Colonel Phayre could make would relate not to private accounts, but rather to the political relations existing between the ruler of Baroda and the British Government. Nor is there anything in the whole course of the evidence laid before this Commission to show that Colonel Phayre had even anything to do with the examination of the Gaekwar's state accounts at the time when these transactions occurred. Moreover, it is an entire assumption on the part of my learned friend to say that Damodhur Punt had been guilty either of fraud or embezzlement. No frauds or embezzlement have yet been traced to him. No doubt there is in Damodhur Punt's character ground for supposing that a man supposed to be guilty of attempting a murder would lend himself to fraud on his own behalf. But no such fraud has been pointed out. There is not the slightest evidence that anything of the kind occurred. And though my learned friend made a great point when he asked Damodhur Punt, "Have you a single piece of paper to show that you had the Maharaja's authority to expend money." And Damodhur Punt said he had not, I do not think that Damodhur Punt could be expected to have any such writing. He told us that the Maharaja was not in the habit of signing accounts, and it will be consistent with the knowledge of the Commission that the Maharaja would not be likely to sign these accounts. Damodhur Punt told us that accounts were kept in five different places, and he explains how this was. My learned friend, no doubt following English ideas on the subject, and supposing a Native Court to be the same as an English banking house, had good grounds for the suggestion he made; but according to the principles of book-keeping that prevailed in the Haveli, Damodhur Punt was perfectly right in saying that he had every means of clearing himself in the event of enquiry. He had the accounts; he produced them here, and you would see that he produced the fullest vouchers. Your Lordship and the other Members of the Commission will doubtless remember the form of the 'yads' that Damodhur Punt showed us. There was on them, first of all, a statement or memorandum by a clerk stating the particulars for which the sum of money is to be expended. Following that memorandum you have the endorsement of the Khangeewalla himself, stating that the permission of the Gaekwar has been obtained for the expenditure. Then you have the receipt of the person to whom the payment was made. You will see therefore that Damodhur Punt had in these yads the best voucher he could have had for the expenditure made through him, when he possessed the receipt of the person into whose hands the money had passed. When he spoke of five places he had doubtless this in his mind, that although it would be easy to forget a memorandum and get a receipt put upon it, yet as the payment of all these accounts passed through several hands and was recorded in several books, it would be easy to see whether the money had been expended as the *yad* professed. There was not only this yad, but an account of the yads was prepared in the treasury daily; then a monthly account or *thalibund* was prepared from the daily accounts; and again an annual statement was compiled from the monthly accounts. Any payment made would therefore have to be traced through five places, and according to the native system of book-keeping that would afford ample means, from one point of view, of discovering whether fraud or embezzlement had been practised, for in order to do so the whole of these books would have had to be falsified, and the whole establishment made parties to the attempted fraud in order to prevent it from being detected. It may be that the servants of the Gaekwar were not of so high and honorable a character as men in their position ought to be; but it seems to be rather hard, upon my learned friend's suggestion, that the whole establishment should be tainted with vice, so that amongst them all not one honest man could be found. I think therefore that the notion that fraud and embezzlement had been committed by Damodhur Punt is one that must have emanated from my learned friend's imagination. If I am right in the contention that there was no danger whatever of the private accounts of the Maharaja being overhauled by Colonel Phayre, my learned friend's theory about Damodhur Punt falls to the ground.

Damodhur Punt could only have been anxious to get rid of Colonel Phayre, because Colonel Phayre was obnoxious to his master. The evidence is that he had no acquaintance with Colonel Phayre, for although he accompanied the Maharaja on His Highness' visit to the Residency, he used to get out of the carriage at the Shriwak's Dhurumsala, and get into it again when the Maharaja returned. Although the Maharaja introduced him on one occasion to Colonel Sir Lewis Pelly shortly after his arrival here, he had no acquaintance with Colonel Phayre. He could not therefore have wished to get rid of the Resident on his own account, and my learned friend's theory upon that subject will no more hold water than his theory about Bhow Poonikur can. Now, my Lord, we come to the last person mentioned in connection with this matter whose interest it might have been to get rid of Colonel Phayre,—I mean the Maharaja himself. My learned friend has told us that in opening this case to the Commission I did not say anything in regard to the motive which His Highness might have had for wishing to poison Colonel Phayre, and my learned friend expressed the opinion, which was perfectly right, that that omission was not inadvertent. I did not certainly go into the question of motive. I was not here to conduct a prosecution. I was here to conduct an enquiry and to lay before this Commission certain evidence by which the Members of it might be able to judge whether or not there was any truth in the motives imputed to His Highness. If the evidence which I was instructed to lay before this Commission were true, that evidence would disclose in the case of the Maharaja material from which you could form a clear opinion as to the motives by which His Highness had been animated; and I think that the evidence has conclusively shown, and more particularly the evidence adduced by my learned friend, what strong motives existed in the mind of the Maharaja for desiring to get rid of Colonel Phayre. Apart from the witnesses concerned in these transactions, my learned friend has referred to documents which, I think, establish in the clearest manner how eager in his desire to get rid of Colonel Phayre His Highness was, and upon this matter I need scarcely do more than refer to the khureeta of the 2nd November 1874, put in by my learned friend, and which is marked No. 1. In that khureeta His Highness describes Colonel Phayre as his persecutor—his persecutor with a determined and strong will and purpose—and says "that he should now be made to sit in judgment upon me is, I must submit, simply unfair." In the same khureeta His Highness is made to say that "his efforts to carry on the administration according to the advice of the Viceroy would be hopeless if Colonel Phayre were to continue here as representative of the paramount power with his uncompromising bias against me and my officials." He complains also of the harassing and obnoxious treatment he was receiving at the Resident's hands. It is pretty clear therefore that although His Highness does not in this document say he has any personal enmity to Colonel Phayre, yet he had the greatest objection to his remaining here as Resident, and considered it was unfair to him that he should be retained in his position. It is difficult in a case of this kind to distinguish between a political and a personal objection. In the plea which has been put in on behalf of His Highness he states the matter in these words: "I never had, nor I have now, any personal enmity towards Colonel Phayre. It is true that I and my ministers were convinced that owing to the position taken up by Colonel Phayre during his Residency, it would be impossible satisfactorily to carry out the reforms I had instituted, and was endeavouring to complete in deference to the authoritative advice conveyed to me in the khureeta of the 25th July 1874, consequent upon the report of the Commission of 1873." When Colonel Phayre was in the witness-box not a single question was put to him—and indeed no question could be put to him—as to whether he had hampered or interfered with His Highness after the khureeta passed at the conclusion of Colonel Meade's Commission. Although I see now in this Court the three gentlemen mentioned in the khureeta, Mr. Dadabhoy Nowrojee, Mr. Bala Mungesh Wagle, and Mr. Hormusjee Ardaseer Wadia, I have not seen one of these gentlemen placed in the witness-box to corroborate the statement that Colonel Phayre was interfering with their efforts to reform

the State. I can only assume, what I apprehend to be the fact, that there was no foundation whatever for such statement on the part of His Highness. His Highness goes on to say: "This conviction was shared by all my ministers, and was strengthened by our knowledge of the severe censure which had been passed on Colonel Phayre by the Bombay Government. The removal of Colonel Phayre on the 25th November 1874 shows that our judgment was not erroneous." His Highness does not condescend to state what that severe censure is, but I presume he alludes to that mutilated Resolution of the Bombay Government passed in May 1872 which had come into his hands, nor does he say from what source he had obtained it, or how it was that his attention had been directed to it. Colonel Phayre has told us—and his statement will be believed—that a document of this kind would not be communicated to the Gaekwar in the ordinary course of business. His Highness could have nothing to do with the administration of Upper Sind; and this document would not be one that would be communicated to him, especially as it reflected upon the character of the officer who had been appointed by the very Government by which this Resolution was passed to represent British interests. It cannot be supposed that the Bombay Government would communicate to the Gaekwar a Resolution so injurious to the character of its own representative at this Court. Not being told when or how this document passed into the possession of His Highness, it is impossible to say—and in point of fact it has not been said by His Highness—whether this document was in his possession at the time the khureeta of the 2nd November was despatched, or whether it has come into his possession since the commencement of these proceedings. Certainly, if it had been communicated by the Government of Bombay to His Highness, it would not have been sent to him in the mutilated and garbled form in which it was placed in the hands of my learned friend. In a question put to Colonel Phayre by my learned friend he was asked whether this document had not been shown by Mr. Dadabhoy to Colonel Pelly. But Sir Lewis Pelly was not examined upon the point, nor has Mr. Dadabhoy Nowrojee been put in the witness-box for examination regarding this matter. It may be that this excerpt from the true Resolution may have come into the hands of His Highness through Mr. Dadabhoy; still we are not told whether at the time of the khureeta of 2nd November it was in the possession either of His Highness or Mr. Dadabhoy Nowrojee; and therefore it is impossible to say whether it could have had any effect in influencing His Highness in forming that khureeta. If it was obtained before the khureeta was passed, it certainly does afford some confirmation of the charges to which I referred yesterday, not so much in regard to having improper communications with the Residency servants, as to having improper communications with Government servants other than Residency servants; and in that way it certainly affords strong color to the truth of the statements made by the ayah, the havildar, and others, that they were retailing not merely gossip at the table, but also conveying State papers of importance. But however this may be, it is idle to suppose that either the Gaekwar or the framer of the khureeta, which my learned friend has justly described as a document admirably well composed for the purpose it was intended to serve, must have been acquainted with the existence of the Resolution before the penning of the khureeta. We are, however, thrown back upon this consideration that, whatever the opinion of the Bombay Government might have been about Colonel Phayre in May 1872, the Gaekwar and his advisers, had they possessed the sagacity with which they ought to be credited, should have known that although, in Indian *parlance*, a "wigging" had been administered to Colonel Phayre, yet the confidence in him of Government had not been shaken, because he was afterwards appointed by the same Government to a post of greater responsibility and emolument than that which he held in Upper Sind. It must occasionally happen to many men who are officials to receive censure more or less strong and expressed in merciless terms, but in this particular case we have the history of the circumstances under which this censure was passed, and it may be worth

while to allude to them. The Resolution was passed when Colonel Phayre was absent from India, and when he had had no opportunity of making an explanation. On his return to India, some six months later, having in the meanwhile heard that this Resolution against him was in existence, he asked for a copy and obtained it, and thereupon made such explanations regarding it as, I feel compelled to say, would, had they been known before, have prevented that Resolution from ever being passed. The result was that he obtained from that same Government a most complete exoneration from the censure which had been passed upon him in the Resolution of the previous May. The best proof that the exoneration was complete is, that although upon a question of policy—in regard to the justification of which your Lordship probably read in the newspapers the other day—it was not considered desirable that he should return to Sind, yet he was posted to Pahlunpore upon the same pay and emolument as he had in Sind, and was promoted thence to the distinguished post he held in Baroda.

Now, my Lord, to a sagacious mind, not fully cognisant of the whole of the circumstances of the case, the appointment of Colonel Phayre to Baroda would of itself have been proof positive that the censure was withdrawn, and if any proof were necessary that Colonel Phayre at the time of his employment at Baroda possessed in the fullest degree the confidence of the Government, it is supplied by what my learned friend elicited for us regarding the circumstances which took place at Nowsaree. There we had the marriage of His Highness to Luxmibaee. Acting under the orders of Government, Colonel Phayre was not present on this occasion, and than this circumstance nothing could have occurred more likely to excite the anger of the Gaekwar. He complained of it in a khureeta addressed to the Government of India on the 9th May 1874 as a mark of want of respect and insult to himself. Then would have been the time at which the Government could have expressed their want of confidence in Colonel Phayre. But what was the result? In spite of this bitter complaint about Colonel Phayre's conduct at the time of the marriage, the Government of India fully approved of Colonel Phayre and informed the Gaekwar he had been acting strictly in conformity with his instructions. Whatever effect therefore might seem to have been created at the first blush by the fact that there was on the records of Government the Resolution of May 1872, even if Colonel Phayre's position here had not been sufficient proof that that censure was practically withdrawn, you have the fact that in the Resolution of the Government of India I have just referred to it was intimated that Colonel Phayre had done perfectly right. The Maharaja had therefore the full assurance of Government that Colonel Phayre had done right and would be upheld in his proceedings at Baroda. Now let me in this connection direct the attention of the Commission to an important date. It was in the month of May the Maharaja was married; and on the 16th October a son was born to that marriage. It follows that the mother not having been recognised by the British Government, the son, as a matter of necessary consequence, would not be recognised; and this fact occurring on the 16th October, at a time when we find according to the evidence that the Maharaja was complaining to the Residency servants that the Sahib was practising great *zoolum*, shows pretty clearly how the mind of His Highness was working. He attributed it to Colonel Phayre that his marriage was not recognised; and he would also attribute it to him that his no doubt much-hoped-for son would not be recognised either. He had therefore the strongest impulse that could have moved an Asiatic Prince to desire the removal of a Resident who had recognised neither son nor mother. That date—the 16th October—may be regarded as very much furnishing a key to the whole of the conduct of His Highness. Now, my Lord, with this idea in his mind, I think the conduct of the Gaekwar would be comprehensible. It is tolerably clear that, whatever the desire of His Highness for reforms might be, Damodhur Punt would not be the person to whom he would apply for assistance in that respect; for he would rely in such a matter upon Mr. Dadabhoy Nowrojee, while in other matters, apart from public affairs, he would turn to his private secretary: and it is by no means

an improbable thing that, while, on the one hand, he should be, with the assistance of Mr. Dadabhoy Nowrojee, writing well-penned khureetas, he should at the same time be adopting a very different, and what to his mind would represent itself as much more safe and reliable, course together with Damodhur Punt. There is nothing improbable in that. I think that the evidence points to it clearly that, while His Highness was walking in one direction with his minister, he was walking in an entirely different direction, led, it may be, by the hand of his private secretary. In point of fact, we find that at the very time he was complaining of the Sahib's practising *zoolum* he was instructing Mr. Dadabhoy Nowrojee to prepare the khureeta of the 2nd November. Probably, to judge by the May khureeta, he did not expect to meet with any great success in his complaints in this subsequent khureeta, and that this was so appears to be tolerably clear from a passage in Colonel Phayre's evidence, to which I shall presently refer. In regard to the khureeta of the 2nd November, beside the general complaint of Colonel Phayre to which I have already referred, two particular instances are given in which his interferences are represented as entirely objectionable and unnecessary. The instances are in regard to a Sirdar named Chunderao and some Sindee cultivators. Colonel Phayre was asked by me whether the statements in regard to these two charges were true, and he said (see page 52 of the notes) that these matters were entirely untrue as they were stated in the khureeta. It might have been easy to disprove that statement, if it were possible to disprove it at all. We have Mr. Dadabhoy Nowrojee here, who had the means of justifying the statements made in that khureeta; but he has not been called, and we have had no opportunity of gaining any further information upon that statement beyond Colonel Phayre's assertion that it was unfounded. Now, my Lord, that the Gaekwar had not much belief in the effect of this khureeta is clear from the conversation between him and Colonel Phayre after it had been despatched. The conversation is at page 62 of the notes. Colonel Phayre is asked:—"Had you at any time any conversation with His Highness the Gaekwar with regard to that khureeta of the 2nd of November?—Yes, I had. Let me ask you this. All these khureetas are translated and sent to you?—All are sent through me, and copies are given for my information. When did you have your conversation with His Highness in regard to this khureeta?—The first day that he came after I received it. It was on Monday the 5th November—no, it was Thursday the 5th November. Will you tell us what the conversation was, or the substance of it?—I merely mentioned to His Highness about the khureeta, and I expressed my extreme regret to think that such a khureeta had been sent, and the conversation was to the purport that the allegations were not correct. What did the Gaekwar say in regard to that?—The Gaekwar said that it was Mr. Dadabhoy Nowrojee, his minister, who had written it, and he was responsible for it. I then explained to His Highness that the object of allowing him to select his own minister was that he himself was to be responsible for all communications made to His Excellency the Viceroy and to the Government of Bombay." We thus find that within three days after the khureeta was written the Gaekwar, so far as he possibly could, disavowed all responsibility for it. It is pretty clear therefore that he did not attach much importance to it, and did not expect much fruit to come of it. That he was right is shown by the khureeta of the 25th November 1874, in which it is shown that, though Government practically complied with his request by removing Colonel Phayre, they deemed it unnecessary to discuss with His Highness their reasons for desiring a change in the Baroda Residency. I say therefore, my Lord, that the suggestion that the Maharaja was relying upon the effect of those khureetas to obtain the removal of Colonel Phayre is entirely unsupported by evidence in the case, and is inconsistent with the inference to be drawn from that evidence. No doubt His Highness may have considered it desirable to have two strings to his bow—that Mr. Dadabhoy Nowrojee should be working for him in a straightforward and honest way, while Damodhur Punt should be working in an entirely opposite direction. But to

say that the Gaekwar was relying upon Mr. Dadabhoy Nowrojee's exertions alone, the evidence does not support. I do not think then that we need look far for motive in this case. The only person to whom motive can be ascribed is His Highness. He knew that at the time this khureeta was being sent that a progress report was being sent by Colonel Phayre, in which the steps taken in the progress of reform would be explained; and it strikes me that the khureeta was much more intended to do away with this progress report than seriously to expect the removal of Colonel Phayre. This progress report appears to bear the same date as the khureeta to which I have just referred. I say therefore that if motive is to be sought otherwise than in the acts proved, we have from the evidence supplied by the defence themselves ample proof of a motive for His Highness desiring to remove Colonel Phayre. I desire here, as in future, to refer to the conduct of His Highness as connected with the considerations I have just put before this Commission. Monday the 9th November was one of the days on which His Highness usually visited Colonel Phayre. Whether His Highness knew before reaching the Residency that an attempt had been made and failed does not conclusively appear on the evidence. It is certain, however, he knew of it as he was driving back from the Residency; and when we take into consideration, too, the hurried ride of Salim towards the city immediately after the note had been despatched to Dr. Seward, it strikes me as highly probable that Salim went, not merely to Rowjee's quarters in the camp in order to secure the destruction of any trace of the powders, but that his ride to the city was not altogether without a purpose. That he went to Rowjee's quarters is shown by the evidence of Damodhur Punt; and that he went in the direction of the city and came back is shown by the evidence of the conservancy peon and the peon Mahomed Buksh, who had been entrusted with the letter to Dr. Seward. Salim knew perfectly well that Dr. Seward had had a letter sent to him by Colonel Phayre, for the Commission will remember that when Colonel Phayre felt this taste, he, unsuspicious of poison, thought it must be the pummelo juice, and got up and tried to throw the remainder away lest he should be tempted to drink the remainder of it. It was not until he had thrown most of it away that he noticed this dark sediment and the dark fluid trickling down the glass. He thereupon wrote to Dr. Seward, giving the note to Rowjee, who was waiting outside the office as usual, and would therefore have had an opportunity of seeing what Colonel Phayre was doing inside the office. Doubtless he had seen what had taken place inside. Rowjee gave the note to Mahomed, who was intercepted on the way by Salim, who gave him a rupee to get some biscuits. That Salim took this ride is beyond dispute, not only from the evidence of the conservancy peon, who saw him going off in the direction of Rowjee's house, and also galloping to the city, and again coming back. Salim took this ride somewhere about 8 o'clock, or between 8 and 9. Colonel Phayre came in at about 7 o'clock, and it would perhaps be about half-past 7 and 8 o'clock when, after throwing the sherbet away, he sent the note to Dr. Seward. This fixes the time at which Salim took this ride in the direction of the city. Where he went to in the city it is impossible to say; what he went for it is not difficult to divine. He was at the Residency very early in the morning, early enough to be informed of what was going on. He had spoken to Rowjee; he knew that the Doctor had been sent for, and then he galloped off to the city. He had ample time to communicate to the Maharaja that something was wrong, and to tell His Highness at all events that Dr. Seward had been sent for. This he could tell him before he paid his visit to the Residency, although as a matter of fact it is difficult to say positively from the evidence whether His Highness knew or did not know before he paid his visit that the attempt had been made and failed. I at all events have not been able to find any passage that places the question beyond dispute. I do not put it upon higher grounds than this, that it is highly probable that information had been conveyed to the Maharaja before he made that visit on the morning of Monday the 9th. If this is so, we can see nothing at all wonderful in the circumstances that he preserved his equanimity on that occasion. My learned

friend has said that he did not move a muscle of his face. But when His Highness was talking to Colonel Phayre he had had ample time to compose his features and determine upon the course he should adopt. I do not know that His Highness could have taken surer means of ascertaining whether or not the poison, which at all events he may have had reason to believe had been administered to Colonel Phayre, had produced any injurious effects than the conversation he entered into with Colonel Phayre. It is quite true that Colonel Phayre in his evidence before the Commission said that he thought he had asked His Highness about his health, and thereupon a certain conversation in regard to health occurred. You will find this at page 34 of the short-hand writer's notes. Colonel Phayre says: "The Maharaja came about half-past 9, I think—his usual hour. Between the time of my giving the remains of the sherbet to Dr. Seward and the Maharaja's arrival I had received no communication from Dr. Seward. I had not mentioned my suspicions of poisoning to any one but Dr. Seward. When the Maharaja came I went out to receive him as usual, and led him into the drawing-room, and he sat down. I asked after His Highness' health, and he said he had not been very well, that there was a good deal of fever about, and that he thought he must have eaten too many of the sweetmeats usual at that time (the Dewalee). He also mentioned that he had had a slight headache and pain in his stomach, but that he was better now. The interview was not a long one." Now no doubt Colonel Phayre there points out that the conversation regarding health was commenced by himself, but in the statement made by him on the 16th November, at a time when the matter was much more fresh in his memory than it was when he gave evidence here, he said (page 38 of short-hand writer's notes) that "at about twenty minutes or half-past 9 A. M. the Maharaja paid me his usual visit. After some common-place remarks His Highness observed that the weather was not healthy, that there was a good deal of fever in the city, and that he himself had been suffering from purging and headache and fever from eating the usual Dewalee sweetmeats, but that he had recovered. I made no remarks, but it occurred to me that His Highness had led the conversation to the subject in order to elicit some remarks from me." Now it seems to me that when Colonel Phayre wrote upon the 16th November, very shortly after the facts occurred, he was more likely to be accurate as to who first broached the subject than he was when he gave his evidence here, and no doubt if Colonel Phayre's attention had been called to what he had said in his statement, he would have modified what he said originally upon the subject. But however that may be, this fact certainly remains, that a conversation turned upon Colonel Phayre's health this morning which was well calculated to elicit from him some description of his state of health. And this is certain, that on his drive home the Maharaja in a conversation with Damodhur Punt, whom he had picked up at the Dhurumsala as usual (see page 113 of short-hand writer's notes), showed that he knew of the matter then. Damodhur Punt says: "As we were driving back, the Maharaja said, 'There is a noise or a report at the Residency.' I asked, 'What for?' The Maharaja thereupon replied, 'Nursoo was in the habit of coming every day. He did not come to-day, and Rowjee made haste and put it.' I said, 'What was the cause of the haste?' The Maharaja said that 'Nursoo was in the habit of sitting outside every day, and if he saw anybody coming he used to whistle; Nursoo was not outside on guard for the purpose of whistling. That is the cause of the noise.'" It is perfectly clear that if Damodhur Punt is speaking the truth, His Highness knew on his way home that the attempt on Colonel Phayre's life had been made and failed. On the same day, later on, we find the Maharaja conversing on the subject with Nana Khanvelkar and the others at the Palace. I do not think the conversation I have just read is one that Damodhur Punt would have been very likely to have invented. It certainly is not the sort of conversation that the police, intelligent as my friend has admitted them to be, would put into his mouth. I think there is strong internal evidence that it was a conversation which actually did take place, and has been faithfully repeated to the

Commission. It is a conversation he would have noticed for his own sake as well as his master's. Doubtless the other conversation, in which Nana Khanvelkar was concerned, also took place. Were it not true, Nana Khanvelkar might have been called by my friend on the other side to disprove it, and so far as the conversation is concerned at present it stands proved by the evidence of Damodhur Punt. Taking it that the Gaekwar knew the attempt had been made on that day—and we have also this important circumstance to consider that it was notorious over the camp and city on the afternoon of the 9th that an attempt had been made to poison the Resident—then it occurs to me that, supposing His Highness knew nothing of the circumstance before the 9th November, the natural thing for him to have done would have been to get into his carriage and hasten to the Residency and congratulate Colonel Phayre upon his escape. It does not seem to me possible that if the Maharaja was entirely innocent of all knowledge of this attempt he would have acted as he did. He does nothing till Thursday, the day of his usual visit, and then speaks to Colonel Phayre about it amongst other things of little importance. He does not make any official communication to Colonel Phayre upon the subject until two days after his interview, and then he says in that communication that he had heard of the attempt from Colonel Phayre, although he does not say that he had heard for the first time from Colonel Phayre that the attempt had been made; and under all the circumstances I think it must be true, as Damodhur Punt says, that His Highness was kept informed of everything that took place. In fact, it is incredible that, being bruited abroad over camp and city as the attempt was, the news should not have reached the ears of His Highness. Even supposing that Damodhur Punt, Salim, and Yeshwuntrao were implicated in the matter, they would have communicated the discovery of this attempt to His Highness, as it was no ordinary occurrence. In this conduct of His Highness in postponing all official notice of the attempt until Saturday I find matter which, I submit to the Commission, is well worthy of consideration by the Commission in connection with the circumstances to which I have already referred as strong testimony indicative of His Highness' guilt. Well then, my Lord, let us consider what was done afterwards. Damodhur Punt, whose evidence I shall not particularly refer to because no doubt the Commission will weigh it carefully for themselves, describes how it was that the Maharaja was kept informed of what was going on at the Residency; how Rowjee was arrested and afterwards released, and arrested again, and all the rest of it. Nothing transpired to cause His Highness any anxiety until some time after Mr. Souter arrived. Then his alarms commenced. We find him going through the same revulsions of feeling in regard to Salim and Yeshwuntrao as he had done in the case of Rowjee, and on the 23rd December we find him cautioning them on no account to betray him. Now, my Lord, during the whole of the time from the 9th November till the 23rd December no doubt His Highness had the fullest opportunity of making himself acquainted with the proceedings which had been taken to discover the authors of this attempt. On the 23rd December he was informed that he himself was implicated. From then until the middle of January he remained upon the *gadee* able to control his own actions. It is then we find him giving instructions to Damodhur Punt during that interval to cause all entries, all records likely to throw light on these transactions, to disappear from his archives. It is during that time we find the clumsy attempt made to erase the name of Salim from the *roz-ki-yads*, and it is at that time we find one of the karkoons tearing up a yad in regard to the purchase of diamonds. That such instructions should be given was only natural under the circumstances, and that such instructions could not be carried out fully was rendered natural by the nature of the accounts kept. My learned friend asked Damodhur Punt why he did not destroy the entries altogether; but Damodhur Punt's answer was a natural one. He said he did not do so because the particulars were kept in five places, and because he would have had to destroy the whole record—not merely the yads, but the whole system of accounts, from the yads to the annual accounts. If a yad

disappeared from the duftur the *roz-ki-yad* would remain, and if that was destroyed the *thalibund* would have remained, and beyond that there would have been the annual account. No doubt the pouring of ink over the entries might have obliterated them, but it was done in such a clumsy way that I do not think it could have been the work of the police. It seems to me to be much more like the work of a clerk in the office who, fearing that he was giving the entries too much prominence, stopped his work of obliteration after he had obliterated only a few of them. Even clumsy as it was, however, the plan might have been successful, for but for the statements of Damodhur Punt it would have been impossible to follow up the entries. Unless he had given the clue, these accounts would have been a sealed book to those investigating them. I therefore say we have here in the evidence before the Commission ample motive to connect the Gaekwar with these charges, and ample reason to infer from his conduct that he was a party to the attempt upon the life of Colonel Phayre. This brings me to a consideration of the events on which my learned friend had so carefully and so ably commented. My learned friend says that the witnesses who have been called before the Commission ought not to be believed, and regarding each one he has given special reasons why he should not be believed. I propose to take those witnesses one after the other, and to point out the fallacy of my friend's reasoning. Minute criticism, I am sure, of the evidence of the ordinary run of natives in this country might no doubt be carried so far as to destroy their evidence altogether. I think your Lordship will bear me out when I say that no ordinary native witness would probably be found to give his evidence in such a way as to withstand the tests applied by my learned friend, although he might in the main be perfectly truthful. They have a loose way of talking, particularly in regard to dates, and in regard to details generally, and it is one of the most difficult as it is one of the most important functions performed by tribunals in this country to separate the wheat from the chaff, and learn from a general consideration of their evidence rather than a minute consideration of it whether or not they are speaking the truth. Now, I apprehend that these witnesses who speak to transactions with the Maharaja can none of them, with the exception of Damodhur Punt, be considered educated persons. You have the ayah, a couple of puttawallas, and others, all occupying a low rank in the social scale, who deposed to these circumstances, and I apprehend it is not surprising to find that they did not agree in details, although they agreed substantially. These people are not so accurate as English witnesses. Take one specimen of their evidence. My learned friend referred to it yesterday, and I will accept it as a fair sample of the looseness with which native witnesses speak as to dates. It will be familiar to the Commission how difficult it is to find a witness who can fix a date after an occurrence. They may remember the day of the week and so fix it, or it may be at the time of some native festival and then it is fixed, or they may fix it by some event in their own lives; but when they come to speak of a transaction, they generally say it is two or four days after, or five or seven days or fifteen or twenty days. They always allow themselves some sort of margin. It is unfortunate they do so. Still, want of accuracy does not I think, in general, weigh with Judges in this country as showing witnesses to be altogether unworthy of credit. Now this third visit of the ayah before the 9th November, which was referred to by my learned friend, is an instance of what I have been arguing. She says it was about twenty days or a month before she heard about the poison being given, which would make it about the 20th October. Her husband, Shaik Abdoola, fixes it by the month, and says it was about the 10th or 18th of the month Ramzan, which began on the 12th October, which would carry us to the 28th or 30th October; and Shaik Dawood fixes it at three or four days before the Dewalee, which would carry us into November. Here we have an instance of what I have just mentioned, but I hardly think that these discrepancies would be considered sufficient to justify the rejection of the evidence of these three witnesses. You have there a slight divergence, but not necessarily an untruth; on the contrary, that very divergence appears to me

to be a test of truth in this way, that it disproves the idea of the witnesses having been tutored by the police. The police must have had more than human ingenuity if they tutored these three persons to mention dates so entirely different. Another observation I may make in regard to the general character of some of these witnesses, and particularly those witnesses who were attached to the service of the Residency. I quite agree with my learned friend that it was not probable that the Residency servants wanted to take away Colonel Phayre's life. That is the opinion I have always entertained since I first read the statements of the witnesses in this case. It is very natural that they should not be desirous of putting to death the master they served, when they no doubt considered that they could render the service required by the Maharaja in a less dangerous and equally effectual way. This accounts for what Rowjee stated to the Maharaja when the matter of poison was first mentioned. He asked if this poison would take immediate effect, and was assured that it would not, but would be effective after some months. This is also a perfect explanation of what Rowjee did when he got the powders and was told to mix them together. He having an idea very likely that the white powder was arsenic, puts only a pinch of it into a third part of the diamond dust which he put into Colonel Phayre's glass. It would very likely occur to him that if Colonel Phayre were murdered at once, there would be an immediate enquiry. There would be a great disturbance; the murder would out; and then he would come to grief. It would then strike him that if he could give him only enough of this poison to make him ill so that he would have to go home, he would have done what the Maharaja wanted, and would get his guerdon all the same, while at the same time this procedure might be a slave to his conscience. Of course on this point, I am referring not merely to his not putting the whole of the arsenic in, but also to the contents of the bottle which was given to him, and which contained the physician's stuff as my learned friend termed it. Finding that a few drops exuding from the bottle produced those unpleasant blisters on his stomach, he probably thought, "dear me, if a little of this causes so much pain, it will not be safe for me to put the whole of it into Colonel Phayre's bath," and accordingly he threw away the contents of the bottle. But not only may this consideration well be borne in mind by the Members of the Commission in determining from the evidence whether these servants would not desire at once and suddenly to take away Colonel Phayre's life, but it must be remembered in regard to their readiness, which was much commented upon at the time, to accede to the Maharaja's desire that they should act as his instruments in poisoning Colonel Phayre when the proposition was made to them in the first instance. It was not until they were completely in the Maharaja's power, until he had got them under his control and had made them furnish him with information and paid them bribes, that he spoke to them of administering poison, or that they entertained the proposition. We see it in the case of all of them. It is first of all: "Give me information, take money from me"—two proceedings to which a color might easily be given on the part of the Maharaja which would be quite sufficient to ruin the men. It would have been easy for the Maharaja just to send down to Colonel Phayre when Rowjee or Nursoo brought him a paper, saying, "Look here, here is one of your servants come to me with this paper which he has taken out of your office." It would have been easy for the Maharaja to say, "These men have been apylying to me for money for the purpose of communicating information, and I have paid it to them, and I now send them to you to show that these men have in point of fact the money." Deeming the Maharaja to be an unscrupulous man, they, bearing these things in mind, must have felt they were completely in his power: and it is to be borne in mind that if they speak the truth, the method of their employment was singularly judicious. The ayah and those working with her do not appear to have known directly anything of the fact that Rowjee and Nursoo were working in their own direction on the part of the Maharaja. There is no complicity between the parties. Any one of the informants might therefore have been sacrificed without the necessity of exposing

the others. In the same way, as I have already suggested, His Highness appears to have been working through Mr. Dadabhoy Nowrojee for the public view of these transactions, so we find him working not merely through Damodhur Punt in regard to the secret conspiracy, but we find him working in regard to Rowjee and Nursoo as one class, the ayah and others in regard to another class, and Damodhur Punt, though strange to say, the head of the whole thing, is not brought into contact with any one of the servants. The strings of this conspiracy, when the machinery is worked, all operate in the same direction, yet the motive power is kept hidden in the first instance. In fact there are several hands by which the machine can be put in motion, and that I think explains many of the peculiarities of this case. I think it may be taken to account for what otherwise is a somewhat unaccountable circumstance. Colonel Phayre says on the 6th and 7th of November he suffered from the same symptoms as on the 9th. Rowjee says that on the 6th and 7th he put nothing into the sherbet. It may perfectly well be that though Rowjee had not put anything into the sherbet on these dates, some other of the Residency servants in the pay of the Maharaja had done so, and produced the effects described by Colonel Phayre. My learned friend was fain to suggest that Colonel Phayre's imagination was stimulated by his having heard or read Rowjee's statements. But that is not so. Rowjee's statement is perfectly inconsistent with Colonel Phayre having formed any idea in regard to the transactions of the 6th and 7th, for in his statement to Mr. Souter he distinctly says that after the two powders had been given to him, and he had mixed them together and put them into the sherbet two or three times, when no one was about to see him, that as a few days elapsed without anything happening, the Maharaja evidently became impatient and sent for him and the jemadar again. It is therefore clear that nothing Rowjee had said before Mr. Souter or before this Commission could have suggested to Colonel Phayre that his sherbet had been drugged on the 6th or 7th. It may be that considering the wholesale system of bribery that seems to have been adopted with the Residency servants, some other of the servants had drugged the sherbet on these two particular days. Now, my Lord, my learned friend, taking the witnesses *seriatim*, asked the Court not to believe them; and first of all, I will refer to what he said about the ayah Ameena. With regard to her, it is perfectly clear from Mr. Souter's evidence at page 175 of the short-hand writer's notes, that Mr. Souter saw the ayah before any of the police had had an interview with her. The ayah, it will be remembered, was seriously ill at the time, and her recollection of what took place when she was first examined cannot be expected to be as accurate as the recollection of Mr. Souter. In answer to the question "Do you remember examining the ayah Ameena in reference to this matter?" Mr. Souter says—"Perfectly. I first saw her on the 16th December between five and six o'clock in the afternoon. I saw her in her own room in Mr. Boevey's compound. On that first occasion she did not make a detailed statement to me, and I did not take it down on that day, because she was very ill and unfit to give a detailed statement on that occasion. She stated that she had been at the Maharaja Mulhar Rao's Palace, and also that she had received certain sums of money from him. She had high fever on at the time, and begged me to come and see her at some other time when she would give me all the details. Before I saw the ayah on this evening, to the best of my belief none of my police had seen her." Therefore it would appear to be perfectly clear from Mr. Souter's evidence that when attention was first directed to the fact of the ayah being driven by the cartman to the Havelee on some day in the month of Ramzan, and Mr. Souter proceeded to the ayah's quarters, he found her in a state of health that did not admit of her being particularly examined; and he was obliged to remain satisfied with the statement that she had been to the Maharaja's Palace and received money from His Highness. Two days after this her illness having increased, so that she had to be removed to the hospital, Mr. Souter went and took her statement marked D 2. Now, it is tolerably clear that the police supposing them to have invented what the ayah said on

the 18th, must have had almost superhuman powers. They had got to deal with a woman who was suffering from high fever, who could not be in a position to profit by their instructions, and they would have, moreover, to make her understand the details of a tale about which they themselves knew nothing, because at that time the only information the police had was that which was supplied by Dawood the cartman. Then the ayah's evidence gave a clue to much that was subsequently discovered. She was able to point to the persons who had accompanied her to or into the Palace on the occasion to which she referred, and these witnesses being examined, were found to corroborate her on every point. It has not been contended that these witnesses were not substantially speaking the truth, and they do confirm the ayah in regard to these portions of her statement. But, says my learned friend, the ayah's reference to poison was an after-thought, and he would have the Commission suppose that that after-thought was suggested by the police. Now, to consider the value of that suggestion, we have to consider the state the ayah was in. She was still very ill in hospital in a separate room; at the door of which a policeman was stationed. This policeman was not one of the heads of police but an ordinary sepoy, who must have been a person incapable of instructing the ayah on a point of this magnitude. Dr. Seward goes to see the ayah, and my learned friend makes a point regarding that visit which I was surprised to hear him make. It seems to me perfectly natural that Dr. Seward should go to see the ayah, not merely because she had been under his care before, but because she was the ayah of a friend of his, and it was natural also, considering the evidence she had given, that he should desire to see her well treated. I cannot see anything unnatural or improper in his paying that visit, and he knew that his friend Dr. Lewis would not object. When he gets there he sees the ayah, and does no more than any other physician of experience would do. He notices her condition; he does not think her physical condition is sufficient to account for her state; and it occurs to him as it would occur to any medical man, that she had something on her mind. Then, again, I find nothing at all improbable or unnatural in the woman, on being spoken to, desiring to complete her statement to Mr. Souter. That there was no connivance between Mr. Souter and Dr. Seward is clear from this, that when Mr. Souter went he knew so little of what she was going to say that he did not expect any further deposition, and took no writing materials with him. When he comes, the woman makes the statement, which was recorded by Mr. Souter on the following day, the 18th, in which she speaks of the Maharaja speaking in a guarded way about the poison. Now, my learned friend asked the Commission to compare what Mr. Souter took down from her statement on this occasion with what she had said before the Commission. I ask the Commission to do the same, and I think they will come to the conclusion that the two statements substantially agree. The words in the statement must be taken to be rather the words of Mr. Souter than those of the ayah. Mr. Souter does not profess to have literally translated them, but has simply given in his own language what he understood her to say. My learned friend says that he did not think it at all likely an ayah would use such expressions as some of those contained in the statement. No doubt "threw out a feeler" is not an exact translation of the vernacular expression used by the ayah, but it is an expression that is perfectly comprehensible and conveys the idea it is intended to convey. When the ayah is examined before the Commission she said substantially the same thing. She speaks about *choochas* or *muntras*, and you find the Maharaja speaking to her, as I have suggested he would be likely to speak, upon such a matter. Now, asking a native, at all events in the class of life to which this woman belongs, about *muntras*, charms, and so on, would be perfectly well understood, I apprehend, by every one of the Commission to be something very like "throwing out a feeler" regarding more than charming. Before this Commission she was of course examined at much greater length and much more particularly than she was examined before Mr. Souter; but she told the same story, and her statement was amply corroborated. Another point with regard to her evidence my learned friend dwelt upon was her statement that she had been threatened by the police. Now, I have no doubt, though it is some time ago that the circumstances under which that expression was used by her, they will be clearly in the recollection of the Members of the Commission. The evidence is at page 9 of the notes. My learned friend asked her—"Did either Abdool Ali or Akbar Ali say to you that the Maharaja must have said something about it?" and she answered "Yes, they threatened me and said, if anything of the kind was said, do you state it, and then I said I have stated all that I know." Now, what she said with regard to the answer translated threatened was *dham kurra*, but she went on at once to say what sort of threat it was that had been used, and I think that the true rendering of the expression should have been "they threatened me *by* saying." Whenever her attention was called to the "threatening" by the question whether Mr. Souter threatened her, she said at once "No one threatened me," and then afterwards, when asked what made her say she was threatened, she says, "I did not say so." The short-hand writer's notes were read to her, and she said, "I don't think I said so; I did not mean it." In fact, she used the expression not in the sense we would use it, but in a very much milder sense. I think, therefore, that in the circumstances of the taking of the ayah's evidence there is everything to support its substantial accuracy and nothing whatever to detract from its value in the minds of the Commission. As to the threats, they appear to have been of the mildest character. The question is put to her as to whether the Maharaja had spoken on a certain topic; but as to ill-usage or harsh treatment, nothing of the kind is mentioned by her, nor does she complain of it. Now the next witness, and one who is of course a much more important one than the ayah, to whose evidence I propose to direct my observations is Rowjee, whom the ayah mentioned in the course of her statements, so that the police had their attention directed towards him, and found out that though a peon employed at the Residency on small wages, he had been spending large sums of money in the bazaar. The police made enquiries and found there was foundation, at all events, for the story that he had been spending money in this way; and accordingly, on the 22nd of December, he was arrested. His account will be found at page 80 of the short-hand writer's notes, in which he speaks of making a statement before Mr. Souter, and the circumstances under which he made it. The correctness of that statement was confirmed by Mr. Souter. Your Lordship will remember what Sir Lewis Pelly said about Rowjee's statement. He was examined as to that, and he tells us how he and Mr. Souter, considering that there was no prospect of really discovering any clue as to who made the attempt to poison Colonel Phayre, were going to Bombay on the 23rd and were arranging to spend their Christmas holidays there. That is very good proof that so far as Ameena's statement was concerned very much importance was not attached to it in itself. But at this time Rowjee makes his statement; the proposed journey to Bombay is put off; and Sir Lewis Pelly says he would like to see the man and judge for himself. He sees the man on that day, and hears his statement, and he says the statement was substantially the same as had been given before the Commission. We have here Rowjee's statement—a statement perfectly voluntarily made and under the most natural circumstances in the world. Mr. Souter is obliged to have him arrested, as it is known he spent money in the bazaar. He says nothing to Mr. Souter upon the morning of his arrest, but he is kept under surveillance. He is in the Residency compound along with the other servants, and they say to him "We have told all about it. You had better save yourself"—a perfectly good reason to operate on the mind of a man like Rowjee. He therefore sends for a police havildar and asks to be taken to the Khan Sahib, who immediately takes him to Mr. Souter; and ultimately he makes a statement before Sir Lewis Pelly and Mr. Souter, who accordingly remain in Baroda to pursue further investigations. The statement is reduced to writing, not on the day it was apparently made but on the following day when Mr. Souter found opportunity. I may here mention that Rowjee's

statement, made to Sir Lewis Pelly and Mr. Souter, gravely implicated Nursoo his superior officer, and the jemadar was arrested the next morning as soon as he came to the Residency. That was the 23rd. I shall by and by speak of the opportunities of communication which Rowjee and Nursoo had with each other. Nursoo being apprehended on the 23rd, makes his statement, and makes it at a time when it was perfectly impossible that he could have been coached up as to what Rowjee had said, because Rowjee's statement had not then been taken in writing. Not only then was there no intercommunication between Nursoo and Rowjee, except that short interview at which Rowjee said "*Dikko baba*, I have said everything *yantuk*—everything up to my neck," but there was no one in a position to state the details of Rowjee's confession to Nursoo, inasmuch as Rowjee's confession had not then been reduced to writing. Mr. Souter, Sir Lewis Pelly, and the native policeman who had heard Rowjee's statement, on the previous day, might have had some general idea as to what the statement amounted to, but could scarcely have carried all the details in their minds. Nevertheless, as the Commission will perceive—and I shall ask the Commission to compare the statements of the two witnesses—it was perfectly impossible that the police, from the information they themselves had, could have communicated to the one what the other had said in the detail in which they must have communicated it in order to render it practicable for the one to repeat substantially what the other had stated. Nursoo does not look like a clever man, and supposing the police to have had the villainy to repeat and the cleverness to remember, point by point, the details of what Rowjee said—is it to be supposed for a moment that a man with Nursoo's dullness of intellect could so aptly learn what it is said the others had taught him? The only explanation is, I think, that both men are speaking substantially the truth. Now, there were three main points in which my learned friend impeached Rowjee's story, and the first of these points to which I would refer—for it appears to me to be one of the most important—is his story with regard to Pedro. Rowjee boldly charges Pedro with having accompanied him to the Havelee to see the Maharaja. Pedro as stoutly denies that he did so. My learned friend says Pedro is introduced as a truthful witness, and must be believed. Well, I do not know that my learned friend is entitled to say he was introduced as a truthful witness. He is introduced pretty much on the same footing as all the witnesses were introduced by me—not as being specially truthful or trustworthy. I do not think I used a single such expression in regard to him. I simply said he would prove the receipt of money from His Highness. These witnesses were not introduced by me as being special witnesses of truth, but rather as persons who had made certain statements into which the Government of India had considered it desirable an enquiry should be held. I could not vouch for their truth, and it is this Commission that must decide as to their credibility. However, Pedro has, no doubt, the advantage of coming before the Commission as an old servant of Colonel Phayre's, and so far must be taken to be a respectable man. He denies point blank that there was any truth in Rowjee's story about him. He denied that he had ever been to the Maharaja, but it is to be observed that his denial begins as soon as admission would be dangerous to himself. I do not think there is anything to be made from the fact of his being examined before Mr. Edginton in Bombay. Mr. Edginton, no doubt, fully deserves the commendation bestowed upon him. He is Mr. Souter's representative, his deputy, and he is now acting for him in Bombay; and he is, as we all know, a very capable and excellent officer. But I don't think that there is any reason to suggest that Pedro gives his evidence before Mr. Edginton under any greater advantage than he would have enjoyed if he had given his evidence before Mr. Souter. He was taken before Mr. Edginton by the direction of Mr. Souter, and by Mr. Souter's officers. He was taken before Mr. Edginton I may mention by the Khan Saheb. His denial of knowledge of these transactions, however, as I have stated, begins as soon as his admission would be fatal to him; as soon as his admission would have involved him in connection with the offence he ceases

to admit. There is therefore this to be said, that by a denial of this kind he not only saves his character with his master, which may be dear to him, but also saves himself, for the moment, from being charged with being an accomplice in these transactions. But I must say that it occurs to me as a curious thing that, long before the attempt to murder Colonel Phayre was discovered, Pedro should have been in everybody's mouth as being in high favour with the Maharaja, and as the person who at the instigation of the Maharaja had undertaken to administer poison to Colonel Phayre. His evidence is not conclusive, but it is something when you find a man's name associated not exactly with bazaar gup but talked about by the Residency servants as being in the pay of the Maharaja; and when you see this very witness mentioned by the Residency servants in their conversations one with another and with persons of their own condition and creed, who were in the habit of frequenting the Residency, as being in the pay of the Maharaja and being in such favour because he consented to poison Colonel Phayre—when you find that Pedro is associated with Rowjee—the very man who admitted that he himself had attempted to poison Colonel Phayre on the morning of the 9th of November—I think these are circumstances that merit consideration on the part of the Commission. Pedro himself shows that Rowjee was cognizant of his dealings with the Maharaja, for he says in cross-examination by my learned friend that he told Rowjee of the present which he had received from the Maharaja. Why should he have done that unless there was some link between them? At page 30 of the short-hand writer's notes we find this:—"Did you yourself ask Rowjee to go with you to the Maharaja? Answer—I did not say anything to Rowjee except as to the payment of rupees sixty?" Why should he have told Rowjee about the receipt of those sixty rupees unless there was some link binding them both together in the service of the Maharaja? It seems to me to be a very reasonable inference from that answer that Pedro knew a good deal more than, being in fear for his life, he was ready to admit. Moreover, I do not think the Commission can fail to observe that Pedro did not give his evidence without considerable reluctance. His evidence begins at page 29. He admits that Salim used to ask him to go to the Maharaja's, and that it would be well for him if he did. He says "I declined to go," and being asked as to the receipt of the rupees sixty, he says "I asked Salim to give it."

The President—Excuse me, Mr. Advocate-General. Except the ayah's statement before Mr. Souter and the examination here, is there anything on the subject of the conversations?

The Advocate-General—Nothing. It only occurs in the ayah's statement, and in her evidence given before the Commission. It was brought out in the cross-examination by my learned friend. Of course I could not ask him anything about this conversation. Your Lordship will find that they are referred to in page 7.

Mr. Branson—She first said it was Pedro and Rowjee who had told her, and then she turned round and said it was Kurrim and the other man. Then Kurrim was called and was not asked a question on the subject.

The Advocate-General—As to what my learned friend has referred to, the mistake in the ayah's remark was so palpable that I am astonished he has referred to it. But the evidence is clear here that what she was told by these people was that Pedro and Rowjee were the men who were in high favour with the Maharaja, and that when she heard that of Pedro and Rowjee, and connected it with the proposal to apply a charm to Colonel Phayre, she became alarmed and entertained suspicions that really serious attempts were being meant to take Colonel Phayre's life. As to whether Kurrim knew anything about it, of course it would have been impossible for me to put the question in examination-in-chief, and the point was not followed up in cross-examination by my learned friend, and I had therefore no opportunity of putting it in the re-examination. The principal thing is the ayah's

statement to Mr. Souter, and the examination points to this very connection of Pedro with Rowjee. We find from Rowjee that Pedro had propositions made to him by Salim which he was to carry out, and you have also to note the manner in which he gave his evidence. Instead of stating, as one would expect a man to do who had done nothing more than receive a casual present, we find Pedro saying, "I said to Salim I was going to Goa, and he brought me sixty rupees. I have deposed to the particulars in my deposition," obviously wanting to just limit himself to that deposition, and say nothing more. Now, my Lord, I submit that as far as his statement goes, I don't wish to say anything about Pedro more than is necessary. He is not here on his trial, but I submit that upon these circumstances the Commission may well doubt, and very gravely doubt, whether Pedro was telling the whole truth before them; and of that there is not much improbability, but that, as Rowjee remarks, Pedro was a person acting with him in the attempt to poison Colonel Phayre. If Pedro was to do nothing—not to be concerned in any way and to be of no use for the Maharaja—it is difficult to understand why he should have got a present of money from the Maharaja. Certainly, something would be expected of him in return for what he had received, and though the evidence is not direct in the case, there is, I think, quite enough on record before this Commission to induce this Commission to say that they are not satisfied with Pedro's evidence, and that the account he gives of himself is not sufficient. Rowjee could have had no motive to accuse Pedro; it is not suggested that they had had any quarrel; but Rowjee, having to tell his story, mentioned the name of Pedro as a circumstance just as connecting him and Nursoo and others with the same transactions.

I have discussed, my Lord, the effect which the episode in regard to Pedro may be taken to have had upon the evidence of Rowjee.

The President—Before you proceed further, there seems to be some considerable doubt from the notes whether Nursoo's statement was made on the 23rd December. Sir Lewis Pelly says that it was made on the 24th, but I have taken it down from you that Nursoo made his statement on the 23rd.

Mr. Advocate-General—It was, in point of fact, made on the 24th.

The President—Mr. Souter seems to have left it a little uncertain.

Mr. Advocate-General—It will be found at page 176, that Mr. Souter says "Nursoo was apprehended on the 23rd. I think he was apprehended on the 23rd—it may be on the 24th." The 24th would be Thursday, and that was the day on which the Maharaja paid his usual visit to the Residency. Probably Mr. Souter may be wrong in saying it was the 23rd, and Sir Lewis Pelly would be right. But Mr. Souter, as your Lordship sees, does not speak positively as to the date. He says "I *think* Nursoo was apprehended on the 23rd," and that before taking his statement he mentioned it to Sir Lewis Pelly.

The President—Sir Lewis Pelly fixes it as the 24th.

Mr. Advocate-General—Taking it to be the 24th, that will not in the slightest degree interfere with the argument I was presenting to the Commission before the adjournment, because it was not until the 24th that Rowjee's statement was reduced into writing. Whether it would be the 23rd or the 24th, there would still be the same observation, that no one would be so familiar with the details of Rowjee's statement as to be able to communicate it to Nursoo. Now, my Lord, the next episode in the evidence of Rowjee, upon which my learned friend dwelt, was the episode of the bottle, and there I venture to think that my learned friend fell into an entire error. The evidence of Damodhur Punt in regard to this bottle was that after having received from Goojaba, Nana Khanvelkër's man, a large bottle containing the physician's stuff, he poured a portion of the contents of that larger bottle into a smaller bottle of his own, and the bottle into which he so poured it was not, as my learned friend assumed, an otto-de-rose bottle, but a bottle in which uttar was kept—that is the expression that Damodhur Punt used, that is, at page 113—"This bottle

was this length (showing about a finger and a half). This bottle contained some medicine. The Maharaja had asked me to pour the medicine into another bottle—which I did. The bottle I poured the medicine into was a bottle which belonged to me and used to contain otto of roses." Now my learned friend from that jumped to the conclusion that this was one of those bottles which we all of us have seen, and which come from Turkey or Persia, which are generally ornamented with gold leaf, and which have a very slight perforation running down the centre of a solid mass of glass, into which one or two drops of the precious uttar is poured—a bottle which could not be used for the purpose for which this bottle was professedly used by the witness. Of course, it could not have been such an ornamented bottle, decorated with gold leaf and containing only a very narrow line into which one could put in but two drops; but it was a bottle simply which had contained, and which the man had used for keeping uttar in. In calling it an otto-de-rose bottle the Interpreter used rather a loose translation. The passage of which I was thinking just now is at page 129. He says: "It was a small bottle of this length (shows finger), and that I poured it into a bottle which had contained otto of roses. The word uttar was translated otto-de-rose. We know perfectly well that the uttar used in this country is not the pure otto-de-rose; not the delicate decoction, or whatever it may be, that is contained in the small bottles which my learned friend obviously had in his mind's eye at the time. In the statement he made to Mr. Richey he merely mentions uttar, which is an essential extract from the rose, and a preparation not at all as agreeable to the smell. It is perfectly certain that my learned friend's theory about this being an otto-de-rose bottle, such as is to be found in the bazaars of Constantinople or Teheran, will not hold water, because the uttar bottle that was used by Rowjee is described not only by himself, but also by Damodhur Punt in a manner which is perfectly inconsistent with my learned friend's theory. In the first place, an otto-de-rose bottle proper is a bottle which will contain only one or two drops of any liquid whatsoever, whilst this bottle was used by Rowjee to shake up one of the powders which he had prepared from the packets given to him, in water, previous to pouring it in Colonel Phayre's sherbet, an operation which could not by any possibility have been performed in an otto-de-rose bottle such as my learned friend was thinking of. I think it is at the foot of page 87 that Rowjee gives a description of the bottle. "How large was the bottle?"—he was asked—and he answers—"About the length of my finger, and about a quarter of an inch in width; it was a round bottle." Then Damodhur Punt described the bottles—the two bottles that were received by him, or at least that were in his possession—the one that he received from Goojaba, and the other which was his own—and he says that the one he received from Goojaba was about as long as that (pointing to about an inch below the forefinger), and that the other bottle, which had contained the uttar, and which used to contain a portion of the physician's stuff, was about the length of his finger.

Mr. Serjeant Ballantine—Pardon me, he said about the length of half his finger.

The Advocate-General—I think my learned friend will find that he said that the larger bottle was longer than his finger and going down to the middle of his hand, and that the smaller bottle was a little less than his finger. But whatever the size of the bottle may be—whether as long only as two or three joints of his finger—it certainly was a bottle larger than what would contain but two or three drops; otherwise the operation referred to could not have been performed with it. I will read the other report:—"It was about this length (showing from the top of his finger to the bottom of his hand). The Maharaja asked me to pour the contents of his vial into another bottle—a bottle which had contained otto-de-rose. It is a small bottle of this size (pointing to about two joints of his forefinger). I kept the bottle in my place." I am perfectly willing to take it that it was only the length of the two first joints of his forefinger; but it is perfectly certain that this small vial which the man spoke of, could not have been such a

bottle as my learned friend had in his contemplation when he was speaking about it; it was not a bottle which contained merely a small perforation in the glass into which but a drop or two could be poured, but one into which it was possible to pour not an inconsiderable portion of the medicine which the physician had prepared, and which was in the larger bottle sent to him by the hands of Goojaba. But as to what was the length of the bottle, is not a very material point. There is no doubt whatever that it was a small bottle, and there is also no doubt that it was not a bottle of the description that my learned friend suggested. It was not an otto-de-rose bottle proper such as my learned friend purchased during his passage through Egypt.

Mr. Serjeant Ballantine—I can assure you that I did not buy an otto-de-rose bottle during my passage through Egypt (laughter).

Mr. Advocate-General—Which had contained otto-de-rose, and which he had by him. It was a bottle large enough for the purpose stated by the witness; it was a round bottle, and not constructed in the way my learned friend suggested, and it was capable of containing some considerable quantity of the medicine contained in the larger bottle, handed to him by Goojaba. No purpose could have been served by pouring two drops of the physician's stuff into the bottle, nor after the exudation from that bottle would there have been anything to throw away. I take it that it was an ordinary vial—an ordinary glass bottle—a round bottle which used to contain not two fresh drops of the precious liquid, but which could be used, if evidence is true, for the purpose, as Rowjee says it was used, namely, of making the powder become dissolved in water. From a bottle of that kind, not sealed with sealing-wax, not fastened with any cork, but simply confined by a wisp of cotton, covered with a little bees-wax, there cannot be any difficulty in assuming that something would exude from it when placed where the witness says he placed it. He tied it to the string of his drawers. We saw when he was in court, the sort of way in which that garment was worn by him, and the string would be in immediate contact with his skin; and that some scar or wound existed upon the portion of his stomach which comes in immediate contact with the string of his drawers in front, was proved by Dr. Gray. Rowjee says that having tied the bottle, fastened it, in the way I have described, to the string of his pyjamas, he takes his way homewards. Now the natural effect of his walking would make this bottle sway about with his body—and, being imperfectly fastened, as it was, with bees' wax and cotton, nothing would be more likely than that some of its contents should exude on to his skin. Dr. Gray has told us, and, although my learned friend appeared to entertain some doubt,—the proposition may have been novel to him—there can be no doubt whatever that arsenic is a caustic; all the works of authority upon that subject agree in the statement, that arsenic does produce such an effect as was spoken to by Dr. Gray and the witness Rowjee, and that arsenic in suspension, as Dr. Gray has stated, would, if it escaped from a bottle of this kind and found a lodgment on the skin, be calculated to produce the blister which Rowjee spoke of. A good deal was said about this being a boil that was produced and not a blister, and that was owing to an infirmity of expression on the part of the Interpreter, of which amongst others we have had occasionally to complain. His better judgment induced him to call it a blister. There is no doubt whatever from the explanation that the witness himself gave that what he meant was a "blister," but the Interpreter followed rather the language used by my learned friend in the course of the cross-examination in putting his questions when he spoke of this as a boil. The witness spoke of it as a "blister," and if the word "blister" had been used throughout by the Interpreter, as it was used in the first instance, I think my learned friend's argument on that point would have been a good deal disposed of. Rowjee is examined in regard to this point. It will be found at page 78 he says,—"I took the bottle with me. I tucked the bottle up in my drawers, and it produced a wound or sort of swelling. Mr. Melvill—He said he put it between his strings. The Interpreter—His meaning is that he put it between the strings of his drawers and the drawers. Examination continued—

The injury was like a boil. Interpreter—I think he means a blister. Witness (asked for explanation)—It was a boil. When a man gets a burn it produces that kind of thing. The wound was here. (Showing his stomach)." Now, my Lord, if there is one thing perfectly in the knowledge of every one in this Court more than another, it is that if a man gets a burn it does not produce a boil, but a blister; and if the Interpreter had used the word *poodi*, and stuck to it throughout, it would have saved some trouble, for "boil" apparently there was none. The word "boil" was adopted by the Interpreter somewhat unfortunately, but the description given by the witness, who sustained it, was that it produced an infirmity not called by the name of "boil," but rather an injury that is really commonly known by the name of "blister."

Sir Richard Meade—"Blister" was what he said.

The Advocate General—And as to the fact that a blister may be produced by a kind of caustic Dr. Gray gave a clear opinion; he examined the man, he found the marks, and he gave his opinion on the subject to the Commission. There can be no doubt whatever, therefore, that so far as this question of the boil is concerned, Rowjee's statement is thoroughly corroborated. Now, my Lord, at the time that Dr. Gray examined the person of Rowjee, and found upon him these signs, Damodhur Punt had not been examined, and he gave a description of the contents of the bottle, of the stuff which the physician had made, and which my learned friend read from the statement made by Damodhur Punt, before Mr. Richey, on the 29th January 1875; and if that statement be true it proves this —that not only was there arsenic in the composition which the physician had made, and which was contained in the bottle brought by Goojaba.

Mr. Serjeant Ballantine—There was no arsenic in the bottle.

Mr. Advocate-General—I beg my learned friend's pardon, there was. I will read the statement made by Damodhur Punt:—"At the same time, namely, when the Resident had the open wound, the big physician's younger brother brought a bottle of poison made up by the physician, but as there were many of us present, he did not give it that time, and he may also have wanted something for it. In the evening one day, when Colonel Phayre had the boil on his forehead, the Maharaja told me to get some blister flies." Those are the same insects which were described by the Interpreter here as large ants. Whether it is a blister fly or large ant I cannot say; but the same word, *Muckaria*, has been used by the witness both before Mr. Richey and before the Commission:—"To send to the younger brother of the big physician. He told me to send through the Fouzdaree and have the Wagrees sent to catch some flies and taken to the physician. I told Narrayen Rao Wakusker, who is in the Fouzdaree, accordingly. The next morning the Maharaja told Hariba, in my presence, that the physician's younger brother wanted some snakes to make medicine. The snake-man came to me two or three days after saying he had the snakes that had been ordered, and I told him to take them to Hariba and take his order before going with them to the physician. Narrayen Rao brought the blister flies then taken by the Wagrees and showed them to me, and the next day Goojaba, a servant of Nana Khanvelkur, came and showed me some blister flies of the same kind, and I told him to take them to the physician's brother and submit them for his approval. About the same time the Maharaja told me that the physician's younger brother wanted the urine of a black horse, and I gave orders to Bapoojee, the Kamdar of the Khas Paga, to take some urine accordingly to the physician's brother. At the same time some arsenic was given from the Fouzdaree, but not through me. I don't know how much was given. Had I known of its being given I would not have got some more from the Borah. Some days after the supply *of these articles* the physician's brother brought the bottle, as above stated, not getting what he wanted for it. The Maharaja wanted the stuff, but did not want to give what the man demanded, so suggested to Nana Khanvelkur to get some of the contents of the bottle, and a day or two after, about 9 o'clock at night, Goojaba came to me with the bottle which the physician had made, and told me that he had taken it to the Maharaja, and

that he had been ordered to bring it to me, and that I was to take some out of the bottle, and keep it till the next day, and then give it to Salim." That is the portion of Damodhur Punt's evidence taken before Mr. Richey, to which my learned friend referred as showing what the ingredients of the physician's stuff were. And according to Damodhur Punt—and here he most distinctly says so—that in addition to the blister flies, and the snakes, and the rest of the things of which this stuff was prepared, arsenic brought from the Fouzdaree is included. I think, therefore, that upon that statement—a statement referred to by my learned friend—I have a right to say that the evidence is that arsenic was one of the component parts of this horrible stuff which the physician is alleged to have made. And taking it, as Dr. Gray has told us, that arsenic itself is a caustic, and that arsenic in suspension in water would, if the water in which it was suspended found a lodgment upon the skin, cause a blister to follow—especially when we find that arsenic is connected, as it is in this instance, with other articles of an irritant character—blister flies, large ants or whatever they may be—and the venom of snakes—to say nothing of the other articles, with the qualities of which I have not the slightest acquaintance—that would certainly appear to be sufficient to produce the effects which Rowjee says were caused by the exudation of the contents of the bottle on the skin of his stomach. What these *makharyas* are I cannot profess to say. The translation is twofold—Mr. Nowrojee Furdoonjee translated them as large ants: they were translated before Mr. Richey as blister flies. I suppose it can be taken that they are articles which bear some resemblance to that article popularly named Spanish fly, or cantharidis, and that they would be likely to produce the ascertained effect on the stomach of Rowjee which he has described. I have already referred to the fact of Rowjee, probably as my learned friend suggested, not desiring to give anything to Colonel Phayre that should produce an immediate effect, and this is a strong confirmation of that theory of my learned friend which I entirely adopt. He found that the slight exudation from this bottle produced the effect upon his stomach which he has described, causing a considerably large blister, and he said to himself, "Dear me, if I put the whole of this, as am directed, in Colonel Phayre's bathing water, the effect upon him may be expected to be corresponding to the additional quantity to which he may be subjected, and there will at once be an enquiry, and I may get into trouble." And consequently, instead of pouring the contents of the bottle into the bathing water, he threw them away. No doubt he told Nursoo, as he says, that he poured it into the bathing water. It is not surprising that he should have done that, as Nursoo would have reported him to the Maharaja on the next visit, for not paying attention to the orders he had received. There cannot be the slightest doubt, I think, upon the evidence, that Rowjee and Nursoo took advantage of the accidental application of the collodion plaster to Colonel Phayre's boil to make up the story they did, that the arsenic had been put in it, which, having been applied, burnt Colonel Phayre and caused him to take it off. They seem to have taken advantage of what Colonel Phayre told us was the effect of this application of collodion, causing him to remove the plaster, which he did with considerable difficulty, and causing the boil to present an appearance of considerable irritation. No doubt that would be a circumstance that would be noticed, and which would be reported, and it would be seized upon by these men in order to satisfy the Maharaja that they had been obeying his orders, and done, in point of fact, something to Colonel Phayre which by reason of the strength of the medicine applied, at once attracted his attention and caused him to remove the plaster. I think, taking what Colonel Phayre said about removing the collodion which he had applied to his head, in connection with the instructions given to Rowjee to administer to him through the medium of his bathing water, or otherwise, this physician's stuff, the stories made up will read well together and the one will very well explain the other. Damodhur Punt, as the Commission will remember, mentions Rowjee's having told the Maharaja about this, and, in the statement made to Mr. Richey, Damodhur Punt says that at the time Colonel Phayre had this sore, as he calls it, on his fore-

head, I heard "Salim talking to the Maharaja in the picture room, and say that Colonel Phayre had felt it burning, and torn it off, and that that was because Rowjee had doctored the plaster." Now, it is very difficult indeed to conceive how Damodhur Punt could have invented this story as to Colonel Phayre's having felt the plaster burn, unless he had had the information from the persons from whom he professed to have had it. He could not have heard anything about Dr. Seward's having prescribed collodion, or that Colonel Phayre had rashly used it himself, instead of waiting for Dr. Seward to come and dress the boil; and unless it is true that this representation was made by Rowjee to Salim as to what he had done in regard to the boil and in Damodhur Punt's presence, it is very difficult indeed to understand how Damodhur Punt could have got hold of this story. The passage to which I have referred will be found at page 171 of the short-hand writer's report. As regards the bottle and the boil, therefore, I think that Rowjee's evidence, instead of being in the slightest degree invalidated by the argument of my learned friend, comes out of the ordeal perfectly satisfactory. The date of the giving of the bottle appears to be fixed by the time at which the boil existed. The purpose for which the bottle was given is illustrated by what Damodhur Punt says of the report made by Rowjee through Salim to the Maharaja as to what he had done with regard to the boil, and unless it is to be supposed that the police were in the confidence of Dr. Seward and of Colonel Phayre with regard to the treatment of the boil, it is difficult to understand how they could have suggested to Damodhur Punt the story which he told not only before Mr. Richey in the passage to which I have referred, but also before the Commission, as will be found at pages 128 and 129 of the short-hand writer's notes. Then, my Lord, another episode in regard to Rowjee upon which my learned friend dwelt strongly, was the episode of the belt. Now, no doubt, that was a subject in regard to which there was an opening for my learned friend, and an opening of which he availed himself; but it was an opening of which he could take full advantage only by introducing into the conspiracy, as an active agent, Mr. Souter. I have already referred to that part of my learned friend's argument, and shown what reasons there are, *a priori*, for believing it to be perfectly impossible that Mr. Souter should have taken that part in the transaction which my learned friend suggests. And when we look at the history of the transactions as recorded in the evidence, it appears to me so utterly unnecessary for my learned friend to have framed that theory, that I cannot forbear expressing my surprise that he should have done so. What is the transaction? Akbar Ali, an experienced officer, knowing that Rowjee had kept the powders which he had put from time to time in Colonel Phayre's sherbet in his belt—having heard that from Rowjee—wishes to examine it. He says to Rowjee—"What has become of your belt?" He naturally would wish to look at the belt, either for the purpose of seeing in what part of it the powders had been kept, and for the purpose of seeing also whether from the packets of powder anything had escaped of which a trace could be found in the belt. To suppose that on receiving this information from Rowjee as to the receptacle in which the powders were placed, he all at once formed the idea of introducing a packet of arsenic into the belt, is to suppose him guilty of an act of the most shameless infamy—a supposition for which the previous character of Akbar Ali affords no justification, and a supposition also, which, from the circumstances under which the examination of the belt occurred, is entirely inadmissible. What was there to make Akbar Ali believe that Mr. Souter would go away into the dressing-room to dress for breakfast at the time the belt was brought back? The Commission will remember how it all happened. Raojee said "I used to keep it in my belt." Akbar Ali says, "What has become of your belt?" Rowjee replies that it has been given to Bhooder. Akbar Ali does not accompany any one to get the belt, but sends a by-standing policeman to go and call Bhooder Nursey. He fetches him, and Bhooder comes with the belt on him. It cannot be supposed that the police messenger who is sent to call Bhooder could have put this packet into the belt, for it is

suggested to be the work of Akbar Ali. The order is given to get the belt while Mr. Souter is in the room, and he probably supposes naturally, that nothing much would come of it, that the powders had been made away with, and that there was very little chance of finding any stray arsenic powder in the belt, and as it was between eight and nine o'clock, he goes into the adjoining room to dress for breakfast. Mr. Souter told my learned friend, just before he began his address, that there was no reason for his not remaining in the room, but that it was near breakfast time, and he went to dress. His dressing-room was immediately adjoining the present dining-room of the Residency, where he and his officers were then carrying on their enquiries, a chick only separating one room from the other. He went to dress; and while he was dressing there, and about ten or fifteen minutes after the belt had been sent for, the belt was brought and the examination began. Akbar Ali examined the belt. He finds what has been called the slide in it through which a sword or a truncheon, as the case might be, could be passed, but finds no packet immediately apparent in this belt, and he asks Rowjee where the packet was in which these powders used to be kept; Rowjee immediately points to the secret pocket which was shown to the Commission the other day. Akbar Ali introduces his fingers, until he comes in contact with a substance; that substance proves to be paper. Naturally the idea strikes him that possibly one of these packets still remains in the belt, but of this he at that time knows nothing; so he breaks open the threads at the bottom, when the packet of paper is disclosed. He summons Mr. Souter, who comes and find that portions of the threads have been torn by the police, takes out the paper in that pocket, a paper which contained not only arsenic, but arsenic possessing precisely the same physical characteristics as the arsenic introduced into Colonel Phayre's tumbler. I cannot conceive anything more simple than that story. Mr. Souter attached no importance apparently to the examination of the belt, not expecting that anything would come of it—not supposing that at that distance of time anything would be found in it,—supposing naturally enough that Rowjee would have taken good pains on the 9th to have got rid of all suspicious articles he might have had about him. Now, surely, if there was nothing in the character of the police to protect them against the supposition that they would put the packet there, as they are suggested to have done here, and if it were not denied by Abkar Ali on oath that he had anything to do with it, it is really giving the police credit for an amount of sagacity almost superhuman, not only that they should have conceived the idea of putting the arsenic in the belt, but that they should have been so careful as to the arsenic that they procured, that it should have presented under chemical analysis exactly the same characteristics as the arsenic found in Colonel Phayre's tumbler. A policeman, supposing him to be the abandoned villain my learned friend would suppose him to be, might perhaps think of putting some arsenic in a place of this kind, but would he think that the microscope would detect him if he did not produce arsenic precisely of the same character as that used in the perpetration of the offence under investigation? That I do not suppose my learned friend would admit would be a likely thing for him to do. In fact, it is a thing so improbable as to render it perfectly incredible. It is much more probable—it is supported by the evidence and by the character of the witnesses—that instead of this being a nefarious conspiracy, as my learned friend suggested, that it was a most simple discovery arising out of the carelessness of one of the principal parties concerned, in having left this packet of arsenic which had remained over from the quantity originally supplied to him, in the belt. The belt was taken from him on the 9th November; the belt does not go into his possession again; from the 9th it is handed over to Bhooder Nursey, who certainly had no suspicions as to its contents; it is only by chance that it is sent for, not with the expectation of making any great discovery; it is examined, but when it is examined, this is found to exist, and the Police Inspector, Akbar Ali, did no more than his duty. I am sure the Commission will consider, in stopping the investigation, as soon as

he found there was something in the belt, in sending for his chief in order that it might be examined in his presence. Abdool Ali and Gujanund were also present at the time, and they have both been cross-examined by my learned friend, but not a single question was put to them on this point, although an imputation of a most grave kind has been made upon them. They were present and taking part in the examination of this belt.

Mr. Serjeant Ballantine—You put no questions to them on the subject.

The Advocate-General—And it was no part of my case to clear them from an imputation which I could not think would have been made. I think therefore that the Commission will come to the conclusion that the finding of this poison in the belt of Rowjee is very strong confirmatory evidence of the truth of his story in this case. My learned friend has referred to Rowjee's statement given before Mr. Souter, and to Rowjee's evidence here as containing contradictions. I think my theory shows that there is no contradiction at all. The presence of this paper—this packet of arsenic—in the belt, was a matter occasioned purely by Rowjee's forgetfulness upon the point. My learned friend read the statement Rowjee made to Mr. Souter, in which he said in the first instance before the belt was produced,—"A few days after this the jemadar gave me two powders, and told me that equal parts of each should be administered for two or three days, and in such quantity as to consume the whole in that time. This had also been carefully explained to me by Yeshwuntrao and Salim in the presence of the Maharaja. I did not commence to administer the powders for two or three days, as no favorable opportunity presented itself for so doing." And then further on he says, "The packet of poison which the jemadar first gave me I made into small doses as directed, and kept the powder in the secret pocket of my cross-belt. The powder taken from the secret pocket of my cross-belt this morning (25th December 1874) is one of the powders made up from the packet given to me by the jemadar, and I used always to keep the powders in the same place." It seems to me that if this belt episode was, to use a common expression, a "plant" on the part of the police, what they would have found in Rowjee's belt would have been, not pure arsenic, but arsenic and diamond dust, because what Rowjee was told to do was to "take equal parts of each" and administer the powders. If this was a police plant, surely the intelligent policeman who could be guilty of an act of the kind would not have procured arsenic only, but arsenic and diamond dust. He would say, "Oh, yes, the man said he would administer the powders, taking equal parts; so let arsenic and diamond dust be mixed that they may be found in his belt"—not pure arsenic, because he would thereby run a risk of being found out. That, however, not having been resorted to, proves that this is not a police plant, but a true story as to the finding of the arsenic. When the witness is asked whether the powder taken from his secret pocket is one of those given to him by the jemadar, he says it is; but he does not say that it is one of the packets made up of a combination of diamond dust and arsenic, but he says: "It is one of the packets made up from the packets given to me by the jemadar," and he explains when he is examined before the Commission, how that packet was made, and he follows the theory which my learned friend adopts, and which I also adopt, that he did not wish to poison his master, but knowing or believing the white power, from the effects experienced by himself, was very deleterious, he only put in one pinch out of the white packet into the others; he did not put in the whole of it, but merely a pinch, keeping the other back; so that would account for the remnant of the arsenic being found in his belt; and it was there found under such circumstances as to be entirely denuded of suspicion, and to be incapable of bearing the construction put upon them by my learned friend. I think a careful review of the whole of the circumstances connected with the finding of this powder in the belt will go far to satisfy the Commission that Rowjee was speaking the truth in regard to this point. There was one other point in Rowjee's evidence on which my learned friend relied and that was this that when he was examined by Colonel Phayre on the 9th or 10th of November or at a later date—I am

not quite certain as to the date—he charged Faizoo with being the person concerned in this attempt. No doubt that was a base and false charge so far as the events of the 9th of November were concerned, but he has given a reason which I think will be considered satisfactory as a *reason*, to the Commission, although I think it will not be satisfactory to them in any view they may form in regard to Rowjee's moral character. Faizoo was a man who was charged, not by Rowjee only, but by all the servants, and they had apparently good reason for doing so, because the Commission will not fail to remember that Faizoo was a man who was practically in the pay of the Durbar. Faizoo had a little son, who was enrolled in His Highness' service as a sowar, and that he received the pay of the appointment. He was a child when he got the appointment, and at this very time he was very little more than a child, being only about sixteen years of age. There can be no doubt, therefore, that he is practically in the Gaekwar's service, or that the appointment of the son was practically the means of making some payment to the father. You have it also stated—with what truth I do not care to enquire—but it is stated by these servants that Faizoo was a man who had been previously charged with improprieties of conduct in regard to various matters, to have been concerned in plots, to have had a hand in *khutput* and intrigues, that he had a son in the service of the Maharaja, and he was, therefore, a man whom the other servants under the circumstances fixed upon as a scape-goat. Faizoo tells us that during an interval of non-employment at the Residency, he had himself been in the service of the Maharaja, and that was an additional reason why it was supposed that suspicion would readily and unquestionably fall upon him. It was a gross untruth on the part of Rowjee to say that he suspected Faizoo in regard to the transactions of the 9th of November, but it is unquestionably also obvious that he had good reason to suppose it would be a device likely to be successful—and he was in point of facts successful—in diverting suspicion from himself. I don't defend his conduct—God forbid that I should—but it was a natural course for a man of Rowjee's character, and concerned as he was in these transactions, to adopt. Now, those were the points in Rowjee's evidence to which my learned friend especially referred as showing that he ought not to be believed. I think that I have given good reasons to the Commission for holding that not one of those objections will be found to be sustainable upon clear investigation. They do not go to show that Rowjee is a man of high character, but they do not invalidate the general truth of his testimony; they are perfectly consistent with the account that he gives of himself, and with the account he gives of the transactions in which he took so important a part; and unless he is to be disbelieved altogether by the Commission, I say that there is nothing in any one of those objections which deters the Commission from holding that in regard to these transactions with the Maharaja he has spoken substantially the truth.

Twentieth day, Thursday, March 18.

