost practical value to all engaged in carrying on the work.

In the situation, as explained in Chapter I, at the end of January, then, it became necessary, firstly, to make the final estimate of the distress to be anticipated in, and the Government grain to be allotted to each district, according to the latest information; secondly, to complete the arrangements for the transport by country carriage of the grain allotted to the various localities; thirdly, to propose to the Government of Bengal the precise organization and the scale of establishments for the distribution of relief in each locality. For these purposes I travelled through the distressed districts, conferring with the local authorities and with the natives on the spot. From time to time I reported to the Government of Bengal the orders given by me in each district and the arrangements proposed. The allotments of grain then recommended by me and accepted by the Government exceeded for most of the districts the quantities which had been at first determined provisionally. But the sum total of my recommendations for the districts alone, agreed closely with the aggregate already recommended by the Government of Bengal, including both the present supply and a reserve.

The estimates which formed the basis of the allotments were made in this wise. In each district the area over which the crops had failed and the proportion of the average produce which had failed (two-thirds, one-half, one-third, one-quarter, as the case might be) were ascertained. The population of the area thus affected was known from the census tables. The effect of the ascertained failure and loss upon the population was estimated in conference with the local officers and the natives, and was represented by a certain percentage on the population expected to require assistance in some shape or other from Government. The percentages in the various localities varied much, even in the most distressed districts, according to circumstances, from 15 to 75 per cent. In the majority of cases these calculations have been verified by the

event, which attests the value and accuracy of the information collected by the local officers from the time when the misfortune began to threaten the country. Further, the estimates gave the numbers of persons expected to require relief during the several stages of the distress—during its beginning, its height, and its decline, showing how they would gradually rise till they attained the anticipated maximum, and how they would decrease down to the minimum. In other words, these numbers were estimated for the initiatory period, when the distress would be gradually increasing; for the middle period, when it would be culminating; and for the latter period, when it would be declining, until its disappearance. The persons requiring assistance from Government included all those who would take such assistance in its several categories, namely, (I), gratuitous relief, (II), employment on relief works, (III), purchase of grain, (IV), advance of grain for subsistence or for seed. According to the estimated number of persons the quantity of grain was determined, at the rate of three-quarters of a seer, or 1½ lbs. per head per diem, for the periods specified. Thus the amount proposed for the total allotment of Government grain for each district singly, and for the whole country collectively, was obtained. These estimates, then, were founded on actual data the best available at the time.

The distress was expected to begin in March, to go on increasing till July, then to begin decreasing slightly till September, to decrease fast in September and October, to vanish generally in November, but to last till the end of December in some parts of north Behar, especially north-east Tirhoot, where comparatively little reliance is usually placed on the autumn crop, and where consequently the people would not receive adequate supplies from a new crop until the winter.

This rate (¾ of a seer or about 1½ lbs. per head for men, women, and children) at which grain should be provided was assumed after due consideration and discussion. The lowest diet provided in Bengal jails for non-labouring prisoners is equal to about 1 seer or 2 lbs. The ordinary diet of a labouring adult in Bengal is taken, after statistical enquiry, to be 1 seer of rice besides ¼ seer (about ½ lb.) of fish, pulse, pepper, or other condiments. The diet prescribed for adult Bengalee emigrants on ship-board and for Bengalee sailors always exceeds 1 seer a day in total weight, and in some cases it reaches 2 seers a day. Many of the poor people for whom grain was to be provided would be labouring hard on relief works during inclement and exhausting weather. Nearly the whole of the Government provision of grain consisted of rice, which contains less strength-giving qualities than wheat and some other grains. It was known that each bag of the expected consignments of Burmah rice would contain from 8 to 20 per cent. of innutritious husk. In view of all these considerations I framed my estimates of total requirements on the basis that each person to be relieved would on the average require ¾ of a seer (1½ lbs. of grain) a day. In practice it was found that even to ordinary paupers, who did not do any work, local committees had to give ⅔ of a seer of rice daily besides one pice (⅛ of a penny) for the purchase of salt and condiments; to women in delicate health and to persons reduced by previous hunger a still larger daily dole had to be allowed.

Being responsible for the general character of these estimates, I feel bound to record my tribute to the utility of the census which had been carried out two years previously under Sir George Campbell—the first regular census which had ever been taken in Bengal. If the success of the prescribed plan of relief operations has in any degree depended on the framing of estimates, if these estimates have in any degree enabled the Government to make a proper forecast of the supplies, and the resources necessary to encounter the crisis, then it is to be remembered that these estimates could never have been framed had not that census existed.

The difficulties of Government with respect to the scarcity were not wholly confined to British territory and British subjects. The strip of Nepal territory, known as the Terai, lying between the Himalaya and the distressed British districts, a rice-growing tract, had been afflicted by failure of the rains. It was anticipated by the Nepal authorities that consequent distress might affect from one quarter to half a million Nepalese subjects across

our border. Our officers were instructed that distressed Nepalese must be employed at our relief works, relieved at our hospitals and relief centres, and served at our granaries, precisely in the same way as British subjects. And it was arranged, with the consent of the Government of India, that 1,000 tons of Government grain should be made over at a moderate price to the Nepal authorities for distribution to their distressed subjects. Throughout the season, Nepalese were among the largest purchasers of grain at the Government granaries along the border. The Nepal officials found difficulty in carrying their grain across British districts from the railway stations on the Ganges, and accordingly our officers at Bhaugulpore transported the 1,000 tons of grain to the border and made it over there to agents of the Nepal Government. I am enabled to state that the Minister of Nepal, Sir Jung Bahadur, G.C.S.I., expressed to the Viceroy the grateful acknowledgments of his Government for the assistance rendered.

On the completion of the estimates in each district the arrangements were revised for the conveyance of the grain from the railway stations to the places of distribution. The amounts of carriage, either already employed or required in addition, were considered. In determining the transport arrangements the object aimed at was this, that all the amounts allotted should be carried to their respective destinations in the interior of the country before the setting-in of the rains by the middle of June. In this way the risks of the transport along roads heavy from rain would be avoided. Also, in the event of unforeseen additional quantities having to be carried, there would still be time during the rainy season to arrange some transport by water routes. For every reason it was expedient to be beforehand with so vital, and yet so arduous, a matter as the inland transit. No effort was spared by the local officers to provide the required amounts of country carriage by carts and bullocks, by pack animals, by boats, for the conveyance of the large quantities of grain which had been allotted.

The boats were used chiefly in northern Bengal. In the beginning of November the navigable routes in that quarter had been tested with the view of transporting grain, as the navigation becomes uncertain after autumn. And boats began to ply during the winter on each river as soon as its suitability was established. With this water transport there was combined land transport by country carriage. This carriage was obtained by direct agency, or with the help of petty native contractors, for hire not more than fifty per cent. above the rates of ordinary times. So far no serious difficulty was encountered.

In Behar, however, there were no water routes practicable at that season, and the difficulty of procuring sufficient land carriage was extreme. During December and January the local officers strove to obtain this carriage, by direct agency without help of large contractors, at hire little above the rates of ordinary times. In this way a considerable amount of carriage was laboriously collected, but that amount proved quite insufficient. The demand had become so extraordinarily large as to require not only all the carts and bullocks ordinarily available for hire, but also all those which might exist for use in other kinds of work. Consequently the rates of hire rapidly rose. Still our officers hesitated to allow the enhanced price, and persevered in their endeavours to procure the carriage. This process had an unfavorable effect on a people proverbially jealous regarding the collection of carriage, and they resolutely refused to give their carts and bullocks on the terms hitherto allowed. It was evident that unless some additional inducement were immediately offered, considerable failure in the land transport must ensue, which failure must cripple the relief of distress. There was no remedy but to abandon the direct agency which could not be rendered successful, and to substitute the employment of contractors, men of substance and influence, to produce the required amount of carriage. The contractors, chiefly European gentlemen, indigo planters, and landholders, possessed exclusively advantages of a special kind. In Behar, the indigo planters are always landholders, and this circumstance alone secured to them a large command of carriage. But the indigo industry also employs a great number of carts (probably 20,000 to 30,000) which are the property of the villagers, but are under engagements to serve the factories whenever called out for service. The planters therefore had a power of collecting carriage such as

no other class possessed. And to this they added the invaluable force of British energy and prowess. For the successful accomplishment of the task all their assiduity, all their local knowledge, all the resources of their estates, all the influence of their factories, must be instantly evoked. The terms of the contracts entered into were, under such circumstances, necessarily high, and involved a rate of hire just double that of ordinary times. It will be seen hereafter that the arrangement stood perfectly the test of trial, and was attended with ultimate success.

In furtherance of the general arrangements the planters banded themselves together in transport companies, which ultimately became five in number; one for Chumparun, for western and central Tirhoot, for south-eastern Tirhoot, for north-eastern Tirhoot, and north Bhagulpore, respectively.

On the 31st January, looking to the anxious prospect of the transport by country carriage, I recommended, with the concurrence of the local authorities, the immediate construction of a tramway for animal draught from the north bank of the Ganges (at a point opposite the railway station of Barh) to Durbhunga, the capital of the most distressed region of Tirhoot, a distance of fifty-three miles. The Government of India approved the project, but ordered that the line should be constructed as a temporary railway for engine traction. The line was commenced on the 23rd February, and was opened for the transport of grain on the 17th April, the construction having proceeded at the rate of a mile a day.

Further, looking to the uncertainties surrounding the land transport, by reason of the inclemency of the advancing season, the roughness of roads, the chances of epidemics, I considered it essential to the security of the transport operations that a strong reserve transport train should be formed by Government from carriage to be obtained in the North-Western Provinces. It would have been impossible to form such a reserve from the carriage resources of Behar itself, because, as already seen, all such resources were needed for the contractors' transport. There was consequently no alternative but to procure the reserve from a distance. Indeed, during the preceding month, January, the Government of India had suggested to the Government of Bengal the adoption of measures of this description. With the excellent co-operation of the Government of the North-Western Provinces and of its officers, this provision was successfully effected. The reserve transport train consisted of carts and bullocks, purchased or hired for Government, chiefly beyond the limits of Behar and Bengal. It was formed with a complete organization under military officers, both European and Native, so that it might be relied upon for any service however hard, in the event of the other carriage breaking down from distress, from sickness, or other causes of failure. Inasmuch as all the draught animals, whether in Behar, and whether from without, were bullocks and buffaloes, it was manifest that any epidemic affecting those classes of animals might suddenly prostrate the transport. It was therefore necessary to procure other kinds of animals, namely, camels, mules, and ponies. Although camels could not be largely employed in Behar, a certain number of them were obtained; but ponies and mules were readily purchased in all parts of northern India as far as the Sutlej.

During the month of February, all the contractors brought their various contingents of carriage into the field, and all the numerous routes of transit were occupied by the transport power which had been set in motion throughout the distressed districts. It is difficult to describe adequately the extraordinary degree of alacrity and promptitude which the European indigo planters displayed in this emergency. North Behar proved to be a country extraordinarily rich in carts, of a build suitable to rough roads, and in a small but hardy breed of draught cattle. At this period the cattle were in the highest condition. The stubble of the vast plains of withered rice had afforded them most nutritious pasture. The suspension of field work on failure of the harvest had lightened their toils. So early as November the Government had enjoined the preserving and stacking of the rice stubble, which was available for fodder much more largely than usual. It will be shown hereafter that upwards of 100,000 carts, with 230,000 draught or pack animals, were brought into action during

February and March. This gave employment to at least 120,000 men drawn from the distressed districts, and in itself constituted an important relief work.

Before the grain could be lifted by the country carriage as above described it had to be carried across a great river, the Ganges. This obstacle *in limine* was overcome by the establishment of steam ferries at the requisite points along the river. For this purpose all the steamers of the Bengal Marine were employed, and many vessels of the India General Steam Navigation Company were chartered. Depôts with yards and enclosures covering many acres were formed on the river banks.

The East Indian Railway actually touched the Ganges at the city of Patna. But special sidings had to be made from the Futwah ghât and Barh stations, whereby grain waggons could be run down to the river's edge. The Barh riverside station supplied the Durbhunga railway and the eastern Tirhoot transport companies. From the Futwah riverside station were ferried across to Bunkar ghât (opposite Patna) the supplies for western and central Tirhoot, for Chumparun, and Sarun. The Patna ghât (riverside) station was left entirely for private traffic. The special sidings, which were put down with much promptitude by the East Indian Railway Company's engineers, were of great use to the transport department, and also to the engineers of the Durbhunga railway. The origin and purpose of the Durbhunga railway will be explained presently.

A large staff of officers, drawn from the Quarter-Master-General's department and from all sections of the Army, was organized to supervise all the inland transport arrangements above described, and all the transit routes. They were assisted by three companies of sappers and miners and a corps of native pioneers. They literally pioneered all the transit routes, causing obstructions to be removed, repairs to be effected, temporary bridges to be constructed, pontoons to be thrown across streams, sometimes even cutting ways across country through the fields. They guarded the springs and improved the drinking places at the halts in the march. Field hospitals for sick animals at central places were established with a complement of veterinary surgeons, in view to the contingency of murrain or epidemic sickness breaking out. The probability of cattle plague reported in Sarun was the source at one time of considerable anxiety.

As the concentration of so many thousands of cattle might prematurely exhaust even the abundant supplies of fodder which fortunately existed on the spot, large quantities of the best sorts of fodder were sent for by rail from the North-Western Provinces and were stacked at convenient places.

As already stated, the grain had to be sent by railway to the various stations on the left or south bank of the Ganges, the bulk of it coming from Calcutta, and a portion of it from the North-Western Provinces. The principal railway stations which thus became centres of activity were Arrah for Sarun; Patna and Futwah for Chumparun and west Tirhoot; Barh for east Tirhoot; Monghyr for north Bhagulpore; Sahebgunge for Purneah; Rajmehal for Maldah and Dinagepore; Kooshtea and Goalundo for northern Bengal generally.

The Eastern Bengal Railway, having a short line and a comparatively small quantity of Government grain to transport, did its share of the work with due punctuality. But the East Indian Railway, with a long line a heavy ordinary traffic, and a very large quantity of Government grain (two thousand tons a day) to transport, met with great difficulty in delivering the grain fast enough for the country carriage to take away. The railway Company, however, put forth every effort by procuring rolling stock from other railways and by employing temporary establishments. In the end the work was well accomplished.

Among the essential preliminaries of the administration was the placing of all the principal relief centres in telegraphic communication with the existing lines of electric telegraph. Before the famine there was not any telegraphic communication in north Behar, nor in northern Bengal (save the line to Darjeeling). In November (1873) a telegraphic line was ordered from Patna to Segowlee, near the Nepal frontier, passing through Mozufferpore (west Tirhoot) and Motiharee (Chumparun); also a telegraph along the line of the Northern

Bengal Railway through Parbuttypore, a point half way between Dinagepore and Rungpore. During February and March a temporary extension of these lines was obtained to the north-west extremities of Chumparun and of Tirhoot, and to Dinagepore and Rungpore; also sanction for temporary lines from the Ganges to Durbhunga, and north-east Tirhoot and north Bhagulpore. Thus a telegraphic connexion was established with the remote centres of the worst tracts of country. The lines were constructed with a speed and efficiency most creditable to the Indian Telegraph department. The posts were obtained from the bamboo groves so abundant in these regions. The lines were opened by March, and, despite floods and storms, were kept up through the rainy season. The numerous and important messages delivered during the relief operations were rendered with remarkable accuracy. The value of this communication as a resource in these emergent affairs is too obvious to need any description.

Next, after completing the transport arrangements and bringing all the country carriage into the field, the most urgent matter was the organizing of the relief system according to the rules of the 26th January already mentioned in Chapter I. My visits to all the most distressed tracts of country satisfied me that if relief operations were (according to those rules) to be inspected at least once a week, and if supplies were to be distributed in every severely distressed village—these tracts must be parcelled and mapped out into circles, each circle to contain from fifty to one hundred villages, to be supervised by a superior European or Native officer with a staff of subordinates, among whom would be divided the duty of inspecting all the villages, and with at least one grain depôt from which might be supplied the granaries to be established at convenient places within the circle; that, in short, the unit of relief administration must be the circle, with an organization of its own, sufficient for all branches of the relief work. The officer in charge of a circle would be the immediate executive authority and administrator of relief; to him would be entrusted the safety of the lives of the inhabitants of his circle; and of him would be demanded all the best practical qualities of a civil officer. The boundaries of the circles throughout the more distressed tracts, and the place for the head-quarters of each circle, were determined with all possible expedition. The construction of temporary habitations at these various head-quarters was taken in hand. It was expected that there would be at least one hundred and fifty such circles. The selection of circle officers of the requisite ability for so many circles was the first care. The next thought was the collecting and disposing of the circle subordinates. Each circle would need, on the average, ten inspectors for the visitation of the villages. For each inspector's sub-circle one granary would be needed (that is, ten granaries to a circle), and each granary must have a store-keeper. Then the circle officer must have store-keepers for his central depôt, and one or more native clerks. Thus each circle must have on the average twenty-five subordinates of some education and training. The number to be found for one hundred and fifty circles would be about three thousand five hundred. Besides these, which might be termed the fully organized circles in the most distressed tracts, there were to be in the less distressed districts many circles and relief centres, with a less complete organization. For these, also, many hundreds of trained officials would be required.

The circle officers and their establishments were to be entirely subordinate to the ordinary civil authority of the district, that is to the Magistrate and Collector. As regards relief operations, the Magistrate-Collectors were entirely subordinate to the ordinary Divisional Commissioners. In parts of north Behar and northern Bengal it became necessary to appoint Additional Commissioners for assisting in the work of supervision.

In the fully organized circles, the functions of relief committees and sub-committees would merge in the duties of the circle officers, though even here there was nothing to prevent these officers from associating with themselves the best non-official persons, Europeans and Natives, of all classes; and indeed, the assistance from private persons proved ultimately to be very great. In the less organized circles, there were sub-committees consisting of private persons. Often native landholders and zemindars distributed relief on behalf of the State

in addition to the charity which they dispensed from their own funds. Often also, European indigo planters acted as volunteers, or unpaid circle officers, for the villages surrounding their factories, being reimbursed by Government only for the establishments which they had to entertain for the purpose. Their permanent residence, their personal interest in the welfare of their neighbours, and their local experience, rendered them most useful and excellent coadjutors. And in all circles, whether fully, or partly organized, not only were the principal residents engaged in the work of securing the public safety, but also other classes, such as village headmen, superior ryots or cultivators, local accountants, petty traders, in short, all who by their good will or by their means, or by their personal attention were able to render aid.

In order, then, to carry out the comprehensive and searching system of relief which had been prescribed, an extraordinarily large staff of officers and officials had to be rapidly collected. The ordinary civil establishments in Bengal are economically fixed on the lowest scale consistent with efficiency, and could spare but little of their strength for extraordinary service. Therefore the men for the relief establishments had to be sought for in every direction. From the commencement, that is, in November, the Government of Bengal had been obtaining the loan of European civil officers from the North-Western Provinces, Oude, the Punjab, the Central Provinces, and the Bombay Presidency. Assistance was subsequently procured from the military staff corps and from the various branches of the Army. In the provinces under the Government of Bengal itself, all the junior civil servants, and many selected officers from the civil departments were withdrawn from their regular stations and appointed to the relief department, their places being supplied temporarily by natives. Many of the best native officials of all ranks were despatched to the scene of distress. Afterwards a strong staff of trained native officials, Deputy Collectors, Tehsildars, and others, from the North-Western Provinces (through the good co-operation of the Government of those Provinces) were sent down to Behar, and did their work there with the full degree of efficiency that was to be expected of the distinguished administrative school whence they came. Further, with the special assistance of the Commander-in-Chief, a large number of selected native officers of various grades, both of the cavalry and of the infantry, were lent to the Civil Government for the relief work. These men have by their discipline, intelligence, and trustworthiness throughout the operations, left a name behind them in all respects worthy of the service to which they belong.

As a valuable adjunct to the relief system, a special medical staff was collected. Additional medical officers, Europeans, were appointed to most of the distressed districts. In each organized relief circle there was stationed a native medical official, and a field hospital was established in special view of the contingency of a more than ordinary ratio of sickness and mortality being caused by the dearth of food. A Sanitary Commissioner was deputed to travel over all the districts and report upon all medical questions. Though the native medical establishments in India are weak in comparison with the growing needs of the country, still the native doctors required for the relief circles were promptly gathered together from all parts of the country.

Besides the organized circles and the relief committees, there was another important agency for the dispensing of relief, namely the Public Works Department.

It had been decided that there should be two kinds of relief works, namely petty works, such as village tanks or village paths, under the supervision of the circle officers and the relief committees; and larger works, such as roads for general traffic, under a special department of public works with Civil Engineers and with trained overseers.

In those tracts where the majority of the population have to be supported for a time by the State, the principle of employing the people on works in their villages, and close by their own doors, assumes great practical importance. It would be very difficult to employ such vast numbers advantageously on any lines of road, or other considerable public work, that could be devised. Or if such object were in any degree compassed and accomplished, this could be

done only by taking the people away from their homes, which process, however suitable for able-bodied or professional labourers, would be very detrimental to the feeble classes who have to be entertained on relief works. Fortunately the worst tracts abounded in old tanks needing fresh excavation, and in sites for new tanks. Scarcely a village was devoid of these humble, but useful works, on which the health, almost the life, of both man and beast depended. Here then was an opportunity of improving the rural water supply of the country in a manner that may be beneficially felt for more than one generation of men. The scheme also fitted in perfectly with the circle system. Accordingly the circle officers took charge of the tanks.

There were also many roads much needed for the promotion of trade, the making or repairing of which would properly benefit the people of the villages through which the lines passed, and also all the professional laborers of the surrounding country. The lines of road to be thus undertaken were immediately made over to the Public Works Department. The several series of these roads were formed into an appropriate number of executive charges. These charges were grouped into three divisions of superintendence. Over each division was placed a Superintending Engineer, and over the whole a special Chief Engineer. Every effort was made to gather together from all parts of India the requisite staff of Civil Engineers and overseers. But these professional establishments are never more than sufficient for the ordinary demands of the public works, always so very heavy in India, and much difficulty was experienced in causing the Civil Engineers, their assistants, and other subordinates, to arrive at the relief works in time. However, by strenuous efforts, the relief roads were all aligned and marked out beforehand. It will be found hereafter that the total length of these roads was expected to amount to upwards of 6,500 miles.

On the 4th February a public meeting, at which His Excellency the Viceroy presided, was held in Calcutta to consider in what way the public of India and England should be invited to help in relieving the distressed people of the drought-stricken districts. At this meeting a Central Relief Committee was appointed at Calcutta to collect subscriptions and administer such funds as might be subscribed. The Government of India undertook to place at the disposal of the Committee public funds equal to the amount of private subscriptions. The Central Committee communicated with the Lord Mayor of London, who had some weeks previously intimated his readiness to open subscriptions for a famine relief fund in England. The Lord Mayor held public meetings in London, at which a Committee was nominated. Meetings were also held at different places in England and India. By the liberality shown £282,669 in all were collected, of which £146,500 were contributed in Great Britain and £131,319 in India. The London Mansion House Committee collected in all £120,000; the Glasgow Committee sent £15,500; the Manchester Committee sent £10,000. Considerable sums were received from the Mauritius, from the Straits Settlements, and from the Dutch commercial community in Java. The Bombay Presidency subscribed £11,704; the Madras Presidency £10,500; and British Burmah £5,500. The total of the private subscriptions, together with the equal sum placed by Government at disposal of the Central Committee, amounted to £565,338.

In deference to the expressed wishes of some of the subscribers in Great Britain, the Central Committee at Calcutta decided that their expenditure should be in addition to, and not in place of, the measures which Government had undertaken for saving life in the most distressed districts. Accordingly they undertook to pay for the special relief hospitals and for the clothes and occasional money help given to paupers in the worst districts, but not for the grain that might be given to them to save their lives, the charges for which grain had been accepted by Government. In the other districts, where the scarcity was less severe, the Committee agreed to defray from their funds all charges on account of charitable relief in whatever shape given. Under this decision the expenditure from the Central Committee's funds may probably amount to about £130,000 in the worst districts, namely Tirhoot, Chumparun, Bhagulpore, Rungpore, Dinagepore, and Maldah,

and to about £290,000 for all the less distressed districts. Their total expenditure may thus amount to about £420,000 in all; but these figures must be regarded as estimates only, until the accounts are finally made up. The Committee engaged also to make provision for orphans or deserted infants who might be unprovided for at the end of the scarcity. Happily such orphans have been few in number.

When the appointment of the Central Relief Committee was first proposed, in November 1873, it was hoped that they would manage and control the operations for charitable relief, and that their funds would, so far as the amount might suffice, bear all charges for such relief. But when, as already explained in Chapter I, it became apparent that in the worst tracts the whole power of Government would be needed to avert calamity, the position somewhat altered. The Committee considered that it would be undesirable for them to have a separate organization side by side with the Government establishments. It appeared also that the responsibility of local officers would be weakened, and their action fettered, if they had to take instructions from a Central Committee in Calcutta, as well as from the Government. Some of the British subscribers had stipulated that their funds should be spent, not in contributing resources towards the saving of the life of the people—a duty ultimately devolving on and accepted by the Government—but on auxiliary forms of relief, beyond the sphere which Government relief might fill. It thus happened that the cost of gratuitous relief in the worst districts, where the brunt of the affair fell, was borne mainly by the Government. The duty of administering and controlling charitable relief operations and local committees devolved upon Government and its officers. The Central Committee received reports and accounts of expenditure of the moneys allotted by them, and rendered to the charitable public statements of the manner in which the relief funds were being spent.

The Government officers duly exhorted the more helpful classes of the community to bestir themselves. European indigo planters, native landholders and traders, took cash advances from the treasury to import grain. In many instances native zemindars caused tanks to be made, either from their own funds or from funds borrowed for this purpose from Government; or gave some advances to their tenantry; or postponed the collection of the rents. It was not, indeed, the case that all of the native gentry fulfilled their duty in these respects; but many, perhaps most, of them did perform it in whole or in part. In Bettiah (North-West Chumparun) the powers of a vast estate were, by special delegation from the Maharaja, exercised by an European gentleman as manager.

In three of the most distressed tracts, namely, Durbhunga (east Tirhoot), Hutwa (west Sarun), Chanchul (west Maldah), extensive estates were under the management of the Court of Wards, and consequently the whole power and resources of those estates were commanded by European officers.

Meanwhile, as the preparations of Government were rapidly completed during February and March, the scarcity grew worse and worse, till during the latter half of March, there were signs of an imminent famine, which could not be stayed save by State interposition, exerted to the utmost.

Besides the marts of the towns and places of trade, there are numerous rural markets in the interior of the country, scattered amongst the villages and held weekly or bi-weekly, whence the majority of the population obtain their supplies of food. Week after week these rustic gatherings were disquieted by the sight of decreasing quantities exposed for sale, and by rumours that the stocks at the central marts were dwindling away. These rumours had, indeed, but too much foundation. There was little, almost no sign of grain being imported from a distance by private trade. Some convoys, rare and small, would arrive from a distance, and only served to show how slender was the hope in that direction. In all the marts of the most distressed districts, it was ascertained from the grain dealers that they were not importing, and did not expect to import any grain from a distance, for the plain reason that the high prices prevailing elsewhere must render such importation a losing business. Already the remnant of the rice of the past year (1873) was supposed to be exhausted. The rice stores of previous years were seldom seen. Whether they existed at all was doubtful; if they did exist they were held back by the possessors, in view of

harder times coming on. There was still some quantity available of the coarser grains, pulses, and millets of 1873. It would suffice to feed the masses for a short time only, how short no man could say. The external demeanour of the people was calm, patient, and resigned. Doubtless they had some faith in the efforts of Government, but remembering the events of former eras, they thought that the worst must come sooner or later. Presently some of the signs of popular anxiety began to appear. Incendiary fires were lighted in many places; private granaries were sometimes ransacked; and the houses of persons supposed to be hoarding hidden grain were occasionally destroyed. But no grain riots occurred at this period.

The prices of grain generally, and of rice especially, were becoming dearer, and were reaching a rate which must distress the poorer classes in many districts, namely, one rupee for ten "seers" or twenty pounds. The ordinary rate of wages for a laboring man ranged from 1½ to 2½ annas per diem, or something under twopence to something over threepence a day, in different parts of the country. But in north Behar the lower rate prevailed. A family in the poorer classes, there, can barely live if common rice is dearer than one rupee for ten seers. In some places the price of rice was a rupee for nine, or eight, or seven seers; in other places it was even one rupee for six and five seers, which rates indicated famine. In other places there was no price quoted as the article was not procurable at all. But famine rates were not permitted to last anywhere, as soon as they had been discovered by the vigilance of the Government officers. By this time, too, the action of Government had exercised an arresting influence on the rise of prices, steadied the markets, stopped a general run being made on all available supplies, and induced the holders of stocks to produce much more than they would otherwise have produced. Although not a single public granary had been opened, not a pound of Government grain had been issued, still the people saw the long convoys of Government grain threading their way over the country. And though they could hardly believe or imagine the real extent of the measures in progress, yet the sight of Government entering the arena had a potent effect on the public mind. But for this, there would have been excessive dearness at the beginning of March, and famine prices before the end of that month, the evil being intensified by panic among a timid and ignorant people. The consequence must have been a constantly spreading mortality. This statement is necessarily one of opinion. Every care was taken that this opinion should be never subjected, or as seldom subjected as possible, to the cruel test of trial. In other words, the prevalence of famine prices was, as a rule, prevented by Government. That without such prevention they must have set in during March, is, I believe, the opinion of all, or nearly all well-informed persons, European and Native.

Besides the apprehended insufficiency of food-supply, there was another pressing difficulty, namely, the dearth of employment. In north Behar there usually is a certain scantiness of employment. There is but scanty work to be done for the spring crops, which are not largely raised. But the labourers receive wages in the winter harvest, from which they save a part for their support until the coming harvest, eking out their livelihood in various little ways. Also, numbers of them emigrate for a time to the districts on either bank of the Ganges where there is much harvesting in the spring. This year there were no savings from winter wages, and there was nothing to be earned in other ways, save by temporary migration towards the Ganges. Accordingly the number of the persons who thus went away was much greater than usual. Most fortunately the ripening Gangetic harvest of this spring was full. Therefore many hundreds of thousands men and women departed down south. But the demand in the south was limited, for there also the population is teeming. So the majority of the north Behar people stayed at home as usual, awaiting their fate. At this time (from the 10th to the 20th of March) it was not an immediate dearth of the coarser grains in the market that was to be looked for, but rather the dearth of means on the part of the people for obtaining it, either by paying money or by giving their labor for it. There was still some grain, though not much, to be bought, but the people could not buy it. The only question was, how long they could endure without coming to Government and stretching out their hands for food. Some did thus

come day by day, hundreds here and there, the aggregate amounting up to some tens of thousands all over the country, who were duly relieved. But the mass of the people were known to be suffering with silent fortitude a degree of privation which must soon force them to seek relief.

The Government officers pressed on their preparations in every direction and by every mode, though it was impossible to say from what direction and in what mode the famine would open its real attack. The first shock occurred during the second and third weeks of March, in the east and north-east quarter of Tirhoot, near Durbhunga and Mudhoobunnee, when about 400,000 persons on various dates came trooping in from the villages all around, and settled down on certain lines of relief roads, where employment was known to have been afforded to limited numbers for many days past. Almost all were in destitution, most were in very poor strength and condition, many were emaciated, and some were near starvation. After the exodus the villages were found to be almost entirely deserted. The organization of the circles and sub-circles for village relief was not finished; the engineering establishments on the relief roads had not all taken up their positions; the extensive preparations of Government had not been fully arrayed for action; the concourse of such multitudes on particular lines of road had not been contemplated. The intention was that the people should be relieved partly on the village works and partly on the roads. In this emergency the instant business was, of course, to issue money to the multitudes for purchase of food until their proper disposal could be arranged. Effort was then made to disperse the people among the relief circles and the villages. But they dreaded quitting the road, which they imagined to be the only place where subsistence could be obtained, and in their alarm they interposed all the passive resistance they could to being placed on village relief. This unwillingness caused considerable delay before they could be disposed of in such a manner that the circle officers could take systematic charge of a large proportion of them, leaving the remainder on the roads in gangs of a strength manageable by the engineer establishments. Meanwhile, before all this could be effected, masses of disorderly and unruly, though miserable and affrighted, people had to be entertained on a few miles of road. Some work was done, though quite disproportionate to the numbers employed under little more than nominal supervision. At first there was some irregularity in payment, though this was soon overcome. After a time the people were efficiently supported, though not kept properly at work. For the moment a due financial check could not be enforced. The daily enumeration of such multitudes could not be correctly made. Many persons of the lower grades, headmen of gangs, subordinate officials, and the like, found their opportunity for cheating, and made illicit gains. They exerted their influence to dissuade the people from obeying the orders which would introduce system and stop abuses. For a short time some degree of demoralization must have prevailed. But the local authorities persevered with the most commendable resolution. Their establishments for supervision were strengthened constantly, and were soon made up to the full complement. After a short time the people were reduced to order, some on the roads, some on the village tanks. Those who could not work were after enquiry brought under operation of the system which had been devised for gratuitous relief. The first efforts at enforcing system were subjected to some disadvantage, but at length the object in view was effected.

No such simultaneous rush of many masses of applicants as that at Durbhunga and Mudhoobunnee occurred elsewhere at this period of the famine, but the numbers of those seeking relief rose fast throughout the distressed area.

At this period the wages were entirely paid in cash, that is in copper pieces; in a few exceptional cases only was payment made in kind. From the beginning up to the 15th of April thirty-one lakhs of rupees, or £310,000, were disbursed for this purpose. Apparently this was calculated to encourage importation of grain from a distance by trade. No such effect, however, ensued. The real effect of this circulation of cash was the production of the greater part of the local stocks, chiefly consisting of the coarser grains other than rice.

The question naturally arises here, as to whether there were many deaths from starvation. At the outset there must be a point of time between the moment when distress is approaching the stage which would justify the autho-

rities in spreading the relief system over the country, and the moment when the system is actually instituted. It is just at this critical point of time that deaths might be apprehended. A watchful search for such cases was maintained. Some were reported and investigated, very few were authenticated. The number of proved cases up to the 18th April did not exceed twenty-two. There was every anxiety on the part of the Government officers to discover such deaths. The facts were important to them for guidance in commencing their operations. From the mistaken cases hastily reported there was manifestly willingness on the part of the people to report. If the authorities had failed in discovering the actual deaths, there were many European non-official residents and independent witnesses able to supply the omission. It may therefore be accepted that the fatal cases were comparatively few, and that there was nothing approaching to an appreciable mortality anywhere. Still it was acknowledged at the time by the Government of Bengal that there must have been some cases directly due to starvation which had never become known, and some cases indirectly due to starvation, where persons casually sick, permanently diseased, infirm, and aged, must have succumbed to insufficient nourishment. This topic will be touched upon again in this narrative, but it may here be said that if such cases had but rarely occurred up to this time (the end of March), they were still less likely to occur afterwards, for a formal enquiry was now set on foot throughout the distressed districts to search out all persons who might be thought to be in danger.

This investigation was taken in hand village by village and house by house for all the poorer classes by the circle and sub-circle officers, already described. Nominal rolls were prepared, and tickets were issued to each person on the roll entitling him or her to a specified ration of rice at the nearest Government granary. The intention was that no person should escape enrolment who was in distress and wholly unable to work, fear being felt lest many ignorant persons might, if not searched out, perish without making sign or complaint. The result of this very extensive registration showed the fear to be but too well founded. But for the close search many would at this period have pined to death in obscurity.

Authority was given to the local officers to sell Government grain under the rules in a few specified places in east and north-east Tirhoot, in north-west Chumparun, in north Bhagulpore, in parts of Purneah, Dinagepore, and Rungpore; in which places a failure of supply in the rural markets might at any moment cause a panic to burst forth, and shops to be closed, the consequence whereof might be acute distress in remote places before assistance could arrive either through trade or from Government. The price was fixed at one rupee for ten* seers of clean rice, that being a dearer rate than those which then prevailed in the principal marts. The apprehension was that if the dealers should perceive, or fancy they perceived, a chance of grain falling short, they would instantly cease selling the small stores they might have in hand. In such times there is a fear lying deep in their minds of the day coming when no man can find food; there is also the forethought of the value which would then attach to every pound of grain. The dread of inanition and the hope of profit combined would precipitate the crisis of famine prices and their consequences. In order to prevent famine it was necessary to counteract this tendency. The notification of the authority to sell Government grain in these particular places prevented the occurrence of any such crisis. The dealers, seeing that Government would not in the last resort suffer food to fail, brought forward their supplies in the ordinary way. Thus panic in the grain-markets, one of the things to be most dreaded at the outset of a famine, was never permitted to arise. But for this, the situation at the end of March would have been grievously aggravated by public alarm.

The matter was one of some delicacy, because the hope of assistance from trade had not been wholly abandoned. The orders of Government had from the first strictly enjoined the avoidance of interference with trade, and the rise of prices in the distressed tracts was the very thing most calculated to encourage importation. Dearness of food up to a certain point was regarded not with regret, but with satis-

* *Note.*—The Government grain, by the time it was delivered at local granaries in the distressed districts, had cost as nearly as possible £12-3-4 per ton, equal to 8¼ seers of grain, or equal to about 8 seers of *clean* rice per rupee (8lbs for a shilling).

faction, as being for the best in the end, and as tending to avert the evil days yet to come. Nothing therefore could be further from the intentions than the artificial lowering of prices generally. On the other hand, as the fundamental principle was the prevention of famine, we could not allow famine prices to exist long in any place, inasmuch as the continuance of such prices must mean wasting misery speedily terminating in death. The determination of the line where famine prices begin wholly depends on the circumstances of the country. What may be an unendurable rate in one place or at one time, may be borne with comparative ease at another place or time. Under the then circumstances of the most distressed districts, there was no doubt that prices dearer than one rupee for seven seers of common rice would be famine prices, which, if permitted to prevail, must cause mortality. As life was at stake, it was resolved that a remedy against such prices must be provided by Government.

In most (though not in all) cases the occurrence of famine prices according to the description above given, was taken as a sure sign of a serious deficiency of food beyond the means of the local trade to supply, and consequently as a justification for giving effect to the rules of the 26th January for the sale of Government grain.

On the other hand, the sale of Government grain was not regarded as necessarily and inevitably to be introduced on the occurrence of prices which caused grave distress. There were other modes whereby Government could supply food to the people besides selling its grain to them, inasmuch as the relief works, the gratuitous relief, the grain advances, were so many modes whereby Government would supplement the food supply in event of need. It is to be remembered that, however dear the price of food might become, there would still be certain classes able to pay it. The circle of persons thus able to pay might become smaller and smaller as matters advanced, but it would continue to exist almost up to the extremity of events. And there would be no public object for Government to lower the price on behalf of these classes. It might be, and often was, preferable to abstain from selling Government grain, notwithstanding famine prices, to leave the upper classes to pay those prices, and to relieve the poorer classes in other ways. The Government never undertook, therefore, to sell Government grain in order to lower even famine prices. Its undertaking was to save life when endangered, and it reserved to itself the discretion of choosing the mode of action most suitable to the general interests. Among those interests was the policy of interfering as little as possible with that trade upon which the food supply of the people, even with the utmost efforts of Government being exerted, so greatly depended. Therefore, whenever Government grain was sold, the price was fixed—not upon any conception of what the poorer classes could afford to pay, nor upon any assumed standard whatever—but upon an actual market standard. At some distance from the most distressed tracts, when Government grain was to be sold, there would sometimes be markets where prices were still quoted, though supplies might be scanty. At all events, there would be the markets on the main line of communication on the Ganges, where prices were regularly quoted, which markets precisely fulfilled the terms of the rules of the 26th January as being "the nearest markets accessible by rail or river." It was by the prices ruling in the markets, and by those alone, that the prices for the sale of Government grain were regulated.

The hope, however, that importation by private trade could ever effectually reach the most distressed tracts was sinking fast. In all the places where the sale of Government grain was authorized, there was not only no prospect of supplies being brought by trade, but there was a certainty that such supplies could not arrive for a long time if they ever arrived. But the quieting and steadying effect of the authorization induced the dealers to sell gradually in the ordinary way such supplies as they had. For some time the authority to sell Government grain was little used, and when sales were opened they were not largely attended.

The sum of the allotments of Government grain made to the several districts on my estimates came to 404,000 tons, and the Government of India

arrange[illegible] the whole of these amounts. Further, the Government of India having fr[illegible] the commencement decided to provide a reserve to meet possible contingencies, arranged to raise the total supply of Government grain to 480,000 tons, out of which 76,000 tons would be retained as reserve at Calcutta.

As already stated, the bulk of the Government grain was purchased in British Burmah, and sent thence to Calcutta. These arrangements were made (under the orders of the Government of India) by the Hon'ble Ashley Eden, C.S.I., the Chief Commissioner. The manner in which they were carried out was thus recorded in a letter addressed by the Government of India to Mr. Eden:—

"The aggregate order requiring delivery between November and May "last amounted to 289,534 tons, value £2,130,874 sterling, exclusive of freight, "and the details of the purchase were left to you. Upon general considerations "of the state of the market and the danger of disorganizing internal trade or the "ordinary export to Europe, you decided not to call for tenders, but to entrust "the execution of the order to two responsible firms, who had a large private "business, and were therefore interested in keeping the market steady. For this "purpose you selected Messrs. Bullock Brothers and Messrs. Mohr Brothers, "and you gave them an open order to purchase at market rate up to fixed limit, "subject to constant communication with yourself, and to ship to Calcutta free "on board at port of despatch. These firms undertook to prepare the rice by "cleaning and husking it, to pack it in gunny bags and place it on shipboard, "and they received a commission of 3 per cent. on their outlay. One of "the greatest difficulties was, as you observe, to procure tonnage for the convey- "ance of the grain thus diverted from the usual channel of trade, as there was "but a short time available to invite freight from distant ports, and as the whole "order had to be executed within a few months. In this difficulty you were "aided by the British India Steam Navigation Company, whose fleet was placed "at your disposal on very reasonable terms, and was utilized to the extent of, "165,789 tons. The balance of the required tonnage was obtained by yourself "chiefly in large and fast steamers, secured from various parts of the world, and "thus the whole order, equal to about two-fifths of the total exportable produce "of the province, was despatched and delivered in Calcutta, according to dates "previously advertised, regularly, punctually, and without any kind of misad- "venture. You express your admiration of the energy and power of organization "shown by the British India Steam Navigation Company and its officers in "keeping to their engagements under the strain suddenly put upon them, and "you are satisfied, on the whole, with the manner in which the firms selected by "you executed the order entrusted to them, notwithstanding the numerous "difficulties of detail consequent on the magnitude of the operation.

* * * * * * *

"The work is now over, and has been successfully done throughout. The "Government entrusted the details of its execution to you, and thus unavoidably "placed you in a new and difficult position, which required prompt decision and "immediate action, coupled with secrecy, and in which any mistake must have "been attended by very serious consequences, both to your own province and to "the people of Bengal, whose relief was mainly dependent upon it. By the "measures you adopted there has been no derangement of internal or export "trade in the purchase of the required supplies, and no delay or failure in their "delivery. The confidence placed in you by the Government has been fully "justified by the result, and the Governor-General in Council desires to record "his high appreciation of your services."

I shall conclude this chapter with a quotation from a resolution issued by the Government of India on the 6th March, which announced to all concerned the sentiments of the highest authority on the eve of the impending contest with famine.

"Active operations for the relief of distress having now commenced, the "Governor-General in Council reminds local officers that it is their duty to see "that the arrangements for the relief of distress are adequate within the area "under their charge, and that they will be held responsible that no deaths from "starvation occur which could have been avoided by any exertion or arrange- "ments within their power and the means placed at their command.

"His Excellency in Council is satisfied that all c[illegible]ne "accepted this responsibility, and that they will per[illegible]n the [illegible]duous r "imposed upon them with the zeal, ability, and self sacrifice which ha[illegible] "always distinguished the servants of the Crown and of the East Ind "Company in India in times of difficulty and danger.

"The Government has not prescribed the invariable use of any test "either by labour or by the distribution of cooked food, for the purpose of "determining who are fit objects for relief. Such tests are desirable and necessary "under certain circumstances. It is right that able-bodied men accustomed "to labour should, as a general rule, be required to work in return for the food "or money supplied to them. It is desirable that light work should be found "for others, where this can be arranged profitably and without obliging large "numbers of people to leave their homes. In dealing with certain classes "of distress, especially in towns, the issue of relief in cooked food may be "useful as a test. But stringent tests are inapplicable to those limited tracts of "country where, owing to the great failure of the crops and the absence of "private trade, the Government have, in accordance with their resolution of "the 7th November last, assumed the task of importing grain for sale and "distribution to the people.

"In such tracts the difficulty will be not to prevent undeserving appli- "cants from being relieved, but to ensure that sufficient supplies reach "those who require them; and, in addition to the modes of relief and the pro- "vision for the sale of grain specified in the instructions to Relief Committees, "grain should be freely advanced to zemindars and mahajuns under the "instructions already issued by the Government of Bengal, as well as to "cultivating ryots, where there is a reasonable probability of repayment, at "the discretion of the local officers, and with a due regard to the maintenance "of a sufficient reserve."

The succeeding chapter will show how the above instructions and all the previous orders were executed during the worst period of the distress.

CHAPTER III.

THE narrative has been continued up to the middle of April, that is, up to the time when the scarcity was approaching its full development, and when the relief operations were covering their entire extent with all their force. Before proceeding further I will pause to give in this chapter a statistical summary of the results of the estimates described in the last chapter as regards—

1*st*, the famine,
2*nd*, the relief operations,
3*rd*, the financial cost.

The first category relates to the famine itself. The area is divided into two parts, namely, the very distressed tracts, comprising a large portion of the districts of Sarun, Chumparun, Tirhoot, Bhagulpore, Purneah, Dinagepore, Rungpore, and Bogra, and the partly distressed tracts, comprising portions of the districts of Shahabad, Gya, Monghyr, Sonthalia, Maldah, Rajshahye, Pubna, Moorshedabad, Julpigoree, Burdwan, Beerbhoom, Bankoora, Manbhoom, Nuddea, and some scattered places not worth mentioning separately.

The following table shows the area of distress, the population affected, the maximum number of persons expected to need assistance from Government, the percentage of that number upon such population, and the quantity of Government grain allotted:—

1	2	3	4	5	6
	Area in square miles.	Population.	Number of persons expected to require assistance from Government at the worst season.	Percentage of numbers in column 4 on numbers in column 3.	Quantity in tons of Government grain allotted.
Very distressed tracts	20,950	10,700,000	2,805,080	26·2	330,000
Partly distressed tracts	19,159	7,064,650	918,484	11·5	74,000
Total ...	40,109	17,764,650	3,723,564	20·9	404,000

[illegible] grain above shown (404,000 tons) is that which, up to the middle of April, the Government of Bengal had undertaken to carry from the railway stations into the interior of the districts. It is exclusive of the quantity ordered for the reserve at Calcutta under the Government of India, which brought the grand total up to 480,000 tons.

The numbers of the villages, and of the houses to be inspected or visited for relief purposes, especially in the partly distressed tracts, could not be stated precisely enough for insertion in a statistical summary. But approximately it was calculated that the work would spread over 27,750 villages containing about 2,096,843 houses.

The area affected by the failure of crops has been stated to be about 40,000 square miles. It is not possible to state precisely the area of crops that were lost; but an estimate framed, district by district, on the best data available, shows that the loss must have been from 3 to 3½ million tons of food, a quantity equal to the average out-turn of 6 to 7 million acres of food-producing land. The vacuum in the supplies was, we may believe, filled by the importation of 1,000,000 tons of grain on the part of trade and of Government together, by the consumption of old stocks to an extent that cannot be stated, and by the cultivation of a very largely increased area with early food-crops, whereby a great quantity of food was thrown into the market during August and September 1874, two or three months before the time when the main rice-crop is usually available. Further, there was some compensation afforded by diminished consumption in consequence of the high prices.

The next table shows the means of transport with which the task was to be undertaken of carrying the 404,000 tons of grain, generally by rough and unmade roads, over distances ranging from 20 to 155 miles.

	European Officers of the Army.	Native Officers and Soldiers.	Carts.	Cartmen.	Draught bullocks.	Camels.	Pack animals, chiefly mules and ponies.	Country boats.	Steamers.	Number of main routes of transport.
Carriage belonging to the country ...	43	1,030	99,900	102,575	202,800	1,350	3,000	2,340	9	23
Government reserve transport train ...	45	1,086	4,250	4,250	10,000	.....	11,000	...	14	.....
Total ...	88	2,116	104,150	106,825	212,800	1,350	14,000	2,340	23	23

If the amount of transport, then, engaged by land and water, shall seem enormous, it is to be remembered that the figures represent the highest amount of transport in use or to be used at any one time. In most cases the maximum amount of transport remained in employ but for a short time, say, a very few weeks. About two-thirds of the aggregate was intended to be employed continuously for four months.

The statistics having been given of the numbers of persons to be relieved in some shape or other, of the Government grain allotted, and of the means and resources for transporting that grain, there remain to be given the statistics of the means for dispensing the relief and for distributing the grain.

The following table exhibits the numbers of the relief centres of various kinds:—

1	2	3	4	5	6	7
Central Committee.	District and Sub-divisional Relief Committees.	Organized circles under Government officers.	Sub-circles or groups.	Circles under private persons, European or Native.	Sub-Committees.	Total of all Relief Circles.
1	90	158	1,141	242	650	2,281

The relief centres then, great and small, amounted [illegible]. All of them had grain depôts and granaries, besides which were [illegible] depôts at the starting places of the main lines of transport. Altogether the number of depôts and granaries together was not less than 2,300.

The special administrative staff ordered or appointed to the relief centres shown in the last table may be classified as below. The average period for which this special establishment was to be employed was expected to be seven, perhaps eight months.

European superior officers.	Circle officers.	Native officers.	Grain store-keepers and other ministerial officers.	Private persons, European or Native, employed on relief.	Total of all grades.
102	158	1,279	3,395	2,026	6,960

The special establishments for relief were over and above the ordinary civil establishments of the districts concerned. The total number of men (6,960) represents men of training and education from the highest degree to the lesser degrees. But it is exclusive of messengers, watchmen, and menial servants, who were very numerous, and could hardly be specified numerically: the number of these, however, was believed to be not less than 9,800. If this last-named number be correct, the total numerical strength of the relief establishments alone must have amounted to 16,760 men.

As previously explained, there were medical establishments engaged for the relief centres, which may be numerically shown as below:—

European Surgeons.	Native Assistant Surgeons and Doctors.
5	136

Besides these, the ordinary medical staff of the distressed tracts were much occupied in attending the relief hospitals and supervising the administration of in-door relief.

As already seen, one of the principal modes of affording relief was employment on public works. The next table shows the various classes of public works then intended to be undertaken or prosecuted for this purpose, each column representing distance in miles:—

Relief roads.	Soane Canal works.	Gunduk embankments.	Northern Bengal Railway.
Miles.	Miles.	Miles.	Miles.
6,626	380	90	198

If the proposed length of relief roads should seem extraordinarily great, it is to be remembered that the work was for the most part to consist of throwing up embankments or preparing plain unmetalled roadways, partly also of repairing old roads, and that comparatively few bridges or culverts were expected to be built.

As already seen, one important class of works for the employment of the people consisted of tanks; partly constructing new tanks, but chiefly excavating the old village tanks, especially in north Behar. It was impossible to give any precise number of the tanks thus worked upon more or less, but the total number was expected to amount to not less than 2,500.

The public works shown above do not include any works of general utility or agricultural improvement, undertaken by private persons, European or Native, indigo planters, zemindars, and others. It was impossible to foresee exactly how much such private persons would be induced to do in this direction, though there was every hope and belief that much was being and would yet be done by them.

...on of the various public works exhibited in the last ... following establishments were employed. From these, however, ... excluded the establishments on the Soane Canal and Northern Bengal Railway, as those great works (though temporarily serving the purposes of relief) were, in the main, to be carried on irrespectively of the present famine. The table stands thus:—

Special Chief Engineer.	Superintending Engineers.	Executive and Assistant Engineers.	Overseers and Subordinates.
1	4	56	113

The extent of temporary lines of electric telegraph constructed in order to connect the principal relief centres with the regular telegraph communication of the country may be thus shown in miles:—

Number of principal relief centres connected.	Length of temporary telegraph lines in miles.
17	336

The labour undertaken by the Government having been thus summarized, there remains to be given the estimate of the cost financially. On the 13th February Sir George Campbell submitted an estimate of the expenditure to be incurred on the famine, which showed a net expenditure of £4,350,000. Immediately after assuming charge of the Government of Bengal, on the 10th April, I was requested by the Government of India to submit a revised estimate according to latest information, which was done on the 13th April. The net result of my estimate showed a larger expenditure than the estimate previously made, inasmuch as during the interval more grain had been bought, the Durbhunga railway undertaken, and the Government reserve carriage organized.

The revised estimate was generally accepted by the Government of India.

The following abstract gives the gross expenditure, according to the estimate of the 13th April, to be incurred before the end of the year 1874-75:—

	£
Special establishments	135,000
Promotion of private grain trade (on guaranteed railways) ...	340,000
Relief works	2,530,000
Durbhunga State Railway	200,000
Government grain purchase	3,784,000
Ditto transport	1,750,000
Government reserve transport train	186,000
Charitable relief	200,000
Grants-in-aid of private works	50,000
Advances to zemindars, traders, &c.	500,000
Total ...	9,675,000

But as a set-off against this gross expenditure large recoveries were expected to be made during 1874-75 and 1875-76, as shown below:—

	£
Sale of Government grain to relief labourers	1,530,000
Sale of ditto to the public	303,000
Sale of ditto to relief committees	150,000
Sale of reserve grain	378,000
Recoveries from ryots of value of grain advances	714,000
Recoveries of advances from zemindars and traders ...	450,000
Total ...	3,525,000

The anticipated net expenditure was to stand thus:—

	£
Gross	9,675,000
Less recoveries	3,525,000
Total ...	6,150,000

When this estimate was submitted, a reservation ... that the case involved extraordinary circumstances which ... foreseen.

The statistical summary given in this chapter does not exhaust t... statistics relating to the famine. It presents only a figured abstract of t... general situation as known in the middle of April, and of the detailed scheme of operations according as the event was expected to occur. The statistics relating to the event, as it actually occurred, will appear in the succeeding chapters.

CHAPTER IV.

THE circumstances of the famine having been narrated up to the 15th April, and a statistical abstract of the case as it then stood having been given, I resume the narrative from that date. It may be remembered that on the 8th April I had assumed charge of the Government of Bengal.

At length it was certain that the gravest of the apprehensions which had ever been officially expressed would be realized in the very distressed tracts. Some grounds for encouragement were not, indeed, wanting. In many of the less distressed tracts the harvest of the spring crops had proved quite as abundant as its early promise. The spring harvest was fair in the North-Western Provinces, and very good in the Punjab. Importation of food-grains from those quarters into southern and central Behar by private trade was going on largely, and was likely to go on more and more, all which would tend to narrow and restrict the area of distress. There were some early rice-crops (of inconsiderable amount) being reaped in northern Bengal. On the other hand, the showers hoped for in the spring had never fallen. The intermediate coarse crops sown by the people of the very distressed districts in February, in order to obtain some slight relief in the summer, were withering fast. There was no longer any hope that grain would or could be imported by private enterprise into these tracts. The private stocks of grain were believed by the people to be nearly exhausted. Prices were rising fast, and it was universally understood that they were prevented from reaching famine rates only by the trust of the public that the opening of the Government granaries would not be delayed. There was, on the whole, every reason to fear that the larger portion of the people in the worst tracts would be forced to look to the State for assistance, more or less, until August. The official investigations had penetrated to every village. It was proved that the class of destitute poor, and beggars, ordinarily supported by private charity, could no longer be sustained by these means, the donors of such alms being themselves in straits. It was found that the non-agricultural classes, weavers, workers in metals of all kinds, carpenters, artizans of all sorts, fishermen, menials, and others, had nothing to eat, and were wholly out of work; that the extensive class next above these, namely, the field labourers, and the small cultivators who occupy some land and eke out their livelihood by working on the land of others, had eaten up their little stores and were bereft of employment. It was further apparent that destitution was gradually creeping over other classes, such as the cultivators generally (with the exception only of the occupancy tenure-holders), and such as the Brahmins, whose habits and notions unfitted them for active work. Although the distress had been successfully checked in most places, the cases of starvation being very rare, yet in some places distress was discovered to have reached a critically dangerous degree, relief arriving only just in time to restore the emaciated, to resuscitate the fainting, and to avert considerable mortality.

The measure of the distress actually existing was at that period ascertainable by the numbers on gratuitous relief and on relief works, which numbers stood thus on or about the 15th April:—

Persons on gratuitous or charitable relief.	Persons on relief works.	Total.
116,471	1,185,448	1,301,919

[illegible] rising daily everywhere, and official warning had been received [illegible] man, places that a more rapid increase must be expected. In most of the distressed districts complaint and entreaty had been made by the cultivating classes to the effect that, as their subsistence until the next August harvest was running short, they might receive advances of Government grain. And in every possible way the people were making known to the officials their anxiety that the Government granaries should be opened everywhere without any more delay, for the sale of grain to the public, for payment of relief wages in kind, and for the general administration of relief. The Government granaries had been for the most part kept closed, partly in order that private trade might have the fairest chance possible, in order that the resources of private stocks might be tested by paying wages wherewith the people would buy their food, and that the arrival of the Government stores in adequate quantities might be secured, before opportunity should be given for very heavy demand.

There was no room for doubt that, while private trade was doing all in its power in many directions with the greatest public advantage, yet there were extensive limits of territory within which it was powerless, and in which there was a general demand beyond its means to supply. The payment of relief wages in cash, by stimulating purchases, had brought out private stocks till they were near depletion. The transport department had succeeded in bringing up enough supplies to meet any demand that could practically be made.

To postpone longer the general issue of Government grain, would be to aggravate the sufferings of the people. It was therefore decided that all gratuitous relief must be given in grain, except a small portion which might continue in cash; that all wages to relief labourers must be paid in grain, cash-payments being stopped as soon as might be practicable; that the relief officers need no longer hesitate to sell Government grain to the public, in all places where such selling had already been authorized, and should immediately apply for permission to sell in any place where the circumstances might seem to necessitate this measure under the rules; that the numerous applications from cultivators and ryots for advances of food-grain must be entertained, and, after enquiry, allowed in all cases where the authorities considered that there was a fair prospect of recovery.

Thus all the parts of the general scheme were brought into effect, and all the forces at our disposal were exerted. In succeeding paragraphs, it will be shown how the executive decision was carried out respecting each of the above points in order.

Before doing so, I must advert to the working of the relief circles and sub-circles, inasmuch as the execution of all orders depended on the circle system; and also to the proceedings of the regular Public Works Department in connection with that system.

The organization of the relief circles and sub-circles in one shape or other, and of the relief committees and sub-committees, as already described, had been by this time completed in all the distressed districts. The very numerous staff of officers and officials (set forth in Chapter III) had arrived at their posts. In the worst tracts every cluster of villages, from five to ten in number, was formed into a group with a native official, and a store of grain with its store-keeper; so that every village could be visited twice a week or oftener, and Government grain be within reach at a distance of two or three miles at the furthest. The several groups in each circle were being frequently inspected by the European circle officer and his assistants. The organization was simple in itself. Its real magnitude, and the difficulty of enforcing it, will be apparent only when the area and population over which it extended are borne in mind. The apportionment of the relief labourers between the circle officers and the Public Works Department had been effected. The relief roads had been visited by the several superintending engineers, and a certain degree of departmental method and check had been established.

The issue of rations in grain to the recipients of charitable relief was arranged without difficulty. The grain consisted generally of rice. It was necessary that, together with the rice, some other kind of grain or some vegetable and condiment should be taken. To enable these people

to purchase the accessories, a small portion, one-sixt[illegible] given in money. It was not found expedient as a rul[illegible] to iss[illegible]ooked prepared food, save in a few places. The investigation adverted to in Chapte[illegible] II had been finished, and the registers had been prepared of all fit recipient[illegible] of this relief. The tickets entitling the people named to gratuitous relief ha[illegible] been issued to each person or to each family. Those who were able to do any, even the lightest kind of work—weaving, spinning, or the like—had their tasks allotted. Those who were unable to take any care of themselves, were lodged in poor-houses, or placed under medical supervision. There was still, however, some difficulty in searching out all the fit objects of this relief. The superior officers of the circles, on going their rounds in the villages to see whether the registration had been completely done, would find here and there some feeble person not included in the registers. And at each weekly or bi-weekly inspection by the group or sub-circle officials, the nominal roll was swelling. In justice to the people, it must be said that but little imposture came to light. We had to guard rather against their holding back unduly, than against their coming forward improperly. Whether from shyness, or ignorance, or resignation, or despair, they often faced mortal danger in a manner which inspired both pity and esteem.

By degrees those persons who from caste, delicate nurture, social seclusion, or such like reason could neither work nor beg, were added more and more to these lists. In north Behar, the Tirhootea Brahmins form a very numerous class. Some few of them were induced to work for Government wages, by the persuasion of a relief officer who was himself a Brahmin. It is probable that the majority of them would, sooner than work, have drifted into a condition near to starvation. The local authorities deferred relieving these cases as long as possible, but gradually admitted them according as the imperative demands of safety might dictate. The people of this class, however, were, from a natural pride, often unwilling to be regarded as recipients of altogether gratuitous relief, and would endeavour to pay something, however small.

In the Burdwan division only was there any reason to take precautions against imposture. There the endemic fever had necessitated the administration of relief, medical or other, during several years past, and some classes had gradually fallen into habits of undue dependence on public charity. Here the issue of cooked-food served as an effective check in this Division.

It was ruled that the payment of wages of relief labourers in grain might be arranged in more ways than one. The most direct way was the issue of grain to the men. But the authorities might establish grain-shops at, or close by, the works, and issue money to the men, wherewith they would buy grain at these shops. Or the men receiving their wages in money might purchase their food at the nearest Government granary. About the time when these orders were being given, a difficulty with many large gangs of these labourers on the relief roads had sprung up in several districts, and more especially in Mudhoobunnee and north-eastern Tirhoot. These people had been paid on the plan of daily wages, which meant that a person—man, woman, or child—should labour all the working hours of the day, and receive a daily wage at rates fixed for men, women, and children, respectively. The rates being hardly higher than those of ordinary times, were very low in places of dearness and scarcity. This plan, though applicable to limited numbers, was found, when applied to very large numbers, to militate against any effective supervision by measuring up of work actually done; to fail in offering a reward to industry or imposing a penalty on idleness; to give birth to many petty abuses, and especially to afford opportunities of wrongful gain to gangmen who had to be selected from among the people themselves for watching the work of the gangs. During the first rush, crush, and stress of relief affairs, the introduction of the piece-work plan (which is much preferable) had not been practicable; but it was resolved to take the earliest safe opportunity of introducing it. The piece-work plan meant fixing a rate of payment for a specified amount of earth-work, measuring up the work actually done, and paying accordingly. The terms first proposed for the piece-work were quite liberal as compared with those which would be allowed in ordinary times, and even in these hard times

[illegible] ably able, industrious, and skilful person earning a subsistence. They were, however, hardly liberal enough in regard to the severity of out-door toil in the hottest season, to the induration of the parched up soil, to the feebleness and inaptitude of many of the people, and to the large proportion of women and children in the gangs. When they were promulgated, the ignorant people imagined them to be so hard as to preclude an ordinary untrained villager from earning subsistence under them. This notion was fostered by the gangmen, who thought by passive resistance to stop the substitution of piece-work for the daily wage, and thereby to prolong the opportunity of their own illicit gains. So they persuaded the people that to attempt piece-work on the roads was to fail to obtain sufficient food, and that it would be better to stay at home and languish there than to starve abroad. In many cases they even insinuated that the Government was tired of supporting the people, and that the piece-work was only a pretext for making the relief-labourers leave the roads, and so for closing the works. All this resulted in the people deserting the works in very large numbers. The total number of persons who thus deserted in various places and on various dates about this time was not less than 350,000. A certain number, some thousands in all, who were either professional earth-diggers or were apt at labour, remained on the roads to do the piece-work. For a while it was naturally believed that the hundreds of thousands of deserters must all come back to the works, inasmuch as they had no other means of living. But soon the relief circle officers reported that tens of thousands of persons having left the roads had returned to their homes and were staying there in apparent destitution, perhaps under some misapprehension. It was found on enquiry that these people were existing on the verge of starvation, under the idea either that they had no chance of earning their bread on the roads, or else that the works had been closed against them. Unless some remedy were immediately adopted, extensive mortality must ensue. These misapprehensions were soon rectified, and the labourers were too glad to return to work and pay. Opportunity was taken to render the terms of the piece-work more liberal, and the local authorities gradually, but firmly, substituted this system for daily wages almost everywhere. At the same time the wages were paid in grain. So many pounds of rice were given for so many cubic feet of earth-work measured up.

After a time, the effect of this change was visible in the behaviour of the relief labourers. They found on trial the premium which piece-work offers to the industrious who choose to work during extra hours. Practice fast improved their skill and aptitude. The long summer days enabled them to labour for many hours out of the twenty-four, and so to earn an amount from which they could find present sustenance, and save something against the rainy season when the works would be closed. Many men, whose wives and children had been working on the roads, would now earn alone enough for the household, and would keep their families at home. Very many, too, managed to earn in a few hours enough for daily food, and spent the remainder of the day preparing their arid fields in the hope of showers. The majority of the people were spurred and stimulated to a degree of perseverance and energy, which would hardly have been credited had it not been fully demonstrated. Despite incessant toil in the fierce heat, the physical condition of the mass improved week by week. As their laboring and earning powers increased, it was thought safe for them, and just to the State, to render the piece-work terms somewhat harder. To this they submitted without complaint. The piece-work system was seen to be open to one particular objection, in that a practised or professional workman earns more than need be allowed to him as relief. Any terms which are favorable enough for the unskilled and inefficient (who are the great majority), must prove too favorable for the skilled few. It was decided that this objection could not be obviated, and that no exception could be made as against these individuals, especially as their example instructed the mass of the relief-labourers in workmanlike habits.

While the number of persons thus assisted rose everywhere, and in some places rapidly, no such extraordinary rush of people to relief centres occurred, such as that related in Chapter II as occurring in Tirhoot during the latter part of March. However, some rapid assemblages did take place

in the north-west corner of Chumparun, in parts [illegible] in Julpigoree, near Cooch Behar. And in some parts [illegible] Mozufferpore) distress was found to have brought the villagers to [illegible]order destruction, when succour arrived to save them. In Julpigo[illegible]e there was serious rioting, though of very brief duration. In no other district did any breach of the peace occur.

About this period some disappointment began to be felt at the amount of labour on the large engineering works not being larger than it was. The Gunduk embankment, indeed, being very favorably situated in respect to distressed tracts, did attract almost as many labourers as could be advantageously entertained—45,000. But the Soane Canal and the Northern Bengal Railway never received the desired complement. The highest numbers of labourers on these works may be thus stated:—

Soane Canal ...	...	...	41,000
Northern Bengal Railway ...		...	22,000

Unsuccessful attempts were made to induce bodies of laborers from Sarun to resort to the Soane Canal, and from the south of the Ganges, Monghyr, and Sonthalia to the Northern Bengal State Railway. Frequent injunctions were sent to the local authorities to send labourers to that railway, but without much result. These numbers would have been greater had there been no other relief work. Some men who might have been induced to leave their homes and go to a distance for these great works, preferred lesser works close at hand. But this objection cannot be obviated, when, from general famine, it has become necessary to spread a relief system over the country. The majority of relief labourers cannot migrate to a distance for a short time; they have their families, their fields, and their concerns at home, all which will in a very few weeks urgently need their presence. Their time would be lost in going and coming, and unless they received bounties (which are otherwise objectionable) they could not subsist. For them, therefore, if no works but the great engineering works are open, there will be no relief at all, and they must perish. But if the numerous lesser works are open for them (and they are the vast majority) it is impossible to prevent the few who could migrate from taking advantage of the works near at home. Nor is this wholly disadvantageous. For these are the very men who, having skill, show the unskilled multitudes how to work, and thus render the relief labour more productive.

It is not to be forgotten, indeed, that even in ordinary years, if State works, whether for relief or other purposes, were to be opened in the month of May, they would attract a certain number of people. But no such numbers, nor a fraction of such numbers, would ever be attracted to out-door work at this burning season, as those which flocked to, and lived upon the relief works in May 1874, unless they were really suffering from hunger.

The applications from cultivators and ryots for advances of food-grain became so very numerous, that it would be impossible to dispose of each separately. Therefore in the more distressed tracts an enquiry was instituted by the circle officers, village to village, as to what cultivators desired and really needed such advances. A registry having been thus made of fit recipients, the circle officers granted the advances. The amounts in various cases differed according to circumstances, representing food for the cultivator and his family for one month, or two months, or even more. Sometimes the cultivator was able to pledge some little property as security; or the cultivators of a village would be joint personal security one for the other; or the landholder and zemindar would be security for his cultivators. The advances were allowed to be made in all cases where there was a reasonable probability of repayment according to the principle laid down by the Government of India on the 6th March, in the resolution quoted at the end of Chapter II. The terms of these advances were that the price of the grain was to be repaid, half by March 1875, and the remainder by March 1876. The price at which repayment was to be made was 15 seers per rupee, and subsequently the price was cheapened to 18 seers per rupee in the case of advances made on the security of zemindars. According to the prices of

...ave to sell at least two maunds of rice in 1875 ...ls for repaying the price of one maund advanced in 1874. Though no interest is charged on Government grain advances, yet the terms to the ryot will practically be cent. per cent. interest in kind for the loan of the grain for two years. Although the Government, receiving back its principal only in cash, does not of course reap any such interest; still it will be seen that the terms of these advances were made as favorable for the public treasury as they could be with regard to the safety of the people.

As the cultivating season approached, on the falling of the summer showers which usually precede the setting in of the rains, the policy of making these advances became seriously important. The men must be tilling their fields, and would be thereby precluded from earning wages elsewhere. But what if there should be no food to be bought, or if they should have no means of buying it, or if, to raise the means, they should have to part with their little capital, their seed-grain and their cattle? These questions involved the prospects of the future crops.

The advances tended especially to prevent the consumption, for food, of grain which ought to be reserved for seed. If they were withheld, there was every reason to fear that seed-grain might not be forthcoming for the next sowings. Some quantity of seed-grain was known to be in the hands of the trade. It was desired to get some of this into the possession of Government for distribution, in event of need, to cultivators. The local officers were authorized to exchange some of the Government food-grain for this seed-grain, which was accordingly done to a limited extent. Some quantity of seed-grain was also purchased by Government in Calcutta for the use of the distressed districts.

While the State was thus doing its utmost for the relief of the people, the efforts of the zemindars and landholders and nearly all the principal natives who hold land (which have been already alluded to in Chapter II) were exerted more and more, in respect to the digging of tanks, to advances to the tenantry, and to the postponement of rent-collections. The conduct of many zemindars was honourably conspicuous. There were, indeed, omissions, short-comings, and failures, on the part of individuals, all which may furnish matter for regret. But when the enumeration comes to be made of the good deeds done by the zemindars as a body during this famine, the catalogue will be found to be extensive and creditable.

I must now advert to the sale of Government grain. Although in some few parts of North Behar there was a rush of purchasers on the opening of the granaries for these sales, yet during April the whole amount sold was small—less than 10,000 tons. The people were allowed to purchase direct from the Government granaries. Generally, however, the grain was sold to dealers on the condition that they retailed it at the fixed rate to the public. Often, too, it was sold to wholesale dealers at a slight advantage over the retail rate to enable them to distribute it among the retail dealers. The prices were slightly modified in favour of the people as compared with that first fixed (one rupee for ten seers of cleaned rice to be sold to the consumers), and were fixed at rates from one rupee for ten seers to one rupee for twelve seers. The rates then prevailing at Calcutta, Dacca, Patna, and other great marts were somewhat cheaper. It was with reference to these market rates, and to these alone, that the prices of the Government grain were regulated. The determination of any artificial standard of price was avoided; and the principles already explained in Chapter II were adhered to.

It will here be proper to state the tracts where the sale of Government grain was and was not authorized. Such sale was authorized over the greater part of Tirhoot, Chumparun, North Bhagulpore, North Monghyr, parts of Purneah, Dinagepore, Rungpore, Maldah, and Bogra. In the above districts the people largely availed themselves of the privilege. Sale was subsequently authorized in very limited tracts of Manbhoom, Rajshahye, Moorshedabad, Sonthalia, Julpigoree, Sarun, and Bankoora, and at four places in Gya. In these last named tracts the people availed themselves but slightly of the privilege. Sale was never authorized in south Tirhoot, Shahabad, Burdwan, Beerbhoom, Hazareebagh, Pubna, and in parts of Sarun, Purneah, Dinagepore, and Rungpore. On the

whole the sales were authorized in about one-third of the ... districts, and were never authorized in the remaining two-thirds.

Up to the 10th of June, the total sales of Government grain in all the distressed districts amounted to only 47,389 tons.

Native opinion may be regarded as having an important bearing on the question whether these sales really interfered with trade. I questioned the native grain dealers at all, or nearly all, of the principal marts in Behar and Bengal, and found them unanimously in favour of the measure, provided that it was carried out under the conditions prescribed by Government. In some places the traders urged the measure on our consideration, and constituted themselves advocates on behalf of their suffering fellow citizens. From their own repeated declarations it appeared that they were not afraid of Government interference. From no persons have I heard stronger expressions of gratitude, or more distinct assertions that the State had saved the fortunes of the traders by saving the lives of their constituents, than from the principal native merchants of Behar.

The best illustration, however, is that derivable from the facts of the grain trade during the summer of 1874, which may now be summarized.

The districts in which the sales of Government grain was not authorized, or was kept within narrow limits, were supplied largely by private trade. The concession whereby Government defrayed half the railway freight on grain, and so enabled private importers to carry their grain by railway at the rate of about 3½ pies (less than a half-penny) per ton per mile, produced an important result in the shape of large private importation into the distressed districts. Rice from Bengal, wheat, barley, maize, millet, and other grains from northern and central India, were brought by rail to all the chief marts on or near the line of the East Indian Railway. For some months the importation of private grain into Behar alone by railway averaged from 1,200 to 2,000 tons a day. The total of private grain imported into Behar by railway, from October 1873 to October 1874, amounted to—

		Tons.
From Bengal upwards	...	157,226
„ northern and central India	...	225,952
Total	...	383,178

The grain imported into Behar by the Ganges during the same period was registered at Sahebgunge and found to amount to 44,886 tons. The rice imported from the eastern districts into northern Bengal came by many different channels, and could not be registered or reckoned as it passed. The total importations of rice from Bengal by rail and river into Behar have been seen to have reached a total of 202,000 tons. It is estimated that about half as much more (101,000 tons) was carried into northern Bengal (Rajshaye) from the neighbouring granaries of the eastern districts. According to this estimate, a total of 529,000 tons of grain must have been carried by private trade into the distressed districts. This large total shows that private trade has been active beyond the anticipations of most people, and has fully justified the confidence placed by the Government of India at the beginning of the affair in the resources and enterprise of private dealers. It has been already explained that prices were everywhere so high, that private traders could not afford to carry grain by long land journeys to markets far from the railways or great rivers; and that consequently private importation scarcely penetrated to the most remote and most distressed parts of north Behar and northern Bengal. But the private importation, as just shown, fully supplied the broad and densely peopled tracts near the railways, and left the Government free to concentrate its supplies and resources mainly on the most distressed tracts.

It may be interesting to note here the total quantity of grain, public and private, imported into the distressed districts during the year 1874. The total Government importations (exclusive of the reserve in Calcutta) amounted to about 460,000 tons; this, together with 529,000 tons of grain carried into the country by private dealers, makes a total of about one million tons of food, a quantity sufficient to support about eight million persons for six months. Of the Government stocks, about 105,000 tons will, in consequence of the favorable character of the present autumn season, remain unexpended at the end of

ısures will be for the most part at an end every-
... ıe L van country.

It is a gn o. the great resources of the provinces of India that, twithstanding the drain on northern India and Burmah during the past ten ..ıonths, the price of food in those countries is at the present moment about as cheap as in ordinary years.

While all parts of the general relief scheme were in force during April and May, causing a present drain on the Government granaries, with the prospect of a still heavier drain from and after June, the efforts of the inland transport department were strained to the utmost degree of tension. Some of the European contractors, those in Chumparun, north-west of Tirhoot, and north Bhagulpore won the highest credit by their vigorous management and unfailing punctuality, performing their engagements some weeks before the appointed time. The Native contractors in Sarun, Purneah, Maldah, and Dinagepore did almost equally well. Delays however came about in Rungpore and in Manbhoom, partly because the local officers persevered in their endeavours to obtain carriage without the aid of contractors, and partly because cholera attacked the transit routes. Providentially the cholera soon ceased, and the other obstacles were soon overcome by the despatch of experienced transport officers to the spot, with authority to make contracts.

In eastern and north-eastern Tirhoot, all the troubles which had been foreseen as incidental to transport work, sickness and mortality of cattle, scantiness of water, poorness of fodder, roughness of roads, breaking up of carts, large deficiency of carriage below the amount which the contractors had expected to bring into the field, falling off in the amount of carriage which had at the outset been forthcoming, actually threatened us in combination, and in their totality assumed formidable proportions. The aggregate of losses and deficiencies was estimated as being represented by a failure of 14,000 carts and 28,000 bullocks. Had there been no additional resource available, it would have been difficult at this time to avert disasters on this, the most important of all the lines of our operations. There would, indeed, have been no general resource to fall back upon save the water-carriage during the coming rainy season, which resource might not prove adequate. In this emergency the railway from the Ganges to Durbhunga, and the reserve transport train from northern India, came into use.

The railway to Durbhunga began to carry grain from the last week in April, and by the second week in June, when it was first invaded by the floods, and ultimately broken up, it carried 31,213 tons of grain, 8,031 tons of fodder, besides 7,530 tons of coal and material. After the closing of the line the rolling stock and permanent-way material remained available. The actual cost of the temporary line amounted to about £100,000, exclusive of the cost of material which remained in hand after the grain transport was done.

The Government reserve transport train made its appearance in detachments, the first of which rendered assistance in carrying materials for the completion of the Durbhunga railway. One detachment after another came on the scene, consisting sometimes of carts and bullocks, sometimes of pack mules and ponies. Though originally intended as a reserve, this transport train was regularly used immediately on its arrival. Each detachment on crossing to the north bank of the Ganges was, without an hour's delay, employed to make up for losses or deficiencies in the contractors' carriage. As the exigency grew intense towards the end of May and the beginning of June, the pressure upon the bullock carts, and especially on the mules and ponies, became excessive, and many animals sank under the toil at the most inclement season of the whole year. If any misgiving had ever arisen as to the necessity of collecting this costly reserve, it was dissipated by the event. The necessity was abundantly proved at this critical and crucial juncture. The presence of the reserve transport train was indispensable to the safe conclusion of the operations in Tirhoot.

The main object during May was to fill every depôt at relief centres, and every granary in the groups of villages, with its allotment of grain while the roads and pathways were open, and the dry rice-fields afforded easy passage. Besides this, supplies were lodged beforehand in most of the principal villages enough to last for consumption during the rainy season. The time was foreseen when

the rains would hinder the despatch of convoys, wou... would clog the roadways, and would flood the rice-fiel... Pachoree ... nse

The exertions of the military officers, both those eng... affairs of the contract transport and preparing the transit routes, ... those i... charge of the Government reserve transport train, were unremitting, and caused a degree of hardship and exposure to a fierce climate, which taxed all their powers of physical and mental endurance. The business which devolved on the transport department of ensuring the due arrival of so many convoys, passing by so many routes to so many diverse points, was very complicated. It was aggravated by the stress arising from urgent haste, but it was discharged with a degree of precision and punctuality most creditable to the officers concerned. Equally great was the endurance and self-sacrifice evinced by the officers in charge of the depôts on both banks of the Ganges, and equally commendable was the despatch of business on their part. The affairs at the two great depôts on the north bank (Bunker Ghât, opposite Patna, and Chumpta Ghât, opposite Barh) were extraordinarily complex, and were disposed of by the officers in charge with remarkable skill, and with entire regularity, notwithstanding the pressure of speed and expedition, with the discomforts, the blinding glare and the dusty heat of an unsheltered situation.

The total quantity of grain ordered to be transported to the interior from the north bank of the Ganges by the middle of June, amounted to 343,750 tons, of which about 340,000 tons were carried within the appointed time. The small residue arrived within a short time afterwards. During this period, although the cattle suffered severely in parts of north-east Tirhoot, there was no general sickness, murrain, or epidemic. The Government fodder as it arrived proved most useful, and the veterinary establishments in the field hospitals tended the ailing and injured animals.

The weather during the months of April and May was unusually dry. The showers to be looked for at that season never fell; much fear was felt lest a dearth of water should supervene. The running streams, so frequent in north Behar, were at the lowest ebb. The water in wells, usually a few feet below the surface, was reached only at a considerable depth. The tanks were drying up, but were dug out deeper and deeper by the relief laborers till water was obtained. Thus a supply was maintained in all the villages. These village tanks are in constant use with the mass of the people, and are very numerous all over the country. The improvement of them in a manner, which must be gratefully appreciated for many years to come, will be one of the results of the relief operations.

The public health was good, probably above the average of ordinary years, throughout this drought and heat. No epidemic sickness broke out. The people were spared the visitations of cholera and small-pox which had been so much dreaded. Relief had been so fully dispensed that the general diseases which are known to follow in the train of famine never supervened. The stronger classes, mostly to be found on the relief works, were in good physical condition. The weaker classes, mostly to be found on the gratuitous relief lists, were, on medical inspection, found to exhibit all the miserable symptoms which arise from want of nourishment. But their state improved week by week; and the medical reports constantly showed a decreasing percentage of persons emaciated and depressed, and an increasing ratio of persons in ordinary condition. Reports of death from starvation were very rare. The authenticated cases numbered only 22 from the commencement of the scarcity to the 20th June, which may be taken as the culminating point of the distress. The question whether more cases have occurred which never came to light, has been discussed in Chapter II. Whatever may have been the truth in this respect at the outset of the famine, it is probable that extremely few deaths could have occurred beyond those officially reported after the middle of April, inasmuch as the whole country was patrolled, officials being within reach of every village, and every hamlet, almost every house, being visited or inspected.

The health of the civil officers and officials engaged in relief was, on the whole, excellent, notwithstanding the mental and bodily strain caused by their devoted exertions during the worst season, and out-door exposure in all hours of the hottest days. Their self-denying zeal, their earnestness

f, their patience in dealing with the people, were

[illegible] ualties among these officers which had been anticipated did [illegible] ill it was thought that many accidents and misfortunes of this sort would happen during the wet season. The formation of a reserve staff of officers of all grades was commenced, and was calculated at a strength of ten per cent. upon the existing relief establishment. Officers in different parts of India were told off to join this reserve immediately on their services being called for. But happily the health of the relief establishment continued so good, that very few of the reserve officers had to be demanded.

The month of June was ushered in amidst public anxiety and gloom in north Behar. The drought was then excessive, and its continuance for another season was much thought of. The people seemed to be making up their minds for a prolongation of trouble. The existence, or otherwise, of private stocks of grain was universally discussed. If they existed, the holders were certainly keeping them back. Prices were steadied by the Government stores, now seen by every one to have arrived in adequate quantities. But for this, famine prices with all their fatal consequences must have prevailed. Indeed, despite all precautions, they did for a brief moment prevail in several places.

Although the arrival of the allotted quantities of Government grain before the setting in of the rains was assured, still the contingency was foreseen of having to send additional quantities by water during the rains when the rivers had risen. With this view a special examination of the navigable rivers in Behar and north Bengal had been made by an engineering staff, experienced in respect to inland navigation. Small light steamers (of 3½ feet draught) four in number, with barges, had been specially constructed in the Calcutta dock-yard. Ten such steamers with barges had been sent out from England. Four more small steamers, with five barges, had been obtained in Bengal and Madras. Canoes had been obtained from the forest department in Oude, and the services of a large number of the river craft of the Ganges had been retained. The strength and composition of this flotilla may be thus stated—

Steamers.	Barges.	River boats.	Canoes.
18	22	4,000	800

A portion of this water-carriage was to be stationed at those points on the Ganges where the several main affluents and their tributaries join the great river, namely—

	Steamers.	Barges.	River boats.	Canoes.
At Hajeepore for the Gunduk river system of Chumparun and south-west Tirhoot	4	5	750	...
At Khagurriah for the river system of east Tirhoot and north Bhagulpore	7	9	1,500	800
At Godagaree for the Mahanuddee river system of Malda and Purnea	4	5	1,000	...
At the Burral river for the Atrai river system of Dinagepore and Bogra	3	3	750	...

By the water-carriage were despatched some quantities of fodder and of grain which the land transport was not able to carry; also such amounts of grain as were despatched after the setting in of the rains in addition to the original allotments. But inasmuch as the quantities sent by land proved in the main amply sufficient, the powers of the flotilla never were exerted to the full. The steamers sent from England, as well as those built in Calcutta, proved (with some slight exceptions) suitable and effective vessels for inland river navigation.

It is to be remembered that the number of vessels of all kinds last mentioned is over and above the number of vessels mentioned in Chapter III.

It has been mentioned that many hundreds of temporary store-houses had to be erected for the reception of Government grain. These granaries were of all sizes, and contained from 4,000 tons down to half a ton each. They were for the most part built of wood, mud, matting, and straw, according to the custom of the

locality. During the dry months only two of these [illegible] by fire. Before the beginning of the rainy season, sele[illegible] to inspect every granary containing 400 tons or upward [illegible] were completed by the appointed time. Occasionally defects of [illegible] site were discovered, and some few granaries were found to be insufficiently raised from the ground, or to be not quite water-tight. The inspecting officers caused all such defects to be remedied at once; and the Government grain has been almost everywhere kept sound and wholesome throughout the rainy season.

In Tirhoot during June it was deemed prudent to increase the provision of Government grain from 154,000 tons to 180,000 tons. Subsequently in Sarun the distress among the ryot classes was found to be spreading more widely than had been expected when the estimate was made in February, and at the earnest request of the Collector, the allotment was raised from 19,000 tons to 34,000 tons.

A general permission was given to pay in Government grain the wages of the lowest grades of the relief establishments, whenever the recipients might prefer that mode of payment.

The fortnight between the 4th and the 18th June was the worst period of the famine, that is to say, the period during which the greatest amount of assistance had to be afforded by Government to the people. The approximate ascertainment of the total number of persons who, in some shape or other, received such assistance is a matter of great interest. Although the number of persons on charitable relief and on relief works were known exactly, the numbers who were assisted by sales and advances of Government grain could only be made out by estimate and calculation. It may be well here to quote the statement which I presented at the time (7th July).

"In order to estimate the total number of persons receiving assistance of "some sort during the first fortnight of June, we have the following data to "form a basis:—

Total number of relief laborers	1,770,732
Total number of persons on charitable relief	401,959
Total grain expenditure, in maunds, of first half of June ...	843,000

"Thus we have 2,172,691 persons receiving relief, quite irrespective of "those who are living on advances or purchases of Government grain. The "amount of Government grain disposed of during the fortnight would give "three-fourths of a seer a day to 3,401,900 persons for a fortnight. But among "the people who consumed Government grain were all the persons on charitable "relief, and a large portion of the labourers. The district narratives show "that by the end of the first fortnight of June the practice of paying all "labourers in grain, though largely introduced, had not been fully carried out. "The Bhagulpore return is the one which best distinguishes between sales to the "public and those to labourers; and that shows 98,228 maunds sold to the "public, as against 25,628 maunds sold to labourers. All the district narratives "show that the non-labouring public are the chief customers at our granaries.

"It would therefore be probably within the truth to take one-half of the "persons supported by Government grain as being outside the relief labour and "charitable relief lists. By this reckoning the total numbers receiving assis-"tance in one shape or another would be—

Labourers and paupers as above	2,172,691
One-half the consumers of Government grain ...	1,700,950
Total ...	3,873,641

"The best estimate that we can now frame shows that the number at the "worst period was 3,900,000 persons receiving assistance of some sort."

As stated at the time, this statement, though very large, may have been slightly under the truth, certainly not above it. It apparently agrees, as nearly as could be expected, with the estimated number given at the beginning of April, as shown in Chapter III. The general percentage of this number on the population affected was seen in that Chapter to be 26 per cent. in the most distressed districts and 11½ in those less distressed. The ratio of course varied

any places less than that above stated; but in the ar it stood as high as from 50 to 75 per cent.

wal arther mode whereby assistance was rendered by Govern- ent, wa… could hardly be included in any particular statement presented at that time, namely the cash advances made by Government to individuals, European planters, native traders, and others, for the importation of grain, and to landholders and zemindars for agricultural improvements. These advances of cash went on, month by month, till they reached the sum of forty-six lakhs of rupees, or close upon half a million pounds sterling. How many persons virtually derived their subsistence from this source, it is impossible to say. But the sum was enough for feeding 500,000 persons for seven months; and that number ought at least to be added to the 3,900,000 given in the above statement. On the whole, then, nearly four and a half millions of souls must have been receiving assistance, directly or indirectly, from the State at the worst period. Under this view of the case, it must be admitted that the actual distress did exceed the estimate. But in reference to the uncertainties of the case, the difference between the estimate and the probable actual is not great.

CHAPTER V.

THE narrative has, in the last chapter, been carried on to what may be termed the culminating point of the famine. In this chapter gradual decadence and ultimate extinction of the famine will be described.

The rains began about the 25th May in eastern Bengal and extended to northern Bengal, and thence to Behar, where they set in about the 5th June. They hardly began in southern and south-western Bengal till a fortnight later. They continued abundantly in northern Bengal and Behar till the 15th July.

During this period it became apparent that, in the distressed districts, the agricultural classes, ordinarily prompt and industrious on the occasions when a change in the season favours their work, were on this occasion putting forth extraordinary efforts. The land was ploughed and prepared with remarkable rapidity. The husbandmen seemed possessed with a desire to free themselves from dependence on the State by resuscitating their own means of subsistence. Some complaints were made by individual employers of the difficulty of attracting men from the relief works. Facilities were immediately afforded for obtaining the men required. In one part of north-east Tirhoot suspicion arose that some men were lingering on relief works instead of betaking themselves to their fields; this was immediately remedied. An unusually large area was sown with those crops—the early varieties of rice, the maize, the coarser millets and pulses—which would be reaped in August, and which would yield the speediest return. Much land was sown with these crops, which, from exposure to inundation, was not properly suited for them, and in which there was consequently great risk of the produce being destroyed. Still the cultivators ran that risk in the hope of obtaining resources by an early date. So intent were the people on the early sowings, that doubt began to arise as to whether due attention was being given to the preparations for the main rice crop to be reaped later. It was soon found, however, that this crop was being sown to the fullest extent possible.

Fear had sometimes been felt lest the administration of relief on a great scale should tend to demoralize a people chiefly agricultural, and to relax their zeal for husbandry. Such fear was immediately dissipated, inasmuch as the severe lessons of the famine had evidently taught them to work harder than ever, and to make the most of the first chance afforded to them by the seasons for recurring to self-help.

There was no longer any anxiety regarding the supply of seed-grain. Relief reaching to all classes had preserved the merchant from the temptation to sell his stock of seed to the hungry for food, and had deprived the cultivator of any motive for eating his seed-grain. Manifestly there was plenty of seed-grain in the country.

On the 3rd June I reminded the officers that they should lose no time in discharging from the relief works all those who might reasonably be expected

to find private employment in agriculture. Every effort should be used by the authorities for the furtherance of this object.

It was soon found that the cultivators and occupants of land did the work in their fields with their own hands to an unusually large extent, in order to save the cost of employing labour. Though a great number of field labourers found employment as usual, still, from the above cause, a considerable number remained unemployed, which circumstance, as will be presently seen, retarded the reduction of the relief labour lists.

Within a fortnight from the culminating point of the distress (some time between the 10th and 20th of June), the aggregate number of persons on charitable relief and relief works fell from 2,175,605 to 1,418,783. But while the number of those on relief works went on decreasing, the number of those on charitable relief went on increasing. Inasmuch as the number pertaining to relief works was much more important than that pertaining to charitable relief, the net decrease on the total of the two numbers was very considerable. The progressive net decrease, as the rainy season advanced, may be shown thus:—

Period.	Persons on charitable relief.	Persons on relief works.	Total.
15th June	404,903	1,770,732	2,175,605
1st July	525,620	893,163	1,418,783
15th „	643,524	638,762	1,282,286
1st August	749,973	453,486	1,203,459
15th „	647,550	426,738	1,074,288
1st September	591,829	395,402	987,231
15th „	444,466	331,982	776,448
1st October	358,446	270,650	629,096
15th „	213,063	114,647	327,710
31st „	100,000	50,000	150,000

The numbers under both headings (charitable relief and relief works) fluctuated considerably in many districts. The course of decrease was sometimes arrested and turned again towards increase. For some time after the setting in of the rains, anxiety arose by reason of the constant growth of the numbers on charitable relief, and the continuance of a comparatively high number for relief works; so much so, that orders were again issued in the beginning of August for further efforts being made to discharge labourers from relief works and transfer them to private employ in the fields; also for a fresh scrutiny of the rolls of the gratuitous relief with a view to reduction. Injunctions, too, were given for further vigilance and economy in the issue of Government grain, lest the drain upon the granaries should be excessive. But soon afterwards causes arose tending to maintain both distress and relief at a high degree; and these must now be mentioned.

The rains of July, though copious in Orissa, in eastern and northern Bengal, and Behar, were very scanty in southern and south-western Bengal, comprising the partly distressed districts of Burdwan, Bankoora, Beerbhoom, Moorshedabad, and Manbhoom, and also the district of Hooghly, which began to suffer so much as to be counted among the distressed districts. In all these places cultivation was delayed, the usual demand for field labour failed to arise, prices became dearer, private charity ceased to support the destitute poor: in short, distress spread fast, and with it the relief work expanded, much beyond the original estimate. Thus the trouble of south-western Bengal assumed during the summer a prominent position in famine affairs, much beyond that originally contemplated. The additional allotments of Government grain for these districts were drawn from the reserve at Calcutta. The grain, though issued for charitable relief, for wages of relief labour, and sparingly for advances to

...sold to the public (notwithstanding many applications, ...rect or ...rect,) as these districts are so situated as to be able for the most part to rely upon sufficient supplies of food being imported by private trade.

The prices of food-grains, though cheaper by one-sixth or seventh since the commencement of the rains, remained dear,—about double the ordinary rates for the season. There was no prospect of further abatement until the early harvest should be reaped towards the end of August. Large quantities of private grain continued to be imported (from 800 to 1,200 tons a day) by rail into Behar from Bengal and from northern India, especially from the Punjab. These supplies were taken up for the tracts on either side of the Ganges, and no share of them ever reached the upper parts of Tirhoot and Chumparun. On the other hand, when the navigation became easy on the rising of the rivers, but little private grain arrived from eastern Bengal; and this particular traffic, from which so much had been hoped, proved comparatively insufficient. Throughout Bengal the native grain merchants were disposed to hold their stocks, and to refrain from selling until the prospect of the coming harvest should be more clear.

From the setting in of the rains the relief circle officers did their utmost to carry out the instruction to discharge all able-bodied persons of either sex from the relief works. As already seen, some nine hundred thousands were so discharged or went away of their own accord within a fortnight after the setting in of the rains. But there was no employment available save field work, and that had become more restricted than usual, as already explained. Large numbers of men not belonging to the agricultural class, and still larger numbers of women and children, were unable to obtain either private employ or any custom in their own business, and were necessarily retained on the relief works. Numbers, again, were able to find work in the fields for a short time only, and that on low wages. This work over, they were forced to return to the relief works. Many, however, who were thus situated refrained from returning to relief, and sustained themselves by the surplus earnings saved by them during the active season on these works. In general terms it may be affirmed that those who could manage to support themselves did not resort to relief.

The situation for those on charitable relief before the commencement of the rains had not subsequently improved. It had become gradually worse for those who were verging on destitution. As to the higher castes, who were unsuited for manual labour, times were operating more and more hardly against them as their little resources were drained. Numbers therefore fell from these classes into the class of recipients of public charity. It is further remarkable that very many able-bodied men, who earned a reasonably good living on the relief works under the piece-work system already described, supported infirm and helpless relatives not of their immediate households. But these men, when discharged from the relief works, resorted to the fields and received the minimum wages for which such service was procurable. With such scanty earnings, and with very high prices, they were unable to support their destitute and helpless relatives, who consequently came upon charitable relief.

The rains of July sufficed to secure good early crops for August and September everywhere, except in parts of south-western Bengal. As these were reaped, the effect on the grain markets was perceptible to the benefit of most classes. The accession of new grain from this source (at the best sufficing to sustain the people for a short time only) failed to lower prices to the degree that might have been expected, by reason of a fresh trouble which was arising, and which must be described.

As the season advanced, the rains, instead of becoming heavier, according to their usual course, became lighter.

From the end of the first week in August to the end of the first week of September little rain fell anywhere in Bengal or Behar save on the line of the Ganges, in the districts of Monghyr, Bhagulpore, Purneah, and Maldah. Thus August, which should have been the wettest month in the season, proved to be an extraordinarily dry month in most parts of the country. Nor was there any rain during the first days of September. At that time the greater part of the principal rice crop (for the winter) remained to be transplanted. This crop

is sown in seed-beds among the fields. These beds become ripe ... August full of seedlings. The tender plants are then rapidly ... into the surrounding lands, which should have become very wet from constant rainfall and flooding. But now the first week in September was passing and yet the seedlings could not be transplanted, because the lands were dry, the soil in many places cracking into fissures from the drought. The very seed-beds were beginning to fade or wither. The transplanting had been already delayed to an extreme degree. After a very few days more drought, the process would be impossible, the consequence of which would be the failure of the principal rice crop for the second consecutive year in most of the distressed districts. It were superfluous to dilate on the crisis which was imminent. Alarm spread among the people, prices rose, and distress increased.

At the last moment rain began, about the 4th and 5th of September, in the south and south-east of Bengal, and extended to the north and to Behar, where it fell abundantly in the very places where it was most needed. It has since fallen seasonably and propitiously at intervals during September and October. The people exerted their utmost energy to effect the transplanting of the winter rice crop, which has been successfully completed almost everywhere, and the subsequent rains have rendered the prospect of the harvest as favourable as could be wished. With the reservation of possible consequences of visitations of Providence and of accidents which cannot be foreseen, the winter crop may be described as secure in the ordinary and practical sense of the term.

In some parts of Hooghly and Burdwan, however, where the failure of rain-supply in August followed a very insufficient supply in July and June, the rain of September did not entirely save the early crop, nor fully restore the prospect of the winter crop. In such places there is and will be some slight failure of the crops. And here distress and relief operations to a limited extent will be protracted beyond the time when trouble ceases in the distressed districts generally.

As soon as the setting in of the rains caused the numbers of labourers to be diminished and the pressure upon the public works officers and their establishments to be lightened, the opportunity was taken to complete the surveys, plans and estimates of all the relief roads, which had been undertaken in the districts north of the Ganges, to consider the value and importance of the work which had been actually done, and to determine what remained to be done, in order that the roads, if not fully completed, might be practically open for traffic and rendered permanently useful to the country. It was impossible to take these steps properly while every officer and official was absorbed in the supervision of crowds of relief labourers. The preliminary examination has been finished, and the completion of the works will be proceeded with as soon as the open season commences, after the cessation of the rains. The result of the preliminary inquiry is to show that in the districts north of the Ganges altogether about 4,000 miles of old and new road have been effectively operated upon by relief labourers; that £1,284,000 in cash and £469,000 worth of grain (or £1,753,000 in all) have been expended on relief works; that the work, though done hurriedly, and occasionally without proper surveys and plans, is of considerably better quality than had been supposed; and that all the work done by relief labour has, on the whole, cost about double as much as it would have done in ordinary years. Out of the total expenditure of 1¾ millions sterling, about £650,000 were expended on tanks and about £1,100,000 on roads. The road work is estimated to be worth £550,000 at the labour rates of ordinary years. These results, if substantiated by the detailed measurements and estimates now being effected, will be fairly satisfactory. Some of the roads had to be aligned while the labourers were working on the lengths behind the surveyors, the price of food was more than double the rate of ordinary years, and many of the poor people who came to the relief roads were unable to do a full days' work.

In order that none of the relief works may be infructuous, I have, with the sanction of the Government of India, set apart a strong staff of Civil Engineers and their subordinates to survey all the relief roads and tanks, to complete unfinished works, to set right any mistakes of alignment or construction which the survey may bring to light, to build small culverts and bridges over the smaller openings, and to erect timber bridges over the moderately-sized streams, and, in short, to make all the relief roads into really useful and permanent works, so far as time and means allow. The Chief Engineer in charge of this work

by March or April next at a cost of perhaps fourteen lakhs of rupees, 0,000. The money will have to be found by the provincial and local funds; but the work is worth doing, and now is the time to do it. If it can be satisfactorily accomplished, then the expenditure on famine relief works during 1874 will have conferred some lasting benefit on the country.

The length of 4,000 miles stated above comprises only the relief roads north of the Ganges. Besides this, there was a considerable length operated upon in the other distressed districts, which would bring the grand total nearly up to the 6,600 miles estimated in Chapter III.

Having thus brought the two categories of charitable relief and relief works to their conclusion, I have to revert to the two remaining categories of sale of Government grain and advances of Government grain to cultivators for their subsistence. These categories of sale and advances were last mentioned during the period immediately before the rains, and their progress since that period is now to be described.

It has been seen that up to the 10th of June 47,389 tons of Government grain had been sold to relief labourers and to the public under the rules of the 26th of January. This amount rose gradually to the several amounts on the dates specified below:—

	Tons.
10th July	74,836
10th August	95,858
10th September	116,941
1st October	118,107

The amount last given, 118,107 tons, may be regarded as the total sold to both relief labourers and to the public. To it will have to be added only such small amounts as may be sold after October. It is exclusive of grain given directly as wages to relief labourers.

During all May and the first week of June there was hardly any rice, and very little food grain of other kinds in the markets of the interior of north Behar and north Bengal. In these tracts the petty retail dealers found their occupation gone, and were glad to act as agents for the distribution of Government rice by sale among the people. The strange spectacle was presented of a whole class of native traders being converted into a Government agency.

When the rains set in after the first week of June, some private stocks were brought out. Of these, a part belonged to individuals, zemindars and others, and was used for the payment of wages of agricultural labour; a part belonged to traders and was sold in the market. Such sales were, however, comparatively insignificant. After a time they ceased. The markets became quite empty again, and remained so until the new grain of the August and September crops came in. The hope so much entertained of grain being brought by private traders in boats on the rising rivers was in the main disappointed. Some quantities did indeed arrive in this way, but they were not sufficiently large to produce any appreciable effect. The same preventive cause which has been already explained as deterring traders from importing grain to the most distressed tracts still prevailed, namely this, that the prices in neighbouring districts, and in Bengal generally, were too dear to admit of the importation being profitable. But as these prices had become slightly cheaper, it was deemed just to the people that the price of the Government grain (which was, under the rules, to be regulated by prices at the nearest large mart accessible by rail or river) should be lowered from one rupee for 12 seers to one rupee for 13 seers in north Behar, and to one rupee for 14 seers in northern Bengal.

The purchases of Government grain were to a considerable extent made by wholesale dealers, to whose mind the fear of another failure of the crops was ever present, and who were guided by the appearance of the weather and of the season. The purchases from the Government granaries attained their maximum weekly rate at the beginning of June, when the people determined to lay in supplies for some little time. The weekly rate, indeed, decreased immediately on the setting in of the rains; but it continued at a steadily sustained average throughout July. It fell further in the beginning of August, but towards the end of that month it showed a tendency to rise again, as the people, seeing the unfavorable state of the weather, were disposed to lay in supplies. In September, however, it decreased again,

immediately on the falling of the rains, and continued [illegible] ceased altogether in October.

The quantity of Government grain advanced to cultivators and ryots by the 10th June has been already shown to have amounted to 14,412 tons, estimated to sustain for one month 720,000 persons of this class, including the men and their families, at the rate of $\frac{3}{4}$ of a seer ($1\frac{1}{2}$ lb) of rice per diem for each member of a family. As the season advanced, men of this class, finding the stores for their subsistence to be near exhaustion, were more and more forced to ask for aid by advances of Government grain; and so the total number of applicants swelled day by day. Moreover, very many of these men had to carry on the preparation of their fields, so emergently necessary after the coming of the rains, by means of the hired labour, which, according to custom, has to be paid for in grain. Unless they could obtain advances of Government grain, they could not prepare their fields. A similar need arose again and again during the course of the agricultural season. Men who had struggled on without advances through July were forced to apply for them in August: many held out through August, but had to apply in September. Some again, who obtained small advances in May, obtained further instalments during the subsequent months. It is to be observed that large numbers of men who were discharged from the relief works and found employment as labourers in the fields received their wages for that labour in grain, which their employers had obtained as advances from Government.

The importance, then, of these advances is manifest. Without them many of the cultivators in all the distressed districts would have been too weak and emaciated to perform the cultivation properly; many would have been without seed to sow, having consumed their seed-grain for food; many would have been unable to pay for the necessary labour in the fields. Much land would have been imperfectly tilled, sown, and cared for, or left untilled altogether. When, therefore, the famine was mitigated or shortened by the strength and spirit with which the people raised fresh crops, when the return of plenty is secured by fine harvests spread over a more than ordinary large area, it is to be remembered that these results are partly due to the system of advances of grain from the Government stores.

The quantity of grain advanced to cultivators from the middle of June rose to the several quantities on the dates specified below:—

	Tons.
10th June	14,412
10th July	45,376
10th August	82,935
10th September	102,828
10th October	107,877

The number cannot be precisely given of the ryots and cultivators among whom the final quantity (107,877 tons) has been distributed. It is believed to be about 400,000. This number of 400,000 cultivating men represents, at the rate of six persons to a family, 2,400,000 persons belonging to the husbandman class who received help in this way.

In continuation of the statement given in a former part of this chapter, of the total number of persons receiving assistance from Government at the worst period (15th June), a similar statement may here be made for the period when the early crops began to be reaped, namely the 15th August:—

Labourers on relief works	426,738
Persons on receipt of charitable relief	647,550
Persons living on purchases of Government grain, being the number of people that would be supported for one month by the grain sold between the 15th July and 15th August, at the rate of $\frac{3}{4}$ of a seer per day per head	1,282,464
Persons living on advances of Government grain, being the number of people that would be supported for one month by the grain advanced between the 15th July and 15th August	1,692,936
Add for persons still deriving support from advances of money made to zemindars and other residents	200,000
Total ...	4,249,688

first sight appear remarkable that the number shown above (4¼ millions) should be so slightly below the number (4½ millions) previously stated for June. A greater decrease might perhaps have been hoped for; but the continuance of the sales and the expansion of advances caused the number during August to be very high. After August the number must have rapidly declined. In a similar statement made for the end of September or the beginning of October, the last three items, namely sales and advances of both kinds (which constitute the bulk), would almost entirely disappear. The two first items only (labourers on relief works and recipients of gratuitous relief) would remain, but with shrunken proportions.

The comparative suddenness with which the sale of Government grain ceased in the beginning of October was due partly to the incoming of the new grain of the autumn harvest. It was also partly due to the popular belief in the safety of the winter crop being assured by the rain which fell at that time. The consequence was that some of the old stocks which had been withheld all through the famine were produced.

The departure of nearly all the relief labourers from the works need not excite surprise, as the work in the fields for the winter crop became most brisk.

But the discharge of the recipients of gratuitous relief proceeded more quickly than had been anticipated. Those who were able, on the revival of the general prosperity, to support themselves, had been previously discharged. Those who remained at the beginning of autumn, that is 1st to 15th September, were those who in ordinary times subsisted on private charity, and who had no livelihood of their own making. During the famine the classes who are the donors of this charity being themselves in straits, ceased to support their indigent and infirm people, who consequently came upon State relief. But with the prospect of returning plenty it became a matter of serious moment to send these poor people back to private charity. There was anxiety as to whether the ordinary donors would resume their charitable offices. However, so strong is the force of usage, almost amounting to religious obligation, that they must have begun again to give to the beggars and to the helpless their accustomed doles of food. These poor creatures have been discharged from State relief, and no harm has resulted to them. These circumstances are certainly creditable to the industrious classes.

Some reduction in the large relief establishments (specified in Chapter III) were made in August, and still more during September. As soon as the abundant rain, lasting to the very end of September, brightened the agricultural prospect, it was decided to break up the framework and machinery of relief from the beginning of October. Every exertion was made to effect this object quickly, and so to save expense. By the middle of October nearly all of these establishments ceased to be borne on the rolls. Some small establishments were maintained here and there, and some of the superior officers to guard against any untoward accident which may even yet occur.

By the beginning of October, when the autumn crops had come fully into market, the Burdwan country was the only province under the Bengal Government where relief operations were maintained on any considerable scale. Though the autumn crops had been poor and the winter crops did not promise well in the Burdwan or Hooghly districts, yet in the surrounding districts the harvests were good, and trade was brisk, therefore it was deemed advisable not to send any further supplies of Government grain to these two districts. It was ascertained that if relief labourers were paid in cash, they could buy food in the local markets, and that grain for charitable relief could be purchased locally. Accordingly orders were issued during the first week of October directing that no more Government grain should be sent to Burdwan or Hooghly from the Calcutta reserve. The authorities in those districts were instructed to pay relief labourers in cash, and to buy grain locally for charitable relief as soon as their stocks of Government grain should be exhausted.

During October the famine has declined rapidly. On the last days of the month (that is the present time of writing), the total number of those receiving assistance from Government does not exceed 150,000. Of these, the majority belong to the districts in the south—that is, in the Burdwan Division. In most of the lately distressed districts north of the Ganges there are few receiving relief. The only district there which shows any appreciable number of such persons is Sarun. This most fortunate decline has occurred from the middle of September onwards at a quicker rate than was anticipated when the estimates of distress were first formed. Those estimates provided for 520,000 persons needing assistance during October and 316,000 in November. Experience on former occasions showed that considerable distress occurred in the autumn. It seemed proper to assume that the same thing would happen on this occasion. In many of the worst districts the autumn crops were known to be small in ordinary years. It was therefore feared that such tracts would not receive a new supply in sufficient quantity till December. As it has happened, however, the distress at this season has proved very slight in most districts, and has so far most agreeably disappointed the expectation. The cause is to be found partly in the administration of relief which had been going on during the previous months, which maintained the people in fair condition during the crisis and so facilitated their discharge towards the end, but chiefly in the abundant produce of the early autumn crops, which, as already described, had been sown over so much larger an area than in ordinary years.

One portion of the establishments is still maintained, and must remain for a short time longer—namely, the account department. A strong staff of accountants under the supervision of trained officers was formed by the Government of Bengal in the midst of the relief operations, besides the auditors appointed by the Government of India for the incorporation of the famine expenditure in the imperial accounts. The special accountants in the interior of the districts are still working at the accounts, which will, it is hoped, be soon presented in due form and order.

It has been explained that the Government provision of grain, including the reserve in Calcutta, amounted to 480,000 tons in all. Of this there had been expended up to the middle of June 115,000 tons. By the first week in September a further quantity of 208,000 tons had been consumed; and up to the first week in October the total expenditure of Government grain had reached 343,000 tons. After the 1st October there has been very little expenditure of Government grain for relief purposes, save in the Burdwan Division. On the 15th September stock was taken of all the grain in the Government granaries, and the total on that date was found to be 100,188 tons exclusive of the Calcutta reserve. The greater part of this quantity, perhaps as much as 85,000 tons, will be absolute surplus, besides about 20,000 tons of unexpended reserve stock in Calcutta. This surplus amounts to about 20 per cent. on the total provision of Government grain. If all the circumstances are considered, if all the necessities to be met are borne in mind, the surplus will not appear excessive. At two very critical periods the Government was not without grounds for fearing that the total provision of grain might not suffice. Towards the end of May, there was hardly a responsible officer in the very distressed districts who considered that the provision of grain for his district or sub-division was too large; and there were many who thought their provision would not suffice. During the last days of August, again, and the first days of September, there was a very general belief that the supplies of grain then in store would be inadequate, and that fresh Government importations would have to be begun.

In previous Indian famines the months of September, October, and November, have been marked by very high prices and by some misery and even mortality. Experience therefore warned us to guard against such contingencies. The unusual breadth, and the generally abundant produce of the early autumn crops of 1874 constituted, as above observed, the main cause of the cessation of the demand for Government grain about the end of September or the beginning of October. Another cause, as already seen, was the relief given so constantly throughout the summer months helped to enable the people to support themselves six weeks earlier than was expected in February 1874. Again in the beginning of the famine the recipients of relief subsisted (as seen in chapter II) on cash payments, without grain, for a longer period than was anticipated: consequently the expenditure of Government grain commenced later in the season than had been expected.

rus grain in the interior of the lately distressed districts is being sold to the best advantage on the spot by the local authorities. The surplus remaining out of the Calcutta reserve has been advertised for sale on specified dates under the orders of the Government of India.

The Government reserve transport train was during July and August kept in the vicinity of Durbhunga in order to recruit its strength, which had been somewhat shattered by the excessive work of May and June. It was retained chiefly as a resource against unforeseen emergency. It then performed such casual and miscellaneous duty as occurred. In the beginning of September, when the season threatened so ill, there was every reason to believe that its utmost services would be required. Soon afterwards, however, these fears were removed, and since the end of September it has been maintained only until it can be advantageously disposed of. Orders for its disposal by sale or otherwise have been given and are in train of execution.

The accounts of the famine expenditure are not yet finally completed. At this moment, therefore, the cost of the relief measures of 1874 cannot be exactly stated. All outlay has, however, almost ceased, and the accounts are so far ready that the ultimate result can be estimated approximately.

In the order of the heads of charges and receipts, as in the estimate of April 1874, given in Chapter III, there will be—

EXPENDITURE.	Estimate now offered. £
Special establishments	120,000
Promotion of private grain trade	453,000
Relief works	1,280,000
Durbhunga State Railway	100,000
Government grain purchase	4,400,000
Ditto transport	1,760,000
Government reserve transport train, land and water, (net cost)	314,000
Charitable relief	280,000
Grants-in-aid of private work	10,000
Advances to zemindars, traders, &c.	460,000
Total ...	9,177,000

RECEIPTS AND RECOVERIES.	Estimate now offered. £
Sales of grain to labourers and the public	950,000
Sales of grain to Relief Committees	270,000
Sales of reserve grain in Calcutta	70,000
Sale of surplus grain stocks in the interior	300,000
Recoveries of cash advances to zemindars and traders during 1874-75	250,000
Ditto ditto in 1875-76 and subsequently ...	210,000
Recoveries of price of grain advanced to ryots during 1874-75	25,000
Ditto ditto in 1875-76 and subsequently ...	600,000
Miscellaneous receipts	50,000
Total ...	2,725,000
Total expenditure ...	9,177,000
Total receipts ...	2,725,000
Net expenditure ...	6,452,000

There is another item of imperial receipt which may (as it seems to me) be reckoned as a set-off against the famine expenditure, and that is the increase in the net earnings of the East Indian, Jubbulpore extension, Eastern Bengal, and Punjab Railways. This increase must have been wholly due to the enormous development of the grain trade: other traffic was, in consequence of the famine, comparatively dull. The increase of the grain trade was mainly due to the Government importations and to the concession whereby Government defrayed half the freight of all private grain carried to the distressed districts; the cost of these operations is debited to the famine in the foregoing estimate under the headings of "Government grain transport" and "Promotion of private

grain trade." The railway earnings account will stand thus acc[illegible] the latest available figures:—

	Total increase in the gross goods traffic earnings of the eleven months ending on the 30th September 1874, as compared with the same earnings of the corresponding months of the preceding year.	Share of the increase debitable to working expense as far as estimate can be made by the Deputy Accountant-General, Public Works Department.	Share of the additional net earnings which will accrue to Government, being one-half thereof in the case of the East Indian Railway, and a larger proportion or the whole in the case of other lines; as computed by the Deputy Accountant-General, Public Works Department.
	£.	£.	£.
East Indian Railway ...	880,330	286,830	440,222
Jubbulpore Extension ...	47,735	10,385	25,883
Eastern Bengal Railway ...	67,971	38,743	14,998
Scinde, Punjab Railway ...	176,168	24,956	151,212
Total ...	1,172,204	360,914	632,315

This computation does not include any part of the increased earnings on the Great Indian Peninsula Railway (£161,532 during the eleven months), though to this railway the Government paid more than £30,000 during the year on account of freight of private grain. It therefore seems quite fair to reckon the whole of the Government share of the additional net railway earnings as a set-off against the famine expenditure. If this sum be deducted from the total shown in the next preceding paragraph (£6,452,000), the final net expenditure on the famine will, according to the best estimate that can be made, amount to £5,820,000.

There do not appear to be any other charges whatever debitable to the famine. If we succeed in recovering more than 85 per cent. of the grain advances, as many local officers expect we shall, then the result will be somewhat better than the present estimate.

Further, the sum of £200,000, and possibly some additional sums, will have to be deducted from the imperial charges of the famine for reasons which I must briefly explain.

There is yet a question as to how far the whole of the cost, as above set forth, will fall upon the imperial finances of India. It was in the beginning ruled by the Government of India that the provincial finance of Bengal should be liable to be debited with the estimated amount at which the relief roads and such like works might be valued, that is to say, the real value of the works if constructed in an ordinary year; the excess cost over such value being chargeable to famine. The expenditure on these relief works was debited provisionally to the provincial finance to the amount of £450,000. As this caused some embarrassment to the provincial finance, the Government of India made a grant to the Government of Bengal of £250,000, which, deducted from the £450,000, leaves a sum of £200,000 really contributed by the provincial finance of Bengal towards the expenses of the famine. Therefore £200,000 are at all events to be deducted from the imperial cost of the famine.

But as already seen, the value of the relief roads is at present estimated at £550,000, which is, *primâ facie*, a debt due by the provincial finance of Bengal to the imperial finance of India. From this amount is to be deducted £250,000 already granted by the Government of India, and £200,000 paid by the provincial finance of Bengal, leaving £100,000 still due. Whether the payment of the £100,000, by the provincial finance of Bengal (or whatever the precise amount may eventually turn out to be) will be enforced in whole or in part, must depend on the pleasure of the Government of India, which will doubtless be expressed after the accounts shall have been finally made up.

So far as is yet known, then, the cost to the Government of India of the famine may be set down at—

	£
Net expenditure as shown above, less recovery by net traffic receipts of guaranteed railways	5,820,000
Less repayment by provincial finance of Bengal	200,000
Net cost ...	5,620,000

o

[illegible] end of the year 1874-75, the losses to the general revenue from the famine of the past year cannot be stated. But it may be anticipated that there will be, in consequence of the famine, some loss on certain items of the customs revenue, a moderate loss on the excise revenue, and perhaps some small falling off in the salt revenue.

I would here testify most emphatically to the desire manifested by relief officers of all grades to be as economical as possible in dispensing Government aid whether in cash or in kind, to stop waste, and to prevent State aid being afforded to any except the really deserving and needy.

It may here be observed, that in the only three districts, namely, Bankoora, Burdwan, and Hooghly, where non-official committees could act on their own judgment, and showed what they would do if unfettered, they invariably displayed a disposition to do much more than the local officers thought necessary. These committees, which had thus to be checked in their too liberal dispensation of charitable relief, were composed of the best and most intelligent Native gentlemen of the neighbourhood. On inquiry being made why the committees wished to dispense relief so liberally, it was explained that the pressure put upon them by the local opinion of the vicinity, and by individual importunity, was too great to be resisted. This pressure was exerted, not for the sake of money, but for the sake of grain, to be dispensed in quantities too small to allow of the recipients making money-profit therefrom; and this grain, moreover, was of a kind which in ordinary years the people would hardly eat at all. Such circumstances, occurring as they did in the less distressed districts, afford striking illustrations of the keenness with which the famine was felt.

CHAPTER VI.

THE foregoing narrative is intended to be a bare statement of the facts as they occurred, without any description of the scenes or situations which presented themselves during the course of these events, and without any discussion of the considerations which such events suggest. In this [illegible] shall endeavour very briefly to describe some of the scenes and situations, and to discuss some of the considerations relating to the circumstances which have been narrated.

It will be evident to the reader that during the actual occurrence of such events there must have been many striking scenes and situations. It might even be feared that many sights, sad, shocking, terrible, must have been seen. The mere notion of swift destruction sweeping over many thousands of square miles of country, highly cultivated to the last rood of ground, and waving with crops destined never to ripen—the very name of utter and widespread famine, affecting several millions of people,—must rouse in our minds the thought of horrors indescribable. The story of such things is known to every student of Indian annals. The tradition of such calamities endures with vivid force among the people of India.

Happily, the famine of 1874 was for the most part free from circumstances of this grave character. If such things occurred at all, their occurrence was in a mitigated form, and to a limited extent. It may be that some horrors have happened of which the accounts are too imperfect and uncertain to command credence, or of which we have never heard and shall never hear. Nevertheless there must unavoidably have been very much of misery to stir the depth of human sympathy. Visiting authorities have found many families of many villages in destitution near to starvation. Relief administrators inspecting crowds of poor have seen the affecting spectacle of women and little children in the last stage of emaciation. Medical examiners scrutinizing the field hospitals, the poor-houses, the relief centres, have made professional reports of physical depression in whole classes. Here and there corpses of hunger-stricken persons have been found, and sometimes the reports of deaths from famine have been authenticated. All these things are, indeed, sad to be recalled; but much worse things even than these might have happened, which it is unnecessary to imagine. The object of the operations undertaken by Government, of the administrative efforts made, of the financial cost incurred, was to prevent these things from

happening so far as might be humanly possible. It will be for [illegible] to judge how far that object was attained.

There were, however, many remarkable points of interest at various stages of the affair, some of which I will mention here, having seen them or heard them described by competent witnesses.

In north Behar the rice crop is raised in vast hollows or depressions in the surface of a slightly undulating country. From any low eminence the view extends over many square miles of rice harvest, a fine spectacle in ordinary years. But in the autumn of 1873 the crop grew up, then faded, and at last withered. Its colour became brown, deepening by the effect of distance into red. The unnatural aspect of such apparently endless expanses of cultivation, the presage of the coming desolation, produced a striking, almost an appalling, effect on the beholders.

In north Bengal many spots on the banks of the inland rivers are formed into quays for the exportation of the surplus rice. These places in ordinary years become scenes of cheerful activity, and are the centres of the life of the country. The contrast which they presented of utter deadness and desertion towards the end of 1873 was deplorable. The rice country generally abounds with luxuriant groves of bamboos, the green masses of which form one of the most characteristic features of that region. In the drought of 1873-74 these innumerable trees dried up and perished down to their roots. They will recover, or there will be reproduction. But at the time their parched and wasted appearance, notoriously portentous according to native ideas, added to the prevailing gloom of the situation.

On the river Hooghly at Calcutta, and at the railway stations on its banks, there was much scope for energy and organisation in unloading the rice ships and loading the bags on to the railway trucks. At one time there were simultaneously as many as seventeen steamers and ships laden with Government rice in the port of Calcutta, with from 200 to 2,000 tons of rice on board of each. The bags of grain were carried away from the steamers by lighters to the railway wharves, whence they were to be despatched to the north. This work had to be done on a broad river, with a tide that runs sometimes five miles an hour, and to be finished promptly to save demurrage of the steamers. The rice ships often came into harbour in convoys, and converging as they did on Calcutta from so many distant ports, there would occasionally be a block or accumulation of 3,000 tons of rice on one wharf, 2,000 tons on another, and 1,000 tons on a third; while scores of lighters were waiting at each to unload additional quantities. The bustle, the noise, the crush, were extreme. Again each bag had to be carried on a man's back from the lighter to the shore, and from the shore into the railway trucks, the men swarming like bees up the steep bank. Sometimes 45,000 or 50,000 bags had to be lifted daily across a wharf space of barely 100 yards. Sometimes, for a day or so, it would seem as if the business of unloading and despatching the grain could never be managed on the narrow wharves. But the arrival of rice ships would slacken for a brief time: all the vessels in the river would be unloaded, and the accumulation would be cleared before fresh consignments arrived. From 2,000 to 3,000 tons of Government rice were cleared daily from ship-board for weeks together. Demurrage was incurred in only one instance, and was mainly due to the arrival of 10,000 tons of Saigon rice at one time in mat bags, which burst in the holds of the vessels. In two instances only were the rice loads of lighters lost, notwithstanding the strength of the tide and the stress of work. One ship from Madras with 2,000 tons went down.

The banks of the Ganges in Behar, which formed the great base of our transport operations, presented scenes of much animation. On the south bank temporary branches or sidings from the main railway line were constructed on to the very ridge of the high river-bank, where long sheds were erected for sheltering the bags of rice piled up in long series of heaps. Wooden slides were constructed, stretching down the steep bank, so that the bags might shoot straight from the goods' platform to the deck of the steamers lying in the stream. At that spring season violent winds from the west (hot as furnace blasts) blow over the broad river-bed (several miles in average breadth) from morning to evening, filling the air with dusty haze and obstructing navigation for all vessels

sa\ propelled by steam. From eventide the winds subside until the morning. But navigation in the shifting and tortuous channels was impossible during the dark hours, so the work had to be done either by steamers laden together with their barges (called "flats"), or else by steamers towing country craft. It was interesting to see a steamer tugging against wind and stream a far-stretching string of, perhaps, twenty country boats. On the other side, the steamers would meet the Durbhunga railway, which had been carried across the low sands to the water's edge, the steam vessel lying almost alongside of the railway engine. As the river rose gradually, the waters encroaching on the sands would drive back the railway line a few yards day by day.

On the north bank the main depôts could be descried from afar by the clouds of ascending dust. Day and night there was a ceaseless creaking and rolling of carts, incoming empty and outgoing laden. The great length of sheds which had been erected was often insufficient for the bags that arrived, which were then heaped into pyramids from 60 to 80 feet high.

The lines of the carts extended continuously over many miles. A traveller might traverse say 20 miles of country and meet with uninterrupted strings of carts throughout the whole distance. Every one of the streams (which though very low were still running clear in that region) was blocked by cartmen stopping to water their cattle. Every one of the roadside mango groves, which abound in that quarter, was crowded with men and animals packed close together for temporary repose and shade. At evening the darkness of the groves would be lit up by the cooking fires. The roadways were cut by the cart wheels into ruts from 2 to 3 feet deep (called "leeks"). The carts could not move unless they followed the ruts. Fortunately most of the carts were of an uniform build. But whenever carts of a different build came into the field, there actually arose questions of cart guage, broad and narrow, and the transport department would be obliged to carve out fresh roadways wherein the carts of a particular breadth might work out their own ruts.

More interesting still, perhaps, was the assembling and mustering of the many contingents of carts in the country around Durbhunga and Mudhobunnee during February 1874. The rough tracks and lanes form a network of communication in that region. Every line was covered by the bands of carts, each several thousand strong, converging from every direction. The troops of men with their carriage gathered with alacrity at central stations. All seemed to understand the vital moment of the enterprise on which they were entering. At first the groves and tanks of the central stations afforded shade and water even for these masses. But soon these places became choked with the dust from the arid, friable soil trodden by countless feet. The foliage of the trees became encrusted and brown with layers of dust; the tanks would be drained to their dregs of fetid mud; the air was thick with particles of earth flying in the fervid blasts of the summer wind. Throughout the twenty-four hours of the day the business had to be prosecuted, and order had to be maintained among the masses of men, animals, and carts, whether at rest or in motion. Side by side with this were the field hospitals for the people and for the beasts—for the sun-stricken, the foot-sore, the over-fatigued, the exhausted, the ailing, and the sick. During the hottest hours of the day European officers on horseback were recovering stragglers, urging on the backward and encouraging the forward.

The appearance of the cattle, both for draught and burden, was in the beginning splendid. For them the drought, which destroyed the ear of the rice plant, had spared the stubble for fodder. The sap and strength of the plant had remained in the stem; so that the stubble fodder was more than ordinarily nourishing. This accounted for the excellent condition of the cattle. Certainly sleeker, sturdier beasts could hardly be seen. A very few weeks of transport service changed all this. But though they lost flesh and appearance, they showed muscle and power to the end.

Towards the close of the hot weather, when the lowering clouds gave warning of the downpour which would damage all grain it might find exposed, the haste and hurry to store the rice bags in the granaries became intense.

At some of the depôts, which were latest filled, streams of laden carts, camels, mules, and ponies, would pour in much faster than the loads could be disposed of under cover. In the still heat of the heavy air, with all the signs of quick-coming rain-storms, the efforts made by the people to house the grain produced an almost wild excitement.

At the opening of the relief operations in many places the population massed itself upon the relief works. Multitude after multitude came trooping across the fields. Every hamlet sent forth a mournful procession of hungry people. Large villages would be searched through and through, but not a soul would be found in the deserted homesteads, save some few who could not stir, and who were resigning themselves to the fate to which they apparently had been abandoned. When the people thus came herding and flocking to certain points on the roads, sitting helpless on the ground by day, and bivouacking on the spot by night, the difficulty was to marshal them in to anything like order, so that they might be counted, arrayed in gangs, set to labour, supervised in their work, and paid when the day's task was over. Sometimes, when questions arose as to the terms of work and payment, our officers would find it almost impossible to obtain a hearing amidst the vociferations of the men and the screaming of the women and children. The proneness to alarm, the sense of pressing danger, even the heat and glare of the weather, added vigour and vivacity to the tumult. Evening after evening, as the hour for payment came round, the unruly throng would press round the paymasters, grasping for copper coin. Soon this confusion, through the perseverance of our officers, gave place to quietness and order. Then the multitudes would be seated on the ground, row after row, thousand upon thousand, in silence broken only by occasional exclamations of misery, to be inspected with patient and leisurely regularity by the relief officer, and to be told off, some to the poor-house, some to light labour, spinning and weaving, some to village tanks, some to the roads, according to the discrimination of the physical fitness of each person.

When the Government granaries near the villages were opened for all to come and buy, it was strange to watch the purchasers congregating in numbers, beyond the power of the store-keepers to serve with sufficient quickness, waiting anxiously but quietly till their turn should come, the widows tendering their mites in payment, the infirm and aged stretching forth the cloth to receive the full measure of grain.

Stranger still, perhaps, was it to see the larger depôts of Government stores attended by all the wholesale and retail dealers of the neighbourhood, who would be settling all their grain transactions and almost turning the depôt enclosure into a sort of local exchange until their own proper trade should revive.

The contrast afforded by the commencement of the rainy season after the long protracted drought was enough to equal the happiest anticipations.

In the distressed districts north of the Ganges the last days of May were distinguished by a heated dust-laden atmosphere; by scanty ploughing and sowing; by anxiety for seed; by navigable streams reduced to lowest ebb; by empty tanks and dried-up wells, to the distress of men and the detriment of cattle; by grain markets becoming tighter and tighter, prices hardening, and private stores locked up; by an intense demand for Government grain, both for wholesale and retail, as if all were anxious to lay in supplies at once for some time beforehand; by private trade stagnant, and traders holding out no promise of importation; by labouring and agricultural classes coming in greater numbers than ever to relief works; by the lists of gratuitous and charitable relief much swollen; by ryots and cultivators clamorous for advances of food-grain; by a large proportion, in some places one-half, in other places three-fourths, of the population receiving assistance from Government in some shape, or from charitable subscriptions, physically in good condition from extraneous aid, but morally depressed and fearful for the future; by relief establishments everywhere strained to the utmost to meet the demands upon them; by transport operations consisting of the final struggle towards the attainment of a long-deferred object; by doubts as to whether even the largest allotments of

Govern ent grain would carry the people through the months that must be passed before the winter harvest.