The Advocate-General continued his address to the Commission as follows:—I now come to the evidence of Nursoo, and in regard to that witness as with regard to the other witnesses, I put the same question as I have put already to the Commission,—what cause has he shown that he should not be believed by you? My learned friend has said that Nursoo was an unnecessary witness, and was only brought into the case to corroborate Rowjee, and that as far as any services he could have rendered to carry out the schemes with which he is alleged to have been entrusted, he might as well have been left out altogether. I think, however, that the Commission will see upon a consideration of the whole evidence that Nursoo was not only a necessary, but an indispensable, person to be drawn into this conspiracy. His assistance was necessary, not only in regard to the matter of the poisoning, but also in regard to the other matters which are the subject of the enquiry here. He lived in the city, and used to go to the

Residency in the morning. His agency was therefore of importance for the purpose of conveying from the Residency to the Palace those news-letters which Rowjee was in the habit of transmitting from day to day. It was a natural and perfectly simple thing for Nursoo to go after his day's work to Yeshwuntrao's house in the city, and on arrival there at the house of Yeshwuntrao or Salim to deliver over those news-letters to the Maharaja's agent, whoever he might be. Another reason why his assistance was necessary was this—he was the head man, the jemadar, under whom Rowjee was employed as a havildar. Had his co-operation not been obtained, he would have been a constant and uncomfortable spy upon all that Rowjee was doing at the Residency. No doubt he would have had his attention directed to the conversations that were going on between Rowjee and the servants of the Maharaja, and would also have had his attention directed to the visits Rowjee was in the habit of paying to Colonel Phayre's office; so that he would have had a good opportunity of detecting any transaction Rowjee entered into in the matter of purloining documents. To secure him therefore became a most important object on the part of those engaged in this plot, and when we remember what the Maharaja himself is stated to have said to Damodhur Punt, we see how especially necessary it was that Nursoo should be secured. You will remember that His Highness on the morning of the 9th of November attributed the discovery of the attempt to poison Colonel Phayre to the absence of Nursoo from the Residency, for he said that Nursoo was in the habit of keeping on the watch and whistling, and he was not there on this morning, and therefore the attempt was discovered. Now it was very likely that some one on this morning might have seen Rowjee putting the powder into the glass containing the sherbet when he fancied he was secure from observation, and no doubt that idea was present to the mind of the Maharaja when he spoke of the absence of Nursoo. Surely this shows you how important it was that Nursoo should have been put on the watch in order that Rowjee might carry out his schemes, either of ransacking his master's office for papers or to act otherwise, as we have seen. It appears that on that morning Nursoo did not present himself at the Residency until 8 o'clock, and it is no small corroboration of the truth of Damodhur Punt's story that that should have been mentioned to the Maharaja, and mentioned by the Maharaja in return to the Private Secretary. That is one of the innumerable small points which, to my mind, proves that the story of Damodhur Punt could not have been a fabrication made up between him and the officers of the police, whose case has been so harshly stated by my learned friend That Nursoo was not present that morning is no after-thought of his, because it was stated in the original statement that Damodhur Punt made before Mr. Richey, and he could easily have been contradicted by the other servants if he had said on the subject that which was not true. Now, my Lord, that was one of the principal grounds—that Nursoo was an unnecessary witness introduced by the police in order to bolster up Rowjee's statements—on which it was tried to impeach the character of the police officers. It seems to me that my learned friend might have judged of Nursoo when that witness appeared in the witness-box. Nursoo did not strike me as being a man of superior intelligence; he was an old servant who had probably risen to his position at the Residency by seniority rather than by any qualities of mind, and such a person, it seems to me, would have been a most difficult pupil to learn all that has been said or suggested to him. My learned friend was also very jocose about the episode of the well. No doubt there was some considerable confusion about the story which the jemadar told before the Commission in regard to that well matter; but I may here refer the Commission to the account which he gives of the circumstance at page 92 of the shorthand writer's reports: "Since my arrest I have been under a military guard at the Residency. For a short time it was a native guard, and latterly it has been European soldiers. On the very day that my statement was made and taken down I remembered going into the garden near the Residency. I fell into a well. After a long service this had happened, and I thought I could not show

my face to any one after it. That was my fate. I had taken my meal, and after finishing it I saw a number of people near the well. I saw my fellow-servants of old standing; I said, after my long service, this is my fate. I fell into the well. I saw a number of people. My head turned, and I fell into a well." Now, my learned friend made a great point in a part of his address in urging that there was no attempt at self-destruction made by Nursoo, and that it is idle upon this statement to assume that he fell otherwise than accidentally into the well. To that suggestion I think the best answer is conveyed in the answer which Sir Lewis Pelly made to a question put to him upon the subject, in which, you will remember, he invited the Commission to see the well for themselves, and see whether such an accidental fall could have been possible. My learned friend was not willing that Sir Lewis Pelly should state particularly what took place when he saw Nursoo taken from the well, and I did not press that question; but I think it would be impossible for any man, seeing that well, the manner in which it is constructed, and the position in which it is placed, to suppose that the witness Nursoo could have accidentally fallen into it, or but that to have fallen into it must have been the result on his part of a deliberate attempt to destroy himself. That that design did exist in his mind is perfectly clear from his story, when he says that, seeing his old fellow-servants standing around near the Residency, and knowing the disgrace he had fallen into, he would rather die than face that disgrace for the future. I think that is a very strong corroboration of the truthfulness of his story. The feelings he entertained at the time were no doubt such feelings as a man of ordinary constitution of mind and heart would be likely to entertain under Nursoo's circumstances. He told his story simply; he saw that he was disgraced; and he sought to destroy himself. But, my Lord, I think there was another episode in regard to Nursoo's evidence which occurred when he stood in the witness-box, and which I think proves him to be a witness of truth. No one who was present here on the day on which Nursoo was examined could forget what took place between him and Sir Dinkur Rao at the close of his evidence. The man had made his statement, and then from the bench, from a countryman of his own—a man whom he would naturally respect from the position he held here, as well as from his whole character as expressed in his face, and his influence as denoted by the caste to which he belongs—a series of searching questions were put to Nursoo, which were in point of fact solemn adjurations as to whether he was telling the truth; and I am sure every one will remember how that appeal was made to Nursoo by one so venerable, one so worthy of respect, one so calculated to inspire confidence. The test was a most severe one—it was almost an invitation to the man in the box to retract, if he could, all that he had previously told us; it was a solemn moment most assuredly, not only for the unhappy man, but for all who heard him; and, my Lord, how was that appeal met? The story is found at page 95 of the shorthand writer's notes: Sir Dinkur Rao—It is a very serious thing to poison one. Would anybody do such a matter in the presence of ten or twelve persons?—There were not ten persons. There were two of his servants and two of ours. Was the quantity of poison used small or large, and was it administered three times?—In my life I have not given any poison. A packet was given to me, and I was told to give it to Rowjee, and I gave it to him. The arrangements as to how much to use and not lay with Rowjee. What servant said that accusations should be made against Faizoo?—No one said so. They mentioned his name in the statements, and therefore I also caused it to be written. Who mentioned his name?—Abdoola, Pedro, and the hamals—five or six persons altogether. At the first meeting the Maharaja called you a rogue. How then did he come to trust you in such a serious matter?—Rowjee, Salim, and Yeshwuntrao took me and they assured the Maharaja. Are you a Hindoo?—Yes. What is your caste?—A Telingan Camatee. Are you afraid of the police?—Why? Why should there be fear for speaking the truth? Do you yourself believe that you are guilty?—It is my bad luck. I also am concerned. If you were granted a pardon, would you in the presence of God tell the truth?—It is not because I may get a pardon that I tell the truth. Whether or not the Sirkar gives me a pardon, they are my parents. Mr. Melvill—That is not a correct interpretation. What the witness said was, "If I were offered a pardon, I would speak the truth. I am speaking the truth now. (Question repeated.) Witness—I know nothing more than this which is true." The President—Sir Dinkur Rao's question, as I understand it, was, whether if the witness were offered a pardon, he would tell a more truthful statement than he is now giving. Repeat that question. (Question repeated by Interpreter.) Witness—What was truth I have said. Beside that there is no other truth. The Sircar may kill me if they like. By Sir Dinkur Rao.—You have served a person thirty-four years, against whom you have done basely. Now, as if you were in the presence of God, state the truth. Do not be afraid whatever is in your mind state it without fear in the presence of God?—I have stated without fear what I had to say. The President (to Interpreter)—Put the question in this way—In the presence of God will you tell the truth? (Question repeated by Interpreter.) Witness—In the presence of God I have stated what was the truth. I have not stated an untruth. I have stated the truth." My Lord, it is scarcely possible to imagine a man of the class of life, of the class of mind, and of the character of the witness Nursoo, exposed to a more trying ordeal than the one I have now read to you, but, in the presence of God and on a solemn adjuration, he speaks the truth—and even when told that there was a prospect of pardon for him if he told the truth, he only replied that he had already told the truth, and that other truth there was none. There can scarcely be a greater corroboration of the truthfulness of the witness than is furnished by that which I have just read from the reporter's notes. Now, my Lord, I come to the last of the more important witnesses whom my learned friend dealt with in his address to the Commission, and that is Damodhur Punt. He was, as my learned friend has said, a man of a different stamp from the other witnesses. He was a man who was in the confidence of His Highness the Gaekwar; he held the most confidential position that it was possible for a man to find in the Gaekwar's employment. It is not suggested that there is any quarrel between Damodhur Punt and His Highness: on the contrary, it is perfectly clear that at the time the attempt to poison Colonel Phayre was made, Damodhur Punt, if possible, was higher in the favor of his master than he had ever been before, for whereas the Gaekwar had not taken him to the Residency during Colonel Phayre's time, he introduced him to Sir Lewis Pelly as his private secretary. There is, therefore, no interruption of confidence between the Maharaja and his secretary, by reason of the attempt to poison Colonel Phayre having been discovered. It has not been suggested that there has been, since the time he was introduced to Sir Lewis Pelly up to the present time, anything to disturb the cordial relations existing between Damodhur Punt and the Maharaja. Up to the time of the Maharaja's arrest there does not appear to me to be any ground whatever for supposing that the confidence existing between the two had been broken. He was arrested on the same day as his master, at the Palace, where he was discharging his ordinary duties. There could, therefore, be no reason why Damodhur Punt should invent a story to the detriment of his master, such as is described to us in the evidence. There would be more reason why he should hold his tongue rather than invent such a story, because, by holding his tongue, if the charges against his master were not proved, he would have every expectation of receiving a large reward from a grateful master. There was nothing in any part of the evidence that was then on record, at the time of His Highness' arrest, to implicate Damodhur Punt in the attempt to poison Colonel Phayre. It is a curious thing that although there were many strings to be pulled in this business, all the various persons who were to be moved were not aware that they were engaged in the same plot. Thus Damodhur Punt knew nothing about the visits to the Palace of Nursoo and Rowjee, and the only occasion on which he saw Rowjee was at Nowsaree when Ranee Jumnabaee's petition was brought to the Maharaja. So far as Damodhur Punt is concerned, the arrest he was put under at the Palace on the 13th of January was only such an arrest as the various other persons at the Palace were kept under. They were not kept in any confinement, but were simply looked after, and that by a guard of the Gaekwar's own troops. There was, therefore, nothing for

Damodhur Punt to fear—nothing to implicate him—nothing to show that he had any concern whatever in these transactions. After remaining for some days under a guard of the Gaekwar's troops in the Senaputtee's kutchery in the Palace, he was removed to the Residency, and there placed under a European guard. That there was reason for that step, we may well imagine, though those reasons probably had nothing to do with any investigation relating to this case. He remained under this guard, without any interference on the part of the police at all. He is brought one day from the European guard, under which he was confined, to a tent in the Residency compound, in order that he may be present at the time that certain papers, which had been sealed up at the Palace, might be investigated, and the seals broken before him. He is present at that investigation, but does not appear to have taken any very active part in pointing out the documents found in the packets then unsealed. The clerks employed under him were there, going through the papers, unconnected with the police. He is present, apparently, when those four cash books, or *roz-ki-yads* on which the blotches of ink had been made, are discovered. The appearance of these may have led him to suppose that something might be discovered in regard to him also, and upon that same occasion he is spoken to by one of the police officers, Gujanund Vithul, who tells him simply, that it would be better for him if he speaks the truth, if he knows anything at all about the matter. Nothing more, apparently, is said to him. He returns to his confinement under the European guard; he remains there for two days, making up his mind perhaps, and then communicates with Gujanund Vithul, saying that if he gets a pardon, he will speak the truth. He accordingly gets an offer of pardon and makes his statement, not to the police, not to Mr. Souter, not to Akbar Ali or Abdool Ali, not to Gujanund, but to Mr. Richey, the Assistant Resident, who records his deposition. I apprehend these are facts which will weigh with the Commission, in considering whether or not Damodhur Punt ought to be believed. He has told us that although he knew that Rowjee and Nursoo had been arrested, and had made their statements, he did not know what they had stated, and that, I apprehend, is a matter which may be taken as one of almost absolute certainty. Up to the time Damodhur Punt was arrested, the statements made by Nursoo and Rowjee would be most carefully guarded. These were the materials upon which His Excellency the Viceroy had to act, and it cannot be supposed for a moment that the nature of documents so important would be communicated to any one: on the contrary, it may be supposed that these documents would be most carefully guarded from inspection by all persons other than those who had a right to see them. Damodhur Punt makes his statement, and his statement is in evidence before the Commission. As I have already stated, he does not implicate Rowjee and Nursoo in regard to the visits to the Palace, because, as he says, he knew nothing about those visits, and all he does is to give evidence which most seriously implicates the Maharaja and gives it in a manner which shows that it could not possibly be the result of tutoring by the police or Damodhur Punt's own imagination. The police could not have had the slightest inkling as to the matters he speaks of, and knowing that Rowjee and Nursoo had made statements, he could not possibly have given to these statements the corroboration he has given, unless he had been speaking the truth. Let us suppose that it was a police conspiracy,—would not the first thing that would occur to the police be to say to Damodhur Punt that "Rowjee and Nursoo were in the habit of going to the Haveli, and used to say that they went in by the entrance at the back by the Nuzzer Bagh, and used to see the Maharaja there. You were about the Palace from morning to night, and you must have seen them there?" He does not describe the whole affair at all, and truly a remarkable characteristic of his statement is that, although he speaks mostly as to his own statements, and matters passing between himself and the Maharaja, he makes no attempt whatever to connect Rowjee and Nursoo with the matters then the subject of enquiry, except stating that he saw Rowjee at Nowsaree, and mentioning a packet that he had to give to Rowjee. But Nursoo he does not mention at all, and the ayah he does not mention. In point of fact, none of the other persons who visited the Palace from the Residency are mentioned by him,

so that he does not mention even that Rowjee visited the Palace to his knowledge. He only says that he heard Rowjee used to write letters almost daily to the Palace of what was going on at the Residency. It is important to notice that all he says about Rowjee is that he saw Rowjee at Nowsaree, and that he was told to give a packet to Salim to give to Rowjee, and that he did so. Now, it has been sought here to discredit the evidence of Damodhur Punt by the evidence of Hemchund Futteychund. Hemchund had made a statement to Mr. Souter, which statement he had repeated to Sir Lewis Pelly. To these officers he had declared that his statement was true, and had appended his signature to it. But when he came into the witness-box here, he was so eager to shew that he had come to unsay all that he had said previously, that it was quite painful to notice the obvious perjury he was committing. The evidence of Hemchund will be found at page 137 of the short-hand writer's notes. I may best convey an idea of his eagerness to depose against his former statement by reading the first few answers he gave: "My name is Hemchund Futteychund. I live at Baroda. I carry on business as a jeweller. I know Nanajee Vithul well. He is in the service of the Gaekwar. I have never taken any jewels to him." Mr. Inverarity repeated the question.—"Have you never taken any jewels to Nanajee Vithul?—Witness—Of what value?—Have you ever done so?—At what month or what date?—About last Dusserah.—No, I didn't take anything about last Dusserah. I never took any diamonds to Nanajee Vithul. I have not taken any diamonds to the Haveli lately. I did so about the time of the last Dusserah. Nanajee Vithul said, "Bring some diamonds." I did take some, but they were given back to me. I took them to Nanajee Vithul from our house. I never took these diamonds back to the Haveli again. I never went back with any diamonds to the Haveli. After that occasion I never took any diamonds to the Haveli. About the time of last Dusserah no diamonds were purchased from me by Nanajee Vithul. I have never received any money in payment or in part payment of diamonds from Nanajee Vithul. In the month of Kartak Macksa (corresponding to October and November) I received from Nanajee Vithul a sum of money that was due to me." He began by saying that he had never taken any diamonds at the time of the Dusserah, and then he says that he did so. In fact he is so eager to unsay what he had previously said, that he forgets to discriminate between that which he might admit without any danger, and that which he might not admit without danger to His Highness. He says, that when the diamonds were returned, he never took diamonds to the Haveli, but he goes on to say: "I know Veneyekrao Venkitish. I have taken diamonds to him at the Palace. I took them on the 7th or 8th of Assoo-vud (31st October and 1st November, 1874). Venayekrao is the brother-in-law of Nanajee Vithul. He is employed at the Gaekwar's jewelkhana. I gave these diamonds to Veneyekrao at the jewelkhana. I took them there by Venayekrao's direction. On that occasion I took two packets of diamonds to Venayekrao. These packets were not bought. The diamonds were rose diamonds." Then my learned friend, with the permission of the Commission, put to him the statement he had made before Mr. Souter, and read out the passages to him as they had been taken down by Mr. Souter from the deposition which Mr. Souter said had been taken down, and he was asked, "Did you make that statement to Mr. Souter?" He answered, "I did not. They caused me to write what they liked." "Who are they?" "I mean Gujanund Vithul." "How much of that statement that has been read to you is incorrect?" Answer, "It is all false." And although at the beginning of his evidence, after all the quibbling and shuffling to which I have just called your attention, he admited that a great part of it was true. Reliance upon the evidence of a witness of this kind is perfectly impossible. He does not discriminate between what is true and false. He boldly states that all he had stated before was false, and at the same time admits that a considerable part of it was true. Hemchund has been shown to be a man having very large dealings with His Highness—not only in made-up ornaments, but also in loose precious stones. In fact, he appears to have had his best customer in His Highness, and doubtless he had a great desire to

do him a service, if he could, even at the risk of his conscience, and he has rendered that service in the way I have described—a way which has deprived his testimony of all value. He says that all that was recorded in his statement by Gujanund was put down by himself, but that there is not a single word of truth in it. It strikes me as singular that when his deposition was read over to him before Sir Lewis Pelly, he should not have turned round and said that the police had forced him to make it, and that he wanted to be protected. Had he made such an appeal, it would have been listened to, and the result would have been a most searching enquiry, which would have been of greater service to the Maharaja than his subsequent conduct has been. I pass over the obvious falsehoods he told us about not knowing Hindoostanee. The innocent air with which he asked "What is Hindoostani? "—apparently not knowing that there was such a language at all—was astonishing, the fact being that Mr. Souter addressed him in Hindoostani at the time when he first saw him. I merely mention, *en passant*, the way in which he equivocated about the statement he had undoubtedly given before Mr. Souter. He at first said that the signature did not look like his, and then, afterwards, he admitted that it was his signature, and a variety of other matters in his evidence showed him to be a man utterly unscrupulous and incapable of distinguishing between truth and falsehood. He professed that he did not recognise Mr. Souter, although he was told to look at him in the presence of the Commission. Now the more important part of his evidence to be considered is his story about his book. He says this book was made up for him by the police. Here, again, one is called on to express extreme surprise at the extraordinary stupidity of the police. Supposing my learned friend's theory is true, can one imagine a police officer so utterly ignorant of what was plausible under these circumstances as to make such entries in Hemchund's books as Hemchund says Gujanund caused him to write? These two entries at the end of the book, as the Commission will remember, appear under date the 7th or 8th November 1874. Now, the evidence of Hemchund is that the ornaments were taken by him to the Palace, and would be entered in his *Yungud Nond*, or Book of Ornaments, taken on approval to different parties. The evidence shows that the date on which he says he took these jewels, would be about the 7th or 8th of the Dusserah—that is about the 27th October—and can any one suppose a police officer causing a man to write in his books any entry which did not correspond with the evidence that he proposed to adduce before the Court? I must say that I cannot understand a police officer causing a man to make an entry in his books which did not correspond with the statements that the police officer intended to bring forward. Yet that is what my learned friend would seek to lead the Commission to infer from Hemchund Futteychund's story. Now, the witness Hurjeewundass, who was called as an expert, showed perfectly clearly that this *Yungud Nond* had been tampered with by some one in a very serious and comprehensive way. There were five *juz* which were genuine—the former part of the original book. There was a sixth *juz*, the paper of which corresponded with the paper of the first five *juz*—from which one leaf was missing—and then came these two *juz*, the 7th and the 8th, composed of different paper, which, according to the opinion of this expert, must have been put into the book at a time subsequent to the making of the book. Now, to give colour to the man's story about the police making these entries, the Commission must suppose that the whole of the alterations from the end of the 5th *juz* were made by the police. The fifth *juz* ended with a part of an entry which was continued on the sixth *juz*, in different handwriting. This perhaps is not very important, because the witness said that he used to get anybody that was passing his shop to make entries in his books for him, and that may account for the difference in the handwriting; or, at all events, it may have occurred in this way—supposing the sixth *juz* to have been tampered with he was obliged to destroy the writing between the last page of the fifth *juz* and the sixth, and could not get the same man to continue the writing on the sixth *juz*. But, however that may be, the Commission has the fact before it that the book has been tampered with, according to the statement of Hemchund Futteychund before Mr. Souter and Sir Lewis Pelly. The story that he gives as to this tampering is contained in

page 139 of the short-hand writer's notes, but that statement is certainly not in accord with the condition of his books, and is not in accord with the story he has told us here. It is not pretended that the entries on all the pages of the last *juz* with the exception of the two entries at the end regarding the diamond chips, were not genuine. He says they are all genuine on the fifth *juz*, and they are also all genuine on the sixth *juz*, and they are also all genuine on the seventh, but there is a missing page on the sixth *juz*, which he does not attempt to account for. He says that all the following entries are perfectly true, until you get to the last ones, which he says he was compelled by Gujanund to make. Now, if his story is to hang together consistently with the evidence he has given and the evidence given in the matter before the Commission, it is perfectly clear that all the *juzes* after the fifth should have been subjected to manipulation by Gujanund Vithul, but he says that was not so, but that all the entries are genuine until we get to the last entries in question. Now it seems to be much more probable that this original story was the true one, and that the missing page was removed in order to conceal the original entry about the diamonds, and that he put down the time of the year in subsequent entries in order that he might not be without some record of his having taken these diamonds to the Palace, and that at the same time there should be nothing to show but that he took these diamonds at a time when no improper purposes could be attributed to them. Now there is only one page gone from the 6th *juz*, and the whole of the 7th *juz* is new. It is perfectly clear that either upon that page, or upon some part of the following *juz*, this transaction as to the diamonds should have been entered. Now my learned friend, in regard to the evidence of this witness, urged it strongly as a reason for believing that the police should have fabricated the two entries, that the hoondees were not mentioned by Gujanund in the statement which he drew up for Hemchund to sign. My learned friend obviously knew all about the transactions of the hoondees, from which it is reasonable to suppose that Hemchund had been in communication with those who are instructing him. These hoondees are entered as of the date of June, they bear on the face of them the following month of July, and the transaction is closed long before we come to the time of the Dusserra or Dewalee. No doubt he had a record of a transaction with one Sivchund Khooshalchund, and he says the account belongs to Nanajee Vithul with regard to some ornaments; but that transaction was closed with the hoondees. The purchase money was Rupees 7,000 and the amount of the hoondees was Rupees 7,000. But it became necessary, in order to conceal these transactions in regard to the diamonds, that Sivchund's account should be taken up again, although there were no transactions with that person subsequently to July. In order to divert attention from the transaction in regard to the diamond chips, it became necessary, as I have already said, to continue this account of Sivchund. Sivchund is a Poona man, and the mention of his name in the books would not be likely to attract attention. These payments thus sworn to by witnesses here to have been made in regard to diamond chips are entries in Hemchund's books, in account with Sivchund, notwithstanding that there was no account with Sivchund at the time. Hemchund says that the account which continued in the name of Sivchund was really the account of Nanajee Vithul. I think I have made myself perfectly clear that the transaction referring to the jewels as purchased by Nanajee Vithul from Sivchund was the cause of this account, but that this account was closed, so far as Nanajee Vithul was concerned, and there was therefore no further account in the book of Hemchund to which Sivchund was a party. It is perfectly clear, therefore, that that payment was made in regard to the diamond chips. There were two payments, one of two thousand rupees, and another which amounted to one thousand rupees. The former was really a payment of two thousand rupees, but the latter was accounted for by a hoondee for Rs. 750, and was in favor of Venayekrao Venkatesh—a transaction with which Sivchund had nothing whatever to do; it seems to be a transaction entirely for the convenience of Venayekrao. The other payment was credited to Sivchund. When were those payments made? One in December, and the

other in January, long after the attempt to poison Colonel Phayre had been discovered—long after the attention of the Maharaja and his servants had been called to the necessity of not allowing any pecuniary evidence to exist which might implicate His Highness in the plot. We have had distinctly shown by the books of Hemchund that these payments were on the dates stated, but from what funds were those payments made? Not from the private funds of Nanajee, or any other private fund, but from the State funds of His Highness the Gaekwar, the payments having been made by a carkoon in charge of the Dumala Mahal, a public officer. My learned friend says that this man Nanchund Talluckchund was not called, but having before us the admission that the payment was made, it was quite unnecessary to call him. Nanajee Vithul says he gave instructions to Nanchund to pay the money, and it was paid. Further proof would not be necessary. Nanajee was not asked a question by my learned friend as to whether he had embezzled this money, and I think it has been admitted that it was paid out of the Gaekwar's funds. Then we have Damodhur Punt's statement as to how the Rs. 3,000 paid to Hemchund was obtained. He has shown you the two entries that were made, the two *yads* that were prepared, one exhibiting a saving on the lighting account, and another exhibiting the proceeds of certain coins received as *nuzzerana*; and he says that by the order of His Highness that money was directed to be appropriated for the payment of these diamond chips. Rupees 3,600 was the aggregate of these savings, and out of that amount Rs. 3,000 was paid by Nanajee Vithul in the way I have described. The method of concealing the payments in Hemchund's books I have already described. They were said to be paid to Sivchund, although the latter had nothing whatever to do with them, and detection of this fact would have been almost impossible had it not been for the original statement made by Hemchund. Your Lordships will remember that these payments of other diamonds were ordered to be entered in the Gaekwar's books as for a Brahman feast, but the priest of the Swamee Narayen temple has been called, and he has proved that no such payment was made. I think, my Lord that after what I have stated you will agree that the books of Hemchund, so far from vouching for the truth of his story, absolutely disprove it, and that the explanations given by Damodhur Punt and Nanajee Vithul show clearly what the transactions were and the ingenious means employed to conceal them. The entry in the accounts at the Palace was easily made to disappear. It consisted of a *yad* nearly at the time the attempt to poison Colonel Phayre was discovered. There was no receipt on the face or the *yad* because no money was paid. There would, therefore, be no entry of payment in any of the ordinary books of the Palace. The record of it, so far as the Palace was concerned, existed simply in the *yad*, and when that *yad* was asked for at the time of the discovery to poison Colonel Phayre, the witness Atmaram Rughoonath, like a veteran carkoon, asks why he should give it up, and Nanajee Vithul tells him that the jewels had been returned to Hemchund Futtcychund, which of course was a natural excuse, though Atmaram evidently had his doubts upon that subject, for he told us here that he did not know whether the diamonds had really been returned or not. As to the blotted daily cash-books, it may be as well to remember that they were sealed up in the Palace on the day of the Maharaja's arrest, in the presence of Damodhur Punt, to whose department they belonged, and that no one except the military guards over them had anything to do with them until they were brought to the tent in the Residency compound, and opened in the presence of Damodhur Punt. Damodhur had made no statement at the time. It was not expected; he was asked to be present simply that he might say whether the seals were intact, and whether the documents belonged to his department. He comes and sees that the seals are intact; and you will bear in mind that when one of these obliterated documents was discovered, Gujanund Vithul went and told Mr. Souter about it. Mr. Souter comes and three more are discovered in like manner as the first. Now, it certainly is very remarkable that these documents should have been discovered in the way I have described, unless they really existed in that state

at the time they were sealed up in the Palace. They were not discovered by the police, but by the Palace carkoons who were examining them. My learned friend suggests that this obliteration was done by the police, but as I have already said, that would be a singularly clumsy device to adopt, and it was more likely to have been done by some clerk who had been told to obliterate Salim's name from the duftur, and stopped doing so when he found what a clumsy job he was making of it. Why it was desired to obliterate these entries is tolerably clear. The obliterated daily cash accounts refer to the *yads* which are in evidence as N 1, O 1, P 1, Q 1, the very first of which relates to the payment of Rs. 1,000 to Salim on the 8th June 1874, which I have already referred to as corresponding to the payment of Rs. 800 to Nursoo and Rowjee. This document, for instance, must have appeared to Damodhur Punt one that it was very desirable to get rid of. Indeed, it seems to me, my Lord, that the only reasonable explanation that can be given of these obliterated cash accounts is the one Damodhur Punt has supplied, and any other suggestion regarding them is so incredible as to be undeserving of serious attention. I have already referred to Hemchund's evidence as being evidence on the face of it utterly untrustworthy, and I think it must have been clear to all who heard him how he came to give it. He was not under the charge of the police, but lived in the city, where he was therefore accessible to the influence of any injudicious friend of His Highness to alter the statements he had previously given. It seems to me to be a matter of almost necessary inference that he, being capable of being worked upon by some injudicious friend of His Highness to come here and perjure himself, came and did so in the way you must have noticed. Now, my Lord, I have gone through the particular portions of the evidence of these four witnesses to whom my learned friend referred as supplying a reason why they should not be credited, and I think, I have answered every one of my learned friend's arguments in regard to these witnesses. It must be perfectly clear that each of the four material witnesses made one statement deliberately and completely ignorant of all knowledge of what the others had said. I call attention to the statement at page 80 of the notes where Rowjee alludes to the only communication he had with Nursoo after his arrest, and to page 91 at which Nursoo describes the interview at somewhat greater length. Akbar Ali's evidence on the point at page 106 and Gujanund's at page 164 are also worth referring to. Then, again, Sir Lewis Pelly's evidence (page 179) as to the manner in which Nursoo gave his statement ought to show conclusively to the Commission that it was given without any pressure of any kind and after considerable time for deliberation had been granted to him. It must be remembered also that Nursoo has always been under charge of a military and not a police guard. My learned friend said—and no doubt there was a certain amount of poetical justice in his complaint—that it was heard that Nursoo, who was probably the least villain among the chief witnesses, should have been the only man who was refused a pardon, but what would my learned friend have said if Nursoo had come here also to give his evidence with a pardon, of course he would have said,—why all those men have agreed to ruin the Maharaja because they know they are free from all fear of punishment. There is a great deal of force in the observations made by my learned friend as to the undesirability of having statements made before the police. In the regulation districts of India, provision is made that that shall not be done, but special cases require special procedure, and it must be remembered that this was an enquiry under special instructions from the Viceroy, who sent the police here on this special duty. There was no Magistrate before whom all these witnesses could have been taken. The Maharaja was still on the *gadee* in possession of his power, and it would have been, I won't say improper, but indelicate, had Sir Lewis Pelly undertaken the duty of hearing all depositions in the case.

The President—Was there no one on the spot exercising the powers of a magistrate.

The Advocate-General—There was the Cantonment Magistrate Dr. Seward, but he has no jurisdiction over the Residency or the City. It would have been

inconsistent with Sir Lewis Pelly's position to take any active part in the investigations, and it was in consequence of his own desire and feeling that it would not be right for him to do so that Mr. Souter was appointed to come here on special duty. Besides the general work of administration in relation to the State was quite enough to occupy the whole time both of Sir Lewis Pelly and his Assistant Mr. Richey. Now, my Lord, I apprehend, that, having regard to the fact that the person incriminated was in uncontrolled exercise of his power, and that this was an enquiry into an attempt made upon the Resident's life, it is perfectly obvious that that enquiry could not have been left to the officers engaged in the course of their political duties with His Highness or to Dr. Seward, who, besides having no jurisdiction beyond the limits of the Cantonment, was also a material witness in the case. I think, therefore, that, as far as this part of the question is concerned, the observations of my learned friend lose all their point, and no fault can be found with the special procedure in this case. My learned friend has said that in pursuing their investigations, the police really practised torture on the witnesses. I fail to find, on the record, evidence of any statement or expression which can, in the slightest degree, justify that phrase, unless we are to take it that leaving witnesses by themselves, and telling them that other witnesses had spoken the truth, was torture. There is a torture, no doubt, to which these witnesses who may have taken an active part in the conspiracy, may have been subject—but that was the torture of their own consciences, and not a torture inflicted upon them by the police; other torture there was none—the torture, as I have said, was the torture conscience could place upon men who had put themselves in such a position. In regard to the observations made by my learned friend as to the impropriety of telling one person or another who was apprehended that others who had been engaged in the same transaction had made a confession, and that therefore the persons so informed should themselves speak the truth, although, no doubt, in past years, under the decisions of the Courts in England, it was held that it was improper to tell a witness that he had better tell the truth, I think the doctrine so laid down has long ago been exploded. I do not wish to refer to any cases in England, and I have refrained from doing so throughout the case, but on this particular point I may quote the case of the Queen *versus* Jervis, which is reported in the first volume, Crown Cases, Reserved, in the new series of the Law Reports at page 96—the Commission will find there a most elaborate judgment of Mr. Justice Willes, to which I have referred, in which he holds as perfectly paradoxical the theory that to advise a person to speak the truth, and that a confession made upon that, is not perfectly good in such a case.

The President asked as to the date of the case alluded to.

The Advocate-General said that his memory was not clear upon the point, but that he thought it was in 1868 or 1869.

The President also asked the Advocate-General if he knew who the person was who told the witness to tell the truth.

The Advocate-General said that he could not remember at that moment who had said that, and he requested leave to read from Taylor's well-known work on evidence with regard to the case he had just referred to —"But when confessions have been rejected in consequence of such expressions as the following having been used:—'It will be better for you to speak the truth;' 'It is of no use for you to deny it, for there are the man and boy who will swear they saw you do it;' 'Now be cautious in the answers you give me to the questions I am going to put to you about this watch;' 'Whatever you say will be taken down and used against you;' 'Do not say anything to prejudice yourself, as what you say I shall take down, and it will be used for you or against you at your trial;' 'What you are charged with is a very heavy offence, and you must be very careful in making any statement to me, or anybody else that may tend to injure you; but anything you can say in your defence, we shall be ready to

hear, or send to assist you; in these and the like cases, it is only too apparent, that justice and common sense have been sacrificed on the shrine of mercy. Indeed, the judges themselves have of late years come to this conclusion, and after solemn discussion of the subject in the Court of Criminal Appeal, they have expressly over-ruled the last three decisions cited above, as cases which are discreditable to the law. So anxious was the Court at one time to exclude evidence of confessions, that exhortations not to tell lies, but to *speak the truth*, have been deemed likely to induce a *false* acknowledgment of guilt; and consequently, admissions made after such exhortations have more than once been rejected. But this paradoxical opinion is now happily exploded." Now, my Lord, there is nothing more shown to have taken place here. The witnesses have been severely cross-examined, but nothing more has been shown than that the witnesses were confronted one with another, and that Rowjee said to Nursoo "I have told the truth up to my neck," and that the only advice given to Damodhur Punt by Gujanund was to the effect that he should tell the truth; and so cautions, I may say, was Damodhur Punt as to the promise of pardon, that Gujanund had to show him the part of the Criminal Procedure Code which relates to the granting of pardons. I say that there is nothing whatever to justify the assumption of my learned friend that this is a police case, or that it was got up by the police or that the witnesses have been subject to intimidation. So far as the statement of the witness Ameena Ayah was concerned, and the statements of the other witnesses by whom she was corroborated, these statements related to charges which the police were not then engaged in investigating—for they were then only engaged in trying to find out who had attempted to poison Colonel Phayre, and it was not until the Gaekwar had been suspended that the charge of holding improper communications with the Residency servants was brought forward.

The Advocate-General concluded his address as follows:—My Lord, I think that upon a review of the mere circumstances under which these statements were made to the police, upon a consideration of the evidence which has been given before the Commission, and upon a comparison of that evidence so given under circumstances which allowed to the defence the fullest opportunity of cross-examination, upon a comparison of that evidence with the statements made by the witness Rowjee, I think this Commisson cannot but come to the conclusion that the witnesses examined here have substantially spoken the truth. That my learned friend's ingenuity should have found discrepancies in their evidence, I am not surprised, nor I believe, are the Members of the Commission; but that these discrepancies do not affect the main facts of the story will be abundantly clear to the Commission when they come to review the evidence. The only witness who has not adhered to his statement, is Hemchund Futtychund who has perjured himself in the face of the Commission, perjured himself under circumstances which, I think, fully justified the police in detaining the other witnesses in such a manner that they also should not be exposed to the outward influences which have obviously been brought to bear upon Hemchund Futtychund. Against the mass of the testimony brought forward here in support of the charges against His Highness the Gaekwar, not a single title of evidence has been adduced. I have in the course of my address to the Commission pointed out the numerous matters in which it should have been possible and easy for my learned friend, had he been so advised, to have produced witnesses to contradict the statements put forward by the witnesses called by me. Not one of these witnesses was produced by my learned friend, and the Commission will draw their own conclusions from that circumstance. As to Yeshwuntrao and Salim, my learned friend has stated that in the exercise of what, I am sure, was the soundest discretion, he had decided not to call them. My learned friend was not able to speak in terms of much approval of Yeshwuntrao and Salim, but when it is remembered that these two men were the confidential servants of His Highness the Gaekwar up to the time of their arrest, and that ever since their arrest they have been kept under a military guard, that they have had no communication whatever with the police, and that since the arrest of His Highness, his solicitors have been allowed the most unrestricted private communication with them, I must say it strikes me as very surprising that my learned friend has not called upon them to give their evidence,

though, as I have said, I have no doubt whatever that my learned friend has exercised the soundest discretion in not putting these men into the witness-box. There is, therefore, no testimony to oppose to that which has been marshalled against the Gaekwar, and unless the Commission should reject altogether the evidence which has been so marshalled as utterly unworthy of credit, I apprehend there can be no doubt whatever but that it will be the painful duty of Your Lordships to find these four charges against His Highness amply proved. I have no necessity to make any appeal to Your Lordships in regard to the view that you should take in this matter; it is not my province; it would not become me to do so; such is not my instruction. I will only say this, that if there is anything in the arguments which I have offered for your consideration upon the evidence which has been recorded, and if there is any truth in the evidence so recorded, then there is no room for sympathy with His Highness. The "persecuted prince," to whom my learned friend has referred so frequently disappears, and the Commission can only look upon him as a criminal worthy of condign punishment. I do not think I can make any further observations upon the case than those I have offered to you, as calmly, I trust, and as dispassionately as it was my duty to do. There are many small points which I have not introduced in my remarks, but I have deemed it right to address myself only to more important parts of the evidence, although I am aware that the consideration of these smaller points might help to show the story told by the witnesses to be true, and that the theory put forward upon the part of the defence is totally unsustainable. I thank this Commission most sincerely for the patient and courteous attention with which they have listened to what I have had to address to them, and I pray God that your deliberations may be conducted to a righteous conclusion.

C. U. AITCHISON,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

Abkaree system in Bengal.

No. 439.

FROM

H. J. REYNOLDS, Esq.,
Offg. Secretary to the Govt. of Bengal,

To

THE SECRETARY TO THE GOVT. OF INDIA.
Financial Department.

REVENUE DEPARTMENT.

Dated Calcutta, the 22nd February 1875.

SIR,

WITH reference to your letters, No. 2528 of the 18th April 1873, and No. 707 of the 29th January 1874, I am directed to submit, for the consideration and orders of His Excellency the Governor General in Council, the following papers on the subject of the Abkaree administration of the territories under the Lieutenant-Governor of Bengal:—

(1).—A Minute by the Member of the Board of Revenue in charge of the Department of Excise.

(2).—A Draft Bill to amend Act XI of 1849 and other laws relating to the Abkaree revenue.

(3).—A letter No. 438, dated the 22nd February 1875, from the Secretary to the Government of Bengal, to the Secretary to the Board of Revenue.

(4).—A Minute by the Lieutenant-Governor of Bengal on the Excise administration of the Lower Provinces, with especial reference to certain memorials submitted to the Governments of India and of Bengal on the subject.

(5).—A memorial from the Reverend J. D. Don and other Members of the Calcutta Missionary Conference, submitted to the Government of Bengal.

(6).—A memorial from the Bengal Temperance Society, submitted to the Government of Bengal.

(7).—A memorial from Raja Romanath Tagore and other inhabitants of the Bengal Presidency, submitted to the Government of India.

(8).—A memorial from Raja Kalikrishna Bahadoor and other inhabitants of the Bengal Presidency, submitted to the Government of India.

(9).—A letter from Baboo Keshub Chunder Sen to His Excellency the Viceroy and Governor General.

2. The Draft Bill submitted herewith embodies those amendments of the existing law which appear to the Lieutenant-Governor to be called for, and I am to request the approval of the Governor General in Council to the introduction of this Bill into the Bengal Legislative Council.

I have the honor to be,

SIR,

Your most obedient Servant,

H. J. REYNOLDS.

No. 1.

Minute by A. MONEY, Esq., C. B., *Member of the Board of Revenue in charge of the Department of Excise.*

THE letter from the Government of Bengal, No. 2192 of the 28th October last, desires me to report on the abkaree administration of Bengal in connection with certain petitions presented to both the Supreme and Local Governments on that subject.

2. It will be convenient first to enumerate the statements, allegations, and charges contained in those petitions. They are as follows:—

1*st*.—That drinking has of late years greatly increased, more particularly among the upper classes.

2*nd*.—That the revenue authorities have promoted the spread of intemperance by multiplying liquor shops, and by giving praise and promotion to officers who have helped to increase the excise revenue.

3*rd*.—That the adoption of the habit of drinking has been facilitated by the importation of low-priced spirits, and, as regards Calcutta, by the extension of time in the evening during which shops may be kept open.

4*th*.—That the consumption of opium and of ganja has also increased of late years.

5*th*.—That the increased habit of drinking has been a prolific source of crime and immorality.

6*th*.—That in Calcutta facilities are afforded for drinking at night by a practice prevalent in certain dispensaries of supplying liquor under the guise of medicine.

7*th*.—That retail shops generally possess back doors, through which liquor is clandestinely sold at prohibited hours.

3. The remedies proposed are—

1*st*.—To impose a higher rate of duty.

2*nd*.—To raise the license fees of shops.

3*rd*.—To open no new shop in any locality except on the application of two-thirds of the rate-payers of the locality (some of the petitioners would substitute residents for rate-payers).

4*th*.—To close any existing shop if two-thirds of the rate-payers of the locality petition for such closing (according to some of the petitioners for rate-payers *read* residents).

5*th*.—To transfer from Collectors to Municipalities the power of granting licenses.

6*th*.—To reduce the number of shops generally throughout the country.

7*th*.—To prohibit any drinking on the premises.

8*th*.—To provide that no liquor shop should have either door or window except in front on the roadside.

9*th*.—To insist on all liquor shops being closed at sunset.

10*th*.—To close all liquor shops in the vicinity of educational institutions or places of public worship.

11*th*.—To discontinue the practice of praising revenue officers in charge of the Excise Department under whose administration the revenue has increased.

12*th*.—To regulate the sale of liquor from dispensaries.

13*th*.—Similarly from hotels and other places of public entertainment.

14*th*.—To refuse renewal of licenses to shopkeepers convicted of offences under the abkaree laws.

15*th*.—To employ a special staff of officers to act as excise police.

4. The petitions are signed by representatives of the best educated and most influential natives in and near Calcutta, also by some European gentlemen whose opinions are entitled to great weight. They represent a wid-spread belief that a great social evil is on the increase, that it is within the power of Government to check its development, and that Government has failed in this duty.

5. I entirely agree with the petitioners in their statement as to the increase of the habit of drinking during late years, especially in towns and among the higher classes. I differ with them as to the extent to which Government action can check this tendency. I deny that Government has ever wilfully preferred considerations of revenue to the welfare of the people; but I must admit that ignorance of the subject in former times has introduced and fostered systems directly conducive to the multiplication of liquor shops, and therefore to the promotion of drinking. There is also no doubt that mistaken zeal on the part of local officers has often led to the same results.

6. On the first point I have asked for the opinions of local officers. The answers show a great diversity of opinion. The increase of the habit of drinking is admitted by some officers: denied by others. The denials, however, refer more to the agricultural classes, and generally apply only to the last six or eight years. So limited, there is undoubtedly truth in these denials as regards some districts. I believe the fact to be this,—All over Bengal there is more drinking now than there was twenty years ago, and there was more twenty years ago than forty years ago. But in some districts there has been no increase in the villages during the last six or eight years (in Backergunge, Fureedpore, Patna, Tirhoot, Maldah, and Bogra, it is positively stated that there has been a decrease); while the increase in towns and among the higher classes has been general. There is also no doubt that intemperance among the higher classes radiates from Calcutta as from a central focus. All testimony shows that the habit is most prevalent in the districts nearest the metropolis. It is very sad to see how prevalent is the opinion that intemperance naturally follows upon the receipt of English education.

* * * * * *

11. The excise of liquor has in Bengal been conducted under three general systems—the farming, the daily or monthly tax, also called the outstill, and the sudder distillery. The general distinguishing features of the three systems are as follows:—

Farming.—Under this system the excise revenue, sometimes of a district, sometimes of part of a district, was farmed out on tenders invited and selected. The farmer worked outstills by his own servants, or under-farmed the right as regarded each outstill. Generally, the second was the mode adopted.

Daily Tax or Outstill.—The Collector decides where shops for the retail sale of country liquor are required. He then puts up to auction for the ensuing year the right to set up a still at the place indicated, and to open a shop in connection with such still. The bidder of the highest amount of daily or monthly tax gets the right.

Sudder Distillery.—Certain central distillery buildings are erected by Government, and at these any number of distillers the building can accommodate are allowed to set up stills. The liquor distilled is tested by a hydrometer before leaving the distillery, and pays duty according to its strength. The duty varies from a maximum of three rupees per gallon, London proof, to a minimum of one rupee per gallon, London proof, according to the average means of the consuming classes in the district. In the Patna and Monghyr distilleries the duty has been levied lately on the raw material (mowah) from which the liquor is distilled, not on the liquor. The liquor is sold by the distiller to shopkeepers, who pay a license fee for leave to keep open a retail shop.

12. The daily tax was the system first in force. In 1790 certain rules were passed, afterwards re-enacted, with modifications in Regulation XXXIV of 1793. All persons were prohibited from manufacturing or vending spirituous liquors and intoxicating drugs without licenses from the Collectors. The manufacture and sale of liquors were confined to towns and villages to be selected by the Collectors, and divided into classes according to their size and population. A daily tax, at rates varying with reference to the importance of the localities, was imposed on each still (and the sale of all drugs was subjected to a tax to be fixed annually by the Board of Revenue with the sanction of Government). Further, a tax was ordered to be levied on unfermented tari at the rate of 25 per cent. on the amount of rent payable by the passees,—*i. e.*, the persons whose trade is to collect and sell the juice to the proprietors of

tar trees. Persons convicted of illicit manufacture or vend of any excisable articles were made liable to pay a fine or suffer imprisonment in default.

13. In 1813 the farming system and the sudder distillery system were both partially introduced.

14. In 1824 the farming system was greatly extended. The annual excise revenue having declined from 19 lakhs in 1829-30 to less than 15 lakhs in 1837-38, the falling off was ascribed to the defective and inefficient system of raising the excise revenue which had hitherto prevailed. To remedy this the Government in 1840, as a partial experiment, entrusted the superintendence of this branch of public revenue, in the 18th or Calcutta Division, to a separate officer designated Commissioner of Abkaree, the districts marginally* named being comprised within his jurisdiction. In 1844 another Commissioner of Abkaree was appointed, and the districts marginally† specified were placed under him, the jurisdiction of the first being then further made to include the districts noted in the margin‡. In 1848 five other districts§ were added to the second Commissionership.

* 1. 24-Pergunnahs. 2. Jessore. 3. Nuddea. 4. Burdwan. 5. Hooghly. 6. Backergunge. 7. Baraset. 8. Calcutta, *i. e.*, Punchannogram). 9. Bankoora.

† 1. Dinagepore. 2. Maldah. 3. Rajshahye. 4. Bogra. 5. Rungpore. 6. Mymensingh. 7. Pubna. 8. Dacca. 9. Fureedpore. 10. Backergunge.

‡ 1. 24-Pergunnahs. 2. Punchannogram. 3. Hooghly. 4 Burdwan. 5. Bankoora. 6. Moorshedabad. 7. Beerbhoom. 8. Manbhoom. 9. Jessore. 10. Nuddea. 11. Midnapore. 12. Hidgellee.

§ 1. Sylhet. 2. Cachar. 3. Chittagong. 4. Tipperah. 5. Bullooah (Noakhally).

15. These two Commissioners had under them Abkaree Superintendents and other subordinates; and the excise revenue of the 27 districts thus managed was raised generally by the daily tax or outstill system, opium and country rum being however subject to fixed duty, and farming was wholly proscribed.

16. In 1847-48 the direct system of management was introduced in the three Orissa districts (Cuttack, Pooree, and Balasore) under the Revenue Commissioner's own supervision, and farming was abolished

17. The system administered by the Abkaree Commissioners was the daily tax system.

18. In 1852 and 1853 the two Abkaree Commissionerships were abolished, and their duties transferred to Revenue Commissioners in their respective divisions.

19. It will be observed that the Behar districts were never included in either of the Abkaree Commissionerships. The farming system continued in them for a long time. It gradually gave way to the daily tax system, but the last vestige of it did not disappear till 1868.‖

20. Under the farming system, which was in force during the larger portion of the first half of this century, every encouragement was given to drinking. The farmer had but one object, private gain, and the more shops he opened and the greater the consumption of liquor, the better was this object attained.

21. When later the management of the excise fell into the hands of Abkaree Commissioners, sufficient care was not taken to limit the number of outstills and shops by the requirements of the people. As long as the excise was a separate department, the officers of this department were actuated by that departmental zeal which is so often productive of both good and bad results. The financial test was the real test of merit.

22. The same defects of management constantly occurred when the outstilled system was under the direct supervision of the regular revenue authorities. It is only of very late years that the principles which should regulate the excise have been at all understood or appreciated. The abkaree was, to Collectors, the most distasteful part of their duties, and, as a rule, was made over to Uncovenanted Deputy Collectors, who, so long as the revenue did not fall off, were allowed pretty much their own way. There was no regularly organised or sufficient check over the multiplication of shops, and the result was too often the simultaneous increase of facilities for drinking and of the excise revenue.

23. In 1859 the Government determined to extend the sudder distillery system as the best mode of maintaining a proper equilibrium between the real demand for liquor and the means for its supply. The theory of this system is perfect. Every ounce of liquor consumed pays duty before it is offered to the public. The rise or fall of the demand is as correct in its indication as are the changes in a barometer, and according to such should the duty be regulated. The rate of duty becomes the best and the proper check against undue facilities for drinking. It logically follows that no necessity exists for imposing any limit on the number of shops. The rate of duty provides the necessary check.

24. Under this system and this theory the number of shops increased greatly in towns, though it diminished somewhat in the interior. The difference is explained by the facility or the difficulty to the retail shopkeeper of obtaining liquor from the sudder distillery. As the Board reported to Government in June 1871—"Up to 1867 licenses were freely given to all

‖ *N. B.*—The above account is mainly taken from the Board's Annual Report for 1871-72.

applicants who were not suspected characters. Complete freedom of trade was the theory and the rule." The first check imposed was the consulting of Magistrates and Superintendents of Police in granting licenses for shops. This dates from 1867.

25. The sudder distillery system is the one in force now in most parts of Bengal. It has not fulfilled the hopes of those who insisted on its extension throughout the presidency. Perfect in theory, it has two weak points in practice—the facilities it affords for fraud, and the temptations and comparative immunity it holds out to illicit distillation. The men who enter into the ranks of the excise staff are not of the best class, and no means have yet been devised to successfully prevent combination between them and the distillers and shopkeepers. It is so easy and so simple to let out of the distillery 50 gallons of spirit, taking duty on only 40, and entering only 40 in the books, the profit on the odd 10 being divided between the distillery darogah and the shopkeeper, or to enter the whole 50 in the register, but at a strength much below the real strength, levying the duty on the registered strength, and dividing the profit on the strength which has escaped taxation.

26. For the detection of illicit distillation, the revenue authorities have almost entirely to trust to the police, and experience has proved that the police are of very little use as abkaree detectives. Nor is this to be wondered at. Illicit distillation is carried on inside the house, and the sale of the liquor in most cases proves nothing, as the distiller is the shopkeeper licensed by Government. As Commissioner of Bhagulpore I had a statement prepared of all licensed shopkeepers in the division, showing what amount of liquor each one had taken during a specified time from the distillery. In 1868, shortly after I joined the Board, I had similar statements prepared for all Bengal. The result, as reported to the Government in 1870, is given in the marginal extract.

"A statement of the number of gallons cleared out from each public distillery during March 1868, the duty paid, and the number of shops supplied by the distillery (marked D). A glance at these figures shows that in March 1868, after the sudder distillery system had been some years in force, many shops were, as regards the distillery returns, carried on at an undoubted loss, that is to say, that the amount of duty-paying liquor sold by them would not have given a profit to cover the license fees and other expenses. Thus, in Cuttack, there were 3 such shops, in Balasore 6, Backargunge 18, Dacca 6, Furreedpore 28 (whole number in the district), Mymensingh 13, Sylhet 13, Noakholly 27, Chumparun 10, Tirhoot 11, Moorshedabad 31, Pubna 27, Rungpore 19, Singbhoom 5, Purneah 11, Jessore 13, Nuddea 7, 24-Pergunnahs 22 (the whole number in the district), Bankoora 2, Burdwan 21, Hoogbly 40, Midnapore 18."

27. Now what is proved by the fact that an abkaree shopkeeper is carrying on his business without profit, according to the distillery books, is that he is making an illicit profit, either by getting liquor out of the distillery free of duty, or by selling, under cover of his license, liquor distilled surreptitiously on his own premises.

28. The extent to which these practices are carried on will, of course, depend on the watchfulness of the local authorities, on the pressure put upon the police, and on attention to the subject by the Revenue Board and Commissioners. But it is only a question of degree. When Board, Commissioner, and Collector have done all they can do, there will still remain a great deal of liquor going into consumption which pays no duty, and over the manufacture and sale of which no control can be exercised.

29. It is on this point that the sudder distillery system contrasts unfavourably with the monthly tax or outstill system. Under this latter system, illicit distillation was almost impossible. The man who paid a monthly fee for the right to distil was the best preventive the Government could get. Within the radius supplied by him no illicit still could be opened unknown to him; and, as the knowledge was certain and denouncement equally so, it followed that the attempt was not made.

30. All the petitions presented to Government display a remarkable ignorance on this point. The whole argument is based on the supposition that it is the duty-paying liquor, and that only, against which precautions have to be taken.

31. The matter is not so easy as petitioners think. Government and the Board have honestly for some years been doing their best to counteract the effects of former ignorance, of bad systems, and of a growing taste for liquor. It is not true of the present time that abkaree officers are praised and receive promotion for increasing the revenue by increasing the facilities for drinking. The only petition which backs up a general statement to this effect relies upon a quotation of 1852-53, and even that quotation does not prove the position. What abkaree officers are praised for, and brought to the notice of Government for, is when their efforts increase the revenue, without multiplying shops or even simultaneously with a decreased number; and this is right, for the increase of revenue under such circumstances is a certain proof of a careful and efficient discharge of duties, resulting in a check on illicit distillation and on removal from the distillery of liquor paying no duty.

32. Petitioners are apparently persuaded that Government has but to raise the duty, to place obstructions in the way of people who want liquor, to forbid sales at night, &c., and sobriety and morality must follow. They are unaware to what extent illicit distillation and fraudulent practices are fostered by every movement in a repressive direction, and how careful those who administer this branch of administration have to be not to fall into Scylla when avoiding Charybdis.

33. Not only do difficulties placed in the way of licit sales give an impetus to illicit ones, but they tend to substitute for a comparatively harmless stimulant, stimulants of a noxious kind, such as ganja and opium. Of this I have seen many proofs. It may be urged against this last objection that it could be met by raising a prohibitory duty on those two drugs; but this argument would also be a mistake, for the result would be an immense stimulus given to the smuggling of opium from the cultivators, and would lead to the substitution of wild ganja for the cultivated plant of Rajshahye.

34. Again, none of these remedies are applicable to the evil which the petitioners more especially call attention to,—the increase of drinking among the upper classes. These classes do not resort to the open spirit shop, nor indeed is it the native spirit which they consume. Undoubtedly, as I have already stated, the educated classes do drink much more than they used to drink, but they drink in the privacy of their own homes and in their own rooms, and the liquor is the imported spirit from England. Against this evil no action of the Government is of much avail. The check of enhanced duty—a check I have more than once recommended—is the only one possible, but it is a feeble one, which will not produce any marked effect, for it is clear that, with regard to the large number of Europeans in the country, the duty on imported spirits cannot be made sufficiently high to be prohibitory. The only real checks are to be found in a sound practical education and in a healthy public opinion, which the signers of these petitions are the persons most capable of forming.

35. While I entirely go with petitioners in their regret that sobriety is not a characteristic of the Bengalee to the same extent as formerly, I cannot but think they have painted in exaggerated colors the evils of increased consumption of liquor. One petition, Baboo Keshub Chunder Sen's, thus describes them:—"Crime and immorality are also, in a large measure, attributable to this cause. The instances of petty crimes and heinous offences committed under the influence of drink are of frequent occurrence, as may be proved by the criminal records of the country." * * * "It is indeed harrowing and painful to contemplate the extent to which sensuality, profligacy, and brutal revels on the one hand, and irreligion, blasphemy, and practical atheism on the other, are making ravages among all classes of the native community in consequence of the spread of drunkenness, and undermining the religious and moral life of the nation." * * * "In short, the use of intoxicating liquor has done more than anything else to degrade the physical, moral, and social condition of my countrymen, and has proved a stupendous obstacle in the path of reformation. Patriots and philanthropists of all classes, who are engaged in diverse ways in ameliorating the condition of the people, always complain that this great evil seriously counteracts and frustrates their efforts."

36. This kind of sensational writing only misleads. In one of the reports I have received on this subject, written by a clever Native medical officer, I am informed that "Young Bengal signifies an incarnation of brandy and immorality." My own observation and the hard test of figures do not bear out these statements. Excluding imported spirits and liquors, the consumption of licit drink in Bengal is equal to the revenue value of just over 7 pies per head yearly,* *i.e.*, 3½ farthings, or about Rs. 26,80,604 in the gross. Including them, the consumption is just 10 pie per head yearly, or about Rs. 38,16,847 in the gross. But these latter figures include the consumption of the European community, who certainly are the chief consumers of imported wines and spirits.

37. There is no real comparison between this state of things and the extent to which drinking has become a national curse in England. The capital there employed in the liquor trade was calculated two or three years ago by Professor Levi at £114,000,000, or one-third more than the whole capital employed in the cotton trade, and the revenue derived by the consumption of drink is in round numbers about £1 or Rs. 10 per head of the population. But there are other differences. The country spirit in Bengal is generally a weak spirit, so that drunkenness is an exceptional effect, and the tendency of the people is not towards crimes of violence. Drink developes this tendency where it exists, but it does not create it; and as regards dispositions to other offences, these are but slightly acted upon by drink. The criminal records of the country do not, as far as my experience goes, substantiate the statements in the petitions.

38. Mr. Lyall, the able Magistrate of Dacca, thus writes last month:—"I have very seldom, I may say almost never, been able to trace any connection between drunkenness and crime in this country." The evidence of the most experienced and shrewdest police officer in Bengal was to the same effect. In 1872 Mr. Wauchope wrote to the Government as follows:—

"I can adduce no facts to show that the existence of liquor shops has any bearing on crime in their neighbourhood. The police section in which the largest number of cases is reported is Colootolla, where there are only seven liquor shops; while there are thirty-one in Burra Bazaar, where there is less crime. Jora Bagan, where nearly every dacoit who commits robberies in the mofussil lives, has only twenty-three shops of all sorts; while Burra Bazar has forty-nine. There are many dacoits and burglars in Burtola, which has only nine liquor and other shops.

"With regard to the criminal classes, dacoits all drink, but not to excess. Before committing a dacoity they perform worship to Kalee, in which Brahmins, though they do not drink as a rule, dip the tip of their fingers into the liquor, and touch their foreheads with it. I had charge at one time of a good many dacoit approvers, and found that, though they consumed a considerable quantity of liquor, they were seldom actually drunk, and did not destroy their constitution with churrus and muddut. On the other hand, there can be no doubt that common burglars and petty thieves are in a constant state of half stupefaction from the use of intoxicating drugs, by which their health is completely destroyed.

"It is generally said that crime is the result of drink, and very probably it is so with regard to offences attended with violence to the person, which are of comparatively rare occur-

* These figures include the duty on country spirits, country rum, and the license fees of tari, pachwai and outstills. In the three last heads, the distinction between duty and the shop license cannot be drawn.

rence in Calcutta; but I cannot discover the connection between drink and offences requiring skill. The most celebrated dacoit I ever knew, who gave me an account of more than a hundred dacoities, in most of which he had been the leader, never tasted liquor; and a New York burglar, perhaps the most expert in his profession who ever visited India, was described to me by the Captain of the ship in which he came to this country as the most sober man who had ever sailed with him.

"In England it is said that drinking promotes intemperance, intemperance undermines morality, immorality is the immediate cause of crime; also that intemperance is supported by extravagance, which leads to poverty, and poverty to crime.

"These theories may apply to England, but not to Bengal; for here intemperance is generally the result, and not the cause of immorality; and living is so cheap that poverty is not starvation, as it is often in England, so as to lead to crime. Dacoits and thieves do not rob because they are poor or starving, but because they can earn their daily bread easier by crime than by labour. Neither has it been shown that men who take to crime from starvation during famine, &c., in this country are addicted to liquor.

"Whether there are liquor shops or not, there will be immorality and crime; and so long as liquor shops are properly supervised by the police, so as to prevent the meeting of bad characters and the concoction of robberies, &c., I do not think that they cause much difference one way or the other in crime."

39. The last year for which I have been able to get comparative figures for all India is 1872-73.

The following statement gives the results bearing on the subject under report:—

Presidency.	Population.	Abkaree revenue.	Amount per head.	Remarks.
		Rs.	Rs. A. P.	
Oudh	11,198,095	6,44,430	0 0 11	
Central Provinces	7,985,411	10,24,100	0 2 0	
British Burmah	2,463,484	11,23,440	0 7 0	
Bengal	66,856,859	69,66,830	0 1 8	
North-Western Provinces	30,014,921	20,30,900	0 1 1	
Punjab	17,611,498	8,76,330	0 0 9	
Madras	26,539,136	61,68,440	0 3 8	
Bombay	12,407,579	41,87,470	0 5 4	
Total ...	175,076,983	2,30,21,940	.....	

40. It will be seen that Bengal contrasts favorably with British Burmah, Bombay, Madras, and Central Provinces.

41. During the last few years the subject of excise has received a good deal of attention in Bengal. My object since I have had this department under me has been to obtain for Government as much as can be got of the profit which arises from the sale of drink, while reducing the temptations which lead astray the weak, the ignorant, and those who have a natural inclination for stimulants. In this view the number of liquor shops where the sudder distillery system is in force has been regulated and reduced; a strong repression has been placed on the tendency to license an unnecessary number of outstills in districts, or parts of districts, in which the monthly tax system prevails. No outstill, as a rule, is allowed within four miles of another, and sometimes the minimum distance is greater, and increased duties have been levied on opium and on ganja. The number of shops and outstills which it is proposed to license during the following year in a district is now reported to the Board; and not only is supervision from head-quarters thus rendered more direct, but the attention of Collectors and Commissioners is forcibly drawn to the subject.

42. Two years ago, on my recommendation, Sir G. Campbell introduced two Acts into the Bengal Council, which allowed of shops being put up to auction in places under the sudder distillery system. This plan was borrowed from the North-Western Provinces. Formerly, monthly fees ranging from one to twenty rupees per shop were levied. Now 32 shops in Calcutta pay a monthly license fee of over Rs. 200, and 28 shops a fee of between Rs. 100 and 200. The auction system enables Government to obtain a share of the larger profit made at the shop where the sales are greatest. The result of this new plan of granting licenses has been to reduce in Calcutta the number of retail shops as follows:—

	1872-73.	1873-74.	1874-75.
Retail liquor shops	260	188	193
Ganja retail „	133	114	103
Opium „ „	212	126	112

The revenue, on the other hand, has increased from Rs. 1,95,019 in 1872-73 to Rs. 3,55,874 in 1873-74. The present year's revenue is of course not yet known.

43. The same system was introduced in the districts shown in the following statement, which also gives the result on the number of licenses issued:—

Districts.	1871-72.	1873-74.	
Burdwan	148	148	
Bankoora	109	44	
Midnapore	132	147	The increase is owing to the establishment of outstills in 1873-74.
Hooghly	321	151	
24-Pergunnahs	135	167	The increase is owing to the exhibition of rum licenses separately from country spirit in 1873-74.
Dacca	159	152	
Furreedpore	70	53	
Backergunge	89	66	
Mymensingh	119	103	
Sylhet	59	46	
Cachar	247	156	
Patna	515	328	
Gya	424	239	
Shahabad	399	285	
Tirhoot	313	243	
Sarun	362	284	
Chumparun	260	172	
Monghyr	461	315	
Bhaugulpore	310	211	
Purneah	252	189	

44. These figures show the number of *licenses issued*. The number of *shops* would be much smaller, especially in the 1873-74 column, for a fresh license is issued every time the old license is given up, and under the auction system licenses fall in much oftener than under the uniform fee system, one shop sometimes being licensed two or three times over during the year.

45. Although the abkaree revenue of some districts fell of in the last quarter of the last financial year, 1873-74, it is owing partly to this auction mode of licensing and partly to the introduction of the outstill system in tracts of country quite unsuited to the sudder distillery system, that notwithstanding the scarcity in Behar and high prices of food generally, the collections of excise revenue for the last year in the whole presidency are higher instead of lower than those of the previous year.

46. The increase of duty in late years on ganja and opium has been as follows:—

Period.	Ganja.		
	Flat.	Round.	Chur.
1853-54 to 1858-59	Re. 1 per seer on all sorts.		
1859-60 to 1863-64	Rs. 2 ditto ditto.		
1864-65 to 1871-72	Rs. 2 per seer.	Rs. 3 per seer.	Rs. 4 per seer.
1872-73 to date	„ 2-8 ditto.	Ditto.	Ditto.

Period.	Opium.
1851-52	A. Rs. 10, 11, 12, 13, 14, 15 and 16 per seer in the several districts.
1864-65	A. „ 16, 18, 20 and 22 per seer in the several districts.
1871-72	A. „ 16, 18, 20 and 22 per seer in the several districts.
1872-73	A. „ 16, 18, 20, 22, 23, 24 and 25 per seer in the several districts.
1873-74	

A.—These rates are leviable in the producing districts.

47. The consumption in maunds during the last seven years has been as follows:—

Year.	Ganja.	Opium.
	Mds.	Mds.
1867-68	9,247	3,629
1868-69	9,172	3,565
1869-70	9,400	3,451
1870-71	10,433	3,462
1871-72	10,750	3,543
1872-73	9,335	3,674
1873-74	8,952	3,607

48. The revenue during the same period obtained from these two articles has been—

Year	Ganja.	Opium.
	Rs.	Rs.
1867-68	9,73,176	21,26,933
1868-69	9,68,010	20,94,117
1869-70	9,98,128	20,29,207
1870-71	11,06,818	20,35,913
1871-72	11,40,329	20,82,864
1872-73	11,89,705	21,99,180
1873-74	11,76,884	23,29,827

49. The results may be thus briefly stated: Ganja, diminished consumption, and an increased revenue of Rs. 2,03,708; Opium, consumption stationary, and an increased revenue of Rs. 2,02,894.

50. Both articles are probably susceptible of still higher rates of duty. As regards ganja, it is under consideration whether it would not be preferable to make the wholesale purchaser pay the duty when he buys the article in Rajshahye, freeing him from all restrictions afterwards. At present the wholesale purchaser merely pays the cultivator for the plant; he then carries it to his own district and gola, where it is placed under the joint custody of himself and an abkaree darogah, and the duty is paid by the retail seller on each lot as he buys it from the goladar.

51. I now come to the remedies proposed by the petitioners to check the increase of drunkenness.

52. Nos. 1 and 2 have been and are attended to.

53. Nos. 3 and 4 are exactly the same checks as proposed in the Permissive Bill which the Temperance Party have tried to introduce in England. They are not, in my opinion, practicable. There would be great difficulty in obtaining the opinions of residents or rate-payers, and it is questionable how far it would be right to set up such a tyranny of majorities. The fact that 600 men in a village prefer to drink water is no sufficient reason for debarring the remaining 200 from obtaining some other drink, if they wish it. At the same time I quite admit that the establishment of a liquor shop in a quiet and respectable locality may be a nuisance to the residents which would form a fair ground of complaint, and from which, like from any other nuisance, they would have a claim to be freed. This is a question of police administration rather than of excise, and as the police can prevent the opening of any shop, or the renewal of any license, the evil where it exists has already a remedy. I may add that I have myself forbidden the opening of a shop where I found there was a strong feeling against it among the residents.

54. An objection of the same kind exists against the adoption of remedy No. 5. Municipalities in India are not representative. This rule would often be the establishment of the tyranny, not of the majority, but of a small minority.

55. I am not myself in favor of an alteration of the present system for granting licenses; but if a change were made, I would rather see it in the direction of Local Licensing Boards. The idea was mooted as regards England by Mr. Arthur Arnold in the April number of the *Fortnightly Review*, 1872. Such a Board might consist of Collector, Superintendent of Police, and four or five influential men in the district, especially natives.

56. No. 6 has been carried out, and is the subject of constant care.

57. No. 7 would be to force a man who wanted a glass of liquor to buy a bottle, and would deprive a traveller or workman of the refreshment he required.

58. No. 8 would turn every liquor shop into a sort of Black Hole, where in the hot weather the unfortunate abkar and his customers would run the risk of death from heat apoplexy.

59 There seems no good reason for adopting No. 9. Government has no right to insist upon every man getting through his drink before sunset any more than through his food. As a matter of police, liquor shops should be shut when quiet and respectable people want to go to sleep, and that is now the rule.

60. No. 10 I agree with, as far as it can be carried out with due regard to the wants of the inhabitants of such quarters.

61. No. 11 is directed against an evil which does not exist.

62. No. 12 touches a real evil which I have long been aware of; but I wish the petitioners, while pointing it out, had given their views as to the best mode of meeting it. The only remedy I can suggest is the passing of a law similar to one which, in 1867, was pressed upon the attention of the Legislature of Massachusetts in the United States. Whether this proposed Act was ever enacted or not in Massachusetts I have no means of knowing. It is copied in the appendix to this Minute.

63. No. 13 I do not understand.

64. No. 14 is attended to as far as is necessary. Each case must be decided on its merits. A universal rule like that suggested would often be productive of injustice and hardship.

65. I am not in favour of No. 15. It is true the police do not help the Excise Department much, but a special abkaree staff would consist of men generally of a lower class than the men in the police, and would probably be of very little more use. They would be bribed to blindness even more easily than the police, and would not repay by their additional service their cost to the State.

66. The fact is that in excise, as in most matters of administration, there is no short and royal road to what is best. Everything must depend on care and on thoughtful adaptation of varying means to ever-changing evils and dangers.

67. The alterations in the existing laws which I would recommend are few. They are embodied in the appendix to this Minute, and have already been urged (most of them) upon the consideration of Government.

68. My own idea of the best form of excise generally for Bengal is the sudder distillery system in towns and the outstill system in the interior, with strict precautions against the tendency of the latter to multiply outstills in the interior, and against the tendency of the former to increase shops in towns. I would raise the duty on imported spirits, and keep on raising it gradually, but by small increases, on ganja and opium.

69. It is, however, mere foolishness to expect that a certain proportion of the people of this country will not continue to use stimulants, or that the excise revenue will not increase. As the upper classes adopt more and more European habits, we must expect to see them take the bad with the good, and probably at first even more of the bad than of the good; while as the position of the lower classes improves, as agricultural produce yields a better price to the cultivator, and yearly the number increases of men, women, and children who earn a livelihood, such as they never dreamt of, in mills and factories, there will be a larger consumption of everything the mass of the people care for. They will wear more clothes, they will eat more food, and they will drink more liquor. Any attempt to enforce sobriety in a country where illicit distillation is so easy and so difficult of detection would be a failure. All we can do is to limit ourselves to supplying the demand, and not to create it, to open no new shops except on proof that they are required to meet an existing want, and to act on an honest recognition of the truth that the excise revenue is a very small matter in comparison with the comfort and well-being of the people.

70. I believe that generally throughout the country Revenue officers more or less are actuated now by these motives, and it is on this principle that the Board attempt to conduct the abkaree administration.

A. Money.

The 25th January 1875.

APPENDIX No. I.

An act to authorize Druggists and Apothecaries to sell Spirituous Liquors.

Be it enacted by the Senate and House of Representatives, in General Court assembled, and by the authority of the same as follows:—

Section 1. Druggists and Apothecaries may sell alcohol, spirits and wines for medicinal purposes only, *provided* that they shall keep a book in which they shall enter the date and quantity of every sale, the name and residence of the purchaser, and, if exported, the place to which exported, and the name of the consignee; which book shall at all times be open to the inspection of the Mayor and Aldermen and selectmen, or of any State constable.

If a Druggist or Apothecary, or any Clerk or Agent of a Druggist or Apothecary, is convicted of an illegal sale, he shall be subject to the penalties prescribed in section thirty of chapter eighty-six of the General Statutes.

Section 2. Section twenty-six of chapter eighty-six of the General Statutes is hereby repealed.

Section 3. This Act shall take effect upon its passage.

APPENDIX No. II.

Proposed alterations and amendments of the Excise Laws, Act XI of 1849, *Act XXI of* 1856, *Act XXIII of* 1860, *Act IV of* 1866 *(B.C.)*.

1. To introduce a provision into Act XI of 1849, requiring wholesale dealers in spirituous wines in liquors in Calcutta to take out licenses, and so to place them in the same position as similar wholesale dealers in the mofussil.

Board to Government, No. 120 B, dated 16th March 1872.

2. To amend section 20 of Act XI of 1849, in such a manner as to allow of search being made at night under certain conditions as would guarantee against abuse,—as, for instance, that a police officer, not under the grade of a Sub-Inspector, should accompany the searching party.

Board to Government, No. 859 B, dated 29th December 1874.

3. To provide a penalty for the illicit manufacture in Calcutta of any spirituous or fermented liquor or intoxicating drug, and also to provide for search by abkaree officers of premises in which illicit manufacture may be reasonably suspected to be taking place.

Board to Government, No. 120 B, dated 16th March 1872.

4. To substitute the following for the opening words of section 40, Act IV of 1866 (B.C.)—"Any person committing a breach of any of the conditions upon which a license is granted under the terms of section 36 or section 39 of this Act shall be summarily convicted," &c., &c.

The necessity for this alteration is stated in the Advocate-General's opinion, which accompanies the Board's letter No. 773 B, dated 23rd November 1874, to the Secretary to the Government of Bengal.

5. To amend sections 33 and 50 of Act XXI of 1856, so as to enable the Board of Revenue to exercise a more effectual supervision over the cultivation, preparation, and storage of intoxicating drugs, by subjecting the cultivators to more restrictive rules than formerly, a penalty being imposed for any breach of such rules, and by forbidding the storage or possession of such drugs, except under a license; the special object of the proposed amendment being to discourage the private growth of ganja in certain districts, and to check smuggling and surreptitious sales in the Rajshahye division.

No. 605 B, dated 27th November 1871.
No. 16 B, dated 5th January 1872.
No. 120 B, dated 16th March 1872.

6. To make the rules in Act XXI of 1856, which relate to Pachwyee, applicable to any fermented liquor other than those referred to in the Act, with the special object of regulating the manufacture of a fermented liquor called "Sharbat bahar," and said to be made from molasses, and of a wine made from the fruit of the jamun tree.

No. 120 B, dated 16th March 1872.
No. 204 B, dated 13th May 1872.

7. To extend the provisions of the several criminal laws relating to the enforced realization of fines imposed on offenders to breaches of the excise laws.

No. 120 B, dated 16th March 1872.

8. To give the Magistrate a discretion to order an offender to be confined in either the civil or the common jail, and with rigorous or simple imprisonment, as from the circumstances of the case may seem best.

No. 120 B, dated 16th March 1872.
No. 61 B, dated 21st February 1872.

9. To import into Act XI of 1849 a similar provision to that contained in section 59 of Act XXI of 1856, as regards the exercise by the police of powers of seizure, search, and arrest. It is not proposed to confer such powers indiscriminately upon all police officers, but only upon certain officers who may be specially selected by the Commissioner of Police. Should this proposal be adopted, it will be necessary also to amend section 20 of Act XI of 1849, by the addition of the words "Magistrate of Police" after the word "Collector;" and section 22 would also require to be altered so as to allow of the person arrested being conveyed to the Magistrate, instead of to the Collector, in cases of arrests by the Police, a report in such cases being immediately made to the Collector showing the action taken.

No. 2.

A Bill to amend Act XI of 1849, *Act XXI of* 1856, *Act XXIII of* 1860, *and Act IV (B. C.) of* 1866.

WHEREAS it is expedient to amend Act XI of 1849 (for securing the Abkaree Revenue of Calcutta); and Act XXI of 1856 (to consolidate and amend the law relating to the Abkaree Revenue in the Presidency of Fort William in Bengal); and Act XXIII of 1860 (to amend Act XXI of 1856); and Act IV (B. C.) of 1866 (for regulating the Police of the town of Calcutta, &c.)

It is hereby enacted as follows:—

1. For section 4 of the said Act XI of 1849, the following section shall be substituted:—

"4A.—It shall not be lawful for any person to manufacture, or sell by wholesale or retail, any spirituous or fermented liquors or intoxicating drugs specified in this Act, within the town of Calcutta, without a license from the Collector; and any breach of this provision shall render the offender liable to a fine of five hundred rupees. Provided that this prohibition shall not affect the arrangements under which taree is supplied to retail vendors, and shall not apply to the sale of such article, or any preparation of the same, when supplied or used for the manufacture of goor or molasses."

Prohibition of unlicensed manufacture or sale of spirits, liquors, or drugs.

Penalty.

Proviso.

"4B.—Every licensed wholesale vendor, not being also a licensed retail vendor, who makes a retail sale, shall, for every such offence, be punished with fine not exceeding two hundred rupees; but this enactment shall not apply to licensed wholesale dealers selling such small quantities of beer, wines or spirits, as may appear to the Collector to be intended only as samples."

Penalty for retail sale by licensed wholesale vendor.

Proviso.

2. For section 8 of the said Act XI of 1849, the following section shall be substituted:—

"8.—Every person taking out a license for the manufacture or sale of spirituous or fermented liquors or intoxicating drugs as aforesaid, shall execute a counterpart engagement in exact conformity with the tenor of such license."

Licensees to execute a counterpart engagement.

3. For section 16 of the said Act XI of 1849, the following section shall be substituted:—

"16.—Besides the penalties above specified for the illicit manufacture, sale, possession and carrying of spirituous or fermented liquors or intoxicating drugs, all the materials and implements used, or intended to be used, in the manufacture, and all the liquors or drugs so manufactured, and all such liquors and drugs found in the possession of any offender against this Act, shall be seized and confiscated; and the vessels, packages and coverings, in which such liquors and drugs are found, and the animals and conveyances used in carrying them, shall also be liable to seizure and confiscation."

Additional penalties for illicit manufacture, sale or possession of spirits, liquors, or drugs.

4. For section 20 of the said Act XI of 1849, the following section shall be substituted:—

"20.—Whenever the Collector has good reason to believe, either from information given by any person, to be taken down in writing, or from his own knowledge, or from the proceedings in any case,

that spirituous or fermented liquors or intoxicating drugs are being unlawfully manufactured or sold in any place,

or that any spirituous or fermented liquors or intoxicating drugs, liable to confiscation under this Act, are kept or concealed in any place,

the Collector may, by warrant under his hand, empower any Abkaree officer above the rank of jemadar of peons, but always in the presence of an officer of Police not being under the grade of a head constable, to enter into any such place, by day or by night, and to seize and carry away all such liquors or drugs, and all the implements or materials used in the manufacture thereof, and in case of resistance, to break open any door, and to force and remove any other obstacle to such entry, search, seizure or removal as aforesaid, and to arrest and detain the owner or occupier of the premises, with all parties whom he suspects to be concerned in the unlawful manufacture or sale, or in the unlawfully keeping or concealing of such liquors or drugs, whom he shall find on the premises:

Provided that, where there is ground to suspect that such liquors or drugs are unlawfully concealed in any zenana, the officer charged with the execution of the warrant shall follow, as closely as may be, the rules for the seizure of property so concealed adopted by the Supreme Court of Judicature at Fort William.

Powers of search, seizure and arrest vested in abkaree officers, under the authority of the Collector, in cases of illicit manufacture, sale or possession of spirits, liquors, or drugs.

5. The powers of seizure, search, and arrest given to Abkaree officers by sections 19 and 20 of the said Act XI of 1849, shall also be exercised by such Police officers who may be specially selected by the Commissioner of Police for such purpose; and the powers which are conferred upon the Collector by section 20 of the said Act, as regards the issue of warrants directed to Abkaree officers, shall also be vested in the Magistrate of Police, in respect of the issue of warrants directed to Police officers, selected in the manner aforesaid; provided that under the said section 20 it shall not be competent to the Collector to issue a warrant directed to a Police officer, nor shall it be competent to the Magistrate of Police to issue a warrant directed to an Abkaree officer.

Similar powers to be exercised by certain Police officers.

Proviso.

6. Whenever any Police officer, exercising the powers of an Abkaree officer under sections 19 or 20 of the said Act XI of 1849, shall arrest any person, or shall seize any spirituous or fermented liquors or intoxicating drugs, or shall enter any place for the purpose of searching for such illicit articles, he shall carry the person arrested, with the illicit articles seized, with all convenient despatch, to the Magistrate of Police, and shall within twenty-four hours thereafter, make a full report to the Commissioner of Police, and the Commissioner shall at once inform the Collector of the fact of the arrest, and of the circumstances of the case; and the Magistrate of Police shall proceed to adjudicate the case according to law.

Police officer to carry the person arrested and the articles seized to the Magistrate of Police, and to report to the Commissioner of Police. Commissioner to inform Collector.