The last days of June were, on the contrary, distinguished by rain; by masses of cloud promising further downpour, even to excess; by saturated soil; by extensive ploughing and sowing of every crop of the season, and general sufficiency of seed; by tanks and wells filling fast, to the refreshment of man and beast; by grain markets still tight, but with an inclination to become easier, no stores indeed produced by traders, but landholders and private persons evidently bringing their hoards into use; by a demand for Government grain diminished and limited more according to the needs of the present moment; by traders collecting their boats and promising importation as soon as the rising streams should afford the necessary means; by labourers and husbandmen all gone from the relief works to the busy fields, leaving only some of the women and children on the works; by the lists of gratuitous and charitable relief still swollen; by ryots and cultivators obtaining advances of food-grains, those who could from their landlords, and those who could not from the relief officers; by a diminution of the proportion of the people receiving assistance from Government; by a general manifestation of feeling that peril from drought was for the present stayed; by relief establishments partially freed from out-door avocations and with more leisure to complete returns and accounts; by transport operations nearly over and granaries filled; by confidence that, unless some new trouble should supervene, the allotments of Government grain would prove sufficient to the end.

I now advert to some of the considerations relating to the famine of 1874. Whether the preservation of the people from the destructive consequences of that calamity should be undertaken by the State was an imperial question beyond the power of the local Government of Bengal to decide. The Government of India determined from the beginning that this should be undertaken with every effort and at any sacrifice, in order to avoid risk with a reasonable degree of certainty, and to secure success so far as human means might avail. It was under this view and upon this understanding that the scheme of operations was conceived and worked out in all its details. Much of course may have been done amiss in the management of such multifarious affairs. As regards the means adopted and the steps taken for the proposed end, it is for others, and not for me, to judge whether any essential mistakes have been made in the way of doing either too little or too much, of falling below, or of going beyond, the requirements of the case on the fundamental principles which had been laid down for our guidance. But if any mistakes have been made in conducting the operations, then it will perhaps be remembered that many (though not all) of the parts of the undertaking had an unprecedented character. Many things were to be accomplished the like of which had never been attempted before. However great may have been the knowledge and practice of the many persons of all classes engaged in this service, still no person could possibly have had the actual experience needed in order to foresee the issue or the entire effect of the measures which had to be adopted.

The lessons learnt in one famine may doubtless be most useful for successfully encountering similar conjunctures in future. But during this famine no particular method has proved to be applicable in all the places concerned. On the contrary, divers methods have been used in the varying circumstances of the several tracts of country. In Bengal and Behar the calamity assumed different aspects, according to the products, the trade, the landed tenures, and the habits of the people. Therefore a similar calamity occurring in other parts of India might present even wider differences. Moreover, any one famine is almost sure to be, in many important particulars, unlike every other calamity of the same general description. It seems certain that a famine at once deep and broad results only from a conjunction of many causes, the convergence of many adverse forces. This has been manifest in the Bengal famine of 1874. If, while the province of Behar was afflicted with scarcity, Bengal had been blessed with average harvests, the disaster in Behar might have failed to produce famine; but we have seen that Bengal was suffering from scarcity at the same time. If the scarcity had befallen those parts of Bengal where the agricultural classes are possessed of resources, as in the

eastern districts, the people might have sustained themselves with but little extraneous aid, instead of being reduced almost wholly to dependence on the State; but this calamity befell those tracts in Behar where the agricultural classes were in a lower status than in any other part of the country, and those parts of northern Bengal where the people do not possess the advantages of the jute fibre culture. If the failure of rain had occurred in districts where harvests are reaped in spring as well as in early winter, then there would have been some chance of gain in one harvest retrieving the loss in the other; but the tracts most severely visited were just those where there could be no spring crops to make up for the loss of the main winter crops. If the worst failure had happened in those parts of Bengal which are traversed by railways or by rivers navigable at all seasons, there would have been hope either that succour would arrive through private trade, or that such supplies as might be despatched by Government would be transported easily; but utter failure of rain and crops occurred in the very tracts which are most remote from easy communication. It was this concatenation of difficulties which intensified the famine of 1874, and which compelled Government to adopt preventive measures so searching, so laborious, and so costly.

In averting the consequences of famine the necessity of using extreme haste is most oppressive to those charged with the administration, and produces inevitable excess in expenditure of resources of all kinds. If the failure could be certainly foreseen even a few weeks before its arrival, or if when it was foreseen the Government could commence large preparations, trouble might be saved in an almost inestimable degree; but this can never be. Failure dreaded for weeks may be averted by rain even at the last moment. Early in September 1873 fears began to be felt, and grew more and more acute as October advanced, but a fall of rain even late in October might have re-established everything. In regard to efficiency of preparations by Government, the time for that was in the autumn. But to set them on foot before the scarcity had declared itself for certain, would have had an evil effect. When the arrival of scarcity within a given time has become certain, the Government cannot properly begin to display all its power, to call forth all its resources; for if it does so trade will be paralysed or impeded at the outset, and the people might at once learn the too easy lesson of foregoing self-help and leaning altogether on the State. It is only by trade being stimulated to supply a vast and emergent demand, by the people being incited by the motive of self-preservation, that the danger can be restricted to those limits within which the Government may effectually interfere. If, then, the measures ultimately adopted by Government had been taken in hand at a much earlier date, the gain in economy and efficiency would have been insignificant as compared with the mischief which might have ensued from the discouragement of private enterprise. In practice, therefore, the measures, however much they may have been considered beforehand, cannot be put into execution until the latest safe moment for decisive action has arrived. The excessive urgency which will then arise must be very disadvantageous, especially in transport arrangements. It multiplies the chances of failure and enhances considerably the expense. But it must be endured, as it springs from the very nature of the trial and from the essence of the case.

In the urgency thus admitted to be inseparable from a great undertaking of this nature, the use of railways in India is conspicuous. On former occasions of this nature, the railways have proved very valuable. On this occasion, however, it is difficult to describe fully the usefulness of their services. It may suffice to say that without the railways the operations against this famine could not have been adequately carried out. The supplies of grain coming either from distant places beyond sea, or from the northern extremity of India, had to be conveyed by rail for distances ranging from 150 to 450 miles to the borders of the distressed country.

The task of systematically feeding almost the whole population of tracts of country containing two or three millions of souls, or even a higher number than that, should not, of course, be accepted by Government save under the most exceptional circumstances, and under the paramount necessity of saving human life. Though undertaken on this occasion for many of the distressed districts, it has not been undertaken for all of them. Many distressed districts

have been managed by other methods. But evidently in many cases the thorough and absolute remedy for famine, by Government supplying the people with food, may be most desirable, if it be practicable. As it had never, perhaps, been tried before, its practicability would probably have been doubted until proved by trial. At the outset the most sanguine of those engaged in such a task doubtless felt some misgivings as to its entire success. There is, however, no longer any doubt as to its being perfectly practicable. It can be accomplished with entire regularity for many months consecutively by disbursing cash, so long as supplies and trade last, and when these fail by distributing, paying, selling, and advancing Government grain. And the demonstration of this problem may be regarded as one of the experiences which the events of 1874 will store up for the future.

Large as may be the official machinery for the administration of any broad system of relief, the experience of 1874 shows the possibility of enlisting powerful forces of voluntary assistance. If in the most distressed tracts the work is mainly done by official agency, yet in less distressed tracts private agency to the utmost extent can be, as it has been, brought into play. The zemindar, the planter, the landholder, the merchant, the trader, the head villager, have all rendered service in their respective spheres.

The enforcement of labour tests, the establishment of poor-houses, the issue of cooked or prepared food, were the topics of much discussion at the outset of the operations of 1874. I shall recapitulate the results of the experience gained regarding these subjects during the operations.

I understand the enforcement of the labour test to mean this, that before gratuitous relief is afforded to any applicant enquiry is made as to whether the person can do any work, light or heavy; and if the person can, then such work is imposed as may be appropriate to the age, sex, or condition. If this be the labour test, then it has been invariably enforced from beginning to end of the operations. Hundreds of thousands of persons of both sexes, of all ages, of various degrees of health, strength, and weakness, have been successfully subjected to it.

The term "establishment of poor-houses" may be used in two senses. If the plan means the constructing of tolerably commodious buildings, even though of a temporary sort, the collecting therein of considerable numbers (say some hundreds, or even thousands) of poor or miserable people, and the managing of the house as an institution on a large scale, then it has never been adopted by Government during the famine of 1874; though there have been some institutions conducted by eminent individuals which in some respects come under the above description. There may be many circumstances under which measures of this sort can be beneficially adopted in preference to any other method of coping with distress. That particular position of affairs did not present itself in the distressed districts on this occasion. But if the plan means the constructing of a small, though salubrious, temporary structure, in which are placed a very limited number (say less than fifty) of poor persons unable to do any out-door work, though not ill enough to be sent to hospital, or unable to walk from their home to fetch food, or having no house to shelter them, or belonging to no village where they could conveniently receive house relief,—then it has been adopted in very many places scattered all over the distressed districts. It has been seen in the last chapter that those recipients of gratuitous relief who could be relieved without being placed in a poor-house were given tickets entitling them to so many rations of grain to be issued from the nearest Government granary.

The issue of cooked or prepared food was much discussed at an early stage of the relief operations. The question was raised whether gratuitous relief ought not to be given in the shape of cooked food. It was argued that in India none would come to a public place for cooked food unless they were really in want, and that the distribution of cooked food would be a test or a check against imposture. On the other side it was explained that needy people of the middle class, respectable widows, and the like, could never thus come; yet there were many people of this class who required relief and must die if they did not receive it. It was decided that charitable relief might be given in the shape of cooked food or uncooked food, according as the local committee or local relief official might think best. When severe famine visited a tract it was impossible to enforce

any cooked food test or to adequately relieve the people except by distributing grain enough for a week's or a fortnight's consumption at a time to every person or family found to be in want. When it is remembered that in a single circle of about one hundred villages there were from 5,000 to 23,000 persons supported by charitable relief, the preparation of cooked food for all these would have been a serious addition to the work of relief. But cooked food was given to inmates of relief hospitals, and to the cripples who lived at the poor-houses.

Towards the end of the distress, when it was desirable to throw the people back on their own resources, and to send the paupers and cripples to their ordinary supporters, the gradual enforcement of the cooked food test was salutary. In towns like Burdwan and Cutwa a class of fever-stricken poor had for some time existed; and there cooked food had to be distributed daily to hundreds who had hardly strength to cook for themselves.

The selection of the most suitable sorts of relief works for the employment of the poor has occupied much thought. At the outset road-works proved decidedly the best for the accommodation of masses of hungry people suddenly arriving. These people could all settle down on one part or other of the road, and could be in some way counted and paid up every evening. When, after the multitudes had been reduced to order, large numbers of them were brought back to their respective villages, relief work on tanks (new or old) was found to be the most appropriate employment. There was a new tank to be dug or an old tank to be deepened within reach of most villages; and it was much easier to enlist the services of local notables and village headmen in supervising work on tank works than on roads. There is this drawback to tank works, that they benefit a small locality and a few people rather than the public generally, and are not therefore such fitting objects for public expenditure as roads.

The large works constructed on high engineering principles, such as canals and railways, will not be very serviceable as relief works in the earlier stages of distress, unless portions of the works are carefully set aside for the reception of weakly persons. Such arrangements can generally be made, and were actually carried out, on the Sone canal, the Northern Bengal State Railway, and the Gunduk embankment. Apart from such undertakings being necessarily concentrated over single lines of country, they are ordinarily done by petty contract. It is contrary to the interest of contractors to employ persons who cannot do a good day's work; and this tendency has to be counteracted. When the relief labourers become strong and healthy, they can with advantage be drafted to railways and canals.

The choice between different modes of paying for relief labour has, as shown in Chapter IV, caused much anxiety. There were three plans, namely, "daily wages," whereby a person having laboured for so many hours receives a wage, whether the result of the work has been much or little; "task-work," whereby a person receives a daily wage for an allotted task, but is liable to reduction of wage if the performance falls short; "piece-work," whereby a person is paid for the quantity of work done and measured up, much or little, according to a fixed rate. The daily wage plan renders it difficult to enforce a proper amount of labour, and is open to manifold abuses. It is permissible at the outset only, until the people can be taught to follow better plans. The task-work is better, but it has one fault—in that it fails to offer any inducement for special and extra exertion, or for self-improvement in skill.

The "piece-work" plan was found the best on every account. As regards facility of supervision, prevention of cheating, and economy of money, it is excellent for the sake of the works; but for the sake of the people also it is preferable to any other plan. It offers a stimulus to extra exertion and self-improvement, and conduces to industrial training. By holding out the prospect of gain, it makes the relief labourers work harder, perhaps, than they had ever worked before. It teaches them to save something from their earnings, and to exercise forethought. Its good effects were exemplified in the conduct of the relief labourers during May and June, as described in Chapter IV. And when the expenses of relief works are examined, it is found that even when the piece-work rates were twice as high as in ordinary years, the work done cost

less than under the daily wage system, when the rates were kept down to the low standard of ordinary years. The experience of 1874 seems to show that piece-work, even at high rates if necessary, should always be introduced on relief works at the earliest possible moment.

The sale of Government grain to the public, wholesale and retail, has been an important element in the policy of relief administration of 1874.

Even in the most distressed districts there were some whole classes, and many individuals in other classes, who had money, or the means of raising it, but who could not obtain food for it. The sale of Government grain to such people relieved the pressure on relief works and on charitable relief, promoted self-help, and maintained self-respect among the middle classes, agricultural or non-agricultural, and materially reduced the burden on the public treasury. In Mudhoobunnee, where the failure of the crops was most severe, the sales of Government grain were largest. To any one watching the sales at the petty granaries, it was remarkable to see what numbers of people, who to all external appearance were paupers, produced or raised money and bought their food rather than ask for charitable relief. Widows, aged persons, children, and unlikely people of all classes, seemed either to have brought out old hoards, or to have raised money somewhere, wherewith to buy food at the Government granaries. If Government grain had not been for sale, these poor people could hardly have bought at the famine rates which would have prevailed, and they must have either died or have swelled the lists of the people on relief works and on charitable relief. Numbers of instances were related of widows who had sold their last remaining ornaments so as to be able to buy food for themselves and keep their names off the pauper lists. In some cases these poor creatures, when they could not afford to pay the full Government price, begged to be allowed to pay at reduced rates rather than be put on the list of paupers who got their food for nothing. These grain sales secured the return of one million sterling out of the money expended by Government on bringing grain into the country. Certainly the people themselves believe the sale of Government grain to have been among the most useful measures which the Government adopted for the relief of distress.

There must always arise the question whether the sale of Government stores is detrimental to private trade. Certainly no effort has been spared to prevent the measure producing any such ill effect. It has been adopted, as shown in Chapter IV, in those places only where there was no private trade in food-grain and no prospect of any arising. If the opinion of native merchants and grain-dealers may be taken as conclusive, I may say that in Bengal and Behar generally, and the distressed tracts particularly, they were all in favour of the measure with the conditions under which it was carried out. More valuable still than the opinion of the trade are its practice and action, as seen already in Chapter IV. Nothing, indeed, could have exceeded the activity of the import trade of grain in the distressed districts generally during the time when the sales of Government grain were at their maximum. From parts of Bengal, such as Mymensingh and Julpigoree, where the crops had been fairly good, private exportation into the distressed districts during the early part of the season was so very brisk that in May and June trouble arose in these exporting tracts, and scarcity was for a time keenly felt. Rarely or never has so brisk an importation of grain been witnessed in Behar as that which occurred in the summer of 1874. It could not, indeed, have possibly been greater from the north-west quarter, inasmuch as it took up all the available railway carriage. The merchants sent their grain as near as they could to the most distressed tracts. Their conduct showed that they had no fear whatever of being interfered with or undersold by Government in any place whither they could manage to despatch their grain. The injunctions which had been given to the local authorities to stop the sales on the arrival of private grain were carefully made known to the merchants and to the public. In the end the sales of Government grain ceased of themselves by the action of local trade underselling the Government. As private supplies made their appearance in the market during the autumn, the prices of private grain became cheaper; while the price of Government grain was purposely kept at the comparatively

dear rates which had been adopted in July, so as to give the best opportunity for the revival of local trade. The new rice and the remnant of old stocks began to be offered at cheap rates, so the people at once purchased private grain and ceased to buy the Government grain. Thus the Government operations did not prevent or check the resumption by the trade of its proper functions. On the whole, it may be affirmed that the sale of Government grain did not improperly interfere with private trade.

It may, of course, be argued that Government, by interposing at all to prevent famine, and consequently by averting the prevalence of famine prices, must to a certain extent have interfered with trade. But any doubtful advantage which trade might have gained if Government had refrained from interposing, would have been much more than counterbalanced by the loss of life and the diminution in production which must have ensued. And, dominating all these considerations, there is the moral principle that it is, in the last resort, the duty of Government to save the lives of its people. But the result proves that Government, while on the one hand exerting the interposition sufficiently for the preservation of the people, restrained it on the other hand within legitimate limits. Inasmuch as the private importation exceeded the Government importation, it is evident that, great as were the efforts of Government, the efforts of all the traders combined were greater still. Indeed the Government itself had the strongest interest in evoking the assistance of trade for the prevention of the famine. That assistance was essential to the accomplishment of the objects in view, and it was ultimately rendered to a vast and beneficial extent.

The policy of granting advances of food-grain to ryots and cultivators on a large scale has perhaps both novelty and interest. The situation was this, in a vast number of cases ryots or tenant-cultivators had no grain and no means of obtaining it. Though the larger landlords advanced grain to their tenantry, the smaller landowners, who own in the aggregate a great portion of the lands of the country, were unable to do so. The village grain-dealers, who would ordinarily make such advances, either had no grain to advance or refused to advance what they had until the prospect of the next crop should be assured. The cultivators were much employed in the transport of the Government grain; they also laboured on relief works. But the time came when they must leave all such employment for their fields. For carrying on the cultivation they must have grain not only for themselves, but also for giving wages in kind to their field labourers. Unless, therefore, advances of grain were made to them by Government, agriculture must suffer, and the new crop must for want of husbandry be short, notwithstanding abundance of rain. The policy, then, of thus advancing Government grain was clear. Its working and effects have been described in Chapter IV. It is among the causes which have brought about the speedy and satisfactory termination of the famine of 1874. So far experience attests the advantage of adopting it in similar emergencies. It remains to be seen whether the money value of these advances will be duly recovered. Instructions have been issued for the realization of some instalment, however small, at the coming winter harvest, so that the people may be reminded that Government intends to hold them to their bond. It has been assumed in the financial estimates that 85 per cent. of these advances will be recovered. The local officers report that the recoveries may even exceed this proportion, and that the people feel grateful for the concession, and evince entirely a disposition to repay.

In reference to the issue of food-grain by Government to the people in distressed districts or provinces, whether gratuitously, or in wages for public work, or by sale, or in advances, or by all modes together, it is to be borne in mind that these processes, singly or collectively, must affect prices of all food-grains, not only in those districts and provinces, but also in neighbouring places. It is indeed impossible to define the area or distance to which such influence may extend, but the extent must be considerable. Comparisons are sometimes made between the prices of food-grains which have prevailed in

Behar and northern Bengal (into which provinces vast quantities of Government grain have been poured) during 1874 with the prices which have prevailed during the same period in neighbouring portions of the North-Western Provinces, and in other parts of Bengal, where no Government grain was sent. Surprise seems to have been sometimes felt that with all the scarcity of private grain in north Behar and in other distressed places, with all the impending misery and mortality averted only by Government aid, the prices, quoted in the local markets for other food-grains as well as rice, should have been not essentially dearer than those quoted in other districts where distress was but slight, or did not exist at all, and should not have reached the high prices that ruled in previous famines. Such comparisons, however, are manifestly inapplicable to the circumstances of the case. It was the policy of Government, and nothing else but that, which prevented prices in Behar in 1874 from becoming dearer than those of Hindoostan, and from reaching the rates of former famines. This policy in Behar acted indirectly to prevent prices in the immediately adjoining districts of the North-Western Provinces rising in sympathy with Behar rates. If there had been no importation by Government, Behar would have attracted an excessive quantity of grain from those districts, and would so have caused prices there to touch famine rates. Nothing short of this policy could save the mass of human life which was in jeopardy. The Government poured into the distressed districts 460,000 tons of grain, and by paying a part of the railway charges assisted private dealers to import 530,000 tons more. The importation by Government kept down prices in north Behar. The private importation, thus encouraged by Government, kept down prices in south Behar. The Government grain was distributed in all the remoter and more distressed tracts, and was sold to the public at rates adjusted according to the prices of neighbouring marts. When wholesome Burmah rice was to be had at these rates close to every village, the common rice of the country, though preferred to Burmah rice, must necessarily follow that standard. In short, the Government was obliged in parts of north Behar to take into its own hands the supply of food for the people. It is therefore manifestly impossible to compare the prices of a place and a time, wherein Government so seriously and potentially interposed, with the prices of other places and other times, wherein there has not been such interposition.

In the tracts south of the Ganges, where little Government grain was stored, the vast quantities of grain imported with the help of Government by private dealers from the cheap districts of northern India could be sold, with profit at rates cheaper than famine prices.

In the most distressed districts the supplies of food were regulated by the operations of the Government, acting for the safety of the people, within the limited area of interference. The pertinent question, therefore, is not what the prices were with State interposition, but what they would have been without it. Referring to this question, I subjoin a statement showing the range of prices in seven of the larger districts during the recent scarcity as compared with prices ruling in ordinary years and in the famine of 1866. It will be seen that, on the whole, prices were in 1874 quite twice as dear as they are in ordinary years. In the early part of the season, before the forces of Government had come fully into the field, prices were dearer during the recent scarcity of 1873-74 than during the corresponding months of the last famine of 1865-66; but from April to June quotations were much the same during both years. In other words, the tendency to an excessive dearness dangerous to life was checked in 1874, doubtless by reason of the proceedings of the Government. Then during July, August, and September of 1874, food was much cheaper than it was during the same months of 1866. Those months were in 1866 a time of very short stocks, of very high prices, of much misery, and of some starvation; whereas in 1874 the efforts of Government, seconded by private trade, sustained the people in fair condition, and kept prices considerably cheaper than starvation rates. According to the analogy of 1866, the failure of December 1873 and the prices of the four subsequent months must have been

followed by starvation rates in the summer and autumn of 1874 if Government had not interposed.

* The famine of 1866 was but little felt in the districts of Dinagepore and Rungpore.

In fact, however, it is attested by all classes of witnesses that the failure of crops in 1873-74 was very much greater than in 1865-66, both as regards extent of area and losses within that area. It may therefore be presumed, almost with certainty, that had affairs been left to follow an uninterrupted course, the prices of 1874 would have been much higher, and the distress much more intense, than in 1865-66.

Even with all our efforts, very high prices did occasionally obtain in limited tracts and under exceptional circumstances. So early as March common rice had risen to seven seers per rupee in parts of Tirhoot, before the Government granaries were opened. In May, when the entire machinery of relief was in play, prices more than once rose to one rupee for seven seers at Mozufferpore, the capital of Tirhoot. In May also a sudden outburst of distress occurred in an unexpected quarter of Purneah: the Government granaries were cleared out, and the price of common rice stood at five to six seers per rupee until further Government supplies arrived. In the Julpigoree district prices ranged from five to seven seers per rupee for a fortnight before the Government grain arrived. Calcutta merchants, who had been concerned in the Orissa famine, predicted most confidently, before the Government policy had been fully declared, that prices in Calcutta would reach seven and eight seers per rupee before the trouble was over.

I believe that none conversant with the facts can doubt that common rice would have been selling at five and six seers per rupee for months together over large tracts of Behar and Bengal if Government had not imported grain largely, and had not successfully promoted importation by trade. In the worst part of north Behar indeed, and in many other places from time to time, prices must have become even dearer than these last mentioned, until at last grain ceased to be procurable at any price. In such dire event, the people would have swayed hither and thither in a wild quest of food. Those who could move would have fled elsewhere, causing accession to the growing mass of misery wherever they went, or lying down to die by the way; those who could not move, would have perished in their homes. Such prices would after a time have attracted supplies by trade, but before the arrival of such supplies a large portion of the people would have been dead.

It is always to be remembered in India that the effect of any given price of food upon the people largely depends on their circumstances, such as the proportion of culturable to cultivated land, the incidence of the population on such land, the quality and value of the articles exported, the influx of money in payment for exports, the demand for labour, the rate of wages, and the like. Again, the effect much depends on the growth, continuance, or permanency of

these circumstances. If dearness of food arises from such causes as these, the people bear up against it, even flourish under it, to a degree that would hardly be credited unless experience proved the fact. In central and western India, for several years subsequent to 1861 prices prevailed which would cause misery in eastern and north-eastern India, yet with those prices the people of central and western India had abundant harvests, and made strides onwards in health, wealth, and strength. Experience will immediately show what the people in any given province can or cannot endure in this respect. And it is understood that in Behar and in many districts of Bengal prices dearer than one rupee for ten seers mean distress, and that prices dearer than one rupee for six seers mean mortality.

I need not dilate here on this part of the subject, as it has been already adverted to in Chapter II.

These considerations lead to the question how many lives may have been saved by the expenditure and the operations which have been described. It has been seen in Chapters II and IV that the condition of the people in the great rice tracts of Durbhunga, Mudhoobunnee, Ramnugger, Bettiah, Soopool, parts of Mozufferpore and Seetamurhee, and parts of Purneah, Dinagepore, and Rungpore, in March and April last, was this, that they had no food, no money wherewith to buy any, and no means of earning anything. I believe that the best informed persons are quite right when they say that the people of these tracts could not have come through the crisis without losing about one-third their number if Government had not stepped in and helped them. Such a consequence would represent the loss of about one and three-quarter millions of lives. Besides this broad sweep of destruction, there would have been sporadic mortality or individual casualties in large numbers in the districts of north Behar and northern Bengal generally; also in parts of Moorshedabad, of the districts round Burdwan, of Chota Nagpore and Sonthalia. This secondary degree of mortality would represent an aggregate which cannot be stated numerically, but it might perhaps represent a loss of nearly 500,000 lives. This would raise the possible mortality to a number of two millions and a quarter. The famine of 1769-70 afflicted very nearly the same region as that which has been visited by scarcity during the past year; and it was estimated by so competent an authority as Warren Hastings that one-third of the population of Bengal (or, as it has since been calculated, ten millions of souls) perished in the famine of 1770. This estimate must apparently have been excessive, still it may be referred to as having passed current for years, and as having been adopted by so able a thinker as James Mill in his History of India. In 1874, for several months three millions to four millions of people, and in two months four and a quarter to four and a half millions, were either living on, or helped by, grain or money supplied by Government or at the expense of the charitable relief fund. My estimate—and after all it is a mere estimate—is that more than half of this number, or upwards of two millions of people, must have fallen victims to the famine of 1874 if Government had not interposed on a great and costly scale.

It is apparently thought by some that in the provinces under the Government of Bengal the population is becoming too dense to be supported properly by the land; and that when the people have been protected by extra-ordinary efforts on the part of Government from famine and other calamities, there will remain the problem as to how they are to sustain themselves permanently in ordinary times. Without at this moment attempting a solution of this problem, which indeed demands the most vigilant attention, I will offer some facts and considerations which are immediately available as bearing upon it.

It has been mentioned in Chapter I that one of the measures by which the Government proposed to relieve distress was the promotion of emigration from the afflicted districts to parts of the country where food was cheaper and population less dense. For some years past about 30,000 persons have emigrated annually from Calcutta to the tea districts of Assam and to the British colonies. Very few of these emigrants come from the thickly peopled districts of Bengal or Behar; indeed Behar has hitherto contributed only 14 per cent. and Bengal proper barely 5 per cent. of all the emigrants who start from Calcutta. In November and December 1873 attempts were made to collect, in the densely peopled districts of Sarun and Tirhoot, a large number of families who would be willing to emigrate to Assam. It was found that unless liberal bounties were allowed and a regular staff maintained for recruiting emigrants, no perceptible relief could be afforded to the distressed districts. It was considered that the money available for relief would be better spent in other ways, and so the attempt to promote emigration to the tea districts was abandoned. At the same time the usual emigration promoted by employers of labour in the tea districts and colonies was more than ordinarily active.

The authorities in British Burmah, in December 1873, suggested that the scarcity would afford a favorable opportunity for promoting emigration thither from the rice districts of Bengal. The Government of India made a considerable grant of money in January 1874 to meet the cost of beginning a system of emigration to British Burmah. An officer acquainted with emigration affairs was deputed to superintend the business, and all the district officers of Bengal were made his agents to procure emigrants and assist them in starting. The result of eight months' working of the Burmah emigration agency has been that 5,040 emigrants have gone to Burmah, and that the Government has spent Rs. 99,115, or over Rs. 19 per head, in sending them. Much of this outlay will be repaid by the emigrants from their future earnings. Out of the total number of emigrants to Burmah, 3,479 came from Calcutta and the districts immediately round the metropolis; 1,199 from Behar; 87 from the Chota Nagpore country; and none at all from northern Bengal.

These facts may throw some little light on the question whether the pressure of the population of Bengal generally is too heavy for the resources of the land. The statistics of emigration (so far as they go) would seem to show that it is not. The fewness of Bengalee emigrants can hardly be due to any mismanagement on the part of emigration agents, for Bengalees themselves are quite as unsuccessful in obtaining emigrants. The chief minister of the Cooch Behar State, a highly intelligent and capable Bengalee gentleman, recently attempted in vain to induce families from his native neighbourhood, the Burdwan country, to emigrate to Cooch Behar, where excellent virgin soil close to dear markets is available at low rents.

A review of the export returns of Bengal ports shows that in ordinary years—

about 400,000 tons of rice (besides 40,000 tons sent annually up the Ganges into the North-Western Provinces);
about 175,000 tons* of oil-seeds of different kinds;
about 380,000 tons of jute and jute fabrics;
about 10,000 tons of indigo and opium from Bengal alone—

are exported annually beyond the sea.

These products, together with miscellaneous raw produce exports, occupy about 3,750,000 acres of the best arable land in the country; so that Bengal can in ordinary years support her own population, and can spare more than one-twelfth of her cultivated land for production of food and other staples for the use of other countries. These remarks, too, apply with special force to the very districts which have been lately the worst distressed, namely, north Behar and northern Bengal. The tracts recently most afflicted with scarcity export food largely in ordinary years, with the single exception of Sarun; but Sarun largely exports non-edible grains, which trade enables it to purchase food-supplies from many marts close at hand.

The agricultural statistics for Bengal have not been completed, but we know that, notwithstanding the great extension of cultivation during the last eighty years, there are still large areas of fertile soil awaiting the plough in Purneah, Dinagepore, Chittagong, Julpigoree, north Bhagulpore, and in Chota Nagpore.

Along the whole northern border of the most populous districts (which last year were also the most distressed) of Behar and Bengal, stretches a wide strip of fertile land awaiting the approach of cultivation. To the south of

* The total export of oil-seeds from Calcutta is about 20,000 tons a year, but of this one-eighth comes from the North-Western Provinces.

central Bengal lie the Sunderbuns, where, even allowing sufficient land for forest reserves, there are broad areas of rich waste available for settlers from the thickly-peopled districts of Bengal. To the west again of Behar and Bengal are situate the districts of the Chota Nagpore division, where the population is comparatively sparse, and where perhaps barely one-fifth of the land has yet been brought under the plough. In the rich valleys of Assam and Cachar there is ample space for any population that may overflow from Eastern Bengal for very many years to come. There are thus on all sides of Bengal wide areas of uncultivated land available for such surplus population as may migrate from the districts of Bengal and Behar.

Sir George Campbell instituted the systematic collection of agricultural statistics in 1872. As yet this work has been completed for the district of Jessore only. The results for that district show that much of the land produces two crops a year, and that lands given up wholly to food-crops yield on an average about one ton of clean rice to the acre; that is to say, an acre supplies ample food for four people for a whole year. In this case the land is yielding enough for the dense population settled on it and for a large exportation besides. Estimates made by competent authorities for Backergunge, Dacca, and the Sunderbunds, put the yield for those districts above one ton of rice to the acre. And some of the best lands in eastern Bengal produce three instead of two food-crops in the year. It is probable that many parts of Bengal do not produce at this rate; but it is believed that lands put down with two food-crops a year produce at a rate approaching to one ton per acre in eastern and northern Bengal. Probably lands bearing only one crop of rice a year in Behar and western Bengal may not yield more than half a ton of clean rice to the acre in ordinary years. Even this calculation would show that the land must be yielding enough for the population living on it, and for some exportation besides.

At the rate of half a ton of food to the acre, one square mile (640 acres) of food-crop land would support 1,280 persons. The area of Bengal, Behar, and Orissa (exclusive of Chota Nagpore, the Chittagong and Tipperah Hills, and the tributary states,) amounts to 133,924 square miles, with a population of 443 persons to the square mile. In the absence of correct agricultural statistics, the best estimate I can offer of the cultivated area is that in these three provinces about 48 millions of acres (equal to 75,000 square miles) are under cultivation. It is estimated that about four-fifths* of this area bear food crops. By this reckoning $38\frac{3}{5}$ millions of acres produce food; one-twelfth of the produce will more than meet all requirements for seed grain; so there remain 35 millions of acres for food, which will support 70 millions of people. But the population of these three provinces is only $59\frac{1}{2}$ millions. Therefore if the estimate now offered is near the truth, there is, without reckoning the yield of double crop lands, a considerable margin of food produce to meet demands for exportation, and to cover short production or occasional failure of crops over limited areas.

In western Bengal, especially Burdwan, and in Behar, the wages of unskilled labour are very low indeed, and there are large classes who live poorly in ordinary years. Their depressed condition has been strikingly apparent during the troubles of 1874. But recent investigations have shown that even in the Burdwan country the poorer classes are, in respect of petty comforts and conveniences, better off than they were twenty years ago. In eastern and northern Bengal the wages of unskilled labour are comparatively high, there is no pauper class, and the petty occupiers of the land are almost to a man comfortably off. For instance in the Rungpore district, where the population averages 619 to the square mile, and the whole people make a comfortable living by the land, it would be almost impossible to collect

* NOTE.—In the three sub-divisions of the Jessore district, for which accurate statistics have been collected, the proportion of food-crop area and of double crop land has been found to be as follows:—

	Acres.
Total area—1,581 square miles, equal to	1,011,840
Total crop-producing land	749,832
Land producing two or more crops a year	75,699
Area under food-crops	661,798

Out of this last total (661,798 acres) more than 75,000, equal to 11 per cent. of the whole, produces two food-crops in the year. In this tract, therefore, 89 per cent. of the cultivated land produces food; but it is notorious that the Jessore district yields a large surplus of rice, sugar, and other food stuffs for export to Calcutta and Western Bengal. In Behar, where opium and indigo are largely grown, the proportion of food crops to other staples is probably smaller than in Jessore.

five thousand workmen in any one place. The road-making, the palanquin-carrying, and the harder menial duties throughout Rungpore are usually done by sturdy immigrants who visit Rungpore and Cooch Behar annually from the less fertile districts of Chota Nagpore and Sonthalia.

Without at all controverting the opinion that the poverty of large classes of the people in some parts of the provinces under the Bengal Government does afford ground for anxiety, I believe that the above considerations forbid us to despond. There are evidently some facts which point the other way, and indicate that so long as the seasons are propitious and the crops prosper, the people will, as a whole, support themselves; that they can withstand a moderate degree of misfortune, and even a partial failure of harvests; and that nothing short of a really formidable calamity will drive them to the verge of danger.

The distress caused by widespread failure of crops in a country thickly inhabited by a purely agricultural population would not of itself show that the pressure of the population is too heavy in ordinary years. In very few countries could the people bear up against such a disaster as that. The rapidity with which the people re-established their agricultural livelihood in the summer of 1874, and with which vast crowds have, during the autumn of that year, left the relief works and relief centres all over Behar and northern Bengal, seems to show that the people look with entire assurance to the land proving sufficient for their support in ordinary years.

The events of 1874 have not indeed furnished any conclusive data for solving the question, which is perhaps insoluble, as to what may be the average amount of stocks of food in the country; but the experience of this year tends to show that these stocks in the distressed districts at the end of 1873 were larger than they had been supposed by many to be. The British Indian Association expressed in December 1873 their confident belief that "the stock of old rice in the country was not such as in any way materially to supply the deficit in the yield of the current year's crops." Again, my own estimates of the grain requirements of each district, which were framed after enquiry on the spot, reckoned on the people needing to consume some Government grain during February 1874, and a great deal more during March and April. Yet the result showed that in all the distressed districts the local supplies sufficed for the great majority of the population until the middle of March, and in some districts they lasted up to even later dates. Their exhaustion was constantly dreaded and frequently appeared imminent; still they held out in most places, though they ran short in some. Up to the end of April only 14,000 tons of Government grain had been consumed, as compared with a consumption of 57,000 tons anticipated in the estimates. It is true that we endeavoured at the outset by cash payments to prevent the consumption of Government grain, and that consequently during subsequent months, May to August, the Government grain was consumed at a rate fully equal to that which had been anticipated. Still there is the fact that stocks in great quantities were drawn out during the spring. Again at the end of the season, in September and October 1874, when the prospects of the winter rice-crop were nearly secure, considerable stocks of grain were brought to market in some of the districts where the failure of 1873-74 had been greatest.

The experience of 1874 has fully indicated the correctness of the policy which drew the Government supplies of grain mainly from Burmah and Saigon, and has also shown that rice is, for Bengal and Behar, the best kind of grain for Government to import. The small Government purchases made in Calcutta during December unavoidably disturbed markets and forced up prices to an extent out of proportion to the magnitude of the transactions, while the result showed that all the surplus food of northern India and of Orissa, that could by any means find means of transit, would work its way to the distressed districts by means of private trade. Considerable purchases (about 17,000 tons) were made by Government in Orissa; but a very much larger quantity (estimated to be about 50,000 tons) of grain found its way by private trade from Orissa into central Bengal, either for despatch to Behar or else to fill the vacuum caused by exportation from Bengal to Behar. The surplus grain of northern India, so far as the railway could carry it, was brought

into Behar by private traders, and thus the Government importations from beyond the sea were in addition to, and not in place of, the surplus grain available from other parts of continental India.

The people of Behar, as well as those of northern Bengal, preferred rice to wheat, and it seemed clear that they were not accustomed to eat wheat in any shape. In parts of Purneah, to which a small supply of northern wheat found its way, numbers are said to have boiled it like rice, and to have eaten it in that shape. Coarse grains, such as maize and the cheaper millets, were not imported by Government, with the exception of some small quantities, because they would not have kept sound longer than a very few months.

Burmah rice, though quite wholesome, was not so palatable to the people as Bengal rice ; but this circumstance had its advantages, for it was certain that few would consume Government Burmah rice who either possessed or could buy Bengal rice. But in the last resort the hungry people ate the Burmah rice and throve upon it. The Burmah rice kept well in India. Fears were expressed by experts from Burmah versed in the rice trade that the Government grain stored in bulk would heat and spoil, as large stocks often did in Burmah; but the Government rice from Burmah has almost everywhere kept well, has not heated, and has been comparatively free from weevils. Part of this result is probably due to the care taken by Government officers to construct good granaries, to keep them water-tight, and to maintain thorough ventilation throughout the stacks of grain bags.

We were not so successful in keeping other grains, such as gram and wheat. Some of the stocks were attacked by weevils and had to be sorted and sold off.

In respect to the state of the people, some questions must obtrude themselves, namely, in what physical condition has the administration of relief in 1874 left the masses of the population in the distressed districts? Has it improved the rates of wages? Has it caused any lasting material improvement? Has it aggravated or widened pauperism? Has it tended to demoralize the labouring classes? Has it altered, for better or worse, the relations between the people on the one hand and the Government and its servants on the other? Has it left any evil legacies behind it?

There is testimony, apparently universal, to the effect that all of the lately distressed classes are now, that is in October 1874, in quite as good health and strength as they have ordinarily been. That the humble classes connected with the land are in excellent working condition, is attested by the state of husbandry and by the area of well-tended cultivation at this moment. Of the classes lower in the social scale, some of them are ordinarily in poor physical condition, and they can hardly be otherwise now. Now that liberal relief has been dispensed for a time, they are declared by the best medical inspecting authorities to be not at all worse than usual, perhaps even to be somewhat above what must be acknowledged to be a low average state.

There is no sign as yet to show that the rate of wages has risen since the relief operations were undertaken. The intention was, in managing relief, and in introducing for a time causes which are in their nature artificial, to avoid every thing which might tend to permanently influence wages either way. It has been seen in Chapters II and IV that when daily wages were given for relief labour, they were made relatively low and kept down as nearly as possible to the standard of ordinary years. When relief labourers were enabled to earn much more than ordinary wages, that was under the piece-work system, which necessarily offers a premium upon extra exertion, and it was thought that this would not affect the future rates of wages proper. At all events it is presumable that the relief administration has not left the rates of wages at all worse than it found them, and that perhaps is all that could properly be expected. In north Bengal the rates of wages are moderately good and may yet rise. In north Behar they are very low, perhaps as low as they are anywhere, and lower than in most Indian provinces of equal wealth and culture. It were much to be wished, for the sake of the humbler section of the community, that they were higher. There seems at present to be no reason to hope that any essential improvement has set in. The only prospect of such improvement immediately discernible arises from the projects of railways and

canals in that region. If such works shall be undertaken, then doubtless the lower classes will receive their share of benefit in the shape of wages bettered.

As regards all the distressed districts save Burdwan, the belief is that pauperism has not been widened nor aggravated. At the period when the famine most touched the very poorest class, there were 750,000 persons on gratuitous relief and on light in-door labour. This number certainly included all the paupers of the distressed districts; but it included many more besides, namely, high caste people unable to beg or to work, and people unable to work and obliged to seek charity for a time only. The reduction of the total number began (as seen in Chapter V) in the beginning of August, and by the middle of September all those who could be made to obtain any support for themselves were discharged. Those who remained after the middle of September (444,000 persons, as seen in Chapter V) represented fully the pauperism of these districts. This number is equal to 2½ per cent. on the population of these districts taken at 18 millions in Chapter III—not a large proportion all things considered. These people ordinarily subsist on private charity. They also (as seen in Chapter V) have been undergoing discharge until they have disappeared almost entirely from the Government rolls everywhere save in the Burdwan division. There has been every desire on the part of Government and its officers to avoid retaining the poor people on the rolls a day longer than could be helped. Since their discharge these people must doubtless be again seeking private charity. In the absence of a poor law there must needs be a class who, by reason of sickness, infirmity, age, or helplessness, are forced to subsist on private charity. The relief system has preserved this indigent class in life through the crisis of the famine, when the sources of private charity were dried up. It has now restored them to their previous way of livelihood. There is no reason for supposing that it has done otherwise than leave them just as it found them. The pauperism of the country remains as it was. Its limits have not been enlarged.

There has been no demoralizing effect whatever visibly produced on the labouring classes. It is true that in the distressed districts these classes were for several months employed on the relief works. A small portion of them consisted of professional labourers, who work for hire in road-making and similar occupations. This limited class certainly made good earnings by the piece-work system; but as they did this by industry superior to the average, there is no reason to regard them as demoralized thereby. They were among the first to be discharged from the works as soon as the season changed for the better. They will doubtless labour in the future on public works and the like, much as they have laboured in the past. But the real bulk of the relief labourers consisted of the lower classes of ryots and cultivators and the field labourers. In Chapter IV it was shown that although the system of daily wages, unavoidably adopted as a temporary expedient, had demoralizing tendencies, the system of piece-work which was speedily substituted and finally adopted, had not any such tendencies, but quite the reverse. It is believed that these people, so far from being demoralized, were actually improved in morale by the system which was adopted. After the setting in of the rains the matter became one of demonstrable fact. For in what did the ordinary work of these classes consist?—Agriculture. After the rains set in, was there any reluctance on their part to return to their fields? Was there any slowness to sow? Was there any contraction of the average area of cultivation? Was any land ordinarily tilled left untilled? Was the first or autumn crop badly raised, tended, and gathered? Was the second or winter crop indifferently sown or inefficiently transplanted? Now all of the above questions, and any similar questions that could be put, may be answered emphatically in the negative. Never have these important things been done better by the people than during the summer and autumn of 1874. Though some persons here and there may have, during June last, been charged with unwillingness to quit relief, yet as a whole they have evinced a degree of alacrity and industry never surpassed by them within living memory. Such being the case, it is hard to see how they can have been in any way demoralized. On the contrary, they have probably learned a lesson regarding the vicissitudes of season and the expediency

of losing no chance of self-preservation by skill and promptitude. The only thing ever alleged against them was this, that in the autumn of 1873 they might have saved some part of their crops by turning streams to the uses of irrigation. But they were wanting in knowledge and not in will. Irrigation cannot be improvised by ignorant rustics for the first time in face of an emergency.

In respect to the relations between the people on the one hand and the Government and its servants on the other, if there is any alteration produced, it is for the better. The people cannot have witnessed unmoved the really vast preparations made by the British Government and the unflagging devotion of the relief officers of all grades. I am convinced that the people of all classes, from the highest to the humblest, regard with the utmost gratitude the policy and proceedings of Government on this occasion. They look back with extreme sensibility to the mortal peril which impended over them. Under Providence they attribute to Government their preservation from that peril. The impression left on their minds is profound, and will prove enduring. The sentiment of lively gratitude is not confined to the lately distressed districts, but pervades all the provinces under the Government of Bengal. The native press, the conversation of the people of all ranks, the addresses and representations constantly tendered to Government, teem and abound with proofs of this. From their bearing and conduct on this memorable occasion, all classes of the people, the zemindar, the landholder, the merchant, the trader, the ryot, the husbandman, the artisan, the labourers, the helpless poor, have risen in our estimation and regard. In respect to the officers of Government, their knowledge of the state of the people must have been greatly enlarged by the experience of the relief work, and they cannot but feel a more vivid interest than ever in the welfare of the people whose lives they have been instrumental in saving.

Respecting any supposed evil legacies of the famine, I hope that they are but few. Certainly a great expense has been incurred, about five and three-quarter millions sterling. This is an evil which cannot be overlooked or forgotten. It may be thought that a precedent has been established, which, whether for good or not, still is in either case most important. If any such precedent is thus established, I believe it will be for good, though I need not discuss its bearings here. Otherwise no evil legacy is perceptible. The famine relief may have not made the people better, but it has left them at least as well, morally and physically, as it found them. Some questions have been made prominent, the discussion of which may conduce to the public benefit hereafter. The insight of Government and its officers into the condition of the people and resources of the country has been improved. Public works for the prevention of famine in future have been designed. Another bond has been added to those bonds which unite the Government and its subjects. Above all, there is the moral effect of the elevated example which has been set by Government before the people at large.

One momentous lesson the famine has left behind it for our learning. That lesson teaches us the necessity of strenuous perseverance in the course of material improvement, on which the Government has already so beneficially and successfully embarked. It is only by such improvement that the country can be permanently protected from famine, and the necessity be avoided of adopting such extraordinary and costly remedies as those which have been described.

On a retrospect of the prevention of the famine, we cannot escape the question as to how the adoption of such extreme preventive measures on the part of Government in the future can be obviated. The calamity of 1874 is averted, the people are preserved in their ordinary condition, these fine districts are to pass on to 1875 with no unfavorable traces of the threatened destruction of 1874. But this has been effected at a very heavy financial cost to the State. During the period of safety there may be a disposition to forget that famine may happen again; still this contingency ought never to be absent from our reflections. Calamities of such awful magnitude as that which recently hung over these provinces are rare, and have been manifested at long intervals of time. We may hope that these provinces may, under Providence, long be spared such a visitation in the future. But at the worst, we must meet famine as we should meet war.

However such events shall again occur in Behar and in northern Bengal, there will be resources available which have been wanting on this last occasion. The Soane Canal, which, though incomplete, has been of great service* already, will be effectively protecting from drought the best part of southern Behar. There will be a railway connecting Patna, the commercial centre and emporium of Behar, with north-east Tirhoot, the chief scene of the late calamity. There is hope that irrigation works on a lesser scale will be securing from misfortune of season those rice plains on the northern borders of Tirhoot and Chumparun and those tracts of Sarun which have most suffered of late. In northern Bengal there will be a railway running through the heart of that territory from the Ganges at the south to the Himalaya on the north, which, had it existed in 1874, would have done much to prevent the famine in that region.

CONCLUSION.

WHATEVER may be the result of the proceedings of which the narrative is now concluded, we must be aware of the futility of mere human efforts for the averting of such a calamity as the famine of 1874; and we must be duly thankful for the mercy of Providence in sparing the lives of so many of our fellow subjects.

The Government of India can judge whether throughout the affairs, which have been described in this report, the officers of all grades working under the Government of Bengal have tried to act up to the terms of the resolution issued by the Governor-General in Council in March 1874, and whether they have striven to "perform the arduous task imposed upon them with the zeal, ability, and self-sacrifice which have always distinguished the servants of the Crown and of the East India Company in times of difficulty and danger."

No language that I can employ will adequately express my sense of the devoted manner in which the Government of Bengal has been served by the body of its officers during this period of extreme trial.

In a separate minute I have made a record of the services of the officers.

In another minute, also, will be set forth the various works for the relief and benefit of the poor undertaken during this crisis by the zemindars and other natives in the lately distressed districts, showing that their conduct has been worthy of their means, fortune, opportunities, and social position.

In recounting these events, the Government of Bengal thankfully remembers its obligations to the Government of the North-Western Provinces for the large staff of highly trained officers and the transport resources; to the Commander-in-Chief of the Army for the well-selected body of military officers, both European and Native; and to the Chief Commissioner of British Burmah for the timely arrival of the grain supplies.

Lastly, the Government of Bengal is gratefully conscious of the considerate guidance, the unvarying support, and the constant encouragement received by it in the fulfilment of its task, from the Governor-General in Council.

RICHARD TEMPLE.

* At page 7 of this paper it was mentioned that irrigation from the unfinished channels of the Soane Canal had saved the crops on 159,000 acres. The amount of food thus secured to the country is reckoned by the Irrigation Department to have been 70,000 tons, valued at £680,000 sterling.

NORTH-WESTERN PROVINCES.

Letter from C. A. ELLIOTT, Esq., Secretary to Government of North-Western Provinces, to the Secretary to Government of India, Department of Revenue, Agriculture, and Commerce, dated 1st January 1875.

In reply to your demi-official letter, dated 24th September 1874, and subsequent telegrams, I have the honor to forward reports on the scarcity of 1873-74 in the districts noted in the margin, with a brief narrative of the scarcity so far as it affected these Provinces.

Gorakhpur.	Allahabad.
Basti.	Banda.
Ghazipur.	Karwi.
Mirzapur.	Hamirpur.
Azamgarh.	Allahabad Divisional Review.
Benares Divisional Review.	Jhansi and Jalaun.
Jaunpur.	

2. The report has been urgently called for, and much delay has occurred in the receipt of the required information from the District Officers. The Lieutenant-Governor has, therefore, thought it better to submit this communication at once. A further despatch will follow, containing His Honor's remarks on the conduct of the officers who have borne the brunt of the work.

3. The Basti report is necessarily imperfect. The Magistrate, Mr. F. Elliot, under whom all the famine operations were carried on, was allowed to take furlough in October under the promise that he would submit a report before he left India. This promise he was unable to fulfil; but his report is expected soon, and will be forwarded when received.

Narrative of the Scarcity of 1873-74, *in the North-Western Provinces.*

Beginning and development of distress.

The rains of 1873 began in the North-Western Provinces more than a fortnight later than usual, were very deficient in quantity, and ended rather earlier than usual. At their close it was reported, especially from the eastern and sub-Himalayan districts, that the ponds and tanks were nearly empty, and this fact, added to the early cessation of the rains and the want of subsequent showers, indicated the probability of an extensive failure of the rice crop, and that the consequence of this, wherever rice is the main crop, would be scarcity and distress. No time was lost in ascertaining the measure of the calamity. On the 7th November a circular order was issued to Commissioners of Divisions, instructing them to demand from Collectors a full general report on the state of the crops in their districts and on the prospects for the coming season. Replies to this circular were received in December and January. It was at once seen that for the Agra, Rohilkhand, and Meerut Divisions there was nothing to fear, and that of the other three plains' divisions that of Benares had suffered most. The Benares report indicated South Mirzapur, Ghazipur, and the northern parts of Basti and Gorakhpur as the parts where severe distress was to be looked for. The extent of distress was, however, uncertain. Everywhere great hopes were built upon the rabi; but the parts where the rice failed most completely are also those where a second crop is usually sown in the fields which are still moist after the rice has been cut, and the ground in which the rice had perished was as hard as iron, so that this second crop could not be sown. As the cold season advanced, it gradually became evident that the districts in which State relief would be necessary were divided into two classes: *first*, those in the east and north-east of the provinces (the sub-Himalayan tract of Basti and Gorakhpur and the east of Ghazipur), which in climate and agricultural conditions more or less resemble the western districts of Bengal; and *second*, the Bundelkhand districts in the south,—Banda, Hamirpur, Jhansi, Jalaun, and Lalitpur—with the southern portion of Mirzapur, all of which have suffered from a succession of bad years, and where the cultivators and landowners are in a state of chronic distress. In all these tracts the pressure of scarcity began to make itself felt at about the same time. Relief works, for which provision had already been made, were opened in most districts during January and in the beginning of February. In Jhansi and Jalaun they were about a month later. They were of the usual type, being mostly road embankments and other works of the kind on which unskilled labor could be employed.

Winter rains.

2. Meanwhile the winter rains were anxiously expected. Every effort was made to supply their place by diligent irrigation, and advances were given by Government to all cultivators who required them to dig wells; but as the drought continued, serious injury to the young crops became inevitable, and towards the end of January the situation became critical. The Christmas rains always make the difference between a good and a poor harvest; and this year, the ground having been less soaked by the rains than usual, the harvest would have been exceptionally poor. To add to the misfortune of the province, a frost such as had not been known for years set in about the middle of January and continued for some days; it did not affect the hardy wheat and barley, but the arhar, peas, and other more delicate crops were completely burnt up by it. At length in the first week of February the long delayed rain fell in moderately heavy showers, and the heavy calamity which seemed to be impending was averted. Though too late to do all the good which it might have done had it fallen at the usual time, it was of incalculable benefit, and through its influence a year of high prices was substituted for a year of famine.

Inspection of eastern districts by Special Famine Commission.

3. The attendance on relief works, however, continued slowly to increase throughout the month. The numbers were greatest in the eastern districts, and as there was by this time little doubt that these were the only districts in which distress would be general and severe, it was thought desirable to obtain a comprehensive view of their condition. Messrs. Simson (Junior Member of the Board) and Carmichael (Commissioner of Benares) and Colonel Davidson, R. E., Superintending Engineer, were accordingly commissioned to make a tour through these districts and report to Government the results of their inspection. Their reports (dated 22nd and 30th March, 1874) showed that in Benares and Azamgarh there was no ground for apprehension, and that in Ghazipur distress was not nearly so widespread as had at one time been feared. Mirzapur the committee were unable to visit. By far the worst districts were Gorakhpur and Basti, and in each of these the northern portion had suffered most severely. Rice is there the main staple, and it entirely failed. The winter crops which are ordinarily sown for a second harvest, after the rice had been reaped, could not be put into the ground on account of the early cessation of the rains. In a tract so extensive, and in which the failure both of the spring and the autumn crops had been so general, it was not to be expected that the rabi harvest would bring much relief. For the last week of March the daily average attendance on relief works was about 30,000 in Gorakhpur and 22,000 in Basti, and there was evidently a steady tendency to increase, which it was probable would continue till the setting in of the rains dispersed the people to field work. Meanwhile other measures of relief were sanctioned. In the Maharajganj Tahsil of Gorakhpur one-half of the rabi revenue kist was remitted, and in Basti the Collector was authorised to propose remission or suspension of revenue where he thought it necessary. Advances were to be made to zemindars and ryots for the purchase of rice seed to the extent, if needful, of a lakh and a half in Gorakhpur and of half a lakh in Basti. The seed was procured from Nipal, sale being permitted by the Darbar to purchasers furnished by the Collector with a certificate, and the total amount of advances in Basti was Rs. 48,209, and in Gorakhpur Rs. 91,471. In Gorakhpur it was apprehended that the northern grain markets in the Maharajganj Tahsil might run short in the rainy season, when importation is difficult. The Collector was therefore empowered to advance money, repayable in a year, without interest, to traders who should guarantee to store grain at specified places, such grain being purchasable by Government at a price fixed so as to cover all the expenses of the trader. The grain stored under these conditions amounted to 90,865 maunds, and though eventually not required by Government, its presence in the district probably had a beneficial action upon prices. To merchants who preferred to import grain for sale at there own discretion, money was to be advanced, repayable without interest in six months, and in this way 10,700 maunds were imported.

Ultimate extent of distress.

4. This estimate of the situation formed by Government in March was confirmed by the event in all but one particular. It was thought probable that the distress would last

till the autumn crops (especially the rice) were ripe, and that the relief works would have to be kept open till then. The unexpected improvement in the spring harvest, however, diminished the distress considerably. The effect of the new supply of food was marked in Ghazipur, where the harvest was decidedly above the average, by a speedy decrease of the numbers employed on relief works, which fell from 3,000 in the end of February to 800 by the middle of April, and in the last week of July the works, which had been kept open for some weeks of the rains in deference to the wishes of the District Officer, were everywhere closed. In Gorakhpur and Basti distress may be said to have reached its highest point in the beginning of April, when the daily numbers on the works averaged 52,000 in the former and 28,000 in the latter district. But even after distress had attained its maximum the numbers on relief works continued steadily to increase. One reason for this was that the rabi outturn, though fairly good on irrigated land, had not been so plentiful in these districts as in Ghazipur, and in the sub-Himalayan rice tracts the area under this crop was very small. By the end of the month there were 91,000 people on the works in Gorakhpur and 84,000 in Basti. But the large and increasing proportion of women and children could not escape notice, and there were considerable doubts as to the extent of the distress which prevailed. On the one hand, it seemed that the relief works might be popular on account of the difficulty of exacting a full day's labor from the crowds who thronged to them and the liberty they enjoyed, and on account of the wages being paid in cash at a time when agricultural labor was very slack and there was nothing else for the people to work at. On the other hand, there was the hypothesis that these works were the sole refuge of a famished and despairing population whose only means of supporting life was by the wages earned on them.

Visit of Lieutenant-Governor to eastern districts.

5. Sir John Strachey lost no time after assuming the reins of Government in visiting the distressed districts, in order to form his opinion with the aid of the best local advice. The conclusion he came to was that, on the whole, the former explanation was the correct one, and that there was not really any such severe distress as to deserve the name of a famine. He decided that it was not advisable to close the works, but that efforts should be made to make the relief more distasteful by exacting a larger tale of work, and that the wages should be reduced to the minimum which would provide subsistence for the laborers. Evidence was adduced that the scale had until lately been too high, and that the relief works had attracted sellers not of necessaries only but of luxuries. The rates now fixed were on the scale which had been introduced by the Magistrate of Gorakhpur about three weeks previously, the allowance for infants only being lessened by one-half. They were—

For a man	...	5	Gorakhpuri pice (or one anna).
„ a woman	...	4	ditto.
„ a child able to work ...	...	3	ditto.
„ an infant	...	1	ditto.

Thus the exclusion of all who were not in need of aid was left to be gradually effected by the low rates of wages and the strict demand of a fair day's work from every laborer. The Collectors of both districts were authorised to allow zemindars to indent on the relief works for men, and laborers who refused to accept employment under these requisitions with the promise of full wages were to be turned away from the works. The rates of wages were also to be lowered as soon as should be consistent with safety, but the necessity of such a measure was practically obviated by the early setting in of the rains.

Disposal of laborers during rains.

6. There was a further question to be considered—how the people were to be disposed of during the rains. No less than 219,000 men, women, and children were congregated on relief works in the districts of Gorakhpur and Basti in the beginning of May. It was obviously impossible to provide out-of-door employment for these multitudes during the rainy season. One of the chief works was the raising of an embanked road through the centre of a great depression which would be filled with water in the rains; and in other places, though the work itself might not be in a swamp, it would have been difficult to hut the laborers on high and dry ground, and a serious outbreak of sickness from damp and exposure might be expected. There was, however, every reason to hope that with the coming of the rains the people would, for the most part, disperse to their ploughing and sowing, and the continuance of the relief system would not be necessary. The Lieutenant-Governor (Resolution No. 479A, dated 16th May 1874) therefore laid down the following general principles for the conduct of relief operations—

1*st.*—Able-bodied persons of a class accustomed to labor were to be employed on *bonâ fide* public works at the ordinary rates of pay.

2*nd.*—For persons of the above class incapable of labor on public works easy employment was to be found on roads, &c., or in poor-houses. The plan of these poorhouses was identical with that adopted by the Lieutenant-Governor when he was Collector of Moradabad during the scarcity of 1861, and was based mainly on the principles that relief should ordinarily be given in the shape of cooked food and restricted to persons obviously in actual want; that every one should work who was not physically incapable; and that all working paupers should remain the whole day in the poor-house.

3*rd.*—Gratuitous relief was to be provided for persons incapable of labor; and

4*th.*—Persons who on account of cast or other feeling or prejudices should refuse to accept relief on the above terms were to receive exceptional treatment.

Closing of relief works.

7. Steps were now taken for gradually introducing this change of system and for bringing the relief works to a close and dismissing the people engaged on them. Warning was given to the people that it was intended to close the works, and workhouses were established at the head-quarters of Gorakhpur and Basti: at Mithaura and Bansi in the north, and at Kasia in the east. The change was made with even less difficulty than was looked for. Towards the end of May, after a few partial showers, the demand for agricultural labor began to make itself felt in Gorakhpur, and from all the works there set in a steady flow of laborers to the fields. On the 30th May rain fell generally throughout the district, and the numbers in daily attendance on relief works, which had been 89,000 during the last week of the month, sank to 25,000 in the first week of June. The rains had now thoroughly set in, and a few days later the last relief work was closed, and the three workhouses were opened for the destitute who still claimed assistance. In Basti the number of laborers went on increasing to 127,000 daily in the last week of May. About this time wages were reduced by one-fourth, the rains began early in June, and by the 22nd of the month the last relief work was closed. In each district the workhouses opened with about 800 inmates.

General conclusions.

8. These events completely justified the conclusions arrived at by Sir John Strachey on visiting the locality, and they deserve special and prominent record on account of the importance of their bearing on the treatment of future famines. It appears probable that in a slack season of the year the opening of Government relief works would always attract great crowds of laborers. In a season of considerable pressure, but not of absolute famine, the relief works in Gorakhpur and Basti were for some weeks daily thronged by more than 200,000 men, women and children, who found an attraction in the light work, in the liberty of going at night to their houses after attending a sort of vast picnic during the day, and the wages earned at a time when ordinarily they had no employment in the fields and had to live on their harvest savings. But when the wages were cut down to a mere subsistence allowance, when a full day's labor was insisted on, and when the liberty of living at their homes was threatened, these immense crowds melted away as rapidly as they had collected, and it was found that there was hardly any one who really stood in need of relief.

Distress in the southern districts, South Mirzapur.

9. For the southern districts the history of the scarcity may be more briefly told. Here distress was due, not, as in the eastern districts, to the failure of a single staple, but to the fact that a series of bad seasons was followed by the indifferent autumn harvest of 1873. In South Mirzapur and in Jhansi relief works had been found necessary in 1872-73. In Hamirpur and Banda, and indeed throughout Bundelkhand generally, the spread of *kans* grass has of late years checked

cultivation and impoverished the people. Throughout a great part of these districts the country is wild and hilly, and the population poor and sparse. This is especially the case in South Mirzapur, where distress made its appearance in the plateau between the valleys of the Son and Ganges as early as the beginning of December, and attained its maximum about the middle of January, when for some time nearly 3,000 people were daily employed on relief works; but the outturn of the rabi harvest in this tract was so good that by the middle of March there remained only one work with about 300 laborers, and this closed in the middle of June. Among the hills to the south of the Son, in the Government estate of Dudi, and the Court of Wards' estate of Agori-Barhar, the effect of the spring harvest was less marked. Various measures of relief were adopted; advances were made to cultivators and to zemindars who undertook to employ labor; grain was imported and stored, and a number of small relief works were opened, to which the wild and timid people of Dudhi were at first hardly persuaded to come. Their only other means of escape from famine was emigration to Sirguja, but as the season wore on they gained confidence or were driven to the works by want, and the number of labourers gradually rose to 1,300 at the end of May. This was the maximum. On the setting in of the rains the people found employment in the fields, and all works were closed by the third week of June.

Banda, Hamirpur, Jhansi and Jalaun.

10. In Banda, Hamirpur, Jhansi, and Jalaun distress did not manifest itself so soon. Relief works were opened in Banda in the end of January, in Hamirpur in the beginning of February, in Jhansi in the beginning of March, and in Jalaun not till April; but as they lay in districts more populous than South Mirzapur, they were more numerously attended. The maximum daily average in Banda was between 7,000 and 8,000 early in March; in Hamirpur about 2,500 at the end of May; and in Jhansi and Jalaun respectively 1,000 and 180 during May. The Jalaun relief works and all the Banda works but one ceased as soon as the rains began; this one and the Jhansi relief works came to an end in the second week of July; and the last works in Hamirpur were closed by the 20th July.

Workhouses.

11. The workhouse system which was to be substituted for relief works during the rains in Gorakhpur and Basti has already been described. The same system was introduced into Banda and Hamirpur. In Gorakhpur the number of paupers in the three workhouses reached its maximum (a little over 1,500) in the end of July; it remained at about 1,000 during August, rapidly declined after the end of the month, and before the end of September all three workhouses were closed. In Basti the average during August was 1,800, and during the greater part of September about 1,200; October opened with about 550, and by the 21st of the month all workhouses were closed. In Hamirpur the numbers in the workhouses rose from 600 to 730 during August and September, but began to fall of in October, and by the end of the month all State relief had come to a close. in Banda the workhouses opened with nearly 1,000 inmates, and the numbers gradually decreased to less than 100 by the middle of August. On the 17th of October all workhouses were closed.

Prices.

12. During the entire period of scarcity prices may be said to have followed their own course. The dearness of grain in the eastern districts during the last three months of 1873 was probably due in part to export to Bengal, but before the beginning of 1874 this had wholly ceased. In Gorakhpur and Basti the rabi grains—wheat, barley, and gram—were at first even somewhat cheaper than they had been in the same months (October—February) of the previous year; but the deficiency of the rabi outturn reversed the case from March to June. The previous year, however, was itself an unfavorable agricultural season, and does not afford a fair standard of comparison. In an ordinarily good year, between October and June, a rupee will purchase not less than sixteen seers of wheat, and for the greater part of the time not less than twenty seers. In 1874, in March and April, after the spring harvest had come into the market, fourteen or fifteen seers was the cheapest rate for wheat. The prices of barley and gram were higher than usual in a considerably greater degree. All these grains were even dearer in Ghazipur from October to February, but there the plentiful rabi

outturn of March and April immediately brought prices down to about their normal level. In the case of rice, which is an autumn crop, there was of course no such fresh supply. The price in Ghazipur between November and June varied from eleven to twelve seers the rupee. In Gorakhpur the price rose to eleven seers in February and to ten and a half from April to June; in Basti it was nine seers during February and March, and eight seers and three-quarters from April to June. In an ordinary year a rupee will buy nineteen or twenty seers from October to March, and not less than sixteen from April to June. The range of prices in the other distressed districts was less remarkable. Grain of all kinds was more or less dearer than usual, but in general prices did not reach the famine limit, and the pressure of distress was, as already explained, due rather to the impoverishment produced by previous unfavorable seasons than to the deficient harvests of 1873-74.

Rates of wages on relief works generally.

13. In the beginning of February the execution of all relief works was made over to the Public Works Department of Government. By that Department a Resolution was published on 10th February for the determination of rates of wages on the following principles:—The daily wages given were to be sufficient to purchase a certain quantity of food, which was fixed according to the scale shown in the margin. It was calculated that in the district of Gorakhpur wages on the above scale would be six Gorakhpuri pice (or $1\frac{1}{5}$ anna) for a man, three for a woman, and two for a child. For the other districts the wages were left to be fixed by the Magistrate in accordance with the food standard prescribed. The maximum daily rates were $1\frac{1}{2}$ anna for a man, 1 anna for a woman, and $\frac{1}{2}$ anna for a child. If it should happen (which was not expected and did not in fact take place) that the daily quantity of food which these rates could purchase fell short of the standard, orders were to be required of Government. To the scale laid down by this resolution, wages paid in all districts gradually adjusted themselves. The rates at first paid in Gorakhpur and Basti were in Gorakhpuri pice of five to the anna:—

	Adult man.	Child above 10.	Child 10 and under.
	oz.	oz.	oz.
Flour ...	16	12	8
Vegetables	4	2	2

Man.	*Woman.*	*Child.*	*Infant.*
6	4	3	3

and in Ghazipur, were four pice equal one anna,

Man.	*Woman.*	*Child.*	*Infant.*
7	5	3	0

and in the end of February they were reduced to

Man.	*Woman.*	*Child.*	*Infant.*
6	4	3	0

In Banda, on the 1st April, the rates were,

Man.	*Woman.*	*Child.*	*Infant.*
4	3	2	1

About the middle of April the Collector of Gorakhpur found it possible to reduce the wages of a man to five pice, or one anna, and the allowance for non-laboring children to two pice. This change was ordered by Government to be introduced in Basti also, and the Ghazipur rates were to be brought down to the same scale. In the beginning of May the Ghazipur rates were reduced by the Lieutenant-Governor to four, three, and two pice, and on the 12th in Gorakhpur the allowance for infants was cut down to one pice, the rate which had already prevailed for some time in Basti. Towards the end of the month the Ghazipur rates were adopted in Basti, and the change, as has already been related, was followed by the speedy dispersion of the crowds assembled on relief works.

Expenditure on relief work.

	Rs.
Mirzapur	10,000
Basti	20,000
Gorakhpur	20,000
Ghazipur	10,000
Banda	10,000
Total ...	70,000

	Rs.
Gorakhpur at half a lakh per mensem for six months ...	3,00,000
Basti ditto	3,00,000
Ghazipur	4,000
Mirzapur	3,000
Banda	15,000
Hamirpur	3,000
Jalaun and Jhansi ...	5,000
Unallotted specially to any district	20,000
Total ...	6,50,000

14. On making over the execution of relief works to the Public Works Department in February, sanction was given to an expenditure of Rs. 70,000, as detailed in the margin. Towards the end of March the grants for Gorakpur and Banda were each increased by Rs. 10,000, a grant of Rs. 10,000 was made for Jhansi, and Rs. 10,000 more were placed at the disposal of the Public Works Department for expenditure as should be judged necessary On the 20th of April the sums shown on the margin were sanctioned in addition to former grants, and on the 17th of June a final grant of Rs. 4,93,000 was assigned to Gorakhpur and Basti. The accounts have not yet been closed, but the district reports which are printed with this state the expenditure as follows:—

	Relief works and other expenditure chargeable to the State.	Expenditure on poor-houses, &c., met from the charitable relief fund.
	Rs.	Rs.
Gorakhpur	3,40,195	10,894
Basti	4,28,557	9,637
Ghazipur	13,116	6,900
Mirzapur	46,239	... ...
Banda	13,249	6,026
Hamirpur	9,145	6,221
Jalaun	6,893	... ...
Jhansi	925	295
TOTAL ...	8,58,319	37,973

15. The relief works were intended for the support of the able-bodied poor. The North-West Government adhered to the rule laid down in the famine of 1868, that the duty of Government is to provide work for those who can and will work, but that the relief of those who are unable to work is a matter which devolves properly on private charity, in which the State should assist, but should not bear the whole burden. Accordingly, as on former occasions, a Central Relief Committee was formed and the subscriptions of the public invited, an equal sum to that subscribed being contributed by Government. The amount thus collected was Rs. 63,988, but the contribution from public funds was no more than Rs. 13,037, for the favorable turn taken after the rains of February reduced the task of the Committee, and the demand for assistance made upon them, far below the original expectations; and, speaking generally, it may be said that the offer of labor on the roads and in workhouses almost met all the requirements of the case. The Committee's report is printed as an appendix; it will be seen that the sums shown in it as expenditure from the charitable relief fund differ somewhat from those shown in the district reports, which are of later date.

Charitable relief.

16. The above remarks contain all that His Honor considers it necessary to say of the scarcity of 1873-74, regarded from a provincial point of view. The district reports, especially that of Gorakhpur, comprise all the detailed information that can be required, and the following paras. sum up briefly what was done in each district:—

Gorakhpur.

Mr. Lumsden's report gives a very full and clear account of the condition of the district, the causes of the distress, and the range of prices. Common rice, which is the staple food of the northern part of the district, stood at 10 or 11 seers from January to August, but no other grain was sold at what may be called famine prices; barley never fell below 13 seers, nor gram, except for a short interval, below 14. Relief works were opened at the end of January and in February,—(1) in the northern or Maharajganj Tahsil, where the main crop is rice, and which had

therefore suffered most severely; (2) in and about the city; (3) in the south-west part of the district, on the great embankment known as the Tuckerbund. On the first of these works the numbers averaged about 12,000 in March, 40,000 in April, and 41,000 in May. In the works round the city the numbers never much exceeded 7,000. At the Tuckerbund and another work near it 7,300 were employed in March, 16,500 in April, and over 19,000 in May. The average number in May on all the works was 78,000, and the maximum reached in that month was 89,000. Early in June these great masses melted away rapidly on the first appearance of the rains, and the works were all closed by the middle of the month, having cost altogether Rs. 3,20,444. Three workhouses took their place: one was established in the city, where was the greatest collection of permanent poor; one in the north, where distress was severest; and one in the east at Kasia; both the latter were but little used. The average at Gorakhpur never exceeded 1,000, and hardly rose above 200 at the other two places. The workhouses were closed in September, the total expenditure on them having been Rs. 7,353. Besides this Rs. 5,865 were expended from private subscriptions on poor-houses established earlier in the year and superseded by the workhouses, and Rs. 513 in relief to "pardah-nashin" women; Rs. 4,700 was the cost of keeping up hospitals for the poor-house and workhouse sick; Rs. 91,471 were given as advances for purchasing rice for seed grain. Altogether the cost of the relief works of all sorts was to Government Rs. 3,40,195, and the sum of Rs. 10,894 was further expended from the funds of the Charitable Relief Committee.

17. In Basti the first relief work—the road from Basti to Bansi—was opened on the 22nd January. Throughout February the numbers averaged about 5,000 a day; in March they were over 8,000; by the end of April they rose to nearly 35,000, and they stood at about this figure through May. In June they rapidly fell to 6,500. The next work opened was the road from Basti to Minhdawal undertaken at the end of February. The numbers in March were about 5,000 a day, in April they rose to 35,000, in May to 50,000, and in June they fell suddenly to 7,000. The Domariaganj road was begun in March, and in May it employed 30,000 laborers. The Basti-Faizabad road was taken up in May, and during that month the numbers averaged 7,000. On the road from Basti to Nepal no less than 30,000 people were employed throughout May. The rapidity of the dispersion of the people is shown by this fact, that while the number on all the works in the last week of May were 127,000, in the third week of the June they were 25,000. The total cost of these works was Rs. 4,28,557. The two work-houses were opened in June and closed in October, and their total cost was Rs. 9,637. The necessarily imperfect report sent up from this district does not show the average daily number of inmates.

Basti.

18. The Collector's report gives an interesting but rather highly colored account of the difficulties he had to encounter in his district, its over-population, and the chronic struggle of its laboring poor for bread. The rice crop, the failure of which was almost universal, is estimated to cover about one-seventh of the cultivated area of the whole district, and this failure came on the top of a series of bad seasons. The price of wheat stood at about 10½ seers in October 1873, barley and gram at 14 and 15 seers, and they remained low till the rabi harvest came in. Several relief works were opened early in February, and employed about 2,000 persons a day in that month and March, but with the reaping of the harvest the numbers fell to less than 1,000, and they were finally closed in July, having cost Rs. 13,116. No regular poor-house was established, but an existing one supported by the Municipality at Ghazipur was enlarged, and much gratuitous relief was distributed in grain and cash throughout the district. The cost of this was about Rs. 6,900 up to the end of October 1874.

Ghazipur.

19. In the south of Mirzapur (Robertsganj and Dudhi) wheat stood in October and November at about 12 to 14 seers, barley at 14 to 16, and rice at 11 to 12. With the end of March and the harvest gathered, all grains rose to an easier level except rice, which remained almost as dear till August. A great number of small relief works were set on foot in December and January, the population being too scattered and small to congregate anywhere in large numbers. The average daily attendance was between 2,000 and 3,000 in January, but fell off rapidly after the 15th March, and the works were closed on the 21st of June. The total expenditure was Rs. 25,136. Besides this, Rs. 21,103 were expended in advances to zemindars and cultivators for seed grain and food, and to

Mirzapur.

tahsils to help them to buy grain. Much of this has since been repaid, and almost all is recoverable.

Banda.

20. The rains ended in Banda on the 9th September, but no severe distress was felt till the beginning of February. Prices were not high then, for barley never fell below 16 seers, or gram below 20 seers per rupee, but the cessation of hired employment in the fields threw many of the poorer classes out of work. Three relief works were opened in February; the maximum attendance was in March, when the numbers rose to above 7,000 a day; they diminished greatly when the rabi harvest set in, and the works were closed by the end of June. Besides these works, 21 poor-houses were opened, the earliest of which were started in February. At these about 1,000 persons received daily relief in April (the maximum, 1,700, being reached in the first week of that month): the numbers diminished rapidly after the rains set in, and the poor-houses were closed in October. The total expenditure on public works was Rs. 13,219; on poor-houses Rs. 6,026.

Hamirpur.

21. At Hamirpur signs of distress were observed earlier. The price of wheat never fell below 13½ seers, or gram below 18 seers per rupee. In December and January two works were set in hand in order to provide relief; later on the number was raised to ten. They were all closed by the 20th July; the average number of persons employed was 1,100, and the highest number was about 2,500, in the last week of May. Six poor-houses were also opened, the average attendance at which was 434, and the last was closed on the 31st October. The total cost of the relief works was Rs. 9,145, and of the poor-houses Rs. 6,221.

Jalaun and Jhansi.

22. In Jalaun there was really no distress to speak of: one relief work was opened, more as a precaution than as a necessity, and only about 180 persons resorted to it: no poor-house was started. Jhansi, however, has long been in a semi-pauperised condition, and though prices were fairly* low and the prospects of the rabi good, there was a considerable amount of general, but not acute, distress in the eastern part of the district. Relief works were opened in March and closed on 14th July; the average attendance was about 1,000 persons, and the total expenditure was Rs 6,983. Poor-houses also were opened in several places, but were very little resorted to—not more than 50 persons a day being relieved at any time: the cost of this was only Rs. 295.

From the Secretary to Government, North-Western Provinces, to the Secretary to Government of India, Department of Revenue, Agriculture and Commerce,—No. 4, dated 11th January 1875.

In continuation of my letter No. 1, dated 1st January 1875, I am desired to forward the following remarks on the conduct of the Civil Officers engaged in famine relief operations in the North-Western Provinces in 1874.

2. The chief brunt of the work fell on the Magistrates of Gorakhpur and Basti, Messrs. Lumsden and Elliot. Both these officers—and especially Mr. Lumsden—showed energy and zeal in devising and setting on foot measures for the relief of the distressed, ability and local knowledge in placing before Government the true condition of the country, and discretion in perceiving when the distress had passed away and the time for contracting the operations had come. The Lieutenant-Governor thinks that Mr. Lumsden deserves the high commendation of the Government for the excellent services which he has rendered. Among their Assistants, Messrs. Stoker and Thomson of the Civil Service, and Mr Mills, Inspector of Police, deserve special notice.

3. Among the officers on the Public Works establishment who supervised and carried out the relief works in these districts, the Chief Engineer singles out Lieutenant-Colonel E. Davidson, R. E., Superintending Engineer, Captain Beauchamp, R. E, and Mr Sub-Engineer Peart, for special commendation.

4. Syud Ahmad Khan, Bahadur, C. S. I., readily responded to the call of Government, and gave very useful help in establishing a system of work-houses on the same principle which was adopted in Moradabad in the famine of 1861.

5. The arrangements made by Mr. C. Robertson, Magistrate of Mirzapur, for meeting the wants of the wild and difficult region in the south of his district, were all that the Lieutenant-Governor could desire.

6. Mr. Oldham, the Magistrate of Ghazipur; Mr. Wall, the Magistrate of Banda, with his Assistants, Messrs. Knox and Hardy; and Mr. Kaye, Magistrate of Hamirpur, showed great devotion and zeal in superintending the works and relieving distress in those districts.

7. All these officers have received the thanks of the Lieutenant-Governor for their services.

* The maximum price of wheat was 14½ seers; of grain 5⅝ seers per rupee.

Letter from C. A. ELLIOTT, Esq., Secretary to the Government of the North-Western Provinces, to the Secretary to Government of India, Department of Revenue, Agriculture, and Commerce,—No. 13, dated 11th February 1875.

In continuation of my letter No. 1, dated 1st January 1875, I have the honor to forward the report of the Central Famine Relief Committee mentioned in para. 15 of the narrative accompanying the letter above quoted.

Letter from C. A. TURNER, Esq., Chairman of the Executive Committee of the Central Famine Committee, North-Western Provinces, to the Secretary to Government, North-Western Provinces,—No. 195, dated 28th January 1875.

In pursuance of a resolution passed at a public meeting convened at Allahabad on the 7th February 1874, His Honor the Lieutenant-Governor was pleased to nominate a central committee to concert measures for the relief of the indigent classes in such districts of the North Western Provinces as were threatened with scarcity, and in the famine-stricken districts of the North-Western Provinces.

2. His Honor was pleased to intimate that the Government would provide labor for all who could work, but that the support of the sick and aged, the young and tender, and the infirm, must mainly be the care of private charity; and His Honor announced that to all subscriptions raised for these purposes, the Government would contribute an equal sum.

3. On the 12th February the central committee appointed an executive committee, instructing it to meet at regular intervals for the transaction of business.

4. At a meeting of the executive committee held on the same date it was resolved—(1) that the Collectors of the several districts in the North-Western Provinces should be requested to form committees to collect subscriptions; (2) that the Collectors of Basti, Gorakhpur, Ghazipur, Mirzapur, Hamirpur and Banda should be requested, if they had not already done so, to form relief committees, to keep the central committee acquainted with the state of destitution in their respective districts, and the amounts which they might from time to time estimate as required for relief of the poor who might be unfit for labour; and (3) that while the circumstances of particular places or persons might require and justify a departure from the rules prescribed by the committee, relief should only be given ordinarily to those persons only who could not labor on relief works, and in the shape of cooked food, not exceeding 10 chittacks per diem for each adult.

5. On the 22nd April the Government, North-Western Provinces, issued a circular to the Collectors, declaring that the entire supervision of charitable relief, and auditing of accounts connected with it, has been confided to the central committee, and ordering that the accounts both of collections of contributions and disbursements should be submitted to the committee in such form as the committee should prescribe. It was at the same time announced that the Government would not sanction any expenditure on poorhouse or charitable relief shown in the treasury accounts of any district until it were shown to have been approved and audited by the central committee.

6. In order to prevent any migration of the poor from the district of Gorakhpur into the district of Champaran, Lower Provinces, and thereby disturb the calculations of the officers of that district, the executive committee requested the Collector to establish centres of relief at the outlying tahsils, and to put himself in communication with the Collector of Champaran.

7. Acting on the instructions, and guided by the principles above indicated, the executive committee procured the appointment of local committees where they had not been appointed in districts requiring relief, received the contributions forwarded from the several Collectorates, made grants, and received and scrutinized accounts of expenditure.

8. The committee received from the undermentioned districts the subscriptions entered in the subjoined statement:—

	Rs.	A.	P.
Allahabad	5,030	3	0
Agra	799	6	0
Budaun	2,721	10	3
Bareilly	1,242	8	0
Bijnor	2,269	13	0
Bulandshahr	1,848	10	0
Etawah	1,137	12	0
Farukhabad	2,095	0	0
Jaunpur	102	0	0
Lalitpur	202	9	0
Meerut	10,201	8	0
Mirzapur	1,774	0	0
Moradabad	2,524	4	0
Muttra	8,520	0	0
Muzaffarnagar	3,233	8	0
Roorkee	578	13	6
Saharanpur	3,367	12	0
Shahjahanpur	1,500	0	0
TOTAL ...	49,149	4	9

9. In the districts mentioned in the subjoined statement the Collectors received in subscriptions, and, under the sanction of the committee applied to local requirements, the sums therein shown:—

	Rs.	A.	P.
Allahabad	100	2	0
Banda	1,718	2	11
Ghazipur	5,372	6	10
Gorakhpur	5,084	10	1
Hamirpur	2,607	10	7
Jhansi	208	4	10
Basti	754	6	5
TOTAL ...	15,845	11	8

10. The districts of Fatehpur and Aligarh gave no contribution to the fund, nor did the district and wealthy city of Benares. Of the sum subscribed in the district of Muttra, no less than Rs. 7,000 were the gift of Seths Gobind Das and Lachhman Das of Muttra, who received the thanks of Government for their liberality. Subscriptions were raised in the district of Azamgarh, and, it is believed, expended to meet local requirements; no account of these subscriptions or of their disbursements has come to the hands of the committee.

11. The total amount of subscriptions received by the committee and by the district officers, over which the committee has had control, is Rs. 64,995-0-5.

12. Before the full amount subscribed was received, the committee drew from the treasury the sum of Rs. 13,036-12-4, being the amount contributed by the Government under the order before mentioned.

The committee has therefore to account for Rs. 78,031-12-9.

13. The sum of Rs. 15,000 was subscribed and remitted by the inhabitants of Bombay for the relief of sufferers from famine in the North-Western Provinces. When the gravity of the crisis in the North-West had disappeared, and it had been ascertained that the sums subscribed in these Provinces would be adequate to meet local requirements, it came to the knowledge of the Committee that distress existed in Sind, for the relief of which an appeal to Bombay was probable; the Committee therefore replaced at the disposal of the subscribers in Bombay the Rs. 15,000 which had been remitted from that Presidency.

14. The central relief committee in Calcutta announced to this committee a resolution passed by it, declaring that the funds received from subscribers in England were available for the relief of the distressed in the North-Western Provinces. The committee for the North-Western Provinces finding that its funds were amply sufficient did not avail itself of this resolution.

15. Before discussing the particulars of the expenditure incurred under the sanction of the committee, it will be convenient to state that the extent of population and the incidence of Government revenue per acre have been taken from the census tables recently published, and that the number of persons stated to have been employed on public works has been ascertained from a return obtained from the Department of Public Works, which apparently does not include the number of persons employed on works of which the expense was defrayed from local funds.

16. Relief was given in the shape of cooked and uncooked food and cash. The cooked and uncooked food consisted chiefly of the cheaper grains, such as dal, bajra, gram, barley and common rice, and the flower of the *mahua* tree. The sick and infirm under medical direction received more nutritious diet. Relief in cash was distributed principally to *purdah-nusheen* women.

17. The miscellaneous expenditure (where it is not otherwise stated) includes these cash payments. It also includes charges for the construction of poor-houses, for the provision of culinary vessels, firewood, cotton for the employment of those able to spin, and medical assistance and medicines.

18. The district officers submitted accounts showing the particulars of the expenditure weekly, and these accounts have been carefully scrutinised by the committee.

19. The following is an account of the operations of the committee in the distressed districts:—

Ghazipur.—This district has been selected as the first for mention because the committee has received from the Officiating Collector, Mr. Oldham, a copy of a carefully compiled report submitted by him to the Commissioner of the Division; and putting aside the peculiar circumstances of the district, many of the remarks made by Mr. Oldham are, it is believed, applicable to the other districts, in which operations for the relief of distress were carried out under the supervision of the committee.

The features which distinguish Ghazipur from the districts last mentioned are the greater density of its population; its production of valuable crops other than food crops—circumstances which conduce to a third difference; its greater reliance on imports for its food supply; and lastly, as compared with some of the other districts, its enjoyment of greater facilities for importation in the shape of rail-road and river communications with foreign markets.

The average population of Ghazipur is estimated at 620 persons to the square mile. The incidence of the Government revenue per acre is Re. 1-1-4 to the total area, Re. 1-1-7 to the area under settlement, and Re. 1-8-0 to the area under cultivation. The Officiating Collector estimates the area under cultivation at 1,000,000 acres; and he considers that of this, 20,000 are devoted to opium, 10,000 to indigo, 40,000 to rose and oil-seeds, and 100,000 to sugarcane. Thus a total of 1,75,000 acres are abstracted from the total area under cultivation to produce crops other than grain crops.

To meet the deficit in the food supply, the Officiating Collector calculates that in ordinary years from 120,000 to 130,000 maunds of edible grains are annually imported by rail, and a yet larger quantity by road and river. From 1st October 1873 to 1st October 1874 the importations by rail amounted to no less than 864,728½ maunds. This increase was doubtless in some measure due to the reduction of freight, but still more to the circumstance, that whereas in ordinary years the district draws much of its supplies from Bengal and the grain from Bengal is introduced by road and river, in the year ending 1st October 1874 the bulk of the food supply was obtained from the North-West and the Punjab. The increase in importation by rail was, in addition to these causes, mainly due to the failure of the kharif crop in the district.

The Officiating Collector insists on the fact that the whole of this importation was effected by private enterprise, and the circumstance is certainly noteworthy. The disaster in Orissa has been frequently made the text of diatribes against the science of political economy. It has been urged that the ordinary rules of that science are inapplicable to the circumstances of India. This objection, when taken to the rule that demand begets supply, merely comes to what every political economist would allow, that the rule is only applicable when there are facilities for the supply. There must be the article available, the means of transport, the wealth with which it can be purchased by the importer, the energy which sets the importer in motion, and the retail distributor. In Orissa several of these essentials were found wanting. In Ghazipur they were all present: grain was to be had in foreign markets at rates which made its importation profitable, the rail-road conveyed it to the place where the demand existed, the importers and retail distributors merely extended operations to which they were habituated and for which the wealth of the district was adequate to provide funds.

In dealing with famines it may be found necessary, according to the peculiar exigencies of the crisis or the circumstances of the locality, to provide any one or more of the facilities abovementioned.

If a Government recognises it as an incumbent duty to protect its subjects from famine, it may have to bring the food required within the reach of the importer, to supply the means of transport, or itself to take the place of the

importer or distributor, or it may have only to furnish funds to importers and distributors to enable them to extend their operations; but inasmuch as any interference on the part of the Government may tend to check private enterprise by rending its gains hazardous, it is obvious that, where it is possible, the interference of Government should be limited to those matters which private enterprise cannot achieve, or can only achieve with assistance. The provision of access to foreign markets by rail-road or water communications is a work, in the present condition of India, generally beyond the means of private enterprise, and therefore the intervention of the Government in this matter is essential.

There can also be no question of the soundness of the policy pursued by the Government, North-Western Provinces, during the recent crisis in offering to importers and distributors advances to enable them to extend their operations. This amplification of the ordinary channels of trade educates and stimulates private enterprise; and where a sufficient number of importers and distributors are provided with funds, so as to secure healthy competition, the cost of the importation and distribution of the food supply, when carried out by private enterprise, will probably be found far less than it would be were the same work accomplished by the agency of a staff of officials suddenly called into existence to meet the emergency. The importers and distributors bring their experience to bear on the work; their private interest inculcates the strictest economy, and they keep and check their own accounts. The importations into the district of Ghazipur during the scarcity of 1873-74 go to show that in this country private enterprise is equal to meet such crises where the normal conditions exist which are essential to the operation of the law of supply and demand. Although the committee is not in possession of figures which would enable it to speak with certainty upon the subject, it is believed that large importations of food-grains also reached the other distressed districts in these Provinces through private enterprize.

The main feature which is common to Ghazipur and the other distressed districts is the poverty of the labouring classes. The Officiating Collector states that at a time when there is more than the ordinary demand for labour, indigo-planters pay mate-weeders four-fifths of an anna per diem, and common weeders three-fifths; and that, excepting in harvest time, a ploughman with a pair of oxen receives for himself and his cattle only two annas per diem.

Cash wages are, however, by no means the rule in villages in the North-West. The proprietors ordinarily pay their labourers a certain allowance of grain, and on rare occasions a rupee or two to buy clothes. The greater portion of the land being held in small parcels by proprietors or tenants, no sooner does scarcity manifest itself, than the hired servants are, as is pointed out by Mr. Oldham, discharged, being sometimes replaced by the members of the family who in ordinary seasons would not labour in the fields. Again, in an Indian village, which, as Mr. Oldham has pointed out, is in itself a kind of small community, the occurrence of dearth deprives of employment the village artizans, such as weavers and blacksmiths. Even in richer countries high prices of food check the retail trade in all articles with which the consumer can for a time dispense. The small wages of the village artizan, which are ordinarily paid in grain, afford no reserve to which he can have recourse when employment fails or his wages are unpaid. Lastly, the charity habitually practised by the natives of India, in the support of the aged, the infirm, and the religious mendicant, comes to an end with the small funds out of which it was doled. The general indigence of the small proprietary and labouring classes causes the effects of a bad harvest to be felt more immediately than in a country in which these classes are either themselves richer, or dwell amongst, and in a measure depend for their employment on, a wealthy proprietary body. It is therefore absolutely essential, in order to ward off from the people of this country the evils of famine, that energetic measures should be taken on the first threat of the calamity.

In Ghazipur, as in the other distressed districts, the cause of the dearth of 1873-74 is to be found in the failure of the kharif crop, on which the poor principally depend for their food supply.

The central committee remitted, for the relief of distress in this district, the sum of Rs. 5,354-12-3, and the subscriptions collected by the district officers amounted to Rs. 5,372-6-10, making together Rs. 10,727-3-1.

Twenty-three thousand five hundred and fourteen rations of cooked food were distributed, at a cost of Rs. 1,348-4-7, and 148,649 rations of uncooked food, at a cost of Rs. 4,305-8-1; while Rs. 742-0-5 were distributed in cash to 4,160 persons. The balance, Rs. 3,831-6-0, has been appropriated to the relief of sufferers from inundation, as will be hereafter explained.

The months in which the largest number of rations were distributed are shown in the marginal table, together with the number of persons employed in the corresponding months on relief works. The average cost of a day's rations of cooked food is shown as eleven pies; but as the whole of the sums entered as miscellaneous expenditure are shown as expended in cash donations, it appears that the sums charged in other districts under this head are included in the cost of the cooked rations in the Ghazipur return. The average cost of a ration of uncooked food is shown as less than six pies.

	Number of rations distributed.	Number of persons on relief works.
February ...	65,467	806
March	66,605	1,247
April	7,759	647
May	2,227	689
June	2,521	956
July	7,831	...
	...	...

It will be seen that the necessity for relief greatly diminished in this district when the harvesting of the rabi crops commenced.

The number of persons employed on relief works shown in the above table is taken from a return obtained from the office of the Department of Public Works. The return furnished by the Officiating Collector shows a considerably larger number, possibly because in it are included persons employed on works of which the cost was defrayed from local funds. The rates of wage originally paid to persons employed on relief works was one and a half anna for each man, one anna for each woman. In February the rates were reduced to one and one-fifth anna for each man, four-fifths of an anna for each woman, and three-fifths of an anna for each child; and subsequently to four-fifths of an anna for each man, three-fifths of an anna for each woman, and two-fifths of an anna for each child.

20. *Gorakhpur.*—In this district the number of persons to the square mile is 441; the incidence of the Government jumma per acre is Re. 1-9-6 on the total area, Re. 1-10-2 on the area paying revenue, and Rs. 2-11-2 on the area cultivated.

Mr. Simson reported on the 2nd March 1874 that the kharif crop had almost totally failed, and that less than the ordinary area was under cultivation for the rabi crops.

The district officers collected in subscriptions Rs. 5,084-10-1, and the committee remitted Rs. 7,704-0-1, making a total of Rs. 12,788-10-2. The sum of Rs. 12,383-15-11 was expended in providing 175,149 rations, and in meeting miscellaneous charges to the sum of Rs. 5,981-12-1.

The average cost of a daily ration, excluding miscellaneous charges, was therefore about $7\frac{1}{5\,4}$ pies.

The table in the margin shows the months in which the largest number of rations was distributed and the number of persons employed in the corresponding months on relief works.

	Number of rations distributed.	Number of persons on relief works.
March ...	36,532	21,825
April ...	38,840	73,261
May ...	30,415	78,059
June ...	17,409	29,314

21. *Basti.*—In this district the population is 528 to the square mile: the average incidence of Government revenue per acre is Re. 0-11-11 to the total area, Re. 0-12-3 to the area under settlement, and Re. 1-1-8 to the cultivated area.

The circumstance of the district much resembled those of Gorakhpur.

The sum of Rs. 7,358-8 was remitted by the committee, and accounts have been received of the expenditure of Rs. 7,982-12-9, in providing 106,741 rations, and in meeting Rs. 1,967-13-11, miscellaneous expenditure. The average cost per ration, excluding miscellaneous charges, was about $10\frac{8}{1\,0}$ pies.

	Number of rations distributed.	Number of persons on relief works.
April	5,843	56,697
May	21,794	125,908
June	24,650	49,935
July	23,857	...
August	20,663	...
September	14,459	...

A balance of Rs. 130-1-8 remains to be accounted for or remitted to the committee.

The table in the margin exhibits the months in which the largest number of rations were distributed and the number of persons employed in the corresponding months on relief works.

22. *Hamirpur.*—The population of this district is shown as 231 to the square mile; the incidence of the Government jumma per acre to the total area is Re. 0-11-10, to the area under settlement Re. 0-12-1, and the cultivated area Re. 1-5-8

The Collector reported that a succession of bad seasons had reduced the people to such poverty that many were starving. The Sanitary Commissioner,

North-Western Provinces, in his report for 1873, had brought to the notice of the Government the miserable condition of the people in several parganas of this and the adjoining district of Banda, reporting that many appeared to him bordering on starvation. The normal condition of the district will account for the circumstances that the rise in the price of food grains throughout the North-Western Provinces was specially felt there.

The district officers collected Rs. 2,607-10-7, the committee remitted Rs. 4,236-4-0, making a total of Rs. 6,843-14-7. Of this sum, Rs. 6,530-8-0 has been accounted for in providing 115,519 ration and meeting Rs. 2,387-7-5, miscellaneous harges; the average cost of a ration, excluding miscellaneous charges, being somewhat under 7 pies. A balance of Rs. 313-6-7 remains to be remitted to the committee.

	Number of rations distributed.	Number of persons on relief works.
April ...	9,254	1,323
May ...	13,551	1,540
June ...	14,045	1,955
July ...	16,707	...
August ...	21,632	...
September ...	20,408	...
October ...	7,832	...

The table in the margin exhibits the months in which the largest number of rations were distributed and the number of persons employed in the corresponding months on relief works.

The Collector attributes the increase in the numbers the relieved in July partly to the closing of relief works, and partly to the fact that owing to the incessant rains, employment in the fields in weeding, &c., was not procurable.

From the circumstance that only 1,955 persons were employed on relief works in June, it is obvious that the closing of the relief works can hardly account for the increase in August and September. It is more probable that employment in the fields was scarce, and that until the chief grain crops, the produce of the kharif, were harvested, the poverty of the landholders in the district prevented them from maintaining hired labourers and dependents.

23. In *Banda* and *Karwi* the population averages 240 to the square mile; the incidence of the Government jumma per acre to the total area is Re. 0-11-9, to the area under settlement Re. 0-12-1, and to the cultivated area Re. 1-6-7.

The circumstances of the district appear to resemble those of Hamirpur, and the observations recorded by the Sanitary Commissioner in his report for 1873 apply, as has been stated, to several of the parganas of Banda.

The sum of Rs. 1,514-12-0 was collected by the district officers, and the sum of Rs. 5,914-12-0 was remitted by the committee, and Rs. 203-6-11 were received as sale proceeds of the products of labour for which material was provided by the local committee. Of the total receipts, Rs. 7,632-14-11, Rs. 4,747-7-4 were expended in food rations, Rs. 826-11-3 in out-door relief, and Rs. 1,488-10-1 in miscellaneous charges. The average cost of a ration, excluding miscellaneous charges, was somewhat less than 7 pies. A balance of Rs. 570-2-3 remains to be accounted for or returned to the committee.

The months in which the largest number of rations were distributed is shown in the marginal table, together with the number of persons employed in the corresponding months on relief works.

	Number of persons on relief works.	Number of rations distributed.
March ...	42,247	3,916
April ...	34,187	941
May ...	28,660	329
June ...	13,876	99
July ...	6,402	...
		...

It will be seen that the number employed on relief works in Banda is small as compared with the number of rations distributed. This is probably to be attributed to the circumstance that the distressed population were scattered over so large an area that it would have been necessary to open a number of relief works at an inordinate expense, whereas at a much less expense relief was afforded to small groups of distressed persons at each tahsil centre. In Karwi there were no relief works. The pressure of distress in the district was apparently relieved immediately on the harvesting of the rabi crop.

24. *Jhansi.*—In this district the average population is 203 to the square mile, and the average incidence of the Government revenue per acre is to the total area Re. 0-7-6, to the area under settlement Re. 0-8-3, and to the cultivated area Re. 0-15-9.

The sum of Rs. 208-4-10 was collected in the district, and expended in 4,901 rations; the average cost of a day's ration, *including* miscellaneous expenditure, which is not distinguished in the accounts of this district, being somewhat in excess of 8 pies.

The table in the margin shows the months in which the largest number of rations were distributed and the number of persons employed in the corresponding months on relief works.

	Number of rations distributed.	Number of persons on relief works.
March ...	276	708
April ...	380	720
May ...	1,559	943
June ...	1,494	861
July ...	1,192	...

25. *Allahabad.*—In this district, is a population of 507 persons to the square mile; the incidence of the Government jumma per acre is to the total area Re. 1-3-6, to the area under cultivation Re. 1-3-9, and to the cultivated area Re. 2-0-8.

The Collector reported that although there was no actual famine, many persons residing in the parganas of Barah and Khairagarh are so poor that the slightest rise of prices affects them. In ordinary seasons about 80 persons are fed at a poorhouse at Mega, the expenses of which are met by the zemindars of the two parganas. In the spring of 1874 the number of necessitous poor increased so largely that an application for assistance was made to the committee. The committee accordingly remitted to the Collector Rs. 1,945-10-10, making, with a sum of Rs. 100-2-0 collected in the district, a total of Rs. 2,045-12-10. This sum was expended in providing 33,502 rations, and in meeting miscellaneous charges to the amount of Rs. 401-4-2. Excluding miscellaneous charges, the average cost of a day's ration was about 9 pies.

No relief works were, it is believed, open in this district.

The stress of the scarcity was most felt in this district in the months of April, May, and June. In April 8,622 rations were distributed; in May 12,682.

The number fell to 9,348 in June and to 682 in July, when extraordinary measures of relief were discontinued.

26. In addition to the sums above shown as expended, the committee made grants for the relief of distress occasioned by sudden calamity other than *dearth*, and pressing the more severely on the people by reason of the high price of food. Thus in several small townships or hamlets of Ghazipur the dwellings of the population were destroyed by violent rains and abnormal inundations. Immediately on the occurrence of the disaster, the Collector remitted Rs. 500 for the relief of the indigent poor in Ballia, an expenditure which was at once sanctioned, while grants to the extent of Rs. 3,331-6-0 have been made to assist the people in rebuilding their houses.

27. A like calamity in Shahjahanpur necessitated a grant of Rs. 3,000; while, on the recommendation of the Commissioner, a sum of Rs. 121-8 was remitted for the assistance of the inhabitants of Dumdumwa, in the district of Benares, whose houses were destroyed by fire.

28. On the closing of the Banda poor-houses a sum of Rs. 900 was granted to the Rev. J. Hill of Banda on his undertaking to take charge of some bed-ridden paupers for whom it was necessary to provide a home.

29. The charges of the central committee for clerk, peon, postage, &c., amount to Rs. 288-2-3.

30. There has been expended on the whole a sum of Rs. 52,251-0-6, and there remains in the hands of the committee, including Rs. 1,013-10-6 to be accounted for by district officers, a balance of Rs. 26,780-12-5. Of this balance it is proposed to devote Rs. 13,306-12-4 to the repayment to Government of the like amount contributed at the commencement of the committee's operations as the equivalent of subscriptions received up to that date, and to invest the residue in Government paper to be available for expenditure in any future famine or scarcity.

31. Many of the working members of the executive committee are now absent from Allahabad, so that I am unable to circulate this report for their consideration and approval. I am sure I may venture to express, on behalf of all the members, their obligation to the district officers and local committees by whom the work of relief has been carried out. Information has at all times been freely supplied to the central committee, satisfactory accounts of expenditure furnished, and a careful selection of the objects for charity and economy in expenditure appear to have been kept in view in all the districts in which operations have been carried on under the direction of the central committee.

32. In conclusion, I have also to bring to the notice of Government the valuable services rendered to the committee by the Honorary Secretary, Mr. W. Tyrrell, C. S.

Particulars of relief operations of the District Officers in the North-Western Provinces.

Letter from G. H. M. BATTEN, Esq., Officiating Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, to the Secretary to the Government of the North-Western Provinces,—No. 82, dated Calcutta, the 25th February 1875.

I AM directed by the Governor General of India in Council to acknowledge the receipt of your letter No.. 1 of the 1st of January last, submitting the reports of the Local Officers on the scarcity of 1873-74 in certain districts of the North-Western Provinces, together with a narrative of the scarcity so far as it affected those Provinces—of your letter No. 4 of the 11th of January, forwarding the remarks of the Lieutenant-Governor on the conduct of the Civil Officers engaged in the relief operations—of your letter No. 9 of the 29th of January, forwarding Mr. Elliot's report on the scarcity in Basti—and of your letter No. 13 of the 11th instant, forwarding the report of the Central Famine Relief Committee for the North-Western Provinces.

2. Considerable apprehension was felt by Sir William Muir, who was then Lieutenant-Governor of the North-Western Provinces, lest the unusual deficiency of the late rains in the season of 1873 should occasion an extensive failure of the winter crops; and early in November reports on the state of the crops and the prospects of the coming season were called for from the Local Officers. The information received showed that no scarcity was anticipated excepting in the Eastern Districts, in which there had been a serious failure of the crops.

3. Sir William Muir had successfully dealt with a period of severe scarcity in 1868-69, and the Government of India left to him with confidence the provision which should be made for the distress that was expected to occur; after assuring him that they were ready to give to the North-Western Provinces all the aid which he might require, and authorising him to undertake at once such relief works as he might think necessary.* In Sir William Muir's opinion no considerable difficulty was likely to be felt in dealing with the districts where the rice crop had failed, and the Government of India found, when they assembled at Agra at the end of November 1873, that all the precautionary measures had been taken which the occasion demanded.†

* Despatch from Viceroy, to Secretary of State, B of November 12th, 1873.

† Despatch from Government of India, to Secretary of State, C 1, November 21st, 1873.

4. The fear that the failure of the winter crops of 1873 might be followed by the more serious calamity of a failure of the spring crops of 1874 was removed by the winter rains which, though late, fell plentifully at the end of January and in the beginning of February.‡ This timely rainfall, to quote the words of the narrative, "was of incalculable benefit, and "through its influence a year of high prices was substituted for a year of famine." A large spring harvest was secured, and means were thus afforded for meeting the demand for food which arose from the failure of the winter crops. On the 13th of February the Government of India had the satisfaction of being able to inform the Secretary of State that "Sir William Muir had taken every neces- "sary measure for the relief of distress in the South-Eastern Districts of the "North-Western Provinces, and that no intimation had been received from him "that he would require assistance in the way of supplies from the Govern- "ment of India in respect to those districts, the prospects of which had, on the "whole, been materially improved by the late rains."

‡ Despatches from Government of India, to Secretary of State, No. 7, January 30th; No. 9, February 6th; and No. 11, February 13th, 1874.

5. As the year went on, it became apparent that severe distress would be limited to the northern portions of the districts of Gorakhpur and Basti, where rice constitutes the main staple of agriculture. In the month of March, Sir William Muir deputed a Commission composed of Mr. Simson, Junior Member of the Board of Revenue, Mr. Carmichael, Commissioner of Benares, and Colonel Davidson, R. E., Superintending Engineer, to visit those districts. They recommended that certain remissions of land revenue should be made,—that money should be advanced to a limited extent to grain-dealers, on condition that they would provide a certain amount of grain which should be at the disposal of Government in a part of the country where some apprehension was felt of a dearth of supplies,—and that liberal advances should be made for the purchase of seed-grain. These measures were adopted by Sir William Muir with the cordial approval of

the Government of India. The supply of seed caused at that time much anxiety, which was soon after relieved by arrangements with the Government of Nepal that the prohibition of the export of seed-grain from Nepal should be removed.

6. A Central Famine Relief Committee was established at Allahabad, as well as Local Committees, who were charged with the care and management of the poor-houses which the Collectors were authorised to set up where necessary, and at which cooked food was distributed to those who needed assistance and could not work. The expense of maintaining the poor-houses, and of all charges incurred in relieving the distressed among the higher classes who could not labour on the relief works, was met by subscriptions received from the Public, aided by donations from Government.

7. The distress appears from the narrative to have reached its highest point at the end of March or at the beginning of April 1874, and the measures which had been taken to meet it were judicious and sufficient. In the beginning of April the daily average attendance on relief works in Gorakhpur and Basti was about 80,000. These numbers were not out of proportion to the character and extent of the scarcity.

8. Sir William Muir had directed that the pay on the relief works should be sufficient to enable the persons employed to provide themselves with sufficient food to sustain life, but no more; the amount in money being regulated by the price of grain in the neighbouring markets. The rates of pay given in March were—

For men	6	Gorakhpur pice	a day.
„ women	4	ditto	ditto.
„ children	3	ditto	ditto.

Mr. Lumsden, the Collector of Gorakhpur, thinking that these rates, with reference to the season of the year, were so high as to attract labourers who were not in absolute want of employment, reduced them in the second week of April to—

For men	5	Gorakhpur pice	a day.
„ women	4	ditto	ditto.
„ children	3	ditto	ditto.
„ infants	2	ditto	ditto.

The same reduction appears also to have been made in Basti.

9. Sir John Strachey succeeded Sir William Muir in the office of Lieutenant-Governor of the North-Western Provinces on the 8th of April 1874.

10. In the beginning of May Sir John Strachey personally visited the Gorakhpur and Basti districts. He found that during the month of April the numbers employed upon relief works had risen from 80,000 to 219,000, notwithstanding the reduction of the rates of pay, and although there was no reason to believe that the condition of the people had deteriorated, or that there was any dearth of food. It became evident that advantage was taken of the relief works by many persons who were not really in distress. The opinion of Sir John Strachey and the orders which he issued under these circumstances were recorded in his Minute of the 16th of May. The rates of wages on the relief works were compared with the price of provisions, and it was found that they were not unduly high: the only change made in them was the reduction from two pice to one pice a day of the dole to infants. In order to prevent improper advantage being taken of the relief works, the Collectors were instructed to pay wages in food instead of in money, and authorised to order applicants off the works who did not really require assistance. Sir John Strachey took care to prevent the risk of relief being withheld from any one in want; and the power, which was given to the Local Officers at their own request, was qualified by the condition that their orders were to be based "on individual knowledge "of the persons or the village, not on general considerations."

11. The modes of relief applicable to the altered condition of affairs were clearly described in Sir John Strachey's Minute. A more extensive application of the work-house test was provided, and warning was given to the people that relief works would shortly be closed. "Circumstances," Sir John Strachey remarked, "have greatly altered since the works "were undertaken. They were then beyond any doubt very useful and

"necessary works, and it is only lately that the numbers employed on "them have become so immense. Owing to the general good outturn of the "rubbee harvest in a country, only a small portion of which is dependent on a "single crop, and to other causes, the people of these districts are undoubtedly "better off now than was the case when the works were commenced."

"The Lieutenant-Governor" (Sir John Strachey truly observed in another part of his Minute) "by no means asserts that the arrangements now contem-"plated would necessarily be sufficient to meet the extreme emergencies of "severe famine where it falls upon the majority of a great agricultural popula-"tion. Such emergencies unhappily exist in some of the districts of Bengal, "but they do not now exist in the North-Western Provinces, nor is there at "present any reason for apprehending them."

12. The Government of India approved of the orders issued by Sir John Strachey, and the result showed that he had rightly appreciated the situation of affairs. The good outturn of the spring crops, coupled with early* and plentiful rain, soon relieved the pressure upon the agricultural population, and the necessity for any further relief operations ceased. The relief works were closed in June, and all that was required afterwards was a moderate amount of relief dispensed from poor-houses.

* Despatches from Government of India, to Secretary of State, No. 32, May 22nd, and No. 42, June 30th, 1874.

13. The relief operations which were carried on in other districts of the North-Western Provinces do not call for any special remarks.

14. The most interesting subject connected with the history of the scarcity of last year in the North-Western Provinces is the analysis of the causes of the difference between the condition of the Eastern Districts of the North-Western Provinces and that of North Behar. Sir John Strachey in his Minute of the 16th of May has referred to some of those causes. The far wider extent of the area of the drought and of the failure of the winter crops—the much greater proportion of the winter crop of rice to other winter crops—the smaller proportion of the spring crops to the food-supply of the year—the longer distance from sources of supply not affected by the drought—coupled, in many tracts, with a denser population—constitute the principal reasons why the distress was far more general and prolonged in Behar.

15. The reduction of the rates for the carriage of grain by railway, and the large supplies of grain sent by Government into the neighbouring districts of Behar, are stated by the Local Officers to have materially diminished the effects of the scarcity in the North-Western Provinces. Some interesting figures are given in the report of the Central Famine Relief Committee as to the trade of the district of Ghazipur. It is calculated that in ordinary years this district imports by rail from 120,000 to 130,000 maunds of edible grains, besides importations by river. From the 1st of October 1873 to the 1st of October 1874 the importations by rail alone amounted to no less than 865,000 maunds. The Relief Committee lay great stress upon this example of the promptness with which supplies are brought forward in India to meet a sudden demand. They truly observe that where, as in the case of Ghazipur, "grain was to be had in foreign markets at rates "which made its importation profitable, the rail-road conveyed it to the place "where the demand existed, the importers and retail distributors merely "extended operations to which they were habituated, and for which the wealth "of the district was adequate to supply funds," there can be no necessity for any interference by Government with the provision of supplies. A still more striking instance of this was given in South Behar; about ten times the quantity of grain imported into Ghazipur was poured by merchants into South Behar, and prevented any dearth of food throughout all that tract of country. The necessity of the interposition of Government arose in Orissa in 1866, and in North Behar during the past year, from the absence of all or some of the conditions enumerated by the Committee. The manner in which the demand has been met by an extension of the ordinary operations of trade, where those conditions existed, is very satisfactory: it supplies a valuable confirmation of the opinion which the Government of India have expressed, that the causes which have hitherto rendered interference indispensable on certain occasions will gradually be removed as the means of communication are extended and the wealth of the country increases.

16. The operations of the Central Famine Relief Committee for the North-Western Provinces, as described in their report, were well conducted and successful. It is satisfactory to observe that funds were liberally subscribed, and that there was no need to take advantage of the offer of assistance tendered by the Central Relief Committee at Calcutta. The distress never assumed such dimensions in the North-Western Provinces as to prevent charitable relief being distributed under the directions of the Relief Committees,—an arrangement which was made on former occasions with advantage. The same course was followed in many parts of Bengal last year; it was only departed from in the case of those districts where the scarcity was so widespread that it would have been impossible, without serious risk of failure, to have made use of two agencies for the purpose of dealing with it. I am to request that you will convey to Mr. Justice Turner and to the Members and Secretary of the Relief Committee at Allahabad the thanks of the Government of India for their services, and for their able and interesting report.

17. The thanks of the Government of India are due to Sir William Muir for the foresight and good judgment which he has shown in dealing with the scarcity, as well as for the cordial and valuable assistance which he rendered to the Government of Bengal upon several occasions during the period of greatest difficulty in the Lower Provinces. I am to convey to Sir John Strachey the thanks of the Governor General in Council for the judicious and able manner in which he prevented the measures of relief from being abused as soon as the substantial safety of the affected districts was secured; and I am to express the entire concurrence of the Government of India with the approbation which Sir John Strachey has bestowed upon the Collectors, the Officers of Government, and other gentlemen, European and Native, who were actively engaged upon the relief operations. The experience of the past year in the North-Western Provinces shows the soundness of the means adopted for dealing with a scarcity of limited extent, under circumstances which gave rise to no serious apprehensions of an extensive dearth of food.

OUDH.

Letter from H. J. SPARKS, Esq., Officiating Secretary to the Chief Commissioner, Oudh, to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce,—No. 5652, dated 16th October 1874.

In my letter No. 1158, dated the 3rd March, the Chief Commissioner reported the measures which he found it necessary to take in the northern parts of the province in order to avert famine, and I am now to submit a copy of Mr. Capper's letter No. 4586, dated the 5th instant, and its enclosures, showing what has actually been done. These papers speak for themselves, but it may be as well to give a brief summary of what has occurred.

2. *Test works.*—Towards the end of 1873, it was feared that there might be considerable distress in the Fyzabad division, and early in the current year it was apparent that these fears were not groundless. Test works were then started by Mr. Capper, the Commissioner. Not content with the appearance of the country and the people, and the reports that he received of the distress, he took the precaution of directing small works to be experimentally set on foot, rightly judging that if many persons were attracted to the works by the very small wages offered, there could no longer be any doubt that the people were suffering from want and privation.

3. *Fyzabad.*—In the Fyzabad district, though the autumn crops had failed, there was no great distress. Here the people found labor without much difficulty. Some few test works were started, but they proved that no relief works were really wanted, and they were all closed before the end of March; the total expenditure being less than Rs. 3,000.

4. *Distress in Bharaich and Gonda.*—But the number of persons who flocked to the test works in some parts of Bharaich and Gonda proved beyond all question that, owing to previous bad seasons, and the failure of the winter rains in the trans-Gogra districts, help was absolutely required. The distress was confined to tolerably compact tracts. The total distressed area comprised about 2,900 square miles, and contained some 750,000 souls.

5. *Nature of relief works.*—The first step was to determine the nature of the relief works to be undertaken. Road-work was eventually decided on, and the reasons which led to its selection may be given in the words of the Commissioner: "As to the nature of the works to be started as relief works, Sir George Couper from the first had urged on us the utility of works of irrigation. But by this time we had gained by experience some knowledge of the numbers which flocked to every test work that was opened. Wells, as chiefly employing skilled labor, were out of the question, even in those parts where there was a probability of successfully sinking them; tanks, although serviceable in the prevention of future scarcity, required much local knowledge and matured consideration in the selection of their site. Their concurrent construction in numerous places demanded a large skilled supervising establishment of a class which was not available, and the few which could have been immediately commenced would have entailed the assemblage at each of a mass of poor, underfed wretches who would have been to a considerable extent unmanageable in so confined a space, and whose very assembling in the immediate vicinity of a village would tend to the outbreak at any time of an epidemic, which might have the most disastrous effects. It was decided that road-work was the most expedient. By simultaneous opening of several sections of each, work would be offered within reach of the homes of the mass of those employed; the gangs would be distributed, and their supervision rendered comparatively easy; whilst the roads themselves in the then roadless Terai would facilitate the immediate importation of food-grains and stimulate the trade in future. Roads then, with poor-houses along the several lines and at such other places as might be thought necessary, were to form the staple of the relief works. Field dispensaries, with central hospitals and adequate medical superintendence of the gangs, were to be provided; whilst, owing to the deadly climate of the Terai during the rainy season, when work by the acclimatized was liable to be stopped by floods, and superintendence by Europeans and unacclimatized officials was said to be precluded by the endemic fevers, depôts of grain were provided for the support of the people when no work could be done. In Gonda itself provision for 50,000 maunds of grain was made, partly as a measure of precaution, should unforeseen accident occur, or another bad season be in store, but chiefly because the new demand, at any price, of grain for Lower Bengal threatened to exhaust the relics of our maize crop and to carry off the spring harvest so soon as it was reaped. So great was this demand, that the agents of Government or of grain speculators hovered round even our most distressed tracts, tempting the holders of even a few maunds by tenders of cash at previously unheard-of rates to part with their small reserves, and there was no law which authorized direct interference with their action. Fortunately, so far as the rabi crop was concerned, the people realized the danger, and as a rule refused to sell; whilst the thekadars, who generally receive their rents in kind, and who for a consideration had bound themselves to procure and store such stock in excess of their usual stores as was prescribed for each, laid an embargo on the crops of the poorer tenantry, and allowed no sales except to themselves.

"Subsidiary precautions were taken, and amongst others the famine tracts, and those others in Gonda district where intolerable distress was apprehended, were divided into circles, each under the supervision of some local respectability, to whom all village chowkeedars and servants of the circle were bound to report all cases of urgent distress, and who was authorized (being provided with means for the purpose) to give discretionary immediate relief, reporting his action to the local delegate of the Relief Committees. Fortunately, although enough cases were thus brought to notice from time to time to show that the machinery was in working order, it never was severely strained and may (tested by results) be pronounced to have been unnecessary."

6. *Roads.*—In the Terai there were but few roads, and it was not difficult to select lines which, while convenient at present because passing through the heart of the country where the distress was greatest, would be of great ultimate utility. An old military path, roughly made during the campaigns of 1858 for patrolling purposes, ran along the Nepal frontier. This could still be traced in places, and it has now been made a useful road. A series of roads, opening out the northern parts of the districts and bringing

the forest roads into connection with the district communications, were designed and lined out, and these were the first works opened. But in addition to these roads, some supplementary works were sanctioned, to be taken in hand if found necessary. Of these may be noticed several tanks, of which two were ultimately undertaken: A "bund" embankment on the Rapti, some 1,200 feet in length, designed to stop a flood which every year submerged some five miles of country. A canal, three miles long, to drain the water from three square miles of swamp. This, it was thought, would not only reclaim some valuable rice land, but would also render that part of the country less unhealthy. Rest bungalows for the inspecting officers wherever they might be found necessary, were also under consideration, but only one was constructed, as the Maharaja of Bulrampur placed at the disposal of the authorities houses in various places, which provided sufficient accommodation for such officers as were not at the time under canvas.

Supplementary works.

7. *Works undertaken.*—The following tables taken from the Commissioner's report show the nature of the works undertaken in the two districts, the number of persons to whom they afforded labor, and the expenditure:—

District.	Name of Work.	Length in miles.	Estimate.	Number of persons employed from commencement.	Amount to laborers.	Establishment and contingencies.	Total.
			Rs.		Rs.	Rs.	Rs.
Gonda	Road from Atrowla to Bulrampur	17½	37,691	610,414	30,160	6,502	36,662
	„ Atrowla to Tulsipur	14½	46,371	561,460	28,259	2,515	30,774
	„ Military (Gonda Section)	36	84,312	786,916	41,706	4,147	45,853
	„ Chowdri Dee to Khurgupur	31½	59,039	1,222,110	58,639	5,866	64,505
	„ Bulrampur to Ekona	14½	40,315	181,940	10,314	1,462	11,776
	„ Karasur to Mankapur	11½	7,533	73,396	4,082	537	4,619
	Total Roads in Gonda	125½	2,75,261	3,436,236	1,73,160	21,029	1,94,189

Fyzabad	Repairs	5½	3,000	57,239	2,997

Altogether in the whole division 4,409,965 persons were employed for one day at a cost of Rs. 2,69,667, being about one anna two-half pie per head, including cost of gang supervision.

8. *System adopted.*—In carrying out these works it was arranged that the works generally should remain under the supervision of the Commissioner, and be constructed by gangs working under and paid by the Deputy Commissioners; the surveys, marking out and measuring up, and purely professional supervision of works in progress, as well as the preparation of the regular plans and estimates, being entrusted to the officers of the Department Public Works. Other proposals had been made. It had, for instance, been suggested that Government should utilize the skilled and able-bodied labor which in times of distress can be obtained at lower rates than usual by employing them on remunerative works, while all other distressed persons should be fed by charitable relief. But the great object in view was not to get the works done cheaply, but to avert distress;

Reasons for its adoption.

and it was held to be far better to take on at the works every one who was willing to give a day's labor for a day's food, than to employ the able-bodied only, and feed the rest in idleness.

9. Doubtless it would have been easier to organize and supervise gangs of skilled and able-bodied laborers. But it would have been disheartening to them to find that advantage was taken of the hard times to get their labor at a cheap rate while their neighbours ate the bread of idleness, and for a naturally lazy people it was considered that it would not be good to give away much in charity. Many would doubtless long continue to come for a day's food given gratis, who would not linger on the works a day after they found they could find more remunerative works elsewhere. Moreover, they would in future take less trouble with their crops if they knew that at the worst they would be fed by Government. The system adopted after due consideration had this advantage—that it taught the people that the authorities would help those who helped themselves.

10. *Work carried out by mixed gangs.*—The works were accordingly carried out by mixed gangs, every one who was willing to work being allowed to do so. The gratuitous distribution of alms to persons able to work was avoided, and the following three points were kept steadily in view:—

(1) That so far as might be possible, men were not to be attracted from their agricultural avocations.

(2) That to ensure this, the wages of labor were to be kept so low as to provide food, but not tempt those who could by any other means obtain it.

(3) That these wages were to be paid daily, either in money or kind.

11. *Mode of payment, &c.*—As to the mode in which the laborers were employed and paid, the Chief Commissioner cannot do better than let Mr. Capper speak for himself: "All comers willing to work at our rates were to be received, and work was to be allotted to each class according to their capacity. They were to be formed into gangs some miles apart to avoid overcrowded encampments, and to bring the work as far as possible within daily reach of the laborers' homes."

Sanitary arrangements were duly seen to, and a field hospital and a few movable huts were attached to each gang. All moonshees and mohurrirs were provided with lithographed copies of vernacular instructions as to laying out and constructing the road, soils to be selected or avoided, digging side-drains, dressing the roadway and slopes, mode of payments, their own duties towards their superior officers and subordinates, and their relations to the supervising establishments of the Department Public Works. Those incapable of even light work were to be received and fed on the works, pending the orders of the proper officer. With him it rested to determine whether such should be maintained at their homes, removed to a poor-house, or sent to a central hospital.

As to the actual working, Mr. Maconochie, Deputy Commissioner of Gonda, states that "over each gang there was a mohurrir to keep accounts and to take care that the necessary funds were available for daily payments; a supervisor of works who apportioned and overlooked the works of each sub-gang, and appointed assistant mohurrirs and mates according to the numbers who flocked to the works. As a rule, each assistant mohurrir had 220 persons under him told off into four sub-gangs of fifty-five persons each, five being skilled diggers, the fifty unskilled hands. There were two mates to each sub-gang, one of whom was required to be able to read and write either Hindi or Persian, and keep the roll of workmen. This man between 7 and 8 in the morning, after marking down all in attendance, made up his account and delivered to the assistant mohurrir a total showing the number of persons present in each class and the amount of money required to pay them. After the assistant mohurrir had checked up the returns of his mates, he made up a similar total for the head mohurrir, who, after receiving the accounts of all his assistants, made up the accounts of the whole gang. He was expected to have made over by 3 P. M. to each assistant mohurrir the money required to pay each sub-gang, and the mohurrir distributed this to the head mates, who, when the order to leave off work was given, seated their sub-gangs according to

their order in the nominal roll, and after the number had been tested, the order to pay was given, and each person received his wages for the day."

Under the system of simultaneous payment of sub-gangs, it was as easy to pay Rs. 5,000 as Rs. 500, and the people were off to their homes before dark. But the preliminary difficulties in procuring a regular supply of pice or of grain on the different sections were very great. They severely taxed the energies and strained the authority of the Deputy Commissioners and their staff, and had the works been entrusted to the Department Public Works, any arrangements that could have been made by them must have broken down, and they would have called upon us to find the cash, the change, and the accountants. It is known from practical experience how tedious is the operation of paying in grain, and it is not surprising that Mr. Maconochie stopped it as soon as he could. But both he and Mr. Chapman found at first that it was much easier to procure maize at 15 or 16 seers per rupee, than to get an adequate supply of copper coin, although it was not easy to get the grain.

The Government coinage was unknown in the Terai, the circulating medium being the lump of copper known as Goruckpuri pice, valued generally at 20 gundas of 4 to the rupee, and there was but a scant supply of these. The stock of copper coin in the district treasuries was, in the face of such a demand as this sudden and unexpected one, ludicrously inadequate, and emergent indents on Lucknow and Fyzabad produced but little. Meanwhile, speculators became alive to the demand, and the price of Goruckpuri pice rose so rapidly, that when the Government pice arrived, the two coinages became current at the same rate, 4 to the anna, or 16 gundas to the rupee. This had, however, its advantageous side. At each work, as far as possible, a banian was induced to settle, and although some came with great reluctance and very small stocks, the more enterprising soon discovered that it was a very good business. Government, the work-people, or the neighbouring villages took at once every ounce of grain that they could produce, and the daily re-sale of the coppers which they received from the people to the works gave them a very handsome profit. In consequence, their numbers and their food-supplies rapidly increased, till at last in April small baiparis, travelling grain dealers, who were taking grain to Nawabganj for boat exportation to Bengal, found it worth their while to bring their three or four carts to our distressed Terai, and every work had its banians no longer pressed but voluntarily attending.

The system and the measures for organizing and maintaining the people worked well, though at the cost of great labor and anxiety to the European officers, and incessant labor and worry to their supervising subordinates.

12. *Wages.*—No man, woman, or child ready to labor was turned away. Every person willing to work was employed, and many came, not only men, but women and children also; "and yet," to quote Mr. Capper again, "the pay given was very small, and the actual measurements by the Department Public Works show that there was a very fair tale of labor exacted." The wages at first starting were—

	A.	P.	
For skilled diggers	2	0	daily.
„ unskilled	1	6	„
„ adult carriers	1	0	„
„ children	0	9	in Gonda.
„ children according to age ...	from 1 to 3		in Bharaich.

About the third week of February Mr. Maconochie found "that these rates were above the ordinary rates paid in villages to unskilled diggers and common coolies, and feared that they would attract the whole population to our work." He proposed to give in future—

	A.	P.	
Skilled diggers	2	0	a day.
Unskilled „	1	0	„
Adult carriers	0	9	„
Children between 12 and 17 years ...	0	6	„
„ under 7 years	0	3	„

The Commissioner had written to Mr. Chapman, who was in charge of the Bharaich sections of the military road, that if he had any reason to believe

that the people preferred our work and pay to working in the fields, he was to reduce—

	A.	P.
Diggers to	1	0
Adult carriers to	0	9
Children to	0	6

And on the 25th February he had announced the reductions. At the conference of the 2nd March, Mr. Maconochie's rates were unanimously adopted. The first rates were a little too high, for, when reduced, some persons left the works, thus proving that they were not in absolute want. That the wages afterwards given were not too attractive is shown by the fact that no sooner did rain fall in June, than the people began to leave the works in large numbers.

13. *Alms.*—The amount spent in affording relief to those who did not work was comparatively small. On this head, the Commissioner writes: "As might be expected under our system, the number of persons who received gratuitous relief was but small." In Fyzabad the aggregate up to 24th April was only 1,114. At Bulrampur a large poor-house supported by the Maharaja fed from 250 to 300 daily, and as that public-spirited gentleman took upon himself the charge of the poor of his estate, including our special poor-house at Tulsipur, only 29,871 persons at the Atrowla poor-house were charged to Government.

14. *Medical arrangements.*—It was feared that disease might break out among some of the gangs employed on the relief works, and that the privations they had undergone might render the people especially liable to any epidemic disease. Rules were therefore drawn up laying down the procedure to be followed in the event of an outbreak of cholera or other epidemic; and some extra medical subordinates were sent to each district. Fortunately, the health of the people was on the whole good, and there was no occasion to test the efficacy of the arrangements that had been made.

15. *Works completed.*—Of the works that were undertaken, some remained unfinished when the time arrived that relief was no longer needed. Of the work that has been done, Mr. Capper writes as follows:—

The work completed was, in Bharaich—

	Miles.
New roads constructed—	
Bhinga to Gobbapur	5⅔
„ to Lachmanpur	8½
Lachmanpur to Muthura	5
Pipraghât to Ekona (part)	6¼
„ to Charda	14
TOTAL	39
Old roads widened and raised—	
Military Road...	15½
Pipraghât to Ekona (part)	7¼
Bhinga to Nanpara	13
TOTAL	36
TOTAL ROADS CONSTRUCTED	75
Leaving incomplete—	
Pipraghât to Charda	18½
Bhinga to Nanpara	12
Pipraghât to Ekona	½
TOTAL	31

In Gonda the work done was—

New roads constructed—	
Chowdri Dee to Khargupur	29
Atrowla to Tulsipur	14½
Mankapur to Karasur	7
TOTAL	50
Old roads widened and raised—	
Military Road...	36
Bulrampur to Ekona	9
Atrowla to Bulrampur	17½
TOTAL	62
TOTAL ROADS CONSTRUCTED	112

Leaving incomplete—	
Chowdri Dee to Khargupur	2½
Bulrampur to Ekona	5¾
Mankapur to Karasur	4¼
TOTAL	12½
Showing a summary of works completed in the division—	
New roads constructed	89
Old roads straightened, widened and raised	98
GRAND TOTAL ROADS CONSTRUCTED	187

Besides two irrigation tanks, one drainage canal (part), and one river embankment, at a total expenditure (not including compensation for land taken up, pay of Public Works establishment, and a few miscellaneous items) of not more than Rs. 2,75,000.

16. *Cost.*—The accounts not having been finally closed, the exact cost cannot be given, and the Commissioner's figures, which have been checked by the Controller of the Department Public Works, seem to be rather under the mark. Approximately, the cost on relief works has been—

	Rs.
Works	2,98,363
Establishment	17,866
Tools and plant	868
TOTAL ...	3,17,097

To these figures must be added the sum of Rs. 90,000 spent on the storage of grain, and a sum of Rs. 1,25,000 advanced for a similar purpose. The lakh and a quarter last mentioned will be recovered, as will also the greater portion of the Rs. 90,000. Taking these sums as expended, the total cost of the relief works has been Rs. 5,32,067. But all accounts have not been received, and there will be some charge on account of pay of hospital assistants, cost of medicine, &c. The total cost may be reckoned as 5½ lakhs. But this sum has not all been given away. The greater part, if not all, of the money expended on storage of grain will be recovered. Allowing for loss, 1¾ lakhs should at any rate be recovered. The works that were undertaken were useful works. At ordinary rates they would have cost about Rs. 1,36,604; so that all that can be fairly said to have been expended on this account on pure relief is Rs. 1,80,493. As far, then, as can be judged from accounts not finally closed, the expenditure stands thus—

	Rs	Rs.
Cost of relief works	3,17,097	
Cost of grain	90,000	
Advanced for storage of ditto	1,25,000	
Contingencies and charges not yet brought to account	17,903	
TOTAL ...		5,50,000
DEDUCT—		
Value of work done	1,36,604	
To be recovered on account of grain	1,75,000	
		3,11,604
BALANCE ...		2,38,396

The exact figures will be submitted hereafter. Those given above cannot be far wrong, and the Chief Commissioner does not think it necessary to delay this report in order to be absolutely precise.

17. *Quality of work.*—The rates at which the work was done were necessarily high. Many of the laborers were women and children. Many of the men were infirm. The work was carried on at a time of year when the clayey soil had become as hard as stone; and much was done which, under ordinary circumstances, would not have been commenced before the rains. All this has added to the cost; but though the rates were high, the work done was good, and the Engineer's report shows that though a considerable portion of the country has been flooded during the late rains, little or no damage has been done to the new works.

18. *Summary.*—Briefly, owing to previous bad seasons, want of rain and a severe frost, the population of some 2,900 square miles were early in the year on the verge of very great distress, which, but for Government aid, would have culminated in famine. Relief works were undertaken, on which four million and a half people worked for one day: this must represent at least 50,000 persons who were paid for their work; and besides these there are others who have received charity and who have been assisted with advances.

The wages offered were so low that it may be safely held that none came to the works who were not in want, and the ultimate cost to the State of the relief that has been given will be something under two lakhs and a half.

19. In conclusion, the Chief Commissioner trusts that these operations, taken as a whole, will not be regarded as unsatisfactory. They have not been accomplished without much personal sacrifice; one valuable life has been lost, and others have broken down under the effects of exposure in that pestilential climate at the most trying time of the year; and Sir George Couper would submit that the services of Mr. Capper, and of the officers whom he has mentioned in his report, especially Messrs. Maconochie, Chapman and Hodges, as well as of the Maharaja of Bulrampur, are deserving of the acknowledgments of His Excellency the Viceroy in Council.

P. S.—The return of the original maps is requested when no longer required.

Letter from G. H. M. BATTEN, Esq., Offg. Secretary to the Government of India, Dept. of Revenue, Agriculture, and Commerce, to the Chief Commissioner of Oudh,—No. 73, dated Calcutta, the 20th February 1875.

I am directed to acknowledge the receipt of your Officiating Secretary's letter No. 5652, dated 16th October 1874, submitting the final report on famine relief works in the Province of Oudh.

2. In reply, I am to say that the letter and the reports which accompanied it from Mr. Capper, Commissioner of the Fyzabad Division, Mr. Maconochie, Deputy Commissioner of Gonda, Mr. Hodges, Officiating Executive Engineer, Relief Works Division, and Mr. C. Chapman, Assistant Commissioner, Bharaich, give a clear and complete account of the measures taken under your directions to avert the distress which was apprehended from the failure of the rains in the autumn of 1873.

3. The condition of some parts of Oudh caused considerable anxiety at the time when His Excellency the Viceroy visited Lucknow in December of that year, the failure of the rice crop having followed a succession of bad harvests and other circumstances injurious to the cultivators of the soil. You were authorised to make such temporary remissions of the land revenue as might after local inquiry be found advisable, and to carry out such other measures for the relief of distress as might be required, being guided by the Resolution of the Government of India of the 7th November 1873.

4. Great pains appear to have been taken by the Commissioner of Fyzabad to ascertain the extent of country over which severe distress was likely to occur, and you visited in person the districts where the failure of the rice crop had been the greatest. In your letter No. 1158, dated 3rd March, the measures which seemed to you, after consultation with the local officers, to be sufficient, were reported. Their gross cost was estimated at Rs. 4,62,500, of which it was calculated that Rs. 2,65,000 would be spent on relief works, and Rs. 1,97,500 on advances for the purchase of grain to be held in readiness for the people to buy in case there should be a dearth of food in certain remote parts of the province.

5. These measures were approved by the Government of India in Mr. Howell's letter No. 1024, dated 25th March 1874, and you were authorised to act upon your own discretion in adapting to the circumstances of Oudh the general principles which had been laid down to meet the distress in Bengal. Subsequently your proposals for strengthening the staff in the distressed districts were also approved.*

* Mr. Howell's letter No. 1518, dated 2nd May 1874. Financial Resolution No. 4611, dated 28th July 1874.

6. The rain which fell at the end of January and in the beginning of February 1874, is stated to have been of the greatest value in securing an abundant spring crop and thus preserving a large tract of country from severe distress. The area of country throughout which scarcity was actually felt is estimated to comprise about 2,900 square miles, with a population of 750,000, and severe distress was confined to "tolerably compact tracts."

7. The measures taken appear to the Governor General in Council to have been completely successful. Public works were opened as the necessity arose. They were judiciously selected, and the system adopted was well suited to the circumstances of the case. It is calculated by you that 50,000 persons were employed upon these works, which were closed in the middle of August.

8. Very little need was found for the distribution of gratuitous relief excepting on the property of the Maharaja of Balrampur, who took upon himself the charge of the poor upon his estates, having, besides other relief elsewhere, fed from 250 to 300 persons daily in a large poor-house at Balrampur. The supplies of grain which were secured are stated to have been of considerable use, and the precaution taken was a wise one; but there does not appear to have been actually any serious deficiency in the food-supply, and trade is stated to have been active.

9. You calculate that the net cost of the relief operations will be Rs. 2,38,396, of which Rs. 1,80,493 have been spent on public works, above the sum for which they would have been constructed in ordinary course. Rs. 40,000 were expended on the grain operations, and Rs. 17,903 upon contingencies. The expenditure is moderate in amount, and every care appears to have been taken to prevent extravagance.

10. The reports prove that the part of Oudh where the rice crop of the winter of 1873 failed was for a time in a very critical condition, and that the successful manner in which severe distress was averted is mainly due to your foresight and that of the local officers, coupled with the zealous exertions of those who were actively engaged upon the relief operations.

11. I am accordingly to convey to you the thanks of the Government of India, and to request that you will also convey their thanks to Messrs. Capper, Maconochie, Chapman and Hodges, as well as to the other officers, European and Native, who have been noticed by Mr. Capper as deserving special approval for their conduct.

12. I am further to request that the thanks of the Governor General in Council may be expressed to the Maharaja of Balrampur for the assistance which at considerable sacrifice he has rendered to those persons living upon his estates and in his neighbourhood who were in need. The conduct of the Maharaja upon this occasion has given another proof of the liberality and public spirit which the Maharaja has always shown when occasion has demanded.

13. I am to add that the report and enclosures together with this reply will be published in the *Gazette of India*.

RAILWAYS, &c.

Letter from Lieut-Colonel F. S. TAYLOR, R. E., Consulting Engineer to the Government of India for Guaranteed Railways, to the Secretary to the Government of India, Public Works Department,—No. 3407, dated 29th December 1874.

In accordance with the request conveyed in your No. 2378R., dated 24th September last, I have the honor to submit a report on the Railway operations in connexion with the despatch of grain to the distressed districts. This report has been delayed for the compilation of the necessary statistics.

Report on the Traffic operations of the East Indian Railway during the Famine of 1873-74.

The traffic in food-grains on the East Indian Railway showed unusual activity as early as the month of October 1873, and its development became very rapid after the issue of the notification of 1st November, by which the rates to the public for food-grain travelling towards the threatened districts were, at the expense of Government, reduced to $\frac{1}{8}$th pie per maund per mile.

2. The arrangements of the Traffic Department were duly organised to meet the emergency, and kept pace with the demand during the rest of the year; but early in January, when the Government commenced operations on its own account, and the despatches of Government rice from Howrah to the Patna station began on a large scale, in addition to the public traffic, the signs of a block at once showed themselves; and on the 17th January I received instructions from His Excellency the Viceroy to take immediate steps to remedy the threatened evil.

3. After consultation with the Railway officials, I waited on His Honor the Lieutenant-Governor of Bengal on the 19th, and represented that nothing short of the complete separation of the Government business from that of the public at Patna station would suffice, and with his approval I proceeded to carry the necessary measures into effect in concert with the local Civil Authorities and the Railway Company.

4. Two favorable sites on the bank of the Ganges, one two miles below Patna, the other opposite the neighbouring station of Barr, were found on the 22nd, and the Railway Engineers at once proceeded to lay branch lines to these points and to construct suitable sheds, sidings, and loading banks, Government agreeing to pay the cost; and to these two depôts, with some slight assistance from a third branch which was subsequently laid from the station of Mokameh to the river at the request of Sir R. Temple, the whole of the Government rice was worked up from Howrah in full train loads and thence transported across the Ganges without a single hitch of any consequence.

5. In connection with this operation the name of Mr. Michael Fox, the contractor who constructed these branch lines, deserve special mention.

6. In the middle of the month of February, the arrivals of Government rice in Calcutta became so large as to overpower the receiving and despatching capabilities of the Howrah station; and under instructions issued by His Excellency the Viceroy on 21st February, a special supervision of the Company's arrangements, for utilising the carrying power of the line to its utmost and for preventing confusion during the processes of landing and despatching, was undertaken.

7. During the first week, after improved arrangements were put in train, the daily despatches from Howrah by East Indian Railway averaged 2,220 tons and continued at about 2,000 tons per diem up to the end of March; during April the traffic was at its height, and the daily despatches of Government rice exceeded 2,500 tons; by the end of the month the pressure was over, and during May the despatches fell again to 2,000 tons, and after that ceased to cause further anxiety.

8. In connection with the despatches from Howrah the name of Mr. Urban Broughton, District Traffic Superintendent at Howrah, deserves special mention for his zeal and ability.

9. Towards the end of February intimation was received that grain was accumulating to an enormous extent at the stations of the Sindh, Punjab, and Delhi Railway in the Punjab, and on 3rd March I received instructions from His Excelleney to report on the carrying power of the Railway "downwards." I accordingly despatched Lieutenant Bisset, R. E., Deputy Consulting Engineer, to Lahore, to confer with the Government and Railway officials on the subject.

10. He reported by telegraph on the 12th that the supply of grain in the Punjab was practically unlimited, and I informed His Excellency that my investigations led me to believe that with due co-operation between the two Railways, and with the rolling-stock then available, the despatches from the Punjab and North-West Provinces together might reach 1,700 tons per diem.

11. Lieutenant Bisset's visit to Lahore was most opportune, and the mission entrusted to him was very ably carried out. The result was a greatly improved system of working the through traffic.

12. A disorganisation of the working arrangements on the chord line towards the end of April caused detention of trains which necessitated a diminution in the despatches of Government rice and led to an additional ac-

cumulation of goods at Howrah. Captain W. A. J. Wallace, R. E., Deputy Consulting Engineer, who was deputed to investigate the matter, reported that the defect which had arisen from mismanagement in the working of the station to station block system had been detected by the Agency and removed. The arrears of traffic that had accumulated at Howrah during this block were all worked off by 8th May.

13. The magnitude of the work actually performed may be gathered from the following figures.

From the 1st October 1873 to the 1st August 1874, the total deliveries of grain at the stations in the threatened districts amounted to 842 696 tons.

Of which— Tons.
306,697 were grain,
95,113 „ pulses,
440,886 „ rice.

The total quantities mentioned above were derived from the following sources:—

	Tons.	Total.
East Indian Railway in Lower Bengal—		
Grain	38,400	
Pulses	7,887	
Rice	425,759	
		472,046
East Indian Railway in North-Western Provinces—		
Grain	74,857	
Pulses	31,007	
Rice	12,563	
		118,427
Jubbulpore Line in North-Western Provinces, Central India, and Central Provinces—		
Grain	20,785	
Pulses	4,211	
Rice	1,524	
		26,520
Great Indian Peninsula Railway, chiefly in Central Provinces—		
Grain	33,987	
Pulses	19,201	
Rice	182	
		53,370
Oudh and Rohilcund Railway, in North-Western Provinces and Oudh—		
Grain	740	
Pulses	127	
Rice	10	
		877
Rajpootana State Railway, chiefly in Rajpootana—		
Grain	639	
Pulses	327	
Rice	6	
		966
Sind, Punjab, and Delhi Railway, chiefly in Punjab—		
Grain	137,289	
Pulses	32,353	
Rice	848	
		170,490
		842,696

14. Of the amount received from Lower Bengal, 304,898 tons were Government rice sent from Calcutta, and considerable quantities of the receipts from the Punjab were either Government or procured for Government, but of this there is no record at once available. Of the total receipts, however, a considerable portion was from one part of the famine district to another, and there were also considerable despatches from stations within to stations beyond those included in this return.

15. The statistics of exports and imports in each group of stations are shown month by month in Appendix No. 1, and the abstract at foot shows the net quantities of food-grains absorbed by each district.

These amount in total to—

Grain	248,348
Pulses	68,748
Rice	398,758
Grand total net receipts ...	715,854 tons.

16. The supplies from the Jubbulpore line, the Great Indian Peninsula line, the Sind, Punjab, and Delhi Railway, which amount in all to 250,380 tons, could not by any other means of communication than railways have found their way to Behar, and it is since the occurrence of the last distress in Behar in 1866 that these sources of supply have been opened. It is to be regretted that there is no means of comparing the supplies by the East Indian Railway in that period with those of the present occasion, but the East Indian Railway Company have unfortunately destroyed their records of that time and the information cannot now be got.

17. The chief executive responsibility during this trying period devolved upon the Traffic Manager of the East Indian Railway, Mr. J. C. Batchelor, and notwithstanding some shortcomings, the result, when the difficulties they had to contend with are taken into consideration, cannot fail to reflect creditably upon him, his Deputy, Mr. St. Leger Carter, and his staff of District Superintendents.

18. **To Mr. D. W. Campbell, the Locomotive Superintendent, very great credit is due for the able management of his staff and for the admirable way in which he worked his department; and Mr. R. W. Pearce, the Carriage and Wagon Superintendent, equally upheld the credit of the Company in his department.**

19. Lastly, the Members of the Board of Agency, Mr. Cecil Stephenson and Mr. G. Sibley, are to be congratulated on the highly successful termination of their labours, and it must be remembered that upon these two gentlemen, as the administrative heads of the Company's Indian staff, the burden of the responsibility fell.

CALCUTTA,
The 23rd December 1874.

F. S. TAYLOR, *Lieut.-Col., R. E.,*
Consulting Engineer to Govt. for Guaranteed Railways.

No. 1.

STATISTICS OF GRAIN TRAFFIC, E. I. RAILWAY,

Prepared in the Consulting Engineer's Office from statistics

FROM 1st OCTOBER 1873 TO 31st JULY 1874.

supplied by the Chief Auditor, East Indian Railway.

APPENDIX SHOWING THE TOTAL IMPORTS AND EXPORTS OF FOOD

GRAINS, MONTH BY MONTH, AT CERTAIN GROUPS OF STATIONS.

F. S. TAYLOR, *Lieut.-Colonel, R. E.,*
Consulting Engineer to the Govt. of India for Guaranteed Railways, Calcutta.

OFFICE OF CONSG. ENGR. TO GOVT. OF INDIA,
Calcutta, the 15th December 1874.

Letter from the Secretary to the Government of India, Public Works Department, to the Consulting Engineer to the Government of India, for Guaranteed Railways,—No. 506 R, dated 24th February 1875.

I have the honor to acknowledge the receipt of of your letter No. 3407, dated the 29th December last, submitting a report on the railway operations in connexion with the despatch of grain to the distressed districts.

2. The work which devolved upon yourself and the Deputy Consulting Engineers, Captain Wallace, R. E., and Lieutenant Bisset, R. E., from October 1873 to June 1874, was exceedingly arduous and responsible. In order to ensure the success of the relief operations, it was essential that the traffic on the trunk line of railway should be conducted with order and regularity; that it was so conducted is in no small degree due to the energy of yourself and your deputies, and to the cordial manner in which you co-operated with the officials of the Railway Company.

3. His Excellency the Governor General in Council desires me to convey to you the expression of his entire approval of the manner in which you performed your duties, and to request that you will convey a similar expression of approval to Captain Wallace and Lieutenant Bisset.

From Colonel C. H. DICKENS, R. A., Secretary to the Government of India, P. W. Dept., to the Chairman of the Board of Agency of the East Indian Railway Company,—No. 455R., dated 20th February 1875.

I am directed by His Excellency the Viceroy in Council to convey the thanks of the Government of India to the Members of the Board of Agency for the very valuable assistance which they have afforded to the Government in regard to the storage of rice at Howrah when supplies were received in large quantities in Calcutta and there was great difficulty in obtaining sufficient accommodation for it. This assistance has been warmly acknowledged by Lieutenant-Colonel Graham, the officer in charge of the rice received at Calcutta, in his letter of the 1st of August last.

2. His Excellency the Governor General in Council congratulates the Members of the Board of Agency, Mr. Cecil Stephenson and Mr. G. Sibley, on the highly successful termination of their labours in providing for the dispatch of supplies of food-grain to the distressed districts, and I am to request that you will be so good as to communicate to Mr. J. C. Batchelor, the Traffic Manager, his Deputy Mr. St. Leger Carter, and his staff, and among them especially to Mr. Urban Broughton, District Traffic Superintendent at Howrah, as well as to Mr. D. W. Campbell, the Locomotive Superintendent, and Mr. R. W. Pearce, the Carriage and Wagon Superintendent, and the other officers and staff of the Company who were actively engaged at the time of the great strain upon the resources of the line, the thanks of the Government of India for their services which have been brought to notice by Lieutenant-Colonel F. S. Taylor, R. E., Consulting Engineer to the Government of India for Guaranteed Railways, Calcutta.

Letter from the Secretary to the Government of India, Public Works Department, to the Agent, Eastern Bengal Railway Company,—No. 503 R., dated the 23rd February 1875.

Lieutenant-Colonel F. S. Taylor, R. E., Consulting Engineer to the Government of India for Guaranteed Railways, Calcutta, having brought to notice the assistance afforded by the Eastern Bengal Railway Company to the Government in the famine crisis, by expediting, as far as possible, the despatch of rice from the river side station at Chitpore, to the distressed districts, I am directed by His Excellency the Viceroy in Council to convey the thanks of the Government of India to yourself and to the several heads of Departments of the Eastern Bengal Railway for this service.

Memorandum from LIEUT.-COLONEL C. POLLARD, R. E., Consulting Engineer to the Government of India for Guaranteed Railways, Lahore, to the Secretary to the Government of India, Public Works Department,—No. 101, dated 27th January 1875.

In compliance with Public Works Department No. 2379 R, dated 24th September 1874, the undersigned has the honor to forward, for the information of the Government of India, the report therein called for, showing the Scind, Punjab and Delhi Railway operations in connection with the despatch of food-grains to the distressed districts in Bengal and the North-Western Provinces.

Report showing the Scind, Punjab and Delhi Railway operations in connection with the despatch of food-grain to the distressed districts in Bengal and the North-Western Provinces.

The accompanying table, marked A, shows the amount of grain despatched by the Scind, Punjab and Delhi Railway during the period of nine months (15th November 1873 to 15th August 1874) to have aggregated 45,73,122 maunds, realizing in freight Rs. 12,77,055, of which Rs. 6,69,017 was paid by Government as compensation for the reduction from $\frac{1}{4}$ to $\frac{1}{8}$ pie per maund per mile.

An examination of the table will show that the export from Loodianah was nearly one-half (accurately it was 0·48) of the whole quantity despatched. Umballa and the adjoining stations of Rajpoora and Burrara stands also high.

The average number of goods train run on the down line averaged monthly during this period 108·95 against an average of 35 before the grain traffic commenced. The extra expenditure on the goods sheds, running establishments, loading and storing, averaged Rs. 1,194 per mensem.

There is no doubt that this Company lost several large consignments of grain from want of wagons. It was not that our rolling-stock was insufficient, but that it was impossible for the East Indian Railway to return an equivalent for our wagons thrown upon that line, and delay of five and six days took place before they could be returned. This told against our traffic.

The officials of the Company worked arduously and well, and it is very creditable to the Traffic Manager, Mr. Ross and his assistant Mr. A. Saunders, that so much was done with so small an increase to the staff. The Locomotive Superintendent, Mr. Bocquet, and his assistants, Mr. Sandiford and W. Bocquet, met the demands in their Departments promptly and energetically.

SCINDE, PUNJAB, AND DELHI RAILWAY.

Statement showing the weight of grain booked from Scinde, Punjab, and Delhi Railway Stations to Famine Districts in Bengal, and the amount of freight received from Government and the Public from 15th November 1873 to 15th August 1874.

* On account of under-charges.

Letter from the Secretary to the Government of India, Public Works Department, to the Agent, Sindh, Punjab and Delhi Railway Company,—No. 512, dated 24th February 1875.

Lieutenant-Colonel C. Pollard, R. E., Consulting Engineer to the Government of India for Guaranteed Railways at Lahore, having brought to the notice of the Government of India the assistance afforded by the staff under your orders in the despatch of food-grain to the famine-stricken districts in Bengal, I am directed by His Excellency the Governor General in Council to express to you His Excellency's acknowledgment of the service rendered, and to request that you will convey the thanks of the Government of India to the Traffic Manager, Mr. Ross, and his Assistant, Mr. A. Saunders, to the Locomotive Superintendent, Mr. Bocquet, and his Assistants, Mr. Sandiford and Mr. W. Bocquet and to the rest of the staff.

Letter from MAJOR J. GRAHAM, on special duty, to the Deputy Secretary to the Government of India, Department of Revenue, Agriculture and Commerce,—No. 1772, dated 1st August 1874.

As directed in the last paragraph of your letter No. 2210, dated 9th ultimo, I have now the honor to submit, for the information of Government, the following report regarding the rice purchased in Calcutta or landed from ships for despatch to the famine districts between the 14th November 1873 and the 31st July 1874.

2. To make it more complete, I have incorporated with my own proceedings those of my predecessors, Mr. Toynbee and Captain J. Barnard Smith, but kept each separate for easier reference.

Incorporating Mr. Toynbee's and Captain Smith's transactions with my own.

3. The quantities of Government rice purchased locally or imported into Calcutta were as follows:—

	Number of cargoes brought by ships and steamers to Calcutta, exclusive of river steamers and sloops.			Received by G. Toynbee, Esq., C. S., to 25th January 1874.		Received by Captain J. B. Smith from 26th January to 25th February.		Received by Major J. Graham from 26th February to 31st July.		Total number of bags received.	Total number of maunds received.	Remarks.
	43 cargoes delivered to G. Toynbee, Esq., C. S.	45 cargoes delivered to Captain J. B. Smith.	206 cargoes delivered to Major J. Graham.	Bags.	Maunds.	Bags.	Maunds.	Bags.	Maunds.

April	2,800	84,012
May	2,007	62,205
June	1,028	25,709
July	1,674	2,570

Messrs. Bird and Company alone had at one time employed in this work 450 cargo boats, carrying about 25 tons each, 5,000 coolies, and 920 carts.

The largest landing made by them was on April 6th, consisting of—

Bags.	Tons.	Maunds.
55,544	4,114	1,11,078

8. The average daily and total monthly despatches made by the East Indian Railway Company from 18th November 1873 to 31st July 1874 were—

MONTHS.	Daily average number of wagons despatched.	Daily average number of bags despatched.	Monthly number of wagons despatched.	Monthly number of bags despatched.
November	19	1,917	212	21,083
December	39	3,860	966	96,491
January	116	11,663	3,499	3,49,898
February	224	22,460	6,291	6,28,885
March	266	26,657	8,264	8,26,366
April	361	36,117	10,832	10,83,535
May	271	27,111	8,404	8,40,439
June	62	6,494	1,812	1,88,334
July	63	8,447	1,977	2,61,856

The largest despatch was made on—

	Bags.	Maunds.	Tons.
April 16th	46,556	88,478	3,160

9. The largest balance in store was on the 26th June—

Bags.	Tons.
9,96,338	66,325

10. In addition to the sloops and river steamers bringing rice from Orissa, 101 vessels were employed in conveying cargoes from beyond sea. With such a fleet, amongst which were country sailing ships and some of the fastest of the Suez Canal steamers, and owing to their cargoes being laden at so many different ports and by so many different agents, it was of course impossible to arrange for their arrivals at any regular intervals; consequently at one time we had only a few vessels in port, and at another more than we could possibly deal with. As my particular attention was directed to keeping up a never-failing supply for the railways, the work was one of great anxiety. If we had too few vessels, there was the danger of a short supply; if too many, of the ships coming on demurrage. It was easy to get the cargoes unladen; but owing to the limited frontage the railways possess, part of which was always taken up with private traffic, there was frequently the greatest trouble in getting our landings effected; and I have often seen the banks lined with boats two and three deep with others moored outside in the stream.

Number of vessels employed, and the unloading and landing of their cargoes.

11. To lighten the pressure as much as possible, it was arranged to land the grain for the East Indian Railway at five different places.

Landing-places and reserves for despatch by East Indian Railway.

1st.—At the Howrah loading platforms. Here, when wagons were available, they were run down to the shore and filled direct from the boats; when they were not, the Railway Company placed at our disposal three and a half of their loading platforms, capable of containing about 40,000 bags. But in addition to these we have often had the beach covered with stacks of rice.

2nd.—At the old engine-sheds. These buildings were our great loading reserve godowns; they were capable of containing 20,000 tons of rice as Bengal rice is usually stored, but as they are unfortunately situated above 500 yards from the landing place, there was great difficulty in getting the rice into them. For a long time it was carried by coolies, but when the very hot weather set in, they could not carry such a load (2 maunds, say 165 lbs.) such a distance; they broke down and commenced to desert. Fortunately I was then able to arrange to have the work done with railway trucks, though it caused much inconvenience, as there was no direct line of rails to the sheds, and the wagons on this work interfered with the ordinary traffic. We had previously tried carts, but they could not work over so many lines of rails.

3rd.—At the portico of the Howrah passengers' platform. The railway allowed us to use this also, and here the greater part of the Saigon rice was loaded and despatched. The distance from the landing place was about 150 yards, a long lead, but not so oppressive as to the engine-sheds.

4th.—At the North Ghât at Sulkea. This place we reserved for Orissa rice only, and we had so much testing, examining, and exchanging of the Orissa supplies that it was fully occupied.

5th.—At the South Ghât at Sulkea. Here two temporary loading platforms were erected before my arrival, which I found simply invaluable. Millions of maunds passed over them. Again and again they broke down and were repaired, but the work never ceased, and for both Europeans and Natives it was most severe, for the corrugated iron roofs reflected the heat, and the boards were so hot that even watering them did not keep the coolies' feet from being blistered, and I had to cover them with old gunny bags.

Landing-places and reserves for despatch by Eastern Bengal Railway.

12. For the Eastern Bengal Railway we landed rice at their river-side station of Chitpore, loading the wagons direct from the boats when they were available; and when they were not, we either stacked the rice on the bank or in the railway godowns, which they allowed us the use of on paying rent for the same. Besides Chitpore, we also used the Sealdah station for despatching all the Saigon consignments of Messrs. Samuel and Company, which, after being rebagged at the jetties, were conveyed to Sealdah on carts.

Assistance afforded by East Indian Railway.

13. I may here remark that the East Indian Railway Company has, without rent or charge, placed at our disposal every building they had available, and large quantities of material for storing. They entirely floored for us with old sleepers the engine-sheds at Howrah, lent 2,768 more for the Opium Godowns, and 17,455 new and 3,367 old for the Salt Golahs, and the sheds on their own and the Docking Company's premises at Sulkeah. (You are aware that the Opium Godown is on this side of the river, and the Salt Golahs and Docking Company's sheds entirely separate from the Railway Company's grounds.) In fact, they have in every way and in the most liberal manner endeavoured to facilitate the operations of Government.

Loading river steamers.

14. The river steamers were all loaded direct from ships so long as we had any vessels discharging cargoes.

Difficulties experienced in unloading and landing cargoes.

15. Our chief drawbacks in unloading and landing the cargoes were—

1*st*.—The way in which vessels were occasionally chartered. Some we were bound to discharge at the rate of 600 tons (say 10,000 bags) a day; and if we had, as was generally the case, ten or twelve other steamers in port when these arrived, it was not a little disheartening to find a vessel come on our hand from which the cargo must be discharged at this rate, or a penalty of (often) Rs. 1,000 a day entailed on Government. From others we were bound to take "as much as they liked to discharge on Sundays or week days, by night or by day."

2*nd*.—Cargoes of 2½-maund bags, which the coolies would not—indeed could not—lift. The East Indian Railway landed these for me at their jetties by the steam cranes.

3*rd*.—Our greatest infliction was the state of the bags from Madras. My establishments were taken up day after day repairing and rebagging these. Our platforms, our landing-places, our godowns, were all covered with them in a burst and torn state, and the annoyance caused by them when we had such heavy work on hand was inexpressible.

Godowns employed.

16. Long before our despatches ceased, the pressure upon us from the great number of ships arriving forced us to commence storing, and at various times we had the following quantities in the following places:—

		Tons.	
	Calcutta Side.		
1.	Opium Godowns	5,333	These were landed at different ghâts, and conveyed thence by carts.
2.	Bonded Warehouse	6,285	
3.	Pittooria Ghât	4,493	
4.	No. 6, Clive Row	2,083	Landed at the jetties, rebagged there, and conveyed thence by carts.
5.	Sealdah station	8,237	Landed at Chitpore and conveyed thence by rail.
6.	Ditto old shed	2,000	
7.	Chitpore railway godowns ...	2,775	Landed at Chitpore and carried by carts.
8.	Chitpore new sheds	8,828	Filled from the Sealdah terminus, the Chitpore godowns, and the Sealdah old shed, when they had to be vacated.
	Howrah side.		
9.	Engine-sheds	9,291	Landed at Howrah and carried by coolies and trucks.
10.	Portico, Howrah station ...	988	By boats and carts from Messrs. Robert and Charriol's godowns at Sulkeah.

		Tons.	
	Howrah Side—contd.		
11.	Salt Golahs ...	1,324	By carts from Sulkeah.
12.	Calcutta Docking Company's old shed	1,625	Ditto.
13.	Ditto ditto new sheds	8,175	Ditto.
14.	Sulkeah railway sheds ...	14,904	Ditto, with the exception of the few sheds on the river bank, which were filled by the coolies only.
15.	Ditto temporary loading platforms		
16.	No. 141, Sulkea Road	2,045	Filled from Messrs. Robert and Charriol's godowns by carts.
17.	Moody Cotton Press	2,068	
	TOTAL ...	80,454	

Despatches.

17. Of the despatches I have already said so much in my remarks about landings that I need only here add that for weeks together we were loading and sending off from 50 to 60,000 bags daily. The East Indian Railway Company kept up for this work an extra staff of above 100 clerks.

Casualties.

18. During all this period I am happy to say that our only casualties were one coolie, who had a sunstroke and died in a few minutes at Chitpore, and another who got his leg broken by a bag of rice falling on him in the engine-sheds.

Messrs. Bird and Company, Landing Contractors.

Mr. Broughton, District Traffic Manager, East Indian Railway.

19. I cannot close this report without briefly bringing to the notice of Government how admirably the work of landing was carried out by the contractors, Messrs. Bird and Company, and of despatching by Mr. Broughton, the District Traffic Manager of the East Indian Railway.

The former had an unlimited supply of boats. Their working partner, Mr. S. Bird, superintending their enormous landings, never failed by his presence and arrangements to overcome every difficulty.

Of Mr. Broughton I will only say, that on all occasions and at all times he gave me the most ready and willing assistance, often at great inconvenience to himself. As to the work they effected, the details above given speak for themselves.

Had it not been for the manner in which they worked most cordially with Mr. Toynbee, the despatching officer, and myself, the work would have been much more difficult; and it was no little gain to have had such able and willing hands to assist in the arrangements for landing above 11½ millions and despatching above 10 millions of maunds.

Losses.

P. S.—I had hoped to have been able to furnish with this report a memorandum showing the very small loss which Government has incurred from having rice damaged either on board-ships or when in my charge here. I am preparing it in communication with the Assistant Comptroller General, and will furnish it hereafter.

Letter from A. P. HOWELL, Esq., Deputy Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, to MAJOR J. GRAHAM, on special duty,—No. 2505, dated 11th September 1874.

I am desired to acknowledge your letter No. 1772, dated 1st ultimo, reporting on the arrangements connected with the receipt and despatch up-country of the rice purchased in Calcutta or ordered from beyond sea for the supply of the famine-stricken districts of Bengal.

2. It appears from your report that between the 14th November and the 31st July last 294 cargoes of Government rice were brought by ships and steamers to Calcutta, exclusive of sloops and river steamers, the whole aggregating 62,49,874 bags, or 1,16,12,509 maunds of about 82 lbs. each. This amount was of course exclusive of the Government purchases in Calcutta, which, however, were comparatively inconsiderable. The despatches during the same period from Calcutta were 1,01,90,132 maunds, of which 82,99,826 maunds were carried away by the East Indian Railway—the largest despatch in one day being 88,478 maunds—on the 16th April. The bulk of the whole quantity was

taken from on board-ship and delivered over to the railway authorities by the Government contractors, Messrs. Bird and Company, who were entrusted with the entire contract in view to avoid, as far as possible, competition in the labor market and disturbance of the ordinary rates of coolies and boats. Their total deliveries amounted to 93,87,481 maunds, their largest monthly delivery being 22,85,126 maunds, or 84,012 tons, giving a daily average during the month of 76,160 maunds, or 2,800 tons. There were of course many difficulties in arranging at the same time for such large receipts from so many different quarters and for despatches from only two railway stations, and these difficulties were aggravated, on the one hand, by the rate of discharge required by some of the charter parties and by the state in which some of the cargoes were received, and, on the other, by the limited river frontage and accommodation afforded by the railways and by the requirements of private trade with which special instructions had been issued not to interfere. These difficulties, however, appear to have been overcome by multiplying the points of receipt, reserve, and despatch, by your constant personal supervision, by the efficiency of the Government contractors, and by the cordial co-operation of the Railway Companies.

3. The whole arrangements have been exceedingly well managed throughout, and the Governor General in Council is of opinion that the successful conduct, without hindrance or delay, of such a large operation at a very important stage when there were many elements of failure, and failure would have been serious, is highly creditable to you, and you have well earned the thanks of Government. You bring to notice the services of the Government contractors, Messrs. Bird and Company, and of Mr. Broughton, the District Traffic Manager of the East Indian Railway, as well as the liberal arrangements made by the Company for the accommodation of the rice previous to its despatch by their line. When the operations have been brought to a close a suitable opportunity will be taken of acknowledging these services.

Letter from MAJOR J. GRAHAM, on special duty, to the Under-Secretary to the Government of India, Department of Revenue, Agriculture and Commerce,—No. 2070, dated 4th February 1875.

I have now the honor to report, for the information of Government, that the last rice godowns have been emptied.

2. I beg to annex a statement showing in detail the disposal of all the rice (86,96,548, eight millions six hundred and ninety-six thousand five hundred and forty-eight maunds, about 319,465 tons) which was received by me.

From the statement it will be seen that—

238,884 tons were despatched by the East Indian Railway,
49,464 by the Eastern Bengal Railway,
9,632 by river steamers, &c.,
73 made over to the civil authorities in Calcutta,
84 lost by the landing contractors, of which the price has been recovered from them, and
6 lost by damage in godown. The remainder (21,320 tons) was sold.

3. In my letter No. 1976* of the 16th November last, I reported the care I had taken and was taking in recovering all sweepings from ships, boats, platforms, &c., and I beg to report that the quantity collected in this way (712½ tons) has been sold for Rs. 29,095-8.

* Proceedings for December 1874, No. 16.

4. The total amount realised by the sales was Rs. 8,09,283-5-6, which has been duly received and credited to Government.

5. I have been informed by different members of the mercantile community that the rice brought much higher prices than they expected. I know many European merchants came to the sales to buy, and could not give the prices given by natives. The very high rates of freight prevailing during the last three months were greatly against the sales.

These rates, which were thirty shillings a ton when the first sale took place, had, I understand, risen to sixty when the last auction was held.

6. The average price which the whole sales brought was Re. 1-6-6 per maund net, about Rs. 38-4-6 (or say £ 3-16-6) per ton.

7. The rice sold in Calcutta has been shipped to England, France, Ceylon, Singapore, the Maldives, Aden, Jedda, and to Bombay for the Persian Gulf; a considerable quantity has been retailed on the spot, and a good deal sent through the neighbouring districts by country boats.

8. Much of the rice was rebagged and weighed at the sheds before removal, and the loss was ascertained (according to the statements of the purchasers) to be about 6 per cent.

9. The rebagging was particularly necessary as regards the Madras rice, which was found in some stacks almost in bulk, the bags from their own rottenness and the attacks of birds and rats having become entirely useless.

10. The rice all through the season suffered more from birds than any kind of vermin, and it was only latterly when the most of it was removed and that the rats concentrated their forces on the small quantity remaining that the stacks suffered much. There was little or no loss however, as off the floors and from the ground under them I collected hundreds of maunds.

11. The Docking Company's premises, after having been put in order by the Department of Public Works, were made over, on the 15th ultimo, by the Executive Engineer and myself to the Superintendent of that Company, who expressed himself fully satisfied in every way. I have made over the sheds on the East Indian Railway Company's premises at Sulkea to the Department of Public Works. The last lot of rice was removed from them yesterday.

12. All the unserviceable tarpaulins, gunny bags, scales, weights, &c., were sold by auction on the 25th ultimo, as sanctioned in your letter† No. 2805, dated 29th December 1874. I have not as yet received the account sales from Messrs. Mackenzie Lyall and Company, but the amount will be duly realised by me and credited to Government.

† Proceedings for December 1874, No. 15.

13. Every establishment has been discharged and every account paid. I know of nothing unsettled or unadjusted with the exception mentioned in last paragraph.

14. I have asked the Comptroller General if there is any objection to my closing this office either as regards his own accounts or my accounts with him, and he has replied that there is none.

15. I have now therefore only to solicit the permission of Government to close my office, and orders regarding the disposal of its records.

Rice sales statement showing the quantities and descriptions of rice sold, the amounts realised, and the average prices obtained per maund net.

EXTRA SUPPLEMENT TO THE GAZETTE OF INDIA, FEBRUARY 26, 1875. 125

Letter from C. J. LYALL, Esq., Under-Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, to Lieutenant-Colonel J. GRAHAM, on Special Duty, No. 75, dated Calcutta, the 22nd February 1875.

I am directed to acknowledge the receipt of your letter No. 2070, dated the 4th instant, reporting on the arrangements connected with the receipt and disposal of the rice, amounting to 8,696,548 maunds, with the charge of which you have been entrusted.

2. I am to repeat the thanks of the Government of India for the very satisfactory manner in which you have performed the arduous and responsible duties which have devolved upon you from the end of February 1874 to the close of the relief operations and the disposal of the rice remaining on hand.

3. I am to request that you will convey to Messrs. Bird and Company and especially to Mr. S. Bird, the thanks of the Government of India for the efficient manner in which their work was performed.

The Lieutenant-Governor of Bengal has already conveyed his thanks to Mr. Toynbee, who has managed exceedingly well the business of receiving the grain from you and despatching it by train.

4. Your office may now be closed, and the records handed over to the Office of the Comptroller General.

5. I am to add that this letter, together with your letter of the 1st August last, and the reply thereto of the 11th September 1874, No. 2505, will be published for general information.

6. A separate letter has been sent to the Agent, East Indian Railway Company, thanking the Agency and Mr. Broughton for their co-operation in facilitating the transport of rice.

Statement showing the Quantity of Rice (distinguishing Table and other kinds), Paddy, Wheat, Gram, and other Food-grains exported from the Presidency of Bengal in the 12 months, from 1st October to 30th September of the years 1872-73 and 1873-74.

No. 14. SIMLA, SATURDAY, APRIL 3, 1875. Register No. 75.

OFFICIAL PAPERS.

A Supplement *to the* Gazette of India *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the Gazette *may receive the* Supplement *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the Gazette of India *is required by Law, or which it has been customary to publish in the* Calcutta Gazette, *will be included in the* Supplement. *For such Orders and Notifications the body of the* Gazette *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1ST APRIL 1875.

GENERAL REMARKS.—Slight rain has fallen generally throughout Madras and Mysore; showers are reported from Malwa and the Godavery District of the Central Provinces. In Northern India (with the exception of Bengal and Assam, reports from which provinces have not been received) none is reported. The *Rabi* harvest is nearly at an end in the Southern and Eastern Districts of the North-Western Provinces and in the Central Provinces: it is progressing in the remainder of the North-Western Provinces and in Oudh. Prospects are generally good. Some damage to the opium in Malwa is reported.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(April 1st)	...	No rain at Masulipatam, slight elsewhere; no change in state of crops; markets well supplied locally; prices slightly fallen in Gudiwada and Vinukonda, elsewhere stationary; mild fever and small-pox continues; cattle generally unhealthy; dry fodder sufficient.
Kurnool	(March 31st)	0·34 in two days.	Slight showers in three taluqs, none elsewhere; harvesting of cotton commenced; second crop paddy good; markets well supplied; prices falling in Sirwell, stationary elsewhere; water and pasture sufficient; fever and small-pox prevalent in some taluqs; no water over Sunkesala anicut.
Tanjore	(April 1st)	*Nil.*	Rivers dry; water in tanks very little; water over anicut none; no cultivation of crops: crops generally good, not thriving in some places for want of rain; harvest of wet and dry crops almost over; markets well supplied; prices steady; small-pox in some places; cattle disease in Tanjore and Moyeveram; pasture moderate.
Trichinopoly	(March 31st)	...	About half an inch of rain in some places, not general; no other change of importance.
Malabar	(April 1st)	0·75	Preparation for sowing first crop begun; markets well supplied; prices almost steady; small-pox prevalent throughout; fever slight; cattle generally healthy; pasture withered. *General Remarks.*—Prospects satisfactory.
N. W. P.—			
Benares	(March 29th)	...	Harvest nearly finished; little sporadic cholera.
Mirzapur	(31st)	...	No change; days unseasonably warm.
Allahabad	„	...	Harvest almost completed; crops exceptionally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P.—*continued.*		
Banda (March 30th)	...	No change; mohwa promises well.
Jhansi „	...	Rabi harvested.
Agra ...	...	No change; prospects good.
Meerut (March 31st)	...	Harvest begun.
Bareilly „	...	Harvest general.
Punjab—		
Delhi (March 31st)	*Nil*	Crops nearly ripe; health good.
Hissar „	„	Ditto ditto.
Umballa „	„	Crops and health good.
Jullundur „	„	Crops fair; health good.
Lahore „	„	Crops and health good.
Mooltan „	„	Crops nearly ripe; health good.
Dera Ismail Khan ...	„	Health and harvest good.
Rawul Pindi ...	„	Crops and health good; cattle disease nearly gone.
Peshawar ...	„	Outturn of harvest below average; health good.
		General Remarks.—Harvest prospects and public health generally good.
Oudh—		
Lucknow (March 31st)	*Nil*	Harvesting going on; sugarcane being planted; weather clear; some cases of cholera reported in the Rai Bareilly and Fyzabad Division.
Fyzabad „	„	
Sitapur „	„	
Central Provinces—		
Upper Godavari (Mar. 27)	·21	Harvest over; health good; prices easy.
Sambalpur „	...	Weather cloudy and close; harvest over; health good.
Raipur (28th)	...	Weather clear; prospects of rabi excellent; few cases of cholera on Bilaspur border; prices easy.
Bilaspur (27th)	...	Weather cloudy; prospects of rabi good; cholera in places but not spreading; small-pox continues; prices steady.
Chhindwara (29th)	...	Weather clear; rabi harvesting; health good; prices steady.
Balaghât ...	...	Weather cloudy and close; rabi harvesting; health good; prices steady.
Chanda (March 30th)	...	Weather cloudy; rabi harvesting; small-pox and fever prevalent; prices easy.
Nagpur (31st)	...	Weather cloudy; threshing rabi continues; cattle disease disappeared; prices stationary.
Wardha ...	...	Small-pox continues; prices stationary.
Seoni ...	...	Reaping rabi progressing; small-pox prevalent.
Jubbulpore ...	...	Weather cloudy and close; rabi good; small-pox continues.
Saugor ...	...	Weather warm; reaping rabi progressing; small-pox prevalent; prices stationary.
Narsingpur ...	...	Crops good; small-pox declining; prices falling.
Nimar ...	...	Opium collecting; small-pox continues.
Hoshangabad ...	...	Reaping rabi continues; yield full average.
Betul ...		
Damoh (April 1st)	...	Prospects good; prices stationary.
Mandla „		
		General Remarks.—Prospects generally good, but cholera has appeared in Bilaspur, and small-pox prevails in a few districts.
Mysore and Coorg—		
Mysore (April 1st)	1·60 (in Bangalore Cantonment.)	Sufficient at present for coffee and cardamoms; cattle disease continues in parts of three districts.

Hyderabad Assigned Districts—		
Umraoti (April 1st)	...	Land being prepared for ensuing cultivation.
Central India—		
Indore (March 31st)	*Nil*	Cases of cholera at Rewah and Sutna, in other parts of Central India health is good; prospects good, though opium harvest has suffered severely.
Neemuch „		
Sutna „		
Rutlam „	Slight shower.	
Nepal— (March 24th)	*Nil*	Prospects good; rain required.
Assam—	...	Received too late for insertion in the General Statement.
Gauhati (1st April)	·87	Weather unsettled, threatening rain with occasionally heavy showers; sowing of *aus* progressing; small-pox at Burpetta; cattle disease reported from certain mouzas.
Sylhet	...	Sowing early rice commenced; small-pox and cattle disease prevalent; weather hot.
Rajpootana—		
Sirohi (March 30th)	...	Tanks dry; wells good; health and prospects very good; harvest now being cut; weather seasonable, still very hot.
Marwar (20th)	...	Water in wells in neighbourhood of town has begun to fail, now obtained from distant wells; health good; prospects favourable.
Harowtee (31st)	...	Prospects and health unchanged.
Ajmere (April 1st)	...	Weather, health and prospects good.
Jeypore ...	...	Crops ripening favourably; health good; weather seasonable.
Bhurtpore ...	...	No change; city continues healthy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (March 31st)		
Sindh.		
Kurrachee „ ...	...	No fresh cases of small-pox. Cattle disease in Tuppa Ghorabaree and Kurrachee talukas.
Shikarpur „ ...	...	Weather unusually hot, nights cool with dews; fever and cough prevalent. Early rabi crops mostly reaped.
Hyderabad „ ...	...	No change in state of crops. Slight shower of rain with thunder on 28th; weather hot. Small-pox in Buddeen and Goonee talukas. Fever continues in Hyderabad.
Upper Frontier „ ...	...	Weather hot; maximum thermometer exposed 125, in shade 108; linseed crops being reaped, good in talukas Thul and Kusmore. Wheat and barley good in all talukas.
Gujarat.		
Ahmedabad „ ...	·04	Rabi harvesting completed.
Surat „ ...	·38	Rain at Mundir with hail-storm. Public health good.
Broach „ ...	...	Rain with strong winds on 28th at Broach, Ahmode, and Unclesur; hail stones in Ahmode; tobacco slightly injured by rain; cotton picking nearly finished; health generally good.
Kaira „ ...	...	State of crops, public health, and weather same as before.
Khandesh and Nasik.		
Khandesh „ ...	...	Estimated yield of rabi crop eight annas in Dhoolia taluka; cattle disease continues; weather hot; cotton supplies nearly exhausted, about twelve annas exported; rate unchanged.
Nasik „ ...	...	No change in the state of crops; out of twenty-five cases of cholera in Nasik town ten resulted in death; cholera confined to the town only; districts healthy; weather warm.
Konkan.		
Tanna „ ...	...	Days and nights cool; public health good in Tanna; slight ague and cough in Dhanoo taluka, and slight fever in Shahpoor taluka; rabi crop middling in Dhanoo, Wada, Shahpoor and Bhewudy talukas.
Deccan.		
Poona „ ...	·13	Weather hot; slight cattle disease in Indapoor, Seroor and Bhimthurry; public health good.
Ahmednuggur „ ...	...	Weather cloudy; health good.
Sholapur „ ...	...	Weather very warm; health good, except in Sangoli, where fever and cattle disease prevails.
Satara „ ...	...	Harvesting of rabi continues; weather cloudy and sultry; ague in Patun, and fever in Tasgaon.
Southern Mahratta Country.		
Belgaum „ ...	·86	Showers with thunder; picking of cotton commenced; cattle disease and fever in Gokak; fever in Uthnee, Sumpgaon and Parasghur, and small-pox and measles in Belgaum.
Dharwar „ ...	·92	No material change in the state of crops and health; cotton indigenous favourable, exotic generally unfavourable, and further injury apprehended from fall of rain; weather cloudy and hot.
Kanara „ ...	...	Thunder-storm with rain at Karwar; light rain above Ghaut; ploughing operations in progress, second crop being reaped in some parts; fever, small-pox, and cattle disease prevalent.
Kaladgi „ ...	...	No change.
Kathiawar and Gaekwar's Territory.		
Rajkot „ ...	·02	Rain slightly damaged wheat and cotton; weather cloudy and windy; public health good.
Wudwanpore „ ...	·8	Rain more or less throughout Zillawad; hail stones at Drangdra; health good.
Baroda ...	...	Cotton picking nearly completed; rabi crops being reaped.
		General Remarks.—Cloudy weather has injured the crops generally; public health good.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8TH APRIL 1875.

GENERAL REMARKS.—Rain has fallen throughout the week in most parts of India. In Bombay it has been accompanied by severe storms of hail: but the spring harvest having been gathered, little damage has resulted. Hail and storms are reported also from Bengal; but here, too, the cold-weather crops have been for the most part reaped. The Provinces where little or no rain has fallen are the North-Western Provinces, Oudh, and the Punjab. In Sindh the Indus is rising. The spring harvest is over in Bombay, most parts of Bengal, and the North-Western Provinces east of Allahabad. It is progressing in the North-Western Provinces west of Allahabad, Oudh, and the Central Provinces, and is beginning in the Punjab. Reports from all quarters are generally favourable.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(April 8th)	...	Heavy rain once at Masulipatam; unharvested crops fair; cotton crop very good; in Guntur castor suffering from grub; markets well supplied locally; prices slightly fallen in Guntur and Varnukonda; elsewhere stationary; mild small-pox and fever still reported; cattle unhealthy in some places; dry fodder sufficient.
Kurnool	(7th)	·12 in two days.	Other particulars nearly same as last week; no water over Sunkesala anicut.
Tanjore	(8th)	...	Rain at Negapatam 0·2 inch; elsewhere slight and partial; rivers dry; water in tanks very little; water over anicuts none; no cultivation; standing crops generally good, not thriving in some places for want of rain; harvest of wet and dry crops almost over; markets well supplied; prices steady; public health generally good; small-pox in some places; cattle disease in two taluqs, some loss; pasture moderate.
Trichinopoly	(7th)	...	Heavy showers in parts of the district; a slight fresh in the river; otherwise no change of importance except that pasture is becoming very scarce.
Malabar	(8th)	1·57	Weather cloudy; sowing for first crop begun; markets well supplied; prices almost stationary; small-pox prevalent throughout; fever slight; cattle generally healthy; pasture withered. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—			
Sindh.			
Kurrachee	(April 8th)	...	Fever continues in talukas Kurrachee, Ghorabari and Jatti; cattle disease in Kurrachee, Jatti, Kotri, Ghorabari and Sakra talukas; measles in Kurrachee, Ghorabari and Mahjimda taluka; late rabi crops in Kotri, Sehwan, Dadú, Ghorabari and Shahbundi talukas damaged by insects and hot winds; rain in Joke in Mirpur Botora taluka on 27th ultimo accompanied by strong winds and hailstones; no fresh cases of small-pox.
Shikarpur	,,	...	Weather little cooler; river commencing to rise; no other change.
Hyderabad	,,	...	Reaping of rabi crops in full progress; no fresh case of small-pox; no other change.
Gujarat.			
Ahmedabad	(April 8th)	·29	Weather warm.
Surat	,,	...	Weather and public health good; thunderstorm with slight rain at Bardoli.
Broach	,,	...	Cotton picking finished; drizzling at Ahmodi and Wagra; health generally good.
Kaira	,,	·04	Weather hot; public health good.
Khandesh	,,	...	Estimated yield of rabi crops 6 annas less in Virdel taluka; cattle disease continues; cotton traffic decreasing, about 3 annas remain, Hinganghat 54, Americans 55.
Nasik	,,	·10 to ·50 1·78 in Peint.	Crops all harvested and nearly threshed; rain fell nearly in all talukas. In Peint heavy hailstorm; cholera in Nasik, where out of 37 cases 17 resulted in death.
Konkan.			
Tanna	(April 8th)	...	Nights unusually cool; thunder with slight rain on 31st; public health good; fever in Shahpur Taluka; rabi crop middling in Bhewndy taluka.
Deccan.			
Poona	(April 8th)	2·23	Heavy storm on 2nd accompanied with hailstones of the size of a lemon; weather continues hot; excepting slight cattle disease and fever at Indapur; public health good.
Ahmednuggur	,,	·41	Cattle disease in Parna taluka; health good.
Sholapur	,,	...	Slight rain in most talukas; ague and cattle disease in Sangola and Pandharpur.
Satara	,,	·59	Hailstorm; crops harvested; ague in Pahtun; cattle disease in Pahtun and Khutao.
Southern Mahratta Country.			
Belgaum	(8th April)	·36	Cotton crops in Chikodi and Uthni slightly damaged by rain; no other change.
Dharwar	,,	1·29	Late crops; harvest almost over; out-turn generally good; cotton slightly injured by rain; state of public health same as before.
Kanara	,,	...	Light rain throughout the district; second crop being harvested; outturn fair; preparations being made for monsoon crop; fever and cattle disease in Ghat Kluka; small-pox at Bhatpul.
Kaladgi	,,	...	Rabi all reaped, except cotton and jowari; harvest middling; public health good.
Kathiawar and Gaekwar's Territory.			
Rajkot	(April 8th)	...	Rabi crops good; weather continues cloudy and windy; public health good.
Wudwan	,,	...	Weather continues hot; no other change.
Baroda	,,	...	Cotton picking continues; rabi crops harvested; public health good.
			General Remarks.—Harvest now completed; hot weather at its height and Indus beginning to rise; health good, save an outbreak of cholera at Nasik.
Bengal—			
Burdwan	(April 8th)	·55	Cholera still prevalent in Jehanabad, Culna and Raniganj; fever decreasing.
Beerbhoom	,,	0·50	
Midnapore	,,	...	Health improving.
Hooghly	,,	1·80	Cholera and small-pox, but not to a great extent.
24-Pergunnahs	,,	0·60	Cholera prevails in thannahs Canning, Baduria, Harowlie, Kaliganj and Assasuni—abated in Magoorah, Satkhira, Kalarooa, and in all thannahs of Diamond Harbour; fever decreasing in Barripore.
Nuddea	,,	0·90	Cholera subsiding in Bongong.
Moorshedabad	,,	0·67	Cholera not virulent in Berhampore and Daulatabad; a few cases of small-pox in thannahs Assampore and Bhadrihat.
Pubna	,,	1·54	Forty cases of cholera in a village and in the station of Dubye.
Furreedpore	,,	0·66	General health good, but a few cases of cholera reported from the tract round Bhangah.
Backerganj	,,	...	Health fairly good, but sporadic cholera in many places; cattle disease.
Chittagong	,,	·05	Cholera still prevalent, an outbreak about twelve miles south-west; cattle disease.
Noakhally	,,	0·52	Cholera bad.
Patna	,,	...	Sporadic cases of cholera and small-pox in all parts, but nowhere in epidemic form.
Gya	,,	...	Health good.
Shahabad	,,	0·59	Cholera in Jehanabad, an out-post of Darbangah, and Mozufferpore; public health good.
Sarun	,,	...	General health good.
Bhágalpur	,,	...	General health very good, but small-pox slightly increasing.
Cuttack	,,	...	A slight outbreak of cholera near Kendrapoora.
Balasore	,,	...	Cholera still raging in the north.
Lohardugga	,,	...	General health fair, but a good deal of small-pox about.
Jessore	,,	0·31	
Dinagepore	,,	0·3	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.			
Maldah	(April 8th)	0·05	
Rajshahye	,,	0·37	
Rungpore	,,	0·48	
Bogra	,,	1·22	
Jalpáiguri	,,	0·2	
Dacca	,,	1·53	
Mymensing	,,	0·52	
Chittagong Hill Tracts	,,	1·15	
Hill Tipperah	,,	1·82	
Chumparun	,,	0·26	
Monghyr	,,	0·55	
Sonthal Pergunnahs	,,	1·07	
			General Remarks.—Rain has fallen in almost every district of Bengal and Orissa, and in more than half of those of Behar; in the Chota Nagpore Division there was a slight fall, and in Lohardugga only high winds. Storms have prevailed in several places, and have been more or less severe in limited tracts of Mymensing, Balasore and Bhágalpur, in the latter accompanied by hail; the rain has been wanted for tillage and the growing crops, and more is very desirable; harvesting of the cold-weather crops is all but ended; prospects of the few standing crops, though slightly injured by rain and hail here and there, continue favourable; spring rice, indigo, and millets are doing well; early and late rice sowings on low lands commenced; tillage at a standstill in places for want of rain.
N. W. P.—			
Benares	(April 7th)	...	No change; some cases of cholera among pilgrims in city.
Mirzapur	,,	...	No change; threshing in progress.
Allahabad	,,	...	Harvest completed; no change.
Banda	(April 6th)	...	Cloudy weather, a few drops of rain; no other change.
Hamirpur	(April 7th)	...	No change.
Jhansi	,,	...	Prices falling.
Agra	,,	...	Slight rain; harvest beginning; prospects fair.
Meerut	,,	...	Harvest good.
Bareilly	,,	...	Harvest going on.
Punjab—			
Delhi	(April 7th)	...	Crops being cut; health good.
Hissar	,,	...	Two slight sprinklings; crops nearly ready for sickle; health good.
Umballa	,,	...	Slight sprinkling; crops and health good.
Jullundur	,,	...	Crops and health good.
Lahore	,,	...	Crops and health good.
Mooltan	,,	...	Rabi nearly ripe; health good.
Dera Ismail Khan	,,	...	Health and harvest prospects good.
Rawul Pindi	,,	·25	Health and harvest prospects good; cattle disease nearly ended.
Peshawar	,,	...	Harvest outturn probably below average; rain wanted; fever in parts of district.
			General Remarks.—Harvest prospect and public health generally good.
Oudh—			
Lucknow	(April 7th)	*Nil.*	Crops nearly harvested; weather clear; cholera in most districts; up to the 8th instant 697 deaths reported.
Fyzabad	,,	,,	
Sitapur	,,	,,	
Central Provinces—			
Upper Godavari	(Apl. 3rd)	...	Weather clear; health good; prices easy.
Sambalpur	,,	...	Weather cloudy; dust storms; fever prevalent.
Bilaspur	,,	...	Weather clear; rabi harvesting; sugar-cane sowing; cholera, small-pox in places; prices steady.
Balaghât	,,	...	Weather cloudy, close; rabi harvesting; small-pox prevalent; prices steady.
Raipur	(4th)	...	Weather cloudy; slight showers of rain; rabi harvest excellent; few cases of cholera on Bilaspur border; prices easy.
Chanda	,,	·38	Prospects of crops good; cattle disease decreasing; prices stationary.
Chhindwara	(5th)	·27	Prospects of crops and health good; prices steady.
Bhandara	(6th)	...	Weather close, cloudy; rabi harvesting; fever and small-pox prevalent; prices easy.
Nagpur	(7th)	...	Weather cloudy, stormy; rabi harvesting; cattle disease disappeared; prices stationary.
Nimar	,,	·08	Weather sultry; small-pox continues.
Wardha	,,	·15	Small-pox prevalent.
Narsingpur	,,	·40	Rabi crops good; small-pox continues; prices stationary.
Hoshangabad	,,	...	Weather cloudy; slight rain; harvesting rabi continues.
Betul	,,		
Saugor	,,	...	Weather cloudy, warm; reaping of rabi completing; small-pox prevalent; prices rising.
Seoni	,,	·10	Rabi harvesting; fever increasing; small-pox in places.
Jubbulpore	,,	·10	Reaping rabi completing; two cases of cholera; small-pox prevalent.
			General Remarks.—Prices continue easy; cholera cases have occurred in Bilaspur and Jubbulpore, and small-pox has visited eight districts.
Damoh	...	...	Prospects good; small-pox prevailing; prices stationary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15TH APRIL 1875.

GENERAL REMARKS.—The rainfall of the past week has been abundant only in Central Bengal (both northern and southern districts), Assam and Mysore. Showers are reported from Sindh, a few districts of Bombay, and the North-Western corner of the Punjab: elsewhere the returns are blank. The Rabi harvest is over in the Bombay Presidency except in Sindh, and nearly over in Bengal, where the rain has been of great benefit to the standing crops. In the North-Western Provinces, Oudh and the Central Provinces it continues as last week: in the Punjab it has not yet begun, but prospects are generally good. Out-breaks of cholera are reported over a wide area in Northern, Central and Western India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (April 15th)	*Nil.*	Unharvested crops doing well; castors suffering from grub in some places; markets well supplied locally; prices steady; mild fever and small-pox continue; cattle generaliy healthy; dry fodder sufficient.
Kurnool (14th)	"	Second crop of paddy good; cotton harvest progressing; outturn fair; markets well supplied; prices generally steady; fever prevalent; water and pastures sufficient; no water over Sunkesala anicut.
Tanjore (15th)	"	Rivers dry; water in tanks very little; water over anicut none; no cultivation; standing crops generally good; not thriving in some places for want of rain; harvest of wet and dry crops nearly over; markets well supplied; prices steady; public health generally good; small-pox in several places; deaths by cholera in Negapatam; cattle disease in three taluqs; pasture moderate.
Trichinopoly April (14th)	"	No other change of importance.
Malabar (15th)	"	Sowing of first crop in progress; markets well supplied; prices steady; small-pox prevalent throughout; fever slight; cattle generally healthy; pasture scanty. *General remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—		
Sindh.		
Kurrachee (April 14th)	...	Fever in Kurrachee, Mulleer, Meerpoor, Batora, Jerrack and Johee. Rain in Gunda Tuppa, accompanied by hailstones, on 28th ultimo. Slight rain in Dadoo taluka on 3rd instant, and severe gale which rooted up many large trees. Small-pox in Jerruck town; no fresh cases in Kurrachee. Wheat crops in Moondar Tuppa attacked by disease; insects in Mahounda and Sehwan damaging grain and peas; nothing to affect revenue.
Shikarpur „	...	Rabi reaping; general grain cultivation doing well; fever decreasing; cotton sowing commenced.
Hyderabad „	...	No change in state of crops; weather cool; public health good.
Upper Sind Frontier „	...	Strong winds; weather cloudy and cooler; harvesting of rabi crops general; fever prevailing, but not generally.
Gujarat.		
Ahmedabad (April 14th)	...	Weather warm; public health good.
Surat „	...	Harvesting of rabi crops nearly completed; weather and public health good.
Broach „	...	Health good; crops harvested.
Kaira „	...	Cotton picking going on; weather hot; public health good.
Khandesh and Nasik.		
Khandesh (April 14th)	...	Cattle disease and measles prevalent; cotton market active; rates unchanged; weather hot.
Nasik „	...	One hundred and four cases of cholera, forty resulted in death; six deaths from it also in Sirmur taluka; weather warm; other talukas healthy.
Konkan.		
Tanna (April 14th)	...	Weather hot and sultry; public health good; fever prevailing slightly in Mahim and Shahpur talukas; guinea-worm in Wada taluka; rabi crop reaped in almost all the talukas; scarcity of drinking water in some places in Wada taluka; ground being prepared for early crops; late crop harvest over; cotton picking progressing; fever and cattle disease in three talukas.
Kanara „	...	Preparations being made for monsoon crop; second crop harvested; light rain above Ghât; fever and cattle disease prevalent; small-pox at Botkal.
Kaladgi (April 11th)	...	No change.
Kathiawar and Gaekwar's Territory.		
Rajkot (April 11th)	·2	Rabi crops good; health good; weather hot; rain at Songhar.
Wudwan „	...	Public health good; no other change.
Deccan.		
Poona (April 11th)	...	Weather continues hot; slight cattle disease still exists in Siroor, Indapoor, and Bhimthadi; except fever in Indapoor, public health good.
Ahmednuggur „	...	Cattle disease in Parna taluka continues; health good.
Sholapur (April 14th)	...	No change.
Satara „	...	Crops harvested; slight ague in Pahtun; cattle disease in Wâlwa and Pahtun; heat intense.
Southern Mahratta Country.		
Belgaum (April 14th)	...	Picking of cotton in progress; fever in Uthin, Gokak, Sumpgaon and Puruschar; weather very hot.
Dharwar „	...	Slight rainfall in Hangue and Kode.
Baroda „	...	Harvesting of all crops, except castor-oil seed, completed; cotton picking nearly finished; public health good.
		General Remarks.—Rabi harvest completed except in Sind; serious outbreak of cholera at Nasik.
Bengal—		
Burdwan (April 15th)	...	Cholera and small-pox in Sadr Jehanabad and Culna Sub-divisions.
Hooghly „	...	Cholera little less; small-pox as before.
24-Pergunnahs „	...	Cholera decreasing in Thannahs Joynagore, Protapnagore, Canning, Bankipore, and Mothoorapore, but unabated in Baduria and Hurwah; fever declining in Barrackpore.
Moorshedabad „	1·07	Cholera in Protabpore and Head-quarters Division; small-pox in Soojagunge.
Rajshahye „	·35	Cholera considerably on the increase in Singrah.
Pubna „	·94	Cholera still in part of Avolye and Mothoora.
Furreedpore „	·52	General health good.
Backerganj „	...	Detached cases of cholera still reported.
Chittagong „	...	Cholera in the north; deaths not so numerous as in the preceding week.
Noakhally „	...	Cholera still bad.
Patna „	...	Cholera on the increase, but not in epidemic form.
Gya „	...	Health good.
Sarun „	...	
Bhágalpur „	...	General health good; small-pox in Mudhpore sub-division.
Cuttack „	...	Health good, but slight outbreak of cholera near Kendrapara.
Balasore „	...	Excessive mortality from cholera in the north shows no diminution.
Lohardugga „	...	Small-pox prevalent, but general health good.

		General Remarks.—The weather is becoming generally hotter, though in some districts not unseasonably so, and in a few cool for the time of year; more or less rain has again fallen in two-thirds of the districts, hail in two only doing very little injury. The rain has benefited indigo, millets, rice, &c., and enabled ploughing operations to proceed vigorously, but more is still much wanted. Harvesting of the rabi is nearly completed, and the prospects of few crops still standing are favourable. Spring rice is being reaped in places, and early and late rice sowings have commenced.
N. W. P.—		
Benares (April 12th)	...	Harvest over; a good deal of cholera among pilgrims in city.
Mirzapur (14th)	...	Harvest nearly over; cereals above average; cane planting going on well; mowha good; mangoes poor; a good deal of fatal sporadic cholera.
Allahabad „	...	No change.
Banda (12th)	...	No change.
Hamirpur (15th)	...	No change.
Jhansi (12th)	...	No change.
Agra (14th)	...	Harvest far advanced; prospects excellent.
Meerut „	...	Harvest good.
Bareilly „	...	Harvest going on.
Punjab—		
Delhi (April 14th)	...	Crops under sickle; health good.
Hissar „	...	Ditto ditto.
Umballa „	...	Crops and health good.
Jullundur „	...	Crops fair; health good.
Lahore „	...	Crops and health good.
Mooltan „	...	Crops nearly ready for reaping; health good.
Dera Ismail Khan „	...	Health and harvest good.
Rawul Pindi „	...	Small showers of rain; harvest and health good; cattle disease lingering.
Peshawar „	·2	Harvest outturn will be below average; fever prevalent; more rain wanted.
		General Remarks.—Public health good; harvest prospects generally favourable.
Sindh—		
Lucknow (April 14th)	*Nil*	Rabi prospects favourable; weather clear; 473 deaths from cholera reported during the past week, of which 99 occurred in Sultanpur, 76 in Gonda, 73 in Partabghar, and 62 in Unao.
Fyzabad „	„	
Sitapur „	„	
Central Provinces—		
Upper Godavari (Apl. 10)	·03	Health good; prices steady.
Sambalpur „	...	Weather clear; fever prevalent.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22ND APRIL 1875.

GENERAL REMARKS.—Rain has fallen during the week in the southern districts of Madras, in Assam, in Cuttack and Cooch Behar in the Lower Provinces, and slightly in the Southern Mahratta Country, Satara, and Mysore. Elsewhere the returns are blank. The river continues to rise in Sindh. The *Rabi* crops have been generally reaped, with a fair outturn. The Punjab is the only province where the harvest is beginning. Rain is wanted in Bengal for the early rice sowings.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(April 22nd)	*Nil.*	Standing crops fair; castor suffering from grub in Repolli; markets well supplied locally; prices steady; mild small-pox and fever reported; guinea-worm in Paluad and Vinukonda; cattle generally healthy; dry fodder sufficient.
Kurnool	(21st)	*Nil.*	Cotton harvest in progress; second crop of paddy reaping commenced; markets well supplied; prices steady; fever and small-pox prevalent; cattle generally healthy; water and pasture procurable; no water over Sunkesala anicut.
Tanjore	(22nd)	...	Rain at Negapatam 13 inches; slight in Putticottai, and drizzling in Tanjore; rivers dry; water in tanks very little; water over anicuts none; no cultivation; standing crops generally good, not thriving in some parts for want of rain; harvest of wet and dry crops nearly over; makets well supplied; prices steady; public health generally good; small-pox in five taluqs; three deaths by cholera in Negapatam; cattle disease in three taluqs; pasture moderate.
Trichinopoly	(21st)	...	Slight showers in two taluqs; water supply failing in dry taluqs; otherwise no change.
Malabar	(22nd)	1·0	Sowing of first crops in progress; makets well supplied; prices steady; small-pox still prevalent throughout; fever slight; cattle healthy; pasture scanty. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—		
Sindh.		
Kurrachee (April 22nd)	...	River rising, measles in Jerrack and Tuppas Ghorabari, Kutha and Shawe; two cases of small-pox in the village of Jinad, Zangajo in taluka Shahbandar; patients previously vaccinated; cattle disease in Ghorabari Tuppa; fever in Johi and Meerpur, Batora Tuppas.
Shikarpur „	...	Days warm; nights cool; public health improving; harvesting going on; wheat slightly injured in places by blight.
Hyderabad „	...	Damage to standing rabi crops by blight in Halla and Hyderabad talukas; no other change in state of crops; river rising steadily; small-pox in taluka Allyar Tanda on road from Umarkote; sickness owing to north winds.
Upper Sind Frontier „	...	Weather hot; maximum temperature 139 degrees; rabi crops being reaped; outturn estimated at 14 annas.
Gujarat.		
Ahmedabad (April 22nd)	...	No change.
Surat „	...	Weather and public health good.
Broach „	...	Health good; mornings and evenings cool.
Kaira „	...	Three deaths from cholera in Neriad; slight sickness in Anand; other talukas free from disease; weather hot.
Khandesh and Nasik.		
Khandesh (April 22nd)	...	Scarcity of water in Bhosawal taluka; weather hot; reaping of rabi crops completed; exports from December to March equivalent to 88,600 bales; rates unchanged.
Nasik „	...	Of 133 cases of cholera in Nasik, 67 resulted in death; cholera has also broken out in talukas Sinnar, Din Dori, Niphar and Igatpura, where, out of 15 cases, 6 resulted in death; weather warm; cholera abating in Nasik.
Konkan.		
Tanna (April 22nd)	...	Weather hot and sultry; public health good, save one death from cholera; fever in Shahpur taluka, and guinea-worm and small-pox in some villages of Wada taluka; scarcity of drinking water in some places in Wada taluka.
Deccan.		
Poona (April 22nd)	...	No change.
Ahmednuggur (Apl. 22nd)	...	Slight cattle disease in Aukola and Parna talukas; health good.
Sholapur „	...	Cattle disease in Sholapur taluka; weather very warm.
Satara „	·04	Slight ague continues in Pahtun; cattle disease in Walwa and Pahtun; heat intense.
Southern Mahratta Country.		
Belgaum (April 22nd)	·21	Crops harvesting; fever prevalent throughout the Collectorate; weather very hot; small-pox and measles in Belgaum.
Dharwar „	...	Slight rainfall in Petta Nargund; ground being prepared for early crops in Hangue and Kalghatgi; fever increasing in Navalgund and Gudâk; cattle disease has appeared in Gudak and is causing mortality in Bankapur.
Kanara „	...	Preparations for monsoon crops continue; weather hot; slight rain above Ghâts; outturn of second crop fair; fever, small-pox, and cattle disease slightly prevalent.
Kaladgi „	...	Cotton picking progressing; yield fair except in Indi, Bhagalkôt and Mudebehal, where it is indifferent; health good.
Kathiawar and Gaekwar's Territory.		
Rajkot (April 22nd)	...	Crops all harvested and nearly threshed; outturn good; weather hot; health good.
Wudwan „	...	Cholera appeared in some parts of Wudwan District; no other change.
Baroda „	...	Cotton being pressed and sold; rabi crops stored; some cases of cholera in the city.
		No remarks.—Cholera is making its appearance in various quarters.
Bengal—		
Cooch Behar (April 22nd)	·38	Cases of cholera still reported; fever lessening.
Burdwan „	...	Cholera abating everywhere, with the exception of Basirhat and Baduria; fever decreasing at Barripore.
24-Pergunnahs „	...	Cholera and small-pox still somewhat prevalent.
Moorshedabad „	...	Cholera still prevails; two cases of small-pox reported at the Pubna Station.
Pubna „	...	General health of the district continues good.
Furreedpore „	...	Cholera still hanging about the northern thannahs.
Chittagong „	...	There has been a great deal of sickness in the north of the district.
Tipperah „	...	Cholera on the increase, though nowhere in an epidemic form.
Patna „	...	Public health good.
Mozufferpore „	...	General health good.
Sarun „	...	General health good; small-pox reported in the town.
Bhagalpur „	...	Outbreak of cholera almost entirely subsided.
Cuttack „	·47	In the north the cholera epidemic has declined, but a good deal of sporadic cholera exists throughout the district.
Balasore „	...	Small-pox prevalent in parts, but public health fair.
Lohardugga „	...	District healthy.
Singbhoom „	...	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Backerganj (April 22nd)	...	A little cattle disease.
		General Remarks.—No rain has fallen in Bengal during the week, except in Cuttack and Cooch Behar. The weather is becoming very hot, but seasonably so in some of the districts, while cool for the time of the year in a very few. Rain is much wanted in almost all for the rice sowings. The standing crops of cotton, indigo, millet, sugarcane, til, oilseed, &c., are nevertheless doing well, but would be better for rain; the early and late rice where already in the ground are doing well, boro or spring rice is progressing favourably and is even being reaped in a few places. The harvest of the rabi is all but completed, and the outturn is on the whole good.
N. W. P.—		
Benares (April 21st)	...	Harvest more than half gathered in; cholera abating.
Mirzapur „	...	No change.
Allahabad „	...	No change.
Banda „	...	No change.
Jhansi „	...	No change.
Agra „	...	Crops cut.
Meerut „	...	Crops nearly all cut.
Bareilly „	...	No change.
Punjab—		
Delhi (April 21st)	...	Reaping in progress; health good.
Hissar „	...	Ditto; ditto.
Umballa „	...	Ditto; ditto.
Jullundur „	...	Ditto; ditto.
Lahore „	...	Health and crops good.
Mooltan „	...	Reaping commenced; health good.
Dera Ismail Khan „	...	Health and crops good.
Rawul Pindi „	...	Ditto; cattle disease still slightly prevalent.
Peshawar „	...	Harvest outturn probably below average; fever abating.
		General Remarks.—No rain during week; harvest prospects and public health generally good.
Oudh—		
Lucknow (April 21st)	*Nil*	Rabi crops harvested; weather clear; 1,371 deaths from cholera reported during the past week, of which 63 occurred in the Lucknow District, 174 in Unao, 79 in Sitapur, 380 in Gonda, 129 in Bahraich, 400 in Sultanpur and 86 in Partabgarh.
Fyzabad „	...	
Sitapur „	...	
Central Provinces—		
Sambalpur (April 17th)	...	Weather clear; fever prevalent.
Bilaspur „	...	Weather clear, but hot; sugarcane thriving; cholera and small-pox in few villages; prices falling.
Chanda (18th)	...	Rabi crops gathered; threshing commenced; fever and cattle disease prevalent; prices stationary.
Raipur „	...	Weather clear; rabi gathered; outturn excellent; cholera disappeared; health good; prices easy.
Chhindwara (19th)	...	Weather cloudy and stormy; slight rain; health good; prices stationary.
Balaghât „	...	Weather cloudy and stormy; slight rain; rabi crops threshing; small-pox and cattle disease prevalent; prices risen.
Bhandara (20th)	...	Weather cloudy but close; threshing rabi completed; fever and small-pox prevalent; prices stationary.
Nagpur (21st)	...	Weather cloudy, but stormy; harvest completed; prices stationary.
Wardha „	...	Small-pox prevalent; prices stationary.
Nimar „	...	25 cases of cholera, 10 fatal; small-pox continues; prices rising.
Hôshangabad „	...	Weather hot; kharif ploughing commenced; health good.
Betul „	...	
Narsingpur ...	...	Crops good; small-pox prevalent; prices stationary.
Jubbulpore ...	...	Weather clear; threshing rabi completed; cholera disappeared.
Saugor ...	...	Weather clear but warm; threshing rabi continues; small-pox prevalent; prices stationary.
Seoni ...	...	Reaping of rabi completed; threshing commenced; outturn good; fever prevalent.
		General Remarks.—Prices generally have remained stationary; no more cases of cholera have occurred in Jubbulpore, and the cases in Bilaspur seem more or less isolated; in Nimar the outbreak seems up to the present time local.
Mysore and Coorg—		
Mysore ...	...	Very slight rain.
Coorg ...	...	Prospects of coffee and cardomoms are good generally; crops are thriving, and public health is good.
		General Remarks.—Agricultural prospects fair.
Assam—		
Gauhati ...	·12	Weather hot; sky irregularly overcast, threatening rain; prospects of crops favourable; public health good; cattle disease reported from Mauza Patidurrung.
Sylhet ...	1·5	Sowing progresses; boora paddy being cut; rice market steady; small-pox and murrain continue.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—			
Umraoti	...	...	Small-pox still prevalent in Ellichpore taluk; other parts of province healthy; land being prepared for ensuing cultivation.
Rajpootana—			
Marwar	(April 10th)	...	Tanks and wells as before; health good; no crops.
Meywar	(16th)	...	Water-supply, health, and prospects good.
Harowtee	(21st)	...	Prospects and health good.
Ajmere	(22nd)	...	Weather seasonable; water becoming scanty; health good.
Bhurtpore	,,	...	Harvest proceeding; crops good; days very warm, nights cool; no unusual sickness.
Jeypore	,,	...	Harvest nearly all secured—above average; health good; weather seasonable.
Sirohi	(19th)	...	Tanks dry; wells good; health very good.
Central India—			
Indore	...	...	Health and prospects generally good in Central India; cholera still hangs about Rewah and the Indore and Burwai road.
Rutlam	...	...	
Neemuch	...	...	
Sutna	...	...	
Gwalior	...	...	
Nepal—	(April 14th)	*Nil.*	*Nil.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6TH MAY 1875.

GENERAL REMARKS.—The rainfall of the past week has been light in Madras, Mysore, and the Southern Mahratta Districts of Bombay. Storms are reported from Nagpore, Bilaspore and Balaghat in the Central Provinces. In Bengal there has been a seasonable and general fall throughout the whole province, with the exception of a small portion of Behar. Heavy rain has fallen in Assam and Sylhet. In the North-Western Provinces, light showers are reported from Meerut, Benares and Jhansi; elsewhere the returns are blank. Few crops remain on the ground. In Bengal the rice sowings are progressing favourably, and the harvest continues in the Punjab with generally fair results.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(April 6th)	·18 at Masuliputam. ·4 at Venukonda.	Second crop of kolair suffering from want of water; prices stationary; public health good; cattle generally healthy; dry fodder used; markets well supplied locally; thunder and cloudy weather on Tuesday.
Kurnool	(5th)	·9 at Markapur	No rain in Kurnool; second crop of paddy and cotton harvest continues; outturn fair; markets well supplied; prices stationary; water and pasture sufficient; no water over Sunkesala anicut; fever and cattle disease prevalent.
Tanjore	(6th)	...	Rain at Negapatam none; elsewhere slight and partial; water scanty in some rivers, and none in others; supply to tanks considerable; water over anicuts *nil*; cultivation of raggi and gingelly oil seeds in some places; standing crops generally good; harvest a few dry grains; yield fair; pasture procurable; prices steady; markets well supplied; small-pox and fever in some localities; cholera in Negapatam and in some other places; cattle disease in four taluqs.
Trichinopoly	(5th)	...	Slight rain in three taluqs; no other change of importance.
Malabar	(6th)	.4	Sowing of first crop in progress; supply of grain sufficient; prices stationary; season continues promising; small-pox decreasing. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—(May 6th)		
Sindh.		
Kurrachee (May 5th)	...	River at Kotree on 1st 6 feet 6 inches, against 7 feet 10 inches on same date last year; cotton sowings commenced in Dadoo and Sehwan talukas; damage to wheat crops in Sehwan from blight, and grain attacked by worm; fever in Sehwan, Johi and Meerapoor Batora; cattle disease in Sehwan and Kotree; measles in Jerruck and Khetty, and Tuppas Ghorabaree and Kutha; no fresh cases of small-pox.
Shikarpur ...	...	Harvest generally gathered; weather warmer, but nights cool; much fever.
Hyderabad ...	...	Rabi crops being harvested, outturn fairly good; small-pox continues in talukas Badin and Aalhar-Ka-Tanda; public health otherwise good; river steadily rising.
Upper Sind Frontier ...	...	Weather hot and close; harvesting of rabi crops continues; public health fair.
Gujarat.		
Ahmedabad ...	...	Weather moderately warm; public health good.
Kaira ...	...	Cholera continues in Neriad; weather hot.
Surat ...	...	Weather and public health good.
Broach ...	...	Public health good; weather sultry.
Khandesh and Nasik.		
Khandesh ...	...	Cholera in Dhulia, Parola, Chalisgaon and Bhusawal talukas; measles and cattle disease in some parts. Cotton market dull; Hingunghat 50 per pulla, American 52; weather hot.
Nasik ...	...	Cholera abating in all talukas; no cases at Nasik; lands being ploughed for cultivation; weather cooler.
Konkan.		
Tanna ...	...	Weather hot; public health good; fever in Wada and Shahpur talukas, and guinea-worm and small-pox in Wada taluka, wherein scarcity of drinking-water continues to be felt at some places.
Deccan.		
Poona ...	...	Weather hot; cattle disease and fever in Indapur and Mawul, except slight cholera in Kheid and Havelee; public health good.
Ahmednuggur ...	...	Cholera in some villages of talukas Ankola and Copergaum; a few deaths from it in Ankola taluka; slight cattle disease in Rahuree and Parna talukas; health good.
Sholapur ...	...	No change.
Satara ...	...	Public health good; ague and cattle-disease in Khutao; days sultry; nights cool.
Southern Mahratta Country.		
Belgaum ...	·1	No change.
Dharwar ...	·04 in Petha Mundargi ·75.	Cotton picking nearly over; fever increasing in Gadak and Mundargi, and causing mortality in Kod, but decreasing in Hubli and Savanur; fever in other talukas as before; cattle-disease decreasing in Kod and Savanur.
Kanara ...	...	Ploughing operations continue; fever, small-pox and cattle-disease prevalent.
Kaladgi ...	...	Weather very warm; fever in Bijapur.
Kathiawar and Gaekwar's Territory.		
Rajkot ...	...	No change.
Wudwan ...	...	Weather hot; health moderate.
Baroda ...	...	No change.
		General Remarks.—Weather very hot; slight cholera.
Bengal—		
Burdwan (May 6th)	...	Cholera and small-pox prevalent; fever decreasing.
Hooghly ,,	...	Cholera and small-pox less.
24-Pergunnahs ,,	1·76	Cholera abated everywhere; fever increasing at Barripore.
Moorshedabad ,,	·23	Cholera still bad at Gowas Circle, 16 deaths during the week; mild form of small-pox at Sujaganj and Berhampore.
Rajshahye ,,	·19	Cholera prevalent, principally in the north-east of the district.
Pubna ,,	...	Cholera continues.
Furreedpore ,,	1·55	Several cases of cholera at head-quarters.
Noakhally ,,	3 99	Cholera abating.
Patna ,,	...	Cholera still prevalent, but nowhere in epidemic form.
Gya ,,	...	Cholera slightly prevalent in some parts.
Shahabad ,,	1·28	Cholera in parts of the district.
Darbangah ,,	...	Cholera still reported, but fewer in number.
Mozufferpore ,,	1·45	In Jullah and Kutrah thanas cholera has broken out and is spreading rather rapidly.
Sarun ,,	...	General health good.
Bhagulpore ,,		
Purneah ,,	1·218	Cholera decreasing.
Sonthal Pergunnahs ,,	...	Cholera appearing on the borders; small-pox heard of occasionally; cattle disease in places bad.
Balasore ,,	...	Cholera in the north steadily declining.
Lohardagga ,,	·9	Small-pox still prevalent.
Palamow ,,	...	A few cases of cholera.
Backerganj ,,	9·96	Cattle disease still present, but not bad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13TH MAY 1875.

GENERAL REMARKS.—In Madras, a portion of the Southern Mahratta Districts of Bombay, and Mysore, there have been slight and partial falls of rain during the week. Throughout Bengal the rainfall has been general, and in some districts heavy for the time of the year; there has also been a good fall in Sylhet, but very little fell in Assam. In the North-West Provinces, slight showers are reported from Jhansi, Meerut, and Bareilly, and in Oudh from Sitapur; the returns from other parts are blank. With the exception of Jalpaiguri, where injury is apprehended to the young rice and jute, the rain has benefitted the crops generally in Bengal, and helped on sowing operations. The crops throughout the Punjab are nearly all harvested.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(May 13th)	...	No rain at Masulipatam; 0·55 at Repalli; ·50 at Nandigama; none elsewhere; at Kolair summer crops suffering from want of rain; markets well supplied locally; prices steady; mild small-pox continues; cattle unhealthy in some localities; dry fodder sufficient.
Kurnool	(12th)	...	0·25 inch of rain fell in Kurnool on one day; slight showers elsewhere; cotton and second crop paddy harvests; markets well supplied; prices steady; water and pasture sufficient; fever prevalent; no water over Sunkesala anicut.
Tanjore	(13th)	0·84 at Negapatam.	Drizzling in Mayaveram alone; rivers dry; supply to tanks none; no water over anicuts; cultivation not yet commenced; standing crops generally good; harvest of a few dry grains, yield fair; markets well supplied; prices steady; fever and small-pox in some parts; cholera in Negapatam and Namulum; cattle disease in three taluks; pasture scanty.
Trichinopoly	(12th)	...	Slight rain in one taluk; no change of importance.
Malabar	(13th)	0·1	Only one shower during the week, more required; markets well supplied; prices steady; some small-pox; no cholera.
			General Remarks.—Prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—		
Sindh.		
Kurrachee (May 12th)		River rising; fever in two, and cattle disease in three talukas; North-West winds on Sunday and Monday with great heat; nights still and warm.
Shikarpur „	...	Wheat harvest gathered; insects in Kumber taluka injuring harvested grain; cattle disease disappeared; nights cool; fever prevailing; river 7 feet 1 inch on Bukkur; gauge height one foot less than last year.
Hyderabad „	...	State of crops, weather and health the same as before; mango crop destroyed by blight; river slightly higher.
Upper Sind Frontier „	...	Weather hot with occasional dust-storms; nights cool; harvesting of kharif crops continues; river floods have reached the Kusmore Begari Bund at Burri; health fair.
Gujarat.		
Ahmedabad ...	...	State of weather the same as before; cholera slightly prevalent.
Kaira ...	...	A few deaths from cholera in some talukas; weather hot.
Surat ...	...	Weather and public health good.
Broach ...	...	Public health good; weather sultry.
Khandesh and Nasik.		
Khandesh ...	...	Cholera continues; preparations for monsoon crops in progress; cotton market dull—Hinganghat 48, American 50; ginning finished.
Nasik ...	...	No change.
Konkan.		
Tanna ...	...	Weather tolerably cool; public health good; slight fever in Shahpur taluka; scarcity of drinking water in some places in Wada taluka.
Deccan.		
Poona ...	...	Weather hot; fever in Indapur; cholera in four talukas, and cattle disease in a few talukas.
Ahmednuggur ...	...	Cholera in four, and cattle disease in two talukas.
Sholapur ...	...	No change.
Satara ...	...	Slight fever in Malwa; ague in Pahtun; cattle disease in three talukas.
Southern Mahratta Country.		
Belgaum ...	...	Fever prevalent; cattle disease in Uthni taluka.
Dharwar ...	...	Slight rain in a few places; cotton harvest over in six talukas.
Kanara ...	...	Sowing for monsoon crop commenced; weather hot; fever, small-pox, and cattle disease prevalent.
Kaladgi ...	...	Crops harvested; land being cleared for next sowing; health good.
Kathiawar and Gaekwar's Territory.		
Rajkot ...	...	Weather very hot.
Wudwan ...	...	Weather very hot; health moderate.
		General Remarks.—Cholera still continues in some districts.
Bengal—		
Burdwan (May 13th)	...	Cholera decreasing.
Hooghly „	1·8	Cholera and small-pox have nearly disappeared since the rain, but in places cholera is still unabated.
24-Pergunnahs „	...	Sickness decreasing.
Moorshedabad „	1·51	Health good.
Dinagepore „	1·55	Cholera on the increase, both in regard to cases and deaths.
Rajshahye „	1·3	Cholera has abated considerably.
Pubna „	1·55	Cholera abating.
Jalpaiguri „	3·46	Cholera is general over the district and worst in Buxa sub-division, where in one part it has assumed severe epidemic type.
Cooch Behar „	4·03	Cholera raging in some parts.
Dacca „	·08	Health improving.
Furreedpore „	·4	General health good.
Chittagong Hill Tracts „	3·29	Cholera in several parts.
Patna „	...	Cholera is spreading on the south and south-west, not actually in epidemic form.
Gya „	·21	Cholera is decreasing.
Shahabad „	...	Sporadic cholera reported in some villages of Sasseram and Buxar sub-division.
„		
Darbangah „	1·06	Cholera still exists in some villages.
Mozufferpore „	...	Cholera in epidemic form in many parts.
Sarun „	...	General health good.
Chumparun „	·2	A good deal of fever about.
Bhagulpore „	...	General health good.
Sonthal Pergunnahs „	·69	General health improving.
Cuttack „	·91	Public health good; cholera disappeared.
Balasore „	...	Cholera still diminishing.
Lohardagga „	·64	Small-pox still prevalent and a few sporadic cases of cholera reported from Palamow.
Singbhoom „	1·38	Healthy.
Bankoora „	1·16	
Beerbhoom „	·88	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.

Maunbhoom ...	1·08	
Tipperah ...	·51	*General Remarks.*—There has been rain throughout Bengal, Behar and Orissa, and the fall has been heavy for the time of year in some districts, and in Jalpaiguri some injury is apprehended to the young rice and to jute, but the rain has done immense good to the crops generally, it has also facilitated sowing operations, which are proceeding rapidly. Boro rice is still being reaped; other crops progressing favourably.
N. W. P.—		
Benares (May 12th)	...	East wind continues; no change.
Mirzapur „	...	
Allahabad „	·2	
Banda „	...	No change.
Agra „	...	
Jhansi „	·2 on the 3rd instant.	
Hamirpur (May 13th)	...	West wind; no other change.
Meerut (12th)	·2	
Bareilly „	·3 in Pargana Bisalpur.	
Punjab—		
(May 12th)	...	*General Remarks.*—Reports from districts show that the crops throughout the province are nearly all harvested. General health good with the exception of slight fever still in the Peshawur District and eleven cases of cholera reported in city of Delhi. From 6th to 12th May two deaths.
Oudh—		
Lucknow (May 12th)	*Nil*	Prices low; weather clear; 2,173 deaths from cholera reported during the past week, of which 56 occurred in Lucknow, 256 in Unao, 93 in Barabanki, 15 in Hardui, 100 in Kheri, 158 in Fyzabad, 459 in Gonda, 799 in Bharaich, 10 in Rae Bareli, 154 in Sultanpur, and 73 in Partabgarh.
Fyzabad „	„	
Sitapur „	·2	
Central Provinces—		
Upper Godavari (May 8th)	...	Weather cloudy and stormy; small-pox prevalent; prices steady.
Sambalpur „	...	Weather stormy; kharif ploughing continues; fever decreasing.
Bilaspur „	...	Weather cloudy and stormy; cholera in Mungels town; prices easy.
Raipur (9th)	...	Weather clear; health good; prices easy.
Chanda „	...	Cloudy, hot; fever abating.
Balaghât (10th)	...	Weather warm; threshing rabi continues; small-pox and cattle disease prevalent: prices steady.
Chhindwara „	...	Weather cloudy; health good; prices steady.
Bhandara (11th)	...	Weather cloudy and close; kharif ploughing commenced; fever and small-pox prevalent; prices stationary.
Nagpur (12th)	...	Weather close; kharif ploughing commenced; prices rising.
Wardha „	...	Small-pox continues.
Nimar „	...	43 cases of cholera, 18 fatal; small-pox decreasing; prices easy.
Hoshangabad „	...	Weather hot and oppressive.
Betul „		
Narsingpur „	...	Small-pox and fever prevalent; prices stationary.
Jubbulpore „	...	Weather clear; two imported cases of cholera; small-pox continues.
Saugor „	...	Weather warm; threshing rabi continues; small-pox prevalent; prices stationary.
Seoni „	...	Rabi stored; kharif ploughing commenced; bowel complaint prevalent.
		General Remarks.—Cholera cases continue to occur in the Nimar and Hoshangabad Districts; precautions have been taken and medical aid is available at most stations on the line of Railway.
Mysore and Coorg—		
Mysore ...	Rain slight.	Public health generally good; fever rather prevalent.
Coorg ...	*Nil*	*General Remarks.*—Agricultural prospects fair.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Assam—			
Gauhati	(May 13th)	·6	Days hot and more or less clear, occasionally overcast with rain storms; prospects of crops continue favourable; small-pox at Burpetta; choleraic diarrhœa still at Gauhati; cattle disease reported from several mauzas in North Kamrup; public health generally good.
Sylhet	„	3·94	Field work progresses.
Hyderabad Assigned Districts—			
Umraoti	...	...	Land being prepared for ensuing cultivation.
Rajpootana—			
Sirohi	(May 10th)	...	Tanks dry; wells good; health very good; high winds prevailing.
Marwar	(8th)	...	Water scarce everywhere; Ranisur tank contains about a month's supply, has been opened to inhabitants for use; health good; a slight storm on night of 2nd.
Harowtee	„	...	Health and prospects unchanged.
Bhurtpore	(13th)	...	Weather cooler; prices continue high; a few cases of cholera.
Ajmere	„	...	Weather seasonable; health continues good.
Meywar	(7th)	...	Water-supply, health, and prospects good; hot winds prevailing.
Central India—			
Indore	(May 12th)	...	Cholera has almost entirely left Rewah, Indore, and the road southwards, but is heavy on the railway works near Futtehabad: with this exception, general health and prospects are good, and weather pleasant.
Neemuch	„		
Baghelkund	„		
Sutna	„		
Nepal—	(May 5th)	2·2	Crops in Terai and hill districts generally good; local damage in valley of Katmandoo to some of the standing corn, owing to a recent hail storm.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20TH MAY 1875.

GENERAL REMARKS.—There has been general but moderate rain during the week in Madras, with heavy falls in Malabar. The rain has also extended to the Southern Mahratta Districts of Bombay; good rain has fallen in Mysore. In Bengal and Assam there has been general rain, in many districts heavy, with severe storms. The ordinary dust storms and showers of the season are reported from the North-Western Provinces, Oudh, the Delhi district of the Punjab, and parts of Rajputana. The rain continues to be of great service in Bengal, where rice-sowings are rapidly progressing. In the Punjab the reaping of the *rabi* harvest is almost over; the out-turn has been fair.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(May 20th)	...	No rain at Masulipatam, Gudivada, Paluad and Naizid; elsewhere a little: *kolior* summer crop wants water; markets well supplied locally; prices steady; mild small-pox and guinea-worm partial; cattle unhealthy in some localities; dry fodder and water sufficient.
Kurnool	(19th)	...	0·16 inch of rain fell in one day; moderate in other taluks; other particulars same as last week.
Tanjore	(20th)	0·13 at Negapatam	Rain elsewhere slight and partial; rivers almost dry; supply to tanks none; water over anicuts *nil*; no cultivation; standing crops generally good; not thriving in Mannargudi; harvest a few dry grains; yield fair; markets well supplied; prices steady; small-pox and fever in some parts; cholera in Negapatam, Nannilum and Moyeveram; cattle disease in Moyeveram; pasture scanty.
Trichinopoly	(19th)	...	Slight rain in parts of district; health good; slight cattle disease in a few villages; pasture scanty.
Malabar	(20th)	4·38	Rain sufficient for sowing of first crop; markets well supplied; prices steady; one case of alleged cholera in Eruad taluk; some small-pox; pasture improving. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (May 20th)		
Sindh.		
Kurrachee (May 19th)	...	Cattle disease disappearing; river rising steadily; cotton crop promising in four talukas.
Shikarpur „	...	Weather warm; river 8 feet 8 inches on Bukkur; gauge 8 inches higher than on same date last year; fever prevalent.
Hyderabad „	...	Harvesting of rabi completed; water entered most of the canals; preparations for kharif cultivation commenced; small-pox in two talukas; disease among buffaloes in one taluka; health good; weather hot.
Upper Sind Frontier „	...	Weather hot; harvesting of rabi nearly completed; water entered through Kusmore Bund and passed into Begari, and is 2 to 3 feet deep near its mouth; it also touched the Bund Khattri hollow; health fair.
Gujarat.		
Ahmedabad ...	...	High winds; a squall on 18th, with rain 0·22; out of 87 cases of cholera in city 25 proved fatal.
Kaira ...	0·1	93 deaths from cholera in two talukas; slight cholera also in other talukas.
Surat ...	...	No change.
Broach ...	...	Health good; weather sultry.
Khandesh and Nasik.		
Khandesh ...	...	Cholera in greater part of the Collectorate; at Dhúlia, out of 265 cases since 26th April 88 proved fatal; cotton rates unchanged; scarcity of drinking water in Eastern Khandesh.
Nasik ...	...	Excepting Baglan and Peint, cholera in other ten talukas; weather warm.
Konkan.		
Tanna ...	...	Health good; scarcity of drinking water continues at some places in one taluka; few deaths from cholera in another taluka.
Deccan.		
Poona ...	...	No change; 55 deaths from cholera.
Ahmednuggur ...	...	Cholera in five talukas; cattle disease in two talukas.
Sholapur ...	...	Cattle disease decreasing; weather warm; health good.
Satara ...	0·2	Cattle disease in six talukas; measles at Mahabaleshwar.
Southern Mahratta Country.		
Belgaum ...	1·54	Fever prevalent; cattle disease in two talukas.
Dharwar ...	0·42 In Gonduk 0·63	In Kod ground being prepared for early crops in most talukas; fever in three talukas.
Kanara ...	0·53	Sowing for monsoon crop continues; fever, small-pox, and cattle disease prevalent.
Kaladgi ...	...	Slight rain at Badami; weather warm; fever and cattle disease in few talukas.
Kathiawar and Gaekwar's Territory.		
Rajkot ...	...	Two cases of cholera at Manikwara, one proved fatal; weather hot; health good.
Wudwan ...	...	Great heat; high wind; health satisfactory.
Baroda ...	...	No change. *General Remarks.*—Weather hot; cholera continues in some districts.
Bengal—

Noakhally „	2·58	
Tipperah „	·59	
Chittagong Hill Tracts „	1·62	
Hill Tipperah „	·86	
Backergunge „	·49	Sporadic cases of cholera continue.
Fureedpore „	2·67	General health good.
Dacca „	2·66	
Mymensingh „	2·62	
24-Pergunnahs „	·37	Cholera decreasing, but cases of fever reported from Barrackpore and Basirhat.
Jessore „	·41	
Nuddea „	3·27	
Pubna „	1·78	
Moorshedabad „	1·83	Cholera present in one village in Goas, small-pox in Sújaganj.
Rajshahye „	1·76	Cholera has almost disappeared, and the public health is good.
Bogra „	·89	
Dinagepore „	3·64	
Rungpore „	5·12	
Cooch Behar „	4·56	Cholera continues to rage in all parts.
Jalpaiguri „	1·18	Cholera still prevalent.
Midnapore „	1·41	
Howrah „	·82	
Hooghly „	...	Sickness decreased.
Burdwan „	1·52	Fever decreasing.
Bankoora „	1·35	
Beerbhoom „	·24	
Sonthal Pergunnahs „	·55	
Bhagulpore „	...	General health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Monghyr (May 18th)	1·39	
Purneah „	1·17	
Chumparun „	1·27	
Sarun „	...	General health good.
Mozufferpore „	·94	Cholera continues in many parts of the district.
Shahabad „	·11	Cholera still prevalent in parts of the sub-division to the same extent as previously noticed.
Patna „	...	Cholera still prevalent throughout the district.
Gya „	...	Cholera has increased in the Aurungabad sub-division, and south of Gya sub-division.
Hazaribaugh „	·18	
Lohardagga „	·02	Small-pox still prevalent, and cases of cholera continue to be reported from Palamow.
Maunbhoom „	2·05	
Singbhoom „	1·58	Healthy.
Balasore „	...	Cholera in the north is still on the decline, but it has broken out sporadically elsewhere.
Cuttack „	·55	Cholera disappeared; public health good.
Pooree „	1·59	
		General Remarks.—Except in Maldah, there has been rain in every district of Bengal, Orissa, and Chota Nagpore, and in about half the districts of Behar. Storms have been frequent in the districts, doing more or less damage to trees and houses, but the rain has done much good: a break, however, for a week or two in places where the fall has been heavy is now desirable. Standing crops are doing well. The preparations of the land and the sowing of late rice seed are progressing rapidly; spring rice is still being reaped.
N. W. P.—		
Benares (May 19th)	...	Dust storms, with light showers, on 17th and 18th.
Mirzapur „	...	Thunder storms, with a little rain, on 17th and 18th.
Banda „	...	Storm and slight rain on 16th.
Hamirpur (20th)	...	No change.
Jhansi (18th)	...	Storm without rain; weather cloudy.
Meerut (19th)	...	Rain and heavy storms.
Bareilly „	...	Showery in places.
Punjab—		
Delhi (May 19th)	·3 on the 17th.	Cholera leaving the city, but has appeared in village Bakirgarh, 25 miles distant.
Hissar „	*Nil*	Crops gathered; health good.
Umballa „	...	Crops harvested; health good.
Jullundur „	...	Crops gathered; health good.
Lahore „	...	Crops and health good
Rawul Pindi „	...	Crops nearly all gathered; health good; rain wanted.
Mooltan „	...	Rabi outturn not yet ascertained; health good.
Dera Ismail Khan „	...	Health good.
Peshawar „	...	Crops gathered; slight fever. *General Remarks.*—The outturn of the rabi crop generally good throughout the province; general health good also, a few cases only of cholera having occurred in the Delhi District.
Oudh—		
Lucknow (May 19th)	...	A slight drizzle on the 18th instant.
Sitapur „	*Nil.*	
Fyzabad „	·2	Prices stationary; weather cloudy; wind, dust-storms, and slight showers; cholera decreasing.
Central Provinces—		
Upper Godavari (May 15)	...	Weather cloudy; small-pox prevalent; prices easy.
Sambalpur „	...	Weather clear; kharif ploughing continues; fever decreased.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27TH MAY 1875.

GENERAL REMARKS.—Rain in greater or less quantity is reported to have fallen during the week in all parts of India. In Madras, Mysore, and the Southern Mahratta Country the falls appear to be the usual monsoon rains. In other parts of Bombay, Sind, the Central Provinces, Central India, and Rajputana the showers were lighter and accompanied with storms. In Bengal and Assam the rain has been general and in many places heavy. In North India the falls have been partial and generally slight, with storms and hail; but in the Sub-Himalayan Districts of the North-Western Provinces and the Punjab a considerable quantity has fallen. Agricultural prospects are everywhere favourable. In Bengal the spring rice has been reaped with a good out-turn, and sowings for the autumn crop are progressing.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(May 27th)	...	Rain ·80 in Palnad, and ·40 in Venukonda; Kolair paddy wants water; prices risen slightly in Guduvada; markets well supplied; mild small-pox in three taluks; guinea-worm in Palnad and Venukonda; cattle generally healthy; dry fodder and water sufficient.
Kurnool	(26th)	...	2·8 inches of rain fell in Kurnool in four days; 2·45 inches on night of 24th; moderate in four taluks; markets well supplied; prices steady; fever and cattle disease in some taluks; water and pasture sufficient.
Tanjore	(27th)	...	Rivers almost dry; no water in tanks; water over anicuts *nil;* no cultivation; standing crops generally good; not thriving in some parts for want of rain; harvest, a few dry grains here and there; yield fair; markets well supplied; prices steady; small-pox, fever and dysentery in some parts; cholera in five taluks. Cattle disease in Tanjore and Mayaveram; some loss; pasture scanty.
Trichinopoly	(26th)	...	No special change; rain in one taluk; two or three cases of cholera in Trichinopoly; all precautions taken against spreading; cattle disease declining; drinking water scarce in dry taluks.
Malabar	(27th)	3·30	Rain sufficient for the present; market well supplied; prices steady; small-pox and fever decreasing; pasture improving. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (May 27th)		
Sindh (May 26th)		
Kurrachee „	...	Heavy rain in Kohistan on 21st and 23rd with hailstones; rats damaging young rice in Jati taluka; cattle disease in Kurrachee.
Shikarpur „	0·12	Thunder-storm on night of 21st; river 7 feet 7 inches high, 2 inches less than on same date last year.
Hyderabad „	...	River falling; preparations for kharif cultivation in progress; cattle disease continues in Sakarand; weather very hot.
Upper Sind Frontier „	...	Weather hot and close; drops of rain on 22nd.
Gujarat.		
Ahmedabad (May 26th)	...	State of weather same as before; cholera spreading and is now prevalent in 3 talukas; out of 153 cases in the city, 27 proved fatal.
Kaira „	...	Cholera throughout Collectorate; mortality 20 per hundred cases; cholera abating in Neriad; weather very hot.
Surat „	...	Weather and health good; land being prepared for agriculture.
Broach „	...	Slight rain in all talukas except Jumboosur; three deaths from cholera at Wagra; other talukas healthy.
Khandesh and Nasik.		
Khandesh (May 26th)	...	Cholera abating; out of 205 cases 84 proved fatal; weather very hot; slight showers on 21st and 22nd; scarcity of water supply continues in Bhosawul taluka; land being prepared for next sowing; export of cotton during fortnight ending 15th, 3,276 bales; rates unchanged.
Nasik „	1·56	Cholera decreasing gradually; heavy hailstorm at Chandwud; weather still warm.
Konkan.		
Tanna (May 26th)	...	Weather sultry; several deaths from cholera; slight fever in Moorbaur taluka; land being prepared for agriculture; scarcity of drinking water in Wada taluka.
Deccan.		
Poona (May 26th)	...	Weather hot; fever in Indapur; cholera in six and cattle disease in three talukas.
Ahmednuggur „	...	Cholera in Rahuree, Kopergaum and Sungumnair talukas; 16 deaths in Sungumnair taluka; cattle disease in two talukas.
Sholapur „	...	Slight rain in Sholapur taluka; cattle disease decreasing.
Satara „	2·67	Slight fever in Walwa and Malcolmpett; ague in Patun; cattle disease in Kurar, Satara, Khanapur, Maun, Patun, and Malsirus.
Southern Mahratta Country.		
Belgaum (May 26th)	0·36	
Dharwar „	1·22	Rain throughout; cotton harvest over except in Guduk; outturn of indigenous about ten, and of exotic eight annas; fever decreasing in one taluka, but causing mortality slightly in four other talukas; cattle disease decreasing in two, and increasing in one taluka; health in other talukas as before.
Kanara „	0·15 at Karwar.	Sowing operations continue; rice has sprouted in some places; fever, small-pox and cattle disease prevalent.
Kaladgi „	...	Fever severe at Bagulkot; slight at Bijapur and Mudebihal; cattle disease in Sindgi, Bijapur and Bagulkot.
Kathiawar and Gaekwar's Territory.		
Rajkot (May 26th)	0·40 at Songarli.	Weather very hot; mornings cloudy; health good.
Wudwan „	...	Weather very hot; public health satisfactory.
Baroda „	...	*Fields being manured; a shower of rain on Friday night; cholera decreasing.* *General Remarks.*—Weather hot; cholera not of a virulent type, extending over a large area; there are signs of the approaching monsoon.
Bengal—		
Chittagong (May 27th)	3·33	Cholera still hangs about the north.
Noakhally „	1·22	
Tipperah „	1·33	
Chittagong Hill Tracts „	·92	
Hill Tipperah „	4·56	
Backergunge „	·74	
Fureedpore „	1·16	General health good.
Dacca „	·12	
Mymensingh „	6·16	
24-Pergunnahs „	1·78	Cholera decreasing everywhere; fever increasing at Barripore.
Nuddea „	·44	
Jessore „	·32	
Pubna „	·85	
Moorshedabad „	·50	General health good, though small-pox continues in Soojaganj, and cholera in Goas.
Maldah „	1·14	
Rajshahye „	1·0	General disappearance of cholera and small-pox.
Bogra „	4·24	
Dinagepore „	·42	Cholera still continues, but deaths fewer.
Rungpore „	1·86	
Cooch Behar „	1·90	Cholera still prevalent; reported to have partly disappeared in some parts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jalpaiguri (May 27th)	1·60	Cholera still prevalent, but seems to have been less fatal.
Howrah „	1·54	
Hooghly „	·62	
Burdwan „	1·13	Sickness decreasing.
Bankoora „	2·66	
Beerbhoom „	·61	
Sonthal Pergunnahs „	·99	
Bhagulpore „	...	General health good.
Purneah „	·54	
Sarun „	...	General health good.
Shahabad „	·59	
Mozufferpore „	...	Cholera still continues.
Patna „	...	Sporadic cholera throughout, except in the interior of Behar sub-division, where it is said to have assumed epidemic form.
Gya „	·46	Cholera abated little in Aurungabad and south of Gya.
Hazaribaugh „	·79	
Lohardagga „	1·43	Small-pox still prevalent, and a few cases of cholera still reported from Palamow.
Maunbhoom „	·71	
Singbhoom „	1·14	Healthy.
Balasore „		Cholera has not yet disappeared.
Cuttack „	1·22	Public health good.
		General Remarks.—The rains have been general throughout the provinces, and upon the whole heavy, and a short break would do good in many places. Storms have been frequent in the districts doing more or less damage. Sowing progressing satisfactorily, except where low lands have been flooded by rains. The harvest of the spring rice is all but complete, and the outturn is generally good. *The growing crops of rice, jute, indigo, millet, &c., are doing well.* In some places the rains have been too heavy for the young crops.
N. W. P.—		
Benares (May 26th)	...	No change.
Mirzapur „	...	Clouds with occasional storms; rain scanty but very beneficial to sugar cane; food very cheap in Dudhi.
Hamirpur (27th)	...	Storms and slight showers; rabi outturn estimated at about two-thirds of average.
Jhansi (26th)	...	Clouds and storms; slight rain on 18th.
Agra „	·4	Thunder-storms from south-west; cloudy weather.
Meerut „	...	Storms with rain.
Bareilly „	...	Rain-fall in Nawabganj 1·50; in Bisalpur ·9; less heavy in other parts.
Banda (27th)	...	Slight rain on 20th, 22nd and 24th; no other change.
Punjab—		
Delhi (May 26th)	*Nil*	Cholera has disappeared.
Hissar „	...	A sprinkling of rain; weather seasonable; cotton crops being sown; health generally good, but cholera in one village; 6 cases, 2 deaths.
Umballa „	...	A slight fall of rain; ploughing for kharif; health good.
Jullundur „	·5	Health good.
Lahore „	...	A few showers of rain; health and crops good.
Rawul Pindi „	Nearly one inch of rain.	Health good; cattle disease still prevailing and has appeared among commissariat cattle in cantonments.
Mooltan „	·6	Health good; water supply in canals deficient.
Dera Ismail Khan „	*Nil*	Health good; crops being gathered.
Peshawar „	·2	Slight fever prevailing.
		General Remarks.—Unusually early rain has fallen over considerable part of the province. General health and prospects good.
Oudh—		
Lucknow (May 26th)	*Nil*	Grain cheap; weather cloudy with occasional dust storms and slight showers; cholera decreasing; cattle disease still exists.
Fyzabad „	·5	
Sitapur „	*Nil*	
Central Provinces—		
Upper Godavari (May 22)	·50	Weather cloudy and stormy; small-pox continues; prices steady.
Sambalpur „	·36	Kharif ploughing continues; a few cases of small-pox.
Bilaspur „	·09	Weather close and cloudy; cholera of a mild type prevalent.
Balaghât (24th)	·02	Weather warm; rabi threshing continues; small-pox decreasing; prices stationary.
Chhindwara „	...	Weather cloudy; slight showers of rain; kharif ploughing continues; health good; prices steady.
Bhandara (25th)	·85	Weather cloudy and close; kharif ploughing commenced; fever and small-pox prevalent; prices stationary.
Nagpur (26th)	...	Weather close and cloudy; kharif ploughing continues; prices stationary.
Wardha „	2·42	Small-pox decreasing.
Nimar „	...	8 cases of cholera, 3 fatal; small-pox decreasing.
Hoshangabad „	...	Weather hot; 81 cholera cases; in the Hoshangabad district 28 fatal.
Betul „		
Narsinghpur „	...	Fever prevalent; small-pox decreasing; prices stationary.
Jubbulpore „	...	Weather stormy; 4 cholera cases.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*			
Murwara	(May 26th)	...	Small-pox prevalent.
Saugor	„	·10	Weather cloudy; kharif ploughing commenced; small-pox continues; prices rising.
Seoni	„	...	Kharif ploughing continues; small-pox decreasing.
Raipur	(23rd)	·40	Weather cloudy and stormy; cholera prevalent on the Bilaspur frontier, a few cases near Raipur; prices easy.
			General Remarks.—Prices remain easy; ploughing operations are in progress; cholera cases are most numerous in the Hoshangabad District, but generally speaking the disease is not of a very fatal kind.
Mysore and Coorg—			
Mysore	(May 27th)	·94 in Bangalore Cantonment.	Fever still prevalent.
Coorg	„	2·41	*General Remarks.*—Agricultural prospects good.
Assam—			
Gauhati	(May 27th)	·8	Weather clear but hot in early part of days; heavy storms with rain in evenings; Assu ripening, but rain wanted urgently in the interior; cattle disease reported from several mauzas; choleraic diarrhœa still prevalent.
Sylhet	„	1·19	Weather hot; field work progresses; small-pox, cholera and murrain continue.
Hyderabad Assigned Districts—			
Umraoti	(May 27th)	...	Cholera slightly increasing in Buldana District; of 81 persons attacked 27 died; other parts of province healthy.
Rajpootana—			
Sirohi	(May 24th)	·55	Tanks dry; wells and health good; thunder-storm with rain throughout district on 20th.
Meywar	(21st)	...	Water-supply, health, and prospects good; hot winds and storms prevalent.
Marwar	(22nd)	...	Water in Rainsur tank expected to last two weeks; health good; storms throughout the week have reduced temperature; furious dust-storms occurred, uprooting large trees and causing other damages.
Harowtee	„	...	Storms of wind followed by slight showers; cholera reported from Jhallawar, Shahpoora.
Jeypore	(27th)	...	Thunder-storms and drops of rain all the week; health good.
Bhurtpore	„	...	Weather cloudy and cool; wind east; health and prices continue unchanged.
Ajmere	„	...	Weather cloudy with storms, but only a few drops of rain.
Central India—			
Indore	(May 26th)	·38	Sharp outbreak of cholera at Mehidpore, Western Malwa; deaths above 50 per cent. of seizures; with this exception, health is generally good, and agricultural prospects are unchanged.
Rutlam	„	·38	
Neemuch	„	*Nil*	
Baghelkhund	„	·10	
Nepal—	(May 19th)	·47	Prospect of rain; crops fair.

FOREIGN DEPARTMENT.

PAPERS REGARDING THE COMMISSION OF ENQUIRY INTO THE CONDUCT OF HIS HIGHNESS MULHAR RAO GAEKWAR READ IN RESOLUTION OF THE FOREIGN DEPARTMENT, No. 1106 P, DATED SIMLA, 21st APRIL 1875, THE SUBSEQUENT PUBLICATION OF WHICH WAS PROMISED.

No. 3.—Official Note of Evidence and Exhibits in the case (the Vernacular documents being translated.)

No. I.—AMINA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—My name is Amina. I remember when the Baroda Commission sat. At that time I was in the service of Mrs. Phayre as ayah. I remained in Mrs. Phayre's service until she went to England. After that I entered the service of Mrs. Boevey as ayah. Mrs. Boevey was daughter of Mrs. Phayre, and lived at the Residency. I continued in Mrs. Boevey's service until Colonel Phayre went to Bombay. I know Mulhar Rao Gaekwar. He used to come twice a week to the Residency. Once while I was in the service of Mrs. Phayre I went to the Haveli (Palace) of the Maharaja. I also went to that place when in the service of Mrs. Boevey. I went to the Haveli on two occasions during the time I was in Mrs. Boevey's service. I believe, as I have not been long in Baroda, that I went to the old Haveli. I believe that it is the old Haveli. I went to the old Haveli on all three occasions. On the first occasion I was in Mrs. Phayre's service. I don't remember exactly when, but I think it was half-past nine or ten o'clock at night. This was about the close of the Baroda Commission. At that time I was living at the (*Kothi*) Residency. Faizu Chobdar accompanied me. We went on foot as far as the well. The well is at some distance from the Residency, close to the school, on the way to the city. There was a wheeled vehicle at the well. I and Faizu both went in that

carriage to the Haveli. Faizu was a fellow-servant at the Residency, but he was employed there before me. I was newly employed. The man pointed out to me is the Faizu to whom I allude. I had not seen at that time anything at Baroda, but the (*gariwala*) driver got up to a gate and stopped there. After the carriage stopped Salam came. Salam, I, and Faizu then went to the Haveli. I don't remember just now, but I believe the distance between the carriage and the Haveli was 100 or 150 paces. Salam used to come with the Maharaja twice a week to the Residency. I, Salam, and Faizu walked from where the carriage stopped to the Haveli; and we entered the Haveli. We went upstairs. I and Salam went upstairs. Salam desired me to stay a little while, and Salam went away saying he would inform the Maharaja of my arrival. Salam returned along with the Maharaja. There is a small place where one can sit, something like a room, on the top of the stairs. Just above the stairs is a small place—like a room; it was there I sat. I did not observe whether there was a door in it. I and Faizu were told to stand in that small place while Salam went to inform the Maharaja. Salam returned with the Maharaja. The Maharaja sat on a bench. I and Faizu sat down on the floor, Salam remained standing. The Maharaja then asked me whether I had heard the Madam Saheb saying anything about the Commission. I said "I know nothing and I have heard nothing." Then the Maharaja said "Do you say something to the Madam Saheb on my behalf." I said "I cannot say anything or explain anything." The Maharaja then said "Should the Madam Saheb say anything at any time, inform me through Salam or through Eshwant Rao." That is all that took place as regards me on that occasion. Then something occurred as regards Faizu. Faizu said something about his son who was then in the service of the Maharaja. I did not take particular notice of what Faizu said. I do not know exactly how long Faizu and I remained in the small room, but I believe it was about half an hour. Eshwant Rao is a *(jasus)* personal messenger in the service of the Maharaja, and used to accompany him twice a week to the Residency. After leaving the Haveli, Faizu, Salam, and I returned to where the gari was standing. Faizu and I got into the gari and went home. The gari stopped at the place where we first got into it. I alighted and went to the Residency. On the second occasion when I went to the Haveli it was after the Maharaja returned from Nowsari* It was in the month of June after the Maharaja had returned from Nowsari that I went to the Haveli. Salam asked me and Karim Naik to come. Karim Naik was a peon serving under Mr. Boevey. At that time Mr. and Mrs. Boevey were residing at the Residency. Mr. Boevey was then an Assistant to Colonel Phayre. On that occasion Karim Naik accompanied me to the Haveli. This was in consequence of Salam's invitation. We went on foot as far as a spot near the school, and then we got into a gari. It was not by day but by night. I believe it was about eight, or a quarter-past, or half-past eight. It is too long ago for me to remember clearly. The driver of the carriage called for Salam. Salam came. Then Salam, I, and Karim Naik got into the gari. We went close to the Haveli, near the staircase. It was raining a little at the time. It was somewhere near Salam's house that Salam joined us. The house is in the town. We all three alighted from the carriage and went upstairs. We went up one flight of stairs, and having got to the top of that flight, Salam desired me and Karim Naik to remain there. We went up two flights. It was there we were told to stand. Salam said he would go to inform the Maharaja of our arrival. The Maharaja came and sat on the same bench whereon he sat on the previous occasion. We were asked to come up a few steps to where the Maharaja was sitting. I and Karim went and sat there, opposite to where the Maharaja was seated on the bench. Salam stood. The Maharaja asked me whether the Madam Saheb had said anything about the marriage at Nowsari. I mean Mrs. Boevey. I said to the Maharaja that I had heard nothing about it. I further said "Mrs. Phayre has left for England." I said "When she returns from England something good will happen to you. She is favourably disposed towards you, and so is Colonel Phayre." Then the Maharaja said to Karim Naik, "Do you say something in

A man is brought into Court and identified by the witness as Faizu.

* Mr. Scoble states that Counsel agree that His Highness the Gaekwar was at Nowsari from the 2nd April til the 16th May 1874.—J. J., 23-2-75.

my favour to Mr. Boevey." I then said that Mr. Boevey did not attend to anything that any one might say; and Karim Naik said that he (Karim Naik) could do nothing. I then made salaam to the Maharaja and was about to go downstairs. Then I heard the Maharaja say to Salam, "Do you give them a sum." I understood that to refer to the marriage of the Maharaja. Then after that Salam, I, and Karim Naik went downstairs to where the gari was standing. I heard Salam then say to Karim, "Do you go to-morrow evening to Eshwant Rao's house?" After that we got into the gari and went home. On the evening of the following day Karim Naik told me that he had brought 200 rupees from Eshwantrao's house, where the money had been given him by Salam.

On the morning of the following day Karim paid me 100 rupees and kept 100 rupees for himself. The time of my third visit to the Maharaja was about eight or half-past eight of the evening. It was then I left the Residency. It was in the Ramzan* month. Salam came and told me that the Maharaja urgently required me to come to him. Nobody went with me except a boy named Chotu. I and my husband and Chotu went on foot. My husband went by the road leading to the bazaar to get a gari. He got one, and I and Chotu got into it near a banyan tree. My husband's name is Sheik Abdulla. We went to the Arabkhana (Arab's house) near the Haveli, which place Salam had appointed for us to go to. When we got to the Arabkhana the driver of the gari called out to Salam. He came I and Salam entered the Haveli. We went upstairs; Chotu remained in the gari. He did not come with us. I and Salam went to the same place where we sat on previous occasions. Salam called out to the Maharaja, and the Maharaja came and sat on the bench where he sat before. As I eat the salt of the English Government I will tell you all that occurred without suppression. The Maharaja first asked me this: "Has the Madam Saheb been saying anything about the child?" The Madam Saheb was Mrs. Boevey, and the child was one born to the Maharaja. I said "The Madam Saheb has said nothing and I know nothing." I then said "When the senior Madam Saheb (meaning Mrs. Phayre) comes something good will occur to you. She and Colonel Phayre both wish you well." I then said to the Maharaja "When the Madam Saheb comes back something good will happen to you—do you attend to what the Saheb says—don't be afraid." Then Salam said "Can any charm be used?" Salam it was who first spoke about charm. Salam said "Should a charm be used, will the Saheb's heart be turned?" but I did not exactly understand his meaning. I then said to Salam as well as to the Maharaja "Don't you use any *jadu* (arts of sorcery) for the Saheb, for they will have no effect on a Saheb." The reason I gave for that was this, that the Saheb people had faith in God. Then Salam said to me "Should anything be given to a Saheb, what do you think the effect would be?" At this I felt very much alarmed, because before that I had heard something stated by two persons. I then said "Maharaja, I am going away." I don't see the Maharaja here now; if he were here he would corroborate me. Then Salam addressing me said, "Hear what the Maharaja will tell you, and if you attend to him you will have enough to live on for the rest of your life." Salam then said to me "Your husband will also get employment, and you too will not have to serve any more." I said in return to Salam "I have not been starving all this time back; I have spent all my life hitherto serving the English." Just then as I was about to go away I said to the Maharaja, "Don't you listen to what anybody may tell you to do to the Saheb, for if anything injurious should happen to the Sahib, you will be ruined." Then it seemed to me that the Maharaja got angry at this, because he said to Salam "Take the ayah away." I and Salam then went downstairs—to the place where the gari had stopped. Chotu and I then went in the gari as far as the banyan (*wud*) tree; then we alighted and went home. I saw Salam again when he came with the Maharaja to the Residency. He then came to me on that occasion to the dispense-room and said to me, "I have placed Rupees 50 under your cot." He meant scant, *i.e.*, Baroda rupees. My cot was in my room. I was not in my room. My room is near the kitchen in the compound. I went to my room and under my

* The Ramzan lasts from the 12th October till the 10th November.

bedding I found Rupees 50. My husband was not living with me when I went to the Haveli on these three occasions. On the first occasion he was in Bombay. On the second occasion he was in the service of Major Blakeney at Baroda. On the third occasion he was living in my house,—I mean my room at the Residency. I informed my husband that I had been on these two occasions. I refer to the first two visits; that which I made first and that after the Maharaja's return from Nowsari. I don't remember where my husband was on the other occasion. When we were apart we corresponded in writing. The first letter was written when I went to Bombay. I don't know how to read. I went to Bombay when Mrs. Phayre went there—in March of last year. It was when Mrs. Phayre went to England. Syed Abdul Rahim wrote that first letter for me. I call him Rahim Saheb. I don't know if that is his proper name. I can neither read nor write. I got the second letter written when I was at Bombay when Mrs. Phayre went to England. Rahim Saheb was the writer. I sent them by the post. I don't remember whether my husband sent me any letter or not. One of the letters which I caused to be written was returned to me by the Post Office. I believe you have got it. I tore it up. I think I sent my husband two letters from Bombay, though I am not quite sure, and one when he was at Mahabaleshwur. I can't be sure. I remember making a statement to Mr. Souter. I was very ill at that time. Dr. Seward knows the state of my health then. He put a plaster on my stomach and leached me.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I spent the Rupees 50 found in my bed during the Ramzan month. I gave religious mendicants a feast. My husband was living with me at the time. He knew of the rupees. I used to manage the house expenses. I told him I found the Rupees 50 under the bedding, and that Salim had told me I would find them there. I have been five times to England [here witness sheds tears]. I told my husband that Karim Naik told me the Rupees 100 were a present given on the occasion of the marriage. I did not tell him that it was for poisoning Colonel Phayre, for there was nothing said about poisoning. I did not understand that there was a suggestion that Colonel Phayre should be poisoned. I had some apprehension in my own mind from what those two persons said. On the third occasion I thought of what they said. I understood from what they said to me that something was to be done about poisoning Colonel Phayre. I was much alarmed. I did not tell my husband. How could I tell him mere uncertain bazaar gup? When the Maharaja spoke to me on the third occasion I remembered what these two men had said to me; but the Maharaja did not then speak about poison. On the third occasion it somewhat occurred to me that it was suggested to me to assist in poisoning Colonel Phayre. My husband was not at that time in the Residency service. I did tell my husband that Salam said something about giving something to turn Colonel Phayre's heart. I understood that poison was intended, and this conclusion I came to from what Pedro and Raoji said. Without these two men had said this, I should not have suspected that the Maharaja intended to poison. The two men I mean are Pedro and Raoji. Pedro and Raoji were not the persons who told me; they were two other persons. When I mentioned Pedro and Raoji I was not thinking of what I said. I am not quite well yet; my arms and legs are swollen. The two men who spoke were Karim Naik and the Kazi of Chanwad. This was about a month before my third visit to the Maharaja. They did not mention the Saheb, but it struck me that Colonel Phayre was meant. How could I tell my Madam Saheb or my Saheb? I did not think that any one in our bungalow would poison him. That was my only reason for not telling him. The persons from whom I got the information told me that Pedro and Raoji were in great favour with the Maharaja; but I did not think they would poison him. I was not aware of such things in native territories. I never heard of such an occurrence before. I did not think such a thing could happen to a Saheb. I was much frightened at what the Maharaja and Salam said. I felt frightened at what the two men said. I had no ground for holding it true, but I thought it might be mere bazaar gup. I felt frightened when before the Maharaja. I thought if I mentioned it I might be killed outright. I being a woman was frightened. How could I tell the Saheb or Madam? I did not think anybody in the bungalow would do such a thing. I said to my husband that I thought something might be given. I told my husband this; but it seemed to me that nobody in the bungalow would do such a thing. I don't remember how long after this was. I did not mention poison at all to my husband. I said that something might be given. I don't remember whether I mentioned to him about poison. I don't remember whether I mentioned poison to my husband at all. I mentioned that it had been said to me that something might be given to the Saheb to turn his heart in order that the Saheb might be induced to do some good for the Maharaja. I mentioned this to my husband on the day following my third interview with the Maharaja. I said nothing to him about it the night before.