7. It shall not be lawful for any person to cultivate plants, from which intoxicating drugs are produced, without a license from the Collector; and any person who shall so cultivate, or in any way cause, encourage, or promote such illegal cultivation, shall be liable to a fine not exceeding five hundred rupees; and the plant so cultivated shall be liable to seizure and confiscation.

Prohibition of unlicensed cultivation of plants producing intoxicating drugs, and of abetment of the same.

8. For section 33 of the said Act XXI of 1856, the following section shall be substituted:—

"33.—The Board of Revenue may, with the sanction of the Lieutenant-Governor, from time to time prescribe rules consistent with this Act,

for regulating the mode in which fermented liquors shall be supplied to licensed vendors of the same;

for subjecting the cultivation of plants from which intoxicating drugs are produced, and the preparation of the said drugs, to such restrictions and supervision as may be deemed necessary to secure the duty leviable thereon;

Board may prescribe rules to regulate the supply of fermented liquors to licensed vendors; and the cultivation, preparation, storing, possession, and transport of intoxicating drugs.

and for granting licenses or passes to persons cultivating, preparing, storing, possessing, purchasing, or transporting the said plants or drugs.

Effect of rules.

All such rules shall be published in the *Calcutta Gazette*, and shall have effect as if they were contained in this Act.

Every person who wilfully or negligently refuses, or neglects to obey, or contravenes any rule issued and sanctioned under the provisions of this section, shall be punished with fine, which may extend to two hundred rupees."

Penalty.

9. For section 50 of the said Act XXI of 1856, the following section shall be substituted:—

Provisions of the two last preceding sections not to apply to the sale or possession of taree used in making sugar; not to the sale or possession of intoxicating drugs by licensed cultivators.

"50.—The provisions of the two last preceding sections, so far as they relate to the sale and possession of fermented liquors, do not apply to the sale and possession of taree, the produce of the date tree, when supplied or used for the manufacture of goor or molasses;

and the provisions of the said sections relating to the sale and possession of intoxicating drugs, do not apply to the sale or possession of such drugs by any person duly authorized under this Act to cultivate the plants which produce these drugs:

provided that every such cultivator selling or parting with any such plant, or any preparation made therefrom, to any person other than a licensed vendor, or to a person duly authorized to purchase the same by pass or license from the Collector, or failing to account for any quantity of such plant, or of any preparation thereof which shall have been in his possession, shall be punished with fine which may extend to five hundred rupees."

Penalty for sale or transfer by cultivators to unlicensed person, or for failure to account for stock of plant had in possession.

Provisions relating to puchwai applicable to fermented liquors not mentioned in the Act.

10. All the provisions of the said Act XXI of 1856, which relate to puchwai, shall apply to any fermented liquor other than those specified in the said Act.

11. In section 40 of Act IV (B.C.) of 1866, the following section shall be substituted:—

"Any person committing a breach of any of the conditions upon which a license is granted under the terms of section 36 or section 39 of this Act, shall on summary conviction before a Magistrate, be punishable by a fine not exceeding one hundred rupees, and such fine shall be recovered from the person licensed, notwithstanding that such breach may have been owing to the default or carelessness of the servant or other person in charge of the shop or place of sale. Any person so convicted shall also be liable to the forfeiture of his license, at the discretion of the Commissioner of Police, subject to the direction and control of the said Lieutenant-Governor."

Penalty for breach of conditions of license.

12. Chemists, druggists and apothecaries, not being licensed vendors, may sell spirituous and fermented liquors and intoxicating drugs for medicinal purposes only:

Chemists, &c., may sell without license for medicinal purposes only.

Provided that, unless specially exempted by the Board of Revenue from the application of this proviso, they shall keep a register, in such form as the Board of Revenue may prescribe, in which they shall enter the date and quantity of every sale, and the name and residence of the purchaser; which register shall at all times be open to the inspection of the Collector, or any Excise officer above the rank of jemadar who may be deputed by the Collector for the purpose of such inspection. Every person bound by the above provision who shall neglect to keep such register, or to enter in it any sale made by him, or who shall refuse on demand to produce such register for the inspection of the Collector, or the Excise officer duly authorized to inspect it, shall for every such offence be liable to a fine of two hundred rupees.

Proviso.

Penalty.

13. Any chemist, druggist or apothecary who may be convicted of making an unlawful sale of spirituous or fermented liquors or intoxicating drugs, shall for every such offence forfeit a sum which shall not be less than one hundred rupees or greater than five hundred rupees, in addition to the penalties provided for such offence in the said Act XI of 1849, or the said Act XXI of 1856.

Penalty for unlawful sale by chemists, &c.

14. When any person is sentenced to pay any fine or forfeiture under the said Act XI of 1849, or the said Act XXI of 1856, or under this Act, the Magistrate shall be guided by the provisions of sections 67, 68, and 69 of the Indian Penal Code, in awarding a period of imprisonment in default of payment thereof.

Imprisonment in default of payment of fine.

Any sum so ordered to be paid shall be recoverable in the same manner as fines may be recovered under section 307 of the Code of Criminal Procedure.

Recovery of fine.

15. Every person who shall be imprisoned under section 73 of the said Act XXI of 1856, or on account of the non-payment of any sum forfeited under this Act, or under the said Act XXI of 1856, if the offence of which he has been convicted be one with respect to which the information of the Collector of an Abkaree officer is required by section 71 of the said Act XXI of 1856, may be confined in the civil or in the criminal jail.

Imprisonment may be in the civil or criminal jail.

16. Section 74 of the said Act XXI of 1856, and section 3 of the said Act XXIII of 1860, are hereby repealed.

Portions of Acts repealed.

No. 438.

FROM H. J. REYNOLDS, ESQ.,
Officiating Secretary to the Govt. of Bengal,

TO THE SECRETARY TO THE BOARD OF REVENUE,
MISCELLANEOUS REVENUE DEPARTMENT.

REVENUE DEPT.
Mis. Revenue.

CALCUTTA, *the 22nd February* 1875.

SIR,

I AM directed to acknowledge the receipt of your letter No. 56 B of the 28th January, submitting a Minute by the Member in charge (Mr. Alonzo Money, C.B.,) upon the abkaree administration of Bengal, with special reference to certain memorials and petitions presented to the Supreme and Local Governments upon the subject.

2. The Lieutenant-Governor has read the Minute with much interest. It gives a clear and complete review of the existing system of administration; and, while it points out that the evils of which complaint has been made are partly exaggerated and partly such as cannot be checked by Government interference, it does not hesitate to admit that the vice of intemperance has increased in large towns and among the upper classes of Native society, and it suggests measures, both executive and legislative, for restraining as far as possible the tendency to excess in the consumption of intoxicating liquors. The Lieutenant-Governor deems it right to say that in his opinion the Minute furnishes a complete answer to the charge which has been brought against Government of encouraging the growth of intemperance by praising and promoting those Revenue Officers who increase the facilities for drinking in the districts under their charge. Whatever may have been the case in former times, it is clearly shown that of late years it has been the object of Government and of the Board to limit the traffic while increasing the revenue. I am directed to convey the thanks of the Lieutenant-Governor to Mr. Money for his lucid and able paper on the abkaree administration.

3. The views of the Lieutenant-Governor upon the general question of the reality and magnitude of the evils complained of, and of the policy which should be adopted by Government to counteract them, have been embodied in a separate Minute, which will be submitted for the consideration of the Governor General in Council as an expression of His Honor's opinion upon the matters in issue. A copy of this Minute is forwarded herewith. A Bill (the draft of which Mr. Money has been good enough to prepare at the Lieutenant-Governor's request) will also be introduced, with the assent of the Supreme Government, into the Bengal Legislative Council, for the purpose of supplying some defects which experience has brought to light in the law as it at present exists.

4. With regard to the measures which the several memorialists desire to see introduced, and which are enumerated in the 3rd paragraph of Mr. Money's Minute, I am directed to communicate the following instructions and remarks.

5. The imposition of higher rates of duty and license fees is already receiving due attention. The duties on both ganja and opium have been considerably increased, as is shown by the figures given in paragraph 46 of the Minute. A fee has lately been levied upon licenses for selling opium. The fees for the sale of both country spirits and imported liquors have been largely increased by the introduction of the auction system. The policy which has dictated the introduction of these measures is still being steadily pursued. The Lieutenant-Governor in his recent Resolution on the Excise Report for 1873-74 has expressed his willingness to assent to the imposition of a higher duty on ganja, and he has lately recommended to the Government of India an increase of the duty upon imported brandy. In paragraph 68 of the Minute the Member-in-charge has stated that it will be his wish to keep on gradually raising the duties on both ganja and opium.

6. The Lieutenant-Governor agrees with the Member-in-charge in thinking that it would be impracticable to introduce into Bengal any measure which should make the existence of a shop in a given locality dependent upon the votes of a certain proportion of the residents or rate-payers. The question has for some years been much discussed in England, and those who advocate such interference have failed to show it to be either beneficial or justifiable. And independently of this consideration, the Lieutenant-Governor feels that it would be extremely difficult to obtain a real expression of the opinion of residents or rate-payers on the subject. The same objections apply to the proposal to transfer the power of granting licenses from Collectors to Municipalities. The power must, His Honor thinks for the present at least, remain with the Revenue authorities, and he feels confident that those authorities will exercise a judicious discretion in the matter.

7. The limitation of the number of shops generally throughout the country is already the subject of continual and watchful care. The imposition of higher rates of license fees is in itself calculated to diminish the number of shops, and it is now the practice to fix at the beginning of each year a maximum number of shops for each district, which is not under any circumstances to be exceeded. In districts in which the monthly-tax system prevails, no outstill is allowed within four miles of another. It is clear that restrictions of this kind cannot be carried beyond certain limits. A demand exists which will be met by the opening of illicit sources of supply if the establishment of licensed shops is prohibited. In determining the number of shops, as in the regulation of the amount of duty and license fees, it must be our object to do nothing which will stimulate the demand, and to contract the supply in such a manner as to check consumption without affording an irresistible temptation to evasion or violation of the law. The Lieutenant-Governor observes with satisfaction that the returns of the past year show a considerable decrease in the number of shops in the majority of districts, and especially in Calcutta, and he trusts to the vigilance of the Member-in-charge to maintain these necessary restrictions.

8. The Lieutenant-Governor is not prepared to enforce a rule prohibiting all consumption of liquor on the shop-keeper's premises, nor to provide that no shop shall have either door or window except in front on the road side. The former of these proposals would not, he thinks, promote the cause of temperance, for the effect of it would be that the man who wanted a glass of liquor would be compelled to buy a bottle. In some of the memorials which have been presented to Government, it has been urged that back-doors and windows afford facilities for smuggling out liquor at prohibited hours. This, however, is a matter of police administration rather than of excise, as the existing rule would be sufficient if it were properly enforced. And though the suggestion of the memorialists, if it were adopted, would make the enforcement of the rule more easy, it would do so at the cost of an amount of public inconvenience altogether disproportionate to the benefit derived from it, and it would bear with equal harshness upon those shop-keepers who now observe the law, and upon those who now violate it. It is not asserted that these irregular practices are universal,—it is not probable that they are even general; but the regulation which the memorialists desire to enforce would apply to all shop-keepers alike, and the Lieutenant-Governor is therefore unable to assent to it.

9. With regard to the other remedies proposed by the memorialists, and noticed in the 3rd paragraph of the Minute, I am directed to express the concurrence of the Lieutenant-Governor in the remarks of the Member-in-charge. There appear satisfactory reasons against the promulgation of a rule requiring all shops to be closed at sunset, and the Lieutenant-Governor is of opinion that the employment of a special staff of excise police would serve no useful end which could not equally be attained by the employment of the existing police force. It is however important, His Honor thinks, that the police should be encouraged to co-operate to the utmost in the enforcement of the excise laws and regulations, and any police officer who shows marked activity and success in this department of his duties should be noticed for promotion and reward.

10. The Lieutenant-Governor has taken note of the remark of the Member-in-charge, that the sale at dispensaries of alcoholic liquor under the guise of medicine is an evil which requires to be checked by stringent regulations. Sir Richard Temple fears that there is good ground for the complaints made regarding the existence of this abuse, and that the facilities for obtaining intoxicating drinks in this manner serve to throw temptations in the way of many who would be restrained by a feeling of self-respect from resorting to shops which are avowedly open for the sale of liquors. The repression of this traffic is a matter of considerable difficulty; but the most effectual means appears to be the enactment of a provision for keeping a register of all such sales, in which the names and addresses of the purchasers shall be entered. Sections providing for this have accordingly been introduced in the draft Bill submitted to the Government of India.

11. In conclusion, I am to say that the Lieutenant-Governor desires that the earnest and unremitting vigilance of the Member-in-charge and of all Revenue Officers of Government may be exercised in the supervision of this department of the administration. The Minute which the Member-in-charge has submitted indicates, in His Honor's opinion, the true principles upon which our policy in this matter should be founded, and it is only necessary to maintain a careful attention to these principles in all the details of excise management.

(Sd.) H. J. REYNOLDS.

No 4.

Minute by the Lieutenant-Governor of Bengal, dated 18th February 1875.

From the Revd. J. D. Don and 26 others.
Ditto Bengal Temperance Society.
Ditto Rajah Romanath Tagore and 51 others.
Ditto Rajah Kalikishen Bahadoor and others.
Ditto Baboo Keshub Chunder Sen.

FOR some time past the memorials marginally noted, regarding the operation of the excise system of Bengal, have been under the consideration of the Government. The subject was referred to Mr. Alonzo Money, C.B., who, as Member of the Board of Revenue for the provinces under the Government of Bengal, has the general charge and supervision of the Excise Department, relating to liquors, spirits, and drugs; who possesses great experience of the whole department; and who may be regarded as the first local authority on the subject. He has now reviewed the case with much care and thought, collated the most noteworthy opinions bearing thereon, and expressed his own conclusions in a lucid and interesting manner. After much discussion with various authorities, I have to declare my general concurrence in Mr. Money's valuable report, for which indeed the Government is much indebted. Nevertheless I deem it right to state briefly my own opinion on the main points at issue.

2. The memorialists, chiefly Native gentlemen of position and education, partly also European gentlemen whose benevolence entitles them to respectful attention, appear to believe that the consumption of liquors, spirits, and drugs is increasing to a harmful extent among the people of these provinces, and that repressive action is not sufficiently exerted by Government upon this dangerous tendency.

3. On the one hand it is matter for regret that so many estimable persons should feel themselves obliged to entertain such apprehensions; on the other hand it is matter for satisfaction that so many of the leaders of Native society, and so many European gentlemen, whose good disposition must give them influence with the natives, are manifesting a lively interest in these questions. Whatever may be the action of Government, there can be no doubt that the moral force of opinion will be effective and beneficial; and the memorials now under consideration supply an earnest that this force will be duly brought into play. If, therefore, I am unable to follow the memorialists in all their statements, and have to differ with some portions of their opinions, I should still desire to evince every respect towards their views.

4. They may be sure that the Government entirely agrees with them in thinking that any general excess in the consumption of liquors, spirits, or drugs is really a national evil; that, so far from encouraging its existence or its growth for the sake of the revenue, the Government already does, and will willingly do, everything in its power to impose a check, or to exercise repression upon any excess; and that the efforts of Government in this direction are only limited by considerations of the practicability or otherwise of attaining actual success in such repression. Whether or not in former periods, separated by many years from the present time, the excise laws, or the administration of them, may have indirectly led to expansion of the consumption, it has been shown that no such effect has been produced during recent years, and that on the contrary every endeavour is made to prevent any such effect arising. The result of the fiscal regulations of Government now is to render liquors, spirits, and drugs dearer than they would otherwise be; to place some artificial restrictions on the production and sale of these articles; and *pro tanto* to impose a check on consumption. It is impossible to doubt that but for these fiscal regulations the consumption would be greater than it is; and that if the present system of taxation upon these articles, and the consequent interference on the part of the State, were to be abandoned, there would be an increase in the consumption. If it be an object morally (as I quite admit it to be) to do all we properly can to prevent the consumption exceeding reasonable limits, then that object is in some degree effected by the fiscal interference, without which indeed even this degree would not be attained. In making its arrangements, the Government is not influenced by the desire of fiscal advantage, nor by the fear of fiscal loss. If any measure or proceeding of this nature could be demonstrated to be capable of checking excessive consumption, the Government would not be deterred from introducing it by the prospect of diminution in the revenue. If such measure or proceeding should promise an enhancement of the revenue, the Government would refrain from adopting it if there were reason to fear that an excessive increase of consumption would be a concomitant result.

5. But it must not be forgotten that, in making its arrangements, the Government is never free from the question as to how far it is possible to check the consumption. It is not possible to stop the consumption altogether, nor even to attempt to check it in any very great degree without introducing a fresh class of evils. Nothing would be easier, in the first instance, than to do all that is recommended in the memorials, to shut up public distilleries, to close shops, to withhold licenses for production and vend, to pass prohibitory regulations. But all this would utterly fail to stop, or even check, manufacture. One main result would be that the manufacture, which is now licensed and controlled, would continue, though illicit, and would be without any really practical control. While, on the other hand, new evils, namely, inquisitorial proceedings on the part of Government officials, and persistent evasion on the part of the people—both circumstances directly conducing to demoralisation—would be introduced.

6. It is to be remembered that the materials from which liquors and spirits are manufactured, namely, molasses, rice, and the flowers and juice of certain trees, are articles produced in the greatest abundance in the country, are most easily obtained, and yield liquor or spirits

by the cheapest and simplest processes within reach of the poorest persons. If, therefore, any section or sections of a vast population desire (as they certainly do desire) to make liquor or spirits, it is not in the power of the most highly organised Government to altogether prevent them, without at least resorting to measures more injurious even than excessive consumption.

7. The problem, therefore, is how to impose adequate restrictions without offering a clear premium on smuggling and other illicit practices; how to frame the fiscal laws and rules in such manner that there shall not arise any undue temptation to infringe them. The practical solution of this problem has long occupied, and will continue to occupy, the attention of the ablest fiscal officers in Bengal. I will not venture to say that a perfect solution has been yet arrived at; but without repeating the description given by Mr. Money of the several methods now in force, I will say that much progress has been made, and that if any ways can be seen for further progress, they will be followed.

8. Similar remarks may be made regarding the drugs opium and ganja. The opium, though not universally produced, is yet grown over a very extensive area. If there were to be anything like prohibition of the local consumption, (and the memorialists seem to desire something like prohibition), the temptation to illicit practices would be so great that they would spring up to a degree beyond our power of prevention. Already these practices do exist, even in the absence of any special inducement, and frequently give rise to some anxiety. From this we can imagine what they would become if such inducements were virtually afforded by prohibition of local consumption. The production of the particular sorts of ganja now in use is, no doubt, much more limited. It has been considerably restricted of late years. Whether any further restriction will be practicable, is a question under consideration.

9. I have dwelt somewhat on the foregoing considerations, because it seems doubtful whether they have been sufficiently present to the minds of the memorialists.

10. Next, I observe that there is some difference of opinion on the question as to whether the consumption of spirits and drugs has increased of late years absolutely or relatively. It appears that the question is answered affirmatively or negatively, according as a longer or a shorter period is taken for the purpose of comparison. On the whole, I believe, that there has been no material increase whatever within the last five years, and that there is no tendency whatever towards excessive increase among the population as a whole.

11. I have said no 'excessive increase,' because it cannot be affirmed that there will be no increase either absolutely or relatively. It is an obvious fact that the population is growing in numbers; it is almost certain that they will not diminish their average rate of consumption per head: it is, on the contrary, probable that they will slightly augment the rate, as their resources and prosperity increase. We may suppose that some of the agricultural and labouring classes will, while erecting better cottages, using better household utensils, wearing better clothes, and eating a better ration, slightly add to their consumption of liquor. If they do, they will not be acting differently from other nations; nor could such a consequence be deemed unreasonable.

12. But I cannot discover, either from the evidence in the possession of Government, or from the enquiries I have been able to make while travelling about the country, that excessive consumption of drugs or spirits is prevalent among the people as a whole. The best calculation that I can obtain seems to shew that the people of these provinces do not drink more than a wine-glassful of spirits per head in a year. It is difficult to imagine how as a people they could drink a smaller quantity, unless they abstained altogether. Any supposition that they are becoming at all addicted to intemperance would be unjust to them. Taken in the mass, they must be regarded as a sober, quiet, and abstemious people. Neither has it been shewn that crime is in any part of these provinces attributable to intemperance. A similar calculation as regards opium shews that the consumption does not exceed one ounce per annum for fourteen persons, which may be considered an extremely low average rate.

13. It is probable that a great part of the people never see spirits at all. Among the lower classes, the only class who enhance their consumption are the labourers who are congregated upon large works and industries belonging either to the State or to individuals or to corporations. With these particular classes there is not as yet any reason to apprehend excess, especially when the severity of their toil is borne in mind.

14. But I fear that to this generally favourable description there is one notable exception to be made, and that relates to several sections of the educated classes among the natives at the Presidency town (Calcutta) and at other large centres of national life. With these sections (which I trust are limited sections), intemperance appears to be on the increase. This fact is derived not at all from foreign or hostile evidence, but from the testimony of the best informed among the natives themselves. Such a circumstance cannot but cause sorrow and concern to the Government, inasmuch as these are the very classes who are bound to us by many ties of common subjects of study, a common vehicle of thought and expression, and common examples of knowledge for imitation. Some measures in detail have been proposed for counteracting this most sad and unfortunate tendency; but I cannot hope that any such will prove efficacious unless the moral sense of these classes themselves shall restrain them from intemperance, unless the weight of public opinion shall help to enforce the necessary abstinence. I know that among the best educated sections of the native community many classes are still proof against this miserable temptation. Having regard to the intellectual industry which distinguishes the whole of these sections of the people, to the desire to excel in mental pursuits

and to win their way in life which animates them all, I cannot but hope that those who have yielded, or are inclined to yield to this temptation, will eschew their dreadful error before it is too late, and will return to the principles of that sobriety which is honourably characteristic of their nation generally.

15. I apprehend that it is the contemplation of this intemperance among a limited section of the people under their immediate observation which has induced the memorialists to generalise (as I think) too much, and to fear that the extent of the evil is much wider than it really is.

16. I append to this Minute copies of the instructions given to the Board of Revenue on the receipt of Mr. Money's report, and a draft of the Bill which he has prepared for submission to the legislature in accordance with his several suggestions which have been approved by the Government of Bengal.

RICHARD TEMPLE.

No. 5.

Dated Calcutta, the 20th March 1873.

To His Honor the Lieutenant-Governor of Bengal.

The humble petition of Revd. John D. Don and 26 others, Members of the Calcutta Missionary Conference.

Humbly sheweth,—

That, in the opinion of your petitioners, drunkenness and the immoderate use of liquor is increasing in this country, particularly among the Native community, to an alarming extent.

2. That the greater facilities afforded for the purchase of spirituous liquors and intoxicating drugs, by the increased number of vendors and the extension of time in the evening during which they may carry on their trade, have originated and encouraged much drunkenness.

3. That whatever may be the published opinions of certain Government officers and others, as to the advantage and even harmlessness of using intoxicating drinks and drugs, your petitioners view with satisfaction your Honor's recorded opinion, that "the increasing use of stimulants throughout the country, and more especially among the better educated classes, is a thing to be deeply deplored," and that your Honor "is not prepared to admit that in this country there is any class of the peasantry to whom even a moderate use of stimulants is beneficial. But that however this may be, there can be no doubt that the growing use of European spirits among the upper classes, who lead a sedentary life, is purely injurious."

4. That the efforts now making by English statesmen to regulate and control the liquor traffic in the United Kingdom, and the discussions in Parliament and by the Press generally, may, in the judgment of your petitioners, assist your Honor in devising a wise and efficient measure for diminishing this fruitful source of vice and crime.

5. That, without presuming to suggest to your Honor which department of the Government executive should be entrusted with the weighty responsibility of granting or withholding licenses to sell intoxicating drinks and drugs, and without offering any opinion as to how far the provisions of any measures submitted to the legislature of other countries may be suitable to the requirements of Bengal, your petitioners, relying on your Honor's experience and judgment, humbly pray—

(1)—That measures be taken to obtain an authoritative record of the opinions of representative men of various classes as to the extent to which drinking habits and drunkenness have increased in this country during the last ten or fifteen years.

(2)—That if, as your petitioners regret to think will be the case, it be found that drunkenness is greatly increasing, your Honor will devise adequate means for discouraging and suppressing it.

(3)—That, in any new law your Honor may see fit to originate, provisions be made that no shop for selling liquor or intoxicating drugs be licensed if objected to by two-thirds of the householders or residents in the neighbourhood; that the protest of two-thirds of such householders against any existing liquor or drug shop may ensure its removal; and that it be illegal to sell intoxicating drugs or liquors before sunrise or after sunset.

And your petitioners as in duty bound will ever pray.

No. 6.

Dated Calcutta, the 9th December 1873.

To His Honor the Lieutenant-Governor of Bengal.

The humble memorial of Koonjo Lall Banerjee, *President*, and Peary Churn Sircar, *Secretary*, "Bengal Temperance Society"

Respectfully sheweth,—

1. That your memorialists, encouraged by your Honor's earnest and strenuous endeavours to promote the welfare of this country, and emboldened by the expression of your Honor's intentions of amending the Abkaree laws with a view to repress the vice of drunkenness,

presumed to submit a memorial on the 18th March last, offering certain suggestions calculated to remedy some of the evils of the existing system.

2. But the proposed Bill along with which your Honor's Council intended to deliberate on the suggestions, not having yet been taken up, your memorialists beg leave most respectfully to solicit your Honor's attention to the subject.

3. The vice of intemperance is spreading so frightfully among the Native population, and some of the evils of the Abkaree system are so crying, that your memorialists trust the improvement of the Abkaree laws will receive an early consideration from your Honor's Government.

And your memorialists as in duty bound shall ever pray.

Dated Fort William, the 20th March 1873.

Endorsed by the Govt. of Bengal, Judicial and Legislative Depts.

COPY forwarded to the Secretary to this Government in the Revenue Department for the purpose of obtaining the opinion of the Member of the Board of Revenue in charge of the Excise Department.

Dated Calcutta, the 18th March 1873.

From—BABOO PEARY CHURN SIRCAR, Secretary, Bengal Temperance Society,

To—The Officiating Assistant Secretary to the Government of Bengal, Judicial and Legislative Departments.

AGREEABLY to a resolution adopted at a general meeting of the Bengal Temperance Society, held on the 17th instant in the Presidency College, I have the honor to forward the accompanying memorial, to be submitted to His Honor the Lieutenant-Governor in Council, on the subject of the Bills now before the Council for the amendment of the Abkaree laws.

TO THE HON'BLE THE LIEUTENANT-GOVERNOR OF BENGAL IN COUNCIL.

The memorial of the Bengal Temperance Society.

RESPECTFULLY SHEWETH,—

THAT your memorialists view with alarm the progress of intemperance among the inhabitants of the territories under your Honor's government.

2. That your memorialists are convinced that the rapid spread of intemperance in this country is attributable to the temptations placed in the way of the people by the opening of liquor shops without any discrimination of locality or proper inquiry as to their necessity, and also to a desire among the higher classes of natives to imitate European habits and tastes.

3. That your memorialists believe that the adoption of drinking habits after the European fashion has been facilitated by the importation of low-priced spirits, and that the temptations in the way of the people have been multiplied, in a considerable degree, by the efforts of the excise officers to enhance the revenue, probably stimulated by the fact that Government has often publicly recorded its approbation of the conduct of such officers as have succeeded in enhancing the revenue.

4. That, though judging from the state of the liquor traffic in Europe the number of shops and the consumption of liquors in this country may not appear large, your memorialists beg to submit that, considering the well-known abstemious habits of the people of this country, the number of liquor shops that have come into existence within a short period is really alarming, especially in the great cities and commercial towns.

5. That, as the evil has not yet reached all classes of the population and all parts of the country, your memorialists are humbly of opinion that advantage should be taken of the facilities now existing to restrain its growth and prevent its extension.

6. That your memorialists therefore hail with joy the introduction of two Bills in your Honor's Council for the amendment of the Abkaree laws, and beg to tender their most grateful thanks for the action your Honor has taken in Council towards the repression of the growing evil.

7. That your memorialists are extremely anxious about the results of the deliberations of your Honor's Council, and trust that, under your able guidance, the Council will not hesitate, even at some sacrifice of revenue, to introduce such positive improvements in the Abkaree law as will materially promote the well-being of society.

8. That, under the foregoing circumstances, your memorialists beg leave to offer the following suggestions, which, if adopted, will, they are persuaded, remedy some of the more manifest evils of the present system:—

I.—That the number of liquor shops be limited, and their localities fixed and confined to the least objectionable parts, as far as practicable.

II.—That no liquor shops be allowed to exist in the vicinity of educational institutions or places of public worship.

III.—That no license be given or renewed for a shop at any place where two-thirds of the local ratepayers object to such traffic.

IV.—That liquor shops be erected on plans approved by Government with only one entrance, and that opening on the public street, and with such wired windows in the walls as will afford facilities for inspection from outside.

* "Every person licensed to sell spirituous or fermented liquors or intoxicating drugs, who shall permit drunkenness, riot, or gaming in his shop, or shall permit persons of notoriously bad character to meet or remain therein, or shall receive any wearing apparel or other effects in barter for liquor or drugs, shall forfeit for every such offence a sum not exceeding Rs. 200."

V.—That the legal restrictions already existing be strictly enforced; section 45 of Act XXI of 1856,* for instance, being daily violated with impunity.

VI.—That all liquor shops be closed at sunset, as was the case for several years in Calcutta.

VII.—That, as it is believed that intoxicating drinks are obtained from certain dispensaries during the hours of night, dispensaries be carefully looked into with a view to prevent the sale of intoxicating liquor except on *bonâ fide* medical prescription.

VIII.—That the sale of liquors in hotels or similar public places of entertainment be regulated, as far as practicable, so as not to defeat the objects of abkaree legislation.

IX.—That no licenses be renewed to shop-keepers who have been convicted of offences under the Abkaree laws.

X.—That officers of Government be strictly enjoined not to permit liquor shops to be opened merely for the sake of increasing the revenue.

XI.—That the rates of license fees, and the duties on country spirits, rum, and imported liquors and other intoxicating drinks, as well as on opium and other drugs, be raised so high as to afford the greatest possible discouragement to their use.

XII.—That a staff of efficient and reliable officers be especially maintained to watch the working of the Abkaree system, and to see to the strict enforcement of the abkaree laws.

And your memorialists, as in duty bound, shall ever pray.

RAJA KALI KRISHNA BAHADOOR,
President.

CALCUTTA,
The 17th March 1873.

PEARY CHURN SIRCAR,
Secretary.

No. 7.

TO HIS EXCELLENCY THE VICEROY AND GOVERNOR GENERAL IN COUNCIL.

The humble memorial of RAJAH ROMANATH TAGORE, and 51 others, inhabitants of the Bengal Presidency.

RESPECTFULLY SHEWETH,—

That your memorialists contemplate with great anxiety and alarm the increased consumption of intoxicating drinks and drugs by the native population of this country, and its frightful effects upon their health and morals.

That your memorialists deem it superfluous to describe the nature and extent of the evils inflicted on the country by intemperance. Besides vitiating the health, intellect, and character of thousands, desolating many a home, and impoverishing many a family, it has proved a prolific source of crime and immorality in their worst forms, and unchecked in time is calculated, more than anything else, to frustrate the efforts of all who are working for the welfare of the people.

That by far the most distinguishing characteristic of the people of this country, whether Hindoos or Mahomedans, has been their religious abstinence from intoxicating drinks. Long as the Hindoos have been under foreign sway and under rulers following hostile forms of religion, the vitality they have shown as a nation, with distinct institutions, customs, and traditions, is generally admitted to be remarkable, and this vitality, your memorialists venture to submit, has been not a little due to their immunity from the vices of intoxication. If they had not religiously fostered a habit of temperance, many of the domestic virtues which grace the Hindoo in the bosom of his family, and which contribute so much to his social happiness, would have disappeared.

That, although the bulk of the people of this country, whether Hindoos or Mahomedans, are still free from the vice of drunkenness, still the inroads, which this pernicious habit is steadily making among all classes of native society, are so terrible and rapid that, unless the Government takes timely and effective measures to arrest its progress, the evil will have reached a stage when it will be past remedy.

That, in the humble judgment of your memorialists, a stringent law and a strict execution thereof are needed to effectually repress the evil under notice. They are so thoroughly convinced of the pernicious consequences of intemperance upon the health, morals, and true well-being of a nation, that they would not have hesitated to urge a complete suppression of the trade in intoxicating drinks as has been done in some states of America could they but feel sure that the Government was prepared to interfere with the requirements of the European residents and surrender the large revenue derived from it. Nevertheless they would earnestly solicit your Excellency in Council to consider the propriety of so raising the duty on indigenous and imported spirits as to discourage the consumption of the same as much as possible; as to impress upon the people that the costliness of liquor was a proof of the disapprobation and disfavor with which the Government regarded its use; as to place it, if practicable, beyond the reach of those—and their number is legion—who live by the sweat of their brow, and through whom

this vice entails great misery upon thousands of innocent women and children that depend upon them for their livelihood.

That, although the duty on spirits, both indigenous and imported, has from time to time been increased, the consumption has by no means abated. Your memorialists are willing to admit that without the repressive action of the legislature the consumption of spirits would have gone on increasing in a much greater ratio than it has done; but, however benign the intentions of the legislature, the abkaree officers can scarcely be credited with a loyal zeal to give due effect to them. Ample facilities have, on the contrary, been given for the multiplication of shops; and thus where there were one or two shops before, five or ten have now sprung up; the excise officers have been practically taught to look to the increase in the number of shops and consequent increase of revenue for promotion, and those who have so distinguished themselves have not unfrequently been honored with favourable mention in the annual reports of superior authorities. The Police, it is admitted in the last annual report of the Commissioner of the Calcutta Police, are not unoften in league with the owners of liquor shops; and what is the case in the metropolis, is equally, if not in a greater degree, the case in the mofussil.

That the Government may by its own example effect much in promoting temperance. For instance, if there had been a rule to the effect that any Government servant who was convicted of drunkenness in a Magistrate's Court, or who might be guilty of breaking official discipline, or neglecting his legitimate work from indulgence in intoxicating drinks, would be visited with condign punishment, a healthy moral influence would have been exercised not only upon the native officers, for your memorialists speak of them only, but also upon the native community at large. What your memorialists deeply regret is that there is nothing in the laws, proceedings, or actions of the Government which shows that it views with disapprobation the habit rapidly growing among the native population of this country of indulging in intoxicating drinks.

That your memorialists equally deplore the increased consumption of ganja and opium. Writing about ganja, the Commissioner of Patna says that "nothing so soon touches the brain or is more harmful to the consumer. Our lunatic asylum shows how frequently patients enter whose abertation of intellect is wholly due to an undue indulgence of this harmful drug. It would be well if its use could be prohibited altogether." "I look on the consumption of [illegible] the Commissioner of Dacca remarks, "as an unmitigated curse. It has no redeeming [illegible] is a fertile source of crime most dangerous to public, and is more than any other [illegible] of admission to lunatic asylum. I should like to see every check placed on the [illegible], and consumption of ganja, which would not lead to extensive smuggling." The [illegible] statement embracing seven years shows that, with the exception of the famine years, consumption is steadily increasing:—

Period.	Flat. Mds.	Srs.	Ch.	Round. Mds.	Srs.	Ch.	Chor or Rora. Mds.	Srs.	Ch.	Total. Mds.	Srs.	Ch.
1864-65 ...	7,730	32	8	1,267	25	4	49	28	0	9,048	5	12
1865-66 ...	7,221	13	14	1,472	5	0	68	5	7	8,762	14	5
1866-67 ...	6,357	14	0	1,101	27	7	44	4	10	7,563	6	1
1867-68 ...	7,811	6	4	1,347	38	9	38	17	1	9,927	21	14
1868-69 ...	7,857	2	1	1,258	35	9	26	0	8	9,141	38	2
1869-70 ...	8,127	29	11	4,231	21	13	7	5	4	9,366	16	2
1870-71 ...	8,963	21	2	1,412	1	6	18	8	3	10,393	30	11

Last year the consumption increased by 317 maunds 4 seers and 8 chittacks.

It is true that from April 1872 the duty has been increased from Rs. 2 to Rs. 2-8 per seer, but your memorialists take leave to doubt whether this slight increase will have any appreciable effect in consumption.

That the consumption of opium is also rapidly spreading through the country. The following statement shows the extent of increase:—

	Consumption. Mds.	Srs.	Ch.	Net Revenue. Rs.
1851-52	196	26	0	35,399
1852-53	145	37	0	26,266
1853-54	70	33	0	12,748
1854-55	203	8	0	36,576
1855-56	187	30	0	33,795
1856-57	287	14	0	51,723
1857-58	270	6	0	48,627
1858-59	263	29	0	47,470
1859-60	279	19	0	83,818
1860-61	632	11	0	2,14,973
1861-62	1,264	19	0	4,29,922
1862-63	1,612	5	0	5,13,681
1863-64	1,803	5	0	5,25,261
1864-65	1,822	24	0	8,14,003
1865-66	1,922	8	0	9,90,578
1866-67	1,695	5	0	9,99,810
1867-68	1,821	7	0	10,74,902
1868-69	1,737	16	0	10,25,064
1869-70	1,399	7	0	9,43,070
1870-71	1,572	5	0	9,27,191
1871-72	1,655	15	8	9,74,142

That in certain districts whole populations have taken to the pernicious habit of consuming opium. This is notably the case in the Orissa districts. The Collector of Balasore writes:—"Opium is the bond of this district, and destoys and enfeebles more human beings than anything else. Here it is a true poison. Drugged with opium from his birth, the native of Balasore grows up weak, evert, and stupid; the dull glassy eye, the heavy loutish bearing, the inability to give a direct answer to a plain question, the indistinct mumbling utterance, the utter prostration of system caused by slight fever, are all signs of the deadly influence of the drug."

The Commissioner of Orissa observes:—"Opium eating is yearly becoming an engraved habit with all classes, all sexes, and ages, notwithstanding its high prices; that the Government system has facilitated this, there can be no doubt. There are shops in every large village, and large quantities are annually consumed. The drug appears to be eagerly sought for, and to have become almost a necessary of life."

That a greater misfortune cannot befall the country than a deep-rooted habit of opium taking. It not only affects the health and energy of the generation addicted to it, but also of succeeding generations. It is therefore the imperative duty of the State to discourage as much as possible the consumption of opium.

This object might be attained if the consumption of opium were prohibited except as a medicine.

That the evils flowing from the consumption of intoxicating drinks and drugs noticed above are really appalling; and as the benign Government, under which it is the good fortune of the people of this country to live, watch with parental solicitude the health and morals of the millions under its sway, your memorialists feel confident that Your Excellency in Council will see the propriety of taking prompt and effective measures for repressing the spread of the evil habits which they have humbly sought to bring to Your Excellency's notice. If these measures should involve a sacrifice of revenue, your memorialists respectfully, but earnestly, submit that the high moral and national interests which would be thus subserved would more than compensate the pecuniary loss.

Your memorialists accordingly pray that Your Excellency in Council will be pleased to take into consideration the above facts, circumstances, and suggestions, and to [illegible] measures for the prevention of the evils under notice as may to Your Excellency [illegible] seem fit.

And your memorialists as in duty bound will ever pray.

No. 8.

To His Excellency the Viceroy and Governor General of India in Council.

The respectful memorial of Raja Kali Krishna Bahadoor, and others, inhabitants of the Bengal Presidency.

Respectfully Sheweth,—That your memorialists have viewed with considerable anxiety and alarm the spread of intemperance among the native population, and its frightful effects on their health and morals.

That in the opinion of your memorialists this great and growing evil is to a great extent attributable to the large number of liquor shops opened in different parts of the country, and the temptations thereby placed in the way of the people. Such temptations have naturally worked with peculiar force on the mind of a nation always distinguished for habits of sobriety and abstemiousness, but whose ideas and principles have lately been unsettled by English education and an aggressive civilisation. It is a well known fact that among the higher and more educated classes, and in places long subjected to British rule and the influence of Western refinement, the worst effects of intemperance have been realised.

Your memorialists deem it unnecessary to describe the nature and extent of the manifold evils inflicted on the country by intemperance. Besides vitiating the health, intellect, and character of thousands, desolating many a home, and impoverishing many a family, it has proved a prolific source of crime and immorality in their worst forms, and has done more than anything else to frustrate the efforts of all who are working for the welfare of the people. Your memorialists believe that, if full and proper inquiries be made into the actual effects of intemperance on the natives of this country by a Commission duly appointed, the same conclusive testimony will be elicited as is recorded in the famous report submitted in 1869 by the Committee of the Lower House of Convocation of the province of Canterbury in England.

Your memorialists are convinced that, though much can be done towards the mitigation of this social vice by the diffusion of sound education, the moral influence of example, and the control of public opinion, no permanent or effectual remedy can be expected without an improved and stringent system of legislation.

Your memorialists therefore humbly invite Your Excellency's attention to the following suggestions, which they trust will meet with your approval :—

1.—The closing of liquor shops at 6 P.M. every evening, especially on Saturdays.

2.—The closing of liquor shops situated in the vicinity of educational and religious institutions and places of business, and in localities where the majority of the inhabitants object to the existence of such shops.

3.—The erection of shops according to a plan to be prescribed by the legislature, so that they may have no back-door, and all the doors and windows may be on the roadside.

4.—The prohibition of the sale of liquor by publicans for consumption on their premises.

Your memorialists are of opinion that the public welfare would be best consulted if some power of restraining the issue of licenses were vested in those most deeply interested—namely, the people themselves; and they therefore beg to suggest that no license should be granted or renewed without the consent of the majority of the local rate-payers.

Your memorialists beg respectfully to express their disapproval of the custom hitherto observed by the local Government of awarding high praise to subordinate officers for their successful efforts to increase the excise revenue. Such recognition, upon which prospects of promotion and increased emoluments often depend, cannot but serve as an indirect inducement to Government officers to seek the multiplication of liquor shops in the country, by persuasion or pressure, and without any regard to the moral interests of the people.

Your memorialists believe that the number of liquor shops in each city, town, and village ought to be limited according to area, population, and actual demand.

Your memorialists humbly and respectfully pray that your Excellency will be pleased to take their suggestions into consideration, and adopt such measures as to your Excellency in Council may seem necessary to remedy the evil.

No. 9.

From—BABOO KESHUB CHUNDER SEN,

To—His Excellency the Right Hon'ble the Viceroy and Governor General of India.

I HAVE the honor to submit, in compliance with your Lordship's request, the following statement of my views and opinions on the working of the excise system in Bengal; its effects on the health and morals of the people, and the reforms it urgently needs.

Spread of intemperance.

It is generally believed that there has been a considerable increase of drunkenness among the native population of late years, especially among the better educated classes. The wide prevalence of the evil is admitted and deeply regretted by the leading representatives of all sections of the community —Hindoo, Mahomedan, Christian and Brahmo—and is a subject of frequent complaint in the local Press. Nor is official testimony wanting. In the Excise Report for 1870-71 the Board of Revenue remarks that "a very large majority of Mofussil officers are of opinion that the use of stimulants by the people is steadily on the increase; and that this increase is far more noticeable among the better educated than among the poorer classes." His Honor the Lieutenant-Governor also observes: "The increasing use of stimulants throughout the country, and more especially among the better educated classes, is a thing to be deeply deplored." Of the exact extent of the increase of intemperance in this country it is impossible to form a correct estimate in the absence of complete and authentic information, which can only be furnished by Government officers. It is of the highest importance that Government should appoint a Commission to investigate the real extent of the evil. A reference to Magistrates and Police Officers, Superintendents of Jails, Hospitals, and Lunatic Asylums, Clergymen and Missionaries, and the leading members of the Native community, will elicit a mass of reliable facts which will shew how far the evil has spread among the people and infected their physical and moral life. There can be no doubt, however, that intemperance has increased to an alarming degree, as will appear from the numerous testimonies of Native and European gentlemen, official and independent, hereto appended for your Lordship's information.

Causes.

The chief causes to which the spread of intemperance is attributable are the unsettlement of popular faith and ideas in consequence of the spread of English education and the unnecessary multiplication of liquor shops. It is undeniable that in this country English education and civilization are not only removing prejudices and errors, but are also effecting a radical change in the tastes, habits, and manners of the native population, and loosening the bonds of attachment to old customs and institutions. In this state of social transition, and amid such sweeping innovations, the contract of the enfranchised native mind with the allurements of a new vice cannot fail to produce the most disastrous effects. Many enlightened youths, who had never before tasted wine, have been drawn, year after year, into habits of intemperance and dissipation by the formidable temptations afforded by the liquor shops which abound in the land. These shops clearly tend to increase drunkenness, inasmuch as they tempt the people and afford facilities for drinking. In villages where fewer shops exist, and the ancient simplicity of the people has not yet been invaded by foreign influences, the vice is much less than in great cities and towns.

Effects.

The effects of intemperance upon the health and morals of the people are indeed of the most appalling description. The use of intoxicating liquor is the bane of the country. The incalculable mischief it has wrought, physically and morally, proves it to be an unmitigated curse. It has been found to impair the health and deprave the character of thousands. The happiness of many a family has been embittered, and the tenderest and sweetest relations of domestic life have been outraged; wives and children have been left to starve—nay, more, the sin of the intemperate father has been visited on his emaciated and sickly offspring. To drunkenness may be traced many of the worst types of disease which afflict the people, and under whose effects many alas! have been hurried into a premature death. Where it does not produce specific diseases of a grave character, it debilitates the constitution and enfeebles the nervous system; and it may justly be regarded as one of the chief causes of the degeneracy of the Bengalee race. That the habitual use of strong drinks more rapidly and effectively undermines the constitution in a tropical country than elsewhere is generally admitted, and does not admit of doubt or controversy. When along with this we take into consideration the fact that, excepting the lower classes, the natives of India generally are not accustomed to drink from early life like European nations, we can easily understand why they so readily succumb to the influence of a new temptation, and why the ravages of intemperance in this land are so destructive and fatal. During the last decade some twenty of the ablest and most useful members of native society have died of intemperance, leaving behind them the influence of their corrupt examples. Crime and immorality are also in a large measure attributable to this cause. The instances of petty crimes and heinous offences committed under the influence of drink are of frequent occurrence, as may be proved by the criminal records of the country. But far more numerous and serious are the cases of those who have wrecked their character and sunk into the lowest depths of depravity, dragging a large circle of associates and neighbours into the vortex of their contagious influence. Such instances of vice and immorality seldom fall within the range of public observation; they only draw forth the wife's secret tears, rend the father's heart with deep anguish, and excite the patriot's gravest anxiety. It is indeed harrowing and painful to contemplate the extent to which sensuality, profligacy, and brutal revels on the one hand, and irreligion, blasphemy, and practical atheism on the other, are making ravages among all classes of the Native community in consequence of the spread of drunkenness, and undermining the religious and moral life of the nation. What has specially excited alarm in the minds of many is the fact that the vice is no longer confined to persons of mature age, but has recently begun to affect the young also. Even boys of 15 and 16 years of age are found to indulge in the excesses of drinking. Nor is it possible to overrate the amount of destitution and pauperism caused by drunkenness. How many families that have been ruined and reduced to penury, how many helpless widows and starving orphans, can trace their misery to the intemperance and improvidence of those on whom they depended! Of the pauper population hanging on public charity a great many are victims of drunkenness. Indigence increases as men's resources and means fall into the hands of publicans. In short, the use of intoxicating liquor has done more than anything else to degrade the physical, moral, and social condition of my countrymen, and has proved a stupendous obstacle in the path of reformation. Patriots and philanthropists of all classes, who are engaged in diverse ways in ameliorating the condition of the people, always complain that this great evil seriously counteracts and frustrates their efforts. The following unimpeachable testimony to the evil effects of drink in England applies with equal or even greater force to this country: "No evil more nearly affects our national life and character; and therefore no question more immediately demands the zeal of our clergy, the attention of our statesmen, the action of our Legislature, and the thoughtful aid of our philanthropists. Nor can any sacrifice be esteemed too costly, or any efforts too great, to check and remedy what may be shewn by accumulated and undeniable evidence to be sapping the foundations of our prosperity, blighting the future, and lowering the reputation of our country, and destroying at once its physical strength and its moral and religious life."—[*Convocation Report on Intemperance.*]

Pauperism.

Disease.

Crime and immorality.

Failure of the excise system.

It is evidently the duty of Government to adopt stringent measures for the suppression of this great evil. However active benevolent societies and individuals may be in their efforts to prevent and remedy it by moral suasion and the influence of public opinion, nothing but the strong hand of the law can fully cope with so formidable a vice. The avowed object of the excise administration is to meet public want without detriment to the public weal; and the means employed are said to be such as are calculated to increase revenue without increasing by State agency the consumption of liquor. Experience, however, has proved otherwise. Far from checking, the Excise Department has rather facilitated the spread of drunkenness by multiplying liquor shops. Any attempt to verify this charge must be superfluous when Mr. Money, the head of the Department, himself distinctly admits (*vide* Report for 1870-71, paragraph 242) that "it has always been a blot on our abkaree system that it brought temptation undesirably close to every man's

door." The Lieutenant-Governor also fully agrees with Mr. Money as regards "the necessity for putting some check upon the number of spirit shops, in the interests both of the revenue and of public morality." His Honor fears that the "Board's old maxim has been occasionally overlooked, that the excise administration should aim not at an increase of revenue alone, but at an increase of revenue combined with the greatest possible discouragement to consumption." It clearly follows from such official and weighty testimonies that the abkaree system is not what it ought to be, that it has failed to impose sufficient restrictions upon the sale and consumption of intoxicants, and that it ought to be so reformed as to cause a reduction in the number of liquor shops in the country.

Remedies.

The history of excise administration in the Lower Provinces shews a decided increase both in the revenue derived from liquor and the number of licenses issued. This remark applies to country spirits as well as foreign wines and spirits, as will appear from the subjoined figures:—

		No. of licenses.	License fees.	Duty.	Total revenue.
Country spirits ...	1867-68	4,459	1,59,219	10,50,665	12,73,383
	1871-72	7,213	3,29,573	15,29,195	19,81,468
Foreign wines, &c....	1867-68	737	58,243	9,85,543	10,43,786
	1871-72	956	70,705	10,53,400	11,24,105

The excise reports also shew a considerable increase in the consumption of imported spirits, which are extensively used by the higher classes in preference to country spirits, and may, it is said, "at no very distant date entirely supplant the latter." The quantity of foreign spirits imported in 1871-72 was 258,154 gallons against 187,194 in 1866-67. The importation of brandy has increased to a fearful extent. The total value of brandy imported in 1860-61 was Rs. 7,34,411, exclusive of customs duty; it rose to Rs. 17,71,816 in 1870-71.

Enhancement of duty.

There cannot then be any doubt that the traffic in liquor is increasing, and that alcoholic drinks are not sufficiently high priced to prevent extensive consumption. Where liquor finds such rapid and large sale and is a profitable concern, there must be the strongest inducement to multiply liquor shops. In order then to put an effective check upon the multiplication of shops and the increasing consumption of liquor, it is indispensably necessary to render the liquor traffic far less profitable and remunerative than it now is. This object would be best achieved by enhancing the duty on liquor, both country made and foreign, and by imposing higher rates of license fees. The present rates of duty and license admit of considerable enhancement, and should, I think, be doubled. The vendors have no right to complain, as their trade is remunerative and thriving. Nor can Government object to the proposal, as it only aims at a further extension of the principle which the Excise Department has always professed to follow, that the maximum amount of revenue should be raised from the minimum quantity consumed. So far as imported spirits are concerned, the Board admits the necessity of increasing the present duty. Mr. Money distinctly says he has "no doubt that foreign spirits would bear an additional duty;" and some of the excise officers have gone so far as to recommend that the duty should be raised from Rs. 3 to 5 a gallon. It is generally admitted that foreign spirits have produced the most deleterious and demoralizing effect on the natives of this country, while it is evident that their supply has never followed any real demand. The supply has created a demand. Before the English came into this country, the natives had no idea whatever of British and other foreign spirits, and cannot be supposed to have felt their want before they had a taste for them. The more these stimulants have been imported into the country and used, the greater has been the demand; and now, as the demand increases, the supply keeps pace with it. The use of such liquors in centres of population is said to be increasing with alarming rapidity among the higher classes of the native population. The Collector of Dacca says:—"When I first joined this district there were no shops for the retail of such liquors in the mofussil, and only two or three in Dacca. Now there are eight in the mofussil, and twenty-eight in Dacca. There has been with this a decided increase in the consumption of spirits, for many a man drinks brandy or rum who has never touched the country spirits. The effect on the people is bad, but I see no means of stopping it." In such circumstances it is absolutely necessary to check the consumption of liquor of all kinds, and of brandy and other ardent spirits in particular, by an enhancement of duty and license fees. As this might indirectly tend to increase the use of ganja and other noxious drugs which are already devastating the country, the duty on intoxicating drugs of all kinds should also be considerably raised.

Popular restraint on the issue of licenses.

A more stringent system of licensing ought to be adopted than obtains at present. Under the present system Government officers have the entire authority of granting licenses, and no power of control is vested in the people. And yet it is these latter who are most interested in the question and most affected by its issues. It is desirable therefore that their wishes should be consulted before licenses are granted or renewed. It would be only justice to recognise their rights in the matter, while the control they would exercise would prove highly beneficial. An unnecessary multiplication of liquor shops would be thereby avoided, their establishment in objectionable localities would be prevented, and lastly, the supply of liquor would be restricted within the limits of actual demand. In order to effect the object in view, it ought to be ruled that no new shops shall be issued by the licensing authorities, unless the applicant can produce a petition in favour signed by two-thirds of the rate-payers of the locality where the shop is intended to be placed. It would also vastly conduce to the same end if the power of granting and renewing licenses were transferred from the Collector to Municipalities, where such bodies exist.

Reduction in the number of shops.

There ought to be a considerable reduction in the number of liquor shops throughout the country. It will be found on enquiry that in some places, especially in great cities, there are too many shops at present. They are out of all proportion to the number of inhabitants in the neighbourhood, and clearly exceed the local demand. Those which are situated within a mile of others should be closed. Shops existing in objectionable localities,—in the vicinity of schools, public libraries, religious institutions, and places of business,—ought also to be suppressed. Besides a general reduction should be effected by restricting the number of shops in each city, town and village according to area, population and the actual extent of local demand. This may be done by the highest local officer of Government, in consultation with the leading members of the Native and European communities in the place. Such restrictions will exculpate the Government from the charge of bringing "temptation undesirably close to every man's door," and prove an incalculable blessing to the country by removing some at least of the sources of crime and misery. The Bombay Government has lately resolved to reduce the number of shops in the Island from 660 to 490.

Prohibition of clandestine sale.

Retail shops are generally found to possess back-doors, through which liquor is clandestinely sold at prohibited hours. Such practices have often been detected and punished, but they are far from being at an end; and there seems to be no likelihood of effectually preventing their recurrence so long as back-doors are permitted to exist. The Legislature ought to provide that shops for the vend of liquor should have no doors or windows except on the roadside.

Prohibition of drinking on the premises.

Considerable mischief is occasioned by vendors allowing persons to become intoxicated on their premises. It not only leads to disturbance, disorderly conduct, and indecency in the streets, which prove a nuisance to the people of the neighbourhood, but it enables the vendors to utterly ruin their customers by supplying as much liquor to them in their intoxicated state as they may feel a craving for. It is evidently the interest of the publican to entice men to get drunk and then to supply them with more liquor. The practice is indeed most ruinous and dangerous, and ought to be put down. Licensed vendors should be strictly prohibited from allowing any person to drink on their premises, and also from selling liquor to those who are already intoxicated. Severe penalties ought to be inflicted on those who violate such rules.

Earlier closing of shops.

Liquor shops should not be kept open till late hours, as at present. There is more drunkenness and more opportunity of indulging in its excesses at night than during the day. If therefore the shops were closed earlier, it would undoubtedly be the means of greatly checking intemperance and its concomitant vices. It appears from the Excise Report for 1870-71 that there was an increase of 12,898 gallons in the consumption of country spirits in Calcutta in that year, owing to the "extension of hour of sale from sunset to 9 P.M." It is impossible to justify this extension of the time of sale in the face of the admitted increase of consumption; and no satisfactory reasons have, I believe, yet been assigned. The Government should compel the closing of all liquor shops at sunset, as was done in this city for some years with the best results.

Discontinuance of the practice of praising officers for increasing the revenue.

The policy long followed by the Excise Department and the Local Government of praising subordinate officers for increasing the abkaree revenue is decidedly objectionable. It cannot fail to act as an indirect inducement to excise officers to promote the traffic in liquor in their respective districts by all means in their power. In their anxiety to please the superior authorities, and thereby ensure the prospects of promotion in the service, they are naturally too ready to exert the fullest influence of their official position and try in every way to increase the consumption of liquor. The enhancement of revenue becomes their sole object, and all other considerations are subordinated to it. So long as they can give effect to this object and raise the revenue, they are sure of receiving the cordial approval of the State, whatever may be the effect of their labours on the health and morals of the people. Such financial success seems to be the only merit in excise officers which is recognized and rewarded by Government, and no effort is made to enquire how far increased revenue may have been accompanied by increased consumption and the growth of disease, pauperism, and crime. This will be evident from the following remark which occurs in the Board's Report for 1852-53:—"Under the precautions taken to ensure a continuance of the same efficient management which in the case of 15 districts has raised the revenue from a little more than 3 to nearly 5½ lakhs, it is hoped that these capabilities will not be neglected. In future reports the Board will not fail to mention prominently those officers who have given marked attention to this branch of their duties." The promise has been carried out year after year, and numerous officers have accordingly been commended for the questionable merit of enhancing the revenue. Such a practice ought to be wholly discountenanced and discontinued. Those excise officers are clearly not entitled to praise who fail to reduce the consumption of liquor and check the spread of intemperance, and its consequent crime and immorality.

These, my Lord, are some of the best means of remedying the evils of that pernicious system of liquor traffic which prevails in Bengal, and more or less in other parts of British India. In laying my humble suggestion before your Excellency, I am fully aware that by adopting them the Government will have to forego a portion of its excise revenue. But the

incalculable moral blessings which will accrue to the nation will more than compensate for such a loss; and even financially considered the loss will not prove so great as is generally imagined, as the improvement in the health and morals of the people will effect a perceptible diminution in disease and crime, and a proportionate saving in the charges of hospitals, lunatic asylums, jails, and police courts. The time, I believe, has come when the whole subject of excise administration, in this and other presidencies, ought to be carefully examined in all its bearings, financial and ethical, with the view of removing the stigma which attaches to the British Government of deliberately teaching the natives of India to drink by besetting them on every side with temptations. The great success which has attended the noble and long-continued efforts of the advocates of temperance in England, in influencing public opinion and securing valuable concessions from Parliament, encourages me to hope that a Government, swayed by your Lordship's enlightened statesmanship and warm philanthropy, will readily concede the principle of the Permissive Bill to a country where the sober habits of the people render the present system of liquor traffic morally and politically inexcusable, and the application of legislative remedies to wrongs committed by the State itself through the remissness and inefficiency of the Excise Department all the more imperative. If nothing is done now to stay the ravages of this great social vice, it will steadily grow and extend on all side, and eventually assume all the strength and solidity of a confirmed national habit: to eradicate it then will be a work of hopeless difficulty. Now is the time when philanthropists, statesmen, and legislators should unite their best efforts and adopt immediate steps for repressing the growing evil. In the interests of thousands and tens of thousands of my countrymen, here and in other parts of India, I humbly pray that your Lordship in Council will be pleased to take into favourable consideration a subject which vitally affects the social and moral interests of the people, and adopt such legislative and administrative measure as may save our country from a prolific source of disease, destitution and crime.

Testimonies of European and Native Gentlemen.

The vice of drunkenness has now become so prevalent among the inhabitants of the Bengal Provinces, and is the immediate cause of so much poverty, suffering, disease and crime, that it is the manifest duty of Government to direct special attention thereto, with the view of adopting measures not only to check the spread, but to dry up some at least of the sources of this social curse.—[Memorial to the Hon'ble Cecil Beadon, Lieutenant-Governor of Bengal, presented on the 22nd March 1866].

„ James Long.

Drunkenness has within the last forty years increased enormously amongst our countrymen, especially in the middle and upper classes, so much so that the indulgence in alcoholic drinks, which at that time was considered an act sufficiently culpable to excommunicate one from the pale of the higher classes of Hindoo society, has now become, I might say, almost the fashion of the day. Our religion strongly forbids the drinking of wine. Our legislators have wisely put the strongest restrictions against its use, and reckoned it as one of the greatest of sins. The Mahomedans equally condemn it, and I confidently believe that our countrymen of all persuations would rejoice to see the suppression of this evil.—*Rai Rajendro Mullick Bahadoor.*

Drunkenness has certainly increased in this country, and that chiefly among the educated classes of the native community. The consumption of wines and spirits imported from Great Britain has increased largely, and this increased consumption is asserted to be confined chiefly to the educated classes. The abkaree system and the exertion of abkaree officers have multiplied temptations so as greatly to extend the use of intoxicating liquors and drugs.—*Peary Churn Sircar.*

In travelling through the country I have heard and learnt and seen with deep sorrow and regret that intemperance is widely spread, and I fear increasing, among the natives of this land. Evidence, such as is given in Dr. N. Chevers' able book on Criminal Jurisprudence, confirms this mournful impression. . . . I must repeat with regret that drunkenness (however quiet and silent in this country) is on the increase.—*Lord Bishop of Calcutta.*

I believe there has been a very great increase of drunkenness among the native community, particularly during the last ten years. The lower classes in Calcutta use cheap spirit and intoxicating drugs very much, but I cannot say whether they use more now than they did

ten years ago. The educated classes are, I believe, much more addicted to drinking now than they were ten years ago. Where fifty of these classes drank spirits ten years ago, a hundred drink spirits now. I believe that the action of the Excise Department has been one among several causes of the increase of drunkenness.—*Revd. J. W. E. Payne.*

There can, I think, be no possible doubt, particularly as regards spirituous liquors, that intemperance is steadily increasing in Bengal,—chiefly in the larger towns. The subject is one of very serious import, as the experience of the world has but too certainly proved that this vice leads to an increase of destitution, of disease, of mortality, and of crime. Its spread throughout Bengal might no doubt be prevented to a great degree; and now is the time for action before the evil attains wider limits. If very stringent measures were not now to be enforced, I feel convinced that within quarter of a century vast social evils would result which may (with such foresight as the Government is most wisely evincing) be averted at the present time.—*B. D. Smith,* M.D.

I confess I was very much surprised when first called on to treat diseases of the nervous system, and to detect alterations in various organs of the body produced by spirit drinking among natives of Bengal. The extent to which such habits prevail among the educated and wealthy classes, is, I am well aware, a subject for much grief to the relatives of those concerned, and I hardly think it would be making too sweeping an assertion to affirm that there is hardly a household in Calcutta to whom, more or less directly, the question of the habits which they witness with distress is not a personal one. Although every family has not the sad experience within its own walls, I doubt very much whether most of them could not produce an instance of misery and shame brought very closely home to them in the persons of those related to them by consanguinity or marriage.—*T. E. Charles,* M.D.

Drunkenness is decidedly on the increase, and its influence upon health is very injurious.—*S. G. Chuckerbutty,* M.D.

Testimonies of the Press.

Under the influence of British rules and British laws Indian society is being sapped to its very foundation. The Indians, as a nation, were not much given to intoxicating drinks or drugs; they were quite content with the comparatively innocent stimulant of tobacco, but as civilization is spreading in this country, and the rigour of British administration is increasing, this monster vice is extending its domain. We have daily, nay hourly, evidences of the ravages which the brandy-bottle is making upon the flower of our society. Wealth, rank, honour and character, health and talents, have all perished in the blighting presence of this huge monster. Notwithstanding the improved education and resources of our higher classes, it is a notorious fact that they can now save very little, and this new feature of our domestic and social economy is in a great measure due to the fell drink-craving. Families, once flourishing, have been reduced to absolute pauperism by the wreck brought by it.—*Hindoo Patriot.*

Formerly none in this country touched wine. It is interdicted in the Shasters. If anybody was found to be addicted to drink, he was cut off from social intercourse, and hated as *patita* (fallen). When wine first entered Hindoo society in consequence of intercourse with the English, it was secretly used. Now it is so prevalent that, far from fearing society or the Shasters, men do not even regard their own superiors. We have seen how one after another some of those who formed the ornament of Hindoo society have prematurely died of intemperance. Within a few years this vice has extended over the whole country like a conflagration. Our prayer is that Government should close the manufacture of intoxicating liquors and drugs, and at once prevent the importation of foreign spirits by imposing a hundred per cent. duty on them. The people would gladly pay an income tax if levied in lieu of the profits of the liquor traffic.—*Shom Prakash.*

The rapidity with which the tide of intemperance is advancing in this country excites alarm in the minds of all but drunkards. That anything will stand in the face of the tide does not seem probable. In many places, especially among the higher classes, wine is being used as a necessary daily drink.—*Amrita Bazar Patrika.*

Under the action of the Abkaree Department, which, while affecting to suppress the evil, has always had an eye to the levy of the largest amount of duty, the consumption of intoxicating liquors and drugs has spread very rapidly among all classes of the native com-

munity. . . . . The utter failure of the Abkaree Department may be traced to the fact that, while flirting with English principles of political economy, it has made the best of both worlds, by feeding upon and encouraging an abnormal phase of native immorality.—*Indian Daily News.*

Unfortunately half a century of our vile excise laws, only now slightly modified, has deliberately taught the present and the rising generation the brutal pleasures of intoxication. But let Sir John Lawrence and Mr. Massey see to it, that, while we tax heavily those who indulge in a vice or a habit so fruitful of crime and immorality, we are not as a Government and a Christian nation guilty, through the Braddons and the darogahs of our establishment, through the utter carelessness of our system of licensing, deliberately tempting to drink a people, who but for us would have, in this respect at least, retained the simplicity, the innocence, and the happiness of ancestors that were an example to Christendom.—*Friend of India* (1866).

Facts and figures, published periodically and by authority, clearly show that drunkenness has been on the steady increase, and the opening of as large a number as *five hundred* new shops in a single section of a single presidency within the short space of a single year is evidence conclusive that the "treacherous vine" and other intoxicating drugs are spreading their devastating influence over the country, with a rapidity and in a magnitude fearful to contemplate.—*Oudh Excelsior.*

Nearly five hundred new retail shops were opened in the North-Western Provinces during the past year, and the prospects of this branch of trade are exceedingly encouraging. The public revenue gains more than two lakhs of rupees by the increase, and we have nothing to do but congratulate ourselves at the prospect of lighter taxation. Some people, however, will be just blind enough not to see the prosperous part of this prosperity, and will hear with dismay of the five hundred new liquor shops, each one of which will destroy the life of from one to ten persons annually, eat up the earnings of from ten to fifty others, cause scores of children to go hungry on account of their parents' drunkenness, and sow the seeds of dissipation in the hearts of scores of industrious and sober men. It is not too late to check this rising danger to India, but we confess that nothing makes us feel so hopeless about it as this growing dependence of our public revenue upon this traffic. Every year it becomes more difficult to retrace our steps from a course which leads inevitably to public ruin. The most conservative English statesmen are taking alarm at the fatal increase of intemperance in England, but we have every reason to anticipate more ruinous effects in India. The people have not the physical stamina to resist the influence of strong drink, and in this burning climate the downward course of the poor victim is much more rapid than in England. We cannot be too earnest in calling attention to this peculiarly "elastic" source of revenue and misery.—*Lucknow Witness.*

We have often advocated a Permissive Prohibitory Bill for India; and, if this had been granted, a large part of the territory of India might have been shielded from the curse that is now daily spreading over the country.—*Bombay Guardian.*

That, in comparison with population, considerably more spirit is now consumed by the native population of Bengal than was consumed fifteen or twenty years ago is a fact which we are advised the excise returns would themselves establish. The increase of consumption has, not, however, been uniform throughout the province. It has been much more rapid in the larger towns than in the hamlets and purely rural districts, and is said to have—at any rate apparently doubled itself in Calcutta within the last twenty years. The leaders of Native society and the Native Press have long been agreed that within the last two decades there has been a great increase of drunkenness in at least the presidency town and its immediate vicinity, and that the rules and procedure of the Abkaree Department, instead of checking, have facilitated that increase. The best proof of all is, however, afforded by the great lucrativeness of the retail spirit trade. For a native to own some half-dozen of these shops, is for him to stand assured of as good a yearly income as a well-managed mediumsized zemindary would yield, considering that it has been estimated that the profits of each such shop are not less than £40 per mensem. In fact, were the existing restrictions removed and complete free trade in intoxicating drinks allowed, the number of spirit vendors' shops would become doubled throughout India—with, we make bold to say, an appalling increase of drunkenness—*Indian Statesman.*

No. 253, dated Simla, the 10th April 1875.

From—W. Stokes, Esq., Secretary to the Government of India, Legislative Dept.,
To—The Officiating Secretary to the Government of Bengal, Revenue Department.

I am directed to acknowledge the receipt of your letter No. 439, dated 22nd February last, addressed to the Secretary to the Government of India in the Financial Department,

as also of its enclosures, and in reply to communicate to you the sanction of His Excellency the Governor General, under section 43 of the Indian Councils' Act, 1861, to the Bill to amend Act XI of 1849, Act XXI of 1856, Act XXIII of 1860, and Act IV (B. C.) of 1866, being considered in the Bengal Legislative Council.

2. I am at the same time desired to invite the attention of His Honour the Lieutenant Governor to the provisions of Act XXII of 1864, sections 29 to 35, relating to the sale, &c., of spirits in Military Cantonments, and to express a hope that there will be nothing in the proposed measure which might clash with those provisions.

3. I am also to suggest that care be taken that the proposed Act is drawn in such terms as not to extend to Assam.

4. In the opinion of His Excellency the Governor General, it is most desirable that the law upon a subject in which the public are largely interested should be clearly arranged, and that, accordingly, either on the present occasion or after the amendments of the existing law which are proposed in this Bill have been made, the Acts relating to Abkari in the Lower Provinces should be consolidated.

5. With respect to the general question of excise administration in Bengal, I am to inform you that a further communication will be made to the Government of Bengal by the Financial Department.

No. 255, dated Simla, the 13th April 1875.

Endorsed by the Legislative Department.

From the Governor General of India, to the Secretary of State for India, No. 19, dated 12th April 1875.

Copy of the above and of the despatch noted in the margin, forwarded to the Financial Department for information.

No. 19, dated Simla, the 12th April 1875.

From—The Viceroy and Governor General of India,
To—Her Majesty's Secretary of State for India.

I have the honour to enclose, for Your Lordship's information, a copy of the correspondence noted in the margin, and of the Bill to amend Act XI of 1849, Act XXI of 1856, Act XXIII of 1860, and Act IV (B. C.) of 1866, to the consideration of which measure by the Lieutenant-Governor of Bengal in Council I have accorded my sanction, under section 43 of the Indian Councils' Act, 1861.

From the Officiating Secretary to the Government of Bengal, No. 439, dated 22nd February 1875, and enclosures.
To the Officiating Secretary to the Government of Bengal, No 253, dated 10th April 1875.

2. Although the general question connected with the proposed legislation, that, namely, of the excise administration in Bengal, is one of great importance, yet the present Bill contains only amendments of detail in the existing law, and does not appear to come within the category of those measures which Your Lordship has desired to be reported to you previous to their introduction.

3. On the general question, however, a further communication will be made to Your Lordship by the Government of India in the Financial Department.

No. 469, dated Simla, the 29th April 1875.

From—R. B. Chapman, Esq., C.S.I., Secy. to the Govt. of India, Financial Dept.,
To—The Secretary to the Government of Bengal.

In continuation of the letter* addressed to you in the Legislative Department by which the sanction of His Excellency the Governor General was given for the introduction into the Bengal Legislative Council of a Bill to amend the law relating to the Excise Department in Bengal, I am directed by the Governor General in Council to communicate the following observations upon the important matters to which your letter No. 439, dated 22nd February 1875, refers.

* No. 253, dated 10th April 1875.

2. His Excellency in Council has read with attention the memorials and other papers submitted with your letter, and cordially recognises the public

spirit of those gentlemen who have addressed the Government on the excise administration of Bengal. The desire manifested for the discouragement of intemperance by every legitimate means has the cordial sympathy of the Governor General in Council. The danger, however, of attempting by measures of undue stringency to suppress the use of stimulants is clearly brought out by Mr. Money in his able Minute. They would without doubt lead to an increase of smuggling and illicit distillation; and thus to the greater evil of an unregulated traffic in drugs and spirits, which under the present system is at any rate subject to some measure of control. At the same time nothing should be done to place temptations in the way of the people that can possibly be avoided. The number of liquor shops should therefore be reduced to the utmost degree compatible with the reasonable requirements of the neighbourhood, and no new shops should anywhere be opened without strong evidence that on the above understanding they are really needed. These are the general principles which the Government of India desire everywhere to inculcate.

3. His Honor the Lieutenant-Governor may rest assured of receiving the support of the Government of India in any measure that he may adopt for limiting the consumption of ganja; and indeed, if the use of the drug could be altogether suppressed without the fear of leading to its contraband use, such a course would be justified by its deleterious effects.

4. In conclusion, I am to request that, with the permission of the Lieutenant-Governor, you will convey the thanks of the Government of India to Mr. Alonzo Money, C. B., for the very complete and excellent Minute which he has submitted on the subject, in the arguments and conclusions of which His Excellency in Council desires to express general concurrence.

5. The correspondence will be published in the Supplement to the *Gazette of India*.

No. 5, dated Simla, the 29th April 1875.

From—The Government of India,

To—Her Majesty's Secretary of State for India.

In continuation of the Despatch from the Legislative Department, No. 19, dated 12th April 1875, we have the honor to forward, for Your Lordship's information, a copy of a letter* which we have caused to be addressed to the Government of Bengal on the subject of the administration of the Excise Department in the Territories under the Lieutenant-Governor of Bengal.

* No. 469, dated 29th April 1875.

R. B. CHAPMAN,

Secretary to the Government of India.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29TH APRIL 1875.

General Remarks.—The rainfall of the past week seems to indicate an early monsoon. Slight rain has fallen in the northern districts of Madras and in Mysore, and heavier showers in the south and Malabar. In Bombay rain is reported only from the Southern Mahratta Country. In Bengal and Assam there has been general rain, heavy with storms in the Central Districts (5½ inches falling in Burdwan) and Sylhet, and lighter in Chota Nagpore and the Bhagulpore Division; hardly any fell in Behar. A little rain fell in Sambulpore and Bilaspore in the Central Provinces; elsewhere the returns are blank. Few crops remain on the ground. In Bengal the rain has greatly benefitted standing crops, and helped forward sowings for the early rice. In the Punjab the *Rabi* harvest continues. Agricultural prospects are generally good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kurnool	(April 28th)	...	Harvest of cotton and second crop paddy in progress. Markets well supplied. Prices generally steady; fever prevalent. No water over Sunkesala anicut.
Kistna	(29th)	...	At Masulipatam a little rain in four taluqs; land winds commenced; standing crops prospering; prices stationary; mild small-pox in some taluqs.; fever in Paluad; cattle generally healthy; dry fodder used; markets well supplied locally.
Tanjore	„	...	Rain at Negapatam ·01 inch; elsewhere slight; rivers dry; water in tanks scanty; water over anicuts none; no cultivation; standing crops generally good; harvest of wet and dry crops over; pasture moderate; prices steady; markets well supplied; small-pox in some parts; cholera prevails in Negapatam, and slightly in Naunilum; cattle disease in two taluqs; some loss.
Trichinopoly	(28th)	...	Favourable rain all over the district on the 21st or 22nd, otherwise no change of importance; season favorable.
Malabar	(29th)	2·2	Sowing of first crop almost completed; supply of grain sufficient; prices stationary; season promising; no epidemic but small-pox, which still continues. *General Remarks.*—Prospects satisfactory.
Bombay—(April 29th)			
Sindh.			
Kurrachee	(April 28th)	...	River continues rising; rabi harvest in Jerruck and Shahbandar over; rabi crops in Sehwan Tuppa Badanee and taluka Dadoo attacked by disease; insects damaging grain in Sehwan; rain on 11th in Moondur Tuppa and taluka Sehwan; kharif preparations commenced; measles in Tuppas Katha, Halla, Khetty, Bunder, Shawl, Sonda and Jerruck; fever still in Johi, Meerpur, Batora and Sehwan talukas; cattle disease in Sehwan, but not serious.
Shikarpur	„	...	Weather much warmer during the day; nights cool; public health good.
Hyderabad	„	...	State of crops, weather, and public health the same as before; river rising steadily.
Upper Sind Frontier	„	...	Weather hot; temperature 119° in tents, above 140° exposed; reaping of rabi crops continues; *peshrus* crops being sown; insects on last flooded tracts, principally on reaped wheat and barley fields.
Gujarat.			
Ahmedabad	(April 28th)	...	No change.
Surat	„	...	
Broach	„	...	Public health good; weather sultry.
Kaira	„	...	Cholera in Neriad, but very few cases prove fatal; public health good in other talukas; weather hot.
Khandesh and Nasik.			
Khandesh	(April 28th)	...	Cholera in Chalisgam taluka; cotton nearly exhausted; Malwa cotton coming in.
Nasik	„	...	Cholera in a few villages in seven other talukas besides Nasik, but not to any great extent, except in Sinnar and Igatpura, where twenty-seven deaths took place; in Nasik, out of thirty-nine cases, twelve resulted in death; weather milder.
Konkan.			
Tanna	(April 28th)	...	Weather cool; public health good; fever in Wada, Mahim and Shahpur talukas, and guinea-worm and small-pox in Wada taluka.
Deccan.			
Poona	(April 28th)	...	Weather continues hot; except slight cattle disease and fever at Indapur and Mawul public health good.
Ahmednuggur	„	...	Slight cattle disease in Rahuree and Parna talukas; four deaths from cholera in Ankola; public health good.
Sholapur	„	...	Cattle disease in Sholapur; health good in other talukas.
Satara	„	...	Ague and cattle disease in Patan and Khutao.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*			
Southern Mahratta Country.			
Belgaum	(April 28th)	0·44	No change.
Dharwar	,,	0·25 in Kalghatgi.	Cotton picking continues; fever and cattle disease have re-appeared in most of the talukas.
Kanara	,,	1·33 at Supa	Preparations being made for monsoon crop; fever and cattle disease prevalent; small-pox in Honore and Bhatkal.
Kaladgi	,,	...	Crops nearly all harvested; slight cattle disease in Mudebehal; public health good.
Kathiawar and Gaekwar's Territory.			
Rajkot	(April 28th)	...	Weather very windy and hot; public health good; no other change.
Wudwan	,,	...	Cholera stopped; no other change.
Baroda	,,	...	Cotton being pressed and sold; rabi crops stored; cholera continues. *General remarks.*—Preparations for next kharif sowings commenced; health good; cholera diminishing; no crops now to report upon.
Bengal—			
Burdwan	(April 29th)	5·49	Cholera and small-pox prevalent, fever decreasing.
Hooghly	,,	1·42	Cholera and small-pox prevalent.
24-Pergunnahs	,,	3·15	Cholera prevails in thanahs Nyehatty, Baduria, Basirhat and Hurwah, it is abating elsewhere, frequent until the storms came.
Noakhally	,,	...	Cholera still bad throughout the district, and people suffering from fever.
Tipperah	,,	...	Cholera still prevails in parts.
Patna	,,	...	Cholera still prevalent, though nowhere in an epidemic form.
Gya	,,	...	Public health generally good.
Shahabad	,,	...	Sporadic cholera in parts of Sasseram sub-division.
Darbangah	,,	...	Cholera almost disappeared.
Mozufferpore	,,	...	General health good.
Sarun	,,		
Bhagalpur	,,		
Purneah	,,	...	Cholera very prevalent.
Cuttack	,,	...	A little cholera here and there.
Balasore	,,	...	Cholera still lingers in the north.
Lohardagga	,,	·11	Small-pox still very prevalent in parts.
Chittagong	,,	3·62	
Bankoora	,,	·28	
Beerbhoom	,,	·77	
Midnapore	,,	2·65	
Howrah	,,	·13	
Nuddea	,,	·26	
Moorshedabad	,,	·07	
Dinagepore	,,	2·89	
Maldah	,,	·3	
Rajshahye	,,	·7	
Bogra	,,	·67	
Pubna	,,	·41	
Jalpaiguri	,,	1·87	
Dacca	,,	·61	
Mymensingh	,,	1·81	
Chumparun	,,	·4	
Poorse	,,	·02	
Hazaribagh	,,	·04	
Singhbhoom	,,	·37	Healthy.
Manbhoom	,,	·18	*General Remarks.*—Rain has fallen in almost all the Western, Central, Orissa, and Chota Nagpore Districts, also in about a third of the Eastern Districts, but in three districts only in Behar; in some the fall has been heavy. The growing crops have greatly benefitted, and ploughing operations are now proceeding vigorously; rain is still, however, wanted and urgently where it has not yet fallen. Spring rice is being harvested in some places and in others is doing well; the early sowing of aus and aman rice and of pulses is progressing favorably; the rabi harvest is now over except in a few isolated tracts. Scarcity of drinking water has been a good deal felt in parts of Burdwan and Hooghly, but the heavy rains in the former must have greatly relieved the people. Cattle disease in parts of Hooghly and Backerganj.
N. W. P.—			
Benares	(April 28th)	...	No change.
Mirzapur	,,	...	No change; easterly wind.
Allahabad	,,	...	No change; easterly wind.
Jhansi	,,	...	No change.
Agra	,,	...	No change.
Meerut	,,	...	Harvest good.
Bareilly	,,	...	Barometer falling.
			General Remarks.—From Basti the harvest is reported on as follows:—Though the harvest in this district has been generally good, yet in tahsil Captainganj frost and blight appear to have done serious mischief and sugarcane has in a great measure failed. The wheat and barley outturn in this tahsil is estimated at three-fourths, sugarcane and gram at one-half, and arhar and peas at one-fourth of an average crop.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3RD JUNE 1875.