BARODA;
23rd *February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. I.—AMINA RECALLED AND SOLEMNLY AFFIRMED:

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I know nothing about the putting of poison into Colonel Phayre's glass, but I heard about it. I don't remember the exact time. I was then living at the Residency. I heard of it afterwards. I did not mention what I have told about the poisoning to anybody when I heard of it. To whom could I mention it? The enquiry was regarding the poisoning, not with regard to my going and coming. For that reason whose name could I mention? I was aware that Colonel Phayre questioned my husband. Whose name could I mention in order that my husband might tell him? I don't remember whether I said yesterday that I mentioned it to my husband. I have not seen my husband since yesterday. I was cautioned not to have communication with my husband. I was so cautioned by Khan Bahadur and the sepoys. I had no talk with the police since yesterday. I was not allowed to communicate with any one. I adhere to my previous statement, that I suspected poisoning from what two men told me, not from what the Maharaja said. At my third interview the Maharaja did not say anything to me about administering poison. I told the Maharaja that he should do nothing to cause injury to the Saheb: in which case he would be ruined. I have stated what I said. When the Khan Bahadur and Mr. Souter came and enquiry was set on foot as to this going and coming, I stated what occurred. This was after Mr. Souter arrived from Bombay. I was very sick at the time.

IT IS AGREED THAT THE WITNESS'S FIRST STATEMENT TO MR. SOUTER WAS TAKEN DOWN ON THE 18TH DECEMBER 1874.

My first statement was not taken down in writing. When I made that, Khan Bahadur was present and the driver of a cart (gari) and a lad. The Khan Bahadur is Akbar Ali. Mr. Souter was not present. I made my statement to Akbar Ali. I knew him in Bombay since Mr. Forjett's time. I identify Akbar Ali as the man called into Court. As far as I remember I made a statement to Mr. Souter two days after the above to Akbar Ali. Before making the statement to Akbar Ali I was in confinement. I had not been confined before that.

A man called in and identified by witness.

BY MR. MELVILL, COMMISSIONER:—I said to Akbar Ali when I first saw him that I could not make my statement. I was very ill. I said I would make it afterwards. It was on that day I was placed in confinement.

CROSS-EXAMINATION RESUMED:—I first said that I was then very sick, and when I recovered I would make a statement. It was then Akbar Ali put me in confinement. I don't remember whether I was confined before or after making the statement. I was lying on my cot at the time very ill. When Akbar Ali came to me and spoke, he said to me that I must not go away. I was first confined in my room, and my husband was not allowed to come near me, and as far as I can remember I was taken two days after to the hospital. I made a statement to Akbar Ali on the first day to this effect, *viz.*, that I would tell everything. Afterwards I was taken to Mr. Souter. I told Akbar Ali

that I was very ill. I don't know what exactly occurred just after. I believe I was taken to another room; I was very sick. Afterwards all the people came to take my statement. I merely stated to Akbar Ali that I had gone; but being ill could not make a lengthy statement. It is true that I made a statement to Akbar Ali in presence of a cartman and a boy. I did not tell everything then, because I was very sick. Ask Dr. Seward about my health. I think from memory that it was two days after that that I saw Mr. Souter. I was in another room to which I had been taken: there were sepoys present. It was a room in the same bungalow (Mr. Boevey's bungalow). There were present sepoys, Khan Bahadur Akbar Ali, and Abdul Ali. I don't remember how many sepoys were present, being sick. On that occasion Mr. Souter took down my statement in writing. He told me to tell everything I knew. I made a statement to Mr. Souter about something I had forgotten. Mr. Souter asked me about the poison. I answered I knew nothing about the poisoning, and then I told him all I knew. When asked by Mr. Souter about the poisoning, I said, I knew nothing about it, but that two persons mentioned it to me, and I then stated what I had heard. Mr. Souter asked me if the Maharaja had said anything to me about the poisoning, and I said that I knew nothing about it, and had told all I knew. Q.—Did Akbar Ali or Abdul Ali say to you that the Maharaja must have said something? A.—They threatened me; and they said "If the Maharaja did say anything to you about it, state it." I said I had stated all that I knew. I was not threatened. I did not say I was threatened. They said the Maharaja must have said something to me about poisoning. I said he had not. It is not true that Akbar Ali or Abdul Ali threatened me (*damkhao*). I may have said it. I think I said they asked me. I am now in confinement—in charge of Police sepoys. Mr. Souter did not read my statement over to me. Nobody else came to me. I am in confinement. Q.—Did you see Mr. Cleveland? A.—I don't know anybody, I am in confinement. I made no other statement to Mr. Souter, but I did to a Vakeel, that is, a Vakeel or Barrister. At the hospital I did make another statement to Mr. Souter. I tell no lies. My second statement was after I was sent to the hospital.

IT IS AGREED THAT THE DAY WAS THE 21ST DECEMBER 1874.

I sent for Mr. Souter and he came in order that I might tell him all I knew. I spoke to Dr. Seward or somebody else about it, but I don't remember whom I sent. I spoke to somebody, not Akbar Ali nor Abdul Ali. I was then under a guard of sepoys, and nobody was allowed to come to me. Q.—How did you get to the Maharaja the first time? A.—I did not then know Baroda, I have seen England, Cawnpore, Aboo, Simla and Arabia. Salam and Faizu were after me for about two months. They asked me from time to time to go to the Maharaja to make my salaam. I went not because I knew not how to go. Faizu and Salam said to me, "Don't you fear," and Salam said I should go with Faizu. I was unwilling to go because I had never been to the Maharaja. I had not been to Baroda before. I do not know (*pachanta*) Damodhar Punt. I don't know who is meant. I never saw him. Faizu persuaded me against my will to go to the Maharaja.

RE-EXAMINATION BY MR. SCOBLE:—The Vakeel I alluded to as the man to whom I made a statement to is the gentleman here. I made a statement to him; it was not read over. Between my first statement to Mr. Souter and my second to him (Mr. Souter) at the hospital I did not see either Akbar Ali or Abdul Ali, nor in that interval had I any communication with any policeman. I was under guard. I was in a regimental hospital. The regimental doctor, whose name I know not, and also Dr. Seward, came to see me there. Khan Bahadur came with a gariwala and a boy. That was the first time I saw Khan Bahadur. I was in my cot in my room sick. I had fever for four or five days before that, and also had liver. For the said four or five days I had been lying sick. I did not know the cartman before meeting him with Khan Bahadur. The cartman's name was like Tabe or Kabai. I don't know the names hereabout. The boy's name was Chotu, my servant. On that occasion all that I said was that I was not able to tell everything. I was afraid of the cartman and the boy. I said I would afterwards tell everything, and that I had visited

Witness identifies Mr. Cleveland, Solicitor in Court.

the Maharaja three times. I was put in confinement after that in another room in the same bungalow. I can't say whether it was imprisonment or surveillance (*nuzzerkeid*): a sepoy was placed at the door of my room, and remained there till I was removed to the hospital. I did not see my husband after that. I don't remember seeing Mr. Souter on the same day that I saw Khan Bahadur, the cartman, and the boy. I was yesterday asked about fright at my third visit to the Maharaja. I mentioned Kazi and Karim as the cause of my fright. I did not exactly understand what was meant when the two men first spoke to me. I began to be frightened at what they said when I went the third time to the Maharaja. I speak a little English. I don't understand difficult English. My Madam Saheb usually spoke Hindustani to me, and sometimes English. On two of the three occasions of my visiting the Gaekwar I obtained leave to go out from Mrs. Boevey. I mentioned to Mr. Souter what I had heard from Kazi and Karim.

BY THE PRESIDENT:—I don't know the drivers who took me to the Maharaja. It was night. I don't know their names. Yes, I know the name of one. Salam told me it. He called it Sandal. That was when Salam told me to come to his house. He said then that Sandal knew his house. I had not seen Sandal at any time before, but I saw him the following day when he came to Karim to demand his fare for the gari. There were either twenty days or a month between my hearing about poisoning Colonel Phayre and my third visit to the Gaekwar. I am quite sure I went on the third visit before my hearing of the attempt to poison.

BARODA,
24*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. II.—FAIZU RAMZAN STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Faizu Ramzan. I was employed as a Chobdar—for twenty years—at the Residency. I remember the Committee sitting at Baroda. I know the ayah Amina. I went with that ayah during the time that Commission was sitting to the Maharaja in the city. It was at night, after nine o'clock; we went in a gari. I don't know who the driver of the gari was. Salam Sowar came and said that he would send a gari. We found the gari at a place near the school where Salam—I mean Salam's man—said it would be found waiting for us. I and the ayah drove in that gari to the city. We did not see anybody on the road. We had a meeting with the Maharaja. Before that meeting we did not meet (*milna*) any one. When we got to the Chapani gate, which is near the new bazaar, outside the city, one of the city gates, the gari was stopped, when I and the ayah alighted, and we then found Salam the sowar. We accompanied him to the Maharaja. We found the Maharaja in the Haveli upstairs. The Haveli is 200 or 250 paces from the Chapani gate. We entered the Haveli by a staircase in the direction of the Nazar Bagh. The Nazar Bagh is a garden at the back of the Haveli and adjoins it: and the front of the Haveli adjoins a public street. The staircase by which we went is in the direction of the Nazar Bagh. It was night. We went up very high. I do not remember whether we went up two stories or three. I and the ayah sat down, and then Salam went to inform the Maharaja. Where we sat was a bench and I saw a mirror—one; it was night. I could not see how many mirrors. The place was a small room. We found this sort of sitting place at the top of the stairs. The place was just in front as we ascended. As I and the ayah were sitting there after a little time the Maharaja came. I know it was the Maharaja, because I recognized him as the Maharaja who came to the Residency. The Maharaja having come sat down on a bench. I salaamed to him. He then said to the ayah, "You do not come to me." The ayah said, "I have no leisure." The Maharaja said to the ayah, "Do you speak to the Madam Saheb in my favour. You request the Madam Saheb to speak in my favour to the Saheb, as many persons are making representations." The ayah said she could not say anything in favour of the Maharaja to the Madam Saheb, but if there was anything else, she might speak about it. I made salaam to the Maharaja and said "I am a servant: there are persons

inimical and jealous of me. I am a poor, helpless man." After that some talk took place, and soon after I went away. The ayah went away with me. What I said was that my son was a servant and therefore people were inimical to me. He is a sowar. He entered the service in the time of Khanderao Maharaj five or six years ago. His age is about sixteen or seventeen years at the present time. He gets ten kutcha rupees, of which ten are worth only eight rupees. This is his pay monthly, and has always been so since he entered that employ. I would be able to recognize the gariwala if I were to see him—the man who drove us to the Maharaja on that occasion. I identify the man now called into the Court as the cartman.

A man is called into Court and witness, Faizu, identifies him as the cartman. The man says his name is Karbhai Poonjabhai.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—He used to come before that to the Camp and the Residency, and therefore I knew him. He was brought before me when I was before Mr. Souter and I recognized him. Colonel Phayre did question me about the attempt to poison him. I said I knew nothing about it. I said nothing about my visit to the Maharaja, because the other persons there and at the Residency bore enmity to me and accused me of having done it. It was for this reason that I mentioned not my visit to the Maharaja as I knew nothing about the poisoning and feared I might be accused. Two days after I was examined I was dismissed. After my first examination was taken by Colonel Phayre, he sent for me two days after and took down my name, and asked how long I had been in the service; and again after these two occasions Colonel Phayre asked me who had incited me or spoken to me. He did not mention the Maharaja's name (*Maharaj ka nam nahin liya*). He did not ask me if the Maharaja had incited me: he merely asked me who had done it. I was only asked by him to mention who had instructed me to poison. I remained after Colonel Phayre went away. I was put into confinement two days after this poisoning matter, and have been in confinement ever since till now. I am now living in a tent with a guard over me. I am in Abdul Ali's charge. I know Raoji Rama. He was one of the persons who accused me of poisoning my master. All the people at the bungalow did so. I went to the Maharaja with the ayah as already deposed. The sowar told both me and the ayah to come in the evening; his name is Salam. I and the ayah were standing at the Residency bungalow, and Salam came with some fruit. He had been to the Saheb with some fruit and came to us on his return. Salam said, "Do you come there?" He had frequently spoken to us before about going, and I said what business had I to go? I did not persuade the ayah; she is not a child requiring persuasion: she went of her own accord. Both the ayah and I went to the Maharaja of our own accord, not by force. I went because the ayah went. I had no other business to go there for. The ayah said, "I have been asked for a long time to go, let us go." I did not ask her for what purpose. Q.—Did you mention before the 29th December when you were examined by Mr. Souter anything about your visit to the Maharaja? A.—I did not until then tell any person about it. Nobody told me before that statement was taken that the ayah had been examined. I did not know that she had. I was taken one day and made to stand up, and the gariwala to stand up in another place. The driver of the gari gave his evidence and the ayah gave her's. The ayah was inside because she was sick, and we were standing outside. Then I admitted that I had gone on one occasion, and the reason of my admitting this was that the ayah and the cartman had admitted it. Somebody told me that the ayah had said I had gone with her. The driver confessed the same, and then I acknowledged. Nobody told me that the ayah had admitted: I was taken to the place where the ayah was, and I was put in one place and the cartman in another. Then I acknowledged that I had gone on one occasion. When I was standing at the ayah's door, she said nothing in my presence. As the two persons who had gone were there I admitted that I had gone. I did not then know that she had admitted. As the witnesses had been found, I admitted having gone. At that time Akbar Ali was not there, nor Abdul Ali, nor any person. Akbar Ali was some distance off, and Rao Saheb was there. I spoke first, before the ayah or the cartman did. I said I went once. Nobody said anything to me. We were not allowed to talk to persons kept in confinement. I was asked whether I had gone, and I said that I did go. Rao Saheb asked me that.

RE-EXAMINATION BY MR. SCOBLE:—The place where the ayah, myself, and the cartman were made to stand was the hospital. Between Colonel Phayre's arresting me and my being taken to the hospital I had no communication with the ayah. I saw the ayah at the hospital. I had no conversation with her then, nor did she make any statement in my presence, nor did the cartman do so. I gave my statement to Mr. Souter on a Monday when he was leaving Baroda. I don't remember how many days this was after seeing the ayah at the hospital. In the interval I did not see the ayah or the gariwala, nor hear what they had said. I have been thirty years in service of the Government.

BY THE PRESIDENT AT REQUEST OF RAJA SIR DINKAR RAO:—The Palace I went to is that called the Haveli. My son entered the Gaekwar's service in Khanderao's time. I requested the Resident, Wallace Saheb, about it when he was about to go. I asked him that I might be employed under Khanderao. Wallace Saheb then transferred me and another man to Khanderao's service. That man's name is Syed Husein. I stayed in Khanderao's service two years, and after that Colonel Barr took me back to the Residency, and my son got my place with the Maharaj.

BARODA,
24th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. III.—KARBHAI POONJABHAI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Karbhai Poonjabhai, in service of Ramchander Halva, and I live in the Cantonment Bazaar. I know Faizu, the Chobdar at the Residency, because he was with the ayah when they went with my gari. That was a long time ago, a year or a year and a quarter ago. They got into the gari at a place near the School, and went to the Chapani gate. They told me to stop the gari there and stay there. I don't exactly remember the hour, but I think they got into the cart at eight o'clock at night. I observed that after getting out of my cart they went into the city through the gateway, that is the road that leads to the Haveli. I stopped there as they desired me. They returned after eleven o'clock. I was asleep then; they awoke me and got into the cart, and drove to the place where there is a School. At that place they got out and went towards the Residency. The Residency is at the other side of the maidan in which the spot is where the gari was stopped.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—The woman now in Court is the same that I drove.* I came from Barton Saheb's bungalow where I was in custody in a tent. Mr. Souter lives there, but the tent is some distance from the bungalow. After the Maharaja was arrested I was taken up. I am kept in custody in order not to communicate with any person. I have done nothing but drive these people in my cart. I informed my master on that night that Faizu and the ayah had got into my gari and that I drove them as described. I told nobody else. My master is Ramchandar. I had seen the ayah on one occasion when I drove to the Residency. I had seen Faizu before, but had not spoken to him. I told my master the same night I returned from the drive. I was asked to point out at the hospital who the ayah was that rode in my gari, and I pointed her out. On that occasion Faizu was present at some distance. I pointed Faizu out. Some man of Mr. Souter's was there—Akbar Ali Khan Saheb. It was to Akbar Ali I pointed out Faizu. Faizu did not hear what I said, being at a distance. I don't know whether Faizu observed me pointing him out. He was as far off as the hedge outside this Court is. Before this I had not pointed him out, as I had no occasion. I was told to look at him from where I was at the time. I was just before doing so asked if I could recognize him. I was asked, "Did he go in your cart?" It was, "See if you can recognize that man as the man who went in your cart?" There was no other woman but the ayah; the ayah was inside. My master is not in custody. He has to look after four garis and to look after outstandings and has no

* The witness Amina is called into Court and identified by witness.

time to look after me. I have not seen him since I went into confinement. I did not tell Akbar Ali or anybody that I had told my master that those persons went into my gari. It depends on Government whether I get out of confinement. Nobody told me that matter depended on the issue of this case. I was told I should be set free after this business is over. Akbar Ali asked me nothing, but Mr. Souter took down my statement. Mr. Souter told me that when the Sirkar's business should be over, I should be set free.

RE-EXAMINATION BY MR. SCOBLE:—The confinement is only eating, drinking, and sitting. There is no remedy against an order of the Sirkar. I agree to whatever order the Government may give. I am a married man and have children.

BARODA,
24th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. IV.—SHEIK KARIM STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Sheik Karim. I am a peon under Mr. Boevey, who was Assistant Resident here. I was in his service when he went to Nowsari last year. After the first fall of rain he returned. I remember after his return from Nowsari going with the ayah. About eight days after my return I went with her to the Maharaj. This was about eight o'clock at night. I and the ayah went in a gari from here. The ayah had previously desired me to call a certain gariwala named Sandal. I did call him, and he brought a gari for us to a place near the School. I and the ayah got into the gari near the School. The ayah told the driver to go to Salam's house. I think Salam is a *jasus* in the Maharaja's service. When we got near it Sandal, the driver, went to call Salam. Salam came and got into the gari with us, and then we all three went to the Haveli,—I mean the Palace near the mândvi or tower with a clock in it. When we got there Salam took me and the ayah upstairs to the Maharaj. We went up by a door at the back of the Haveli. The Nazerbagh adjoins that entrance. There are two Havelies with a covered way between them. Having entered this door we went upstairs with Salam. I know where we were taken. We went through two rooms, and were told to sit in the third room. I did not count the story nor the number of staircases. I think there were two or three staircases. The room where we sat was a story above the two rooms through which we passed. I had to turn when I got to the top of the stairs to get into the room. Nobody came there. No one was there when we arrived. I did not see the Maharaj on that occasion. The ayah stayed with me the whole time I was there. I was there about three-quarters of an hour. From that room I, the ayah, and Salam went to the Maharaj. When we went upstairs and got to the top we saw the Maharaj sitting on a bench close to the top of the stairs. The place where we had to turn was between the rooms where we were waiting and the place where we found the Maharaj. The ayah sat down and conversed with the Maharaj. I stood aside. I did not join in the conversation. No one else was there except me and Salam and the ayah and the Maharaj. The ayah commenced speaking about the wedding. The Maharaj asked the ayah whether the Saheb was angry with him on account of that marriage having taken place. The ayah thereupon said, "I cannot say anything now, but when the Madam Saheb comes, I will be able to talk her over." The ayah said she did not go to the Saheb's room, but she would speak to the Madam Saheb when she came. The Maharaj addressing me said, "Will you explain things to your Saheb?" I said, "My Saheb won't attend to what I or others say to him. He does what is proper to his own mind." I had no further conversation. We were at the Haveli about an hour. We went downstairs after that, and then came to the Residency. Next day the ayah told me to go

to Eshwant Rao in order to get a present on the occasion of the marriage. I knew Eshwant Rao because he came every fourth day to the Residency with fruit for the Resident from the Maharaja. I went the next day to Eshwant Rao. Salam and Eshwant Rao were there and no other person. Salam gave me two hundred rupees, and told me to keep one hundred myself and give the other hundred to the ayah as a present on account of the Nowsari wedding. I kept the hundred rupees for that night, and at six o'clock next morning I took them with me and gave them to the ayah.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I gave them to her in her husband's presence. After the attempt at poisoning Colonel Phayre questioned me.

IT IS AGREED THAT THIS WAS THE 13TH NOVEMBER 1874.

It was not Colonel Phayre but Mr. Boevey; Colonel Phayre was not then present but in his office. Colonel Phayre did not read over my statement to me. I did not tell Mr. Boevey about my visit to the Maharaj. I was questioned about Salam but not about the Maharaj. I told him that I had a quarrel with the Arab Sowar Salam. I did tell Mr. Boevey that Salam told me that I should relate what passed in Bhau Poonekar's matter and be rewarded for it. I told him of Salam's enmity causing him to refuse my going in a servants' cart on the way to Makinpur. I said that I had a quarrel with Salam at Makinpur on account of my not furnishing information desired by him. I was afraid of being accused in the poisoning matter; therefore I did not tell Mr. Boevey of my visit to the Maharaj. I am now in confinement. I was put in confinement about a fortnight after my statement to Mr. Boevey.

Counsel reads from statement, and witness replies.

I afterwards made a statement to Mr. Souter. I told Mr. Souter all I knew. I told him—"Last hot weather I went with the Assistant Resident to Nowsari and on return went with an ayah to the Maharaj. We went in a cart to the house of Salam Sowar and then with him to the Haveli, and then all three through a private entrance upstairs. The Maharaj, Salam, and the ayah had a private talk for about an hour. We returned to the Residency about eleven o'clock." I did tell Mr. Souter about the conversation. I told Mr. Souter the talk between the ayah and the Maharaj. I was examined by Mr. Souter only once. What I said was written down and read over to me. Mr. Souter asked me if it was correct, and I said it was. I did mention the conversation between the ayah and the Maharaja. Mr. Souter did not read that part of my statement out to me. I did not hear him read out that part. I have not seen Akbar Ali to speak to since yesterday, because policemen are there. I went to the Maharaja's Palace because the ayah took me there in order to get a present on account of the Nowsari wedding. I am Karim Naik. It is not true that the ayah went because I and Salam asked her to go.

RE-EXAMINATION BY MR. SCOBLE:—The ayah has said nothing to me since yesterday. I have heard nothing about the evidence she gave yesterday.

BARODA,
24th *February* 1875.

Secy. to the Commissioners.

No. V.—SANDAL STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Sandal Bakhtyar Khan. I am a servant, a gariwala, in employment of Mahomed Bakar. I know Mrs. Boevey's ayah; I don't know her name. She is a woman. I know Mr. Boevey's peon Karim. I identify the woman called into Court as Mrs. Boevey's ayah. She

The witness No. 1, Amina, called into Court.

and Karim have been driven by me in my cart towards the city from the plain called Pirpathar. It is near the boundary pillars between the Gaekwar's limits and the Cantonment. It is near the School. We drove to the house of Salam. Having got there, Karim Baksh told me to go to Salam's house and call him out. Salam is the Maharaj's Sowar. I know him because he is in the habit of coming to the Residency. I called Salam. Karim took hold of the reins of the gari while I went and called Salam. Then Karim, the ayah, and Salam went in the gari. Salam came when I called him, and got into the gari and sat with the ayah and Karim. Then we drove to the Sirkar Haveli, that is, the Haveli close to the clock tower. I drove the gari by a way between the two Havelies and stopped the gari near the staircase at the back, near the Nazerbagh. The ayah, Karim, and Salam alighted and went upstairs. The gari remained standing. I got out of the gari and went to sleep on a step of the staircase. Salam, Karim, and the ayah all three returned. When they returned the sentry awoke me. It was near twelve or one o'clock at night that I awoke. I took the gari there at half-past nine, and they got into the gari about ten o'clock. I drove the ayah and Karim back to the Pirpathar maidan. I don't remember what time of the year this was, nor whether it was the monsoon or before or after, but it rained at the time I went. I don't exactly recollect, but it must have been eight or ten months ago—eight or nine months I think. Karim Baksh paid me for the gari. He paid me at six o'clock next evening. I identify the man called into Court as Karim Baksh.

A man called into Court.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I was going from the railway train to the city. The Bombay Police came here and made inquiries, and could get no information. I first made this statement to Mr. Souter. It was when the Bombay Police came and made inquiries. Being ignorant, I cannot say when this was. It was not last night. It was the day the Bombay Police arrived. It was two or three months ago. I told Mr. Souter, but I requested he would not publish it in an assembly or council, I being a (*pardeshi*) foreigner. Mr. Souter did not write down my statement. I was not put in confinement, nor have I been, nor am I now, in confinement. Since then I have told nobody. A Saheb sent for me last night and took down what I had to say. I point him out. Except him nobody else was there. It was last night. I don't speak English. There was a Havildar or some one who explained to the Saheb. I don't know Abdul Ali. Why should I not remember the hour of twelve or one as I was paid for my gari? I had no watch. I can't specify whether it was twelve or one o'clock. It was a dark night. That man put questions to me and the Saheb took down what I said. I don't know the man's name to be Abdul Ali. I thought him a Havildar. He caused the Saheb to take down what I said. Abdul Ali said to me, "The Saheb wants to know who hired your gari." He did not say when, but it was eight or nine months ago. I asked him "When?" The answer he gave was, "At the time Karim Baksh and the ayah went in your gari." I said "It was either eight or nine months ago that he went." Before that I did not know the ayah, but I did know Karim, who used to go about the bazaar. I never drove him before. I have seen him since, not last night nor this morning. Abdul Ali did not tell me what Karim said yesterday. Last night I slept at my house. I was never in confinement at any time. One day, that on which my statement was taken, I was kept in confinement. I had not mentioned about Karim Baksh. I was kept in confinement, but after mentioning about Karim Baksh I was liberated. I and all came from the Residency. Abdul Ali was present. I mentioned Karim Baksh's name after I was told that my statement should not be taken. I was afraid—[Witness draws his hand across his throat]. I made my statement two, or two and a half or three months ago to Mr. Souter. Nobody else was present. I first made an arrangement with Mr. Souter in order to save my life. I got him to agree that he would not publish what I said. I mentioned the ayah on that occasion and not Karim's name. I merely said, "The ayah went to the city." I know her now. I knew her at the time I made a statement to Mr. Souter. I knew at that time that she was Mrs. Boevey's ayah, because she lived at Mr. Boevey's. Before then I had seen her at Mr. Boevey's. Mr. Souter did not ask me if Karim had gone with her. I made a bargain with Mr. Souter through fear of my life from the side of the Gaekwar, I being of another country. I was not confined that night—not at all, not at any time. I was taken to Mr. Boevey's bungalow. I was not kept in confinement until I mentioned Karim's name. After making arrangement about my life I told the whole story. When the Bombay Police came inquiries were made regarding this case. I went to Mr. Souter. Syed (*untwala*) camelman took me to Mr. Souter. Syed had a camel formerly, but not now. I don't know that Syed made a charge against the Gaekwar. Syed's other name is Sadak Ali.

Witness points out Mr. Cleveland, Solicitor.

Abdul Ali is pointed out.

RE-EXAMINATION BY MR. SCOBLE:—When first I went to Mr. Souter it was with Syed, the camelman. I was asked what I had to state. I made a statement. I said "Karim came to me at six o'clock to hire my gari; Karim Baksh having come to my house to hire the gari, it was taken to the Pirpathar maidan at half-past nine. The ayah and Karim came and got into the gari, and the gari was driven to the city. They went in the gari to Salam's house in the city. When we arrived close to Salam's house Karim Baksh desired me to go and call Salam. I gave the reins of the gari into Karim Baksh's hands and went to call Salam. Salam came from his house. Salam, Karim, and the ayah got into the gari, and we went thence to the Sirkar's Palace. We went to the old Haveli, close to the Nazerbagh, and the gari stopped at a staircase in rear of the Haveli. Karim, the ayah, and Salam alighted and went upstairs. After they had left I went asleep." I made all the above statement to Mr. Souter about two or two and a half months' ago when the Bombay Police arrived. I made the arrangement with Mr. Souter after I made my statement—at the same time. I made the arrangement from fear of my life. I was not in confinement on that day. I was not in confinement. I was brought from the Residency to Mr. Boevey's bungalow to point out the ayah and Karim Baksh. I was brought there after I made my statement to Mr. Souter. I pointed out the ayah and Karim Baksh to Mr. Souter, Mr. Boevey, and Khan Saheb. After pointing them out I was allowed to go away. Since then until now I have not been in confinement.

BY SERJEANT BALLANTINE:—The man I called Syed is Sadak Ali. I don't know his father's name. I don't know if he comes from Ahmedabad. He was sitting in his house, and there was some talk of the Bombay Police having arrived. He came to me because I said I would point out to Mr. Souter such-and-such persons as had gone to the Sirkar's Palace. I said I would prove that the ayah and Karim had gone.

Q.—Why did you tell Sadak this if afraid of your life? A.—It was stated that no clue to this case would be got. Sadak said so. I have seen Sadak lately. He lives in the camp. I saw him in the camp fifteen or sixteen days ago. I did not see him about the present case. I don't know if he is assisting in getting up the case. I told Sadak, and Sadak told Mr. Souter.

BY RAJA SIR DINKAR RAO:—I was afraid of my life, being resident of a foreign country. I heard that Bhau Sindia had been strangled to death by an elephant—that is all. I have been servant here for three years. If so great a man as the person named was put to death, I thought I might be rammed into a hole.

BARODA,
24th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. VI.—CHOTU STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Chotu. I am in service of Amina, Mrs. Boevey's ayah. It is four months since I was in her service. I went to the city with her on one occasion; I think two or three months ago. I cannot specify the month or day. It was in the month of Ramzan. It was in the night time, about nine o'clock, in a gari. It was a Mahomedan gariwala's gari. The gariwala's name is Daud. I got into it near a burr tree on the maidan or plain. There were the ayah, myself (no one else), and the gari-driver. The ayah's husband brought the gari and was there when it came. I and the ayah got into the gari. We went to the Arabkhana in the gari. It is a short distance from the *mandavi* and the Haveli in the city. Salam was there. Salam is a Sowar. I did not know him before. I know him now because while I served the ayah he was in the habit of coming with the Sirkar's escort to the Residency: he used to come to drink water to the ayah's room. We went to the Haveli, in front of the Haveli. I don't know what became of the ayah; she left the gari. Salam took the ayah with him. I know not where they went. A short while after they left I fell asleep together with the gariwala. I was afterwards awakened by the ayah and Salam. I went back with them in the gari, and so got home. It is four months since I entered the ayah's service.

Amina, witness No. I, is called and identified by witness.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I am not, and have not been, in confinement. A sepoy follows me. I don't know his name. I sleep at the Khan Saheb's. I have not been followed like this before. Since all those persons were brought to the tent they are followed by sepoys. I identify the Khan Saheb. All the witnesses are in the tent. Since the day before yesterday they are apart. We were then separated because we were examined. I know Raoji, who lives at our place. He is separated from the witnesses. He is with the Khan Saheb here. He is always with him ever since they have been taken up. I gave evidence when taken up about two months since. It has never been read over, even until to-day, to me.

Akbar Ali is called and identified.

RE-EXAMINATION BY MR. SCOBLE:—In the tent with me are the gariwala and we. By we I mean myself. There are three gariwalas. I know the name of the driver of the gari in which I went, not of the other two. Since the day before yesterday the witnesses were kept apart—the ayah and others. I mean those who have given evidence are kept apart from those witnesses who have not given evidence.

BARODA,
25*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. VII.—SHEIK DAUD STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Sheik Daud, and father's name Sheik Rahim. I am shigram-driver. I don't know Mr. Boevey's ayah, but when I went to the Residency I saw her outside. I know her by sight. I know the boy Chotu. I know the ayah's husband sufficiently to salaam to him. I did drive the ayah and the boy in my shigram. I did not think I would be asked the date. It was before the last Divali—two or four days before the Divali.

I drove the ayah and Chotu from a place twenty paces from Dadabhai's shop—yonder. I stopped the gari near the banian tree. I don't know how far the shop is from here. I drove them to the city, to the Arabkhana, where the Sirkar's guard is stationed. Then the ayah said to me, "Go and call Salam." I then brought Salam, who was close to the Arabkhana. Salam and the ayah then got down and went to the Haveli—the old Haveli on the right-hand side. The Arabkhana and the Haveli are contiguous. I stopped near the Arabkhana and the well near the Durgah. I took the cushion from the gari and resting on it slept. Salim awakened me. The ayah was with him. I got up, put the bullocks in, got the gari ready, turned it towards the camp, and drove it back with the ayah and Chotu. A butler came to me who lived in the Resident's bungalow that night to tell me to take the gari. I know not his name; he was a Mussalman. I recognize him as the man now called.

A man calling himself Sheik Abdulla is identified.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I have not a sepoy with me. I live in the camp with my parents. Since this matter began I have never been in confinement. I did not give information. I mentioned it in presence of a man named Sandal. I identify the man called in. I mentioned it to Sandal as he sat with his master, a baker. I do not know Sadak Ali. I met Sandal one day on the road, and he asked me, "Who did you take that night?" I said "The ayah and a boy." I did not notice what night he meant. He meant the night I took the ayah. He knew about it because he took the bullocks from the gari and gave water to the bullocks at a cistern. I told him about my taking the ayah: thus he knew. He met me on the road,—I mean at the time I took the ayah. He must have seen, otherwise he would not have asked me. I had only two or four talks with Sandal about my taking the ayah. What object have I in finding who took the ayah? I myself took her. Sandal did on one occasion mention Karim's name, saying that he had driven him.

Witness No. V, Sandal, called and identified.

RE-EXAMINATION BY MR. SCOBLE:—The first talk I had with Sandal was one day about eight o'clock two months or two and a quarter months ago. I knew him before because my master and Sandal's master are brothers. My master's name is Sheik Chotu, and Sandal's master is Sheik Shah Ahmed. Both of them let out garies on hire. Their garies are kept at different places—one lives near a butcher's shop, the other near a liquor place; both live in the camp. When I took the ayah to the city I met Sandal, who was watering the baker's bullocks which he usually drives. The cistern is on the Baroda road—on the other side of a bridge called Banda Bridge. He spoke to me: as I went to the city, he called out "Daud, where are you going?" I said "To the city." Five or seven days after he mentioned the matter to me, I said "Truth will be out." One day as we were sitting together, about 8 A.M., he mentioned, and I did also. This was the occasion he asked me who I took that night. It was the occasion I said "Truth will be out." He asked me who did I take. I don't remember when the Bombay Police came to Baroda. I did not see them.

BARODA,
25*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. VIII.—SANDAL RECALLED:

BY MR. SCOBLE:—I know the witness Sheik Daud. We serve masters who are brothers. I had a talk with Sheik Daud once as I was going from the station to the city and unyoked my bullocks to water them, and Daud was going with his bullocks to the city. He went on, and after giving water to my bullocks I went after him. I saw his gari near the Sirkar's Haveli. Then I returned home leaving my passenger. Next morning I asked him, "Whom did you take last night?" He said "I took Chotu and the ayah." That is all.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I mentioned Karim to Sheik Daud. I told all this to Mr. Souter.

RE-EXAMINATION BY MR. SCOBLE:—As to Daud, he took them in the Ramzan. He heard about Karim when I told Council, that is when I told Mr. Boevey. I did not tell Sheik Daud about Karim. When I said I did mention Karim to Sheik Daud I did not understand the question. I am a poor labourer; why should I mention Karim's name to Sheik Daud?

BY THE PRESIDENT:—On the occasion when Sheik Daud asked me whom I had taken to the city I did not mention Karim.

BY MR. SCOBLE:—I don't remember that I afterwards mentioned Karim. I don't know if I mean Mr. Boevey or Mr. Souter. I point out the man I mean.

Witness points out Mr. Souter.

I knew him by the name of Boevey. Daud was present on the day I made a statement to Mr. Souter. Daud had been taken up and was present there.

BY SERJEANT BALLANTINE:—Q.—Why did you not mention Karim when you mentioned the ayah and Chotu? A.—Lest I might be driven away—even now I am afraid of my life.

BARODA,
25th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. IX.—SHEIK ABDULLA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Sheik Abdulla. I am the husband of Amina. Last year I served Major Blakeney. I served him seven months, two months whereof I was at Mahableshwar and the rest at Baroda. I went to Mahableshwar in March—about the 28th or 29th March. I came back with Major Blakeney to Baroda and stayed with him that month, and got leave in the next month. After that I lived at the Residency with my wife, and have lived at Baroda ever since then. I first served Major Blakeney in January of last year, and before that January I was at Bombay. My wife Amina went to Bombay with her Madam Saheb in March last year. She remained there rather more than a month. When I was in Mahableshwar and she in Bombay I received two letters from Amina. One of the documents shown me is one so received (*this is marked A*). The other I did not receive (*marked with initials*). The letter now shown me was sent by me from Poona (marked B). The next letter shown me was signed by me and sent from Baroda by the post (marked C). I was present when these letters were found in a box in the room where we live at Mr. Boevey's bungalow. The letter which I have said I did not receive was found in the same place in the same box as the other three.

Two documents put in witness's hands.

THE LETTER MARKED A IS ADMITTED AS EVIDENCE, AND RECORDED AS EXHIBIT A.

I knew Eshwantrao and Salam. I have had conversation with them. Salam was in the habit of coming with the Maharaja's escorts to the Residency. Salam was in the habit of coming to Faizu's room to drink water. It is near my wife's room. My wife told me that she went to the city to Salam. She told me this the morning after my arrival from Bombay in January. She said "Faizu and I were sent for by the Maharaj through Salam. I went in company with Faizu." She said "The Maharaj made some inquiries of me." She said the Maharaj enquired if she knew anything about the Committee, and that she answered that she knew nothing about the Commission. She also told me that the Maharaj said to her that she should talk over in his favour the Madam Saheb, and that she replied that she was not in the habit of going

to the Saheb's room, and that the Madam will not listen to anything she would say. She did not at that time tell me aught else. I came to know, on the day following a visit, of other visits. I was then in Major Blakeney's service at Baroda. I believe it was in June she went on the second visit after my return from Mahabaleshwar. She told me that she went to the Maharaja as desired by him. She told me the circumstances. She said she went along with Karim Baksh. She told me the conversation between her and the Maharaja. The Maharaja, she said, enquired if any allusion had been made to his marriage. She answered that none had been made, that she heard none. The Maharaj asked her to talk over the Madam Saheb. She replied that she was unable to talk over the Madam Saheb. My wife got Rupees 100 after the second visit. I know this because she told me. She said that Salam had asked her to send Karim Baksh the following day, and that Karim Baksh went the following day and received Rupees 200, of which he kept 100 and paid her the other 100. I know my wife did get the Rupees 100. Soon after my wife went to Poona. I believe it was in July. She remained a month or more,—about a month and a half. It was when she was in Poona that I addressed to my wife these two letters. When my wife was at Poona, Eshwant Rao had gone to Bombay.

Letters B and C are put into witness' hands.

THE LETTER C. IS NOW ADMITTED IN EVIDENCE OF THE INTEREST SHEWN BY WITNESS AND AMINA IN BARODA POLITICAL AFFAIRS AND IS RECORDED AS EXHIBIT C. MR. SERJEANT BALLANTINE WITHDRAWING HIS OBJECTION.

The word "bungalow" in this letter means the Residency. The Eshwunt Rao therein mentioned is a *jasus* of the Maharaja.

THE LETTER B IS ADMITTED IN EVIDENCE AND IS RECORDED AS EXHIBIT B.

The Esra Naik alluded to herein (*i. e.*, in the letter B) is Eshwant Rao, the *jasus*. My wife came back from Poona in August; I don't remember what day. After that return she paid another visit to the Maharaja in the month of Ramzan, about the 15th or 18th of that month. On that occasion I went to fetch the gari for her. A boy named Chotu went with her. My wife told me what passed on the following morning. The Maharaja said, "Was any reference made to the son that was born?" She said that she knew nothing about it. She said that she was asked to talk over the Madam Saheb in favour of the Maharaja. She also said that the Maharaja enquired if anything could be given to these people to bring about a union between the hearts of the Maharaja and the Saheb. She replied "that nothing should be given to the Saheb to eat, and if you do anything of the kind, it will be bad for you." She said that she told the Maharaja to do nothing of the kind. My wife got Rupees 50 after this third visit. She said that Salam brought it. She also told me that I also should be employed. She did not tell me who would employ me, or what employment it would be. Nobody but my wife spoke to me of this employment.

BARODA,
25th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

CROSS-EXAMINED BY SERGEANT BALLANTINE:—I have been married to my present wife ten or eleven years. We have been in the habit of writing letters to each other. We did so if we had any news regarding our house, and also on other matters of interest. My wife wrote, if necessary, on matters of importance. Besides the one letter from my wife shown, perhaps there may be others from here among the papers. In June and July of 1873 I and my wife lived together. In November and December we were not together. I was at Bombay; she was at Baroda. In June of 1874 I went to Mahabaleshwar for a few days. When I went, she was in Bombay. My wife was about six or seven months in Colonel Phayre's service as ayah. People mentioned the fact of poison

being put into Colonel Phayre's glass at the time it took place. I knew nothing about it. I do not know whose duty it was to give sherbet to Colonel Phayre. I remember being examined by Mr. Boevey.

IT IS AGREED THAT THE 13TH NOVEMBER WAS THE DATE OF MR. BOEVEY EXAMINING THIS WITNESS.

I did not mention to Mr. Boevey anything that my wife told me. When Mr. Souter sent for me and examined me, I did so. I had not told Mr. Boevey because I was afraid. I don't know who did it. How could I mention it? I did not mention what my wife told me about something to turn Colonel Phayre's heart because I was afraid. It was because the Saheb's orders were not to go to the Maharaja. I don't mean orders to me, not being in his service. My wife told me she had such orders about not going to the Maharaja. She told me so often. I don't remember when Mr. Souter sent for me when I was at Mr. Boevey's. That lad who is in my service said a gari had been hired and they had gone. When I was taken to the Saheb, the boy came there. The boy was at Mr. Souter's. The boy and the gariwala were there, and the Khan Saheb, Akbar Ali and Abdul Ali. I did not see them there when I arrived at Mr. Souter's. Khan Saheb was there then. Both Akbar Ali and Abdul Ali were there when I went, also Rao Saheb and nobody else. I was first asked, "Did I know about this, or what?" I was first asked if I knew anything in regard to the affairs in that quarter. At that time I said, "I knew nothing." The Saheb said, "Tell the truth." The cartman and Chotu were not there at that time; Mr. Souter was there then,—four persons. There were three persons, Rao Saheb, Khan Saheb, and the younger Khan Saheb, and also Mr. Souter. When I was first questioned, Mr. Souter was there. The Saheb said, "Tell the truth; don't tell a lie." In the meantime the boy and the gari-driver were brought there. The Havildar brought them, I did order the gari.

Q.—Did Mr. Souter say the cartman and boy had said that you ordered the cart? A.—Mr. Souter did not say that, but the boy and the cartman did say that. When I was examined first I was kept under guard for three or four days and was afterwards released, and since then I have lived with my wife. I was present the day my wife was examined and was not with her that night and next day. Since she was examined, we have been kept apart. Nobody told me what she said.

Q.—In one of your letters you say Eshwant Rao has gone and Shabudin will go to Bombay? A.—Shabudin lives in the city. He has some employment under the Gaekwar. He was Sir Subha. He is a native of my own country. I am not aware that he holds the same place under Sir Lewis Pelly.

RE-EXAMINED BY MR. SCOBLE.—I made my statement to Mr. Souter at the Residency in a room on the west side on the ground-floor. My wife was at that time unwell at Mr. Boevey's house. She was not then under a guard. She had been taken to the hospital; she was at the house of Mr. Boevey the day I was taken and examined by Mr. Souter. On the first day I was questioned a little, and not on other days. I was not then put in Chowki when those questions were put; I was with the Khan Saheb. I did not have communication with my wife in those days. I did not go to her when she was in hospital. I went to her when I was released. She was in hospital when I was released, and I visited her there. She had been then in the hospital for about five days. When I first went there to see her, I saw her and talked to her.

IT IS AGREED THAT THE AYAH'S FIRST STATEMENT IS DATED THE 19TH DECEMBER 1874.

BARODA,
February 26th, 1875.

(Sd.) JOHN JARDINE,
Secretary.

No. X.—SYED ABDUL RAHMON STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF.

BY MR. INVERARITY:—Syed Abdul Rahmon is my name. I am also called Rahim Saheb. I know the ayah Amina for a short time. I am a first class peon in the Bombay Post Office. I live in Bombay, and carry on my calling there. The ayah is not of my country: her husband is a neighbour of mine. I first knew her six years ago. Last year I saw her in Bombay. The woman in Court is the ayah in question. She said she came to Bombay to see her Madam Saheb off to England. The ayah, I think, asked me to write a letter,—more than one I believe, though not certain. I wrote this letter by the ayah's directions.*

Amina witness No. 1 called and identified.

The second letter† shewn me I wrote by the ayah's directions.

Besides these letters which I did not remember, I wrote another letter for the ayah which I do remember. It was addessed to Sheikh Abdula, butler. It was written under the ayah's directions. I don't remember the details, but I do remember the fact of writing it. In the third letter there was a note written in the Maharaja's name. I think it was Mulhar Rao Gaekwar. I mean it was addressed to him.

* Letter marked A. is shown to witness.

† Another letter shown and tendered in evidence. It is marked D. Its date is 29th March 1874.

CROSS-EXAMINED BY MR. BRANSON:—I understand a little English. I can understand it, but cannot speak well. I live in Bombay in Khetwadi. I lived in my last house there for three or four years. The ayah lived in the same house in a room adjoining mine. I know Akbar Ali and his son Abdul Ali. They belong to the Bombay Police. Before coming here I did not see them, being busy. They first sent for me in this case. They came to the Kalkadevi Post Office to see me first. I first came here on the 6th January last, and on the 7th Mr. Souter examined me. Akbar Ali and Abdul Ali came to see me in Bombay, but I did not see them. I saw a Police Subhedar named Ahmed Ali. I don't know if he is a relation of Akbar Ali. Ahmed Ali did not tell me I was said to have written a letter to the Maharaja. Because in all my life I only wrote one letter to the Maharaja. First of all these persons enquired about me. I mean the detectives. I was at office, not at home. Mr. Edginton wrote a letter to the Post Office. Ahmed Ali took me to the Police. He said nothing to me but Khan Bahadur enquired of me; but I was not found. Khan Bahadur asked me questions at Bombay. He and I were present: nobody else. When I went to the Khan Bahadur's house there were one or two others. Khan Bahadur did not ask me if I wrote to the Gaekwar. He asked if I wrote any letter for the ayah Amina. He asked to whom I wrote. I said she caused the letter to be addressed to her husband, a butler. I don't remember if Khan Bahadur wrote down my statement. I don't remember the month in which I wrote a letter enclosing another. It was very likely last year. It was written before both the two letters I have identified. I don't know how long before, not quite a month before. I don't recollect if it was before the Holi. I know the Bakri Eed. I don't remember last year's Bakri Eed. Nor whether I wrote it before or after Bakri Eed. I cannot mention the season of the year. I know the Shab-i-barâr. I cannot say if I wrote it before or after the Shab-i-barâr. I cannot say that it was after the Shab-i-barâr. The ayah came to my house, to my room to cause the letter to be written. People who lived there used to come and go there. Mussalmans used to come there to smoke and drink water. Probably people were present at the time of writing. First the letter was caused to be written to the husband. When I was writing the letter to the Maharaja, people may have been present part of the time. There was no privacy in my

room. The ayah did not discuss state secrets, but dictated to this effect; "You will greatly oblige me if you will send money for my expenses. There was a dinner at the Governor's, where I made some enquiries: be not apprehensive." There was nothing else in it.

RE-EXAMINED BY MR. SCOBLE:—This letter enclosing that to the Maharaja was written during the same visit of the ayah to Bombay in which the other two letters were written. I have served the Post Office for more than three years. My pay is rupees twenty-eight a month.

BARODA,
26*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XI.—AMINA RECALLED.

BY MR. SCOBLE:—I used to know the last witness Syed Abdul Rahimen, and lived in the same house with him in Bombay. I got him to write certain letters for me. Speaking from memory, I think he wrote three letters: of which two were addressed to Baroda. The third was addressed to Mahabaleshwar. The time was when I went to Bombay in company with Mrs. Phayre last year.

The witness Syed Abdul Rahmon reads the letter D., checked by interpreter.

The letter read to me (D.) was written by my direction. I sent salaams to Kazee, Salam, and Eshwant Rao. The Kazee Saheb used to visit a Reverend *padri* gentleman at the Residency, and come to my room to drink water. He comes from Chandor in the Deccan. Salam was a sowar who used to come with the Maharaja. I described him the other day as a jasus.

Eshwant Rao was a Maharaja's jasus or naik. The letter alluded to in this letter as sent with a ticket was written by Syed Abdula Rahim Saheb. The chitti enclosed in it was written to Salam to be delivered to the Maharaja. (Witness explains.) I wrote it because Salam told me to do so. It was intended for the Maharaja. The letter just read out to me (A) was written by my directions. The statement in it about Salam meeting me in Bombay refers to the same Salam before described. He did not come to see me. I met him at Eshwant Rao's house. I don't know his house. As I was going to Bhau Daji's I met Eshwant Rao and went with him to eat pan-sopari. At Eshwant Rao's residence I met Salam. The Raj-durbari matter referred to in the letter is this: I asked Salam when will you give me the reward? He said he had not got it. It, being a State affair, must be done leisurely. It is true that Eshwant Rao spoke to me in Bombay as stated in the letter and quoted. It is true that I invited Salam and paid him attentions in Bombay, giving him tea and pan-sopari. As to the passage "I have sent a letter there, I will come on the 20th," I say that I referred to my going to Nowsari; to Mr. Boevey's service. I remember receiving at Poona the letter (B) read over to me. At that time I was at Poona.

Syed Abdul Rahmon reads out letter A.

The Interpreter reads out letter B.

The letter marked C is now read out to witness.

I received this letter (C) from my husband when I was at Poona.

CROSS-EXAMINED BY MR. BRANSON:—Since my last examination I have been with Khan Bahadur, and have seen him and his son. I have not seen Rao Saheb Gajanand Vithal. I remember Mr. Inverarity examining me.

RE-EXAMINED BY MR. SCOBLE:—I have not conversed with them.

BARODA,
26*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XII.—SHEIKH ABDULLA RECALLED.

BY THE PRESIDENT:—I received a letter with a chitti enclosed in it for the Maharaja. When I was about to go to Mahabaleshwar, I gave that note, together with the other letters, to my wife. I had kept the enclosed note for, I think, three or four days. When I received it, I was at Baroda in service of Major Blakeney. I mean that I gave it to my wife three or four days after I received it. It came from Bombay. When I gave it to my wife, I was at Bombay. I took it from Baroda to Bombay, and gave it to her at Bombay, when I was on my way to Mahabaleshwar. The reason was that I had no time here and did not meet that man. I mean Salam. I gave the enclosure to my wife.

BARODA,
26*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XIII.—PEDRO DE SOUZA STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Pedro de Souza. I was in the service of Colonel Phayre when he came as Resident to Baroda, and remained in his service till November last. Colonel Phayre came to Baroda as Resident about March 1873. Between then and last November I remained in Baroda, but went to Nowsari, and on one month's leave to Goa. I know the Gaekwar's Sowar Salam. He used to come twice a week to the Residency. He used to say, "If you come to the Maharaj, it will be well. A gari will be sent for you." I told him, "I wont come." I received money. I was about to go to Goa. I told Salam, "I am about to go to Goa." I asked him to give me some money for expenses of my journey, and he brought me a sum of money. I have told the particulars in my deposition. I said to him, "I am about to go to my country, ask the Maharaja to give me some money for journey expenses." He did so. Salam often sent for me and he told me money was got from there (*udhar-se*). Salam brought me the money about 10 or 12 days after the asking. He brought me 60 Baroda Rupees, equal to 50 Bombay Rupees. He brought them to me to my room at the Residency. He said the Sirkar has given this money for expenses of the journey. The Sirkar was the Maharaja. I accepted the 60 Rupees. I was a household servant, butler, head servant in the house. I used to wait at table; altogether I had been 26 years in Colonel Phayre's service, of which I had been 15 or 16 years butler.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—My deposition was taken at Bombay before Mr. Edginton. I told him all I knew. Salam alone asked me to go to the Gaekwar. Ever since I came to Baroda he used to come twice a week to the Residency with the Maharaja. He told me it would be well for me to go to the Maharaja. He did not say why. I was very busy. I never went to the Maharaja. When I deposed to Mr. Edginton, I was in my master's service. I came to Baroda a month and ten days ago. I am with the Khan Saheb in the tent. I knew Raoji bin Rama at the bungalow since he came to serve at the bungalow. He had not come when I came there. I was on speaking terms with him, not in particular friendship. Raoji never told me to go to see the Maharaja. I did not promise to go there. I did not say anything to Raoji, except about the payment of sixty rupees which I had received. I did not arrange with him to go and see the Maharaja. I never went to the Maharaja. Therefore I could not see Eshwant Rao at the palace, as I never went there. Eshwant Rao never conducted me to the Maharaja. The Gaekwar never spoke to me in presence of Raoji. I never went to the Maharaja's Palace. I never had any conversation with the Maharaja. If Raoji says I

went with him to the Palace, it is false. If Raoji says that he and I went on two other occasions to the Palace, it is not true. I never went. I did go to Goa on one month's leave. On my return from Goa I did not go with Raoji to the Palace to see the Maharaja. I was never given a packet from the Maharaja, as I never went to him.

Q.—Did Mr. Edginton put any of these questions to you? A.—What he put and what I answered are written down. In answer to him I told him as I tell today that I did not go to the Maharaja. I don't know Akbar Ali. I know Khan Bahadur. First, I made a statement to Khan Bahadur, according as is put in my deposition. Khan Bahadur asked me if I had gone to the Maharaja. I said I had not gone to him. I was told to tell the truth: to tell everything that was true. I was not told that it would be worse if I did not. Nobody told me that Raoji had said anything about me. I don't know that Raoji has said anything about me.

MR. SCOBLE SAYS IT IS AGREED THAT MR. EDGINTON TOOK THE STATEMENT OF THIS WITNESS ON THE 5TH JANUARY 1875.

The Secretary then read a deposition by Pedro de Souza taken by Mr. Edginton, Deputy Commissioner of Police, Bombay, dated the 5th January 1875, *which was put in by Mr. Scoble and which was recorded as E.*

BARODA,
26*th February* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

NO. XIV.—COLONEL PHAYRE STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Robert Phayre, Colonel in the Bombay [illegible] Companion of the Bath, and Aide-de-Camp to the Queen. I arrived at Baroda first on the 18th March 1873. I arrived as Political Resident. The Baroda Commission commenced its sitting at the beginning of November 1873, and discontinued till about the 24th December 1873. In March 1874 Mrs. Phayre left Baroda and went to England. I went with her to Bombay, and the ayah came in attendance. I returned to Baroda after three or four days. The ayah did not return: she had leave to go home for a month: we left her behind in Bombay. When in Bombay on that occasion, we were staying with General Gell. I don't recollect whether I and Mrs. Phayre went on that occasion to Government House. I left Baroda for Nowsari on the 2nd April with His Highness the Gaekwar. I now recollect I did go to Government House with Mrs. Phayre in March, and had tiffin. Mr. Boevey did not accompany me to Nowsari. He was in the district on boundary duty, and had been there some time. He joined me afterwards at Nowsari. His camp was at Nowsari. I remained at Nowsari till the 16th May 1874. I returned to Baroda on the 16th May. I came ahead to prepare for the Gaekwar's reception, and His Highness came a day or two afterwards; I remained at Baroda from that time, until relieved by Sir Lewis Pelly, with the exception of short absences on duty. The Gaekwar also remained at Baroda from May until I left. His Highness used to visit me officially at the Residency twice in every week—on Mondays and Thursdays—on which occasions, after the Commission, he was often accompanied by Bapubhai and Govindrao Nana, and after our return from Nowsari His Highness often came alone. These two sometimes came together, sometimes singly. He always came with an escort of outriders and sowars. I knew by sight those who always attended His Highness. Whenever Eshwantrao Jasud was present in Baroda, he always came with His Highness. Another habitual attendant was Madhaorao Kale, and the third was the Arab sowar Salam. There was also a son of Eshwant Rao. I always noticed these people in attendance on him wherever he went—at Nowsari as well as at Baroda. My private office was in a detached building, on the west side of

the main Residency building. It is connected with the main house by a covered verandah. In the detached building there is an ante-room in which native assistants used to sit, my private office, and a bath-room which I was in the habit of using. The ante-room is separated by a dwarf wall and two or three steps, descending from the connecting verandah leading to the main building. A man standing in the verandah can easily see at once into the ante-room, and also into my office if the door be open. The peons used to sit on a bench in the verandah at a right angle to the dwarf wall dividing the verandah from the ante-room. The peons usually in attendance were Raoji Havildar and Jemadar Narsu. They never attended anywhere else. Their post was on the bench described. Karim was there always in attendance on Mr. Boevey. It was Govind Balu Hamal's duty to look after my office room. The Hamal swept it; other people swept it, but it was his duty to attend my office room. I dressed in the room adjoining the private office. I rise early and go out to ride or walk every morning, and on return from that it was my habit to take a glass of sherbet prepared from pumaloes. Usually it was Abdulla who prepared it. It was the duty of one of the house-servants. Abdulla is also a chobdar. It was generally placed on the washhand stand in my private office. The wash-stand was in the far corner to the right front as you went in, so that a person looking from the verandah through the ante-room into the office could see it when the door was open. Before the 9th November last I had been ailing one way or other from about the middle of September. I remember particularly that about the Ganpati festival I suffered as if I had a bad cold in my head, and I had a bad boil on my forehead at that time. I did not get rid of the boil for about three weeks. Dr. Seward, Residency Surgeon, attended me and used to dress the boil every morning. The plaster used was some of it on the dressing-table, some on a side table in my private office, and, I think, I shifted some on to a little clock-stand above the dressing-table. I had a slight fever at one time; I frequently had this feeling of fullness in the head, and my eyes watered at one time. I used to sleep out at night, and thought perhaps I might have got malarious fever. Also I began to wonder whether the pumalo sherbet was made with proper pumalo. This must have begun about the end of September or beginning of October. I remember Govind Rao Rore. I went to an adoption ceremony on the 6th November. We arrived there about five of the afternoon. On the morning of that day, the 6th November, I did not drink the whole of my sherbet. I took a sip or two and threw the rest away. On that day, the 6th, I did not feel at all well. I was writing a good deal with Mr. Boevey that day. About mid-day I felt dull, stupid and sleepy with feeling of fullness about the head, such as I had previously experienced. When Mr. Boevey went to tiffin, I got into an arm-chair and slept a half or three-quarters of an hour. That is unusual with me, unless I am very tired. Next day, the 7th, I came in and took a little of my sherbet. I felt the same symptoms, but worse than the previous day—fullness in the head, unfit for work. I did not call in Dr. Seward on either of those days. He had spoken to me about not looking well, and I said it might be fever. On the Monday I was always earlier, and had got off about 6 A.M. I returned about five minutes to seven. As I was coming up the walk, the approach to the Residency from westward, Raoji came along the verandah to meet me, and made two or three low salaams, an unusual thing, as generally at that early hour nobody is present. I saw no one else about till I got to my office room. Raoji came out and went back. There was no one in my office room. I came from the walk right into the ante-room through the door from the compound without going through the verandah at all. When I went into the office room the pumalo sherbet was there on the right hand side of me as I approached the washhand stand, as near as I can recollect close to the basin. It was in a position to be visible from the verandah if the door were open. I would also be in a position to be visible as I approached the glass. I went up to the washhand stand, took the tumbler of sherbet in my hand, and took two or three sips. I placed it again on the washhand stand, and then went to the writing table to write a letter which I wished to despatch by the mail

that morning. I wrote for about twenty minutes or half an hour, and then felt a sudden squeamishness as if I were about to be sick. The thought occurred to me at once that it must be the sherbet which was always disagreeing with me. I got up, took the tumbler from the washhand stand and tried to pitch all the contents through the window. The window opens on a chunamed verandah—rather a wide verandah,—and then comes the compound. As I was replacing the tumbler on the washhand stand, I saw a dark sediment collected at the bottom, and part of it pouring down the side of the tumbler. I held up the tumbler and looked at it, and the thought occurred, at once to my mind that it was poison. From that moment to my mind all my previous illness and sensations were accounted for. I put the tumbler down again and went to the table and wrote a note to Dr. Seward. The time was then about half-past seven or 25 minutes to 8. I called, but I don't remember into whose hands I gave it. I told whoever came to take it to the Doctor Saheb. Until Dr. Seward's arrival I sat waiting for him: my feelings were sickness, dizziness in the head as if it were going round a little, not much. Dr. Seward came in about between $\frac{1}{2}$ hour and $\frac{3}{4}$ hour. On his coming, I made over to him the tumbler and remains of the sherbet with request that he would analyse and report to me about it. I described my symptoms to Dr. Seward. He may have remained with me ten minutes, and he took the tumbler away with him. I told him to conceal it, as I did not know what it was. After Dr. Seward had gone, I dressed so as to be ready for the Maharaja, as this was the day of his visit. I think the Maharaja came about half-past nine, his usual hour. Between giving the tumbler to Dr. Seward and the Maharaja's arrival I had received no communication from Dr. Seward, nor did I mention my suspicions of poison to anybody but Dr. Seward. When the Maharaja came, I went out to receive him as usual, led him into the drawing-room and sat down. I asked His Highness after his health. He said he had not been very well; that there was a good deal of fever about; and that he thought he must have eaten too many sweetmeats usual at Diwali. He mentioned also that he had had slight headache and pain in his stomach, but was better now. The interview was not a long one, and when I got into the verandah, to escort him into his carriage, there was Eshwant Rao with Diwali sweetmeats, the usual tray. His Highness pointed out to me the particular kind of sweetmeats which he thought had disagreed with him. I then took leave of His Highness and went back into my room. After breakfast I wrote to Dr. Seward.

By the President:—After His Highness had left, I went to breakfast about 10 o'clock, and after breakfast wrote to Dr. Seward.

Baroda, 26*th February* 1875.

(Sd.) John Jardine,
Secy. to the Commissioners.

By Mr. Scoble:—After the visit of the Maharaja I mentioned my symptoms to Mr. Boevey before Dr. Seward came to see me. I saw Dr. Seward again that day when he returned between 11 and 12 o'clock. But I wrote him a letter in the meantime. The letter shown me is the one I wrote. I saw Dr. Seward again half an hour or $\frac{3}{4}$ after writing this letter; between 11 and 12 o'clock. But Dr. Seward had not seen the letter when he came to me. Dr. Seward, when he came at 11 or 12, stated what appeared to him to be the contents of what I sent. He told me that he had detected arsenic in the tumbler, more than sufficient to have killed me had I taken it all. After getting this information I gave orders to ascertain what people came into my room that morning, and I commenced enquiry among the servants at the Residency. I telegraphed to Government at once that an attempt to poison me had been made. The paper shown me is the original draft telegram in my writing to the Private Secretary. I despatched this after Dr. Seward had told me of his opinion about

Letter handed to witness. It is dated 9th November. It is read in Court, and recorded as F.

Draft telegram read and recorded as G.

1 or 2 o'clock. I kept the enquiry quite secret. The servants knew about it. I did not allow any outsiders to know. Every one in the Residency knew about it. I know I arrested Raoji Havildar. On the 9th I placed in confinement Raoji Havildar and Govind Balu Hamal, Yellappa Hamal, and Lakshman Peon. It must have been at evening these four were placed in arrest. The other servants remained at large. On the 9th it was known in Camp that an attempt to poison me had been made. I directed that the rest of the sherbet sent to Dr. Seward should be sent to the Government Analyser. I continued enquiring as to who put in the poison. I did so for several days. We did it steadily the first four days, *i. e.*, from the 9th till the 12th. Mr. Boevey and I made it. After my interview with the Maharaja on the 9th, I next saw him again on Thursday the 12th, when he came to call as usual. He was then accompanied by his Minister Dadabhai Nauroji. As a rule, he was not usually accompanied by his Minister. On the 12th His Highness remarked that he had heard a report that an attempt had been made to poison me. I understood him to say that he only heard it the previous day, *i. e.*, the 11th; and that he had resolved to speak to me about it this morning. He then remarked that he had expected me to speak about it on the previous Monday, but I had not done so. I said I had not mentioned it, and I then described to him what had taken place. Mr. Dadabhai Nauroji said he had first heard the report on the 10th, but did not believe it; but that on hearing it repeated on the 11th with greater force, he did believe that an attempt had been made. I remember the Maharaja expressing his surprise that I did not take an emetic when Dr. Seward recommended it to me. Nothing further passed that I remember. I think on that day Dadabhai asked if I was making enquiry, and I said "yes," and he said "I hope you will be successful in finding out the person who made the attempt." I afterwards received a *yad* from the Durbar in relation to the matter, *i. e.*, three or four days after—at least on the Saturday night following. I believe the document shown me is the *yad*. The endorsement of receipt on it is my native clerk's. I threw the remainder of the contents of the tumbler out on to the chunam. Afterwards, at the suggestion of Dr. Gray, I scraped it up. I think the suggestion may have been made through Dr. Seward. In consequence of this, I myself went and scraped up as much as I possibly could and sent it to Dr. Gray. Others were with me. So far as I re-collect, I made up the packet myself. It was scraped up by a puttewala in my presence. I sent the matter so scraped up to Dr. Gray with the letter shown me which fixes the date. Either I or my native assistant sealed up the packet; it was done in my office. The letter received in answer from Dr. Gray is that now shown me. The crest of a bird alluded to is mine, and the seal would be mine. I think I made a statement in writing on the 16th November. It is that now shown me. In September I had a boil on my head, to which some collodium was applied. I put it on by a lint plaster from ignorance. The effect was that it stuck so hard on the boil that I thought I had done wrong. Getting some hot water, after considerable time I got it off. I then told Dr. Seward about it. When I was taking it off, I was standing by the table where the collodium was near the washing-table. It was in the morning about 8 or 9 o'clock when I was dressing. Servants and peons were standing outside.

Document shown of 14th December 1874, and recorded as H.

Letter of 13th November 1874, from Dr. Gray to Dr. Seward shown.

Letter of 16th November 1874, from Colonel Phayre to Dr. Gray, read, and recorded as I.

Letter shown, dated 19th November 1874, from Dr. Gray to Colonel Phayre, read and recorded as J.

Statement recorded as K.

Cross-examined by Serjeant Ballantine:—On March 18th I came to Baroda in 1873 to take up my appointment. I had just come from Pahlanpur where I held an appointment. It is in Northern Gujerat. I was Political Superintendent there. I held that six weeks I think. I have held many appointments. Previous to that I was Political Superintendent in Upper Sind and Commandant-in-Chief, Frontier Brigade. I quitted that to go home on leave at the end of 1872. I did not return to it. My appointment was not cancelled. It was

under the Bombay Government. I don't know whether or not I have the document terminating my appointment. I have the Government Resolution exonerating me in the whole matter. I have documents, but will not say whether it was a removal or not. I am not aware whether the Gaekwar or his Minister had copy of that document. It was a Government document; he could not have honestly come by it. I never heard that the Gaekwar was in possession or that his Minister shewed it to Sir Lewis Pelly.

MR. SCOBLE OBJECTS THAT COLONEL PHAYRE'S CONDUCT IN UPPER SIND IS NOT BEFORE THE COMMISSION. SERJEANT BALLANTINE EXPLAINS; THE PRESIDENT RULES THAT IT IS ADMISSIBLE TO SHOW WHAT THE GAEKWAR KNEW.

I could not say whether the paper shown me is a correct copy, as it is marked "private." I do not believe it is a copy substantially correct. I don't recognise it at all. If I saw the Government Resolution and my reply, I should know. I am willing to tell everything. I advised prosecution of certain persons for gross faults. I cannot use any Government paper without sanction of Government, I have one Resolution of the 6th May, and the final Resolution of Government. I can get them from Bombay. In November 1873, a Commission began its sittings at Baroda, to enquire into certain charges of mal-administration by the Gaekwar. General Meade was President thereof. It ended the 24th December 1873, and subsequently an elaborate report appeared. On the 7th May the Gaekwar married. A kharita was written complaining of my want of respect.

The real cause was that the Government directed me not to go to the marriage; it was not personal, but connected with my official position. The Gaekwar continued to visit me privately all the same. Kharitas all went through my hands. One went to the Government of India about the 17th May from the Gaekwar. I know of an answering kharita of 25th July, from the Viceroy to the Gaekwar. Its effect was to give the Gaekwar an opportunity of reformation till the end of 1875,—progress being reported by me to Government when I thought necessary. There had been no question between me and the Gaekwar about appointment of Dadabhai Nauroji. He asked my opinion about it, which was adverse, but I said that according to the Viceroy's orders His Highness was to judge for himself exclusively. This was the Governor General's order to the Gaekwar. The Gaekwar appointed Dadabhai who continued to act. He had been Minister for nine or ten months before. From about the 10th or 12th August 1874 my communications commenced with Dadabhai as Minister. Before that Dadabhai had carried on the administration himself. We met daily and discussed matters. I made complaints to the Gaekwar, who summoned Dadabhai. A kharita, dated 2nd November 1874, went from the Gaekwar to the Viceroy. I sent in a progress report the same day.

SERJEANT BALLANTINE READS A KHARITA TRANSLATION FROM VICEROY DATED 25TH NOVEMBER 1874. RECORDED AS NO. 2.

Read a kharita dated 2nd November 1874 from the Gaekwar to Viceroy; recorded as No. 1. It is a translation.

The kharita of the Viceroy in reply did not come through my hands. A child was born; the marriage took place on 7th May, and the birth occurred on the 16th October 1874. In September and October I suffered from a boil in my head, for which Dr. Seward attended me. From the commencement he supplied and applied the plaster. About that time it was I had slight fever and fulness of the head and watering of the eyes: these symptoms commenced before and continued after the plaster. At that time I began to wonder if the sherbet was made with proper pumalo. I used generally to drink the whole of it. Sometimes I threw it away. I said once to Abdulla why he had not made it: he brought two pumaloes and said the reason was that the pumaloes were bad; at that time I did not investigate about the pumalo juice. I did not say that I noticed a peculiar taste on the 6th November. I took a sip or two that day. After that I did not feel well, heavy in the head, like I was in September and October. On the 7th November I did not drink the whole of the sherbet. On the 8th November it was Sunday and I did not drink as I had not been well on Saturday; on the 9th I threw much of the contents out of the window. What was left in the tumbler was

not sherbet, but a dark substance. I saw some dark substance at the bottom of the tumbler and a little liquid pouring down the side of the tumbler—a very small portion. After depositing itself, this liquid covered the bottom of the tumbler; there was enough at the bottom of the glass for two tea-spoonfuls, or perhaps a tea-spoonful and a half. Dr. Seward saw the whole of it. I never touched it. What I saw was not pumalo juice,—but of another colour, quite different from pumalo juice. Pumalo juice is red.

SERJEANT BALLANTINE READS FROM LETTER.—I received private information from people who generally gave me information that what was administered to me was arsenic, finely powdered diamond-dust, and copper. I could scarcely go out without being met by many petitioners everywhere. Many people used to come and give information. I did not pay for it. These people had never received money from me, nor do I know they had ever received money; I believed they had not. I cannot with reference to the words "Secret and confidential information" mention the exact person who told me of copper having been administered. I could mention several among whom the person was.

Letter dated 13th November 1874 from Colonel Phayre to Chemical Analyser, read and recorded as No. 3.

Q.—What do you mean by "the importance of verifying this information is obvious?" A.—Of course it was to know if it was diamond dust or not. I can give a list of my informants, and if the Court desires, I would try to find out who it was. I did not see the necessity of recording my informant's name or noting down his evidence. I wanted that of the proper man—the Chemical Analyser. It was secret and confidential, and I did not know that it was right. I know Poonekar. It was either Bhau Poonekar or another man, perhaps. I will enquire. I don't know whether it was Bhau Poonekar or not. There is another man Balwant Rao Munshi. It was I believe one or other of those two; but I am not sure. I gave Bhau Poonekar's name as an honourable person who gave me much information in the cause of reform. He is honourable and reliable. He was not adverse to the Gaekwar in representing grievances of the people. In cases in which he believed it to be adverse to the Gaekwar, it was and it was found to be. But he was not always adverse; nor was he adverse as a general rule. He gave information regarding many of the cases before the Commission, but not all of them. Sadak Ali's case was not one of them: he made it himself. Sadak Ali's case came to me first from Government to report upon. Bhau Poonekar did not get it up or manage it before the Commission. It was begun long before. I have no doubt he gave Sadak Ali a little assistance. What I was told about copper by my informant was that the ingredients put in my glass were arsenic, diamond dust, and copper. That was what we call "kutchi khubber" (imperfect information.) I did not enquire into it at all, it being kutchi khubber. It depends where it comes from whether it is secret and confidential information. I sent it to the Doctor to verify it. I said to Dr. Seward that after drinking the sherbet there was a coppery taste in my mouth, which I had not had before. I did not taste it in the liquid, but a considerable time after drinking it. I said to Dr. Seward, when he asked my symptoms, that I had a coppery taste and tendency to salivation. This was about three-quarters of an hour after drinking. I may have smoked a cigar in the interval. It was not in consequence of the taste, but of the effects I felt, that half an hour after I threw away the contents of the tumbler. I did not throw them away till twenty minutes or half an hour. I allude to the 9th. It was the feeling I had twenty minutes after which induced me to throw away the liquid. On the 6th and 7th I had no taste. I can't account for my not continuing drinking it on the 6th and 7th, except the mercy of God preventing me. There was no human reason for this. I sipped it and left it, as if I did not want it. I had no reason for throwing it away. On the 7th I had been unwell after drinking on the 6th, and that may have prevented me. On the 6th I simply took it up, and threw it away. On the 7th I had been unwell the day before; it was not the taste of the sherbet, but the effects upon my health. Raoji Havildar was among the persons I examined. Among other things he said: "I suspect Faizu, because he has for a long time past engaged in all kinds of intrigues, in the time of Colonel Barr and Colonel

Shortt. In Colonel Shortt's time he used to go with Colonel Shortt's butler to Raholkar's, Nana Saheb and others." Bhau Poonekar had access to the Residency and to my private office. Not in my absence, never; but in my presence. Many others also had access to it. I never found Bhau Poonekar in my office when I came back, in my private office. I may often have got up in my room during the day and found him when I came back. I never found him when I came back in the morning. I never found him that I know of in my private office when I had not left him there. Certainly it was never his custom to come, when I was out, into my private office and wait there. He may have gone to the ante-room and sat with my clerks. I did hear from Bhow Poonekar that the kharita of 25th November was to be sent from the Darbar. It may have been the next day. It may have been either the day or the day before, as far as I remember. I don't know how Bhau Poonekar knew. He mentioned that a letter, or answer to the Governor General, was under preparation. He did not tell me how he knew, nor did I ask him. He did not tell me the nature of it. He merely said a letter was under preparation to the Governor General. I don't know whether complaining of me. I swear positively I did not know the contents of that Kharita. I did not learn the general contents, nor whether it complained against me. I formed an idea it was such a thing. Bhau Poonekar was an agent of one of the nobles of the State named Meer Ibrahim Ali. He came to the Residency on business often, and when I first knew him, on business connected with a ward of Government, Meer Zulfikar Ali. It did not occur to me to ask him how he got this information. After the attempt to poison, Bhau Poonekar was at the Residency that day. I remember him after breakfast. At that time I did not tell him about the circumstance. I am sure I told nobody till after seeing Dr. Seward. I don't remember when I told Bhau Poonekar. I think it was the 12th or 13th I was told about the copper. I have lately seen Bhau Poonekar. I saw him since I left this Court. I asked him if it was he who told me about diamond dust and copper. He said it was he.

RE-EXAMINED BY MR. SCOBLE:—The kharita was written complaining of want of respect. With reference to the Gaekwar's marriage at Nowsari. I acted according to directions of Government, and my action was entirely approved by Government. I communicated to the Gaekwar the orders of Government respecting the Nowsari marriage. The paper shown me of the 29th June is the draft of the *yad* I communicated. The approval was from the Government of India. The Gaekwar, not himself personally at first, but through his Karbharies, asked my opinion of the appointment of Mr. Dadabhai. On the 27th August 1874 I addressed a *yad* on the subject to the Gaekwar. I did thence forward give Mr. Dadabhai all assistance in the discharge of his duties. He never complained to me that I did not assist him. More than once he acknowledged the assistance given by me to him in the Sirdars' cases. The persons who were in the habit of giving me information were not employed by me, but came voluntarily. I never paid, nor authorised payment, for information so given. In kharita of 2nd November there are two charges, *viz.*, about Chanderao Sirdar and some Sindhi cultitvators. These charges are not correctly stated. I had talk with the Gaekwar about kharita of the 2nd November. All kharitas are sent through me and copy given me for my information. I had this talk the first day he came after I received it, *viz.*, on Thursday the 5th November. I mentioned to him about the kharita, and mentioned my extreme regret that such a kharita had been sent. The purport of the conversation was that the allegations made were not correct. The Gaekwar said it was Mr. Dadabhai who had written it and was responsible for it. I then explained to His Highness that the object of his being allowed to select his own Minister was to make the Gaekwar responsible for what was sent to the Viceroy or the Bombay Government. From the time, on the 9th November, when I sipped the tumbler till the time I threw the contents away, nobody had any access to the tumbler. Till I handed over the

Mr. Scoble reads English translation of *yad* of the 27th August 1874, which English paper is recorded as L.

tumbler to Dr. Seward nobody came into the room. I was there myself. The colour of the sherbet that morning did not attract my attention. The upper part of the sherbet was as clear as possible. The sherbet is nothing but the expressed juice of the pumalo without any water.

BY SERJEANT BALLANTINE:—I communicated with the Viceroy about the kharita of the 2nd November—I mean to the Bombay Government, to whom I forwarded as usual my explanation with the kharita.

BARODA,
27*th February* 1875.

Secy. to the Commissioners.

No. XV.—GEORGE EDWIN SEWARD STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—I am George Edwin Seward, Surgeon-Major, Bombay Army, Baroda Residency Surgeon and Cantonment Magistrate at Baroda. In September, October, and November 1874 I was at Baroda. Colonel Phayre was under my medical attendance in September and October. I saw him regularly when he was suffering from a boil, but not otherwise. This was either in September or October. I can be sure by looking at notes of a prescription not here with me. I think it was in September. I prescribed for a boil on his forehead. I think I invariably dressed the boil myself, except towards the latter end, when Colonel Phayre did so. At first I gave him a little adhesive plaster for his forehead, and afterwards carbolic acid with cotton and oil and plaster and afterwards collodium. That was in the latter stage to make the wound contract that I gave collodium. I perfectly remember the morning of the 9th November, and that I received a note that morning from Colonel Phayre between 7½ and 8½ o'clock. I don't know what I did with that note. It merely asked me to see Colonel Phayre on my rounds. I did see which Residency peon brought that note to my house. I now know him to be Mahommed Baksh. On receipt of the note I walked over directly to the Residency. On coming up I did not notice particularly outside the house if there were servants. Before seeing Colonel Phayre I saw two at the end of the verandah which is between Colonel Phayre's house and the private office. One was Narsu. I have since learnt that the name of the other is Raoji. I saw them at the end of verandah, near a little wall—the dwarf wall already described by Colonel Phayre. When Narsu saw me he in an unusual manner avoided meeting me. I was in the habit of saying, "Well, Narsu, how are you?"—which usually caused him to salaam and seem pleased. On this occasion he looked grave; he looked straight down the verandah and salaamed, but not at me. There was something odd in the man's manner. I remembered it afterwards. I noticed it at the time. Raoji came forward when he saw me with great alacrity and took my hat and umbrella; this was an unusual thing. I think I never received that attention from him before; he said nothing. I may have asked if the Burra Saheb was in the office; he may have said yes, but I am not sure. Narsu and Raoji, Residency peons, knew I was the Residency Doctor. I went to Colonel Phayre's private office and dressing room, already described by Colonel Phayre, where the wash-hand-stand was. After I shook hands, he went and took up a tumbler from the wash-stand and showed me a sediment in the tumbler, and said "What is that?" I took it in my hand; there was a very small quantity of liquid in the tumbler. There was something less than a dessert spoonful of sediment and liquid together,—I mean of liquid. There were about five grains of sediment in weight, more or less. I looked at it, took it, and noticed as I shook it that a little powdery film rose out of the sediment. I added a little water from a goblet near. I then observed the play of colours on the glistening part of the sediment, and there was a separation between the glistening part and the non-glistening part. I next said, and Colonel Phayre also,—we said we suspected

the presence of poison (witness explains). We began to suspect the presence of poison. Colonel Phayre said he had heard of such things; he had heard that such attempts might be made against him, but he had not suspected it till this time. He said he had taken the sherbet about half an hour before. He showed that he had nausea and a soreness in the throat and stomach. He did not say so, but by a expressive motion he made me understand it. I think he said he had a confusion in his head and that he could not write. He said he had a soreness, and from his action I understood it was in throat and stomach. Colonel Phayre showed me where he threw the contents of the tumbler. I went with Colonel Phayre to look. Evidently some fluid had been thrown there on the verandah which was wet. There were some things also which I call flocculi like little pieces of white cotton—such things as are not found in sherbet. Colonel Phayre told me that he had suffered on previous days, *i.e.*, that he had had colicy pains and nausea. I took away the tumbler to analyse. Going out I again saw the peons Narsu and Raoji. I carried the tumbler away in the breast pocket of the pea-jacket I wore, and I put a handkerchief over it. It bulged. Raoji was assiduous as I came out. He brought my hat and umbrella, looked at me, scanned my face, and his demeanour was different from the usually impassive Residency peon. Narsu was very grave, and his manner was unusual for him. I went back to my house on foot. On my way back I met the man Mahommed Baksh. I met him at the Ranee's bridge, in the middle of the maidan, between the Residency and my house. He was coming towards the Residency. I spoke to him. There was a conversation. He in reply to a question of mine told me something. He must have come across the maidan, *i.e.*, from a direction opposite the Residency. After crossing the bridge I saw two horsemen going towards the Residency. I recognized one. His name is Eshwant Rao, the same who used to go with the Gaekwar to the Residency.

BARODA,
27th February 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

DOCTOR SEWARD.

EXAMINATION-IN-CHIEF BY MR. INVERARITY:—When I got to my house with the tumbler I put it into my desk with its contents, and kept it there till I got apparatus for testing. I procured some fresh wood charcoal. Before doing so I put a little of the sediment under the microscope. The sediment presented under the microscope a white opaque granular substance, which seemed to me like pounded alabaster. There was a white crystalline substance, transparent; there were one or two dark gritty particles. I observed nothing else in the sediment under the microscope. The sediment I put on the glass slide I put into a little glass mortar which I had very carefully cleansed. I then rubbed this sediment with a little of the charcoal. I then put this mixture into a new and unused test tube. This I heated in the flame of a spirit lamp. At first there was a little moisture deposited from the other part of the tube inside the tube. I removed that moisture with a little blotting paper. I again heated the mixture in the flame. On removing the tube from the flame I observed a metallic ring. I have that ring. I might have called it a deposit within the tube. I produce the tube. I point out the metallic ring. On heating the tube again a little and withdrawing it from the flame I observed what evidently was a crystalline deposit on the tube, both above and below the ring. Under the microscope the crystals appeared to be lustrous and octohedral. The metallic ring and crystals indicated arsenic. I got the charcoal and tube sent from the dispensary. I made no further experiments that morning. I had no chemicals. I remember that morning receiving a letter from Colonel Phayre. The letter shown me is the one. I did not send reply to that letter. As I was going in my gari I met that letter. I ordered my tonga and went straight to the

Witness produces a tube, which is recorded as M.

The letter marked F is shown and recorded.

Residency, and there I saw Colonel Phayre. I told him the result of my analysis. I wrote a letter to Colonel Phayre in his presence and that of Mr. Boevey.

LETTER OF 9TH NOVEMBER 1874 FROM DR. SEWARD TO THE RESIDENT, COLONEL PHAYRE, READ AND RECORDED AS N.

I threw the sediment that remained in the tumbler into a piece of blotting paper made into a filter. Some portion of the sediment remained in the tumbler. I poured a little water into the tumbler, and passed that also through the blotting paper filter. By that means the sediment remained on the paper after the water had passed through. I dried the blotting paper near the chimney of a lamp. When the paper was sufficiently dry I folded it up and put it into an envelope. I put my seal on the envelope. I show my seal on the envelope. The writing on the back of the envelope is mine. That was written on the morning of despatch. I sealed the envelope at night. In the morning I despatched it in a registered letter to Dr. Gray, Chemical Analyser. I put the envelope containing blotting paper in a larger envelope. The large envelope shown me is the one in question. On that occasion I did not write to the Chemical Analyser, but enclosed Colonel Phayre's letter,—I mean exhibit F. On forwarding it I made the endorsement on it [*Mr. Inverarity reads it*]. I sealed the large envelope with the same seal as the small envelope.

Shows envelope, and afterwards large envelope.

THE SMALL ENVELOPE CONTAINING BLUE BLOTTING PAPER IS RECORDED AS O, AND THE LARGE ENVELOPE AS P.

After that I received this reply from Dr. Gray. I made further experiments some days after. I took the mixture from the tube and threw it on the surface of some water and allowed the heavier particles to sink to the bottom and poured off what was floating. After repeating this process three times, several times I collected the sediment, and placed it on some glass slides which I can now produce. These are them.

Letter dated 11th November 1874 from Dr. Gray to Dr. Seward, read and recorded as Q.

WITNESS PRODUCES A CARD-BOX CONTAINING SLIDES.

I placed the sediment on these slides under a microscope, and saw that it consisted mainly of these lustrous crystalline fragments. I then passed a clean glass slide over the sediment with a rubbing motion once. I found the clean glass slide after that rubbing presented the appearance it now bears. The scratches were not there before. By passing the one over the other I mean I rubbed the two together, the sediment being between the two slides.

The slides recorded as R. There are three of them.

A glass slide is produced and shown, and recorded as S.

The conclusion I came to was that, whatever the nature of the sediment, it was not glass. I thought it might be diamond-dust, of which I had heard, because the particles were so very lustrous. I mean rather "of what I had read" either in papers or in Dr. Gray's letters. I remember receiving certain information which I communicated on the 10th November to Colonel Phayre. The letter shewn me is the one in question. I sent a short note. This is the formal letter.

Letter of 10th November 1874 from Cantonment Magistrate to Resident is shown, but not marked.

I said that on shaking the tumbler a thin film came up. This is one of the indications of arsenic. From the time I received the tumbler from Colonel Phayre till I concluded my experiments, none but me had access to the tumbler, the sediment, or the apparatus. I remember the ayah Amina being under my care. On looking at my book I say that she came under my care either on the 17th or 18th December; I believe the 18th December. She had then fever. She was in much pain on the right side. She appeared to have congestion of the liver. The base of the right lung and some of the wind-tube were affected. I considered her illness serious. I saw her before she came to hospital in a house in Mr. Boevey's compound. By my advice she was moved thence to the hospital. When she was in hospital I had a conversation with her. She scarcely gave me a message. She appeared very ill and restless. I thought

she might have something on her mind. I thought it might help her recovery if she unburdened her mind. She then told me something. In consequence of what she said I went to Mr. Souter. I have no personal knowledge as to whether Mr. Souter came to the hospital after that. I don't remember the date of my going to Mr. Souter. I have no notes to refresh memory. It could not have been more than two or three days after the 18th December.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—I knew she had been examined by Mr. Souter before coming to hospital. I did not know the nature of her communication; I knew that of the enquiry. I know nothing about a blister. Her liver was queer. Dr. Lewis had doctored her. I thought her uneasiness might be mental rather than the result of blister or physical pain. My treatment much relieved her; but oppression remained on her mind and countenance as if conscience was at work. The hospital was the regimental one, where Dr. Lewis is Surgeon attending. I attended her because she was ayah of a friend, and I liked to do it, and Surgeon-Major Lewis was my friend. I did not communicate with Dr. Lewis, because it was not necessary. I am not sure I prescribed for her. The plaster I prescribed was before her going to hospital. After she went there I don't remember prescribing for her. I assisted her to unburden her conscience. The ayah and I understand each others language. She spoke in Hindustani and understood a little English. We had no interpreter. There was a policeman there. I don't know who he was. I know none of them. I know Akbar Ali. It was not him. I don't know if it was Abdul Ali. I believe she was under police surveillance. There was a policeman in her room, an ordinary policeman. I know nothing about usual medical practice, but I knew Dr. Lewis, and I did not mind seeing the woman as I had an interest in her. It may or may not be a usual thing. It depends on the relation between the Doctors. With a private person it would not be etiquette: nor usually at another doctor's hospital. Dr. Lewis is quite competent for his duties. I have seen Bhau Poonekar once, but can't say I know him. It was after Mr. Boevey's departure from Baroda he came to my house. As far as I know, I never saw him before, nor that I have spoken to him since. I can't say when Mr. Boevey went away. I don't believe I saw Bhau Poonekar since. As far as I remember, the policeman present did not interfere in my conversation with the ayah. I don't know that the policeman interpreted. I don't remember whether he did or not. It is possible he did. I don't remember. I can swear I did not get every word of her message from the mouth of the policeman. I cannot tell you whether I got the substance from the policeman. I have no belief on that subject. I can talk Hindustani, not fluently.

Colonel Phayre told me that he had heard that his life was threatened, but up till that time (the 9th November) it had not been attempted. He did not tell me from whom he had heard that there might be attempts against him. When I got to the Residency, I saw the tumbler. Colonel Phayre shewed me the tumbler. As far as I remember, he held it a little obliquely; it was a sediment then, not diffused in the liquid. There was just enough liquid. There was something down the side of the glass. The darkish brown colour would not be consistent with arsenic or diamond dust. I decline to give any opinion as to whether there must have been something else. I saw no dark brown sediment. What sediment I saw seemed to me to be of faint fawn colour like some sea-sands. The words "pale grey" might be a fair description of the colour. I mixed a little water with it. I did not analyse that water before I put it in. Generally an analytical chemist analyses all substances he works with. There are instances on record in which the poison supposed to be found came from the tests used. There was about a dessert spoonful of remains of the sherbet and about five grains of sediment. After adding the water in Colonel Phayre's room I took it home in my pocket in the tumbler. I then used the charcoal test, called test by reduction eliminating certain appearances subsequently convertible into original element. Thus the metallic ring can be shewn to be arsenic. The salt of arsenic can be brought out. The ring, as

far as eight-sided crystals go, shows arsenic. They exist in the tube. They are almost surely conclusive: other mineral poisons would not produce similar crystals. Corrosive sublimate would not. The charcoal was brought I think by my Hospital Assistant himself with the other apparatus. I did not at that time test the charcoal. I did not afterwards. I sent it to Dr. Gray—the remainder of it. I made no attempt to test the liquid. I merely tested the sediment. The liquid was thrown away I eliminated the liquid from the sediment and tested the sediment only. It may have been an omission of mine not to test the liquid. I only tested for arsenic. There are poisons whose foundation is copper. The common one of these is verdigris. I did not test for copper. There was nothing to indicate the presence of copper. The colouring would usually indicate copper. I cannot from my analysis account for Colonel Phayre's feeling a copperish taste. I don't remember the specific gravity of arsenic in relation to water. It is much heavier. If arsenic is well mixed and then put into a tumbler, I can't say if it will get up to the top. I have tested for arsenic at home under Hoffman. I have since made one experiment only. I did not weigh the sediment. I think I experimented upon one-third of it, rather more than a grain, sending up the remainder to Dr. Gray. What I experimented upon was one or two grains, between one and two grains. With the glass slides I used the whole of the sediment I had got. This brought out the metallic ring. I put all the sediment into the reduction tube. I can't say I used it all up, as some remained on the slides. For the slides I operated on that which I had already put into the tubes after subjecting it to heat. It was after detecting arsenic, not after extracting all the arsenic. I can't say if the arsenic colouring the tube is more than $\frac{1}{8}$th or $\frac{1}{16}$th of a grain. The residuum left in the tube was dried charcoal and whatever was mixed with it. I took the whole out for the other experiment. I did not weigh the charcoal on which I experimented. There was no necessity. My last experiments were made on about a grain that remained in the tube. By the process I used I brought out a crystallised appearance on the slides. The scratch indicated would come by renewal of same experiment on other slides. I sent Colonel Phayre's letter to Dr. Gray with an addition—[Serjeant Ballantine reads from some letter]. I think it refers to what I wrote. It was my first communication to Dr. Gray. There is some mention on the envelope. I think about result of my analysis. That (exhibit D) is my communication. I believe arsenic is used in manufacturing some varieties of glass. I could scratch a plain piece of glass. I think there is a variety of corrundum that will scratch glass. I mentioned the demeanour of the servants to Mr. Boevey. I can't tell you when. Before Mr. Boevey left Baroda. It was before the 24th or 25th December. I think it was shortly after the inquiry. That's all I can say; that it was before the 25th.

DR. SEWARD SCRATCHED THE GLASS S. WITH ONE OF THE SLIDES ON WHICH THERE WAS SEDIMENT AND PRODUCED SMALL SCRATCHES ACROSS THE TOP.

RE-EXAMINATION BY MR. SCOBLE:—The ayah had been my patient before going to hospital only for one day. In serious cases it was my duty as Residency Surgeon to attend Residency servants. She was too seriously ill to remain where she was, unattended, at a hut in Mr. Boevey's compound; therefore I sent her to the hospital. My visit to her in the hospital was not to prescribe for her, but I took an interest in her as Mrs. Boevey's ayah. In the hospital she was in a separate room. The policeman was I think standing or sitting at the door. I think one of the hospital assistants came in with me when I visited the ayah. I don't remember which hospital assistant it was. The policeman was a Bombay policeman. He seemed, as far as I remember, to be an ordinary police sepoy, not a subadar or havildar. I can speak Hindustani well enough to dispense with an interpreter. I frequently get one if I find myself unable to carry on the conversation. I noticed the liquid in the tumbler to be dull pink in colour. I added possibly about a table spoonful of water. To the best of my belief, I got that water from a water goblet on the washhand stand. I took the first water that came to hand. My hospital assistant was a man named Abrahimjee. He has now left Baroda; he is a Jew. I think

I either sent a note or called him. I did not tell him or any body why I wanted the charcoal and tube. Shaking arsenic in water in a small bottle might have the effect of diffusing the arsenic more thoroughly when put in a tumbler. Diamond-dust would naturally sink to the bottom. On detecting arsenic I ceased further trial. I could pursue inquiry myself. I had no apparatus. I think corrundum is a metallic oxide. I don't know if chemical tests would discover corrundum. I first discovered the film before I added any water.

By Sir Dinkar Rao :—The poison was arsenic in my opinion. I have no knowledge as to whether a man can digest diamond-dust without harm.

Baroda, 1*st March* 1875. } (Sd.) John Jardine, *Secy. to the Commissioners.*

No. XVI.—Dr. WELLINGTON GRAY STATES ON OATH:

EXAMINATION-IN-CHIEF

By Mr. Scoble :—My name is Wellington Gray, Surgeon, Bombay Army, and Acting Chemical Analyser to Government. On the 11th November last I received a registered letter from Dr. Seward, Residency Surgeon at Baroda—a registered cover.

Exhibit P shown witness.
Ditto F ditto.
Ditto O ditto.

The letter shown (P) is the outer envelope of the packet. The seal was perfect. The envelope (P) contained a small packet and a letter. The letter (F) is the letter it contained. The exhibit (O) was the envelope of the packet enclosed. It was sealed with a perfect seal. It bore the endorsement in Dr. Seward's hand-writing which it now bears. In the envelope (O) I found a piece of blue blotting paper folded. Inside the blotting paper I found some powder; the powder weighed a grain and a half. Its colour was greyish. I noticed that it contained glittering particles. I analysed the powder by the usual process for the detection of arsenic. It was not the reduction test I first used. I first heated a little of the powder. The result of the process was a white sublimate on the side of the tube. I next examined that sublimate under the microscope. I found that the sublimate consisted of eight-sided crystals. I examined those crystals thoroughly. The result was that I concluded them to be crystals of white arsenic. I did this by first boiling them in a little water. I then took part of the water. I added a drop of solution of ammonio-nitrate of silver, and it produced a pale-yellow precipitate. I then took another part of the water of solution, and I added some ammonio-sulphate of copper, and the result was a pale-green precipitate. I then added some muriatic acid to the remainder of the solution. I then passed some sulphuretted hydrogen gas through the acid solution. I had first boiled the acid solution. The result of this was a bright yellow precipitate. The results I obtained by these three experiments. I tested the precipitates. I added ammonia to all three, and they all dissolved. I added the ammonia to part only of the last precipitate and kept part of it for another experiment. I boiled that part in strong muriatic acid, and it did not dissolve. All these tests satisfied me that it was arsenic. I used about the sixth part of what powder I had received in these experiments. I made further experiments with the remainder of the powder. I made them in connection with the arsenic. I boiled a little of the remainder with water and muriatic acid. I then put in two pieces of clean copper foil, and I continued to boil it, and in a few seconds the copper foil became covered with a grey metallic deposit. I took out one piece of copper foil. I dried it. I heated it in a test tube, and a white sublimate formed on the side of the test tube. I examined that sublimate under the microscope and found it consisted of eight-sided crystals. I ascertained by test what those crystals were. I went through exactly the same sort of tests as I have just described and with the same results. I also tried to test by reduction with charcoal. I have the test tube showing the result of that experiment.

Witness produces a glass test tube.

I point out the metallic ring on it. This ring is one of the signs of the presence of arsenic. It may be reduced again into white arsenic by heating; I did not make that experiment. The bottle I have got contains some of my results of my experiments. I made no other experiments on the 11th. I made some since. I did not on the 11th make any experiments to ascertain what the glittering particles were. They were not affected in any way by the experiments I made about the powder generally. On the 11th I did examine some of the glittering particles under the microscope. That was the only examination I made of them on the 11th. The result was that I thought them to be either powdered glass or powdered quartz. On the 11th I communicated the result to Dr. Seward. The letter shown me (Q) is the communication. On the 12th I made a further examination of this powder. On the 12th I opened the piece of blue blotting paper, and on looking at the powder I was struck by the brilliancy of some of the particles. I was led to the conclusion from my examination that they were diamonds. First of all my examination of them was simple inspection. I then tried to dissolve them by all the ordinary acids and then with an alkaline, *viz.*, potash. I found the particles not soluble. The result of my experiments was my writing this letter to Dr. Seward. At the time I wrote this letter I had not received any communication from Baroda mentioning the possibility of diamond-dust being in the powder. The opinion I formed as to presence of diamond-dust was the result entirely of my own inquiries. The letter from Baroda came after this. I received this packet on the 17th November—a registered packet, sealed with a seal bearing crest of a bird. The seal was perfect when I received it. Inside it I found a small packet and also a letter. The letter shown me (I) is the one contained. In the small packet I found some earthy matter, seventeen grains in quantity. I examined it. I found it contained arsenic and also sand and glittering particles. The glittering particles were similar to those sent in the previous packet. I ascertained the presence of arsenic in the earthy matter by the same tests as on previous occasion. I point out the tube containing the metallic ring of the second packet. I formed the same opinion about the nature of these glittering particles as of the glittering particles in the former packet. In neither of these packets did I detect the presence of any poison but arsenic. In the first packet the whole quantity of arsenic I found was one grain, and in the second packet one grain and a quarter,—total $2\frac{1}{4}$ grains of arsenic. Under favourable circumstances for the action of arsenic, that is, on an empty stomach, about two grains and a half is a fatal dose for an adult. Usually the effects of taking arsenic begin to manifest themselves in from half an hour till an hour. Of arsenical symptoms the first usually noticed is a dizziness, then nausea followed by vomitting, burning pain in the stomach, purging. Chronic poisoning or repeated small dozes of arsenic produces an effect on the eyes. It makes the eyes water and feel weak and sore. If arsenic is applied to a sore or wound, it produces effects—may be, fatal effects. I cannot say whether the mixture of diamond-dust with the arsenic would affect the diffusion of arsenic with the water. If arsenic were first mixed in a small bottle, and shaken and then poured into a tumbler, it would cause the diffusion of the arsenic through the contents of the tumbler. The production of a film, as described by Dr. Seward after shaking it about in a tumbler, would indicate presence of arsenic. I did afterwards on the 30th December receive a third packet from Mr. Souter. It contained another small paper packet, inside the envelope. I examined the contents of that packet. I found it contained

The test tube is put in as T and so recorded.

Exhibit Q is shown to witness.

Letter of 13th November 1874 from Dr. Gray to Dr. Seward shown, read, and recorded as Exhibit U.

Packet shown to witness.

Exhibit I shown.

Glass tube is marked V—a short tube with a bulb.

seven grains of white powder. The powder was white arsenic. The envelope shown me is that of the packet of 30th December, and inside is the paper of the packet. There was a piece of thread besides. Except the arsenic, the paper, thread, and envelope are here. The whole of the powder, seven grains, was white arsenic. I also, at Dr. Seward's request, examined some charcoal sent me by him. I received that packet on the 30th January 1875. I tested the charcoal. I found it was free from arsenic. Diamond-dust has, according to the best authorities, no injurious effect on the human body.

Envelope shown to witness enclosing paper shown and recorded as W.

THE PRESIDENT DISALLOWS A QUESTION AS TO WITNESS' KNOWLEDGE OF OPINION OF NATIVES AS TO THE EFFECT OF DIAMOND-DUST ON THE HUMAN BODY.

The question has been discussed among medical men as to whether diamond-dust has injurious effect on the human body. The result of that discussion is that it is harmless.

BARODA,
1*st March* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I extracted the arsenic from part of the powder. I examined the metallic ring only with the microscope. It is quite possible to go further and to produce the arsenic. There are several sorts of copper which are poisonous, *e.g.*, sulphate of copper. A person drinking a liquid with sulphate of copper in it would find a strong metallic taste. It is at once tasted. The taste would continue for some time. Sulphate of copper has an astringent effect on the throat. It would cause colicy pains, and not an increase of saliva as I am aware, not till it began to affect the stomach, on which it would act in much less than half an hour. The time depends more or less on the state of the stomach. The moment nausea begins there is an increased flow of saliva. Arsenic taken chronically produces salivation, but one does not look for it necessarily after a single dose; 2½ grains of arsenic would kill a person. As no stomach pump was used on Colonel Phayre, and whatever he took remained in his stomach, the quantity must have been small. What he took was enough to produce nausea, and therefore saliva, and the same might result from copper. Salivation is always one of the first symptoms of nausea. I can't say it was improper of Dr. Seward to add water to what he meant to analyse. It is possible to find substances in water. It was six days after my first analysis that I was sent what was said to have been scraped up from the ground.

RE-EXAMINATION BY MR. SCOBLE:—The extraction of arsenic bodily from part of the powder was not with the reduction test, but the sublimation test. I found no trace of copper in either the first or second powder sent me. Having been informed about copper being suggested, I did direct my analysis to detect copper. Arsenic is not what is called an accumulative poison. It passes off with the natural secretions of the body. There is diversity of opinion as to whether arsenic produces a metallic taste in the mouth. It raises the question as to whether arsenic has a taste. I have tried to taste it, but found it had no taste. I have seen a person suffering from poisoning by arsenic, and he complained of metallic taste in the mouth. In the course of my experience as Analyst I have noticed that a metallic taste in the mouth was described as one of the symptoms in arsenical poisoning. My analysis of the powder contained in the third packet received from Mr. Souter enabled me to know that it was the same substance as that received in the other two packets.

BY SERJEANT BALLANTINE:—In physical characters there are varieties of white arsenic. I say that the arsenic was the same from ocular inspection by microscope. The physical characters of both were exactly the same under the microscope. I don't mean coppery taste by metallic taste.

BY HIS HIGHNESS THE MAHARAJA OF JEYPOOR:—Arsenic is soluble in water.

BY RAJA SIR DINKAR RAO:—There are several substances besides arsenic that taken once in small quantity prove fatal.

BARODA,
2nd March 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XVII.—ABDULLA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Abdulla Khan Walad Mahomed Khan. When Colonel Phayre came to Baroda from Pahlanpur I came here after him. I have been many years in his service. I was so as a little boy. But he and his wife have gone sometimes to England. I have been fifteen or sixteen years in his service altogether. I was in November last first as second servant and as chobdar. In the month of Ramzan I was second servant. My master, Colonel Phayre, had sherbet got ready for him every morning. It was the second servant's business; when the second servant was sick, it was the butler's business to prepare it. I remember Monday the 9th November. That morning I prepared Colonel Phayre's sherbet in the dispense-room where it was always prepared. Having prepared it I took it and went into the dining room, and there I took a saucer, a plate, a plantain and two or three oranges. I thence at once proceeded to the Saheb's office-room. I placed the tumbler where it was always put on the washhand table. I remember that it was two or three minutes before half-past six in the morning that I did so. Two hamals were there,—one named Govind; the other is called Yellappa, I think. One was sweeping the room; the other cleaning the things. Having placed the tumbler, I took out clothes for my master and left the place. I did not re-enter the room before the return of Colonel Phayre. That morning I made the sherbet from pumalo. I put nothing in except the juice of the pumalo. I cut up the pumalo and separated the seed in a soup-plate. I strained out the juice through muslin. Before that I pressed the pumalo in the soup-plate with a spoon. The spoon was a silver spoon—a large table spoon.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—There was a verandah to the room where I placed the tumbler, which leads from inside as well as outside. The inner verandah used to be cleaned every day. I don't know if the outer one was. There are two ways of getting to the office—one from outside, one from the verandah. It is one verandah of which a portion is open. The inside verandah was cleaned daily. There is a passage partly open, partly shaded. I did not notice if the outside verandah was cleaned daily. It was the hamal's business to clean it.

RE-EXAMINATION BY MR. SCOBLE:—I did not notice any one cleaning the verandah on the morning of the 9th. Two hamals used to sleep there. I saw no one cleaning it that morning.

BARODA,
2nd March 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XVIII.—GOVIND BALU STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Govind Balu. I am a hamal employed at the Residency. I entered the Residency service when Colonel Walker went on two years' leave, about five years ago. It was my duty to clean the Saheb's office.

I remember the morning of Monday the 9th November. I went on duty. That morning I was cleaning Colonel Phayre's private office. I went into that room before 7 o'clock. It was after the Saheb had gone out to walk. It was about half an hour or one-quarter of an hour after he went out as far as I remember. I remained in the room one quarter or half an hour or thereabouts. While I was in the room Abdulla was there. Lakhsman, sepoy, was outside cleaning the inkstand. First of all Yellappa went into the room. He cleaned it and then came out; he is another hamal. Abdulla was inside; he took out the Saheb's clothes. After Abdulla had taken out the Saheb's clothes and cleaned the boots he went out. Raoji, havildar, came after Abdulla went out. Raoji said to me, "Let the torn papers be removed from this basket to that basket." He meant the waste papers. There were torn papers in the basket where they used to be kept, close to the Saheb's writing table. He said, "Let the torn paper be removed from the basket to that basket." There were two baskets—one inside, the other outside. Raoji emptied the waste paper from one into the other. By outside I mean the anteroom. He brought inside the outside basket and emptied into the outside basket the contents of the inside basket. Raoji did not stay there long, only about five minutes. I know the washing table in the private office. I used to clean it and to provide fresh water for it. On it there is a *ghindee* (washhand bowl) and a *kuja* (goblet) for holding water. On the 9th November I supplied fresh water to the *ghindee* and the *kuja*. I got the fresh water from an earthen pot outside. The bhistie (water-carrier) has to fill that earthen pot. The earthen pot was for the use of the Saheb people. I did not see Abdulla bring in the sherbet that morning. It was seven o'clock when I went into the dining-room to clean it. I did not see the Saheb return.

BARODA, 2*nd March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

GOVIND RECALLED BY MR. SCOBLE:—The earthen pot is outside the dining room and near it. There is a wall between the pot and the dining-room. In front is the visiting room, and the dining-room is separated by a wall and door. To get to the back of the house you pass through the dining-room, at the back of which is a covered place where there was the earthen pot.

BARODA, 2*nd March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XIX.—YELLAPPA NARSU STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Yellappa Narsu. I am a hamal at the Kothee. On the 9th November I was engaged with Govind Balu in cleaning the office room.

[No cross-examination is desired.]

BARODA, 2*nd March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XX.—LAKSHMON STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Lakshmon Daryasingh. On Monday morning the 9th November I arranged Colonel Phayre's writing materials in his private office. After that I went and took my seat in the *deori* where the

sepoys sit. I don't know what happened then. I afterwards went thence to the Post Office with a letter given me by the Saheb. I went after 7. It was quarter past or half past seven. As I went with the letter, I did not meet anyone. As I started, I saw no one. I saw no one as I left the Residency. As I was coming back from the Post Office, I saw some body. I saw that Salam,—I mean the same as used to come to the Residency with the Maharaja. He was near a *nulla* near the Residency. He was riding a horse going towards the Residency. I did not see him before that time that morning. On my arrival at the Residency after my delivering the letter, he was at the Residency at a place where there are a number of English trees, about eight or nine paces from the house, close. He was standing there. It was more than a quarter of an hour I took going to and coming from the Post Office. Salim continued where he stood.

[Serjeant Ballantine has no questions.]

BARODA, 2*nd March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXI.—JAMU MEEA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—I am Kotwal of the Cantonment. I remember the 9th November. That day I got some information from one Nata Jaga, which I communicated to Dr. Seward. I that day heard a report in the camp of an attempt to poison Colonel Phayre. I first heard it about 2 o'clock. Dr. Seward mentioned it to me. I did not mention it to others. I told nobody at the time. Afterwards I spoke to Nata Jaga. I mentioned it to him about between 3 and 4 o'clock. This was after Dr. Seward mentioned it to me. First of all Dr. Seward told me of an attempt to poison Colonel Phayre. Then I spoke to Nata with a view to enquiry. I first told Nata, in making this enquiry, what Dr. Seward told me.

CROSS-EXAMINED BY SERJEANT BALLANTINE.—Nata then told me something when I told him what Dr. Seward told me. Next morning I saw Dr. Seward and told him what Nata told me. Dr. Seward told me to make enquiries. He said to me—"A man has given poison to Colonel Phayre. It is not known who gave it. Therefore, make enquiries as to who did it." That was all Dr. Seward said. He did not mention names. I am Kotwal.

BARODA, 2*nd March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXII.—NATA JAGA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—I am Nata Jaga. I am Mokadam of the bazaar and attend to conservancy. I remember Monday, the 9th November. I know Salam, Gaekwaree Sowar. I saw him on 9th Nvoember about 8 o'clock in the morning. I was then causing some place to be cleaned near Kamatipura. I was on duty there. Salam was going to the bazaar on horseback, going fast, from the direction of the city bridge towards the Sudder Bazaar in the Camp. I know Raoji and Jaga, servants at the Residency. They live in the Sudder Bazaar. Salam went and returned shortly afterwards. I saw Salam come back about five minutes after he went. On his coming back, he went towards the city, still on horseback. He rode (*daurata*), not fast. When he returned from the Sudder Bazaar, I asked him—"Where did you go?" He spoke to me. I told Jamu Meea Kotwal what I had seen.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—When Salam went back, he went more slowly than when he went first. Salam's name was not mentioned to me in connection with this matter.

BARODA, 2nd *March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXIII.—MAHOMED ALI BAKSH STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Mahomed Ali Baksh. I am a peon at the Residency. I remember Monday, the 9th November. I know Salam, a Gaekwaree sowar. I saw him the morning of that day at the Residency. I saw him first at half-past six or seven o'clock. This was before Colonel Phayre returned from his morning walk. At first I did not speak to him. He was sitting there. I was sitting on a box. He was standing with his horse's bridle in his hand. The box was in a place called the *deori*. On entering the house by the steps, the *deori* is on the left hand. I remember seeing Mr. Boevey return that morning. I did not see Salam at that time. I remember taking a note that morning to Dr. Seward. As I was taking that letter, I had some conversation with Salam. He took out and gave me a rupee. He said—"As you are going with the letter to the bazaar, if you can get any biscuits for me, pray bring some." First I delivered the letter to the Saheb, and then I went. I could not find any biscuits. When I came back to the Residency, I did not see whether Salam was there or not. He has never asked for the rupee back or the biscuits. Afterwards I was prevented from speaking. This was on the second or third day after. The Saheb ordered me not to speak to anybody. I remember meeting Dr. Seward on my way to the Residency. I salaamed to him. The Saheb asked me—"What have you brought?" I spoke to him.

CROSS-EXAMINED BY MR. BRANSON:—Mr. Boevey took my deposition (*zabani.*) Colonel Phayre was sitting separate. I did not sign my statement in his presence. I said to Salam from a distance, when I returned from the bazaar, that the biscuits were not ready. I saw Salam as I returned from the Doctor's bungalow and passed by the school. It was 7½ or a quarter to 8 at the time. I saw Salam again. He came to the bungalow.

RE-EXAMINATION BY MR. SCOBLE:—When I saw Salam near the school, he was going to the city on horseback. It was 9 or past 9 when I saw Salam at the Residency afterwards. At that time I had no talk with him.

BARODA, 2nd *March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

MAHOMED RE-CALLED BY RAJA SIR DINKUR RAO:—Salam used to come to the Residency on Mondays and Thursdays. The 9th was the day following the Divali (or second day, (*dusri-din-ki- Divali*). It was a Monday.

BARODA, 2nd *March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXIV.—RAOJI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Raoji Rama. I was a Havildar of Peons at Baroda Residency, and had been so for one year or 1¼ year. Colonel Phayre

appointed me. I lived in the Sudder Bazaar in the Camp. None other of the Residency servants lived with or near me. I know Salam, a sowar of the Gaekwar's. I knew him since he commenced to come to our bungalow, *i.e.*, the Residency. Salam did make a proposition to me. This was two months before the sitting of the Commission,—I mean the Commission about complaints of ryots, about one year and a quarter ago. Salam made a proposition to me two months before that. Salam said—"The Maharaja has sent for you." He also said—"He wants you; he wants to have some conversation with you." I said to him—"I can't come just now;" and he was after me very much. He said the same thing to me five or six times. I agreed to go. I said "I will go." I did go on a Sunday. I don't remember the month. It was two months before the time the Commission commenced. On that Sunday I left the camp, my house in the camp, about seven o'clock in the evening. First I went to the house of Eshwant Rao, a *jasud* of the Maharaja. He used to come with the Maharaja to the Residency. Eshwant Rao's house is near the new bazaar, in the city. I found Salam Sowar sitting at Eshwant Rao's house. Eshwant Rao was also there. From Eshwant Rao's house I was taken to the Maharaja's Haveli by Salam Sowar and Eshwant Rao,—I mean the Haveli where the Maharaja lives in the city. I went by a way in the rear through the Nazer Bagh. There is a flight of steps leading to it. The entrance was in the rear by the Chiman Bagh called Nazer Bagh. I was taken upstairs. Salam Sowar and Eshwant Rao, these two, took me upstairs. I sat down upstairs in a room. Salam Sowar sat by me, and Eshwant Rao went inside to report to the Maharaja. Eshwant Rao brought the Maharaja. I knew the Maharaj by sight. I recognized the Maharaj very well when he came in with Eshwant Rao. I made salaams to the Maharaj and sat down. Then the Maharaj began saying—"If you can get any news from the bungalow, let me know it." I said, "Very well." The Maharaja said—"I will give you many rewards and presents. I will gratify and please you. Do you continue to give me news and information on that side." I said, "Very well." Then the Maharaja asked—"Are you on friendly terms with the Jemadar?" He said Narsu Jemadar, the Residency Jemadar. I said "Yes." The Maharaja said—"You should bring him to me." I said, "Very well." He enquired about matters relating to here and there (unimportant matters). I took my leave. Salam Sowar and Eshwant Rao came too; they went to their houses, and I to the camp. I went to Narsu Jemadar and told him about it the following morning when I went to my duty. The Jemadar said—"At present I have no time to go." Before the Commission sat, I went three or four times to see the Maharaj. All those times were before the Commission sat. When I went from the camp, I went alone and afterwards met Salam Sowar and Eshwant Rao, who went with me to the Maharaj. I used to meet them at Eshwant Rao's house. I used to go alone to that house, and then with them to the Maharaj. I used to inform the Maharaj about the people who used to come to the Residency and mention their names. I went to see the Maharaj while the Commission was sitting. I went three times during that period. On those occasions I used to go alone to Eshwant Rao's house, and thence with Eshwant Rao and Salam. On each of those three occasions I saw the Maharaj at the same Haveli. I spoke to the Maharaj on those occasions. I used to tell him about what occurred at the Resident's bungalow. Complainants used to come there, and people used to appear before the Commission. I used to hear what they said and to repeat it to the Maharaja. I had spoken to the Maharaj about my intended marriage, and he paid me about 100 Rupees for expenses of that marriage. I spoke to the Maharaj about it during the sitting of the Commission. He called Eshwant Rao and he said, "You must remind me of it." Eshwant Rao was beside him. The money was not then paid. Eshwant Rao came to the bungalow (Residency), and spoke to me. This was when he accompanied the Maharaj. My visit was on Friday, and Eshwant Rao spoke to me on Monday. Monday was the usual day for the Maharaj's visit. Eshwant Rao said—"I have brought and kept Rupees 500 for you; you should come and fetch the money." I did go to fetch it. I remember it was the

evening of the day he so spoke. I went to Eshwant Rao's house. With me I took Jaga, a punkawala employed at the bungalow. At Eshwant Rao's house I met Eshwant Rao; he gave me the money by the hands of his karkoon—500 Rupees. At that time his karkoon and Jaga were present and nobody else that I saw. Eshwant Rao was then upstairs in his house. The karkoon's name is Dalpat. I spent that money on my marriage. Rupees 400 I so spent and deposited 100 Rupees with Jaga, with instructions that I would draw it from time to time as I required it. I bought some clothes and made some ornaments. Dajibhai Karia got the ornaments made for me. My marriage took place while the Commission was sitting. I remember not the month. I remember meeting Salam after the Commission left Baroda—two or three days after they left. Salam said—"I have had a talk with the Jemadar. I have brought him over." I afterwards asked the Jemadar. Salam also said,—"I have spoken to him; promise to come; come with him to the Maharaja's." I said—"Very well, I will ask him." I did speak to the Jemadar about this—the evening of the day of the talk with Salim. The Jemadar said to me—"I will go with you on Sunday." I don't remember the month, nor the Musalman nor the Hindu calendar month. This was eight, nine or ten days after the sittings of the Commission. When the Sunday came, the Jemadar had, as previously arranged, gone to Eshwant Rao, and I found him there. In fact, I found the Jemadar there on the Sunday night. For the most part, as far as I remember, Jaga was with me or Karbhai. Karbhai lives in the camp; he was punka-puller at the Residency, and is now unemployed. I don't know his father's name; he is not the same as Karbhai gari-driver. As far as I remember, either Jaga or Karbhai accompanied me. At Eshwant Rao's house I found Eshwant Rao, Salam Sowar, and the Jemadar. I went thence to the Maharaja's Haveli, and I went through a lane in direction of the Nazer Bagh, and Eshwant Rao went in by an entrance where a sentry was, on the public street. With me went Salam, the Jemadar, and the man who was with me into the Palace: the man who went with me did not go upstairs, but sat below. We all went up the first flight of steps—I, the Jemadar, Salam, and either Jaga or Karbhai. We were made to sit there by those persons. Only Salam went further upstairs. Afterwards Salam and Eshwant Rao and the Maharaja came there, and Salam came down and called us up. I and Narsu Jemadar went up; Jaga or Karbhai stayed sitting below. Then I and the Jemadar went upstairs. We went to a bench on which the Maharaja was in the habit of sitting, and where there was a bath-room. When I got there, those present were, I Salam, Eshwant Rao, the Jemadar, and the Maharaja. I and the Jemadar had conversation with the Maharaja. I don't remember that conversation. Eventually the Maharaja said to the Jemadar—"You should report the news from the bungalow. As you are living in Baroda, you should bring the news every day." The Jemadar said, "Very well." The Maharaja said to the Jemadar—"You should notice what Sirdars come to the Residency, as you are a servant of long standing, and you know the Sirdars." The Jemadar said—"I will give the news, and Raoji will do so also, and it will be communicated through Salam." The Maharaj said—"Very well—send the news, and if it is very important you should write it and send it to Salam. You should bring it from the bungalow." The communications were to be given to Salam, when the Jemadar left the camp to go to his house. The Jemadar lived in the city. The Jemadar said to the Maharaj—"My brother's pension has been stopped; please make arrangement about that." The Maharaj said—"I cannot make any arrangement about that; you must petition the Saheb; and if the Saheb speaks to me I will at once make arrangement." The Jemadar's brother was in the Maharaja's service. There were two brothers,—one a Commander, the other Jemadar in the Rasala. That was all the conversation. Then we left and came away. After this visit and before the Maharaj went to Nowsari, I visited the Maharaj four or five times about the time of his going to Nowsari. I and the Jemadar both did so. On those occasions I saw the Maharaj and conversed with him; and I and the Jemadar gave the Maharaj information of what was going on at the Residency. I went to Nowsari with Colonel Phayre. Narsu Jemadar also went. So did we all.

I and the Jemadar attended Colonel Phayre all the time he was at Nowsari. The Maharaja also came to Nowsari. I saw Salam for the most part at Nowsari. Eshwant Rao himself I did not see. His son lived in our bungalow there,—I mean in a routie or tent in the compound. Colonel Phayre's servants lived in the bungalow, and we sepoys had a tent or routie. It was in the routie Eshwant Rao's son lived. Salam lived in the routie in our compound. At Nowsari I went to the Maharaj once. I was introduced to his presence by Salam. On that occasion I had some talk. The Maharaja enquired about Bhau Poonekar and others, who used to come to the Resident's bungalow, and as to what conversation they had. I know by name one Damodhar Trimbuk or Damodhar Punt. I know him by sight. He was at Nowsari with the Maharaja. After returning from Nowsari to Baroda, I did not continue for the most part my visits to the Maharaja. I forgot (*bhulgaya*). After my return from Nowsari I went thrice with Pedro, the butler. I went with the Jemadar also. Altogether I think I went to the Maharaja 20 or 25 times. After my return from Nowsari, I went three times with Pedro and four times with the Jemadar. I never went with them both together. I and Pedro and Salam Sowar went. After I came from Nowsari, Pedro said to me—"Will you go with me?" I asked—"Where to?" He answered—"Salam Sowar has told me we should go to the Maharaja's." I said—"I will go with you when you want me to go." I did go with Pedro. I left the camp and waited at the bridge while Salam Sowar was bringing a gari from the city. Salam brought one and halted it, and went to the bungalow (Residency) to call Pedro. I mean the bridge near the school on the high road to the city at the corner of the maidan. Pedro came. Pedro, I and Salam went to the city. This was at night, after ten o'clock. We went to the Maharaja's Haveli, where we met Eshwant Rao Jasood. Pedro and I met the Maharaja. On the first time Pedro and I went, the Maharaja asked—"When your Saheb sits at the table; does he make any allusion to me?" Then Pedro said to the Maharaj—"The Saheb says what is good for you." Pedro said—"It would be good for you if you live on amicable terms with the Saheb." The Maharaj said—"I behave well, but the Saheb gets angry." Pedro added—"The junior Madam Saheb is very kind to you (*mehrban*). If you behave well, the Saheb will also be very kind to you." The junior Madam was Mrs. Boevey, Colonel Phayre's daughter, who lived in the Residency. No other conversation occurred. The Maharaj said—"You should send news through Salam," because Salim used to go to the butler's house. I remember the butler went to Goa on a month's leave. This visit was after my return from Nowsari. It was before the butler went to Goa. Before the butler went to Goa, I went with the butler three times to visit the Maharaja. After his return from Goa, I once visited the Maharaja with him. So I went four times altogether with him. The visit after the butler's return from Goa was as follows:—The butler had some talk with the Maharaj. I heard it. The Maharaj said—"When did you come back from Goa?" He answered "two or three days ago." The Maharaj said—"Will you do something if I give you something." The butler said—"If it is possible for me to do it, I will do it." Then the Maharaj called Eshwant Rao, who was present. Eshwant Rao had a packet in his hand which he gave into the Maharaja's hands, which the Maharaj put into the hands of Pedro. Pedro said—"What is it? (*kya chiz hai*)." The Maharaj said—"It is poison" (*zahir*) Pedro said—"What shall I do with it?" The Maharaj said—"Give it in some food to the Saheb." Then Pedro said—"If the Saheb dies all of a sudden, I shall be taken up and ruined." Then the Maharaj said—"Nothing will happen all of a sudden; the Saheb will die in two or three months" (*mar-jaenge.*) The Maharaj added—"Nothing will happen suddenly to the Saheb. Don't you be alarmed." After this conversation, I left for the camp with Pedro, who went to the bungalow. I believe Pedro kept the packet in his possession. I went home. I know that Pedro got some money from the Maharaj. Pedro told me that Salam Sowar had paid him some money,—how much I know not. Pedro told me this at the time of his going to Goa.

BARODA,
2nd March 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

ROAJI'S EXAMINATION CONTINUED BY MR. SCOBLE:—After my return from Nowsari I went to the Maharaja with Jemadar Narsu. This was about two or three days after my return to Baroda from Nowsari. A punkawala, named Karbhai, went with me. After my return from Nowsari I received Rupees 300, about fifteen days after my return. Narsu Jemadar paid me those 300 Rupees. After I received those 300 Rupees I went again to see the Maharaja. My next visit was about four months after receiving the 300 Rupees. I guess it was four or five months. Narsu Jemadar went with me then. On this occasion I went from here at seven o'clock, I mean from the Camp Bazaar. I went first to Eshwant Rao's house. Salam Sowar was at Eshwant Rao's house. Narsu Jemadar also was sitting there and also Eshwant Rao. From Eshwant Rao's house, I went to the Maharaja's Haveli. I entered by the way of the Nazerbagh side. On that occasion I saw the Maharaja in his bath-room, where he was seated. It was upstairs. When I went to the Maharaja, I and Narsu Jemadar sat down, and Eshwant Rao and Salam were standing near the Maharaja. Then the Maharaja said to us, "The Saheb practises, great ('*zulm*') oppression on me. I will tell you something: will you listen to it?" Then I and the Jemadar said, "We will listen." Then the Maharaja said, "What is the Saheb in the habit of eating." I then said, "He does not eat anything in my presence, but he drinks juice (*ras*), sherbet." Then the Maharaja said to us, "If I give you something, will you put it in? (*dálna*)." Then we said, "What will be the effect of it." (*Kya hoega*). Narsu it was who said this. Then the Maharaja said to us, "I will send a packet by the hands of Salam Sowar." I thereupon asked the Maharaja, "What will be the effect of it?" (THE INTERPRETER MR. NOUROJEE SAYS THE WORD INTERPRETED AS PACKET MAY ALSO MEAN POWDER "*puri.*") When I asked, "What substance is it?" (or rather "thing".) Then the Maharaja said, "It is poison" (*zahar*). I then said to the Maharaja, "If I put it in, and if anything happens to the Saheb all of a sudden, what then?" The Maharaja said, "It will not produce any immediate effect, but will produce an effect in the course of two or three months." Then the Maharaja said to us, "I will give you a present of a lac each, if you will do this thing, and I will employ you (*asámi*) or give you service, and I will protect your children and family. Do not entertain any apprehensions." I myself asked the Maharaja," In what manner shall I put this in?" Then the Maharaja said, "Take a small bottle, put some water and the powder in it, shake it well, and put that in." Then I asked the Maharaja, "If I put the powder thus, what will be the effect?" The Maharaja said, "If without shaking it you put it in the juice, it will come to the top, therefore you should shake it before putting it in." Then Salam Sowar and Eshwant Rao both said, "It will be good for you if you do this job: do not have any apprehensions." The Maharaja said, "Make three powders of this and finish them in three days." At that time no powder was shown me. Nothing was shown me then. The Maharaja said, "I will send it to the Jemadar's house by the hands of Salam or Eshwant Rao." I said, "Very well." Nothing more occurred. After the Maharaja said this, we left. I cannot mention the day of this conversation. I don't remember the day of the week or month it occurred, nor what season it was. I do not remember the 9th November. I do remember the day Colonel Phayre found out the attempt to poison him. The above conversation occurred about 15 or 20 days before that event. After that interview with the Maharaja, the Jemadar brought a packet and gave it to me. The above-described interview with the Maharaja took place at seven o'clock of the evening. The Jemadar brought me the packet the day following the interview with the Maharaja, so far as I remember. I opened that packet. There were two powders in it,—one white and the other rose-colour. There was that much (SHEWS ABOUT A PINCH), I cannot remember.

I don't think quite as much as a tea-spoonful. I did not weigh it, nor estimate its weight. (WITNESS SHEWS WITH THE SAND OF A SAND BOX USED FOR DRYING INK AND SAYS) The whitish powder was more in quantity than the other. Narsu said something to me. I divided the two powders into three portions, taking more of the rosy powder than of the white. I used only a little of the white powder. Some of the white powder was left. A good deal remained.

I took a pinch of it. I don't remember if half the white powder remained. I used up all the rose-coloured powder. I kept them in the pocket of my *putta* or belt after making them up. I put in one side of my belt the remainder of the white powder, in the lower part of my belt, in the same pocket of the belt with the three powders, but in a separate division; with the three packets obtained by mixing the white and red powders, I threw them into the Saheb's sherbet, at different times. I don't remember the different days. It was on alternate days, putting in one, then leaving a day. I put one powder (*bhuki*) into a bottle. I left the other two. I put them in (*dálna*) another day. After putting it into a bottle, I put some water in, and shook it and threw the contents into the glass containing the Saheb's sherbet. By Saheb I mean Colonel Phayre. By glass of sherbet I mean that daily placed in his office for Colonel Phayre. I did the same with each of the three powders (*bhuki*). The Maharaja gave me the bottle. He gave it to me about the time the Saheb had a boil on his head. The bottle contained some white liquid like water. When the Maharaja gave me this bottle, I was at the Maharaja's Haveli. Narsu Jemadar was with me on that occasion. The Maharaja spoke. I asked him, "What does this bottle contain?" He said, "It contains something which you should throw into the Saheb's bathing tub or *ghindi*." I brought the bottle with me. I tucked it up in my drawers under the string, and it produced a wound on my skin. It caused a boil, a thing like a boil, what a man gets when burnt. It swelled. The place was in my belly (WITNESS SHEWS THAT IT WAS NEAR THE NAVEL.) As it produced a boil on me, I thought it would much injure the Saheb: so I threw it away. I mean I threw away the medicine (*dawa*) contained in the bottle. When given to me, the mouth of the bottle was stopped with cotton, and that was covered over with bees-wax. The bottle was given me before I got the powders—about a month or one month and a quarter before. I brought the bottle to the Residency. Narsu Jamedar asked me, "Did you put it in?" I answered him that I had put it in. Then I afterwards said to Narsu Jemadar, "Look here. I have been burnt here," pointing to my belly. I afterwards kept the bottle in the bungalow underneath a box belonging to the Saheb kept near a form where we and the Jemadar used to sit near the Saheb's office. This box was near the form where I used to sit. After putting the three mingled powders into the sherbet, I went to see the Maharaja again. It was about eight days after. The Maharaja used to come to the Residency to see the Saheb; perhaps he thought nothing happened to the Saheb. The Maharaja sent me a message through Salam. I and Narsu Jemadar both went to the Maharaja by night. As far as I remember, nobody else went with me. I first went to Eshwant Rao's house. There the Jemadar was, and Salam Sowar was sitting. The Jemadar Narsu was there when I got there. So also was Eshwant Rao. I went thence to the Maharaja's Haveli—with Eshwant Rao, the Jemadar, and Salam Sowar. I saw the Maharaja at the Haveli—in the Maharaja's bath-room—the same place where I had seen him before. The Maharaja gave me coarse abuse, and said, "You did not do anything." I said, "Maharaja, I did it, but I can't account for its not happening." Then the Maharaja said, "I will give you another thing* which you should put in (*dálna*)." I said, "Very well." When I began to go, Salam extended his hand. He gave something to the Jemadar; what it was I don't know. He said nothing in so doing. No other person said anything. I heard nothing. Then I and the Jemadar went away thence. Next day, when the Jemadar came from his house, he gave me a packet. I opened and looked at it. Inside there was a dark-coloured (*kala*) substance. The colour was not so dark as the Interpreter's coat (black alpaca) It was like that hat (grey felt helmet.) I kept the powder by me one day. I went on a Friday, and the Jemadar brought it to me on Saturday. On the Sunday I did not go to duty. I went to duty on the Monday. I refer to the Monday of the report about the poisoning. On the Monday I put it in (*dálna*).

* *Chiz.*

Q.—In where? A.—In the Saheb's sherbet. I mean the packet sent by the Maharaja through the Jemadar, and which the Jemadar gave me on the last occasion. I put the poison in a bottle, shook it,

and put it into a glass. The bottle was the one given to me by the Maharaja. I put nothing else into the bottle except the powder. I put some water in and shook it. Nobody was in the room when I put it into the Saheb's glass. I put it into the Saheb's glass at half-past six o'clock, when I went to my duty. It was about twenty minutes before Colonel Phayre returned. I had no watch. I saw Colonel Phayre return. I remember Colonel Phayre writing a note. He gave it into the Jemadar's hands who gave it to me. I gave it to a puttewala. I don't remember what puttewala. I told the puttewala. "Take it to the Doctor Saheb." When I gave it to the puttewala, Salam Sowar was present. It was about seven o'clock when I first saw Salam Sowar that morning. First Salam Sowar asked me, "Did you do that job or not?" I said, "I did it." Afterwards I said, "A note has this day been written and sent to the Doctor Saheb, and I think you will be disgraced." Salam said nothing to me. On saying this to him, I left him. I told him about the note to the Doctor Saheb at the same time as I told him about my having given the poison. I remember the Doctor coming. I and the Jemadar were standing there when the Doctor came. I remained on duty all that morning at the Residency. I was not put in arrest that day. I was suspended. I was told to take off my belt and place it there and go home. I did take off my belt. I put it in the Saheb's office. My belt was never given me back. On that day, Monday, I was examined a little by Colonel Phayre and in Mr. Boevey's presence. I was placed in arrest the next morning at seven o'clock. I remained there through the night: the next day, at five o'clock in the evening, I was released by the Saheb. I was not allowed to return to my duty. Besides the Rs. 500 paid on my marriage and Rs. 300 through the Jemadar, I received no other money. How could I know what the Maharaja gave to the Jemadar? Out of the money I received, I had some ornaments made. These are the ornaments I caused to be made.

Silver anklets, gold armlets, rings produced.

I paid for these ornaments about 500 or 550 Rupees. I did make communications in writing of news through Salam. I once or twice caused Jaga to write for me. I know Jaga's handwriting. I can read a little Gujerathi. I can write a little, but not well.

Paper shewn.

The writing shewn me is Jaga's writing. I don't think I could read this, as I can't read much. I never employed any writer but Jaga. I wrote myself on two or three occasions. After getting the letters written I gave them to the Jemadar. The Jemadar also took those which I myself wrote. I did make a statement to Mr. Souter which was taken down. The first day of my doing so was Tuesday the 22nd. I don't know the month.

MR. SCOBLE SAYS IT MAY BE TAKEN AS THE 22ND DECEMBER. THIS IS AGREED.

The Saheb, Mr. Souter, took down the statement: but not on the 22nd, but on a later day. Early in the morning Mr. Souter sent for me: in the morning I said nothing to him: he questioned me till 8 or 9 o'clock, but I did not acknowledge anything correctly. I was then brought into the Residency. I saw Mr. Souter at Mr. Barton's bungalow. I was desired to sit down in the Residency garden. I sat there till 5 or 6 o'clock. Karim and Faizu were there. We began to discuss amongst ourselves. Then Faizu and Karim said regarding themselves and the Ayah, "We have told the truth, you had better tell the truth and be saved." They said," We have stated that we have been there. you had better tell the truth and be saved." Thereupon I sent for Mr. Souter's havildar who was near there. I would identify him if I saw him. This

A Policeman calling himself Mir Imam Ali is called.

is the man. I said to him, "Take me to the senior Khan Saheb." That is Akbar Ali. I then went to the senior Khan Saheb. I said to him, "I will tell you the truth regarding the poison." I said to him, "If you save my life and get a promise given me by the Saheb, I will tell the truth." I got a promise of pardon (*muafi*) if I made a full statement, and on that promise I made my statement to Mr. Souter. From that day at 6 A. M. till now, I have had no communication with Narsu Jamedar except on the day Narsu was taken up; the Khan Saheb said to me, "Tell before Narsu the truth that you have told." What he said was, "Tell

before these people the truth you have told." The Rao Saheb and the junior Khan Saheb were present. I was then taken to near the Jemadar and I said to the Jemadar, "I have told that what was to be told even up to my neck." I said no more to him. I was then taken away to the police guardroom. This belt

A belt is shown.

is the one I used to wear. In this pocket I put the powder; the other powder I put here (SHOWS ANOTHER PLACE. MR. SCOBLE POINTS OUT THAT THE FIRST IS AT THE LOWER FOLD OF THE BELT, AND THE SECOND AT THE SIDE.) I was present when something was found in the belt. At that time Rao Saheb and Akbar Ali were present, and the junior Khan Bahadur also. Something was then found in my belt, namely, one powder. First Khan Saheb asked me, "Where used you to put it?" I said, "I used to put it in the pocket of my belt." He then asked, "Where is your belt?" I said, "It is in the possession of Budhar Puttewala (possession=*ke-pas*)." Chand, a sepoy of Mr. Souter, went and brought Budhar Puttewala. When Budhar came, the belt was round Budhar's neck. He was wearing it. The Khan Saheb took it off his person, and then they began to search. Khan Saheb, Rao Saheb and Khan Saheb junior began to search. A thick finger was introduced into the belt. It was Khan Saheb's finger, (WITNESS SHEWS THE PLACES IN THE BELT). He found something hard here, and then he remarked, "There is something there." Then he left it as it was and sent for Mr. Souter, who was in a room opposite. Khan Saheb then opened the bottom of the belt. The Saheb then took out the packet and examined it. It was wrapped in a piece of white paper. Inside it was a poison. A white powder (WITNESS USED THE ENGLISH WORD "POWDER.") I recognised the white packet on its being taken out. The Saheb asked me if I could, I said, "I could recognise it." I said, "This is the packet left me by oversight (*bhul men rahgaya*)." After this enquiry, the Saheb took some of my statement (*zabani*) and I left. I don't remember the day of the packet being taken from my belt. It was about two days after I gave my deposition. There was one day between the day it was found, and the day of my first statement.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—I had been 1½ year in Colonel Phayre's employ. He was very kind to me. I consented to poison because the Maharaja offered me money, I am a poor man, he offered me a lack of rupees. For this I consented. I did not intend to murder him. The Maharaja so intended. I meant to do it, being poor, because I was instigated. I consented to murder a kind master for money, being instigated. I never got my lac of rupees. I never applied to the Maharaja for it. After the attempt failed, I was examined by Colonel Phayre, after which I was for a month at liberty. I made no application during that time to the Maharaja. I got no message from him, nor did I see him. I did not go to him. How could I? I used to go, but not after I stayed at home. I did not apply to him because the affair was not successful. I did not go. How could I go and ask for money. After the failure I had no conversation with Narsu. I did not leave my house. I knew Bhau Poonekar. He used to go to the bungalow to see the Saheb. I don't know what he came for. I sometimes heard what he came for and used to tell it. I know nothing about a kharita from the Maharaja to the Governor General. I don't recollect. I did not hear of it from Bhau Poonekar. I got the boil from the medicine (*dawa*) inside the bottle. The medicine dropped through the cotton stopper. It gave me a boil (*phor*). I threw it away. It was given me to hurt Colonel Phayre; I did not use it. It hurt me; so I threw it away. I feared I might be arrested at once. I did not put it in water. Because I was injured, I thought my Saheb would be injured. I told Narsu I had used it. That was a lie. Every day a sowar used to come from the Maharaja to enquire if it was administered or not. I told the lie, because they were after me. Mr. Souter was never after me; all that I told him was truth. Had I told Colonel Phayre the truth, how would he have believed it, the story of one person? Therefore I did not tell the truth. He would not believe me, and I did not do it with a view to tell it. I told Mr. Souter the truth correctly. [THE WITNESS'S ATTENTION IS CALLED TO

THE MATTER OF THE TWO PAPERS OF POWDERS GIVEN WHEN HE AND NARSU WERE PROMISED A LAKH OF RUPEES EACH.) The two powders were brought and given me by Narsu Jemadar. He told me to divide them into three parts and give them on three days. I made three packets and kept them in my pocket. From each powder I took a little, because I had doubts that the white powder was more injurious. I doubted how the white powder was to be used, (MR. SERJEANT BALLANTINE READS FROM STATEMENT MADE TO MR. SOUTER.) This is what I told Mr. Souter; this is true.

Q.—Who gave you the last packet you had? A.—The Jemadar. It was rather of a dark colour, like that hat (grey felt *J. J.*), not like the white colour first given me. It was a little darker than that hat. I don't remember exactly. I put the whole in. I first put it in a bottle, mixed it with water, and then poured the whole of it in (WITNESS SHOWS WITH INK-STAND WHAT THE QUANTITY WAS). It was a little less dark than this. I saw Dr. Seward the morning I tried to kill my master. I was at the bungalow. I hear that Salam is in imprisonment. I have been in imprisonment several days. Pedro went with me to the Haveli three times after his return from Nowsari and once after his return from Goa. He knew about the attempt to poison. I heard the Maharaja tell him. A packet was given into his hand in my presence I heard the Maharaja say it was poison. This was after Pedro's return from Goa and at his last visit. I don't recollect the date thereof. First the powder was given him and I was called two days after. The Jemadar first brought me two powders and afterwards one powder. Pedro received one two days before I received the last powder. After Pedro received one, I received one two days after. I don't know what Pedro did with his powder. We were all engaged in the same attempt. Why should I ask Pedro? He should know his business. The Maharaja was in haste, so he gave to Pedro and me so as to make haste. I know because Salam and Eshwantrao were after me. That's how I know. I was told that it would not take effect for two or three months. I never asked Pedro what became of his paper. I first accused Pedro before Mr. Souter—not before. I did not mention his name before Colonel Phayre. I was afraid. If anybody does anything, does he do it for telling it? I quite forgot about the powder in my belt. I administered three powders; there were four altogether—one was left. The Jemadar gave me two powders. I made the rose powder into three portions, put some of the white powder into each, and one powder remained. This was what I was told to do—to give it three times and make three portions. I thought the white powder was arsenic, and if it was given to the Saheb, something would happen soon. For that reason, by mistake (*bhul-men*), it remained. I kept it in the pocket and forgot if it was there or not. I made three packets, but took a little from the other. I was afraid something might happen to the Saheb of a sudden. I put in all the dark powder at once—it was little. Those people kept saying, "Do it quick, do it quick." I did not know it would take effect at once. Nobody knew I had any poison left. I told nobody. My accomplices thought the whole was used. The Police first asked me where I kept my belt. I had not told them I kept the powder in it, nor did I remember. If I did, I would have taken it out and thrown it away. I was asked if I recognised my powder, and I said I did. Akbar Ali asked where I used to keep my powders. I said, "In the pocket of my belt." He asked where it was. I said, "With Budhar." The Resident had given it to him. When the police came, I was called for enquiry to the bungalow. The belt was given to Budhar in my presence. It was several days before the police found the packet in the belt. I don't remember how many days. I had no recollection about the powders. Before Colonel Phayre I did say to save my life that I suspected Faizu. Those people were also going to the Durbar. When asked whom I suspected, I said, "Faizu and all other people go from the town there." Because they were living in the town, I said this. I did not accuse them. I said, "Faizu lives in the city, and there is suspicion against him." I said, "I suspect Faizu." I had done it. Many persons were mentioning Faizu's name. I said, "As

Faizu lives in the city and goes to the palace, I suspect him." I suspected that powder might have been given him in the same way as to me and Pedro. This was why I accused him. After Colonel Phayre released me I lived at home. I had applied for a putta (belt). The Saheb did not give me re-employment. He said "When the Sahebs come and enquire, you will be reinstated." I don't know if Bhau Poonekar interfered on my behalf. I did not ask him to do so. I did not talk on this matter to him. He used to go to the bungalow and used to see me. At the time the Saheb was about to leave this he was at the bungalow and I saw him (Bhau Poonekar). This was after my attempt at poisoning. I did not talk with him on this subject. I don't recollect. I did not converse with Bhau Poonekar about the Maharaja; nor did I do so or he do so about the Maharaja after the attempt. Bhau Poonekar did not ask me if the Maharaja knew about it. I never mentioned the Maharaja to him. I did not see him before I was examined by Mr. Souter. I did not see him at that examination, nor about that time. I consented to poison my master, being a poor man, and having a lakh of rupees offered. That lakh was my inducement—too much for a poor man. During the month I was at liberty I did not ask the Maharaja. I did not leave my house or go anywhere. I put poison into the Saheb's sherbet on the Monday when the report got abroad. I used all the last packet at once. The Jemadar brought me the packet on the Saturday. Since my examination by Mr. Souter I have not been to the palace. I have been in confinement from that day. The Maharaja spoke to me about poison. I knew him two months before that. I had been called. I was called two months before the Commission came.

RE-EXAMINATION BY MR. SCOBLE:—That was for asking about news (*khaber batmi*),—I mean I was to tell him whatever I should hear at the bungalow. Poison was first mentioned after the return from Nowsari, about five months. After the 9th when I put in poison I was suspended and remained at my place. After my suspension neither Salam nor Eshwant Rao came to my place. I had gone to the palace alone before the Commission came. Salam or Eshwant Rao was always with me when I was taken to the palace. After my suspension and when in my house I don't remember if any watch was placed over me by the Sirkar. I have a mark on my stomach left by my boil.

ON THE APPLICATION OF MR. SCOBLE, THE WITNESS GOES INTO A ROOM IN THE COURT-HOUSE TO HAVE THE MARKS ON HIS BELLY EXAMINED BY DR. GRAY.

BARODA, 3rd *March* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XXV.—DR. GRAY RECALLED.

EXAMINED BY MR. SCOBLE:—I have examined the last witness (Raoji). There were three marks on the belly about one inch and a half above the navel. That is near the place where the string of his drawers was tied. They might be caused by the application of caustic or hot iron. They are not such marks as a boil would be likely to leave. They are what a blister or a burning substance would be likely to leave.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I have been in Court and heard the witness' story. White arsenic might cause them—arsenic in contact with the skin. A man would feel the irritation within an hour. It is my opinion that the marks might be caused as described by the witness in his evidence. This is after taking into consideration that he described it as a swelling something like a boil. I think the marks could have been caused by arsenic on an unbroken substance. I should say arsenic is not the cause of a boil. If I had heard nothing, I should have said that the marks were caused by caustic or hot-iron. Natives use cautery on the most trivial occasions.

RE-EXAMINED BY MR. SCOBLE:—Arsenic is a caustic. Arsenic suspended in water or other liquid and oozing through a bottle would be capable of producing such marks.

BY SERJEANT BALLANTINE:—I remember the bees-wax and cotton in saying this.

BY SIR R. MEADE:—A boil would not leave such a mark. If caustic were applied to such a boil, it would depend on the age of the boil.

BARODA, 3rd *March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXVI.—RAOJI RECALLED.

BY THE PRESIDENT:—After using the bottle on the Monday morning I hid it in the verandah where the carriages stand near the wall. The Police came and searched for it. I pointed out the place, but it was not found. Nobody knew of my putting it there. The bottle was as long as my fore-finger.

BARODA, 3rd *March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXVII.—NARSU STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Narsu Rajana. I was Jemadar of peons at the Residency, and had been employed there I guess 30, 32, or 34 years. I have been Jemadar 17 or 18 years. My pay was Rupees 14 per month as Jemadar. Raoji Havildar got Rupees 10 a month. I lived in the city. I usually came to work at 7½ or 8 o' clock in the morning. In the evening I went home at 7 or 8 o'clock, or if Cutcherry was over at 6½ P.M. I remember the Commission sitting at Baroda. Raoji said something to me, *viz.*, "Eshwant Rao and Salam say you should go to the Maharaja's." I said "I cannot go just now as there is sickness in my house, and I am deeply engaged in my service." The suggestion of going to the Maharaja's was again made to me after the Commission was over by Raoji and Salam. I knew Salam since, not before, he began to come to the Residency. He began to come. After Khunderao's death I was in the service of Jumnabai; and after my return to the Residency Salam used to come—in the time of Colonel Barr. Jumnabai was at the Residency. I was deputed to serve her when she was there, and also for two months more when she went to Poona. Colonel Barr and Mr. Tucker deputed me. Colonel Barr was Resident then, and Mr. Tucker came to Baroda. Both Salam and Raoji spoke to me after the Commission was gone about going to the Maharaja. Eshwant Rao Jasud spoke to me once or twice. Salam and Raoji spoke to me often on Sundays and Mondays, when the Maharaja used to come to the Residency. I did ultimately agree to go to the Maharaj. I did go to the Maharaj. The first time I went was about twenty-five days or a month after the Commission left Baroda. Raoji and Salam went with me, and another man who went with Raoji. We went to Eshwant Rao's house, and thence to the Maharaja's. I did not go with these people to Eshwant Rao's house. I found them at Eshwant Rao's. I went thence to the Maharaja's—to the Bara—or Haveli, from the rear. Raoji, another man, and Salam went with me, and Eshwant Rao by another way. Those who went with me were Raoji, a man with Raoji, and Salam. We went. We entered the Palace from a rear entrance where a new garden has been lately laid out. I don't know that garden's name. Eshwant-Rao went by another road, and brought the Maharaja and came with the Maharaj.—I mean Eshwant Rao went from his house by himself and very likely entered by the front entrance. He did not go with us. We went

to a room upstairs. I first sat down at a place some steps below the room. When Eshwant Rao had brought the Maharaj there, Salam said to me "Come upstairs." I went up. Raoji and I, we two went up. Raoji's companion remained below, downstairs. On going up I saw the Maharaj. Eshwant Rao and Salam were with him. I sat down. Eshwant Rao and Salam began talking with the Maharaj. I had some talk with the Maharaj. At first the Maharaj expressed anger. The Maharaj said "This man is a rogue (*lúcha*), why did you bring him?" Raoji said "No Sir, he will not do roguery (*lúchai*) now." Raoji, Eshwant Rao and Salam they all spoke thus. I said nothing to their speaking about *lúchai*. The Maharaj said "In the same way through Salam you will give news and information from the Residency." I said "Very well." And that was all I said. No more occurred at this first interview. I went to the Maharaj on a second occasion—a month more or less after. Raoji and Salam went with me, and also a man with Raoji. There was one man with Raoji, named Karbhai. On this second occasion I saw the Maharaj, so did Raoji. Karbhai was made to wait below, and did not see the Maharaj. Karbhai was a punkawala at the Resident's bungalow. Conversation took place between the Maharaj and Raoji. I did not take part. If they put a question to me, I said "Yes." These visits did not occur by day but by night. We left this place at 8 or 8½ P. M., and reached the Maharaja's at 9 or 9½. On the second occasion I went to Eshwant Rao's house, and thence to the Maharaja's. Salam and the others went into the Palace with me together. Between the two visits Salam used to come to the bungalow and we exchanged salaams. We said nothing to each other. Raoji and Salam used to sit together. Eshwant Rao and two or three sowars used to come before the Maharaj when the latter came to the Residency. On such occasions Raoji and Salam used to sit together. I went to Nowsari with Colonel Phayre. The Maharaj went there also at the same time. Salam went there with the Maharaj. Eshwant Rao did not. Salam lived in the same place at the bungalow where the Saheb put up with some sowars. I mean in the compound. Raoji caused a present to be given to me. Perhaps the Maharaj said something to Salam. Salam said nothing to me. Raoji said to me "Two hundred and fifty rupees have been given for you." I said "What am I to do with the money here?" He left that money with Salam. Raoji did so. When Salam was about to return to Baroda, Raoji said "The money has been sent to your house." Salam after having paid the money to my house reported to me. Raoji told me the money had been sent. Raoji said "The money has been paid to your brother." On my return I came to know that the money was received. When at Nowsari I did not go to see the Maharaj. When the Saheb went to see him two or three times I went with the Saheb. I had at Nowsari no private interview with the Maharaj. After I returned from Nowsari to Baroda I went to see the Maharaj. This was a month more or less after my return. I went there after going first to Eshwant Rao's house, where I met Raoji and the persons who usually went. I mean Raoji, Karbhai, and Salam. Eshwant Rao did not go with us, but went by himself; he was at his house. He said "Go on and I will follow." I went from his house to the Haveli. We went by the garden side. After waiting sometime the Maharaj came there into the same room. I, Raoji, and Salam went to see the Maharaj. Except Raoji and the Maharaja's servants none went with me into presence of the Maharaja. Karbhai never did. One Jaga did once. At this first interview after my return from Nowsari, Raoji had conversation with the Maharaj. Raoji used to write on a note the names of people who came to the Residency. I mean he wrote the conversations that took place at the Residency. Eshwant Rao, Salam, and the Maharaj were sitting there. Raoji said, "The present in honour of the marriage,"—I mean the marriage made by the Maharaja. Then Eshwant Rao said to the Maharaj, "Maharaj, nothing has been given to these persons." The Maharaj said "Do make some arrangement regarding these persons." On that occasion nothing was given. I received something afterwards, ten or fifteen days after. I received Rupees 800. Salam brought me that money. We, *i.e.*, I and Raoji, divided it. Some was also paid to Salim and the punkawalla. I paid the money to Raoji, who paid it to the punkawala Jaga. I paid Salam

100 rupees. I got myself about 300 out of the 800 rupees. When it was in the depths of the monsoon Raoji did not himself take his news notes, but used to give them to me, and Salam used to get them from me. I got from Raoji and gave Salam about 20 or 25 chitties. I did not give them on the Mondays and Thursdays Salam used to come to the bungalow, but on other days. Raoji used to write them daily, excepting Mondays and Thursdays. After the receipt of the Rupees 800, I went again in one month and a half or two months to see the Maharaja. On this occasion I went from Eshwant Rao's house, from which went with me Raoji and Karbhai. Salam went on ahead but with us, and one of Eshwant Rao's men went with us. I saw the Maharaj in the same place as usual. It is a small room, where there is a bench and a mirror. There were some candle-sticks of brass for giving light. The Maharaj sat on a raised seat or bench. I sat on the ground. Raoji also sat down. I and Raoji saw the Maharaj. Eshwant Rao and Salam were with the Maharaj. The Maharaj had some talk with Raoji. I was present, heard, and took part. The Maharaj said "The Saheb now becomes very angry, and some endeavour should be made regarding it." Eshwant Rao said, "It is the intention (*irada*) of the Maharaj. The Maharaj will give you something, you try to put it in (*dalna*)." The Maharaj said, "Yes, you should do something by which the thing should go into his stomach." I said, "With regard to the food, that does not lie in my province; I won't be able to do it." Then Raoji said, "If you like I will put it in the pumalo sherbet which he drinks." The Maharaj said, "Very well, try to do it." The Maharaj said, "I will send a packet (*pudi*) which should be given to Raoji." Eshwant Rao and Salam said, "With regard to what the Maharaj says, when he gives it to us we will bring it." The Maharaj said, "If the thing is done, it will be good for you." Eshwant Rao repeated the same thing. By the words "It will be good for you" was meant you will get your meat and drink well, so that you won't depend on service. The Maharaj said this. Salam and Eshwant Rao said the same thing. This interview lasted ten minutes or quarter of an hour. I don't remember the month. The occasion was fifteen days, or twenty, or twenty-five days, or a month before Colonel Phayre discovered poison in his tumbler. At that interview no packet was given me. After it was over Salam gave me a packet the next day. Salam gave it me at my house. The packet was as long as my forefinger, made up in Ahmedabad paper. Salam said to me, "This is the packet to which the Maharaj referred; give it to Raoji." I did not open it, but kept it in my turban. When I came to the Residency at 8 o'clock I gave it to Raoji. After that I saw Eshwant Rao at the bungalow on the fourth or fifth day. I did not hear the conversation then between Eshwant Rao and Raoji. Salam asked me about the packet, whether I had given it to Raoji, and I said I had. I had no further conversation with Salam. Raoji went there. I don't know if he had any. I had at that time no talk with Raoji on this matter, though we were always together there. After the Dassera procession I went again to see the Maharaja. It occurred as follows: Raoji said, "Those people are pressing: they say nothing has been done as yet." I said to Raoji, "You should know that, whether you did it or not." (*The Interpreter says the Dassera is shown in the Calendar as the* 20*th October*.) Raoji said, "As far as I am concerned I did put it (*dalna*)." Nothing more occurred at that time between Raoji and me.

This was eight or ten days after the Dassera procession. About five or six days after I went to see the Maharaj. This was seven or eight days before the attempt to poison Colonel Phayre. I went as usual to Eshwantrao's house about 8 o'clock at night. Raoji, Karbhai, and Jaga punkawala went with me from Eshwant Rao's house. Salam as usual took me into the Palace. Raoji and I went into presence of the Maharaj. We saw him at the usual room. Salim and Eshwant Rao were with him. The Maharaj said, "You are a *lucha* (and used a coarse expression)*; you have done nothing as yet." I said, "Raoji knows that." Raoji then said, "As far as I am concerned I did put it in." Raoji added, "What can I do if your medicine (*dawa*) is not good." The Maharaj said to Raoji, "Very well, I will send another packet, and you do

* *bhosra*.
(the same word of coarse abuse deposed to by witness Raoji.)

it properly (*barábar karo*)." He added "Put it in well." Raoji said, "Very well." Eshwant Rao and the Maharaja both said, "It will be brought to you to-morrow by Salam. Give it to Raoji." Nothing further was said. I then left. Raoji waited a little while. I received from Salam a packet like the previous one, near my house. I brought it with me and gave it to Raoji at the Residency at the place where we sit on our form. This was five or seven days before the poisoning was discovered. I don't remember exactly. I remember that Monday. I came that day at 8 o'clock. I saw Raoji on the seat he used to have, near the private office of the Saheb. That's our usual seat. I had no talk that morning with Raoji. I had some after the disturbance (*gharbar*). This was after the Doctor Saheb had come and gone. Raoji said, "The Doctor Saheb took a tumbler away (*tumbler*)." So saying, Raoji went in front of the bungalow. I had no further talk with Raoji at that time. Raoji said to me, "The Doctor Saheb took away the tumbler into which I had put it." That day when I came from home I found Salam sitting at the bungalow. I had no conversation with him, but went on to the bungalow. On that day I was examined by Colonel Phayre *(Zabani)*. My written examination was taken that day or the next. I was not suspended from employ. I remained on duty at the Residency until the day of my arrest by Mr. Souter. I remember Raoji being taken before Mr. Souter. From the day Raoji was taken before Mr. Souter till I was myself arrested, I had no conversation nor communication with Raoji. I saw Raoji seated at a distance at the place where my deposition was taken. Before I made my statement to Mr. Souter, I don't remember whether I had been told what Raoji had said. When I made my statement, I did not know what Raoji had said. No promise of pardon was made to me before I made my statement. Before I made that statement, I was on duty with Sir Lewis Pelly. On that day he was sitting with Mr. Souter. Neither Mr. Souter nor Sir Lewis Pelly said anything to me. They heard my statement. I was kept under a military sepoy guard at the Residency; for a short time there were Native sepoys, latterly European soldiers. After my statement had been taken down, I went that same day into a garden at the Residency. I fell into a well. After a long service this happened, and I thought I could not show my face after this. It was my fate. I had taken my meal, and then I saw many people coming there. I saw my fellow-servants of long standing. I said, "After my long service, this is my fate." I fell into the well.

Q.—Did you fall accidentally or on purpose? A.—I saw a number of people, my head turned, and I fell (*girparna*) into a well. I remember Raoji shewed me a scar on his stomach. It was before the disturbance about the thing thrown into the tumbler—a few days before—not many. Raoji told me that he had received those scars from a small bottle (*sisi*) he had placed there. It was a swelling (*pola*) and something burnt.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—I had been about 32 years or more at the Residency. I had had no quarrel with Colonel Phayre. He was the same as my parents, and found me with food. It was my bad fate. I was instigated to poison him by Raoji: it was my predestination. The money I received was not for this, but for the marriage. For this the promise was that it would be better for me. I understood that I would get promotion and money. That was why I engaged in the affair. I am to get nothing for what I say to-day. I would not take money in order to perjure myself. It was my fate. Raoji used to make notes of what went on at the Residency. I gave them to Salam. They were on pieces of paper sealed up, and I gave them every day. I have none with me. They may be with Salam or the Sirkar. The room where I first saw the Maharaja was a small room, with a bench in it. There were two mirrors, one clock; it was night, I did not observe what else there was. It was in one and the same room I always saw the Maharaja. Perhaps it led to a bath-room; there were doors leading to other rooms. There was no bathing-place in this room: perhaps the door led to a bath-room. I did not see a bath-room. I know nothing about a bath-room. I have not since been to the Haveli. I was examined before Colonel Phayre. I promised

to tell him the whole truth: but I caused him to write some falsehoods. My conscience had not begun to work then. It was written in my fate that I should tell him lies. I am of the Hindu religion. I said that I suspected Faizu in the attempt to poison Colonel Phayre.

Q.—You knew at the time that Faizu was innocent? A.—Faizu was in the habit of coming to see a Padri Saheb, and so was a Kazi. A Padri Saheb used to come to our bungalow. Salam used to go and sit at Faizu's room. Faizu had a room in the Residency compound, and Salam and those others used to sit there. All the other servants mentioned [*likhwáya*] Faizu's name, and I did the same. I heard that and I also made that statement, so that we might agree. I thus stated a false story. Raoji and I did not agree to mention Faizu. Not only Raoji, but all the other servants mentioned Faizu. I did not make the statement merely because Raoji did. I did not know that Raoji had made the statement. Raoji and I did not converse about it before my examination. Raoji was confined before his examination. Abdulla, Pedro, the hamal, the masal, they all caused that statement to be written. I do not know that Raoji and other servants agreed to charge the Maharaja, nor that they have done so. With regard to the packet brought to me, and which I delivered, there is no falsehood. It is all truth that I say to-day. I don't know that the servants have conspired to accuse the Maharaja of the attempt to poison. I don't know that Raoji has given evidence charging the Maharaja with an attempt to poison. I had five or six meetings with the Maharaja. Perhaps five. I think five times. On the first three times there was no allusion to poison. Salam, the Maharaja, Raoji, and myself were present when it was arranged that a packet of poison should be sent. I don't remember the day of the month or week. One packet was given about 25 days before, and the other about seven days before the attempt to poison Colonel Phayre. (WITNESS' ATTENTION CALLED TO THE FOURTH MEETING WHEN POISON WAS MENTIONED FOR THE FIRST TIME.) I quite understood at the fourth meeting that the intention was to poison the Resident. It was the first time it was mentioned in my presence, or that I knew anything about it. I went again after the Dassera holiday, at the time of the second packet. At the fourth meeting one packet, and at the fifth meeting one packet, altogether two packets were given. The Maharaja became angry and gave a second packet. The fifth meeting was from five to seven days before the attempt to poison Colonel Phayre. I asked Raoji. Salam and others pressed me to know what had become of the powder given at the fourth meeting. Raoji said he had put it in: what could he do? I did not ask him, nor he tell me if he had kept any back, nor how many times he had given it. I did not remonstrate with Raoji about the slow poisoning of my master. I was shown a boil by Raoji on his stomach. I can't say when this was. It was about or after the time of the last meeting. I don't remember. A bottle was kept under a box in our bungalow. At the last meeting with the Maharaja something was given Raoji; I was getting up. I don't know whether it was a bottle or packet. As I was going down I observed something given. I did not ask Raoji what it was. I don't remember asking him after, but he showed me that a bottle was given, and it caused a boil on his stomach. This was with reference to the same vial. I don't remember whether I understood it to refer to the same bottle given at the last meeting. It did (*babat*) refer to the same bottle. I can't be sure. I never saw a second bottle. Most likely it was after the last meeting, but I can't remember properly. I can't remember whether he said he had poured it in.

RE-EXAMINED BY MR. SCOBLE:—I mean the Residency by the bungalow where the bottle was kept. I saw the bottle; I saw it only once. I cannot remember properly. Raoji showed me that after shaking what was in it, it should be put in the tumbler. Raoji showed this. I don't remember when he did this. It was before the day the poison was given to Colonel Phayre. I don't remember how long before. I was under guard and have come out to-day. After two months I have been brought out. Nobody has told me who have been examined before the Commission. I have been under a guard. No one has told me what evidence has been given to the Commission.

BY RAJA SIR DINKAR RAO:—I have gone and come to the Maharaja only in the time of the present Maharaj. I did not do so before the time of the late Commission. I did not go to the Maharaja Khande Rao except with the Resident. I did not go to him to ask for a present. Some minor Sirdars give them, but not the Sirkar. The Diwan Rao Saheb used to give presents directly. It was not the custom to ask of the Durbar. When I agreed to poison, I did not ask about provision for my family. It was on what the Maharaja said that I relied. It was done through Raoji. There were not ten persons present when poisoning was suggested,—only his own servants and us. In my life I have not given any poison. A packet was given me to give to Raoji, which I did. It was his business to arrange how much to use or not. Nobody spoke of accusing Faizu; each mentioned his name in their statements, therefore I did so also; Abdulla, Pedro, Ranchor, the hamals, altogether five or six persons mentioned Faizu's name in their statements. Although the Maharaja called me a *lucha* at first meeting, he trusted me, because Raoji, Salam, and Eshwant Rao took me to him and assured him. I am a Hindu, Telangi or Kamati from Telangana. Why should I be afraid of the police from speaking the truth? I know that I am guilty; it is my bad fate. I state the truth whether the Sirkar pardons or or not,—they are parents. If I were offered a pardon, I could not tell more truth than what I have said. The Sirkar may kill me if they like. I have said without fear what I had to state. In the presence of God I have stated the truth. I have not stated an untruth.

BARODA,
March 4th, 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XXVIII.—JAGA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Jaga Bhagwan employed as a punkawala at the Residency. I know Raoji Havildar and Narsu Jemadar. I knew Salam and Eshwant Rao, servants of the Maharaja. I have been to Eshwant Rao's house. It is in the city. I went with Raoji Havildar. I went twice with Raoji. When I got to Eshwant Rao's house, I saw his karkoon. That was on the first occasion, about 7 o'clock at night. His karkoon gave me rupees. Five hundred rupees were paid altogether. One hundred rupees were given me to keep. Raoji Havildar took the other 400 rupees away. Raoji gave me the one hundred rupees. Raoji got the 100 and the 400 rupees from Eshwant Rao's karkoon. This first visit was 14 or 15 months ago from to-day. I went on a second occasion to Eshwant Rao's house seven or eight months after the first visit. I went at 7 or 8 o'clock at night. I saw Eshwant Rao, Salam and Narsu Jemadar. From there those three and we two, altogether five of us, went to the Haveli. I was made to sit below. The other four went upstairs. They went by the Nazerbagh entrance. I waited till they returned. They were upstairs about two hours. Then I and Raoji Havildar returned to the camp. I was never paid any money on any other occasion. The paper shown me is in my handwriting. I have read it. I wrote it at request of Raoji Havildar and Narsu Jemadar. I may have written two or three other notes at their request. I wrote them at request of Raoji and Narsu. I wrote what they told me. Having written them I gave them either to Raoji or Narsu. I wrote what they caused me to

Paper given to witness to read to himself.

write. They know the substance. The other letters were of another sort to this. They were of the same sort.

The letter is put in on Mr. Scoble stating that it will be proved to be found in Salam's house. It is recorded as X and English translation is read.

TWO OTHER DOCUMENTS ARE NEXT SHOWN TO WITNESS.

I don't know whose handwriting these two letters are in. They are not mine.

(No cross-examination is desired.)

BARODA, *4th March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXIX.—KARBHAI AMARSINGH STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—I am a punkawala. I was not so employed last year at the Residency. I was this year. I don't remember the months. I know Raoji, havaldar of peons. I went with him to the city by night. I went several times—four or five times. My first visit in Raoji's company was I don't remember how long ago. It was in the hot weather, last hot season. I went by the high road to Eshwant Rao's place in the city. On all my visits I went to Eshwant Rao's place; I used to see Eshwant Rao there, and also Salam and Narsu Jemadar. From Eshwant Rao's place I used to go to the Sirkar's Haveli. I may have gone more than once, but don't remember. Narsu Jemadar, Eshwant Rao, Raoji and Salam went with me. I went inside the Haveli. We had to go up three flights of steps and were made to sit in a room, and they used to go somewhere. I mean Raoji, Narsu, Eshwant Rao and Salam. I remained sitting in the room till they returned. I remember going to the Haveli and sitting as described two or four times. I usually stayed sitting, waiting for the others to return, for about half an hour.

CROSS-EXAMINED BY MR. BRANSON:—On the last occasion I was 14 or 15 days as punka-puller at the Residency, and on the first occasion for one month. I went first when the punka was started. I was first employed as substitute after the last Holee (March 2nd, 1874 *J. J.*) I don't know March. The second time was when the punka season was nearly over. It is about three months ago. Before I was first employed I knew Raoji and Narsu. I swear it. For the most part I became acquainted with them when employed there at the punka. I don't remember whether I said before now about my going upstairs and sitting while the others went away. I told Mr. Souter that sometimes I went upstairs, sometimes I stayed below. That is what I told Mr. Souter. I don't know if the extract read to me is correct. I have been in custody for one month and a half on account of this evidence. I stated what I had seen, and so I was kept under surveillance. I was in surveillance three days before I made a statement to Mr. Souter, but I used to go home in the evening. I was under the Khan Saheb's care. One day I was not asked anything. I was asked on two days. I don't recollect if it took Khan Saheb two days to elicit from me what I told Mr. Souter. I saw Jaga about that time. He was in custody. At that time I used to go home. I was under surveillance from the day following that on which the Maharaja was arrested.

RE-EXAMINED BY MR. SCOBLE:—On the first day I was asked nothing and allowed to go home. On the second day I was sitting; I was asked nothing, and allowed to go home. On the third day I made my statement to Mr. Souter and was allowed to go home. I have been in surveillance from the day following the arrest of the Maharaja.

BARODA, *4th March* 1785. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXX.—DAJIBA NAROTUM STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—I am Dajiba Narotum, a bricklayer. I know Raoji, Havildar of the Residency. He got me to get some ornaments made for him. He first spoke to me about the time of the Diwali before last. I went with him and pointed out the house of a goldsmith named Sivlal. I know what ornaments were made on that occasion. They are mentioned in the goldsmith's book. I will tell, as well as I remember, what was made sixteen months ago, *viz.*, a pair of silver anklets (*tora*), a man's gold necklace (*kanti*). Afterwards one gold wristlet called *kani*, two gold finger rings weighing one tola, a boy's waist-ring of silver *kandora*, a pair of small silver anklets for a boy. The making of them commenced in the month of Kartik. The ornaments were taken away at two or three times, as they were ready. I did not keep an account for Raoji of the ornaments. At the time they were made the goldsmith gave a writing (*panch*) or receipt. This is it. It was given to me in Raoji's presence. I said to Raoji, "Take this receipt of yours." He said, "I will take it to-morrow or the day after." It remained with me till I was called to the Residency. I gave it to the Ahmedabad Fouzdar, Gajanand Vithal, who gave it to the Saheb. I know that Raoji was married, but I don't remember the month.

Paper shown to witness.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—Raoji asked if I knew any man of my acquaintance. The goldsmith lives near a pipal tree, not near Raoji's house.

The paper already shown is recorded as Y.

BARODA, *5th March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXI.—SHIVLAL STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Shivlal Vithal, a goldsmith. I live near Ganpatrao Mahajan, near the roadside, outside the city, not in the camp. I know Dajiba Narotum, an acquaintance of mine. He got some ornaments made by me for a puttewala named Raoji, employed by a Saheb. It was said he was employed at the Resident's bungalow. I made ornaments for him at Dajiba's request. I have not got my book, but it is here. This book is mine. I am not learned. I caused another person to write for me. I cause any one I choose to do it. I cannot read or write. I first made a pair of anklets at the time of the Diwali. It is all written in this book. I mean the Diwali before last. I cannot point out Raoji's account in my book. I made one anklet first. I made one anklet, one *dora* or gold necklace, one gold wristlet called *kani* weighing three tolas; and, as I made the ornaments, from time to time I delivered them. They were a pair of anklets, one gold *dora* or necklace, one *kani* or wristlet, two gold finger

Red leather covered book shown.

rings weighing one tola, two child's wristlets of silver; and I also gave a number of gold *putelies* (venetians). Daji took the *putelies*. Sometimes I gave them to Daji. He got the ornaments two or three times, and once or twice Raoji took them. I don't remember if it was fifteen days before or after the Diwali. It is all written in my book. Some I made at the time of Diwali, others afterwards. I point out the anklets, the wristlets, *putelies*, and two finger rings. The other ornaments shown were not made by me. The *dora* or neckchain of gold which I made is not among these. Those I made for Raoji were worth Rupees 500 or Rupees 475. The amount is stated in the book. I received full payment to the last pice. Daji and Raoji came, and I was paid the full amount, not in one payment, but in different payments. I gave a written account of these ornaments to Daji or Raoji. I don't remember who wrote it. I got it written by some one who chanced to be with me. I will recognise it if I can; the paper shown me may be the one, but I cannot be certain.

Ornaments shown.

Exhibit Y is shown to witness.

[No cross-examination is desired.]

BARODA, 5*th March* 1875.

(Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXII.—DULAB STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Dulab Manohardas. I am a goldsmith. I know Raoji, who is employed at the Residency. We both live at the bazaar, but distant from each other. I made for Raoji four gold earrings and a chain to be attached to them round the ear, and another chain for the ear. I have not a regular account of them, but I have entered the sundry sums I received; I wrote the entries. The book shown me is my book.

Account book shown to witness.

Q.—Look at Asad Shud 11th? A.—I point out Asad Shud 11th. The year is not mentioned. I recollect it was last year. I mean the year 30. Here is an entry of the first item—Rupees 7. There is one of Rupees 4½ in part for ear chains; total Rupees 11½. On Asad Wad 1st, Rupees 20 were received that day. This, with a second item of Rupees 20, makes a total of Rupees 40. This is of the 9th. There is an item of Rupees 20 of the 7th. There is another item of Rupees 20; altogether, these make up Rupees 60. These Rupees 60 were given for making the *sanklies* or ear-chains. On Asad Wad 10th, there is an entry of Rupees 8; altogether Rupees 68. Altogether I received Rs. 79-8-0. Of the ornaments on the table, I recognise as my making two rings, two earrings and two ear-chains, all of gold.

Looks at ornaments.

[No cross-examination is desired.]

BARODA, 5*th March* 1875.

(Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXIII.—DALPAT GOVINDRAM STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—I know Eshwant Rao, who is in the Gaekwar's service. I was in Eshwant Rao's service for the last year and ¾ year. I used to keep the

keys of his boxes and do all he told me to do. I did karkoon's work; I kept the keys of his boxes. I could recognize Raoji if I saw him. If I saw Jaga, I would be able to say if I recognize him. I recognize them as these two men. I once saw them at Eshwant Rao's house about one year or fourteen months ago. It was about eight o'clock at night. I gave them something on that occasion—Rs. 500; I mean Baroda rupees. I gave them by direction of Eshwant Rao. When these two men came Eshwant Rao was upstairs in his house.

Raoji (XXIV) and Jaga (XXVIII) called.

[No cross-examination is desired.]

BARODA, 5*th March* 1875.

(Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXIV.—CHAGANLAL STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Chaganlal Damodhardas. I am Sheristedar of the Fouzdari Huzoor Court at Baroda. I know Salam, a Gaekwari servant. I know his house. I remember a police guard being placed on his house about the 23rd December. I can't be exactly certain. I went next day with Hormusjee Ardesir Wadia, Huzoor Fouzdar, to search. There was a Bombay Police Havildar with me. This is him. Hormusjee Wadia is Chief Huzoor Fouzdar, a servant of the Gaekwar. I hold my appointment under the Gaekwar. I saw papers found in the house. They were put into a packet; and as there were many papers, so they were tied up again in a handkerchief and taken to the Huzoor Fouzdari Office. I went with them. Hormusjee Ardesir Wadia and Imam Ali also went. At the Fouzdari Office a label of paper was put over the packet in the handkerchief, and then I sealed the paper with four seals at the corners of the papers. I was directed to do so by direction of Hormusjee Shet. The man who carried the packet from Salam's house to the office was one of my sepoys who went in the same buggy as I did. A memorandum was written on the label: "This packet contains papers found at Salam's house." The packet was delivered to Imam Ali Havildar, who took it away. The handkerchief shown me [folded] I can't identify as that used.

A Havildar calling himself Mir Imam Ali called.

Q.—Open it and see. A.—(After opening it)—This is the handkerchief.

BARODA, 5*th March* 1875.

(Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXV.—MIR IMAM ALI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Mir Imam Ali. I am Havildar in the Bombay Police. When Chaganlal and Hormusjee Ardesir Wadia searched the house of one Salam I was present. I did see some papers found there. Chaganlal sealed them up in a packet enclosed in a *rumal* and gave them to me. I brought it, showed it to the Saheb, and kept it under guard. On the 29th December I handed it over in presence of Salam and Manibhai to the Rao Saheb. Salam was brought and it was placed in front there to be opened.

It was opened in presence of Salam and Manibhai. From the day I received it till this opening of it in their presence, on the 29th, it was kept in our police guard. When I produced it for opening in presence of Salam and Manibhai it was all as perfect as I received it.

BY THE PRESIDENT:—I refer to the last December.

[No cross-examination is desired.]

BARODA, 5*th March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXVI.—MANIBHAI JASBHAI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY:—My name is Manibhai Jasbhai. I am Native Assistant to the Resident at Baroda. On the 29th of December last I was present when a packet of letters was brought by Mir Imam Ali. A paper was gummed over it so as to cover the knot at each corner of the cover. The seals were those of the Fouzdari Court—ink impressions. There were words inscribed to the effect: "Found in Salam's house." Salam was present when it was opened. I did not make a list of all, but I did of some of the papers.

Exhibit X shown.

The paper shown me is one of those taken ... smith. ... bazaar, of the bundle. It bears my signature which I ... to on at the same time.

These other papers were also found in the bundle: they both bear my signature made at the time. I have got the list of the papers which I made.

Two other papers shown.

MR. SERJEANT BALLANTINE OBJECTS TO THESE LETTERS BEING RECEIVED AS THEY ARE NOT PROVED.

THE HON'BLE A. R. SCOBLE ANSWERS THAT THEY WERE FOUND IN SALAM'S HOUSE AND ARE CONNECTED WITH THE CASE BY THE EVIDENCE OF RAOJI.

THE PRESIDENT RULES THAT THEY ARE NOT SUFFICIENTLY CONNECTED TO BE ADMISSIBLE.

[No cross-examination of Manibhai is desired.]

BARODA, 5*th March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXVII.—BUDHAR NARSI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Budhar Narsi. At first I was a puttawala, now I am raised to be Jemadar, at the Residency. I was promoted last month to Jemadar. Before that I was puttawala in place of Raoji. I got his belt on the 15th December (*Natal ke mahina*). I got it from Mr. Blandford, Assistant in our office. When I got it I put it on. It remained with me till Christmas, the 25th December. It remained with me from the 15th till the 25th, except when I went to bathe or dine, and then I put it at the *deori* where the peons sit. On Christmas day the Khan Saheb asked me to produce it. It

was on me. Khan Saheb said, "I want to examine your belt." I took it off and gave it to him. The belt shown me is the one I received and gave the Khan Saheb. I point out one pocket. I don't know of another. It is hardly a pocket, rather a place for a sword. I knew of no pocket.

Red Belt shewn.

[No cross-examination is desired.]

BARODA; 5*th March* 1875. } (Sd.) JOHN JARDINE, *Secy. to the Commissioners.*

No. XXXVIII.—AKBAR ALI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF.

BY MR INVERARITY:—I am Khan Bahadur Akbar Ali. I am head of the Detective Police in Bombay. I have been in Government service since April 1831. I came with Mr. Souter to Baroda to enquire into this case. I remember this belt. On the 25th December last I examined it and found a packet. I had asked Raoji where he used to keep the packets he used to bring. He had stated that the packets given him by the Jemadar were kept by him in his pockets. I thought I would be able to find some trace of something dropped from the packet into the pocket. I asked him, "Where is your belt?" He said, "It is in possession of one Budhar at the Residency." Four of us were then present, *viz.*, I, Khan Bahadur Abdul Ali, Rao Bahadur Gajanand ... A Hai ... Imam Ali ... and Raoji. The place was that where our Saheb Mr. Souter was in the ... of writing. This was in the bungalow of the Residency. When Raoji told me his belt was with Budhar, I sent for Budhar, who came. Then Raoji pointed to the belt on the neck of Budhar, and said, "This is my belt." It was on Budhar's neck and round his waist. [*Witness put it on to show that it hung from one shoulder across breast and back and was tied by a cloth at the waist.*] I asked Budhar to give the belt to me. He did so. I began to search it. I put my fingers in here [*shows*]. Raoji said, "Not there, but here." I first put my fingers in the slide. Raoji then said, "Not there," and pointed to this place [*shows*]. Then I put my fingers in there. It is the back pocket—the secret pocket. I felt something hard there. I could not get it out, so I tore up this end. When I saw the packet I sent for Mr. Souter. Then I tore it open. On the upper part was a dirty rag. Budhar said, "That is my rag." In the back pocket I think there was a little bit of white thread. I did not open the packet, Mr. Souter opened it in my presence. I saw what was inside the white paper. It was a white medicine, a powder like flour, white. Mr. Souter kept the packet after that.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—I never speak English. I don't know it, nor understand it. This is the pocket where I found the packet. When I first had the belt the pocket was not torn. I tore it this way [*shows*]. I can't say how much I tore. I tore it because I felt something hard and wished to see what it was. I called Mr. Souter after I saw the packet. I did not call him before the tearing because I was not sure it was a packet. I knew it was something. I knew more after the tearing. I called Mr. Souter that he might see what it contained. Raoji had made a statement to me.

Q.—Why did you not examine it? A.—Raoji said some medicine had remained. When I heard this I did not take it out,—I mean that Raoji said this after he and I saw the packet. Then I sent for Mr. Souter in order that he might open the packet with his own hands. There he was, my Chief, so I sent for him.

Q.—Was it to have a witness to the finding? A.—There were three of us witnesses: Raoji, Gajanand Vithal, Khan Bahadur Mir Abdul Ali and

myself were there. I had no idea of finding a parcel. I thought there might be some trace there. I had no idea what it contained. I could not say if it was a paper parcel. When I felt it hard how could I tell that it was a packet? I felt it to be paper, but not something wrapped up in paper. I could not tell if it was loose paper, tied up paper, or a packet. To find out I tore open the pocket. After Raoji made the statement above described I sent for Mr. Souter. Raoji's statement was made after I tore the pocket and found the packet. He said, "There was some remnant of the medicine left, and this it is." Thus before sending for Mr. Souter I knew what it contained; but I sent for Mr. Souter that he might see. I did not open the packet because the Saheb was close by. Raoji had not told me about the belt. He had simply stated when I asked him where he used to keep the packets. He had not said that he retained some of the medicine in his pocket in his belt. Raoji was brought to me on the 22nd. I, Gajanand Vithal, and Abdul Ali sent for him. A sepoy brought Raoji. He did not confess at first to giving the poison. He said something to Imam Ali, Havildar, who brought him to me. Raoji remained with me from 8 A. M. till the evening, not in my company. He was kept where the other dismissed servants were kept—in the Residency garden. He was brought to me and confessed about the poisoning. The servants fell out among themselves. He made confession of his own accord. I had heard nothing about his being implicated before then. I had heard of his having squandered money. I had not heard of his being implicated in the poisoning until he was brought before me, nor of his having received poison. When he made that statement he was kept in confinement, separate from the other servants. He made the statement on the 22nd. From the 22nd until the 28th he was in my charge. After making the statement and till the 28th he did not go to his house. He did not go where the bazaar, servants were; he was in my charge. I could not tell whether he went to-day saw any of the other servants; he was under guard of sepoys. I don't know that he did. I had given orders that he should not be let talk with any of the prisoners. He was confronted with the Jemadar. I and Gajanand Vithal caused a sepoy to bring him for this. Abdul Ali was there too. The Jemadar was with me then. Gajanand Vithal said to the Jemadar that Raoji had told him all that he had done, upon which I sent for Raoji. First the Jemadar was told that Raoji had confessed all that he had done. He was not told what Raoji had confessed. Gajanand Vithal said, "If you like, you may send for Raoji." Raoji was sent for. He was brought. Raoji confronted with the Jemadar said, "Baba, I have told everything up to my neck." After that the Jemadar said, "I will tell you the fact." He did not tell me. I said, "Don't make a statement to me: come to the Saheb." He made no statements whatever to me. I had witnesses in my charge, not prisoners. They were collected and kept to prevent them going away lest we should not find them again. There were twenty or twenty-two witnesses in my charge. I can give their names. I know Nur-u-din Bora and Nazm-u-din Bora. They are not in my charge. Both are in the jail. They were in Gajanand Vithal's charge, who brought them and kept them where the other witnesses were, but separate. Abdul Ali knows when they went into the jail. It is fifteen, twenty or twenty-five days ago since they went there. They were not kept with the witnesses, but apart. Abdul Ali knows how long they were apart. They were in his charge. I don't know if they were ever taken before any Magistrate till to-day, or before Mr. Souter or any Saheb. Gajanand knows about their statements. Damodhar Punt mentioned Nur-u-din's father's name about arsenic. I now recall that they were sent to jail about arsenic. Because Damodhar Punt said he had brought poison from a Bora's shop, on this statement three Boras were examined; the Police examined them. They were kept in confinement like the other witnesses, but in a separate tent. The confirmation of Damodhar's statement is a big affair, and will take place afterwards. Endeavours were made to get these three men to confirm Damodhar's statement, and are still being made. They have been sent to jail, but have not yet been examined.

RE-EXAMINATION BY MR. SCOBLE:—The lower end of the belt which I tore had been sewed up. I tore open the stitches. Mr. Souter was about ten paces off in a room adjoining and separated only by a chick. It was in the Residency bungalow. Mr. Souter had told me to wait there while he washed himself. He came as soon as called. I first mentioned the belt to Raoji, not he to me. This was when Raoji told me he used to keep the powder in the pocket of his belt. I at once sent for the belt. I had never seen the belt before, nor known Budhar. Having found the packet in the belt, I considered it my duty to send at once to Mr. Souter. Raoji was brought to me on the 22nd at seven or eight in the morning. I did at once put some questions to him. I sent for Raoji because both I and my Saheb strongly suspected him, as we received information from all sides that he had been squandering money and because he used to go to the room where the sherbet was. When I questioned him in the morning he gave no information. I saw him in the evening. I had no leisure to speak to him till the evening, though I saw him in the interval. Narsu was not in custody that day, but on duty as Jemadar at the bungalow. Narsu was not in custody with the servants. The servants were not in my custody, but were brought for inquiries to be made. Faizu and Jaga and Ramabhai were in custody. Ramabhai who had been put in custody by Colonel Phayre was brought up. Raoji was in custody from the 22nd to the 28th. Except on the occasion described, Raoji was not allowed to see or converse with Narsu up till the present time. He saw him on the 24th.

Q.—Did Raoji say anything more to the Jemadar than that he had told everything up to the neck? *A.*—He did not say anything more. Nobody told the Jemadar what Raoji said. After the 22nd December Raoji was where we lived. That was for a few days on the maidan near the Residency, outside the compound. Within each tent two, three, or four persons were kept in custody of police sepoys. habit[illegible] that we transferred ourselves behind Colonel Barton's bungalow, before the Mohurrum, about the 2nd or 3rd February. Raoji has been there ever since. Narsu was for some days under a guard of native regimental sepoys and then of European soldiers. He was kept at the place near the Residency where the guard stays. He has never been in my custody. I have had nothing to do with the matter for which the three Boras are in custody. Gajanand Vithal has to do with it. When Raoji showed that he had told everything up to his neck, the Jemadar spoke, not to Raoji, but to me after Raoji left.

BY SIR DINKAR RAO:—Under Mr. Souter I had authority to enquire into this matter. I did not open the belt in Mr. Souter's presence because I did not know it contained a packet.

BARODA;
5*th March* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XXXIX.—WASANTRAM STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—I am Wasantram, son of Bhikariram. I had employ under the Gaekwar, in the shop at Bombay and Baroda, a shroff or banker's shop, as superintendent of accounts. I used to live in the Palace (Wara) in the treasury department and used to see His Highness. I know Eshwant Rao, also a servant of Mulhar Rao as jasud (messenger). I knew Salam, a servant of the Maharaj. They used sometimes to attend him and sometimes not. I knew Damodhar Trimbak *alias* Damodhar Punt. He was in the private service of the Maharaj, in making payments to sepoys and karkoons. I was once sent for by the Maharaj to read a paper for him eight or ten months ago. I went to the Maharaj. There was a paper (*chit*) which I read out. It was lying on the bench. I took it up, and a khitmatgar told me to read it and I did read it. The Maharaj and other

servants were there. I read it as I am speaking now, in the same tone. It was in Gujrathi. The khitmatgar told me to read it out. I read and kept it with me, and next day I gave it to Damodhar Punt. Some one told me to do so. The Maharaj told me to do so. I have not seen it since I gave it to Damodhar Punt. I remember a little about what it was about. It had no date at the top: "Poonekar and the Nawab Saheb's karkoon are having conversation with the Saheb." I do not remember further contents. There was no date nor signature to the note. I live in my house. I used to go every day to the Palace (Wara). That is the part where cloth is stored up,—I mean the old Haveli. It is there my place of business is. Behind that Haveli is the Nazerbagh. There is an entrance to the Haveli at the back on one side near the Nazerbagh. There is a cutcherry up above. The entrance is ordinary for going and coming.

CROSS-EXAMINATION BY MR. BRANSON:—The ground-floor is used as a store room and the first upper storey for a store room, and the second storey for the Nyayadesh's Cutcherry. His name is Anna Pendse. I am in custody for the offence of reading a letter from the time of the attachment *(japte)* from Thursday, Paush Shudh 6th, the day the Maharaja was arrested.

RE-EXAMINATION BY MR. SCOBLE:—There is a third storey. By passing through a small room there is a passage to go up. That is on the third storey. I am not sure, but believe there is a fourth storey. It lies unoccupied; people go about; that's all. I have been in those storeys. I am living in the street near Champana in my own house. Since the 6th Paush Shudh I have been in confinement in Senapati's Cutcherry, in custody of the Gaekwari police.

[The Interpreter refers to the Calendar and states that Paush Shudh 6th is the 29th December.]

BARODA;
5th March 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XL.—ARTHUR WILLIAM CRAWLEY-BOEVEY STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR INVERARITY:—My name is Arthur William Crawley—Boevey. In November last I was Acting Assistant Resident at Baroda, and lived at the Residency. I remember Monday the 9th November. I had been out that morning early and returned about half-past eight. As I returned I saw some of the Gaekwar's servants, *viz.*, Eshwant Rao jasud, Salam sowar, and another sowar called Madhao Rao Kale. They were these three in the verandah of the Residency when I saw them. They were in the verandah nearly opposite the entrance door of the house. They came up to me,—I mean the door nearly opposite where you go into the drawing room. To the best of my recollection, I saw Faizu talking to Salam. I heard first about something put into Colonel Phayre's sherbet when I came down from dressing about half-past nine. This was just after the Maharaja had left the bungalow. Colonel Phayre told me of it. I afterwards aided Colonel Phayre in making inquiries among the Residency servants. I was present when Raoji's belt was taken away from him. He hung it up himself on a peg in the office adjoining Colonel Phayre's private room. I know the witness Amina, ayah of my wife. She entered my wife's service in April or May 1873. I know she was several times absent. I can't fix the date. She was seldom absent; therefore I remember it. I can remember she was absent once on the death of Abdulla's child, and again on a later occasion not long before the attempt to poison Colonel Phayre. I remember the day Mr. Souter went into the ayah's room.

I accompanied him. Besides myself and Mr. Souter, I think Gajanand Shastri and Akbar Ali and the other Khan Bahadur were there. I was present when she said something to Mr. Souter. She appeared to be very unwell.

THE POINT BEING RAISED BY SERJEANT BALLANTINE WHETHER THE WITNESS MIGHT BE QUESTIONED AS TO WHAT THE AYAH SAID THE PRESIDENT OBSERVED THAT AS THE AYAH WAS CROSS-EXAMINED ABOUT THESE MATTERS THE EVIDENCE IN CORBORATION WAS RELEVANT AND SERJEANT BALLANTINE WITHDREW HIS OBJECTION.

The ayah said she had been to the Maharaja's house and had received money. She made many other statements which I don't recollect. But those were the main facts. Mr. Souter wrote down her statement in my presence on that occasion. I had not before that occasion seen the ayah in reference to this matter. I left Baroda on a Saturday. I think it was the 19th December.

CROSS-EXAMINED BY SERJEANT BALLANTINE:—I knew Bhau Poonekar—he was constantly at the Residency. He was on business about a Government ward, and had been sent there by Mr. Hope, Collector of Surat. He was not in the Residency employ, but in that of the Surat Collector. He got no pay from the Residency. He often gave information about Gaekwari affairs. So did many others. Bhau Khedkar did not. I never saw any arsenic or preparations of copper at the Residency. None were procured by me or by my order. Certainly no poison was procured for any purpose after the attempt to poison Colonel Phayre.

RE-EXAMINED BY MR. SCOBLE:—Bhow Poonekar was employed by the Collector of Surat to manage the affairs of Mir Zulfikar Ali, a ward of the British Government, who had estates in Baroda territory. To my knowledge nobody brought any arsenic or preparation of copper into the Residency after In 6th of November. Nor was there any arsenic or preparation of copper After Residency before that date.

BARODA;
5th March 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. XLI.—DAMODHAR TRIMBAK STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—My name is Damodhar Trimbak. I am also called Damodhar Punt. I am a Brahman. I was in service of the Gaekwar as Private Secretary, and became such 3 or 3½ years ago. My duty was to pay the wages of sepoys and the allowances or wages of *kusbins* (prostitutes), *tomashgirs* (players) and the *shikarkhanas* (hunting department). I had certain funds in charge. They used to be drawn from the shop for private expenses, and I defrayed charges under His Highness' directions. I used to live at Ratnagherry, and at Baroda outside the Leripur Gate. I performed my duties at the *Bara* or Palace in the Khangi Kutcherry (private office). There are 25 clerks there. The Head Clerk under me was Madhav Rao Ramkrishna. There was a clerk, Nanaji Vithal, at the *javerkhana* or jewel department. I knew Balvant Rao Raoji employed under me in the cash department. Nanaji was in a separate department, but his dealings used to be under me. Abaji Ramchandar was also a clerk under me, and used to write what it behoved him to write. Atmaram Raghonath was employed in the *javerkhana* (jewellery department), but received his salary from me in the private department. I used to attend the Palace from 7 A.M. till 10 at night daily. I used to go home at noon for dinner. The Maharaja used to live on the fourth storey from the ground-floor. Durbar people used to go to him by way of the Gadee (Royal seat), which was on the first storey above the private cutcherry. Outsiders came

by Murgasna's entrance which leads direct to the garden. There is an entrance from the public road. That is the Murgasna's entrance. There was another entrance to get to the Maharaja. It is by the Nazerbagh, and there is another from the Kothara Gate. The straightest way to the Maharaja's rooms is by the Nazarbagh. I knew Eshwant Rao. He was in the Maharaja's service as *jasood*. I also know Salam, a sowar in the Maharaja's service. I have seen Eshwant Rao and Salam attending the Maharaja. They were not with him night and day, but came as required. I remember the Maharaja ordering me to give something to Salam; it was arsenic. It may have been in last Bhadrapad Wad, but I don't exactly recollect. (THE INTERPRETER READS THAT BHADRAPAD WAD BEGAN ON 26TH SEPTEMBER AND ENDED 10TH OCTOBER—FROM THE CALENDAR.) The Maharaja said, "Get two tolas of arsenic for itch." He told me to write a note to the Foujdari Department. I did write a note to the Foujdari Department. This note shown me is the one: it bears my signature. There is an endorsement by the son of Ganpatrao Balvant Foujdar. I have not seen his handwriting till now, but I speak from what purports to be his signature.

Note shewn to witness.

MR. SCOBLE READS THE PART SIGNED BY WITNESS AND IT IS RECORDED AS EXHIBIT Z.

The date Bhadrapad Wad 9th (*4th October in calendar*) is the date I wrote it on. The Maharaja told me to write that the arsenic was required as medicine for a horse; therefore I did so. I did not get any arsenic from the Foujdari. Then I directed that some arsenic be got from Nurudin Borah. Before giving that direction I had some talk with the Maharaja. In consequence of a message I received I spoke to the Maharaja. I said, "Hormusji Wadia says he would give it after asking you." Hormusji Wadia was Foujdar. I told the Maharaja what Hormusji said. The Maharaja then said, "Send for it from the Camp." I said, "A pass is necessary in order to procure it from the C[illegible]aar, Then said the Maharaja, "Get it somehow from Nurudin Borah, the ma[illegible] to had business with the arsenal (*Sillekhana*)." By *Sillekhana* I mean the depository for medicines and other articles. I mean the *Dawakhana* (dispensary) which is in the *Sillekhana*. The *Sillekhana* is upstairs in the Haveli, close by where the Maharaja sleeps. The Maharaja also said, "Get a tola of diamonds." This was on another occasion. On the Maharaja's order I ordered Nurudin to bring two tolas of arsenic. I saw Nurudin who had been sent for to the Haveli. I saw him and told him to send two tolas of arsenic. He brought and gave it to me. I don't remember if he gave it on the day when he was told or the next day. The arsenic brought by Nurudin was a packet. I did not unpack the packet to see the contents. I asked the Maharaja what I should do with it. Then the Maharaja said, "Give it to Salam: he will convert it into medicine for itch and will bring it." I gave the packet which I received from Nurudin to Salam. I don't quite remember how soon after I received it, perhaps I gave the packet to Salim two or four days after I wrote the order upon the Foujdari. After giving this to Salam I was directedt o get one tola of diamonds. The Maharaja directed me. I don't remember when it was; it was about eight days after I got the arsenic. When directing me about the diamonds, the Maharaja said, "Get the diamonds and give them to Eshwant Rao." I got some diamonds from Nanaji Vithal, who is in the *Javerkhana* (or Jewel Department).

Q.—What kind of diamonds? *A.*—I did not open the packet to see. I gave the packet to Eshwant Rao after having asked the Maharaja. The Maharaja said, "Give it to Eshwant Rao." I gave the packet to Eshwant Rao. After that I once received further orders from Eshwant Rao, about eight days after. He used to give me orders at intervals of four or eight days. The Maharaja told me that a small bottle had been received from the *Hakimji* Doctor), and had been sent to my house by the hands of Gujaba. Gujaba is a servant of Nana Saheb Khanvelkar, who is the present Pratinidhi and brother-in-law to the Maharaja. The bottle had been brought in the night time; I did examine it. The length of the bottle was a finger and a half. There was medicine in the bottle. The Maharaja had asked me to pour the medicine into another vial, which I did. I

poured it into a bottle which was in my possession and had contained attar of roses. It was a small bottle (WITNESS SHOWS THAT IT WAS AS LONG AS THE TWO TOP FINGER JOINTS). Gujaba poured the medicine into the smaller bottle. I kept the small bottle into which it had been poured; and next day I gave it to Salam by instructions of the Maharaja. I saw the Maharaja in the morning about this bottle,—when I accompanied the Maharaja to the Haveli. I went with him in a buggy. I mean a four-wheeled carriage. I was in the same four-wheeled carriage with the Maharaja. I asked him, "What should I do with that bottle?" The Maharaja told me to give it to Salam. I don't remember the date I ordered it to be given to Salam. It was about the time of last Dassera. I gave the bottle to Salam the next day at 10½ or 11 o'clock in the morning. Another time I was directed by the Maharaja to get some arsenic. He said to me, "Get two tolas of arsenic and one tola of diamonds." These were at different times. On this occasion I did bring two tolas of arsenic from Nurudin Borah. I did see Nurudin; it was he who brought and gave it to me. He said it was arsenic. I did not see it. After asking instructions from the Maharaja I gave it to Salam. I was again directed to get a tola of diamonds by the Maharaja. The Maharaja said, "Get a tola of diamonds from the *Javerkhana*." I don't remember if this was before or after I got my second order for arsenic from the Maharaja. Nanaji Vithal brought and gave diamonds to me. I did not open the packet. It contained three *masas* of diamond powder. I know this because Nanaji told me, and it also contained nine *masas* of diamonds. After getting them, I asked the Maharaja what was to be done with them. The Maharaja said, "Give it to Eshwant." He meant Eshwant Rao Yeola. He said, "The diamonds are for making a crown for the Swami of Akalkot." I gave these diamonds to Eshwant Rao. Some conversation then took place. I gave the diamonds to him at the private cutcherry outside the wall. I asked him, "What are you going to do with the diamonds?" Eshwant Rao said, "They are to be ground into powder and to be given to Phayre Saheb." I said "This is bad." I don't remember any further talk on that occasion between me and Eshwant Rao. I remember a report of an attempt to poison Colonel Phayre on the 1st Ashwin Wad, Monday. *(The calendar shows it to be 26th October.)* The report was on a Monday. I gave the packet of diamonds to Eshwant Rao. five or seven days before I heard of this attempt. The Maharaja on the day of this report came to the Camp and told me about it. I went with the Maharaja's retinue and got down at the Sevak's Dharmsala. He was going to the Camp to the Resident. The Sevak's Dharmsala is by the roadside, near the banyan tree in the Camp, just outside Camp limits. I had accompanied the Maharaja from the Palace to this place. It was eight o'clock in the morning. I got down because the Maharaja did not take me to the Residency. Having got out at the Sevak's Dharmsala, I sat there doing nothing till the Maharaja came back, and then I got into his carriage and drove with him to my own house, where I got out. As we drove back, the Maharaja said, "There is a report at the Residency." I asked "What about?" The Maharaja said, "Narsu used to come every day; he did not come to-day. Raoji made haste and put it." I said, "What is the cause of the haste?" The Maharaja said, "Narsu Jamedar was not outside on guard* for the purpose of whistling. That's the cause of the report." I had more talk about this. The Maharaja said, "Salam ran to Raoji's house. He went there for the purpose of taking the packets and throwing them into the fireplace where the old woman was making bread. Raoji went to his house, because he was not quite sure whether Salam would or would not destroy the packets.† Raoji went to his house. I don't know whether Raoji threw away the packets or not." The Maharaja added, "This is a bad affair." I don't remember that the Maharaja said anything else. I left the Maharaja at my own house. Before this I may have had talk with the Maharaja about this matter. I don't remember. After taking my leave, I went into the Haveli at 11 o'clock the same day. I saw the Maharaja.

* (*Pahera*) watch.

† The word may also be interpreted as "powder."

He was sitting on Lakshmi Bai's bench and was speaking to Nana Saheb Khanvelkar. They were talking about that noise (*bombat* or exciting report) about the poison. I was at a distance and could not hear what they said; I was five or seven cubits off and did not join in their talk. On the same day, Monday, I again saw the Maharaja at noon. He was then sitting on Lakshmi Bai's bench, as I have told. Then the Maharaja and Nana Saheb and I got into a carriage and drove to the race-course, which is outside the city, on the other side of the Railway. In that drive the Maharaja said, "You should keep yourself well informed of any enquiry that may take place in this matter." The Maharaja addressed this to me and Nana Saheb both, regarding the poison. He said, "You should communicate the particulars to me." I did make enquiries that night of several people who came. I next day told the Maharaja what I had learnt. No other person was present. I said, "Raoji had not been found." I mean that he had not been taken up. The Maharaja said, "He is a very clever man and a liar (*labad*)." He said nothing else. On the Tuesday after the Monday of hearing about the poisoning, I saw Salam and Eshwant Rao. I mean the same Tuesday I spoke of Raoji not being arrested. I saw them at the Haveli in the presence of the Maharaja. The Maharaja desired them to enquire abo the case of poisoning. I may have had other conversations about it witl Maharaja. I don't remember them just now. I remember going wit Maharaja on Thursday, and I got down at the Dharmsala. I usually far as that with him when he went to the Residency. During the tim Phayre was Resident, I did not go with the Maharaja to the Resi remember Sir Lewis Pelly coming to relieve Colonel Phayre. I with the Maharaja when he went to pay respects to Sir Lewis Pelly. with the Maharaja to Sir Lewis Pelly on one occasion. I saw Sir Lew The Maharaja went to the Residency. He took me to give evidence of so versation the Maharaja had had with Narayenji; Raji Pandarang. The M had some talk with Sir Lewis Pelly, and when about to depart he introdu to Sir L. Pelly near the door. I don't remember having had a conversation wi the Maharaja about the poisoning after Sir Lewis Pelly came. I did not see Raoji [redacted] all except on one occasion at Nowsari. I remember Mr. Souter coming to Baroda, I heard of it. After Mr. Souter came, I had a talk with the Maharaja about the poison. Raoji had been arrested and released. Thereupon the Maharaja said, "The man with the proof (*múda*) has been released; so there is no apprehension." I don't remember the occasion of the Maharaja saying this. It was after Mr. Souter came. I remember hearing of Raoji's arrest. The Maharaja was told by me, "When Raoji was again arrested, he made a confession." The Maharaja said, "I too have heard so." I don't remember if he said anything more. Raoji made his statement and got a certificate of pardon. The Maharaja said, "If any enquiry takes place here, do not admit anything." He also said to Nana Saheb, Eshwant Rao and Salam, "Do not admit anything." I don't remember, without a particular question being asked me, if the Maharaja said anything else on that occasion. I remember Salam and Eshwant Rao being arrested on the 15th Margsir Shudh Purnima 14th or 15th (*22nd or 23rd December*). There was a note from the Residency directing that they should be sent there. The Maharaja told me that he had sent Eshwant Rao and Salam to the Residency. don't recollect the occasion he told me this. It was the evening of the day they were sent. It was not when the note was sent but in the evening that the Maharaja said this. He said "I have cautioned (*takid*) those two not to confess anything." The Maharaja said nothing more. Eshwant Rao and Salam went to the Residency and came back. They were afterwards sent for again by the Resident and returned the same day. I saw them before they went to the Residency the second time. I saw them at the Haveli—upstairs. Nana Saheb Khanvelikar met me. He was not present. I saw the Maharaja in the evening—after Eshwant Rao and Salam had been sent to the Residency. The Maharaja said, "I have cautioned those two not to acknowledge anything." The Maharaja said nothing more that I remember. I can't remember if he said anything next day. I was arrested on the evening

of the day the Maharaja was arrested. I don't remember what day. It was the day after the Sankrant. On the day the Maharaja was taken I went to the Haveli. At 9 o'clock the Haveli was attached, and all the rooms were sealed up, and a guard placed over the Palace. I was arrested at 8 or 9 o'clock of the morning. Mr. Jackson and Gajanand Vithal said to me, "You should be present at your post: your papers and monies and other things are to be sealed up." I was present when my private cutchery and the Haveli were sealed up. I went home and was immediately sent for again. I was confined in the Senapati's cutcherry in the Haveli, for two days, under a guard of Sepoys, not military, *pardesi* Sepoys. I was brought from Senapati's Cutcherry to the Residency by Sepoys of the Foujdar of Baroda. I was put at the Pesidency under a guard of European soldiers, and so guarded for 16 days, and since then I have been under a police guard. Since I made a confession, I have been in charge of the police. Till then I was in charge of European soldiers. I confessed, because I was tired of being under a guard of European soldiers. One day I was sent to ttend a tent at a garden in the rear of the Residency. The two Khan hadurs were there; and Balvant Rao, Secretary, who is a Karkoon sent for Ahmedabad, and one Bhau Kibbe who is a Karkoon. There were also Sepoys. Then Khan Bahadur said, "I want to examine the papers in ." He sent for me in order that I might be present at the opening als. The box contained the Maharaja's private (*khangi*) papers. It sealed up in my presence. It was in the tent where I was called. were large and of wax. They were unbroken. The box was my presence, and Balvant Rao Kirtan and Bhau Kibbe began to exlso the two Khan Bahadurs did so. I remained in the tent examining rs half an hour. I said nothing to the Police, but they said, "It e well if you would tell what is the truth." They said no more. y else spoke to me. From the tent I was taken back to the guard European soldiers. In the tent Khan Bahadur said something to me. *(Objection being taken by Serjeant Ballantine the question is not put.)* Two days after the examination of the papers in the tent I made my statement to Mr. Richey. Sir L. Pelly, Mr. Jackson, and Captain Seagrave were present; also the two Khan Bahadurs and Gajanand Vithal and Balvant Rao Secretary. When I made my statement, I had received a promise of pardon from Sir L. Pelly. I had not been informed by anybody as to what Raoji Havildar or Narsu Jemadar had said. I was under a guard of European soldiers. When under guard, no one communicated with me. On the day I got a certificate, the two Khan Bahadurs and Gajanand Vithal said to me, "Tell the truth and you will get a pardon," and they showed me a book (*chopadi*) of law (*kaida*). That was all that was said to me. I have said I saw Raoji at Nowsari. This was when the Maharaja went to Nowsari. I saw him at the Maharaja's bathing place. The Maharaja, Raoji and Salam were sitting there. At that time it was 10 or 11 o'clock at night. I had been sent for from my lodging. The Maharaja on my arrival said, shewing me a paper, "Read this." It was Jumna Bai's complaint to the Governor; Jumna Bai is the widow of Khanderao Maharaja. She is at Poona or thereabouts. I read it and took a copy of it. The paper was given back to Raoji. He took it back with him. I made a copy of it by direction of the Maharaja. I was used to read papers to the Maharaja—Maratha papers. They were private *yads* or papers received from the private department. The private department accounts were kept on separate pieces of paper, not in books, I was in the habit of taking a *yad* or receipt* from the person to whom the Maharaja used to direct me to make a payment. I used to make an endorsement in my handwriting to the *yad*. I did so before the receipt (*bharpai*) was taken. Before making the payment I got the Maharaja's sanction. I got his sanction orally. The paper shewn me is one of these *yads*. It bears my endorsement.

The Sankrant in 1875 was Wednesday, the 13th January.

* *Bharpai.*

Paper shewn to witness. Translation read by Mr. Scoble. Document recorded as A 1.

SERJEANT BALLANTINE OBJECTS TO SUCH DOCUMENTS BEING ADMITTED. THE PRESIDENT RULES THAT AS THEY SHEW A COURSE OF BUSINESS AND PAYMENTS BY OR ON BEHALF OF THE MAHARAJA, THEY CANNOT BE CONSIDERED IRRELEVANT.

It is here written generally "paid for articles." The names of persons to whom specific items are to be paid are entered. My endorsement follows. I point it out on the back. It begins, "In accordance with the above memorandum." Then follows the receipt. A *rozkirdi* (daily account) and *talebands* both monthly and annually also were made. The daily account was kept on loose sheets. It shewed the amount credited and disbursed during the day. The monthly account was kept on several sheets of paper stuck together. The yearly account was written on several loose sheets stuck together. I don't know if the yearly account relating to this *yad* has been made or not. Balvant Rao used to keep the daily journal. I simply put on my endorsement. Balvant Rao did the rest. I don't know the pay of Eshwant Rao. Eshwant Rao's pay was not in my private department: it was under the Fadnis Salam was not paid in my department. I have paid money to Eshwant Rao : Salam out of private money in my charge. That *yad* refers to it. But I hav paid them for wages. As to goods brought from Bombay referred to

Witness looks at Exhibit A 1.

yadi, no goods were received. This stater made because payments were to be made here. Servants employed at the Residency were meant. If paymen goods, the Maharaja directed them to be entered accordingly: but ments were for such persons, the Maharaj directed entry in this m for goods, the entry was made like this, but the merchant's name ar lars of the goods received were entered.

This is another *yad* from my Khangi records and bears my end

A document shewn to witness, dated 29th November 1873, and recorded as B1.

It shows a payment of Rupees 18 to Eshwa It professes to relate to goods received from Ahm abad and is like the last. It contains neither the name of the merchant, nor particulars of the goods. The next paper shown

A document is shown and recorded as C1, dated 6th December 1873.

me is one of these *yads* and bears my endorsement. It shews goods received from Salam Walad Ali Arab. No goods were brought from Ahmedabad.

The next is one of these *yads* and bears my endorsement; it is for

Another document shown dated 9th December 1873, and recorded as D1.

Rupees 300 for goods brought from Ahmedabad for Eshwant Rao and paid to Salam. Salam received money. We got no goods.

This is another *yad* with my endorsement. I have seen all these. They

Another document shown, and recorded as E1.

are all from my private dufter and bear my endorsement. One of these relates to fireworks brought from Bombay by Salam. He never brought any. Eshwant Rao in Ashwin or Kartik of last year brought some. In Paush S udh 1930 no fireworks were brought by Eshwant Rao or Salam. No fruit was brought by Salam from either Bombay, Ahmedabad, or Poona. The persons who used to bring fruit and fireworks for the Maharaja are different persons, and there is an account in their names. The fruits were entered in the *Sillekhana* or the private department. There may be a separate account for Salam for fruits, but without seeing the *yads* I cannot say. All the sums entered as paid on these *yads* were paid to the persons mentioned therein and the receipts therein, entered. The payments were made by the Maharaja's directions. The payments were entered as for goods from Bombay, fruits, and fireworks, by the Maharaja's directions.

Other documents put in witness' hands.

The above documents are recorded as F1. to Q1., both inclusive.

BARODA,
8*th March* 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XLI.—DAMODHAR TRIMBAK RECALLED

EXAMINATION-IN-CHIEF

BY MR. SCOBLE:—I spoke of two occasions of getting diamonds. The arrangement was made according to the Maharaja's instructions through me. I asked the Maharaja if the money for the diamonds should be paid. He said yes. I arranged for the payment. Nanaji Vithal has the lighting department in his charge, and some money had been received by him as kaser (savings). He had those monies,—not me. The amount of money from savings was credited. This is the yad received from Nanaji Vithal. It bears my endorsement that it should be credited. It was entered as paid for a feast to Brahmans on account of Swami Narayen. Besides the Rupees 1,706 there is another yadi also this shewn me, and bears my endorsement. Besides the sums thus credited to nuzerana and the other account, I say from looking at the paper now shown me, that it is the order relating to the above feast to Brahmans, and it bears my endorsement. It was written in the yad that the money was paid

Document shewn.

Mr. Scoble reads translation of above document. The original is recorded as R1.

relating to saving, and it is

)ocument shewn. Mr. Scoble reads slation. The original is recorded

t shewn. Translation read, recorded as T1.

'east to Brahmans, but it was really paid to Nanaji Vithal under the tructions of the Maharaja. I asked the Maharaj if the money due to rs was to be paid. He said "Yes." It was my business to see out nance it should be paid. I entered it as paid to Rameshwar—in re- the two packets I mentioned yesterday. Q.—But if it was paid to why enter it to the Brahmans' feast? Because the money paid for monds was not to be credited in the jewel account. Q.—Why not? haraj first of all said "Enter these diamonds as for medicine for making of them, reducing them to ashes." Accordingly an entry to that effect had been made in the jewel department. Afterwards when there was a noise (report) about the poisoning of Colonel Phayre, then I asked the Maharaj, with regard to the entry of diamonds credited as reduced to ashes, whether diamonds could be reduced to ashes. The Maharaj said they could not. On that occasion I asked "What am I to do with the entry made to the effect that they were for medicine and for reducing to ashes?" The Maharaja then said "If the entry has been credited, tear it up, remove the paper." I told Nanaji Vithal to remove it if that was the case. He did so. Therefore the amount was entered as paid for Swami Narayen. Q.—Did you report this to the Maharaja? A.—I had received once for all an order that on such occasions I might assign any reason I liked. I said yesterday that I twice got arsenic from Nurudin. No money has been paid for the arsenic. Nurudin was promised the business of the Sillekhana. After the report (noise or rumour) he asked me for Rupees 200. By Sillekhana I mean the dispensary. By the report I mean the rumour about the poisoning. He said "The Borah in the Camp wants that money." By Camp he meant the Camp of the Residency. Nurudin came to me to the Palace (*wara*). Q.—What took place?

(MR. SERJEANT BALLANTINE OBJECTS. THE PRESIDENT RULES THAT THE CONVERSATION MAY EXPLAIN THE ACT.)

Nurudin said "I brought that arsenic from the Camp and gave it. The first packet had not been entered, and the second packet had been entered in the name of Khangiwala," that is, myself (the witness).

BY SIR R. MEADE:—He meant entries in the shop of the Borah in the Camp.

BY MR. SCOBLE:—He said that the Borah in the Camp had told him that his books had been seized and taken to the Residency. "If you wish that name which has been entered to be concealed, pay me two hundred rupees." I said to Nurudin Borah "Pay the money out of your pocket, and then the amount will be allowed to you in the Sillekhana business, which it is proposed

to give to you." Nurudin said nothing to this. I did not see him after. Nurudin did not tell me the name of the Camp Borah. Yesterday I said I saw Raoji only once, *i.e.*, at Nowsari. I did not see Raoji at the Haveli in Baroda. I heard that Colonel Phayre was suffering from a boil. I heard that in the month of Bhadrapad (September) last year. I don't quite remember. Salam mentioned it to the Maharaj. I was then present. Salam said "Colonel Phayre has got a boil on his head of this size," pointing with his fingers, and that he used to get Raoji to apply a plaster to the boil, and that Raoji had put some arsenic on the plaster—a pinch of arsenic, and that after the plaster was applied, the Saheb felt a burning sensation, in consequence of which he took it off. I heard that. I don't remember the Maharaj saying anything to that. I remember about arsenic to be given to Salam as medicine: after that, eight or fifteen days after or before this conversation. It was about that time. The medicine about which I received order was to be prepared by the Hakim. The Maharaj said "Send to the Hakimji large ants and serpents and the urine of a black horse." If the Maharaj said anything more I don't remember it now. I gave orders to have these things brought. These articles we ordered to be sent to the Hakim. I afterwards got a small bottle from Hakim. Gujaba brought me this. It is the one I described yes' I said yesterday it was a small bottle, and that I put the contents into which had contained attar. I don't recollect if the bottle Gujaba br was stopped by bees-wax, or by a stopper. I fastened the bott gave Salam with cotton and bees-wax. It was a glass bottle. Maharaj received information of what passed at the Residency. Note sent by Raoji to the Maharaj through Salam. I know this, because raj used to direct me to read them. I did use to read them. Af

Four bundles of vernacular papers shewn witness.

read them to the Maharaj, I used to tear The four bundles shown me are *rozkirdu* journals) kept at the place where I used to work. There are four in m One is for the 11th Shrawan Wad (*6th September, Sunday*). I find an entry o Rupees 119-8-0. Part thereof is obliterated with ink. I did not pour the ink over that entry. A karkoon did by my orders. The name of the karkoon to whom I gave the order is Balwant Rao, son of Raoji. The reason for my giving this order is as follows: In the entry it was stated generally "Goods in the name of Salam," and there was no yadi of particulars of the articles. Therefore as there might be some enquiry after the report of the poisoning, I directed that ink should be poured over that part.

THE PAPER WITH THE OBLITERATION IS RECORDED AS U1.

Exhibit P1 is shewn to witness.

The entry in P1 relates to the entry which bears an obliteration.

Paper shewn and recorded as V1.

In the paper shewn dated Jesht Wad 9th (= 8*th June* 1874) there is an obliterated entry. The reason of the obliteration was that Salam's name was entered there. It relates to Rupees 1,000 paid to Salam.

Exhibit N1 shewn.

The paper shewn me is the yad relating to above item.

Rozkird shewn, and recorded W1.

The next paper shewn me is another of these rozkirds. It is dated 3rd Ashwin Shud (= 13*th October* 1874). It has a partly obliterated entry over Salam or Eshwant's name. I can tell by looking at the yad.

Q1 is shewn

The paper (Q1) is the yad in question. The obliteration was made by my orders for the same reason.

Rozkird shewn, and recorded X1.

The next rozkird shewn me is Ashad Wad 3rd (= 2*nd July* 1874). The amount is Rupees 298-12-0. The yad shewn me relates to the entry which bears the obliteration.

Exhibit O1 shewn.

I don't remember what day it was I gave the order to obliterate the entries after the report had spread at the Residency.

When money was paid to give a feast to Brahmans, the person receiving the money gave a receipt for it.

Receipt shewn to witness under an order for payment, recorded as Y 1.

The paper shewn me is such a receipt. It has an endorsement of mine. Similar documents were always given in such matters.

If this* were an order for feeding Brahmans, the signature of Rameshwar should be on it. I ordered obliterations, because something must be done in order that the items might be altered as they were simply "articles" in the name of Salam without a yadi of particulars.

* Exhibit T 1 shewn.

CROSS-EXAMINATION BY SERJEANT BALLANTINE:—All the accounts were not fictitious,—only portions made up for the purpose by the Maharaja's directions, given as there were occasions. I mean the Maharaj knew the occasions. I asked his permission. All I did was under his orders. If I had been accused of theft, I could produce the rozkird, four books, the receipt, the man ·o received, and the man who paid. By such orders of the Maharaj lakhs of ·s have been expended in the last four years, and when necessary, accounts ·. I did the falsifications when directed by the Maharaja. The papers ·ots contain the orders to justify what I did. Except with the Fudnis ·) there are no written orders. I have no authority in the Maha- writing. There are papers signed by Lakshmi Bai, the third wife of ·ia. She signed under the Maharaja's order. During the four ·haraj never signed any papers belonging to my department. There ·s in five places, I could easily defend myself with them. The annual statement was once signed by the Maharaj. You could get like. It is under attachment. Before the attachment there was out the Maharaj to examine my accounts. After that attachment the ·· shewed the papers and said enquiry was to be made. They shewed me ·he papers on which ink has been poured. My pay was Rupees 200, and my brother's pay Rupees 400 a month. I was arrested on the evening of the same day as the Maharaj. I had heard reports about Raoji and Narsu and others being examined. If I got any information I used to tell the Maharaj. Why should I have personal interest? I had assisted in the attempted murder. I have an interest to save the Maharaj and myself. There being an attachment I must be saved now. I used to hear reports from the town. When Salam was at large, I heard directly from him. I did not when at large hear about Raoji's bottle. Nobody told me that he had received a bottle. I heard about powder put into Colonel Phayre's glass, and that it was arsenic and diamond dust. I heard that Raoji confessed to the attempt to murder Colonel Phayre, and I told the Maharaja. The entries were made in five places, and therefore could not be destroyed. I knew they related to my own acts as to the poisoning. All except two related to the bribes. I did not know there was an enquiry going on about the bribes. I swear I did not know when Mr. Souter was enquiring about them. I could not destroy all the papers as they were at different places. The papers at the Javerkhana were only one: that was caused to be destroyed. I could not have destroyed those shewn to-day; there being an entry by the Treasurer. There is a general day-book, 3rdly, a memorandum and receipt endorsed upon it, and after all that the journal now shewn is prepared. After that a monthly statement is prepared and sheets stitched up. Therefore to destroy so many papers in so many places would be difficult. If given in one month only, the papers might have been destroyed. The memoranda (yads) are on separate pieces of paper. If the money had been paid in one month, or at one time, the papers might have been destroyed. There was no opportunity to destroy papers in so many places: there was no help for it. People who poison are punished. I don't know what punishment is provided by law. It is whatever the Judges please. I have not seen that they hang for poisoning at Baroda. I did not destroy these papers as there was no convenience (*suvad* or opportunity). I could get the papers if the Maharaj desired me. The

papers were in my charge. At that time I was not aware that there would be an attachment, or that this time would come. I have no other reason for not destroying them. The ink was used to obliterate parts, because there were no particulars of goods to hide matters connected with Salam and with these transactions. I had orders to give, and I told the karkoon to do as he could conveniently. In order to prevent the Maharaj being accused, and to prevent this proof not being found, this thing was resorted to. I have not invented the story of these papers with a view to accuse the Maharaja.

By Sir Dinkur Rao:—Q.—The papers, as they stood, did not accuse the Maharaja. Had not your pouring ink on them the effect of implicating the Maharaja? A.—The Maharaja told me to make an arrangement, so I poured ink.

Cross-examination:—It did not occur to me at that time that these great pieces of ink on the papers would draw attention to them. Now I feel from the consequence that it was folly to pour this ink on them. I did n expect an attachment (*japti*); I did it toprevent the matter going out. I wo not have got out of the jail unless I had made a confession of some I was first put under a European guard, and for two days was kep Senapati Cutcherry. My companion was a sepoy. I mean two days and t I used to sleep there where I used to sit. A sepoy watched to p running away. Thence I was brought to the Residency, and w room guarded by soldiers. After 16 days, when I made a confe sent to the Police. They send me here with a sepoy and to the ten up and sit down as they tell me. I am still in charge of Police sepoy every four days. I don't know their names. I don't know what wi to me when this is over. That depends on what the Judges say. I a having confessed: if they like they will release me; if not, I must he sentence. If they don't believe me, I shall be punished: if they do, I sh be released. I have a certificate of pardon. There were as many plots to poison Colonel Phayre as are stated in my deposition. I gave these five things,—four tolas arsenic, two tolas diamond, and one bottle: if there was anything more, I don't know. By physician's stuff I mean serpent and ants and horse's urine. That may have been the first or second attempt. I don't remember which. I made a statement to Mr. Richey detailing the attempts as now read out to me (from* deposition). The physician's stuff was brought in the bottle by Gujaba, and transferred to the attar bottle. I can't remember the date. I did not know of the attachment and certificate of pardon in the future. If I had, I would have written dates down. It may have been in Ashwin (*October 11th—November 9th*). I am sure it was in that time. I don't remember how long before Divali. I can't say if it was one week or two weeks before Divali,—it may have been longer. When I gave this bottle I knew perfectly well it was for poisoning Colonel Phayre. I don't remember the day within a week. Asadh had passed two months before. I don't know what August is. Q.—Was it within Asadhwad and Shravan or Shudh? A.—No. Q.—Or within Shravan or Bhadrapad? A.—The first note written to the Foujdari was Bhadrapad Wad 9th (=*4th October* 1874). Since that day all this occurred, *i.e.* between Bhadrapad Wad 9th and Ashwin Wad 15th (=*9th November*). Arsenic could be had only through the Foujdari. I don't know whether arsenic could always be had on the order of the Maharaj. With the Maharaja's permission it could be had. Hormusji Wadia said he would give it after asking the Maharaj. The Maharaj had told me to bring arsenic. He had not issued order to the officer himself. He did not give an order, but told me to get it, and that it was for a horse. I last saw Nurudin after I was in confinement; he was confronted with me once. I don't remember how long ago. I have not seen him in the last two or three days, not in the last week. When he was confronted with me he did not say anything as to whether I told lies; but I told him I had given all in writing. I said to him "I have admitted I bought the arsenic from you." He did not in my presence say

* As to attempts by physician's stuff, poison in a plaster and arsenic.

anything, nor whether it was lies. He was taken away by some officer. I don't know who. I don't remember if it was Akbar Ali or Abdul Ali. How can I remember now? It was not Gajanand Vithal. I don't remember; it might be Akbar Ali or Abdul Ali. I said before him I had bought arsenic from him. I don't remember where he was taken to. Gujaba was brought before me—not by Akbar Ali, but by Gajanand Vithal. I told him I had told all about him. This was when he was sitting. He was also sent back. I have said I gave a bottle to Salam. I knew it contained poison. Gujaba brought the bottle by permission of the Maharaja to my house. I was with the Maharaja's procession. I got down, went to my house, and gave the bottle to Salam. When I gave it, the Maharaja was not present. I said, when giving it, "Take this to Raoji." It was not necessary to say what Raoji was to do. I did not say what he was to do. I knew what it was for. It was to be put in water to cause blisters on the body of Colonel Phayre by throwing it into his bathing water. I did not hear; I don't know if it was done or not. I gave the bottle two or four days before or after the Dassera. I never heard from anyone nor asked what became of the contents of the bottle. Whenever there was business Eshwant Rao used to come to the Palace on Mondays aud Thursdays. Salam used to come for the procession, and if notes were to be brought, he used to come. I never asked Salam what had been done to Colonel Phayre. I knew contents of the bottle. I had no curiosity.

Cross-examination by Mr. Scoble:—I said the accounts were in five places as follows: The order of the Maharaj, an oral order, to give money to persons. On this a *yad* is prepared. Then the Karkoon and the man gets the money go to the treasurer with the *yad*. The treasurer has a book, and the item is entered there. When the money is paid and received it is entered into the *rozkird* (daily account). From that rough *kird* the fair daily account shown to me is made. From the fair daily account the monthly account called *talebund* is prepared. From twelve *talebunds*, an annual account is prepared called *jharte talebund*. Every transaction passing through my hands would appear in all these. Thus any mistake can be detected back. During the last four years lakhs of rupees were paid by the Maharaja's orders. All his private accounts passed through my hands. I never received a written order from the Maharaja for any money during the four years so paid before. On one *talebund* alone the Maharaj had signed. The Maharaj did not sign orders about expenses made daily. He only signed one monthly *talebund* in my time. I mentioned one paper from the jewelry department which was torn up. It related to money expended for diamonds debited as expended for medical purposes. Before my arrest I had heard that Raoji had confessed and stated particulars (*khalasa*) and had got a certificate. After my arrest and before the time of my confession I had not become aware of the particulars of what Raoji and Narsu had said. My statement was taken down in English, and by a karkoon in Maratha. I at that time read the statement taken down in Maratha. It was correct and I signed it. This is the deposition, and it has my signature.

Maratha deposition shown taken by Mr. Richey before Sir Lewis Pelly, recorded as Z.1.

Baroda; 9*th March* 1875.

(Sd.) John Jardine,
Secy. to the Commissioners.

XLII.—HEMCHAND FATECHAND STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

By Mr. Inverarity.—My name is Hemchand Fatechand. I carry on business as a jeweller at Baroda. I know Nanaji Vithal day and night. He is in the Gaekwar's service. I took no jewels to him. Last Dassera I took none, nor about that time. I never took any diamonds to Nanaji Vithal

Not lately. But I did about last Dassera. Nanaji Vithal said, "Bring some diamonds." I took some, but they were given back to me. I took them from our house to Nanaji Vithal. They were returned. I did not take them there a second time. I did not any other time go to the Haveli with diamonds. I never did so after that. Nanaji Vithal purchased no diamonds from me about the time of last Dassera. I never received any money from Nanaji Vithal in payment for diamonds. I received from him a sum of money in the last Kartik—Kartik Margasir—which he owed me. I know Venayekrao Venkatesh. I took him some diamonds to the Haveli on the 7th or 8th of Aso Wad (= 31*st October and* 1*st November*). He is the brother-in-law of Nanaji Vithal. He is employed at the Gaekwar's jewel office. I took these diamonds to the jewel office. I took the diamonds by Venayekrao's directions. On that occasion I took two packets of diamonds to Venayekrao. They were not bought—neither of them. They were rose diamonds (*bilandi*), 6 or 7 to a rati in weight. They were not very small nor very large. Nanaji paid me some money. It was on account of my dealings (*len-den*). I had given a *hundi* (bill of exchange) for Rupees 7,000 to Sivchand Kushalchand at request of Nanaji Vithal. I received the mon[ey] in payment of the hundi. I got one sum of Rupees 2,000—another of 4 [0]00 another of 2,000—another of Rupees 2,000. I received total Rupees [7,]000. There were some other dealings also. The diamonds which I took to V[enaye]krao I gave back to the merchants who came to me to sell them. I took the two packets of diamonds to the Haveli Damodhar Pun[t] present. I did not see him. I never sold any diamonds to Damo[dhar] nor to Venayekrao nor to Nanaji Vithal. I remember Mr. Souter [fr]om me. MR. SERJEANT BALLANTINE OBJECTS TO MR. INVERARITY EXAMINING WITNESS AS TO WHAT HE SAID TO MR. SOUTER. THE PRESIDENT RULES THAT THE QUESTION MAY BE PUT TO REMIND WITNESS OF PREVIOUS STATEMENT. My deposition was written down in Gu[jarathi]. It was reduced to writing in the evening and I was made to sign it. I [di]d it. It was not read over to me. I did not acknowledge that what was written was true. I was forced to sign it. I did not acknowledge anything. I did sign it in presence of Sir Lewis Pelly. Gajanand Vithul said to me—"Don't speak; sign it." It was not read to me in presence of Sir L. Pelly. In his presence I did not say that it was true.

Deposition shewn to witness.

Q.—Is that your signature? A.—This signature does not appear to me to be mine. It is not mine.

THE SAME QUESTION IS REPEATED AND SIGNATURE POINTED OUT. It is my signature.

Q.—Read the three lines above the signature. MR. NOWRAJI, THE INTERPRETER, READS THE GUJARATHI THREE LINES AND HANDS THE PAPER TO WITNESS. Are those three lines in your writing? A.—They are my handwriting. Q.—Show him the signature above those three lines. Is that signature your handwriting? A.—I have seen it. It is my signature. At the time I put my signature, great *zulm* (oppression) was used on me. I was confused and I was made to sign. I can read Gujarathi. I can't make this (the deposition) out well. I can make out part here and there, *e.g.*, the name Hemchand Fatechand. I can't read this document so as to understand it. (The part beginning "A few days after the last Dasera festival Nanaji Vithul directed me to bring some diamond chips which we did.") I did not make this statement to Mr. Souter. They caused him to write what they liked. By "they" I mean Gajanand Vithal. All that has been read out to me is false. I never said anything of the sort when I was examined by Mr. Souter. (Another extract read about Nanaji asking witness if the diamond chips had been used, and about witness substituting pages in his books after the rumour about the poisoning of Colonel Phayre). I did not say to Mr. Souter what has just been read to me nor anything like it. My books have been detained there for a month and a half.

Books shown to witness.

Q.—Are those the books you produced before Mr. Souter? A.—Yes, these are my books. I did not point out to Mr. Souter any entries in these books. Q.—Did you tell him that

certain entries would be found on certain pages in these books? A.—I did not say so. (Extract about the price of diamonds being Baroda Rupees 6,270,— and about entry of Rupees 3,000 credited at pages 10 and 24.) I did not say that to Mr. Souter, nor anything like that. No part read out to me of the statement is true. Since I made my statement to Mr. Souter I have been living at my house in the city. I have had no guard of any kind placed over me. I point out my jangad book (book of goods left with customers for approval). This is my jangad book for Samvat 1930. (*The calendar shews that Samvat* 1930 *ends on the* 9*th November* 1874.) I point out two entries in my *hand-writing*. Gajanand Vithul forcibly caused me to make this entry.

Entry pointed out about Rs. 2,770.
Second entry pointed out about Rs. 3,500.
About 44½ rutees returned.
Total 6,270 rupees.

I wrote this second entry at desire of Gajanand Vithul. Gajanand made me write one on the day in which it rained in a tent, before I made my statement to Mr. Souter. Q.—How many days before? A.—I wrote these entries on the same day in which at evening I made my statement to Mr. Souter.

BARODA; *th 9th*, 1875.

(Sd.) JOHN JARDINE,
Secy. to the Commissioners.

No. XLII.—HEMCHAND RECALLED:—

INVERARITY.—This entry is in my writing. I wrote it together with the preceding entries. Gajanand said—"Write this entry in order that the other entry may not prove false."

The book is unmarked and the entry is read about—one ruby finger ring* Aso Wad 14th (= 7 and 8th† November 1874.) The book is now marked as A2.

*Taken by Dósi Permanand Naranjii for wearing price Rupees 21.
†= Aswin.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—*Read entry shown yesterday Debit to His Highness Mulhar Rao Delivered to Damodhur Punt* personally. Diamonds belandi.

Aso Wad 14th:—

300 in number, 69½ rutties, at Rupees 40 per rutie ...	...	2,770
Diamonds bilandi, 250 rutties, 70, at Rupees 50 per ruttie	...	3,500
Total	...	6,270

Returned purub diamonds coloured weighing 44½ rutties at Rupees 35 per ruttie.

The bilandi and other diamonds are different varieties. Bilandi diamonds sparkle. Bilandi diamonds are thin and brilliants are thicker. Gajanand caused that item to be fabricated. About that time I had no dealings about diamonds with the Maharaja or on his account.

There are items of dealings in these books relating to the Maharaja. I have not supplied any diamond chips to any body. I know diamond dust to be small diamonds. I don't know diamond "lôt." I never saw diamonds reduced to a powder. I was not examined (*zabani lidhe*) before Mr. Souter, but I was examined on two or three occasions. I don't know Mr. Souter (*Mr. Souter is pointed out to witness in Court.*) I was examined before two or three Sahebs. First of all I was examined before the Police (*zabani lidhe*), and then I was taken by the Police before two or three Sahebs. As to the signature I gave it before Gajanand and Sir L. Pelly. I had in the first instance been made to give my (*zabani*) deposition, and my signature was taken to it before. Gajanand sent for me and said—"Put your signature, say

Two other account books shown to witness.

nothing; if you don't I will imprison you." My signature was taken in presence of Sir Lewis Pelly. I have already said I was threatened. Q.—Did you give your evidence befor Sir L. Pelly or had you given it already before Gajanand? A.—Gajanand made me forcibly sign my deposition, and I was afterwards made to sign before Sir Lewis Pelly. I was made to sign what had been written by Gajanand. Gajanand wrote down what he liked. It was not read over to me. Gajanand told me I would be sent to prison if I did not sign. I have been annoyed every day till now. Sepoys seize me and bring me up every day and detain me. I have not seen Gajanand since. I was up here to give evidence. I have not seen him since yesterday. I saw him yesterday before giving evidence. He said—"an item of debit and credit of diamonds to the amount of three lacs has been made in your name which is false." He said nothing else. I did not see him yesterday after giving my evidence. I went home then.

MR. SERJEANT BALLANTINE READS FROM THE ENGLISH DEPOSITION MADE TO MR. SOUTER BEGINNING AT THE PLACE "A FEW DAYS AFTER IT BECAME KNOWN * * * TO POISON COLONEL PHAYRE." I have not sold d monds nor has Nanaji come and asked me those questions. (Re "On hearing this I * * substituted.") As to above I know anything about that matter. (The Interpreter from the reads.—"The books which are now marked A B and C I pro question asked.) (Serjeant Ballantine reads the sentence about R and payment to witness of Rupees 3,000 received from Nanaji Vitha Gujerathi is translated) credited to Shivchand Khushal.) Q.—Lo 10 and 24 of your (*rozmel*) day-book. A.—Here is page 10. Q.— item of payment received? A.—There is a receipt of Rupees 2,000 fr Vithal (*Gharthi.*) It was on account of a *hundi* (bill of exchange) Q.—Look at page 24? A.—Yes. There is an item of Rs. 2,000 f Gu trict called Dumala received from the karkoon employed, on[illegible] I s money due to me for the hundi (bill of exchange). Q.—For Nanaji V A.—It was for the bill of exchange given by me on Shivchand Khushal. The paid bill of exchange has been received and is in Gajanand Vithal's possession. He caused me to give it up to him. There are three hundies. Gajanand Vithal has all my papers—12 of my books and 3 paid bills of exchange. This is one of those bills. There is a payment endorsed on it in the Deccanee letters.

Document shewn to witness. Bill of exchange for Rs. 750.

Two other documents shewn him.

Here are the other two,—one for Rs. 3,000, and the other for Rs. 4,000. Total Rs. 7,000. The items pointed out just now in my books were received in part payment of these three hundies.

(*The Interpreter says one is dated* 10*th Asadh Shudh, Wednesday, without any year, and is for* 3,000 *rupees.*

Another for 4,000 *rupees, dated Tuesday,* 9*th Asadh Shudh, without any year.*)

RE-EXAMINATION BY MR. SCOBLE:—I point out that the Samvat 1930 occurs on both bills for 4,000 and 3,000 rupees. (*The Interpreter reads the date of the other for* 750 *Rupees as Kartik Wad* 30, *Samvat* 1931 (= 8*th December* 1874). Q.—About Aso Wad 14th, when the entries of Rupees 2,270 and 3,500 were made, you had no dealings in diamonds with, or on account of, the Maharaj? A.—Not with him nor on his account Q.—Look at the first item on the page in question, and say whose handwriting it is? A.—I do not know the name of the Gumastha in whose writing it is. It is not in the handwriting of one of my Gumasthas. Any one who comes to my shop may write entries. It is a genuine entry. It refers to brilliants (*billian*). It is dated 13th Aso Wad of last year. (*The calendar shews* = 6*th November* 1874). (The Interpreter translates the entry about a brilliant headdress of brilliant diamonds. Total Rupees 28,000).

Q.—Now look at the entry above that, on the previous page. Do you see a red mark? A.—It is a genuine entry. I find it an entry of ornaments—brilliant diamond ornaments sold to His Highness. (*Witness reads "Rs.* 27,000, *one ornament called tangman* (*necklace*) *of the* 5*th Aso Wad last* (= 29*th October* 1874 *in calendar.*) (ANOTHER PAGE IS SHEWN).

Debited to the account of Shrimant Sirkar Mulhar Rao Gaekwar, Aso Wad 13th. By the hands of Nana Saheb, who has given his signature, Rupees 28,000. One *venan* (female head-dress) made of brilliant diamonds.

Entry about *tangman* (necklace) Rupees 27,000.

Debited to the account of Shrimant Mulhar Rao Gaekwar for Rupees 1,800, one pearl nose-ring.

Q.—Is that another entry of diamonds sold to the Gaekwar? A.—No, a nose-ring of pearls, dated 8th Aso Shudh (*the Interpreter says it is* 18*th October* 1874.) It was sold through Venayekrao or Nanaji Vithal by me. My Gumashta was in the habit of taking ornaments and delivering to which ever of those two might be present. I don't know to whom or on whose account they were received. It might have been thrown away. As to the sale, it was sold to the Sirkar and delivered to Nanaji Vithal. (*The Interpreter translates the entry.*)

Q.—Is not that book full of transactions about diamonds and ornaments [illegible]v you to the Gaekwar in 1930? A.—What occurred is therein entered. [illegible]e many items.

[illegible]Vas not your evidence written down by Mr. Souter? (MR. SOUTER [illegible]ND WITNESS LOOKS AT HIM.) A.—No, not that I remember. I [illegible]ber him asking me questions in Hindustani, how could he if I gave I don't know. I don't understand Hindustani.

[illegible]Mussalmani? A.—What's Hindustani or Mussalmani? I under- [illegible]athi. I do not understand Hindustani What sort is it?

[illegible]ot the first part of your examination yesterday conducted in [illegible].—Hindustani! I understand Gujerathi.

[illegible]T BEFORE MR. SOUTER IN GUJERATHI SHEWN.) Q.—Where did [illegible]ose three lines above your first signature? A.—I was made to write them at the bungalow of Sir Lewis Pelly—in presence of Sir Lewis Pelly. I did not tell Sir L. Pelly about Gajanand practising *zulm* upon me. I did not, because I had been threatened. I made no complaint before Sir L. Pelly. Gajanand said, "You should give your signature, as we ask you to do. Don't raise any objection there about it." From 8 A.M. till 8 P.M. I was not allowed to get away. At one time I was kept in the Resident's bungalow, and at another near some trees near Gajanand Vithal's house. Even last night at 8 or 9 o'clock three sepoys came to my house and told me to go to the Fouzdar. I was not at home; my gomashta was taken to Ramchandar Fouzdar. He sits at the mandai in the city. I have only once been taken to the Residency. Every day I used to sit at the trees near Gajanand Vithul's house, daily for the last month and three-quarters. I was released a day before the assembling of this Commission.

Q.—Look at your (*jangadnond*) account book. Have any new leaves been put in since you first made it? A.—I put no new ones in, nor took any pages out, nor caused either such things to be done.

Account book shown. Exhibit A2.

Q.—Have any pages been put in or taken out? A.—Seven or eight leaves (*pan*) appear to have been removed. I point out the place. Old leaves appear to have been removed and new ones put in. [THE INTERPRETER SAYS THEY ARE THE TWO LAST LEAVES IN THE BOOK.] [THE WITNESS LOOKS AT THE PAGES WITH ENTRIES MARKED BY THE SECRETARY AT BEGINNING OF THIS DAY'S EXAMINATION.]

Q.—Is that page about the ruby ring a substituted page? A.—It has been used fraudulently (*daghalbazi malum padeche*). I can't say whether the page is new or old. These pages appear to me to be new, and the item to be a fraudulent one.

Q.—Take these two hundies of Rupees 3,000 and 4,000. Who are they drawn by and on whom? A.—They are both drawn on Hemchand Fatechand of Bombay. That is my firm at Bombay. They are drawn by Fatechand Somchand (javedi) jeweller. That is my firm here. They are drawn in favour of Shivchand Kushalchand of Poona. Shivchand is a jeweller. Shivchand had sold some goods to Nanaji Vithal for his own purposes, and these hundies were given for them. Nanaji Vithal caused me to draw these bills of exchange—not in full payment. A balance of Rupees 100 or 150 remains, a small balance. Both of these hundies have been paid by my firm in Bombay on account of or to Shivchand Kushalchand. Both are dated Asad Shud. I have not given any hundies except these two in favour of Shivchand Kushalchand. I have entries in my books of payment of these Rupees 3,000 and 4,000. Give me my *nond*. [AN ACCOUNT BOOK IS GIVEN INTO WITNESS' HAND.] My ledger account may give the page of the *nond* (day book) [WITNESS GETS HIS LEDGER]. I have found it [WITNESS POINTS OUT AN ENTRY DATED JESHT WAD 12TH AND JESHT WAD 13TH FRIDAY.] Debited to account Shivchand Kushalchand of Poona two hundies, written and delivered request of Shetjee for Rupees 7,000 on Bombay, at 19 Rupees and and 2½ annas. Drawn on Hemchandbhai Fatechand drawn fr[illegible] by us. Payable immediately. Drawn Asad Sh[illegible] *Interpreter says Jesht Wad 12th and 13th = 11th and 12th J*[illegible] My account amounted to Rupees 10,000. I received Rupees 10,0[illegible] two hundies, with the exception of a small sum. A hundi was gi[illegible]n. Vithal's brother-in-law, Venayek Venkatesh, and the money was p[illegible]y *i. e.*, Rupees 400 or 500 in cash.

The entry about the ruby ring is stated to be Asad 14th = 7th and 8th November.

Q.—How much exactly? A.—I must refer to the account[illegible] new ledger has not been posted. Th[illegible] Gu[illegible] me is the one given to Nanaji's br[illegible]on[illegible] have it entered in my book to accoun[illegible]naji Vithal[illegible] Khusalchand. This was because Nanaji Vithal was owner of that account.

Hundi shewn for Rupees 750, dated Kartik Wad 30th Sumvut 1931 = 8th December 1874.

Q.—Show it? A.—The new ledger has not been posted up.

Q.—Look at your day-book (*Rozmel*) [looks]. Here are particulars. (INTERPRETER READS AN ENTRY OF RUPEES 750 AND ITEM FOR EXCHANGE RUPEES 155-10-0 dated Kartik Wad 30th and Rupees 94-6-0 in cash. Altogether Rupees 1,000.) A.—This item is a correct entry. The hundi was given to Nanaji Vithal's brother-in-law, also the cash, not to Shivchand Kushalchand.

Q.—Look at page 10 of your day book already referred to. Do you find Rupees 2,000 credited to Shri Poonawala, and Rupees 2,000 credited to account of Shivchand Kushalchand of Poona? A.—Yes. [THE INTERPRETER READS DATE, &C.] The words (*haste pote*) "by himself" very likely mean me. I got the money in cash from Nanaji Vithal. It means me. (The Interpreter reads the date, "Wad 9th and 10th Thursday.) It means the month of Kartik, as stated earlier in the account (9th and 10th Kartik (= 2nd and 3rd December 1874 Thursday being the 3rd per calendar.) Who says Gajanand Vithal got this written? It is a genuine entry. Q.—Look at page 24. A.—The date here is Margshir Wad 10th and 11th (=*2nd and 3rd January* 1875) per calendar. "The amount is Rupees 2,000 credited to account of Shivchand Kushalchand of Poona, Rupees 2,000 in ready cash. Examined coin. Received by the hands of your gomashta Kuberji who made payment from Dumala." This Kuberji is very likely gumasta of Damala Department, but is not a servant of Shivachand. There is a karkoon employed in the Dumala Mahal who used to do business for Nanaji Vithal. His name is Nanchand. He may have brought the money. The entries of Rupees 2,000 are not hundies, but cash dealings. The hundi of Rupees 750 and two items of Rupees 2,000 relate to my dealings with Nanaji Vithal, in respect to hundies of Rupees 7,000 and other dealings

and transactions. Q.—How do you make up Rupees 10,000? A.—Hundies paid Rs. 7,000, with exchange, it is Rs. 8,500, that other bill of exchange Rs. 1,000 and Rs. 400 or 500 sundry monies. Nanaji Vithal bought a necklace (*khanti*) from Shivchand Kushalchand: portions of the necklace were sold from time to time. I thus sold the value of it up to Rs. 4,000, and Nanaji himself sold Rs. 2,000, and the balance I received in cash. In order to ascertain the loss which might occur on the sale of that ornament, it was entered to the account of Shivchand, which was owned by Nanaji. I don't observe that the pages of the *rozmel and nond* have been tampered with.

BY SERJEANT BALLANTINE:—I have not sold any loose diamonds of late. Q.—Is there any entry of any such sale in your books? A.—What the books state is true. I don't remember their contents exactly.

BY THE PRESIDENT:—My books were seized about one month and three-quarters ago from this time. They were all seized then—12 books of mine. Until then I used them in the way of my business.

BY SIR R. MEADE:—The seizure of my books occurred I think in the [illegible]th of Paush. (The calendar shews Paush to begin on the 8th January), don't remember the day. This book (Exhibit A2) is the Jungwad [illegible]he Hindu year Samvat 1930. It terminated with Samvat 1930.

[illegible]E PRESIDENT:—There is an entirely new set of books for the new made to write this item (of which the total is Rupees 6,270). After [illegible]ere were originally no other leaves. Q.—Then, if they were no [illegible] beyond this, what was the use of removing them and placing [illegible]—I was terrified. *Question repeated*—Whether there were other [illegible]or not? I do not rightly remember. Yesterday, when I was [illegible]T was desired to wait by a Police sepoy, and made to wait five [illegible]then I was made to wait outside the outer gate. A sepoy at [illegible]pound desired me to wait, and said "I will let you go when [illegible]ion to do so from Gajanand and the Saheb." Afterwards he let me go, and I went home in the evening, and sepoys came to my house at 10 o'clock at night. The sepoys had no conversation with me except what I have recounted.

BARODA, 10*th March* 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. XLIII.—NANAJI VITHAL STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—I am a Brahman employed in the jewel department of His Highness the Gaekwar as Superintendent of it. I know Damodhar Punt. I remember getting some order before the Dassera from him. Diamonds were required for the purpose of reducing them to ashes. I sent for diamonds from two or three persons. Three jewellers brought to me diamonds at the Haveli,—one was Ghelasha, another Pratabsha, and another Hemchand Fatechand. I kept them one day, *i. e.*, the diamonds got from Hemchand, and I shewed them to Damodhar Punt. The other two brought their diamonds the following day. Those got from Hemchand I informed Damodhar Punt of, and kept them with me. On the following day the other two persons brought their diamonds. The diamonds belonging to all three were shewn to Damodhar Punt. He approved of some—those of Hemchand. Those belonging to the other two were returned. Those of Hemchand were weighed and taken. They weighed about 68 or 68½ raties. After weighing they were given to Damodhar Punt. A yad was made about them by one of my two Karkoons. I did not see it. The Karkoon prepared and recorded it. I

gave him oral instructions. Afterwards 5, 7, or 10 days after other diamonds were brought from the same man—Hemchand—by direction of Damodhar Punt—*parab* diamonds and *bilandies*. Hemchand brought them. They were also taken. The quantity was 74, 73½, or 73¾ raties. They were brought according to Damodhar Punt's instructions and given to him. The entry of them was made on the former memorandum: the same piece of paper. The price was fixed. I don't remember it orally. What was written at the Bunia's house is correct. I remember it partly. It was a few rupees over 6,000 (six thousand). The diamonds bought on these occasions were parab (flat) and bilandi (rose) diamonds—2, 3, or perhaps 1 or ¾ to a rati. I did not weigh them separately. I did make a payment to Hemchand in respect to these diamonds. I paid him three thousand rupees on that account in two sums. They were Rs. 2,000 and 1,000 respectively. Rs. 2,000 were to be taken from Damodhar Punt. I had to pay him some money. The memoranda were prepared, and the payments made, according to Damodhar's instructions. Some venetians (putlies) were sold on account of nuzzerana.

Exhibit S 1 shewn. The paper shewn me is one of those yads, a[illegible] bears my signature on that subject. The proc[illegible] were to be credited to the private department. The other relates to the [illegible]

Exhibit R 1 shewn. department. The yad shown me is the one [illegible] the money of those yads in my hands. I [illegible] Rs. 2,000. I caused a Parik to pay that sum. The Parik's name is [illegible] He is the Parik (Shroff) in the Dumala Mahal. I paid the Rs. 1,0[illegible] own house—in cash. A hundi was given for Rs. 2,000, out of wh[illegible] was paid. I had paid Hemchand Rs. 2,000. On account of thos[illegible]n. hundi of Rs. 1,000 was taken from him. The other Rs. 1,000 re[illegible]y him, and on this account Rs. 1,000 were allowed him. I mean [illegible] diamonds. The hundi which I had taken from him was fo[illegible] cash may have been taken, and the hundi was for the balan[illegible] whose name the hundi was in. If I see it, perhaps I can t[illegible]

WITNESS. Th[illegible] Gu[illegible] br on [illegible] ount[illegible]naji Vithal [illegible]

HUNDI OR BILL OF EXCHANGE FOR RS. 750 SHEWN.

This is the hundi. Some must have been taken in cash. I don't remember if this is the hundi in question. The Rs. 2,000 were Baroda rupees. The yad on which these two transactions were written was on the records of the Karkoon Atmaram. I don't know his father's name. At the end of the Diwali Damodhar Punt asked for the yad and received them. I mean about the end of the five Diwali days. He received them from me. He took them and said, "I will tear them up." I don't know if he destroyed them or not.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—I am the Darogah of the jewel department. My duty is to take care of ornaments in the jewel-room and give them out when the Sirkar wants to wear them; also to purchase jewels. Damodhar Punt told me these diamonds were wanted to be made [illegible]hes for medicine (*aushada*). I never saw diamond used as medicine. I have not seen diamond-dust (*lót*). I have been employed with diamonds only for 4 or 5 years. I never heard of diamond-dust, nor saw it. I have been staying at Baroda in charge of the Sirkar, of the Khan Bahadur Police. From the day of arrest of the Maharaj, I have been made to sit, and I considered myself as confined. I don't know why. I have not asked the reason. I am not charged with anything. The jewel department was in my charge, and when the Raja was arrested, perhaps I was. Attachments were made at the palace and guards placed. I was sitting at the Wara 15 or 20 days, and I told about Hemchand after I came to the camp. For those 15 or 20 days nobody asked me anything. I was in imprisonment at the Wara, in Senapati's Cutcherry under a guard of pardeshi sepoys. Nobody came to me there. I was sent for here. Some sepoy went there: there is a Karkoon called Vishnu Punt. Vishnu Punt gave me directions; and in company with a sepoy I came in a gari to Gajanand Vithal, who asked me, "How many diamonds were purchased at the Javerkhana in the month of Ashwin?" He asked me generally, not what I had purchased of Hemchand. I said they had been purchased. I had not heard what Narsu and Raoji had said. I was arrested on the same day as the Maharaja. I had heard nothing of these people having been examined. I know nothing about them. I never heard that they had been examined. I am speaking of that time. I did not hear of it then, not till after I came here. After the Diwali I heard that some attempt had been made to poison. At that time I did not hear that Raoji or Narsu had been examined. I knew that they were in prison. I did not know that Raoji had made a statement. Gajanand Vithal did not tell me about any statement made by them. He told me to tell the truth. I was threatened, and told that if I did not tell the truth I should know the result. I thought that meant I might on telling falsehood be put in prison. What the Sirkar may do will be felt. Whether to get out of the power of the police or not is not in my power. Gajanand did not write down my statement, but got it orally. He took me to a Saheb, not Mr. Souter, but some Saheb who lives in a bungalow, and whose name I don't know. Pelly Saheb was then present, when the other Saheb wrote it down. I made my statement before both. I did not know of Damodhar Punt making a statement. Before going to Sir Lewis Pelly I had been 20 days in custody first and now for a month. The next Saptami will make two months.

RE-EXAMINED BY MR. SCOBLE.—The pardeshi sepoys at Senapati's Cutcherry were Gaekwar's men. The guards were sent from here. Inside, the Gaekwar troops were under the guards. I was taken at 8 at night to Sir Lewis Pelly the same day. I was sent for by Gajanand Vithal.

BY RAJA SIR DINKAR RAO.—I am Darogah of the jewel department and responsible head of it. Besides the *yads* produced no other accounts have been kept of these particular things, but such accounts are kept as a custom in debit and credit. There is no entry in my accounts of these purchases. Damodhar Punt took away the yad. I have not a credit entry of Rs. 6,000 diamonds received from Hemchand. In our department such ledger accounts (*khates*) are not kept, and there is no voucher. Q.—Can purchases to a lakh of rupees be made orally? A.—The entry is made item by item, and details are given below. As regards other ornaments, there is a ledger account of Hemchand, but not of these diamonds, as the yad was taken away. In the accounts of Hemchand each item of the diamond is entered. In the yad what was written was "diamonds purchased from Hemchand Fatechand." Q.—In the Nagwadi yad, why was no entry of these Rs. 6,000 of diamonds made? A.—A paper has to be prepared at the end of the month. Q.—How can a Saukar's account be kept without entering weight, price, and number? A.—At the time of making payment a yad is prepared in the Khangi (private) department, and that yad specifies weight, price, and particulars. In the Javerkhana here vouchers will be found from of old. How can I say if a Saukar's book, or my oral statement shall be considered weighty? Whether my yad is true or false is to be judged by the state of mind of the Sirkar.

BARODA, *March 10th*, 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. XLIV.—ATMARAM STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—My name is Atmaram bin Raghonath. I was Karkoon in the Gaekwar's jewel department, whereof Nanaji Vithal was chief man. Last Diwali diamonds were purchased. About 8 days before the Diwali diamonds were brought by four merchants. The name of one was Hemchand Fatechand. I think Ghela Hemchand was another, but am not sure. Pratabsha was another. These diamonds were brought by the merchants into the room of the Jâmdarkhana. I mean the Javerkhana (jewel-room). Afterwards those of Hemchand

were purchased; those of the others were to be returned. Nanaji Vithal has an assistant, a Karkoon, named Venayek, who wrote some entry about the purchase from Hemchand. I mean Venayek Venkatesh. It was kept in his dufter; it was given to me 4 or 5 days after. I kept it in the dufter (record) for 4 or 5 days more. Nanaji Vithal sent for me one day and took that yad from me. I have not seen that yad since then. I heard in the city of an attempt made to poison Colonel Phayre. Nanaji took the yad from me about Diwali time after I heard of that attempt.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—I am still in the jewel department. Ganpatram Mahajan is now the head of it. Small diamonds are called diamond chips. They are not the pieces cut off in cutting diamonds. I never saw pounded diamond. I was 12 years in the jewel department. The Maharaj used to buy diamonds, small and large, loose as well as made into ornaments. He has a large quantity. Nanaji Vithal approved of the diamonds shewn by Hemchand. Sometimes I was called in by Nanaji Vithal when he purchased and weighed diamonds. I was present on this occasion. Venayekrao made a yad with his own hand, which he kept by him. That is all I know. I never saw the diamonds again. These small diamonds are used for the purpose of setting. I did not know that Nanaji had returned those small diamonds to Hemchand. The diamonds were taken in the manner described, and Nanaji took the yad. The 2nd or 3rd day after that I asked the merchant Hemchand, "Did you "take your diamonds away?" He said "yes." Nanaji said, "I am going to take "the yad away; they are not to be purchased." He said, "I don't want to "purchase the diamonds. I am going to return them. I don't want to buy "them." Nanaji did not tell me not to buy the chips, as he had returned them to Hemchand. I was examined by Mr. Souter. (Mr. Serjeant Ballantine reads from English deposition.)

"*Nanaji Vithal told me, when receiving the yad, that I was to make no entry of the diamond chips, as he had returned them to Hemchand.*"

What I have deposed is true; they were to be returned to him.

BY THE PRESIDENT.—Nanaji Vithal knows—I don't—whether there were loose diamonds in the Javerkhana* when the merchants brought the diamonds. The ornamentation of a scabbard or sword hilt with diamonds—small ones—was going on, and also a jacket was being ornamented at that time. The diamonds used for those had been in store, from what time I don't know, but there is a balance of small diamonds going on from year to year always in store.

* Jewel-house.

BARODA, *March 11th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. XLV.—BALVANTRAO RAOJI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—My name is Balvant Raoji. I was in the private (Khangi) treasury department, employed under Damodhar Punt. These four documents refer to payments which have been made to persons out of the private treasury. I notice in them some obliterations made by ink. I do not know how they came to be obliterated.

Exhibits U1, V1, W1, and X1 shewn to witness.

(No cross-examination is desired.)

BARODA, *March 11th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. XLVI.—RAMESHWAR STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—My name is Rameshwar Morarji. I am a disciple at the temple of Swami Narayen here. I may be called the head man. I did not receive money from the Gaekwar Sirkar for feeding Brahmans in Margashir last; if I had, I should have given a receipt. In that month I did not receive a sum of Rs. 3,632 from or on behalf of the Maharaj. I used to give my signature in writing on such occasions, and then the money was paid me. This writing is not mine. If it refers to Asâdh Shudh, it is right. A feast was given to Brahmans that month, for which I gave a receipt. I know Bholanath Punjaram—my man. I know that man's writing; this is it.

Exhibit Y1 shewn.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—In Asâdh I received Rs. 1,125. The paper shewn me is the receipt for that exact sum (Exhibit Y1).

RE-EXAMINATION BY MR. SCOBLE.—The Rs. 1,125 were for the purpose of giving a feast to Brahmans. I got no other sum except that in Asâdh. The Khangi Karkoon used to come and pay charity (dâkshina): Rs. 375 was the amount. It was paid the same day as that on which the feast took place.

BY THE PRESIDENT.—The reason why no receipt for Rs. 375 was given was that the Karkoon brought the money in quarter rupee pieces and gave it to the Brahmans there.