GENERAL REMARKS.—Although there has been more or less rain in most parts of India, the monsoon does not appear to have regularly set in, unless it be at the southern extremity of the Peninsula. The fall has been moderate in Madras, and showers have passed over Sind, Gujarat, and the Deccan Districts of Bombay, the Central Provinces, and Central India. In Bengal the rain has been general, with storms. Heavy falls are reported from Assam and the North Central Districts of Bengal. In the North-Western Provinces and Oudh, showers and storms have been frequent. Valuable rain has fallen in Rajputana and in several districts of the Punjab. Agricultural prospects are generally favourable.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(June 3rd)	...	Rain about 5 at Masulipatam, Repalli, Bezwarrah, Palnad and Guntur; Kolaif summer crop wants water; markets well supplied; prices steady; fever in Palnad; mild small-pox; cattle healthy; dry fodder sufficient.
Kurnool	"	0·18 in two days.	Moderate fall in five taluks; markets well supplied; prices steady; slight fever prevalent in some taluks; cattle generally healthy; water and pasture abundant.
Tanjore	"	1·0 in Negapatam.	Elsewhere slight; rivers almost dry; tanks dry; water over anicuts *nil*; no cultivation; standing crops generally good; not thriving in some parts for want of sufficient rain; harvest, a few early grains here and there, yield fair; markets well supplied; prices steady; small-pox, fever, and dysentery in some places; cholera prevails more or less all over the district; cattle disease in two taluks; pasture scanty.
Trichinopoly	(2nd)	...	Slight shower; water in the Wyakundam channel; a few cases of cholera in the town; no epidemic; slight cattle disease in Museri.
Madura	(3rd)	0·10	Rain sufficient for the present for cultivation; markets well supplied; prices tend to rise; heat excessive; small-pox and fever decreasing; pasture improving.
			General Remarks.—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (June 3rd)		
Sindh (2nd)		
Kurrachee „	...	River 10 feet 4 inches on Kotree; gauge on 31st 6½ inches less than on same date last year; kharif sowings commenced in Jerruck and Shahbunder districts; measles in Khutty Bunder; cattle disease in Kurrachee abating; of 32 cases 17 proved fatal; little damage from turtles to young rice plants in Khetty Hasim Tuppa; fever in Sehwan, Johie and Meerpoor Batora; *mung* crops fair; camels in Kotree taluka suffering from disease.
Shikarpur „	...	Slight rain; weather cooler; preparations for sowing kharif crops begun; river 10 feet 1 inch high, 4 inches lower than last year.
Hyderabad „	0·20	River risen two feet; state of crops the same as before; public health good.
Upper Sind Frontier „	...	Weather hot; preparations for kharif crops progressing moderately; Indus water at mouth of desert canal 6½ feet deep on 27th; health fair.
Gujarat.		
Ahmedabad (June 2nd)	0·88	129 cases of cholera in the city, and 37 deaths therefrom.
Kaira „	0·15	166 deaths from cholera which still prevails, but not in a virulent form; weather very hot and sultry.
Surat „	...	Weather and public health good.
Broach „	...	Slight rain at Broach and Ahmode; heat excessive.
Khandesh and Nasik.		
Khandesh (June 2nd)	...	Cholera abating; 63 deaths; rabi about six annas less; in Edlabad and Chopra cotton season closing; weather hot.
Nasik „	...	No change.
Konkan.		
Tanna (June 2nd)	...	Weather sultry; cholera still prevails at Tanna and in Kullian, Bassim, and Bhewady talukas; 7 deaths from it in Bassim taluka; scarcity of drinking water continues in Wada taluka.
Deccan.		
Poona (June 2nd)	...	Slight rain in the city and in some talukas; climate hot; cholera and cattle disease continue.
Ahmednuggur „	0·32	Cholera in four and cattle disease in two talukas.
Sholapur „	...	Slight rain in two talukas; public health good.
Satara „	0·20	Slight fever in Walwa, and ague in Patun; few cholera cases in Faolee; cattle disease in six talukas.
Southern Mahratta Country.		
Belgaum (June 2nd)	1·13	Rice sowing commenced in talukas bordering on the Ghâts; fever prevalent.
Dharwar „	...	Slight rain; fever and cattle disease prevalent; sowing of rice in progress; sugarcane fair.
Kanara „	0·15 in Karwa.	Rain throughout the district; ploughing and sowing operations continue; rice has sprouted in some parts; fever prevails; small-pox and cattle disease slightly decreasing.
Kaladgi „	...	Fever in every taluka, especially at Bagulkot; cattle disease in Indi, Sindgi, Bijapur and Bagulkot.
Kathiawar.		
Rajkot (June 2nd)	0·15	Weather very hot and cloudy; public health good.
Wudwan „	...	Weather very hot; public health satisfactory.
		General Remarks.—Slight cholera prevalent; no monsoon as yet; sowings commencing in Sind, where river is rising, and rice sowing begun in Southern Mahratta Country.
Bengal—		
Chittagong (June 3rd)	·42

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10TH JUNE 1875.

General Remarks.—The monsoon is announced as having broken in Malabar and the Southern Mahratta Country, where the fall has been abundant. Throughout Madras there has been moderate rain, and good falls in Mysore and Coorg. In Bengal the rain has also been general, extending half through Behar: the fall has been heaviest in the Eastern and Northern Districts; heavy rain is also reported from Assam. Elsewhere in Southern and Central India showers have been frequent, with storms. In the Northern Provinces but little rain has fallen in few places, and the heat is reported to be great. Agricultural prospects are everywhere satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(June 10th)	...	Rain above an inch in Bezwada, Palnad, Nandiguma and Guntur; very slight in Gudiwada and Venukonda; Kolair paddy harvested, outturn one-eighth; markets well supplied locally; prices steady; fever in Palnad; mild small-pox and guinea-worm partial; cattle generally healthy; dry fodder sufficient.
Kurnool	(9th)	0·11 in two days.	Slight rain in four taluks; ploughing begun; markets well supplied; prices of jouna and rice rising in four taluks; in others generally stationary; water and pasture sufficient; fever and small-pox prevalent in parts of the district; cattle generally healthy; no water over Sunkesala anicut.
Tanjore	(10th)	...	Rain at Negapatam slight and partial, none elsewhere; water scanty in some rivers and none in others; no supply to tanks; water over anicuts *nil;* no cultivation; standing crops very few; rain wanted; harvest of a few dry grains here and there—yield fair; markets well supplied; prices steady; small-pox, fever and dysentery in some places; cholera prevails more or less all over the district; cattle disease in Mayaveram—some loss; pasture insufficient.
Trichinopoly	,,	...	Twenty-nine deaths from cholera up to yesterday in Trichinopoly; one in Srirungum; cattle disease abating with advent of rain.
Malabar	(10th)	8·76	Rain favorable for first crop cultivation; markets well supplied; prices have tendency to rise; small-pox and fever decreasing; cattle healthy; pasture improving.
			General Remarks.—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (June 10th)		
Sindh (9th)		
Kurrachee „	...	River rising; height at Kotree 21 inches less than on same date last year; heavy rain near Kotree for four days.
Shikarpur „	...	Days hot; nights generally cool; river 8 feet 9 inches, 4 feet 2 inches lower than last year.
Hyderabad „	...	River much lower than last year; disease among goats in Tanda Ashar, and among buffaloes in Nowshera.
Upper Sind Frontier „	...	In Jacobabad heat oppressive with hot winds during greater part of night; rabi crops reaped; spring crops doing well; diarrhœa at Khyrigaum owing to bad water; water admitted in Begari canal.
Gujarat.		
Ahmedabad (June 9th)	...	Heat oppressive; cholera in city, 108 cases, 26 deaths.
Kaira „	0·6	481 cases of cholera, 179 deaths; heat intense.
Surat „	...	Slight shower of rain on 8th; weather sultry; public health good.
Broach „	0·25	Sowing preparations progressing; cholera in the city and in four talukas; cattle disease in Anklesur.
Khandesh and Nasik.		
Khandesh (June 9th)	...	295 deaths in 481 cholera cases; cattle almost recovered from disease; weather cloudy and hot; slight showers of rain; great demand for American cotton seed; Hingunghat 45.
Nasik „	...	Rain in seven talukas; cholera abating; land ready for sowing; weather warm.
Konkan.		
Tanna (June 9th)	0·25	Weather sultry; slight thunder-storm on evening of 7th; cholera continues at Tanna and Kullian and in Bhewndy and Bassim talukas.
Deccan.		
Poona (June 9th)	...	Slight rain in the city and in some talukas; cholera and cattle disease continue in a few talukas; climate hot.
Ahmednuggur „	0·25	Cholera in eight talukas—20 deaths in one taluka and cattle disease in six talukas.
Sholapur „	...	Slight rain; public health good.
Satara „	...	Fever at Mahableshwar; ague in Patun; cattle disease prevalent.
Southern Mahratta Country.		
Belgaum (June 9th)	8·17	Thunder and hail; sowing of rice commenced.
Dharwar „	...	Rain wanted in rice-producing districts; land being prepared for sowing of early crops; fever and ague almost in all talukas; cattle disease prevails slightly.
Kanara „	2·0 at Karwar.	Ploughing and sowing operations general; fever and cattle disease prevalent, and small-pox to a slight extent.
Kaladgi „	4·58	Ploughing operations commenced; fever and cattle disease decreasing.
Kathiawar and Gaekwar's territory.		
Rajkot (June 9th)	...	Weather very hot; public health good.
Wudwan „	0·85	Weather oppressive.
Baroda „	0·40	Manuring continues; cholera decreasing.
		General Remarks.—Monsoon has broken in the Southern Mahratta country.
Bengal—		
Noakhally (June 10th)	·9	
Tipperah „	2·96	
Chittagong Hill Tracts „	1·52	Cholera prevalent in different parts of the district.
Hill Tipperah „	4·24	
Backergunge „	...	A kind of disease has attacked the fish in the river which has become so serious that the people are ceasing to use this article of food; at present worms are found in the intestines of the fish, and a kind of eruption like small-pox is visible upon their skins. It is not known how far this disorder has spread, but enquiries are being made.
Fureedpore „	2·04	General health good.
Mymensingh „	4·09	
24-Pergunnahs „	·31	Cholera and fever decreasing.
Nuddea „	1·67	
Jessore „	1·39	
Pubna „	1·16	A few cases of sporadic cholera still reported.
Moorshedabad „	...	Cholera still in Goas station; small-pox appears to have died out for the present.
Rajshahye „	·38	No sickness reported.
Bogra „	1·34	
Maldah „	·42	
Dinagepore „	·46	
Rungpore „	1·85	
Cooch Behar „	1·91	Cholera decreasing gradually.
Jalpaiguri „	3·65	Cholera is still generally prevalent, but there are more recoveries than there were at first.
Howrah „	·23	
Hooghly „	1·77	
Burdwan „	1·19	
Bankoora „	·41	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal,—*continued.*		
Beerbhoom (June 10th)	·22	
Sonthal Pergunnahs	·03	
Bhágalpur „	...	General health good.
Sarun „		
Chumparun „	·17	
Darbangah „	·52	
Mozufferpore „	...	Cholera still continues.
Shahabad „	...	Health improving.
Patna „	...	Cholera still continues throughout the districts; bad in the town of Barrh Sub-division.
Gya „	...	Cholera still in Aurungabad sub-division, and prevalent in Nowdah sub-division; rest of the district healthy.
Hazáribágh „	·10	
Lohardugga „	2·10	Cholera and small-pox still reported.
Maunbhoom „	·29	
Singbhoom „	·02	Healthy.
Balasore „	...	Cholera has nearly ceased.
Cuttack „	1·75	A little cholera in places; public health on the whole good.
Pooree „	·04	
		General Remarks.—Rain has fallen in every district of Bengal, Orissa and Chota Nagpore, except Midnapore and Backergunge, and in about half the districts of Behar; a further fall is wanted almost everywhere. Boro rice is all but reaped; tilseed and oilseed and cheena millet are being harvested, and sowings of early rice continue in places. The young crops of rice, millet, sugar-cane, jute, &c., are progressing favourably, but want rain; indigo is doing well, and in some places is fit for cutting; sowings of the main rice crops are progressing favourably.
N. W. P.—		
Benares (June 9th)	...	No change.
Mirzapur „	...	Wind changeable, chiefly east; clouds daily; heat great.
Allahabad „	...	No change.
Banda „	...	Intense heat, east wind; no other change.
Hamirpur (10th)	...	No change.
Jhansi (8th)	...	From 1st to 7th weather stormy with slight rain; great heat; prices almost stationary; health good.
Cawnpore (9th)	...	Prospects good; health fair.
Agra „	...	Extreme heat and east winds.
Meerut „	...	Slight rain in Bágpat; prospects unchanged.
Bareilly „	...	Health good.
Punjab—		
Delhi (June 9th)	...	Health good.
Hissar „	...	Health of Division generally good, but 25 cases of cholera in two villages of Rohtak District, 14 deaths.
Umballa „	...	Health good.
Jullundur „	...	Ditto.
Lahore „	...	Ditto.
Rawul Pindi „	...	Ditto; but cattle disease still prevails.
Mooltan „	...	Kharif sowings commenced; health good.
Dera Ismail Khan „	...	Health good.
Peshawur „	...	Slight fever prevailing.
		General Remarks.—General health of the province and agricultural prospects good.
Oudh—		
Lucknow (June 9th)	*Nil*	Prices stationary; cholera decreasing; weather uncertain; cloudy with slight showers to-day; kharif operations progressing.
Fyzabad „	·4	
Sitapur „	*Nil*

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

Forecast of expenditure from Extraordinary Funds on Railways and Irrigation Works.

Extract from the Proceedings of the Government of India, Public Works Department, Account—General,—No. 354 A—G., dated 11th June 1875.

Read again—

Resolution in the Public Works Department, No. 377 A—G, dated 18th July 1873.

Read also—

Tables and Memorandum prepared in the Public Works Department, dated 11th June 1875.

OBSERVATIONS.—In July 1873 a Resolution was published in the *Gazette of India* reviewing the contemplated operations for the extension of Railways and Irrigation Works in India, with a Forecast of the probable result of an annual outlay of 4½ millions sterling for five years. The conclusion arrived at by the Government of India was, that the operations might be continued on that scale without fear of financial embarrassment. But it was added in conclusion that the arrangements permitted of the rate of expenditure being contracted if a reduction should be found necessary.

2. The basis of the calculations made in 1873 was this:

In the year 1872-73, after deducting the net receipts derived from works in operation, there remained a sum of £2,378,140 charged to revenue for the interest of money borrowed, whether directly by Government or indirectly through Guaranteed Companies, for the construction of 'reproductive' public works. The term 'reproductive' is meant to imply not that all these works are likely to be in themselves remunerative as an investment of capital, but that their effect will be to add to the general wealth of the country. The condition of the finances was such as to satisfy the Government of India that a similar charge of £2,378,140 might be met in future years without increased taxation.

As works under progress are completed, and as those lately completed are brought into fuller work, fresh receipts will come in: some increase is also to be expected from old works. In the Forecast of 1873 the rate of expenditure upon works in progress and new works was so adjusted for five years, that the estimated additional annual charge upon revenue for the interest of money to be borrowed should be met by the estimated additional receipts, and no increased annual charge upon revenue should be incurred. The calculations then made showed an estimated annual charge upon revenue in every year after 1872-73 considerably below the charge incurred in that year.

3. These calculations can be now compared with the actual results of the last three years: thus—

	Forecast of 1873.	Present information.	Based on
	£	£	
Excess of interest charges over net receipts			
1872-73	2,378,140	2,357,696	Actuals.
1873-74	2,127,579	1,780,833	„
1874-75	2,019,780	1,565,705	Regular Estimate.

It will be seen that the Forecast of 1873 has been more than justified by the facts. The large decrease of the net annual charge in 1873-74 and 1874-75 is due in a great measure to the increase in the profits of the Guaranteed Railways owing to the great extension of the grain traffic during the famine of 1873-74. But detailed calculations show that without taking those profits into account the calculations of the Forecast of 1873 would have been perfectly safe.

4. Since the publication of that Forecast it has been deemed expedient to limit the annual outlay on reproductive public works, classed as extraordinary, for the prosecution of which funds are authorised to be raised by loan, if necessary, to 4 millions sterling.

5. New tables have been prepared on this basis. They include the operations of 1872-73 and 1873-74 taken from the accounts of actual outlay, and those of 1874-75 taken from the Regular Estimate. The operations for 1875-76 are taken from the Budget Estimate, and those of the following four years from the best estimate that can be formed of probable operations. The new Forecast extends to the Financial year 1879-80. The excess of interest charges over net receipts is estimated to decrease from £2,357,696, the actual charge in 1872-73, to £1,939,806 in 1879-80. This charge is expected to average £2,023,126 per annum from 1875-76 to 1879-80, as shown in the margin. The even progress of the fall was interrupted by the earnings of the famine traffic in 1873-74 and 1874-75; but the regular series is resumed in 1875-76. The result is on the whole much the same as in the calculations of 1873.

	£
1875-76	2,179,394
1876-77	2,010,920
1877-78	2,022,306
1878-79	1,963,206
1879-80	1,939,806
Total ...	10,115,632
Average per annum	2,023,126

6. The principal circumstances which have led to alterations in the present Forecast as compared with that of 1873 are the following. The total annual outlay has been limited to 4 millions sterling with full effect from 1876-77. The estimated cost of the State Railways has been considerably affected by the decision to make the Indus Valley, the Punjab Northern, and the Scindia lines on the broad gauge, which necessitates a larger outlay of capital without a corresponding increase of traffic receipts. The outlay upon Irrigation Works is concentrated on fewer projects. The interest has been calculated at 4½ instead of 4 per cent. It is to be noted that interest has been calculated on the entire sum charged under the head Extraordinary, while no deduction has been made for receipts from Irrigation Works in Madras, Bombay (including Sindh), and Rajpootana, in consequence of the manner in which the receipts derived from irrigation are to be separated from the land revenue not having been finally decided. No allowance has been made for the probability that surplus revenue will be applied to the construction of reproductive works. It will thus be seen that a considerable margin has been allowed for safety in these calculations.

7. The result of the new Forecast is satisfactory. It appears that, taking a moderate estimate of the growth of income from existing Railways and Irrigation Works, and very small returns from the new works, an annual capital outlay of 4 millions for the next five years on State Railways and Irrigation Works charged with interest at 4½ per cent. is not likely to lead to any increase of annual charge on the revenues of India.

8. The progress intended to be effected in the works in hand according to this Forecast is as follows:—

Guaranteed Railways.

9. All the Guaranteed Railways are open for traffic complete, with the exception of the Oudh and Rohilkund and South of India Railways.

Of the Oudh and Rohilkund Railway, 539¾ miles have been opened for traffic. The bridge over the Ganges at Cawnpore will be completed before the end of the current year and connection established with the East India Railway. The total mileage then open for traffic will be 544 miles. It is as yet uncertain when the remaining sections of the Oudh and Rohilkund Railway as originally projected, *viz.*, from Buxar to Akbarpore, and a branch to the foot of the hills near Ranneekeet, will be undertaken.

The South Indian Railway is to be of 619¾ miles in length on the metre gauge, of which 167 miles from Negapatam to Erode (at present on the 5′ 6″ gauge, but to be converted to the metre gauge) are open; also 18¾ miles from Arconum to Little Conjeveram (at present on 3 feet 6½ inches gauge). The Southern extension, 215¾ miles on the metre gauge, from Trichinopoly to Tuticorin, with a branch to Tinnevelly, is expected to be open throughout in 1875-76, and the Northern extension, 218 miles, from Madras to Tanjore in 1876-77.

State Railways.

10. The progress expected in the State Railways is as follows:—

The Punjab Northern Railway, 103 miles in length, from Lahore to Jhelum, will be completed on the broad gauge on a bank separated from the Grand Trunk Road and opened for traffic in	1876-77
The Rajpootana Railway on the metre gauge, 323 miles of which are already open, will be completed and in work, from Delhi and Agra (including the bridge over the Jumna at Agra) to Ajmeer and Nusseerabad, a length of 396 miles ... „	1876-77
The Wardha Valley line for the supply of coal from the Warora Colliery to the Great Indian Peninsula Railway will be completed and at work, 46 miles, on the 5½ feet gauge ... „	1876-77
The Rangoon and Irrawaddi Valley Railway, 161 miles, on the metre gauge, will be completed to Prome ... ... „	1877-78
The Indus Valley Railway, from Kotree to near Mooltan, 498 miles in length, will be completed on the 5½ feet gauge and opened for traffic, including the large bridges over the Sutlej at Bahawalpore and over the Indus at Sukkur ... „	1878-79
The Holkar State Railway, of which 57 miles are now open for traffic, will be completed from Khundwa to Indore, including the bridge over the Nerbudda, and will be extended to Neemuch and Oojein, a length in all of 254½ miles, on the metre gauge ... ... „	1878-79
The Scindia Railway (72 miles of 5½ feet gauge) will be completed from Agra to Gwalior, including the large bridge over the Chumbul ... ... „	1879-80
The Northern Bengal Railway, 225 miles on the metre gauge, from the Ganges above Kooshtea to the foot of the Darjeeling Hills, will be completed and opened for traffic ... „	1878-79
The Tirhoot Railway, 110 miles on the metre gauge, which occupies the principal lines over which the grain was carried in the recent famine relief operations, and of which the permanent line from the Ganges to Durbungha, 50 miles, will be finished in 1875-76, will be completed ... ... „	1877-78

The above operations embrace the completion of 1,865 miles of State Railway, of which 719 miles will be on the broad and 1,146 miles on the narrow (metre) gauge. Other lines of Railway will also be undertaken as the completion of these sets free funds and staff.

IRRIGATION WORKS.

11. For Irrigation Works the progress expected is as follows:—

MADRAS.—*Godavery Delta works.*—Eastern and Western Deltas: Rectifications and necessary additions to existing works, improvements to the distributary system, and some additional lengths of channel required for an extension of the irrigated area, are being carried on as rapidly as the available supply of labor will admit, and will probably be completed by the year 1879-80.

Similar operations in the Kistna Delta. A large proportion of those already sanctioned will probably be finished by 1879-80, but owing to the limited supply of labor, the work can only be carried out slowly.

Similar operations in Pennair Delta will probably be completed by the year 1877-78.

Weir across the Vellaur River.—Will probably be completed by the year 1876-77.

Works in the Cauvery Delta.—These are works for regulating the supply of water to the several natural channels which distribute the irrigation from the Cauvery weirs in the districts of Tanjore and Trichinopoly. They are all nearly complete, with one exception, the estimates for which are not yet sanctioned.

Streeviguntum weir project.—A new work across the river Tambrapoorney in the Tinnevelly district; in great part completed, and will probably be finished by 1877-78.

BOMBAY.—*Ekhrookh Tank and Mookti Reservoir.*—Nearly complete; will probably be finished by 1876-77.

Moota Moola project.—Masonry dam across the river forming a reservoir to supply water to Poona, and irrigation to lands above and below. Partially completed; now supplies water to Poona and some irrigation: may be finished by 1878-79.

Krishna, Palkheir, Lakh and Hathmuttee Canals.—Channels from rivers; all nearly completed.

Sukkur, Mitrow, and Bigaree Canals.—All inundation canals in Sindh, the two first new; improvements are being made to the last, which has for some years supplied the station of Jacobabad and the lands along its course with irrigation. The sanctioned work on all three is nearly completed.

BENGAL.—*Soane works.*—The canal was formally opened in April last. The weir across the Soane is complete; the Arrah Branch and its distributaries are ready for the most part for the issue of water; the Patna and Buxar branches are in progress. Revised estimates for the completion of the project within certain limits are now under consideration. It is intended to push on the works to completion as rapidly as circumstances will allow. The portion of the project now in progress will probably be finished in 1880.

Orissa and Midnapoor.—These originally formed one project, but are for the present being worked separately, and have supplied irrigation to a limited extent for the last three or four years. The rivers Mahanuddee, Brahminee, and Byturnee supply the Orissa series, the Cossye that in the Midnapoor District. The limits to which the projects should be carried out are now under consideration. In Orissa the works in progess are the canals and distributaries in the Central and Northern Deltas of the Mahanuddee, and the weirs and channels from the Brahminee and Byturnee. The work projected for the next few years is to complete these, and bring them into operation as rapidly as possible. In Midnapoor the work remaining to be done chiefly consists in completing the distributary system, drainage and river embankments.

Irrigation Works in Tirhoot.—Investigations are now being made to ascertain how far the wants of the tract in North Behar, which has suffered most from famine, can be supplied by small works in connection with numerous petty streams intersecting it, as well as by inundation canals from the Gunduck.

N. W. PROVINCES.—*Ganges Canal.*—Rectifications of existing works, and extensions and improvements to the distributary system are in progress. Most of these works can only be carried out slowly owing to the necessity of keeping the channels full to supply the irrigation. Some new works, such as weirs in the main channel, can only be built when the canal is closed, as it usually is, for about a month every year for periodical repairs.

Agra Canal.—This canal was opened in March 1874. The work remaining to be done chiefly consists in completing the distributary system, and the separate navigable lines connecting it with the cities of Muttra and Agra.

The Lower Ganges Canal.—This is a new work, is being pushed on as rapidly as possible, and will probably be ready for opening in 1878-79.

Irrigation Works in Bundelkund.—Estimates for one project consisting of a weir on the Betwa river and channels therefrom are now under consideration.

PUNJAB.—*Western Jumna Canal.*—Some of the new distributaries are in progress, and the new canal-channel in substitution for a portion of the existing Main Line and Delhi Branch is being commenced. The permanent weir across the Jumna River and head-works are well advanced, and may probably be completed in a year or two. It is intended to push on the other works as rapidly as the available supply of labor will admit.

Baree Doab Canal.—Permanent weir and head-works on the River Ravee are in operation; a small outlay only is required to complete them. The Kussoor and Sabraon branches are well advanced. These, with their distributary channels and the distributaries required to complete the system on the branches now open, will probably be completed by 1879-80. The rectification of the Main Canal is in progress, but is necessarily a slow process with a running canal.

Sirhind Canal.—These works are being pushed on as rapidly as possible. They will probably be sufficiently advanced by 1879-80 to allow of water being passed down the main channels and portions of the branches.

Swat River Canal.—This will irrigate a portion of the Peshawur Valley. The project has been drawn up and is now under consideration.

RAJPOOTANA.—*Bheer Reservoir.*—Is nearly completed. Irrigation has commenced therefrom.

ORDER.—Ordered, that this Resolution, with the tables referred to, be communicated to the Secretary of State, and that a copy be published in the Supplement to the *Gazette of India*.

C. H. DICKENS, *Colonel, R.A.*,
Secy. to the Govt. of India.

Note.—In the case of Madras and Bombay specially, and in other Provinces generally, the outlay incurred from the Ordinary chargeable as Extraordinary. The probable cost shown above does not include charges for simple interest while work is under The amounts of these several charges are omitted, because they are defrayed from Ordinary Funds.

(*a*)—Represents outlay from contributions given for the construction of the Sirhind Canal by His Highness the Maharaja of Patiala the works enumerated above has been deducted from the probable cost of the projects, and the balance shown as amount , or leave and pension allowances, or capitalization of abatement of land revenue, or charge by exchange on payments in England. the Raja of Jheend, and His Highness the Raja of Nabha.

IRRIGATION WORKS.

No. II.

Detailed Statement of the actual and estimated net direct revenue of Irrigation Works in Bengal and Northern India for the 11 years ending in 1879-80.

This Table excludes the receipts due to Irrigation Works included in the Civil Accounts as a portion of the Land Revenue.

[The revenue in Madras and Bombay including Sindh is excluded for want of a reliable separation of Land Revenue from Water Rates.]

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 17TH JUNE 1875.

GENERAL REMARKS.—The monsoon appears to have now regularly set in in all the Southern, Central and Eastern Provinces. Moderate rain is reported from Madras, with heavy falls in Malabar: in Mysore, Bombay, and the Central Provinces, the falls have been general and plentiful. Good rain has fallen in Berar and Central India, and throughout Rajputana. In Bengal rain is reported from every district except Bhágalpur and four districts in Behar: in the Eastern, Northern and Central Districts, it has been extraordinarily heavy. From Oudh and the Benares Province of the North-Western Provinces moderate falls are reported. But in the Western Districts and in the Punjab (except slight showers in Delhi and Rawul Pindi) none has fallen. The Indus is abnormally low in Sind, and some anxiety is felt. Elsewhere agricultural operations are progressing vigorously, and prospects are satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kurnool	(June 16th)	0·29 inch in two days.	Good rain in Pattikonda, slight in other taluks; ploughing progressing; water and pasture sufficient; markets well supplied; prices steady, except in Ramulkota, where rice is falling; fever, small-pox and dysentery prevalent in some taluks; cattle generally healthy.
Trichinopoly	,,	...	A few good showers of rain; cholera in the town increasing slightly not rapidly; a fair amount of water in river channels.
Malabar	(17th)	9·30	Rain favorable for cultivation; transplanting of first crop begun; markets well supplied; prices increasing; small-pox and fever decreasing; cattle healthy; pasture improving.
Kistna	,,	...	Rain about ·5 in five taluks, none in seven, river freshes have commenced; 2½ feet over anicut; markets well supplied locally; prices generally steady; mild small-pox in eight and fever in two taluks; mild cattle disease in three taluks; healthy elsewhere; dry fodder sufficient; monsoon burst last night at Masulipatam.
Tanjore	,,	0·17 at Negapatam.	Elsewhere light and partial; water supply scanty in some rivers and none in others; no supply to tanks; water over anicuts nil; cultivation going on in parts; markets well supplied; standing crops very few, but tolerably good; harvest, gingelly seed yield fair; prices tending upwards; cholera prevalent more especially in Negapatam and Nannibum; cattle healthy except in Mayaveram, whence a slight loss reported; pasture improving. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (June 17th)		
Sindh (16th)		
Kurrachee „	...	River at Kotree on 12th fallen 15 inches; it is 53 inches lower than on the same date last year; heavy rain in Tuppa Bado on 31st; hill torrents flowing, and much ground soaked; fish in bunds in Sehwan taluka dying from a disease said to be caused by great heat; fever in Johee, Sehwan, Jati and Mirpur Batora; cattle disease disappeared in Kurrachee; camels in Kotree taluka suffering from disease.
Shikarpur „	...	Kharif sowing commenced; nights continue cool; river 9 feet 10 inches, 4 feet lower than previous year; public health good.
Hyderabad „	...	State of crops the same as before; continual lowness of river is causing anxiety; small-pox in taluka Mirpurkhas on Umarkot road; weather cooler; high winds from south-west; public health good; disease among goats in Tanda Ashar.
Upper Sind Frontier „	...	Days very hot; nights cooler than usual; water supply in canals quite inadequate, and more very much required; diarrhœa continues at Khyri Garhi; deaths from heat and fever.
Gujarat.		
Ahmedabad (June 16th)	...	74 cases of cholera, 18 deaths.
Kaira „	...	Cholera abated in Neriad; continues in Mehmadabad, Kapadwanj and Heasra, 109 deaths out of 279 cases; weather sultry.
Surat „	0·79	Weather and public health good.
Broach „	...	Sowing operations progressing; cholera abating.
Khandesh and Nasik.		
Khandesh (June 16th)	0·99 at Dhulia.	Rain throughout the Collectorate; cholera continues, 280 deaths out of 955 cases this week; cotton market dull; sowing commencing.
Nasik „	...	Rain throughout the Collectorate; cholera still in a few villages; cattle disease in Dindori and Jeola; weather cooler.
Konkan.		
Tanna (June 16th)	1·29	Weather cloudy and sultry; cholera at Tanna and in four talukas.
Deccan.		
Poona (June 16th)	...	Slight rain at head-quarters and in some talukas; cholera and cattle disease continue in a few talukas; 41 deaths from the former at Khed.
Ahmednuggur „	0·11	Sowing operations delayed for want of rain; cholera in eight and cattle disease in four talukas; 8 deaths in Sangamner taluka.
Sholapur „	3·0	No change.
Satara „	0·96	Fever and cough at Mahableshwar; ague in Patun; cattle disease in six talukas.
Southern Mahratta Country.		
Belgaum (June 16th)	0·48	Rice sowing in progress.
Dharwar „	1·26	Sowing of early crops progressing; public health the same as before.
Kanara „	5·0	Season favourable; sowing operations progressing well; fever and cattle disease prevalent as usual, and small-pox on the coast.
Kaladgi „	·59	Fever and cattle disease still prevalent in some talukas.
Kathiawar and Gaekwar's territory.		
Rajkot (June 16th)	...	Weather very hot; public health good.
Wudwan „	2·28	Health good; sowing commenced.
Baroda „	...	No change.
		General Remarks.—Monsoon general throughout nearly the whole of the Presidency.
Bengal—		
Chittagong (June 17th)	15·42	
Noakhally „	12·74	
Tipperah „	8·15	
Chittagong Hill Tracts „	2·33	
Hill Tipperah „	3·11	
Backergunge „	1·61	Cattle disease abating; the disorder among the fish still continues. Health of the people is generally satisfactory.
Fureedpore „	7·01	The health of the district is good on the whole.
Dacca „	9·63	
Mymensingh „	6·14	
24-Pergunnahs „	1·76	Fever decreasing at Barripore, but increasing in Baserhat Sub-division. Some cases of cholera reported from Selkhira.
Nuddea „	7·37	
Jessore „	3·95	
Pubna „	·86	General health good.
Moorshedabad „	3·76	Small-pox still in Soojagunj, general health good.
Rajshahye „	3·30	No sickness.
Bogra „	3·75	
Maldah „	3·44	
Dinagepore „	4·64	
Rungpore „	9·28	
Cooch Behar „	3·58	Cholera disappearing gradually.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal,—*continued.*		
Jalpaiguri (June 17th)	13·23	
Midnapore „	1·7	
Howrah „	·67	
Hooghly „	4·68	Health good.
Burdwan „	2·98	
Bankoora „	·97	
Beerbhoom „	3·44	
Sonthal Pergunnahs „	3·91	
Bhágalpur „	...	Health good.
Purneah „	2·9	
Champarun „	3·80	
Darbangha „	3·22	
Mozufferpore „	...	Cholera still continues.
Sarun „	...	General health good.
Shahabad „	...	A few cases of cholera and small-pox still remain.
Patna „	...	Cholera prevalent throughout the District, bad still in three villages of the Behar Sub-Division.
Gya „	1·2	Cholera spread in Aurungabad, Nondat and part of Jehanabad.
Hazáribágh „	1·71	
Lohardugga „	2·49	Cholera and small-pox are still reported.
Maunbhoom „	1·78	
Singbhoom „	2·39	Healthy.
Balasore „	...	Cholera in the north has ceased.
Cuttack „	1·5	Cholera still hanging about, chiefly in Kendrapara and around it.
Pooree „	1·45	
		General Remarks.—Rain has fallen in almost all the Districts of Bengal and in some has been very heavy. The rain has improved the state and prospects of the crops generally, especially where they were suffering from want of it. A further fall is urgently required in the Medehapoora sub-division of Bhágalpur for the Bhadoi crops. Harvesting of spring rice is everywhere completed and cheena millet is being reaped in places. Indigo manufacture has commenced in places. Early rice, jute, indigo, millets, sugarcane, mulberry, &c., are all doing well. Sowing of the main rice amun is also progressing favourably. Tillage is being carried on vigorously, and the prospects of the season are generally good.
N. W. P.—		
Benares (June 16th)	...	Storm and heavy rain on 13th.
Mirzapur „	...	Daily clouds and storms, and 2 inches of rain in the south, but little elsewhere.
Azimgurh (14th)	...	1·8 inches of rain at head-quarters on the 11th and 12th, and much more in the east of the district; sugar-cane and indigo doing well.
Cawnpore (16th)	...	Occasional storms; prospects good.
Allahabad „	·50 on 13th & 14th	
Banda „	·2 on the 13th	
Hamirpur (17th)	...	Light showers on 14th and 15th; cholera still prevalent.
Jhansi (15th)	...	High westerly winds with clouds but no rain; heat less.
Agra 16th)	*Nil*	Clouds gathering.
Bareilly „	...	Clouds and slight showers, prospect of rain.
Punjab—		
Delhi (June 16th)	·3	Cholera in one village, otherwise health of district good.
Hissar „	*Nil*	Water in tanks drying up; ploughing for crops not commenced; health good.
Umballa „	...	Cholera appeared in two villages.
Jullundur „	...	Health good.
Lahore „	...	Ditto.
Rawul Pindi „	·16	Public health good; cattle disease continues.
Mooltan „	*Nil*	Kharif sowings commenced; health good.
Peshawur „	...	Fever prevalent.
		General Remarks.—General health and prospects of the province continue good.
Oudh—		
Lucknow (June 16th)	·4	Prices favorable; weather uncertain and wind variable; heat oppressive; kharif operations progressing; cholera decreasing.
Fyzabad „	1·1	
Sitapur „	1·	
Central Provinces—		
Upper Godavari (June 12th)	1·83	Small-pox prevalent; prices easy.
Sambalpur „	1·64	Kharif ploughing progressing; health good.
Bilaspur „	·95	Dry sowings commenced in places; cholera prevalent; prices easy.
Raipur (13th)	2·10	Weather cloudy and stormy; kharif ploughing progressing; cholera prevalent; prices easy.
Chanda „	2·97	Kharif ploughing continues; prices steady.
Balaghát (14th)	1·50	Kharif sowings commenced; small-pox continues; prices steady.
Chhindwara „	1·60	Weather cloudy; ploughing continues; health good; prices stationary.
Bhandara (15th)	·69	Weather cloudy; ploughing continues; 3 fatal cholera cases towards Raipur boundary; fever and small-pox prevalent; prices easy.

Presidency or Province and District.			Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*				
	Nagpur	(June 16th)	2·84	Ploughing continues; prices stationary.
	Wurdha	"	3·64	Small-pox prevalent.
	Nimar	"	·52	19 cholera cases, 5 fatal; prices of jowar and bajra rising.
	Hoshangabad	"	·04	111 cholera cases, 46 fatal.
	Betul	"	·36	Rain heavy in places.
	Narsinghpur	"	2·	Weather cloudy; ploughing commenced; fever prevalent; prices stationary.
	Jubbulpore	"	1·54	Weather stormy; cholera abating; small-pox continues.
	Saugor	"	...	Weather cloudy and close; ploughing continues; small-pox prevalent.
	Seoni	"	...	Kharif ploughing commenced; small-pox decreasing; cattle disease prevalent; prices stationary.
	Damoh	"	1·	Kharif sowings commenced; prices stationary.
	Mandla	"	1·90	Prices stationary.
				General Remarks.—The monsoon seems about to set in all over the country; ploughing and sowing in operation.
Mysore and Coorg—				
	Mysore	(June 17th)	1·60 in Bangalore Cantonment. 2·52	Fever still prevalent; crops generally thriving.
	Coorg	"		*General Remarks.*—Agricultural prospects good.
Hyderabad Assigned Districts—				
	Umraoti	(June 17th)	3·75	Cholera spreading in Buldana district; of 546 attacked 106 died; disease increasing in Akola district; cotton sowing commenced.
Rajpootana—				
	Sirohi	(June 14th)	...	Tanks have received a good supply of water; wells also rising; weather seasonable; health very good.
	Meywar	(11th)	...	Water supply, health, and prospects good; frequent storms and signs of early monsoons.
	Harowtee	(12th)	...	One heavy fall of rain; cholera cases reported in Jhalawar, Tonk, Kotah and Shahapoora.
	Bickanare	(4th)	·09	Sand-storms during the week.
	Soojangurh	(10th)	...	Plenty of rain on the 28th ultimo; no epidemic prevalent.
	Ulwar	"	...	Tanks dry; many wells falling short in supply; health good; preparations for sowings have begun.
	Joypore	(17th)	*Nil*	Weather cloudy; health good.
	Ajmere	"	...	Dry south-westerly winds have lessened the intense heat of last week; health continues good.
	Bhurtpore	"	...	Dust-storms severe; hot winds variable; rain of 14th cooled atmosphere; north-easterly breeze; weather cloudy since; health improved.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24TH JUNE 1875.

GENERAL REMARKS.—The monsoon is not yet general throughout India. In Madras the falls have been scanty, except in Malabar. In Bombay rain is reported from every district except Sind: below the Ghâts it has been heavy, but more is required in the Deccan and Gujarat. In Sind the river is still low. The rain has been general throughout the Central Provinces and Berar. In Bengal the falls have been heavy, the returns from Bhágalpur, Sarun and Darbhanga and parts of Chota Nagpúr only being blank. In the North-Western Provinces the monsoon has not yet passed westward of Allahabad, although showers and storms have occurred in these tracts. In Oudh also it is not yet general. In the Punjab slight falls are reported from only three districts. In Rajputana there have been storms and showers. Prospects are satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(June 24th)	·20	Rain at Masulipatam two inches; in Palnad about one inch; elsewhere seven inches above anicut; canals not opened; agricultural operations commencing; markets well supplied locally; prices steady; mild small-pox still reported; cattle disease at Palnad; dry fodder used.
Kurnool	(23rd)	0·53 in five days.	Pretty good rain in two taluks; slight elsewhere; yellow jonna and sajja being sown in red soils; markets well supplied; prices rising in Ramulkota and Pattikonda; stationary elsewhere; fever and small-pox prevalent; cattle healthy; water and pasture sufficient; no water over Sunkesala anicut.
Tanjore	(24th)	0·65 at Negapatam.	Rain elsewhere moderate; water supply scanty in rivers and tanks; water over anicuts *nil;* cultivation going on in parts; standing crops very few, generally good; harvest, gingelly seed, yield fair; markets well supplied; prices steady; cholera prevalent, more especially in Negapatam and Nannilam; cattle generally healthy, some loss in Mayaveram and Shealli; pasture improving.
Trichinopoly	(23rd)	*Nil*	Water supply sufficient; crops good order; cholera in town of Trichinopoly, increased since the rain, several cases in districts.
Malabar	(24th)	12·90	Rain favorable for cultivation; transplanting of first crop in progress; markets well supplied; prices increasing; small-pox and fever slight; cattle healthy; pasture much improved. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay— (June 24th)		
Sindh		
Kurrachee (23rd)	...	River at Kotree on 19th 45 inches lower than on the same date last year; Nara still closed; rice seedlings in Shahbandar division suffering for want of water; weather cloudy; high moonsoon winds.
Shikarpur „	...	All canals open; weather warmer; river 11 feet 7 inches, 10 inches less than last year.
Hyderabad „	...	Crops the same as before; river much higher; all canals flowing; public health good; strong monsoon winds.
Upper Sind Frontier „	...	Heat oppressive; Begari and branches dry; deep anxiety respecting kharif crops.
Gujarat.		
Ahmedabad (June 23rd)	1·3	Cholera abating—41 cases, 5 deaths.
Kaira „	1·21	Sowing commenced; cholera cases 257, deaths 95; weather cloudy.
Surat „	5·92	Rainfall general; sowing operations commenced; weather very cloudy; public health good.
Broach „	9·86	Slight cholera prevails; kharif sowings progressing.
Khandesh and Nasik.		
Khandesh (June 23rd)	1·98 at Dhulia.	202 deaths from cholera out of 579 cases; kharif and cotton sowing commenced.
Nasik „	3·34	Rainfall general, but not sufficient for sowing; a few cases of cholera, district otherwise healthy.
Konkan.		
Tanna (June 23rd)	9·68	Cholera prevalent; sowing operations commenced.
Deccan.		
Poona (June 23rd)	4·20	Rainfall general; cholera and cattle-disease continue in a few talukas; sowing of kharif partially commenced in three talukas.
Ahmednuggur „	1·3	More rain wanted; cholera in eight and cattle-disease in three talukas; sowing operations commenced in some places.
Sholapur „	1·35	Sowing of early crops commenced.
Satara „	0·76	Sowing operations commenced; cattle-disease in six talukas; fever prevalent.
Southern Mahratta Country.		
Belgaum (June 23rd)	2·30	Sowing of rice in progress.
Dharwar „	...	Little rain, more wanted; sowing of early crops progressing; fever, ague and cattle-disease slightly prevalent.
Kanara „	19·5	Sowing operations continue; rice crop satisfactory; fever, small-pox and cattle disease prevalent.
Kaladgi „	1·87	Sowing operations commenced; fever and cattle disease prevalent.
Kathiawar.		
Rajkot (June 23rd)	1·44	Weather cloudy; sowing operations commenced; health good.
Wudwan „	1·90	Weather cloudy; health good.
		General Remarks.—Prospects so far tolerably good; more rain wanted in the Indus, and more rain in Gujarat and the Deccan.
Bengal—		
Chittagong (June 24th)	2·94	Cholera decreasing.
Noakhally „	9·06	In the interior slight increase of fever and bowel complaint and cholera among the prisoners at head-quarters. The epidemic of cholera has broken out both among river and tank fish.
Tipperah „	3·36	
Chittagong Hill Tracts „	11·65	
Hill Tipperah „	10·73	Public health good.
Backergunge „	6·21	General health good.
Furreedpore „	7·50	
Dacca „	1·90	
Mymensingh „	7·39	
24-Pergunnahs „	5·16	Fever decreasing at Barripore, a mild form of it prevailing at several places in Sub-Division Basirhat; a few cases of cholera reported from Satkhira.
Nuddea „	2·31	
Jessore „	12·84	
Pubna „	5·49	Small-pox reported in the extreme south-west of the district and cholera at a village 12 miles west of Surajganj.
Moorshedabad „	3·05	At the commencement of the week outbreak of cholera in Sujaganj, 7 attacked and 2 died; small-pox still continues in a mild form also at Nulhatty and Danigram.
Rajshahye „	2·97	No sickness prevalent.
Bogra „	2·22	
Maldah „	·76	
Dinagepore „	4·90	
Rungpore „	4·0	
Cooch Behar „	11·86	Cholera decreasing.
Jalpaiguri „	3·92	Cholera is still prevalent in many parts of the district, and is reported to have broken out with great severity in the Mech villages in the Duars.
Midnapore „	9·58	
Howrah „	3·42	
Hooghly „	4·21	Health good, except a little cholera.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal,—continued.		
Bhágalpur (June 24th)	...	General health good.
Chumparun „	3·55	
Sarun „	...	
Darbangha „	...	
Mozufferpore „	2·70	
Patna „	1·61	Cholera still prevalent throughout the district in parts of Behar sub-division.
Gya „	1·31	Cholera still bad in Aurungabad and extending in Nowdah.
Hazáribágh „	·88	
Lohardugga „	1·42	Cases of cholera and small-pox are still reported.
Maunbhoom „	2·32	
Singbhoom „	...	Healthy.
Palamow „	...	Public health good.
[illegible] „	9·05	A little cholera still around Kendrapara; public health otherwise good.
[illegible] „	1·73	
		General Remarks.—The monsoon has regularly set in and rain is reported in almost all the districts of Bengal; in some it has been very heavy and flooded the land, but it has benefitted the crops generally; in a few places it has submerged the crops in low land, and injured them to some extent; more rain is wanted in a few districts. Sowing and transplanting of the main rice are progressing vigorously. The prospects of the early rice look favourable, and it is being harvested in Rungpore. Indigo is doing well and is being manufactured in places; cattle disease in Backerganj and Noakhally. Prospects are on the whole satisfactory.
N. W. P.—		
[illegible] (June 23rd)	...	Rains set in on 21st.
[illegible] „	...	Rains set in on 21st, with partial showers from one to three inches; river rising slightly.
[illegible] „	...	Looks like commencement of rains; about an inch rainfall generally; ploughing begun in some parts.
[illegible] „	...	No general rain; prospects good.
[illegible] (June 22nd)	...	Rains still holding off; no change.
(23rd)	...	Some cattle disease reported.
Hamirpur (24th)	*Nil*	Clouds without rain; variable winds and great heat.
Jhansi (22nd)	...	Slight storms with showers; rains holding off.
Agra (23rd)	...	Slight clouds.
Meerut „	*Nil*	
Bareilly „	1·9 on the 18th.	
[illegible] (June 22nd)	*Nil*	Cholera in two villages.
[illegible] „	·3	Weather seasonable; showers in a few villages of Sirsa District; preparing for kharif sowings where rain has fallen; health good.
[illegible] „	*Nil*	Cholera appeared in a few villages, but no fresh cases for last two days.
[illegible] „	*Nil*	Health good; heat intense.
[illegible] „	·9	Health good.
[illegible] „	·20	Health good; cattle disease continues.
[illegible] „	more wanted.	
[illegible] „	*Nil*	Kharif sowings under average owing to deficiency of canal water; health good.
Dera Ismail Khan „	*Nil*	Rain much required; health good.
Peshawur „	*Nil*	Slight fever in district.
		General Remarks.—General health of the province good, the few cases of cholera confined to the Southern Districts; measures taken to prevent spread of cattle disease in the districts in which it has appeared. Weather on the whole seasonable.
Oudh—		
Lucknow (June 23rd)	·1	Prices stationary; weather cloudy, but rain not yet general; kharif [illegible] progressing; cholera still exists.
[illegible] „	*Nil*	
[illegible] „	1·3	
Central Provinces—		
Upper Godavari (June 19th)	4·24	Small-pox continues; prices easy.
[illegible] (20th)	2·29	Rice sowing commenced; cattle disease decreasing; prices steady.
Bilaghát (21st)	3·0	Weather cloudy; kharif sowing commenced; small-pox continues; prices rising.
Chhindwara ...	1·64	Kharif sowing commenced; health good; prices steady.
Bhandara (22nd)	3·88	Cloudy weather; kharif sowings commenced; fever decreasing; cholera and small-pox continue.
Nagpur (23rd)	3·20	Weather cloudy; kharif sowings commenced; health good; prices stationary.
Wardha „	5·90	Kharif sowings commenced.
Nimar „	2·48	Kharif sowings commenced; 36 cholera cases, 5 fatal; prices rising.
Hoshangabad „	2·69	48 cholera cases, 19 fatal; kharif sowings commenced.
Betul „	2·47	Kharif sowings commenced.
Narsinghpur „	2·17	17 cholera cases, 8 fatal.
Jubbulpore „	1·45	Small-pox continues.
Saugor „	1·45	Weather cloudy; small-pox continues; prices steady.
Seoni „	3·25	Health good.
Mandla „	3·50	Kharif sowings progressing; prices stationary.
Damoh „	·90	Small-pox declining.
		General Remarks.—Monsoon set in with moderation; rainfall not great; weather cloudy and promising; cholera still hangs about Narbada Valley.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg—			
Mysore	(June 24th)	·37 in Bangalore Cantonment.	Fever still prevalent; sowing of dry crops progressing.
Coorg	„	7·26	*General Remarks.*—Agricultural prospects satisfactory.
Assam—			
Gauhati	(June 24th)	3·67	Mornings overcast and often rainy; evenings clear; nights cold; asu being reaped; prospects of all crops favourable; season for tea good; choleraic diarrhœa on the decrease; cattle disease still reported from several mauzas in North Kamrup.

No. 27. SIMLA, SATURDAY, JULY 3, 1875. Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1ST JULY 1875.

GENERAL REMARKS.—The monsoon has not yet become general throughout Northern and Western India. In Madras the falls have been scanty, except in Malabar: good in Mysore and Coorg, and general throughout Bombay, where however the distribution has been very irregular, in some places exceedingly heavy rain having fallen and in others very little. They have been general throughout the Central Provinces, Berar, and the Southern and Eastern portions of Central India. In Bengal and Assam the falls have been general and abundant; the only districts in Bengal where none has fallen are Hooghly, Balasore, Bhagalpur, Patna and Sarun. In the North-West Provinces the rains continue east of Allahabad, and the monsoon has broken in Bundelkhand; elsewhere there have been showers, but no general rain. In Oudh also the rains are not yet general; and in the Punjab they have nowhere set in: light showers have fallen in Hissar, Umballa, Jullundur and Rawul Pindee: elsewhere there has been no rain, and some anxiety is felt. Throughout Rajputana rain still holds off. In Sind the river is abnormally low, and considerable apprehension is felt in consequence. Elsewhere prospects are satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(July 1st)	...	Masulipatam no rain; Jissunnapet ·50; Nandigama ·40; Bezwara ·20; none elsewhere; rain wanted for ploughing and sowing; markets well supplied locally; prices steady; mild small-pox continues; cattle generally healthy; dry fodder sufficient; 11 inches over anicut.
Kurnool	(June 30th)	2·392 in three days.	Rain slight in the taluks; yellow jonna, sajja and areka being sown; markets well supplied; prices of rice falling in Ramalkota and Nandial; jonna rising in Nandial; others generally steady; fever prevalent; cattle healthy, Markapur excepted; water and pasture sufficient;
Tanjore	(July 1st)	...	Rain at Negapatam none; elsewhere partial and scanty; water supply moderate in rivers; none in tanks; water over upper anicut *nil*; cultivation, ploughing and sowing general; markets well supplied; standing crops very few in good condition; harvest none; prices steady; cholera more generally prevalent; cattle healthy; pasture insufficient.
Trichinopoly	(June 30th)		Rain wanted; cholera in the town slightly increasing, some cases reported from the district; Cauvery pretty full; Coleroon low; very little cattle disease.
Malabar	(July 1st)	8·16	Rain favourable for cultivation; transplanting of first crop in progress; markets well supplied; prices rising; small-pox and fever slight; cattle healthy; pasture much improved. *General Remarks.*—General prospects satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—	**(July 1st)**		
Sindh			
Kurrachee	(June 30th)	...	River at Kotree 148 inches on 26th, 43 less than last year; injury to rice seedlings in two tapas; fever and cattle disease in three talukas; kharif crops in Delta and Sakra want water; weather cloudy but cool.
Shikarpur	„	...	Great want of water; river 9 feet 3 inches, 2 feet 7 inches less than last year; much loss expected unless river rises fast.
Hyderabad	„	...	River fallen greatly: it is 2 feet lower than the average, and unless it rises considerably within next week, kharif cultivation, save on large feeders, will be almost *nil*; public health good.
Upper Sind Frontier	„	...	No kharif preparations on Begari; its mouth being open by cuts through Kusmore Bund; gauge reading 1 foot, full supply 11 feet; health good.
Gujarat.			
Ahmedabad	(June 30th)	...	Sufficient fall of rain in the districts where agricultural operations have commenced; 19 cholera cases, 5 deaths.
Kaira	„	...	189 cholera cases, 70 deaths; weather very oppressive.
Surat	„	8·85	Sowing operations in progress; weather and public health good.
Broach	„	0·56	Slight cholera still prevails; kharif sowing progressing.
Khandesh and Nasik.			
Khandesh	(June 30th)	0·91	Cholera prevailing—846 cases, 256 deaths; sowing commenced; cotton market dull.
Nasik	„	8·13	Rainfall general; sowing of kharif crops in progress; a few cases of cholera and fever.
Konkan.			
Tanna	(June 30th)	25·37	Cholera prevalent; sowing operations completed in three talukas.
Deccan.			
Poona	(June 30th)	8·55	Rain has fallen in all talukas; cholera and cattle-disease continue in a few talukas; sowing of kharif progressing in four talukas.
Ahmednuggur	„	0·12	More rain wanted; cholera prevalent; sowing operations have commenced wherever rain has fallen; cattle-disease in two talukas.
Sholapur	„	0·15	Sowing of kharif retarded; except slight cholera in three talukas health good.
Satara	„	3·41	Sowing operations continue; young crops thriving; slight fever, ague and cattle-disease prevalent in certain talukas.
Southern Maharatta Country.			
Belgaum	(June 30th)	5·63	Sowing of rice nearly completed; fever in three talukas; cattle-disease in Athni.
Dharwar	„	...	Rain moderate; sowing of early crops almost completed; fever, ague and cattle-disease prevail slightly.
Kanara	„	4·0 at Karwar.	Season's prospects very favourable; fever general; small-pox, dysentery and cattle-disease on the coast and near the Ghâts.
Kaladgi	„	0·40	Kharif sowing stopped for want of rain; fever and cattle disease in five talukas.
Kathiawar and Gaekwar's territory.			
Rajkot	(June 30th)	1·8	Weather cloudy; health good.
Wudwan	„	...	Weather cool; sowing commenced; health satisfactory.
Baroda	„	5·0	Cultivation commenced; public health good.
			General Remarks.—River has fallen in Sind, and prospects are ominous in that province; elsewhere sowing in progress and prospects good; cholera is extending in the Deccan, and has not stopped in Gujarat.
Bengal—			
Chittagong	(July 1st)	11·07	
Noakhally	„	4·53	Some fever prevailing.
Tipperah	„	10·62	
Chittagong Hill Tracts	„	2·4	
Hill Tipperah	„	2·94	Five cases of cholera and two of small-pox at Koilashur.
Backergunge	„	4·11	A little disease is still reported among the cattle of five thannahs, and the fish disorder still continues.
Fureedpore	„	3·48	General health good.
Dacca	„	2·64	
Mymensingh	„	1·11	
24-Pergunnahs	„	2·42	Fever decreasing at Barripore and Basarhat; one or two cases of cholera reported from the latter station.
Nuddea	„	3·71	
Jessore	„	1·28	
Pubna	„	2·44	Cholera and small-pox have disappeared.
Moorshedabad	„	5·73	Few cases of small-pox reported.
Rajshahye	„	4·30	No sickness.
Bogra	„	3·42	
Maldah	„	12·06	
Dinagepore	„	2·18	
Rungpore	„	2·0	
Cooch Behar	„	4·37	Cholera gradually disappearing.
Jalpaiguri	„	2·74	Cholera on the decrease.
Darjeeling	„	10·78	
Midnapore	„	2·04	
Howrah	„	5·08	
Hooghly	„	...	Health fair, with a little small-pox.
Burdwan	„	·55	Cholera disappeared; no serious out-break of fever as yet.
Bankoora	„	2·12	
Beerbhoom	„	5·45	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal,—*continued.*			
Sonthal Pergunnahs	(July 1st)	2·20	
Bhágalpur	„	...	Health good.
Purneah	„	3·43	
Chumparun	„	·35	
Darbangha	„	·50	
Sarun	„	...	Cholera broken out in thannahs Sewan and Durrowlie.
Shahabad	„	1·54	
Patna	„	...	Cholera abated to some extent, except in one village in Behar, where it is still raging.
Gya	„	5·64	Cholera in Aurungabad decreasing.
Hazáribágh	„	6·17	
Lohardugga	„	2·89	Cases of cholera and small-pox still reported.
Maunbhoom	„	5·28	
Singbhoom	„	1·95	Healthy.
Balasore	„	...	Cholera reported to have broken out in the south, otherwise public health good.
Cuttack	„	4·49	A little cholera still remaining.
Pooree	„	1·4	
			General Remarks.—Rain is reported in almost all districts. In some it has been very heavy and flooded the low lands causing injury to the crops, particularly in Jessore, where the damage done by submersion of crops in Beels is considerable, but on the whole it has benefitted the crops. Sowing and transplanting of the main rice crops are progressing vigorously in some parts of Behar; it, as well as the early rice, is a little backward; early rice crop is generally flourishing. A little jute is said to have suffered by the rise of rivers. Indigo is not doing well in most places in consequence of excess of rain; in Sarun and Purneah it is doing well; manufacturing operations have commenced. Up to the present time the prospects of the crops are on the whole favorable.
N. W. P.—			
Benares	(June 30th)	...	Rains continue: no change.
Mirzapur	„	From 3 to 6½ inches.	Season very favorable; river rose till 28th, but has since fallen three inches.
Azamgarh	(„ 29th)	...	Rainfall over three inches at head-quarters and much heavier in the district sugarcane and indigo doing well; rice sowing begun; prospects good.
Allahabad	(July 1st)	...	Showers and sunshine; not much rain as yet.
Cawnpore	(June 30th)	...	Slight rainfall, hardly as yet sufficient for ploughing.
Banda	„	...	Rains begun; ploughing general.
Hamirpur	„	From 1½ to 3 inches.	Ploughing general.
Jhansi	„	2·50	Commenced on the 23rd.
Agra	„	From ·2 to ·12	Weather cloudy, thunder and duststorms, but the rains have not yet fairly set in.
Meerut	„	Slight rain in 3 parganas.	Cloudy weather.
Baréilly	„	·3 on the 28th	
Punjab—			
Delhi	(June 30th)	*Nil*	Weather cloudy; cholera in several villages.
Hissar	„	Slight rain.	Tanks drying up; rain urgently wanted for kharif sowings; health of division generally good, but several cases of cholera in seven villages of Rohtak District.
Umballa	„	·8	Ploughing for kharif; cholera still prevalent.
Jullundur	„	·8	Health good.
Lahore	„	*Nil*	Health good.
Rawul Pindi	„	Little rain.	Prospects and health good; cattle disease continues.
Mooltan	„	*Nil*	Kharif sowings considerably below average; failure of water in canals causes serious loss in some villages; health good.
Dera Ismail Khan	„	...	Rain much wanted; health good.
Peshawur	„	*Nil*	Rain much wanted; preparations for kharif sowings on irrigated lands; cattle disease appeared in two tehsils; slight fever.
			General Remarks.—The setting-in of the rains now looked for; cholera has appeared in a few more villages, but is dying out where it first appeared.
Oudh—			
Lucknow	(June 30th)	·3	Prices stationary; weather uncertain; rain not general, and the want of it begins to be felt.
Sitapur	„	·7	
Fyzabad	„	2·5	
Central Provinces—			
Chanda	(June 27th)	2·24	Sowings continue; cattle disease decreasing; prices rising.
Chhindwara	(28th)	4·19	Sowings continue; health good; prices steady.
Balaghât	„	3·10	
Bhandara	(29th)	3·82	Weather cloudy; sowings continue; 22 cholera cases, 7 fatal; fever and small-pox continue; prices easy.
Nagpur	(30th)	5·26	Sowings delayed owing to heavy rains; health good; prices rising.
Wardha	„	·04	Small-pox continues.
Nimar	„	1·29	Kharif sowings continue; 14 cholera cases, 9 fatal; prices risen.
Jubbulpore	„	4·50	Small-pox continues.
Saugor	„	3·53	Weather cloudy; sowings commenced; small-pox decreasing; prices rising.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces,— *continued.*			
Seoni	(June 30th)	6·40	Health good.
Narsinghpur	,,	17·	Much damage caused by overflowing of Singree Null; 11 cholera cases, 6 fatal.
Hoshangabad	,,	5·95	Sowings commenced; cholera decreasing.
Betul	,,	4·5	Sowings continue.
Mandla	,,	9·50	Sowings continue.
Damoh	,,	4·15	Sowings progressing; small-pox continues; prices stationary.
			General Remarks.—Heavy rain during the week; damage done to railway line by floods in Narsingpur District, otherwise season favorable.
Mysore and Coorg—			
Mysore	(July 1st)	·14 in Bangalore Cantonment.	Fever still prevalent in parts of Mysore province.
Coorg	,,	6·98	Agricultural prospects satisfactory.
Assam—			
Gauhati	(July 1st)	3·56	Mornings usually cloudy or rainy; cold north-east winds, nights cold; prospects of crops favourable; season for tea good; cattle disease still reported; in North Kamroop choleraic diarrhœa prevalent, but on the decrease.
Sylhet	,,	7·	Public health improving.
Hyderabad Assigned Districts—			
Umraoti	(July 1st)	1·15	Cholera still increasing in Buldana, Akola and Ellichpore districts; disease has appeared in Umraoti District; cotton sowing nearly completed.
Rajpootana—			
Sirohi	(June 28th)	...	A little water in some tanks; wells good; health very good; weather cloudy with occasional thunder-storms.
Meywar	(25th)	...	A good supply of water; health and prospects good; weather cloudy; winds from all points of the compass.
Marwar	(26th)	...	Three days' water-supply in city tanks; wells fast subsiding; a scarcity of drinking water much dreaded; health good; crops drying for want of rain; rain much wanted.
Bickanare	(19th)	*Nil*	Heat intense; hot winds blowing from 9 A. M. to 9 P. M.; prices rising; health good.
Harowtee	(26th)	...	Rain keeping off and much required; cholera hanging about the towns.
Deolee	,,	...	
Ulwar	(24th)	...	A very slight shower; tanks almost all dry; cholera in Kalumber Tehsil; much general suffering from the heat.
Jeypore	(July 1st)	*Nil*	Strong winds with sandstorms which have moderated heat; health good.
Ajmere	,,	*Nil*	Furious winds prevent clouds collecting; prices have risen; no more reports of cholera.
Central India—			
Indore	(June 30th)	1·67	General health improved, though cholera still hangs about.
Gwalior	,,	*Nil*	
Neemuch	,,	·55	
Rutlam	,,	3·41	
Baghelkhund	,,	Heavy rain, weather cooler.	
Sutna	,,		
Nepal—	(June 23rd)	2·05	Transplanting of rice begun in the hill districts.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 1st July 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.

PANJÁB LAWS ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill for the better administration of law in the Panjáb.

PANJÁB JUDICIAL ADMINISTRATION BILL.

The Hon'ble MR. HOBHOUSE also presented the Report of the Select Committee on the Bill to amend the law relating to certain Courts and Offices in the Panjáb. He said that this was a Bill which was introduced into the Council by their hon'ble colleague, Sir Douglas Forsyth, for the purpose of providing relief for the Deputy Commissioners and the Tahsíldárs in the Panjáb. When Sir Douglas Forsyth introduced it he explained that the intention of the Government was to provide for more separation than now existed in the Panjáb between the judicial and the executive duties of those officers; though it was not their intention to effect such complete separation as existed in more advanced parts of the country. The thing wanted was to appoint other officers having the same judicial powers as the Deputy Commissioners and Tahsíldárs, not to fix their duties by law, but to let the Executive regulate their duties as required by circumstances from time to time, the intention being that they should perform the judicial work which was now performed by executive officers, so as to leave those executive officers much more time than they had now to attend to executive work. It was found that the amount of alteration that the law required for that purpose was exceedingly minute, for the present Panjáb Courts Act provided that, in a certain state of the judicial business, and for temporary purposes, the Government might invest any other person with the powers of a Deputy Commissioner or a Tahsíldár. Therefore all that was wanted was to give to the Local Government those same powers, not subject to any condition, and not for temporary purposes alone. That was the whole alteration of the law which was proposed. The Bill had now been published for a considerable time. Remarks had been made upon it by local authorities, and the result was that the Select Committee had made one or two merely verbal alterations. The Bill was substantially in the same shape as when Sir Douglas Forsyth introduced it. MR. HOBHOUSE called attention to that because he was about to move that the Bill be taken into consideration and passed. That was the usual course, but it was a course consistent with our rules, only that if any Hon'ble Member considered

that the subject was one which required further consideration, he was entitled to object, and that objection must prevail unless the rules were suspended. The Bill had been pending now for some time, and the Panjáb Government were very anxious to begin the new system; and inasmuch as the Council had nothing to consider now, but what they had to consider about three months ago when Sir Douglas Forsyth introduced the Bill, he (MR. HOBHOUSE) thought he was acting within the limits of prudence in proceeding to the ulterior motions.

He then moved that the Bill be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

THE INDIAN TELEGRAPH BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to amend the law relating to Telegraphs. He said that the reason for amending the present Act was this. The law relating to Telegraphs was formerly regulated by an Act passed in the year 1854, and that Act gave power to the Governor General in Council to grant licenses for the establishment of Telegraphs, and it also gave the Government power to make rules for the conduct of Telegraphs established under those licenses. The Act of 1854 was repealed in the year 1860, and there was passed Act VIII of 1860 containing the law which now governed the subject. The Act of 1860 repealed the Act of 1854, except as to any license for the establishment of a line of Electric Telegraph granted under that Act, but it did not expressly save the power of making rules for the conduct of Telegraphs which had been established under license granted under the Act of 1854. It gave the Government power to grant licenses under the Act of 1860, and to make rules for the conduct of Telegraphs under those licenses, but omitted to say that the power of making rules under the Act of 1854 was to remain.

The Government had recently been advised by the Advocate General that that power either did not exist or that it was at least doubtful whether it existed, and the Government therefore could not prudently make any such rules. It was necessary that the Government should distinctly have that power, and therefore we proposed to amend the present Act. An opportunity would be taken at the same time to bring the penal clauses of that Act into greater conformity with the Penal Code, which the Council would observe was passed subsequently to Act VIII of 1860, and also to make some of the penal clauses more effective and stringent.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to regulate the emigration of Native labourers from the Presidency of Fort Saint George to the Straits Settlements. He said that in order to explain why it was proper to enact a special measure for the regulation of emigration to the Straits Settlements instead of leaving it to be regulated by the General Emigration Law, he must state briefly the course of events which had brought us to the point at which we stood. There had been going on for a great many years—he did not know how many—but at the least from the beginning of the present century, a considerable emigration of labourers from the Coromandel Coast to the Malay Peninsula. That emigration had been conducted with great advantage to both countries, and had resulted in the settlement of a large Tamil population on the eastern side of the Bay of Bengal. It was a purely voluntary movement on the part of the people, stimulated only by their own interests and wishes; it was not assisted by any law, neither was it impeded by any law till the year 1857.

In that year, however, and again in the year 1859, Acts were passed for the regulation of passenger traffic in the Bay of Bengal. The effect of such enactments was to render the voyage more expensive and to diminish the number of

emigrants. To meet the change, the employers of labour in the Straits Settlements adopted the system of employing agents in India to advance money to persons willing to emigrate, and of making contracts with them to serve for a term of years. That system again remained untouched by law until the year 1864, when the first consolidated Emigration Act was passed. By the Emigration Act of 1864, a very curious and quite unintentional effect was produced on the Straits Settlements. It would be remembered that they were then part of British India. But by the definition of the expression "British India" contained in section 2 of the Act, it was not to include the Straits Settlements. Section 3 ran as follows:

> "Except under and in conformity with the provisions of this Act, it shall not be lawful to make any contract with any Native of India for labour to be performed in any place beyond British India, or to enable any Native of India to emigrate or to assist any Native of India in emigrating;"

but with a proviso that the prohibition should not apply to the Island of Ceylon. Section 4 said that contracts might be made for emigration to certain places among which the Straits Settlements were not included. And sections 5 and 6 gave the Governor General in Council power to allow emigration to any other place, but only subject to all the provisions of the Act. Now, as he had had occasion to observe before in this Council, the spirit and object of our Emigration Laws was not to assist emigration, but to throw safeguards around it. In fact, they impeded the free course of emigration very much by requiring the observance of a number of formalities, both cumbrous and expensive. He was not now saying that these formalities were otherwise than beneficial, or even necessary, in order to avoid great abuses. He was not discussing that point now. All he now said was that, as a matter of fact, the law did impede emigration to places beyond British India.

Well, then, the legal position in which the Straits Settlements were placed by the Act of 1864, was a very unfortunate one. Emigration to Ceylon, which was not in British India, was left wholly unrestricted. Emigration to British Burma, again, was left wholly unrestricted. If the emigrant wanted to go to Tenasserim, the law had nothing to say against it; and nobody interfered with him. But if he wanted to go to Penang, which was not beyond British India as Ceylon was, and was practically at no greater distance than Tenasserim, everybody was absolutely forbidden under heavy penalties to assist him. He could not be assisted to emigrate to Penang except after an order of the Governor General in Council, and then only subject to all the safeguards which were thought necessary for a voyage to South America. Now he had said that the effect thus produced was unintentional, and he said so because it was impossible to suppose that such a thing would be intentionally done in entire silence both on the part of the Government of India and this Council on the one side, and on the part of the inhabitants of the Straits Settlements on the other side. Moreover, the origin of the mistake was easily discerned. There could be little doubt that it was produced solely by the circumstance that the Act contained a fictitious and unreal definition of the expression "British India", and that Nature, who though thrust out with a pitchfork would constantly reassert herself, resumed her dominion over the draftsman's mind at a later stage of his work. In fact, so little was the result intended or known that for fully six years after the passing of the Act the system of emigration that he had mentioned went on without alteration, and without anybody remarking that it was wholly illegal.

The Act of 1864 was repealed in the early part of the year 1871, and was replaced by the Act of that year, which now constitutes the law regulating emigration to places beyond British India. The Straits Settlements had then ceased to be part of British India. But the Act of 1871 made no alteration in their legal position: on that point it simply left the Act of 1864 untouched; and it was clear that the existing anomaly was never brought to the notice of the Government of India, though a controversy about it had arisen in the Presidency of Madras under the circumstances he was about to mention.

It was in the year 1870 that a Madras Magistrate, believing that a system of kidnapping Indian peasants for the Penang market had been set on foot, drew

attention to the state of the law, and actually commenced some prosecutions for penalties. The Madras Government then deputed Mr. H. J. Stokes, the Sub-Collector of Tanjore, to enquire into the matter, and he sent in a very able and careful report, showing that the supposed system of kidnapping did not exist, and that the system which did exist worked with a large preponderance of benefit to the Indian population. In the meantime, the employers of labour in the Straits Settlements represented the injury they would suffer by the stoppage of their supply of labour; the injustice of forbidding to Penang what was allowed to Tenasserim and to Ceylon; and the absurdity of enforcing the same regulations for a long voyage to the West Indies, and for a run of eight or ten days to the Straits of Malacca. Under these circumstances we passed Act XIV of 1872, which merely empowers the Governor General in Council to exempt the Straits Settlements from the provisions of the General Emigration Act. When he (MR. HOBHOUSE) introduced the Bill, he intimated that arrangements would be made between the Government of India and that of the Straits Settlements to put the system of emigration on a definite footing, but that time was necessary for the arrangement of details, and that in order not to disturb the industry of the Straits Settlements, it was necessary to leave the matter for a while in the hands of the two Executive Governments. Well, on that footing the matter had rested ever since. It had been decided that in order to secure the well-being of the emigrants, an ordinance must be passed by the Straits Settlements Legislature; and he believed that the provisions of that ordinance had now been put into a shape satisfactory to the Government of India, if indeed it had not actually passed into law.

On our side we had to frame such safeguards as were deemed necessary to throw around emigration to the Straits Settlements. He confessed he was in hopes that when a sufficient law had been passed on the other side of the water, nothing would have been found necessary on our side beyond the mere removal of the shackles placed on the emigration by the Act of 1871. But the Madras Government, who had the local knowledge necessary for a due understanding of the matter, and on whom lay the responsibility of duly protecting their subjects, did not think so. They were of opinion that, though a great deal of machinery required by the General Emigration Act might be dispensed with, some was still necessary to provide against abuses and disorders. Indeed, it was not the emigrant only who required protection; the employer of labour was liable to be cheated by the recruitment of infirm persons, or by the substitution of such for sound recruits in their passage to the ship that conveyed them away.

He believed he had now explained why it was necessary to have a special law to regulate this particular province of emigration. The Council were aware that the same necessity had been found in other provinces of the same wide subject, according to the special circumstances affecting them. The transit of labour between Bengal and Assam had its special law; that between Madras and Ceylon had its special law; and if Hon'ble Members would cast their eyes on the item No. 8 in to-day's list of business, they would see that a Bill was before the Council for making a special law as between British Burma and the rest of India. The special circumstances as between Madras and the Straits Settlements were the short distance, the long-standing continuance of the traffic, and the consequent numbers of the population already drawn from Madras, among whom the emigrant would find himself not wholly a stranger. It was premature to speak in detail of the contents of the Bill; that would be more properly done when he introduced it. He had already indicated its general principle, namely, the allowance of emigration under as few restrictions as were consistent with security. He thought we might congratulate ourselves on having the assistance in this matter of Sir Andrew Clarke, who had not only been engaged in preparing the ordinance of the Straits Settlements on this subject, but had seen the other side of the shield, and would be able to supply us with a kind of knowledge which he (MR. HOBHOUSE) had always felt that we wanted in discussing questions connected with emigration, namely, a knowledge of the actual life led by the emigrant in the country to which he was conveyed.

The Motion was put and agreed to.

OUDH LAWS BILL.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Mr. Eden and the Hon'ble Sir A. J. Arbuthnot be added to the Select Committee on the Bill to declare and amend the laws to be administered in Oudh.

The Motion was put and agreed to.

BURMA LABOUR CONTRACT BILL.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Sir A. J. Arbuthnot and the Hon'ble Sir A. Clarke be added to the Select Committee on the Bill to regulate the transport of Native labourers to British Burma, and their employment therein.

The Motion was put and agreed to.

The Council then adjourned to Thursday, the 15th July 1875.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8TH JULY 1875.

GENERAL REMARKS.—The rains are not yet general. In Madras there have been moderate falls in the Northern Districts, but little or none in the South, except in Malabar. In Mysore little has fallen. Throughout Bombay the falls have been scanty during the week, though prospects are still fair. In Sind the river is reported to be rising slowly, and apprehensions are less than last week. In the North-West Provinces the rains continue, with convenient breaks, in the Benares and Bundelkhand Divisions: in Rohilkhand, Agra and Meerut, they have set in: but in Cawnpore only showers are reported, insufficient for ploughing. In Oudh there has been good rain in the Fyzabad Division, but in those of Lucknow and Sitapur the monsoon is still delayed. In the Punjab showers have fallen in most districts, but more rain is required. In Assam proper the fall during the week has been slight, but heavy in Sylhet. In Berar, Central India and Nepal good rain has fallen.