BARODA; *March 11th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. XLVII.—DATATRAYA RAMCHANDRA STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—My name is Datatraya Ramchandra. I am employed in the Foujdari. I receive orders and accordingly issue instructions to the Karkoon. I mean about poisons. This document bears an endorsement by me. I remember it being brought. No arsenic was delivered out in respect to this note. When this note was received, a Karkoon endorsed it in my name. It remained in the Foujdari until the time Jagjivanbhai sent a Karkoon with directions that it should be given him. Jagjivandâs is the head of the Foujdari. He sent for it about ¾th of a month ago.

Exhibit Z is shewn.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—The rule was: A report or adhikaree's* note is received. An adhikaree then makes a note in my name, and it is then the arsenic is delivered. In this instance there was no difficulty in giving the arsenic; but he did not come to get it, and it never was given. The Gaekwar's order appears in this note. There is an order that arsenic be given when the Gaekwar directs, not otherwise. This has been the rule for the last 18 months.

* Officer or man in authority.

RE-EXAMINATION BY MR. SCOBLE.—This note has not got a Gaekwar's order on it. In the year 29 an order was issued. The endorsement states that the Sirkar Maharaj has given permission for 2 tolas to be given and price taken. It is stated that the 2 tolas be given to Damodhar Trimbak.

Exhibit Z shewn.

BARODA; *March 11th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. XLVIII.—RAMKRISHNA SADASHIV STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—My name is Ramkrishna Sadashiv, commonly called Bhau Poonekar. I have been a resident of Baroda for about 30 years. I am now employed on behalf of Mr. Hope in regard to Mir Zulfikar Ali's business. Mir Zulfikar is son of Jafir Ali, who was Nawab of Surat. Mir Zulfikar is a minor and a ward of the British Government. He has estates in the Baroda territory. I have other business also. I do business for a number of Saukars (traders) and Sirdars (men of rank) as agent. I knew Colonel Phayre. The Diwan, Nana Saheb Khanvelkar, introduced me to him. I used to go to see Colonel Phayre so long as he was Resident at Baroda. I had a letter from Mr. Hope to enable me to go to Colonel Phayre in connection with Mir Zulfikar Ali's case, which was going on at Surat. I saw Colonel Phayre on that business. I may sometimes have seen him on other business. I lived in the city in Ranpura. I told him what I knew of the talk of the city sometimes when he asked me when he returned from his walks. I used to go to see Colonel Phayre at 10 or 11 o'clock in the morning. I never received any payment for any information which I gave to Colonel Phayre—nothing. I remember hearing of the attempt to poison Colonel Phayre on the 9th November. I did not hear it that day, but on the next day at 10 or 11 o'clock, when I went to the Residency. I heard of it from Colonel Phayre. I gave some information to Colonel Phayre on the 2nd or 3rd day after the day Colonel Phayre mentioned the matter to me. A man named Balvantrao came to the Residency. He said he had heard there were three things mixed in the poison given to Colonel Phayre. He mentioned copper-powder and arsenic and diamond sand.* I informed Colonel Phayre, taking Balvant Rao with me. I introduced him to Colonel Phayre. Balvant Rao told Colonel Phayre that he had heard it c ained diamond-powder or sand, arsenic, and copper-powder. Balvant Rao is a Karkoon under Bapu Saheb, a son of a kept mistress of Khanderao Maharaj, and he used to come to the Residency. Balvant Rao said this at the Resident's Office where Colonel Phayre was in the habit of sitting.

* (Chota chota hira ke bhaki or reti.)

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—I remember the Commission enquiry held by General Meade. Q.—Did you get up cases against the Gaekwar? A.—I was obliged to do what the rights of parties demanded. In cases where people were deprived of their rights, it was against the Gaekwar. The 2 or 4 cases which I conducted may be called against the Gaekwar, since money was due from the Gaekwar. I did not do anything to cause injury to the Gaekwar. What do you mean by calling it against the Gaekwar? Colonel Phayre must have known I had conducted these cases. I used to go to him daily, and do so now. I was in the habit of telling him things, but got no money for so doing. Many persons used to give him information. He listened not only to me, sometimes he heard something when he was out, and on his return asked me, and I told him what I knew. The other informants were not employed by me. The Saheb met people when out walking. I don't remember if it was me who told him about a kharita about to be sent to the Viceroy. The Maharaja sent a number of kharitas. I don't remember if I informed about the kharita asking for removal of Colonel Phayre. I swear I did not know it.

* Q.—Did you hear from Bhau Poonekar that a kharita of the 2nd November was about to be sent in to the Government?
A.—I did.

Serjeant Ballantine reads from English notes of Colonel Phayre's evidence.*

Q.—Colonel Phayre says it was you who told him? A.—I don't remember mentioning that kharita to Colonel Phayre. If I had received information about any such letter being written, I did inform him, but how could I know the substance. People talked about the Durbar's consultations, and I heard them. I know all the Baroda people. I know Salam only, because he came to the Residency. I did not go to the palace to see him. I have been to the palace, but not since Colonel Meade's Commission. I know Damodhar Punt by sight. Bapu Saheb is son of Khanderao's kept mistress. He did not claim the throne, but a *nemnook* (allowance). He claims nothing but that. I was kept in surveillance in connection with an alleged offer of a bribe by Bhau Sindia to Captain Salmon, in which affair Bhau Saheb has been dismissed by the English Government. There was no charge against me.

BARODA;
March 11th, 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. XLIX.—JAMES BELLIOT RICHEY STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—My name is James Belliot Richey. I am Assistant to the Governor-General's Agent at Baroda. I am a Member of the Bombay Civil Service. I remember Damodhar Punt being examined by me on the 29th January, and also on the 30th January. He made his statement in Maratha. I understand Maratha pretty well. As he gave it in Maratha, I took it down in English, a Native Assistant, Manibhai, interpreting it into English too as he stated it. I know enough of Maratha to know whether the interpretation was correct. I took down correctly what Damodhar said. I wrote down as graphically as I could from his mouth, and made corrections afterwards. His statement was also taken down in Maratha at the same time. I have here the statements, in English, of the 29th and 30th. They bear my signature, and are the whole in my hand-writing. I don't think I was present when they were read over to Damodhar. I may have been.

Witness looks at documents.

(SERJEANT BALLANTINE OBJECTS TO MR. INVERARITY'S PROPOSAL TO PUT IN THE STATEMENTS. THE PRESIDENT RULES THAT AS THE INDIAN EVIDENCE ACT MAKES ADMISSIBLE SUCH A STATEMENT "IF MADE BEFORE A PERSON COMPETENT TO INVESTIGATE IT," IT IS ADMISSIBLE, MR. RICHEY BEING SUCH A PERSON. ALSO ON PRINCIPLE.)

THEY ARE RECORDED AS B 2 AND C 2.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—Damodhar Punt is not now under my charge. He is under Mr. Souter's charge. I don't know in whose actual custody he is.

BARODA;
March 11th, 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. L.—COLONEL R. PHAYRE RECALLED.

BY SERJEANT BALLANTINE.—I have got the original document to which I referred when my examination was postponed.

WHEN CALLED ON TO PRODUCE, COLONEL PHAYRE ASKS IF HE HAS PERMISSION TO DO SO, AS IT IS A GOVERNMENT DOCUMENT.

THE PRESIDENT RULES THAT THE PERMISSION IS NOT TO BE ASKED, THE PRODUCTION OR NON-PRODUCTION RESTING WITH COLONEL PHAYRE AND THE ADVOCATE-GENERAL. COLONEL PHAYRE REFUSES TO PRODUCE IT.

I will not produce it then, but I will answer questions about it. (*Serjeant Ballantine reads.*) Is this here? (quotes). There are important omissions. There are two more paragraphs.

Your cross-examination was postponed for the purpose of allowing you to get the original of a document to which I referred in the course of my cross-examination?—Yes.

Have you got that original?—Yes.

Will you be good enough to produce it?

SERJEANT BALLANTINE.—The date of the Resolution I refer to is 4th May 1872?—It is dated the 7th May, and must have been altered to 4th May.

But the number is 1,023?—It is 1,233 A.

Very well. Will you hand it to me?

COLONEL PHAYRE [TO THE PRESIDENT.]—My Lord, this is a Government document. Shall I produce it?

THE PRESIDENT.—It is not for me to say.

COLONEL PHAYRE.—Then, if I have the permission of the Court, I shall.

THE PRESIDENT.—I give no permission, one way or another. I leave the matter to be settled by you and the Advocate-General. But I understood the other day from the Advocate-General that it was not available for use.

COLONEL PHAYRE.—Exactly. Then, if your Lordship leaves the option to me, I think it would be better not to produce it. [To Serjeant Ballantine]—I will give you any information or answer any question regarding this document, but I decline to give it up.

SERJEANT BALLANTINE.—Then I understand you to decline to produce this document? I decline to put the document into Court, although, as I have said, I will answer any questions regarding it.

Do I understand you to decline to produce the document?—I do.

Then, I must just ask you whether this which I hold in my hand is a substantially correct copy of the document. Reads—

"No frauds having been shown to have been committed, it only remains "to consider Colonel Phayre's proceedings in this case, and it is with extreme "regret that His Excellency in Council is obliged to record his unqualified "condemnation of them."

Is that correct?

COLONEL PHAYRE.—Important omissions have been made before that.

But is that substantially a representation of the original document?—I cannot say it is a true representation of the original document.

Then do these words occur in the original?—They do.

Serjeant Ballantine reads—

"It would seem that Colonel Phayre not only instituted the prosecution of "these men prematurely before the accounts had been thoroughly sifted, but "that he persisted in doing so against the advice of the Commissioner in Sind "to stay proceedings, and after he had been warned by Sir W. Merewether "that the accounts disclosed no frauds."

Is that substantially correct?

COLONEL PHAYRE.—That comes in after a most important omission from the original document.

SERJEANT BALLANTINE.—Then, I shall leave you to supplement it, if you like. You know it is not my fault. [Reads.]

"Throughout this matter His Excellency in Council has no doubt that "Colonel Phayre believed that great frauds had been committed, and that he "considered the measures he took were necessary to enable him to remove a "gigantic system of chicanery which he imagined was being carried on to the "detriment of the State; but it must be admitted that he has displayed great "ignorance of matters with which as Superintendent of Frontier Districts he "might have been expected to have some acquaintance, and that he has been "singularly hasty and indiscreet in applying to a criminal tribunal before the "accounts, which he held to be suspicious, had been thoroughly examined by "competent persons."

COLONEL PHAYRE.—That also comes in after an important omission.

Serjeant Ballantine reads—

"Moreover, in neglecting the advice and warnings of his immediate "superior, the Commissioner in Sind, and persisting in a course which he knew "to be opposed to the views of that Officer, he has laid himself open to very "great censure. Zeal and honest intentions are not alone sufficient in a public "servant. There must be skill, discretion, and proper subordination. In all "these points Colonel Phayre must be held to have been signally wanting in "this instance. The attitude which Colonel Phayre has assumed with regard "to the Commissioner in Sind in connection with the Khelat affairs has led to "his temporary removal from his appointment at Jacobabad; and His Excellency "in Council with much regret is compelled to observe that the facts disclosed "by these papers render it expedient that he should not be allowed to resume "office as Political Superintendent of Upper Frontier."

COLONEL PHAYRE.—There are two more paragraphs.

THE ADVOCATE-GENERAL.—Of course my learned friend undertakes to prove all this.

Serjeant Ballantine said he did not intend to do so.

The President thought it unnecessary to do as the Advocate-General suggested, because the parts read had been so far proved by Colonel Phayre himself, while what Colonel Phayre had said about the "important omissions" would appear on the record.

At the last Commission there was a Borah case, perhaps Nurudin's it may have been, in which some one was fined by the Gaekwar in connection with a flogging case.

(SERJEANT BALLANTINE SAYS HE HAS NO OBJECTION TO THE OMITTED PARAGRAPHS OF THE GOVERNMENT RESOLUTION JUST READ BEING PUT IN PUBLICLY OR PRIVATELY.)

The Borah, Nurudin, or whoever it was I am not certain, made the complaint against the Gaekwar.

RE-EXAMINATION BY MR. SCOBLE.—The passages just read to me are extracts from a Government Resolution. The original contains important passages omitted by Serjeant Ballantine. The date is the 7th May altered to the 4th May. At that time I was in England in 1872. These matters had been under discussion for a long time; but before that Resolution issued, I was not called upon for any special explanation. There was a long correspondence. On my return from England in November 1872 I was furnished with a copy of that Resolution, on my own application to Government. It had not been furnished to me in the ordinary course of business. I heard of

it casually. I furnished full explanations in two statements of the 8th and 14th November 1872, and thereupon a Resolution of Government was passed exonerating me from the censures contained in the extracts of the Resolution read. That Resolution of the 4th May had nothing to do with my not joining my appointment in Sind. From the date I arrived in India from England I received the same pay as I drew in Upper Sind, until the date of my joining at Baroda. My appointment at Baroda was superior in emolument to the one I had in Sind, and is reckoned to be of superior importance. The document of the 4th May is certainly not a document which would be communicated to the Gaekwar or any Native Prince in the ordinary course of business.

By Serjeant Ballantine.—The Borah I refer to is a medicine-seller, who took an affirmation before me in January 1874.

Baroda, *March 11th*, 1875. } (Sd.) John Jardine, *Secretary to the Commissioners.*

No. LI.—ABDUL ALI STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

By Mr. Inverarity.—I am Khan Bahadur Abdul Ali. I am employed as Inspector of Detective Police, Bombay. In December 9th last I came here with Mr. Souter, and have ever since been here assisting him in investigating this case.

(No cross-examination is desired.)

Baroda, *March 11th*, 1875. } (Sd.) John Jardine, *Secretary to the Commissioners.*

No. LII.—GAJANAND STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

By Mr. Scoble.– Gajanand is my name, and Vithal my father's name. I have got the title of Rao Bahadur. I am 1st Class Police Inspector at Ahmedabad. I have been employed on special duty under Mr. Souter in investigating this case. I came to Baroda on the 10th December and remained here ever since, except visits for a day or two to Ahmedabad. I remember the day the Gaekwar was put in arrest; on that day I went to the Haveli with Captain Jackson about 9 o'clock in the morning or 8 o'clock. All round the Haveli I stationed sentries; then wherever there was property belonging to the Gaekwar we sealed them up. Among these was the jewel-room (Javerkhana), the private treasury, and the accounts and papers of the Khangi (private) department. The accounts and papers were attached and sealed. I think Captain Jackson was present. Perhaps Damodhar Punt, but I don't remember. Those papers remained under seal for 2 or 3 days, when they were brought up, *i. e.*, some of them to the Residency, others such as old private papers are under seal still at the Haveli. The dufter was sent to the Residency and placed in a tent under a police guard. The seals were broken in my presence. I don't remember the day. The Khangi Karkoon was present. Mr. Souter was not, but he came after. Balvant Rao and Madhav Rao of the Khangi Department were present. I don't remember if any others were. The four papers* shewn me were among the papers when the seals were broken. When they were taken out of the dufter,

* Exhibits U1, V1, W1, and X1 shewn to witness.

the inky spatches now on them were on them, and it was, therefore, they were shewn Mr. Souter. I remember Damodhar Punt being arrested. I first saw him after his arrest 15 or 20 days after, and I then had some talk with him. I said to him, "If you give a correct statement, if you tell all of it, then Colonel Pelly will "give you a pardon." I shewed him a section of the Criminal Procedure Code regarding the grant of pardon, in order that he might know all about it. I also said, "Nanaji Vithal and others have acknowledged." Afterwards Nanaji Vithal was made to stand outside the tent, and he said, "I have declared everything "that is true." Nanaji said nothing but this. Damodhar said, "I will consider "about it, and give you an answer." This was about 10 in the morning. I saw Damodhar Punt 2 or 3 hours after. He gave his deposition after Sir Lewis Pelly had given him a pardon. I saw him in the tent. Sir Lewis Pelly gave him a certificate. Sir Lewis Pelly came to the tent, and Mr. Richey there and then in the same tent took down his deposition. I know the witness Hemchand Fatechand. I saw him for the first time before Damodhar Punt made his statement. I saw him on two matters. Q.—When first on this matter? A.—About 4 or 5 days before Damodhar Punt made his statement. It is false that I practised *zulm* on Hemchand Fatechand. It is false that I wrote down what I liked and then made him sign it. It is false that I said I would put him in prison unless he signed what I had written down. I used no threats whatever to him. I did not take his books by force; he produced his books with his own hands. Hemchand Fatechand's statement was taken before Mr. Souter. I was present. After the statement was taken before Mr. Souter, he was taken before Sir L. Pelly. It is false that I said that if he did not sign I would send him to prison. I used no force nor zulm to induce him to sign before Sir L. Pelly. I see the two entries relating to purchase of diamonds three entries, and one about a ruby ring. None of these were written under my directions. I don't quite remember when I saw this book first. Hemchand first brought it to me, and at that time these entries were in it. I have not taken out, nor put in any papers in this book. But that has been done. It was done before I first saw this book. Since I first saw it no alterations have been made in it. The alterations which seem to me made are that old leaves have been removed and new ones put in at the end of the book. Anybody who looks at it can see that. I remember Narsu Jemadar being arrested. When he came to the Residency he was arrested by Mr. Souter's order. I don't know by whom, it was not by me, but in my presence. He was next day in my presence confronted with Raoji. I was sitting with Narsu in the maidan opposite the Residency, and I questioned him about the particulars of his case. The Khan Saheb Akbar Ali and Abdul Ali were also present. I had given instructions to Raoji: "You should say nothing more than that you have stated "everything in the matter," and that was what Raoji said when he came. Raoji said so much to Narsu, and he added, "I have said up to this," pointing to his neck. He said nothing else. I did not say anything to Narsu of what Raoji had said. It was in order that Narsu might not know particulars that Raoji was cautioned. To my knowledge no other Police Officer told Narsu particulars.

Exhibit A 2 shewn to witness and attention drawn to marked entries.

Cross-examination by Serjeant Ballantine.—My object was to get the truth. If Narsu had not confessed, and there was no further proof, I should have discharged him after receiving the Saheb's order. At the Haveli I seized all the papers. When 2 days after the seals were broken, Mr. Souter was present. When I examined the papers I shewed them the same time to Mr. Souter. As soon as I noticed, I sent for Mr. Souter. Before that they were not in my possession, but under a police and a military guard. As soon as I opened the papers, Mr. Souter came,—I mean in 10 or 15 minutes. The whole department of papers at the Haveli was sealed on seizure. I did not seize papers at the Haveli; they were sealed up here and there where they were. Those that had our seals were accessible to me and Captain Jackson. During the time the papers were in attachment, no

body but myself and Captain Jackson had access to them. After I had seen them I went myself and called Mr. Souter. I did so as soon as I observed one obliteration with ink. He came, a further examination took place, and all was discovered. I can point out the falsifications I observed in the book. Some original accounts have been removed. Look here. The previous writing is different to this one line. The papers were as they are now, except that they are further soiled. Anybody can see that this line is newly written. I have many other reasons to prove it. I don't say this line is false, but I don't mean to say anything false has been written on this page; but the book has been altered in order to falsify it by removing an account. In Gujerat the pages are altogether; not torn nor separated; several are torn: look and see how many are connected, and how many unconnected. In the latter part the leaves are not made of the proper number sticking together as in the former part of the book. Where the account of diamonds was entered, an alteration has been made. The entries were made subsequently. The original page, date, and entry was in another place: it has been removed. A leaf has been removed from the place where a number of leaves were together. The entry was subsequently made: the original entry has been removed. Sets of leaves in one place have been torn. I point out that so many leaves have been changed. I presume that leaves have been removed at the place where the set of leaves is torn. I say that pages have been removed from here. Q.—This is the place you shewed before? A.—The previous writing is old; this line is new ink. Pages have been altered from this point. (*The Interpreter says the first entry is Asâdh Wad* 14*th*=12*th July. On another page there is a date Tuesday,* 1*st Shudh of* 2*nd Asâdh*=14*th July.*) Ganpatrao Mahajan is now head of the jewel department. He is father of my son's wife. What do I know of it being suggested on former occasions that I fabricated evidence? I do not know of any such charge being brought against me by a Judge, not in all my life. I was engaged in the Kot succession case. I was chief policeman in it. The Magistrate Saheb conducted it. I did not enquire into the case before Mr. Coghlan. I went on one occasion with Mr. Richey before Mr. Coghlan. I did not conduct the whole of that case. I may have done one act in that case, and may have been sent for, for that reason. Of the police in that matter I was the man whose salary was largest. In 1870 I was 1st Class Police Inspector. Q.—Do you remember Mr. Coghlan saying that he had a disagreeable impression that the police had too much to do in getting up the evidence? A.—If he did it does not apply to me. I was myself a witness. I had nothing to do with getting up the evidence. I don't know if Mr. Coghlan said this. The remark may have applied to the police who enquired, not to me. Q.—Do these words in a further enquiry apply to you? Do you remember the case before Mr. Justice West? A.—Yes, but I was not present before him. I was concerned in the case before the Committing Magistrate. Q.—Reads as "to the case bearing plain marks of falsehood "and fabrication more than others." Did Mr. Justice West in his judgment say that? A.—I was not there; how can I know? I may or may not have heard this? Justice West has been imposed upon by the defendants, and I got proof of this lately, and can produce it here if ordered.

Exhibit A 2 given to witness; he points out a page.

RE-EXAMINATION BY MR. SCOBLE.—Between the locking and sealing the papers in the palace till the day I began to examine them after the breaking of the seals at the Residency, I did nothing to the papers. I found the inky marks, to which I drew Mr. Souter's attention. How long after beginning my examination I don't remember, perhaps in an hour or half an hour. I was superintending, and the Karkoons mentioned were making the examination in this time. They were Karkoons employed in the Gaekwar's Khangi department. I went at once to Mr. Souter, and he came at once. This book is made up of sets of pages or "juz." The number of pages in a "juz" is unfixed. In this book there are six leaves to each "juz." There are six "juzes" which are not split above the sewing. The first five juz and the last juz are entire; the others intermediate are not entire. In the Kot case before Mr. Coghlan I was only concerned as a witness to state what occurred on an occasion when I went to Kot with Mr. Richey.

Witness takes Exhibit A 2.

BARODA, *March* 11*th*, 1875.

(Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. LIII.—HARJIVAN STATES ON SOLEMN AFFIRMATION:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—My name is Harjivan Parshotum. I am Head Karkoon of Gujerathi accounts in the Ahmedabad Collector's Office. I know the way Native account books are made up. They are bound as follows:—Sheets of paper are folded into juz or sets, and then they are bound up. A juz comprises usually 6 or 9 leaves. In a book of 6 leaves juzes, the number throughout would be 6 leaves to each. There would not be juzes of different sizes in the same book. I have looked at this book. In two juzes the leaves are broken. In a juz the leaves are divided below the string. Above the string generally the leaves are not cut, but left entire. If a leaf or two is removed from the middle, it would not be necessary to cut. If one leaf were removed, it would be necessary, or a whole juz might be removed without cutting. The 1st five juzes in this book are entire. The 6th juz has one leaf deficient. In the 6th juz there are 4 leaves not cut up: one leaf is separated and one is wanting. Each sheet has four leaves. In the 7th juz two leaves are joined together and four are loose. The 8th juz is entire: it is the last juz in the book. The 7th and 8th juz appear to me to be made of paper of a kind different to the rest of the book.

Exhibit A 2 shewn.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—One leaf out of the 6th juz is gone: one leaf gone altogether. If I look at the new leaves, I would say 13 have been removed, 12 new leaves put in, and one leaf is altogether missing. There is some writing on the first six leaves out of the 12; the other six leaves are blank. On the preceding page the date is the last day of the first month of Asâdh of last year. (*The calendar date is given as* 13*th July* 1874.) By preceding page I mean "that preceding the missing leaf." The entries shewn me occur on the page which has been put in—those about diamonds and that about the ruby ring on a subsequent page.

Entries about diamonds and about ruby ring shewn of date Aso Wad 14th =(7th and 8th November 1874) in Exhibit A 2.

RE-EXAMINATION BY MR. SCOBLE.—I point out where the missing leaf should be. (This is the entry said by Gajanand Vithal to be begun in old ink and continued in new.)

BARODA, *March* 12*th*, 1875.

(Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. LIV.—F. H. SOUTER STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—My name is Frank Henry Souter, Police Commissioner of Bombay and Companion of the Star of India. On 9th December last I came to Baroda to enquire into the alleged attempt to poison Colonel Phayre.

I had with me as Assistants Abdul Ali and Akbar Ali, and Rao Saheb Gajanand Vithal joined me on the 10th December. I perfectly remember examining the Ayah Amina in reference to this matter. I first saw her on the 16th December about 5 or 6 o'clock in the afternoon. She was in her own room in Mr. Boevey's compound. On that occasion she did not make a detailed statement. I did not on that day take down her statement, because she was very ill and unfit to give a detailed statement. On that occasion she stated she had been to the Maharaj Mulhar Rao's Palace, and also that she had received certain sums of money from him. She had high fever on at the time, and begged me to come and see her at some other time when she would tell me all the details. I have no knowledge that any of my police saw her before I saw her. On the 18th I took down her statement. This is the statement which I took down, in my own hand-writing. I don't require an interpreter for Hindustani. I know the language thoroughly. On the 21st December I took a further statement from her, appended to the first. This is it. On the 19th Dr. Seward came to the Residency. He told me the Ayah was better, and wished to see me. On the following day the 20th I went to the Ayah. I had no writing materials with me. I did not write it down till next day the 21st. I also took Raoji's statement. This paper is the record of his statement which was taken on the 24th, 25th, and 26th. I also took the statement of Narsu. This document is it—in my own hand-writing—dated the 26th December. I think Narsu was arrested on the 23rd, and he was placed in custody of the military guard at the Residency. He has remained under that military guard ever since. Before he made this statement no promise of pardon whatever was made to him. I reported to Sir Lewis Pelly that the Jemadar wished to make a confession, and I should like him to be present at the hearing. Sir Lewis Pelly came into the room where I carried on my enquiries. He explained to the Jemadar distinctly before he made any statement that he would not be pardoned. On the contrary, Sir Lewis Pelly explained that he would be prosecuted. Thereupon the Jemadar took off his turban and laid it at Sir L. Pelly's feet. He said that even though he might be hung, he wished to speak the truth, and tell all that had happened. After that Narsu made the statement, which was not taken down that day. He was removed to the guard, when he made that oral statement: Sir L. Pelly, myself, and others were present. I wrote it down on the 26th instant. I think it was on the 23rd he made this oral statement. The room where I made my enquiries was a room off the drawing-room: the present dining-room at the Residency. I had for bed-room a small room separated from the dining-room by a chick. I remember the day Raoji's belt was examined. If I remember right, that day was the 25th, Christmas Day. My detective sent for the belt while I went to dress and bathe for breakfast. I think the belt was sent for before I retired. At the time it was sent for my detectives were in this dining-room at the Residency. After I had retired, one of the detectives called out for me while I was dressing. All this went on in 10 minutes or quarter of an hour. On my return to the room they showed me the belt, and said there was a piece of paper. I could see a portion of this paper: at the bottom of a kind of pocket. I saw some of the threads broken. The paper was taken out and opened by me. I found it to contain white powder. I put the powder and the paper into an envelope, docketed it, sealed it, and sent it down to Dr. Gray myself at Bombay. I was not at Baroda when the first statement of Damodhar Punt was made. After my return to Baroda Damodhar Punt made some further statements to me. These are them taken before me on the 3rd, 5th, and 8th February. I remember some Native accounts with ink splotches on them being shewn me. I don't remember the exact time, but I think it may have been the 20th February,—I mean some time in January. One packet

Document shewn.

Deposition of the 18th and 21st December recorded as Exhibit D 2.

Statement made by Raoji shewn to witness and recorded as E 2.

Statement of Narsu shewn to witness, dated 26th December, recorded as F 2.

Statements shewn to witness, dated 3rd, 5th, and 8th February 1875, recorded as G 2.

of accounts was brought into my tent at the Residency by Gajanand Vithal. Gajanand Vithal asked me to come into the tent in which all the records were kept—a different tent from mine—as they were looking over the accounts. There were several Karkoons or Native Clerks in the tent at the time examining the accounts and books. I sat in the tent for some time, and while there other books and accounts were found over which ink had been similarly spilt. The Karkoons, whose duty it was to write up the account, were present; they were found by them. They were Karkoons of the Haveli. I remember one of them named Balvant Rao. I perfectly remember taking the statement of Hemchand Fatechand. This is the statement I took down on the 6th February at Colonel Barton's Office in his compound. It was given in Hindustani. At the same time I took it down in English a Karkoon took it down in Gujerathi or Marathi. I asked Hemchand if he knew Hindustani, and I took down his answers to my questions. I conducted the examination in English without an interpreter. To the best of my belief his statement was read over to him after it had been written down. I remember he did sign it. No compulsion nor threat was used to induce him to sign, not the slightest. I remember, before taking his statement, my attention was called to a very uncommon ring in his ear, set in brilliants with two pearls. I asked him where he got it made. He said "at Baroda." This conversation was in Hindustani. It took place before taking his statement. When I took his statement, he produced certain books before me, which I marked as A, B, and C. I believe I signed the leaves, but cannot be quite sure. To the best of my belief this is one of the books. I saw Hemchand, who came here to give evidence. He is the same man Hemchand Fatechand.

Statement shewn to witness. It is in English, and dated the 6th February 1875.

Exhibit A 2 shewn.

THE ENGLISH STATEMENT OF HEMCHAND FATECHAND BEFORE MR. SOUTER, DATED THE 6TH FEBRUARY 1875, IS RECORDED AS H 2.

Balvant Rao, who examined the books in the tent, has not been in my custody at all, not in custody at all to the best of my belief. I don't know his father's name. He is the same man as was called as a witness the other day.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—Narsu made a confession before Sir Lewis Pelly. It was not taken down that day. I had a great deal of work that day in connection with my enquiries. Narsu was a most important witness. I can shew by my diary what I had to do. That was the reason. He was also placed in a military guard, and could not be tampered with. Q.—Do you mean by Police? A.—I mean by outsiders. What I took down on the 26th was the same substance as he stated on the 23rd.

BARODA,
March 12th, 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. LV.—GAJANAND VITHAL RECALLED:

EXAMINATION-IN-CHIEF

BY MR. INVERARITY.—I remember Hemchand Fatechand being examined before Mr. Souter. I wrote his statement down in Gujerathi. This paper is it. Hemchand on that occasion signed it before Mr. Souter.

Gujerathi paper shewn.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—This was not written before I went to Mr. Souter. In fact Mr. Souter took it. After Mr. Souter took it I took down a note (*tipan*). I did not take a deposition from him before Mr. Souter took one, nor was one taken in my presence.

(THE INTERPRETER SAYS THERE IS A DATE OF 6TH FEBRUARY ABOVE THE THREE LINES WHICH HEMCHAND HERE DEPOSED TO BEING IN HIS OWN WRITING. IN THE THREE LINES OCCURS THE DAY 8TH FEBRUARY.)

The date, 6th February, is that of the deposition to Mr. Souter. It was read over again in presence of Sir Lewis Pelly, and he acknowledged it on the 8th February.

RE-EXAMINATION BY MR. SCOBLE.—I took down this Gujerathi at the same time as Mr. Souter took the English; other persons translated from English into Gujerathi, and I wrote that down.

THE STATEMENT IS RECORDED AS I 2.

After I wrote it out, Hemchand read it, getting it explained by me when he came to passages he did not understand. After that Hemchand signed it with his own hands.

BY THE PRESIDENT.—Hemchand, when making his statement, spoke partly in Hindustani and partly in Gujerathi. The translation into Gujerathi which I wrote down was made from the English by a person.

BARODA, *March 12th*, 1875.

(Sd.) JOHN JARDINE,
Secretary to the Commissioners.

No. LVI.—SIR LEWIS PELLY STATES ON OATH:

EXAMINATION-IN-CHIEF

BY MR. SCOBLE.—I am Agent to the Governor-General and Special Commissioner of Baroda. I arrived here on the evening of the 4th December. In obedience to instructions I sent for Mr. Souter to enquire into the poisoning of Colonel Phayre. Mr. Souter's services were placed at my disposal. He arrived about the 9th December. I gave him quarters at the Residency, and he did his duties in the present dining-room. I remember being informed that Raoji Havildar had made a statement. I left the enquiry in Mr. Souter's hands till the 23rd, when Mr. Souter and Mr. Richey came. I had meant to go that day for the Christmas holidays, but being told that something important had occurred, I consented to remain. Mr. Souter meant to go to Bombay on the 21st. I got him to stay to a dinner on the 22nd, and then asked him to wait till the 23rd. Raoji's statement was not made in my presence. I said, "You had better let me see him during the day, and I will judge for myself." I did see him on that day. He made a statement which I heard. That statement was substantially the same as that which he has given before the Commission so far as I remember. Of course he was allowed to speak freely before me on that occasion. The next day was a Thursday, on which day the Gaekwar was in the habit of visiting me. So when I came downstairs I told Mr. Souter on the morning of the 24th that I should immediately communicate to His Highness that his name had been brought into connection with the affair. I think that then Mr. Souter said to me, "Narsu, the Jemadar, also has confessed." So I told Mr. Souter that when the Maharaja comes he must come with me into his presence. Mr. Souter came with me, and what had happened was told to the Maharaja. I then suggested to His Highness to afford every facility for a searching investigation, and the Maharaja promised to do so. Then we went to work on our re-organization. I saw Narsu Jemadar that day after the meeting with the Maharaj. He was sitting in the room which is now my dining-room. I came there by order or appointment. I reminded the Jemadar that the matter on which he was understood to have given evidence was a most serious matter, and that

if he were in it he must not expect pardon: as far as I was concerned, he should have no pardon. I then told him to sit apart and reflect a little. I told Mr. Souter to explain that he should not have pardon. After a little time the Jemadar flung himself forward from where he was sitting with his pugri off. He then said the Sirkar might kill him, or do what they liked to him, but he must speak the truth. He used other and clearer expressions of the same sort which I forget. He then made a verbal statement which I did not allow to be taken down. It was to the same effect as the statement taken afterwards by Mr. Souter on the 26th I think. I said, "Let him go back to "his room, let him think it over, and take it down when he has had time." As far as I recollect I took no further notice of the matter for a day or two. On the afternoon of the 26th, between 4 and 5 o'clock, I was dressing in my room in order to go out. Walking up and down my bed-room, I chanced to see that the Jemadar walking in the Residency garden with some police sepoys. Shortly afterwards I heard a considerable disturbance coming from the garden amidst the trees. There were calls for a rope and for assistance: those were the words I heard. I went downstairs as quickly as I could, and, when proceeding from the verandah to the back of the house, I met the Jemadar with two policemen. He was dripping wet. I asked what was the matter? The police said he had thrown himself into the well. I know the well in the garden of the Residency compound. It is a more than ordinarily deep well, that is, down to the surface of the water. It is lined with masonry, either brick or stone. There is, I think, a parapet round a portion of it. I saw Narsu the next morning—Sunday it was I think. A man calling himself a relative of his sent me a petition on Sunday morning.

SERJEANT BALLANTINE OBJECTING, MR. SCOBLE ARGUES THAT THIS EVIDENCE IS ADMISSIBLE AS EXPLAINING THE CONDUCT OF NARSU. THE PRESIDENT RULES THAT NARSU OUGHT TO HAVE BEEN ASKED BEFORE SIR L. PELLY.

The papers in the various offices and palaces were forthwith sealed up before I received the Governor-General's orders. I deputed to this work Captain Jackson as Assistant Resident and the Police. I forget who the Police Officer was. The more important witnesses whose statements were taken after His Highness' suspension were brought before me. Among others I remember a witness named Hemchand Fatechand. This Gujerathi statement bears an endorsement by me. The rule was when a man came to me after giving his evidence, he was asked if he could read or write. The man who acted as interpreter on these occasions was the Subordinate Judge, called Deshmukh. If the man could read and write, the man read it over himself, and was allowed to make corrections, and if he could not make out parts of the hand-writing, Deshmukh or some one else helped him.

Exhibit I 2 shewn to witness.

The rule was that if he could read or had it read to him, he signed it in token of its correctness. This statement was, I can say, read over by Hemchand Fatechand, and acknowledged by him to be true.

BY THE PRESIDENT.—I have no doubt whatever that it was as here stated in the endorsement.

BY MR. SCOBLE.—I had seen Damodhar Punt before he was arrested. I had seen him sometimes, and may once have spoken to him. The Gaekwar had come to call on me on a private visit. After the visit was over I accompanied His Highness as usual to the lintel of my big drawing-room. I then saw a man standing in the verandah between us and His Highness' carriage. The Gaekwar introduced him as "Khangi," and I think he also used the words in English—"Private Secretary." I am not sure if I spoke to the man. I applied to the Gaekwar through his Minister for Eshwant Rao and Salam. They are now in custody in the Residency premises under a military guard. I sent for them twice. I first sent for them in the morning, and they were sent up without

unnecessary delay. They were not detained. I forgot about them; the puttewalas said I was engaged, and they went back to the city. Mr. Souter told me of this mistake, and they were sent for again. The Solicitors to His Highness have been allowed access to them. I don't know Wasantrambhau, but I think he has been apprehended in 2 or 3 cases. Under explicit orders from the Government of India, I have suspended enquiry into this and other cases until the Commission has ceased its sittings.

CROSS-EXAMINATION BY SERJEANT BALLANTINE.—I have seen the Gaekwar almost daily since I came. I understood my instructions to be to assist him through his difficulties and reform his administration. Also an incidental instruction that this enquiry begun by Colonel Phayre was to the concluded either by me or under my orders. As far as I am aware, His Highness was sincerely desirous to aid me in reforming his administration. *(Serjeant Ballantine reads letter, dated the 23rd December, asking that Eshwant Rao and Salam should be sent to the Residency, as the Commissioner of Police was desirous of taking their evidence.)* That is the sort of letter I sent. The same day I got a letter (like that read) from Dadabhai, saying he would send them at once. I got one from him, also saying he presumed they must have gone to me. Also I sent one to Dadabhai "to get the houses "of Eshwant Rao and Salim searched, as it "was alleged they were concerned in the "attempt to poison Colonel Phayre now "before the Commissioner of Police, and that he, Dadabhai, would send some "one to assist at the search. Dated the 23rd December." "The note about "sending Wadia and Bapurao is not mine I think. It may be Dadabhai's." *(The correspondence in copy is recorded as Exhibit J 2.)*

"MY DEAR SIR,—Will you oblige me by "causing Eshwantrao and Salim to be sent to "the Residency at your earliest convenience, as "Mr. Souter, the Commissioner of Police, is de-"sirous of taking their evidence in regard to "the case now under investigation before me.

"Yours very truly,
"LEWIS PELLY.

"Residency, 23rd December 1874.

"TO DADABHOY NOWROJEE, ESQ."

"Palace, Baroda, 23rd December 1874.

"MY DEAR SIR,—As asked in your note just "received, I send Yeshwuntrao and Salim for "their evidence.

"Yours very truly,
"DADABHOY NOWROJEE.

"SIR LEWIS PELLY, Residency."

"23rd December 1874.

"MY DEAR SIR,—I have already sent away "Yeshwuntrao and Salim to you. I hope they "are at the Residency by this time. I am "waiting for a note from you for doing any-"thing further.

"Yours very truly,
"DADABHOY NOWROJEE.

"SIR L. PELLY."

"MY DEAR SIR,—Kindly ask the Maharaja to cause the houses of Yesh-"wuntrao and of Salam to be searched, as it is alleged they are concerned in "the important case (attempt to poison the late Resident) now before the "Commissioner of Police.

"The Commissioner of Police would be very glad if you could arrange "for the head of your office conducting the search, and this note will be taken "to you by two of the Commissioner's men, who, he would request, might be "present at the search.

"Yours very truly,
(Sd.) "LEWIS PELLY."

"23*rd December*.

"DADABHOY NOWROJEE, ESQ."

Q.—And then follows a foot-note by you, Sir Lewis. Will you see whether I state it correctly?—

"*P. S.*—This was at once attended to by His Highness, who asked the Chief Magistrate himself, Mr. H. A. Wadia, and a Senaputtee's Assistant, Mr. Baboorao, to go and see that the search was fully made, and every help given to the men of the Commissioner of Police to see whatever they liked.

D. N."

A.—Is that mine or Mr. Dadabhoy's?

In the copy I have got it is signed L. P.? It seems to me that it mentions more than I knew about it.

(The initials at the foot of the note turned out to be D. N.—Dadabhoy Nowrojee.)

MR. SERJEANT BALLANTINE [TO INTERPRETER].—Explain to the Commission that that is Mr. Dadabhai Nowrojee's note, and not Sir Lewis Pelly's.

[That was done by the Interpreter.]

Here is another letter from Sir Lewis Pelly, dated the same day, 23rd December 1874. I will just read it to the Commission.

"*Urgent.* "*Residency, 23rd December* 1874.

"MY DEAR SIR,—The Commissioner of Police informs me that the servants "of His Highness the Gaekwar, named Yeshwuntrao and Salam, whom you were "so good as to send up here to-day, have returned to the city without "giving their evidence or communicating with him.

"The Commissioner considers that there is a *primâ facie* case of complicity "already made out against these persons in respect to the attempt to poison "Colonel Phayre, and the Commissioner hopes that these persons may be made "over to the Residency for safe custody, pending the termination of the "investigation of this important case.

"My advice to His Highness is to afford every practicable facility for "thoroughly clearing up all the circumstances of the case. If His Highness "pleases to send a guard to the Residency with the accused, I shall be happy "to receive them.

"Yours truly,
(Sd.) "LEWIS PELLY."

"TO DADABHOY NOWROJEE, ESQ."

(This letter was also interpreted.)

Then comes a letter from Mr. Dadabhoy.

"*Palace, Baroda, 23rd December* 1874.

"MY DEAR SIR,—On receiving your note His Highness at once sent for "Yeshwuntrao, and asked him why he and Salam had returned without giving "their evidence. He answered that he gave my letter to you to one Bala "Pattawalla, and this pattawalla told him that the Saheb said, "Salaam bolo." "Yeshwuntrao says he asked again of the pattawalla whether the Saheb did "not want him and Salam, as they had been sent specially to the Saheb. The "pattawalla said again, the Saheb only said "Salaam bolo," that Manajee "Pattawalla also gave the same reply, and told them to go.

"From this it is evident that some misunderstanding has taken place.

"I did not tell these men to go to the Commissioner of Police, but had "only directed them to yourself.

"On my explaining your note to His Highness, he was sorry any mistake "should have taken place, and immediately ordered them to go to you. I send "them with this letter to you, accompanied by a Karkoon, who will hand them "over to you.

"His Highness is ready to give every practicable facility for clearing up "the matter.

"Yours very truly,
(Sd.) "DADABHOY NOWROJEE."

"TO SIR LEWIS PELLY."

[The substance of that letter was also interpreted.]

The explanation is that they went to me instead of to the Commissioner of Police, and then thinking they were not wanted, they went away again.

Q.—This is the last letter I call your attention to: it is from you to Dadabhoy:—

"DADABHOY NOWROJEE, ESQ.

"MY DEAR SIR,—I am obliged by your promptitude in causing Yeshwuntrao "and Salam to be sent to the Residency for the purpose of giving evidence. "I have requested the Commissioner of Police himself to see that they are "accommodated in my Office with as little discomfort as possible, and to take "their evidence without unnecessary delay to-morrow. The puttawalla, if "he told these persons to go to-day, acted wholly without my knowledge. "Pray, thank His Highness for his assurance of giving every practicable "facility for clearing up this important matter.

"If you could conveniently meet me to-morrow morning at 8 o'clock, I "should be glad to see you.

"Yours very truly,
"(Sd.) LEWIS PELLY."

"*Residency, 23rd December* 1874."

A.—My impression is that His Highness instantly responded to my call for these men. On the 23rd December I first heard of the Gaekwar being implicated. On the morning of the 24th, a Thursday, the Gaekwar came as usual, and I went to him with the Police Commissioner, informed him, and advised him to give facility to enquiry, and he agreed at once. Till he was arrested he was under no restraint. I was instructed by His Excellency the Viceroy to arrest His Highness, and I did so. He had come to the Residency, and I explained the situation to him. He declared his willingness to submit. I accompanied him as far as the border of his territory, and repeated the Viceroy's order in a polite manner. He said he had many enemies. He said something like—"The very earth under me is my enemy." From that time he has been practically in custody in honourable confinement, with every comfort, but liberty restricted. The property in the palace has been attached and sealed, and all the public places, and such places as the arsenal, also sealed. I entered on the State in order to protect the public property, and I put seals on, in order to hand over the property to the next administration that might succeed me in the same state as I got it.

BARODA, *March 12th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

No. LVII.—F. H. SOUTER RECALLED.

BY SERJEANT BALLANTINE.—Raoji mentioned that the belt was in possession of some one called Budhar. A man went to fetch the belt, and Budhar came with it himself. There was nothing to prevent my remaining and examining the belt himself.

BARODA, *March 13th*, 1875. } (Sd.) JOHN JARDINE, *Secretary to the Commissioners.*

EXHIBITS.

No. 1 Series.

JOHN JARDINE,
Secretary to the Commissioners.

EXHIBIT No. 1.

To His Excellency the Right Hon'ble Thomas George Baring, Baron Northbrook, G.M.S.I., Viceroy and Governor General of India, Calcutta.

My Honoured and Valued Friend,—From the events which occurred prior to Your Excellency's khureeta of 25th July 1874, it is plain that the administration of this State cannot be carried on, and the necessary reforms introduced without the cordial support of the Resident. It had occurred to me, among other matters I desired to say in reply to the above khureeta, whether I should not solicit Your Excellency's attention to the position which the present Resident, Colonel Phayre, had all along taken up towards me, and to submit for Your Excellency's consideration whether, with the want of sympathy which existed between us, I could expect an unbiassed and fair treatment at his hands in future. I, however, refrained from troubling Your Excellency owing to the confidence expressed by Your Excellency in Colonel Phayre, and in the hope that, seeing the course I resolved to adopt on receipt of Your Excellency's advice, he could forget the past and assist me with his active sympathy in the difficult work of introducing a reformed *régime*. But I deeply regret to say from the experience of the past three months that this hope has not only been not realised, but that, on the contrary, Colonel Phayre has evinced, if anything, a more determined and active opposition towards me and my administration than before.

From the very commencement he had expressed a strong opposition to the selection of the minister of my choice. The assurance of support subsequently given by him to my minister, however, raised hopes in me, but they have not been realised.

On the receipt of Your Excellency's khureeta, I at once took the necessary steps as far as practicable, and have been endeavouring all along to give effect to the advice contained therein. Among other things I have to replace the executive machinery of Government with able and experienced men, to [illegible] on some equitable basis, the demands of the Sirdars and others which had received attention from the British Government, and to inquire into and revise the existing land revenue settlement throughout the whole territory. No one, however, can know better than the Resident what difficulties each of these subjects presents, especially when all this is to be effected in a very short time. But when, owing to his former attitude, even Colonel Phayre's presence alone would have been enough for a continuance of the unsettled state of the mind of the people, unless he gave me open and cordial support, the difficulties of my work become vastly increased by the course of open opposition he has been lately pursuing. I am, therefore, driven to appeal to Your Excellency, which I do most reluctantly to decide whether under such circumstances I can have a fair trial.

I may mention here one or two instances in support of my complaint. A charge of defamation was some days ago preferred by my father-in-law against a Silladar by name Chanderao Kadoo. My Dewan himself in the presence of Chanderao read over the proceedings of the preliminary investigation, and in order to give both parties the benefit of an impartial trial, I directed the Chief Magistrate, Mr. H. A. Wadia to try the case instead of the Senaputtee, who is my relative. The accused suddenly left Baroda and, I was informed, went to the camp. What he did there I cannot say. But soon after several other Silladars and some Sirdars, with their retainers, some hundred and fifty in number, assembled, armed in the house of one of them, openly defying the Durbar authority and threatening armed resistance. They told the Durbar officials, who went to serve the summons on Chanderao that the case in which his attendance was required was a caste concern, and that they would defend him with their lives if attempts were made to enforce his attendance. They then escorted him to his house and remained there armed to guard him. I sent the Dewan to represent the matter to Colonel Phayre, in the hope that he would use the influence he had over them and uphold the Durbar authority. But, to my astonishment, the Dewan found the Resident prepared to justify their conduct on the very same plea, and almost in the very same words the Silladars themselves had used. He refused to persuade them to disperse, saying that

they would do so only if the criminal proceedings were withdrawn. On the joyful occasion of the birth of my son I resolved to give up further proceedings against Chanderao, when I sent the Chief Justice of the High Court to explain to the assembled Silladars that further criminal proceedings would not be taken against Chanderao, and to ask them to return to their houses, they refused to do so and substituted in place of Chanderao's case a new plea for resistance, that unless the grievances of one and all of them were redressed they would not separate. The Resident at the same time addressed me a *yad* with reference to this assemblage, putting me the very same question, viz., what steps had been taken by me towards settling the grievances of the Sirdars, showing a remarkable coincidence of views.

As another instance, I beg to enclose copy of a letter received from the Resident dated 20th October 1874, and translation of a petition to the Government of Bombay which accompanied it. The petition is from certain Sindee Mahomedan cultivators, complaining that they were prevented from cutting their crops and were mohsalled, &c. Your Excellency will observe the threat of an appeal to arms which is contained in the petition. On enquiry I find that these petitioners had not made any complaints since the commencement of the last rainy season either to the talooka authorities, to the head of the Revenue Department or to the Dewan. The petition further on the very face of it shows that it has been drawn up under the inspiration of designing persons. Colonel Phayre however, without making any enquiry from me, at once addressed me the above letter. This letter is enough to show the spirit in which the Resident acts towards me, such proceedings on the part of the Resident cannot but have the effect of encouraging the turbulent propensity of such a class of Mahomedans and disloyalty generally.

These two instances, which I have taken as representative ones, can hardly give an idea of the harassing and vexatious treatment I am at present receiving at the Resident's hands.

This attitude on the part of the British representative has naturally become a source of serious anxiety to me, especially as in such times persons are not wanting who, for their private ends, take advantage of this state of things to misrepresent me and to instigate continuous resistance to my authority among my subjects. The result will be a great loss of revenue this year and a continuance of the unsettled state of the minds of the people. How seriously this state of affairs must embarrass and obstruct me in my intended reforms, it is not difficult to conceive.

Your Excellency knows well the extent and nature of the work before me, and I owe it to myself and those whom I have engaged for that work to submit how hopeless any efforts on my part would be if Colonel Phayre were to continue here as representative of the Paramount Power with his uncompromising bias against me and my officials.

I beg it to be understood that I do not impute other than conscientious motives to Colonel Phayre. But he is too far committed to a distinct line of policy and to certain extreme views and opinions, and he naturally feels himself bound to support all and everything he has hitherto said or done. He makes no allowances. He forgets that till the officials I have asked for come I could not make much progress in the mahals, and continues to lend a ready ear to complaints against me, thus defeating the very object he says he has in view of helping in the arduous task before me.

Colonel Phayre has been my prosecutor with a determined and strong will and purpose, and that he should now be made to sit in judgment upon me is, I must submit, simply unfair to me. From only three months' experience, it is clear that he has prejudged the case, and I cannot expect an impartial report from him. I leave myself into your Excellency's hands. Your Excellency has asked me to stake my all on this trial, and I must therefore request Your Excellency to place me in a condition in which I can really have the fair trial Your Excellency has given me.

I may mention here that I have made some progress in the various reforms recommended by Your Excellency, which will be communicated to Government in due time. As to what I have already done, and what I propose to do, in the

matter of the claims contained in the Commission report, and upon which Government have given advice, I shall shortly send in a complete statement. For the reduction of assessment I have already fixed upon my arrangements, and I am only waiting for the Government officials I have asked for to carry them into effect.

As I cannot enter in a khareeta like this, into all those incidents which make up my present troubles and anxieties, I request that my minister be permitted to visit Your Excellency with the Resident. I shall feel highly obliged by Your Excellency granting this permission by telegram.

I beg to express the high consideration and esteem I entertain for Your Excellency, and subscribe myself

Your sincere friend,

(Sd.) His Highness Mulharao Maharaja.

Baroda Palace, 2nd November 1874.

EXHIBIT No. 2.

To His Highness Maharaja Malharrao Gaekwar, Sena Khas Khail Sumshere Bahadoor, Baroda.

Fort William, the 25th November 1874.

My Honoured and Valued Friend,—I have received through the Bombay Government your Highness' khureeta, dated 2nd November 1874.

I deem it unnecessary to discuss with your Highness the reasons you have given for desiring a change in the Baroda Residency. But, after a careful consideration of the circumstances that have taken place, and, moreover, in pursuance of the determination of the Government of India to afford your Highness every opportunity of inaugurating a new system of administration with success, I have made arrangements to depute an officer of high rank and of wide experience in political affairs to be the representative of the British Government at your Highness' Court.

Accordingly I have appointed Colonel Sir Lewis Pelly, K.C.S.I., my Agent for Rajpootana, to be my Agent at Baroda, and he will present this khureeta to your Highness.

In giving to your Highness the great advantage of the advice and assistance of an officer of such high distinction, who has filled important political functions with great ability and to my entire satisfaction, I have now done everything in my power to aid your Highness in the efforts which I am glad to be informed by the khureeta under reply are being made to reform the administration of your Highness' territories in consequence of the khureeta I addressed to your Highness on the 25th July 1874.

I shall await with anxiety the reports which I shall receive from Sir Lewis Pelly from time to time of the progress of the measures which your Highness is taking with this object.

I beg to express the high consideration I entertain for your Highness and to subscribe myself

Your Highness' sincere friend,

Northbrook,

Viceroy and Governor General.

(True copy,)

H. R. Cooke,

Registrar, Foreign Office.

EXHIBIT No. 3.

No. 501 of 1874.

From the Resident, Baroda, to the Chemical Analyser to Government, Bombay.

Baroda, 13th November 1874.

Sir,—Referring to your demi-official letter to the address of the Residency Surgeon, Baroda, dated the 11th instant, relating to a small packet of poisonous matter forwarded to you for examination by Dr. Seward, I have the honour to request that you will be kind enough to favour me with a formal official report as to the contents of the poisonous matter above referred to.

2. With reference to the statement made in your letter that the powder forwarded to you consisted partly of common white arsenic and "partly of finely powdered silicious matter" which, under the microscope, appeared to be either powdered glass or quartz, being most like the former, I should feel much obliged by your kindly informing me whether in your opinion the silicious matter referred to can possibly be powdered diamond.

3. Previous to the receipt of your letter under reference I had received secret and confidential information* that the poison administered to me did consist of a mixture of (1) common arsenic, (2) finely powdered diamond dust, (3) copper.

* Please do not mention this at present.

The importance of verifying, if possible, this information is obvious.

I have the honour to be,

Sir,

Your most obedient Servant,

(Sd.) R. Phayre, *Col.*,

Resident, Baroda.

EXHIBIT No. 4.

My dear Sir,—Will you oblige me by causing Eshwantrao and Salim to be sent to the Residency at your earliest convenience, as Mr. Souter, the Commissioner of Police, is desirous of taking their evidence in regard to the case now under investigation before him.

Yours very truly,

Lewis Pelly.

Residency, 23rd December 1874.

To Dadabhoy Nowrojee, Esq.

Palace, Baroda, 23rd December 1874.

My dear Sir,—As asked in your note just received, I send Eshwantrao and Salim for their evidence.

Yours very truly,

Dadabhoy Nowrojee.

Sir Lewis Pelly, Residency.

23rd December 1874.

MY DEAR SIR,—I have already sent away Eshwantrao and Salim to you. I hope they are at the Residency by this time. I am waiting for a note from you for doing anything further.

Yours very truly,

DADABHOY NOWROJEE,

Sir Lewis Pelly.

MY DEAR SIR,—Kindly ask the Maharaja to cause the houses of Eshwantrao and of Salim to be searched, as it is alleged they are concerned in the important case (attempt to poison the late Resident), now before the Commissioner.

The Commissioner of Police would be very glad if you could arrange for the head of your office conducting the search, and this note will be taken to you by two of the Commissioner's men, who, he would request, might be present at the search.

Yours very truly,

LEWIS PELLY.

23rd December.

Dadabhoy Nowrojee, Esq.

URGENT.

Residency, 23rd December 1874.

MY DEAR SIR,—The Commissioner of Police informs me that the servants of H. H. the Gaekwar, named Eshwantrao and Salim, whom you were good as to send up here to-day, have returned to the city without giving their evidence or communicating with him.

The Commissioner considers that there is a *primâ facie* case of complicity already made out against these persons in respect to the attempt to poison Colonel Phayre, and the Commissioner hopes that these persons may be made over to the Residency for safe custody, pending the termination of the investigation of this important case.

My advice to His Highness is to afford every practicable facility for the thoroughly clearing up all the circumstances of the case. If His Highness please to send a guard to the Residency with the accused, I shall be happy to receive them.

Yours truly,

LEWIS PELLY.

To Dadabhoy Nowrojee, Esq.

Palace, Baroda, 23rd December 1874.

MY DEAR SIR,—On receiving your note, His Highness at once sent for Eshwantrao, and asked him why he and Salim had returned without giving their evidence. He answered that he gave my letter to you, to one Bala Puttawalla; and this puttawalla told him that the Sahib said "Salaam bolo." Eshwantrao says he asked again of the puttawalla whether the sahib did not want him and Salim, as they had been sent specially to the sahib. The puttawalla said again, the sahib only said "Salaam bolo," that Manajee Pattawalla also gave the same reply, and told them to go.

From this it is evident that some misunderstanding has taken place.

I had not told these men to go to the Commissioner of Police, but had only directed them to yourself.

On my explaining your note to His Highness, he was sorry any mistake should have taken place, and immediately ordered them to go to you. I send them with this letter to you, accompanied by a karkoon, who will hand them over to you.

His Highness is ready to give every practicable facility for clearing up the matter.

Yours very truly,

DADABHOY NOWROJEE.

To Colonel Sir Lewis Pelly.

Dadabhoy Nowrojee, Esq.

MY DEAR SIR,—I am obliged by your promptitude in causing Eshwantrao and Salim to be sent to the Residency for the purpose of giving evidence. I have requested the Commissioner of Police himself to see that they are accommodated in my office with as little discomfort as possible, and to take their evidence without unnecessary delay tomorrow. The puttawalla, if he told these persons to go to-day, acted wholly without my knowledge. Pray, thank His Highness for his assurance of giving every practical facility for clearing up this important matter.

If you could conveniently meet me to-morrow morning at 8 o'clock, I should be glad to see you.

Yours very truly,

LEWIS PELLY.

Residency, 23rd December 1874.

EXHIBIT No. 5.

MY honoured and valued friend His Excellency the Viceroy, having declared his intention of giving me an opportunity of clearing myself from the grave suspicion which he was induced to consider attached to me in consequence of the alleged attempt to poison Colonel Phayre, the Resident at my Court, I now, out of respect for His Excellency the Viceroy, and from a desire to clear myself before him and before the world at large of those suspicions, make the following statement:—

I never had, nor have I now, any personal enmity towards Colonel Phayre. It is true that I and my ministers were convinced that, owing to the position taken up by Colonel Phayre during his Residency, it would be impossible satisfactorily to carry out the reforms I had instituted and was endeavouring to complete in deference to the authoritative advice conveyed to me in the khurita of the 25th July 1874, consequent upon the report of the Commission of one thousand eight hundred and seventy-three, and acting on this conviction, and after a long and anxious deliberation with my ministers, Messrs. Dadabhai Nowrojee, Bal Mangesh Wagle, Hormusjee Ardeshir Wadia, Kazi Shahabudeen, and others, I caused the khurita of the 2nd November one thousand eight hundred and seventy-four to be despatched to His Excellency the Governor General through Colonel Phayre himself, and notwithstanding his remonstrances, feeling assured that when the true state of affairs was placed before His Excellency the Viceroy, my appeal would be successful. This conviction was shared by all my ministers and was strengthened by our knowledge of the severe censure which had been passed on Colonel Phayre by the Bombay Government. The removal of Colonel Phayre on the 25th November 1874 shows that our judgment was not erroneous. Thus, neither personal nor political motives existed to induce me to attempt the crime with which I am charged, and I solemnly declare that I never personally, or through any agent, procured or asked the procurement of any poison whatsoever for the purpose of attempting the life of Colonel Phayre; that I never personally or through any agent

directed any such attempt to be made; and I declare that the whole of the evidence of the ayah Ameena, of Rowjee, Nursoo and Damodur Trimbuck on this point is absolutely untrue. I declare that I never personally directed any of the Residency servants to act as spies on the Resident, or report to me what was going on at the Residency, nor did I ever offer or cause to be paid any money to them for such purposes.

I say nothing as to the presents that may perhaps have been made to servants of the Residency on festive occasions such as marriage and the like. Information on trifling matters going on both at the Residency or at my Palace may have been mutually communicated, but I did not personally hold any intercourse with those servants for this purpose; nor am I personally cognizant of any payments for the same having been made; nor did I authorise any measures by which secrets of the Residency should be conveyed to me. I present myself before this Commission fearlessly. I put implicit faith in the justice of those appointed by my honoured and valued friend the Viceroy. I am willing to answer any questions they may deem it right to put to me, and again solemnly deny the foul charge my enemies have instigated against me.

Note.—The above Exhibit 5 was accompanied by a similar statement in Maratha. Both the English and the Maratha statements were presented by the Counsel for His Highness the Guckwar.

Exhibit A.

Translation of a Marathi Exhibit marked A.

To Hazrat (or Mr.) Sheikh Abdoola, Butler, at present residing at Mahableshwur.

May his wealth always increase. With respects and prayers. Further, the cause of writing (this letter) is as follows:—I have received a letter from you and understood its contents. I hope you will in like manner frequently communicate to me the news from that place through letters and thereby gratify (me). Salim saw me on his arrival here, but as that is a "Raj Darbari" matter (State matter), it will be done leisurely as opportunities offer. I am a little better. I have sent a letter there (stating that I would attend on the 20th twentieth. It is (my) intention to go there accordingly. I have now also commenced (taking) medicine. There is also less strength in (my) hands. Five rupees have been paid to Vazir Ma. You had given to me here the letter received by you from home. On reading it I found its contents (as follows):—"The house of your father-in-law is to be attached. What place, then, should be fixed for residence?" I can give no reply about this. Formerly I told her to reside in (our) house, but she did not mind this, and lived there at her father's house. And 5 rupees for expenses and a black *sari, (a piece of cloth worn by women)*, have been sent subsequently. Even when she has money in her hands, she sends for it from here. I am, therefore, thrown into difficulties on all sides. After securing his or her object on all sides, I am likely to be disgraced eventually. If a single pot, out of the pots, &c., which are in the house is lost, you will be responsible for it. You write (to say) that you will send ten rupees for me. It will be well if you send the same soon, that is before the 18th. If not please yourself; I cannot compel (you). From Alisha Jemadar have been received 25 rupees on account of himself and 25 rupees on account of Raheem Saheb, and 10 on account of Shah Saheb—in all sixty rupees. Forty rupees remain (to be recovered), for which it is in contemplation to get a fresh bond executed. Meanwhile 20 rupees, due to a Marwari,* should be paid off soon. After the payment thereof, I am to proceed thither. By (my) taking one month's leave, I have been subjected to a heavy loss. But what can be done? Owing to my illness, I could not help (doing so).

* *i. e.*, money-lender.

I had been to Yeshwant Rao's house. He has gone to Pandharpur on fifteen days' leave. He said to me as follows:—"On my return I shall have arrangements made about you, and the Maharaja twice or thrice enquired when the ayah would come." Salim was invited to my place of residence here. He was shown attention so far as my poor circumstances would permit. Let this be known. What more need be written. This is my (representation). Raheem Saheb Mohideen and Baba Matkar and others send their best compliments to you.

Ameena Bi Ayah, *residing at Bombay.*

Dated 10*th April* 1874.

Love to Sobhagiawati Ameena Bi Ayah, from Sheikh Abdoola, Butler, Karel.

I am well by the favour of God and by your blessing. You should not entertain any anxiety. Colonel Phayre went to Poona on the 18th; he is to put up at Kirkee. Let it be known to you that the Dewan has been removed, and that no other person has yet been appointed (in his room). You should communicate what news there is, (getting the letter) written by a good writer.

Make enquiries about the Hazrat, who was in Bombay, and bring him without fail at the time of (your) coming. (You) should write about him without fail. You should communicate (to me) news frequently. You have forgotten me since your departure to Poona. What can you do? It is my fate. It is the will of God. It is my predestination. What can you do? You should not do so. Yesra Naik has gone to Bombay. Let this be known to you. Abdoola Khan has accompanied the Saheb. Pedro sends his compliments to you. Give my, as also Pedro's, compliments to your butler; the mestri (cook) and other people also send their compliments to you. Dated 18th, 1874. Signature of Sheikh Abdool. (He) sends his compliments in case they have been omitted through oversight. Send a reply to this letter without fail. I anxiously await it.

What more need be written?

This is (my) request.

(*Address on the letter*).—This letter should be delivered to Ameena Bi, the ayah of the Resident Mr Boevey, in the bungalow of the Revenue Collector, Mr. Oliphant, near the Post Office, Poona.

Not paid.

Poona.

To be delivered to Ameena Bi, the ayah of the Resident, Mr. Boevey. Despatched from Baroda. Shaba.

Love from Sobhagiawati Ameena Bi, Ayah.

(Addressed to) Sheikh Abdoola Wallud Sheikh Adam, Butler, residing at Baroda.

I am well by the favour of God and by your blessings. The cause of writing (this) letter (is as follows).—(I) have had no tidings of you since your departure from Baroda. This has made me very uneasy. You should therefore not act in this way. But as it is the will of God, you are not to blame. It is my fate. What can you do? The Maharaja is much perplexed. He has received an order to the effect that the petitions presented by the ryots should be disposed of within fifteen months. Such an order has been issued and the Dewan Saheb has been removed and prohibited from visiting the bungalow (*i. e.*, the Residency). Let this be known to you. I receive no news whatever from you. You should send me news frequently. I am doing well here. Do not entertain any anxiety. The people in the bungalow send their compliments to you and convey the same to the Butler.

Yeshwunt Rao Naik has gone to Bombay. Let this be known to you. Shahuddin is also to go, (but) I have no correct information. As soon as you see (this) letter, send a reply without fail. What more need be written? This is what I had to write.

My compliments to the reader, in case they have been omitted through oversight.

The signature of Sheikh Abdoola, Butler,

His own handwriting.

Dated 16*th August* 1874.

Exhibit D.

Translation of a Marathi Exhibit marked D.

To HAZRAT (or MR.) SHEIKH ABDOOLA, Butler, residing at Baroda.

I, Ameena Bi Ayah, now residing at Bombay, respectfully represent (as follows):—I sent to you a letter affixing a postage stamp on it. I do not know whether it has reached (you) or not; I am therefore under anxiety day and night. I trust you will, therefore, not act in this way, but will frequently communicate the news by letter and thereby gratify me. If you wish that I should not go there, I am ready to undertake a voyage to England. If you wish it, I shall endeavour to obtain a situation of that kind. I am in doubt as to why no letter is received from you here; I await a reply from you. If you call (me), I shall go there; it will not matter (in the least). I wrote to you for (money for my) expenses, but nothing has been received from you. Convey my best compliments to the Kazi Saheb, my compliments to Salim and my best compliments also to be given to Yeshwunt Rao.

Chotoo's mother owes me rupee one. You should deduct it from her son's pay, because she has not visited me since her arrival at Bombay. You should go to and make proper enquiries at the place there, where I am coming to take up service. I hear that he has obtained an appointment in Rewa Kanta. If such a thing has happened, it is very bad. Write to say whether you have borrowed Rs. 5 from Vingorlekur Mahommad. He comes here and duns me for the (payment of the) same. Let me know in writing whether this is true. I do not know whether or not you have delivered the note (chitti) enclosed by me in my last letter to the person for whom it was intended. I labor under anxiety on this account only. Give my best compliments to Nathiaba. Write to say whether or not you have received the two "firkees." What more need be written? This is my request. Dated 29th March 1874.

I reside in Shetwadi in the same house as before.

AMEENA BI AYAH, Bombay.

A reply to be sent without fail.

NOWROZJI FURDOONJEE,
Sworn Translator and Interpreter to the Commission.

JOHN JARDINE,
Secretary.

BARODA, 27*th February* 1875.

Exhibit E.

PEDRO DE SOUZA, Native Christian, states:—I am about thirty-seven years of age, and have for more than twenty-five years past been in the service of Colonel R. Phayre, the late Resident at Baroda. I have been serving that gentleman as his butler for the last fifteen or sixteen years, and before that I filled several situations of different kinds in his household. When Colonel Phayre was appointed to the office of Resident at Baroda, which was, I think, in the month of March 1873, I accompanied him to that place, lived in the Residency, and served him there from that time until the month of September last, when I obtained leave of absence from him and proceeded to Goa, my native country. I left Baroda on the 3rd October last, went to Goa, remained there about a fortnight, and returned to Baroda on the 3rd November, one month after my departure. I know one Salim, a Mahomedan, who resides at Baroda and is a "*jasood*" in the service of H. H. the Gaekwar. I have known this man Salim from the time I first went to Baroda with Colonel Phayre, as above stated. He used to come to the Residency twice a week regularly during all the time I stayed there. The Gaekwar always came twice a week, on Mondays and Thursdays, to pay a sort of official visit to the Resident; and on these days Salim always preceded His Highness to give notice of his coming. Salim always brought with him on these occasions, a tray of fruit as a sort of "*nuzzerana*" or tribute of respect. In the month of August last, when I first thought of obtaining leave from my master to go to

Goa, I was short of money; and on seeing Salim at the Residency one day I said:—"I am thinking of going to my native country for a month, but am badly off for money, my wife is pregnant, and the expenses on her account and for travelling will be heavy; will you entreat the Maharaja to give me some money for this purpose?" Salim replied that he would speak to the Maharaja and bring me the money. No particular sum was named by either of us. I made this request to Salim, because I had heard that the servants of previous Residents had obtained similar favors from the hands of the Gaekwar. Salim himself had told me this many times before I made my said request to him. About a fortnight after I had so spoken to Salim, he came to me in my room at the Residency, and said:—"The Maharaja has sent you these rupees. I told him what you said." I thanked him very much, took the rupees he offered me, and he went away. I counted the rupees as he gave them to me and said:—"Here are sixty rupees of Baroda currency, which are equal to fifty Bombay rupees." Two or three days after this, or on his next visit to the Residency, Salim met me in the compound of the Residency, and said:—"You come and see the Maharaja. If you will agree to come, I will bring a carriage to take you." On hearing this I said:—"I will never come to the Havelee" (*i. e.*, Palace). He replied:—"If you cannot come now, I will bring a carriage for you whenever you wish to come." To this I again said:—"I will never come!" After my return to Baroda from Goa I never saw Salim, except in passing, and I had no speech with him other than to say "salaam." I positively declare that I never received any other gift from the Gaekwar than this one of sixty rupees sent to me through Salim, and that I never had any conversation with Salim about my own affairs or in connection with the Gaekwar excepting on the occasion mentioned. I never went to the Havelee or spoke to the Gaekwar, and I never had any correspondence with him, either directly or indirectly, other than that above detailed. Further I say not.

The mark x of
PEDRO DE SOUZA.

Taken on oath, and duly acknowledged and signed by Pedro de Souza in my presence, this fifth day of January 1875.

A. EDGINTON, J. P.,
Deputy Commissioner of Police, Bombay.

The foregoing statement was duly read and interpreted by me to the said Pedro de Souza on the day and date above written and acknowledged by him to be correct.

Head Clerk, Commr. of Police.

JOHN JARDINE,
Secretary.

BARODA, 26*th February* 1875.

Exhibit F.

Confidential.

Baroda, 9th November 1874, 11 A.M.

MY DEAR SEWARD,—With reference to the circumstances which I mentioned to you this morning, together with the symptoms which I described to you, and the contents of the tumbler which you took home with you, I should feel much obliged if you would kindly give me a professional opinion as to the nature of the contents of that tumbler, whether poisonous or not.

Although I only took two or three sips of the pummalo juice which the tumbler contained, I felt within about half an hour, as I described to you, a most unusual sickness of stomach, accompanied by dizziness in the head and of sight, producing confusion of thought, also a most unpleasant metallic taste in the mouth, with slight salivation such as I have never experienced until within the last few days, and which I attributed partly to a slight attack of fever, which had, however, quite gone off, and partly to an idea that the pummalos from which the juice daily placed on my table had been extracted were not fresh ones. I now, however, attribute all of these symptoms, especially that of this morning, to entirely different causes. In fact, I now believe that for

the last few days small doses of poison have been introduced into this juice, and that had I drunk the whole tumbler off to-day I should have been very ill indeed.

The confused state of my head has often surprised me of late, because for the last six weeks I have abstained *in toto* from wine and beer, &c., except once or twice when friends dined at the Residency, and have found myself all the better for it.

My general health, is, as you know, most excellent, and therefore the symptoms which I have described to you are, I feel sure, the result of unnatural causes. I never dreamt of poison, otherwise I should not have thrown away so much of the contents of the tumbler which I gave you this morning. It was only after doing so, and when I was replacing the tumbler on the table, and saw the sediment at the bottom, that I for the first time suspected foul play.

Believe me, Yours very sincerely,

(Sd.) R. PHAYRE, *Colonel.*

(Endorsement.) For the information of the chemical analyser, who will kindly return the original.

Exhibit H.

Translation of Durbar Yad No. 2057, received on the 14th November 1874, in the evening at 5-45 P. M.

AT a personal interview with you the day before yesterday, I learnt from you the particulars about the attempt made by some bad man to poison you, for which I am very sorry. But it was the favour of God that his cruel design did not meet with success.

If it becomes necessary to obtain my assistance in proving this criminal's guilt, the same will be given. This is written for your information.

Dated 14th November 1874.

C. RUSTOMJEE,

Translator and Interpreter to the Commission.

BARODA, *16th March* 1875.

JOHN JARDINE,

Secretary.

Exhibit I.

Endorsement Received 19th November.

No. 502 A.

To DR. GRAY, M.D., Chemical Analyser to Government.

Baroda, 16th November 1874.

SIR,—In consequence of the opinion expressed in your demi-official of the 18th instant to Dr. Seward's address (received on the evening of the 14th

idem), I yesterday morning scraped together from the chunam floor of the verandah as much of the deposit as could be found on the spot where the contents of the poisoned tumbler fell; and I enclose the said scrapings herewith, in the hope that they may be useful in leading you to a decision as to the other ingredients which were contained in the poisoned tumbler besides arsenic.

I have the honor to be,

SIR,

Your most obedient servant,

(Sd.) R. PHAYRE, *Colonel,*

Resident.

JOHN JARDINE,

BARODA, *27th February* 1875. *Secretary.*

Exhibit J.

No. 401 OF 1874-75.

From the Acting Chemical Analyser, to the Resident, Baroda.

Grant College Laboratory, 19th November 1874.

SIR,—I have the honor to acknowledge the receipt of your letter of the 16th instant, and also of the small packet enclosed. The letter was sealed, the seals were unbroken, the crest a bird.

The packet contained a small quantity of moist earthy matter of a brown color mixed with glittering particles. A chemical examination of this earthy matter revealed the presence of arsenic. I failed, however, to detect in it the slightest trace of any mineral poison other than arsenic. Many of the glittering particles appear to be of the same nature as those seen in the powder sent me by Dr. Seward, namely, diamond dust: other glittering dark-colored particles in the earthy matter proved to be oxide of iron, being in fact the same substance that is commonly used as sand for drying ink.

SIR,

Your most obedient servant,

(Sd.) W. GRAY, *Surgeon,*

Acting Chemical Analyser to Govt.

JOHN JARDINE,

BARODA, *27th February* 1875. *Secretary.*

Exhibit K.

APPENDIX C.

Statement by COLONEL PHAYRE, C.B., Resident, Baroda.

Baroda, 16th November 1874.

THE attempt to poison me was made on the morning of Monday, the 9th November, 1874. The small quantity of poisoned sherbet taken by me was swallowed at about 7 A.M. At about twenty minutes or half-past 9 A. M. the Maharaja paid me his usual visit. After some common-place remarks H. H. observed that the weather was not healthy, that there was a good deal of fever in the city, and that he himself had been suffering from purging and headache and fever from eating the usual Dewalee sweetmeats, but that he had recovered. I made no remarks, but it occurred to me that H. H. had led the conversation to the subject in order to elicit some remarks from me. I have since learnt from the evidence that His Highness' confidential Arab sowar Salim was at the Residency earlier than usual on that morning, that when I sent a note to summon Dr. Seward between 7 and 8 o'clock, the Arab sowar stopped the peon Mahomed who was carrying it and asked him to buy him

some biscuits in the bazaar, which extraordinary occurrence I can only account for by a desire on the part of Salim to divert the peon's attention from his proper errand to summon the Residency Surgeon.

By about noon on Monday, the attempt to poison me began to spread in the camp and city. Next day, Tuesday, 10th, several people from the city came to call, or sent to enquire after my health, but no one came from the Maharaja. Wednesday, the 11th, passed in a similar manner without any enquiry on H. H.'s part.

On Thursday, the 12th, H. H. came to pay his usual visit, and on this occasion, for the first time, he was accompanied by Mr. Dadabhai. Usually H. H. comes alone. H. H. opened the conversation by saying that he had heard on the previous day (11th) that some one had poisoned me and asked how I was, remarking at the same time that I showed no signs of having been poisoned when he called on Monday the 9th instant. Previous to this remark by H. H. I had not mentioned the hour at which I was poisoned, but I afterwards told him. How the Maharaja knew that I had been poisoned when I came to receive him on the Monday morning is not apparent.

Mr. Dadabhai said that he heard the rumour first on Tuesday, 10th, but did not believe it, that the rumour was repeated so strongly on the 11th that he believed it, and that he intended to speak about it next day (12th). He asked me if I was making enquiry into the matter, and I replied that I was, and he expressed a hope that I should succeed in discovering the perpetrator of the crime.

On Saturday, the 14th instant, after dark in the evening, 5-45, I received the following *yad* from the Durbar :—

"Durbar *yad* to the Resident No. 2057, dated 14th November 1874.

"At a personal interview with you the day before yesterday I learnt from "you the particulars about the attempt made by some bad man to poison you, "for which I am very sorry. But it was the favour of God that his cruel "design did not meet with success.

"If it becomes necessary for you to obtain my assistance in proving the "criminal's guilt, the same will be given. This is written for your in-"formation."

[A true translation.]

(Sd.) R. PHAYRE, *Colonel,*
Resident.

IT will be observed that in this *yad* H. H. alludes only to having heard of the matter from me personally on the 12th instant, whereas the report had spread everywhere by the evening of the 9th November, and it is not reasonable to suppose that H. H. has not heard of it immediately, as everything is reported to him at once by his spies.

Moreover, he himself told me on Thursday, the 12th, that he had heard of it the previous day, and had resolved to speak regarding it on his next visit that morning. The delay of His Highness in not taking notice of the occurrence till Thursday the 12th and afterwards in writing the *yad*, offering assistance on the evening of the 14th, the sixth day after the event, are remarkable.

Exhibit N.

From—The Residency Surgeon, to the Resident.

Baroda, 9th November 1874.

SIR,—In reply to your letter just received 1 P.M. I have the honor to report that so far as my chemical appliances allow me to pronounce an opinion upon the quality of the sediment which you this morning entrusted to me for examination, that sediment is arsenic.

The quantity was sufficient to allow of its being tested by reduction with charcoal, and the result I have shown you.

The metallic ring deposited upon the tube in rich profusion and the octohedral crystals also deposited, point almost certainly to the presence of arsenic.

I purpose despatching the remainder of the sediment by to-morrow's mail train to the Government Analyser.

The quantity of the sediment would almost assuredly have proved fatal had it been swallowed.

I have the honor to be,
SIR,
Your most obedient servant,

Exhibit Q.

Grant College Laboratory, Bombay, 11th November 1874.

MY DEAR SEWARD,—I have duly received your letter and its enclosures, *viz.*, a demi-official from Colonel Phayre and a small packet, which contained a few

grains of greyish-coloured powder, mixed with numerous glistening gritty particles.

I have examined this powder and find it to consist partly of common white arsenic and partly of finely powdered silicious matter. This silicious matter under the microscope appeared to be either powdered glass or quartz, being most like the former. Some of the particles had a purplish or rose-coloured tinge, which fact may perhaps furnish you with a clue as to its source. If you wish an official reply in addition to the present, I shall send it.

Herewith is returned Colonel Phayre's letter. I shall keep the remains of the powder in my possession, till I hear further from you.

Believe me,
Sincerely yours,
(Sd.) W. GRAY,
Acting Chemical Analyser to Government.

JOHN JARDINE,
Secretary.

BARODA, 1*st March* 1875.

Exhibit U.

Grant College Laboratory, Bombay, 13th November 1874.

MY DEAR SEWARD,—In continuation of my letter of the 11th I write to tell you that a still closer examination of the gritty powder has led me to think that part of it at least is diamond dust. The lustre of some of the particles seems to me too great for anything else, and they are besides exceedingly hard and quite insoluble in any acid. This opinion, however, is based only on ocular inspection. I am not in possession of any means here to test the substance chemically, should it be asserted that it is diamond dust; and, besides, the quantity sent is exceedingly minute.

How do you account for the metallic taste described by Colonel Phayre? Can it be copper? Arsenic is tasteless or nearly so. I failed to find any compound of copper in the powder you sent me, but as all its salts are very soluble, it is possible that if put into the pummelo juice it may have been all thrown away when the tumbler was emptied. The early appearance of the symptoms may be due to the fact that he took the arsenic in solution, or rather suspended in the pummelo juice, on an empty stomach. He may also have taken a comparatively large proportion of what was in the tumbler, as arsenic, unless well mixed, has a habit of floating on the top of a liquid. Natives have a firm belief in the deadly properties of diamond dust or powdered glass, but the fact is that neither of them possesses any deleterious qualities.

I shall be happy to examine anything else you may require done. Is it possible to obtain any of the pummelo juice or any part of the ground or other place upon which it was thrown? If so, we might be able to detect copper if present.

Believe me, sincerely yours,
(Sd.) W. GRAY,
Acting Chemical Analyser to Government.

Exhibit X.

"This day the Poonekar said to the Saheb that the Maharaja had made a new *waudo**, that her name was Gangabai, that her father was a washerman, that the Maharaja had caused a nuzzarana of Rupees seven thousand to be paid to her from the Patan Mahal, and that those people had come to prefer complaints, but that no one listened to the same. Secondly, Bapu Saheb Gaekwar had come. He (the Saheb?) enquired: "Well, how are you?" He answered that he was well by the Saheb's blessing. The Saheb then enquired: "Do you go to Dadabhai and Shabuddin for your business?" Then Bapu Saheb answered as follows: "There is no necessity for my going (to them). As long as you are here, it is not necessary for me to go to any one. What do these people know of the administration of justice, and what do they do? These people ask each other's advice, sit doing nothing, and enjoy themselves." Thirdly, the Poonekar said: "Saheb, all the people became glad on hearing the reports of a cannon, assembled together, and began to say that some great Sahib had come from Bombay to enquire into the cases of all. On account of this happy news all the people had collected." Then the Saheb said: "The gentleman is the General Saheb who has come from Ahmedabad to review the regiment." Fourthly, Rakhmabai's brother has presented a petition. He says that his sister should be made over to him. The Saheb became very angry with him. Fifthly, I shall come to-morrow bringing with me Cawasjee. You should therefore send Salim."

In accordance therewith what was paid in ready cash (was as follows):—The Soor Sun (year) one thousand two hundred and seventy-five, the (Mahommedan) lunar day the 8th, that is the [Hindoo] lunar date the 10th of Margshirsh Shoodh, the Samvat [year] 1930 [29th November 1873] Saturday.

Machine-made [rupees] were purchased at the place of business of Parakh Govardhan Dalpat in the bazar, and delivered for the same. Babashai [rupees] were paid to Parakh [as below]:—

Principal Surat (rupees) by the hands of Gunpatrao, corrected to Narayanrao, son of Bhikoba Selkey, attached to the small Khas Paga			10	0	0	
For exchange at the rate of Rs. 18-14 per cent			1	14	0	
			11	14	0	11 14 0
Babashai (rupees) paid in ready cash				...		7 0 0
						18 14 0

In accordance with the above memorandum, the Sirkar's permission was granted for the payment of rupees eighteen and fourteen annas, to Narayanrao Shilkay Burgir of the small Khas Paga. The lunar date, the 10th of Margshirsh Shoodh, for the Samvat (year) 1930 (29th November 1873).

In respect of the above memorandum, machine-made rupees 10 ten, and Babashai rupees 7 seven, were received in ready cash in full out of the treasury. By the hands of Narayanrao Shilkay the said [rupees] were received in full from Yeshwantrao Yeolay. The handwriting of Krishnajee Ramchandra Kelkar.

[The letter attached to document marked B, as translated, is as below]:—

Shri [*i.e.*, Prosperity, &c.]

To Rajeshri Balwantrao Raoji, in the private service of the Sirkar.

Further, Narayanrao Shilkay is now sent. Do you therefore pay him machine-made rupees 10 and (give him) a piece of jagannath (jaconet cloth) immediately out of the treasury; or pay him rupees seven for the purchase (of the cloth) in the bazar, or cause it to be delivered by Choonilal. The lunar date, the 10th of Margshirsh Shoodhya, the Samvat (year) 1930 (29th November 1873).

DAMODHUR TRIMBUCK, *Khangiwalay.*

(Endorsement.)—The Sirkar ordered payment in accordance with the above memorandum of Rs. 3,632-13-3. Accordingly His Highness, wetting the coins at the place of bathing, gave this day, dated Magshirsh, Vadh 8th Samvat (year) 1931 (31st December 1874).

EXHIBIT U.1.

Entry under date Shrawan Wadya 11th Samvat 1931 (6th September 1874).

Rupees 119-8-0.—(In the original the words which follow here are blotted with ink and are illegible) through Khasi goods (articles) purchased and brought from Ahmedabad. For the price for the same, machine-made rupees were paid out of the Nowsaree Swari account, together with its exchange (paid) in cash in Babashai currency to the Swari account by the hands of Bhivba Jamdar as per yad.

EXHIBIT V.1.

Entry under date Jesht Wad 9th Samvat 1931, Monday (8th June 1874).

Rupees 1,000.—Credited after being debited. Fruit was purchased and caused to be brought from Bombay through (the words which follow here in the original are blotted with ink and are illegible). The price payable for the same was caused to be paid by the said Parakh, is on the said date debited as expended and is credited here.

EXHIBIT W.1.

Entry under date Ashwin Sood 3rd Samvat 1931, Tuesday (13th October 1874).

Rupees 200.—Expenses on account of purchases for the Sillikhan for fruit for His Highness purchased and caused to be brought from Ahmedabad through (the words which follow here in the original are blotted with ink and are illegible). The Sirkar's permission was given for paying the money for its price, accordingly paid in cash in the hands of himself the said Salim as per *yad*.

EXHIBIT X.I.

Entry under date Adhik (intercalary) Ashad Wudya, 3rd Thursday Samvat 1931 (2nd July 1874).

Rupees 298-12-0.—Fruit caused to be brought from Poona through (the words which follow here in the original are blotted with ink and are illegible). In regard to which the Sirkar's permission was given for paying machine-made money. Accordingly money in Surati coins was to be paid. This money was caused to be paid out of the balance of machine-made money on account of the Nowsaree Swari. In regard to the same Babashai money was paid together with exchange to the Swari account in cash by the hands of Bhiva Wullud Hanmuntrao Bochre Jamdar as per *yad*.

EXHIBIT Y.1.

MEMORANDUM showing the expenses (necessary) for feeding 1,500 Guzerathi Brahmins through Rameshwurbhaee at the temple of Swami Narayen on account of finishing the Brahmin feeding and Dumpataya (feeding the pairs) and giving of charities connected with the intercalary month. The money to be given in cash to Rameshwurbhaee (Sur Sun year) Samvat 1931* 2nd, Ashad Shud 3rd, Thursday, (16th July 1874.)

* Moorgsar.

Rupees 1,125 for net articles at 12 annas per head, total.

„ 375 for distributing charity money at the time of dinner per each 4 annas.

1,500 The Sircar has ordered payment of Rupees 1,500 for Brahmin feast according to the said yadee. Dated Ashad Shud, 3rd Samvat 1931† (16th July 1874).

† Moorgsar.

[In Guzerathi.]

Written. Payment by Rameshwur Morarjee to wit.

The money of this memorandum has been received in full, in the handwriting of Bholanath Poonjaram through him.

Translation of EXHIBIT Z.1.

DAMODHUR TRIMBUCK NENE, Brahmin, age—, Khangi Kamdar or Private Secretary to Mulharrao Maharaj, states:—

Yeshwuntrao Yeole, Salim and Rowjee were concerned in poisoning Colonel Phayre. In the month of Ashwin last, about the time of the Dusserah [20th October 1874], the Maharaja asked me to procure some arsenic from the Foujdaree, on the ground that he wanted it for itch, and he desired me to say at the Foujdaree that it was wanted for giving medicine to a horse. I could not get any arsenic at the Foujdaree, and on my telling the Maharaja, he desired me to get it from the Camp. I told him it wanted a pass. He said never mind about it. I thereupon got two tolas of arsenic from Nooroodin Borah, the Maharaja having told me to promise him a monopoly of the supply of medicine to the Sillikhana. He did not say whence he procured the arsenic. I took the arsenic to the Maharaja, and asked him to whom it should

ther.

amgar

be given. He desired me to give it to Salim, and that he (Salim) would, as instructed, prepare the medicine to be made from it. I accordingly gave it to Salim. I don't know when he brought it here. Afterwards the Maharaja desired me to get one tola of diamonds to be burnt and reduced to ashes. I ordered Nanajee Vithul to get one tola of diamonds and deliver them to the Maharaja. He brought me the diamonds, and I showed them to the Maharaja, who desired me to take and deliver them to Yeshwunt. Up to this time I did not know they were required for this purpose. The Maharaja said they have been ordered for the purpose of making a crown for the Swami of Akulcote. After a few days the Maharaja again asked for another tola of very small diamonds. I thereupon desired Nanajee to get them. He brought some diamonds and some very small diamonds. That evening either he or Vinayekrao gave them to me. I asked the Maharaja what was to be done with them. Thereupon he desired that they should be given to Yeshwunt. When I gave the small diamonds to Yeshwunt I asked him what he was going to do with them. He said I am going to take them for the purpose of pounding them fine and giving (the same) to Colonel Phayre. This took place about five or six days before the attempt to poison Colonel Phayre became known. On that day I accompanied the Maharaja as far as the Shevak's Dharamsala, where the Maharaja took me up in his carriage. And on his return he told me at once that the poisoning of Colonel Phayre by arsenic had become publicly known. He said that the attempt to administer poison through Salim and Yeshwunt had been divulged. Salim used always to be coming and going to and from the Residency day and night (*i.e.*, constantly) from the time that Rowjee was corrupted by bribery. That day he was there early in the morning, and the Maharaja told me that when this matter transpired, Salim went to Rowjee's house to get any of the packets of arsenic that might have been left and to throw them into the fire-place where the old woman was cooking. But as Rowjee did not trust Salim, he himself ran to throw those packets away. But whether he did so or not I did not learn. I asked the Maharaja how this matter came to light? He said it came to light because Nursoo Jemadar was not there on the watch. Because he used to keep watch and whistle to give the alarm; and as he was not there that day early in the morning, the matter became known. The Maharaja had come earlier than usual. I went home, and Nana Sahib and the Maharaja were discussing together that day at noon at Luxmeebaee's house. At noon Nana, the Maharaja, and I went out in a carriage, and the Maharaja said they should be on the look out about the matter they had been discussing. The next day the Maharaja desired Salim and Yeshwunt in the Palace to keep him well informed of what was going on. He afterwards told me and Nana Sahib in the carriage to keep him well informed, and so saying stated that Rowjee had been released, and that he was a very clever man and a liar. As he has been released he (the Maharaja) is now under no apprehension, because the proof of the evidence has disappeared. After Colonel Phayre's removal and after Colonel Pelly's arrival, the Maharaja told me one day that Rowjee was standing on the road and was making signs to Salim to the effect that he (Rowjee) wanted some present from the Maharaja, but that he had told him that nothing could be done in that matter until the termination of the enquiry; but that he would hereafter try to do something about it. After Mr. Souter's arrival he went back without seizing Rowjee. Thereupon the Maharaja used to say that it was well Rowjee had not been seized, and that now there was no cause for fear. Then when Rowjee was seized he told me he had heard of it, and that it was a bad occurrence. Afterwards (he heard) of Rowjee having been pardoned and of his having confessed everything. He then said if any other persons be arrested they should not confess; and he enjoined me not to confess even if I died, and as to other persons who might be acquainted with this matter, they had also been similarly enjoined. He further told me that he had enjoined Nana, Harriba Dada, Salim, and Yeshwunt. When the order came from the Residency for the transmission of Salim and Yeshwunt at noon, I met Nana Sahib who told me that the order had been received, and that it is necessary to send them, and that similar orders would be received for sending you and me (*i.e.*, *Nana and Damodhur*). In the evening the Maharaja told me that the two men had been sent to the Residency, and that he had enjoined upon them not to confess even though they were killed and cut to pieces. When Yeshwunt and Salim were released, and a note was received again

to send them back, the Maharaja sent for Yeshwunt and told him not to say anything, and desired him to take Salim with him and to go to the Residency. The next day the Maharaja told (me) to act as Govindrao Kale, who was cut to pieces but would not confess; and he had given the same injunctions to Nana and Harriba Dada. I heard from Nanajee Vithul that the diamonds were procured from Hemchund. Nanajee Vithul had money, being balance of the kasar or saving account. I asked the Maharaja to sanction payment of the value of the diamonds. By his orders Rupees 3,500 were credited in the khangi or private book, and were debited to the Swami Narayan as spent for feeding Brahmins. The value of the diamonds was Rupees 7,000, in part payment whereof Nanajee paid a moiety, and the same amount, Rupees 3,500, was not entered in the account in the name of the jeweller, but was entered as paid for a feast to the Brahmins. At first when the diamonds were purchased, they were entered in the account as bought for the Sillikhana for medicinal purposes, and when the attempt to poison was discovered, I asked the Maharaja whether it should be *specified in the account*. (The words interlined here are erased in the original by drawing a line through them.) That the diamonds were to be burnt and converted into medicine as he had stated. Thereupon the Maharaja said, no, and said that the account should be torn up. I told Nanajee Vithul to do so; and he having informed me that he had done so, I informed the Maharaja. The account was not (entered in a book, but was entered, as is our custom, on separate sheets (of paper). When I first ordered the arsenic from the Foujdaree, Hormusjee Wadia, who was in charge, said he would give it after having consulted the Maharaja. I therefore did not ask him again for it. The note regarding the arsenic, bearing my signature, remained in the records of the Foujdaree. Gunputrao Bulwunt said there was no objection to its remaining there, because it is stated in the account that the arsenic had not been given. When Dadabhoy wanted to get a return of the quantity of arsenic sold, the matter was mentioned by me to the Maharaja, who thereupon wanted to know why the return was required, and ordered that it should be given. I then asked Gunputrao Bulwunt to return my note, when he told me there was no reason to entertain any apprehension about it. Enmity against Phayre Sahib was the chief origin of this design in the Maharaja's mind; and that enmity increased since Luxmeebaee's marriage came under discussion. At Nowsaree, one night, I saw Rowjee bringing secretly some Government papers, which he had stolen, into the Maharaja's room. The Maharaja thereupon sent for me and desired me to make a copy of the said papers in the presence of Rowjee. Salim was with Rowjee and the Maharaja. The papers related to the case of Jumnabai. They consisted of the memorial of Jumnabai to Government, which had come to Phayre Sahib for report, and Rowjee had stolen them and had brought them to the Maharaja at 10 o'clock at night. Having copied them till late, I returned them to Rowjee at 2 o'clock. I tore up the copy, because I was afraid of being arrested at Surat in connection with the charge brought by Luxmeebaee's husband. Afterwards at Baroda Colonel Phayre had fever and a boil on his forehead. At that time I heard the Maharaja talking to Salim in the picture-room, and Salim was telling him that a plaster had been applied by Colonel Phayre, but that he having felt it burning, had taken it off. Salim informed the Maharaja that Rowjee had prepared that medicine. At the same time, *viz.*, when the Resident had the open wound, the great physician's younger brother brought a bottle of poison; but as we were present there, he did not give it at that time; and it appeared he might have wanted some money for it. In the evening the Maharaja desired me to procure some blister flies and to send them to the younger brother of the great physician. He desired me to send some Waghries (bird-catchers) through the Foujdaree to catch some flies and take them to the physician. I accordingly communicated it to Narayan Rao Vakaskar, who is in the Foujdaree. The next day early in the morning the Maharaja said to Hariba in my presence that the physician's younger brother wanted some snakes for making medicine. The snakeman came and brought the snakes two or three days afterwards, and I desired him to take them to Hariba before taking them to the physician. Narayan Rao showed me the flies that had been brought by the Waghries; and the next day Goojaba, a servant of Nana Sahib, came and shewed me some flies of the same kind. I desired him to take them to the physician's brother. At the same time the Maharaja told me that the physician's younger brother wanted the urine of a black horse. Thereupon I gave orders to Bapajee, Kamgar of the Khas Paga, to take some

urine of a black horse to the physician's brother. At the same time some arsenic was given from the Foujdaree, but not through me. I do not know how much was given. Had I known of its being given, I would not have procured it from the Borah. Some days after the delivery of these articles to the brother of the physician, the physician's brother brought the bottle of medicine, but he got nothing for it. The Maharaja wanted the medicine, but he did not wish to pay what the man demanded for it. He therefore suggested to Nana Khanvelkar to take out some of the medicine contained in the bottle, and a day or two after, about nine o'clock at night, Goojaba came to me with the bottle prepared by the physician, saying he had taken it to the Maharaja, and that he had ordered him to bring it to me, and that I was to take some medicine out of it and to keep it till the next day and then to give it to Salim. I poured the medicine out of the physician's bottle into a small bottle which had contained attar, and gave the bottle to Goojaba. The next day Salim came to my house at 9 o'clock, when I gave him the bottle to take to Rowjee to poison the sahib. I understood this perfectly at the time, but I did not tell Salim to give it to Rowjee.

There were three separate attempts to poison Colonel Phayre:—

The first attempt was to poison by means of the physician's medicine.

The second attempt was to poison the plaster for Colonel Phayre's boil.

The third attempt, to put in arsenic, was that which has been discovered.

The arsenic which was given to Salim first was to poison the plaster.

Twice I brought arsenic from Nooroodeen Borah by order of the Maharaja, two tolas on each occasion. When the report of the poison transpired, I asked Nooroodeen if he had entered the arsenic in my name. Nooroodeen told me that the Borah in the camp from whom he had bought it had not at first entered it in any one's name; but the second time he had entered it as given to Nooroodeen for the Khangiwalla, and he wanted Rupees 200 for it. I told Nooroodeen to pay the 200 rupees. I knew that when Nooroodeen got the Sillikhana business, it would be adjusted in the account. I think he did not give him the money. I don't know the Borah in the camp, but I know he lives in the city. After the report of the poisoning had spread when I first mentioned the matter to Nanajee Vithul, I found that he had suspected that the diamond had been purchased for the purpose of poisoning Mhalsabaee, against whom Luxmeebaee had enmity, and I told Nanajee at the time to conceal anyhow this transaction in the accounts.

Before me 29th January 1875,

(Sd.) J. B. RICHEY.

Taken before SIR LEWIS PELLY, Agent to the Governor General and Special Commissioner, CAPTAIN SEGRAVE, and CAPTAIN JACKSON.

I have read the above deposition. This is the deposition which I gave before Mr. Richey. The above particulars are true, and the above is a true translation thereof.

4th February 1875. [Sd.] DAMODHUR TRIMBUCK NENE.
His own handwriting.

DAMODHUR TRIMBUCK, Brahmin, late Secretary to His Highness Mulhar Rao Gaekwar, states:—

Yeshwuntrao Yeole, Salam, and Rowjee were concerned in the poisoning of Colonel Phayre. In the month of Ashwin about the Dussara the Maharaja asked me to procure some arsenic from the Foujdaree, where it is kept, giving as cause that he wanted it for itch, and told me to say at the Foujdaree that it was wanted for a horse. I could not get any at the Foujdaree, and told the Maharaja, who told me to get it from Camp. I told him it wanted a pass; he said no matter about the pass.

I got two tolas of arsenic through Nooruddin Borah, the Maharaja having told me to promise him a monopoly of the supply of medicine to the

Sillekhana. He did not at first say whence he procured it. I took the powder to the Maharaja, and asked him whom it was to be given to. He told me to give it to Salam, who would prepare the medicine to be made from it. *I gave it to Salam.* I don't know why he brought it here. Afterwards the Maharaja told me to get one tola of diamond to calcine and make ash of. I ordered Nanajee Vithul to get a tola of diamonds and bring it to the Maharaja. He brought me the tola of diamonds, and I showed it to the Maharaja, and he told me to take it to Yeshwant. Up to this point I did not know that it was wanted for this purpose. The Maharaja said at first it would be to make a head ornament for a Swamee at Akulkote. Afterwards again the Maharaja asked for another tola—this time *diamond dust.* I told Nanajee to get it, and he brought some diamonds and some diamond dust, and either he or Venayekrao came and gave it me in the evening. I asked the Maharaja what was to be done with it, and he told me to give it to Yeshwunt. *When I gave it to Yeshwant* I asked him what he did with these diamonds that were being given him, he said they were pounded and rubbed fine and given to Colonel Phayre. This took place about five or six days before the attempt to poison Colonel Phayre became known. On that day I had accompanied the Maharaja as far as the Sewuk's Dhurumsala, when the Maharaja picked me up in his carriage on his return. He told me out at once that the poisoning by arsenic of Colonel Phayre had become known. He said that the attempt to administer poison through Salam and Yeshwant had become known. Salam used always to be coming and going to and from the Residency *day* and *night** from the time that Rowjee was corrupted for the purpose of sending information. He was here on that morning, and the Maharaja told me that when the matter came out Salam had run off to Rowjee's house to get any of the powder that was left and throw it in the fire where the old woman was baking, and that as Salam was not fully trusted by Rowjee, Rowjee himself had gone to throw it away; whether he did or not, I did not further hear. I asked the Maharaja how this happened to be found out, he said that it was because Nursoo Jemadar was not there to be on the watch. He used to keep watch and whistle to give the alarm, and as he was not there that morning, the thing was found out. The Maharaja had come earlier than usual. I went home, and that afternoon, in Luxmeebaee's house, Nana Sahib and the Maharaja discussed together. In the afternoon Nana and the Maharaja and I drove together, and the Maharaja said they must be on the look-out about the matter that they had been discussing. The next day the Maharaja told Salam and Yeshwunt in the Palace to keep well-informed of what was being done, and afterwards in the carriage drive told Nana and me to keep ourselves well-informed, and said that Rowjee had been let go, that he was a clever scoundrel, and that now there was no fear as "our principal evidence†" was let go. After Colonel Phayre had gone and Colonel Pelly came, one day the Maharaja told me that Rowjee had stood on the road, and made signs to Salam that he wanted some present from him (the Maharaja), but that he had told him he would do nothing now, but that when the case was entirely disposed of, he would do something for him.

At first after Mr. Souter came, and Rowjee was not seized, and Mr. Souter was said to have gone, the Maharaja used to say that as Rowjee was not seized, it was all right, and there was no cause for fear. Then, when Rowjee was seized, he told me he had heard of it, and that it was a bad business; then he heard of Rowjee having taken a pardon and confessed, and told me to make arrangements that any others who might be arrested should *not* confess, and enjoined upon me not to confess even if I died for it, and told the others who knew, informing me of it. He told me that he had warned Nana, Hariba Dada, Salam, and Yeshwunt. When the order came from the Residency asking for the surrender of Salam and Yeshwunt on that afternoon, I met Nana Sahib, and he told me that the note had come, and that they would have to be sent, and that soon notes would come to send us, *viz.*, Nana and Damodhur. In the evening the Maharaja told me that the two men had been sent to the Residency, and that he had enjoined upon them not to confess, though they were torn in pieces.

* Idiomatic—"constantly."

† "Moodyacha manus."

When Yeshwunt and Salam were let go back, and another note came again asking for them, the Maharaja sent for Yeshwunt and enjoined silence upon him again, and told him to take Salam and go to the Residency. The next day the Maharaja told me to act as Govindrao Kali, who was torn in pieces, but would not confess, and he gave the same injunction to Nana and Hariba as he informed me.

The diamonds, I heard from Nanajee Vithul, were brought from Hemchund. Nanajee Vithul had the balance of the "saving" [*kussur*] account, and when I asked the Maharaja to sanction the payment for the diamonds, the following arrangement was made by his order. The Rupees 3,500 or so of the "saving" account were credited in the khangee, and a corresponding debit was made in the account of Swamee Narayen's Brahmins' feeding.

The diamonds were worth about Rupees 7,000, so half payment was made by Nanajee Vithul, giving the jeweller the Rupees 3,500 which was entered in the accounts as paid for the Brahmins' dinner.

At first when the diamonds were bought they were entered in the accounts as bought for the Sillekhana for medicinal purposes, and when the poisoning was discovered, I asked the Maharaja whether diamonds could be used for medicine, as he said, by burning them. He said they could not, and directed the entries in the accounts to be torn up. I told Nanajee Vithul, and he informed me he had done it. I told the Maharaja. The account was not in a book, but, as is the custom, on a loose paper. When I first asked for arsenic from the Foujdaree, Hormusjee Wadia was in charge, and he said he would refer to the Maharaja before giving it, so I did not ask him again. The note asking for it under my signature was left in the record of the Foujdaree as I was informed by Gunputrao Bulwunt, who also told me that there was no reason to mind its being there, as there was an entry in the record that the arsenic had not been given.

When Dadabhai wanted to get a return of the sale of arsenic the matter was brought before the Maharaja, who wanted to know why the return should be sent, but decided that it must be given. I then asked Gunputrao Bulwunt about our note, as above, and asked him to give it back, when he told me, as above, that there was nothing to fear.

The enmity against Colonel Phayre was the origin of this design in the Maharaja's mind; it increased much when Luxmeebaee's marriage was under discussion. At Nowsaree one night I saw Rowjee bringing some Government papers which he had stolen into the Maharaja's private room: the Maharaja sent for me and told me to copy the papers Rowjee had brought at once in Rowjee's presence. Salam was with Rowjee and the Maharaja. The papers were about Jumnabaee's business; it was the memorial of Jumnabaee, which had come to Colonel Phayre for report, and Rowjee stole and brought to the Maharaja. He brought it about 10 o'clock, and I was copying it till late. I gave it back to Rowjee about 2 o'clock. I destroyed the copy because I was afraid of being stopped and arrested at Surat in connexion with the charge brought by Luxmeebaee's husband. Afterwards, at Baroda, Colonel Phayre had fever, and a sore on his forehead from the fever. At that time I heard the Maharaja talking to Salam in the picture-room, and Salam explaining that the plaster had been applied by Colonel Phayre, but that he had felt it burn and had torn it off. Salam told the Maharaja that Rowjee had told him as above, and that it was Rowjee who had doctored the plaster.

At the same time, namely, when the Resident had the open wound, the big physician's younger brother brought a bottle of poison made up by the physician, but as there were many of us present, he did not give it that time, and he may also have wanted something for it.

In the evening one day, when Colonel Phayre had the boil on his forehead, the Maharaja told me to get some blister flies to send to the younger brother of the big physician. He told me to send through the Foujdaree, and have the Wagries sent to catch some flies and taken to the physician. I told Narayenrao Wakusker, who is in the Foujdaree, accordingly.

The next morning the Maharaja told Hariba, in my presence, that the physician's younger brother wanted some snakes to make medicine. The snake-man came to me two or three days after, saying he had the snakes that had

been ordered, and I told him to take them to Hariba, and take his order before going with them to the physician.

Narayenrao brought the blister flies taken by the Waghries and showed them to me, and the next day Goojaba, a servant of Nana Khanvelkur, came and showed me some blister flies of the same kind, and I told him to take them to the physician's brother and submit them for his approval. About the same time the Maharaja told me that the physician's younger brother wanted the urine of a black horse, and I gave orders to Bapajee, the kamdar of the Khas Paga, to take some urine accordingly to the physician's brother.

At the same time some arsenic was given from the Foujdaree, but not through me. I don't know how much was given. Had I known of its being given, I would not have got some more from the Borah. Some days after the supply of these articles the physician's brother brought the bottles, as above stated, not getting what he wanted for it.

The Maharaja wanted the stuff, but did not want to give what the man demanded, so suggested to Nana Khanvelker to get some of the contents of the bottle, and a day or two after, about 9 o'clock at night, Goojaba came to me with the bottle which the physician had made up, and told me that he had taken it to the Maharaja, and that he had been ordered to bring it to me, and that I was to take some out of the bottle, and keep it till the next day, and then give it to Salam. I poured some out of the physician's bottle into a small bottle of mine, which had held attar, and gave the other bottle back to Goojaba, and the next day Salam came to my house about 9 o'clock, and I gave him the bottle to take to Rowjee to poison the sahib. This I understood perfectly, though I did not tell Salam to give it to Rowjee.

There were three distinct plots to poison Colonel Phayre:—

1st.—By the physician's stuff.
2nd.—By poisoning the plaster for Colonel Phayre's boil.
3rd.—By the arsenic which was discovered.

The arsenic that was first given to Salam was to poison the plasters.

Twice I got arsenic from Nooruddin Borah by order of the Maharaja, on each occasion two tolas. After the poison business came out I asked Nooruddin whether he had entered the arsenic in my name; he told me that the Camp Borah, from whom he had bought it, had not entered it at all in any one's name, but the second time had entered it as given to Nooruddin for the "Khangee-walla," and now wanted Rupees 200. I told Nooruddin to give Rupees 200 to him, knowing that when Nooruddin got the Sillekhana business it could be adjusted in the accounts. He did not give the money I believe. I don't know the Camp Borah, but he lives in the city.

After the poison business had come out, when I first talked on the subject to Nanajee Vithul, I found that he had suspected that the diamond dust was intended to be used to poison Malsabaee, against whom Luxmeebaee has a hatred. I told him at that time about the account business by which the transaction was to be concealed.

Exhibit C.2.

Examination of DAMODHUR TRIMBUCK resumed 30th January 1875 :—

YESHWUNTRAO used to take money to give in bribes to the servants, but latterly Salam took the money from the private account, and it used to be debited to fruit from Ahmedabad, &c., fireworks, &c., always some fictitious entry. I should think he must have taken 2,000 or 3,000. Bulwantrao Rowjee used to write the private accounts under my instructions, as I had charge of the money, and made payments by the Maharaja's orders. When money was to be paid to Salam for the above purposes, the Maharaja gave me general orders to make such fictitious entries.

The Maharaja told me after the poison business came out, and Yeshwantrao and Salam had been caught, that if there were any suspicious entries left in the accounts they should be altered, or erased, or concealed. On this order I told Bulwantrao to dispose of suspicious items accordingly. He assented, but in a day or two came and said that the accounts were not such as could be so tampered with. I consulted Madhoorao, another Karkoon; and finally ink was to be poured on the items in question; and I told him to blot in the same way other items also, so as to avert suspicion from the particular entries. I saw one such blotted item, which Bulwantrao showed me as a specimen. I understood this much about the fictitious items, that the fruit, &c., was not ever really brought, but the money was given to Salam to use in bribery at the Residency. This practice of bribing through Yeshwunt and Salam had been in force for about a year and a half.

About four months ago one lac and twenty thousand Babasaye rupees was paid to Premchund Roychund through Ootemchund Jeweree. An anklet was bought from Ootemchund, and the above sum was paid to him in excess of its value. Moro Punt, Nana Khanvelker's servant, was engaged in the business, which was to get recognition of Luxmeebaee's child by Government; it was said to be for a bribe to Mr. Gibbs. I thought that Premchund kept the money, as I heard that he had redeemed Rupees 60,000 worth of property out of mortgage, and I suspected it was with this money.

Ootemchund, Premchund, Moro Punt, and the Maharaja were upstairs together. When the Maharaja came down he told me that 3¼ lacs were to be paid for the anklet,—one lac and twenty thousand to be paid *at once*, and the rest afterwards. The anklet had been given before this passed. The anklet was in the jewel-room, and Nanajee Vithul, jewel-keeper, was instructed by both the Maharaja and me to send in his note for the payment of the sum settled, *viz.*, 3¼ lacs from the Khangee. His note would be cashed in the Khangee by the Maharaja's verbal order, the cash being drawn from a State shop as a general rule. In the Khangee day-book it will be seen where the cash came from.

In connexion with the same intrigue for the recognition of Luxmeebaee's marriage and her son's legitimacy, a Baboo, who was brought by Motilall Dulpatram and Moro Punt, who was paid two sums of about Rupees 25,000 and 20,000 in Government notes, which were brought from Bombay by Ootemchund in Rupees 1,000 notes.

The Baboo came twice and received the money as above on the two occasions. These items may perhaps appear in the day-book with Luxmeebaee's signature, as she used to sign sometimes for the Maharaja.

The Baboo came from Calcutta and talked in English with Motilall, who would interpret to the Maharaja.

When the Baboo came first there was a meeting at Mukhunpoora, and there were present—

The Maharaja,
Nana Khanvelker,
Motilall Dulpatram,
The Baboo,
Moro Punt,
and myself.

Rupees 25,000 were given him there, and a promise of a large reward if the matter were carried through successfully. On the second visit of the Baboo, when he was paid Rupees 20,000, the money was given by me at the Maharaja's order to Moro Punt, and I know nothing of what became of it, but it was to be given to the Baboo.

All the criminal proceedings in which the Maharaja was engaged originated with himself; he did not act under any one's advice that I know of. I speak now of the matters of which I was personally cognizant. I know that Bhau Sindia, Govindrao Naik, and Rowjee Master and others were killed by the Maharaja's order, but I was not personally concerned in these matters, which were conducted through the Foujdaree Department Officers, during the *régime* of Bulwantrao Rahoreker, at which time I was not allowed access to the Maharaja. I was taken into favour for my services in connection with Luxmeebaee's marriage. Before that time I had been in the Khangee Department for about two years, and knew about the accounts.

The order on the Hoozoor Foujdaree Kamdar to send a pass for arsenic, now shown me, is in my handwriting, and is the order which I sent by the Maharaja's direction, as stated in my deposition yesterday, and the words "required for medicine for a horse" were used also by the Maharaja's order, as before stated. The pass for arsenic which I sent for by this order I did not receive, but, as above stated, got the arsenic from the Borah.

Exhibit D.2.

AMEENA, wife of Sheikh Abdoolla Kiral, age about 40, and ayah to Mrs. Boevey, states:—At the time of the meeting of the Baroda Commission, I was persuaded, much against my will, by Faizoo Ramzan, Residency Chobdar, to visit the Maharaja Gaekwar. I went to see him three times altogether. On the first occasion I was taken to the Maharaja by Faizoo, and that was when the Enquiry Commission was sitting. Salim sowar met us at the Haveli, and we all three proceeded before the Maharaja together. We went up three flights of stairs to where the Maharaja was sitting. He spoke to me personally, and begged me to intercede with my madam, Mrs. Phayre, in order that she might use her influence with the Resident in his (the Maharaja's) behalf. I made no promises. After being about half an hour with the Maharaja I left. Faizoo went to his house in the city; Salim remained at the palace, and I came home by myself in a bullock shigram.

I visited the Maharaja twice again; the second time was after my return from Bombay and Nowsaree, where, on Mrs. Phayre's departure for England, I accepted service with her daughter, Mrs. Boevey, wife of the Assistant Resident. It must have been about a month after my return to Baroda that

I visited the Maharaja on the second occasion. I was then persuaded by the Maharaja's Arab servant, Salim, to go to the Gaekwar, and I was taken by the Residency Naik named Kurreem. The Maharaja and Salim talked to me about *jadoo* [sorcery], but I remarked that Europeans could not be affected or influenced by such means. My interview with the Gaekwar lasted about half an hour, and I then returned home in the shigram with Kurreem. On this day I received no money, but two or three days after Kurreem Naik called at my house and gave me Rupees 100, stating that Yeshwuntrao Yeola had given Rupees 200, of which Rupees 100 was for him, which he had kept, and the other Rupees 100 for me.

The third time I visited the Maharaja was during the Ramzan. I was then pressed to go by Salim, who fixed the day and time; and I went in company with my servant boy named Chotoo. My husband, Abdoolla, procured a shigram, and Salim met me at the Haveli and took me before the Raja. On this occasion the Maharaja spoke to me with reference to the birth of Luxmeebaee's child, and enquired whether the Saheb and Madam had been talking about him (the child), and if any objection was likely to be raised with regard to his legitimacy. The Maharaja asked me to do what I could in the matter; but I told him that I could not help him. I was with the Maharaja for about half an hour on this occasion, and returned to my home at the Residency with my servant boy about 10 o'clock at night. About two or three days after this visit Salim came to my house at the Residency and gave me Rupees 50. I am quite familiar with the Maharaja Gaekwar's appearance, as I have often seen him during his visits to the Resident; and on one occasion, when the Gaekwar's family came to visit Mrs. Phayre, the Maharaja was in the room when I happened to be called in and made my salaam. He was then sitting quite close, and I saw him distinctly, and it was the same person before whom I was taken and conversed with during each of my three visits to the Haveli.

The Kazi of Chandore, who was in the habit of frequenting the Residency, particularly when the Reverend Mr. Taylor used to be on a visit, informed me about a month before the attempt to poison Colonel Phayre that the Resident's butler, Pedro, and Rowjee, Havildar of Peons, were in great favour with the Maharaja, and that they had agreed to administer poison, but they did not say to whom.

Kurreem Naik also told me, about a month before the attempt to poison the Resident, that he had heard from a person in high position that Pedro, butler, and Rowjee, Havildar, had consented to administer poison.

Commissioner of Police.

Baroda, 18*th December* 1874.

AMEENA, wife of Sheik Abdoolla, and ayah to Mrs. Boevey, is recalled at her own request, and further states:—When I gave my statement on the 18th, I was suffering from fever and was not feeling well, and omitted to mention certain facts which I have now remembered and wish to have recorded along with my first deposition.

On the occasion of my being taken before the Maharaja the third time during the Ramzan, the Maharaja asked me, after other questions, whether it would not be possible to administer something by which the Resident could be brought round to his (the Maharaja's) will. The Gaekwar spoke in cautious and hidden language, but I understood him to be throwing out a feeler to ascertain whether I would consent to administer poison to my master, Colonel Phayre. I indignantly refused, and objected, and told the Maharaja that if he attempted anything of the sort he would get into serious trouble and be ruined. I exclaimed, "it would* be better that lakhs of people should die than that the supporter of lakhs should come by his death." Salam, who was standing close to the Maharaja at this time, endeavoured to persuade me by kind words and by saying that if I would only do as the Maharaja

* *Lakh murna, lakin lakh ka palnawala nai murna.*
This is a very common Oriental idiomatic phrase.

wished, I would have provision made for me for the rest of my life, and that my husband should also be taken into service under the Raja.

Baroda, 21*st December* 1874.

Exhibit E.2.

Rowjee bin Rama, Mahratta, age 24, Havildar of peons on the establishment of the Residency at Baroda, states:—About two months before the Commission sat at Baroda, Salim, Arab Sowar, who was in the constant habit of visiting the Residency with H. H. the Gaekwar, spoke to me and said that the Maharaja wished to see me. I agreed, and it was decided that I should go on the following Sunday and meet him, Salim, at the house of Yeshwuntrao about 8 o'clock at night. I was taken before the Maharaja by Salim and Yeshwuntrao by a private entrance on the side of the Nuzzer Bagh. On being introduced to the Maharaja, he asked me if I would agree to keep him informed of all that went on at the Residency. I consented, and he promised to reward me handsomely and to confer other favours upon me. The Maharaja asked me if I could get the jemadar of peons, Nursoo, to help in this matter also and to visit him. I promised that I would arrange this, as the jemadar was a great friend of mine. I then left the Maharaja, and the following day I spoke to the jemadar and told him of the Maharaja's wishes. The jemadar said that his family was ill, and that he had his duties to attend to, and could not go to the Maharaja at that time. I visited the Maharaja several times again previous to the sitting of the Commission, and on each occasion I went first to Yeshwuntrao's house, and was invariably accompanied by him and by Salim when taken before the Gaekwar. I visited the Maharaja three times while the Commission was sitting, and furnished him with all the information I was able to gather as to the action of the Commission, and of all that was going on at the Residency.

At one of these latter visits I informed the Maharaja that I was about to be married, and that I was without the necessary means. He ordered Yeshwuntrao to remind him of this, and on the following Monday, when the Maharaja came on his usual visit to the Residency, Yeshwuntrao, who accompanied him, informed me that he had got Rs. 500 for me, and told me to come for it. I went soon after in company with one Jugga (a man employed at the Residency to pull the punkah to Yeshwuntrao's house, where Rs. 500 were paid to me by a carkoon in Yeshwuntrao's presence and before Jugga. Of this money I lent Rs. 100 to Jugga, and made up a silver anklet of the value of about Rs. 100, and the rest was expended on my marriage. One Dajeebhai Kurya got the anklet made up for me.

After my marriage, and a few days after the Commission had left Baroda, Salim Sowar met me, and said that he had got the jemadar all right and willing, and wished to know when I could come in company with him to see the Maharaja. I settled with him to go two days later, which was on a Sunday: the jemadar and I met that night at Yeshwuntrao's house about 8 o'clock. Jugga accompanied me, as I did not like to go by the rear road to the city at night by myself.

From Yeshwuntrao's house we all went to the haveli, where Jugga remained below, and Salim, Yeshwuntrao, the jemadar, and I went up and interviewed the Maharaja. This was the jemadar's first visit, and he consented, at the Maharaja's request, to keep him informed of all that transpired at the Residency, for which promise of favour and liberal reward was held out to the jemadar by the Maharaja. It was then arranged that Salim should from time to time receive and convey information from the jemadar to the Maharaja. I accompanied the jemadar two or three times on his visits to the Maharaja

previous to the Resident's leaving for Nowsaree. At Nowsaree nothing particular transpired. Salim and Yeshwuntrao accompanied the Maharaja, but lived in the compound of the house occupied by the Resident. There they struck up a friendship with the Resident's butler, Pedro, and about two or three days after the return of Colonel Phayre to Baroda, the butler, Pedro, asked me if I would accompany him to the Maharaja. I agreed, and on an appointed day Salim came to the Residency, and we three went off together about 10 o'clock at night in a bullock shigram which had been placed on the road by Salim and belonging to the Durbar. We went direct to the haveli, where we met Yeshwuntrao, who took us up to the Maharaja. The Gaekwar spoke to Pedro and asked him if he understood English. He said he did a little, so the Maharaja requested him to communicate to him any conversation that might take place at the table relating to him, to which Pedro consented. I accompanied the butler, Pedro, on two other occasions to the Maharaj, previous to his going to Goa after the rains. We went to the haveli in the same manner as before and with Salim and Yeshwuntrao: nothing particular transpired. On the butler's return from Goa, I accompanied him again to see the Maharaja. Salim came as before and brought a shigram which we met on the road. Yeshwuntrao met us as usual at the haveli, and we were taken before the Maharaja, who first enquired of Pedro how he was and when he returned, and then said he had something of importance for him to do, and asked if he would do it. Pedro said if it was a matter within his province that he would do it. Yeshwuntrao then handed a small paper packet to the Maharaja, who passed it on to Pedro, and told him to administer it in his master's food. Pedro remarked that if anything should happen suddenly, he would get into trouble. The Maharaja said that he was not to fear, as nothing would take place for two or three months, when his master would either die or get mad. Pedro consented to do what was wanted, and he returned to the Residency about midnight.

In addition to the visits I paid the Maharaja at night in company with Pedro, I also went to see him several times in company with the jemadar after our return from Nowsaree. The jemadar was not aware of my having gone to the Maharaja with Pedro. About fifteen or twenty-one days after our return from Nowsaree, the jemadar gave me at his house in the city Rs. 300, which he said was half the sum he had received from the Durbar to be divided between us. About three weeks or a month before the attempt to poison the Resident was discovered, the jemadar and I were taken before the Maharaja by appointment at night. Yeshwuntrao and Salim introduced us, the Maharaja sat in his private room as before, and after a short conversation he remarked that the Resident was very hard upon him and doing great "zoolum," and asked us if we would consent to administer something which he would give. Salim and Yeshwuntrao immediately began to persuade us by saying that if we would only carry out the Maharaja's wishes, we should not be required to serve any longer, as he would make a handsome life provision for us and our families; that we should have "assamies" bestowed upon us, and should in addition receive a lakh of rupees each as soon as the work was done, meaning as soon as the Resident's death took place. We consented to do the job, and the Maharaja then said that the article to be administered would be given to us by Yeshwuntrao and Salim. A few days after this the jemadar gave me two powders, and told me that equal parts of each should be administered for two or three days, and in such quantity as to consume the whole in that time. This had also been carefully explained to me by Yeshwuntrao and Salim in the presence of the Maharaja. I did not commence to administer the powder for two or three days, as no favourable opportunity presented itself for so doing. It was decided at our consultation with the Maharaja that the poison should be administered in "sherbet," which Colonel Phayre was in the habit of taking every morning on return from his walk. Accordingly I put the powders into the "sherbet" two or three times wherever I found no person in the way or about to see me.

As a few days elapsed without anything happening, the Maharaja evidently became impatient, and sent for me and the jemadar again. We went in the usual manner with Yeshwuntrao and Salim. The Maharaja remonstrated with us for not having done the work we promised. I assured him that I had put

the powder into the sherbet two or three times, and I expressed my doubts as to the poison being efficacious. Thereupon the Maharaja said he would give another powder, which Salim produced and handed to the jemadar. The Maharaja said that this would not take immediate effect, but that it would work slowly and surely. We then left, and the following morning the jemadar gave me the packet of poison at the Residency while I was sitting on the form close to the screen and near to where Colonel Phayre used to sleep. A day or two after this I administered the poison in the glass of sherbet which had just been made and placed on the washhand table close to the Resident's writing-desk in his private office room. Colonel Phayre was out walking at the time, and returned about twenty minutes after. I informed the jemadar when he came about half-past 7 o'clock of what I had done. When I visited the Maharaja, the punkahwalla, Jugga, accompanied me from the Camp Bazaar sometimes, but a man named Karbhai more frequently came with me as far as the Haveli. They never appeared before the Maharaja, and I only took them as company, as I was afraid to go so far at night by myself.

The packet of poison which the jemadar first gave me I made into small doses, as directed, and kept the powder in the secret pocket of my cross-belt. The powder taken from the secret pocket of my cross-belt this morning (25th December 1874) is one of the powders made up from the packet given to me by the jemadar, and I used always to keep the powders in the same place. While at Nowsaree I spoke to Yeshwuntrao and Salim, at the jemadar's request, to get some money for him, and they interceded with the Maharaja, who ordered Rs. 250 to be given to the jemadar through Salim, who, at the jemadar's request, paid the money to one of his brothers at Baroda.

Whenever there was any information to send to the Maharaja from the Residency, and I was unable to go to the Haveli myself, I used to write or get Jugga to write at my dictation, and the note used to be taken by the jemadar when he went home at night to the city, and he used to send it on to the Maharaja through Salim. The gold and silver ornaments which I have produced, and valued at about Rs. 420, have been made up from the money which I have from time to time received from the Maharaja.

Taken on the 24th and 25th December 1874, before

Commissioner of Police.

Baroda, 25th December 1874.

Rowjee bin Rama is re-called, and further states:—

On the occasion when the jemadar and I were taken before the Maharaja in company with Yeshwuntrao and Salim, and it was decided and arranged that poison should be administered to Colonel Phayre, it was carefully explained to me, and I was instructed each time to mix the powder in water first, otherwise I was told that the poison would float on the surface of the sherbet. Accordingly I used to shake the powder up with water in a small phial and pour it into the glass of sherbet. The jemadar knew this, and was aware that I kept the phial for this purpose concealed under a large empty box which stood close to the form on which the peons sat while on duty.

Taken this 26th day of December 1874, before

Commissioner of Police, Bombay.

The Residency, Baroda.

Exhibit F.2.

Nursoo bin Rajanna, Kamatee, age 50, jemadar of peons on the establishment of the Resident of Baroda, states:—About the time of the sitting of the Commission at Baroda, Rowjee Havildar told me one day that he had been speaking favourably of me to the Maharaja, who had expressed a wish to see me. I replied that there was sickness in my house, and that I had my duties to attend to, and therefore could not arrange to go to the Maharaja at that time.

After the Commission left Baroda, Yeshwuntrao, Salim, and Rowjee all urged me to go and see the Maharaja; and I at last consented, and on a fixed day I went to the house of Yeshwuntrao, where Rowjee and Salim also met me: and we went together by way of the Nuzzer Bagh and a private entrance to an upstair private room, into which Yeshwuntrao brought the Maharaja and introduced me. The Maharaja first remarked that I was a scamp and a bad man, and had never been favorable to or assisted him; but the three men, Yeshwuntrao, Salim, and Rowjee, assured the Maharaja that they had all spoken to me, and that I was now fully prepared to carry out his orders and act up to his wishes. The Maharaja then requested me to keep him regularly informed through Salim of all that transpired at the Residency, to which I consented. On this occasion, a man named Karbhai accompanied Rowjee from the camp to the Palace, but he did not appear before the Maharaja. About twenty or twenty-five days later, I again visited the Maharaja in company with the same people, and in the same manner. Nothing particular transpired at this visit beyond furnishing the Maharaja with all the information we had regarding matters at the Residency.

In the month of April, I accompanied the Resident to Nowsaree; the Maharaja also came there and lived in his Haveli, while Colonel Phayre was located in a bungalow close to the Railway station, and about a mile from the Maharaja's Haveli. Salim and Yeshwuntrao lived in the Resident's compound

I believe Rowjee used to visit the Maharaja at Nowsaree, and through Salim he obtained for me a present of Rupees 250, which, at my request, was paid to one of my brothers at Baroda.

About a month or more after the Resident's and the Maharaja's return from Nowsaree, I visited the Gaekwar again in company with Rowjee, Salim, and Yeshwuntrao. We met as usual at the house of the latter, who took us before the Maharaja. We first gave him all the information of what had been going on at the Residency, and then Salim and Yeshwuntrao remarked to the Maharaja that we (Rowjee and I) had not received anything on account of his recent marriage with Luxmeebai. He said very well, that he would see about it. We then left, and a few days after Salim brought me Rupees 800, of which I gave him Rupees 100, and I believe I paid Rupees 400 to Rowjee, from which sum he was to pay Jugga Rupees 100.

About two months later I again visited the Maharaja in company with Rowjee. We met as before at the house of Yeshwuntrao, and he and Salim took us before the Maharaja. We first informed the Maharaja of all that had been going on at the Residency, after which he remarked that Colonel Phayre was very hard and doing great "zoolum" to him, and asked us if we could and would consent to put something in his food. I replied that in my position I had no opportunity to do this, upon which Yeshwuntrao and Salim began to persuade us by saying, that if we'd only consent to do this job, the Maharaja would reward us in such a manner that we should not be required to serve any longer, and that our families should also be handsomely provided for, and that the remainder of our lives would be spent in ease and comfort. Rowjee then said that Colonel Phayre was in the habit of drinking sherbet early in the morning on his return from walking, and that he would administer the dose in that. The Maharaja and Yeshwuntrao then said that they would send a powder by Salim to me at my house in the city, which I was to give to Rowjee at the Residency. Yeshwuntrao carefully explained to Rowjee at the time the manner in which the powder was to be administered. We left, and the following day Salim brought me a packet which I stuck safely within the

upper folds of my turban, and the next morning I gave the packet to Rowjee while he was sitting on the form close to the screen near where Colonel Phayre used to sleep. I did not open the packet, and therefore was unaware of the number of powders it contained.