No reports had been received from Bengal, the Central Provinces, or Rajputana up to the time of going to Press.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(July 8th)	...	1·75 inches of rain at Masulipatam, 2 inches at Palnad; slight elsewhere, one in Gudivada; some canals opened; five feet water over anicut; seed-beds forming in delta; cholum and sajja sowing in Palnad; markets well supplied locally; prices steady; mild small-pox continues; cattle unhealthy in Palnad; dry fodder sufficient.
Kurnool	(7th)	0·7 inch in two days.	Pretty good rain in Cumbun; slight elsewhere; yellow jouna, arica and sajja being sown; markets moderately supplied; prices rising in Tirwell, falling in Nandial, and generally steady in other [illegible]kas; fever prevalent; cattle healthy, except in parts of Markapur; w[illegible] and pasture sufficient; 1·5 feet water over Sunkesala anicut yesterday.
Tanjore	(8th)	...	No rain at Negapatam; elsewhere very scanty; water-supply moderate in rivers and none in tanks; water over lower anicut north branch one foot half inch; south branch 1 foot 4 inches, upper south 3 inches; north none; cultivation early rice and few dry and vegetable crops; standing crops very few, not thriving from want of rain; harvest none; markets well supplied; prices steady; cholera abating; cattle healthy; pasture insufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (July 7th)	...	Cholera in town much about the same; spreading slightly in district; high winds; no rain; pasture scarce.
Malabar (8th)	6·78	Rain favourable for cultivation; transplanting of first crop almost completed; markets well supplied; prices rising; small-pox and fever slight; cattle healthy; pasture much improved.
		General Remarks.—General prospects satisfactory.
Bombay— (July 8th)		
Sindh		
Kurrachee (7th)	...	River very low; agricultural prospects gloomy.
Hyderabad „	...	River risen slowly since 4th instant: should this continue, safety of greater part of kharif cultivation will be ensured; public health good; weather cloudy; some rain on night of 6th instant.
Upper Sind Frontier „	...	Weather extremely hot; kharif prospects unchanged.
Gujarat.		
Ahmedabad (7th)	0·26	Total rainfall since commencement of season 1·91; more wanted; six cholera cases, but no deaths.
Kaira „	0·46	Total rainfall 1·89; more required; 110 cholera cases, 43 deaths.
Surat „	0·10	More rain wanted in some taluks; weather and health good.
Broach „	...	Slight drizzling; kharif crops thriving; rain much needed; cholera continues.
Khandesh and Nasik.		
Khandesh (7th)	0·31 at Dhulia.	More rain wanted; cholera prevailing; hoeing of cotton in progress; prospects good.
Nasik „	0·25	Kharif sowings retarded for want of more rain; cholera decreasing.
Konkan.		
Tanna (7th)	2·42	Total rainfall 39·5; sowing operations completed; cholera continues.
Deccan.		
Poona (7th)	0·10	Ditto 14·55; sowing of kharif partially commenced; cholera prevalent.
Ahmednuggur „	0·10	Ditto 1·83; sowing operations generally impeded for want of rain; cholera continues.
Sholapur „	...	Total rainfall 4·40; cholera prevalent, except in Sangola.
Satara „	0·30	Ditto 6·46; kharif sowing generally progressing; slight cholera in three talukas; ague in Patan.
Southern Mahratta Country.		
Belgaum (7th)	0·98	Total rainfall 18·7; sowing of kharif in progress.
Dharwar „	...	Ditto . 11·88; sowing of rice almost completed, but of jowari, &c., delayed for want of rain.
Kanara „	2·5	Total rainfall 34·0; crops satisfactory; fever and cattle disease prevalent.
Kaladgi „	...	Kharif already sown destroyed by rats; fever and cattle disease prevalent.
Kathiawar.		
Rajkot (7th)	...	Total rainfall 2·67; sowing operations partly in progress.
Wudwan „	0·23	Total rainfall 5·26; owing to break crops in Dhrangadra and Chura withering.
		General Remarks.—Prospects in Sind still gloomy; in Presidency proper prospects fair, but marked deficiency of rain in some Collectorates; cholera continues in Gujarat and part of the Konkan and Deccan.
N. W. P.—		
Benares (July 7th)	...	Weather during the past week has been favourable for ploughing.
Mirzapur „	...	Season very favourable; showers from half an inch to three inches and a half; river nearly eleven feet above zero.
Allahabad (8th)	...	Rains continue with sunshiny breaks.
Cawnpore (7th)	...	Rains still keep off; occasional partial showers; hardly enough for ploughing.
Banda „	...	Favourable rain; ploughing and sowing general.
Hamirpur (8th)	...	Rain moderate as yet and good for ploughing; half an inch to an inch generally, except in pargana Mohaba, which got three inches and a half.
Jhansi (7th)	...	Rain stopped on 29th; slight fall on 4th; raining again to-day.
Agra „	From ·1 to 3·5	Rains seem to have set in; ploughing begun.
Meerut „	From ·6 to 2·5	
Bareilly „	5·70	
Punjab—		
Delhi (July 7th)	·6	Cholera abating; kharif ploughing in progress.
Hissar „	·1 at Hissar and slight showers at Sirsa.	Weather seasonable; sowings suspended for want of more rain; cattle suffering from scarcity of fodder; a few cases of cholera in Rohtak and Hissar districts, otherwise health good.
Umballa „	·8	Kharif sowing commenced; cholera still about.
Jullundur „	·1	Health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*		
Lahore (July 7th)	*Nil*	Rain anxiously awaited; health good.
Rawul Pindi „	·50	More rain wanted; health generally good; cattle disease lingers.
Mooltan „	*Nil*	Health good.
Peshawur „	...	Kharif sowings in progress on irrigated lands; cattle disease in two tahsils; slight fever prevalent.
		General Remarks.—More rain required throughout the province for the kharif sowings; cholera still confined to the southern districts, general health being otherwise good.
Oudh—		
Lucknow (July 7th)	*Nil*	Prices stationary; public health good. In the Fyzabad Division prospects are so far favourable; elsewhere the rains have been unduly delayed, and in the Lucknow and Sitapur Divisions some anxiety is expressed.
Sitapur „	...	
Fyzabad „	4·7	
Mysore and Coorg—		
Mysore (July 8th)	·09 in Bangalore Cantonment.	Fever still prevalent in parts of Mysore Province; crops generally thriving, but more rain wanted; agricultural prospects fair.
Coorg „	5·11	
Assam—		
Gauhati (July 8th)	·64	Mornings cloudy and hot; scarcely any rain during the week; prospects of crops favourable; tea cultivation progressing; cattle disease on the decrease; choleraic diarrhœa disappearing; public health generally good.
Sylhet „	5·38	Field work again progresses.
Hyderabad Assigned Districts—		
Umraoti (July 8th)	4·	Cholera still increasing in Buldana, Akola, Elichpur and Umraoti Districts; disease has appeared in Bassim District; since last fortnight of 5,710 attacked, 2,494 died; cotton sowing completed; jowaree sowing commenced.
Central India—		
Indore (July 7th)	1·40	General health good; agricultural prospects favourable.
Gwalior „	·65	
Neemuch „	3·27	
Rutlam „	2·91	
Baghelkhund „	3·	
Sutna „		
Nepal— (June 30th)	3·4	Agricultural prospects fair.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15TH JULY 1875.

GENERAL REMARKS.—The monsoon may now be considered to have set in, although the falls have been scanty in parts of Northern India. In Madras the fall has been good and general, except in the South-Eastern Districts: in Bombay it has also been sufficient. In Sind some rain has fallen, the river is rising, and prospects have improved. Throughout the Central Provinces and Berar the rainfall has been normal. In Assam it continues abundant. In Bengal it has generally been sufficient, except in Behar and a few other districts: the crops are doing well and the sowings for the winter rice progressing. In the North-West Provinces the rains continue in the Benares Province and Bundelkhand: they have set in in Agra: in Cawnpore, Meerut and Rohilkhand the falls have been light and partial. In Oudh also the rain is not yet general or sufficient. There has been rain throughout the Punjab, except in Sirsa and Rohtak, and prospects are good. In Central India the rain is general, and also in Rajputana, except in Bikaner and Alwar.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(July 15th)	1·41	Rain at Masulipatam 4 inches; at Repalli about 2 inches; elsewhere slight; 5 feet 7 inches of water over anicut; canal supply insufficient; seed beds forming; early dry crops being sown; markets well supplied locally; prices steady; mild small-pox and fever reported; mild cattle disease in four taluks; green grass everywhere.
Kurnool	(14th)	4·54 in six days.	Rain good in three taluks; moderate in two; scanty in others; sajja, yellow jonna, kawa and oilseeds being sown; market well supplied; prices of jonna rising in two taluks, steady in others; fever and small-pox prevalent; cattle disease in Markapur and Pattikonda; water and pasture sufficient; 1·2 feet of water over Sunkesala anicut yesterday.
Tanjore	(15th)	...	Rain at Negapatam ·44; elsewhere slight and partial; water-supply moderate in rivers and scanty in tanks; water over anicut none; cultivation, early rice and a few dry crops; standing crops very few, generally in good condition; harvest none; markets well supplied; prices slightly rising; cholera abating in some parts and increasing in others; cattle healthy; pasture insufficient.
Trichinopoly	(14th)	...	Cholera in town decreasing; spreading in districts, but not severely; rain much wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Malabar (July 15th)	4·17	Rain favorable for dry and wet cultivation; transplanting first crop almost completed; markets well supplied; prices rising; small-pox and fever slight; cattle healthy; pasture much improved. *General Remarks.*—General prospects satisfactory.
Bombay— (July 16th)		
Sindh (15th)		
Kurrachee "	...	River rising steadily; agricultural prospects improving.
Shikarpoor "	2·41 at Shikarpoor.	Rain throughout district; has much benefited kharif crops; more expected; cotton picking commenced; river 13 feet lower than last year by 11 inches.
Hyderabad "	1·5	River 2 feet higher than last week; a little rice destroyed from want of water; other cultivations progressing actively; there will be a decrease in cotton acreage; public health good.
Upper Sind Frontier "	0·92	Water-supply in Begari abundant; spring crops good; cotton 14 annas in the rupee; health good.
Gujarat.		
Ahmedabad (15th)	1·17	Total rainfall 2·17, more wanted generally; one death from cholera.
Kaira "	3·12	Total rainfall 5·1; 119 cholera cases, 42 deaths.
Surat "	2·27	Total rainfall 15·33.
Broach "	2·18	Total rainfall 12·85; slight cholera in all talukas except Jambusar; kharif thriving.
Khandesh and Nasik.		
Khandesh (July 15th)	0·68	Total rainfall 4·24 at Dhulia; sowing operations continue; young cotton plants thriving; flood at Shirpur on 6th; damage about Rs. 30,000; cholera as before.
Nasik "	1·32	Sowing retarded in some villages for want of rain; cholera decreasing.
Konkan.		
Tanna (15th)	11·1	Total rainfall 50·6; transplantation of crops commenced; cholera continues slightly in seven talukas.
Deccan.		
Poona (15th)	0·61	Total rainfall 14·65; sowing of kharif and cholera as before.
Ahmednuggur "	0·75	Total rainfall 2·58; sowing operations in progress wherever rain has fallen; cholera continues.
Sholapur "	2·30	Total rainfall 6·70; cholera continues.
Satara "	1·15	Total rainfall 7·61; more rain wanted in three talukas; sowing completed in some and progressing in other places; cholera prevalent; ague in Patan; cattle-disease in three talukas.
Southern Mahratta Country.		
Belgaum (15th)	1·92	Total rainfall 19·5; sowing of kharif progressing.
Dharwar "	0·69	Total rainfall 12·57; jowari, &c., not sown in six talukas for want of rain; rice in good condition.
Kanara "	10·0	Total rainfall 40·0; crops satisfactory; fever and cattle-disease prevalent.
Kaladgi "	0·89	Total rainfall 7·35.
Kathiawar and Gaekwar's Territory.		
Rajkot (15th)	0·6	Total rainfall 2·73; sowing operations suspended in some parts for want of rain.
Wudwan "	0·78	Total rainfall 6·4; sowing progressing.
Baroda "	2·68	Kharif crops healthy; public health good. *General Remarks.*—Prospects much brighter in Sind, the river having risen; monsoon generally favourable, but more rain is wanted in parts of Gujarat and Khandesh.
Bengal—		
Chittagong (July 15th)	6·84	
Noakhally "	4·19	
Tipperah "	2·87	
Chittagong Hill Tracts "	2·66	
Hill Tipperah "	2·9	Small-pox has broken out amongst the hill-people in the Koilaspur sub-division.
Backergunge "	2·69	Cattle disease is still prevalent in five thannas.
Fureedpore "	0·18	General health continues good.
Dacca "	2·46	
Mymensingh "	0·79	
24-Pergunnahs "	6·20	Fever decreasing at Barripore; a few cases of cholera reported from Basirhat and a case of small-pox from Satkhirah.
Jessore "	2·18	
Nuddea "	4·17	
Pubna "	1·16	Public health generally good, but there are many cases of fever of a mild type in the town of Pubna.
Moorshedabad "	0·18	Cholera prevalent in Soojaganj, Gorabazaar, and Gohurn.
Rajshahye "	0·79	No sickness.
Bogra "	0·23	
Maldah "	1·18	
Rungpore "	0·56	
Cooch Behar "	4·22	
Jalpaiguri "	10·22	Cholera disappearing.
Darjeeling "	4·50	
Midnapore "	2·32	
Howrah "	5·37	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal,—*continued.*		
Hooghly (July 15th)	2·20	
Burdwan "	1·5	
Bankoora "	2·68	
Beerbhoom "	1·85	
Sonthal Pergunnahs "	2·66	
Bhágalpur "	3·18	General health is very good, except in Muddeespoora, where fever is said to be prevalent.
Purneah "	·36	
Darbangah "	·12	
Mozufferpore "	·27	
Sarun "	...	General health good; cholera abating.
Chumparun "	3·16	
Patna "	·15	Cholera still prevalent, but is fast decreasing.
Gya "	·40	Cholera decreasing,
Shahabad "	3·28	
Hazáribágh "	5·01	
Lohardugga "	5·58	Small-pox and cholera still prevalent, particularly the latter in Palamow.
Maunbhoom "	4·65	
Singbhoom "	2·92	Healthy.
Balasore "	...	A good many cases of cholera reported from all parts.
Cuttack "	1·18	Cholera accompanying the pilgrims back from Pooree.
Pooree "	2·22	There is some cholera. *General Remarks.*—More or less rain is reported to have fallen in almost all the districts, doing much good to the crops and cultivation; in about ten districts the fall has been scanty, consequently more is urgently wanted there, though no injury has yet resulted from its want; in Modhoobaree sub-division of Darbangah and in Bogra serious damage to young crops is apprehended if it does not rain soon. Fair weather is also wanted in places where the rainfall was heavy; elsewhere the crops are doing well and the cultivation of the great rice crops is progressing rapidly. Early rice is being cut in places with good results; other crops faring well. A strong gale, accompanied by showers of rain, has been blowing in and about Calcutta from the evening of the 13th instant.
N. W. P.—		
Benares (July 14th)	...	Not much rain during the past week, except on the night of the 13th.
Mirzapur "	...	Season favourable; no continuous rain but partial showers from half an inch to an inch; steady general rain now falling; river 20 feet above zero on 11th, but has since fallen to 17 feet.
Azimgurh (13th)	1·6 at head-quarters.	Prospects good; ploughing general.
Cawnpore (14th)	...	Rains still very partial; ploughing and sowing continue favourable where rain has fallen.
Allahabad "	2·	
Hamirpur (15th)	...	From 12 to 19 tenths in the four southern parganas, where sowing goes on favourably; from 8 to 2 tenths in the north, where rain is much wanted.
Jhansi (14th)	...	Rainfall eight-tenths on the 8th; total rainfall hitherto 4½ inches; ploughing and sowing going on.
Agra "	...	General rain; ploughing begun everywhere.
Meerut "	...	Not enough rain for ploughing generally.
Bareilly "	·6	More rain required; ploughing begun.
Punjab—		
Delhi (July 14th)	·3	Health good; cholera disappearing.
Hissar "	·9	Heat oppressive.
Sirsa "	...	Agriculturists and cattle suffering from want of drinking water and fodder becoming scarce; ploughing and sowing in abeyance.
Rohtak "	...	29 deaths from cholera in this district, but general health throughout Hissar Division good.
Umballa "	·9	Kharif sowings in progress; no deaths from cholera since 11th.
Jullundur "	1·6	Health good.
Lahore "	·4	More rain wanted; health good.
Mooltan "	1·	Crops under average; health good.
Dera Ismail Khan "	1·	Health good.
Peshawur "	·4	More rain wanted; sowings in progress; cattle disease still continues in two tehsils and slight fever prevalent. *General Remarks.*—The rainfall has been general except in parts of the Hissar Division; every appearance of a further fall; cholera has reached the Kangra and Dalhousie Hills, but is disappearing from the Umballa and Delhi Divisions; cattle disease still lingers in certain districts; crop prospects generally good.
Oudh—		
Lucknow (July 14th)	1·4	Public health good; there have been partial showers in most places, but the complaint is general that more rain is urgently required.
Fyzabad "	2·8	
Sitapur "	1·8	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces,—			
Upper Godavari	(July 10th)	4·32	Weather seasonable; Kharif crops sown; health good.
Sambalpur	,,	2·65	Sowings continue; health good.
Bilaspoor	,,	·74	Sowings continue; cholera and small-pox prevalent; prices easy.
Raipur	,,	·95	Sowings continue; cholera decreasing; prices easy.
Chanda	(11th)	3·72	Rice sowings completed; other sowings continue; cattle disease prevalent; prices stationary.
Chhindwara	,,	3·17	Kharif sowing completed; crops look well; health good; prices steady.
Balaghât	(12th)	3·20	Transplanting rice commenced; health good; prices steady.
Bhandara	(13th)	3·72	Sowings continue, transplanting rice commenced; cholera, fever and small-pox prevalent; prices easy.
Nagpur	(14th)	4·48	Sowings continue; prices stationary.
Wardha	,,	2·45	Sowings continue.
Nimar	,,	1·28	71 cholera cases; 42 fatal; prices stationary.
Hoshangabad	,,	4·48	21 cholera cases; 9 fatal.
Betul	,,	4·50	Sowings continue.
Narsinghpur	,,	5·	Sowings continue; 2 cholera cases, 1 fatal.
Jubbulpore	,,	1·15	Small-pox continues; prices rising.
Saugor	,,	2·30	Crops above ground; small-pox declining; prices rising.
Seoni	,,	4·60	Sowings continue; health good.
Mandla	(15th)	3·20	Sowings progressing; small-pox continues; prices stationary.
Damoh	,,	1·20	Sowings continue; prices stationary.
			General Remarks.—Prospects generally good and weather seasonable; cholera smoulders in Narbadda Valley, in Chhattisgarh and Bhandara border.
Mysore and Coorg—			
Mysore	(July 15th)	1·66 in Bangalore Cantonment.	Health improved in Coorg.
Coorg	,,	5·31	
			General Remarks.—Agricultural prospects satisfactory.
Assam—			
Gauhati	(July 15th)	1·73	Weather very uncertain, hot and sultry; occasional heavy showers; asu being reaped, good outturn expected; season for tea good; prospects of all other crops favourable; public health generally good; cattle disease disappearing.
Sylhet	,,	6·44	Field-work progresses; rice slightly cheaper; fever prevalent; weather finer.
Hyderabad Assigned Districts—			
*Umraoti	(July 15th)	1·75	Cholera still prevalent in province and severe in some places; jowari sowing progressing.
Rajpootana—			
Sirohi	(July 12th)	4·25	Tanks nearly full; wells filling; health very good; seed-time favourable.
Aboo	... ...	.....	Rain up to date 14 inches.
Meywar	(9th)	4·40	Good supply of water; health good; prospects favourable; weather cloudy; southerly wind.
Marwar	(10th)	1·61	Two months' supply of water in tanks; wells filling; health good, excepting some fatal cholera cases in Mullanee, but rain has stopped their progress, tillage pushed on victoriously.
Bikaner	(3rd)	*Nil*	Heat intense; prices rising.
Alwar	(8th)	·20	Tanks dry; wells in short supply; cholera still prevalent in two tehsils; people suffering considerably from the great and prolonged heat; want of rain prevents agricultural operations.
Harowtee	,,	...	Slight showers; rain much required; cholera severe at Kotah.
Deolee	,,	2·	
Bhurtpore	(July 15th)	...	Heavy rain on 10th; health improved.
Jeypore	,,	...	Rain general; ploughing active throughout the territory; public health good.
Ajmere	,,	2·50 on 11th & 12th	Prices fallen; sowing generally going on.
Central India—			
Indore	(July 14th)	·83	Cholera still on the Vindias; otherwise general health and prospects good; sowing season has been very favourable.
Gwalior	,,	2·22	
Neemuch	,,	1·18	
Rutlam	,,	2·42	
Baghelkhund	,,	...	No return.
Sutna	,,	...	
Nepal—	(July 7th)	3·25	Agricultural prospects fair.

A. O. HUME,
Secretary to the Government of India.

EXTRA SUPPLEMENT TO
The Gazette of India.

No. 29. SIMLA, MONDAY, JULY 19, 1875. Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 15th July 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble T. C. Hope.

NEW MEMBER.

The Hon'ble MR. HOPE took his seat as an Additional Member.

PANJÁB LAWS AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill for the better administration of law in the Panjáb be taken

into consideration. He said that the Council were aware that although this Bill had rather a grandiloquent title, its object was merely to give the Government of the Panjáb greater power for making regulations for village-watchmen and police. The subject was one which was not thought of sufficient importance to handle when the Panjáb Laws Act was passed. He had explained to the Council, once or twice, how the Panjáb stood in respect to legislative matters, and how it was necessary, since the passing of the Indian Councils' Act, for the Panjáb Government to come to this Council for any additional legislative powers that it might require. The present Bill, since its introduction, had been published for several months. The remarks that had been made upon it had not induced the Select Committee to make any but verbal alterations; in fact, hardly any substantial alterations had been suggested, so that the Bill as amended by the Select Committee stood almost exactly in the same position as it stood when it was introduced.

The Hon'ble MR. HOPE said that perhaps Mr. Hobhouse would be so good as to inform him for what reasons two suggestions made by the Panjáb Government with regard to the Bill had not been adopted by the Select Committee. One of those suggestions was with reference to the second proviso to section 39A; the other with regard to section 39C. He had no doubt that the Select Committee had good reasons for rejecting those suggestions. The suggestions of the Panjáb Government were to be found in paragraph 6 of the letter No. 892 of the 3rd March 1875, from the Secretary to the Panjáb Government, which was amongst the papers considered in Committee.

The Hon'ble MR. HOBHOUSE said that according to his recollection the suggestion had been discussed, and that a slight alteration had been made. He had not the original Bill in his hands and could not recollect its precise terms.

The Hon'ble MR. HOPE said that his hon'ble friend Mr. Eden had now kindly explained the matter to him, with the facts of which he had not been previously aware. The second suggestion was with regard to retaining the power of the Governor General in Council in the matter referred to under section 39C.

The Hon'ble MR. HOBHOUSE explained that the reason for retaining that power was that the particular class of tax referred to was a new tax. In everything else he believed that the Bill followed the exact practice that had been observed in the Panjáb for a great number of years, but with respect to *kasbahs*, they proposed to have a more elaborate system of police, and they might therefore be obliged to put on a new tax. Now in such cases it was considered by the Government of India best to place some degree of check upon the Local Government, and to require them to refer to the Supreme Government whenever they desired to levy a new tax. It would be observed that the words "with the previous sanction of the Governor General in Council" had been transposed. The clause formerly ran so as to make the previous sanction necessary to the exercise of the discretion of the Local Government whether or no to apply Act V of 1861 at all. Now it was not proposed that the sanction of the Governor General in Council should be required for that exercise of discretion, but when they wanted to put on a new tax for the purpose of paying for that more elaborate system of police, then it was proposed that the sanction of the Supreme Government should come in.

His Excellency THE PRESIDENT observed that that view was in accordance with the policy of the Government of India in the case of all new taxes, whether provincial or local. Whether the tax was called a local or a provincial tax was of no consequence to the person who paid it, and the same dissatisfaction which might be created by the injudicious imposing of new Imperial taxes was also likely to follow the imposition of new provincial or local taxes. It appeared to the Government of India to be essential that a distinct and complete power of control, apart from the more general executive authority of the Government of India over the Local Governments, should be provided for in all Bills relating to local or provincial taxation.

The Hon'ble SIR A. ARBUTHNOT remarked that it seemed necessary that the Government should have the power to determine whether or not a tax was

expedient. In the case of most of the other Provinces, where legislation was resorted to, involving taxation, it was the practice to make in such legislation definite and specific provision as to the nature and description of the taxation which was to be levied; and it appeared to him a little doubtful whether in principle it was desirable that the nature and description of a tax, where taxation was sanctioned, should not be specifically provided for.

The Hon'ble SIR WILLIAM MUIR said that the same doubt had occurred to him in reference to clause *(j)* (under section 39A), namely, whether it was in accordance with legislative usage to confer the absolute authority on a Local Government of imposing a tax without any limitation as to the amount of its incidence, nor any condition as to the mode of its assessment. But on making inquiry into the subject, he learned that in this present case, the power in question had long been exercised by the Panjáb Government; and as the Bill simply legalized the existing practice, he had withdrawn the objection.

The Hon'ble MR. HOBHOUSE remarked that it had been the practice which, he believed, had prevailed since the acquisition of the Panjáb, and that it was in accordance with the law. When we acquired the Panjáb, the orders of the Government were the law, and they had since been expressly legalized by the operation of the Councils' Act. This state of things therefore was quite legal, and the Bill only proposed to continue it. But in point of fact there was a practical limitation of this tax, and a very substantial one, namely, the extreme smallness of the object for which alone it could be levied. It could only be levied for village-watchmen and the things connected with them. That was a minute matter and might well be left where it stood, in the hands of the Local Government.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

BURMA LABOUR CONTRACT BILL.

The Hon'ble MR. HOBHOUSE presented a preliminary Report of the Select Committee on the Bill to regulate the transport of Native labourers to British Burma, and their employment therein. He said that there was no motion before the Council with respect to this Report, and they did not propose to proceed with the Bill until there had been ample time for the Local Governments, and that portion of the public which was interested in the matter, to consider it; in fact, in all probability, it would not be desirable to proceed with the Bill until the Council got to Calcutta. But the Select Committee had introduced some very large alterations into the Bill, and those alterations again depended upon a most essential change in the administrative and financial system which underlay the whole of the legislation on this subject, and therefore it would be convenient if he now gave to the Council a short explanation of the nature of those changes.

It was now very nearly two years ago since he introduced this Bill into the Council. At that time there was no system whatever of assisted emigration to British Burma, but it was conceived that the owners of property in British Burma who stood in need of labour were prepared to advance funds for the purpose of importing labourers from peninsular India into British Burma, looking, of course, to be repaid by the value of the labour. In particular there was one large owner of property—the British Burma Company—who expressed a strong desire to have a law which would secure to them the fruits of the expenditure that they were prepared to make upon the importation of labourers into British Burma. Upon that footing a Bill was prepared, following in most of the essential respects the other enactments that we had upon the subject of emigration, that was to say, securing certain safeguards for the proper conduct of the emigrants down to the sea-shore, for their carriage across the sea, and for their protection against ill-treatment when they arrived at the place of labour; and, on the other hand, securing to the person that bore the

expenses the services of the labourers, putting summary remedies into his hands, and placing penalties upon the labourers in case they violated the terms of their contracts.

Well, the Bill was introduced and it was published, and it was intended to proceed with it after the Council got to Calcutta, because it was a matter that affected the Local Governments both of Bengal and Madras. But before any further step was taken there came the Bengal famine, and with the famine came a new plan of importation of labourers from Bengal into British Burma at the expense and under the direction of the Local Government. When that undertaking was commenced the Local Government of British Burma, over which his hon'ble friend Mr. Eden then presided, applied to the Council to stay their hands. Accordingly the progress of the measure was suspended for a considerable time. During that time the new plan came well into work, and the working of it had been considered quite satisfactory by the Government.

Now the Council of course were aware that there were different systems of emigration prevailing in different places. In most of those countries which, as regards the Government of India, were foreign countries, the system was to make the emigrant contract with the Government and for the Government to assign the emigrant to some particular private employer for the full term of his contract. In Assam, which was both near at hand to us and also was under our dominion, the practice was for the emigrant to enter into a direct contract with some private employer, and the Government had nothing whatever to do with the disposal of his labour. In the Straits Settlements, which were also near at hand to us, and which used, until quite lately, to be part of our dominions, the same practice prevailed as in Assam.

With respect to British Burma, as the two circumstances that he had mentioned of proximity and uniformity of dominion were the same as they were in Assam and as they used to be in the Straits Settlements, the circumstances seemed, in the first instance, to point to the adoption of the same system that prevailed in Assam, and accordingly the original Bill was framed upon that footing. But there were two reasons why in the case of British Burma we should rather adopt the system of contract with the Government. One reason—a very important one and probably of itself conclusive—was that the system had been started,—it existed,—it was working on a considerable scale and in a satisfactory way. The other reason was that the conditions of labour in British Burma were not the same as those that existed in other countries. In Assam, and also in our Colonies, the labourer directly he got into his new country was set to work for the whole term of his contract upon some plantation of tea, cotton, coffee, sugar, or some other product; but in British Burma the Government itself was the principal employer of the labourers who went there, and of those who were not employed by the Government, the majority were set to work in the towns or at some labour other than field labour. Well, then, he would state the system proposed for British Burma, and perhaps his hon'ble friend Mr. Eden, who knew more about the country than he did, would be good enough to correct him if he made any misstatement or any material omission.

It was proposed that every emigrant should enter into a contract with the Government to labour for a certain term of years, or, to put it more technically, he was to contract with the Secretary of State in Council who, for all purposes of property and contract, represented the Indian public. The contract would be regulated by section 13 of the Bill, which provided for the term of his engagement, which in no case was to exceed three years; the quantity of his work, which in no case was to exceed six days a week or nine hours a day; and the quantity of his wage, which in no case was to fall short of Rs. 7 a month. Then by section 35, which might be termed the corner-stone of this Bill, every emigrant who had entered into such contract, when it had been ratified by the Emigration Agent, was bound to serve according to the terms of his contract in the place and mode in which the Local Government, that was the Chief Commissioner of British Burma, should appoint. The expenses of conveying the people to their place of labour were intended to be borne in the first instance by the Local Government

of British Burma, and they would look for repayment to the value of the labour they got, or to some private employer who might desire to have the services of the labourer for a greater or less period of his contract. Every labourer who throve and succeeded would have to pay in some shape or other the expense of his own transit to his place of labour, and also something more which should represent the general expense of carrying the machinery of the Act into effect, and the expense of the conveyance of those persons who died or who fell sick, or in some way or other failed to produce any profit. In fact, in those operations, as in all operations on a great scale, the successes must pay for the failures. Now let us suppose that the cost of transit to Rangoon was Rs. 20. He was giving only imaginary figures, but he believed they were tolerably near the mark. Well, Government would want to be repaid this Rs. 20 and also something more which would represent the man's fair share of the general expenses. What that something more should be, would be ascertained by experience, somewhat roughly perhaps, but yet with tolerable accuracy. Let us suppose it to be Rs. 5. Therefore the man would have to pay Rs. 25 before he cleared scores with the Government. Now he might be dealt with in two different ways: either he might be assigned to somebody who wanted his services and would take him for a greater or less time and pay down the Rs. 25, or some portion of the money according to the period of the engagement, or he might be retained in the service of Government and the excess of his earnings according to the market-price of his labour over the contract-price of it would be placed to his credit; that was to say, the Government might say to him "you have contracted to serve us for Rs. 7 a month, your labour is worth Rs. 10, we will place Rs. 3 to your credit, or we will pay you Rs. 8 and place Rs. 2 to your credit, and whenever it comes to pass that Rs. 25 stand to your credit, then you shall be a free man." But then one might say, if it was the fact that the market-price of labour so much exceeds the contract-price, every good labourer would repay the Government over and over again before he had completed the three years of his contract. No doubt that was so, and if it should happen that a good labourer contracted to serve for three years, which however, be it observed, was the maximum and not the necessary term of his service, and that he worked all that time for Rs. 7, which however was the minimum and not the necessary amount of his wages, in that case the Government would be repaid long before the three years were out. But in order to meet such cases it was proposed that whenever the amount that was settled as the redemption price was placed to the credit of the labourer, that moment he might redeem his contract and become a free man. In fact, the Government wished for nothing so much as for free men instead of contract labourers, and they proposed to give every species of facility to the early redemption of contracts upon proper terms.

Of course the principle of the Bill could not be changed in the way Mr. Hobhouse had described. We could not change the whole motive power of the machinery we created without great modifications in the Bill itself. The Council would find the Bill very much shortened and simplified, and they would also find one or two questions, which he had mentioned when he introduced it as puzzling questions, entirely got rid of. He would briefly state the main features in which the original and amended Bills remained still the same and those in which alterations had been made by the amended Bill.

With respect to the treatment of emigrants from the time they left their own homes to the time they got on board-ship for British Burma, there was no material difference between the two Bills. The Bill still required a written contract before the emigrant left his home; it still required a local medical examination for the purpose of testing the man's fitness for labour; it still required a local examination by the Magistrate in the presence of the recruiter for the purpose of testing the man's knowledge of the undertaking into which he had entered; it still required a formal registration of the contract, and made that registration the foundation of all ulterior proceedings; and it still required due attention to the wants of the emigrant on the part of the recruiter, the Emigration Agent, and the Medical Inspector. Again, when the man arrived at the place of his labour, there was very little difference between the original and the amended Bills in the requirements they made for the purpose of securing to him due protection against any imposition or ill-treatment. But inasmuch as the Local Government would be entirely responsible for his conveyance from penin-

sular India to his place of labour, it was proposed to omit a great number of detailed requirements which were in the original Bill respecting the period of transit, because those matters might now be provided for much better either by general rules or by simple executive orders.

Of the questions of which he said we had got rid, perhaps the most puzzling was the question of labour-rate. The original Bill provided that the Local Government might levy a rate upon all employers of emigrants not to exceed Rs. 5 per emigrant, and the rate might be levied yearly. There were considerable difficulties in fixing the maximum amount of that rate, and perhaps greater difficulties in fixing its exact incidence. It was necessary because we were proceeding on the footing of a direct contract between the emigrant and the employer, and the employer would only pay the expense of the actual transit of each person; whereas there was also the expense of the general machinery to be provided for, and the Government which provided that machinery ought to be reimbursed in some way. But now, seeing that every contract was to be made with the Government, and that the private employer would get no labour except by an assignment from the Government to himself, it seemed more proper and certainly would be much easier to make him pay in one lump sum the expense of the transit of the labourer he took, and the percentage on it to cover the expenses of the failures and of the machinery. That would be provided for in the first instance in the assignments, which of course would differ in the charges they imposed upon the employer according to the length of time for which he took the labourer. After a time it would probably be possible for the Local Government to fix upon some general rules to regulate those payments, and the Bill gave them power to do so.

Another matter of considerable difficulty was the terms upon which contracts should be redeemed. The original Bill gave a scale or tariff on which every emigrant should be entitled to redeem his bargain with his employer, so many rupees for the first year, so many for the second, so many for the third. It was a very rough way of ascertaining the price of redemption, and it met with a good deal of remonstrance from our friends the British Burma Company as representing the employers of labour. But now he had explained to the Council the very simple mode in which it was proposed that as between the labourer and the Government the contract should be redeemed. Of course, if the labourer was assigned, he must redeem the assignment as well as the contract, and in the case of very short assignments probably the simplest plan would be that they should be worked out. In the case of long assignments it would be better to give the man some power of redeeming them, and we proposed that the Inspector of Immigrants in British Burma should decide whether the assignment should be redeemed or not. If not, the emigrant must work out his assignment. If it was to be redeemed, then it would be redeemed on the terms which would form part of the original bargain between the employer of the labourer and the Government, and which might perhaps after some accumulation of experience be reduced to rule.

Another difficult matter related to the return-passage of the emigrant. It had been our general policy to insist that the emigrant's contract should always contain a provision entitling him to a free return-passage, that is to say, one at the expense of his employer, whenever the term of his contract was worked out. However suitable that might be to other places, it was certainly not suitable to the system of short contracts and very easy redemptions which we proposed for British Burma. In point of fact the existing contracts under which labourers at this moment were going from India to British Burma did not provide for any such thing. On the contrary, it had been the policy of the Government of British Burma to offer the labourers grants of land for the purpose of inducing them to stay in their new country, instead of a money bonus for the purpose of inducing them to return to their old homes.

There were minor alterations in the Bill, some depending upon the essential alteration of principle he had mentioned, and others made because the provisions of the Bill were found not to be suitable to the circumstances of British Burma. But the Council was not now considering the Report, and he need not go into those matters in more minute detail. He thought he had stated enough to enable the Council, and those outside who might take an interest in the matter, to

grasp with facility the differences which existed between the original and amended Bills and the reasons upon which those differences rested.

The Hon'ble SIR WILLIAM MUIR said that there was one question he would like to ask his hon'ble friend Mr. Hobhouse. For sufficient reasons, the section providing for the return of the labourer to India had been properly removed from the new Bill as it now stood. But there was one exception, and that was with regard to disabled labourers. The Local Government, as he understood from section 60, should either provide for the employment and support of the disabled labourer and his dependents, or return them to the place at which they were registered. When the labourer was disabled permanently, and there was no means for his support or employment, he (SIR WILLIAM MUIR) would ask whether it would not be more suitable that the labourer should be provided with the means of returning to his home, rather than to the place of registration.

The Hon'ble MR. HOBHOUSE said that the expression suggested by Sir William Muir was the more correct expression. But as it was only a matter of a few words, it was hardly worth while altering the Bill, and it would be sufficient if the Secretary made a note of it for the Select Committee, to whom the Bill would come back again.

His Excellency THE COMMANDER-IN-CHIEF enquired why no provision was made for returning emigrants.

The Hon'ble MR. HOBHOUSE said that it was because the Bill contemplated a system of very short contracts. We contemplated a contract which should never be for more than a term of three years, and which in many cases would be less. Moreover a good labourer might redeem that contract within a year. The policy of the Government was to take a population into this very thinly-peopled country, and the Government of British Burma at this moment were offering grants of land to the emigrants in order to induce them to settle in British Burma. Now it would be an absurd thing if with one hand we offered inducements to the emigrants to stay in the country, while with the other we held out a money bonus to them to return home. Such a course would be both inconsistent and against our policy.

His Excellency THE COMMANDER-IN-CHIEF observed that it seemed to him that the emigrants might possibly not have intentions of settling in British Burma, and that if the rate of wages was only Rs. 7 a month, it would be a perpetual exile to a man, because he could never save a sufficient sum out of Rs. 7 a month in a foreign country to repay the Government and to defray the expense of his return home.

The Hon'ble MR. HOBHOUSE said that it was the difference between the contract-price and the market-price which would repay the Government.

His Excellency THE COMMANDER-IN-CHIEF remarked that the Bill as now framed seemed to indicate the possibility of a considerable population being thrown into British Burma who did not contemplate being for ever exiled from their own country and settled in British Burma, and of being left there without the means of returning.

The Hon'ble MR. EDEN explained that although the cost to emigrants of returning from the Colonies was Rs. 40 or Rs. 50, steamers left British Burma sometimes two or three times a week, which would bring back emigrants occasionally as cheap as Rs. 2 or Rs. 3 a head. The instances, he thought, would be very exceptional in which the emigrant could not afford to pay this sum, having regard to the fact that every labourer who chose could with ease earn eight annas a day. The case with regard to Colonial labourers was very different, as they had to be sent on emigrant ships a long voyage under special arrangements at a considerable cost per head.

His Excellency THE COMMANDER-IN-CHIEF said that the only other remark he wished to make was that the fixing of nine hours a day by law was rather a long period for labour. Eight hours was considered the usual working day.

The Hon'ble MR. HOBHOUSE said that was the time which was settled in the Department which attended to those matters, and that particular part of the Bill was framed by a gentleman—Mr. Geoghegan—who had great knowledge of the subject, and who was very vigilant with regard to the protection of emigrants. The point was not one on which Mr. Hobhouse himself possessed personal knowledge.

INDIAN TELEGRAPH BILL.

The Hon'ble MR. HOBHOUSE then introduced the Bill to amend the law relating to Telegraphs in India, and moved that it be referred to a Select Committee with instructions to report in six weeks. He said that this was a Bill which he obtained leave to introduce at the last meeting of the Council, and he then explained the necessity for the measure. It was to remove all doubt with respect to the power of Government to make rules for the conduct of Telegraphs licensed under the Act of 1854. That object was provided for by section 2 of the present Bill. The rest of the Bill, as he had already mentioned, so far as it altered the present law, consisted merely of penal clauses. The present Act was passed shortly before the Penal Code, with which it was not quite in accordance. It was now to be brought more into accordance with it, and several sections we found might be omitted altogether on account of the passing of the Criminal Procedure Code. He thought that the only section to which he need draw attention as embodying any important principle was section 15. That section provided for the increase of the police force if an act causing wrongful damage to any Telegraph was repeatedly committed in any place, and that the cost of such additional force should be charged upon the inhabitants of such place. Whether, under the present law, it would be competent to do that or not, MR. HOBHOUSE was not quite certain. It seemed to him that it would. The principle was contained in the Police Act V of 1861, one section of which gave the Local Government power to employ additional police in any part of the general police district in which, from the conduct of the inhabitants, they might deem it expedient to increase the number of the force. That was exactly the same principle which we proposed to apply to the Telegraphs. We only proposed to make it clear that it was capable of that particular application, and he did not suppose that any one would dispute that the instance in question would be a very beneficial application of the general principle.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE moved that the Bill be published in the official *Gazettes* in such languages as the Local Governments might think fit.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Mr. Hope be added to the Select Committees on the following Bills :—

To consolidate and define the law relating to the settlement and collection of land-revenue in Oudh.

For declaring what laws are in force in Oudh.

To consolidate and amend the law relating to Native Passenger Ships and Coasting Steamers.

To limit the jurisdiction of the Civil Courts throughout the Bombay Presidency in matters relating to the land-revenue.

The Motion was put and agreed to.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Mr. Eden be added to the Select Committee on the Bill to consolidate and amend the law relating to Native Passenger Ships and Coasting Steamers.

The Motion was put and agreed to.

The following Select Committee was named :—

On the Bill to amend the law relating to Telegraphs in India,—the Hon'ble Sir Andrew Clarke, Sir Douglas Forsyth and Mr. Hope and the Mover.

The Council then adjourned to Thursday, the 29th July 1875.

SIMLA,
The 15th July 1875.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

In the Extra Supplement to the *Gazette of India*, July 19, 1875, page 5, for the first two sentences in the second paragraph read :

"Of course the principle of the Bill could not be changed in the way Mr. Hobhouse had described, we could not change the whole motive power of the machinery we created, without great modifications in the Bill itself."

ERRATUM.

EXTRA SUPPLEMENT TO

The Gazette of India.

No. 30. SIMLA, SATURDAY, JULY 24, 1875. Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22ND JULY 1875.

GENERAL REMARKS.—Good rain has fallen in the Northern Districts of Madras and in Malabar: it is much wanted in the South. In Sind heavy rain has fallen at Hyderabad and Kurrachee: the river has risen greatly and is now sufficiently high. In Gujarat, Khandesh, the Konkan, and the South Mahratta Country the falls have been heavy: in the Deccan, Poona and Satara have had abundant, and Satara and Ahmednuggur scanty, falls. The rains are general and abundant throughout the Central Provinces, Berar, Central India and Rajputana. In Assam little has fallen, and more is wanted. In Bengal the falls have been general, but less than last week: more rain is reported to be urgently wanted in several districts of the Rajshahi, Bhágalpur and Patna Divisions. In the North-West Provinces the rains continue in the Benares Division, Allahabad and Bundelkhand; more is wanted in Cawnpore, Agra, Meerut and Rohilkhand. In Oudh good rain has fallen in Sitapur, little in Lucknow and none in Fyzabad: its want is much felt. In the Punjab the rain has been general except in Delhi and Hissar, where it is much needed.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(July 22nd)	·19 at Masulipatam.	Rain about one inch elsewhere; 5 feet of water over anicut channel; supply insufficient; early crops being sown; markets well-supplied locally; prices steady; mild small-pox in five taluks; fever and cattle-disease in Paluad; pasture improving.
Kurnool	(21st)	3·28 in six days.	Pretty good rain in three taluks, and less than an inch in others; jonna, sagga and areca crops being sown; market well supplied; prices rising in Pamalcotta and Nandial, stationary in others; fever prevalent; cattle-disease in Patticondah and Markapur; water and pasture abundant; 0·7 foot of water over Sunkesala anicut.
Tanjore	(22nd)	...	No rain at Negapatam, elsewhere slight and partial; water supply low in rivers, and none in tanks; water over upper anicut north branch 10 inches, south 1 foot 1 inch; lower anicut none; cultivation, rice and a few dry crops; standing crops very few, not thriving from want of rain; harvest none; markets well supplied; prices steady; cholera generally abating; cattle generally healthy; pasture scanty.
Trichinopoly	(21st)	...	Cholera in town abating, still prevalent in the district; rain much wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Malabar (July 22nd)	9·80	Rain favorable for cultivation; transplanting first crop almost completed; markets well supplied; prices steady; small-pox and fever slight; cattle healthy; pasture flourishing. *General Remarks.*—General prospects satisfactory.
Bombay— (July 22nd)		
Sindh (21st)		
Kurrachee „	...	River rising; heavy rain on Sunday and Monday.
Shikarpoor „	0·02	River 14 feet 9 inches; 8 inches higher than last year.
Hyderabad „	...	River risen 22 inches since last week; supply now sufficient for cultivation; rain 8½ inches.
Upper Sind Frontier „	0·25	Canals doing well.
Gujarat.		
Ahmedabad (21st)	4·95	Total rainfall 7·12; agricultural operations going on favorably.
Kaira „	7·58	Total rainfall 12·59; 39 cholera cases, 10 deaths.
Surat „	10·89	Total rainfall 26·22.
Broach „	19·92	Total rainfall 32·77; slight cholera in some talukas; agricultural prospects promising; cotton injured at Broach and Wagra by rain.
Khandesh and Nasik.		
Khandesh (21st)	2·29 at Dhulia	Total rainfall 6·53; cotton and other crops in good condition; cholera continues; 1,541 cases, 690 deaths.
Nasik „	4·30	Total rainfall 13·04; fall general; kharif sowing in progress; cholera decreasing.
Konkan.		
Tanna (21st)	11·63	Total rainfall 61·69; transplantation of crops in progress; cholera prevalent.
Deccan.		
Poona (21st)	4·05	Total rainfall 18·70; sowing of kharif and cholera continues.
Ahmednuggur „	0·12	Total rainfall 2·70; sowing operations generally impeded, except in Akola and Sangamner talukas; cholera prevails throughout district; increasing in Nagar taluka.
Sholapur „	0·40	Total rainfall 7·10; cholera prevails slightly in Madha taluka.
Satara „	5·42	Total rainfall 13·3; sowing of kharif generally completed; young crops thriving; cholera in 8 and cattle disease in 3 talukas.
Southern Mahratta Country.		
Belgaum (21st)	8·64	Total rainfall 29·69.
Dharwar „	4·48	Total rainfall 17·5; crops good; jowar sowing still progressing.
Kanara „	14·	Total rainfall 54·; crops good.
Kaladgi „	·18	Total rainfall 7·53; kharif sowing progressing.
Kathiawar and Gaekwar's Territory.		
Rajkot (21st)	1·28	Total rainfall 4·1 inches; weather continues cloudy.
Wudwan „	1·18	Total rainfall 7·22 inches; crops well; cholera in Li mri and Sfani.
Baroda „	8·78	Kharif crops healthy; public health good. *General Remarks.*—Height of river satisfactory in Sindh; prospects generally good in remainder of Presidency; cholera still prevalent in parts of Deccan and Gujarat.
Bengal—		
Chittagong (July 22nd)	·90	
Noakhally „	7·26	General health most favourable; no particular disease prevalent; accidental deaths of children from drowning frequent as usual at this time of the year.
Tipperah „	2·29	
Chittagong Hill Tracts „	7·70	
Hill Tipperah „	1·11	
Backergunge „	6·73	A little fever continues, and also a little cattle disease.
Fureedpore „	2·63	General health continues good.
Dacca „	1·75	
Mymensingh „	1·79	
24-Pergunnahs „	1·71	Cases of cholera reported from Satkhirah, Barripore and Basirhat; fever on the increase at Diamond Harbour and decrease at Barripore.
Nuddea „	1·32	
Jessore „	3·77	
Pubna „	1·09	Public health generally good, but there is much fever in and about the town.
Moorshedabad „	1·10	Cholera still prevalent at Soojagunj, Gorabazar, Gokwur and Kallyanganj thanas.
Rajshahye „	·68	There is no marked sickness.
Bogra „	·20	Cholera has entirely disappeared.
Maldah „	·08	
Rungpore „	·52	
Cooch Behar „	1·17	
Jalpaiguri „	·03	
Darjeeling „	2·78	
Midnapore „	2·02	
Howrah „	6·24	
Hooghly „	·81	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Burdwan (July 22nd)	...	Health fair.
Bankoora „	1·06	
Beerbhoom „	1·91	
Sonthal Pergunnahs „	1·01	
Bhágalpur „	1·07	General health very good, though fever, cholera and small-pox cases are reported here and there.
Purneah „	1·98	
Darbangah „	·49	
Sarun „	...	General health good; cholera in a mild form has broken out in Sewan.
Chumparun „	·13	
Patna „	1·32	Health generally good.
Gya „	2·12	Cases of cholera show an increase again during the week in Aurungabad Sub-division.
Shahabad „	0·25	
Hazáribágh „	4·53	Health good.
Lohardugga „	5·39	In Palamow cholera is increasing.
Maunbhoom „	3·71	
Singbhoom „	5·14	Healthy.
Balasore „	...	Cholera still lingers in a sporadic form, but the number of cases reported has decreased considerably during the week.
Cuttack „	5·52	Cholera accompanying the pilgrims who are coming back from the Ruth festival at Poorce.
Pooree „	2·47	*General Remarks.*—Reports have been received from almost all districts that more or less rain has fallen which has benefited the crops in general. The high winds noticed in the last report appear to have traversed about one-third the number of districts. The rice crop in parts of the 24-Pergunnahs, Jessore, Moorshedabad, Noakhally, Tipperah, Chittagong Hill Tracts, and Gya, have suffered either from excessive rain, high winds, or both. In Hazaribagh the Indian corn has been damaged past recovery, on the other hand rain is urgently required in about ten of the districts, mostly in the Rajshahye, Patna and Bhágalpur Divisions; elsewhere the state and prospects of the crops in general are good.
N. W. P.—		
Benares (July 21st)	Average rainfall 3·8	Weather favourable for sowing.
Mirzapur „	...	More rain needed north of Ganges; showers from 15 to 27 tenths; river rising.
Azimgurh „	3· at head-quarters.	Ploughing general.
Cawnpore „	Average rainfall 1·	Ploughing and sowing continue; more rain wanted, especially in the south-eastern parganas.
Allahabad „	Average rainfall 1·33	Prospects favourable save in north.
Banda „	...	Rains favourable; prospects good.
Hamirpur (22nd)	From ·1 to 2·	Rain fairly general; prospects good in south.
Jhansi (21st)	·7 at head-quarters.	Prospects good except in pargana Jhansi where rain is wanted.
Agra „	...	Good rain in Pinahat, but little in other parganas; rain is now wanted and seems to be imminent.
Meerut „	...	Ploughing begun in some parts; rain much wanted.
Bareilly „	...	Prospects of rice doubtful for want of rain.
Moradabad „	...	Rain wanted; delay in sowing especially in the case of rice in consequence.
Punjab—		
Delhi (July 21st)	...	No rain; sowing operations consequently retarded; general health good; cholera almost disappeared.
Hissar „	*Nil*	Rain much wanted; weather warm and cloudy; ploughing and sowing commenced in a few villages of Hissar and Sirsa where rain has fallen; health generally good but 55 deaths from cholera during the week in nine villages of Sirsa where cattle disease also prevails; cattle suffering from want of pasturage generally.
Umballa „	1·2	Kharif being sown; cholera still lingers; 3 deaths during the week.
Jullundur „	2·9	Ploughing and sowing in progress; a few cholera cases in Phillour Tahsil.
Lahore „	2·1	A good fall of rain throughout district; health and agricultural prospects good.
Rawal Pindi „	2·25	Prospects and public health good.
Mooltan „	...	Drizzling while report despatched; crops improving; health good.
Dera Ismail Khan „	·3	More rain wanted; Kharif sowing progressing.
Peshawur „	3·7	Kharif sowings in progress; cattle disease still in two tahsils; slight fever prevailing. *General Remarks.*—Cholera still lingers in certain localities, but health and agricultural prospects generally good, though rain much needed in Hissar District.
Oudh—		
Lucknow (July 21st)	·3	Public health good; prices rising; rains much wanted in Lucknow, Unao and Sitapur, and some anxiety is beginning to be felt in other Districts for the Kharif sowings.
Fyzabad „	*Nil*	
Sitapur „	2·2	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—			
Upper Godavari	(July 17th)	1·65	More rain wanted; health good; prices easy.
Sambalpur	„	4·44	Rice sowings completed; prospects favourable; health good.
Bilaspoor	„	3·90	Cholera and small-pox prevalent; prices easy.
Chanda	(18th)	1·33	Rice-crop doing well; cattle disease continues; prices stationary.
Chhindwara	„	3·81	Rain favourable to crops; health good; prices easy.
Balaghât	(19th)	7·60	Heavy continuous rain; transplanting rice continues; health good; prices steady.
Bhandara	(20th)	4·67	Transplanting rice continues; jowari sowings delayed owing to heavy rain; fever and small-pox continue; 10 fatal cholera cases; prices stationary.
Nagpur	(21st)	2·94	Transplanting rice commenced; four cholera cases in Ramtek tahsil; prices stationary.
Wardha	„	1·40	Sowings continue; two deaths from cholera.
Nimar	„	1·65	Sowings continue; 112 cholera cases, 58 fatal; prices stationary.
Hoshangabad	„	7·63	Nerbudda river in flood; 10 cholera cases, 7 fatal.
Betul	„	3·10	Sowings continue.
Narsinghpur	„	10·	Heavy continuous rain; sowings continue; 5 cholera cases, 3 fatal.
Jubbulpore	„	6·30	Small-pox continues; prices rising.
Saugor	„	11·12	Weeding commenced; prices stationary.
Seoni	„	4·40	Sowings continue; health good.
Damoh	„	5·75	Sowings continue; prices stationary.
Mandla	„	4·80	Sowings continue; prices stationary.
			General Remarks.—General prospects continue favourable, but in parts rain has been excessive. Cholera lingers in Nimar; elsewhere decreasing.
Mysore and Coorg—			
Mysore	(July 22nd)	·69 in Bangalore Cantonment	Fever still prevalent in Mysore.
Coorg	„	15·47	*General Remarks.*—Agricultural prospects continue satisfactory.
Assam—			
Gauhati	(July 22nd)	·07	Weather hot and sultry; want of rain retards the progress of the planting of salee; prospects of tea good; cattle disease on the decrease; public health good.
Sylhet	„	2·09	Reaping of aous crop commenced; rice slightly dearer; weather oppressive.
Hyderabad Assigned Districts—			
Umraoti	(July 22nd)	1·40	Cholera still prevalent; since last fortnight of 11,430 persons attacked 5,108 died; jowaree sowing nearly completed.
Rajpootana—			
Aboo	(July 22nd)	37·	Total rainfall up to date 53·, a quantity quite unprecedented.
Jodhpore	(17th)	...	2 inches of water in wells; rising in tanks; a month's supply; health good; cultivation going on; present crops promising; cholera in Mullanee entirely ceased.
Pallee	(21st)	...	Rain plentiful; rivers in flood; subsided on 17th and 18th.
Meywar	(16th)	2·3	Water supply, health and prospects good; light showers during the week.
Bickanere	(18th)	·64 on 7th & 8th	
Alwar	(15th)	2·82	Cholera subsiding in the tahsils which were suffering for the past months; good deal of land has been sown.
Harowtee States.			
Deolee	(July 15th)	3·5	
Tonk	„	1·6	
Kota	„	8·	
Jhallawar	„	4·5	Cholera abating at Kota, increasing at Tonk.
Bhurtpore	(22nd)	*Nil*	Weather cloudy and close.
Jeypore	„	...	Favourable rains; ploughings and sowings active; health good.
Ajmere	„	1·75 on 16th, 17th, and 18th.	Sowings in progress; season so far favourable.
Central India—			
Indore	(July 21st)	2·31	Cholera occurs occasionally in the Bheel Villages; general health in Central India good; rains promise favourably.
Gwalior	„	1·1	
Neemuch	„	6·80	
Rutlam	„	6·18	
Baghelkhund	„	6·80	
Sutna	„		
Nepal—	(July 14th)	2·5	Agricultural prospects fair. A few cases of cholera have occurred in the city of Katmandoo.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29TH JULY 1875.

GENERAL REMARKS.—In Malabar and the Northern districts of Madras good rain has fallen: in the South-Eastern Districts none. In Bombay the rainfall is general and plentiful, except in Ahmednuggur and Kaládgi. There has been rain in Sind, and the river is sufficiently high. The rains continue to be abundant throughout the Central Provinces, Berar, Central India and Rajputana. In Bengal the fall has been general, but in several districts of the Rajshahi, Bhágalpur and Patna Divisions insufficient, and in these fears are entertained for the safety of the main rice crop if more does not soon come. The rains are now general in the North-West Provinces and Oudh, and prospects are good. In the Punjab none has fallen in the Jullunder, Lahore, Mooltan and Dera Ismail Khan Districts: elsewhere prospects are satisfactory. Accounts are good from Assam and Mysore.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(July 29th)	...	Heavy rain last night, 6·84 at Masulipatam, none in Palnad, about one inch elsewhere; heavy fresh of 15 feet water over anicut; tanks full; canal supply sufficient; early dry crops being sown; markets well supplied; prices steady; mild dysentery and small-pox prevalent; cattle generally healthy; pasture good and improving.
Kurnool	(28th)	1·1 in four days.	Rain good also in the taluks; sowing of early crops continues; markets supplied; prices rising in Ramulkota and Nandial; stationary elsewhere; water and pasture sufficient; cattle disease in Markapur; fever prevalent; 3·5 feet water over Sunkesala anicut yesterday.
Tanjore	(29th)	*Nil*	Rivers rising; tanks, upland, almost empty; water over upper anicut, north branch 1 foot 6 inches, south 2 feet 7 inches; over lower anicut, north branch 4 feet 1 inch, south 4 feet 10 inches; wet cultivation general over delta; also a few dry crops; standing crops very few; in upland parts withering; harvest none; markets well supplied; prices almost stationary; cholera abating, 1,406 deaths this week against 1,624 last; cattle disease in parts, some loss; pasture scanty.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (July 28th)	...	Cholera decreasing in town, much the same in taluks; no rain; good freshes in river.
Malabar (29th)	6·92	Rain favorable for cultivation; transplanting first crop completed; markets well supplied; some cases of cholera in Calicut taluk; small-pox and fever slight; cattle healthy; pasture flourishing. *General Remarks.*—General prospects satisfactory.
Bombay— (July 29th)		
Sindh (28th)		
Kurrachee „	...	River high; rain general, more expected; rice in Sehwan and Dadir talukas injured by floods from hill torrents.
Shikarpur „	...	River 14 feet 3 inches, 2 inches over last year; kharif progressing fairly; slight fever prevalent.
Hyderabad „	...	River at good height; canals well supplied; considerable mortality among cattle in Tanda division during late heavy rain, also much damage to buildings, bunds, &c.; some loss in rice cultivation from rain floods.
Upper Sind Frontier „	...	Weather extremely hot and sultry; canals full; bund breached, no danger from breaches.
Gujarat.		
Ahmedabad (July 28th)	1·33	Total rainfall 9·62; prospects everywhere favorable.
Kaira „	4·40	Total rainfall 17·2; cholera cases 23, deaths 13.
Surat „	1·82	Total rainfall 27·71.
Broach „	2·96	Total rainfall 35·73; cholera slight; cotton injured in four talukas by rain; agricultural prospects good.
Khandesh and Nasik.		
Khandesh (July 28th)	1·88 at Dhulia.	Total rainfall 9·9 inches; sowing of kharif crops excepting bajari nearly completed; cotton plants healthy; cholera continues, 1,238 cases, 551 deaths.
Nasik „	4·66	Total rainfall 22·2 inches, fall general; agricultural prospects good; cholera slightly at Nasik and in talukas; for total rainfall 13·4 inches in last report read 17·36.
Konkan.		
Tanna (July 28th)	8·20	Total rainfall 69·89 inches; transplantation of crops in progress; cholera in eight talukas.
Deccan.		
Poona (July 28th)	4·88	Total rainfall 24·19 inches; sowing in progress wherever rain has fallen; cholera continues.
Ahmednuggur „	1·1	Total rainfall 3·31 inches; sowing operations progressing; cholera decreasing except in three talukas.
Sholapur „	1·25	Total 8·35 inches; cholera continues.
Satara „	10·57	Total 23·60 inches; kharif crops thriving; in Malwa crops suffering from excessive rain; in Khatan more wanted; slight cholera throughout district excepting Patan and Khatan.
Southern Mahratta Country.		
Belgaum (July 28th)	11·32	Total rainfall 40·93 inches; damage by floods in Chikori.
Dharwar „	2·47	Total rainfall 19·52 inches; kharif crops good; sowing of jowari retarded owing to excessive rain.
Kanara „	12·	Total rainfall 70 inches; crops good.
Kaladgi „	·80	Total rainfall 8·33 inches; sowings partially impeded for want of rain.
Kathiawar and Gaekwar's Territory.		
Rajkot (July 28th)	1·69	Total rainfall 5·70 inches; sowing operations over; cholera appeared at Bhannagar and Wala not of virulent type.
Wudwan „	·94	Total rainfall 8·16 inches; crops good; cholera in Limri. *General Remarks.*—Prospects generally excellent, but deficient rainfall in Ahmednuggur and a few other tracts; river risen in Sindh to a satisfactory height.
Bengal—		
Chittagong (July 29th)	3·91	
Noakhally „	2·44	
Tipperah „	6·86	
Chittagong Hill Tracts „	·18	
Hill Tipperah „	1·01	
Backergunge „	2·23	
Fureedpore „	1·18	General health good.
Dacca „	1·95	
Mymensingh „	·62	
24-Pergunnahs „	1·72	Fever and cholera decreasing at Barripore, two cases of small-pox reported from Satkhirah.
Nuddea „	2·03	Public health good.
Jessore „	·44	
Pubna „	·51	Fever of a mild type prevails in Pubna.
Moorshedabad „	·46	Cholera still lingers in the stations of Gorabazar and Soojaganj, and there were 11 deaths reported during the week.
Rajshahye „	·85	No sickness reported.
Bogra „	·24	
Maldah „	·53	
Dinagepore „	1·06	
Rungpore „	1·50	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar (July 29th)	1·07	
Jalpaiguri „	8·58	A few cases of endemic cholera at Jalpaiguri itself; there is less than before in the district.
Darjeeling „	9·07	
Midnapore „	1·34	
Howrah „	·91	
Burdwan „	·16	Fever decreasing.
Bankoora „	1·18	
Beerbhoom „	1·73	
Sonthal Pergunnahs „	1·21	
Bhágalpur „	·12	General health good.
Purneah „	·79	
Mozufferpore „	1·35	
Sarun „	...	General health is good; a little cholera still about in Sewan.
Chumparun „	·58	
Patna „	·47	Health generally good.
Gya „	·37	Cholera is still bad in the west of the district and not wholly disappeared in some other places.
Shahabad „	·62	
Hazáribágh „	·91	Health good.
Lohardugga „	1·88	Cholera prevalent at Palamow, and a few cases of small-pox are still reported.
Maunbhoom „	1·58	
Singbhoom „	3·05	A few cases of cholera have been reported from Dhulboom.
Balasore „	...	Cases of cholera are frequent and severe.
Cuttack „	12·43	Cholera has rather increased.
Pooree „	9·14	Cholera still lingers in the city; cattle disease is bad in Hattya. *General Remarks.*—During the week under review rain is reported to have fallen in almost all districts, but the fall has been insufficient in all the Rajshahye and most districts of the Cooch Behar, Patna and Bhágulpur Divisions; more rain is also wanted in half of the districts of the Burdwan and Presidency Divisions, and in parts of the districts of Mymensingh and Maunbhoom. Transplantation has stopped in many places for want of water, and serious consequences may be apprehended as to the fate of the main rice crops in most of these districts, unless rain falls copiously within a short time. Early or aus rice is being harvested in some of the districts of the Presidency, Rajshahye and Dacca divisions. In Dinagepore half of this crop has been destroyed by the drought, and unless rain falls within a day or two the entire crop will be lost. In Behar the prospects of the bhadoi crops still continue good except in Purneah and Bhágalpur; elsewhere the general prospect is favourable.
N. W. P.—		
Benares (July 28th)	...	Average rainfall 1·6; more rain wanted for the rice.
Mirzapur „	From 1·5 to 5·5	More rain wanted in Robertsganj; prospects favourable.
Azimgurh „	1·4 at head-quarters.	More rain needed in the interior for the rice.
Allahabad „	...	Average rainfall 3·50; prospects good save in north.
Cawnpore „	...	Beneficial rain everywhere; prospects good.
Hamirpur (29th)	From 1· to 6·6	Prospects good.
Jhansi (27th)	...	The rice wants rain, but the general prospects are good.
Agra (28th)	...	Timely rainfall of 3 to 35 tenths doing great good.
Meerut „	From ·7 to 1·7	Ploughing now general.
Moradabad „	...	Ample general rains; sowings secured; weather favourable.
Bareilly „	9·4 at head-quarters.	General and sufficient rainfall.
Punjab—		
Delhi (July 28th)	1·3	Sowing in progress; a few cases of cholera in Delhi city.
Hissar „	1·9	More rain expected; weather cloudy; very little barani cultivation in Hissar and Rohtak owing to continued drought; sowing and ploughing in few villages of Sirsa district; cholera abating in Rohtak and health generally good.
Umballa „	·5	More rain wanted to complete kharif sowing; cholera still prevails.
Jullundur „	*Nil*	Ploughing and sowing in progress; rain wanted; health good.
Lahore „	*Nil*	Health and agricultural prospects good.
Rawal Pindi „	1·	Prospects and health good.
Mooltan „	*Nil*	Weather cloudy; health good.
Dera Ismail Khan „	...	Health good.
Peshawur „	1·7	Sowing in progress; cattle disease has disappeared; slight fever prevailing and cases of small-pox in three tahsils. *General Remarks.*—Though cholera still prevails in certain localities, health throughout the province is generally good. Agricultural prospects on the whole good, but more rain required.
Oudh—		
Lucknow (July 28th)	4·7	Public health good; prices stationary; rainfall general; prospects of kharif favourable.
Sitapur „	Rainfall not reported.	
Fyzabad „	·2	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—			
Sambalpur	(July 24th)	6·88	Rice sowing completed; prospects good; cholera in a few villages on the Bilaspur frontier.
Bilaspur	„	4·66	Prospects favorable; cholera prevalent; prices easy.
Raipur	(26th)	11·50	Heavy continuous rain has damaged lowland rice; cholera decreasing; prices easy.
Chanda	„	7·33	Transplanting rice continues; prices easy.
Chhindwara	„	2·57	Crops look well; health good; prices steady.
Balaghât	(26th)	8·90	Heavy continuous rain; transplanting rice continues; health good; prices steady.
Bhandara	(27th)	8·90	Rice crops doing well; jowar suffered from excessive rain; small-pox and fever continue; cholera decreasing; prices easy.
Nagpur	(28th)	7·61	Rain heavy for crops sown; cholera in places; prices risen.
Wardha	„	4·85	Sowings continue; five deaths from cholera.
Nimar	„	2·76	115 cholera cases, 71 fatal; prices rising.
Narsinghpur	„	3·	Sowings completed; six deaths from cholera.
Jubbulpore	„	4·95	Health good.
Saugor	„	7·47	Crops flourishing; health good: prices rising.
Seoni	„	5·30	Sowings continue; health good.
			General Remarks.—In Nagpore, Bhandara and Raipur there has been excess of rain and a break is wanted; elsewhere prospects continue good.
Mysore and Coorg—			
Mysore	(July 29th)	·03 in Bangalore Cantonment	Fever abated in Coorg; cholera shown itself in Mysore District; 8 fatal cases from 14th to 28th.
Coorg	„	12·30	
			General Remarks.—Agricultural prospects fair.
Assam—			
Gauhati	(July 29th)	2·50	Irregular rain, hot and sultry, chiefly in mornings; asu almost reaped; good outturn; prospects of all crops, as also tea, favorable; public health good; cattle disease on the decrease.
Sylhet	„	7·23	Fieldwork progresses; prices steady.
Hyderabad Assigned Districts—			
Umraoti	(July 29th)	1·90	Cholera still prevalent though decreasing in some places during present week; of 3,752 attacked 1,853 died; agricultural prospects good.
Rajpootana—			
Sirohi	(July 26th)	·25	Tanks and wells fairly filled; health good; prospects fair; seasonable weather so far.
Aboo	(29th)	4·3	Total rainfall up to date 57·6.
Meywar	(23rd)	4·50	Tanks and wells in good supply; constant showers; health and prospects good.
Marwar	(24th)	·47	Three months' supply in city tanks; wells rising daily; health good; prospects promising.
Ulwar	(28th)	3·4	Temperature 89°; crop prospects favorable; cholera prevalent but declining.
Harowtee States.			
Deolee	(July 24th)	·7	Cholera almost left Kota, hanging about Tonk.
Tonk	„	·5	
Kota	„	2·7	
Jhallawar	„	4·2	
Shahpoora	„	1·2

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 29th July 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir Douglas Forsyth, K.C.S.I.
The Hon'ble T. C. Hope.

LAW REPORTS BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill for the improvement of Law Reports. He would explain to the Council, in a very few words, the reason for the introduction of that Bill. The Council would remember that an Act was lately passed with the object of improving Law Reports. One of the sections of that Act was framed for the purpose of giving to decisions of High Courts an extent of authority which they did not possess at the present moment. Well, the Secretary of State, with whom rested the duty of advising the Crown to disallow whatever laws he thought inexpedient, considered that that provision might lead to some embarrassment, and accordingly while he assented to, and approved of, the rest of the measure, he had intimated that he could not allow that particular portion of it to become law. He, however, suggested that, instead of disallowing the whole Act, we should ourselves repeal it, and re-enact such portion of it as was unobjectionable. The Bill he (MR. HOBHOUSE) proposed to introduce was simply for that purpose, and he presumed that the Council would have no objection to re-enact portion of that which they had already enacted.

The Motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR A. ARBUTHNOT moved for leave to introduce a Bill to provide Reformatory and Industrial Schools. He said that the subject of the establishment of reformatories had, as the Council were aware, engaged the attention of the Government of India and of the various Local Governments for several years. So far back as 1861, the framers of the Code of Criminal Procedure included in that enactment a section which provided that, in the case of juvenile offenders, it should be competent to the Criminal Courts, on the occasion of sentencing any person under the age of 16 years to imprisonment for any offence, instead of directing that he should be confined in a criminal jail, to direct his confinement in a reformatory.

This law was still in force. Its defect had been found to be that while it had some advantage over the previous law in that it admitted of the separation of juvenile offenders, where a reformatory was available, during the period of their sentences, from adult criminals, still, as a general rule, the periods of

those sentences were so brief that very little could be done to carry out the objects with which reformatories were established.

This blot in the legislation of 1861 very speedily attracted the attention of one of the Local Governments, and it was to the credit of the Government of Bombay that, in the year in which the Code of Criminal Procedure became law, they framed a Bill for supplementing the provisions of the Code in that respect, and for providing for the detention of juvenile offenders for periods which might be sufficient to admit of a reformatory system being duly carried out. That Bill, however, was disallowed by the Governor General, and a Bill subsequently framed also by the Bombay Government in the following year shared a similar fate. The main reason given for the disallowance of the former Bill was that it imposed certain penalties which were inconsistent with those imposed by the Penal Code, and that that was a power which it was not desirable to entrust to a local Legislature. The disallowance of the Bill submitted in 1863 proceeded upon very similar grounds. In 1867, the question again came before the Government of India. Representations were made from various quarters as to the want of an effective system of reformatories. The question was very fully considered by the Government, but at that time they did not see their way to any legislation of the description which it was now proposed to resort to. The views of the Government of that day were essentially different from those now entertained on this subject. Objections were felt to the establishment of reformatories in India which at that time were considered to be insuperable. A circular, however, was issued to the various Governments drawing their attention to the necessity of providing more effective means than then existed in the various central jails and other prisons, for separating juvenile from adult offenders. This reference elicited a representation from the Government of Madras, in which Lord Napier and Ettrick entered very fully into the question, and urged very strongly that the Local Government should be permitted to establish a reformatory at Madras. Lord Napier's proposition did not go so far as the proposals made by the Bombay Government in 1862 and 1863; it did not provide for any change in the law; it merely went to the extent of requesting that the Local Government might be permitted to establish a reformatory in which practical effect should be given to the provisions of the Code of Criminal Procedure. For reasons very similar to those which had led the Government of India in their circular on the subject of providing for the separation of juvenile offenders in jails to object to any attempt at the establishment of distinct reformatories, the Government of India rejected Lord Napier's proposition.

Perhaps he might mention here one or two of the objections which were raised at that time, and, with the permission of the Council, he would read the answers on these points which were given by Lord Napier. One of the objections was that the effect of the establishment of a reformatory would be, to an undesirable extent, to remove juvenile delinquents from the influence of their parents. Another objection was that a reformatory, in the sense in which the term was used in Europe, and in the sense in which those institutions were managed and carried on in England and other civilized countries, could not be effectively managed in India in consequence of the difficulty, in fact impossibility, of imparting sound, moral and religious teaching in an institution of that description in this country. Now, on the first point, in fact on both points, the remarks made by Lord Napier in the minute submitted to the Government of India appeared to him to be deserving of every consideration. Lord Napier said, with reference to the first point—

"I cannot help remarking respectfully that this feature in the reformatory system, which the Government of India deprecate, is exactly the feature which European philanthropists desire. It is considered in Europe that one of the greatest benefits which can be extended to the juvenile criminal in most instances is to be separated from early associations and from parents who are often his instructors in crime, and who live by the fruits of his iniquitous industry. Crime is hereditary, it goes down from generation to generation, and the reformatory is the beneficent power that breaks the chain of transmitted guilt which weighs upon a family once embarked upon this fatal course. I cannot state from personal knowledge to what extent criminality is propagated by parental teaching in this Presidency. The ancient murdering and thieving castes are no doubt much broken; still, in the country of Thugs, Maravers, Dundassies, Pullers and Kullers, a hereditary character must be more deeply stamped on crime than in England. The opinion of Captain Drever quoted above is conclusive for Presidency Towns. I cannot but think that maturer reflection, and a particular consideration of the physiognomy and history of crime in India, may induce the Government of India to modify their fourth objection to the institution of reformatories."

On the other point, the difficulty of imparting moral and religious teaching, Lord Napier wrote :—

"The absence of moral and religious teaching in a juvenile reformatory would be undoubtedly a serious want. Religious teaching in connection with the superstitions of India is, of course, out of the question; and it must be conceded that moral teaching loses much of its force when not associated with the influences of Christianity. Nevertheless, I am not prepared to admit that all direct moral teaching must be banished from an Indian reformatory. Some of the principles of morals are common to all civilized nations, and may be impressed on the mind as maxims of prudence and honour. Indian children may be convinced that it is their interest not to steal, though their Gods have not said 'thou shalt not steal;' or they may be taught to aspire to what is high and good. The Muhammadan religion comprises all the elements of morality except one. It would not be difficult to compile books of morals, acceptable to both Hindús and Mussulmans, impregnated with much of the spirit of the Gospel, without its dogmas. But, granting that I am mistaken, and that direct moral teaching is impracticable in an Indian reformatory, there still remains the invaluable force of indirect, insensible, practical discipline—perhaps more powerful than preaching and teaching on the human heart—the habits and lessons of obedience, cleanliness, punctuality, industry and economy which may all conduct the criminal child in India, as well as in England, to a better stage in life."

This representation was, however, ineffectual, and up to this period nothing had been effected in this direction at Madras. At Bombay, however, the Local Government had not relaxed in their efforts, notwithstanding the rejection of the Bills which they submitted in 1862 and 1863.

There were, in the Presidency of Bombay, two institutions which were carried out with objects analogous to those sought to be obtained by the Bill which he now moved for leave to introduce.

One was the David Sassoon Institution. From a recent report, which he had seen within the last few days, he found that during the past year that institution contained no less than 130 inmates and appeared to have been worked efficiently and well. There was also in Bombay another institution, not actually a reformatory, but a juvenile prison, under the direction of the Government, which was maintained at Poona, and which contained some 50 inmates, in which, although the designation of reformatory had not been attached to it and although it laboured under the defect common to every institution of the kind which could be established in India under the existing law, appeared to be effecting some amount of good. He had read a report on this institution by the Inspector General of Jails in Bombay in which he drew attention to the defect to which he (SIR A. ARBUTHNOT) had alluded. The Inspector General said—

"If possible, the sentences of juveniles should be proportioned to their age, e. g., a boy of ten, if sent to the reformatory, should be sentenced to such a term as would enable him to learn his trade, and be strong and independent enough to earn his livelihood on discharge, while a boy of fifteen need only be sentenced to a year or more, as it is not advisable to keep grown-up boys almost men, in the reformatory."

That remark had reference to the defect to which he had alluded, and which defect it was proposed to remedy in the Bill which he desired to bring before the Council.

More recently, the subject had attracted the attention of the Lieutenant-Governor of Bengal, and from the papers which had come before SIR A. ARBUTHNOT, he observed that it had also engaged for some time past the attention of His Excellency the President. Sir Richard Temple had proposed to legislate locally, but on examination of the law, it was found that the Bill which he proposed, and indeed any Bill which could effect the object that he had in view, would interfere with certain provisions of the Code of Criminal Procedure, and that was a Code which, having been passed since the enactment of the Indian Councils' Act, the local Legislatures could not alter or amend. Further, it might be said that the question was essentially an imperial one. It was as imperial as any other question connected with prison discipline, or indeed with any of our penal laws. Therefore it had been determined, with the consent of the Secretary of State, to resort to imperial legislation for the purpose of

removing the defect in the existing law to which he had referred. If permission to introduce the Bill were now given, it would be his duty, when introducing it, to draw attention to its leading provisions.

The Motion was put and agreed to.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Sir Andrew Clarke and the Hon'ble Sir D. Forsyth be added to the Select Committee on the Bill to consolidate and amend the law relating to Native Passenger Ships and Coasting Steam ers.

The Motion was put and agreed to.

The Council then adjourned to Thursday, the 5th August 1875.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5TH AUGUST 1875.

GENERAL REMARKS.—The chief feature of the week has been abundant falls of rain, causing floods throughout the greater part of Northern India as far west as Meerut, and as far south as Satna in Baghelkhand. In Madras the rain has been abundant in the Kristna District, moderate in Kurnool, and scanty in the south; in Sind the river continues high, and rain has fallen in Kurrachee; in Bombay the falls have been copious along the Konkan and in Satara and Nassik, but elsewhere somewhat scanty. Throughout Central India, Rajputana and the Central Provinces the rain has been ample; in Bengal abundant rain has fallen, especially in the eastern and north central districts; some flooding has occurred in Orissa. The prospects of the crops are generally excellent. In Assam the fall has been copious; in the North-Western Provinces extraordinarily heavy falls have been registered at Benares and Allahabad, and also, though less heavy, at Mirzapur, throughout Bundelkhand and at Cawnpore and Bareilly; extensive flooding has occurred in the Ganges valley. In Oudh the fall has been ample and general. In the Punjab there has been heavy rain in Rawal Pindi, Umballa and Jullundur, and good falls in the Delhi and Hissar Divisions, less elsewhere. The prospects of the crops are generally excellent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (August 5th)	...	Rain 2·25 in Masulipatam, about 2 inches in Guntur and Bezwara, slight elsewhere, none in Palnad; 16 feet 5 inches above anicut, embankment burst in places, considerable extent of country inundated by river, no loss of life reported, houses in exposed hamlets much damaged, canals full, flood rapidly subsiding; early crops being sown, markets well supplied locally, prices steady; mild small-pox and dysentery in four taluks; cattle generally healthy; pasture improving.
Kurnool (4th)	·025 in one day.	Rain moderate in the taluks; early dry crops sown good, markets well supplied, prices generally steady; fever prevalent; cattle disease in Cumbrun, Markapur and Pattikonda; water and pasture abundant; two feet water over Sunkesala anicut yesterday.
Tanjore (5th)	...	Rain at Negapatam ·83, elsewhere partial and insufficient; water supply in rivers moderate, in tanks scanty; water over upper anicut north branch none, south 4 inches; over lower anicut north branch 1 foot 4 inches, south 1 foot 6½ inches; wet cultivation general over delta, also a few dry grains, standing crops very few, not thriving; harvest none; markets well supplied, prices tending upwards; cholera abating, 1,044 deaths this week, against 1,406 last week; cattle generally healthy; pasture insufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (August 4th)	...	Cholera in town very slight, better in district, except in Udaiarpoliem where it was rather bad up to close of month; good rain on 1st and slight shower last night.
Malabar (5th)	2·95	Prospects favourable; grain supply sufficient, prices high; three deaths by cholera in Calicut taluk, fever prevalent in Ernad and Walluvanad, small-pox slight; cattle healthy; pasture flourishing.
Bombay— (August 5th)		*General Remarks.*—General prospects satisfactory.
Sindh		
Kurrachee (August 4th)	...	River continues high; terrific storm at Dadu on 18th with heavy rain, much damage; fever and catarrh prevalent; agricultural prospects fair.
Shikarpur „	...	Want of water in Mirpur taluk; river 14 feet 11 inches, 8 inches higher than last year.
Hyderabad „	...	Canals well supplied; weather very cool with high winds; fever and colds rather prevalent.
Upper Sind Frontier „	...	Kharif operations continue; water supply abundant.
Gujarat.		
Ahmedabad (August 4th)	·12	Total rainfall 9·74; crops well.
Kaira „	·92	Total rainfall 17·94; agricultural prospects good, transplantation of rice progressing; cholera cases 23, deaths 15.
Surat „	1·58	Total rainfall 29·29.
Broach „	·72	Total rainfall 36·45; cholera slight; low wind; crops slightly injured by rain, others thriving.
Khandesh and Nasik.		
Khandesh (August 4th)	...	Kharif crops healthy except in 8 taluks, cotton plants satisfactory; cholera abaiting, cases 804, deaths 347.
Nasik „	1·12	Total rainfall 23·12; prospects favourable; cholera continues slightly.
Konkan.		
Tanna (August 4th)	4·86	Total rainfall 74·75; transplantation of crops continues; cholera slightly prevalent in 7 taluks, 1 fatal case at Tanna.
Deccan.		
Poona (August 4th)	·63	Total rainfall 24·82; sowing progressing; cholera continues.
Ahmednuggur „	·2	Total rainfall 3·73; sowing generally progressing; cholera continues except in Kopergaon, increasing again in 3 taluks.
Sholapur „	·30	Total rainfall 8·65; cholera continues.
Satara „	3·19	Total rainfall 26·79; state of crops same as before; bajoi sowing progressing; cholera generally prevalent except in Patan.
Southern Mahratta Country.		
Belgaum (August 4th)	1·77	Total rainfall 42·0; cholera in 2 taluks.
Dharwar „	·38	Total rainfall 19·90; kharif crops good; black soil taluks required rain.
Kanara „	2·50	Total rainfall 72·50; crops good.
Kaladgi „	·89	Total rainfall 9·22; kharif already sown, generally doing well.
Kathiawar and Gaekwar's Territory.		
Rajkot (August 4th)	·24	Total rainfall 5·94.
Wudwan „	·1	Total rainfall 8·17; crops good.
Baroda „	·99	Kharif and cotton crops healthy; public health good.
		General Remarks.—Cholera generally decreasing; more rain required in some districts; height of river in Sind satisfactory.
Bengal—		
Chittagong (August 5th)	36·68	Cattle disease is still prevalent in Cox's Bazar.
Noakhally „	9·62	
Tipperah „	20·06	
Chittagong Hill Tracts „	·74	
Hill Tipperah „	·77	
Backergunge „	4·34	Health of the people is very good; a little cattle disease in the police stations of Bonefall, Gulshekhal and Baranaddo.
Fureedpore „	4·76	
Dacca „	13·0	
Mymensingh „	3·45	
24-Pergunnahs „	3·07	Fever decreasing at Barripore, a case of small-pox reported from Satkhira.
Nuddea „	1·68	Health of the people is generally good.
Moorshedabad „	1·99	A few cases of cholera and small-pox in Thanas Shobanagore, Manullabazaar and Bhadoorihat, cholera still lingers at Soojaganj.
Jessore „	1·92	
Pubna „	1·41	
Rajshahye „	2·0	
Bogra „	6·0	
Maldah „	3·34	
Dinagepore „	5·11	
Rungpore „	11·35	
Cooch Behar „	3·90	
Jalpaiguri „	...	One case of cholera in the Police lines at Jalpaiguri, but the disease is disappearing.
Darjeeling „	7·28	
Midnapore „	4·13	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Howrah (August 5th)	·97	
Hooghly „	4·79	A few cases of small-pox and cholera, but general health is fair.
Burdwan „	4·91	Health fair.
Bankoora „	3·90	
Beerbhoom „	3·35	
Sonthal Pergunnahs „	2·7	A good deal of cholera in Deoghur.
Bhágalpur „	9·03	General health very good.
Purneah „	10·7	
Sarun „	1·87	General health good.
Patna „	2·48	Health generally good, except few cases of cholera scattered over the district.
Gya „	2·64	No sickness reported except from Aurungabad, but cholera there is said to be decreasing.
Shahabad „	8.96	Cholera almost entirely stopped.
Hazáribágh „	1·88	
Lohardugga „	2·30	Cholera is still prevalent but not increasing, cases of small-pox continue to be reported.
Maunbhoom „	2·51	
Singbhoom „	6·05	District generally healthy, only one fresh case of cholera in Dhulbhoom.
Balasore „	1·41	Cholera continues unabated not in an epidemic but in a sporadic form, this district has certainly been infected with cholera during the present year to a very unusual extent.
Cuttack „	5·89	Cholera still prevalent in some places.
Pooree „	3·45	
		General Remarks.—There has been a more copious and seasonable fall of rain in almost all districts during the week under report than in the preceding week, and it has been very beneficial to the standing rice crops. It has come just in time to save the withering crops and seedlings; but more rain is still needed in many places, especially in the districts of Rajshahye, Darbangah, Mozufferpore, and Sarun, where the fall has been scanty. The fall in the districts of Cuttack and Pooree has been heavy and overflooded portions of those districts, but no damage to crops has yet been reported. Of the aus rice crops, those sown early have suffered very little, or not at all, and are being housed; but those sown late, which had partially withered or become stunted from want of sufficient rain, will, it is anticipated, now improve. The amun or late rice crops have generally benefited by this rain, those sown broadcast and transplanted early are improving, and the seedlings are being vigorously transplanted. The anxiety which was felt during the previous week for the crops in the districts of the Rajshahye, Cooch Behar, Patna and Bhágalpur divisions is removed for the present; but periodical falls of seasonable rain are still looked for to complete the transplanting operations. The state and prospects of the crops in the eastern and other districts favourably noticed in the previous report continue good.
N. W. P.—		
Benares (August 4th)	...	Heavy and continuous rain; some damage to crops and much to houses in city by great and rapid rise of river.
Mirzapur „	From 7 to 11·50 inches.	Very high floods in the Ganges valley, destroying the kharif in parts; prospects otherwise good.
Azamgarh „	1·2 at Headquarters.	Prospects good.
Allahabad „	...	Average fall of week recorded as 13', must be far more; country swamped. Crop in Kachar much damaged, state not yet fully known as communication is difficult and in places all but impossible.
Cawnpore „	...	Average general rainfall 5'; prospects good.
Banda „	...	Three days' heavy rain; Kew and Bhagu have flooded Banda and Badausa destroying mud houses, lowlands submerged but will be resown.
Hamirpur (5th)	11'	A break in the weather required.
Jhansi (4th)	11' up to date.	Prospects good.
Agra „	...	Beneficial rainfall from 2·1 to 6·4.
Meerut „	...	General rainfall from 4·2 to 9·3; prospects good.
Moradabad „	...	Rain continues favourable.
Bareilly „	...	More than 10 inches of rain in the week.
Almora (5th)	...	Daily rain with very little sunshine; prospects good.
Punjab—		
Delhi (Aug. 4th)	1·1	A few cases of cholera in Delhi city and suburbs; sowings in progress.
Hissar „	1·6	Rain becoming general throughout the division; agricultural prospects much improved; ploughing and sowing in progress; cholera abating; health generally good; cattle disease in a few villages of Sirsa.
Umballa „	4·2	Kharif sown; cholera still prevalent in villages.
Jullundur „	3·6	Sowing nearly over; health and prospects good.
Lahore „	·7	Health and agricultural prospects good.
Rawal Pindi „	9·	Prospects excellent; health good.
Mooltan „	·1	Crops and health good.
Dera Ismail Khan „	...	A slight fall of rain; sowing progressing; health good.
Peshawur „	·3	Sowing in progress; cattle disease has disappeared; slight fever and small-pox still prevalent.
		General Remarks.—Owing to the rainfall during the week agricultural prospects throughout the province are decidedly good; general health is good, although cholera still prevails in certain localities.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Oudh—		
Lucknow (Aug. 4th)	6·8	Prices stationary; public health good; rain heavy and general; kharif prospects very favourable.
Sitapur „	6·5	
Fyzabad „	5·6	
Central Provinces—		
Upper Godavari (July 31st)	3·20	Rain favourable; prices easy.
Sambalpur „	3·17	Transplanting rice continues, prospects satisfactory; cholera continues.
Bilaspur „	2·40	Prospects favourable; cholera and small-pox continue; prices easy.
Raipur (August 1st)	2·	Floods abated; cholera decreasing; prices easy.
Chanda „	2·86	Transplanting rice; jowar sowing delayed in consequence of heavy rain.
Chhindwara „	2·53	Crops look well; health good; prices steady.
Balaghât (2nd)	3·20	Transplanting rice continues; fever prevalent; prices steady.
Bhandara (3rd)	1·95	Rain favourable for rice crop; jowar suffered by excessive moisture; cholera disappeared; fever and small-pox prevalent; prices easy.
Nagpur (4th)	·34	Crops doing well; cholera increasing; prices rising.
Wardha „	·50	Jowar sowing continues; cotton plants thriving; cholera decreasing.
Nimar „	1·13	136 cases of cholera, 67 fatal; prices rising.
Hoshangabad „	4·15	15 cases of cholera, 9 fatal.
Betul „	2·53	Weeding suspended in consequence of continuous rain, a break desirable; 4 cases of cholera.
Narsinghpur „	3·	Considerable damage done to jowar and cotton by continued heavy rain; 7 cases of cholera, 4 fatal.
Jubbulpore „	4·20	Health good.
Saugor „	7·40	Crops suffering from want of weeding; health good; prices stationary.
Seoni „	1·85	Kharif sowings completed; transplanting rice commenced; health good.
		General Remarks.—Prospects generally good, but rain has been excessive in Nagpur country, Betul and Narsingpur. A break was wanted, and appears now to have set in; cholera in Nimar continues, in other districts a few cases.
Mysore and Coorg—		
Mysore (August 5th)	·19½ in Bangalore Cantonment	10 fatal cases of cholera since last report, it is also advancing from north.
Coorg „	2·26	Health good.
		General Remarks.—Agricultural prospects fair; more rain wanted.
Assam—		
Gauhati (August 5th)	6·41	More or less rain falls in mornings; days cool but cloudy; weather favourable to crops and tea; cattle disease on decrease; public health generally good.
Sylhet „	11·75	Prices rising.
Hyderabad Assigned Districts—		
Umraoti (August 5th)	·15	Cholera slightly decreasing; agricultural prospects good.
Rajpootana—		
Sirohi (August 2nd)	·90	Tanks and wells filled; health good; prospects fair; seasonable weather.
Aboo (5th)	1·88	Total rainfall up to date 59·54.
Meywar (July 30th)	·10	Good supply of water; health and prospects good; cloudy sky; heavy rains in the districts.
Bickanere (17th)	·70	Plenty of rain in the district; health fair.
Harowtee States.		
Deolee (July 31st)	2·06	
Tonk „	4·7	Cholera severe.
Kota „	·6	
Jhallawar „	2·5	
Shahapoora „	2·7	
Ulwar (August 4th)	1·40	Temperature 86°; cholera has not disappeared quite; weather most favourable for sowing.
Jeypore (5th)	...	Favourable rainfall during the week; public health good; agricultural operations hopeful.
Ajmere „	1·7	Season favourable, but light rain in many places.
Bhurtpore „	...	No change; weather rainy; prices stationary.
Central India—		
Indore (August 4th)	·85	Season generally favourable to agriculture; cholera still hangs about Malwa.
Gwalior „	No report.	
Neemuch „	·24	
Rutlam „	1·49	
Baghelkhund „	23·20	
Sutna „		
Nepal— (July 28th)	4·8	Agricultural prospects fair; no further cases of cholera reported.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

Revision of the Indian Customs Tariff.

No. 6703, dated 25th November 1874.

RESOLUTION—By the Government of India, Financial Dept.

READ the undermentioned papers:—

Letter from the Secretary to the Bengal Chamber of Commerce, dated 20th August 1873, proposing a revision of the values on which duties are assessed under the Tariff Act XIII of 1871 and of the rates of duty.

Letter to the Governments of Bengal, Bombay, and Madras and the Chief Commissioner of British Burmah, No. 3073, dated 18th September 1874, forwarding the above for report.

Letter from the Government of Bombay No. 6443-319 R, dated the 26th November 1873.

Letter from the Government of Bengal No. 2372, dated 9th September 1873, proposing a revision of the customs tariff with the view of placing certain articles named on the free list.

Despatch (Separate Revenue) from the Secretary of State for India No. 2, dated 26th March 1874, forwarding for consideration a memorial from the Manchester Chamber of Commerce on the subject of the duties now levied on yarns and manufactured goods imported into India.

Despatch (Separate Revenue) to the Secretary of State for India, No. 10, dated 15th May 1874, stating that the subject has been under the consideration of the Government of India and that possibly a Committee for the revision of the tariff would be convened in the ensuing cold season.

Letter from the Secretary to the Bengal Chamber of Commerce, dated 23rd September 1874 (received 8th October), inviting attention to his previous letter of 20th August 1873 regarding a proposal for the revision of the tariff of fixed valuations, and stating that the Chamber is prepared to recommend various amendments in the tariff.

Despatch (Separate Revenue) from the Secretary of State for India No. 5, dated 8th October 1874, forwarding a further letter from the Manchester Chamber of Commerce pressing for a revision of the tariff.

RESOLUTION.—It has been represented to the Government of India that the values on which customs duties are assessed, as contained in Schedules

A and B of the Indian Tariff Act, 1871, are in some instances in excess of the market values of the articles valued.

2. His Excellency the Viceroy and Governor General in Council is of opinion that the time has arrived for the revision of the tariff valuations, and has resolved for this purpose to appoint a Committee to enquire into and report on the subject.

3. The Committee will be composed of the following Members:—

President:

Mr. A. Money, C. B., Member of the Board of Revenue, L. P.

Members:

The Hon'ble J. R. Bullen Smith.

Mr. T. B. Lane, Officiating Collector of Customs, Calcutta,

and other Members* who will be subsequently appointed after communication with the Governments of Bombay and Madras.

4. The Committee will meet in Calcutta in the first week of January next.

5. The Government of India would further be glad to consider the opinion of the Committee as to the propriety of removing from the tariff any articles the retention of which may be thought unimportant in the interest of the public revenue and the removal of which from the list of dutiable articles would give freedom to trade, or any other cases in which from competition or otherwise the Committee may be of opinion that any of the existing export duties are seriously prejudicial to the trade in the articles subject to them.

6. Representations have also been made to the Government of India as to the injurious effect of the duties levied on the import of cotton goods and twist manufactured in England. The Government of India would be glad to receive a report of the opinion of the Committee on this point after inquiry into the facts.

7. In considering this question the Committee will observe that the Government of India does not impose or maintain customs duties for the purpose of affording protection to any branch or class of industry, but for revenue purposes only.

ORDER.—Ordered, that a copy of this Resolution be sent to each of the Members of the Committee named therein, to the Government of Bengal, and to the Governments of Bombay and Madras for information and for communication to the officer that may be selected from each of those Presidencies to be a Member of the Committee.

No. 19 T, dated 4th January 1875.

From—J. D. MACLEAN, ESQ., Secretary to the Tariff Committee,

To—The Secretary to the Government of India, Financial Department.

I am directed by the President of the Committee appointed for the revision of the tariff valuations to point out that in Resolution No. 6703, dated 25th November 1874, the Committee thereby appointed have three duties assigned to them:—

1.—Revision of tariff valuations;

2.—Removal from the dutiable to the free lists, any articles;

3.—Effect of import duties on cotton goods and twist;

and to represent that questions will naturally force themselves upon the Committee connected with the levy of duties on many articles besides cotton goods and twist, and to ask whether the Committee are to consider it a part of their duty to recommend the reduction of duty, the increase of duty, and the removal from the free to the dutiable list of other articles, in cases where such a course may appear expedient.

---

* *N. B.*—The following Members were accordingly subsequently appointed:—

Mr. T. C. Hope, Bombay Civil Service.
Hon'ble R. A. Dalyell, Madras Civil Service.
Mr. J. C. Murray, President, Bengal Chamber of Commerce.
Mr. J. D. Maclean, Bengal Civil Service, Secretary to the Committee.

No. 98, dated 6th January 1875.

From—R. B. CHAPMAN, ESQ., Secretary to the Government of India,

To—The Secretary to the Tariff Committee.

In reply to your letter No. 19 T, dated 4th January 1875, I am directed to say that the Government of India will be glad to receive suggestions from the Committee upon any matters in which they may consider that the customs tariff requires amendment.

REPORT OF THE COMMITTEE APPOINTED TO REVISE THE TARIFF VALUATIONS.

Dated the 27th February 1875.

From—The Secretary to the Committee appointed to revise the Tariff valuations,

To—The Secretary to the Government of India, Financial Department.

I am directed by the Committee, appointed to revise the Tariff under Financial Resolution dated the 25th November 1874, to submit the following report and recommendations as the result of the Committee's labor.

The Committee, consisting of the gentlemen whose names are noted in the margin, met on the 5th of January, and completed their inquiry by the 27th of February.

A. Money, Esq., C. B., *President.*	Hon'ble J. R. Bullen Smith.
Hon'ble R. A. Dalyell, C. S.	J. C. Murray, Esq.
T. B. Lane, Esq., C. S.	T. C. Hope, Esq., C. S.

In accordance with the instructions in your letter dated 25th November 1874, they proceeded—

1*st*.—To revise the tariff valuations.

2*nd*.—To give their opinion as to the propriety of removing from the Import Tariff any articles now in it the retention of which may be thought unimportant.

3*rd*.—To consider on the import and export sides any duties which may appear prejudicial to the trade in articles subject to them.

4*th*.—To enquire into the effect of import duties on cotton goods and twist.

5*th*.—To consider generally the expediency of subjecting any fresh articles to duty and of raising existing duties.

Appendix A shows not only the changes in valuations recommended by the Committee, but also the new headings introduced, classes of goods it is proposed to transfer from the free to the duty list, together with their valuations, and any changes recommended in duties. This statement places the old and the new tariff in juxtaposition, and shows at a glance every change proposed.

Appendix B shows the financial result of the new valuations on the old and also on the new rate of duty, both on the import and export side.

Appendix C shows the financial result of the proposed duties on present valuations, and of the duties on new articles brought into the tariff, as also the proposed remissions of duty, both on the import and export side.

Appendix D gives the complete result of all changes recommended both on the import and export side.

REMARKS ON NEW VALUATIONS AND ON NEW ENTRIES IN THE TARIFF.

II. All the recommendations made in tariff valuations are made with the general approval of the Committee, with the exception of the valuations of two classes of goods, in Schedule A, heading No. 12, "Cotton," in the present tariff: these will be noticed in the proper place. In fixing valuations the Committee have been influenced, partly by the averages of the last three or four years, and partly by the present prices, combined with the fact of a rising or falling market.

III. The important changes, either as regards their bearing on customs revenues, or the great difference between the past and present valuations which the Committee have proposed, are in the articles falling under the following headings:—

Import—

Cotton.

Drugs and Medicines—Camphor, China. Arsenic and Salep.

Ivory.

Metals.

Naval Stores—Pitch and Tar.

Paints—Vermilion.

Shells—Mother-of-pearl.

Spices—Cloves and Pepper.

Export—

Hides and Skins generally.

Lac.

Oils.

Spices.

IV. 1.—*Arms and Ammunition—Gunpowder.* The expediency of alter ing the values fixed for this article was considered in connection with the greatly differing values of various sorts of gunpowder, but the risk arising from handling so dangerous an article was held to be an insuperable obstacle to any but a very general classification as at present.

2. *Beads and False Pearls.*—After taking evidence on the subject of this heading, the Committee decided to leave China beads as they are, and to remove the remainder to the *ad valorem* list, in view of the practical difficulty which has been found to exist in distinguishing between the different classes.

3. *Cabinet-ware.*—It was decided to omit this heading, as it would more appropriately fall under the new heading of "Furniture."

4. *Carriages.*—It has been thought advisable to add the words "and component parts thereof" to meet a practice of importing portions of carriages as manufactures of wood, which are free.

5. *Cork.*—This has been divided into two heads in order to relieve the vial corks, for which the valuation is too high.

6. *Cotton.*—The Committee enquired most carefully and at length into this, the most important item of the tariff, with the result shown in the statement. Under this heading all the valuations have been decreased, with the exception of that of thread, which has been increased. *Thread.*—It was also decided with regard to thread in reels that the duty might be taken either on the quantity as by the mark or by the actual length. The necessity for this arises from the practice of importing reels marked in excess of the length of thread they contain. The importers declare the real quantity only, and consequently pay duty on a smaller quantity than they sell the reel to represent. It is not a fraud *quoad* the customs, but the public are the losers, and it is necessary to check the practice. *Twist.*—The decrease in twist generally has varied from one anna to two annas per pound: the present designation would not include No. 15, and should therefore be altered to "Mule No. 15 and lower Nos." *Piece Goods.*—No variation has been made in mulls: the decreases in jaconets have been one anna, and six pie, per pound respectively.

As regards shirtings, madapollams, printers, long cloths, jeans, domestics, drills and T. cloths, the Committee were agreed on the following points:—

(*a.*) That the classification was bad.

(*b.*) That the two classes would be more appropriately divided into four, *viz.*:—

1*st.*—Printers.

2*nd.*—T. cloths, 18 reed and upwards, and madapollams.

3*rd.*—Shirtings and long cloths.

4*th.*—T. cloths under 18 reed, jeans, domestics, sheetings and drills.

(*c.*) That the proposed valuation on printers should be 10 annas 6 pie per lb.

(*d.*) That, with reference to the other three classes, the valuation on shirtings should regulate the remaining two valuations, on the principle that the valuation on the goods in the class above shirtings should stand at 6 pie above the valuation on shirtings, and the valuation on the goods in the lower class should stand at one anna below.

The Committee also agreed that the 8¼lb. shirtings should be taken as the representative standard of that class of goods. But there was a difference of opinion in regard to the valuation to be fixed upon that class of shirtings. The valuation shown in the statement is that which commends itself to the judgment of three members, and which the casting vote of the President has made the valuation of the majority.

This valuation is based on the averages of the last thirteen months, from January 1874 to January 1875. It was thought that, in regard to an article in which the market has been for a long time a falling one, the averages taken should not extend over any lengthened period of time. The three members who recommend a valuation of 9 annas 6 pie per lb. considered that twelve or thirteen months' average was a fair medium for calculation between the usual plan of taking the average of three or four years, and the exceptional mode of looking only at the present prices. They believe that the present rate of prices is due mainly to the existence of a large crop of cotton in America in the current year, and that adulteration of the bulk of piece-goods during the last two or three years, but especially during the last year (a fact which was proved by evidence given before the Committee), has unduly depressed the prices. They are inclined to think that this evil will probably correct itself, and that prices will rise when the public shall insist on a more genuine article. They observe that in September 1874 (only five months ago) the Chamber of Commerce, Calcutta (letter dated 23rd September 1874), apparently considered an average of twelve months a fair basis for determining the tariff value, and 9 annas 6 pie per lb. a fair rate for the new valuation of shirtings.

On the other hand, the three members (Messrs. Bullen Smith, Murray, and Hope), whom the casting vote of the President placed in the minority, consider that this is an instance in which it is necessary to look forward as well as backward, as the Committee have unanimously done in several minor cases, and that present prices are the very highest safe basis for a tariff value. After making such allowance as may be necessary for improvement in price arising from the check on adulteration which ill repute acquired by the excessively adulterated importations of the past two years, is likely to afford, they do not see that there exists good reason to expect recovery to the average of the last thirteen months. Indeed, looking to the late course of prices, to the apparently normal condition of over-supply which exists in Bombay and Calcutta (the two largest markets of India), and especially to what they consider a permanently increased supply and probable lower selling value of the raw material, they hold that maintenance of current prices is the most that can be looked for, and that any material change is likely to be in a downward direction. They would add that the valuation of 9 annas which they advocate is the one suggested by the Chambers of Madras and Bombay and by the Collector of Customs, Madras; and that both the Calcutta gentlemen who gave evidence before the Committee considered that present prices should not be exceeded. The letter of the Bengal Chamber of Commerce cannot be taken as against this argument: for, in the first place, it was only a general exposition of the case for a revision of the tariff, and not a close fixing of values; and in the second, the position and prospects of the trade have materially altered for the worse since September last. Moreover, even a nine-anna valuation allows no margin for a fall, as has been customary in former tariffs (*vide* Sir C. Trevelyan's financial statement for 1864-65, page 21). A difference of six pie may appear trifling, but in this case it involves about Rs. 1,60,000, and there seems every reason to appre-

hend that the adoption of the higher figure will only produce dissatisfaction, and a reduction of rate at no distant period.

7. *Drugs, Medicines and Chemicals.*—The heading of chemicals was removed from the tariff by the letter, Government of India, Financial Department, No. 2498, dated 7th April 1870, under the belief, as the Committee understand, that all chemicals would practically fall under the head of "Drugs and Medicines" But this result did not follow, and doubts and disputes frequently occur; so the re-insertion of the heading is recommended.

8. In *Fruits, &c.*, after the words Buzarbutto nuts it is proposed to introduce the words "and fresh fruit and vegetables not specially assessed," with the object of removing doubts which existed at Bombay with regard to the import of these articles from Goa, Jinjeera, and Italy.

9. A new heading is recommended—"Furniture, including Cabinet-ware, Lacquered-ware and wall paper." Most of these were formerly assessed under the heading of "Cabinet-ware," and the vagueness of the definition led to frequent disputes.

10. *Glass.*—The Committee would introduce after the word bottles the words "used to bottle beer, wine, spirits or aerated waters," to prevent the importation free of cut glass and other ornamental bottles.

11. *Hides and Skins.*—The words "other than raw or salted which are free" have been added with the object of removing doubts, which appeared to exist in some of the custom houses in India, as to the kind of hides and skins which are dutiable. The addition removes the necessity for the words "Prepared" after border hides, and "tanned," after the words "buffalo and cow hides, country."

It is proposed to introduce a new class of "skins," *viz.*:—

Roan skins, valued at Rs. 30 the dozen, and also—

Goat
Sheep } as in the export.
Lamb

12. *Jewellery, &c.*—It is proposed to add "other than European" opposite to the words "silver-ware, plain, embossed, or chased." The valuations really refer to silver-ware from China, and European plate is taxed under "Jewellery and plate of all kinds," so it is desirable to make the designation correspond to the practice.

13. *Mats.*—It is recommended to introduce the word "Singapore" after the word "China," as a good deal of matting comes from there. It is also proposed to introduce a new heading—"Other sorts *ad valorem*," to provide for mats coming from elsewhere than China and Singapore.

14. *Metals.*—The excision of the words "China and Europe" will bring all foil and dauk pana under one valuation. The fact is that so little comes from Europe as to render a separate classification unnecessary.

It is proposed after the word "bridge work" to add the words "and other descriptions imported exclusively for building purposes." Hitherto this last class of goods has been taxed under head of "Other sorts," but now it is inserted separately on the authority of the letter, the Government of India, Financial Department, No. 381, dated 30th December 1868. The sub-heading "Nails, rivets, and washers" has been divided into two—

Nails ... { "Rose, clasp, and flat-headed, rivets and washers;"
"Other sorts, including galvanized."

the former being left with a tariff valuation, and the latter, which are more valuable, and of a varying value, being placed *ad valorem*. A new sub-heading of "Pipes and tubes" *ad valorem* has been added, as the Committee are of opinion that the purposes to which iron pipes are mostly applied warrant their being taxed at one per cent. in common with other specified articles under the head of "Iron," rather than under the heading "Other sorts," which hitherto has included them.

In sub-heading "Rod, round, &c.," it is proposed to substitute "not exceeding," for the word "under," which if interpreted literally would allow rod of exactly half an inch to escape tariff valuation. In "Other sorts" it is proposed to omit the exemption of "anchors and cables," and a separate sub-heading has been provided for them in alphabetical order.

Under *Lead*, pipes have been removed to the *ad valorem* list, as the values vary; and tin pipes have been omitted, as no separate classification for them is required.

Under *Sheet-lead*, the words in a bracket have been omitted, and a separate head of "Tea lead" at Rs. 20 per cwt. has been introduced.

Under the sub-head *Spelter*, "Plate, &c.," has been divided into "soft" and "hard," the former being raised to Rs. 15 and the latter left at Rs. 11.

To the sub-head *Steel, British*, the words "and foreign other than Swedish" have been added, as it was found that steel comes from other countries than England of the same value as British, with the exception of Swedish, which is more valuable.

Under *Other sorts*, after "Cutlery" it is proposed to introduce "and plated-ware" and to strike out "machinery." Plated-ware has been introduced with the object of removing disputes which often arise, and machinery has been put under a separate heading.

The revised valuations in "*Copper*" range from about 15 to 20 per cent. increase in most articles under that heading. The prices of copper at present are rising in the market.

The present prices of *Iron* are below the average of the last two or three years, and the valuations now recommended have been fixed with reference to the fact that the market is rather a falling than a rising one.

15. *Naval Stores.*—The words "Maldive and Laccadive" have been omitted, as coir rope comes from elsewhere as well.

In "Pitch and Tar" the system of valuation by the barrel has been found inconvenient, and it is recommended to fix the valuation per cwt.

16. *Oils.*—Spermaceti has been specially excepted from whale oil. Spermaceti oil is much more valuable than other whale or fish oils, and the practice has been to tax it under the head of "Other sorts" *ad valorem*. The addition made will give legal sanction to this practice.

17. *Paints, &c.*—Patent driers have been placed in a sub-heading with a separate valuation, as the valuation for composition paint is too high for them. The word "Macao" has been omitted from "vermilion," as this article comes only from China, and the small valuation of Macao leads to constant attempts at fraud.

18. *Perfumery.*—The changes under this head are made with the view of not allowing spirits, merely because they are perfumed, to escape the high duty fixed on spirits, and are based on the practice of the English Custom House. Small bottles of scents, however, will continue to be taxed *ad valorem*.

19. *Porcelain, &c.*—The word "China" has been added to remove doubts, and a fresh sub-heading has been introduced to provide for glazed tiles and bricks, and to remove earthen-ware pipes from a 7½ per cent. rate of duty to a 3 per cent. rate.

20. *Provisions.*—The word pork has been added to "Hams," to save from an unduly high valuation mutton hams, which are occasionally imported.

A new heading for "China Preserves" is introduced, as they are of a regular value, and a tariff valuation saves trouble. At present they come in under "other sorts."

21. *Ratans, &c.*—The exception as to bamboos is to remove doubts which sometimes arise.

22. *Seeds.*—There is so little difference between mustard and rape or sursee, that it is thought better to abolish the distinction.

23. *Shells.*—The price of mother-of-pearl has risen so much that the valuation of Rs. 30, instead of 8 per cwt., is still below the present market value.

24. *Spices.*—A new heading for betel nuts imported from Goa has been introduced, with a separate valuation. The increases of valuation in cloves and pepper are very great, but well within average market rates.

25. *Tea.*—A distinction has been drawn between black and green tea, the latter being more valuable.

26. *Toilet requisites, &c.*—This new heading has been introduced, as constant difficulty appears to be felt at the custom houses in taxing miscellaneous articles which would appropriately come under it. At present they are disposed of under the heads of "Perfumery, Metals, Hard-ware," &c.

27. *Umbrellas.*—The addition is made to remove from the *ad valorem* list to a fixed valuation a class of umbrellas largely imported from China, *viz.*, oiled-cotton umbrellas.

EXPORTS.

V.—1. *Cotton Goods.*—The new headings and the changes in the classification of twist are in accordance with a recommendation from the Bombay Chamber of Commerce. As Bombay has almost a monopoly of these exports, the Committee adopted their recommendation.

2. *Hides, &c.*—The word "tanned" is unnecessary opposite "buffalo." The heading "Goats and sheep" has been sub-divided, goat-skins being much more valuable than sheep-skins.

3. *Lac.*—The valuations in lac show an enormous increase; the market has been a rising one, and is at present above the valuations. Lac-dye has been struck out in consequence of the recent Government Resolution on this subject.

4. *Indigo.*—It is proposed to introduce a fresh sub-heading "Leaves, green or dry," at a duty of Rs. 3 per ton, to meet a practice in Madras, whereby the revenue suffers. The leaves, which are not dutiable, are exported into Pondicherry, and indigo is subsequently made from them in foreign territory.

5. *Seeds.*—Mustard, rape or sursee are classified together for the same reasons as are given on the import side.

VI.—Little or no import trade in the following articles has led the Committee to recommend their omission from the tariff. If imports should take place, they will be dealt with under the sub-heading "Other sorts" of the heading to which the article belongs.

Import—

Red coova under "Drugs and medicines," No. 13.

Gamboge wood and four kinds of saffron under "Dyeing and coloring materials," No. 14.

Mangoes and prunes under "Fruits and vegetables," No. 17.

"Glass broken" under "Glass," No. 18.

Rhinoceros leather under "Hides and skins," 21.

Foil from Europe under "Metals," No. 29.

Cardamoms, cinnamon, earth, and sorrel oils under "Oils," No. 31.

Anchuchuck, anise, assalia, cajoo, esubgool, tookmeria under "Seeds," No. 43.

Aloe wood, cassia-buds, mace false, wild nutmegs, under "Spices," No. 47.

Export—

Aloe wood under "Spices," No. 8.

VII.—The following articles in imports which appear under fresh headings in the proposed tariff will be noticed in that part of the report which refers to duties:—

Bitumen and mineral tar—Manufactures of cork, of hemp, of gums, of ratans and canes, and basket-work—Anchors and cables—Instruments, drawing, optical, surveying, measuring, surgical (including surgical appliances)—Butter,—Tallow and grease.

REMOVALS FROM THE IMPORT TARIFF.

VIII.—The only articles of which the entire removal from the Import Tariff (*i. e.*, exemption from duty) is recommended by the Committee are—Fish maws, sozille and singally fish, and shark fins, under heading 39, "Provisions." These articles only pass through Bombay, being re-exported, and the entire duty, with the exception of the usual drawback, being refunded. The Committee would have been glad to recommend the excision of all articles yielding small amounts; but precluded as they are in the peculiar circumstances of India from proposing an increase of duty on any article which could yield a large return, they felt unwilling to recommend the relinquishment of a sum which as a total is of importance, although the items composing it are of insignificant value. It must also be noted that in the present Tariff there are only seven general headings which yield sums less than Rs. 10,000, and that there exist objections against removing from the Tariff only parts of a general heading.

DUTIES, WHETHER ON THE IMPORT OR EXPORT SIDE, SERIOUSLY PREJUDICIAL TO THE ARTICLES SUBJECT TO THEM.

IX.—*Imports.*—The Committee find that the only duties which can be deemed prejudicial are those upon certain metals regarding which a complaint addressed to the Governor General in Council by the Bombay Branch of the East Indian Association has been referred to the Committee. Under the general head of "Copper," including yellow metal, the fall has been remarkable all over India, excepting British Burmah, as will be seen from the table below:—

Year.	Bengal.	Bombay.	Madras.	Sind.	Burmah.	Total value.	Duty.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1869-70	30,65,161	22,74,240	10,55,621	72,[illegible]	68,136	1,75,36,352	13,14,821
1870-71	62,63,436	58,91,825	12,15,667	1,74,[illegible]	73,358	1,36,17,582	8,87,821
1871-72	59,03,577	27,18,243	7,01,378	40,058	1,03,488	1,03,66,744	7,74,558
1872-73	27,27,[illegible]39	25,78,725	3,04,944	3,425	1,18,561	57,87,884	4,42,886
1873-74	27,38,973	17,99,240	5,41,040	...	99,693	51,66,946	3,87,521

This fall appears to be attributable, partly to the higher prices of metal in Europe of late years, and partly to the somewhat depressed condition of the agricultural classes in some parts of India. When those classes are prosperous they buy copper vessels, but in hard times they return to clay ones. The reaction which has taken place in Bombay since the termination of the American war is notorious. Under these circumstances, and considering that a higher tariff value has necessarily been fixed, the Committee consider that it would be good policy to relieve the article by a reduction of the rate of duty from 7½ to 5 per cent. This reduction should not, however, extend to the metal when manufactured into utensils and other articles, so as to follow the analogy of iron, such manufactures of which have always been subject to the full duty of 7½ per cent. The case of lead and spelter is somewhat similar, and the Committee would relieve them in the same way as copper, especially as lead is mostly used in conjunction with other metals. Quicksilver, too, has fallen off greatly, and should be relieved similarly.

The total revenue affected by these reductions, calculated on the basis of the new tariff valuation, will apparently be about Rs. 1,70,062, but it is fair to anticipate that some portion will be recovered by the reduced duties stimulating consumption. After considering the representation of the Bombay Chamber of Commerce regarding sugar and dates, the Committee were of opinion that the trade in them is not prejudiced by the duty.

X. *Exports*.—As regards exports, the Committee, in the first place, framed the following general estimate of the probable amount which existing duties would produce in 1875-76:

Articles.	Five years' average, 1868-69 to 1872-73.	1872-73 included in previous average.	1873-74.	Estimate.	Increase or Decrease by new valuations.	Net Estimate.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Rice and Paddy ...	44,03,901	61,74,968	52,96,861	53,00,000	*Nil*	53,00,000
Lac	92,703	81,765	1,03,337	1,00,000	+ 1,40,000	2,40,000
Indigo	4,33,510	4,72,097	4,72,903	4,72,000	*Nil*	4,72,000
Hides and Skins ...	1,32,513	2,08,583	1,88,987	2,00,000	+ 50,000	2,50,000
Cotton Goods	1,21,277	1,31,658	1,57,971	1,60,000	— 17,000	1,43,000

Their conclusions regarding each item will now be briefly mentioned in order:—

1. The *Rice* and *Paddy* trade is to the extent of three-fifths in the hands of Burmah. The market for the Burmese article is by all accounts perfectly secure, and there are special reasons connected with the land revenue why the duty can be borne by the producer, upon whom it is believed sometimes to fall. As regards Bengal the case is somewhat different; but considering the comparatively small proportion of its export, and that its trade with the eastern markets, in which it had to encounter the competition of rice from Cochin China, Siam, and Java is practically dead, a distinction need not be made. The Committee therefore do not recommend interference with the duty, and the more so as the difficulty of replacing the large sum it yields would probably be an insuperable financial obstacle to its removal.

2. The duty on *lac* likewise need not be interfered with, as it does not affect the trade in the article, in which India holds the monopoly.

3. *Indigo* is understood to bear the present duty, amounting to 1 per cent., without actual injury to the trade, and circumstances have removed the grounds of complaint on this subject which at one time existed in Madras. The Committee therefore do not recommend any alteration in it; at the same time they would remark that there appears a certain hardship in taxing indigo while jute is free, and that whatever arguments were deemed by the Secretary of State of sufficient weight to justify the disavowal of Act XVII of 1865, by which jute was taxed, apply equally in favor of placing indigo on the free list whenever the financial position of the Government may enable them to do so. On the other hand, if the objections referred to are not of present application, the article jute is on its merits a fair subject of taxation. A duty of 6 pie per maund would come to about 1 per cent., as in the case of indigo, and would yield Rs. 2,05,000.

4. In *Hides* and *Skins* the trade has doubled in the last five years, as shown in the statement below:—

Year.	Bengal Presidency, value.	Bombay Presidency, value.	Madras Presidency, value.	British Burmah Presidency, value.	Sind Presidency, value.	Total value.	Total duty.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1873-74 ...	2,67,566	9,78,200	50,42,733	4,900	6,166	62,99,565	1,88,987

1870-71 ...	2,15,508	5,50,216	30,06,711	2,449	10,119	37,85,003	1,17,726
1869-70 ...	1,42,742	2,43,831	29,30,653	703	15,403	33,33,332	1,00,292

It has been urged that a repeal of the duty will encourage cattle-poisoning, which already prevails to a large extent in certain parts of India. The Committee cannot of course consider that an export duty is the proper means for putting down an offence, but the objection may be allowed some weight along with the fact that the trade is flourishing and not in need of relief.

The abolition of the duty on cotton goods exported is advocated by the three Chambers of Commerce. The case is also very fully stated in paragraphs 4 and 5 of the memorial of the Bombay Branch of the East India Association already referred to. The Committee consider it clear that Indian manufactures are weighted to the extent of the export duty when competing in all foreign markets with the products of Lancashire. A large proportion of country piece-goods, moreover, is made of English twist which has already paid the 3½ per cent. import duty. The export duty on coal and iron was removed in 1862 (see Financial Statement of 1862, p. 17) as it was open to analogous objections, and the Committee recommend abolition in this instance also.

5. The Committee further recommend the removal of the duty on *seeds*, *grain, other sorts*, *oils*, and *spices*. The condition of the trade in these articles will be seen from the statement below, which shows the amount levied on each during the last six years:—

Year.	Seeds.	Grain, other sorts.	Oils.	Spices.
	Rs.	Rs.	Rs.	Rs.
1868-69	6,65,054	1,69,078	1,21,510	64,457
1869-70	7,22,861	1,46,208	1,04,305	59,271
1870-71	10,79,984	1,74,472	56,038	68,882
1871-72	8,48,462	2,08,562	1,85,881	91,985
1872-73	4,71,719	2,55,912	1,07,090	51,391
1873-74	7,26,010	1,37,514	85,567	71,036
Average ...	7,52,348	1,81,957	1,01,562	67,337

These figures appear clearly to show that, speaking broadly, these articles have made no advance during the past six years. It is no doubt true that individual oils or seeds might be picked out which are doing well, but many others show a heavy and steady decline, and it does not seem desirable, if indeed it be practicable, to deal with portions only of a general head, and give an artificial encouragement or check to one grain or oil compared with another. It will also be observed that these articles are more or less subject to vicissitudes both as to price and supply. It may be added that seeds and oils encounter a formidable opposition from Russia and America—countries having great natural advantages over India as regards freight to a market, and time within which a return can be obtained. The relief of all four items is advocated by the Chambers of Commerce. It is proper to state, however, that in the case of *seeds*, *grain other sorts*, and *oils* the recommendation for abolition on the above grounds proceeds only from a majority of the Committee (Messrs. Dalyell, Bullen Smith, Murray and Hope). These members do not think it necessary to offer any lengthy and elaborate exposition of the objections to export duties, which are well known. If relief from duties be financially practicable, they think it ought in the first instance to be applied to exports, especially those of raw materials, in consideration of what the Manchester Chamber of Commerce, in their recent address to the Marquis of Salisbury, aptly term the "paramount importance of agricultural industry to the people of India, and the abundant return which rewards its development." As regards the three articles now in question, they would invite attention to the following quotations:—

"So far as India possesses the monopoly of the foreign market, or a decided superiority over all other countries taken together, an export duty must be paid by the consumer. So far as exported articles are met by an effective competition in the foreign market, the duty must be paid by the producer,"—(see Sir Charles Trevelyan's Financial Statement of 1865-66, page 20).

"When the incidence of the tax is on the producer, export duties are condemned by all sound writers on political economy,"—(Speech of the Hon'ble Mr. Bullen on passing of Act XVII of 1865).

They consider that there can be no doubt that these three articles, taken *as a whole*, are subject to effective competition, which at times throws the duty on the producer, and even checks exportation altogether.

		Rs.
Imports.	Copper, &c. ...	145,107
	Lead ...	2,800
	Quicksilver ...	8,940
	Spelter ...	13,780

	Grain, other sorts	2,00,000
	Seeds	7,84,000
	Oils	98,000
	Spices	80,000
	TOTAL ...	14,75,627

XI. The total estimated value of the duties which the Committee thus either unanimously or by a majority recommend for removal, as seriously prejudicial to the articles subject to them, is 14¾ lakhs, as shown marginally, and more fully in Appendix C-I. This loss is estimated on the corrected valuations and at the proposed duties. But the actual loss will be less, owing to the stimulus to consumption given by the reductions in metals.

EFFECT OF THE IMPORT DUTIES ON COTTON GOODS AND TWIST MANUFACTURED IN ENGLAND.

XII. In so far as the complaints alleged that the tariff valuations were excessive, they have been found to be just, and the Committee have already recommended reductions involving relief to the extent of Rs. 6,42,000 as shown in Part I of this Report and in Appendix B. But it is also urged that the duty is "absolutely prohibitory of the trade in yarn and cloths of the coarse and low-priced sorts," which the Indian mills make largely under the protection of the duty, and it is suggested that ere long the finer yarn and cloth will, with the help of importations from Egypt and America, be manufactured also. It must, of course, be admitted that the Indian mills have injured the English ones to the extent to which their manufactures have displaced the manufactures of Manchester, less their exports to other countries, and the amount of the injury they have inflicted on the hand-looms of India in localities which Manchester goods have not been able to reach. But the duty, though contributing to this result, cannot be said to be the sole cause of it, since India, with many disadvantages, possesses certain natural capabilities for producing goods of this low quality which will probably secure the trade in them to her, even if the duty be removed. On the other hand, if the duty were as prohibitory as it is represented to be, the market would not be habitually over-stocked, as it has been for years.

XIII. The Committee think it more to the purpose to consider what proportion the particular goods which have to meet Indian competition bear to the whole cotton import duty, and how far this competition justifies the demand for abolition of the entire duty which has been brought forward. The Indian mills can make mule twist up to 32s. and water twist up to 20s.; as also long cloths, T cloths, drills, domestics, jeans and sheeting. The prospect of the finer kinds of yarn and cloth being made with profit or success is notoriously so remote, and the enterprise so doubtful, that it is quite unnecessary to take it into present calculation. The duty levied in Bombay in 1873-74 upon the similar Manchester goods which have to stand the Indian competition was about 2 lakhs of rupees. If the total duty on such goods paid in all India be taken, though the mills beyond the Bombay Presidency are as yet comparatively unimportant, it would barely exceed four lakhs. The demand that because one class of goods, represented by 4 lakhs of duty in all India, has in one part of India to meet a local competition, the Government shall remit the remaining 77 lakhs which competition does not affect, appears to the Committee quite unreasonable, and it is unnecessary even to enquire whether the finances could afford the remission. The scheme of removing the duty on coarse goods only, though reasonable in theory, is difficult in practice, as explained by the Chairman of the Bombay Chamber of Commerce in his published speech of January 5th, and has, he admits, been in England pronounced unworkable. The alternative of an excise duty on the Indian mill products remains, but part of it would have to be refunded on exportation, and the Committee see

	Rs.
On Twist ...	16,412
On Long Cloths, &c. ...	1,87,926
TOTAL ...	2,04,338

no more need for establishing a cumbersome and expensive excise machinery now than there was in 1861 and 1862, when Mr. Laing decided against it (Financial Statements, 1861, page 11, and 1862, page 14). There are numerous heads in the Import Tariff which embrace some articles which are also to a certain extent produced in India, and the Committee consider any alteration in favor of cotton goods to be uncalled for.

FRESH ARTICLES SUBJECTED TO DUTY AND INCREASE OF EXISTING RATES OF DUTY.

XIV.—The Committee, in view of meeting in some measure the loss of revenue involved in their previous recommendations, consider that the rate of duty on a few articles of import might be raised, and some new articles brought upon the tariff. They are of opinion that, generally, articles of luxury might contribute to the exchequer more than at present. It is proposed therefore to raise from 7½ to 10 per cent. the duty on—

Beads and false pearls.
Corals, real.
Fireworks.
China glass bangles.
Perfumery.
Toys and requisites for games.

On *silk piece-goods* the Committee would raise the duty from 5 to 7½ per cent.

XV.—As regards *spirits and wines*, they have recommended an increase of 33 per cent. on the former, and on certain kinds of the latter an increase of about 66 per cent. The only two principles according to which wines can be taxed are the principle of strength and the principle of value. The Committee are clearly of opinion, notwithstanding the opposite practice in England, that the principle of value is the correct one. But owing to the insuperable difficulty of ascertaining the market value of consignments of wine, the principle cannot be acted up to fully and logically. The nearest practical approach to its enforcement is a rough classification of different kinds of wines, arranged, as regards the bulk of them, according to value. This is the plan the Committee have adopted. They are also influenced with reference to the cheap French clarets by the same motives as that which lately in England led to a distinction being made in favor of these wines. It is thought advisable that clarets should continue to pay a rate of duty not higher than at present, while stronger and dearer wines can easily bear enhanced taxation. In making the present classification the Committee was met by the difficulty that the expensive French Clarets and Burgundies would come in under the lower rate of duty. It appeared, however, that the proportion of these to the weaker and cheaper kinds was so small as not to make the objection a practical one. Thus in clarets, enquiry shows the proportion of expensive to cheap claret to be, as far as a rough estimate can fix it, about 1 to 5 at most, while in Burgundy the proportion is much less. The average price of all clarets imported into Calcutta is about Rs. 15 per dozen, and about Rs. 12-8 in Bombay.

XVI.—Prima facie, *jewellery and silver-ware* would appear to be goods which should be included among other articles of luxury on which an additional duty is proposed. The reason for their non-inclusion is, as regards jewellery, facility of smuggling it, and, as regards silver-ware, the fact that the trade in this article is a declining one. In connection with this subject, the Committee would call the attention of Government to the practice of transmitting jewellery and watches to this country from England through the post office. It is believed that the customs revenue is in this manner defrauded to a considerable extent. The customs authorities and the post office would probably, if consulted, be able to devise a remedy.

XVII.—On *iron* of the kinds tariffed, the Committee propose a duty of 2 per cent. instead of 1 per cent. They fail to see why this metal should continue to be introduced into India at so low a rate of duty as hitherto. Its employment in manufacturing industries and in other businesses warrants, in their opinion, its paying a higher duty.

XVIII.—For much the same reason the Committee recommend that *machinery* be no longer admitted free, but pay a duty of 2½ per cent. It is mainly used in the many manufactures which have now established a firm existence, and there appears no reason for continuing to it the indulgence originally given as an encouragement and help to the nascent manufacturing industry of India.

XIX.—There are besides machinery a number of small new articles brought upon the tariff which appear to the Committee fit subjects for taxation, and the omission of many of which they believe to be due to an oversight.

1. Thus *asphalte* being a duty-paying article, the Committee have introduced *bitumen* and *mineral tar*, and *cements* generally.

2. *Brushes* also come under a separate heading. There has been a diversity of practice about this class of articles: some kinds of brushes paid duty, some escaped.

3. *Manufactures of cork* have been given a place. The Committee fail to see why, corks paying duty, other manufactures of cork should escape.

4. *Chemicals* have been re-introduced into the tariff. There are frequent disputes at present as to whether a certain article should pay as a drug or a dye, or escape as a chemical. There seems to be no good reason why chemicals used as medicine should be more severely treated than others.

5. *Manufactures of hemp* have also been placed in the tariff. The Committee consider them as fair subjects of taxation as manufactures of flax.

6. *Manufactures of gums* should also, the Committee think, be taxed as well as the raw material, which at present pays duty.

7. To *Instruments, musical*, the Committee would add optical and surgical, as also all instruments for drawing, surveying, and measuring, and surgical appliances. There appears no sufficient reason for exempting any of the articles coming under these heads. At present surgical instruments pay as cutlery, but they would be more appropriately taxed under the head proposed. Surgical appliances are really in the same category, in reference to their use, as surgical instruments.

8. *Compositions for application to leather and metals* it is now proposed to tax. Under this heading would come blacking, varnishes for leather, and any composition applied to metals for purposes other than lubrication.

9. *Toilet requisites* is a new heading; some of the articles falling under it have hitherto been taxed improperly as perfumery. It comprises others which have been admitted free, but which appear fit subjects for a duty.

10. The Committee think that *bricks and tiles* might well bear the small duty of 3 per cent. *ad valorem*, and that *China clay*, the substance with which the Bombay mills adulterate their cloth, ought to pay a high duty.

11. *Ratans and canes* being already taxable, the *manufactures* of them and *basket work* should, in the Committee's opinion, be similarly treated.

12. *Tallow and grease* have hitherto been improperly taxed as railway materials on this side of India, while in Bombay they have passed free. There seems no good reason, if machinery pays duty, why these two articles and compositions for lubricating purposes should not also be taxed.

	Rs.
Silk	1,21,000
Machinery	2,60,000
Iron	45,000
Items raised to 10 per cent.	84,158
Spirits and liqueurs ...	6,26,000
Wines	2,46,000
Minor items ...	75,000
TOTAL ...	14,57,158

XX. The total result of new duties and of additions to existing duties is estimated at Rs. 14,57,506, as shown marginally, and in greater detail in Appendix C.

GENERAL REMARKS.

XXI.—In conclusion, the Committee desire to point out, that if the Government should decide not to tax machinery, a definition should be introduced into the Act showing what kinds of machinery are to be admitted free. As the law stands, machines for making aerated waters, for producing ice, for grinding oats and grain, &c., pay no duty. The Committee presume this was not the intention of Government. They recommend a return to the definition of Act VII of 1859, with the addition of certain words which would make the definition as follows: "Machinery for improvement of the communications, and for development of the resources of the country, and for purposes of printing, lithography, engraving and such like."

XXII.—The Committee have experienced in the course of their inquiries a good deal of difficulty owing to the deficient manner in which custom-house returns are made up. The entries as regards many classes of goods give no sufficient details. It is recommended that orders be issued to all custom-houses in India to prepare one return strictly according to the classification of the tariff finally approved by Government.

XXIII. The financial results of the Committee's recommendationss may be summed up as follows:—

The loss by tariff valuations will be Rs. 2,60,000 as shown in Appendix A (or Rs. 4,20,000 in the event of the lower valuation for certain piece-goods referred to in page 3 of this report being adopted). The duties proposed for remission amount to Rs. 14,75,000 and the total loss therefore will be Rs 17,35,000 in the one case and Rs. 18,95,000 in the other. The new duties and increases of duty suggested are Rs. 14,57,000, so the apparent net loss would be either Rs. 2,78,000 or Rs. 4,38,000, against which must be set the increased consumption and duties which may be expected to follow the reductions in tariff value, and in rates on metals, the amount of which the Committee are unable to estimate.

XXIV. Two memoranda of dissent to certain portions of the report which have been handed in—the one by Messrs. Money and Lane, and the other by Mr. Hope,—are appended.

I have the honor to be, Sir,

Your most obedient Servant,

J. D. MACLEAN,

Secretary to the Tariff Committee.

MR. T. C. HOPE'S DISSENT.

I HAVE concurred in the Report of the Committee, subject to the following reservations.

2. The proposal of a majority of the Committee to raise the import duty upon beads, bangles, corals, fireworks, perfumery, and toys and games from 7½ to 10 per cent. appears to me extremely objectionable. The general principle of the Indian tariff has been that of a uniform rate of duty, except in the case of articles such as tobacco, wines, and spirits, which were treated specially. The normal rate previous to 1859 was 5 per cent., but in that year the pressure consequent on the mutiny lead to a general increase to 10 per cent., with a 20 per cent. duty on nine articles. The 20 per cent. rate was a financial failure, and in 1860 Mr. Wilson reverted to a uniform rate of 10 per cent. This high rate was confessedly "imposed to meet an emergency." Piece-goods and twist were in 1862 put back to their normal rates of 5 and 3½ per cent., and the other articles were in 1864 reduced to 7½ per cent., as an instalment of relief which was the most then financially practicable. Mr. Wilson in 1860 said that "there is no good reason why cotton yarn and twist should be imported at a lower rate than cotton piece-goods;" and similarly there is no reason why cotton goods generally should pay a lower rate than other articles. I hope that the next general change will be a reduction of the 7½ per cent. rate to 5 per cent., and I believe that fiscally the result would be very satisfactory. An increase from 7½ to 10 per cent. at the present day seems to me a step in the wrong direction, and contrary to the principle and history of the tariff. The principle on which the seven articles have been selected for increase, namely, that they are "luxuries," appears

also to be of doubtful policy and application. What is a "luxury"? Are not some things luxuries to one class in life and necessities to another? And are we to come heavily down on the perhaps solitary luxury of the poor? Certain ornaments, as bangles, indicate in large sections of Hindú society a particular status, as of marriage. Are these luxuries or necessities? The Committee negatived formal proposals to subject to the 10 per cent. rate photographic materials, clocks and watches, china, cameos, tortoise-shell and mother-of-pearl, and musical instruments, which I submitted with the view of arriving at their principle. But are watches and cartes-de-visite necessities? What difference is there between a cameo or tortoise-shell comb on the one hand and a bangle or bead necklace on the other? And why should not French millinery pay as high as the latter? Also, why is a billiard table to pay 10 per cent. and a piano only 7½? If the "luxury" principle is to be introduced into the tariff, it should be applied throughout, and a Committee of philosophers and moralists convened to settle the curious questions which will arise. The whole of the 10 per cent. increases are only estimated to yield Rs. 84,000, and it would be much better to abandon them.

3. I regret that the Committee have only raised champagne and sparkling wines by Re. 1, and other wines (except claret) by 8 annas, instead of by Re. 1-8 and 12 annas respectively, as I had proposed. It is admitted in the Report that an *ad valorem* duty would be proper theoretically, but could not be worked in practice. Concurring in this, I proposed rates which would have a tolerably equal percentage of incidence on each main class of wine. The calculations in a minute which I laid before them, and which have not been disputed, show that claret, which it is not proposed to touch, now pays about 20 per cent. *ad valorem*, and that to subject champagne and "other wines" to that rate, increases of Re. 1-8 and 12 annas respectively are required. This being so, I fail to see why only Re. 1 and 8 annas should be adopted. The reason given that these increases are enough, being 66 and 50 per cent. over existing rates, seems to me beside the question, and inconsistent with the admission that an *ad valorem* duty, if practicable, would be best. It is not contended that the extra 8 or 4 annas would check consumption. The sum involved is Rs. 48,224 for the champagnes and Rs. 75,000 for the others, total Rs. 1,23,224, which could be obtained without difficulty, and would more than cover the abandonment of the increases to 10 per cent. above referred to.

4. I feel that there are strong objections to the proposed imposts on iron and machinery. It is probable that the extra one per cent. on the former would hardly be felt, and that two and a half per cent. on the latter would not actually check the use of machinery. But the reasons assigned by Sir Charles Trevelyan (Financial Statement of 1863, page 19) for the reduction of iron to one per cent., that it is "a material of industry so essential to the development of the great works upon which the future of India depends," has not lost its force, and an increase may also be represented as protective of the infant iron trade of India. The tax on machinery would be a tax on capital, to which the objections are well known. An increase on either article will rouse the powerful iron, coal, and machinery interests of Great Britain without either sufficient necessity or a sufficiently strong case, and I do not think it would be politic to provoke the contest. The amount involved is 3 lakhs at most, even if the large machinery imports of 1873-74 be maintained, which is doubtful.

In conclusion, I will sum up the financial results of the measures which I have advocated. The loss by tariff valuations, including the Rs. 1,60,000 on piece-goods, regarding which the Committee are equally divided—and I am on the side of reduction—will be Rs. 4,20,000. The duties proposed for reduction or remission amount to Rs. 14,75,000 (*vide* Appendix, C-II), giving a total loss of Rs. 18,95,000. Deducting from the proposed new or increased duties shown in Appendix C-I Rs. 3,05,000 for machinery and iron and Rs. 84,000 for the 10 per cent. items, total Rs. 3,89,000, but adding the Rs. 1,23,000 for higher duties on wines, the total increase *per contrà* will be Rs. 11,91,000, and the net result will be an apparent probable loss of Rs. 7,04,000. But against this must be set the increased consumption and duties which may reasonably be expected to follow the reductions in metals and tariff values, the latter alone amounting to Rs. 9,27,000, of which the share of cotton goods is Rs. 8,02,339. The amount of this recoupment we have not the means of accurately estimating, but if the net loss should prove to be three or even four lakhs of rupees, I trust that the Government of India may find their general financial position sufficiently strong to bear it, in consideration of the relief and stimulus to trade and the general satisfaction which must follow the various reductions and the removal of so large a portion of the export duties.

The 27th February 1875. T. C. HOPE.

MESSRS. MONEY AND LANE'S DISSENT.

I DIFFER with the majority of the Committee in regard to certain parts of the Report which refer to export duties. I take exception to the remark, that "there appears a certain hardship in taxing indigo while jute is free." I see no connection between the two. Indigo is a manufacture; jute a raw material. If the duty as an export duty falls upon the producer, it falls in the one case on the English planter, in the other on the Indian grower. I am of opinion that both articles are proper subjects of duty, each on its own merits. Indigo is a manufacture which no other country can equal; jute is a raw material of which India has the monopoly. If there be hardship as regards the taxing of any Indian produce while jute is free, it falls upon rice, seeds, and spices—articles in which there is much more competition than there is in indigo. The comparison with indigo has induced the majority of the Committee to recommend a duty on jute of only half anna per maund if it should be taxed. I would impose one anna, which would still be below the rates fixed on other raw materials exported and would give over four lakhs.

I do not agree with the recommendations generally of the majority as to certain headings of the export tariff.

I am opposed to the abolition of duty on grain generally as long as that on rice and paddy is retained. The question whether the duty on export in grain is or is not a proper means of raising revenue is a question which applies to all grains; and the only good reasons I can conceive for making a difference between the various kinds of grain, as far as regards their liability to be taxed, are when, from competition or other causes, the duty is found to interfere with trade in a particular class of grain, or when the financial results of the duty on any one class are so small as not to counterbalance the disadvantages inherent in the imposition of all duties, import or export. Neither of these reasons in my opinion so exist as to warrant the recommendation to free from duty all grains except rice and paddy—though on the first ground there may be cause shown for some relief. The statement below shows the duty realised on all such grains (excluding wheat, which has been freed from duty) and on pulses for the last twelve years :—

1862-63.	1863-64.	1864-65.	1865-66.	1866-67.	1867-68.
Rs. 1,54,362 Mds. 12,34,896	Rs 1,90,920 Mds. 15,27,360	Rs. 1,58,320 Mds. 12,66,560	Rs. 1,41,018 Mds 11,28,144	Cannot be given, the duties on rice and other sorts being shown together.	Rs 2,83,697 Mds. 15,13,050
1868-69	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
Rs. 1,69,078 Mds. 9,01,749½	Rs 1,46,208 Mds. 7,79,776	Rs. 1,74,472 Mds. 9,30,517½	Rs. 2,08,562 Mds. 11,12,330½	Rs. 2,55,912 Mds. 13,64,864	Rs. 1,37,514 Mds. 7,33,408

The falling off in the last year is attributable to the famine, which checked the exports of all grain. The statement also shows the quantities on which duty was paid during the same twelve years. While the totals of duty have increased from 1865-66, the exports themselves decreased after the duty was raised in 1867 from two to three annas a maund, and it is only in the last three years (excluding the famine year) that they are reaching their former level. I would therefore return to the two-anna duty for all grains and pulses, excepting rice and paddy. These two have not been affected by the duty. The average quantity of rice exported during each of the four years preceding the year of enhancement of duty was 781,401 tons, which in 1871-72 rose to 849,544, and 1872-73 to 1,148,689. It appears to me that as the exports of the other grains are increasing steadily, and in the year before the famine exceeded the average of the four years preceding the enhancement, the reduction of the duty from three to two annas is the maximum of relief required, if any be required.

The only exception I would recommend is as to barley, which resembles wheat, and might with advantage have the same indulgence extended to it as has been granted to wheat. The exports of this grain are small at present, but in 1871-72 a large quantity, nearly 79,000 cwt., was exported from Bombay and Sind, giving evidence of a considerable cultivation and of importations from the Persian and the Arabian Gulfs. Exemption from duty might develop the trade in barley.

With reference to the remark of the majority of the Committee, that "it does not seem desirable, if indeed it be practicable, to deal with portions only of a general head and give an artificial encouragement or check to one grain or oil compared with another," I would observe that this is exactly the course the Government took in the matter of wheat, and the very course followed by the majority themselves when they recommend the retention of duty on rice and paddy, and its abolition in connection with other grains. The difficulty seems to me quite an imaginary one.

If the duty on *grain, other sorts*, be not abolished, the word *pulses*, which formerly was in the tariff, should be reintroduced. *Gram, dâl*, and *peas*, and other similar products are pulses, *i.e.*, are formed in pods instead of in the ear, as is grain.

Oils.—The statement below shows the duty realised on oils during the last twelve years:—

1862-63.	1863-64.	1864-65.	1865-66.	1866-67.	1867-68.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
1,06,828	1,18,532	63,560	37,982	39,269	60,976	1,21,510	1,04,305	86,088	1,35,881	1,07,090	85,567

The figures give evidence of a very fluctuating trade, while the general result shows no improvement. I think therefore that oils generally require relief, but it does not follow that every oil is injuriously affected by the duty. Castor oil is almost a monopoly of Indian production, a small quantity only being exported from the West Indies and from North America.

The subjoined statement of exports of castor oil from Bengal to foreign countries, made out for the last twelve years, shows (especially if the first year, which was quite an exceptional one, be left out) an increase of exportations, reaching in the last year to a considerable amount:—

1862-63.		1863-64.		1864-65.		1865-66.		1866-67.		1867-68.	
Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.
	Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.
60,485	21,771 1 6	35,939	12,826 10 6	34,518	12,420 9	39,964	14,376 8 9	39,712	14,811 3 9	50,271	23,979 4 3

1868-69.		1869-70.		1870-71.		1871-72.		1872-73.		1873-74.	
Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.
	Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.		Rs. A. P.
66,339	31,706 7 3	54,978	31,192 0 3	46,406	22,185 5 3	51,487	24,836 1 0	31,154	14,990 7 0	82,733	39,704 6 0

I would therefore not extend the exemption from duty to castor oil; as an article of almost purely Indian production, it is an appropriate subject of duty.

Seeds.—I do not agree with the majority of the Committee in recommending Government to give up the duty on these articles—a duty yielding over 7 lakhs of rupees. The following figures give no sign of a trade declining under a pressure of an oppressive duty:—

1862-63.	1863-64.	1864-65.	1865-66.	1866-67.	1867-68.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.
Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
5,48,395	5,78,363	5,51,975	5,03,025	5,57,808	6,66,760	6,65,054	7,22,861	10,70,984	8,48,462	4,71,719	7,26,010

The province which mainly exports seeds is Bengal, where the duty paid last year was Rs. 4,21,351, against Rs. 1,28,892 in Bombay and Rs. 1,18,398 in Madras. The seed chiefly exported from Bengal is linseed, and the subjoined statement of exports of linseed paying duty from Bengal during the last six years gives evidence of a flourishing trade:—

1868-69.		1869-70.		1870-71.		1871-72.		1872-73.		1873-74.	
Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.	Cwt.	Duty.
2,521,883	Rs. 3,78,897	1,803,155	Rs. 2,70,472	3,272,763	Rs. 4,91,234	2,694,654	Rs. 4,04,198	2,118,907	Rs. 3,18,290	2,247,463	Rs. 3,39,982

With regard to the fluctuations in the trade of exported articles which the statements attached to this note exhibit, I think there is need for great caution before coming to a conclusion that the trade in any article is declining, and still more so before deciding that the proper remedy even for a positive decrease is abolition of the duty. In 1869-70 the exports of rice fell enormously, and occasion was taken of this fact by Chambers of Commerce and others both in India and England to urge upon the Government the total removal of the duty. The Government, however, held firm, and the result is that in 1872-73 rice gave a return of more than double what it yielded in 1869-70, while the predictions of ruin to the Burmah rice trade from the free competition of Saigon and Bangkok—predictions based upon grounds sufficiently strong to induce two members of the Government to advocate immediate repeal—have been singularly falsified by the extraordinary and increasing development of exports from that province during the last five years. The remarkable fluctuations which may be noticed in most exports from India appear to me to indicate that the supply is mainly regulated by causes varying in their effects in different years. If the duty had much to do with it, exports would either remain at one level, representing such part of the demand as could afford the duty, or would gradually decrease. In some cases there might also be a gradual but slow increase. These remarks only apply to those articles of exports in which there is a competition from other countries.

While generally objecting to remission of the export duties on the ground that any substituted taxation would be worse, I am of opinion that possibly some of these duties might advantageously be lowered.

No principle seems to have been followed in their imposition. Thus indigo pays a duty of about $1\frac{1}{3}$ per cent. in value, while oils, which are also a manufacture, pay 3 per cent., and seeds and spices, which have to encounter much severer competition, pay also 3 per cent. I believe that a careful re-adjustment of some of the export duties would be attended with benefit to Government and the trade.

In saying a word for export duties, I am laying myself open to the charge of ignorance and of retrogression. At present everybody except the natives, who are supposed to pay them, condemns these duties. The advocates of abolition quote Political Economy, and gain the easy victory which always falls to those who take their stand on first principles and irrefutable theories.

Export duties are not defensible on their merits, nor indeed is any form of taxation in India, except that on land, which is rent, the excise on spirits, and the import duties on spirits, wine, and tobacco. Arguments it would be difficult to answer can be brought against the salt tax, the stamp tax, and income tax, &c. The practical question is as to the tax which possesses the least objectionable features. If export duties be looked at from this point of view, the peculiar circumstances of the country, for which the conclusion generally adopted makes no allowance, will be taken into consideration.

Surely the fact that the natives of India, a people so impatient of taxation, not only do not object, but are generally ignorant even of their existence, is greatly in favor of this class of duties. In the answers throughout the country to Lord Mayo's enquiries in 1870 about taxation, I find among those written by natives a constant enumeration of the taxes paid by the people, customs duties being altogether ignored. Only one man from Madras remarks upon these, and all he says is that people think it hard to pay as high an export duty on the cheaper pulses as on rice.

As to the incidence of an export duty falling on the producer, this in India is not necessarily an objection. In England the masses of the people are taxed more or less in various ways. In India the difficulty is to get at them at all. If by means of an export duty on rice, on seeds, and on jute the producers of these staple growths do or should contribute slightly (though unknowingly) to the resources of the Government, I fail to see wherein the mischief lies, provided always that the duty be not to the extent of discouraging production.

Again in the argument that all export duties invite competition and place the producer and the trade of the exporting country at a disadvantage with countries exporting the same articles freed from any burden of duty, the distinguishing characteristic of India—cheapness of labor—seems to me to be lost sight of; all that is considered is the fact of duty on one side and no duty on the other. But there are other important points. As a rule, no other country can equal this one in cheapness of production. If owing to this primary advantage an article can be exported from India at a lower cost, including production and duty, than from the competing country for production alone, it is evident that the duty will not act injuriously on the supply or on the trade. Russia and America grow seeds to a large extent; but as regards the competition of India with them, the question is not simply one of duty, but one of cost of production, of duty, and of freight. Possibly the duty in India turns the scale against her, but the balance, if so, could be adjusted by reducing the duty from 3 to 2 per cent. It seems to me quite unnecessary to rush into the extreme of abolition.

These remarks are perhaps beyond the scope of a dissent from certain recommendations made by the Committee of which I am a member. I submit them, however, because it seems to me that between the pressure from England against all import duties (I say all, for if the duties on cotton goods are abolished, scarcely any others can be retained) and the constant appeals in this country to the stock arguments against export duties, the revenue derived from customs is in some danger.

Having for years supervised the administration of every form of taxation in Bengal, I am strongly of opinion that there are practical objections against enhancement of salt duties and re-imposition of income tax, the only available means at present discovered of increasing the revenue, far weightier than against the continuance of any existing custom duties, import or export.

(Signed) A. MONEY.

I CONCUR in the above minute of dissent.

(Signed) T. B. LANE.

Appendices.

APPENDIX A.

This shows in juxtaposition the Import and Export Tariff as now existing and as proposed by the Committee. It has not been reprinted, because the Committee's valuations, having been adopted in all cases, appear in the new Tariff Act, and their other recommendations will be found in the body of their report. Ed.

TOTAL LOSS OF REVENUE ...	2,78,000

Dated 31st May 1875.

From—H. W. I. WOOD, Esq., Secretary to the Bengal Chamber of Commerce,
To—R. B. CHAPMAN, Esq., Secy. to the Govt. of India, Financial Dept.

BY the Resolution of the Government of India, Financial Department, No. 6703 of 25th November 1874, the formation of a Committee for the revision of the customs tariff valuations was sanctioned.

Under the orders then issued, the Committee commenced their duties early in January following, and they appear to have submitted their report without delay, as it was acknowledged in the Budget statement published on the 13th March last, the customs estimates having been framed after reference to it.

As considerable time has passed since the Government have had the report under consideration, and as the deferred publication of the orders of Government regarding the tariff is causing great inconvenience to many of the commercial community, the Committe of the Chamber of Commerce direct me to request you will be so good as to express to His Excellency the Governor General in Council their hope that an early decision may be arrived at, and that His Lordship may be pleased to place at their disposal a copy of the Tariff Committee's report.

No. 1459, dated 11th June 1875.

From—R. B. CHAPMAN, Esq., Secy. to the Govt. of India, Financial Dept.,
To—The Secretary to the Committee of the Bengal Chamber of Commerce.

In reply to your letter dated 31st May 1875, I am directed to state, for the information of the Committee of the Chamber of Commerce, that action on the report of the Committee lately appointed to revise the Customs Tariff valuations and to report upon other matters relating to the customs duties generally, has been unavoidably delayed, in consequence of certain further enquiries that were found necessary. The report will, however, be taken into consideration as soon as possible.

I am also to intimate that His Excellency the Governor General in Council regrets that he is not in a position to furnish the Chamber with a copy of the Tariff Committee's report.

Dated 21st June 1875.

From—H. W. I. WOOD, Esq., Secretary to the Bengal Chamber of Commerce,
To—R. B. CHAPMAN, Esq., Secy. to the Govt. of India, Financial Dept.

THE Committee of the Chamber of Commerce direct me to acknowledge the receipt of your letter No. 1459 of the 11th instant.

As considerable time, upwards of three months, had passed since the Tariff Committee submitted their report to Government, and as the customs estimates in the Budget for the current year, published on 13th March, were declared to have been framed after reference to the Committee's recommendations, the Chamber's application of 31st ultimo was made in the confident expectation that the orders of Government would be speedily announced.

It is therefore with much regret the Committee now learn that no decision can, at present, be arrived at, pending further enquiries, and they would urge upon Government the advisability of an early decision upon the tariff question, which is of the greatest importance to the trade of the country.

Under the existing tariff, merchants are paying duties on valuations largely exceeding real values, thereby incurring actual loss; and the business of those who are bonding their goods in anticipation of a more equitable tariff, is obstructed by the uncertainty of the changes that may be introduced.

Under these circumstances, the Committee trust His Excellency the Governor General in Council will pardon the renewal of their application for the earliest publication of the revised tariff.

No. 2636, dated 12th August 1875.

RESOLUTION,—By the Government of India, Financial Department.

READ—

Proceedings in the Separate Revenue Department, Nos, 13 to 51 of January 1875.

Read the following papers—

From Secretary to the Tariff Committee, No. 197, dated 4th January 1875.
To ditto ditto No. 98, dated 6th January 1875.
Report of the Committee, dated 27th February 1875.
Letters from the Committee of the Bengal Chamber of Commerce, dated 31st May and 21st June 1875.

THE Indian Customs Tariff was carefully revised by a Committee at the beginning of 1869, when the tariff valuations of cotton yarn and piece goods and other articles, were largely reduced.

2. In April 1873, the Board of Revenue, Lower Provinces of Bengal, forwarded to the Government of Bengal a memorandum by the Collector of Customs, Calcutta, suggesting a number of alterations in the import tariff annexed to Act XIII of 1871, and some additions thereto. The Board supported, generally, the recommendations made by the Collector, and made some further proposals.

Upon receiving these papers from the Government of Bengal, the Governor General in Council invited the opinions upon them, of the Governments of Madras and Bombay.

3. In August 1873, the Committee of the Bengal Chamber of Commerce submitted for the consideration of His Excellency the Governor General in Council, the expediency of revising the rates on which duties were assessed under the Indian Tariff Act, 1871, as well as the rates of duty to which merchandise was, at that time, subject, and intimated that the Chambers of Commerce of Bombay and Madras had been addressed on the matter, and that it was believed that these bodies would communicate with the Government of India and endeavour to obtain an object in which they were interested in common with the Bengal Chamber.

The Governments of Madras, Bombay, Bengal and British Burmah were invited to report upon these proposals.

4. On the 31st January 1874, the Manchester Chamber of Commerce addressed a memorial to Her Majesty's Principal Secretary of State for India complaining—

that the duties of 3½ per cent. on yarns and 5 per cent. on British cotton manufactures imported into India were assessed on tariff rates fixed many years ago, when values ruled much higher than at present; so that the duties thus levied, actually amounted to about 4 per cent. on the actual price of yarn, in India, and nearly 6 per cent. on cloth;

that the tax was found to be absolutely prohibitory to the trade in yarn and cloth of the coarse and low-priced sorts;

that the Chamber were informed that it was proposed to import Egyptian and American raw cotton into India (no duty being charged thereon) to manufacture the finer yarns and cloth, which would thus compete with goods received from England on which duty was levied;

that a protected trade in cotton manufacture was, thus, springing up in British India, to the disadvantage both of India and Great Britain; and

that the duties increased the cost to the native population, or at least to the poorest of the people, of their articles of clothing, and thereby interfered with their health, comfort and general well-being.

The Manchester Chamber of Commerce, therefore, prayed that early consideration might be given to the subject of the duties levied on yarn and cotton piece-goods on import into India, with a view to their abolition.

5. On receipt from the Secretary of State of a copy of this memorial, the Government of India pointed out that the tariff had been carefully revised at the beginning of 1869, when the tariff valuations of cotton yarns and cloths were largely reduced; but held out an expectation that a Committee of revision would, again, be convened in the following cold season.

6. Thereupon, the Manchester Chamber of Commerce, while quoting facts to show that the tariff valuation required immediate revision, reminded the Secretary of State that, in their memorial, they had only incidentally referred to *valuations*, and that their main object and prayer was the total and immediate repeal of the duties themselves, for the reasons given in their memorial; and added:—

"The statements as to the baneful operation of these duties on commerce, and on the best interests of Her Majesty's subjects, both in India and in England, are abundantly confirmed by the latest advices from Bombay, which show that, under the protection extended by the levying of duties on imports, to the spinning and weaving of cotton yarn and goods in India, a large number of new mills are now being projected, and the revenue from import duties, will be consequently diminished. The impost is therefore defeating its own object, as well as inflicting an injustice on the consumer and importer."

7. In September 1874, the Committee of the Bengal Chamber of Commerce again addressed the Government of India with a view to the revision of the tariff valuations, and furnished figures to show that the existing valuations were too high.

8. In November 1874, the Government of India constituted the following Committee for the revision of the tariff valuations:—

President.

MR. A. MONEY, C. B.	...	... Member of the Board of Revenue, Calcutta.

Members.

THE HON'BLE J. R. BULLEN SMITH	...	Member of the Legislative Council of India.
THE HON'BLE R. A. DALYELL	...	Member of the Legislative Council of India.
MR. T. C. HOPE	...	... Acting Commissioner of Customs and Opium, Bombay.
MR. T. B. LANE	..	... Collector of Customs, Calcutta.
MR. J. C. MURRAY	...	... Chairman of the Bengal Chamber of Commerce.

9. Mr. Murray was nominated by the Bengal Chamber of Commerce. The Bombay Chamber of Commerce were invited to depute a Member, but declined to do so.

10. The whole of the papers hereinbefore described, together with the various reports and opinions received from the several local Governments and Chambers of Commerce, were placed before the Committee; and they were instructed not only to revise the tariff valuations, but to give their opinion "as to the propriety of removing, from the tariff, any articles the retention of which may be thought unimportant in the interest of the public revenue, and the removal of which from the list of dutiable articles, would give freedom to trade; or any of the existing export duties which, in the opinion of the Committee, were, from competition, or otherwise, seriously prejudicial to the trade in the articles subject to them."

The opinion of the Committee was especially invited upon the representations which had been received upon the injurious effect of the import duties on cotton goods and twist. "The Government of India," they were informed, "does not impose or maintain customs duties for the purpose of affording protection to any branch or class of industry, but for revenue purposes only."

Finally, the Committee were told that the Government of India would be glad to receive suggestions from them, generally, upon any matters in which they might consider that the customs tariff required amendment.

11. The report of the Committee is dated the 27th of February last. They recommended considerable changes in the tariff valuations, the only difference of opinion among the members, in this respect, being as to the valuation of certain classes of cotton piece goods, in regard to which the members were equally

divided. The President gave his casting-vote in favor of a scale which, calculated on the importations in 1873-74, would reduce the duty on cotton goods by Rs. 6,42,000. The three remaining members, among whom were the two members connected with trade, proposed a lower scale, which would increase the relief to Rs. 8,00,000.

12. In regard to the larger question of alterations in the rates of duty, the Committee made several important proposals. They noticed the falling off of the imports of metals, which they attributed, partly to the rise in the price of metals of late years, and partly to the somewhat depressed condition of the agricultural classes in India, and recommended that, as a higher value would be put upon metals in the new tariff, the rate of duty upon copper, lead, spelter and quicksilver, in their raw state, should be reduced from 7½ to 5 per cent.

13. With regard to the representations by the Manchester Chamber of Commerce as to the effect of the import duty upon yarn and cotton cloths, they observed:—

"In so far as the complaints alleged that the tariff valuations were excessive, they have "been found to be just; and the Committee have already recommended reductions involving "relief to the extent of Rs. 6,42,000. But it is also urged that the duty is 'absolutely "prohibitory to the trade in yarn and cloths of the coarse and low priced sorts' which the "Indian mills make largely, under the protection of the duty; and it is suggested that, ere "long, the finer yarn and cloth will, with the help of importations from Egypt and America, "be manufactured also. It must, of course, be admitted that the Indian mills have injured "the English ones, to the extent to which their manufactures have displaced the manufactures "of Manchester, less their exports to other countries, and the amount of the injury they have "inflicted on the hand-looms of India in localities which Manchester goods have not been "able to reach. But the duty, though contributing to this result, cannot be said to be the "sole cause of it; since India, with many disadvantages, possesses certain natural capabilities "for producing goods of this low quality, which will probably secure the trade in them to her, "even if the duty be removed. On the other hand, if the duty were as prohibitory "as it is represented to be, the market would not be, habitually, over-stocked, as it has been "for years.

"The Committee think it more to the purpose to consider what proportion the particular "goods which have to meet Indian competition bear to the whole cotton import duty, and "how far this competition justifies the demand for abolition of the entire duty which has "been brought forward. The Indian mills can make mule twist up to 32s., and water twist "up to 20s., as also longcloths, T cloths, drills, domestics, jeans and sheeting. The pros-

		Rs.
On twist	...	16,412
On longcloths, &c.	...	1,87,926
TOTAL	...	2,04,338

"pect of the finer kinds of yarn and cloths being "made, with profit or success, is notoriously so "remote, and the enterprise so doubtful, that it "is quite unnecessary to take it into present cal- "culation. The duty levied in Bombay, in 1873-74, "upon the similar Manchester goods which have "to stand the Indian competition was about 2 lakhs of rupees. If the total duty on such "goods paid in all India be taken, though the mills beyond the Bombay Presidency are, as "yet, comparatively unimportant, it would barely exceed 4 lakhs. The demand that, because "one class of goods, represented by 4 lakhs of duty in all India, has, in one part of India, to "meet a local competition, the Government shall remit the remaining 77 lakhs which com- "petition cannot affect, appears to the Committee quite unreasonable, and it is unnecessary even "to enquire whether the finances could afford the remission.