A few days after this, when Yeshwuntrao and Salim came to the Residency with the Maharaja, they began to enquire of Rowjee how it was that nothing had happened, and asked whether he had administered the powders or not. Rowjee then spoke to me, and said he did not know how to account for there being no result, as he had certainly put the poison in the "sherbet." The Maharaja being dissatisfied about this sent for us again. About fifteen days after the great Dusserah sawaree, we went as usual to Yeshwuntrao's house. It was about 8 o'clock at night when Rowjee and I met there, and we accompanied Yeshwuntrao and Salim as before, and they brought the Maharaja and introduced us in the same room. He immediately upbraided us for not having carried out his wishes as promised, upon which Rowjee declared that he had put the powders in the "sherbet," but stated that he did not think they could possibly have possessed the required property. The Maharaja then said "Very well," that he would give something else which would be brought to me by Salim. At this time, and when we were about to leave, Yeshwuntrao gave something (I am not sure what it was, a small bottle, or what it was) to Salim, who passed it on to Rowjee. The former promises of high reward and favour were repeated, and we came away. The following morning Salim gave me a packet, which I handed to Rowjee the same day on coming to the Residency. He was sitting as before on the form near the screen. A few days after this the conversation took place of the attempt to poison Colonel Phayre. Rowjee told me that, as instructed, he on each occasion mixed the powder with water, which he shook up in a little bottle before pouring it into the sherbet. He used to keep the bottle for this purpose hid under a large empty wooden box close to the form above referred to. Rowjee used often to give me notes, written sometimes by himself and sometimes by Jugga, at his dictation, to send on to the Maharaja. These notes contained all the information of what was going on at the Residency, and Salim or his man used to call at my house for them. I live in the city and have always been in the habit of returning to my house at night, and on Sundays I have not been required to come to the Residency.

On the several occasions when we visited the Maharaja, Jugga came once with Rowjee from camp, and on all other occasions he was accompanied by Karbhai.

Taken this 26th day of December 1874, before

(Sd.) F. H. SOUTER,
Commissioner of Police, Bombay.

The Residency, Baroda.

Exhibit G.2.

DAMODHUR PUNT'S examination resumed 3rd February 1875:—

I held the position of Private Secretary to His Highness the Maharaja Mulhar Rao, and had charge of all his private business, known as the Khangee Department.

About a week before the Maharaja was made prisoner he brought me to the Residency and introduced me to Sir Lewis Pelly at the door as his Private Secretary.

It was the habit of the Maharaja to go for a drive three times during the day, and he always took me once or twice with him.

Whenever the Maharaja visited the Residency I used to accompany him as far as the Sewak's Dhurumsala, where I generally got out of the carriage

and waited till the Maharaja's return, when he took me in again and drove me to my house on his way to the Palace. The Maharaja was usually driven by a coachman named Rutansing.

I do not know why it was that the Maharaja put in force measures to poison Colonel Phayre without first waiting to ascertain the result of his kharita addressed to the Viceroy urging his removal.

I never knew that Mrs. Phayre's ayah had ever visited the Maharaja till I heard from him that she had also been taken up and made a prisoner of. It was characteristic of the Maharaja not to divulge to anybody the plots which he used to put in force, and to confine such secrets to those actually engaged.

3rd February 1875.

DAMODHUR PUNT's examination resumed 5th February 1875:—

I have stated in my deposition of the 29th January that I procured diamond chips on two occasions by order of the Maharaja. I do not remember the exact dates on which they were obtained, but as well as I recollect about a week intervened between the two occasions when I procured them.

The sums of money which have been entered in the accounts of my department as having been paid to Yeshwuntrao and Salim under the head of fruit, fireworks, &c., represent the amounts which were paid by me in obedience to a standing order of the Maharaja for the purpose of bribing Rowjee, Nursoo Jemadar, and other servants at the Residency.

It was no part of the duties of Yeshwuntrao or Salim to purchase fruit or fireworks for the Maharaja.

The Maharaja and Salim both told me that the details of the plot to poison Colonel Phayre had been personally planned by the Maharaja himself, and the execution of them arranged in his presence by Yeshwuntrao, Rowjee, Salim, and others.

The written information which the Maharaja had arranged to obtain through Rowjee of all that transpired at the Residency used to be delivered to the Maharaja by Salim, and either Wasantram Bhau or I used to read them to him, and the papers were immediately destroyed.

The two sums of Rupees 25,000 and 20,000 paid to the Calcutta Baboo have been entered in my books as having been paid to Bhikoo (a kept woman of the Maharaja's) and to the relations of Luxmeebaee.

I am aware that while Bulwuntrao Rahoorkur held the office of Deputy Dewan he was the Maharaja's principal counseller in all his wicked designs, and it was he who took the principal part in bringing about the poisoning and murder by other means of Govind Naik, Rowjee Master, and Bhow Scindia.

I have stated above that it formed no part of Yeshwuntrao's or Salim's duties to purchase fruits, fireworks, &c., but I now remember that on one occasion Yeshwuntrao did bring some fireworks, either from Bombay or Ahmedabad, and this was about the time of the "Dewalee," 1873.

The orders and vouchers in Mahrattee lettered from A to F, and each bearing my endorsement, are the original documents and authority under which the sums shown in each were paid to Yeshwuntrao under the Maharaja's instructions for the purpose of bribing the servants at the Residency and others. Those papers lettered from G to Q show sums of money similarly paid to Salim for the same purpose.

I have to the best of my knowledge and belief stated all I know, but shall willingly furnish hereafter any further information that I may remember.

Baroda, 5th February 1875.

BARODA, *8th February* 1875.

The deposition of DAMODHUR TRIMBUCK, Brahmin, resumed:—

The two memoranda in Mahrattee now shown to me (lettered R and S) were addressed to me by Nanajee Vithul, at my request, with the object of concealing the purchase of the diamond clips obtained from Hemchund Futteychund. The two documents purport jointly to acknowledge the receipt of about Rupees 3,500 from the "Saving Fund," and the Mahrattee order bearing my endorsement now shown me (lettered T) is my authority to debit the above sum under the heading of expenses incurred in feeding Swamee Narayan's Brahmins. In reality this money was paid to Hemchund Futteychund on account of diamond chips purchased from him for the purpose of poisoning Colonel Phayre, and represents the sum of Rupees 3,500 referred to in my deposition of the 29th January. On that day I stated the amount to be Rupees 3,500 *or so*, as I was giving my deposition from memory. The documents above referred to (lettered R, S, and T) have now been found amongst my records which show that the actual amount was Rupees 3,632-13-3 of Baroda currency.

Exhibit H.2.

HEMCHUND FUTTEYCHUND, Jeweller of Baroda, states:—

Some few days after the last Dusserah festival Nanajee Vithul, in charge of the Gaekwar's jewel-room, directed me and other jewellers to bring some diamond chips, which we did the same day and handed them to Nanajee, who retained them. The following day our diamonds were all returned, and we were told that the price did not suit. Two days after Nanajee Vithul directed me to bring my diamonds back again; they were weighed, the price settled, and purchase concluded. Four or five days later I was again sent for* by Nanajee Vithul, and directed to bring other diamond chips, which I took to the Palace accordingly. Nanajee Vithul was not present in the jewel-room. The diamonds were therefore handed to Venayekrao, Nanajee's brother-in-law, who weighed and priced them, and then took them along with me to Damodhur Punt, who remarked that the price was high, but kept them, saying that he would purchase them if required. On this occasion the diamonds were in two packets, both of which were kept; but about four days after one packet was returned to me.

A few days after it became known that an attempt had been made to poison the Resident, Colonel Phayre, Nanajee Vithul asked me whether I had entered the purchase of the diamond chips in my books, and if so, that I was to remove the entries in some way or other, as he was afraid that the diamonds in question had been made use of to poison Colonel Phayre. On hearing this I became afraid, and at once caused the pages of my account books on which

Note by the Secretary—

* In Exhibit I 2 the words are "Nanajee Vithul sent me a direction."

the sales of the diamonds were entered to be removed and fresh pages substituted. The three books now before me (lettered A, B and C) are those that were thus tampered with.*

The price that I was to receive for the diamond chips was Rupees 6,270 of Baroda currency, and on account of this sum I was paid Rupees 3,000 by Nanajee Vithul, which has been credited at pages 10 and 24 of the day book as having been received from one Shivchund Khushal. A portion of the above sum of Rupees 3,000 was counted out and paid to me by Nanchund, Shroff of the Doomala villages.

No. 4.—Printed Notes of the arguments of Counsel.

COMMISSION OF INQUIRY INTO CHARGES LAID AGAINST H. H. MULHAR RAO, GAEKWAR OF BARODA.

Sixteenth day, Saturday, March 13.

Serjeant Ballantine's Speech:—

(*Extracted from the "Bombay Gazette," Newspaper.*)

SERJEANT BALLANTINE then rose to address the Commission. He said—May it please your Lordship, your Highnesses, and the other Members of this Commission,—After what I believe—and I think I shall demonstrate—to have been a most cruel and groundless persecution, His Highness the Gaekwar of Baroda has now the opportunity of coming before a Court constituted as this is, and to ask at their hands that justice which has been hitherto denied him. It is now known upon what grounds these accusations have rested. It is now known upon what slight foundation his liberty has been taken away. He has been humiliated in the sight of his subjects,—has suffered the misery of what amounts in reality, upon a man constituted as he is, to a severe incarceration. It is now further known upon what evidence these charges are founded, and in what way that evidence has been procured. It is known that those who have conducted this prosecution conducted it with all the energy that an active, and I am obliged to say utterly unscrupulous, police have brought to bear upon the matter. We know now what is the foundation, what are the facts, and who are the witnesses in confirmation of these facts. And I am not afraid to assert—and I do so fearless of contradiction from any thoughtful and reasoning man—that a mass so incongruous, that statements so contradictory, that matters so improbable—I may say almost impossible—have never been heaped together in any charge that in modern days at all events has been brought into a court of justice. I further am entitled to assert—again I may say without fear of contradiction—that the witnesses who are called upon to support these charges are abandoned beyond all ordinary infamy, and that the only endeavour that can be made by myself in appearing for His Highness the Gaekwar is to point out, not these matters that I should have to meet as bearing in any way the impress of truth, but probably rather have to comment upon the greater infamy of one witness beyond another, whilst I am unable to rest my mind upon any witness or upon any evidence which is not corrupt, and bearing upon its very features the stamp of falsity and almost carrying upon its very surface an invitation to those who have but to hear to say that this is a foul and perjured lie which no gentleman or man of honor can receive or believe. I have said, my Lord, that the mass of evidence, the character of it, and the nature and character of the witnesses, is such as to be almost without a parallel. I remember no case of modern days bearing the slightest similarity to it—I have not the slightest acquaintance with the proceedings of courts of justice in this country. And for aught that I know, infamy may exist elsewhere, and cases of infamy may have been discovered before a tribunal like this. But in my time, and in my knowledge of other tribunals with which I am familiar, I have known none of the same character,—I have known none bearing even a similarity to it, and I confess it is with wonder and astonishment I find that this unfortunate and unhappy Prince has had his liberty taken away, and been followed by slanders of the foulest kind and has been heaped with infamy of the most extraordinary kind from quarters where he would feel it most. And when I come to look at the evidence, I find nothing but a mass of groundless lies, of filthy perjury, of abominable invention. My Lord, whilst this case has been proceeding, and while I have been reflecting from time to time upon the evidence which has been given from day to day, whilst I was unable to find anything in modern days in any way whatever similar to the story, with all its improbabilities, with all its incongruities, with the absolute carelessness in many instances of making falsehoods fit in one with another, as if the persons

who told the lies thought that they would here find an easy audience who would believe everything that these dirty wretches swore against a man who was under the ban of Government, and this Court knows right well it is not a peculiarity of the country of India how when a man is down, and when he is supposed to be under the ban of power and it is thought he may never rise again, the dirty curs surround him, spring up and yelp and bark, and how their miserable tongues convey all the miserable slander they are able against a victim whom they suppose is prostrate. My Lord, while reflecting on these things, the story which has been told here brings forcibly to my mind one of the most disgraceful passages in our history —where a weak King and an excited populace, assisted by corrupt judges, listened to stories equally incredible, listened to tales equally absurd, scorned anything like reasoning, applied nothing like judgment, listened to everything that was stated, and apparently believed it, and allowed many an honorable and upright gentleman to be hounded by perjury and fraud to the scaffold. It reminds me of those days when Oates and Dangerfield and the crew of villains who surrounded them invented every lie which came to their mind, and emitted these lies in a court of justice, and were listened to because those to whom they told the lies had no independence, and were afraid to act against the opinion of the monarch and the feelings of the people. But again I have been thinking whilst this case has been progressing that in this country there is a belief amongst certain sects in the doctrine of transmigration of souls, and when I have heard Rowjee and the other persons who have been called here—Nursoo and the others—I could not help dreaming to myself that possibly, if the ideas of these sects have anything of truth in them, at this moment we have the souls of Dangerfield and Oates before us, hidden in the bodies of the perjured witnesses, who have dared to give evidence before an intellectual and honorable tribunal. My Lord, I hope—indeed I am sure—that you will believe that it is no mock modesty on my part when I say that I enter upon a discussion of this case with a feeling of such heavy responsibility that it almost destroys my powers of reasoning with the clearness I should have desired to put before this tribunal, constituted as the present is. I cannot divest my mind—it may be a wrong feeling—a feeling not appreciated probably by many—I do not mean upon the bench, but by many of my hearers—but I cannot divest myself of a strong feeling of sympathy for that unhappy Prince, and my mind and powers are overladen with the weight that rests upon me, having more or less his fate in my hands, and possibly—I do not say probably—because I believe without a word of mine this case will be disposed of as I could desire, and, as I believe, in the cause of justice and truth. But still it may be upon me that some matters rest which may have a more or less effect, and I do feel the weight of the responsibility cast upon me, and an apprehension of being unable to perform the duties I have undertaken. I have only to make this observation upon the subject. The matter rests entirely upon my own feelings. From the time I have had the honor of addressing the Court, I have met with nothing but a desire exhibited by the keenest attention to investigate the truth, and I have met with nothing but assistance even where it was possible. I might have trespassed upon their kindness, and I feel that upon me, and me only, rests this matter, and I have had no complaint to make since the subject has come into this Court. I have had every facility afforded me, and with these facilities I propose to address the Court. From this time I will endeavour to do so with calmness, advancing to them solely what I deem to be argument, because I hope to be able to impress my feelings upon the Commission;—in my conscience I believe if I can only succeed in placing before this Commission the matter as it has been impressed upon my own mind, there will not I believe be a dissentient opinion as to the decision which will be arrived at. It is not often, my Lord, that an advocate dares to express such confident opinions, but I am assured the Court will feel that I intend no disrespect to them, and moreover if the decision should indeed be adverse, I shall simply feel that my judgment has been wrong, that my thoughts have been erroneous, that my conclusions have been led away possibly by my feelings. But

such nevertheless are my feelings, and my only hope and prayer is that I may be enabled to convey that which is upon my own mind in clearness to the minds of those whom I have the honor to address. My Lord, the Proclamation by His Excellency the Viceroy, as has been pointed out, has limited the scope of this enquiry. It is particularly directed that no extraneous matters should be introduced. It is anticipated that the two questions that have been submitted to you, namely, whether or not there has been an illegal tampering with certain servants of the Residency, and whether or not the graver crime imputed to the Gaekwar has been committed—are the two questions which this Commission is called upon to apply their minds to and to express an opinion upon. I refer to this because it is impossible not to feel that the Gaekwar has been surrounded by, or enveloped I should rather say in a cloud of what as far as I know is, calumny. I am not here with any power to know of his former transactions, or aught of his former life. I have not sought, and I do not possess information upon the subject. I can well imagine—one's reading at all events gives one an insight into those who are occasionally governing territories of this description. One knows how they are brought up. One knows how little of independence they possess, how their thoughts are more or less controlled by others, and I believe I am right in saying that there were unfortunate circumstances in His Highness' life which made him more than usually dependent on others, and gave him less opportunity of acting for himself and governing in those matters in which he had a more immediate concern. It is not uncommon, unless a Prince is indeed very acute and unless he is also very determined—it is not uncommon—I will not say merely in this country, but in every country in the world—for Princes to be surrounded by the vilest of servants—men who are plundering them, men who are deceiving them—men who are tricking them—and yet men in whom they place their confidence. My Lord, I only refer to that for the purpose of founding this observation. Do not let us be too hasty to fasten upon the man's heart, his judgment, or his mind transactions, if there be any, which may have emanated from his servants and over which he may have had but little control. I make no further observations upon this point. I think it will not be felt by the Commission that it is an improper one to have been made, although it is not with reference to that which is more immediately in issue, and although, when I come to point out what is the real nature of this case, it will not be, my Lord, unimportant to ascertain by whom the Gaekwar was surrounded and who were the persons influential in his household. But I wish rather to convey—perhaps, addressing this tribunal I ought not to do so—but it is an argument that is addressed to the highest and to the greatest—whoever is mortal, is subject to mortal prejudices and feelings, and it will not be considered disrespectful on my part when I earnestly implore those Members of the Commission who may have known something of former transactions on the part of the Gaekwar, and who may for aught I know have formed certain opinions upon those transactions—I am sure it will not be felt any disrespect on my part, if I implore them earnestly, as a duty to the Gaekwar, as a duty to their country, as a duty to common justice, to dismiss every consideration of that kind from their minds—to start free and clear from the point to which His Excellency the Viceroy has directed your attention, and from that point say,—is there any case made out? The importance of this enquiry of course is very great. It is not for me to contemplate political consequences. I am quite sure, from the course that His Excellency the Viceroy has taken in this matter, that he is careless of political consequences, that he has desired to exhibit to the civilised world that the kingdom of India can be governed by honour, and that questions between the Government and those who may be supposed either to be antagonistic to or somehow in the way of the Government—that such questions shall be determined in such a manner as shall give satisfaction to civilization—and he has appointed for that purpose a tribunal to whom it is impossible not to look up. The Native Princes, acquainted with the habits of their own order, I shall hereafter appeal to upon certain evidence that has been given during

the progress of this case, and endeavour to obtain their assent to a proposition that I shall make, that the story stated is, upon the face of it, incredible. To the Native Princes I shall appeal as having at this moment the power and authority placed in their hands, and a belief reposed in their truth and in their knowledge—the exercise of which power will have to be answered for to the length and to the breadth of India. To those who are my own countrymen I have only to say, I expect and know I shall possess that assistance and that fair consideration that ever comes from an honorable English gentleman, and I care not who the presiding officer of this Commission may be, provided he is a judge of England, because the very term judge of England means independence; and no such thing as wavering from the truth, or yielding to power, or acting except under the virtue of strong convictions, strong belief, and independent feeling ever enters into the mind of any of those whom I am proud to call my countrymen—of any of those to whom the entire world look up as being free from anything like imputations of ever leaning to the right or to the left, and who as far as their judgment enables them go straightforward, whatever might be the interests that were at stake, whatever might be the importance of the determination, whomsoever it might injure, whomsoever it might benefit. Under such circumstances I consider I am indeed fortunate in the tribunal I have the honor of addressing—and while I doubt my own powers and ability in placing the matter as I could wish before them, I believe, and the world believes and looks to them with implicit and absolute reliance, in their integrity as well as their knowledge and their judgment. Now, my Lord, in dealing with this case, the early evidence, as it will be in the recollection of your Lordship, applied to tampering with the witnesses. I propose, however, to postpone the consideration of the matters connected with that particular charge and to deal with the evidence applicable to the graver charge that has been made against the Gaekwar. I think that will be more convenient for one or two reasons. In the first place, the charge of poisoning, or attempt to poison, involves in many of its details the necessity of considering the evidence connected with the other charges and the nature of those other charges, and I think that a great deal of time will be saved by taking the earlier charge first, and I am bound also to state in doing that I am unable to bring my mind down to the level of the other charge, which I scarcely appreciate. It appears to me—comparatively at all events—trumpery and trivial. I feel some difficulty also in understanding the exact nature of it, or its exact legal bearings, but I shall when I come to consider it endeavour to obtain the sanction of the Commission for the view I take upon the subject. In the meanwhile I shall deal—I propose to deal—with the graver charges and upon that, it appears to me, that it is desirable that I should make one or two general observations. With regard to the nature of it, I shall have to enter into a good deal of detail and particularity. But there is one observation that it occurs to me that I am entitled to make. I have already referred to the police. I find that the police are dealt with in different books connected with the law of this country, evidently upon the foundation of great doubts arising as to their testimony. I believe I am right in saying that within certain jurisdictions—I do not go into details of such jurisdictions—that a confession made to a policeman is not receivable in a court of justice in any instance whatever, unless somebody was present at the time to corroborate it. So an uncorroborated confession of a person to a policeman would not be received. A confession to a policeman, as I understand, would not be received at all. There are also provisions in other Acts of Parliament (I believe I am speaking correctly upon the subject), by which policemen are forbidden to accompany witnesses to a court of justice. It seems that the Legislature and the Courts are fearful of the influences that the police are likely to have upon these witnesses. Laws of that kind do not apply here. As far as I see there is no law whatever governing the police, or what they do. As far as I can see, they are entitled to do anything. They appear to me to have unlimited power; there does not seem to be any judge,

any magistrate, who can control them—what a policeman chooses to do, he does; and in the present case I do not know how many—but a vast number of witnesses—have been detained in custody for the purpose, as they say, of investigating this charge. Now such an unlimited power undoubtedly creates—and it is necessary that it should create—a very great amount of terrorism: and you know no man can call his house or his person his own when a policeman is able at any moment to take him into custody and hold him whenever he chooses for any time he pleases, and there is no remedy in any way—no magistrate can interfere or does interfere, and he has no power whatever either to obtain redress at the time or compensation afterwards. It is the law, I presume, of the land. It is unquestionably the practice at Baroda. We have seen it in numerous instances, and we have seen the mode in which the police have acted with regard to different persons whose evidence was given in this case. In many instances I shall have to dwell upon facts connected with the police.

But there is one general observation which appears pertinent to this case, and I shall be glad to fix it upon the minds of the Members of the Commission—it appears to me to be a most monstrous thing and calculated to lead to the gravest injustice—I believe that I shall show in the present case that it has led to the gravest injustice—that a police officer should not only be the person getting up the case, doing all he can to bring it home to the person who is suspected of the charge, but that he also should have the power of taking the depositions, and that those depositions should be capable of being used against a person upon the subsequent enquiry or trial, whatever it may be.

Human nature is not less so because it inhabits the mind of a police constable, and a man who is hunting something down gets a keen desire to catch it—and sometimes if he cannot get at it by fair means, he will go a little out of the way and obtain it by foul. It is not right that that which is a judicial document, and intended to govern judicial minds, should be the act of a person who has a strong, a naturally strong, partisan feeling in the matter under discussion, and I think I shall be enabled to show that this observation that I have made is singularly pertinent in the present case upon referring to some of the depositions that have been taken, and I cannot help saying—and I shall give my reasons hereafter for making the assertion—that these depositions are not warranted by what took place, that they have been unfairly obtained, and that in many instances they do not represent in reality what was said, and that in point of fact they do not in any way whatever convey the truth as was intended even in the mass of falsehoods, because these depositions contained that which the witnesses themselves did not intend that they should represent. I think I shall be enabled to show this in a variety of instances, and that the observation that I have made upon these depositions will show that they are not to be credited. I myself treat them as being instances coming from a source more or less tainted with suspicion. Now, my Lord, there is another matter; it is a general one, and upon that I must rather address the President of this Commission than address the others, except so far as some of the observations will be mere ordinary common-sense observations which they shall be, as far as I can make them so, but they involve certain principles of law as well as certain principles of justice. One often meets, when these questions are being discussed in society, a number of people, very worthy people indeed, who say, especially if it is a subject of such great interest as this, "Oh! so-and-so, there is no doubt that he is guilty." And I have no doubt whatever that that will be the kind of observation that I should meet with pretty generally among the English residents at and English visitors to Baroda. This opinion is not confined to one sex, but I should think it is pretty generally extended. But let me endeavour to introduce a little reasoning into the subject and ask, "Oh! but why is he guilty?" "Oh! why you know everybody says he is guilty; there is no doubt he is guilty." Then you ask, "Upon what facts do you put it?" Then comes the

puzzle. Facts are difficult things. And I have often observed that those who have given their opinion upon a particular subject dogmatically, have very little knowledge of the matters upon which these conclusions are formed. Belief, I apprehend, cannot be formed by mere intuition—such belief as ought to govern the minds of courts of justice must be a belief founded upon facts. Now with regard to the facts—there, again, there is very often a very great mistake. People treat mere assertions as being facts without investigation, and without enquiry, and without analysis. But there is moreover a class of facts, and what may be dealt with as assertions, and which may also be said to be facts that frequently come before courts of justice, and which have had the attention of very great and learned men applied to them for the purpose of dealing with them in a fair and judicious manner,—I mean those statements that are made by accomplices—the statements that are put forward by persons who admit themselves to be parties to a crime, and I am extremely anxious in this case that the position of persons of that kind should be thoroughly understood; and I apprehend that I am not wrong in saying that no court constituted under British law will receive the evidence of an accomplice without confirmation. I am not unaware—and I should like to exhaust this subject, which I think will be an important one, and one which I shall not probably allude to again—that there is no law to prevent a person being condemned by the evidence of an accomplice alone; but there is springing up a custom, as much honored as the law itself, that judges in directing juries expressly direct them—and it would be a misdirection if they omitted to do so—that upon the evidence of an accomplice alone no person can be put into peril, or have his liberty or his life imperilled. That proposition is a simple enough one, perfectly intelligible, and I fancy so completely admitted that I need not labor upon it, but it will be well appreciated by the learned Chief Justice that there is a more important question subsidiary to that one, and that is, what is the nature of the confirmation that can with propriety be received to implicate a person charged? That is a question not of less importance, but it is a question undoubtedly of more difficulty. It requires clear heads and clear minds to deal with that question. I propose to make some observations upon it, and submit not my views, but I believe the views of all lawyers upon the subject. Corroboration must be something that implicates, however slightly, the person charged with the statement of a witness—it must bring in some way or another the accomplice and the accused together. It would be confirmation supposing there was any writing in the handwriting of the accused in which some of the statements made by the accomplice were alluded to, and although it might be very slight confirmation, it would be confirmation of a kind that could not be rejected. The confirmation that is simply supporting the assertions of the accomplices themselves as to their own acts, independent of the accused, away from the accured, out of the presence of the accused, and not shown to be within the knowledge of the accused, is no confirmation whatever. To put the matter broadly, even if you could get (and that seems to be difficult) a respectable witness into this case who had seen Rowjee put the poison into the glass of Colonel Phayre, if he did put it in, would be conclusive against Rowjee, but it would be no evidence whatever against the Gaekwar. I put that broadly because it makes the proposition that I have submitted to the Commission perfectly intelligible, and it is an observation that I think the Commission will find follows every witness in this case, and follows all the evidence that has been given in this case. I think that I shall demonstrate that that confirmation that is said by the law to be required to support the assertions of accomplices against an accused person is wanting from the commencement to the end; that there is not in point of fact a scintilla of evidence, coming from an uncorrupt witness, which in any way whatever confirms the evidence of the accomplices in this case. I may put illustrations founded upon this case very shortly. Supposing there is a word of truth—and I do not say there was not—in the assertion of Damodhur Hunt that he

obtained arsenic from a man named Nurroodeen; supposing Nurroodeen had been called and proved the receipt of the arsenic; supposing there was any confirmation whatever, or assuming that there is confirmation that diamond dust or diamonds were obtained from any individual;—that is confirmation if the man himself were under charge—that would be proof against him, but it does not confirm his story against the Gaekwar: and I think this Commission will find, after careful investigation of all the evidence in this case, that from the commencement till the conclusion there is no evidence whatever that introduces the Gaekwar personally or by writing, or by act. There is no independent witness who has put his finger upon one single act of the Gaekwar that in any way whatever confirms the story told by these accomplices. As I discuss the witnesses—which I am afraid I shall have to do at considerable length—I shall have to discuss the details that they give in the shape of confirmation, and I think I shall satisfy the Commission, who have heard my proposition on that subject, that it is at all events a perfectly correct one; and having, as I hope, made myself clear on these topics, I won't trouble the bench further on that subject, but request them to weigh what I have said and say whether or not I have laid before them a proposition that is not only legal, but one which commends itself to men of sense and learning, though they may not have the learning and experience of lawyers. It is sometimes said and sometimes written—said by people whose words are not of much value, written sometimes by people whom one would have supposed knew better, —"Ah, do not let us have any technicalities." And I think I have seen it stated in relation to this case somewhere that there will be no legal quibbles in this case—it will be tried according to common sense and reason. Technicalities will be entirely excluded. Those who talk that way forget that the technicalities they so much abuse and which govern the practice of courts of justice are the works and experience of great lawyers and great men, of the judgment of those who have considered the question of how the truth is best elicited, and that these technicalities, which are abused by thoughtless and silly people, are in point of fact the bulwarks of their country and the means by which truth is sifted out of lies, and has been created and recognised by the wisdom of ages as the best mode of establishing the truth. I shall not trouble you further with the discussion of a subject which certainly does not possess any features of amusement, but shall proceed to direct your attention to what I consider to be an important feature in the case. I am not going to make any observation or complaint further than this, that I have already made about the position in which His Highness is already placed. Those who have done the acts are responsible for them, and their doings will not affect the judgment of this Commission. I may, however, allude to them, so far as they may be pertinent to this enquiry, and I think you will agree that this observation is fairly pertinent, that the Gaekwar from the position in which he has been placed, from the practical seizure of all his possessions, or, to use the euphemism of the Resident, Sir Lewis Pelly, to their attachment—an attachment of so lasting a character that the Gaekwar has never yet seen the end of it, so that so far as he is concerned whatever word is applied to the subject is extremely immaterial. In relation to all this, I say, he has been placed without means at his command and is under a cloud, and I need scarcely add the observation that the position in which he is placed naturally creates many difficulties in meeting any charge of any nature such as is now preferred against him. I will say no more upon the subject; I think the observation will meet with ready assent, and I do not propose to refer to it again. But I propose, with great submission to the Commission, to dwell upon what has been the conduct of the Gaekwar, and also what his interest would be in this matter. It appears to me to be an extremely important subject indeed. I should venture to say, in a case surrounded, as this case must be admitted to be, by perjury, it becomes extremely important to view that which must in any way whatever be the effect of falsehood, of fraud, and design. I therefore earnestly, and at the same time most respectfully and humbly,

ask the Members of this Commission to consider what the conduct of my client has been from the period which forms the date of this transaction, namely, the conclusion of the Commission that was held before Colonel Meade. It would be irrelevant for me, as it would be irrelevant for this Commission, to consider the enquiry that took place before one thoroughly competent to form a judgment and to assist the Viceroy of India by his views upon that or any other subject. I won't say or suggest, except by a word, that much which appeared upon that Commission may have been applicable to servants, and not directly to the Gaekwar, but I pass away from that. The terminus from which I begin is the end of that Commission. The conduct of the Gaekwar from that period is a matter to which I have to solicit your earnest attention. I have to solicit it with a view of asking you to say that it was not the conduct of a man who was designing and arranging a crime of deep dye, but that it had all the contrary appearances. It is not merely negative;—I wish very much that my observations upon this point should be made with sufficient clearness and force to fix them on your minds. I assert that it is not in human nature that a man should be acting openly in the way the Gaekwar did, and avowedly against the person against whom he was also plotting secretly. It will be obvious to the meanest intellect that people would at once say, "Yes, here is the man that has done it." Ordinary common sense, to give no higher name to it, ordinary cunning, would prevent any course of that kind. I should expect that a man who was about to poison another in the way suggested against the Gaekwar would be all affection with the man he intended to poison, and I should expect to find him destroying any evidence that he desired to do him evil. Instead of that, you find him in conflict with Colonel Phayre certainly, but in a fair, open, and honorable way. He obtained a khureeta from the Viceroy of India—an important document in which the Viceroy, after having considered Colonel Meade's report, after learning all that could be said upon the subject, after deriving all the assistance that could be given to him by experience, ability, and knowledge,—came to the conclusion that the Gaekwar was a person who might under certain conditions be entrusted with the reform of those institutions the bad arrangement and management of which had formed the subject of the preceding enquiry, and he gave to the Gaekwar an opportunity down to the end of the year 1875 to effect the necessary reforms. He therefore had received from the Viceroy the clearest proof that in the Viceregal Court he would meet with fair consideration, with fair judgment, and that he would be given a fair chance. Well, why should he interfere with him? But he finds—and upon that I shall have to observe hereafter—every sort of opposition to the proceedings he was taking and to the endeavours he was making to perform that which had been suggested by the Viceroy. I do not think it is unworthy of remark the observation that was made by Sir Lewis Pelly in his examination yesterday of what his experience of the Gaekwar was. He found him quite amenable to reason; he was able to act with him upon most agreeable terms; he found that he was perfectly ready to do what was suggested to him in the interests of his Government and according to the desire of the Viceroy. And one cannot help making the observation, that there is sufficient and abundant evidence—and I think I shall be able to point out without any unnecessary harshness or unkindness—that Colonel Phayre was about the very worst man who could have been placed in the position he was in; that he was in his conduct most injudicious, and that the Gaekwar had most reasonable ground to complain of the conduct he pursued. One little incident is enough for me, and I think I shall have to dwell more upon this hereafter. You, Gentlemen of the Commission, can do what I cannot;—you can realise the native mind and the native reason, and I ask you—and I think you will agree with the comment I am making—could there be anything on earth more injudicious than for Colonel Phayre to show himself in daily and hourly intercourse with the very bitterest enemy the Gaekwar ever

had? Could he have thought under such circumstances justice was likely to be done to him? Moreover, *was* justice likely to be done to him? I venture to think not; for although Colonel Phayre imagined and stated that Bhow Poonikur was a most upright and highly honorable man, I venture entirely to dissent from that opinion, and to think he was nothing more than a spy, and a person who, with other persons too numerous to mention, was hunting up for that very information which the Gaekwar is accused of obtaining—hunting it up in much the same way, not perhaps receiving for it specific sums of money, but receiving Colonel Phayre's patronage which would put more in Bhow Poonikur's pockets than a few rupees would do, as it would show that he had the ear of the Resident; and it must be remembered that this man must have appeared before the eyes of the Gaekwar as being a person who, in all human probability, was controlling all the actions of Colonel Phayre. Is it wonderful then that the khureeta of the 2nd of November should have been framed? Of course the gentlemen of the Commission have all the dates in their minds, so that I need not ask them to recollect them particularly, but in dealing with it, it seems to me to be a matter of importance to remember this date,—I allude to the 2nd November. Immediately previous to that time the khureeta was being framed. It must have been a subject of very grave deliberation. It is, as far as my humble judgment goes, a very admirable document. Everything is put most fairly, most temperately, and at the same time argumentatively, while not leaving matter upon bare assertion without proof. Two or three cases are quoted of what he alleges to be the gross injustice perpetrated against him by Colonel Phayre. The case propounded by the prosecution is that at the very time this khureeta was being prepared, simultaneously with it—day by day and hour by hour it must have been going on—arsenic, diamond dust, contrivances of kinds that are the dreariest remains of ancient superstition, bottles containing poison, such as one may read of probably in the *Arabian Nights*, but which I should have thought would have been hardly alluded to in the darkest places in the nineteenth century. But all this time while a great State document of great importance was being prepared with care, and argued out with judgment—while this is being prepared by himself and his ministers, he is accused of mixing himself up with a parcel of scoundrels, and inviting them to poison the man whom he must have known perfectly well, would have to answer this khureeta, and whom he also must have known it would be perfectly useless to act in any way whatever against, till this khureeta was answered. Of his object I shall say nothing more at present; but when I come to objects I shall have to say a good deal. There are grave matters in this case that will present themselves, and I cannot help thinking, before it is concluded, the real criminal will be traced. I cannot help thinking so. But talking of the probability of the Gaekwar being that criminal, I wish to impress—and this is a matter that I shall have to dwell upon hereafter—as strongly as I can on the minds of the Commission, that such an outburst as would arise from the successful poisoning, or unsuccessful attempt to poison, must, in all human probability, have utterly prevented any attention being paid to the khureeta. In this particular instance the Viceroy appears to have attended to it immediately, and notwithstanding this alleged attempt occurring, to have answered the khureeta in most favorable terms. But it appears to me if the Resident had been poisoned, in all human probability there would have been an end of the enquiry raised by the Gaekwar, and that the greater subject connected with the kingdom, the poisoning of the Resident, of the Queen's representative in that kingdom, would have smothered everything like an enquiry into other matters, and probably would have led to a deposition of an entirely different kind, upsetting from the beginning to the end all the endeavours of the Gaekwar for the purpose of obtaining what he considered justice at the hands of the Viceroy. I submit that would be the natural result,—in point of fact —I should say the almost certain result of such an attempt whether successful or not, therefore I venture to think that the two things are totally

inconsistent: that the khureeta and poisoning do not agree; that they do not go hand in hand; that they are poles asunder; that they diverge of necessity; that the man whose mind was on the khureeta would not do anything that would be likely to make that khureeta of no effect, and at the same time bring another Resident, together with, as he must have known, the severest investigation, and one that might be attended with the most dangerous consequences. Having remarked on the conduct up to that time of the Gaekwar, I wish now to proceed to the period when suspicion, or rather before I arrive at that, I wish to call your attention to the conduct of the Gaekwar during the interval, when you have been told by Sir Lewis Pelly, he was free from all restraint, under no watch, and not interfered with in any way whatever. The suggestion of the prosecution is that upon this man's mind is the knowledge of this heavy crime, and he also knows, if the story be a true one, that the immediate actors in this crime are persons who have been already suspected, that enquiries have been made, and that the train is laid by which ultimately the truth may be arrived at. At this period his Secretary Damodhur Punt was not under charge. Damodhur, who certainly, whatever other elements may be wanting in his constitution, is not wanting in intelligenee—would of course have communicated with him, and according to Damodhur Punt's evidence he had communications with him: so if Damodhur Punt's evidence is to be believed, his mind was quite alive on the subject, at all events his mind would necessarily be alive from the fact of Rowjee and Nursoo having been taken into custody, and this matter being investigated. Well, during all this time he has control of all the means connected with his Government. The control of money sufficient for the purposes I am about to suggest, and the question is what his conduct was, and whether that conduct is what you would expect the conduct of a guilty man to be. I submit that it was not. On the contrary, it was the conduct of an innocent man. It is not pretended that he had communications with Rowjee or Nursoo; or that he, either by his agents or otherwise, endeavoured to get them out of the way. It is not suggested that any attempt was made by his agents or others to bribe them. He remains there knowing, if the case on the part of the prosecutors is a true one, that he was sitting upon a mine to which a match might be at any moment applied; knowing that he must be necessarily blown up by it, and yet there he remains careless, pursuing his ordinary avocations, seeing Sir Lewis Pelly each day, dealing with Sir Lewis Pelly anxiously for the purpose of meeting the views of the Viceroy daily in the town, daily having an opportunity of seeing Rowjee, daily having an opportunity of seeing Nursoo, his secret agents, I suppose he would have no difficulty in finding some whom he could use for his purpose, and there is not a single act from the beginning to the end of that period—and I urge this upon the Commission—that is indicative of anything but the most perfect freedom from being guilty of the subject of the matter that was then being investigated and now is charged against him. A very few words more about him. I had intended rather to have deferred my observations upon this matter till a later period, but one does not always follow the exact arrangement that one has made, but having alluded to it, I will now conclude my observations upon the subject of his conduct, by begging attention to the evidence given by Sir Lewis Pelly yesterday as to his conduct when he was requested to send Yeshwuntrao and Salim to the Residency. I think I may ask you to refer to the correspondence which I put in on that subject. Sir Lewis Pelly left no doubt whatever as to what was the nature of the enquiry, and as to his object in asking for the presence of these two persons. What was the conduct of the Gaekwar himself? It may be great deceit and it may be great hypocrisy, but it is a deceit and hypocrisy that he has not shown in any other part of his career. It may have been great deceit and great hypocrisy, but it is inconsistent with anything you find in the earlier period of his conduct regarding the matters which have given rise to this trial. It may have been deceit and hypocrisy that he exhibited, but bear in mind that he sent Salim and Yeshwuntrao without hesitation, without a moment's

delay, and without any communication having been made to them by any human being, they were permitted to come to the Residency and state all they knew about the matter under the hands of acute police officers; under the hands of authority, under the hands of the law. He knew the power of the law, he knew the power of the English Government, he knew how much could be brought to bear upon a person against whom there is an accusation by the British Government. And yet the supposed attempted murderer has never interfered with any of those persons, never attempted to corrupt them, or buy them over, and when their presence was required at the Residency, he immediately without communicating with them, ordered them to go there, went himself, offered himself in every way to give every assistance; and I take the liberty of saying that while his interests and his conduct militate against his contemplating the act of poisoning, his subsequent conduct showed as conclusively as a man's demeanour and conduct can show, that he had never been a party to it. I submit for your better consideration and judgment these observations upon the subject of what his conduct was both before and after this charge, and I hope you will not consider that I am too sanguine in supposing that they are likely to have great effect on your minds, and that effect of a kind much calculated in favor of the Gaekwar. At that time, as your Lordship is aware, I mean during that month while the Gaekwar was at liberty and free from anything like restraint, Salim and Yeshwantrao were his servants, under his control, and there would have been no difficulty whatever in their removal if it had been desired. Another remarkable fact in this case is that while there is evidence of sums of money of a comparatively small amount being paid, as was supposed, for information to the ayah and to others—I say comparatively small amount because as far as I recollect the evidence the amount is small, your Lordship will correct me by your notes, if I am wrong, I am speaking now without looking at my notes, but as far as I recollect there is not a half-penny supposed to have been paid to any of the alleged actors in this murdering transaction during the whole of the time during which the transactions were being carried out. I think I am right in saying that it was about August or September, certainly not later than these months, that any sums of money whatever were paid, and while it is supposed the Maharaja is spending money recklessly for the purpose of obtaining information, there is no evidence that a farthing was paid to any of his accomplices in the murder he contemplated. There is undoubtedly another instance in this case of remarkable modesty and self-denial on the part of Rowjee and Nursoo —one is glad to find any good qualities remaining in their constitutions—they never seem to have asked for any money. My Lord, you see that we were in the hands of these men, for supposing they had told that they had received sums of money, probably they would have had to show how they had spent it, so that they dared not assert it. If that is the case, we have, I think, a feature quite unnatural, that a Prince should put himself absolutely in the power of half a dozen of his subordinates, because one of the curious matters in this case is that the Gaekwar, who is said to be rather reticent in one of the examiaations, seems to have been extremely anxious to parade in a most unnecessary fashion his intention to poison Colonel Phayre, and if, in point of fact, he had been anxious to make up a case against himself, he could not have gone more effectually to work, for while one instrument would have been quite sufficient, he seems to have taken endless opportunities of proclaiming his intention, and surrounding himself with conclusive evidence of four or five witnesses, at least four of whom were quite unnecessary for the purpose he is supposed to have had in view. There cannot be a more remarkable instance of that than Nursoo himself, for if you look through the whole of his evidence, I ask you whether that man has been brought here for any purpose except to corroborate the lies of Rowjee, for from beginning to end he was useless in the transaction, and he is brought into the presence of the Gaekwar for no earthly purpose in connection with the crime that was about to be committed. All that I find about him is that "Salim will hand you so and so." They make him an intermeddler, and an entirely unnecessary accomplice to the crime.

Not very natural, not very probable this. But Nursoo's fate leads him into most unhappy matters and entails upon him most unhappy consequences. I fear, my Lord, that in pursuing a consecutive argument,—the materials are so abundant, as the investigation has lasted such a long time,—that somehow or other, in the arrangement of matters, I may get into confusion, but I shall leave it to the Commission to put my omissions right—I shall endeavour to be as clear as possible, and I shall also endeavour to be as concise as possible. I think, my Lord, it may not be undesirable that I should refer more particularly to the case as it has been put before you—and, for that purpose, I shall refer to the speech of my learned friend the Advocate-General—a speech in all respects worthy of the high position he holds—perfectly temperate, and fair, and not an observation introduced into it, about which, on the part of the Gaekwar, I feel I have the slightest right to complain; in fact, I may say that one of the pleasures I have had in the conduct of this most painful and anxious case, has been the continuous courtesy I have met with from my learned friend, and the assistance he has afforded me, whenever he could justly give it to me. I propose, as I have said, to refer to his speech, because it is a careful speech, and has been founded upon instructions carefully given. I call your attention to the mode in which he places this case and the features to which he invited the attention of the Commission, as being those upon which he should ask your judgment adversely to the Gaekwar. He divided the matter into the charge of tampering with the servants in which he suggested the sayah as being one of the principal performers. I ought, however, before I comment upon what my learned friend did open, to refer to one very remarkable omission in his speech. The omission must have been deliberate, and so far as I can see, it is omitted of necessity. He does not from the commencement to the conclusion of his speech suggest any motive that could have actuated the Gaekwar to commit this crime. It has been left to me to bring out the position of the Gaekwar and his course of proceeding to show what motives he had, and comment upon these motives, and what they probably would have led to, but my learned friend suggests no motives, although he must have well considered this matter, it must have occurred to him as the first thing that should be dealt with in proving a great crime like this; but my learned friend has been unable to put his finger upon any single position that existed in connection with the Gaekwar that would have shown whence a reasonable motive could have sprung for the commission of this great crime with which he is charged. I say he alluded to the tampering of the servants, but he did not suggest or allege that there was any connexion between the ayah, Rowjee, and Nursoo. What is also very remarkable is the following fact, which I shall ask your permission to say a word or two about. The Advocate-General introduced into this part of the case a person of the name of Pedro, who, according to my learned friend, was chief butler, and had been butler for some five and twenty years, and whom he connected with that branch of the case which I have described as being the tampering with the servants. After the mention of Pedro, my learned friend says, "I now come to the more important part of the case." So that he divides the case into two parts—the acts of the ayah, and one or two other persons, and the acts of Pedro, in connection with the tampering of the witnesses, and then he goes on to the acts of other persons in support of the allegation of poisoning. It becomes important that we should consider the mode in which my learned friend has introduced the man Pedro, who forms a most important feature in this enquiry. I have no hesitation whatever in saying that independent of almost every other argument in the case, and taking a certain view of the case, the evidence of Pedro entitles the Gaekwar to an acquittal on all the charges brought against him. It becomes therefore extremely important to consider how my learned friend has dealt with Pedro, knowing perfectly all that Pedro had to say, knowing who Pedro was, and having to introduce him to your notice. Now, my Lord Chief Justice who presides is well aware how witnesses of a certain kind may be introduced into a case. Supposing their testimony is at all suspicious—there may be a doubt under such

circumstances as to whether they should be produced as witnesses. My learned friend has of course deliberated on this matter. He has not attempted to cast the slightest slur upon Pedro. He has introduced him as a perfectly respectable trustworthy witness, and as a person to be relied upon as proving a particular fact. He had been twenty-five years in the employment of the Residency. I have a right therefore to say that from the beginning to the end of this case, there has not been a suggestion of anything which would cause me to say that Pedro is not amongst the whole group of liars and perjurers who have been introduced to support this case, the one man against whom no imputation whatever is cast. Pedro puts this case out of Court. If Pedro is to be believed, there is an end of it. The entire superstructure must tumble. Rowjee, the main actor, cannot be believed as his evidence stood, but here it is contradicted up to the very hilt, and I will show you internal evidence presently of the truth of Pedro's statement and of the falsity of the statements made by Rowjee. Without, however, entering now upon that particular evidence, I shall deal simply with the particular fact that a man introduced here by my learned friend as a thoroughly respectable witness, competent to prove a fact, a man upon whose evidence he has asked you to find a decision against the Gaekwar, a man who, for aught I know, has been a confidential servant for a quarter of a century, declares in the witness-box here that every word deposed in relation to him by Rowjee is a foul lie and fabrication. My Lord, I feel it very difficult, indeed, to say more upon such a point. It appears to me that as far as Rowjee is concerned, the evidence against him is conclusive, and if you agree with me that upon Rowjee's evidence this case must stand or fall, then Pedro strikes a mortal blow to the whole case, from which I think that even the ingenuity and power of the Advocate-General will not be able to rescue it. He will attempt to avert it with all the fairness which, as the representative of the Crown, desirous simply for justice, he can command; but I think that, notwithstanding it will puzzle him to find an argument to convince this Commission, that if the evidence of Pedro can possibly be believed, it is not possible to believe in Rowjee. I am reminded by my learned friend Mr. Branson, to whom I have constantly to offer thanks for his assistance, that Pedro oddly enough is the only person whose examination does not appear to have been conducted by parties to the case. He was examined at Bombay by a Justice of the Peace and Deputy Commissioner of Police there (referring to Mr. Edginton). There are some things that must be and which can never be denied. I apprehend that, in the first instance, you have such a case. You have got Rowjee and you have got Pedro. You cannot believe both of them, it will be impossible to do so. I shall comment upon Rowjee's evidence presently, and, in the meantime, I shall say nothing more about Pedro's evidence. It is not necessary for me to give a character to a man from whom my learned friend has not attempted to take it, but who, on the contrary, has been relied upon by my learned friend for the proving of what he deems to be an important part of this case. Now, my Lord, my friend, having stated that he had come to the more important part of his case, proceeds to open upon the attempts to poison Colonel Phayre, and I think that your Lordship must have been surprised at the instructions which my friend received upon that subject. My learned friend, in his opening, makes no mention of the earlier attempts to poison. He does not allude to the earlier attempts which are said to have taken place to poison Colonel Phayre, and which form an important part in Rowjee's testimony. I do not remember the dates, but I shall call your attention to the subject afterwards. I merely call attention now to the fact that it is alluded to by Colonel Phayre, but that my learned friend does not mention it in his opening. I can scarcely imagine an omission of that kind to be accidental. Probably my learned friend thought it was so utterly incredible that he did not like to put it gravely before the Commission, and I think I shall be able to show that if such was his idea, that it is a correct one. But whilst he does not speak of these September attempts, he opens upon two attempts by Rowjee on the 6th and 7th November, while Rowjee himself, as the Com-

mission will remember, declared that he did not make any attempt either upon the sixth or the seventh. It is perfectly true that although there was no attempt made upon the 6th and the 7th, yet Colonel Phayre had all the distressing symptoms just the same. Colonel Phayre looked back to the times when he ought to have taken the poison, and when he ought to have taken it his stomach was always in a most uncomfortable state. If it was so upon the 6th and 7th, it must have been the pummeloe juice, because there is no poison. Rowjee, who was said to have put in the arsenic, does not assert that he put it in on those dates. That tumbles to the ground altogether. On the contrary he says, "All that I received I put in on the 9th November." There can be no doubt whatever that liars often forget themselves. It is one of those fortunate arrangements of nature that liars very seldom have a good memory; and nobody can doubt that when my learned friend opened the attempt at poisoning on the 6th and 7th Rowjee had made his statement, that there had been this attempt at poisoning. I forget whether he said so to Mr. Souter or not. It is quite clear he made it to somebody because this statement my learned friend was instructed to make. Well, when Rowjee came to be examined, I quite admit his position was not altogether a pleasant one, and his memory might not be altogether so retentive as it might be. He made no allusion to the attempts of the 6th and 7th, but on the contrary he made a statement in effect entirely inconsistent with that, saying that he put the whole of the powder he received in Colonel Phayre's tumbler on the 9th. My friend then refers to the orders to procure arsenic from Hemchund Futteychund, about whom I shall have to say a word or two when I come to the evidence of Damodhur Punt, and I place before you a probable solution to this part of the case. But my friend makes an observation which I think also I may say was upon his instructions, and upon which also there is a direct and positive contradiction. He says arsenic and diamond dust appear to have been pounded together and handed over by Salim to Rowjee upon two occasions. In page 6 of the short-hand writer's notes, my friend says: "The arsenic and diamond dust thus obtained, appear to have been compounded together and handed over by Salim to Rowjee on two occasions." The importance of that I shall deal with in another portion of my observations, but I may briefly say that this diamond dust and arsenic are the diamond dust and arsenic supposed to have been given upon the first occasion to Rowjee. Arsenic and diamond dust are not said to have been received at all upon the last occasion. One powder only is said to have been given on the last occasion. But the two packets are said to have been given to Rowjee for the purpose of being administered to Colonel Phayre, somewhere about September. Why it is important to consider what my friend was instructed to open, is this. I think there is no doubt from my learned friend's opening—and I believe it will turn out that this was the original assertion—that the diamond dust and arsenic appear to have been compounded together and handed over to Rowjee. Now, the statement that Rowjee makes now is that there were two packets given. He told us that he divided this into three portions—one packet into white and the others into a rose-colored powder. Probably it is rose-colored because Rowjee had heard of rose diamonds. I rather imagine he introduced the color out of compliment to the name. At any rate there were two powders, one of arsenic and one of something like rose-colored powder. That is his first statement, quite inconsistent with the diamond dust and arsenic compounded together—perfectly so, for if they were compounded together, the arsenic could not have come into Rowjee's possession. It was necessary therefore for Rowjee, in support of the lie about the belt and the arsenic found in the belt,—it was necessary for him to invent another story, and therefore Rowjee does invent this very remarkable one. He says that there were two powders given to him; not compounded together—that one was separate and the other, as I pointed out, rose-colored. Then Rowjee—whose mind is of a peculiar character, made up of murder and mercy, of affection for Colonel Phayre and a desire to kill him—thinks that this white powder is too

poisonous to administer, and he accordingly in making up the packets mixes up three packets, principally of the rose-colored powder, and puts in a small pinch of arsenic not calculated to harm anybody into the rose-colored powder; and then he deposited that which was intended to poison Colonel Phayre in his girdle and forgets all about it. I shall have to comment upon the belt episode hereafter. It is a very peculiar and important episode, and is not one of the least indicative of what the case is. It is not wrong that I should refer to that and point out the entire difference between the case my learned friend was instructed to open and the facts which have been proved. I shall be obliged to refer to these matters again at something like great length, but I mention them now to request you to give such consideration as my observations and the facts themselves lead you to consider they are worth. Then, my Lord, my learned friend, being in serious difficulties, having no motive to suggest, suggests that there is a confirmation arising from the absence of communication between all the witnesses. He dwells upon that as being a strong and pregnant evidence of confirmation. Perhaps that would be about the nearest approach to evidence of confirmation that could be given in this case; yet I should say that it was trumpery and trashy—yet perhaps it has some claim to be considered as evidence of corroboration if it were the fact. The only misfortune is that it is utterly without foundation. Not only had the witnesses intercourse together, but they were invited by that respectable gentleman, Akbar Ali, in a most persuasive manner, to give every particulars to him; and they generally made a statement after having passed a not very comfortable twenty-four hours. There seems to be a process—what it is I do not know—that after having been under the gentle care of Akbar Ali, and probably quite accidentally, they are made very uncomfortable in their minds and at once make a statement. That, as confirmation, falls to the ground; and I shall point to a way they were brought together for the purpose of having their evidence manufactured—and how completely it was manufactured from beginning to end—and I shall, I believe, lead your minds to that conclusion which will be pretty well bounded by this. I do not think I need here do more than use the name of Gujanund (I wish he had a name I could pronounce better). I think that when they talk of fairness and of the witnesses having no opportunity of seeing each other and of confirmation from that source, all I need say is—Gujanund. Nothing can be fairer, my friend may say, to these witnesses, and that at least there was candour and fairness. I answer—Gujanund. And if, when Gujanund is fully impressed upon the minds of the Commissioners, and when they remember the active and intelligent officers, as they will be called in the London papers, whose assistance he had on all occasions, I think the notion of the witnesses not seeing each other or knowing what they were about to say is the most comical that has ever been brought before a Court of Justice. Unfortunately, as I have said before, liars who have no foundation of truth to go upon cannot always recollect what they may have formerly said, and therefore, notwithstanding Gujanund, Akbar Ali, and Abdool Ali, who have done all they could for their country and themselves, I do not think it will be believed that the witnesses had not many opportunities of meeting together. But my learned friend had felt that up to this time he had a very unsympathetic case to offer to the Commission. He felt that he had a terrible lot of rogues and a terrible lot of falsehoods, or probable falsehoods, to allude to, and there was nothing whatever in regard to Damodhur Punt and to Rowjee that could redeem them from the depth of rascality into which their own admissions have put them. But at last my learned friend comes to an oasis in the desert of miserable lying through which he had been obliged to travel. He comes upon Nursoo and my friend is at once relieved. There is something to dwell upon, something of innocence, something of virtue—there is repentance. My learned friend alludes to him in this way, and I noticed that when he did so his voice almost trembled as he said,—"One other circumstance in regard to Nursoo deserves to be mentioned. He had been many years in the service of the Residency and held a high position. After he had given his

evidence under the circumstances I have stated, he felt so strongly the disgrace he had incurred and the falsity of allegiance of which he had been guilty, that he attempted to drown himself. There is a deep well near the Residency. One day he broke away from his guards and jumped into the well, from which he was rescued by the police." It turns out, however, that he had had a dinner at the Residency—I have no doubt a very good one. He was standing beside the well and saw people, and he was seized with a vertigo, and then he tumbled: notwithstanding all my learned friend's efforts to push him into the well, he would not go in except by his own act, and my friend could not get him to declare more than that he tumbled into the well. They say that truth is found at the bottom of a well, but on this occasion the police were too quick and rescued him before he had found any. So we pass away from Nursoo. The next matter to which my learned friend alluded, and upon which also he had depended for confirmation, was the demeanor of the Gaekwar when he called upon Colonel Phayre on the 9th November. My friend said: "Colonel Phayre was still suffering from the effects of the poison which he had imbibed, but he did not know at that time, as he had not heard from Dr. Seward, what he had taken. He received His Highness as usual, and was much struck by His Highness in the course of conversation describing to him almost exactly the symptoms under which he was suffering, and saying that there was a great deal of sickness about the town of such a character as Colonel Phayre was at that very moment suffering from. He said that he had himself suffered in the same way." It is curious that such a conversation should take place. Colonel Phayre did not tell Mulhar Rao what he had taken or what his suppositions were at that time—he may have thought something had been put in his goblet. He had no definite idea that he had partaken of poison, not having then seen Dr. Seward. But if Damodhur speaks truthfully the Maharaja knew perfectly well then that the attempt had been made and had failed, because on his driving back from the Residency to the Palace he picked up Damodhur Punt on the road and had a conversation with him about it. That conversation Damodhur Punt will himself relate. My learned friend intended to convey—and probably it would have been an argument of very great weight—that the Gaekwar had wished, having ordinary knowledge enough to know the symptoms of poisoning by arsenic, to divert Colonel Phayre's attention from thoughts of poisoning by endeavouring to convey the impression presented that he himself suffered under exactly the same symptoms from natural causes. I read to you a letter from Colonel Phayre to Dr. Seward or Dr. Gray—I see it is to Dr. Seward: "Although I only took two or three sips of the pummelo juice which the tumbler contained, I felt within about half an hour, as I described to you, a most unusual sickness of stomach, accompanied by dizziness in the head and of sight, producing confusion of thought, also a most unpleasant metallic taste in the mouth, with slight salivation, such as I have never experienced till within the last few days." These are the symptoms described by Colonel Phayre, and those are the symptoms my friend is instructed to say are identical with those which the Gaekwar attempted to make Colonel Phayre believe he was suffering under from natural causes. I have therefore looked into what the evidence of Colonel Phayre was upon the subject. He says: "I asked His Highness about his health, and he said that he had not been very well, and that there was a good deal of fever about, and he thought he must have eaten too many sweetmeats of the kind usually made at the Dewallee. He also said that he had headache and a slight pain in his stomach, but he was well now." It is rather difficult to associate the description which he gives of the slight pain in the stomach from eating sweetmeats with the coppery taste, the dizziness, and the slight salivations described by Colonel Phayre, and I believe another observation was made as to there being something unusual in asking Colonel Phayre about his health. Indeed, I am reminded that Colonel Phayre led up to the question by speaking of his own health. When I look at Colonel Phayre's evidence, I am warranted in saying that the whole of the Gaekwar's demeanor to Colonel Phayre upon that morning was one nothing approaching

to guilt, but was the perfectly natural demeanor of a man who generally visited Colonel Phayre on that day—it was not a demeanor, in fact, that could have excited suspicion in the remotest degree in the mind of the most suspicious person. I have thus, my Lord, dwelt with my learned friend's speech, which is valuable, not only for its ability, but as pointing out in the clearest manner what his view is of the evidence. Now, he says that this case depended upon Nursoo and Rowjee; he admits them to be accomplices in the crime they say was committed, and that he considers that according to ordinary practice—and the practice will be observed in the present occasion—that confirmation of some kind is necessary; and he undertakes to give that confirmation. He gives three samples—one is that the witnesses were kept separate. I have already referred to that to show that wherever traceable the contrary was the fact. Will any one for a single moment doubt that there is any honest confirmation in the conduct of Nursoo, a man who, although very wicked on one occasion, when his fate led him to attempt murder, was a man who had the merit of showing repentance, and exhibiting his sincerity by attempting to pitch himself into a well? With what object was he introduced into the case? Did the Maharaja on any occasion give him anything to do? He has done nothing—that also has fallen through. Another point was the demeanor of the Gaekwar and his allusion to his own maladies which he says were identical with those of Colonel Phayre—that also tumbled down to the ground. He has failed upon the one point on which he relied to give confirmation. He has opened with Pedro as a witness to be relied upon to give confirmation. He has opened with Pedro to be relied upon, making no comment to detract from his evidence and credibility, and Pedro knocks over the main witness upon the most material points, thus showing that Rowjee has upon these points entirely and deliberately perjured himself. Then, if I am right in the observations I venture to make in this portion of my address upon this point, we are now left entirely and absolutely at the mercy of the three accomplices; and it is upon evidence of such witnesses, filled with other inconsistencies, that you are asked to deprive the Gaekwar of his honor, of his property—to cast him forth as a helot in the world from whom all would shrink—a man whom, if you were sitting here in another capacity than that of Commissioners, if you were sitting here as jurymen—a man whom without hesitation you would hand over to the scaffold. And this result is asked of you to be arrived at upon the evidence of men admitted by my learned friend to be accomplices, and show I think, up to this time at all events, by the opinions which I have ventured humbly to address you, to be accomplices without a shadow of foundation. I will now—and before going to other evidence, because I may do so with propriety and conveniently—refer to the evidence of Colonel Phayre. He is the central figure in this extraordinary story. Heaven knows that. I have no wish to say a word more than I am absolutely obliged to do calculated to hurt the feelings of Colonel Phayre, who, I have no doubt, is a thoroughly upright and honorable man, and a gallant and distinguished officer; but I venture to think that Colonel Phayre was entirely unfit for the position he held—which was an extremely delicate one—and he was known by the Gaekwar to have met with a reprimand of a most serious kind, not involving, but on the other hand conceding, his honor and integrity, but dwelling upon his want of tact and judgment in the management of delicate affairs. I think I am not putting it unfairly. He said, and no doubt truly, that a subsequent Governor cleared him from this imputation. This gives me no dissatisfaction, but on the contrary I never wished to use that document as charging Colonel Phayre as deserving of the censure passed upon him. I used it simply to show that it was one of those documents operating upon the mind of the Gaekwar and leading him to consider first that Colonel Phayre was scarcely the person to occupy the position he did, and that in the next place that he would be removed upon a complaint being made. Colonel Phayre most imprudently associated himself with a person, or a number of persons, who were not friendly to the Gaekwar. Bhow Poonikur was a speci-

men of the lot. They say they got no money—but they got patronage, which was probably very much more valuable to all these men, to whom Colonel Phayre seems entirely to have lent himself. From mixing with these men Colonel Phayre comes to the conclusion that Bhow Poonikur—God only knows how he comes to the conclusion—is or was an honorable man. We know not upon what grounds he came to that conclusion, but he made a right-hand man of him who had been so active against the Gaekwar. Then Colonel Phayre has a great notion of redeeming a persecuted people. He is the saviour to whom the people looked and made entreaties to. When he drove out he was met by persons who petitioned him, and he was a ready listener to all their complaints. Such demonstrations are not ungratifying to the vanity of some people, but are little proof of the truth of the complaint, knowing as they did that his ears were open to any complaints that might be uttered against the Gaekwar, ready enough to give ear to such congenial food to his imagination, and to listen to those who would make assertions which he would readily accept. I have already alluded to what must have been the feeling of the Gaekwar when he saw Colonel Phayre in daily, almost hourly, communication with Bhow Poonikur; how he was absolutely in his hand; and how absolutely impossible therefore it was for reforms to take place. Was there no difficulty in the way of accomplishing that which the Viceroy had considered would take a period of two years or a year and a half to effect, but he was to be thwarted that way. Colonel Phayre also seems to have been laboring under the idea that he should be poisoned. Where he got it from Heaven knows; but one can very well understand that persons like Bhow Poónikur who talked about bazaar gossip impregnated a mind like Colonel Phayre's with notions of that character. Then we have a circumstance that also occurred which I shall have to speak of afterwards. Somewhere about September or October Colonel Phayre had a boil on his forehead. This boil will not be altogether unimportant in the case. I think a good deal turns upon it. There is a curious episode connected with it, and if anything can be humorous in this case, this forms one. There is no doubt whatever he had a boil. He had the attendance of a distinguished medical practitioner to take care of this boil. Where he got the idea into his head, and how he got it there, nobody knows, unless he had read over Damodhur Punt's evidence and recalled matters to his mind, and then came to a sudden conclusion, because he does not appear at that time to have made any observations on the subject. He complains at that time of having been sick, not liking his pummelo juice. Dr. Seward was not asked upon the subject. I know collodion was mentioned, but Dr. Seward would hardly apply collodion to an open boil. If he did apply collodion it fully accounts for the feelings he described; but it is clear that he intended to convey that something was done to the plaster which he put on and which he describes. My learned friend corrects me, and therefore the observation does not apply. I did not remember that he used anything else, and I did not remember what was said by one other witness what was to be put on the place. My friend mentioned this, and it is to support the testimony of Rowjee that he put certain powders into his pummelo juice. A peculiar matter is that Colonel Phayre drank his bad pummelo juice without complaining. It occurs to me that the best tempered man in the world on drinking bad pummelo juice would say,—"What on earth is the matter with this?"—but Colonel Phayre seems to have behaved in a most Christian spirit and said nothing about it. He simply does not drink it, and simply throws the juice away, and this occurs on three successive days, with no complaint, no alteration, no enquiry. I think you will agree with me that that conduct is of a kind which can hardly be accounted for. He says so however, and I accept his statement as such; but I do not accept it as being what actually took place, and I cannot help thinking he has been pouring over the evidence of the other witnesses, and that he is inclined to attach to that an importance which has only been created by the assertions of other people. Of course I may be wrong on that point, but it appears to me to be extremely probable. Let us look at it

whilst we are considering it with Rowjee's. If his account is true, he really took out all the arsenic from the parcel he had received and deposited it in another parcel and practically only used the diamond dust. Practically he only used that which, supposing it to be admitted, is a perfectly innocent matter, and can cause no pain nor annoyance. It certainly does look as if fancy had worked upon his mind, and that he had recollected feelings which he never experienced, by reading depositions that an attempt had been made to poison him. Then, my Lord, we go on to the subsequent period, the 6th, 7th, and 9th of November. On the 6th and 7th the same incidents occurred. The same symptoms that he had experienced in September and October, and again experienced on the 6th and 7th November—the very same that were afterwards experienced on the 9th. To say the least of it—this is extremely peculiar, because according to the evidence of Rowjee, he had not put the poison in upon the 6th and 7th; and therefore Colonel Phayre must certainly have imagined these symptoms upon those days, and one cannot help thinking with regard to all the circumstances that Colonel Phayre supposed that poison had been attempted to be administered to him upon these particular days. The pummelo juice was bad again; he tasted an unpleasant taste again, he could not drink it all; again he was perfectly submissive, and made no complaint, nor till the 9th of November did it strike his attention that poison had been administered. Now, my Lord, these I confess are matters that I am unable to fathom. At one time it occurred to my mind—I do not say it occurs to it now—but it did occur to it, and to the minds of other persons, and I wish to offer it as an argument to you, and that is, that there was no substantial, real intention to poison the Colonel. I shall have to address many observations in which that point will be an important one to consider. It occurred to me as very strange that persons having such complete access to poison, having also such complete access to Colonel Phayre, with a perfect knowledge of his habits, with an opportunity of dealing with them,—it occurred to me as extremely strange that for so long a time with all these implements at their hands no attempt had been successful, and that in reality Colonel Phayre had never derived any, and in point of fact never complained of any at the time from what were said to be repeated attempts to poison him. That was a matter which it was impossible to lose sight of in a case like this presenting such extraordinary circumstances and so many impossibilities. But when we come to the ultimate act, the description of it greatly puzzled me, and puzzles me to this moment. Colonel Phayre was very resolute in saying that the sediment at the bottom of the glass was a dark sediment. The other witnesses all spoke of light-grey powders, and if that which was analysed, and if the analytical tests have been correct, and if we are rightly informed upon the subject, beyond all question the powder analysed did not in any way answer the description given of it by Colonel Phayre. The tumbler had been put down, and after it had been put down, and after it had remained for, if I recollect the evidence rightly, about half an hour, he threw it away and then was attracted by the appearance of the contents at the bottom. Now you will remember what Dr. Seward said upon that subject. I received his evidence upon a number of points, and I assured him that it was not my intention to offer him the least offence, but directly I spoke about the colour of the powder in the glass, he got out of temper and proposed to keep me here till doomsday. It seemed to me perfectly clear that it was a puzzle to him which he could not make out, for the powder which Colonel Phayre saw was dark, while that seen by Dr. Seward was light. I do not mean to say that eyesight of people does not deceive them occasionally, so that that which is light may appear to them dark and *vice versâ*. I have heard that such cases sometimes occur in regard to colours, but, to say the least, it is unusual, and the fact remains that between Dr. Seward and Colonel Phayre there is a direct and altogether irreconcilable difference. Now, the powder—at all events if it was the powder that really remained, for I confess that I cannot understand the difference of the colour

I have alluded to—was sent away for analysis. I shall be obliged, when comparing what Rowjee and Nursoo and one or two of the other witnesses said, to refer again to the circumstances that took place on the morning of the 9th. In the meantime, however, I pass away from that. In analysing the powder, Dr. Seward applied a test which is not always carried out with success. And from Dr. Grey's evidence I do not understand that the arsenic was really reproduced by either himself or Dr. Seward, although they both refer to the discovery of a metallic ring. There is no doubt that this metallic ring indicates arsenic, but it is not an absolute proof; and I know that in cases of arsenic poisoning tried at home, the scientific men employed have generally brought out the arsenic itself in its pristine form and not relied merely upon the appearance of this metallic ring. With regard to the diamond dust, it is entirely idle to say that any whatever has been found. It is pure nonsense to say so. There are some sparkling elements and something that scratches glass, but to say that it is diamond dust is utterly beyond any possibility of proof. It cannot be proved. It is the purest guess-work imaginable to speak of the presence of diamond dust; and to accept scientific disclosures upon such a subject is the merest trash, which I do not think will have any weight upon the minds of the Members of this Commission. Of arsenic there is a certain amount of proof, supposing that the powder sent for analysis was the identical powder which was in Colonel Phayre's glass at the time he showed it to Dr. Seward; and I am well aware of a positive declaration by Colonel Phayre that the glass could not have been touched or the contents added to before he gave it to Dr. Seward. But I do not think that positive declaration will go far, because there were a number of people about who had the fullest opportunity of touching the glass if they wished to do so; and his positive declaration may have been due to his preconceived idea that he had been poisoned. In making these observations I am not propounding a theory which I undertake to prove or substantiate; I am only remarking upon the peculiarity of the evidence in this part of this case and the reflections it gives rise to, and the difficulties presented by those matters to which I have taken the liberty of calling your attention.

Seventeenth day, Monday, March 15th, 1875.

Mr. Serjeant Ballantyne—In my concluding observations on Saturday, there were one or two matters in which I made a slight mistake which, with your permission, I will now correct. It was only with reference to dates—and they are only slight errors and rather assist my arguments than detract from the effect of them. In speaking of the date of the first poisoning I put it back to August or September. I find, on looking carefully over the evidence, it is fixed by the only witness who has given anything like an accurate account of the matter to have been fifteen or twenty days before the 19th of September. And I wish to direct attention to the date because when I come to a later part of my argument, it will form an important feature of that which I propose to offer for your consideration. The second matter is that, as far as I can see, and subject to the correction of the Commission, the last money payments actually proved was not later than July. I put it at a later date in my observations on Saturday. But looking through the evidence with the assistance of my learned friends, I think I am right in saying that the last money payment to any of the servants was some time in July—certainly not later. That also, in my view of the case, will be an important matter to consider, and therefore I correct what was to a certain extent an error that I made in addressing you on Saturday. There was another subject which I introduced casually; I did not attempt to follow it out at that time; it will be a subject on which I shall have to dwell hereafter, but I may as well supplement what I said on that occasion. You will remember that I called attention to the colour of the deposit in the glass of Colonel Phayre, described by himself, after

he had drunk a portion of it. I wish also to call attention to the fact that, looking at the number of attempts—putting them at four or six, according as you may be satisfied by the evidence that has been given—I assume that there were about six attempts—on every occasion Colonel Phayre was prevented from drinking the remainder of the glass by the taste that he discovered after drinking a small portion of it. That will not have escaped your observation. That was the case on every occasion that the attempt was alleged to have been made. It will not have escaped the attention of the Commission that the only agents that are supposed to have been used for the poisoning of Colonel Phayre were arsenic and diamond dust, neither of which produce any taste whatever, and no doubt he might have drunk off an entire glass of liquid without having discovered that there was anything deleterious in it until about half an hour afterwards. I believe that is spoken to as about the nearest time at which the effects of the poison would begin to be felt. I shall have to dwell upon this matter again, but having incidentally alluded to it on Saturday, I wish to call attention to it, because I think it is worthy of the attention of the Commission; and when I come to the evidence of Damodhur Punt and others, I think the point of these observations will be sufficiently apparent to the Commission. I propose now to enter into the investigation of the graver charge against His Highness the Gaekwar and the order I propose to do it in is to commence with Damodhur Punt. It is evident that he originates everything, and that from this source whatever poisons obtained, were obtained. There is no suggestion that any other person originated, or supplied the poisons; it is traced back to him; it is intended to be fixed upon him. It becomes therefore extremely important to consider his testimony, and I think it will be better to take his evidence as being the first in order of time. In discussing the evidence of this witness, as well as of Rowjee and Nursoo, I don't think it will be improper for me to allude, before entering into details, to the mode in which the evidence has been obtained. I alluded to it shortly on Saturday, and I don't intend to dwell upon it at any length now. I think that I shall meet with the agreement of all men who reason the matter fairly, as I am sure it will be reasoned here, when I make the observation that when you find that witnesses of an extremely suspicious character have placed themselves before a tribunal in the character and light of accomplices, it is extremely desirable to ascertain whether their evidence has been obtained by people of a pure character themselves, and whether the mode of obtaining it will satisfy the tribunal that it has not been got in an improper way. It is always a disagreeable thing to make any general observations detrimental to other people; but I am obliged not only to speak of the persons, but of the mode in which this evidence has been procured. Mr. Souter, I have no doubt, is an extremely able man, and he holds a post of importance, I presume, at Bombay. He was perfectly aware of the character of the three persons who are the remarkable persons in this case —Gujanund, Akbar Ali, and Abdool Ali. He was quite aware of the censure that has been passed upon them by, I believe, a man who is acknowledged to be one of the most honored and most eminent members of the bench of India—he must have been well acquainted with this, I say; and whether that censure was right or wrong which had been so passed, he might have reasonably entertained suspicion of the instruments he was about to employ. He might have found other persons in Bombay to serve his purpose, but these three persons—Gujanund, Akbar Ali, and Abdool Ali—seem to have been brought from another district. There is no reason for their having been so brought; they are persons, as I have said before, who have had comments made upon them elsewhere regarding the falsifying of evidence and getting up false cases; and whether these were true or not, I say there ought to have been care taken as to the amount of power that was left in their hands. The mode in which the evidence has been given of these three witnesses (I may also speak of the ayah) is also a matter to which I must call your attention. And I call your attention to it very earnestly, because I think it is a feature in this case that will meet with great observation from one end of this country to the other, as well as in almost

every civilised country. These men seem to have been allowed to take persons into custody, and then after keeping them in custody for a certain time, and not until then—a custody, as far as I know, utterly illegal—Mr. Souter comes forward and takes their examination. The mode in which these examinations were taken I shall defer commenting upon until I enter upon the individual cases to which I shall have to call attention; but, in every instance, as far as I know, the persons who have been the material witnesses in this case, have been persons, who first of all were placed in custody, and not until after having been in custody for a considerable time—some longer than others—not until then, are they supposed to make their statements. I shall presently show you how if these statements are not satisfactory, they are subsequently cooked up by additions or alterations; that will be a matter I shall dwell upon in individual instances, rather than generally; but I cannot help making this observation, that witnesses so dealt with are, in point of fact, tortured before giving their evidence. You do not administer the thumb-screw, nor do you stretch them upon the rack, but they are nevertheless kept in misery and terror, and, from what I have seen of many persons that have been called here, a position of abject terror. They feel that their lives, their property, their hope, and their liberty—every thing in the world—is dependent on what they do while in the custody of the police, and that the only mode in which they can escape from that custody is by answering the whip—I use that expression advisedly—by giving the character of evidence that the police require for carrying out their case. In the towns of India, such a course would not be endured. I know it would be utterly and absolutely illegal. It is practised here in a distant district, where there are crowds of poor, ignorant natives—men who do not know who to appeal to, or who do not know where to go to, men who have no constituted tribunal which can help them in their difficulties. They feel, as in the present case, their master is powerless; the police are to them a power that they cannot resist; the police that they exercise a terror that they cannot control, and they go the length of what I cannot but call deliberate torture for the purpose of obtaining their ends. I have made these general observations after reflection and great thought. I feel that they will be observations weighed, not only by your experience, but by the knowledge and intellect of many others, and I believe that this case will thoroughly support the observations that I have ventured to make. Having made them, I will now proceed to consider the case of Damodhur Punt—a man who, as I have said before, is the *fons et origo* of the entire case, because, although examined at a much later date than the other witnesses, he is the person from whom everything is supposed to have originated and to have been the immediate agent of the Gaekwar; and, therefore, a man whose evidence we are bound to consider with a great deal of care, and to ascertain whether it is evidence upon which you can rest. I am speaking to men as I would wish to be spoken to. I desire, in this case, to introduce no violent expressions. I desire to use no words but those which are justified by their being argumentative. I believe conscientiously that if I can convey the thoughts and impression that are upon my own mind to the tribunal I have now the honor of addressing, the safety of the Gaekwar is perfectly clear, and that it will be felt that it is perfectly impossible for a tribunal in a civilised country, upon such evidence, to pronounce a verdict adverse—I won't say merely to the Gaekwar—but I say that they could not pronounce a verdict against the lowest person in the land, if the evidence is such as is produced against a person who, if he falls under it, loses his character, crown, and all that is dear to him; and, as I said before, loses it under circumstances which I cannot help thinking, would not be fatal to the humblest in the land. My Lord, before entering with the minuteness which I must do, into Damodhur Punt's evidence, I must refer to the mode in which he was given into custody as corroborative of the general observations that I have made on the subject of the police. It appears that he was taken into custody on the same day as the Gaekwar, and instead of being brought before any Magistrate, instead of being

confronted with his accusers and having the matter investigated fairly and properly,—the first thing that is done is to put him under a sepoy's guard; under that guard he remains for seventeen days. The words "being under guard" do not seem to be very terrible, but with the thoughts that must follow it, and with the feelings that must attend it, I think I have not improperly described it as that not of confinement but as amounting to torture. He himself says, "I made the statement for the purpose of getting free from that guard." That is his own perfectly candid statement upon the subject, and probably, whatever doubt he may have raised by his evidence, you will not feel much hesitation in believing that he was speaking the truth. Upon that he was handed over to the care of the police. He knows, at this time, the evidence of both Nursoo and Rowjee. This he admits himself. If he had denied it, it is palpable that he must have known it, because Rowjee and Nursoo were being examined, and had been examined when he was at liberty, and it was natural that he should be interested in knowing what they had stated, and he must have known that that charge was one against the Gaekwar, and that it was a charge of poisoning by arsenic and diamond dust. He therefore has to arrange something or another in which arsenic and diamond dust are mixed up. But, in addition to that, there is a shadowy account of a bottle; and he therefore must introduce a bottle into his statement: and, although he is the first person who is brought into this case by the evidence,—that is, the first person who supplies this bottle,—in point of fact he only gave it after what was expected of him. He knew perfectly that diamond dust and arsenic must be the means by which the Gaekwar should be accused. These were matters with which he was perfectly well acquainted, and with which he was ready to deal under the circumstances that he himself describes. Now what these circumstances are, are worthy of your consideration. They have been eloquently detailed by himself, and I need do no more than call your attention to them. The position of this honorable witness is, "If you convict the Gaekwar, you shall get off; if he gets off, you shall be punished." That is his own account, his own proposition. He is then granted a conditional pardon. "Succeed in what the police have told you to be what they require, and you will get off, otherwise you must bear the consequences of your own admission." Liberty, possibly a grant of land, Heaven only knows how perjury of this kind is ultimately rewarded, might be given to him; but, on the other hand, he would not only not get liberty, but I don't know exactly what the punishment is for having committed perjury or having attempted to commit murder in this country, he would probably be very much more severely punished for not doing what the police expect of him than he would be for the crimes that he has undoubtedly committed. I don't know whether I have ever met before with an instance in which a witness has come forward and made such a direct avowal, and stands before you with a halter round his neck which is to be used or not according to the evidence that he gives. Still, there are marvellous instances in this world in which, notwithstanding so painful a position, a man will sacrifice everything to the truth, but I don't think the warmest admirer of Damodhur Punt would be inclined to think that he would be disposed to make any such sacrifice. He is a clever man—the cleverest amongst the witnesses that have been produced, as far as my judgment has been able to go, an eminently cunning man, who gives his evidence with very considerable volubility—but I could not help thinking that there was an appearance about his countenance as if even he felt a sense of shame while he was uttering what I shall demonstrate to be a perjury, for he made statements which have been materially altered. My Lord, this will make it necessary for me to examine this evidence in relation not only to its consistency with itself, but also in relation to other matters; that is what I propose to do at some considerable length; and I venture to think that when I have done this and called your attention to the evidence of other witnesses who were also called to support this case—Hemchund and other witnesses—I think I shall show you, not only that he has deliberately falsified a number of statements

in this matter, but also that the police have been most active and have made much of a great deal of the evidence which has been produced before you. I, my Lord, particularly refer to the evidence given by Hemchund,—evidence that was manifestly extremely suspicious as, you were of opinion when you allowed him to be cross-examined upon his statement, but evidence which I am now in a position to consider, and I think shall point out, with such material matters connected with it, that I think it will have a very formidable effect upon the conclusion of this case. I think—unless I am very wrong indeed in the conclusions that I have arrived at—I shall show in this case police manipulation, beyond all question, of a most daring and outrageous kind. Of course, I can only judge that of my own humble ability, and I can only submit such reasons as have affected my own mind. I can only hope that they will also affect yours. I shall lay them before you, and I hope, in relation to this and other matters, I shall appeal to your reason as I should wish to be appealed to by those who endeavoured to convince me upon any particular point. The first matter, to which I call your attention, is the position of the man Damodhur Punt. Permit me to describe it, as it occurs to my own mind. I do not think it will be a fancy sketch at all. He is the secretary and trusted servant of His Highness the Gaekwar; he is a man likely to have His Highness' confidence, I admit, and so far they may be enabled to state part of his story as probable. But his position, as he describes it himself, is one of a man whose accounts are rotten to the very core—false entries in all his books—false representations as to what payments have been made for, and, in point of fact, he places himself in a position, that if he had been charged by the Gaekwar, or upon the suggestion of Colonel Phayre, which was extremely likely to be the case, with embezzlement and fraud, he would have had no earthly answer to those charges, his books would have told their own story, the falsifications would have been perfectly apparent, the evidence given by the Brahmin and other people would have shown his entries to be utterly untrue; and, supposing there was no charge against the Gaekwar, I think he, Damodhur Punt, might have howled himself deaf before anybody would have believed that these falsifications had been made at the Gaekwar's direction. Supposing the charge had been made against him, what answer could he have made? How on earth could he in any way whatever have rescued himself from the certainty of being convicted as a fraudulent servant? My Lord, I asked some questions and pressed them to him, and I don't think they were impertinent or unworthy of consideration. I pointed out to him what his position was, and he admitted that which I am now arguing—he admitted that he had no means of answering, no means whatever of rescuing himself from the imputation; and the suggestion that was patent upon that I now venture to make to you,—Is it at all likely that he would have become the instrument of the Gaekwar for the purpose of falsifying books, which falsification admitted his own dishonesty, and to which falsification, if he himself were accused and the Gaekwar chose to be a party to the accusations, he could not have had any earthly answer? And upon that point it is proved that there is not a scrap of writing in the Gaekwar's hand—not an act done in the presence of an independent witness by the Gaekwar from the beginning to the end of this case (but more particularly I am referring now to the falsification of those accounts)—by which Damodhur Punt might have exculpated himself from the charge of embezzlement and fraud. My Lord, I think that is a forcible argument for your consideration against the supposition that they were committed in the way that he stated, and for the purpose that he stated. It is difficult to imagine that he would not have supplied himself with some protection and that he would not have left himself entirely unprotected in the hands of a master who he must himself have known would be after a certain time glad to get rid of him, and to whom he gave the power of getting rid of him. In the history of villanies committed in which great people are supposed to use small instruments, we always find that these instruments generally supply themselves with the means at all events of implicating their principals. I am not aware that I have ever heard in my life of a case in which a man in

Damodhur Punt's place lent himself to fraudulent entries without retaining the power of making an explanation in the event of an accusation. My Lord, there is a matter that I may allude to in a word—although his hours at the Palace were from eight o'clock in the morning until ten at night, with the exception of a short time for dinner, those visits which form a material portion of the earlier part of this case, and which one would have thought he would have known of perfectly, especially if he had been an accomplice of the Gaekwar, seemed to have passed without his notice, and he did not seem to be a party in any way consulted in them. It is one of those inconsistencies that I think speak to our minds, and leads the way naturally to another observation, why if the Gaekwar was in point of fact dealing with a parcel of servants and others, and had a desire to obtain information, or to commit the graver crime with which he is charged—why, when he had a ready and facile instrument in his secretary, did he not leave him to do the infamous and dirty work, instead of placing himself constantly in the power of parties every one of whom would be unable to testify against him? I believe I remarked on Saturday that one of the most remarkable features in this case is that it seems that the Gaekwar rather took a pride in the number of persons whom he took into his confidence upon a capital and fatal matter of this kind; and really the mode in which the meetings are supposed to have taken place, and the perfect candour with which he seems to have offered his opinion to the humblest people, and I should think the most dangerous of people, is even in this extraordinary case a very noteable and extraordinary feature. When I come to refer to some of the evidence that has been given, and the circumstances under which it has been given, and the conversations that took place, I shall very earnestly ask those Members of the Commission who are also natives of this country to attend to some observations. I know that they will attend generally to all; but I shall direct some observations which I think will be peculiarly adapted to their knowledge of the country and its habits, and upon which I believe that they may give very valuable information and be of very valuable use indeed to the Gaekwar in this his terrible position. Now, my Lord, those matters I have dealt with, and I have endeavoured in doing so to state myself calmly, as I shall endeavour to do during the remainder of my address. I may take the opportunity of saying that these observations are pertinent not only to this part of the case, for their application will be found when I come to the other portions of the case in detail. But having once called the attention of the Commission to them, I don't propose to elaborate upon, or, unless by forgetfulness or otherwise, again refer to them. Having disposed of Damodhur Punt's position in relation to the accounts, now let me ask you to follow me in the history of what he is alleged to have done. At page 112 in the short-hand writers' notes in the *Bombay Gazette*—and it will save my reading many extracts that I might otherwise do, and I think enable you to follow such parts of the argument as are worthy of my attention, if you would allow me to refer you to the short-hand writers' reports in the matters which I may place before you—your Lordship will find the commencement of this extremely singular transaction. It commences with the order of the Gaekwar for the arsenic from the Fouzdaree, regarding which it is alleged that the Gaekwar stated to him that it was for the itch, and that he himself worded it that it was for a horse; and his further evidence, is "I took the order to the Fouzdar, but was unable to procure the arsenic." Now, I beg the attention of the Members of the Commission to that. He wrote the order, and was unable to obtain the arsenic; that is his story. That is a falsehood, a deliberate falsehood. He begins by telling that which is entirely and absolutely untrue; he could have obtained that arsenic without any difficulty. The Fouzdar was called by my learned friend, and his evidence will be found in page 156 of the short-hand writers' notes. The Fouzdar says that the order was in all respects complete, and that there was nothing whatever to prevent Damodhur Punt from obtaining the arsenic from the Fouzdaree. As the superstructure is built upon this, the whole of it must tumble to the ground with the falsity of that allegation. It

will be broken to pieces by other means, but that alone is sufficient to destroy it. But that, my Lord, is not the only feature to which I think it right to call your attention in this order for arsenic. This was an order upon which the Gaekwar's name appeared; the Gaekwar endorsed it. Therefore, as far as we can gather, unless he was a lunatic, he actually puts his own name upon an order for arsenic, which, according to Damodhur Punt, is to be used for the purpose of poisoning the Resident. There is another view that may be taken of this, and that depends upon the view that hereafter you will take of Damodhur Punt. Damodhur Punt may be a mere instrument of the police, and, knowing that he is perfectly safe if he assists them in obtaining a particular object, he may have invented the whole of this matter. But there is another view that may be taken—Damodhur Punt may have had some object of his own in obtaining the arsenic. Look at what his position was at this time. Colonel Phayre was beyond all question using every means in his power to sift the proceedings at the Palace; and, sooner or later, it must have been apparent to Damodhur Punt that his defalcations and frauds would be discovered. That idea must have been apparent. Nothing could have been more perilous to Damodhur Punt than an investigation of his accounts, and in all probability other servants of the Gaekwar might be reasonably supposed to be under the same apprehension. I have already pointed out what such an enquiry would have led to; and if an enquiry had been made against him, there is no doubt his position would have been sufficiently perilous. He was in disgrace admittedly at the Residency; the Gaekwar was never able to take him there; he was not admitted within the walls of the Residency. Under these circumstances Damodhur Punt knew that he was a marked man. He had a motive: the Gaekwar had none. Therefore, it will be hereafter a matter for consideration whether the whole of this story is a lie, or whether when, in point of fact, he admits that he has intended to murder, he has told the truth; and upon that point I shall make some further observations hereafter, when I come to investigate the evidence that has been given by other witnesses; and I think, indeed I feel sure, that when I point out some matters that at present have not been called to the attention of this Commission, that, extraordinary as the circumstances are that are patent before this Commission, there is passing through the whole of the matter circumstances that require the deepest consideration, and are calculated to create the gravest doubt as to what is the real history of this transaction. Let me, however, proceed with his statement. It is obvious, supposing he had any object in getting arsenic, why he did not get it from the Fouzdaree; because if he had been mixed up with the use of it at any time afterwards, the name of his master upon it would have at once traced the possession of it to himself. Under these circumstances if the Gaekwar had been desirous to use poison, the last thing on earth that he would have done would have been to put his name upon the order. On the other hand, the last thing Damodhur Punt would do when he found his master's name upon the order, would be to obtain the arsenic, because it would have been the means of tracing it to himself. Upon that, he, according to his own account, represents to the Gaekwar that he cannot get the arsenic from the Fouzdaree. That will be in your recollection. Why not? Would not the obvious answer of the Gaekwar be, "Why, all poison is sent out of the Fouzdaree upon my order, and upon my order alone. I have the entire control of the poisons; I have the entire control of arsenic. What do you mean by saying that you cannot get the arsenic? You have got my order for it; go and get it." And yet he (the Gaekwar) allows the order, with his own endorsement, to remain in the records, so as to convict him of attempting to procure arsenic in the event of any charge being made against him, and yields to the reason given him by Damodhur Punt that he cannot get it without a single observation, although he knew perfectly well he could get it, and tells him to go and get it elsewhere under the circumstances to which I have now referred and to which I call your attention. Upon his statement that he could not get the arsenic at the Fouzdaree, he is directed to go to Nooroodin Borah, and get

it there. Now, here, we have another curious interlude or episode in this very remarkable case, and here we have again an exemplar of police management and police arrangement. We have a good view of the liberty of the subject—whether they are respectable tradesmen or not—when the police choose to interfere with it. He gives a long account of going to Nooroodin Borah. I can quite understand why he has fixed upon Nooroodin Borah to tell a parcel of fables. He expected Nooroodin would endorse them. Nooroodin Borah, as will be remembered by Colonel Meade, was one of the complainants against the Gaekwar upon the Commission. He complained of having been fined five thousand rupees unjustly, and he also complained of a relative of his having been flogged. He was, and is, and might be well esteemed to be a bitter enemy of the Gaekwar. One can very well understand why it is that Damodhur Punt should have selected him as being the person to whom he applied for arsenic. It occurred to him, as it has occurred probably to men of little minds generally, that this man would naturally be only too glad to obtain vengeance. This is a man who is no friend of ours, but he seems, at the same time, to be an honest man. And how has he been treated because he refused to come up to what the police demanded of him as confirmation of Damodhur Punt's statement; he is kept in custody, and has been kept in custody, for months. According to Akbar Ali, I believe, he has been remitted to prison, because they could not get anything whatever out of him, and Akbar Ali, with a smile the very reverse of benevolent, intimated, in passing, that there was something or other in reserve for him that he would not at all like. One is not therefore surprised that he has not made his appearance to confirm Damodhur Punt upon the subject. The police have done all they could to make him—they have threatened him, they have tortured him—but they cannot make him. Bitter enemy as he is to the Gaekwar, he is the one spot in this case in which an adherence to truth has induced a man to suffer torture and degradation rather than be made an instrument of a false charge against an innocent man. So much for the arsenic. Oddly enough, it does not appear by the depositions that he was ever taken before Mr. Souter, and that illustrates what I have already said that nobody was taken before Mr. Souter until a proper course of police manipulation had rendered him subservient to their purposes. He was never taken before Mr. Souter; he remained in prison. Akbar Ali said that he had been remitted back to jail with the threat that some proceedings or other will be taken against him. What they may be Heaven only knows! He is powerless to prevent them. There is no magistrate, no human being to whom a man, persecuted as this man has been, can appeal for remedy and for safety. So, my Lord, as far as I remember, there is no evidence whatever that Damodhur Punt ever obtained any arsenic at all—no evidence, I mean, beyond his own assertion. His own assertion is that he obtained it from Nooroodin. I think the observations that I have made upon that subject will satisfy you that this is utterly false. If he obtained it, he obtained it from some other source, and for some other purpose. The whole of his story is a fabrication that he might have obtained it upon his master's order. He did not do so, and the evidence in relation to Nooroodin is conclusive that he did not get it from there. He makes no suggestion as to having got arsenic from any other quarter. This is the arsenic that permeates ultimately until it is supposed to reach the cup of sherbet of Colonel Phayre. I am not aware that there is any other suggestion as to arsenic being procured. I believe there was some suggestion of arsenic from the camp Borah—the man who has not been called; and if there was any arsenic obtained from him, they have his books in their possession, so that if that arsenic had been brought from him they have abundant means in their own hands to prove it. Now, I think the next portion of his evidence having dealt with the arsenic it will be desirable to deal with, will be the evidence as to what he calls the "physician's stuff." I have before me the evidence given before Mr. Souter; and part of it I will take the liberty to read. It will save me considerable amount of description, for I think the description he gives himself is as good and

graphic as any I can attempt:—"At the same time, namely when the Resident had the open wound," (that I presume to allude to the boil upon Colonel Phayre's forehead,) "the big physician's younger brother brought a bottle of poison made up by the physician, but as there were many of us present, he did not give it that time, and he may also have wanted something for it. In the evening one day, when Colonel Phayre had the boil on his forehead, the Maharaja told me to get some blister flies to send to the younger brother of the big physician. He told me to send through the Fouzdaree, and have the Wagries sent to catch some flies and taken to the physician. I told Narayenrao Wakusker, who is in the Fouzdaree, accordingly. The next morning the Maharaja told Hariba, in my presence, that the physician's younger brother wanted some snakes to make medicine. The snakeman came to me two or three days after, saying he had the snakes that had been ordered, and I told him to take them to Hariba and take his order before going with them to the physician. Narayenrao brought the blister flies taken by the Wagries and showed them to me, and the next day Goojaba, a servant of Nana Khanvelkur, came and showed me some blister flies of the same kind, and I told him to take them to the physician's brother and submit them for his approval. About the same time the Maharaja told me that the physician's younger brother wanted the urine of a black horse; and I gave orders to Bappajee, the *kamdar* of the Khas Paga, to take some urine accordingly to the physician's brother." Now, I don't know what state of darkness this country may be in, but certainly this story reminds one much more of some Eastern tale of a former time than it does of anything that could have occurred in the nineteenth century. At the same time upon that subject you are very much more competent to form an opinion from your own knowledge of what may be the superstitions of the natives possibly than I am myself, and I won't profess to offer any argument upon the subject, but leave you to judge of the probability of it. But, passing away from that, I call your attention to what is done with it and how it is used. I may as well, however, mention here that I think my learned friend began to get a little ashamed of this particular part of the case. I don't think that these plaster flies at all suited with his keen and acute intellect. I think he had a sort of notion that he was going a little too far; but inasmuch as they were down upon this evidence of Mr. Souter, my learned friend fairly and properly enough proved the whole thing from Damodhur Punt's mouth;—but my learned friend could not go any further. I expected—indeed we were promised—the presence of the snakeman. We should have had an opportunity of learning by what process he is able to extract the poison. We should also have had some valuable information upon the subject of blister flies and their effect upon human beings, and with regard to the article that was particularly desired by the Maharaja for the purpose of poisoning his enemy, some account of its properties might have been given by the gentleman who was deputed to obtain it, and who appears to have obtained it. But my learned friend does not appear to have called any of those sages for the purpose of giving us any information upon the subject; and, as far as I can gather, these wonderful extracts were made into a white liquid and disposed of in a manner to which I will now call your attention. "The Maharaja wanted the stuff, but did not want to give what the man demanded" (that, I think, is rather improbable, and considering that Damodhur Punt had nothing to do but finger whatever amount of money he pleased belonging to his master, probably you will agree with me that it is not very likely to be true); "so he suggested to Nana Khanvelkur" (who has not been called, and I don't know who the gentleman is) "to get some of the contents of the bottle, and a day or two after, about 9 o'clock at night, Goojaba came to me with the bottle which the physician had made, and told me that he had taken it to the Maharaja, and that he had been ordered to bring it to me, and that I was to take some out of the bottle, and keep it till the next day, and then give it to Salim. I poured some out of the physician's bottle into a small bottle of mine, which had held uttar and gave the other bottle back to Goojaba; and the next day Salim came to

my house at 9 o'clock, and I gave him the bottle to take to Rowjee to poison the Sahib. This I understood perfectly, though I did not tell Salim to give it to Rowjee." So that we have now the contents of the bottle which were to be applied to the unfortunate Colonel Phayre. We know how it was made, the elements of which it was compounded. I shall have to follow that bottle through a variety of stages. It is almost a comical episode in this otherwise extremely serious case. But we trace it now from its source and it will not escape your attention, and I beg that you will keep in your recollection the account that Damodhur Punt gives of it, because you will find that when we are considering Rowjee's evidence that that account is extremely material. He says the first bottle brought was about this length (pointing to the fore-finger). He did not use any other term, but put up his finger, represented that the first bottle was about a finger's length, and that the bottle that he put it into was about half a finger's length. You will find that in the evidence—I believe I am quoting it quite correctly—because it is extremely important. It will be one of the means by which the falsehood of Rowjee's story will be developed. He tells us further that it was in an attar bottle. Now, I did not ask any particulars as to attar bottles. But I believe it is perfectly well-known what they are. They are bottles in which there is a very thick coating of glass and capable of holding a very small quantity of attar. Probably the space to hold the liquid is almost infinitesimal, and when you consider an otto-of-rose bottle of about the size of half your finger, you will agree with me that it is not calculated to hold any amount of liquid. But, according to all accounts, that is the famous bottle which ultimately met with such adventures, and came under such very learned cognizance. This is the bottle given to Rowjee, and the bottle that I shall presently follow through its very eventful history. I have dealt with the arsenic, and I have dealt with the physician's stuff, as I shall perhaps in the future call it whenever I have the necessity to allude to it. I have now come to the supposed obtaining of diamond dust. Now, I venture to believe that there was never such nonsense in the world talked as diamond dust being accredited as a poison. I have looked into books of considerable authority, such as Taylor and Beck, and others, and I cannot find the slightest trace, except in a work with which I was not acquainted until I came here, where it has been quoted on the subject. At the same time, for aught I know, there may be a belief that diamond dust is a poison when a book of any kind, whether an authority or not, asserts that it is. As far as I can understand, if it is spoken of as being an article thoroughly well known, one would imagine that it would be the residuum that comes from diamonds after they were filed or cut. However, they are shown to you as being the result of diamonds themselves being pounded, and it is supposed that diamonds were procured for the purpose of pounding them into diamond dust and using them in the way that is suggested for the poisoning of Colonel Phayre. It is quite odd that of two or three witnesses who have been asked upon the subject,—goldsmiths, Nanajee Vithul and others—every one of them declared that he had never heard of diamond dust in his life—never heard of diamonds being pounded. We all know it is a very valuable article, and would imagine that the notion of its being a poison would have been discovered effectually long ago. However, I will accept the assertion made by my learned friend upon the foundation of the work that he referred to—Dr. Chever's work. I will accept it that there is a superstition of that kind which I will class with the superstitions about the snakes and the flies and the other articles. There may be such a superstition; I cannot tell. But diamond dust never came out of Damodhur's place. Damodhur Punt never obtained any diamond dust. Let us follow what he says upon that subject, and I come now to a portion of the case that I shall have minutely to analyse, and I hope I shall be enabled to convey the ideas that are present on my mind upon the subject:—"I got the diamond dust from Nanajee Vithul. I got three *massas* of powder, and nine *massas* of diamonds. I know this from what Nanajee Vithul told me." That is an important portion of his evidence, as you will observe when I call attention to the evidence given by Nanajee Vithul. Then he says, "I gave the diamonds to Yeshwuntrao, who said they were to be made into powder and given to Colonel Phayre. I said, 'This is not good—this is bad'," a sufficiently mild

mode of talking on the part of one who intended to poison. You will see that in the statement he first of all made, he said there were three *massas* of powder. It appears from what Yeshwuntrao observed—if his statement is true—that there was no powder given to him, because he simply makes the observation that the parcel or packet given to him was to be made into a powder. Now, I must pause at this period of the case. I have made observations upon the improbability of the Gaekwar taking such means as those imputed to him for the purpose of obtaining arsenic. I now would venture to ask the Commission what they think of the story in relation to his obtaining diamond dust. Assuming diamond dust to be pounded diamonds, why on earth should there be such an elaborate scheme to obtain possession of these diamonds? Why should other people have been taken into confidence? Why should a man have to falsify his books when the Gaekwar has nothing whatever else to do but to take the loose diamonds, and the diamonds that he was using in ornamentation and have them pounded? At that very moment he had small diamonds which were being used for the purpose of ornamenting the hilt and scabbard of a sword. Throughout his whole reign he had been in the habit of procuring diamonds. His diamond department was full of them; he had nothing whatever to do but take them. Then why all this machinery? Why all this quantity of falsehood? Why all this manipulation of documents? What earthly purpose could be gained by it? If he had wanted diamond dust, he had only to take his own diamonds and have them pounded. That is all he had to do. In the same way, it appears to be manifestly absurd that there should have been so much elaboration for securing arsenic. All these transactions took place in the absence of the Gaekwar, and they are alone dependent upon the statement of Damodhur Punt. No collateral evidence of any kind is taken. Diamond merchants are not found to have brought the diamonds to the Gaekwar, nor said to have brought them, nor is it said that they had any conversation with the Gaekwar at all about them. In point of fact, except through the medium of these most tainted and infamous witnesses, there is not a scintilla of evidence that the Gaekwar had anything whatever to do with or any knowledge whatever of these transactions. My Lord, I pass over those portions of Damodhur Punt's evidence in which he imputes certain conversations to the Gaekwar relative to the attempt on Colonel Phayre. They come within the argument that I have already humbly suggested to the Commission—they are utterly and absolutely uncorroborated—there is not a scintilla whatever of confirmation—and it is quite clear that in the matter of conversations, inasmuch as they are said to have taken place when Damodhur Punt and the Gaekwar were entirely alone, it is perfectly impossible for the Gaekwar to give anything but a general denial to them. He has no means, by evidence or otherwise, of doing anything else than contradicting what he denounces as an infamous falsehood; and I cannot do more therefore than refer to the character of Damodhur Punt, and the impossibility of any human being, I don't care who he is, extricating himself from such a web of charges as those made by Damodhur Punt against the Gaekwar, made by a man admitting himself to be an accessory to the murder or attempt to murder, endeavouring to shift off his own shoulders the responsibility on to somebody else, and obtain immunity for himself by casting the crime upon another. But while there is no conversation whatever, or any corroboration of any kind, all the statements made by the Gaekwar to Damodhur Punt, there is negative evidence that in my humble judgment goes very strongly to refute it. Every paper in the Gaekwar's possession was seized by the officers, and there is no genuine document whatever found by which the Gaekwar can be personally implicated in any of the transactions. I used the term personally implicated for the purpose of distinguishing between the statement Damodhur Punt has put forward as the confirmation of his own statement, (and supposing it to be true it amounts to nothing more,) in contradistinction to what I say ought to exist for the purpose of confirming a villain of this description, namely, such confirmation as brings the accused by word or by deed, by act or by letter into connection with the transactions. But it is not pretended, except in one most remarkable document to which I shall presently call your attention, that the Gaekwar was cognizant in any way whatever with any of the transactions that Damodhur Punt was

carrying on. And all the papers ransacked, searched and investigated with every minuteness, show there is not a single corroborative proof connecting him with the actions of Damodhur Punt. There are other things that are very well worthy of your attention, and these again I used as being the strongest evidence that this case is a got-up case against the Gaekwar. I submit what I am about to say to you with great confidence—it depends upon no words, it depends upon dates and upon the construction that the Commission will put upon those acts. It does appear to me to be a most singular and remarkable thing, and I think that it must have struck the members of the Commission at the time that the matters were being investigated as being singularly remarkable, and that is the story of the obliteration of particular parts of these journals. It strikes me as being all important. The mode in which it is used or suggested by the prosecution is that these were obliterations of certain words—certain names, that connected Damodhur Punt with the transactions in question. Well, I have had an opportunity of looking at the dates of these obliterations, and I believe I am right in saying (if I am wrong my learned friend will hereafter correct me) the dates of three of the papers so obliterated are June 8th, July 2nd, and September the 6th—these are dates, which the Commission will be quite aware, during which time it is not pretended that any of these transactions took place—and therefore the supposed obliteration could have been for no earthly purpose as regards Salim, because there was nothing whatever to conceal at that time, and according to the case of Damodhur Punt, nothing whatever occurred at that time. It is a much later date. There is one obliteration as late as the 13th October, that may have been an obliteration for something or another occurring to some of these parties; but with regard to the other three obliterations, they are at dates during which it is not pretended by any witness whatever that anything at all had occurred. Then, my Lord, there is another curious feature in this case. Damodhur Punt did not obliterate them himself he says, but that he told an office clerk to obliterate them, and he vouches the name of the clerk so employed. That name is vouched by my learned friend and pledged in confirmation of the story. He is called and absolutely denies the fact—he says there is not a word of truth in it. Bulwuntrao is his name. It is very true that we have a statement of Mr. Souter, one in which he admitted it on one occasion. I am corrected by my learned friend: that has not been said. I thought that in his examination by Mr. Souter he had so stated. However, he may now say the whole thing is a falsehood and an utter fabrication; he says, "I never did anything of the kind." I do not know that any human being would have blotted it there, except for the purpose of attracting attention. I don't believe this was ever done by Damodhur Punt; certainly it was not done as he said it was. Is it within the range of probability, or of common sense and common experience that Damodhur Punt for the purpose of concealment would have made these obliterations that must have attracted the attention of the very first person who looked at them? I am told, I do not know whether correctly or not, that some of the natives of India are not unskilful hands at obliteration, and that they are not generally signalised by large blotches of ink that must attract everybody's attention, that looks at them. I can scarcely with gravity deal with such an assertion. It seems to me to carry on the face of it absurdity—the statement of a comparatively unreasoning mind which only looks at one object, which object it wants to carry out, and cannot grasp at the same time the folly and absurdity that surrounds an assertion of this character. I ask whether any rational or intelligible answer was given to the questions that I put and repeated over and over again. Why, if there were any entries that you wanted to conceal in the journal, did you not throw them behind the fire or tear them up? If he had had time to do the one thing, he would have had time to do the other—but it is manufactured—it is a part of this foul case—it is shortsighted—it is ignorant—it is what no man of ordinary intelligence would practise, because it carries its answer upon its very face, but it is very probable that those who made these statements never imagined that this case would be tried before a Commission like the present, but by somebody or other without some reasoning power that would swallow all the absurdities he chose to utter; that must have been his idea passing through his wretched brain, that thing

answers itself, and answers itself in a way that is most important for the men whose nonsense I have been endeavouring to demonstrate; it shows that evidence of a grossly flagrant kind has been manufactured, and it will cause this Commission to look with the greatest care and apprehension upon every portion of this case with which these manufacturers have had to do. I make no further observations upon that. I shall not have to recur to it again. As I have said before, I think it is negative testimony of a very important character indeed, and in the light of negative testimony I place it before this tribunal. I have already referred to the fact that he was perfectly well aware of the statements that Nursoo and Rowjee had made—he admits that before he was arrested he had heard of the alleged poisoning by arsenic and by diamond dust, so that his mind was fully prepared to furbish up some story of poisoning in which the principal elements should be arsenic and diamond dust. As to the bottle employed in the transaction, he gives some kind of excuse by saying that he had poisoned a boil of Colonel Phayre. But now you have before you the evidence of Damodhur Punt that is given upon the subject of the arsenic and upon the subject of the diamond dust, and you have also my comments upon the subject, which it is a great gratification to me to find are not at all likely to be forgotten, and will, I know, be hereafter considered with perfect impartiality and with sound and excellent judgment. I have endeavoured to make my propositions as clear as possible. I make them, knowing that they will be answered as far as they can be by my learned friend the Advocate-General. I know that the ability of a man holding one of the highest positions in the country will be brought to bear upon the subject; but at the same time I know that, recognising the duties of his high position, he will only do that which is in the interest of justice. He is not here, and he must feel gratified that he is not, to hunt an unhappy prince off his throne, and no man is more likely than my learned friend to act in the interests of that justice which will ultimately be administered here, and to which I have no hesitation in saying the whole of the population of India is looking forward to the result with great interest, while it will be watched by the greatest minds and the greatest intellects of Europe. I go now to another part of my subject. I shall have to go into some detail, and perhaps I shall not secure the entire sympathy of the Commission at first in what I am about to say.—I am alluding to the evidence of Hemchund Futtychund. (Refers to page 137 of short-hand writers' notes.) Your Lordship will not have forgotten the appearance of that unhappy person in the witness-box. I never in my life witnessed, stamped upon the face and appearance of an individual, such an abject expression of terror as there was upon his. He had made his statement to the police and to Mr. Souter, which I shall presently read to you. He came forward here to say that that statement was false, that he had made it under intimidation, that he had gone through the process usually administered to witnesses, that he had been left in the custody of the police until he had been sufficiently handled to serve their purpose, that moreover he had introduced fictitious items at the bidding of the police, that he had done so under the threats of the police, and that they had carried out these ends by giving him just a gentle hint, as he was going in to Mr. Souter, —"Now, if you don't verify what has been done before, back you go to prison." That is his account, and under the influence of those threats he made a false statement to Mr. Souter. The Crown produces him for the purpose of saying that diamods were brought from him through Nanajee Vithul, that Rs. 3,000 were paid him on account, that that sum came from a saving account, and had been falsely entered by Damodhur Punt as having been paid away to the Brahmins,—that is to say, that the entry upon which the Brahmin was called as a witness was an entry fabricated for the purpose of accounting for the sum of money paid to Hemchund for these diamonds, and that Hemchund's books contained fictitious entries to the effect that Rs. 3,000 were received from Khemchund Khusalchund, when in point of fact they were in payment of diamonds. Hemchund was called here to prove two entries at the end of his book, debiting the Gackwar with two sums of money for diamonds. For all these purposes he was called here by the prosecution. I think it is very desirable in this case, as so much depends upon it, to read what this witness said to Mr. Souter: "Some few days after the

last Dussera festival Nanajee Vithul, in charge of the Gaekwar's jewel room, directed me and other jewellers to bring some diamond chips, which we did the same day and handed them to Nanajee, who retained them. The following day our diamonds were all returned, and we were told that the price did not suit. Two days after Nanajee Vithul directed me to bring my diamonds back again; they were weighed, the price settled, and purchase concluded. Four or five days later I was again sent for by Nanajee Vithul and directed to bring other diamond chips, which I took to the Palace accordingly. Nanajee Vithul was not present in the jewel-room. The diamonds were therefore handed to Venayekrow, Nanajee's brother-in-law, who weighed and priced them, and then took them along with me to Damodhur Punt, who remarked that the price was high, but kept them, saying that he would purchase them if required. On this occasion the diamonds were in two packets, both of which were kept; but about four days after one packet was returned to me." It is well that I should call attention now to what Hemchund said when he was examined. Up to this point his evidence when examined here and his statement agree, but they commence to disagree at this point, where he says that only one packet was returned to him. The Commission will find it desirable to recollect this fact when I call attention to the evidence of another witness. He asserts now that both packets were returned to him, and the question for your consideration is whether that is true or not: "A few days after it became known that an attempt had been made to poison the Resident, Colonel Phayre, Nanajee Vithul asked me whether I had entered the purchase of the diamond chips in my books, and if so, that I was to remove the entries in some way or other, as he was afraid that the diamonds in question had been made use of to poison Colonel Phayre. On hearing this I became afraid and at once caused the pages of my account books on which the sales of the diamonds were entered to be removed and fresh pages substituted. The three books now before me (lettered A, B, and C) are those that were thus tampered with. The price that I was to receive for the diamond chips was Rupees 6,270 of Baroda currency, and on account of this sum I was paid Rupees 3,000 by Nanajee Vithul, which has been credited at pages 10 and 24 of the day-book as having been received from one Khemchund Khoosal. A portion of the above sum of Rupees 3,000 was counted out and paid to me by Nanchund, Shroff of the Doomala villages." I want very much to impress upon the Commission the point here which is really in dispute. Hemchund says now in evidence that both packets of diamonds were sent back, and that there was no transactions between him and Nanajee Vithul. He also says in his statement before Mr. Souter that the pages containing the alleged transactions with the Gaekwar were torn out; but he goes on to show that which you will ultimately find to be entirely inconsistent with their being so torn out—that an account of these transactions was to be found at pages 10 and 24 of the day-book disguised as transactions with Khemchund Khoosalchund. My learned friend says that Khemchund Khoosalchund was an entirely imaginary character, in so far as these accounts were concerned; that Hemchund had had no such transactions with this Khemchund Khoosalchund, and really never knew of any transactions whatever existing with Khemchund to which he had been a party; and my learned friend pledged himself to call Khemchund Khoosalchund to prove that no transactions whatever had taken place between him and Hemchund.

The Advocate-General explained that the name should be Sewchund Khoosalchund—not Khemchund.

Serjeant Ballantine was glad that it was the printer's mistake with the name this time, and proceeded—But there is no doubt about the real name, and no doubt whatever about the transaction. Now comes what I think sufficiently exhibits the manipulation of the police, the substantial truth of Hemchund's story, and the undoubted falsification of the books by the police themselves. I think you will agree with me that it is about as iniquitous and at the same time as transparent a proceeding when exhibited by the light of information subsequently obtained as has pretty well ever been endeavoured to be foisted upon a court of justice. When Hemchund is called here, he says, "Refer to pages 10 and 24—there they are—they

are not torn out—they are not pretended to be falsified." These are the items which in his examination before Mr. Souter he vouches as proving the payments in relation to the diamond dust, and at the very time he was vouching this before Mr. Souter Gujanund Vithul had in his pocket three bills of exchange, which he must have deliberately suppressed, of which he never made the slightest mention, and which he never produced to the light until I challenged the production of them here. In these bills the history of Hemchund's transactions is clearly shown, and the impossibility that they could have related to diamonds proved beyond the possibility of a doubt. Now, Sirs, I shall rely upon your assistance in this case as men much more versed in such business matters as this than I am, and shall content myself with just giving a summary of my views upon the subject with a view to directing your attention to the details which are extremely important. It appears that Nanajee Vithul had transactions with this Hemchund, and I cannot help having a kind of notion of the nature of the transactions when it appears, according to Hemchund's testimony, that some ornament was purchased from the person whose name I have already mentioned—a jeweller at Poona—and it appears that that article of jewellery was intended in some way or another to belong to Nanajee Vithul, and had been paid for, and paid for by these three bills. You heard his evidence upon the subject, and I think he must have made out to your entire satisfaction that these three bills did apply to the payment for that ornament. Hemchund gave you the amount of the bills, the amount of interest, and so on, and made out an original sum of Rupees 10,000. How that sum was made up he explained with minuteness and detail; he brought the account up to 9,300 odd Rupees, and said the balance was in connection with other transactions upon his books, where they might be seen. My learned friend, evidently astonished at these disclosures regarding the bills of exchange, and believing that the whole of Hemchund's story was an utter fabrication—as well he might from the information he had received—if he were aware of it he possibly had not his mind particularly directed to the bills—he endeavoured to prove out of the mouth of Nanajee Vithul that Hemchund had been guilty of perjury, fabrication, and falsehood. My learned friend cross-examined him at great length upon this point, and upon his dealings with Nursoo and the Poona goldsmith. It now turns out by negative testimony that every word of Hemchund's story about these transactions is strictly true, and that in point of fact the transactions did take place. Nanajee Vithul was never examined about them, and the Poona goldsmith was never called to confirm or the contrary the statement made about his dealings with Hemchund. As far therefore as I can see, and remembering the written documents before the Court, these two entries, declared to before Mr. Souter to represent an untrue transaction for the purpose of covering the sale of the diamonds, turn out to represent a perfectly true transaction. The documents before the Commission, the absence of any contradiction of them and of witnesses who were upon my learned friend's brief and might have been called—all prove conclusively, I think, that what that man Hemchund said regarding this in the progress of this case was perfectly true: "When I declared that these were fabricated entries, I did so in order to get out of the hands of the police. I give you my books, my bills of exchange —I vouch the names of all my people engaged in these transactions." That is practically what he said here. No contradiction whatever has been given to that. Although Nanajee Vithul is called in in the matters, the entries are now proved conclusively by Hemchund to have been a pure business transaction, although he had been dragooned and frightened by the police into telling a falsehood when examined before Mr. Souter. I must say it really is a terrible state of things, take it in whatever point of view— something that must produce very grave feelings in the minds of all of us—the abject terror that these people can create upon the minds of people who appear to be well-to-do and intelligent, and who in a civilised State would be protected by their character and position, but here may be dragged from their homes, dragged to a prison, bullied by the police, threatened with punishment, kept in confinement, promised delivery if they make a statement consistent with what the police tell them to make: and then we have this fearful thing—that a deliberate false statement is made in the presence of Gujanund Vithul—made by his procuration—in relation to two items, while at that very moment Gujanund himself had in his pocket the means of proving, and probably had satisfied himself, that these items were entirely correct. My Lord, I use no further expression in condemnation of such a state of things. I confess it was with great apprehension that the proposition first came into my mind. It was with doubt I allowed it to remain there for a moment. I doubted my own judgment; I hesitated about my own discretion; and it was not until I had thoroughly mastered the documents themselves and the surrounding evidence, that I ventured to put it before men who can appreciate my argument, and to put forward upon it the broad assertion, that if you are satisfied my view upon this matter is a correct one, the whole case from the beginning to the end is foul and rotten—that this mass of forgery and falsehood must fall to the ground, and be crushed under the foot of every thoughtful and feeling man. Hemchund's evidence is not, however, confined entirely to that, nor are the falsifications of the book limited to that. [Here Mr. Ballantine received from the Secretary Exhibit A 2.] As my learned friend reminds me—and I am obliged to him for the information—these hoondies are not only referred to in this particular book, but are referred to throughout the other book admitted to be genuine. Therefore they are shown by a number of books to be a regular mercantile transaction, and bring out the state of things I have endeavoured to develop. It is very difficult to quite understand how this story is intended to be made out, because it seems rather like blowing hot and cold first of all to impute to Hemchund the tearing out of the items which involve him in this matter, and the fact of vouching the very items themselves which appear to be still in the books;—it is very difficult, I say, to see, even on the prosecution's own showing, how they are to reconcile these two things. But there can be no doubt about this. He is supposed to have torn out items for fear of implicating the Gaekwar, and yet they say that the item I have now before me is a genuine entry appearing upon the books at the time they were received. [Page 140 of the short-hand writer's notes referred to.]

Serjeant Ballantine pointed to an item and requested the Interpreter to read it.

Mr. Nowrozjee Furdonjee—The item is as follows: "Debited to the account of Shrimunt Mulhar Rao, Gaekwar, 14th of Aso-vud. Given to Damodhur Punt." (To the President)—This line is not quite correctly written, but I would translate it thus: "Narranjee himself gives to Damodhur Punt." One letter is wanting in Narranjee, so that it is Narrajee. Then follows the items—"Rs. 2,770—bilandi diamonds."

Serjeant Ballantine—That is sufficient for my purpose. You perceive, from that entry that so far from the transaction being concealed, it is patent. It is not in a curious place certainly, because it comes in upon the 7th or 8th November, when it might be very convenient in regard to the diamond dust that was supposed to be administered to Colonel Phayre. It, however, follows in a remarkable way the evidence of Damodhur Punt, because according to the words used it is "delivered to Damodhur Punt by the hands of Nanajee." Such an entry as that would not, I should think, be found in many tradesmen's books, but here it concurs precisely with the evidence given by Damodhur Punt. If the item is a manufactured one, we can pretty well account for the terms of the manufacture. You find it consistent with the traces being destroyed—with the destruction of entries. Here you not only find the item, but moreover in the very place a policeman would wish to find it who was conducting this particular case—upon the 7th and 8th, although probably it could not have been used at such a time of being supplied. Hemchund has declared that that entry was made in duresse and by compulsion. I ask you to take the entry itself, and you have simply Gujanund against Hemchund. You have a man—I suppose a respectable tradesman—at all events no imputations have been suggested against his character. You have Gujanund, and know the nature of his transactions. I take the liberty of asking you to believe Hemchund rather than Gujanund. I ask you to do so, not only upon the characters of the men, but also upon the entry itself. I want to know what any reasonable man will say about that entry. Is it a genuine one? Or is it one made

up for the purpose, as stated by Hemchund? Why, it passes everything! It being supposed that this transaction was correct, and one in which Damodhur Punt did not want to come before the public view, care has actually been taken to stick his name in. Moreover, it is clear that the whole thing is in direct contradiction of the statement made before Mr. Souter, that all entries had been destroyed. Does it not creae pregnant suspicion that Hemchund has told the truth? I think that that suspicion will be largely increased when I call your attention to another witness, Nanajee Vithul—the next witness to whose evidence I will now call your attention. Now Nanajee Vithul is introduced as a go-between between Damodhur Punt and Hemchund in the purchase of these diamonds, and he, during his examination, confirms what was originally stated, that one of these packets was purchased and one sent back; and he alleges—and I beg the Commission not to lose sight of this fact—that these items of Hemchund's upon which I have offered so many lengthened comments (the items accounted for by the hoondies) do in point of fact represent the sale of that one packet of diamonds. Nanajee Vithul knows all about these bills of exchange. He knows all about the transaction with the goldsmith at Poona. The transaction was one in which the ornament alleged to be purchased was an ornament for his brother-in-law. And beyond all question Nanajee Vithul was intended to be called to corroborate the evidence that had originally been given by Hemchund, and to contradict the evidence which he gave in open Court here. There is no doubt whatever that Nanajee Vithul could have contradicted that evidence most conclusively had it been untrue. Here is a tradesman who keeps books. Here is a transaction in which Nanajee Vithul is said to be implicated, the bills of exchange being alleged to be bills to which he was a party. But Nanajee Vithul, although called by my learned friend, was allowed to stand down without being asked a single word upon the subject. I do not know that it is possible to place the case more strongly or to have more forcible and convincing proof of the truth of Hemchund's statement. Nanajee, however, sticks to it—and I think you will believe it to be a deliberate falsehood—that a packet of these diamonds was in point of fact kept and charged for, and I am not without warrant for saying that it is a deliberate falsehood, because the very next witness called—Atmaram bin Rughoonath, a servant or clerk under Nanajee Vithul—said in the course of his evidence, "Nanajee said to me, I am going to take the *yad* away, as the diamonds are not to be purchased." That was in relation to the second packet of diamonds; and he distinctly states that the *yad* was to be destroyed because the diamonds had been sent back. This was not a matter of surprise to my learned friend, for I find the witness saying in his evidence before Mr. Souter, "It was about this time that a report was current throughout the city that an attempt had been made to poison the Resident. Nanajee Vithul told me, when receiving the memorandum, that I was to make no entry of the purchase of the diamond chips, as he had returned them to Hemchund." That is what Hemchund himself says; and under these circumstances—considering the bills of exchange, the absence of any contradiction on the part of Nanajee Vithul, and other matters—I say it is perfectly clear that the diamonds were returned, that no sales took place, that there has been no erasure or obliteration whatever in Hemchund's books, that these pages which are vouched as being fraudulent and not applicable to what they are stated to be applicable, turn out to be applicable exactly to what Hemchund has stated in his evidence; and moreover that the two last items about the diamonds on the 6th and 7th are falsified entries, but that Hemchund was compelled by compulsion and duresse to make them. I have not abstained from referring to any document upon this subject, or from any test that could be supplied; and I do say I think I have made out, as against the allegation of Gujanund, that Hemchund has told the true story, and is to be taken as a witness of truth. I am quite aware that Hemchund exhibited himself in no very favorable light in the witness-box when he said he did not know what Hindoostanee was. Of course that was an absurdity. At the same time it is clear, even from Gujanund's account, that he speaks Hindoostanee very imperfectly, and that his evidence was given partly in Hindoostanee and partly in Gujarathi, so that saying that he did not understand Hindoostanee was

reasonable enough. Of course, when he said he din't know what it was, that was an absurdity which nothing can justify except confusion and a kind of terror he seemed to be in. He seemed to be apprehensive every moment of feeling the imaginary claw of an imaginary policeman upon his shoulder, and therefore afraid to utter a single word. I feel that in this matter I have a duty to do towards those persons who make statements upon which I feel I can place great reliance; and when one considers who Hemchund was—the circumstances under which he had been treated—I must ask the Court to extend their consideration towards him. An error he may have committed in the way he gave his evidence, but I shall presently have to call attention to the evidence of Colonel Phayre; and as I take it for granted that Colonel Phayre did not want to misrepresent statements, I hope that when you see that an educated man, in the confusion of his position, making errors which he has afterwards to correct, you will no more impute the errors committed by a poor man, under the influence of terror, to an intentional deviation from truth, than you would the errors committed by Colonel Phayre. I have very little more to say upon this branch of the case, except to allude to this fact—that Nanajee Vithul is said to have given Damodhur Punt two parcels, one containing diamond dust and the other diamond chips; while Nanajee himself says that he does not know what diamond dust is, and never gave him diamond chips at all, but that he only supplied the diamonds. Moreover, he proved the fact that with regard to small diamonds and chips, there was abundance belonging to, and subject to the management of, the Maharaja, which he could have got at any moment, and that in point of fact there was a quantity at his disposal. You have therefore, in reality, by different witnesses, every single portion of the remainder of this substantial case disposed of. No arsenic, no diamond dust, doubtful whether any diamonds whatever were sold, no proof from any source whatever that they were, the arsenic supposed to have been got from Nooroodin Borah not confirmed, the books of the person who is supposed to have sold the arsenic not produced; and the very mint out of which the coinage is supposed to spring, and upon which the whole case depends from the beginning to the end, crumbles to dust, and leaves nothing whatever remaining but Damodhur Punt's bare assertion unsupported by a single credible witness. With regard to Damodhur Punt, he may be lying from the beginning to the end, or he may for all I know be only a poisoner in intention. I shall not attempt to clear that man. From what I saw of him in the witness-box, he has a skulking, scowling, lowering countenance, and I could believe him guilty of any villainy. From the way in which he answered questions here, I could imagine him capable of any amount of cunning. Doubted by Colonel Phayre, likely to have an investigation, prevented from ever coming into Colonel Phayre's residence, and being himself, as I am sure you will believe, a robber and embezzler of his master's money, a fraudulent servant who was likely to have his books investigated at any moment—I can very well believe that he was likely to be the person who initiated these proceedings; and if he did so, and employed Salim and Yeshwuntrao as his agents, I implore you in the name of everything just and fair to exculpate from such charges, made upon such weak foundation, the unhappy Prince who is now relying upon the honor of those now sitting here to acquit him of a crime of which he has declared himself to be absolutely and entirely guiltless.

I am told that Nanajee Vithul vouched that a person named Nanchund Tullackchund was present when a sum of money was paid for these diamonds. I merely beg to mention that that witness has not been called to corroborate these statements. He was examined before Mr. Souter.

The President—Have we got any evidence in our proceedings that he was examined by Mr. Souter?

Serjeant Ballantine—I believe, my Lord, his evidence has been put in.

The Advocate-General—I have not the slightest objection to admit that Nanchund made a statement before Mr. Souter.

Serjeant Ballantine—This is rather important, as Hemchund is attacked by this witness in his deposition.

The President said that if Mr. Serjeant Ballantine had not the note referring to the matter at hand, he (the President) could take a note of it afterwards.

Serjeant Ballantine:—I have, my Lord, dealt with Damodhur Punt, considering him to have been the origin of the whole matter, although as a matter of fact he was last called here. There are other two witnesses—Nursoo and Rowjee—whose evidence is of course of considerable importance. With regard to Rowjee, I do not propose at this moment to go through the details of his evidence, because I wish to follow one or two episodes of this case which I think are illustrative of the whole, and I think had better be followed to their source. I have already alluded to the story about the bottle. We have got a bottle about the size of Rowjee's finger—an attar-of-rose bottle—which holds so little. It has not been pretended that there has been any change whatever in the bottle, but yet in Rowjee's hands it increased considerably in size. I propose very shortly to follow the history of this bottle. The Commission may remember that in the course of my observations, without pretending to put forward any direct proposition of any kind whatever, I expressed a doubt that has permeated through my mind as to whether the servants of Colonel Phayre had in point of fact any intention to poison. I have dealt with Damodhur Punt and delivered him over to your mercies. Deal with him as you please, or consider him the villain he pretends to be when he did in point of fact intend to murder Colonel Phayre; but I cannot bring my mind quite to the realization of the idea that Colonel Phayre's servants were concerned in any such deliberate design. I do not say that they were not, but I cannot bring my mind to think that they were. It is extremely important to follow the history of this bottle and Rowjee's statements upon it. Well, this attar bottle gets into his hands. The period when it does so is extremely doubtful. He himself puts it at about the 9th November, but I am told that he received possession of it at a much earlier period than I supposed. At all events he gets it earlier than October. As I have said before, it becomes extremely enlarged after it gets into his possession, and then the question is as to the uses he has to put it to. He understood that it was to be put into Colonel Phayre's bath, that it was given to him for that purpose, and that there was powder in it. According to Damodhur Punt we have heard what the stuff was compounded of. According to him also, we have the size of the bottle. We then have a description of what Rowjee did with it. He puts it between his drawers, or some other peculiar place, and it produces a boil upon his stomach. It occurs to him then that if he puts it into the bath or uses it against Colonel Phayre, it might injure the Sahib. The bottle was intended to poison him, or destroy him in some way or other; but Rowjee is seized with a fit which it is extremely difficult to understand. At all events, directly it produces a boil upon his own stomach, he is determined that he will not use it, and accordingly throws the contents away. I believe I am correctly stating the extraordinary evidence Rowjee has given. He, however, keeps the bottle, which is subsequently, according to his account, mixed up with arsenic, or whatever the materials may be, to poison Colonel Phayre upon the 9th November. He is told to mix these things in a bottle, shake them up, and put them in a glass from which Colonel Phayre was in the habit of drinking sherbet. The first observation that occurs is, how could a quantity of arsenic or any other poison be shaken up in a bottle of half-a-finger's length? It is not pretended that there is any other bottle than this, which has been traced from the evidence of Damodhur Punt. Of course, probably the whole story of the bottle is a fabrication, and that Damodhur and Rowjee contradict each other upon the size of the bottle, because one did not know what the other had said

about it. But I think the whole thing is an absolute piece of absurdity. A mixture of arsenic, poison, and water could not be shaken in it. If you consider that the story about the bottle has broken down, another link in the story is done away with. I will ask my learned friend what he means to say upon this bottle episode. He cannot urge that there were two bottles. If so, what became of the attar bottle? Does he mean to say that Rowjee procured another? If so, what becomes of Rowjee's statement that he obtained that identical bottle from Damodhur Punt? I would also ask this Commission what view they take of Rowjee's evidence about not using this bottle, which, it is said, was handed over to him for the purpose of injuring Colonel Phayre in some way or another. Do you accept his explanation that he was afraid he would hurt the Sahib? Is it not pertinent to the observations I made on Saturday that it is quite possible that Damodhur Punt intended to commit murder, but Colonel Phayre's servants did not? I shall be very glad if the Commission come to this conclusion, because, although these people are perjurers and scoundrels, they are not of the deep die they have described themselves to be. If that is the case, I may as well call your attention to the time when it is said Rowjee received this bottle. He says that he received it about the time that Colonel Phayre had this boil—that is to say, some very considerable time before he received the first supply of arsenic. He vouches that Nursoo was present at the time he received the bottle, and I call your attention to this, as it contains one of the important contradictions of the case. Nursoo corroborates him as to the receipt of the bottle, but fixes the time as at the very last interview—that is, three or four days before the poisoning took place. It ought not to be lost sight of either that, in his deposition before Mr. Souter, Rowjee never mentioned the bottle at all. The bottle is only mentioned after Damodhur Punt has made his statement upon the subject.

The President mentioned that, according to his recollection, there was a discrepancy between Rowjee and Nursoo as to the time the bottle was given.

The Advocate-General said that Rowjee had mentioned the small bottle in his deposition, for he said, "I used to shake it up in a small bottle and then pour it."

Serjeant Ballantine—But he never says a word about a bottle being given to him full of poison, or (in the way that is now suggested) a bottle coming from Damodhur Punt at all. He says he has got a bottle, but never speaks of another bottle of poison. Rowjee himself affirms the fact that the bottle he saw used was the bottle he obtained from the Maharaja under the circumstances I have described. I wish to impress upon the Commission that in the first place the bottle described by Damodhur Punt is an impossible bottle to have been used in the way described; in the next place, Rowjee never mentioned he received a bottle containing poison when he was before Mr. Souter; again, the bottle he used for the alleged poison he describes in a perfectly different way and of a different class, while he does not pretend to say that the bottles were two different kinds. Perhaps really that bottle contained some of the magic elements described by Damodhur Punt, because it appears to me utterly incredible, notwithstanding the great scientific opinion we have heard expressed upon the subject, that a bottle sealed up in the way it was could produce a boil upon a man, supposing some of the contents exuded from it. If a person manipulated his stomach with arsenic he might have caused a boil, but that the mere accidental exuding of a small quantity of arsenic from a bottle of that description should cause a boil is beyond my comprehension. My learned friend had evidently a lingering belief in the story, and called up Dr. Gray for the purpose of supporting his idea. Dr. Gray, during the process of examining Rowjee's boil, looked very grave, and came back to the witness-box with his scientific opinion. It was put to him whether, in his judgment, such appearances he saw might have been produced by what Rowjee had described. Fortunately none of us had an opportunity of judging what

these appearances were. Dr. Gray gravely told us that a little of this liquid exuding from the bottle might have produced the boil. After that, who on earth can say that it might not? This reminds me a good deal of how a very eminent man in our profession, whom your Lordship doubtless remembers, and who, I have no hesitation in saying, was the greatest advocate I have ever seen in my life and the best lawyer, was deluded by a scientific opinion into a suggestion that a person who had eaten an apple might have been poisoned, because there was an apple pip in it! He was called "Apple Pip" ever afterwards, and, in the same way, I think Dr. Gray's name will always be associated with a boil upon the stomach of this Hindoo. The way science was shocked by such a piece of absurdity was rather surprising. I was taken in by Dr. Gray because there was a solemnity about his appearance that led me to hope I would be able to say that there was at least one witness in this case thoroughly respectable; but I thought of Apple Pip, and there was an end of the belief, and an end of the bottle. It is something too absurd. By the way, the contents of this bottle were never put to Dr. Gray, or probably he might have found out that there was something in them deleterious and calculated to produce boils upon the stomach. If this were an ordinary case, one would be inclined to pass it over with a mere smile; but to think that the man who is the principal perpetrator here should be guilty of such a piece of folly and be the man upon whose evidence a Prince has been practically deposed from his throne, makes that which I believe would otherwise be a laughing-stock a matter of deep gravity and one worthy of the gravest contemplation. I cannot help thinking that before such a man was allowed to have such an effect, his evidence ought to have been analysed by big and honest men. I pass away from the bottle; I wish it farewell. It is an absurdity at once ridiculous and painful as being part of a procedure like this. I now come to another part in which Rowjee is also an actor. I mean the powders Damodhur Punt is supposed to have sent to Salim or to Yeshwuntrao. They are subsequently supposed to have been delivered in the presence of the Gaekwar through a variety of formalities, and at last they come into the hands of Rowjee. I think I had better call your attention to the account Rowjee gives of these powders when he is examined for the first time before Mr. Souter:—"Salim and Yeshwuntrao immediately began to persuade us by saying that if we would only carry out the Maharaja's wishes we should not be required to serve any longer, as he would make a handsome life provision for us and our families; that we should have 'assamies' bestowed upon us, and should in addition receive a lakh of rupees each as soon as the work was done—meaning as soon as the Resident's death took place. We consented to do the job, and the Maharaja then said that the article to be administered would be given to us by Yeshwuntrao and Salim. A few days after this the Jemadar gave me two powders, and told me that equal parts of each should be administered for two or three days, and in such quantity as to consume the whole in that time. This had also been carefully explained to me by Yeshwuntrao and Salim in the presence of the Maharaja. I did not commence to administer the powders for two or three days, as no favorable opportunity presented itself for so doing. It was decided at our consultation with the Maharaja that the poison should be administered in 'sherbet,' which Colonel Phayre was in the habit of taking every morning on return from his walk. Accordingly I put the powders into the 'sherbet' two or three times whenever I found no person in the room or about to see me." In another part he goes on to say that the packet of powder which the Jemadar had given him he made into small doses, as directed. Now, the statement that he has made here is not that he used the papers as directed, not that he made them into three packets, not that he administered them in that way, and not that one of the three packets was found in his belt; but what he says is, that he found the two powders of different colours, and "my own notion was that the white powder was the most dangerous, and therefore I only put a small portion of the white powder into all three packets which I made up, and the remainder, consisting of all white powder, I put into my belt." Now, which of these stories is true? They are

in direct opposition. As far as I understand the evidence, the powders were mixed up at the time he got them up and were not two powders, one of white and the other of gray. That is the story told by Damodhur Punt, and that is how he represents it to Mr. Souter. I am wrong, it seems, in supposing that the powders were mixed up already, and I am much obliged to my friend for correcting me. But Rowjee distinctly says to Mr. Souter that he mixes them up as directed, and his statement before this Commission was quite different. How are these stories reconcilable? Then we come to the question—why should he not have followed his directions? What did he know about the difference of the powders? Then again they were meant to poison Colonel Phayre, and why should he have kept back what he supposed to be the most deleterious? The whole thing is unintelligible in connection with the subsequent story of the belt. If his story before Mr. Souter was true, the parcel found in his belt would have contained two powders and not merely arsenic. I venture to think that, taking these stories together, you have a congeries of improbabilities out of which it is impossible to see daylight. There is no doubt, however, that that arsenic in the belt was extremely useful for other purposes. Mr. Souter was not present at the finding of the damaged papers belonging to Damodhur Punt, and at the discovery of the arsenic he was not present. In fact, he never seems to be present at the finding. There was a universal cry after Rowjee to destroy the poison and leave no trace whatever, but curiously enough his mind seems to have got into a haze about the arsenic, and it entirely escaped his recollection. But Akbar Ali's intelligence overcomes many difficulties, and perhaps Providence assisted him on this occasion. Akbar says to Mr. Souter that he would not wonder if some powder were left in the belt, and Mr. Souter says, "You'd better look to the belt," and he has such confidence in Akbar that he permits him to depart to fetch the belt. It occurs to me to ask, however, why didn't Mr. Souter accompany Akbar? Akbar had made a most valuable suggestion. That belt ought to be put in a menagerie—I mean a museum—and that Akbar Ali should be put in the museum. That belt is a wonderful belt. It will go down to posterity. When Akbar feels the parcel in the belt, as if his Providence had told him there was arsenic in it, he immediately sends for Mr. Souter, and Mr. Souter says, "God bless me, why this is arsenic." I cannot help thinking that here was a matter in which Mr. Souter deliberately left a man whom he knew to be utterly unscrupulous to manage the belt, and relied upon something coming out of it, and sure enough something did come out of it. The discovery of this arsenic can only be considered providential—if it can be supposed for a moment that Providence had anything whatever to do with Akbar Ali. I have shown that as far as Damodhur Punt is concerned he got no arsenic and no diamond dust; I have shown that Rowjee's account of the belt is absurd even to comicality, and I have shown that with regard to the bottle he never mentioned it until the bottle had been mentioned by Damodhur Punt; that with regard to the powders he says he used them in one way, and then swears he used them in a totally different way, and then produces a paper of pure arsenic which is found in the belt under improbable circumstances. All this is a story which rational beings would be compelled to look on without doubt, to use no stronger expression; but when the story is told by such a man as Akbar Ali, it carries falsehood upon it, and I charge, before this Commission and before the world, that in that belt was placed by Akbar Ali the powder which was ultimately found, and directly that was done he called Mr. Souter as a comparatively respectable person to vouch to the fact of its being found. I shall now conclude my observations to-day by calling attention to the intrinsic evidence of Rowjee's falsehood. Undoubtedly Pedro is a respectable witness; upon his character no stain attaches; but he is a Portuguese by birth, and I am told that it is extremely unlikely that any Hindoo would make an accomplice of a Portuguese. Pedro gave his evidence where he could not be tampered with—before a gentleman named Edginton, who, I am told,

bears as high a character as any man in India. Pedro says he received money upon a particular day, but with regard to all the interviews imputed to him by Rowjee, Pedro pledges his solemn oath that Rowjee's statement is entirely and absolutely false. The Commission can determine, without any observations on my part, whether they can find Pedro guilty of accepting poison with the view of poisoning a master with whom he had been a servant twenty-five years without any earthly motive, because, so far as I can see, no motive whatever is suggested for the treachery of Pedro. I think I can point to other intrinsic evidence of the falsehood of Rowjee. The conversations which Pedro is said by Rowjee to have had with the Maharaja are singularly alike, both in spirit and in word, to conversations which Rowjee reports to have had with the Maharaja himself. The inference is obvious. What other conclusion can you come to than that Rowjee's story is a base and weak fabrication? My friend here calls my attention to an extremely material fact. Pedro's visit is made to be three or four days after his return from Goa, which was on the 3rd November, so that the visit would be about the 6th or 7th—the very period, as I shall subsequently show, that has been fixed as being the period of Rowjee's visit with Nursoo.

Eighteenth day, Tuesday, March 16.

Mr. Serjeant Ballantine—My Lord, I think that it will be convenient that I should refer now to a matter that is not without its significance in this case, and probably more or less weight will be applied to it by the Members of the Commission: I allude to the examination of the two principal witnesses, Rowjee and Nursoo, before Colonel Phayre, when the supposed attempt at poisoning was first under investigation. I don't know whether it is necessary that I should occupy any great portion of the time of the Commission in commenting upon that evidence. It is almost sufficient to refer to it; it exemplifies their characters; perhaps it does not make them more black than they were made before by their statements made in connection with other matters, and their own evidence in this case has made them. But at the same time it is a matter not to be passed by without observation. We find a number of the servants at the Residency, persons one would assume comparatively respectable people from the offices they filled, directly after the suspicion that the poisoning has been attempted on Colonel Phayre, knowing that the matter might inculpate some of themselves, quietly setting to work together to consider who it is they ought to charge with the offence, and by a general combination of every one of the persons to whom I refer charging a man who they knew, if their evidence is at all true, was perfectly innocent. They seem to have felt no sense of shame. They were frightened at the enquiry that was going on, so they every one combined, according to their own account. They talk the matter over, and Rowjee and Nursoo knew if there is a scintilla of truth in any portion of their story, that they were the persons to whom the act is really attributable. They and their fellow-servants endeavour, as far as they can, to supplement the charge by details which might render it likely that a fellow-servant would commit the offence. Where you find people coming forward first of all, admitting that they have attempted to commit the murder, when you find that they are prepared to charge everybody else, and that they are now charging the Maharaja, it occurs to me that the whole case is of a kind that certainly does not very much commend itself to any Court in which there is a disposition to come to a conclusion upon anything like credible testimony, and although those are matters thoroughly in the mind of the Members of the Commission, it might nevertheless have seemed neglectful on my part if I had not called attention to them; but I do not desire to dwell upon them at any length, as exhibiting the infamy of these people. I shall do no more than say that I feel the force of it, leaving the Members of the

Commission to apply their minds to the subject to which I have called their attention in anything but strong terms. Having made that remark, as I was entitled to do, I now go to the remainder of Rowjee's evidence, a great portion of which I have disposed of. As to the bottle and the belt, I shall offer the few observations remaining for me to make on that testimony. I think, however, that I might refer, and ought to do so, to the circumstances under which he made his statement, and that again I shall refer to very shortly, for I have already made reference to the conduct of the police in general terms. It is only necessary for me now to call the attention of the Commission to the fact that the plans which they adopted with everybody else they adopted towards Rowjee. He is taken into custody on the 22nd, and then it is said upon the same evening he confessed that he had administered poison to Colonel Phayre. He is promised, it appears, pardon if he will confess all. However, that is only after an interview with Akbar Ali. He is subsequently taken before Sir Lewis Pelly and Mr. Souter, after he has been manipulated by the police, Akbar Ali, and all the others engaged in the business of Mr. Souter, to which I wish to call your attention. It seems to have been the course adopted throughout the whole of this enquiry that Akbar Ali and Gujanund and Abdool Ali are the persons who upon all occasions manipulate the witnesses and the persons charged previously to their examination being taken by Mr. Souter. I know that it is always unpleasant to make observations that are either unfair or unjust, but upon serious reflection that I have given upon the matter, I cannot hold Mr. Souter to be irresponsible in these matters. He must have perfectly known the character of Gujanund; he must have known perfectly well, when he was handing over these persons to them, how unscrupulous they are: and I cannot help thinking—and I have expressed an opinion to that effect, and submitted it to the Court—that Mr. Souter ought himself, in the first instance, to have taken down their evidence before they were threatened and tortured as they appear to have been on every single occasion when the examinations had been taken. I refer now to some two or three other matters in Rowjee's testimony. Rowjee's examination is taken on the 23rd, another examination is taken on the 24th, and another examination on the 25th. He is then taken before Sir Lewis Pelly, where the promise of pardon to him is confirmed. There is a remark that I may take the liberty of making, but I think it does seem excessively strange, that while Damodhur Punt is supposed to be the originator of this infamous plot, and Rowjee, who is supposed to be the person who consummated it—if a pardon is promised to them—that Nursoo, who at all events performed a very subordinate part in the whole matter, and so a very inferior actor in the whole affair, should be the only person to whom the hopes of a pardon are not only not held out, but who alone of all others is told that he never will be pardoned. It is an extraordinary thing to find that the perpetrator, the originator of the crime, should be pardoned, and that a mere subordinate agent in carrying it out is the only person to whom a pardon is refused. I should have thought that Nursoo would have been the only person to whom a pardon would have been extended. I cannot tell by what process of reasoning Sir Lewis Pelly should have arrived at the conclusion that Nursoo should be excluded from the grant of an amnesty, and I cannot but think that Nursoo has some reason to complain that he has been entirely left in the shade while persons worse than himself are to go entirely free—to be pardoned. I however cannot help thinking that if this case goes on all right, that we shall find that Nursoo will not be excluded from the position others have found themselves in. To go, however, now to Rowjee's evidence. It appears that his first interview was in August 1873, and it is said that these interviews took place in consequence of certain proposals of Salim. I want rather to dwell upon this. These are matters that apply, because at this time it is not shown that they were engaged in the matter at all connected with the attempt to poison. It is only suggested that Salim is desirous of getting hold of some of the servants for the purpose of getting information as to what

was going on at the Residency, and it seems that some information was given, if we are to believe Rowjee. It is said that he went upon three different times —sometimes during the Commission, and up to the end of the Commission, and that conversations were had upon the subject of his giving information. It seems that this gentleman has taken to himself a wife, and that under these circumstances he thought it only proper that he should have asked for a present. There seems to have been a comparatively small sum of money given to him at that period, or about that period, and, as far as I recollect, it is a sum of money not applicable in any way whatsoever to poisoning, if applicable to anything; but it has been very elaborately followed out. There has been an endeavour to give form to it by calling a jeweller who has produced a quantity of trash which he made on Rowjee's wedding, and to prove that the cash according to Rowjee came from the Maharaja. I shall have to say a few words—though a very few—upon the subject of this endeavouring to get information of what was going on at the Residency. But I stop here to call the attention of the Commission to the fact that, as far as I know, this is the only money that has really been "ear-marked." There are some small sums of money supposed to have been given to the ayah; but with that exception, these are the only sums of money supposed to have been given, and it becomes a feature of considerable prominence to notice that, after this attempt had been made, there was abundant opportunity both for Rowjee and Nursoo to apply to the Maharaja for money. There do not seem to have been any application of any kind, and no communication whatever made in reference to any money. It is exceedingly strange, to say the least of it, that something was not kept back by these men, and some endeavour to extort money from the Maharaja was not adopted. It seems to me that the absence of all demand is strongly corroborative that the whole of this, as far as the Maharaja is concerned, is the most entire and infamous falsehood. One of these, so far as the Maharaja is concerned, is a most entire and infamous falsehood. I see it is Rupees 500 he is said to have received from Yeshwuntrao. Nursoo, Salim, and Jugga went to the Palace; but although Jugga was the person who had gone there, and was introduced by my learned friend as corroboration of some of the visits when the attempt to poison was suggested, I think that that part of the case must fall to the ground. There is also another person connected, named Khabai, who is introduced by Nursoo, or both Nursoo and Rowjee, as having accompanied them to the Palace. But upon these occasions regarding which my learned friend wanted corroboration Khabai, like Jugga, fixed an earlier period than is consistent with the supposed suggestion of conspiring to poison. He says he went to the Palace last hot season. In point of fact, both of these witnesses entirely fail to give corroborative evidence on the points on which they were wanted to give such evidence, and there is no evidence from any unpolluted source that any visits were made at which the poisons were given. I have to submit that the fair inference, as it stands, of the evidence of Rowjee and Nursoo is, that there may have been visits in the early part of the year during the time the Commission was sitting, and for some time afterwards down to the hot season that Khabai speaks of; that certain sums of money were received by Rowjee and others, but that from that period not one single farthing is ever alleged to have been given to any of these witnesses. Notwithstanding that it is said they were risking their necks in the transactions regarding the alleged attempt at poisoning, these people never appear to have asked for, or as a matter of fact received, one single farthing of money out of the Maharaja's treasury. It is said, and it may be true—and I am not going to dispute it—that Nursoo received Rupees 800 on one occasion. But he says he received it at the time and in consequence of the Maharaja's marriage: and of course this is not in connection with the poisoning, nor does it agree with the period when the poisoning was supposed to be attempted. These are general observations which may have occurred to the Members of this Commission as they have occurred to myself. It is not necessary to dwell upon them further than remarking that a man generally

expects to get rewards according to what he does; and these men are supposed to give information, and one gets Rupees 500 and another Rupees 800 upon an occasion when it was perhaps not unreasonable that they might get presents. But the point to observe is that on the occasion of the attempted poisoning of the Resident they do not get one single farthing. It has been suggested that each of them expected a lakh of rupees; but I do not think any one would take it upon himself to believe that these men expected that they would get such a sum in the event of their success. That would be a sort of promise that a native of this country, unless he were peculiarly simple-minded, would hardly hope to receive in a state of hard cash, and at all events it is a promise of an exceedingly improbable kind. With regard to Nursoo, I don't believe he mentioned from beginning to end of his evidence that he received any consideration to induce him to join in a crime for which he showed so much repentance afterwards. But the pointing out of these improbabilities sinks into comparative insignificance side by side with other improbabilities to which I have drawn the attention of the Commission. The account given by Rowjee of Damodhur Punt is an odd one, considering that they were so deeply implicated in the one concern. He says, "I know a man named Damodhur Punt. I know him by sight. He was at Nowsaree with the Maharaja." That is the account he gives of Damodhur. You will remember that Damodhur Punt says of Rowjee, "One day Rowjee came to my place. He had stolen some documents from the Residency, and he waited there while I copied these documents." I think that these things show that there have been three men at work in getting up this matter—Gujanund Vithul, Akbar Ali, and Abdool Ali—and as each has worked the matter differently according to his own idea, that accounts for the differences in the story. It may be said variances are a proof of truth; but this is an argument which I think has been pushed too far. In small variations it may be true, but when you find the parties themselves differing pretty well upon every material point from beginning to end of the case, I apprehend that this is a contention which my learned friend can hardly submit, and that the Members of the Commission could scarcely understand. It has been said that Pedro went twice to Goa, but that was one of the discrepancies which I did not think it necessary to refer to. I shall not occupy the time of the Court by repeating the arguments I have already addressed to the Commission on the subject of Pedro. Rowjee describes the packet as containing two powders—one white and one rose-colored —and then he says he divided them into three parcels, taking more of the rose than of the white-colored. The fourth part he put into his belt, and the other powders he put into the tumbler upon alternate days. Upon this subject I shall have to refer to Colonel Phayre's evidence, wherein he describes himself as suffering from confusion of the head, and that incapacity of understanding himself which astonished him so much—all which he attributed to these powders, though, unfortunately for that theory, these powders were administered when Colonel Phayre had become perfectly well. These powders were obtained fifteen or twenty days before the 9th, and the period fixed for the symptoms I have referred to was the time when he was suffering from the boil, which I think was fixed as some time in September. It was very curious to see the way in which there is an endeavour—I won't say a dishonest endeavour, but one of those endeavours that a mind not over-strong might make—to adapt himself and his recollections and thoughts to circumstances he subsequently believed to have taken place. When I read over some parts of Colonel Phayre's evidence, you will see it is quite obvious that he means us to infer that he underwent a process of slow poisoning at a time long preceding anything whatever having been done to him. As to the boil, perhaps Colonel Phayre may have attributed his symptoms to the bottle that had been obtained by Rowjee, although there is this difficulty about doing that—he never used the bottle at all. That suffering which he felt when he took off the plaster, and that confusion of brain which he so seldom seemed to suffer from, could not be applicable to the;

bottle, more than the powders. It is said that Nursoo had asked about the bottle, and Rowjee replied that he had used it, but we have got the history of the bottle so completely before us that I need not refer to the falsehood connected with that matter. In referring to the 5th November, or about this time, I want to call the attention of your Highnesses to a comparatively small matter, but which if I were addressing a jury in England I might consider to be a very important point. It is said that when about November 5th Rowjee went with Nursoo to the Palace he was violently reproached by the Maharaja with not having done anything at all, and that the Maharaja gave vent to some very coarse abuse. I believe that the particular expression used was given to some one in Court; but I should desire that expression to be submitted to their Highnesses, for, considering their knowledge of Eastern manners and of the manners of a person occupying the position of a Maharaja, I should ask them to say whether that expression was one that was ever likely to come from his lips. I have been told that the expression is one of extreme filthiness, and wish the Court to know what that expression was.

The Advocate-General remarked that the expression had been brought out in the vernacular during the examination of the witnesses.

Serjeant Ballantine—Then, that is all right, for the expression should be in the recollection of their Highnesses. Then Rowjee says that on the next day Nursoo gave me—this is a matter I have already alluded to before the Commission, but I will venture to allude to it again—"On the next day Nursoo gave me some black or dark-colored substance." This is the substance supposed to be put into Colonel Phayre's glass. I think, Sirs, that this is substantially all I need call the attention of the Commission to in relation to Rowjee's evidence, for having dealt with that evidence upon some particular points at some length yesterday, it is not necessary for me to refer further to the evidence. There is, however, I think, this very remarkable fact—I do not know whether it has occurred to the Commission, but I think I am right—that every transaction emanating from Damodhur Punt first of all goes through either Salim or Yeshwuntrao, and that the next person brought upon the scene is invariably Nursoo, to whom, quite unnecessarily it appears to me, the packets from time to time are supposed to be handed. Nursoo need not have been entrusted with the secret at all. However, he is brought in, and then he hands the packet to Rowjee, and the poison is used, or not used, according as Rowjee's evidence is to be taken. The Commission have therefore clearly before them that, according to Damodhur Punt's own admission, he concerts the schemes and then employs as his agents Salim and Yeshwuntrao—probably both of whom were persons implicated in the frauds committed upon his master—and that then through the hands of Salim and Yeshwuntrao the powders are delivered to Nursoo, by whom again they are given to Rowjee, who is supposed to use them. But all through this the Maharaja is never brought into the matter at all, and he has not been connected with the affair but by bare assertions. Now, supposing this were the case, and that Damodhur Punt were under a charge and had no opportunity such as he has now of saving himself by throwing the blame upon the Maharaja, there would have been the most conclusive case that the design emanated from him and was carried out ultimately by Rowjee. I cannot help thinking—and I put it before you in a clearer way than I have put it hitherto, because I am sure this Commission will not rest with any bare proposition—that the case as propounded against the Maharaja has not been made out. This, it appears to me, is one of the most extraordinary elements in this difficult case, but I can understand that Damodhur Punt, excluded from the Residency, threatened with an enquiry, a man who had been embezzling his master's property, as undoubtedly you will agree he has been if you accept the explanation I gave to you and do not accept the explanation he offered out of all reason to you, that Damodhur Punt, with Yeshwuntrao and Salim, who were his accomplices in these matters, and who had therefore equally good reasons for getting rid of the Resident,

really intended to murder the Resident himself. Considering what Damodhur Punt has admitted, I think that this is neither improbable nor impossible; but I have shown, I think conclusively, that it would have been in no respect whatever for the Maharaja's benefit to murder Colonel Phayre; and I have given you sufficient grounds for supposing that Damodhur Punt may have had a motive for doing so and wanted to carry out his designs. But when we come to the servants of the Residency, it is extremely difficult to see what motive on earth they had to destroy their master. They would lose a man against whom they had no complaint. They would lose a man—Nursoo especially, who had served so long in the Residency—from whom they obtained their position and everything else. There are other men more cunning and cleverer—men who have completely taken in Colonel Phayre and governed his mind and ruled his intelligence; men like Bhow Poonikur, who knew all that was going on, and who were perfectly well aware, for instance, of the khureeta that was in existence, and who must have known that Colonel Phayre was in a considerable peril of being dismissed: but when we come to examine motives, I think we will find that it was much more reasonable for the servants at the Residency to keep him there than seek to take away his life. Now, where every particle of a story is monstrous and improbable, I do not think it is a forced conclusion to arrive at, that it may have easily occurred to Bhow Poonikur that if there was an appearance of an attempt upon the Resident's life, that would save him from being removed. The lesser thing would merge in the greater, and the confusion that would be caused by the rumour of the attempt might distract attention from the intention to remove him. I would not venture to put forward such a proposition if it were not for the evidence given by Rowjee. If Rowjee is to be at all believed, and the story of the bottle has any truth in it, directly he gets what is to be formidable upon the life of the Resident, he throws it away; and again, directly he gets the powders, he takes out all that is dangerous and leaves that which is innocent. At all events, if Rowjee used those powders, it is perfectly clear that no evil effects from their use arose to the Resident. Then comes the dark-brown powder which we must follow, as it is one of the oddest features of this case. Dark but black, Rowjee calls it; dark, Colonel Phayre calls it; while Dr. Seward took away the powder and says it was a light-colored one. Says Dr. Seward, "I cannot account for the powder being dark, because the powder I took away was a light one." Therefore you have to account for this dark sediment or the powder which was sent to be analysed. You have no explanation of it. Colonel Phayre cannot explain it, nor can Dr. Seward. It stands entirely inexplicable. Then there is another circumstance which shows this was not a reality. If arsenic was really used, arsenic is perfectly tasteless. Now Colonel Phayre says that there was a strong coppery taste in what he drank, while there is no suggestion, either by the evidence or by the analyst, of anything whatever having got into that sherbet with a strong metallic taste. There is no accounting for this fact: this also stands perfectly unexplained. Then, my learned friend may say, how do you account for arsenic getting into the possession of Dr. Gray or Dr. Seward? I do not know whether I should answer that, but if it is intended that I should, I take the liberty of saying that there would not be the slightest difficulty of doing so in the world. It is perhaps not to be supposed that either Dr. Seward or Colonel Phayre, who had had their attention directed so much to this matter of poisoning, might have made a change; but what is there from the beginning to the end of this case that is not either probable or improbable? Nothing. The whole is a mass of inconsistencies. Here is at all events something of a solution. You will remember that associated with this matter there was a statement which must have meant something to Colonel Phayre, and did really mean something at the time, that he had received private and confidential communication that the ingredients in his glass were arsenic, copper and diamond dust. I shall refer you presently to his evidence on that point. I think it is only right to do so on behalf of His Highness the Maharaja. This private and confidential communication turned out at last

to be from Bhow Poonikur, although Colonel Phayre did not confess it without some backwardness. Bulwunt Rao or some such person is, according to Bhow Poonikur, the man who first gave this information about the ingredients of the sherbet. My learned friend did not think it necessary to bring forward Bulwunt Rao. But there the information stands, that copper had been used, and that Colonel Phayre affirms there was a copper taste in his mouth. How is that explainable, nothing being used but diamond dust and arsenic? If my learned friend means to show that any other ingredient has been used, then he must knock down the whole of the superstructure that has been so deliberately and carefully raised in order to show that the poison used was diamond dust and arsenic alone. I have already told you that neither of these ingredients possesses any taste whatever, although they possess certain sensations; and I venture to ask again how on earth is this story reconcilable? How do you get rid of that dark residuum? What became of it? Where did it go to? Dr. Gray didn't get it, and Dr. Seward didn't get it. They both get a light grey powder. The only possible way out of the difficulty is that Rowjee mistook the dark for the light, and that Colonel Phayre mistook the dark for the light. Now, in propounding this theory of the possible guilt of Damodhur Punt, or the possible intention on the part of the servants at the Residency to play a trick upon their employer, but with no view whatever of poisoning him, it must not be understood that I propound it as one of the matters upon which I stand to prove the innocence of His Highness; I put it forward as one of those matters which upon theory may be fairly put forward, and I assert that it is just as possible as many of the other theories which have been propounded here, and is, in point of fact, supported by circumstances that are not nearly so inconsistent in themselves, as those other theories I alluded to. I suggest that an actual intention to poison did exist in the minds of certain people, but that the Residency servants took care that copper should be used and put something into the glass that tasted so strongly that Colonel Phayre's attention is drawn to the matter and the whole thing becomes known in the bazaar. I simply ask the Commission whether or not these are not considerations that you ought to receive with the other circumstances in this case. My Lord, I do not think it is necessary that I should occupy your attention with many observations upon the subject of Nursoo. It is worthy of note, however, that he appears to have been arrested on the 3rd December, and was confronted with Rowjee in the presence of Gujanund and Akbar Ali and Abdool Ali. Mr. Souter was not then present. The same system was pursued by these three men that I have already called attention to. Gujanund Vithul himself admits (see page 164 short-hand writers' notes) that he had questioned Nursoo. This is the account he gives himself upon the subject. The next day after Nursoo was apprehended he was confronted with Rowjee: "I was sitting with Nursoo upon the maidan or plain opposite the Residency, or the open space or plain opposite the Resident's bungalow, and I was questioned about the particulars of this case." Then there is a question put by Mr. Melvill, and the witness says, "Yes, I was sitting with him; and the Khan Sahib was also present, *i.e.*, Akbar Ali and Abdool Ali were also present. I had given instructions to Rowjee (and I call the attention of the Commission to this point). I said, 'You should not say further than this; you have said everything connected with this case.'" The President asks, "Who was this said to?"—and the witness replies "to Rowjee, and that was what Rowjee said when he came there and he said, 'I have said up to this' (pointing to his neck). He did not say anything more than that. I did not say to Rowjee anything of the particulars what Nursoo had stated in order that Nursoo might not hear the particulars in the manner I have mentioned." I cannot make any minute observations upon this matter again. If it does not strike the Commission as being a fabulous account of what really took place, no words of mine would be able to convince you. Gujanund particularly desires that Rowjee should not allow anything to escape that can in any way inform the mind of Nursoo, and all that Rowjee does is the intimation, quite intelligible, that he has said up to his neck. It is possible that Gujanund may have been actuated with a good desire upon this occasion, but such a thing would be inconsistent with his nature and of his previous history. Moreover, if he did want to be fair, his object was wofully defeated by what took place afterwards. It next appears that Nursoo made a statement and was taken before Sir Lewis Pelly and Mr. Souter, and then is told that no pardon will be given to him—which I think was rather hard upon Nursoo, as he was the least criminal among the persons concerned. It seems that he made an oral confession. I asked Mr. Souter why he did not take it down. He replied (see page 177), "I did not take it down as I had a great deal of work to do." I beg the attention of the Commission to that. It occurs to me, and I think it will occur to you, that if Nursoo did make an oral confession at that time, and if that oral confession was interpreted and was not in any keeping, Mr. Souter's duty to the public was to take it down there and then—it was a confession of murder and of guilt. Why was it not taken down then? "I had no time to do it," says Mr. Souter; "I had other matters to do connected with this enquiry." But what more important than taking down the account of an accomplice to the murder? To this Mr. Souter has no reply. Then we have Sir Lewis Pelly, and he entirely differs from Mr. Souter's account of what took place. It was not because Mr. Souter had not time to take it down, but because, as I understand the matter, as Mr. Souter was about to take it down, Sir Lewis Pelly said, "Oh no! let him have time to think it over," and accordingly he was admitted to the care of the police, and it is not until the following day that he comes forward and makes a statement, which is subsequently reduced into writing. Now I must say that the whole of that transaction is eminently suggestive of an opportunity being given to a man whose statement was not in accord, or might have contained elements somewhat contradictory, with the statements of others to correct that testimony. Another point to which I would draw your attention is that the statement was not taken down until the 26th, although he was put into custody on the 23rd. This fact is vouched for by Sir Lewis Pelly. Then we come to the garden scene or the well incident, which I have already referred to, and in which the question is whether it was the effects of conscience or the effects of a dinner that induced Nursoo to do something which he could not be prevailed upon to say was done purposely. I wonder who it was that told this precious story about the well. Whoever it was, they conveyed what was a palpable and deliberate falsehood, although surrounding it with circumstances that might have been very easily proved. They say that he was in the custody of the police when he broke away from his guard and was standing at the edge of a well and threw himself in. That is a fact stated with so much detail that it should have been proved up to the very hilt. It may be said that when Nursoo comes here he may have told that which was untrue, and the suggestion be that he was tampered with—although your Lordship will remember that the word tampering was defined the other day by one of the witnesses as being the handing of a man over to the soldiers and only allowing him to be seen by the police. But where are those people from whom he broke away? Cannot any of them be found? Are none of those careless guards from whom the prisoner suddenly broke away to be discovered? It is astonishing that the gentleman who instructs my learned friend has put none of those men into the witness-box. I think that the explanation that would have been more satisfactory to the tribunal would have been the evidence of some of these witnesses to show upon what possible pretence the assertion has been put forward that he wanted to jump into the well. I do not propose to refer to his cross-examination. It will be in the recollection of the bench that the fate that overwhelmed him, predestination, and so on, led him to take part in committing this attempted murder, for which he was to get nothing. But having dealt with all the main parts of the case, I do not propose to offer any further observations regarding this man. The case of my learned friend is this, that, without a motive, without an inducement, without anger, without

revenge, with a good master, with good wages, with everything surrounding them to make them comfortable—these servants, without one single word of remonstrance, no resistance, nothing in the way of protest, directly when a proposal is made to murder their master fall into the scheme as readily as if it were a proposition of a most ordinary kind, and consent to go through processes the most cruel to their master. If they had succeeded, nothing but evil could have happened to themselves, because they would have been left in the power of the Maharaja, and they themselves would have been charged with the crime without a possibility of their ever being able to blame others. This is the story that has been told to us. They have connected it with the story of Damodhur Punt and have endeavoured to make a whole of it. I have already dwelt at great length upon all the matters connected with the witnesses and with Damodhur Punt, and out of that this Commission will have to make a consistent whole—and not only this, but you have to say that which you make out of the evidence is founded upon evidence upon which it is impossible for you to place the least reliance. You have, first of all, to come to the conclusion that an attempt at murder did take place. It is possible that you may come to that conclusion, because you cannot believe that any man could be so vile as to charge himself with attempting a murder which in point of fact he did not intend. I have no means of answering that conclusion. I have no evidence to offer against it. In reality, I have no desire to stake that conclusion. But I repeat that, as against the Maharaja, you have nothing but a mass of gross improbabilities put forward by people who must be admitted to be the most infamous of men—brought forward by the police, who have beyond all question tampered with them on every possible occasion, and been urged to do so by motives of the strongest kind. If guilty, a promise of pardon was held forth to them if they succeeded in making you believe that the Gaekwar was the criminal. On the other hand, the knowledge was branded upon their memories and permanent upon their minds, that unless they succeeded in making you believe that the man I call this ill-used Prince has been guilty of this foul attempt at murder, they will go back with a halter round their necks to meet their well-deserved punishment for having in point of fact committed a foul and filthy perjury. I think it is well to get rid of these witnesses and associate them, if necessary, in my comments on Colonel Phayre. In dealing with him at all events I have a pleasanter subject to deal with, and one in which, although my observations will not be altogether laudatory, I shall nevertheless be able to discuss without making observations of great severity. As reflections have been cast upon one of the witnesses here, I think it is not unnatural to call attention to some of the answers given by Colonel Phayre to show you how a man under the excitement of cross-examination is likely to avoid telling what is strictly the truth except after a great deal of pressure. He told us here that he remembered Yeshwuntrao and Salim were in the habit of coming with the Gaekwar to the Residency, and then he says, "I remember particularly that about that time (that would be the middle of September) I was suffering from a bad cold in the head and had a bad boil on the forehead. I did not get rid altogether of the boil for, I should think, nearly three weeks. My medical attendant was Dr. Seward, who used to dress it every morning. He used to put the plaster he used on a dressing-table and there was a side-table on which it remained, and I think I shifted some of it on to a little clock-stand near the dressing-table in my private office" Now this looks as if Colonel Phayre thought something had been done to the plaster, and you will remember in the evidence of Damodhur Punt he says that Rowjee put something in the plaster. It is quite clear that what Colonel Phayre imagined after reflecting upon the thing was that there had been arsenic put upon the plaster, and his head was suffering in consequence. I have already referred to the fact that this idea is altogether repudiated, and that no arsenic had been used in this way. Then Colonel Phayre goes on to say,—"After this boil I had slight fever at one time; my eyes watered a good deal, and I had a feeling of fullness in the head, and I tried to account for this in various ways. I used

to sleep out at night and thought I had caught malarious fever, and thought that perhaps this was the cause. I had puzzled myself about the circumstances and tried to account for it in the way I have mentioned, when I also began to wonder whether the pummelo sherbet was made with proper pummelos. It would be about the end of September or the beginning of October that I began to wonder at this. I remember Govindrao Rouj. On the 6th November I went to an adoption ceremony at his house. I think I arrived at his house about 5 o'clock in the afternoon. On the morning of that day I did not take the whole of the sherbet; I took a sip or two of it and threw the rest away." Now it is quite clear that Colonel Phayre implies by that that there was some difficulty in the sherbet which induced him to throw the rest away. In point of fact, it was opined by my learned friend that he was poisoned, or attempted to be poisoned, on the 6th or 7th. Now it turns out that nothing was done to him on these two days, so that really Colonel Phayre's imagination must have been the father of these symptoms—*ex concessio* there is not one single *scintilla* of evidence to show that any poison was employed on these days. In his letter to Dr. Seward Colonel Phayre says: "My dear Seward, —With reference to the circumstances which I mentioned to you this morning, together with the symptoms which I described to you and the contents of the tumbler which you took home with you, I should feel much obliged if you would kindly give me a professional opinion as to the nature of the contents of that tumbler, whether poisonous or not. Although I only took two or three sips of the pummelo juice which the tumbler contained, I felt within about half-an-hour, as I described to you, a most unusual sickness of the stomach, accompanied by dizziness in the head and of sight, producing confusion of thought, also a most unpleasant metallic taste in the mouth, with slight salivation, such as I have never experienced till within the last few days, and which I attributed partly to a slight attack of fever, which had however quite gone off, and partly to an idea that the pummelos from which the juice daily placed on my table had been extracted were not fresh ones. I now, however, attribute all of these symptoms, especially that of this morning, to entirely different causes. In fact, I now believe that for the last few days small doses of poison have been introduced into the juice, and that had I drunk the whole tumbler off to-day, I should have been very ill indeed. The confused state of my head has often surprised me of late, because for the last six weeks I have abstained *in toto* from wine and beer, &c., except once or twice when friends dined at the Residency, and I have found myself all the better for it. My general health is, as you know, most excellent, and therefore the symptoms which I have described to you are, I feel sure, the result of unnatural causes. I never dreamt of poison, otherwise I should not have thrown away so much of the contents of the tumbler which I gave you this morning. It was only after doing so and when I was replacing the tumbler on the table, and saw the sediment at the bottom, that I for the first time suspected foul play." This only shows what imagination may do with a man. Upon these two days it is not pretended by any one that any poison was used in the pummelo juice. Then comes the morning in which this poisoning is supposed to have taken place. After having drunk the pummelo juice he says: "I wrote for about twenty minutes or half-an-hour, and then felt a sudden squeamishness, as if I was about to be sick. The thought occurred to me all at once it must be the sherbet which has always disagreed with me, and I got up, went to the wash-hand table, took the tumbler in my hand, and tried to throw away the contents in order that I might not be tempted to drink it." This shows a very funny reason for throwing it away and one that can scarcely be satisfactory to this Commission. As I said before, it would have caused me to call my servant and say, "What on earth do you mean by getting me this pummelo juice?"—and it would have been better still if this liquid substance had been kept and analysed, instead of the greater part of it being thrown away. Dr. Seward seems to have acted also with a great deal of haste, as he threw away all the liquid handed to him by Colonel Phayre and only retained

the powder. Then Colonel Phayre goes on to say: "The window through which I pitched the sherbet opens on a chunam verandah, which is rather wide, and then comes the grass of the compound." It was on this verandah that this remarkable discovery of diamond dust and arsenic takes place. It seems to me that the discovery of this was sufficiently odd to excite attention. If there was no trick being played, or if there had been a predisposition to find arsenic, there would have been plenty of means of finding it upon the verandah, and perhaps this Commission will not pay much attention to anything that was found outside of the glass. Colonel Phayre then goes on to say: "As I was replacing the tumbler, I saw a dark sediment collected at the bottom." He then proceeds to describe the sensations, which he says were similar to those he suffered upon the two previous days. Now the whole story here seems to be odd; first there is the throwing away the liquid, instead of calling his servant, in order that he might not be tempted to drink it; then there is the description of the coppery taste in it, and the darkness of the powder. All these points I have already commented upon, and I must leave you to consider the value of these comments. I have already referred to his letter in which he speaks of the confidential communication; and this shows how completely a man's mind may be perverted by his prejudices. On that very day he writes to the Government of Bombay telling them that he has been providentially preserved from being poisoned. He displayed the same determination to consider himself poisoned. He then goes on to say: "The Maharaja came at about half-past nine, his usual hour. Between the time of my giving the sherbet to Dr. Seward and the Maharaja's arrival, I had received no communication from Dr. Seward. When the Maharaja came, I went out to receive him as usual, and led him into the drawing-room, and he sat down. I asked after His Highness' health, and he said he had not been at all well, that there was a good deal of fever about, and he thought he must have eaten too many of the sweetmeats common at that time (the Dewalee). He also mentioned that he had a headache and a slight pain in his stomach." Now, how unfair that is, and how thoroughly untrue, because in an early part of his evidence he says that the conversation began with his asking upon the subject of His Highness' health, and it was then, and not till then, that His Highness gave a description of his symptoms. This shows you how that man's mind had become so impregnated with an idea that he actually states what is not true until you come to find it out by the facts proved. The Maharaja did not lead the conversation; Colonel Phayre did, and it was he who made the enquiries regarding health; and it was only in reply to this that the Maharaja gave a very natural account of his own feelings and of what really took place about that occasion. There was not the slightest ground for making the allegation that the Maharaja was the first to lead this conversation. In point of fact, my Lord, can you consider this Prince guilty by his own acts? Supposing Colonel Phayre's story was true, there is not the least reason to suppose that the Maharaja knew of the events which took place on the 9th. He was ignorant of what had taken place at the Residency that morning, and that Dr. Seward had got the glass. This was not a gunpowder plot in which the day and the hour had been fully arranged and all the accomplices were waiting to see what became of it. In point of fact, nothing was arranged at all; there was no day mentioned, and nothing whatever had been fixed. Therefore all the insinuations about the peculiarities in the behaviour of Rowjee on that morning fall to the ground, unless it was the case that Rowjee was playing a trick upon Dr. Seward, whose youthful imagination carried away his judgment in the matter. I think there is nothing from beginning to end in this case—and that is a matter I implore your consideration of—there is nothing in the demeanor of the Maharaja which indicates the knowledge or impression of guilt. There is no movement in a muscle of his face; there is not an act done out of the ordinary course of nature. His Highness, in fact, acts as he had always done before, and meets Colonel Phayre as a man and not as a murderer who had made him his intended victim, and the Gaekwar only pays to Colonel Phayre the ordinary

visits which he was in the habit of paying at such times. I do not know how Eastern Princes are constituted, but I should say that at all events they are men like ourselves. They must have some emotions, and they must have some fears, and we look to the conduct of a murderer to exhibit by manner or demeanor something or other to implicate him with his crime. I defy the most ingenious of those who have maligned this unhappy Prince from the time he was arrested to the time he has sat here waiting the decision of this Commission to point out anything in His Highness' conduct which criminates him. I defy those who have called him harsh names and who have communicated to the papers, to their disgrace, terms opprobrious of His Highness, and who have thought fit with a view of influencing the tribunal before whom he is being tried, endeavouring to make that tribunal forget the duty they owe to themselves, by falsely misrepresenting statements and falsely heaping upon His Highness terms which in England would cast upon the editor of that newspaper an obloquy from which he could never escape to the end of his days. I have read the words published in that newspaper about that unhappy man, and my blood has boiled. Living in a country where there is a free press and an honorable press, I know there is not a man, except a man who would be hunted into infamy for it, who would have written one single word against that Prince, much less word upon word, sentence upon sentence, that I find has been written about that unhappy Prince in one of the papers here which, I am told, is one of the most influentially circulated through this country. I say that there has not been one single act exhibited by His Highness the Gaekwar that would lead you to conclude that he is guilty of the crime laid to his charge. Now, my Lord, I am not referring to the early parts of the cross-examination of Colonel Phayre; I do not desire to do so. It was with great difficulty that I could get from him any admission about that document, which he called a private document, and which he said he could not recognise, as no private document had ever come to him. I have never used that document in any way except to show that it was known to the Maharaja, and I may here call attention to the letter that Colonel Phayre writes to Dr. Gray, to the effect that "previous to the receipt of your letter under reference, I had received secret and confidential information that the poison administered to me did consist of a mixture of (1) common arsenic, (2) finely powdered diamond dust, (3) copper." Now, Sir, I pressed Colonel Phayre to mention what justified him in saying that the information he received was private and confidential, and he replied: "I can give no information. Amongst the persons who gave me the information it was one or the other amongst them, but which particular person it was I could not say without enquiry. I can give a list of all the persons who used generally to give me information, and it was one or other among them." Was it Bhow Poonikur?—"I cannot say. It was either Bhow Poonikur or the other man." To the best of your belief, was it Bhow Poonikur?—"To the best of my belief, I cannot say." Who is the other man?—"The other man I referred to is named Bulwuntrao, a moonshee. But there is a list of persons." I won't have a list of persons, sir, I shall just have your evidence. Was it Bhow Poonikur or the other man you mentioned?—"I tell you I cannot say." Was it one or other of them?—"So I believe." Ultimately it turned out that the statement was given by Bhow Poonikur, who was called as a witness here and gave an account of the persons from whom he got that information—men who have not been called here by my learned friend. I will leave Colonel Phayre's evidence at this point with a view of pointing out the nature of the statement of his feelings, especially as to the coppery taste. You will take these in relation with the whole matter in this case and say how far it leads you to be satisfied that any attempt to poison had been made. This, I think, leads me to one more matter to which I should address myself, namely, the tampering with the servants at the Residency. Now, my Lord, as a specific charge, I hardly know how it is intended to be used. I understand perfectly well that if it is supposed that servants were being tampered with to do an

injury to their master, that that might be an offence. But I do not think the charge can exist as an offence here. If the Maharaja chose or endeavoured, however little-minded it might be, to obtain information of what was going on at the Residency, and that, not with a view to injure the Resident, but simply for his own information, I hardly know in what manner that could be dealt with by this Commission as an offence. I cannot help making this observation, that it comes very ungraciously in the charges laid against the Gaekwar if it emanates from Colonel Phayre, because it is quite obvious that Colonel Phayre had a lot of people who were in his employment to all intents and purposes, although they were not paid by him. The person who seemed to be thoroughly in the confidence of the Resident will make money in a variety of ways, and I have no doubt that Bhow Poonikur was more or less a spy used by Colonel Phayre for getting information for him. Could it be doubted that he in his own room dealt with these persons day by day, and from them was consequently in the receipt of information of what was going on at the Palace? Colonel Phayre seems to have thought there was no harm in this, but there is no mistake however that it was done. He had learned—and that is a matter well worthy of consideration—some time before that this khureeta was being prepared, and he had learned all that through Bhow Poonikur, who must have bribed or inveigled the servants at the Palace for the purpose of obtaining that information. That is all, as I understand, that is alleged against the Maharaja. As far as I can see, all that the Maharaja obtained was the most trumpery stuff in the world. As far as one can gather from one of the letters to which I shall presently refer, it is something or another about a dinner party, and I do not remember that anything whatever is gained by the Maharaja. Even the evidence of the ayah as to the information, supposing that evidence is taken to be true, is that Mrs. Phayre is "very well disposed towards him," and that she will get her to look kindly upon him, with some other matters of that kind. But as far as I can gather, he gains nothing of importance from beginning to end, and nothing that is worth while to lay himself open to the observations made in the present case. Colonel Phayre undoubtedly in respect of this khureeta did get valuable information. He got information of this khureeta a considerable time before it was delivered, and he must have got that through the instrumentality of some of the servants. Now Colonel Phayre in reality speaks of a number of people who were constantly giving him information, and one of these is Bhow Poonikur, whom he describes as being a man whom he constantly received and constantly communicated with, and constantly got information from. Such being the case, it seems to me rather hard that a charge of this kind should be made against the Maharaja, when it is perfectly clear that Colonel Phayre practised at all events quite as much espionage as it can be pretended was ever practised by the Maharaja. I of course do not admit the statements of the ayah upon the subject. They are denied entirely by the Maharaja; he denies having had any communication with the woman at all, and you are to say whether these communications have been of the kind, and the description of them of a character, that would carry at all conviction to your minds. I submit to you that they are in the highest degree improbable. One does not understand what is to be got out of the ayah. What does she know? What are her communications? What influence has she? What can she get? State papers? She was only an ayah at the Residency, and so she seems, as far as I can see, about the last person in the world he would have been likely to use for such a purpose. It was stated by my learned friend that this is not the only purpose for which she was used, and there is no doubt whatever that a strong endeavour was made to apply her communications to entirely different motives and to get her to say that some suggestions had been made to her upon the subject of poisoning the Resident, and there is no doubt also that originally the intention was to bolster up a case against the Maharaja by the ayah's evidence. My learned friend now is content to put it as being merely one applicable to the obtaining of information, and not in any way whatever as supporting Rowjee and

Nursoo's story; and in fact, as far as I recollect, the ayah is not supposed to have been in communication with or to have seen Nursoo and Rowjee—at all events not to have been in communication with them. I don't deny any of the evidence of the carriage drivers who are supposed to have taken the ayah to the Palace. When I say I do not deny, my learned friend will perfectly understand that what I mean is that I know nothing about it one way or the other. It is a matter perfectly possible, because the ayah may have visited the servants at the Palace, and may have plenty of gossip with them for aught I know, and yet the whole story of having seen the Maharaja may have been utterly untrue. And then one of the dates given by the ayah is a very important one; and in relation to the evidence which she gave to Mr. Souter and to her subsequent statements I think it is extremely important. There is no doubt whatever that pressure was put upon her to make her allege that she had been not a party, but that she had rejected with scorn—rejected with utter disgust—the suggestion that she should assist in the poisoning. Now it is a very odd thing that one of the visits—and this is a thing to be considered throughout the whole case—made by this woman was a visit made at the very time when Nursoo and Rowjee were said to have obtained the last lot of poison; and the suggestion originally made was, while Nursoo and Rowjee were the agents who had undertaken to poison Colonel Phayre, that at that very time, almost upon the identical day, the 5th or 6th of November, this woman also had a suggestion made to her of the same kind—not in any way whatever connected with Nursoo and Rowjee, but an independent poisoning, something apart from them, something that she was to do, and in her own fashion, if she had not been shocked at the proposition and declined to have anything to do with it. That is an observation that I make with reference to that particular meeting. I don't know whether there will be any doubt upon that subject. Shaik Dawood says, "It was before the last Dewalee, about two or four days before." So that he fixes the time to be the 5th, 6th, or 7th November, which is about the very period when the other plot was going on and was in full play, or supposed to have arrived absolutely at the consummation. This woman asserts that she had an interview with the Maharaja, who talks to her on the subject of poisoning, which he, it is alleged, had already arranged to have done by somebody else, and talks, as he is alleged to have talked to this woman, as if she had been Colonel Phayre's prime minister—a person of the greatest power, a person of the greatest dignity and of the greatest importance. This Commission will consider the probabilities of that story, and with the observations that I have already made upon the subject, I don't think that I shall feel it necessary to trouble them further on the subject of these visits. Tampering with servants seems to me to be a matter in which both sides have done exactly the same, so that the one can hardly charge the Gaekwar for doing that of which we had such prominent examples in the case of Colonel Phayre. There is no doubt whatever that there was a time when the establishment of spies as against the enemies of the kingdom was considered absolutely necessary and were a part of the constitution of the State. However, that was done away with in 1830. Before concluding the evidence of the ayah, I must refer to her evidence given before Mr. Souter, and to the circumstances under which that evidence was given, because it shows very prominently how charges of this description may be raked up and upon what miserable gossips they depend, so that the chatterers in the bazaar are listened to, the wretched gossip that takes place here is retailed, and although the Gaekwar, who may not have much experience of the world, might have seen any of these persons, I say it is with great surprise that I learn a man holding the high position of Resident in a kingdom of this description should allow and encourage a parcel of people to be constantly retailing their stories in his ear, especially when one of these is looked upon not only as Colonel Phayre's chief spy, but as a bitter enemy of the Gaekwar. In the first statement that the ayah made to Mr. Souter, though I venture to say it was the second—(reads extracts from ayah's statements in which she states that the Maharaja and

Salim talked of *jadoo*, and she said Europeans could not be affected by that means)—you will perceive that in that account there is not a word said about her being unwell, though meanwhile she gets unwell and then she is taken to hospital. Then she goes on to state how she visited the Maharaja on the Ramzan. (Relates conversation.) Don't you remark how puerile this is? Here I may remark that Kazee Shahbudeen seems to have entirely disappeared, although he was in the habit of visiting the Residency, particularly when Mr. Taylor was there. You will observe that in this deposition, taken on 18th December, there is not a pretence that the Maharaja makes any suggestion to her about poison, and we have heard the accounts of all her meetings in which there is no suggestion made except that of using sorcery, which seems to be tolerably absurd. At the time she made this statement she was unwell, I presume from her being in hospital, although she was well enough to make such a long statement. We have circumstances deposed to by Dr. Seward which are somewhat sacred. He says he took a great interest in the ayah. Why he should do so passes my comprehension. No doubt there may have been something very attractive and fascinating in the ayah, but when she was here the other day I do not think that that fascination interested anybody who had a good opportunity of seeing her. He knew she had been in the habit of going to the Palace, but that would not interest him. What was the mystery? She was under good medical treatment, but he went to see her, never communicating with the gentleman who was the medical attendant at that hospital, simply because he says he knew that gentleman. At all events, he went to see the ayah, and then, you know, upon her striking and eloquent countenance, he discovered those marks that indicated that she was moved; and Dr. Seward's medical experience led him to discover in those emotions not physical pain, but the agony of her conscience; and so, to solace her, he induced her to unburden her mind to him, probably assuring her that if she would only relieve her mind, she would at the same time relieve her stomach. There was one period at which a more efficient remedy was applied in the shape of a blister, but on this occasion she relieved her conscience as a kind of emetic. In consequence of what she said the relief seemed to be thoroughly sufficient both for mind and body. Dr. Souter—Mr. Souter I mean, although one might call him doctor upon this occasion—was sent for by Dr. Seward to administer to her, and while Dr. Seward looked after the body, probably the other was engaged to look after her soul. I can well understand Dr. Seward saying to his colleague, "She is under my care, and taking the interest in her that I do and wishing to see her well, I think it is right you should have this interview with her while her soul is troubled. That interview is held, and the result of her unburdening her conscience is this. (Serjeant Ballantine reads as follows from the ayah's statement: "On the occasion of my being taken before the Maharaja the third time during the Ramzan, the Maharaja asked me, after other questions, whether it would not be possible to administer something by which the Resident could be brought round to his (the Maharaja's) will. The Gaekwar spoke in cautious and hidden language, but I understood him to be throwing out a feeler to ascertain whether I would consent to administer poison to my master, Colonel Phayre.") Now I ask my Lord Chief Justice, whether ever in the course of his experience or his reading he ever found such a sentence. This common woman, this ayah, is made to say, "I understood him to be throwing out a feeler." Now did that ever come out of the mouth of an ayah? Then she says, alluding to the administering of poison to her master Colonel Phayre, "he spoke in cautious and hidden language." Really the ayahs of this country beat the nursery maids in ours. Then she says she indignantly refused and objected. (Just fancy the ayah refusing) and told the Maharaja that if he attempted anything of the sort he would get into trouble. Now, I really do ask the Members of this Commission whether so grotesque a falsehood was ever attempted to be bolstered upon reasonable men. Then this moral and highly educated ayah says, "I said it would be better that lakhs of

people should die than that the supporter of lakhs should come by his death." And to this wretched stupid old woman, (who had no power on earth to administer poison, and no chance of doing anything else but chattering everything said to her as soon as she got into the bazaar,) it is supposed that the Maharaja, who must have an amount of decent intellect, is supposed to have spoken to her in this way and made her an accomplice when it would appear he had made other arrangements with other people. I hope that when the Commission comes to consider some of her answers, they will remember that she admitted at last her statement had no foundation, and that never from the beginning to the end was any suggestion whatever made to her except that she should use a charm on the Resident in favour of the Maharaja, and that nothing whatever justified her in supposing that the Maharaja had contemplated poison. There is another passage which it is my duty to call your attention. The ayah was asked, "Did Mr. Souter ask you if you knew anything about the poisoning?" Now just fancy beginning with a woman like that, and suggesting poisoning and what she was wanted to say. Now, look at the answer this woman gives upon the spur of the moment. "Yes, they threatened me and said that if anything of the kind was said I should say it." "I told all I knew." So here you have in the first instance Mr. Souter putting directly in her mind the notion, and then you have Akbar Ali threatening her about the poison. In fact, her story is one mass of absurdities from beginning to end. I have examined those statements, and I have also considered whether it was possible there was any means to answer the case, and I have found that there is not a single instance in which there is not a single witness worthy of any attention as being present at any of the proceedings. My learned friend asked a witness—and unless he had done so I would never have made any allusion to the subject, whether or not there had been any access on the part of my client to Salim and Yeshwuntrao. I presume that the object of that question was to suggest that Salim and Yeshwuntrao were witnesses to be called on the part of the Maharaja, but in the first place the Maharaja in no respect whatever recognises any of these proceedings. He cannot tell, and his advisers are unable to suggest to any certainty whether these men are or are not accomplices with Damodhur Punt, they may be so or they may not be; they are people connected intimately with Damodhur Punt according to Punt's own statement. They are persons who have gained a livelihood like Damodhur Punt by embezzling their employer. But moreover from the time of this enquiry down to the present moment they have been in the hands of, and are now in the hands of the Police. My learned friend has not hesitated to call tainted witnesses here; they have called no other. Why should they not have presented Salim? He is not a greater scoundrel than Damodhur Punt. Why should they have not brought forward Yeshwuntrao? He is not a greater villain than Rowjee. They might have called all these, which would lead me to suppose and there is nothing in the conduct of this case that they might have been called if they could have been found to confirm a single question. But I say unfeignedly I could never have learnt what I have done, as to the Police in the present case, even if these men had been men of a better cast than I believe them to be, and even if these had been anything whatever that the Maharaja was called upon by evidence from respectable sources to give an answer to, I should have felt the utmost unwillingness and the utmost doubt upon the subject regarding the calling of Yeshwuntrao and Salim. They would have come out of a custody from which nothing could be safe, and unless they could have proved some facts of which the Gaekwar was cognizant, I should have felt the deepest hesitation in putting these men into the witness-box. It is not for me to make out a case on behalf of the Gaekwar. I believe now that these men have lent themselves to proceedings utterly unjustifiable if the story of the different witnesses be true, but these proceedings the Gaekwar knows nothing about. No independent nor honest witness has implicated the Gaekwar in any way, and I will not put into the witness-box men who have been in the hands of the Police up to this time,

and who may probably have been implicated in that what may have been an attempt by one set of persons, although not carried out by another. My Lord, whether I am right in that course or not, I need not say my judgment has been left perfectly free and unbiassed, and it is upon my judgment that I act upon this occasion. I decline absolutely to put forward these people. I refer back to the evidence given, and submit to this Court that the evidence is utterly unsatisfactory, and that the charge made against the Gaekwar entirely falls to the ground. My Lord, it is really with a deep sense of gratitude that I thank you for the attention that has been paid to the arguments I have humbly and probably insufficiently pressed before you—arguments that may be fallacious, but which I have earnestly and in the belief they are worthy of consideration pressed upon your attention. My Lord, you have given, I am sure, and will give, the fullest effect to them. I have felt the weight of this case and the deep responsibility cast upon me. No case probably has ever excited more general attention—that will be watched with more jealous care—that will be canvassed by more critical minds. It is, probably, the very first example that I know of, in which a man in the position of the Gaekwar charged with an offence of this character, or indeed with any offence at all, has been put upon his trial. We know well the history of India furnishes many examples of it, how the Viceroy has frequently with a high hand taken upon himself the supposed necessary correction of those who have acted contrary to that which is just, or the view which the Viceroy has taken on himself to think is correct. But on the present occasion His Excellency the Viceroy has felt it right when there is a grave accusation against a great Prince in the kingdom that that accusation should be sifted. He has seen upon paper probably sufficient grounds for an enquiry, and he has instituted that enquiry—the first I say that has ever existed in this country and by which English law and English justice are called upon to assist in an enquiry connected with a charge against an Indian Prince. My Lord, to me, at all events, that is a profound satisfaction, for whilst admitting and feeling deeply my own incompetency—and in that I am not talking from any false feeling of modesty, because I believe there is hardly a Counsel in the land who would not have the same sense upon this matter, and probably justly so, for it requires indeed a great grasp of mind, great power, and one would have been glad if one could have brought to bear upon the subject great eloquence. I have only been able to bring to the subject calm reasoning and such as I wished and calculated would have an effect upon the judgment and minds of the Commission. Again, my Lord, I thank you for the attention you have paid me—I implore you not to consider that what I have said is all that can or might be said upon the part of this unhappy Prince. I implore you to look into the minutes of the evidence. I believe in that minute will be found matters upon which I have not relied, but which have strong bearing to show that the Gaekwar is entirely innocent of this charge. Cast from his throne, exhibited to his people under circumstances of degradation, not one man scarcely daring, while the investigation is going on, to come forward and say a word in his favor—he has solemnly declared his own innocence, and I as his Counsel have referred to the evidence given here, and solemnly ask the tribunal which has to try him by equal judgment and justice of English laws, to say that the veriest pickpocket ever charged with an offence could not have been found guilty upon the evidence by which it is sought to deprive a Sovereign Prince of his throne.

Enclosure No. 32.

Eighteenth day, Tuesday, March 16.—(Continued.)

The Advocate-General's Speech :—

(*Extracted from the "Bombay Gazette," Newspaper.*)

The Advocate-General then proceeded to sum up, which he did as follows :—

My Lord Chief Justice, Your Highnesses, and Gentlemen,—It now becomes my duty to offer such observations as have suggested themselves to me upon the evidence which has been recorded in this matter, and upon the able and eloquent speech which we have heard from my learned friend Serjeant Ballantine in defence of His Highness the Gaekwar; and I feel that the task which now devolves upon me would be one almost beyond my strength were not I satisfied that the evidence which I have been able to adduce before this Commission has established every one of the material propositions which I stated to you in opening this case. My Lord, it has been a satisfaction to me to find that my learned friend has recognised, not once only, in the course of his address, the satisfaction with which he and his client viewed the course which has been adopted by the Government of India upon this occasion. My learned friend has recognised in the fullest degree that the Commission which has been appointed to investigate this case is a Commission to which no exception can be taken. My learned friend has said that the decision at which the Commission shall arrive will be one to which, though he may not agree with it, he can offer no valid or substantial objection. Of my learned friend's part in the case it is not for me to speak. My learned friend has brought to this country a reputation which is not merely English, but European. My learned friend has before this Commission exhibited these rare qualities which have raised him to the foremost place in the ranks of the British Bar, and he has here equally sustained the fame which has accompanied and preceded him. It cannot therefore be said that if the Commission should arrive at an adverse decision to His Highness the Gaekwar upon any of these points, it has not been for want of ability or zeal on the part of his advocate. If indeed my learned friend has introduced into this case sympathy for his client, which is not unnatural under the circumstances, and which has found expression continually in the course of his arguments, that sympathy which my learned friend has expressed and felt has not detracted in the slightest degree from the force of his argument. I have, I confess, been somewhat surprised to hear that my learned friend has dwelt so much upon a persecuted Prince—upon the circumstance of His Highness having been placed in what Sir Lewis Pelly very properly called honorable confinement, and upon the fact that the public property of the State, pending the decision of the Government, has been placed under what is popularly called in this part of the country attachment. Indeed, it would have been impossible for any other course to be pursued, and my learned friend must be satisfied that in subjecting His Highness to suspension from power, in so assuming the temporary administration of the State, and in providing for the protection of the State property, the Government of India would have failed in its duty if it had not adopted the course that it has adopted. It should be felt as no hardship by His Highness the Gaekwar that this course has been taken. I am sure that my learned friend will bear in mind that in his conduct of the case he has met with the assistance of the officers of the Government—an assistance which he has himself so handsomely acknowledged. The defence which has been presented to the Commission on behalf of His Highness is not merely contained in the argument of my learned friend, but in the statement put in by His Highness—a carefully prepared and well-weighed statement, which is before the Commission. That statement really amounts to nothing more than this—that it is, in elaborate phraseology, a plea of not guilty. It is a statement not vouched by an oath or solemn affirmation—it is a statement, as we must take it, I presume, made by His Highness upon his honor, and weight must accordingly be attached to a document presented under such circumstances. For my own part, I have no desire to cavil at the course that has been thus adopted. I had no desire to ask the Commission any of those questions which His Highness stated at the close of his statement he was willing to answer. There seems to me to be no necessity for harassing His Highness upon any plea that he has put in, or with any cross-examination whatever. My learned friend, following the general statements in that plea, has dissected, with the ability for which he is so remarkable, the evidence which has been offered in this matter, and

we find that the defence which he puts forward comes really to this—that instead of the circumstances which your tribunal has to investigate being a conspiracy on the part of the Gaekwar and his servants to procure the death by poison of the British Resident at this Court, this is really a conspiracy on the part of the police, who bring false accusations against His Highness. For that defence I was prepared, though I was not prepared to hear it put forward in the way in which my learned friend found himself, on instructions, justified in adopting. The case really, as presented by my learned friend, comes to this—that all the evidence literally as to the graver charges imputed against His Highness has been manufactured, notably by Akbar Ali, Abdul Ali, and Gujanund Vithul, the three detective officers employed under Mr. Souter; and, strange to say, my learned friend has not hesitated to aver that Mr. Souter was a party to the base and vile conspiracy so brought to pass. Now, before I go into the consideration of the case proper, allow me to say a word or two on the general question, that this has been a case made up by the police. It will be in the recollection of the Commission that Sir Lewis Pelly stated that among the matters that he was deputed to enquire into when he came to supersede Colonel Phayre was this very question of the attempt to poison Colonel Phayre. Mr. Souter's services were applied for by Sir Lewis Pelly shortly after his arrival here, and Mr. Souter came to Baroda on the 9th December—just one month after the alleged attempt had taken place—and was then accompanied, or immediately followed, by the three police officers whose names I have mentioned. Of these three men it may be permitted to me to speak here one or two words. Akbar Ali is an officer of forty-four years' service. He joined the service in 1831. He has received in recognition of his services the honorable distinction of Khan Bahadoor—a distinction conferred by the Government of India, and a distinction not conferred lightly or without due consideration. During the whole forty-four years that he has been in the public service, there was not one event upon which my learned friend could cross-examine him. There is not one single instance in his career to which the research or the ingenuity of those who instruct my learned friend could point as attributing to him the slightest disgrace. He comes before the Commission as a man of unspotted character whose services have been recognised by the State, and nothing whatever discreditable to him is on record. And the junior Khan Bahadoor, Abdul Ali—he of course has been for a less period of time in the service of the State than his father; but he has also gained from the Government of India the honorable title of Khan Bahadoor; and when he was put in the witness-box for cross-examination, not a single question was asked of him. If there had been anything in his career upon which he could have been cross-examined, no doubt my learned friend would have questioned him as to the character which my learned friend has attributed to him. No such question was put to him, and we must therefore presume that he, like his father, has a character unstarnished, notwithstanding the difficulty and delicacy of the services he has had to perform. And the third man, Gujanund Vithul, he also has been for a long time in the service of the State, and has earned the corresponding distinction given to Hindoos in the British service of Rao Sahib, Khan Bahadoor being a title conferred upon Mussulman officers. And the only point as to which my learned friend could cross-examine him was as to his previous character with regard to the phases of a case which was brought, in the first instance, in the District Court of Ahmedabad, and afterwards tried in the High Court of Bombay, and is what is popularly known as the Koth succession case. In regard to the first branch of it—I mean the first investigation before Mr. Coghlan—Gujanund was not concerned in it further than as a witness, and in the later branch he was not in it at all. My learned friend was instructed to read a passage from the judgment of the High Court, which in no way referred to the police. Those are the three men—old, zealous servants of the State—whom my learned friend has been instructed to describe to this Commission as utterly unscrupulous persons, and as persons engaged in the inception and prosecution of a vile conspiracy. I think the Commission will be of opinion that there is not the slightest foundation for the charge which my learned friend was instructed to make against them, and that in the proceedings in this matter they have done nothing which should cause them to lose the good character which they have so justly earned. My Lord, my learned friend has frequently in the course of his address to the Commission

said that he has been told this and that by various persons whom he has not named. I have no doubt that my learned friend has been told a great deal since he came to this country that he would not have repeated had he been better acquainted with this country and the people of this country, and with the particular individuals who are concerned in this case. There are no doubt here, as everywhere, a large number of people who have a bad opinion of the police, and that opinion I have generally found to be entertained by persons who have at one time or another been in the hands of the police in connection with a charge made against those persons. The criminal classes all over the world have a great objection to the police; and no doubt some of the information which has been conveyed to my learned friend may have been derived from people who have no reason to speak with pleasant recollections of the days when they had to pass through the hands of the police. But when my learned friend, not satisfied with ascribing to the three native officers whom I have mentioned an active part in the conspiracy which he has been instructed to suggest in this case, went on to say that Mr. Souter deliberately left the room at the time that Rowjee's belt was about to be examined, knowing that he left the examination of that belt in the hands of an utterly unscrupulous person, notwithstanding the expectation that something would come of that enquiry—which something did come, as my learned friend said—and that Mr. Souter was called in afterwards as a comparatively respectable witness to testify to something having been found in the belt, I think my learned friend was misled by those who gave him the information to misjudge not only the audience of this court and all who heard him, but to misjudge also the Commission themselves. Mr. Souter is a man well-known throughout this side of India. He has been an officer in the service of the Government for many years, and his services have been recognised by Government by conferring upon him the Star of India. My Lord, he wears, though in a lesser rank, the same decoration that is so worthily worn by three of the members of your Commission; and even if it were not the case that Mr. Souter is personally known to the members of the Commission, surely the fact that he is an English gentleman ought to have preserved him from the imputation which my learned friend was instructed to cast upon him. But Mr. Souter has a reputation as dear to him as mine is to me, and as my learned friend's is to him; and I have no doubt that if my learned friend knew Mr. Souter better, he would find him to be a gentleman of honor and of honor as untarnished as Mr. Serjeant Ballantyne's himself, and it does not recommend the case put forward by the defence to have it suggested here in open court that a gentleman of Mr. Souter's position and character—I will not say a puppet in the hands of Government, but one of their servants now engaged in a vile conspiracy for the purpose of ruining His Highness the Gaekwar. Had Mr. Souter's character been capable of being attacked, there is no doubt that it would have been attacked in the course of his cross-examination, but it was not so attacked, and it was with a feeling of great pain that I heard my learned friend attack it yesterday. The character then of the police officers specially deputed by Government to enquire into this case—for it will be remembered that these three native officers were men whom Mr. Souter well knew—one of them, the Rao Sahib, had served under him many years ago in the mofussil, and the other two are at the head of the detective branch of the police force of Bombay—the character of these men ought to have saved them from the imputation cast upon them. Another consideration also which I think, if fully and fairly weighed, would have saved it is this—what interest could three or four police officers of the Bombay police have in accusing the Gaekwar? My learned friend has not come down here to say that it was a part of the policy of the Government of India to drive His Highness Mulhar Rao from the guddee and to get rid of him from Baroda. If those who instructed could have ventured to suggest that such was the policy of the Government of India, there might have been found in that an explanation of a desire on the part of the Bombay police to carry out the behests of the Supreme Government. But no such suggestion is or can be made, and I doubt

if the suggestion that my learned friend threw out, and which he deemed well worthy the attention of the Commission, is a good one—one which is warranted by the circumstances of the case. Surely, if it were necessary to find some culprit to whom the attempt to poison Colonel Phayre could have been traced, it would have been much easier to have fixed upon Damodhur Punt, as my learned friend appears to have done, as the person by whom the plot was initiated and by whose instrumentality it was carried out. But those who instructed my learned friend must have felt that the accusation was justly and truly made. I think, therefore, I may ask the Commission to dismiss from their minds, so far as the character of the police evidence, and so far as the probabilities of the case are concerned, the wild theory of my learned friend that this is a case which has been got up by the officers of Government. Had it been got up by the police, after the compliments which my learned friend has paid to the ingenuity of that body of men, after the enormous praise which he paid to them of supposing that they could have invented and carried out a conspiracy of this kind—surely, we might have expected that the evidence would have hung together more completely than it has done; that if tutored at all, the witnesses would have been so tutored as to agree exactly in the statements they had to make; that there would have been none of those discrepancies in the evidence to which my learned friend has also adverted, and certainly none of those hitches in regard to documents which my learned friend has endeavoured to make out—we might in fact have expected a perfect case had the ingenuity of the police, and the ingenuity of the police alone, been expended upon it. But, my Lord, I think it must be perfectly clear, from the history of the investigation of this case at Baroda, that the police have done nothing more than their simple duty in endeavouring to trace out, from slight indications at first to more important indications, the authors of the attempt made to poison Colonel Phayre. I think if the Commission refer to the dates to trace the sequence of the evidence from the time that the cart-driver took the ayah to the Palace up to the time that Damodhur Punt supplemented all the evidence previously recorded,—I think this Commission will be able to come to no conclusion but that what the police has been doing has been to record carefully from day to day what has been done with regard to the progress of the discovery of this attempted crime. But not only in the sequence in which the witnesses were examined and brought one by one before the police charged with this enquiry, but in the circumstances under which this enquiry was conducted, will the Commission, I think, find irrefragable proof that my learned friend's theory cannot be supported. We have been informed that there is another kind of torture beside that of the thumb-rack and the screw, and that torture has been applied in this case by the police. It is strange, if this was so, that one of the rooms at the Residency should have been selected as the scene of these operations of the Police. I apprehend it would never enter into the minds of those who have instructed my learned friend to suggest that Sir Lewis Pelly was a party to this conspiracy, and yet, unless it is intended to be so suggested, it is difficult to know why it was so much insisted upon by my learned friend, when this torture was committed in the very dining-room which forms an ante-room between the reception room of the Residency and the office, and between which there must have been the freest access. But having regard to these circumstances, I do not think the theory put forward by my learned friend will be accepted by this Commission; and if that is so, I fail to see what answer there can be to the charges which have been brought against His Highness. Before I leave this part of the case, I may refer to one other point. Sir Lewis Pelly stated that he was on the point of going to Bombay for the Christmas holidays, and he asked Mr. Souter to accompany him, and this was before Rowjee's statement was given. This shows that they did not know of that statement, and it may be that if they had left for Bombay Rowjee's statement might never have come to light. I think this circumstance should show that there could have been no desire to make a police case of it. That statement was made only in the most natural

way, and it was in consequence of that statement that the proposed visit to Bombay was deferred. My Lord, another point which I may mention, as it was very much dwelt upon by my learned friend in the opening of his speech, was this: that the material witnesses who were called in this case to prove the guilt of His Highness were accomplices, and my learned friend asked that upon that ground their evidence, if not rejected by you, should be utterly discredited. Of course, every one familiar in the slightest degree with the proceedings of courts of justice in this country, and every man of common sense, must know that there is a grave degree of suspicion always attaching to the evidence of accomplices, but I am not aware that I introduced these material witnesses to the attention of the Commission otherwise than as coming here with the disadvantage that their evidence ought to be regarded with a certain amount of care. I am not aware, at the same time, that there is any law existing in India or England which renders the evidence of an accomplice inadmissible. In India it is customary for judges to tell juries in their summing up, in cases in which the evidence of accomplices has been taken, that it is not safe for them to act upon the evidence of accomplices unless that evidence is corroborated in some circumstance that affects the identity of the persons accused; but at the same time it is by no means necessary for judges to offer that advice. As your Lordship is probably aware, there is a rule stating that it is no misdirection on the part of a judge trying the case to omit to give that caution to juries. By the Evidence Act it is stated that an accomplice shall be a competent witness against the accused person, and a conclusion is not illegal merely because it proceeds upon the uncorroborated testimony of an accomplice. That is a point in Indian law which is, I am sure, familiar to at least three of the gentlemen sitting on this Commission, but I have deemed it desirable to mention it, because I thought the impression might be conveyed to the public from the address of my learned friend that unless an accomplice is corroborated it is impossible to find an accused person guilty against whom he has given his evidence. I think, however, I shall satisfy this Commission that in this case there is no particular necessity for bearing upon this rule of Indian law, because the corroboration exists in vast quantities upon the very points which English lawyers have held such corroboration ought to be directed. The identity of the Maharaja is a fact beyond all possibility of doubt. Perhaps, also, I may be permitted to advert to another of the points dwelt upon by my learned friend in the early part of his address, and which is a point of much importance, namely, to the conduct of His Highness the Gaekwar after he was informed that his name had been mentioned in connection with this attempt to murder Colonel Phayre. The Commission will remember that after the evidence of Rowjee was taken, and before the statement of Nursoo had been made, His Highness paid one of his ceremonial visits to Sir Lewis Pelly. On that occasion Sir Lewis Pelly requested Mr. Souter to communicate to His Highness the purport of the evidence given by Rowjee, and the Gaekwar, being advised thereto by Sir Lewis Pelly, stated he would willingly give every assistance in his power towards the detection of the criminals. My learned friend has said that from that time forward His Highness did so, and that by his demeanour and his readiness in giving up Salim and Yeshwuntrao he was proved to be an innocent man. But I am not disposed to attach much importance to the surrender of Yeshwuntrao and Salim. I do not see how their surrender could have been refused. Moreover, whether it was an act of the Gaekwar personally to surrender these prisoners, is not apparent. An application for their surrender was made to Mr. Dadabhoy Nowrojee, and the communications on the subject, in which the Gaekwar may have concurred, were through Mr. Dadabhoy Nowrojee. No doubt Mr. Dadabhoy would at once have advised the surrender of the man, and I have no doubt also it would occur to His Highness that the surrender of the two men was a thing which it would be, not only wise not to do, but which could not be helped. If His Highness had disregarded the advice of his Minister, and refused to surrender the prisoners, what would have been the consequence?

He would have placed himself in open hostility with the British Government, and he would either have had to yield or fight. So, my Lord, there cannot be the slightest doubt that there was nothing extraordinary in His Highness' conduct in the matter of sending the men, and I do not see that any powerful argument can be put forward in favor of His Highness because he did not refuse to give up the men. Moreover, as to the rest of the conduct of His Highness from the time he was informed through Sir Lewis Pelly that he was said to be implicated in the attempt to murder Colonel Phayre until the time he was suspended from power by the orders of the Government of India, I fail to see what there was in the demeanour of His Highness from which a conclusion can be drawn either one way or another. No doubt it might have been possible for His Highness to raise the standard of revolt, but that would practically have been an admission of his guilt. I think that the course he adopted was a course that would have suggested itself to any man, namely, to stand by and abide the consequences of his own act. He could not have taken any active measures which might not have amounted to proof positive of his guilt. He therefore remained passive, and if we read his conduct by the light of Damodhur Punt's evidence, we can understand why he did remain passive. Not only did he know beforehand that an attempt to poison Colonel Phayre was to be made, but on the morning of the 9th November before he saw Colonel Phayre he knew that the attempt had been made and failed. He had followed day by day the progress of the enquiry which was instituted by Colonel Phayre, and he was kept informed of the progress of that enquiry. Damodhur Punt has described to us the alternations of fear and hope that filled the breast of His Highness. He has told us how he praised the sagacity of Rowjee, and rejoiced over that witness' liberation; he has told us how again when the Bombay police came to Baroda he enjoyed a moment of elation because Yeshwuntrao and Salim had been permitted to return to the Haveli from the Residency, whither they had been sent; and again how he did not permit Salim and Yeshwuntrao to be sent back in the evening to the Residency without having previously cautioned them to say nothing. That the confidence reposed on these men was not misplaced and was justified is proved by the fact that they have said nothing, notwithstanding that my learned friend on behalf of the defence has given them up as scapegoats. My learned friend says they have said nothing, though in the care of the police, and we may accept that as true, but I say that there is nothing to show, nor can you find any proof, that this is a police case, nor can you find anything to exonerate His Highness from the charges imputed to him. These charges may be conveniently referred to, because they group themselves into two heads—in regard to one of which my learned friend has not made much contention. He has expressed himself unable to understand the meaning of the charges, and he has not set himself to disprove them. The first is, "That the said Mulhar Rao Gaekwar did, by his agents and in person, hold secret communications for improper purposes with some of the servants employed by Colonel Phayre, the Resident at Baroda, or attached to the Residency:" the second, "That the said Mulhar Rao Gaekwar gave bribes to some of those servants, or caused such bribes to be given." The third and fourth charges relate to the attempt to poison, and, as you will see, the other charges relate merely to the bribing of servants at the Residency by the Gaekwar or his agents for the purpose of obtaining information which it was not proper he should obtain. Let me read to you what His Highness the Gaekwar himself says upon this matter: "I declare that I never personally directed any of the Residency servants to act as spies on the Resident or report to me what was going on at the Residency, nor did I ever offer or cause to be paid any money to them for the same purpose." He does not say "he has never personally or by my agents," as he has said in the previous paragraphs. He limits his denial to his own personal acts. He proceeds: "I say nothing as to the presents that may perhaps have been made to servants of the Residency on festive occasions, such as marriage and the like. Information on trifling matters going on both

at the Residency or at my own Palace may have been mutually communicated; but I did not personally hold any intercourse with those servants for this purpose, nor am I personally cognisant of any payments for the same having been made; nor did I authorise any measures by which secrets of the Residency should be conveyed to me." This, I think, contains a very material admission. It simply comes to this—that the Maharaja denies that he personally had any communication with the Residency servants for improper purposes, but that money was given to Residency servants which, I think, may be considered as bribes. He also tacitly admits that such communications may have been made by his agents with these Residency servants, and that such payments were made by his agents to these servants for the purposes mentioned in the charges. My Lord, it is not for me to discuss whether or not there is any difference between the information which Colonel Phayre received and the information the Gaekwar received. It appears to me that there is a wide difference between a British Resident at a Native Court receiving voluntary information from persons who go to visit him and a Native Sovereign lending himself to bribing the servants at the Residency in order that they might convey information to him of what was going on there. I think that the difference need only be stated to be appreciated. But that the Maharaja did establish communications with the Residency servants for improper purposes, and did pay those servants for the communications they give him, is, I think, established beyond all doubt, not only by the admissions in his own plea to the Viceroy, but by the evidence given in this case. I don't think it will strike the Commission as improbable that persons in the position of the Residency servants should have been introduced into the presence of His Highness the Gaekwar. I don't think the Commission will be of opinion that there is anything in itself improbable in that which the Residency servants have told. I am tolerably sure that the Members of this Commission who have visited His Highness' Palace, the old Haveli in the city, will be satisfied that the accounts these servants have given of the way they were introduced into the Palace by a door abutting on the Nuzzer Bagh, and then going up a series of stairs to the room where the Maharaja sat, and who remember that the room had mirrors in it and that there was a bench on which His Highness used to sit,—I cannot think that the Members of this Commission will be of opinion that the story, so far as relates to the Maharaja's room, is an invention. It is not suggested by my learned friend that these servants have been taken to the Haveli since they made their statements to the police. On the contrary, that they have not been taken to the Haveli since they made their statements appears clear from the evidence recorded. That the rooms at the top of the house at that particular corner of the Palace were the rooms occupied by the Maharaja is admitted by Damodhur Punt; that the Maharaja would be likely to be found there results as a natural consequence from the fact that these were the rooms which he usually occupied. Although my learned friend has given up Yeshwuntrao and Salim, it is positively certain that these were two of His Highness' attendants, and were most frequently in the habit of accompanying him on his ceremonial visits to the Residency, and therefore these would be the men who would be most useful to him in his communication with the Residency servants. My learned friend admits that he is not in a position to quarrel with the account given by the gharry-drivers who accompanied the ayah when she went to the Haveli. It was from the statement of one of these gharry-drivers that a clue to this whole story was obtained. It cannot be doubted that the ayah went to the Haveli upon the occasions she has deposed to, and although my learned friend has suggested that she may have gone to see some of the servants of the Palace, I think that that is a suggestion based rather on my learned friend's idea of what would be a likely state of circumstances in a European Court than from what we know are matters of frequent, nay, almost daily, occurrence in the Native Courts of India. The servants in a Native Court stand on an entirely different footing from those in a European Court, and as Damodhur Punt himself has said, he did not live

in the Palace. There was nothing to show that there was any friendship existing between the ayah and any of the Palace servants except Salim and Yeshwuntrao, and as these she had constant opportunities of seeing at the Residency, there could be no occasion for her going to the Palace for the purpose of seeing them. Moreover, unless it were to see some one of greater importance than the servants at the Palace, is it likely that the servants at the Residency would have made the journey from the Residency to the city at the dead of night? You will remember that even Rowjee said that he felt so much alarmed at going into the town at night, that he induced people—at one time Jugga, and at another time Kabhai—to accompany him there. My learned friend does not suggest that the Maharaja was personated on the occasions when at these late hours the Residency servants visited the Palace. Such a suggestion it would have been impossible to make. There could be no mistake about His Highness with any one who had seen him. His appearance is sufficiently remarkable to render him recognisable by any one who has seen him even once, while those Residency servants having an opportunity of seeing him often could make no mistake about his identity. The suggestion therefore that any one could have personated the Maharaja upon these occasions would have been but a wild suggestion. I take it that it must be held to be established beyond all question that the ayah did on these three occasions go to the Palace in the city for the purpose of having a personal interview with the Maharaja. No doubt the evidence as to the personal interview rests upon the statement of the ayah and of those who accompanied her on those occasions into His Highness' presence—Faizoo on one occasion, and Kurrim on another. But there is important corroboration of their story upon these points to be found in the letters of the ayah, which were admittedly genuine. These were discovered in the house of the ayah, and passed between her and her husband at the time when one was at Mahableshwar and the other was in Bombay or Baroda. This is a branch of the case to which I don't think my learned friend will extend his argument that the whole of this is a fabrication by the police—not even the ingenuity of a policeman could account for the presence of post-marks upon some of these letters which were exhibited. Exhibits A, B, C and D show beyond a doubt that the ayah was in communication with Yeshwuntrao and Salim in regard to the matters affecting the Maharaja that passed at the Residency; and that she was even in direct communication with the Maharaja himself has been proved by the evidence of Syed Abdool. The letter which was written to the Maharaja does not appear to have been forwarded, because the husband of the ayah found no opportunity of delivering it to the person for whom it was intended. But it shows, does it not, that this ayah was in communication with His Highness upon matters of political importance? She mentions—and this is just one of the things that might be expected in the case—that her master and mistress had been dining at Government House, and she affects to give an account of conversations that took place there, and no doubt these were the kind of communications that the Maharaja would be desirous of receiving. That that letter was transmitted appears not only from the evidence of Syed Abdool, but also in the reference made in that letter D: "I do not know whether or not you have delivered the note (*chitti*) enclosed in my last letter to the person for whom it was intended. That person was, the ayah says in her evidence, His Highness the Gaekwar. I take it therefore as established upon the evidence, and established clearly, that these communications did exist between the Residency servants and His Highness; that these communications were held in secret, and for improper purposes. I do not suppose it could be contended that it would be a proper thing for a Prince to set household servants to repeat to him anything that passed at a British Resident's house; and when it is remembered that these communications were established about the time that General Meade's Commission was assembled at Baroda, and continued during the time that that Commission sat, and were continued afterwards, I apprehend

there can be no doubt in the minds of this Commission that what the Maharaja desired was to pick up from what might fall at the Resident's table or from the mouth of some of the Members of the Commission some private information that might be useful to him in shaping his course in reference to that investigation. Then, let us look at the nature of these communications. One of these news-letters is in evidence, and another is referred to in a statement by Wasuntrao Bhow—not a willing witness against his master, and a man who had been director of the State banks or shroffs' shops which had been established here and elsewhere by the Gaekwar, and a man who jumped at the suggestion put to him by my learned friend, Mr. Branson, that he was kept in jail for merely reading these letters, although the fact is that he is kept in custody by Sir Lewis Pelly upon charges of a serious nature. This man says that he was once called upon to read one of those letters that Damodhur Punt has told us about. Damodhur Punt tells us that these letters were passing day after day between the Residency and the Haveli, and that as soon as they were received they were destroyed. These payments were not merely for the repeating of conversations that might take place at the Residency table, but they extended to other matters; for we have it on the evidence of Damodhur Punt that Rowjee, at Nowsaree, brought an important document to the Maharaja—no less a document than a petition addressed by Jumnabaee, the widow of Khunderao Maharaja, to the Government of Bombay—and that document was copied by Damodhur Punt by the orders of the Gaekwar, and then restored to Rowjee, who took it back again to the house of his master. Can it be said, my Lord, that these communications were for the mere reporting of idle gossip? Can it be said that these punkawallas, havildars, and other servants, the inferiority of whose position protected them from suspicion, were engaged by the Maharaja for the mere purpose of gathering idle chatter? In the short experience that I have had in this country, it strikes me as not at all unnatural that His Highness should endeavour to enlist the sympathy of the ladies of the Residency on his behalf, and for that purpose should seek to get the ayah to communicate with those ladies. This may appear unnatural to the Commission, but I don't think it will. Nor does it appear unnatural that His Highness should wish to enlist on his side Pedro, who had been a long time with the Resident, and from his position as waiter at the Resident's table would be perfectly cognizant of what was going on and able to repeat it to the Maharaja. It does occur to me also that the very men whom he would be anxious to get over to his side would be the headmen of the Resident's office establishment—the jemadars and havildars—men who could have access to the private office at all hours of the day; men who would be left in charge of that office during their master's absence, and might select any papers they might fancy would be of use to their employers. If you consider as to the sums paid to these men for the services they rendered, can you say that these sums are not bribes? My learned friend says that five hundred rupees is a small sum. In some points of view it is a small sum; it might be a small sum to the Maharaja, but it is a large sum to pay to men whose monthly pay is about ten or fourteen rupees—it is more than four years' pay to them. The payment of that sum to the witness Rowjee has not been disputed. He got it from Yeshwuntrao, through his clerk, who proved the payment in the witness-box, and that clerk, I may say, was not cross-examined by my learned friend; so that that payment must be taken to be proved beyond a doubt. Let me ask what inducement could there be for Yeshwuntrao to pay this sum of money? My learned friend says that Yeshwuntrao is an inferior creature, and might be in the service of Damodhur Punt. Then what inducement was there for Damodhur Punt to get this information for which so much money was paid? My learned friend's theory only goes so far as to say that it might have been worth while for Damodhur Punt to poison Colonel Phayre, but not to get information. My learned friend can only say so far that it might have been worth Damodhur Punt's while to poison Colonel Phayre, but he cannot go so far as to say that

he had any interest in obtaining information. Yet these five hundred rupees were given, and, as my learned friend says, long before, and not after, the poisoning was attempted. We have it in evidence that Yeshwuntrao was a confidential servant of the Gaekwar, and knew the Residency servants. Does it not seem beyond all possibility of doubt that that payment was not made by Damodhur Punt, but by the Gaekwar himself, through the hands of Yeshwuntrao? But, my Lord, that payment was not the only payment which Rowjee received for giving this information. He divided eight hundred rupees with Nursoo immediately after their return from Nowsaree, and immediately after Jumnabaee's petition to the Government of Bombay had been given to the Maharaja. You have here two large payments to these men in less than six months. I say that these payments were small as compared with the Maharaja's revenues, but they were enormous indeed compared with the regular salary of the persons employed. Then there is Pedro. Pedro is a witness upon whom my learned friend relied very much. Pedro admits a payment of sixty babashai rupees made to him when he was about to go to Goa, but it does not appear why that money should be given. Is it not likely that it should have been given for some services rendered? Then we have Shaik Kurrim, the chobdar, whom we find admitting the receipt of a hundred rupees at the same time that a hundred rupees were paid to the ayah. Again, we have another payment of fifty rupees to the ayah. Now, on referring to the entries put in by Damodhur Punt, you will find that payments corresponding, or nearly so, in amount to those bribes were made through the Khangee Department at the very time that the servants say that they received those bribes. [The Advocate-General here refers to Exhibit E.] This Exhibit shows that on the 19th of June 1874 six hundred rupees were paid to Yeshwuntrao, and were received by the hand of Salim. That would be about the time on which five hundred rupees were paid by Yeshwuntrao by the hands of his servant, Dhulput, to Rowjee, and as for the balance it would be consistent with what one would expect to find in a case of this kind, that some money should remain in the hands of Yeshwuntrao: so the Maharaja pays six hundred rupees, and Rowjee receives five hundred rupees. Then again as to the eight hundred rupees paid to Nursoo Jemadar, and which he divided with Rowjee after their return from Nowsaree, your Lordship will find that A 1 is a second payment made out of the treasury to the extent of one thousand rupees on the 8th of June 1874, and that would be very shortly after the return of His Highness the Gaekwar and of the Resident from Nowsaree. Your Lordship will remember that that took place some time in the end of May. Again, M 1 is a payment of two hundred rupees on the 15th of May 1874, which corresponds very nearly to the payment of the two hundred rupees to Kurrim and the ayah; and in following up these documents further, I think I may state that we find shown on the records of the Khangee Department payments out of that Department to Salim or Yeshwuntrao nearly corresponding to the sums of money received by the Residency servants at or about the time that the servants profess to have received those payments. Now, my Lord, I do not think it can be reasonably suggested that all these payments were made by Damodhur Punt to serve his own purposes. I do not think it can be suggested with any show of reason that Yeshwuntrao and Salim were merely agents of Damodhur Punt in this matter. No doubt the money was passed out of the treasury by Damodhur Punt, but the disbursements were made, I apprehend it is clear beyond a doubt, by the direction of the Maharaja. Of course there could be no reason for Damodhur Punt wishing to obtain information, and paying for it in this way, for himself; but there was a strong reason why he should wish to do so in the service of his master. That Rowjee had money is tolerably clear, because it was one of the matters that first directed the attention of the police to him. They had found out he had been making large purchases of jewellery in the bazaar at the time these monies were paid. Exhibit Y is the list of ornaments put in, and you will remember at what time these ornaments were made. The first set of ornaments was made in October,

February, and March (golden bracelets and rings, and so forth); and in the month of June, when the payment of eight hundred rupees was made, and divided between Nursoo and Rowjee, a silver anklet was purchased of the weight of over seventy rupees, and subsequently to that, and apparently about the same time, a necklace of gold venetians appears to have been bought. I think there can be no doubt that the money was supplied to Rowjee by the Maharaja the Gaekwar's directions out of the Gaekwar's treasury for the purpose of obtaining information of the character to which the witness has deposed. Couple that fact with the statement you find in His Highness' plea to the Viceroy, wherein he says that he never *personally* had had communications with the Residency servants—he does not deny that they made these communications through his agents—and I think the Commission will have no doubt whatever that the first two charges against His Highness are satisfactorily established. My Lord, my learned friend has suggested that an oriental Prince is likely to be surrounded by evil counsellors, and to have things attributed to him for which he cannot justly be held responsible. There can be no doubt that His Highness the Gaekwar was to some extent so surrounded by evil counsellors. I am not here to defend the character of Damodhur Punt. Nothing that my learned friend might say about that man would excite my indignation. He is not a man whom I would put forward as one whose uncorroborated evidence should be worthy of your great consideration. There is no doubt, from what he has admitted he has done, that he is a very bad man; but when we find that a man of that character is retained by His Highness the Gaekwar as his private secretary, as his most intimate confidant, as his most trusted servant, and when we find him, even after the attempt to poison Colonel Phayre was made and bruited abroad and under investigation, introducing that man to Sir Lewis Pelly at the Residency as his private secretary,—I must say that I do not think His Highness can come before this tribunal with any serious expectation of being held entirely irresponsible for anything that that person might do or say on his behalf. My learned friend has referred to Yeshwuntrao and Salim as likely to obey the behests of Damodhur Punt, but they would, my Lord, be more likely to obey the behests of the Maharaja than that of the Maharaja's private secretary. Therefore, if you find a series of witnesses coming forward here, and if you find one of these servants testifying that he issued orders by the directions of his master the Maharaja, though we may look upon that man with suspicion, and though we may desire not to believe him, yet nevertheless, looking at the probabilities, I apprehend it is difficult not to give him credence for telling a certain amount of what was true, especially as to his merely obeying his master in the matters to which he refers. My learned friend has admitted that Damodhur Punt, Yeshwuntrao, and Salim are the three persons likely to take part in any such attempt as is alluded to here in the Viceroy's notification in the third and fourth charges against His Highness. I think that is going a great way. These charges are, "that his purposes in holding such communications and giving such bribes were to use the said servants as spies upon Colonel Phayre, and thereby improperly to obtain information of secrets and to cause injury to Colonel Phayre, or to remove him by means of poison; that, in fact, an attempt to poison Colonel Phayre was made by persons instigated thereto by the said Mulharrao Gaekwar." We have therefore this—that in regard to this most serious charge, my learned friend admits if that His Highness was so concerned, he could scarcely have found three better instruments than his private secretary and his two confidential attendants. Now, my Lord, before I go into the investigation of the evidence which connects the Gaekwar with the attempt to poison Colonel Phayre, let me briefly refer to one or two matters on which my learned friend has also dwelt at considerable length. I think my learned friend suggested rather than argued that this Commission could come to no other conclusion than this attempt to poison Colonel Phayre was not in point of fact made by some one on the 9th of November when he asked if the Commission were satisfied that such an attempt had been made. I don't think

that he himself could dispute that such an attempt was made by some one or another. Nor do I think that my learned friend could have seriously contended that that attempt was not made by arsenic and diamond dust. A good deal was said by my learned friend upon the color of the sediment which Colonel Phayre noticed in the glass, and which was also shown to Dr. Seward; but I think that the Commission, looking carefully to the evidence upon that point, can only come to this conclusion, that, although a good deal was said upon this branch of the case, there really is not much in it. Colonel Phayre no doubt describes the sediment that he noticed as being dark, and undoubtedly to him it may have appeared to be such. Some of it was at the bottom of the glass, and the rest was trickling down the side of it. That glass had previously been filled with a preparation of pummelo juice, which is of a reddish or pinkish color. Colonel Phayre at the time he noticed the sediment at the bottom of the glass was under the influence of poison, if poison was there at all; and one of the effects produced upon him by the poison he imbibed was, as you will remember he stated himself, that his head was dizzy and swimming round. I will give your Lordship the exact words, because they are of considerable importance: "I felt a sort of dizziness in my head, and as if my head were going round slightly." It may be that Colonel Phayre, seeing the light through the colored fluid, would be very likely to attribute to the sediment a darker color than the more practised eye and less excited observation of Dr. Seward would attribute to it. Again, the liquid in which the sediment was contained was dark or darkish, and even a white powder put into a dark liquid would probably look dark until separated from the fluid; and supposing the liquid to have been dark, it may be quite natural that Colonel Phayre should see that dark which Dr. Seward, after separating it from the liquid, would consider to be a tawny or fawn color. My learned friend has made a suggestion which is a perfectly fair one, and which I accept as a possible explanation of this affair. He says that some people have not that sharp perception of colors which others have, and it may be quite possible that Colonel Phayre has not that perception of color which Dr. Seward has. Another thing is, that if Colonel Phayre held the tumbler against a dark table or something dark, the darkness might appear to be communicated in some degree to the contents of the glass. But whatever the impression produced upon Colonel Phayre's eyes may have been under the circumstances I have detailed, I apprehend there can be no doubt as to the impression produced upon Dr. Seward. He had not imbibed poison. He came over at once to the Residency on being called, and he could calmly examine the contents of the glass. He says he held the glass against the light and then detected this fawn-colored powder, which may have been what would naturally follow a calm investigation. Rowjee described the powder he received as of a dark color. We all know how natives in this country in speaking of color do not express the gradations that Europeans are accustomed to. Anything in the slightest degree dark would be *kala* to a native. While Rowjee used this word *kala*, he qualified it by pointing to a sun-topee upon the table and said it was like that. The topee pointed out was of a bluish grey color. Rowjee qualified that again by saying that, although it was like the hat, it was perhaps of a still lighter hue.

Serjeant Ballantine—Oh, no. He said it was darker.

The Advocate-General (after referring to the notes)—My learned friend is right. I remember that some emery powder was shown to Rowjee by Mr. Jardine. But at all events the darkness he meant was only a little darker than the hat he pointed out. As to Dr. Seward's evidence upon the point, I think there can be no doubt whatever about its correctness. He examined the powder with the care of a man of science who would afterwards have to experimentalise upon it, and if the glass were found by him to contain any deleterious matter, its presence there would of course be a subject

of close examination. In fact, I think Dr. Seward's evidence should be accepted as perfectly conclusive. That that sediment was found to contain the two ingredients—arsenic and diamond dust—I apprehend there can be no doubt. Dr. Seward by his own experiments detected arsenic by means of the reduction test and the diamond dust by means of microscopic investigation. The reduction test, though one of the simplest tests, is at the same time one of the surest tests for the discovery of arsenic; and though the metallic ring he saw was not reduced into crystals of arsenic, there can be no doubt whatever that that metallic ring by itself established, unless disproved, an almost conclusive proof of the presence of arsenic in the substance from which that ring had been evolved. Dr. Gray subjected the sediment sent to him to the most rigorous investigation. He was not satisfied with the reduction test, although on applying it he found precisely the same sort of metallic ring that had been found by Dr. Seward; but he adopted a number of other tests, which I shall not weary you by describing. But having by these tests reduced the sediment to various chemical substances, he from these substances evolved the pure arsenic again. There can be no doubt as to that.

The President (referring to his notes) said he was not sure whether Dr. Gray said he had done that.

The Advocate-General—Yes, my Lord; you will find it at page 68 of the short-hand writer's notes. Dr. Gray was asked whether he had extracted the arsenic bodily from parts of the powder, though not by the reduction process, and he replied that he had done so by the test called the sublimation test. In regard to Dr. Seward, I may mention that although he did not reduce the metallic ring into the form of arsenic, yet by another test he discovered octahedral crystals, which is one of the surest indications of the presence of arsenic. [Page 55 of the short-hand writer's notes referred to.] There can be no doubt whatever therefore regarding this scientific evidence, which has not been contradicted in any way, that in the sediment extracted by Dr. Seward on the morning of the 9th from the contents of Colonel Phayre's tumbler arsenic was extracted to the extent of about a grain, though Dr. Seward's appliances did not enable him to determine the exact amount. If these tests were not conclusive, there is also the other circumstance which Dr. Seward noticed—namely, the powdery film that was created by gently shaking the fluid in the bottom of the tumbler. This film was noticed before the addition of any water to Dr. Seward's glass, and it is regarded as a very sure sign of the presence of arsenic. Upon the medical testimony recorded here, I do not think the Commission can come to any other conclusion than that arsenic had been introduced into Colonel Phayre's glass in very considerable quantities. I hardly think that my learned friend would ask your Lordship to hold that in the water poured into the sediment by Dr. Seward the arsenic was contained. Govind, a witness called here, said that on that morning he had filled the *koojah* from which Dr. Seward took the water from a *mutka* which was kept for the general use of the house. Although my learned friend asked several questions upon this subject, I do not think the Commission will conclude that in that tumbler there was not arsenic or some deleterious substance on the morning of the 9th. There is no question whatever that Dr. Seward took every precaution he could in sending the packet to Bombay, and that the examinations conducted by Dr. Gray and himself corroborated each other. Though diamond dust does not offer the same ready means of detection as arsenic, yet there are some processes by which a clear conclusion may be arrived at to show its presence. First of all, there are the particles themselves, which, Dr. Seward has told us, are distinguished by their lustrousness and their hardness, and here they are known by the way they withstood the severest test under the spirit-lamp and several powerful chemical agents. Notwithstanding their exiguity, he was able, by rubbing one small piece of glass with another, one of which had a small portion of the diamond upon it, to produce a scratch upon the glass. Dr. Seward said that besides diamonds he knows only one other substance that will scratch glass in this way—namely, collodion. My

learned friend was referred to Dr. Gray for information on the subject of collodion, but in the cross-examination of Dr. Gray not a single question was asked about it. The microscopic test which was offered to the Commission is still available, but I think that the statements of Dr. Seward and Dr. Gray, both men of science and perfectly independent, will be accepted as conclusive evidence upon the point. Without having had any communication with each other, both of these gentlemen came to the conclusion that the other substance found in the sediment besides arsenic was diamond dust. Dr. Gray's attention to it was not called until he himself had written to enquire whether or not the substance was diamond dust. This conclusion occurred to him independently of any information from Baroda. Colonel Phayre's communication from Baroda, in which he mentioned the probable presence of diamond dust, crossed Dr. Gray's letter of enquiry on the way here; so that, as I have said, it was his independent observations that led him to conclude that he had diamond dust before him. [Dr. Gray's letter, Exhibit U, referred to.] I think that the further investigations of Dr. Gray support most conclusively the result of his examination of the sediment sent to him by Dr. Seward from Baroda. You will remember that Dr. Gray, being puzzled in his mind, writes to Colonel Phayre and reminds him that he had said he threw some of the contents of the tumbler out upon the chunam verandah outside of his office. Colonel Phayre proceeds there at once, and in his presence traces are found of the marks of the sherbet which he had thrown out of the window on the morning of the 9th. He scrapes up a portion of the chunam, puts it into a paper, seals it, and sends it to Dr. Gray, by whom the same substances as before were discovered. Unless it is contended that Dr. Gray deliberately put diamond dust and arsenic into the scrapings sent to him from Baroda, it must be admitted that they formed part of the contents of the tumbler. In fact, I have no doubt whatever that diamond dust and arsenic were introduced into Colonel Phayre's tumbler on the morning of the 9th November. [Refers to Exhibit I.] That is a letter to which I have referred in the course of my remarks.

Nineteenth day, Wednesday, March 17.

The Advocate-General resumed his address as follows:—My Lord, in the observations which I addressed to the Commission yesterday, I endeavoured to show, and I think I did establish, that the first two charges contained in the Notification of His Excellency the Viceroy had been made out—namely, that the Gaekwar had communicated for improper purposes with certain of the Residency servants, and had given them bribes through his confidential attendants Yeshwuntrao and Salim. My learned friend has already admitted that Damodhur Punt, Yeshwuntrao and Salim were persons proper to be entrusted with such a crime as is here charged under the third and fourth heads of charge; and I have shewn, I think, that on the 9th of November, in point of fact, an attempt to poison Colonel Phayre was made; that deleterious ingredients were placed in his tumbler of sherbet. One of these has been proved to be arsenic, which is certainly a poison, and the other is diamond dust, which, my learned friend was fain to admit, is by some persons, or a certain class of persons out here, believed to be a poison. I may in connection with this, I think, usefully refer to one point in the case which has always appeared to me to be rather a small point, but on which my learned friend having dealt, I must deal with as briefly as may be—and it is this. It appears to me very clearly on the evidence that no other deleterious ingredients than arsenic and diamond dust were introduced into Colonel Phayre's sherbet. It will be in the recollection of the Commission that the suggestion was thrown out as having been conveyed in an intimation to Colonel Phayre by Bhow Pooniker, who had himself received it from one Bulwuntrao, that another ingredient, namely copper, had been introduced along with the diamond dust and arsenic. But the scientific

investigation of the sediment discovered in the tumbler has shown conclusively that no trace of copper could be found in it by analysis. My learned friend dwelt upon the fact that among the symptoms described by Colonel Phayre as proceeding from the administration of poison to him, was the experiencing of a metallic taste in the mouth. My learned friend also established, by the evidence of Dr Gray, that if copper, or a preparation of copper, is taken into the mouth, the taste is experienced at once. Colonel Phayre's evidence is perfectly clear that the metallic taste did not at once present itself. It was not until some twenty minutes or half an hour after he had taken the sherbet that he among other symptoms perceived the metallic taste in his mouth. Had there been copper or a preparation of copper, Dr. Gray's evidence shows that Colonel Phayre would at once have experienced a metallic taste, but it is very clear that he did not experience this immediately, and it was not until about half an hour afterwards that he had a feeling of nausea and the other symptoms that he described. The evidence upon that point is very clearly given by Colonel Phayre at pages 48 and 59 of the short-hand writer's notes. At page 48, my learned friend asks Colonel Phayre—"You said previously, didn't you, that there was a coppery taste in the liquid that you had?" And Colonel Phayre replies—"No, I said to Dr. Seward that there was a copper taste in my mouth after drinking it." And again he says—"I did not taste it in the liquid, but in my mouth afterwards." It is perfectly clear from this that there was not such a metallic taste produced by Colonel Phayre drinking this sherbet as would have been produced had there been any preparation of copper put in with the other poison; but, as I say, it was not till afterwards that Colonel Phayre experienced this coppery taste when he felt the symptoms produced by taking the sherbet. That a metallic taste in the mouth is frequently experienced, or sometimes, at all events, by persons suffering from arsenical poisoning, is shown by Dr. Gray's evidence at page 68 of the short-hand writer's notes, where, after being asked whether a metallic taste was produced by taking arsenic, he replied—"In the course of my experience as Chemical Analyser, regarding arsenical poisoning, a metallic taste is often experienced." That answer is not very correctly taken down; but what Dr. Gray meant was that he had known persons suffering from arsenical poison complain of a metallic taste as one of their symptoms. I think the whole of the evidence disproves the suggestion that there was any copper introduced into Colonel Phayre's sherbet, or that anything in point of fact was introduced but diamond dust and arsenic. I may now refer to the quantity of arsenic found. Dr. Gray states that in the two packets submitted to him—one from the tumbler itself, and the other scraped from the verandah—he found 2½ grains of arsenic. Dr. Seward, in the portion examined by him, says he found between one and two grains. (Page 61 of notes referred to). We have here therefore between three and four grains of arsenic discovered by the chemical analysts in so much of the sediment as was recovered; and how much more there may have been in the sherbet before Colonel Phayre threw some of it away, it is impossible to say. The quantity discovered, however, was more than enough to constitute a fatal dose—a fatal dose, as Dr. Gray told us, being about 2½ grains of arsenic. Another small point to which I may refer in regard to this part of the case is, that it is shown perfectly clear by Colonel Phayre's evidence that from the time he put down the glass after taking one or two sips of sherbet, until the time when he handed over the remains of the sherbet together with the sediment to Dr. Seward no one had any opportunity of tampering with that glass, of approaching it, or putting anything into it. Colonel Phayre's evidence on that point is at page 52 of the notes, and is in these terms:—"From the time that you first noticed this black sediment at the bottom of the tumbler until the time when you handed the tumbler to Dr. Seward, had any one access to that tumbler?—No one came into the room. There was only myself in the room until I gave it to Dr. Seward. No one had access to the tumbler." It is therefore clear, if Colonel Phayre is to be believed, that from the time he first took a sip of the sherbet until he handed the

remains of it to Dr. Seward, no one had access to the tumbler, and it is equally clear that the poison must have been put in before Colonel Phayre had returned from his walk, and before he took a sip or two from the sherbet he found prepared for him. The next point to which I would invite the attention of the Commission is this. Taking it to be established that arsenic and diamond dust were deposited by some one or other in Colonel Phayre's sherbet on the 9th November, what is the evidence as to the source from which these two articles were obtained? A vulgar poisoner, or one who had not the command of considerable means, would not be likely to resort to diamond dust, albeit he might be likely to resort to arsenic; and the possession of diamond dust would therefore argue the possession of considerable wealth, as well as of an intention to employ, no matter at what cost, such means as he believed would be capable of effecting his object. Now, upon the theories that have been put forward by my learned friend, either that Bhow Poonikur or those who were acting with him, or Damodhur Punt, and those acting with him were the persons by whom this dose of poison was sought to be administered, I think it is unlikely that such an expensive article as diamond dust would be resorted to by these persons. These suggestions are sufficiently improbable for other reasons to which I shall afterwards call the attention of the Commission. But there would be no improbability in a person in the position of the Gaekwar employing such an expensive ingredient as diamond dust, supposing him to have entertained the belief in its poisonous qualities which Dr. Chovers asserts to be prevalent among the natives of India. From his position he would be perfectly well able to procure either of these articles. He could easily procure arsenic, as indeed most people can in this country. I do not see myself that there is much difficulty in getting almost any quantity of arsenic that is required. We have heard recently of a man, without any apparent reason for it, buying in a shop 8lbs of arsenic, and I suppose it may be taken for granted that if a man wants to get arsenic in the bazaars of India he can get any quantity. In Baroda, however, there is a greater difficulty. My learned friend brought out the fact that in Baroda arsenic could only be obtained from the Fouzdaree, upon the special order of the Maharaja himself; and Damodhur Punt has produced an order, not from the Maharaja indeed, nor as my learned friend somewhat inaccurately said, bearing any endorsement of the Maharaja, though it does bear an endorsement in which the Maharaja's name appears, by which the Fouzdar was directed to give arsenic for the purpose of making medicine for a horse. That order is exhibit Z, and is at page 112 of the short-hand writer's notes; and the date of it is the 4th October 1874. Now Damodhur Trimbuck says that that order was written by him at the direction of the Maharaja. In the endorsement which was made by the Fouzdaree officer upon that document we find that the name of the Maharaja is introduced. The signature is, I think, Gunputrao Bulwunt, and the order is addressed to Datatria, who says that no arsenic was in point of fact issued from the Fouzdaree on that order. He says also that there would have been no difficulty in furnishing arsenic upon that document, had the person in whose favor it was drawn out come and applied for it. But Damodhur Trimbuck shows clearly why it was the arsenic was not supplied on that order. He says that Mr. Hormusjee Ardasir Wadia, who was then Fouzdar, refused to issue arsenic upon it till he had communicated with the Maharaja. Mr. Hormusjee is a gentleman of high position and reputation. He arrived in Baroda at the end of last week; he is now sitting at this table; and he has not been called on by the defence in regard to his reasons for not supplying the arsenic. I apprehend that if it had been possible to disprove Damodhur Punt's statements upon that point, Mr. Hormusjee Wadia would have been put into the witness-box. I think, therefore, that Damodhur Punt may be taken to be most materially corroborated by the document to which I have referred. I would call the attention of the Commission to this—that the endorsement, which is not the endorsement of the Maharaja, but simply the endorsement of one of the officers of the Fouzdaree department, is in these terms:

"Shrimunt Sirkar." No doubt by learned friend was somewhat misled when he stated that the Gaekwar had endorsed this order. It is not so. There is merely an endorsement in which the Gaekwar's name is mentioned. But when my learned friend says that the obvious answer the Gaekwar would make to any objection on the part of Hormusjee to deliver out arsenic upon the order in question would be, "Why, all the arsenic in the Fouzdaree is mine. Go and get it!" When my learned friend puts that argument, it would be a perfectly good one if it could be shown that the arsenic was for the purpose specified in the order—namely, medicine for a horse. But it does not apply here, as the arsenic seems to have been wanted for the purpose of poisoning Colonel Phayre. I can understand the Maharaja having no objection whatever to putting his name to a paper which was merely to warrant an order for arsenic for medicine for a horse, but he might well hesitate to put his name to an order for arsenic for a human being, and might well, as Damodhur Punt says, be anxious to get the arsenic elsewhere. My learned friend uses the argument:—"If the Gaekwar had been desirous to use poison, the last thing on earth that he would have done would have been to put his name upon the order." But he has never used that order, and I use my learned friend's argument against himself. Then again, as to the obtaining of diamond dust, my learned friend, feeling no doubt that diamond dust would be an article at the command of His Highness, sought to show that had diamond dust been required for the purpose of poisoning Colonel Phayre, nothing could have been easier than for him to have supplied some diamonds out of his stores for that purpose. Now it is no doubt true, as stated by Nanajee Vithul, that diamonds are kept in the jewel department at the Palace in considerable quantities, that jewellers' work is always going on, and that at the period to which these transactions refer a scabbard and the hilt of a sword were being encrusted with diamonds. But I think it will occur to the Native Members of the Commission, and probably to all the Members of the Commission, that when in the jewel department of a Native Court diamonds are being used for the purpose of ornamentation, a very strict account is required of the manner in which the stones are applied. For their own protection the workmen requiring these stones would be desirous that such an account should be kept; and if a stone was taken away, they would desire, as a safeguard to themselves, to see that it should be entered in some document or other. Moreover, it does not follow that because a scabbard and hilt were being encrusted, diamond chips of the small size and comparatively inexpensive quality that are alleged to have been used on this occasion would not be turned to account. It may be very well to take small chips and pound them up by some means or other; but it would be a different thing to take stones of value and pound them up and reduce them to powder for the purpose of using it for nefarious purposes. And I do not think that the mere fact of diamonds being used about this time for the purpose of ornamentation can countervail the evidence in this case, having consideration to the fact I have just suggested that a strict account of all jewels is kept in Native Courts, and that workmen employed among them would, if any were withdrawn, require an account of it. Even according to the evidence of Hemchund Futteychund, whom my learned friend put forward as a thoroughly trustworthy and credible witness, as a witness whose mistakes and errors were on the same footing as the mistakes and errors of Colonel Phayre, though what errors are alluded to on the part of Colonel Phayre I do not know—at all events, this Hemchund Futteychund, whom my learned friend put on the same level of presumable veracity as an officer in Colonel Phayre's position says he was asked about the time of the Dusserah to bring small diamonds to the Palace; and that he and other jewellers did so bring small diamonds to the Palace, albeit he says these diamonds were returned to him. We have it, therefore, perfectly clear, according to the evidence of this unimpeachable witness, that diamonds were required for some purpose or another at the Palace. That they were purchased, that they were retained, is proved not only by Damodhur Punt himself, but also by Nanajee Vithul, the head-

man in the jewel department, and by Atmaram Raghoonath, one of the principal clerks employed there. It is also perfectly certain that whatever Damodhur Punt may say in other matters, he is perfectly correct, according to Hemchund, in this statement, that small diamond chips ("bookkie") were required at the time of the Dusserah, that is at or about the 20th October. The only way the diamond chips so required at the Palace can be disposed of on the part of the defence is by the evidence of Hemchund, who swears they were returned to him. As to the value of that evidence, I shall have something to say hereafter. Here, however, we may rest assured that the diamonds likely to be employed for a purpose of this kind were sent for inspection, and (as we say) purchased at the time to which these transactions relate. We, therefore, have at all events the possession of the two ingredients found in the sherbet by persons in the service of the Maharaja during the time that Rowjee and Nursoo say the packets were delivered to them. This is shown by incontrovertible evidence. And as I am upon this point, I may, as conveniently here as at any other part of my argument, refer to the case of the Borah Nooroodeen, from whom Damodhur Punt says the arsenic was obtained, and who, my learned friend says, has not been called. My learned friend is quite entitled to the benefit of any inference he may draw from that circumstance. But there was nothing to prevent his being called by my learned friend himself if he wished to contradict Damodhur Punt's evidence on this point. In a certain view of the cross-examination by my learned friend, I might have been placed under the necessity of putting Nooroodeen into the box. If there had been a challenge whether Nooroodeen did supply this arsenic, there would not have been the slightest difficulty in getting him to give evidence. But there was no such necessity. I hear my learned friend, Mr. Branson, making a suggestion on the point, and I will meet it. He says Nooroodeen was an enemy of the Gaekwar. I do not know how that is proved. It is proved that a Borah named Nooroodeen was a complainant before the last Commission; but it is not shown that his complaint was not then redressed: and, that being so, thereisno reason to show that his hostile feelings had not disappeared. But at all events, enemy or no enemy, this much is certain that the propriety of calling Nooroodeen here as a witness had not suggested itself to my learned friend, and Damodhur Trimbuck's statement on this point remains entirely uncontradicted. The attornies for the defence have had full access to Nooroodeen and everybody else whom they wished to see in regard to this case, and no doubt they satisfied themselves as to whether it was desirable to call Nooroodeen and others. The result of their discretion is, however, that no witnesses have been called; and the Commission will, of course, draw such conclusions as it thinks just from that fact. Now, my Lord, the next point to which I would refer, having shown that there was in point of fact an administration of arsenic to Colonel Phayre on the day in question, and having shown that at all events the evidence points to the possession by servants of His Highness, under His Highness' directions, of these two articles at the time we say they were obtained by order of His Highness. It will be in the recollection of the Commission that the evidence shows that Rowjee was the person who received certain packets from Salim, and deposited the contents of one of these packets in Colonel Phayre's glass on the 9th November. It is not suggested that any one else but Rowjee put these packets into the tumbler. My learned friend, fertile in suggestions though he has shown himself to be in the course of this case, did not suggest that any other hand than that of Rowjee's was employed for the purpose of putting the arsenic and diamond dust into Colonel Phayre's tumbler; and so therefore we may take it as a fact, undisputed in the case, that Rowjee's was the hand by which this was placed in Colonel Phayre's sherbet. Now, my Lord, comes a very important class of considerations to which I beg to draw the attention of the Commission. Whose object could it be to make this attempt upon Colonel Phayre's life? Who could be interested in administering poison to him? Four classes of witnesses have been suggested as being likely or possibly concerned in the attempt, and the first class is the Residency

servants. Now my learned friend made that suggestion only to answer it. He said with perfect truth that they could have no object in administering poison to a man who was a good master, from whom they received wages, and against whom it is not shown they had any cause of complaint. I may take it, therefore, upon my learned friend's own admission, that the Residency servants were not the concoctors of this attempt for any personal reasons of their own. Then the next class of persons who it is suggested would be likely to engage in a conspiracy of this kind were Bhow Poonikur and those who were acting with him. Now, my learned friend was very hard upon Bhow Poonikur. He called him—on what grounds I fail to discover after a careful perusal of the evidence—the Gaekwar's bitterest enemy. He said he was the man who had Colonel Phayre entirely under his control; that he was a spy; and that, in all human probability, he controlled all the actions of Colonel Phayre. My Lord, the evidence shows that Bhow Poonikur was examined in this case as well as Colonel Phayre in regard to this point; and that Bhow Poonikur is, at all events in Colonel Phayre's opinion—and no evidence to the contrary has been produced—a perfectly honourable and trustworthy man. He has lived in Baroda the greater part of his life, having come here when a child; he has held various appointments, to not one of which anything discreditable could be attached. At present he is employed as agent to Mr. Hope, the Collector of Surat, in regard to a ward of the British Government named Meer Zulfukkar Ali, the son of a gentleman whom your Lordship will very well remember, the Nawab of Surat. This young gentleman has considerable estates in the Baroda territory, and Bhow Poonikur, it appears, had such confidence reposed in him that he has been employed by Mr. Hope to look after those estates. He came with a letter of introduction to Colonel Phayre from Mr. Hope; and I do not think Mr. Hope is a man who would give letters of introduction to persons he did not consider perfectly worthy of them. Bhow Poonikur has not only to look after these Baroda estates of the young ward, but he is also trusted with business by many of the sirdars and sowcars in the Baroda territory. He has the management of their affairs as well as of those of the son of Mir Jaffir Ali. He lives in Baroda; his life has been open to inspection, and not one single thing has been alleged against him, except that in representing the various interests I have enumerated he found it necessary to bring forward at Colonel Meade's Commission four cases on behalf of his employers. I cannot see anything in that to warrant the conclusion that my learned friend has drawn, that he is the Gaekwar's bitterest enemy. Surely something more than has been adduced here should have been brought forward to warrant what has been said against him. As to his influence over Colonel Phayre, that entirely exists in the imagination of my learned friend. He put the question to Colonel Phayre: "Was he not in the habit of seeing you daily?"—and Colonel Phayre admitted that he did use to come to him almost daily upon business of one kind or another. But because one man comes to see another daily, it is rather a *non sequitur* to argue that therefore he controls the actions of the person he visits. It has been alleged also that he it was who gave information to Colonel Phayre about the preparation of the khureeta of November; but there is nothing extraordinary in that, Bhow Poonikur says that he heard of it from two or three people connected with the Durbar and then mentioned it to Colonel Phayre, and it must be remembered that those sirdars and sowcars by whom he was employed would naturally know what was going on at the Gaekwar's durbars, and certainly these persons, going or coming from the Durbar, would know of any matter of importance that was being discussed. It is not surprising, therefore, that he should inform Colonel Phayre that a khureeta was in course of preparation, although his information did not enable him to go so far as to say, because he did not know, what the nature of it was. I cannot see that there could be any impropriety in telling Colonel Phayre about that khureeta, because any khureeta either to the Government of Bombay or the Government of India would have to pass through the hands of the Resident before it could be forwarded. Colonel Phayre

has already told the Commission that khureetas were to be sent to the British Resident, accompanied by an English translation, and it was his duty to forward it to the Government to which it was addressed, together with such observations of his own as he deemed it desirable to make. At page 50 of the short-hand writer's notes the Commission will find, in the cross-examination, the statement to which I have just referred. Now, surely these circumstances, which are all that can be urged against Bhow Poonikur, are a very slight foundation indeed upon which my friend would be entitled to build his sweeping assertion that Bhow Poonikur was the Gaekwar's bitterest enemy, that he controlled Colonel Phayre's actions, and that he was Colonel Phayre's spy. Hard words these, no doubt; but I do not think they will produce much effect, and I think the Commission will prefer to form their own opinion about Bhow Poonikur without accepting my learned friend's harsh and entirely unwarranted account of him. But having regard to the relations between Colonel Phayre and Bhow Poonikur, as described by the evidence, does it not occur to the Commission as ludicrously improbable that Bhow Poonikur or those acting with him—the very men who, he says, had Colonel Phayre in their hands—a puppet, the wires of which they could pull at any time—does it not seem improbable that these men should desire to see him either removed or killed? It would be to the interest of Bhow Poonikur, whether or not he was an honourable and trustworthy man, engaged in the performance of respectable duties, or whether he really was a wirepuller of the puppet, Colonel Phayre—it would be his interest, I say, and that of those associated with him, to keep him alive in Baroda rather than conspire to lay him in his grave. As for the utterly wild suggestion that Bhow Poonikur only wished a sham attempt to be made upon Colonel Phayre's life, and then step in and appear as the *Deus ex machinâ* who was to save him from the danger he appeared to be in—how does that consist with the facts proved regarding the enormous quantity of arsenic, more than enough to kill him, that was introduced into Colonel Phayre's glass? And how does it consist with the fact that Bhow Poonikur instead of rushing on to the scene in the nick of time, snatching the poisoned goblet from Colonel Phayre's uplifted hands, and dashing it to the ground, does not appear until several hours afterwards, when the sediment had been given to Dr. Seward, and then does not say a word about the affair until Colonel Phayre mentions it himself? I think the suggestion that Bhow Poonikur had anything to do with this crime is one which the Commission will dismiss from their minds. Then we come to a suggestion which my learned friend, though not putting it forward as a matter he undertook to prove, nevertheless put forward, not once but several times, to the effect that Damodhur Punt was the person whose interest it was to get rid of Colonel Phayre, and who therefore might have made the attempt to poison him. My learned friend's argument upon this point rested entirely upon an illusory basis. Damodhur Punt, says my learned friend, had been guilty of gross frauds and embezzlement of the property of his master. He, according to my learned friend, knew that Colonel Phayre was sifting everything in regard to everything about the Palace affairs, and in order to prevent Colonel Phayre from overhauling his accounts he determined to try and poison him! Now, I cannot imagine upon what information my learned friend was proceeding when he suggested that Colonel Phayre was likely to do any such thing as overhaul Damodhur Punt's accounts. It certainly does not appear from the evidence that Colonel Phayre entertained any such idea. On the contrary, as must be perfectly well known to at least four of the Members of the Commission from their own personal experience, and probably also to your Lordship and Mr. Melvill, to overhaul the Maharaja's khangee or private accounts would be entirely beyond the power of Colonel Phayre. There could be nothing in the duties devolved upon Colonel Phayre by the British Government that would entitle him to interfere with the Maharaja's private accounts, regarding which Damodhur Punt's accounts entirely related. Damodhur Punt had therefore nothing to fear from Colonel Phayre's investigations. The only investigations which