"The scheme of removing the duty on coarse goods only, though reasonable in theory, is "difficult in practice, as explained by the Chairman of the Bombay Chamber of Commerce in "his published speech of January 5th, and has, he admits, been, in England, pronounced "unworkable.

"The alternative of an excise duty on the Indian mill products remains; but part of it "would have to be refunded on exportation, and the Committee see no more need for establish- "ing a cumbersome and expensive excise machi- "nery now, than there was in 1861 and 1862, "when Mr. Laing decided against it.*

* Financial Statements, pp. 57 and 85.

"There are numerous heads in the import tariff which embrace some articles which "are also, to a certain extent, produced in India; and the Committee consider any alteration "in favor of cotton goods to be uncalled for."

14. The Committee recommended that the import duty upon certain articles of luxury should be raised from 7½ to 10 per cent., that on silk piece goods from 5 to 7½ per cent., and that upon iron from 1 to 2 per cent.; and that a duty of 2½ per cent. should be levied on machinery.

15. They proposed that the duty on spirit should be raised from Rs. 3 to 4 a gallon, that on liqueurs from Re. 1-8 to Rs. 3 a gallon, that on champagne and sparkling wines from Re. 1-8 to Rs. 2-8 a gallon, and that on all other wines, except Claret, Burgundy, Austrian and Greek, from Re. 1 to Re. 1-8 per gallon.

16. They also proposed to insert, in their appropriate places, in the tariff, certain minor articles which appear to have been accidentally omitted.

17. The Committee expressed an opinion against removing from the list the articles from which but a small amount of duty is derived, for the following reasons:—

"The Committee would have been glad to recommend the exclusion of all articles yielding "small amounts. But, precluded as they are, in the peculiar circumstances of India, from proposing "an increase of duty on any article which could yield a large return, they felt unwilling to "recommend the relinquishment of the sum which as a total is of importance, although the "items composing it are of insignificant value. It must also be noted that, in the present "tariff, there are only seven general headings which yield sums less than Rs. 10,000, and that "there exist objections against removing from the tariff only parts of a general heading."

18. The Committee, rightly considering the export duties to be the most objectionable portion of the Indian tariff, enquired carefully into these duties and recommended the abolition of the duties on—

Cotton goods;
Grain and pulse, except rice and paddy;
Seeds;
Oils, and
Spices.

19. The financial result of the proposals of the Committee, calculated upon the actual trade of 1873-74, was as follows:—

1st.—The alteration of the valuations was estimated to raise the receipts from customs duties by Rs. 5,07,000 and to lower them by Rs. 7,67,000, showing a net loss of Rs. 2,60,000. This loss would be increased by Rs. 1,60,000, or to Rs. 4,20,000, if the proposal for the lower valuation of cotton goods were adopted.

2nd.—The loss from the proposed remission of duties, was estimated as follows:—

			Rs.	Rs.
IMPORTS ...	Metals	... ...	1,70,627	1,70,627
EXPORTS ...	Cotton goods	... ...	1,43,000	
	Seeds	... ...	7,84,000	
	Grain and pulse other than rice and paddy		2,00,000	
	Oils	... ...	98,000	
	Spices	... ...	80,000	
				13,05,000
		TOTAL		14,75,627

3rd.—The gain by the increase of duties proposed, was estimated as follows:—

		Rs.
Duty on articles of luxury raised from 7½ to 10 per cent.	...	84,158
Ditto silk goods from 5 to 7½ per cent.	...	1,21,000
Ditto iron from 1 to 2 per cent.	...	45,000
Ditto machinery	...	2,60,000
Ditto spirit from Rs. 3 to Rs. 4 a gallon ...	...	6,26,000
Ditto liqueurs from Re. 1-8 to Rs. 3 a gallon ...	...	
Ditto wines	...	2,46,000
Small items brought into the tariff	...	75,000
TOTAL	...	14,57,158

leaving a net loss of Rs. 18,469 from alterations of duties.

20. Assuming the lower valuation of cotton goods to be accepted, the revision of the valuations and alteration of the duties together showed a net loss of Rs. 4,38,469. Against this was to be set the probability of an increase in the

imports of cotton yarn and piece goods, which, by the reduction of the valuations, would be relieved of duty to the extent of about Rs. 8,00,000 a year; and perhaps also some increase in metals.

21. Two dissents were appended to the Committee's report. Mr. Hope objected to the proposals to raise the import duty upon certain articles of luxury from 7½ to 10 per cent. and to double the one per cent. duty upon iron, and impose a duty upon machinery, and advocated a still larger increase of the duties on wines than the Committee. The President and Mr. Lane were opposed to the remission of the export duties in general, and especially of the export duties on grain and pulse, castor oil and seeds.

22. The Governor General in Council, having considered the report of the Committee, arrived at the following conclusions upon the various questions arising in connection with it:—

TARIFF VALUATIONS.

23. The tariff valuations recommended by the Committee have been accepted, with the exception of the valuation of shirtings and longcloths, T cloths, madapollams, jeans, domestics, sheetings and drills. Three members of the Committee advocated a valuation of these goods lower by half an anna a pound than that recommended in the Committee's reports. The Governor General in Council preferred to adopt the lower valuation of these goods.

EXPORT DUTIES.

24. The Governor General in Council carefully considered the dissent, recorded by Messrs. Money and Lane, from the recommendations of the Committee for the remission of many of these duties. But he concurred with the majority of the Committee in the opinion that it is of primary importance as far as possible to relieve the export trade of India from taxation, and to stimulate the growth of Indian produce, whether raw or manufactured, for exchange with other countries. In the judgment of the Governor General in Council, no part of the Indian tariff more urgently needed reform than the schedule of export duties. It was therefore with great satisfaction that His Excellency in Council found himself able to assent to all the recommendations made by the Committee for the remission of export duties. Moreover, the Governor General in Council was pleased to remit the export duties on hides and skins. The Committee do not seem to have observed that the existing export duty was confined to *tanned* hides and skins, and that the export of raw and salted hides and skins was already free. It seemed to the Governor General in Council inexpedient thus to tax the export of the manufactured article only; and the duty, which yielded, in 1874-75, only Rs. 1,51,100, has been abandoned altogether.

25. Thus the export tariff of British India now contains only three articles—Indigo, Rice and Lac. With these exceptions, the entire export trade is freed from all fiscal burdens.

IMPORT DUTIES.

26. The Governor General in Council has not thought it necessary to increase the duty on certain articles of luxury as proposed by the Committee. As will presently be explained, he had resolved to reduce the general rate of import duty from 7½ to 5 per cent.; and it would have been inconsistent with this resolution to raise the duty on these articles. For like reasons, His Excellency in Council was unwilling to increase the duty on silk piece goods; and, as the reasons for treating iron and machinery with special favor appeared to him as strong now as they have ever been, the recommendations of the Committee for imposing a duty on machinery and increasing that on iron were not adopted.

27. The inclusion in the import tariff of certain petty articles for the exemption of which there was no particular reason, has been approved. On the other hand, *coffee* has been exempted from duty as yielding a very small net revenue and as being largely produced in India, and *quinine* as an article the import of which deserves special encouragement. Further, His Excellency in Council deemed it expedient to fix the duty on arms, ammunition and military stores at 10 per cent.; and, in order to place those who are engaged in curing fish,

with taxed salt on an equality with the curers of fish with untaxed or less highly taxed salt, it was considered necessary to impose a duty of 12 annas a cwt. on salted fish imported into the Bombay Presidency, except Sindh: it was not, for the present, thought necessary to impose this duty in other parts of India; but power has been taken, under the Indian Tariff Act 1875, to extend it as may be found expedient.

28. The Governor General in Council accepted the conclusion of the Committee in respect to the demand made by the Manchester Chamber of Commerce for "the total and immediate repeal of the import duties on yarn and piece goods." The revenue obtained in 1874-75 from these duties was Rs. 92,15,383; and, even at the valuations as now revised, it would have been more than Rs. 83,00,000. It would be impossible for the Government of India to give up such a sum without seeking some compensation from other sources. These duties are levied at a very small cost and at a minimum of inconvenience to the people, and they cause no discontent. Had the Government of India found it necessary, for the reasons given on behalf of the Manchester Chamber of Commerce, or for any other cause, to abandon these duties, they would have been placed in a position of much anxiety. If necessary, they must probably have resorted to the alternative of an excise on the indigenous mills, rather than give up a large revenue which cannot be spared. But it is plainly shown by the Committee, that, in regard to the great bulk of the trade in these goods, the importers are, as yet, subject to little or no new competition by the manufactures in India. The Committee have reported, after careful inquiry, that the import trade which is exposed to competition from Indian manufactures, yields a duty of only Rs. 4,00,000. It should be remembered that the handlooms of India have, all along, competed with importers in respect to this class of goods: the only new feature in recent times is the construction of cotton mills in increasing numbers; some have long existed, and have not, it is believed, till lately been very successful.

It is difficult to obtain trustworthy statistics of the consumption of cotton goods in India. The following were given at a meeting of cotton spinners held at Blackburn on the 21st of October last:—

210,000,000 lbs. imported from England.
210,000,000 lbs. supplied from native hand manufacture.
40,000,000 lbs. supplied from Indian manufactories.

Whether these figures be correct or not, it cannot be doubted that the imports of cotton manufactures are mainly composed of the higher qualities of goods, and that the coarser fabrics have always been largely manufactured in India.

29. The figures given in the margin show the quantities of cotton yarn imported, each year, since 1859-60, and the value of cotton yarn and piece-goods together for the same period. The figures of value cannot be trusted for purposes of accurate comparison; the valuations were partially raised in November 1860;* in 1864† the remainder were raised; in 1867, and again in 1869, they were reduced. It will be remembered that, in 1862, the duty on cotton twist and piece-goods was reduced to 3½ and 5 per cent. respectively. The imports of cotton goods were affected by the high prices caused by the interruption in the supply of raw cotton to England from the United States owing to the civil war. These prices lasted till 1865.

YEARS.	Quantities of cotton twist and yarn.	Value of cotton twist and yarn and piece-goods.
	lbs.	£

1873-74	30,947,634	17,781,341
1874-75	37,097,200	19,387,270

* Mr. Wilson, Financial Statements, p. 21.
† Sir C. Trevelyan, *ibid.*, p. 150.

30. In the three years from 1859-60 to 1861-62 the average annual value of the imports of cotton twist and piece goods was, in round numbers, £11,000,000. In the four years from 1862-63 to 1865-66 the

average annual value was £12,150,000. The financial year 1866-67 is useless for purposes of comparison, as it only embraces 11 months. In the four years from 1867-68 to 1870-71, the average annual value was £17,966,000.

31. In the four years from 1871-72 to 1874-75, the average annual value was about the same—that is to say, £17,970,000: but, in 1869, the tariff valuations were lowered by 15 per cent.; and, if allowance be made for this, there is an increase of about a quarter of a million sterling over the average for the preceding period. In the year 1874-75, the value was £19,387,270, which is the highest amount for any year of the period under review.

32. The Governor General in Council is aware that it is stated that the trade of last year was not prosperous; but, looking at these figures together, and making every necessary allowance, he can see no indication that the demand in India for English cotton manufactures has diminished, or is likely to diminish. On the contrary, it is more probable that, as the demand for English cotton manufactures has, hitherto, steadily progressed, notwithstanding the competition which has always existed in the lower classes of goods, from native hand-loom weavers, and even, for several years past, from mills, so it will continue to progress, although the lower classes of goods may, in future, be produced in the new Indian manufactories more cheaply and more suitable for the Indian consumer, than they have been by hand-looms, or in the older mills.

33. An alternative proposal was made, not by the Manchester Chamber of Commerce, but by that of Bombay, that the Government should exempt from duty the coarse sorts of yarn and cloth, which alone are subject to indigenous competition. The Government of India would have been willing to adopt this proposal, and to sacrifice revenue in giving effect thereto, if, on investigation, it had been found to be practicable. But it is open to two serious objections: 1*st*, it would be difficult, if not impossible, to draw any clear and stable line to describe the goods to be thus exempted; and 2*ndly*, if any such line were fixed, it would be hardly possible to protect it from evasions; and moreover, a very onerous responsibility would be imposed, upon customs officers. To fix any such line, if it were possible, would be to stimulate the indigenous mills to devote their attention to the manufacture of goods such as would compete with those just above the line. It is stated to be the opinion of some leading members of the Manchester Chamber of Commerce that this alternative scheme is impracticable; and it certainly so appears to the Government of India with the information now before them.

34. Duties upon imports have not been imposed in India with the object of protecting Indian manufactures or produce, but solely for purposes of revenue. When, after the Mutiny, the Government were compelled to raise additional taxes, the general rate of the import duties was increased; but the earliest opportunity was taken to reduce this rate, and among the first articles relieved were cotton twist and piece goods, the duty on which articles was lowered in 1862 to 3½ and 5 per cent. respectively, while the general rate remained at 10 per cent.

The following observations then made by Mr. Laing expressed the views entertained by the Government:—

"Free-trade does not mean that there shall be no taxes, but that taxes shall be levied solely with a view to revenue, and not partly for revenue and partly for protection.

That every customs duty on an imported article should have a corresponding excise duty on similar articles produced at Home has, therefore, become an axiom; and it only admits of one exception—where the amount of import duty is so moderate that it does not seriously affect trade, while it makes it obviously inexpedient to establish an excise machinery for the sake of levying a trifling duty.

This is the case with regard to corn in England, where a duty of 1*s.* a quarter equal to 5 per cent. on the cheaper sorts of foreign grain is retained; and it is precisely our case with regard to piece goods.

We cannot dispense with customs duties on our imports generally; and, while this is the case, no reasonable man can object to our retaining an old accustomed duty of 5 per cent. on manufactured goods."

The Government of India are still of opinion that a duty of 5 per cent. *ad valorem*, upon cotton goods, cannot practically operate as a protection to native manufacture.

The Government fully admit the advantage that would be derived to the people from a reduction in the cost of their clothing; but, as has been already said, financial considerations will not admit of so large a sacrifice as that of the duty on cotton goods. There are other items of customs, moreover, particularly the export duty upon sugar by land, which, in regard to the general interests of the people of India, demand prior consideration.

35. While, thus, unable to accede to the demand made by the Manchester Chamber of Commerce for the remission of the import duties on cotton yarn and goods, the Governor General in Council has gladly assented to the revised valuations of these goods proposed by the minority of the Committee, which are calculated to afford relief to the trade by a reduction of duty to the extent of Rs. 8,00,000, if reckoned upon the trade of 1873-74, and Rs. 8,80,000, if reckoned upon the trade of 1874-75. The Governor General in Council hopes that this relief will give some help to a commerce which is of vast importance to both India and Great Britain.

36. The value of American and Egyptian raw cotton imported in 1873-74 was less than Rs. 70,000; and the Governor General in Council has not ascertained that, hitherto, such cotton has been imported to any extent to be manufactured into cloth in Indian mills. But, in order to place the Indian manufacturer upon the same footing as the importer, it would be necessary to levy a duty upon such raw cotton, if it should be imported: as a precautionary measure, therefore, an import duty of 5 per cent. has been imposed by the Tariff Act, 1875, on raw cotton not the produce of continental Asia or Ceylon. It is not necessary thus to tax foreign cotton of the same quality as that grown in India.

37. The duty on twist is left, for the present, at 3½ per cent. But, if it be found that imported twist is largely manufactured into cloth in the Indian mills, it may become necessary, hereafter, to increase this rate.

38. The value of metals, machinery, and railway materials imported yearly from 1859-60 is shown in the margin. A comparison of the imports for the ten years from 1863-64 to 1873-74* gives the following result:—

Years.	Machinery.	Railway materials.	Metals.
	£	£	£

Year	1874-75	2,607,075	1,185,943	753,057

39. There has been a decrease in the imports under each head during the ten years. The import of railway materials depends upon the operations of the State, either directly or through guaranteed companies; and the decrease has been caused by the gradual completion of the main lines of railway. Machinery shows a large recovery in the years 1873-74 and 1874-75; in the latter year,

* The year 1866-67 has been omitted because the returns for this year include only 11 months.

the imports rose to a higher value than in any previous year. The chief decrease has been in raw metals; and it has continued during the last eight years of the series, until last year, when there was a satisfactory improvement. The values given are the tariff valuations, and they do not accurately represent the real values, for the price of metals has of late risen considerably; but the figures are good for the purpose of comparison. But for the encouraging reaction in 1874-75, it might have been necessary for the Government to grant a larger measure of relief to the trade in metals than has been actually given. As it is, the Governor General in Council hopes that the reduction of the general rate of duty from 7½ to 5 per cent., by which metals will benefit largely, will give adequate relief to this branch of trade.

40. The Governor General in Council has adopted the recommendations made by the Committee for the increase of the duties on spirit and wines, with some slight modifications, the chief being that the duty on liqueurs has, in accordance with a recommendation made in 1873 by the Collector of Customs, Calcutta, been fixed at the rate adopted for spirit, *viz.*, 4 rupees a gallon.

41. It will be generally admitted that spirit and wines are legitimate subjects of taxation; it is only necessary to take care that the duties are not pitched so high as to induce illicit practices, and that the principle is kept in view of preserving a relation between the customs duty on spirit imported from abroad, and the excise duty on spirit distilled in India. This principle has been clearly affirmed in Section 11 of the Indian Tariff Act, 1875, and the Local Governments will be immediately consulted as to how far practical effect can be given to it. The circumstances of India and the present stage of development of the administration of the Excise Department are not such that the internal duties can be raised indiscriminately, or without careful consideration of local circumstances.

Reduction of the general rate of import duty to 5 per cent.

42. Before 1845 the general rates of import duty were as follows:—

	Imported on British bottoms.	Imported on foreign bottoms.
Raw produce	3½ per cent.	7 per cent.
Manufactured articles ...	3½ and 5 per cent.	7 and 10 per cent.

43. By Act IX of 1845, a general rate of 5 per cent. was substituted for all manufactured articles not enumerated with special rates of duty; and by Act VI of 1848, goods imported on foreign bottoms were admitted on the same terms as those imported on British bottoms.

44. In 1859, after the Mutiny, the rate was raised to 10 per cent. and, during one year, in some instances, to 20 per cent.

45. In 1864, the rate was reduced to 7½ per cent. The articles then, and now, subject to the general rate, are numerous; but their value does not exceed one-fifth of the value of the whole import trade, the chief articles of import having special rates of their own, and not coming under the general rate.

46. The Committee, naturally, did not consider it within their province to propose any revision of the general rate of import duty. But Mr. Hope, in his dissent, incidentally expressed a hope that it might soon be found possible to reduce the general rate to 5 per cent., and added that he believed that "fiscally the result of such a reduction would be very satisfactory."

47. The Governor General in Council has had much pleasure in announcing the determination of the Government of India to make this reduction, and again to fix at 5 per cent. the general rate of import duty for all articles not enumerated in the Tariff with special rates of duty. His Excellency in Council was pleased, at the same time, to remove from the special, to the general category, tobacco, a high import duty on which must operate as a protection to the Native produce and manufacture.

48. The articles specially taxed are, now, as follows:—

	Rates.
Arms, ammunition and military stores	10 per cent.
Cotton twist	3½ „
Liquors	Various rates.
Iron, enumerated sorts, and railway materials	1 per cent.
Opium	24 rupees a seer.
Salt and salted fish	Various rates.

The import duty on all other articles liable to such duty, is, now, five per cent.

49. It is important to form some opinion how soon the ordinary growth of trade, together with the stimulus given by the relief now granted, may be expected to recoup to the revenue the sacrifice which has, thus, been made. The facts of the last reduction were as follows:—the average receipts, from the 7½ per cent. duty from 1861-62 to 1863-64 inclusive were about 40 lakhs of rupees a year: the duties were reduced in March 1864; the average yearly receipts from 1864-65 to 1866-67 inclusive were about 33 lakhs. The average yearly receipts, from 1867-68 to 1869-70, were about 40 lakhs, and, from 1870-71 to 1872-73, Rs. 40,40,000. Thus, it appears that, in three years, the increased trade recouped the revenue for the loss by the reduction in the duties made in 1864.

50. In estimating the effect of the further reduction now made, it must be borne in mind that the reduction from 10 to 7½ per cent. was one-fourth, whereas the reduction from 7½ to 5 is one-third, of the duty. The value of the trade on which the general rate of 7½ per cent. duty was levied, in 1874-75, was Rs. 6,88,00,000, yielding a revenue of Rs. 51,60,000. To yield the same revenue with a 5 per cent. rate of duty the value of the trade must increase to Rs. 10,32,00,000, or by Rs. 3,44,00,000. The reduction from 10 to 7½ per cent. was recouped in three years, showing an increase of trade of 1⅓ crore in three years, or at the rate of about Rs. 46,00,000 per annum. At this rate of increase, it would take more than seven years for the revenue from the duty now reduced to rise again to its recent amount. But, since 1864, the development of the railway system and of the trade with England has been very great, and it may be hoped that the trade will respond to the still more liberal concessions now made to it, so that, perhaps, a more rapid recovery may be looked for now than after 1864.

Financial Results.

51. The Committee calculated the results of their recommendations upon the ascertained trade of 1873-74. Upon this basis, they estimated the net loss of revenue, if all their proposals were accepted, and if, moreover, the lower rate of valuation recommended by the minority for certain cotton goods, were adopted, at Rs. 4,38,800. To this must have been added the following amounts, owing to the alterations made by the Government in some of the proposals of the Committee:—

Increased duties proposed by the Committee but not adopted.

	Rs.
Silk	1,21,000
Machinery	2,60,000
Iron	45,000
Articles of luxury	84,158
Add duties taken off in excess of the Committee's recommendations—	
Export duty on hides and skins	1,88,988
Import duty on coffee and quinine, less increase on arms, ammunition, &c.	10,000
Total ... Rs.	7,09,146

52. The Committee, however, reckoned as lost by the remission of the export duties which they recommended, not only the actual duty obtained in 1873-74, but a further sum of Rs. 25,000 which would have been also received,

if the duties had been retained at the new valuations. This sum of Rs. 25,000 should be deducted from the Committee's calculation. It thus appears that the loss of duty calculated upon the trade of 1873-74, and upon the basis of the Committee's recommendations as modified in detail by the Government of India, would have been Rs. 11,22,946.

53. The figures of the trade of 1874-75 are, however, now known; and the Government of India prefer to calculate the financial effect of the measures recorded in this Resolution, upon the basis of this trade, being the latest ascertained statistics.

The figures are as follows, after allowing for the net reduction (estimated at Rs. 46,333) of refunds and drawbacks owing to the reduction of the import duties:—

LOSSES.

Import duties remitted.

	Rs.
General rate reduced to 5 per cent.	17,20,000
Duty on coffee and quinine remitted—less increased duty on arms, ammunition and military stores	10,000
	17,30,000

Export duties remitted.

	Rs.
Cotton goods	1,63,826
Grain and pulse	2,73,450
Hides and skins	1,51,104
Oils	94,955
Seeds	9,84,730
Spices	59,500
All others	534
	17,28,099 or say 17,30,000

Revision of Valuations.

	Rs.	Rs.	
Loss on cotton goods		8,80,000	
Less net gain on other goods—	Rs.		
Import tariff	1,20,000		
Export tariff	1,40,000	2,60,000	
			6,20,000
Total loss ...			40,00,000

GAINS

	Rs.	
On spirit	6,40,000	
„ wines and liqueurs	2,80,000	
„ other articles	80,000	
		10,00,000
Net yearly loss ...		30,80,000

54. It thus appears that the net amount of revenue sacrificed by the present revision, calculated upon the trade of 1874-75, is Rs. 30,80,000.

EFFECT UPON THE ESTIMATES.

55. Rather more than one-third of the current financial year is already passed; and the loss, during the remainder of the year, may be estimated at Rs. 20,00,000. The customs revenue of the year is, however, as yet, prosperous; and, apart from the revision of the tariff, the Government consider that it would have been reasonable, now, to estimate the revenue of the year at Rs. 2,80,00,000 instead of Rs. 2,67,00,000, as originally estimated. In considering these figures, it should be remembered that, in expectation of the present revision of the tariff, the customs revenue of the year was estimated at Rs. 4,20,000 less than would, otherwise, have been set down. There is, thus, reason to hope that, notwithstanding the sacrifice of Rs. 20,00,000 during

the present financial year, the customs revenue will reach the sum of Rs. 2,60,00,000; in other words, that it will fall short of the estimate by only Rs. 7,00,000.

This augurs well for the rapid recovery of the revenue from the reductions now conceded; and it may fairly be expected that, notwithstanding the present concessions, the customs revenue, as a whole, will in a very few years be again as high as it was in 1874-75. For these reasons, the Government are of opinion that the changes introduced into the customs tariff, while they will give a substantial relief to the trade of India, will not cause any risk to the stability of the finances.

NEW CLASSIFICATION OF THE TARIFF FOR STATISTICAL PURPOSES.

56. It remains only to observe that the classification of the tariff schedules has been revised in accordance with instructions issued by the Secretary of State for India, upon the report of a Committee convened to consider the best means of assimilating the statistics of Indian trade with those of Great Britain and Europe.

CONCLUSION.

57. In conclusion, the Governor General in Council desires to offer the thanks of the Government of India to the Members of the Tariff Committee whose Report has been reviewed in this Resolution, and, especially, to those Members who, though not public servants, have willingly contributed their valuable time and experience to the laborious task which has now been accomplished.

ORDER.—Ordered, that this Resolution be communicated to all Local Governments and published in the supplement to the *Gazette of India*; and that a copy be sent to each Member of the late Committee for the revision of the Customs Tariff.

R. B. CHAPMAN,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 5th August 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble T. C. Hope.

INDIAN TARIFF BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to amend the law relating to customs duties and for other purposes. He would explain in a few words the origin of this Bill. About four years had elapsed since the existing tariff values were fixed by Act XIII of 1871, and numerous representations had been made to the Government of India that market-prices had fallen considerably below those values. Regarding cotton-goods especially, the Manchester Chamber of Commerce had stated that the excess in values amounted to an addition of nearly one per cent. to the rates of duty. It likewise happened, in the course of customs administration, that as time went on, it was necessary to make various petty changes by notification, and legal difficulties came to light which could only be removed by legislation. Thus a new customs law became necessary from time to time at no very long intervals. In December 1874, the Government of India appointed a Committee to consider all these matters. The constitution of the Committee was this: Bengal was represented by the Collector of Customs, Mr. Lane; Madras by the Hon'ble Mr. Dalyell, who had held the post of a Member of the Board of Revenue at that Presidency; Bombay by the Commissioner of Customs and Opium, an appointment held at that time by himself. The mercantile community were represented by the Hon'ble Mr. Bullen Smith, who was a Member of this Council, and Mr. J. C. Murray, the Chairman of the Bengal Chamber of Commerce. The Chamber of Commerce of Bombay was invited to send representatives, but was unable to do so. The Madras Chamber sent a short letter explaining their views upon the principal subjects under discussion, and the Bombay Chamber sent a detailed statement of the tariff values they desired, and also their proceedings at a public meeting, which were very voluminous, and expressed their views on all the points in dispute. The Chairman of the Committee was Mr. Money, Member of the Bengal Board of Revenue. The Committee had made their report, it had been taken into consideration by the Government of India, and the result was the Bill he now requested permission to introduce.

The Motion was put and agreed to.

The Hon'ble MR. HOPE then applied to the President to suspend the Rules for the conduct of business, with a view to the Bill being taken into consideration and passed at the present sitting. The reasons for asking His Excellency to take this somewhat unusual course were, that urgent representations were still being made as to the loss which trade was suffering by the enhanced tariff values; that there was no reason why trade should be kept waiting for any relief as to rates of duty which the Government, with the concurrence of the Council, were prepared to give; and, lastly, that if the Bill were proceeded with in the ordinary manner, there would be, under some heads, loss to the public revenue, and under others a complete paralysis of trade.

His Excellency THE PRESIDENT said that the reasons given by the Hon'ble Mr. Hope for the suspension of the Rules appeared to him to be conclusive. These Bills relating to customs tariffs were necessarily such as could not be circulated to the public previous to their introduction, because the circulation of them would have the effect of disturbing trade. Mr. Hope had also correctly remarked that there was considerable pressure to deal with this question. THE PRESIDENT therefore declared the Rules to be suspended.

The Hon'ble MR. HOPE then introduced the Bill and moved that it be taken into consideration. He added that in doing so he would explain to the Council, as concisely as the subject would allow, the nature and scope of the measure.

Taking first the body of the Bill, the Council would observe that sections 1, 4, 5, 8 and 10 corresponded almost word for word with sections 1, 2, 3, 7 and 8 of the existing Tariff Act No. XIII of 1871. Section 2 of the Bill repealed that Act, and also Act XVIII of 1870, which it was desirable to get rid of and re-enact in the present measure. Section 3 was the old section 4, shorn of the Opium clause, modified to suit the proposed change in the export tariff, and with an addition of 'salted fish,' which he would explain presently. Section 6 was the old section 6, with the addition of the substance of the repealed Act XVIII of 1870, empowering the Government of India to reduce or take off the duties on any particular goods. Section 7 placed in the body of the Bill a proviso regarding rendering unfit for human consumption spirit intended for use in arts, manufactures and chemistry, which existed in Schedule A of the present Act, and added a penalty corresponding with that in Act XVI of 1863, which was the law on this subject for country-made spirit. Section 9 expanded the old Opium clause omitted from section 3, so as to place all the action of Government regarding opium on a clear legal footing. Section 11 was new, and empowered the Governor General in Council to control the excise duties on country-made spirit, with the view of maintaining a proper proportion between them and the duties on imported spirit. Section 12 was the old section 5, with two similar verbal amendments of the Consolidated Customs Act which had been found necessary, and also an important proviso regarding arms. Its object was to enable the Government to deal with arms, ammunition, and military stores, for which a license had been refused, in ways other than sale by auction, which alone was legal at present, and of course could not be resorted to without nullifying the refusal of license.

Turning to the schedules of the Bill, it would be observed, in the first place, that the classification of articles had been entirely altered. Under the orders of the Secretary of State for India, a Committee had met in England to revise the whole of the Indian forms of trade statistics, with the view of bringing them into correspondence with the publications of the Board of Trade. Under the advice of this Committee, a new classified list of all imports and exports had been sent out for adoption, and the classification of the tariff had necessarily to be changed in conformity with it.

He would now explain all changes of importance which were proposed in the substance of these schedules for the approval of the Council—first taking changes in duties, next tariff values, and finally giving an outline of the financial result of the whole.

Commencing with duties which were said to be prejudicial to trade, and with the import side, the most important item was cotton goods and twist. In the course of 1874, the Manchester Chamber of Commerce had made two

important representations to the Secretary of State, to the effect that the duty was "absolutely prohibitory to the trade in yarn and cloth of the coarse and low priced sorts;" that it was intended to import into India, American and Egyptian raw cotton in order to make the finer qualities also; that the duties increased the cost to the poor consumer, and fostered a protected trade and new mills, thus defeating their own object and endangering the revenue; and finally, that their "total and immediate repeal" was necessary.

The Tariff Committee, to whom these representations were referred, enquired carefully into them, and found that the duty levied in all India on the coarse goods referred to was only about four lákhs of rupees, or five per cent. of the entire duty on cotton goods, which amounted to about eighty lákhs, and that only half of this sum, or one-fortieth of the whole, belonged to Bombay, where alone there was as yet any considerable local manufacture. The case therefore stood thus, that because one-twentieth of the cotton goods imported were subject to a local competition, which only seriously affected one half of that twentieth, the Government were asked for the "total and immediate repeal" of the nineteen-twentieths of the duty, paid by the remaining cotton goods on which local competition had no present effect whatever. It might of course be said that the present duty was no measure of the injury local manufacture had caused, and that, to estimate it properly, we must take into consideration the quantity of goods which the local mills were now producing, and which it was to be supposed would, but for them, have been supplied by Manchester. But as far as Bengal and Madras were concerned, there was no trace of any injury whatever. In Bombay, no doubt, the mills took to a certain extent the place of increased imports, but the competition of Bombay mills, like their profits, had been greatly exaggerated. After deducting what they made for exportation; and allowing for the extent to which they had displaced the hand-loom weaving of the country, the residuum was not sufficient materially to affect the argument as stated above. The Committee were therefore of opinion that the case for total abolition, on the grounds on which it was claimed, must inevitably fall to the ground.

There was an alternative scheme put forward by the Chamber of Commerce—not of Manchester but of Bombay—which he would now notice. It consisted in the exemption from duty of only the coarser sorts of yarn and cloth which were subject to local competition. This scheme had, at first sight, a great deal to recommend it, but it was open to two objections: 1*st*, that it was impossible to draw a well defined line between coarse and fine goods; and 2*ndly*, that any line drawn would not only lead to elaborate evasions and frauds on the part of the home manufacturer, who would endeavour to make goods which should just come within the exemption, but would stimulate the local mills to manufacture goods just above the line, and so would enlarge the range of the competition now complained of. The line would never be a steady and permanent one, for it would be necessary perpetually to keep moving it on further and further, higher and higher, until in the end, perhaps, the whole duty would be affected. There were two principles on which a line might be drawn—the principle of value and the principle of description. By the principle of value was meant saying, for instance, that all cotton goods valued at nine, or ten annas, per lb. and under should be exempt. By that of description was meant specifying that certain kinds of cloth, say longcloths, domestics, T cloths, and other coarse grey cloths under 18 × 18 reed, should be free. "Value" was objectionable in that it was not only a matter of opinion but subject to a double fluctuation—one following the market, like a tariff value, and another following the advance to higher and therefore more valuable kinds of cloth in which the local mills would be encouraged. "Description" threw on the Customs officers the onus of deciding whether the varieties of cloth which existed and the new ones, such as with 18 × 17 reed, which would spring up, were within the exemption or not. While fully appreciating the compliment paid to the honesty and intelligence of Custom-house appraisers by those who advocated "description," he did not think that the burden was one which ought in justice to be imposed upon them, or which they would be able to bear to the satisfaction of the mercantile community. As to invoices, weight and size of bales, and other

indications which it was thought would prove safeguards, Customs officials knew well that only a limited reliance could be placed upon them. The difficulty of drawing a line could hardly be better illustrated than by the fact that in January last the Bombay Chamber of Commerce addressed the Tariff Committee advocating the principle of value, but that now the Secretary of the Chamber informed him (Mr. Hope) that on reconsideration leading members were in favour of the principle of description. On the whole, therefore, there appeared to be no doubt of the soundness of the verdict, understood to emanate from some leading members of the Manchester Chamber of Commerce, and announced by the Chairman of the Bombay Chamber in his speech of the 5th January last, that this alternative scheme was unworkable.

It might be said that this decision against either total or partial repeal showed a total indifference to the interests of Manchester. It was, no doubt, the fashion in some quarters to represent the interests of the Government of India and Manchester as antagonistic. But in point of fact the reverse was the truth. Both were in the same boat, for if Manchester lost her trade, the Government would lose its revenue, and would be obliged to resort to some other form of taxation which, considering the suitability and extensive incidence of a tax on clothing and the ease with which a customs duty was collected, would be far more objectionable than the duties now complained of. The wisest policy in the interests of both seemed to be to leave matters to take their natural course, instead of aggravating by interference any evil, such as it was, which might exist. The Council had already heard how small a proportion of the cotton trade was really affected. There was scarcely a trade furnishing imports to India which had not to suffer to some extent from local manufacture. We had only to look around at some of the ordinary articles we consumed to see that they were produced in India as well as in England. The competition of which Manchester complained was now but little more than had always been encountered from the hand-looms of India. And moreover what did the duty amount to?—5 per cent.! Mr. Massey had remarked with truth that the Indian import duties were "the lightest in the world." Until two or three years ago the English import tariff itself comprised a duty on wheat called, like the Indian counterpart, a revenue duty, and yet no one thought of accusing England of being a protective, instead of a free-trade country.

In accordance with the above view it was the desire of the Government, with the concurrence of the Council, to do whatever seemed to be in accordance with sound policy to prevent what little evil might be thought to exist from assuming through their neglect undue proportions. The only measure at present required appeared to be the imposition of a duty upon raw cotton not the produce of continental Asia or Ceylon, which had therefore been provided for in the Bill. The reservation was intended to save Persian and similar cotton which was analogous to Indian and useless for the finer fabrics. The duty would, therefore, fall on American and Egyptian cotton, which the Bombay mills might be tempted to import. Another point was worthy of note, that the fact of the duty on imported twist being 1½ per cent. lower than that on cloth gave an encouragement to Indian mills to make the finer cloths from such twist. If it were thought by the English manufacturers that this modicum of protection was injurious, no doubt the Government would be ready to consider any representation they might make on the subject, and might abandon the policy of Mr. Laing, who reduced the duty on twist, and revert to that of Mr. Wilson, who declared in his financial statement of 1860 that he could "discover no good reason why cotton yarn and twist should be imported at a lower rate of duty than cotton piece-goods." If in spite of such precautions the Indian mill manufactures should assume more important dimensions than at present, then there appeared no doubt that the proper course would be, not a repeal of the import duty with its concomitant resort to more objectionable taxation, but the imposition of an excise duty. Home and imported goods would thus be put on an absolute equality, and the revenue unobjectionably derived from clothing would be preserved. At present there appeared to be little

more need for such a measure than when in 1861-62 Mr. Laing decided against it. But it would be well if investors in Indian mills would bear this hint in mind and, thus forewarned, be precluded from charging the Government with breach of faith to them in the event of the imposition of an excise duty at any future date.

Having thus noticed the question of cotton goods, he would now take up that of raw metals. The Tariff Committee found that there had been a heavy fall in all of these, and especially in copper, lead, spelter and quicksilver. They accordingly recommended a reduction of the duty on these from 7½ to 5 per cent. But for the recovery which had been found since the date of their report to have taken place in 1874-75, it was probable that even a larger reduction than they advised would have been thought desirable. As it was, the present Bill adopted their recommendation, but extended it to all the metals paying 7½ per cent.

This reduction introduced the broader question of a reduction to 5 per cent. of all the articles in the tariff now paying 7½ per cent. Previous to the Mutiny the normal rate of the tariff had been 5 per cent. except on a few special articles; but that event necessitated heavy increases, and it was not till 1864 that a return even to 7½ per cent. was attained. Ever since then there had been an implied understanding that the 5 per cent. rate would be reverted to whenever the state of the finances would permit.

The items paying 7½ per cent. were some fifty in number, and comprised several which could ill-afford the additional impost. In the case of raw silk, on which the additional rate produced nearly two lákhs of rupees, there was the anomaly that the home spinners of Gujrát and other Provinces had to contend at this disadvantage with imported silk goods paying only 5 per cent. duty. Another important point was, that all the 7½ per cent. articles were falling off. The average of the last four years was below that of the preceding four by no less than nine lákhs of rupees of duty, from which, at 7½ per cent., the falling off in the value of the imports themselves could readily be calculated.

The amount involved in a reduction of these articles to 5 per cent. was very large—no less than seventeen lákhs of rupees! The reduction from 10 per cent. to 7½ per cent. in 1864 had been recouped to the revenue in three years. But as in the present case the reduction would be of one-third instead of one-fourth, a longer period would perhaps be required. On the other hand the railway system had since then been greatly developed, and a greater proportionate recoupment might also be expected from every fresh reduction of duty.

Considering this prospect, and also that the relief would reach very numerous branches of trade, that it would in some cases be a set-off against unavoidably increased tariff valuations, as also that trade was believed to be generally depressed and the value of silver was low, he was glad to say that the Government were prepared, with the approval of the Council, to take a bold course, and reduce to 5 per cent. all items except arms, ammunition and military stores, which would be noticed presently.

The Tariff Committee were instructed, amongst other matters, to consider whether there were in the tariff any articles so unimportant that they might be exempted altogether from duty. The Committee found under this category only fishmaws, sozille and singally fish, and shark-fins, the whole duty on which was refunded on exportation. To this the present Bill proposed to add coffee, because two-thirds of the duty was refunded, and the net sum received was under £500 a year. Quinine, it was also thought, might be exempted, both on hygienic grounds and in the hope of encouraging the importation of a purer article than that which was now received.

All changes in import duties thought to be prejudicial having been explained, he would proceed to exports. The first item was cotton goods. This duty was subject to the general objection that it was laid upon a local manufacture subject to severe foreign competition, and was thus a burden of 3 per cent. on Indian manufactures in foreign markets. Where, as happened to some extent, the goods were made of imported twist, which had of course paid the 3½ per cent. import duty, the burden was 6½ per cent. instead of 3. The returns showed a falling off in the trade of late. As coal and iron were relieved

in 1862 on similar grounds, and the three Indian Chambers of Commerce, together with the Committee, recommended the measure, the abolition of this duty was provided for in the Bill.

Hides and skins, the Committee thought, might remain dutiable, as the trade was undoubtedly thriving. But considering that raw hides had been exempted some years ago, and it was an anomaly to tax the industry alone, especially in the face of competition, abolition was recommended in this instance also.

Seeds, grain (other than rice and wheat—the former to be noticed presently and the latter already free), oils, and spices were recommended for relief from duty by only a majority of the Committee, who held that although individual oils and seeds might be doing well, the trade as a whole had been nearly stationary for some years, and had to encounter severe competition from America and Russia—countries holding a great advantage as to freight and time of reimbursement of investments. These grounds were considered to warrant abolition.

With regard to exports generally, due weight ought to be given to the importance of relieving the producer, and the indirect returns in land-revenue, indirect taxation, railway receipts, and especially exchange, which would follow that policy. By the measure proposed the Indian export tariff would be reduced to three articles, all taxable, for the present at least, on special grounds. Indigo and lac were still in the main monopolies in the hands of India, and where, as might sometimes happen, the duty on rice fell on the producer, an exceptionally light land tax rendered him able to bear it, and justly liable to do so.

It was not possible, MR. HOPE proceeded to state, that relief from duty of the extensive nature now proposed, and amounting to perhaps thirty-four lákhs of rupees, could be given without increase of other duties where such a course was reasonable. Spirit was an article which had long been known as capable of bearing a higher duty. Two years ago the Bengal Board of Revenue had recommended that the duty of Rs. 3 per gallon should be raised to Rs. 4, in order to preserve a proper relation with the excise on country-made spirit. The Madras Collector of Customs on similar grounds recommended as much as Re. 5 per gallon. As the existing duty was not light and every rupee per gallon was equal to six lákhs of rupees of duty, an increase to Rs. 4, which the Committee advocated, was thought sufficient for the present Bill. No doubt there was a possibility that this increase might check consumption, but not a probability, and if a decrease did occur it was likely to be met by a corresponding increase in the excise on country spirits.

Liqueurs were at present classed with champagne, and paid Re. 1-8 per gallon. The Committee recommended their being raised to Rs. 3; but considering that they were a pure luxury, there appeared no reason why they should not pay Rs. 4, as spirit did.

Wines were at present placed in two classes, champagne and other sparkling wines, paying Re. 1-8 per gallon, and all other wines paying Re. 1. On examining into the incidence of this rate the Committee found that claret and Burgundy were at this rate paying on an average 20 per cent. *ad valorem*, and held this rate to be sufficient, especially in view of the desirability of encouraging the use of such innocuous beverages by Europeans, in preference to spirits. Champagne and the like were found to pay only from 10 to 15 per cent *ad valorem*, and the remaining wines 11 per cent. on an average; so the Committee recommended that the one should be raised to Rs. 2-8 and the other to Re. 1-8 per gallon. In both cases the increase left the duty a little under 20 per cent., which could not be deemed excessive, since the duty on wines in England was believed to be about 23 per cent. The Committee's recommendations were adopted in the Bill.

It might of course be said that these increases on both spirit and wines were an addition to class-legislation at the expense of Europeans. There were, no doubt, certain well known objections to class-legislation which, however, need not be gone into on the present occasion, as in this case nothing more was effected than a readjustment of class duties, and a very desirable

one. The long list of articles the duty on which was reduced from 7½ to 5 per cent. embraced very many which were much consumed by Europeans. Apparel, for instance, got relief to the extent of a lákh and a half; glass-ware, Rs. 80,000; provisions and oilman's stores, Rs. 80,000; carriages, watches, pianos, billiard-tables, saddlery, china, stationery, and other things too numerous to mention, came in for their share. Soap, for which Europeans were believed to have an especial predilection, got a bonus of Rs. 5,000; and even the lovers of pipes and cigars were not forgotten.

Arms, ammunition and military stores were the last item entered in the Bill for increase. The Government thought it desirable on political grounds to raise the duty on them from 7½ to 10 per cent.

Besides the increases of duty already referred to, there were a few minor articles on which new duties were proposed. The reasons for a duty on raw cotton had been already given. As to the rate of duty, it was clear that in order that a local manufacturer using imported raw material might have no advantage over the importer of a manufactured article who had to pay duty, a duty on the raw material was required at least equal in amount to that paid on such manufactured article. Theoretically, perhaps the duty on the former ought even to exceed somewhat that on the latter. But in the present case it was thought sufficient to make the two equal—that is, to impose 5 per cent.

A small duty on salted fish was found necessary in Bombay, in order to prevent Indian salters who had to use our excised salt being at a disadvantage compared with importers of foreign salted fish, which had no excise to pay. The rate had been made nearly equal to our excise duty on salt. Indigo-leaves also it was proposed to subject to a special duty, to prevent the loss to the revenue arising from the manufacture of indigo in Pondicherry from leaves exported from British India. Duties were likewise recommended by the Committee in their 19th paragraph on a variety of small articles, in order to fill up gaps and correct anomalies. Their suggestions were adopted in the Bill, except as regarded bricks, tiles, tallow, and grease.

It was a relief, MR. HOPE continued, to turn from duties which it seemed necessary to impose to the mention of others which, though formally recommended by the Committee, did not appear expedient. The Committee suggested that six items which they deemed luxuries might be raised from 7½ to 10 per cent.—a measure which was fortunately not financially necessary, and lay open to various objections. It was only fair, however, to those members of the Committee who by their votes carried this recommendation, to state that they probably would not have made it but for the belief that some equivalent must be found for the duties they desired to remove. Silk they proposed to raise from 5 to 7½ per cent. but this placed silk higher than other piece-goods. They also advised the increase of the duty on iron from one to two per cent., and the imposition of a 2½ per cent. duty on machinery, which was now free. The Government, however, were of opinion that it was as important to encourage manufacturing industry now as at the time when these articles received the favour they enjoy. The total estimated yield of duties thus suggested, but not included in the Bill, was Rs. 5,10,000.

Having thus explained the changes of all kinds in rates of duty which were comprised in the Bill, he would mention briefly tariff values. The valuations of the Committee involved a net loss of Rs. 2,60,000 on the basis of 1863-64, and they had been adopted in every instance except one. The Committee were equally divided as to the valuation of shirtings, which it was agreed among them should govern that of the classes above and below. Those members whom the casting vote of the President constituted the majority advocated a higher valuation, based on an average of the preceding thirteen months, the others a lower, in consideration of the present and future prospects of the trade. The difference between the two, though only amounting to six pies per pound, involved about Rs. 1,60,000 of duty. In view of actual quotations since the date of the report the adoption of the lower rate was now proposed. According to the estimates now prepared on the basis of 1874-75, and with allowance for all the proposed changes of duty, the net loss by valuations would

be Rs. 6,20,000. The actual relief to cotton goods alone was no less than Rs. 8,80,000, or nearly 11 per cent. of the whole duty paid.

In conclusion, he would trespass but a few moments longer on the patience of the Council, for the purpose of stating very briefly the financial result of the entire measure, leaving to the Hon'ble Member in charge of the Finances to show how that result affected the Budget and was justifiable on general financial grounds. The loss by reduction of import duties would be £173,000 per annum, and that by remission of export duties an equal amount, or £346,000 in all. To this was to be added, as already stated, £62,000 for tariff valuations, making a total of £408,000 per annum. Against this loss was to be placed a gain of £100,000 per annum, composed of £64,000 from spirit, £28,000 from wines, and £8,000 from minor articles. The net loss was therefore £308,000 per annum. It would be perceived that the consumer would get a net relief of £161,000 and the producer of £173,000. As regarded the current financial year of course only two-thirds of these figures were to be taken, as four months of the year had expired. He had every confidence that the Council, in view of these figures and the explanations which had been offered, would approve of the measure he had had the honour of laying before them, as being sound and opportune.

The Hon'ble SIR WILLIAM MUIR said: MY LORD,—"The Council will probably expect from me some explanation of the bearing which the measures now proposed for their consideration will have upon the finances of the empire.

"Hitherto no extensive revision of the tariff has been made but at the beginning of the financial year and in connection with the budget. Measures of the kind taking effect during the currency of the year are inconvenient because of their disturbing influence on the estimates; and the present is no exception to the rule. But it was found impossible to mature the details connected with this revision at an earlier period; and my hon'ble friend has explained the evils that would have resulted from further delay. It is true that Government was in possession of the Tariff Committee's report before the budget was closed; but so many weighty questions required careful deliberation, that anything like immediate or precipitate action would have been most inexpedient; and in view of the broad and liberal treatment the subject has received on both sides of the tariff, the delay will not, I trust, be regretted by the mercantile community.

"Formerly all questions connected with Customs were dealt with in the Financial Department alone; but since the establishment of the Department of Agriculture and Commerce, the responsibility has naturally been shared with it. The proposals now before the Council, framed under the personal guidance of Your Excellency, have been carefully elaborated in both Departments and, I may add, have the cordial concurrence of both.

"As regards the charge of the Bill, it was felt that no one was more competent to the duty than my hon'ble friend who has introduced the measure, both from his intimate acquaintance with the subject and also because, having been himself a member of the Tariff Committee, he was thoroughly cognizant of their proceedings and the reasons which dictated their proposals. And I am sure that the Council will feel that the manner in which he has discharged the trust has fully justified the confidence reposed in him. I think that the thanks of the Government are in an especial manner due to Mr. Hope both for his labours in elaborating all the details involved in this important measure and also for the exhaustive and able speech in which he has placed them before the Council; and the thanks of Government are similarly due to the Committee for the thorough and earnest manner in which they conducted their investigations, and for their complete and most satisfactory report of the results of their deliberations.

"The duty now devolves upon me of showing in what way the changes proposed will affect the estimates of the year, and how our future finances will bear the strain of the loss arising therefrom.

"And first as to the re-adjustment of VALUATIONS. The Committee estimated the loss of duty by reduction of values at £76,700 and the gain by increased values at £50,700, leaving a net loss of £26,000. But there was a difference of

opinion as to the price of cotton goods; and the Government, giving the doubt in favour of the trade, adopted the lower valuation of the Minority, thus increasing the net loss to £42,000. A provision to this amount was accordingly made in the estimates for the year.

"But the loss has been increased by further alterations in the tariff. Making the calculation on the receipts of 1874-75, the reduction on cotton goods alone amounts to £88,000; whilst against this we have a gain by increased values of only £26,000, leaving a net loss of £62,000. Of this only two-thirds, or £41,333, will be incurred during the remaining eight months of the year: and this is covered by the provision in the budget of £42,000. In calculating the loss in future years, as compared with the estimates of the present year, a deduction to the extent of this provision should be allowed, which will leave a sum of £20,000 to be debited hereafter as the annual loss for decreased valuation.

"I proceed to notice the loss on IMPORT duties. In their treatment of the import tariff, the Committee confined their proposals to a reduction in the duty on metals, estimated at £17,000. They no doubt refrained from recommending any larger measures, not considering themselves at liberty to do so. But Your Excellency has happily determined on the broader and bolder course of cutting down the duty all round from its present rate of 7½ to 5 per cent.

"My hon'ble friend was himself in favour of this reduction, though he did not venture to look for it till some future occasion; in his separate paper he writes:—

"'There is no reason why cotton goods generally should pay a lower rate than other articles. I hope that the next general change will be a reduction of the 7½ rate to 5 per cent.; and I believe that fiscally the result would be very satisfactory.'

"The Tariff Committee of 1869 also advocated the same measure.

"'If the finances of the country,' they said, 'could bear the reduction at the 7½ per cent. duty to 5 per cent., we would urge the expediency of the change by which a considerable measure of relief would be afforded to the commerce of the country.'

"Looking back to the various changes which have taken place in the import tariff, I find that prior to the mutiny, the general rate on British goods was 3½ per cent. on raw products, and 5 per cent. on manufactured or prepared articles; with special rates at 7 and 10 per cent. on certain classes of goods. In 1859, owing to the deficit caused by the mutiny, the general rate was raised to 10 per cent., and on a variety of luxuries (as tea, coffee, millinery, grocery, &c.) as high as 20 per cent.; but this latter rate so crippled the trade that in the following year it was reduced by Mr. Wilson to 10 per cent.; and this continued to be the ruling duty for the next five years. Meanwhile in 1861 cotton yarn was lowered by Mr. Laing to 5 per cent., and in the following year still further to 3½ per cent., and piece-goods from 10 to 5. In 1863 iron was brought down from 10 to 1 per cent. The next large measure was in 1864, when the general rate was lowered from 10 to 7½ per cent.

"The measure then which Your Excellency has now resolved on, namely, a reduction of the general rate of import duty from 7½ to 5 per cent., brings us back to the normal import duty that prevailed before the finances were disorganized by the events of 1857-58, but without the special rates. From this large measure of relief we may anticipate the happiest effects, in the encouragement of commerce, and in causing a material accession to the import trade. The expectation is based on experience; for the rebound, when the duty was similarly lowered in 1864, is truly surprising. The average customs revenue from the articles affected for the three years preceding that reduction was £400,000; in the three years following, it fell to £333,000; but in the second triennial period (1867 to 1869) it rose to £404,000, that is to say, the loss was more than recouped within three or four years. There is a distinction, however, between the former and the present measure; that was a reduction from 10 to 7½ per cent., or one-fourth; this, from 7½ to 5, or one-third; £400,000 duty at 10 per cent. represents a trade of four millions; at 7½ per cent. of five and one-third millions. Thus the former reduction was covered by an increase in trade of £1,400,000 in three years; or at the rate of above £450,000 a year. To recoup the loss in the present case, the addition to trade must be £3,440,000, which, at the former rate, would take at the least seven years. But then the present reduction is larger in the proportion of 4 to 3; and we may naturally expect that the stimulus to trade will be proportionately stronger, and more rapid in its action. Add to this that the railway system has since been greatly extended and the facilities for the distribution of merchandise multiplied. The import trade will also receive a reflex impetus from the relief proposed for the export trade.

"It is true that other causes may also have been at work to create the rapid development of trade from 1864 to 1867; but credit may justly be taken for the reduction as the chief agent; and the precedent strengthens the position of Government in its present resolution.

"Hardly any articles have been removed from the Import Schedule, excepting coffee which is a home product, and quinine, which was recommended by the Committee in 1869, and the cheap and plentiful supply of which cannot but be regarded as a blessing to the country at large. On the other hand, some minor articles, before accidentally omitted, have been added; for, constituted as the Indian import tariff is with a general reach and incidence, exemption can only be justified on special grounds, as e. g., with machinery, the attraction of which is of the highest consequence to develope the resources of the country, or where the duty is so small that its collection is not worth the expense and trouble. For any other cause, exemption would, under the present conditions of the tariff, be tantamount to a class-privilege.

"Bating the set-off from these additions, the loss to our Customs revenue by the reduction of import duty from 7½ to 5 per cent., as estimated on the receipts of 1874-75, will amount to £173,000.

"I now come to the EXPORTS: and here the recommendations of the Committee have (with one exception) been adopted whole and entire. Every staple has been swept away from the list of dutiable exports, but three. The reform now achieved has long been demanded. For 30 or 40 years, it has been admitted on all hands that to levy a duty on the export of our own productions is the most vicious form of taxation, excepting only where we have either a monopoly of the staple, or such special advantages of soil and climate in its production as will enable us to command the market, and so to throw the increase of price upon the foreign consumer. As long ago as 1846, the Hon'ble Court of Directors stigmatized the levy of duties on the export of our staples, because 'they could not fail to restrict the demand for these articles, and to render them less able to compete with the similar products of other countries,' and concluded that 'all these duties were objectionable in principle and ought to be abolished with the single exception of indigo.'

"SIR W. MUIR then quoted a number of distinguished authorities, from that time to the present, including Sir H. Maddock, the Calcutta Chamber of Commerce, Mr. Bullen, Mr. Crawford, Mr. Bullen Smith and Colonel R. Strachey, who had in the strongest terms denounced export duties, and urged their abolition. In 1860, the Right Hon'ble Mr. Wilson, thus addressed the Council:—

"'As a general rule, when the products of our soil have to find a foreign market, and in cases in which they enter into competition with those of other countries, the direct effect of export duties must be to place our products in those countries at a disadvantage with their foreign competitors. ... With regard to export duties on articles which have to compete with the products of similar articles from other countries in neutral markets, the first effect no doubt is that the export duty acts to that extent as a reduction of the price paid to the producer, and is a special tax and discouragement to him as a producer; but a further and serious danger is that your duty may exclude the articles from the foreign market altogether, act as a prohibition, and thus put an end to, or greatly limit, the production and the demand for labour. It is this obvious distinction that has made us so desirous to relieve our exports as the best means of improving our internal resources.'

"Notwithstanding these vigorous and unassailable protests extending over the last thirty years, the tariff has till very recently been clogged with a vast number of export duties. Slowly, and one by one, they have gone. In 1860, tea, coffee, wool, flax, jute, and raw hides, were freed; in 1865, silk, saltpetre,

borax, wax and shawls; in 1873 wheat, and in 1874 lac-dye. But up to 1867, no less than 97 articles were subject to export dues, besides every article not enumerated in the tariff. A great reform was made, at the recommendation of the Committee in 1867, when only 9 articles were retained. And so the tariff has remained to the present time, when it is now left for Your Excellency to give the *coup de grâce*, or nearly so, to this bad system.

"Six staples of the country,* all labouring under the disadvantage of foreign competition, it is now proposed to free. The remission has been recommended in every case by the Committee excepting that of hides. But raw hides having been exempted in 1860, the maintenance of the duty would evidently have been a burden on the export of tanned and prepared skins, and thus a check upon a profitable industry. Indeed one chief merit of the present measures is that unfettered export will promote domestic manufacture not only in this case but in that of Cotton goods, Oils, and other commodities, (as has already been done with Jute), and so encourage the shipment of our staples in a more valuable shape, and one that will ensure a higher return. And we may assuredly hope that India has now a new rôle before her by the growth of a flourishing export trade in her own manufactures.

"In comparing with by-gone tariffs the Schedule now submitted to the Council with its three remaining articles, it is hardly possible to believe that but eight years ago, the export tariff contained close upon one hundred articles, besides every other commodity that was not therein expressly freed by name.

"From this measure, we may surely anticipate that a great impetus will be given to production throughout the country and to the export trade. The saying of the Wise man is true in this aspect as in so many others; 'there is that scattereth and yet increaseth, and there is that withholdeth more than is meet and it tendeth to poverty.' Instances are not wanting of the export of a staple having been checked with the view of retaining it in the country; and the result has been the drying up of its production, scarcity and dearness, and the eventual impoverishment of that country. On the contrary, the increased demand caused by free export, will, we confidently trust, stimulate production everywhere, cause fresh capital to be invested, and new labour applied; and thus, like fresh springs each one contributing its portion to the flood, the quickened manufactures and production will from every quarter help to swell the great stream of merchandise.

"This is not to be set down as mere theory or fond expectation. It can be illustrated from many undoubted examples of the marvellous growth of trade when freed from the burdens of the custom-house. I will adduce a few instances by way of illustration.

"JUTE (raw) was made free in 1860. In the five years preceding, the quantity exported averaged 684,800 cwts., value £344,500. In the five years ending 1874-75, the trade had increased to an average 5,790,000 cwts., value £3,504,000.*

	Cwt.	£
*Five years' average 1855-59 ...	684,800	344,500
„ „ „ 1860-64 ...	1,641,259	902,463
„ „ „ 1865-69 ...	2,580,000	1,326,000
„ „ „ 1870-74 ...	5,790,000	3,504,000

"HIDES (raw) were exempted in 1860. In the five years from 1863-68, the value of raw hides exported averaged £894,758: in the next five years £2,355,677: and in 1874-5 £2,677,767.

"The statistics of TEA have a special significance for the confidence they afford of the steady growth and bright future of this important staple. It was made free in 1860; in the five years from 1863 to 1868, the average annual value of export was £519,164. In 1874 it had reached £1,937,429.†

†Five Years.	Average. lbs.	£
1863-68	6,340,418	519,164
1869-73	16,285,653	1,409,589
1874-75	21,137,087	1,937,429

"The growth of the WHEAT trade (freed in 1873) is remarkable. From 1862 to 1865 the annual export was only 63,557 cwts.: during the last two years it has averaged 1,412,500 cwts.‡

	Average. Cwt.	£
‡1862-65	63,557	...
1867-69	217,700	77,664
1870-72	426,540	188,313
1873-74 ... ... }	1,412,500	659,000
1874-75 ... ... }		

"The rapidly improving aspect of our general Export trade will be clearly learned from the following particulars, in which quaternial periods are compared for the last twenty years. The figures are exclusive of the value of raw cotton, the greatly enhanced price of which from 1862 to 1865, consequent on the American war, would have vitiated the comparison.

	£
Average for 4 years 1859 to 1862	... 25,800,000
„ „ 1863 „ 1866	... 28,880,000
„ „ 1867 „ 1870	... 33,239,247
„ „ 1871 „ 1874	... 41,480,543

In 1834-35 the total of our exports to all parts, as Mr. Wilson shows in his speech of 1860, was under Eight millions. It is now more than five times that amount. Mr. Wilson goes on to say:—

"'Again, Sir, in 1834-35, the value of our imports into India was only £4,261,106: in 1858-59 it was no less than £21,366,447; and in the present year will exceed £24,000,000" [*in 1874-75 it was close on 36 millions*]. "And this is independent of treasure, to the average amount of no less than £11,223,107 yearly ... ... Taking the exports and imports of merchandise and treasure, and there is really no distinction between the two, we find that the trade of India has grown up from a total sum of £13,847,289 in 1833-34 to one of £60,219,660 in 1858-59. Can we desire a stronger proof of the steady prosperity of the country?'

"A bright and promising view; but no one can accuse it of having been over-sanguine, when we find the average of the total trade for the five years ending 1873-74 was nearly Ninety-five millions, and that in 1874-75 it exceeded One hundred and one millions. With these facts before us, we may not doubt the marvellous buoyancy of Indian merchandise, nor question the capacity of the trade for future expansion in the same ratio;—or rather, having regard to the concessions now proposed, and the increasing facilities created by the railway, in a ratio still more rapid and surprising.

"The loss from the remission of export duty is close upon £173,000, which (by happy coincidence) is the exact relief given also to the import dues. The loss by exchange is a loss to importers, but it is a gain to exporters. The importers, therefore, may say that they were in need of greater relief. This is of course not stated as an objection, but simply as a suggestion, in case it might seem to render expedient a modification of the expression 'just.' But this must not be regarded as altogether a dead loss. For *first*, the remission of duty will stimulate the export trade; and that again, by swelling the amount required in repayment, will re-act upon our imports, and increase our customs revenue. *Second*, an increase of exports (until, at any rate, they shall have been balanced by an equal increase of imports) will improve the exchange by creating a greater demand at home for the means of remittance to India; and any improvement in exchange will lighten our burden on account of the heavy payments made in England. *Third*, the expanded trade will add to the railway traffic, and so to its receipts in which Government is directly interested. And *fourth*, whatever increases the demand for the products of the soil or enhances their value, must add to the wealth of the people; and moreover the Land-revenue is benefited not only by greater ease and regularity of realisation, but also (where the settlements are temporary) by an eventually higher assessment. These are all clear advantages to our finance, which, though indirect, are not to be the less thought of on that account.

"Three articles are still retained on the export schedule. Of lac and indigo* we have practically almost a monopoly, and so the duty, serving to raise the price, falls on the foreign consumer. It is true that indigo is exposed

	Duty.
* Lac ...	£ 24,300
Indigo ...	„ 47,300

to some inconsiderable competition from America and also to danger from mineral dyes; and Mr. Wilson seemed to contemplate its eventual remission. But the Committee say that the duty (not more than one per cent. *ad valorem*) is not felt, and they do not recommend its removal. It is a trade, however, which engages much capital and employs much labour, and is deserving of every encouragement: and I trust that it may be possible at some future time favourably to consider its claim to be free. The third staple is rice. The propriety of retaining the export duty on it was much discussed some time ago. It was then doubtful whether the duty had not a prejudicial effect upon the trade. But of recent years there seems ample evidence that neither production nor export is checked by it; on the contrary, both expand and flourish in a manner quite astonishing. The greater part of the export is from Burma, and the position of Burma is peculiar: the land assessments are extremely low; and this duty, which is a moderate tax on the profits of the peasant proprietors, is the most easy and convenient form of supplementing the land-revenue. It is clear that, for the present at any rate, it does not press; and such being the case, we could not afford to give up the large customs revenue of £600,000 derived from it for any mere theoretical objection. We are fortunate in having here present, in my hon'ble friend Mr. Eden, the highest authority on the subject; and I hope that he will give us the benefit of his views upon it.

"I should have said that there was a fourth commodity subject to the trammels of the custom-house, and that is opium; for the income derived from it, under whatever form taken, is in reality an export duty. But it falls on the foreign consumer; and I think there are few, at the present day, who would wish to see the duty on it lowered or the traffic stimulated. Rather should it be our object, if possible, even to enhance the duty.

"We come now to consider the total loss for which we must be prepared. Upon imports and exports, there will be a loss on each of £178,000, for duties reduced; and (as will be remembered) there is on account of lowered valuations a balance to be debited against future estimates of £20,000, making in all a total of £366,000. Against this must be put the gain expected from increased duty on spirits and wines, and the additional articles taxed, amounting (as Mr. Hope has shown) to £100,000; so that the net loss will be £266,000. The calculation is made on the returns of 1874-75, a favourable year. On the average of the three preceding years, it would be some £25,000 less.

"Such, then, is the loss for which we must be prepared. This is without taking account of any recoupment, direct or indirect, from increased trade. It is also irrespective of enlarged receipts from spirit manufactured in the country, the excise on which will be raised, as far as possible, to the enhanced standard of the new import duty; but against this there may possibly be some diminution of consumption. All such sources of increase are, however, contingent on the future; and to be absolutely safe (so far as safety is possible in finance) we must look how our ways and means will stand without them.

"In the current year, then, there will be no difficulty. Four months of the year have already passed; for the remaining eight the loss will be £177,334. The surplus provided in the estimates is £506,000; so that the margin is ample. And we have every reason to expect that the out-turn of the year will be materially better than the estimates. One heavy loss, indeed, there will be—for exchange; but however high we may take this, it will be far more than covered by the rising receipts in other branches. It is early, and perhaps imprudent, to calculate as yet the issue of the year. But there are certain branches in which we shall almost certainly be above our estimate. Opium is already £167,000 in excess, and by the close of the year may probably be £300,000 to 400,000. In customs we are even now £118,000 above estimate, and an equal sum in salt.

"So far as can be foreseen, no extraordinary charges are likely to devolve upon us. The only item of the kind is the grant of £80,000 for the visit of His Royal Highness the PRINCE OF WALES. And should the expenditure exceed that sum, assuredly we shall not grudge it on the auspicious occasion that augurs so well for the future of India, and promises to deepen the personal

interest of the Throne, and one might add of the whole Realm, in the prosperity of this great dependency.

"Everything, indeed, looks prosperous at the present moment: and although it would be rash to calculate on the continuance of equal fortune to the close of the year, yet we may with some confidence assume that, even with the drain of the present measures upon it, the surplus of the year will prove to be considerably larger than what was estimated in the Budget.

"And now as regards future years, the same considerations may induce a feeling of security that the loss, even if in no degree recouped, would not endanger the equilibrium of our finances. True, if anticipated, that loss would have reduced the estimated surplus of the year to £240,000. But, then, we must bear in mind that the estimate for Opium, though taken at a higher figure than before, was still avowedly low. It was, in fact, £380,000 below the lowest income of the last seven years, and £800,000 below the average of that period. It is not unreasonable then to expect that we shall, on the average, have in the future at least £400,000, or half a million, above the estimate of 1874-75. Then the other main sources of revenue,—Land, Excise, Salt, Customs,—are all in a sound state, and show a tendency to rise, and that in a far more marked and rapid way than any increase in the charges of administration. It is true that the prospects from exchange and the depressed value of silver are not encouraging; but any loss on that account must be small in comparison with the sources of enhancement. And over and above all these considerations, we have the good hope of an eventual full recoupment of our loss by the steady growth of trade, increased Railway receipts, and other benefits to be looked for from the present measure.

"In forming any forecast of our position, it would be wrong not to take into account the contingencies of the future in reference to three enemies of Finance,—*famine*, *flood* and *foe*. In so great an empire, we cannot but expect from time to time the visitation of drought and famine in some parts of the dominion. But the experience of the past is not discouraging. The special conditions of the recent famine in Bengal involved, from the inaccessibility of the tract, the necessity of an unusually large expenditure. And yet the cost, nearly Six millions, was (as shown in the financial statement for the year) nearly covered by the surplus of the preceding three years alone. And it should be remembered that this conclusion is not affected by the money we have been borrowing during that period. All this and more has been devoted to the construction of reproductive works which, besides adding to the revenue and the prosperity of the country, will eventually repay the interest due upon them. The debt, therefore, will in reality prove no burden. The general revenues will not be one whit the worse on their account.

"As respects floods, we are no doubt frequently exposed to them; but I do not recollect any instance in which they have seriously affected our receipts. During the past year there were serious losses from this cause both in the Madras and Bombay Presidencies; but they hardly told perceptibly on the revenues of the year.

"As for war, it is of course entirely beyond the scope of any computation, and we can only trust that there may be 'peace in our time.' But bating this last contingency, we have, I believe, every ground of confidence that our receipts will continue to be in excess of our normal expenditure; and that even after the drain upon them caused by the proposed measures, we shall have a sufficient and an improving margin.

"There is one other conclusion to be drawn from this brief review of our finances. It will have been clear that, even if it had been on other grounds expedient, our position would not have admitted abandonment of the duty on cotton imports. The loss of £800,000 could not have been undergone unless we could have substituted for it some new source of taxation; that is to say, we should have to give up a productive source of income, the pressure of which, though of wide incidence, is not appreciably felt by the people, and in its stead impose some new measure that could not fail to harass and irritate the people. I hardly think that any one could seriously contemplate the

alternative. Indeed the arguments of the Committee, as clearly enforced by my honourable friend, are conclusive against the necessity for any change. The competition from domestic manufacture affects at the most only Four out of Eighty lákhs of rupees of duty, that is only one-twentieth part of the trade. If the coarser commodity so affected could have been treated separately, it might have been exempted altogether; but, as Mr. Hope has shewn, there are insuperable difficulties in the way. No doubt, the argument is theoretically correct that where a commodity is produced at home, we should either free the import of that commodity, or excise its production to an extent equivalent to the import duty, or altogether prohibit its production. But if Hon'ble Members will cast their eye down the import schedule, they will find hardly any article which, in consequence of the vast area and varying conditions of our soil and climate, cannot be more or less produced in some part of our dominions. The argument, however perfect in theory, would prove too much in practice; for I presume no one will contend that, in deference to mere theory, we should surrender our whole revenue on imports, of £1,700,000. And, in point of fact, the duty is so low that it cannot perceptibly affect the trade. This was evidently the opinion of Mr. Laing. In his financial statement of 1861, when vigorously denouncing all protective duties, and asserting that they 'certainly could not be maintained for a couple of years,' he at the same time admitted an exception where the import duty was 'so small that it would be palpably not worth while to establish a countervailing system of excise.' The duty on cotton piece-goods was then 10 per cent., and that on yarn (reduced by him to) 5 per cent.; it is now but 5 and 3½ per cent., respectively. His views are still more explicitly stated in the following passages delivered on the same occasion:—

"'Free trade does not mean that there shall be no taxes; but that taxes shall be levied solely with the view to revenue, and not partly for revenue and partly for protection.

"'That every Customs duty on an imported article should have a corresponding excise duty on similar articles produced at home, has therefore become an axiom; and it admits of only one exception, where the amount of import duty is so moderate, that it does not seriously affect trade, while it makes it obviously inexpedient to establish an excise machinery for the sake of levying a trifling duty.

"'This is the case with regard to corn in England, where a duty of 1s. a quarter equal to 5 per cent. on the cheaper sorts of foreign grain is retained, and it is precisely our case with regard to piece-goods.

"'We cannot dispense with Customs duties on our imports generally; and while this is the case, no reasonable man can object to our retaining an old accustomed duty of 5 per cent. on manufactured goods.'

"The argument is sound, and on the present occasion most pertinent. The trade flourishes under the duty, and the imports indeed were higher last year than ever, even although burdened with an excessive valuation. The trade will now receive material relief in that respect to the extent of £88,000, or 11 per cent. of the entire duty hitherto paid, and it must not be forgotten that the Government has specially favoured this branch of merchandise by adopting the lower valuation of the Minority of the Committee. Moreover, in common with all other imports, the cotton trade must benefit in the increased demand, which we trust will follow the freeing of the export traffic, in repayment of growing shipments to Europe.

"I must apologize to the Council for having detained them so long; but the measure which I trust they will shortly pass into the law of the land, will, I am sure, form an important era in the history of the Indian tariff; and although the effect upon the finances is by no means serious, yet the interests involved are so weighty, that the subject demanded a review in all its bearings so far as it lay in my power to furnish it. And I trust Your Excellency will allow me to congratulate you on having carried this important reform so near to its conclusion; swept away the last financial trace of the mutiny; and placed the tariff for the first time on anything approaching to a sound and consistent basis. I hope that even within the period of your own Viceroyalty, Your Excellency will witness the success of this reform financially in the increase of trade, and still more, under the blessing of God, in developing the wealth and advancing the welfare and prosperity of India."

The Hon'ble MR. EDEN said:—"There can, I think, be no doubt as to the soundness of the policy by which the Government has been guided in making the alterations of customs duty just announced by the Hon'ble Mr. Hope. Coming at a time when trade generally is slack and depressed, they give relief to nearly every branch of trade, either by a direct reduction of duty from 7½ to 5 per cent., or by a modification of the fixed valuation on which duty is assessable, or, in the case of exports, by their removal to the free list. In making these changes, I think that Government has gone quite as far as it safely can go for the present. Possibly the Manchester trade may not be satisfied and may consider that sufficient concession has not been made to their representations regarding the injurious effect of the present duties on the cotton trade. But, as explained by the Hon'ble Mr. Hope and by the Tariff Committee, their expectations were not altogether reasonable and were not warranted by the actual condition of the trade. Still they have received very material aid by the reduction of the fixed valuation on cotton goods, which is equivalent to a surrender of £80,000 of the duties now levied on such goods, being 10 per cent. on the total collections on that head.

"It is not, however, necessary for me to follow the Hon'ble Mr. Hope and Sir W. Muir through the different changes which have been made; but with reference to what has been said by Sir W. Muir regarding the maintenance of the export duty on rice, I wish to make a few observations, as it is a subject in which I am particularly interested, and regarding which I have had special means of observation. As Sir W. Muir has observed, this export duty on rice has for some years past been very strongly attacked by those who think that all export duties are unsound in principle and indefensible. Fully admitting the principle as a general one, I have always maintained that there are special circumstances under which export duties are perfectly justifiable and are an excellent form of taxation. This may be either where we have a complete monopoly of the trade in the article in foreign markets, or where, as in the case of the rice trade, there are special circumstances connected with its production which render the duty innocuous while it at the same time yields a very large revenue. The duty on rice comes under this last condition, and I think I shall be able to shew by incontestable figures that the foreign rice trade is in a singularly prosperous condition, and that it is developing and progressing in a degree which is almost without precedent in any branch of the export trade.

"In taking figures, it will be best to confine my remarks to what are called the rice ports, that is to say, the ports of Burma, which have really almost a monopoly of the trade with Europe in the cheap and common kinds of rice. Bengal is affected by a number of considerations which do not affect the Burma trade, and exports a great deal of superior rice on which the duty falls very lightly. Not many years ago the advocates of the abolition of the export duty on rice brought great pressure to bear on Government, and by declaring that the Burma trade was declining in favour of the trade of Siam and Cochin China, very nearly succeeded in making Government sacrifice the important revenue which these duties afford. How far they were from being justified in their apprehensions will be apparent from the following figures. The duty on rice was raised in 1867; the amount exported in the two years before this rise of duty was—in 1865, 380,000 tons, in 1866, 340,000 tons. While in 1872 the export under the duty had risen to 660,000 tons, in 1874 it was 760,000 tons, up to the latter part of July of the current year it has reached 600,000, while there are between 200,000 and 300,000 tons remaining to be shipped. The total surplus crop for this year is not much less than 900,000 tons, or nearly treble the export which took place before the duty was raised, and if this is all shipped, as I believe the bulk of it will be to foreign ports, it represents a revenue of £450,000, or nearly half a million, and it is this that the Government of India is asked to surrender for the sake of supporting a theory.

"In 1872, the Government of India invited from the Local Governments an expression of opinion on this subject. In replying to this call, the Government of Madras, while objecting to the duty as a matter of principle, admitted that 'the general opinion seems to be that the duty exercises no appreciable influence on

the trade,'—a view which is completely borne out by the return of rice exports from Madras. In the Lieutenant-Governor of Bengal's reply it was said that 'the export of rice keeps up pretty steadily, though it of course varies with the harvests and the price of grain in Bengal and Europe. The rice export flourishes and improves, notwithstanding the small duty it has to bear. Almost every one of the reporting officers says that no ryot, landholder, or dealer in the interior of the country, even knows of the existence of the duty. So far, then, as Bengal is concerned, the Lieutenant-Governor does not consider that the rice duty should be the first tax for reduction or abolition.' The Chief Commissioner of Burma strongly upheld the continuance of the duties on the ground of the enormous development of the trade and the peculiar circumstances of Burma. He said—

"'It is quite clear from this that the anticipations of those opposed to the imposition of these rice duties have in no way been fulfilled. It has been said that we could never compete, weighted as we are, with Saigon and Bangkok, the rice of which ports is subjected to no duties. The results, on the contrary, show that they are quite unable to compete with us, and that they have been beaten altogether out of the European markets. Indeed, the rice of those countries would never have entered the European market, had it not been that there was in 1868 a very large harvest in China, and the home supply of that country was such as to make the foreign rice a drug in the market. Under these circumstances, Saigon and Bangkok had no other course but to ship to Europe; this they did and were supposed to have become dangerous competitors, though, after all, the quantity they shipped to Europe was very insignificant, Bangkok sending in 1869, 53,000 tons, Saigon, 31,260 tons, a very small export compared with the 550,000 tons which Burma is sending this season. The experimental export from Saigon and Bangkok, however, was a failure; their rice did not suit the European market and fetched £1 to £2 per ton less than the Burma rice; and, as a natural consequence, as soon as the rice market in China resumed its normal condition, the exports from Saigon and Bangkok ceased, and the whole trade again fell into the hands of Burma. It must be prominently kept in view that the natural ports of supply for China are Saigon and Bangkok, the natural ports of export to Europe are the Burma ports. It may be taken as an undeniable fact that so long as the rice supply of Siam and Cochin China are not capable of meeting the wants of China, we shall be called upon to make good the deficiency; whenever they are capable of meeting this demand, no rice will go from this to the East. On the other hand, so long as those ports can obtain a market in the East, they will not endeavour to compete with Burma in the European market.'

"This view of the little danger to be apprehended from the competition of the Eastern ports with Burma, has been fully confirmed by the returns of subsequent years. Even in 1874, when Burma was called upon to supply rice in large quantities to meet the Bengal famine and when prices were high, Saigon only sent to Europe 14,000 tons, while Bangkok sent 3,000 tons. During the first half of the current year, while Burma has exported 600,000 tons, Saigon has sent none to Europe, and Bangkok under 3,000 tons. In the same letter the Chief Commissioner showed that, owing to the keen competition in the rice trade the merchants gave to the producers the full amount which European quotations enabled them to give, and that if the duty was taken off, it would not in any way affect the price to the consumer, but would be added to the price given to the producer. Competition with foreign markets therefore was not affected by the duty, which fell wholly on the producer. The opinions of some of the leading rice merchants were quoted. One merchant said: 'At the present moment if the rice duty were remitted, I do not think it would affect the gross cost of rice intended for the European market.' Another said that the duty had not affected the trade: 'In fact, in spite of the heavy export duties the trade has steadily gone on developing and increasing, and the cultivation of paddy seems to be extremely profitable to the cultivators, who are yearly increasing their cultivation. The export duty falls exclusively on the cultivators.' A third merchant said that he believed that the duty falls entirely on the producer, in fact, the duty may be regarded as an indirect tax on the grower. And he goes on to say that 'were the duty repealed to-morrow, the price of paddy would immediately advance proportionately, thus benefiting the producer entirely and not even in the slightest the shipper.' Thus clearly those interested in the trade do not agree with those who maintain that because export duties are wrong as a general principle, therefore their continuance must strangle the trade.

"It has been shown that the duty falls on the producers, the real test as to whether this is mischievous is the extent to which it has hindered production.

Now the amount of land under rice cultivation in British Burma in 1870-71 was 1,709,490 acres, while in 1873-74 it had run up to 2,061,568 acres, an extraordinary increase when we recollect that the agricultural population of the country is only 1¼ million, and that therefore under ordinary circumstances and with normal profits the cultivation of new land would be a matter of time. In the one year for which we have the latest returns, 1873-74, the increase of cultivation was 206,578 acres. In the face of these facts it is quite impossible to maintain that production has been impeded by the duty. The ground upon which the maintenance of the rice duty has always been advocated by the authorities in Burma is, that it does fall exclusively on the producer, and that it is therefore an admirable way of supplementing the land-revenue. It is most important to keep the land-revenue as light as possible. Burma is peculiarly situated; it has a vast territory but a scanty population; it is however surrounded by Foreign States from which we desire to draw the surplus population, and we have hitherto been most successful, but this can only be done by placing on the land a very light assessment, and supplementing it by a rice duty which the people pay without knowing anything about it. To make our revenue system compare favourably with the system of taxation in the Native States from which we draw our immigrants, we must keep our taxation out of sight as much as possible.

"I trust that I have succeeded in showing that the rice duty has not injuriously affected the trade or the producer, that if it were surrendered it would inflict a serious injury on the revenues of the country with absolutely no corresponding advantage to compensate for the sacrifice, and that the result would be sooner or later that we should have to substitute some offensive and objectionable tax for one to which no one has raised the slightest practical objection and which is collected in the manner most in accordance with the feelings of the people."

His Excellency THE PRESIDENT said:—"Mr. Hope has so clearly put before us the reasons which induced the Government to appoint a Committee to revise the Indian Customs Tariff, the recommendations of the Committee, the extension that the Government has been able to give to those recommendations, and the financial effect of the Bill which he has introduced, that I have little more to say upon the Bill itself than to express my cordial concurrence in the thanks which Sir William Muir has tendered on the part of the Government to the Committee, and especially to Mr. Hope himself both for his services as a Member of the Committee, and for having accepted the task, which he has so ably performed to-day, of explaining the subject to the Council.

"Without dwelling upon details that have already been fully discussed, I desire to say a few words upon the general considerations which govern the Customs duties of India.

"The Government of India possesses the advantage of being closely associated with the Government of England—a Government which has taken the lead in adopting and developing the principles of free trade; and we must expect to see our financial policy judged by a comparison with that of England—judged, that is to say, by the highest standard in the world.

"Indian statesmen have always acknowledged the principles of recent English financial legislation to be sound, although owing to differences between the two countries it has been impossible to carry them out as completely in India as in England. Indian statesmen have never regarded Customs duties as desirable for the purpose of protecting the products or manufactures of India. Mr. Wilson, Mr. Laing, Sir Charles Trevelyan, Mr. Massey, and Sir Richard Temple have all been thorough free traders. In India, equally as in England, protection has been regarded as an exploded doctrine, contrary to the general interests of the country which imposes protective duties. In India, equally as in England, the doctrine has long since been abandoned that the mother country should favour colonies or foreign possessions by Customs tariffs or navigation laws; as well as the corresponding doctrine that colonies and foreign possessions should adopt Customs tariffs or other financial measures which favour the mother country against the interests of the colony.

"At the time of the American War, Sir Charles Wood, who was then Secretary of State for India, was pressed to take certain measures for increasing the export of raw cotton from India to England. 'Whatever,' he said, 'is for the 'real interests of India, I will do, and do willingly, but no more.' His position was never challenged; and in all financial questions the true interest of the people of India is the only consideration which the Government of India has to regard.

"The general principles, then, which should guide us are agreed upon both here and at home; and, if we examine our Customs tariff by the light of those principles, we must frankly confess that there is much to amend.

"A considerable revenue has hitherto been raised by export duties upon articles of Indian produce which are subject to the competition of articles produced in other countries, and there exists also what I can only call the monstrosity of a duty upon the export of Indian cotton manufactures. Such duties are of course altogether inconsistent with free trade. Sir William Muir has told us that they have only been retained in consequence of the necessity of the case; that many have been abolished from time to time; and that an intention has frequently been expressed to abolish the remainder as soon as the condition of the finances would admit of it. The measure which I hope will to-day be passed into law is a very substantial advance in this direction. Grain, seeds, oils, spices, hides, and cotton manufactures will be freed from export duty, and only three articles of export—rice, indigo, and shell-lac—will hereafter be taxable.

"Although our duties upon imports are not so open to objection as those upon exports, much still remains to be done before our import tariff can be regarded with satisfaction. If the English and the Indian tariffs are compared, it will be found that in England Customs duties are imposed on a few main articles of consumption—such as tea, coffee, sugar, and wine which cannot be produced in England,—tobacco whose production is prohibited—and spirits upon which an equivalent Excise duty is imposed. The reason why such simplicity has been found practicable in the English tariff is that the wealth of the country has sufficiently increased to admit of a large revenue being derived from a few articles; and, moreover, that some of the principal articles of consumption in England are the products of tropical countries, and cannot be produced in England.

"It is only, however, under the most favourable external circumstances, after the lapse of many years, and a great progress in education and wealth, that this result has been achieved in England: it has indeed been for the most part brought about within my own Parliamentary recollection. No other nation in the world has as yet been able to come up to the English standard, on account either of disadvantages of position or of the predominance of unsound doctrines of finance.

"In India we cannot hope as yet to arrive at so simple a tariff upon imports. The reason is that India is a far poorer country than England, and therefore we cannot obtain a large Customs revenue upon a few articles, and are obliged to draw a larger number within our net. Moreover, India is a country which possesses, either in existence or in embryo, the means of supplying all the necessaries, and many of the luxuries of life. Indeed, with the exception of wines and some classes of spirits, there is hardly any article imported from abroad which could not be produced in India; and, in order to obtain any substantial revenue from duties on imports, we are forced to tax articles which may be, and many of which actually are, produced in India; and so far our import duties, although low in amount and imposed for revenue purposes only, may have had some protective effect.

"The theoretical conclusion is obvious—that, in order to bring our tariff into absolute conformity with the latest development of English financial legislation, all import duties, excepting those on the few articles which India cannot produce, or upon which an equivalent Excise duty can be put, should be abolished, and other means should be found of raising the revenue which would be sacrificed.

"But I agree with Sir William Muir that the practical conclusion is entirely the reverse. India is a country in which there is but little choice of new

sources of taxation: it would be difficult to replace a large amount of revenue excepting by an Excise duty on tobacco or by some kind of direct taxation. I am satisfied that such a change would not be desirable even in a financial point of view. The army of tax-gatherers, on low pay, which would be let loose over the country to collect a new Excise, would probably involve a larger charge to the Government than the cost of collecting the Customs duties; and, what is of more importance, by the imposition of a new Excise duty or of direct taxation under the best arrangements that could be made to levy either, the people of India would, in my opinion, have to pay a larger sum than they would gain by the reduced cost of the articles which would be affected by the abolition of our Customs duties.

"But this is not all. I have no hesitation in asserting that the political evil of giving up our Customs duties, or a large part of them, and of imposing fresh taxes in their place, would be great. Whatever may be the objections to Customs duties, they possess the advantages of being collected easily and paid without pressure. These advantages are of peculiar importance in India, where new taxes are particularly liable to occasion popular discontent. To substitute direct taxes or new Excise duties for the Customs duties which are now imposed upon foreign goods, seems to me to be a policy which would be contrary to the interests of the people of India, and which no statesman with a knowledge of India and a sense of responsibility could be found to propose.

"Under these circumstances successive Governments have done all that was feasible. From time to time, as Sir William Muir has pointed out, articles of importance to the development of the resources of India—such as machinery and iron—have either been entirely relieved from duty, or the duty has been reduced to a very low amount. We propose now, leaving all exceptionally low duties as they stand, to reduce the present general rate of 7½ per cent. *ad valorem* upon imports to the old rate of 5 per cent.,—a rate imposed entirely for purposes of revenue, and which cannot be fairly described as protective.

"I need not detain the Council with many observations upon the effect of the import duty upon cotton goods after the exhaustive manner in which Mr. Hope has dealt with that subject. Indeed the general remarks I have already made upon our tariff are sufficient to show that we could not give up so large an item of revenue as the import duty on those goods, which brings us in more than £800,000 a year. It is to be observed that, while we are only now able to reduce our general rate of import duty from 7½ to 5 per cent., the latter rate has been adopted since the year 1862 for cotton goods, while cotton twist has been charged with a duty of only 3½ per cent. Mr. Hope has shown that the competition of the Indian manufactures is confined, owing to the inferior quality of the raw cotton produced in India, to the lower classes of goods which form but a small part of the whole trade.

"It is difficult to draw a perfectly accurate comparison between the imports of cotton goods over a series of years owing to alterations in the tariff valuations. The annual statement of Trade and Navigation furnishes the following figures:—

"In the three years from 1859-60 to 1861-62 the average annual value of the imports of cotton twist, yarn, and piece goods was in round numbers £11,000,000.

"In the four years from 1862-63 to 1865-66 the average annual value was £12,150,000.

"It will be remembered that the duty was reduced in 1862, and the tariff valuations were raised in 1864; but the high price of cotton goods which prevailed owing to the American War must have had a prejudicial effect upon imports.

"I omit the financial year 1866-67, as it only embraces 11 months.

"In the four years from 1867-68 to 1870-71 the average annual value was £17,966,000.

"In the four years from 1871-72 to 1874-75 the average annual value was about the same—that is to say, £17,970,000; but the tariff valuations were lowered in 1869 by about 15 per cent.; and, if allowance be made for this, there

would be an increase of about a quarter of a million over the average for the preceding period.

"In the year 1874-75 the value was £19,387,270, which is the highest return for any year of the period which I have reviewed. I know it is stated that the trade of last year was not prosperous; but looking at these figures together, and making every necessary allowance, I can see nothing in them to lead us to suppose that the demand in India for English cotton manufactures has diminished or is likely to diminish.

"On the contrary, it is more probable that as the demand for English cotton manufactures has hitherto steadily progressed, notwithstanding the competition which has always existed in the lower classes of goods from Native hand-loom weavers, so it will continue to progress, although the lower classes of goods may in future be produced in the Indian manufactories cheaper and better than they have been by hand-looms.

"While, however, for the reasons given by Mr. Hope and Sir William Muir we see no reason for remitting the duty, we have gladly given substantial relief to the trade in cotton goods by a reduction of their tariff valuation. We have preferred the lower valuation recommended by the minority, and relief to the extent of no less than £88,000 per annum, as compared with the duty paid last year, will be given to the imports of cotton manufactures.

"The only increase of duties which we propose, putting aside some minor items, is to raise the import duty upon spirits and wine. We think that wine may fairly bear a moderate increase, and spirits are undoubtedly a legitimate subject for increased taxation. The Excise duty on spirits manufactured in India will as far as possible be raised in the same proportion as the Customs duty on imported spirits. The principle by which the Government is guided in the taxation of spirits is exactly the reverse of that which is followed in regard to other imports. The general principle is to impose low duties, and to rely upon increased consumption for an expansion of revenue. In dealing with spirits, the principle is to impose as high a duty, whether by way of Customs or Excise, as can be levied without being defeated by smuggling or illicit manufacture.

"Sir William Muir, who has especial charge of our finances, has shown that we need not apprehend any disturbance of the estimates of the current year from the alterations in the tariff which we propose to make. He has, moreover, given us good reasons to anticipate that the relief we are about to give to trade will involve no ultimate loss to the revenue. For my own part, taking into consideration the indirect, as well as the direct, advantages to the revenue which will be derived from the proposed measures, I believe that they will prove financially successful. I have therefore no hesitation in recommending them to the approval of the Council.

"Shortly stated, they are as follows:—

Export duties will be abolished which last year produced a revenue of £173,000.

Import duties will be reduced which last year produced a revenue of £173,000.

Import duties will be imposed which are estimated to produce a revenue of £100,000.

The tariff valuations will be revised at a net loss to the revenue of £62,000.

The whole net relief calculated upon the Customs receipts of last year will be £308,000.

"Notwithstanding this, the Customs revenue for the financial year 1875-76 is not expected to fall short of the estimate by more than £70,000 for reasons which have been fully explained to us. The result in future years depends upon the correctness or otherwise of our anticipations that the loss will be speedily met by a substantial increase of other sources of revenue.

"I do not dare to borrow the proud metaphor with which Mr. Gladstone illustrated a policy similar in character, but on a far grander scale than that which we propose for the abolition and reduction of Customs duties. He likened it to the tree of golden leaves described by Virgil; from which his

hero was ordered to pluck a branch, and on whose trunk the moment one branch had been plucked another took its place. In the language of the Poet—

"Primo avulso non deficit alter
Aureus; et simili frondescit virga metallo."

"We in India, pursuing the same course at a respectful distance, may be allowed to draw upon the great scholar of the Latin Poet for a less ambitious metaphor, and to use the language in which Dante describes a similar legend—

"Qual egli scelse
L'umile pianta, cotal si rinacque
Subitamente là onde la svelse."
"As he selected every humble plant,
Wherever one was pluck'd another there
Resembling, straightway in its place arose."

"We believe that the humble plant we are about to pluck will, if not at once, assuredly ere long, be replaced by a healthy and vigorous offspring.

"I am glad to embrace this opportunity of making some observations upon the general condition of the finances of India.

"During the last three years it has not been necessary for the Government to propose any fresh taxes; and, consequently, under the provisions of the Statute by which this Council is governed, there has been no opportunity for the Financial Member of Council to make the Budget statement which, in former years, under less fortunate circumstances, used to be looked for with so much anxiety. I do not regret that the necessity for annual budget discussions has ceased to exist. On the contrary, I look back with satisfaction to the fact that no fresh taxes have been imposed during the past three years; and I agree with the high authorities who hold that the annual discussions were open to the objection of raising apprehensions of additional taxation, or at least of leading the public to expect changes every year in the financial arrangements of the State. Such changes in England are well understood and regarded without apprehension, but in India they are liable to be exaggerated and to disturb the minds of the people. There are none of the constitutional reasons for annual discussions which exist in England, and the consideration of financial measures by this Council only when the necessity for them arises is, in my opinion, both more in accordance with our functions, and more calculated to maintain the stability of Indian finance than such annual discussions.

"While, however, there have been no annual budget statements in this Council for the last three years, there has been no concealment as to the state of our finances. The Government of India has always pursued the wise course of giving the fullest publicity to everything relating to the financial condition of the State, and we publish with the most ample explanations our annual estimates and accounts, together with every other information which bears upon trade and finance.

"In order to place before the Council, as clearly as I can, the present financial condition of India, I will take the statistics of the four last financial years, beginning with the year 1871-72, and ending with the year 1874-75. For the first three years we have the final accounts, and for the last we have what are called the 'Regular Estimates,' which usually approach very closely to the actual results. I will first compare the ordinary revenue of each year with the ordinary expenditure, omitting the charge which we have had to defray on account of the Bengal famine, and omitting also the expenditure which has been incurred in the construction of rail-roads and irrigation works, which, in the accounts, are classed as 'Extraordinary.'

"The revenue exceeded the expenditure in the year 1871-72 by £3,124,177; in the year 1872-73 by £1,765,672; in the year 1873-74 by £2,071,937; and in 1874-75 it is estimated to exceed the expenditure by £1,889,000. In the four years, therefore, there appears upon the face of the account to have been a surplus of revenue over expenditure of no less than £8,850,786.

"These figures, however, present the account in rather too favourable a light. Certain deductions, with the reasons for which I need not trouble the Council, should be made from the revenue in order to show the correct balance

between income and expenditure. I calculate these deductions to amount in the four years to £1,738,253, but, after making them, the surplus still amounts to the goodly sum of £7,112,533.

"The expenditure upon famine relief in 1873-74 was £3,864,673, and the estimated expenditure for 1874-75 is £2,442,000, giving a total of £6,306,673. After charging the whole of this expenditure against the ordinary revenue of the four years, there remains a surplus of £805,860. I am informed that the accounts for 1874-75 will probably show a larger increase than usual over the Regular Estimate, and we may confidently anticipate that, after defraying the famine charges, there will remain a surplus of revenue over expenditure in the four years of not less than a million sterling.

"In a Resolution of the Government of India last year we expressed our opinion that, 'besides a fair surplus of income over ordinary expenditure, such a margin should be provided as would constitute a reasonable provision for meeting occasional expenditure upon famines.' The financial history of the last four years shows that such a margin has been amply provided. We have met a very large expenditure for famine relief out of the ordinary revenue of four years, with a substantial balance besides. It may interest the Council to know that when a calamity of the same kind fell upon Great Britain, in consequence of the failure of the potato crop of Ireland, only two millions out of a total expenditure of about ten millions was defrayed from ordinary sources of revenue, the remainder having been raised by loan and not appearing, according to the best information I can obtain, in the accounts of ordinary income and expenditure.

"In several despatches which successive Secretaries of State have addressed to the Government of India on the subject of finance, a desire has been expressed—more I think in the nature of a hope than of a confident expectation—that the Indian finances might show an annual surplus of more than £500,000. It will be seen that our surplus in four years has amounted to £7,000,000, or more than three times the sum which the Home Government has desired.

"This satisfactory result, moreover, has been accompanied by a considerable remission of taxation. In the year 1873, the Income tax, which during the preceding two years had produced a net sum of £1,362,570, was allowed to lapse. The Southern Customs Line, which drew its long and obstructive length of 800 miles across Central India, has been abolished at a considerable sacrifice of the salt revenue; and yet in each of the last two years we have realised a very substantial surplus.

"Our cash account for the four years we are examining is given in a statement which is in the hands of Members of Council.

"The cash balance in India and England stood on the 1st of April 1871 at £20,124,715, and it was estimated to stand on the 31st March 1875 at £18,386,198. We have spent in the four years on Public Works Extraordinary £11,401,351, the balances of the Guaranteed Railway Companies have been diminished by £1,212,466, a disbursement which is of the nature of a reduction of debt, and we have lent to Native States, Municipalities, &c., £1,570,231, which we shall eventually recover, and which in the meantime has been of great benefit to those whom we have assisted. These disbursements, amounting together to £12,613,817, have been met as follows:—By diminution of cash balances, £1,738,517; by surplus of revenue over expenditure, £805,860; by excess of receipts over disbursements on the sundry accounts which are embraced in our cash transactions, £2,103,007; and by net increase of debt, £9,536,664,—an increase which is considerably less than the sum spent upon Public Works Extraordinary.

"The terms upon which loans have been raised in India and England in 1874, and in India in June last, are as follows:—

"In 1874—Five millions sterling were borrowed in England at £101-7-11¼ for £100 stock. Two and a half crore of rupees were borrowed in India at Rs. 102-12-2 for 100 Rupees stock.

"In 1875—Two and a half crore of rupees were borrowed in India at Rs. 102-3-8 for 100 Rupees stock.

"These terms afford a proof of the high estimation which is entertained of the credit of India in the money market, both here and in England.

"The cash balances in India were estimated to amount at the beginning of the present financial year to £15,700,042. This is held by some to be too high an amount, and the business of the Government could certainly be transacted with lower balances; but I do not consider them to be excessive, considering the magnitude of the liabilities to which the Government of India is exposed, and the difficulty that would be found in suddenly increasing our means in case of need. India is in this respect very differently situated from England. London is the centre of the banking business of the world, and in England the Chancellor of the Exchequer can, if he pleases, safely reduce his cash balance to the amount which is just sufficient to meet the business of the day; but the money market of India is very limited, and it would be hazardous to rely upon it for temporary assistance if a sudden demand should come upon the State, particularly as such a demand would almost certainly occur at a time when there would be a pressure for accommodation on the part of the public. The condition of the Calcutta money market in the beginning of 1873, when considerable funds had to be suddenly supplied to pay for rice from Burma and elsewhere, sufficiently indicated the risk which would be run by reducing our cash balances too low. I entertain a strong opinion that a substantial cash balance over and above what is absolutely required, although it involves a considerable annual cost from loss of interest, is essential to the security of the finances of India.

"The Council will, I think, desire to consider to what causes the satisfactory condition of our finances is to be attributed. First I will observe that great improvements have been effected of late years in our estimates and accounts. Unless estimates are carefully framed and accounts promptly and accurately rendered, a Government is liable to fall into difficulties without any warning. Nothing can be better than our present system of estimates and accounts, and I am sure Sir Richard Temple will confirm me when I add that the chief credit for this improvement is due to Mr. Chapman, the Financial Secretary to Government.

"The sound condition of our finances, in my opinion, mainly results, on the one hand, from the gradual increase of the revenue in consequence of the increased wealth and prosperity of the country, and, on the other, from the exercise of strict economy in every department of the State. Both these subjects are so important that it is worth while to illustrate them by a few figures.

"We have sources of revenue which mainly depend upon circumstances other than the progress of the wealth and prosperity of India. Our opium receipts depend upon the supply of the drug and the demand for it in China. Although our land-revenue, taking a term of years, depends upon the increased wealth of the country, yet the increase arises from time to time as existing settlements expire, and it would be difficult without going into lengthy explanations to exhibit any comparative statement that would be of value for my present purpose. I will therefore confine myself to the revenue derived from Customs, Salt, Excise, and Stamps, all of which mainly depend upon the general prosperity of the country. I take the net receipts from these taxes since the year 1870-71, because alterations were made in 1869 in the Salt and Stamp Laws as well as in the tariff valuations, which would vitiate the comparison with former years.

"The average annual net receipts from Customs, Salt, Stamps and Excise in the three years from 1870-71 to 1872-73 amounted to £12,691,262 a year. In the years 1873-74 and 1874-75 the receipts rose to £13,035,857 a year. These figures exhibit an increase, in the last two as compared with the first three of the five years, of £350,000, and this increase has taken place notwithstanding some remissions of Salt and Customs duties.

"On the other side of the account we have to meet expenditure which depends but little upon the action of the Government of the day—for example, the interest of our debt, and the charge for superannuation and retired allow-

ances. Taking the expenditure within the control of Government, namely, the cost of Civil Administration, Law and Justice, Public Works, the Army, and the Marine Service, I find that the average annual expenditure for the three years 1867-68 to 1869-70 was £31,833,512; for the three years 1870-71 to 1872-73, £29,748,527; and for the two years 1873-74 and 1874-75, £29,331,793. The average annual expenditure upon these services during the last two years is therefore less by two millions and half than it was six years ago, and less by rather more than £400,000 than it was three years ago.

"These figures show that while, on the one hand, the revenue steadily increases, although not at a very high rate, on the other, the expenditure has been carefully supervised by the Government.

"I can say this without scruple, because the result is mainly due to the attention which was paid to the control of expenditure while Lord Mayo was Viceroy, and it was the constant care of Sir Richard Temple during the time he filled the office of Financial Member of Council. The exertions of the Government have been cordially seconded by the several departments of the Government of India, by the Local Governments, and by all the officers concerned throughout India; and the thanks of the Government of India are due to them for their valuable co-operation.

"While such has been the result of the Imperial finance of the past four years, the Government have not neglected the subject of provincial taxation. In 1872 circulars were addressed to the different Local Governments, and the opinions of officers, both English and Native, were obtained respecting the effects of provincial and local taxation. The answers showed that there were at that time some taxes which were productive of discontent, and which might with advantage be discontinued. In the Madras and Bombay Presidencies the taxes to which most objection was then taken have been readily abandoned by the Local Governments. In the Central Provinces the Pándhari tax,—a direct tax which extended over a very large number of people,—has been greatly modified. The only new measure of provincial taxation which has since been carried into effect is the road cess in Bengal,—a proper and legitimate impost which, owing to the care which has been taken by Sir George Campbell and Sir Richard Temple to apply it gradually and cautiously to the different parts of the Province, is being levied without difficulty, and applied to the advantage of the people who have to pay it.

"The Council will have observed that in the remarks which I have hitherto made I have only cursorily alluded to what is termed 'extraordinary' expenditure. This, however, is a part of our annual expenditure of great importance, a notice of which cannot be properly omitted in any review of the finances.

"I have seen it observed that we have in the last few years 'drifted back into a condition of chronic deficit,' and that the expenditure upon railroads and irrigation works has greatly increased. This misconception may perhaps have arisen from the manner in which the account of our annual revenue and expenditure is published. What is called the 'extraordinary' expenditure is added to the ordinary expenditure of the year, and the result appears at the bottom of the account. Those who have made a study of the accounts are able to appreciate the real facts of the case, but they are not unlikely to be misunderstood by others who have not had time or opportunity for such a study. If the expenditure upon works such as railroads, which are of too great magnitude to be paid for altogether out of the ordinary resources of the Government, and which are in the nature of investments of capital, be added to the ordinary expenditure, the result must be a deficit. But expenditure upon such works belongs to an entirely different category from the ordinary expenditure of the State, and ought to be excluded in drawing a balance between income and expenditure for the practical purpose of showing the real surplus or deficit of the year.

"In England, works of this kind are carried out by private enterprise without the aid of the State; in India this has been found to be impossible. The works themselves are essentially reproductive, in the broadest sense of the term,—I mean that whether or no they may pay the full interest on the capital invested they certainly add to the general wealth of the country—and moreover, in my opinion, they will directly or indirectly recoup to the State the full interest on the capital expended in their construction. Whether the capital be raised by giving a guarantee by the State of a fixed rate of interest to private companies, as has been done in the case of what are termed 'guaranteed railroads,' or the capital be borrowed by the State and the works carried on by the agency of the officers of Government, is, so far as the finances are concerned, one and the same thing.

"In order, therefore, to institute a correct comparison between the expenditure on such works in recent years, and the expenditure which formerly prevailed, it is necessary to add the expenditure of guaranteed rail-road capital to the direct expenditure by the State. I have had a return prepared showing the sum spent annually upon rail-roads and irrigation works, both from guaranteed capital, and directly by the State, and I will give the Council the results shown by that return. In the four years from 1867-68 to 1870-71 the sum of £25,330,518 was spent by Government and from guaranteed capital together, which gives an average annual expenditure of £6,332,629. In the four years from 1871-72 to 1874-75 there was spent from similar sources a sum of £16,647,871, which gives an average annual expenditure of £4,161,967. The annual rate of expenditure therefore during the last four years has been less by more than two millions than that of the preceding four years.

"But it is of more consequence to consider whether the expenditure which has hitherto taken place has been wise; and whether, although its rate may be diminished, it is at the present time within the resources of the Government.

"The answer to the first question is supplied by the steady progress of the national wealth since the policy of pushing forward railways throughout India was adopted in the time of Lord Dalhousie, and by the sound and satisfactory condition of our finances. In reply to the question whether our present rate of expenditure is within our resources, I need hardly do more than remind the Council of the careful forecasts which have been published showing the calculations upon which the present rate of expenditure has been determined. We considered that, however advantageous the extension of railroads or irrigation works might be, it would not be right to carry them on at such a rate as would require the imposition of fresh taxes, and the rate of expenditure has therefore been based upon calculations showing that any additional interest for which we may be liable on account of money borrowed for the purpose of constructing rail-roads and canals will be met from increased receipts derived from works which have been, or will from time to time be, completed and brought into operation. The calculations originally made in 1873 were carefully checked this year, and the Government have no doubt of their substantial accuracy.

"I may observe, moreover, that we are now in a far better position than we have been at any former time in respect to our liability for the completion of railroads and irrigation works.

"So long as the main lines of communication—such as the East Indian and the Great Indian Peninsula Railways—were in progress, a very large liability rested upon the Government for their completion; a liability which, as those rail roads were constructed by guaranteed companies, could not be set aside whatever financial exigencies might arise. Now that the principal lines of communication are completed and the works under construction are of a more limited character, this liability for the future expenditure necessary to complete works under construction is considerably diminished. The rate of progress, moreover, is now almost entirely at the command of Government, because the works are mainly constructed directly by the State, instead of through the agency of guaranteed companies. I believe that in the course of a few years our liability will never at any time much exceed the annual sum which is appropriated to the construction of such works. Thus, in the case of a failure of any great branch of our revenue, or if other calls, such as those of war, should fall upon the Government, we should be able within a very moderate time to contract our expenditure, without subjecting the country to the loss which would be occasioned by abandoning important works before they are brought into remunerative operation.

"I have one more remark to make upon this subject. Although the Government, rightly in my opinion, preferred the more expensive mode of construction of the Indus Valley railroad in order to complete a very important trunk line upon the broad gauge, we feel that the utmost possible economy should be observed in the construction of public works in India. We are therefore carrying out the narrow gauge system of rail-roads for the minor lines of communication; we reconsidered a few years ago the schemes of irrigation works which were then before us, and abandoned, for a time at any rate, works which were projected at an estimated cost of not much less than 9 millions sterling. We have recently, in discussing the projected irrigation works for Behar, impressed upon the Government of Bengal, and upon the Engineer Officers who were engaged in making the plans, the necessity of carefully considering certain minor works which will probably be sufficient for the purposes in view, in lieu of more ambitious schemes which, however creditable they may be to their constructors, are not likely to be remunerative, and indeed are not unfrequently accompanied by serious drawbacks to the advantages which irrigation undoubtedly confers upon most parts of the country.

"The general conclusion to be drawn from a review of the present state of finances of India is highly encouraging. It is dangerous to anticipate the future; but with one exception I see no reason to doubt that, so long as a wise economy prevails, the prosperous condition of Indian finances will be maintained. The exception to which I allude is the effect of the recent fall in the value of silver. This subject has been alluded to by Sir William Muir, and comes home to most of the English residents in India. Every one who has to make a remittance to England, that is to say who has to make a payment in gold while he receives his income in silver, has to pay more silver, or in other words a larger portion of his income, than he had to pay when the value of silver was higher.

"The Government of India is one of the best abused Governments in the world, and I have seen it asserted that this fall in the value of silver is our fault. This accusation reminds me of the witty lines—

"Who makes the quartern loaf and Luddites rise?
Who fills the butchers' shops with large blue flies?"

"I need hardly say that the Government is not a whit more responsible for the fall in silver than Buonaparte was for the flies. Governments can do much—when they interfere with trade they usually do much harm—but they are powerless to control the value of any article in the markets of the world. What the cause of the fall in silver has been, and how long it may continue, is not easy to say. It may be produced mainly by the change in the currency of some European Nations from silver to gold, which has thrown a large quantity of silver into the market. It may arise from the increased production of silver. As long as it lasts, however, the Government of India suffers in common with private individuals. The Government of India has to make large fixed payments in gold out of income received in silver, and a fall in the value of silver raises the cost of those payments. This really governs the item 'loss by exchange' which has of late years figured so heavily on the wrong side of our accounts; for whatever temporary fluctuations in the rate of exchange may be produced by the balance of trade between India and other countries (and the measure which I hope we shall pass to-day by encouraging the export trade may have a temporary effect upon the rate of exchange, and, so far, assist our finances), these fixed payments in gold must in the long run constitute a lighter or heavier charge upon the Indian finances in proportion to the rise or fall in the value of silver.

"The net sum provided in the estimates of the current year for loss by exchange amounts to more than a million sterling, and if the value of silver should continue to fall, this charge will be considerably increased. But I do not think that this liability seriously affects at present the reasonable prospect we have of a substantial surplus in future, provided—and I cannot repeat this too often—a careful check is kept upon increases of expenditure.

"The condition of the finances of a country greatly depends upon the state of its trade, and the information which Sir William Muir has given us of the progress of the trade of India is highly encouraging.

"Mr. Wilson, who came to India with a long financial experience, in his budget statement of 1860, made at a time of gloom, expressed a sanguine view of the future finances of India; and brought forward, as the principal reason for his favourable anticipations, statistics showing the progress of the Indian foreign trade during the preceding five and twenty years. The most recent returns, when Mr. Wilson made his celebrated budget speech, were those for the year 1858-59. Fifteen years have passed between that year and the year 1873-74, which is the last for which we have complete Trade and Navigation accounts; and it is not without interest to examine how far Mr. Wilson's hopes have been realized.

"The average annual value of the foreign trade of India, including imports and exports of merchandise and treasure, for the five years ending with 1838-39, was £18,638,552.

"For the five years ending with 1858-59, the average annual value rose to £52,700,013.

"The increase was £34,061,461, or at the rate of about £1,700,000 a year for the 20 intervening years, and these were the results which Mr. Wilson stated.

"For the five years ending with 1873-74, the value of our foreign trade has further risen to an annual average of £95,077,948.

"This increase, as compared with the five years ending with 1858-59, was £45,646,103, or at the rate of about £3,000,000 a year for the 15 intervening years. The rate of increase has therefore far exceeded that which Mr. Wilson regarded with so much satisfaction.

"Individual years included in this period have shown considerable fluctuations. The extraordinary development of the export trade in raw cotton during the American War was followed by the usual re-action. The accidents of the seasons have affected both the produce of the principal Indian staples, and the quantity of them available for export. The lowering of the valuations of cotton goods and metals in 1869 by 15 per cent. has considerably affected the returns, and the imports of railway materials have varied according to the requirements of the State. But the broad result drawn from averages of years, which is the only safe way of making a calculation of the kind, has amply justified Mr. Wilson's anticipations, and proved the soundness of his observation, that let cultivation be extended ever so much, there would be no fear of the want of a market for the produce of the Indian soil.

"Of late years, since the old Indian manufactures decayed owing to competition coupled with the heavy import duties imposed in old times upon their import into England for the purpose of protecting English manufactures, the principal exports of India have been raw products; but I agree with Sir William Muir that there are signs that Indian manufactures may again before long take their place in the market of the world.

"The conclusions which I believe may safely be drawn from the considerations which naturally present themselves in discussing the subject before us are that the trade of India is steadily increasing; that our finances are sound, but that their stability mainly depends upon the exercise of strict economy in our expenditure; and that the relief from taxation that we propose is both safe and wise. For, to adapt the weighty words of our greatest English financier, we abolish restrictions upon the application of capital and the exercise of industry and skill, and the principal object of our policy is to give full and free scope to the energies of the people of India."

The Motion was put and agreed to.

The Hon'ble MR. HOPE moved that the Bill be passed.

The Motion was put and agreed to.

LAW REPORTS BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill for the improvement of Law Reports, and moved that it be referred to a Select Committee with instructions to report in six weeks.

The Motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR A. ARBUTHNOT introduced the Bill to provide Reformatory and Industrial Schools, and moved that it be referred to a Select Committee with instructions to report in four months. He said that at their last meeting the Council gave permission for the introduction of this Bill. On that occasion he endeavoured to explain the circumstances under which the Government of India had deemed it expedient that legislation should be resorted to on this subject. He showed that so far back as 1861 the matter had engaged the attention of the framers of the Code of Criminal Procedure, and that they had inserted in that Code a provision having for its object the establishment and utilization of Reformatories, but that that provision was in one important respect defective; that the defect had attracted the attention of the Government of Bombay which, in the very year in which the Code of Criminal Procedure was passed, framed and passed through their Council a Bill for remedying the defect, which however was vetoed by the Governor General; that a similar Bill was framed in the following year, which shared a similar fate; that in 1867 the subject again attracted attention and received consideration from the Government of India, and also from the Government of Madras, and elicited from the Governor of that Presidency a forcible and, in SIR A. ARBUTHNOT'S opinion, a very just representation; that more recently the question had occupied the attention of the Lieutenant-Governor of Bengal and also that of His Excellency the President; and that after further consideration the Government of India had come to the conclusion that it was desirable no longer to postpone a resort to legislation for the purpose of enabling the several Local Governments to provide that youthful offenders should be secluded for longer periods than was possible under the existing law, with a view of reclaiming them from the evil habits and associations in which they had been brought up, bringing them under salutary influences, and training them to habits of honest industry. At the last meeting he had omitted to advert to one point of some importance in connection with this Bill, namely, the number of juvenile offenders in any Presidency or Province who could be brought under the influence of a reformatory, if such institutions existed. In the correspondence to which he had referred, it was shown that in the year 1866 in Madras the number of juvenile offenders in our prisons in that Presidency was less than 70; but it was also shown that this small number was, in point of fact, no criterion of the number of youthful offenders who might with advantage be brought under the influence of a reformatory; for it appeared that during the period in question no less than 651 boys had been sentenced to punishment, most of whom probably had been flogged and dismissed, and it was obvious that many of them probably would and might, with great advantage, have been sent to a reformatory. It appeared that in the one institution of this character, which existed at present in India—the Sassoon Reformatory at Bombay—there were at present over 100 inmates, and in the juvenile prison at Poona there was about half that number. According to Sir Richard Temple's estimate, the number of juvenile offenders now in the jails in the Province of Bengal was about 100, and the Lieutenant-Governor anticipated that if a reformatory should be established, about an equal number of juvenile vagrants who were being trained to crime, might be expected to be received into it under the provisions of the Bill which he (SIR A. ARBUTHNOT) was now introducing.

Having made these preliminary remarks, he would request the notice of the Council to one or two of the leading provisions of the Bill. He might, in the first place, observe that the principle of the Bill was very similar to that of the English law bearing upon the subject, which was contained in two Statutes, chapters 117 and 118 of 29 & 30 Vic. The provisions, or perhaps he should say, the ideas, of those two Statutes were combined in the Bill now before the Council. In England, it had been deemed expedient to provide separate legislation for the two different classes of persons with which we proposed to deal. Under the English Statutes two separate classes of institutions existed for those separate classes of persons. Under the first of the English Acts (117 of 29 & 30 Vic.), Reformatory Schools

were established and made use of for juvenile offenders who had been convicted of offences. Under the second Statute (Cap. 118) schools, which were called Industrial Schools, were established for the reclamation of boys and girls who were found to be in close association with the criminal classes, to be leading vagrant lives, and to be, in the opinion of the authorities, suitable persons to subject to the influences of an institution of this character. It had been deemed sufficient here to provide in a single Bill for the two classes of persons to whom he alluded. There were one or two points of detail in which the Bill before the Council differed from the English Acts. The English Reformatory Schools Act limited the period during which a youthful offender might be confined in a reformatory to five years, and under that Act the maximum age at which he could be sent to a reformatory was 16 years, and in the case of a youthful offender under the age of 10 years, an order could not be passed sending him to a reformatory unless he had already been sentenced on conviction for some criminal offence. Under the English Industrial Schools Act the maximum age for sending youths, whom he might designate as juvenile vagrants, or the juvenile associates of criminals, to an Industrial School, was 14 years. Under that Act also, a child under 12 charged with certain offences must go to an Industrial School, and there was a provision in it, which we had not adopted here, which enabled refractory children under the age of 14, at the instance of their parents or guardians, to be sent to an Industrial School. That provision, he had reason to believe, had been found in England to be susceptible of some abuse, and certainly in this country it did not seem advisable to resort to it. Under the Bill now in the hands of the Council the maximum age at which boys could be sent to a Reformatory and Industrial School was fixed at 14 years, and that was only applicable to the cases of boys convicted of the offences which, under the Penal Code, were punishable with transportation or imprisonment, in fact, of offences of the more serious character provided for in the Code. In the case of boys convicted of offences which were simply punishable with imprisonment, the maximum age at which they could be sent to a Reformatory was 12 years. Under the Bill the maximum period for which a boy could be detained in the institution was seven instead of five years, the term named in the English Acts. In those Acts and in the Bill, the maximum age up to which a boy might be detained was specified at 16 years. In the English Acts, while there was a practical limit as to the number of years of detention, there was no limit to the age further than that which was provided by fixing a limit as to the age up to which a juvenile offender might be sent. All these provisions of detail would have to be carefully examined by the Committee to whom the Bill would be referred, and he had no doubt that they would also engage the attention of the various local authorities.

He might mention that it had not been deemed expedient in this country to apply this legislation to the case of girls. Probably the operation of the Bill would principally be confined to schools established and maintained by the Government, but it would also be applicable to private institutions, and it so happened that there was at the present time one existing private institution—the Sassoon Institution at Bombay—to which, no doubt, the Bill would, if passed, become applicable. Provision was also made for enabling Municipal authorities to establish institutions of this character and for bringing them under the operation of the Bill. The only other provision to which he need draw the attention of the Council, was one contained in section 20, one of the sections relating to Boards of Management, which provided that on every Board there should be at least two Native members. This was a provision which had been deemed to be of importance by the Government. Inasmuch as the proposed legislation was of a novel character, and might be said, in some respect, to affect the liberty of the subject, it was very desirable that the Native community, through their representatives, should have every opportunity of watching the working and operation of the institutions which might be established under the Bill.

The Motion was put and agreed to.

The Hon'ble SIR A. ARBUTHNOT then moved that the Bill be published in the local official *Gazettes* in English and such other languages as the Local Governments thought fit.

The Motion was put and agreed to.

CENTRAL PROVINCES LAWS BILL.

The Hon'ble SIR DOUGLAS FORSYTH moved for leave to introduce a Bill to declare and amend the law in force in the Central Provinces. He said that the necessity for a Bill of this kind would be apparent if he placed before the Council in a very few words a description of the territories which formed the Central Provinces.

The Central Provinces were formed under the Resolution of the Government of India dated 2nd November 1861, and comprised the Province of Nágpur and the Ságar and Narbada territories.

To these were added Sambalpur with its dependencies in 1862, the District of Nimár in 1864, and the Bijeragogarh territory in 1865.

By the death of the last Bhonsla Rájá in 1853, who left no heir, the Nágpur Province lapsed to the paramount power, but for some time previous to this event a considerable supervision over the administration had been exercised by the British Resident.

In fact, for a period of some twelve or thirteen years, during the minority of Rájá Raghují III., the administration of the country was conducted by the British Resident under the orders of the Governor General and by the aid of British officers.

Sir R. Jenkins, the Resident, issued orders and proclamations laying down a system of procedure and principles of law, based on general instructions issued by the Supreme Government.

Under that system the people were secured in their own laws based on the customs and usages of the country, but in *criminal* punitive law the system was based on the Bengal Regulations.

One or two rather objectionable customs were however abolished, such as the auction sale of widows and the levy of a tax on the remarriage of widows and the putting to death of witches, whilst an order was given to punish persons who should denounce another as a wizard or witch.

Sir R. Jenkins' system of administration seemed to have been retained to a considerable extent, even after the Rájá attained his majority; and up to the time of the death of the last Chief in 1853 and on the assumption of the administration of the country by the Government of India, Sir R. Jenkins' system was authoritatively re-introduced and subsequently was somewhat modified by the introduction of the Panjáb civil judicial system with some improvements borrowed from Assam.

The Ságar and Narbada territories were acquired by treaty: the former in 1817 from the Peishwa Báji Rao; the latter in 1818 from the Rájá of Nágpur. He would quote from the Resolution of the Government of India:—

"These territories have been transferred at various times from one Government to another. They were originally under the Supreme Government; subsequently they were placed under the Lieutenant-Governor of Agra. Again in 1842 the general control of them was vested in a Commissioner and Governor General's Agent in direct communication with the Supreme Government, while the supervision of fiscal and judicial affairs remained with the Sadr Board and Sadr Court at Agra respectively. Again at a later date the general jurisdiction was once more entrusted to the Government of the North-Western Provinces, under which it remained up to the time of annexation."

These territories were first governed by special rules issued to the Commissioners, and subsequently by the spirit of the Regulations of Government applicable to the Province: though in a report written in 1834, Mr. Bird declared that of the British officers supposed to be conducting the administration in accordance with the spirit of these Regulations, not one had read a word of them, and the spirit and all that was valuable in the Regulations was unknown.

Subsequent to this sweeping condemnation and before their incorporation with the Central Provinces, the Ságar and Narbada territories had the good

fortune of being administered by officers of very high distinction, such as General Sleeman, Sir D. McLeod, and Mr. A. Roberts, to the last-mentioned of whom the Province was indebted for a Code of Civil Procedure, which was adopted to a very great extent in the formation of the Panjáb Civil Code, which in its turn was sent to the Central Provinces as a model for guidance.

Sambalpur with its dependencies lapsed to the British Government in 1849, up to which time the civil, police and judicial administration had been conducted by the Rájás in their own way; and if he might trust Mr. Nicholls, a Civilian who had drawn up a most valuable work on the Law, special and local, of the Central Provinces, and from whom he was quoting largely now, it would appear that until the Province was made over to the Chief Commissioner, Nágpur, in 1862, it was governed by our own officers very much in the same manner. Mr. Nicholls said that Sambalpur was treated as what was called a political mahál. If justice was administered, it was, as in Nimár, justice without the niceties of law, and the spirit of the laws and regulations was observed, if observed at all, in a Pickwickian sense. In Nimár our first acquisitions were by treaty from the Peishwa in 1818, and the desolation of the tract acquired was such as to give rise to the saying that "there is not a crow in Kanapur Beria."

As Mr. Nicholls remarked, the political condition coupled with the original desolation of the country, and superadded to the curiously vagrant habits or instincts of a very large portion of the inhabitants, formed at all events a fair excuse for the almost entire absence of authoritatively imposed laws and regulations in Nimár.

Even so late as 1862, SIR D. FORSYTH found in the annual report the following important postscript:—

"There is no authorized Code of Civil Procedure in Nimár. Improvements have been introduced from time to time and in some instances the spirit of Act VIII of 1859 is acted upon. But with the weak establishments in Nimár we can attend to justice only, and not to justice and the niceties of the law combined."

Nimár was incorporated with the Central Provinces in May 1864.

Bijeragogarh was first brought under the management of political officers in 1848 during the minority of the last Chief, Surju Pershád. When he attained his majority, he was placed in full possession of his hereditary estate, but shortly afterwards the mutiny broke out and he was induced to rebel. His territory was confiscated and placed under the charge of the Governor General's Agent in Bandelkhand and was finally incorporated with the Central Provinces in 1865.

Such was a very summary glance at the history of the various tracts which went to make up the present administration known as the Central Provinces.

In his report for 1862-63, the then Chief Commissioner, Sir Richard Temple, thus described the previous judicial condition of these Provinces:—

"In other Non-Regulation Provinces even where there were no laws there was yet a rule and system clear and complete. But in the territories newly brought together under the general designation of the Central Provinces, there could be no universal procedure, no general regulation, no complete legal foundation for the conduct of affairs. There were up to the year 1862-63 a variety of laws, rules and systems, each having force more or less in the several parts, but none having force over the whole."

In 1866 the Chief Commissionor addressed the Government of India on the subject of declaring what Acts and Regulations should be considered applicable, and a long correspondence ensued. He might here remark that in the Resolution of the Government of India, the administrationof the Central Provinces was declared to be formed on a system similar in most respects to that which existed in the Panjáb and Oudh.

When, therefore, it became necessary a few years later to pass an Act of the Legislature to declare what the law was in the Panjáb, and the same is now being done in respect of Oudh, it followed, as a necessary consequence, that the same operation must be performed with regard to this younger Province.

The Motion was put and agreed to.

The following Select Committees were named:—

On the Bill for the improvement of Law Reports,—the Hon'ble Sir A. Arbuthnot, Sir D. Forsyth, and Mr. Hope and the Mover.

On the Bill to provide Reformatory and Industrial Schools,—the Hon'ble Mr. Hobhouse, the Hon'ble Sir W. Muir, Sir D. Forsyth and Mr. Hope and the Mover.

The Council then adjourned to Thursday, the 19th August 1875.

SIMLA,
The 5th August 1875.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 12TH AUGUST 1875.

GENERAL REMARKS.—There has been general rain in Madras, where prospects are satisfactory; in Mysore more is needed. In Bombay the falls have been scanty in parts of Guzerat, the Deccan and the Southern Mahratta Country, but the crops are generally in good condition. In Sind the river remains high and prospects are favourable. There has been abundant and in some places excessive rain in the Central Provinces, where a break is needed. In Bengal unusually heavy falls are reported from the eastern, and abundant rain in the central and northern districts; in Behar the fall has also been ample, and prospects are upon the whole excellent. There has been general rain in the North-Western Provinces, heaviest in the eastern and Bundelkhand districts: the floods in the Ganges valley are now subsiding; great damage has been done in the Allahabad district, and some in Mirzapur; in Rohilkhand and the western districts the season is favourable. In Oudh the rainfall has been general and abundant. In the Punjab heavy rain has fallen in the districts of the Delhi, Hissar, Umballa and Jullundur divisions; eleven inches fell in Lahore, doing much damage to houses; no reports have been received from the northern districts, where a considerable extent of country is flooded and telegraphic communication interrupted. There has been continued rain in the northern States of Rajpootana and throughout Central India. Reports from Assam, Burmah and Berar are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (August 12th)	At Masulipatam 1·9. At Bizwara Sattanapully 3·0. At Nasaropett nuzid 2·0.	Rain slight elsewhere; 6½ feet water over anicut, canals full; early crops being sown, transplanting commenced in a few inundated villages, some crops are still under water, elsewhere crops good; markets well supplied locally, prices steady; mild small-pox and fever in some taluks; mild cattle disease in four taluks; pasture improving.
Kurnool (11th)	1·88 inches in two days.	Good rain in three taluks, moderate in others; early dry crops in good condition; markets well supplied, prices generally steady; fever prevalent, small-pox in two taluks; cattle disease in Pattikonda and Markapur; water and pasture abundant; 1·2 feet water over Sunkesala anicut on 10th.
Tanjore (12th)	2·30 inches at Nagapatam.	Rain elsewhere light and partial; water supply in rivers moderate, in tanks scanty; water over upper anicut south branch 1 inch, lower north and south branches 1 inch in each; cultivation, wet and a few dry crops; standing crops very few, not thriving for want of good rain, harvest almost none; markets well supplied, prices rising; fever here and there, cholera abating, 507 deaths this week against 1,044 last week: cattle disease prevalent; pasture insufficient.
Trichinopoly (August 11th)	In Trichinopoly more than 1 inch. In Perambular and Udiarpollium ·25	Water sufficient, except for the Kadarambam wet crops; dry crops suffering from want of rain in parts of the district; out-turn up to average; markets well supplied; cholera declining, except in Udiarpollium; condition of cattle good; pasture scanty.
Malabar (12th)	4 22	Prospects favourable; markets well supplied, prices high; bowel complaints and fever prevalent in Ernad and Walluvanad; cattle disease in Wynaad; pasture flourishing.
		General Remarks.—General prospects satisfactory.
Bombay— (August 12th)		
Sind.		
Kurrachee (August 11th)	...	River still rising; canals all flowing; weather cloudy; agricultural prospects fair.
Shikarpur "	...	River 15 feet which is 9 inches higher than last year; kharif crops healthy; fever prevalent.
Hyderabad "	...	River keeps steady.
Upper Sind Frontier "	...	Weather extremely close and sultry; kharif crops being sown; water supply good.
Gujarat.		
Ahmedabad (August 11th)	·52	Total rainfall 10·26; more rain needed everywhere; cholera re-appeared, 63 cases, deaths 14.
Kaira "	3·49	Total rainfall 21·43; rice transplantation completed; crops well; cholera cases 10, deaths 6.
Surat "	1·27	Total rainfall 30·56.
Broach "	1·5	Total rainfall 37·50; cholera slight; injured crops being resown.
Khandesh and Nasik.		
Khandesh (August 11th)	·72	Total rainfall 9·81; kharif crops generally thriving; cholera abating, cases 671, deaths 280; cattle disease in Shahada.
Nasik "	3·1	Total rainfall 26·13; bajri sowing suspended owing to heavy rain, in one taluk crops suffering from excessive moisture; cholera decreasing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan.		
Tanna (August 11th)	7·12	Total rainfall 81·87; transplantation of crops almost completed; cholera still slightly prevalent.
Deccan.		
Poona (August 11th)	1·8	Total rainfall 25·90; sowing nearly completed; young plants in some places well; cholera slight.
Ahmednuggur "	·42	Total rainfall 4·15; sowing finished in seven taluks; crops middling; cholera rather decreasing.
Sholapur "	·98	Total rainfall 9·63; cholera prevails.
Satara "	2·20	Total rainfall 28·99; crops in three taluks have suffered slightly from excessive rain; cholera throughout the district, although decreasing in some taluks.
Southern Mahratta Country.		
	2·39	Total rainfall 44·39; cholera in 3 taluks.
Belgaum (August 11th)	·83	Total rainfall 20·73; kharif crops good; rain wanted in 4 taluks.
Dharwar "	3·50	Total rainfall 76 inches; season satisfactory.
Kanara "	·6	Total rainfall 9·28; more rain wanted throughout; kharif still damaged by rats; cholera in two taluks, cases 37, deaths 15.
Kaladgi "		
Kathiawar and Gaekwar's Territory.		
	·32	Total rainfall 6·26; crops suffering from drought in some parts.
Rajkot (August 11th)	1·36	Total rainfall 9·53; more rain wanted; two deaths from cholera.
Wudwan "	1·46	Kharif and cotton crops healthy; public health good.
Baroda "		*General Remarks.*—Cholera abating except in Ahmedabad, where it has re-appeared; agricultural prospects generally good.
Bengal—		
Chittagong (Augt. 12th)	35·87	Cattle disease in parts.
Noakhally "	24·29	
Chittagong Hill Tracts, "	25 78	
Hill Tipperah "	21·71	
Backergunge "	11·60	The general health of the people is remarkably good, and the sick rate even in the notoriously unhealthy Jail is not quite 4 per cent.
Fureedpore "	8·59	General health good.
Dacca "	·98	
Tipperah "	·10	
Mymensingh "	7·91	
24-Pergunnahs "	1·52	Fever increasing at Barripore.
Calcutta "	1·84	
Nuddea "	4·07	
Moorshedabad "	Very heavy rain, but no return received.	
Jessore "	9·87	
Pubna "	3·47	Fever is still common in Pubna; a sudden outbreak of small-pox occurred in a village 10 miles north-east, 4 persons were attacked, 1 died, and the disease disappeared.
Rajshahye "	6·93	
Bogra "	7·0	
Maldah "	9·50	Cattle disease in parts.
Rungpore "	1·0	
Cooch Behar "	14·94	
Julpaiguri "	4·74	
Midnapore "	1·89	
Howrah "	4·15	
Hooghly "	4·27	General health fair; a little small-pox and cholera.
Burdwan "	1·18	General heath fair.
Bankoora "	4·63	
Beerbhoom "	9·59	
Sonthal Pergunnahs "	7·44	
Bhágalpur "	4·57	General health very good.
Monghyr "	6·53	
Purneah "	2·69	
Darbangah "	7·28	
Mozufferpore "	·97	
Sarun "	4·19	General health good.
Chumparun "	3·09	
Patna "	3·55	Health generally good, slight cholera.
Gya "	·84	Cholera still prevalent in some parts of the Aurungabad sub-division.
Shahabad "	0·51	
Hazáribágh "	2·08	A few cases of cholera reported.
Lohardugga "	2·48	Cholera still prevalent in Palamow; small-pox decreasing.
Maunbhoom "	5·33	
Singbhoom "	2·65	Cholera ceased.
Balasore "	1·16	The number of cholera cases has somewhat diminished.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Cuttack	(August 12th)	...	Cholera is still prevalent in places, but not severe.
Pooree	,,	·39	
			General Remarks.—In the western and central districts the rainfall has been ample and the prospects of the crops, especially of the late rice crops, are very promising; in the district of Jessore both the beel rice and indigo were injured by excessive rain, whilst in the district of Dinagepore the bhadoi or early rise was spoiled and the late bhadoi it is calculated will yield only an eight to ten-anna crop. In the eastern districts the rainfall has been unusually heavy, reaching 35·87 inches in the district of Chittagong, and 21·7 inches in that of hill Tipperah, doing considerable damage to villages, cattle, roads and the crops. The abundant rain in the Behar districts has generally resulted beneficially, the only exceptions being in the inundated lowlands and dearah lands on which the early bhadoi has considerably suffered; in the north-west of Purneah alone more rain is said to be wanted. In the Orissa districts the crops are in many places under water, but no great damage has yet been reported. The Gondli and Mokai crops have suffered from excess of rain in the Chota Nagpore districts, but the rice crops are said to be favourable.
N. W. P.—			
Benares	(August 11th)	...	Average 4·50; prospects generally favourable; floods have subsided after doing a good deal of damage to houses in the city and crops in river villages.
Mirzapur	,,	From ·8 to 2·7	Prospects excellent except in recently flooded tracts; river fallen; kharif crops except sugar-cane much injured by recent floods covering more than one-third of the district.
Azamgarh	(10th)	At head-quarters, 9·9	Prospects generally good, though the rainfall in some places has been excessive.
Cawnpore	(11th)	...	Average 1·50; prospects good.
Banda	(12th)	...	Kharif in low lands damaged by floods; weeding obstructed by rain.
Allahabad	11th)	...	Average 2.0; immense damage to over 200 villages chiefly on Tons and Belan; 174 lives reported lost up to date; crops severely injured; great loss of agricultural cattle and stored grain; full reports not received yet; pressing distress being alleviated; general health good.
Hamirpur	,, (12th)	...	Average 2·1; a break much wanted.
Jhansi	,, (10th)	2·4	Upwards of 10 inches of rains in parganas Mau and Garotha; a break required for weeding.
Agra	,, (11th)	From .6 to 3.4	Prospects good.
Meerut	,,	From 1·6 to 2·9	Prospects good.
Moradabad	,,	...	The season continues to be favourable.
Bareilly	,,	·7	Sowings of Joar and Bajra going on.
Punjab—			
Delhi	(Aug. 12th)	2·6	Agricultural prospects improving; health of district good.
Hissar	,,	4·4	Crop prospects improved, ploughing and sowing in progress, and grass now obtainable for cattle; a few cases of cholera in certain villages of Hissar, otherwise health good; cattle disease in a few villages of Sirsa.
Umballa	,,	3·9	Crops good; cholera still prevalent.
Jullundur	,,	3·8	Crops and health good.
Lahore	,,	11·	Health and crops good.
Mooltan	,,	*Nil*	Weather cloudy; crops and health good.
Dera Ismail Khan	,,	Slight fall of rain.	Health good and prospects of harvest in parts favourable.
			General Remarks.—No reports from the north, telegraph communication interrupted, but heavy rain known to have fallen and a great extent of country flooded; rainfall in Lahore the heaviest known for years and destruction of house property very great.
Oudh—			
Lucknow	(Aug. 11th)	6·3	Prices stationary; public health good; rain general throughout; prospects of the crops very favourable.
Sitapur	,,	3·4	
Fyzabad	,,	4·8	
Central Provinces—			
Upper Godavari	(Aug. 7th)	3·77	Prospects favourable; prices easy.
Sambalpur	,,	2·96	Prospects favourable; 38 cases of cholera, 21 fatal.
Bilaspur	,,	1·97	Cholera and small-pox continue; prices steady.
Raipur	(8th)	4·20	Cholera continues; prices easy.
Chanda	,,	3·48	Crops doing well; cattle disease continues; prices easy.
Balaghât	(9th)	6·40	Transplanting rice continues; health good; prices steady.
Bhandara	(10th	4·68	Rice crops continue favourable; jowar suffered in consequence of much rain, small-pox, fever and cattle disease prevalent; prices stationary.
Nagpur	(11th)	2·16	Crops doing well; cholera increasing; prices stationary.
Wardha	,,	2·40	Sowings completed; cholera increasing.
Nimar	,,	4·60	Weeding commenced; 111 cases of cholera, 42 fatal; prices falling.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*			
Hoshangabad	(Aug. 11th)	3·28	64 cases of cholera, 27 fatal.
Betul	,,	2·57	A break required; cholera prevalent.
Narsinghpur	,,	3·0	Prospects unfavourable owing to continued heavy rains; cholera continues.
Jubbulpore	,,	2·25	Health good.
Saugor	,,	5·81	Crops suffering from want of weeding; preparation of rabi lands stopped in consequence of continued heavy rains; health good; prices stationary.
Seoni	,,	4·10	Transplanting rice continues; prospects favourable; health good.
Damoh	,,	2·30	A break wanted; prices stationary.
Mandla	,,	3·60	A break wanted; small-pox continues; prices stationary.
			General Remarks.—On the whole prospects not altogether favourable; rain has been too incessant; cholera too is slightly on the increase.
British Burmah—			
Arakan	(August 11th)	...	Public health good.
Akyab	,,	11·0	Sowing progressing.
Pegu	,,	Abundant	Public health good.
Rangoon	,,	...	Considerable cattle disease; cultivation progressing favourably.
Tenasserim	,,	...	Public health good; few cases of Cholera at Thatone and Shwegyeen; crops flourishing; inundations in some places.
Tounghoo	,,	5·50	
Amherst	,,	4·0	
Mysore and Coorg—			
Mysore	(August 12th)	1· in Bangalore Cantonment.	17 fatal cases of cholera in Mysore District and town since last report.
Coorg	,,	6·52	Health good.
			General Remarks.—Agricultural prospects generally fair, but more rain needed especially in two districts whence reports are gloomy.
Assam—			
Gauhati	(August 12th)	1·95	Mornings more or less overcast, with slight rain; days fairly cool; transplanting of saleo progressing; prospects of tea favourable; public health good.
Sylhet	,,	4·05	Finer weather; prices falling.
Hyderabad Assigned Districts—			
Umraoti	(August 12th)	1·50	Cholera broken out in Woon District, decreasing in other five districts of province; agricultural prospects good.
Rajpootana—			
Sirohi	(August 9th)	·25	Tanks and wells filled; health and prospects good; weather seasonable.
Aboo	(12th)	5·16	Total rainfall 64·70.
Meywar	(6th)	·10	Tanks full; health good; prospects fair; cloudy sky; sunshine required.
Marwar	,,	...	Wells ceased to rise; tanks drying daily; mild fever prevailing; crops promising though damaged by Kotra worms; no rain; heat very oppressive.
Harowtee States.			
Deolee	(August 7th)	·7

The Gazette of India.

No. 34. SIMLA, SATURDAY, AUGUST 21, 1875. Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 19TH AUGUST 1875.

GENERAL REMARKS.—Floods have injured the crops in several provinces. In the Central districts of Bengal rice and indigo have both suffered, and in the Eastern districts there has been considerable destruction in the rice crops. In the North-Western Provinces also, where the rains have been heavy a break is wanted, and the crops in the flooded lands have suffered severely: but here and in Bengal prospects are satisfactory wherever the floods have not extended. In the Punjab, the Central Provinces and Central India, and Burmah, floods have also done damage, especially in the Lahore district of the Punjab. In all these provinces however prospects are on the whole satisfactory. From Madras, Berar, Rajputana, Oudh and Assam reports are favourable. In Bombay also the state of the crops is generally satisfactory, but in three districts (Ahmednagar, Khandesh, and Kaladgi) the want of rain is felt. More rain is also wanted in Mysore (where the crops are suffering in parts) and Nepal. In Sindh prospects are generally satisfactory, except in Kurrachee, where caterpillars are damaging the crops.

On the whole, except in flooded districts, the crops are in very good condition.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(August 19th)	2·74 at Masulipatum. 5·47 at Bezwara. 4·37 at Gudivada.	Rain good elsewhere, none in Kimkonda; 9 feet 11 inches water over anicut; canals full; early crops sown; transplanting progressing; standing crops good, except in inundated country; prices steady; mild small-pox in three talukas; fever in Guntur; markets well supplied; cattle generally healthy; pasture sufficient.
Kurnool	(18th)	0·10 in one day.	Rain moderate in six talukas, scarce in Pattikonda and Rawalkota; early dry crops good; markets moderately supplied; prices steady; water and pasture sufficient; some tanks received partial supplies; fever and small-pox prevalent; cattle healthy; 1·7 feet water over Sunkesala anicut yesterday.
Tanjore	(19th)	1·75 at Negapatam.	Rain elsewhere insufficient; supply in rivers moderate, in tanks scanty; water over upper anicut, north branch, 1 inch, south 6 inches; lower north branch 7½ inches, south 8½ inches; cultivation wet and a few dry crops; standing crops very few; dry crops in Tanjore taluka not thriving; harvest none; market well supplied; prices steady; cholera abating, 362 deaths this week against 507 last week; cattle disease in Sheally and Manargudi; pasture inadequate.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (August 18th)	Slight but general rain between 11th and 15th.	Wet crops good, dry crops want water; cholera in town very slight, much better in district, except in Udiarpollium, where it still prevails; cattle healthy; pasture ample in wet parts, scanty in dry parts of district.
Malabar (19th)	2·27	Prospects favourable; markets well supplied; prices high; bowel-complaint prevalent in Ernad and Calicut, five cases and three deaths; fever prevalent in Ernad and Walluvanad; cattle disease in Wynaad; pasture flourishing. *General Remarks.*—General prospects satisfactory.
Bombay— (August 19th)		
Sind.		
Kurrachee (August 18th)	...	River still rising; myriads of caterpillars damaging crops in Kurrachee taluka; rain holds off; total fall to date in Kurrachee 3·16.
Shikarpur „	1·9 in three talukas.	Slight rain; kharif crops flourishing; river 15 feet 3 inches, one foot two inches above last year.
Hyderabad „	...	River a little higher than last week.
Upper Sind Frontier „	...	Kharif sowings progressing; canals well supplied; cotton crops in taluka Thul damaged by floods extending north to Tangwani, west towards Gunia and the Nurwah, progress very slow; part of Shikarpur—Jacobabad road flooded.
Guzerat.		
Ahmedabad (August 18th)	1·27	Total rainfall 11·53; more wanted for rice; cholera cases 186, deaths 40.
Kaira „	·57	Total rainfall 22 inches; prospects good.
Surat „	·46	Total rainfall 31·2.
Broach „	2·42	Total rainfall 39·92; cholera slight.
Khandesh and Nasik.		
Khandesh (August 18th)	·53 at Dhulia.	Total rainfall 10·34; kharif crops promising; cultivation of American cotton increased; cholera cases 587, deaths 248; cattle disease in two talukas.
Nasik „	·99	Total rainfall 27·12; grain crops suffering in two talukas from excessive rain; cotton crops promising; cholera continues slightly.
Konkan.		
Tanna (August 18th)	3·1	Total rainfall 84·88; transplantation of crops almost completed; cholera still slightly prevalent.
Deccan.		
Poona (August 18th)	·99	Total rainfall 26·89; young plants well; cholera continues slightly.
Ahmednagar „	·07	Total rainfall 4·22; sowing finished in eight talukas, and crops withering in four; cholera decreasing except in four talukas.
Sholapur „	·26	Total rainfall 9·89; cholera diminished.
Satara „	3·30	Total rainfall 32·29; sowing of bajri partially completed; young crops flourishing in four talukas, but slightly injured by excessive rain; cholera prevalent.
Southern Mahratta Country.		
Belgaum (August 18th)	1·92	Total rainfall 46·31; cholera continues; crops good.
Dharwar „	·64	Total rainfall 21·37; kharif crops good; rain wanted in black soil talukas.
Kanara „	13·	Total rainfall 22·8 inches; season good.
Kaladgi „	·16	Total rainfall 9·44; more rain wanted throughout; kharif sowing not finished; crops already sown well; cholera at Kaladgi and in three talukas, 34 deaths.
Kathiawar and Gaekwar's Territory.		
Rajkot (August 18th)	2·33	Total rainfall 8·49; more generally wanted throughout the province; crops suffering for want of it.
Wudwan „	1·28	Total rainfall 10·81; crops good except at Sitha where they are damaged by insects. *General Remarks.*—Rainfall satisfactory, except in Ahmednagar, Khandesh, and Kaladgi; cholera general, except in Sind; but the epidemic is not virulent.
Bengal—		
Chittagong (Augt. 19th)	2·17	
Noakhally „	·61	
Chittagong Hill Tracts „	3·75	
Hill Tipperah „	1·12	Health good.
Backergunge „	·91	Health good.
Fureedpore „	·11	General health good.
Dacca „	·75	
Tipperah „	3·20	
Mymensingh „	·74	
24-Pergunnahs „	3·59	Ordinary fever prevailing in Diamond Harbour and Basirhat Sub-division.
Nuddea „	·23	
Moorshedabad „	·34	
Jessore „	·73	
Pubna „	·51	
Rajshahye „	1·69	37 cases of cholera have been reported during the week, 24 proved fatal.
Bogra „	·34	Fever prevailing to a great extent.
Maldah „	2·38	
Dinagepore „	1·38	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Rungpore (Aug. 19th)	·50	
Cooch Behar „	3·70	
Jalpaiguri „	·40	
Darjeeling „	Not received.	
Midnapore „	1·23	
Howrah „	1·11	
Hooghly „	1·20	Small-pox a little on increase, measles in places; general health good.
Burdwan „	·79	Health fair.
Bankoora „	·68	
Beerbhoom „	1·35	
Sonthal Pergunnahs „	·90	Cholera still hanging about Deoghur.
Bhágalpur „	1·30	Fever and small-pox reported from Madehpoora, elsewhere health is very good.
Monghyr „	·49	
Purneah „	·98	
Darbangah „	Not received.	
Mozufferpore „	·35	
Sarun „	·58	Cholera has broken out again at Raghanathpur, an outpost of thana Darowli, in Sewan Sub-division.
Chumparun „	3·53	
Patna „	·06	Health generally good.
Gya „	1·13	Sickness decreasing.
Shahabad „	1·30	General health good.
Hazáribágh „	1·92	Cholera continues where first reported.
Lohardugga „	2·17	Cholera still prevalent in Palamow.
Maunbhoom „	2·08	
Singbhoom „	4·66	Healthy.
Balasore „	4·84	Cholera on the decrease.
Cuttack „	1·38	Cholera appears to be decreasing.
Pooree „	3·91	*General Remarks.*—In the western districts the reports of the state and prospects of the crops are favourable; the indigo prospects are also good. The reports from the central districts are also generally favourable, but both rice and indigo have suffered more or less in the submerged lands. Nearly the whole of the eastern districts suffered considerably from the late floods, and there was much destruction of the amun seedlings. Re-sowing is proceeding steadily, and it is anticipated that much of the injury will be repaired in the Behar districts; the bhadoi crops are flourishing, though some injury has been done to them and the makai in the low lands by the floods; transplanting is going on vigorously. The crops in the Orissa and Chota Nagpore divisions are also generally promising; the murwa millet in Hazaribagh is recovering itself, but both murwa and goondli millets in Lohardugga have suffered much.
N. W. P.—		
Benares (August 18th)	...	Kharif in tahsil Benares damaged by heavy rain; favourable reports from other parts; a break is wanted.
Mirzapur „	1·3 to 2·6	Kharif promising except in flooded tracts.
Azamgarh (17th)	3·8 at headquarters.	Prospects good.
Cawnpore (18th)	Average rainfall 2·50.	Prospects good.
Banda (19th)	Average rainfall 2·1.	Crops in low lands in danger; a break wanted.
Allahabad (18th)	2·5	Bajra sowing going on generally; health good. No distress for food; rebuilding cannot commence until rain stops.
Hamirpur (19th)	Average rainfall 2·	A break is wanted.
Jhansi (17th)	·1 at headquarters.	Prospects favourable.
Agra (18th)	1·1 to 7·3	Prospects good.
Meerut „	2·4 to 6·1	Prospects good.
Moradabad „	...	Rains still heavy; a break wanted.
Bareilly „	...	Prospects good.
Almorah (19th)	Daily showers.	In valleys and irrigated lands complaints are made, but elsewhere prospects are very good.
Punjab—		
Delhi (Aug. 18th)	4·1	Health and prospects good.
Hissar „	3·7	Agricultural prospects improved; grass abundant; health generally good, though cholera still lingers; slight cattle disease in Sirsa villages.
Umballa „	5·2	Crops good; cholera has not quite disappeared.
Jullundur „	12·9	Heavy floods; much damage done to crops, villages and wells; a few cases of cholera; otherwise health good.
Lahore „	3·5	The recent heavy floods have done immense damage to house property in towns, also to district communications; agricultural prospects and health good.
Rawal Pindi „	·25	Agricultural prospects excellent.
Mooltan „	1·1	Great damage to crops by floods; health good.
Dera Ismail Khan „	1·9	Health and agricultural prospects good.
Peshawur „	1·3.	Sowing in progress; fever and small-pox prevalent. *General Remarks.*—Rain has fallen abundantly in those districts which up to the last week or two were most in need of it. The excessive rainfall in other districts has caused considerable damage.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Oudh—		
Lucknow (Aug. 18th)	8·5	Public health good; rain general; kharif prospects continue favourable; prices stationary.
Sitapur „	3·2	
Fyzabad „	2·6	
Central Provinces—		
Upper Godavari (Aug. 14th)	2·86	Prospects favourable; health good.
Sambalpur „	4·3	Prospects good; cholera continues.
Bilaspur „	·76	Prospects favourable; cholera and small-pox continue.
Raipur (15th)	1·60	Prospects excellent; cholera continues; prices easy.
Chindwara „	1·45	Prospects unchanged; 174 cases of cholera, 80 fatal; prices steady.
Chanda „	4·1	Sowings of late kharif crops delayed owing to excessive rain; 10 cases of cholera, 4 fatal; cattle disease abating; prices easy.
Balaghât (16th)	2·90	Transplanting rice completed; fever prevalent; prices steady.
Bhandara (17th)	8·11	Rice crops good; failure of jowar on low lands anticipated owing to excessive moisture; 7 cases of cholera; fever and small-pox continue.
Nagpur (Aug. 18th)	4·35	Cotton and jowar suffered from continuous rain; cholera continues; prices rising.
Wardha „	3·20	Prospects fair; cholera continues.
Nimar „	·92	Weeding commenced; 96 cases of cholera, 46 fatal; prices fallen.
Hoshangabad „	4·74	A break wanted; 27 cases of cholera, 15 fatal.
Betul „	4·77	A break wanted; 37 cases of cholera, 19 fatal.
Narsinghpur „	3·	A break wanted; 19 cases of cholera, 8 fatal.
Jubbulpore „	3·10	A break wanted; health good; prices rising.
Saugor „	4·29	Jowar and cotton damaged owing to excessive rains; rabi ploughing stopped; prices stationary.
Seoni „	1·60	Transplanting rice continues; prospects good; fever and bowel-complaint prevalent.
Damoh (19th)	1·30	A break wanted; prices stationary.
Mandla „	4·	A break wanted; small-pox continues; prices stationary.
		General Remarks.—Excessive rain has injured jowari in low lands, and a break is wanted in the Narbada Valley, Saugor and Damoh. Prospects of rice crops good.
British Burmah—		
Arakan (August 18th)	5·0 in Akyab.	In Akyab public health good.
Pegu „	25 inches over last year in Rangoon District.	Public health good. In Rangoon district cattle disease still prevalent; crops favourable. Inundations excessive in the Thayetmyo, Henzada and Prome districts; embankments at Kyanghen in Henzada district washed away.
Tenasserim „	Plentiful.	Public health good; fever at Shwegyeen and small-pox at Tavoy; crops flourishing, inundated at Tounghoo.
Mysore and Coorg—		
Mysore (August 19th)	1·32 in Bangalore Cantonment.	Cholera confined still to Mysore district; 63 deaths up to date; want of rain felt generally; crops suffering in parts.
Coorg „	6·15	Health good.
Assam—		
Gauhati (August 19th)	1·34	Mornings overcast and cool, with occasional slight rainfall; days clear and hot; transplanting operations going on; season for tea favourable; public health good.
Sylhet „	2·67	Weather rainy; rice market steady; transplanting of shali crop progresses.
Hyderabad Assigned Districts—		
Umraoti (August 19th)	·05	Cholera increasing in Woon district, decreasing in other districts; crops in good condition.
Rajputana—		
Sirohi (August 16th)	·80	Prospects and health good; weather seasonable.
Aboo (19th)	·97	Total rainfall up to date 65·67.
Meywar (13th)	1·3	Wells and tanks full; health good; makai crops threatened by too much rain and want of sunshine; prospects still good; weather cloudy, with occasional sunshine.
Bickaneer (July 31st)	From 27th to 28th 2·90	Good deal of rain reported from districts; sowing progressing; prices decreasing; health fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—*continued.*		
Harowtee States.		
Ulwar (August 18th)	2·08	Temperature 84°; crops doing well; cholera still prevalent.
Jeypore (19th)	1·50	Prospects continue favourable; health good.
Ajmere „	1·1	Weather favourable for crops; health good; tanks not full.
Bhurtpore „	2·24	Crops progressing; weather favourable.
		General Remarks.—General prospects good; weather clearing.
Central India—		
Indore (August 18th)	·64	Damage in Baghelkund from floods; agricultural prospects improving in Malwa; cholera still sharp in places.
Gwalior „	1·46	
Neemuch „	*Nil*	
Rutlam „	·94	
Baghelkhund „	4·30	
Sutna „		
Bhopal Agency.		
Sehore (August 7th)	1·	
Beorah „	5·1	
Bhilsa „	4·5	
Nursingurh „	4·	
Nepal— (August 11th)	1·65	More rain needed in the hills; Indian corn crop in the Bara and Pursah districts of the Terai very deficient; cholera increasing in Katmandoo.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 19th August 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble T. C. Hope.

CENTRAL PROVINCES LAWS BILL.

The Hon'ble SIR D. FORSYTH introduced the Bill to declare and amend the law in force in the Central Provinces, and moved that it be referred to a Select Committee with instructions to report in two months. He said that when he had asked for leave to introduce the Bill, he explained that the Central Provinces was composed of various territories, the different Regulations applying to which were in some confusion, and that the present Bill, which was now prepared at the desire of the Local Government and to a great extent by the Judicial Commissioner, was intended to remove all doubts and difficulties with reference to the application of those laws.

The Bill was exceedingly short, and contained only ten sections. It repealed certain obsolete enactments, and declared what laws were in force throughout the Central Provinces. In order to preclude doubts which might arise from the way in which additions had from time to time been made to those Provinces, section 4 made the following declaration:—

"Every Act of the Governor General in Council which extends, or can by notification be extended, to the territories which were under the administration of the said Chief Commissioner at the time of the passing thereof, shall extend, or may by notification be extended, as the case may be, to all the territories now under the administration of the said Chief Commissioner."

There were no special laws applicable to the Central Provinces, as was the case in the Panjáb, such as the law of pre-emption, or the law relating to vagrants; and the work of the Committee, to whom he trusted this Bill would be referred, would consist chiefly in overhauling the different Acts and Regulations in the Schedules to see that they were correct. The Bill left untouched the revenue system of the Central Provinces, which would probably be dealt with by some other enactment.

The Motion was put and agreed to.

The Hon'ble SIR D. FORSYTH moved that the Bill be published in the *Central Provinces Gazette* in English and such other languages as the Local Government might think fit.

The Motion was put and agreed to.

OPIUM BILL.

The Hon'ble SIR W. MUIR moved for leave to introduce a Bill to amend the law relating to Opium. He said that the law was defective in various parts of India in respect of the control which the Government should have over the growth, manufacture, possession and transport of opium. In Bombay the cultivation of opium was prohibited, and its transport was practically under check; but the legal power for enforcing the action of the State in the matter was imperfect. In Madras, where the same practice prevailed, the state of things was still more defective, there being no law to enable the State to interpose in respect to the cultivation, manufacture, possession and transport of opium. Both these Administrations had had it in contemplation to introduce projects of law to remedy the want; but the subject of opium being an imperial one, it was thought better that the law should be uniform throughout India, and they were therefore requested to stay their action in respect to the introduction of the Bills which they had before them. The law was also in some respects uncertain in other parts of British India, that was to say, with regard to the new Administrations which had been formed in recent times. Advantage would be taken in the Bill to remove these doubts by having a uniform law which would be applicable to the whole country, and which would give the authorities the necessary power to interpose in the matter as he had explained. Opium being the subject of imperial revenue, there appeared no doubt that the proposed legislation should be by this Council, and should be also of an imperial character. At their next meeting he would take the opportunity of introducing the Bill and of explaining the provisions of the proposed measure.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to declare and amend the law in force in the Central Provinces—The Hon'ble Messrs. Hobhouse and Hope and the Mover.

The Council then adjourned to Thursday, the 2nd September 1875.

SIMLA,
The 19th August 1875.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 26TH AUGUST 1875.

GENERAL REMARKS.—More rain is wanted in Bombay, and in Sindh caterpillars and rats are injuring the crops; but prospects are still generally good. In Bengal also more rain is wanted in the Central districts, but the prospects of the main rice crop and of the *rabi* crops are good. The early rice crop has suffered in many districts from the floods, and the yield of indigo is uneven. In Mysore and Coorg and in Nepal also the want of rain is much felt. On the other hand in the North-Western Provinces a break in the rains, which was much wanted, seems to have set in generally. In the Central Provinces also a break is greatly wanted: the autumn crops have suffered from excessive rain, but in the rice districts prospects are good. In Madras, the Punjab (where there has been a break in the rains), Oudh, British Burmah (where the floods are subsiding), Assam, Berar, Rajputana and Central India, prospects are generally satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(August 26th)	No rain in Masulipatum and Rewarri.	Rain very slight elsewhere; 5 feet 7 inches of water above anicut; canals full, except two that breached; early crops sown; transplanting progressing; early crops require more rain in Bapatha and Palnad; markets well supplied locally; prices steady; mild small-pox and fever in four taluks; cattle disease slight in three taluks; pasture sufficient.
Kurnool	(25th)	No rain in Kurnool, nor in three taluks.	Rain slight in others; standing crops suffering from want of rain in Sirwill and Pattikonda, good elsewhere; market moderately supplied; prices rising in Nundial and Markapur, steady in other taluks; fever and small-pox prevalent; cattle generally healthy; water and pasture sufficient; one foot water over Sunkesala anicut yesterday.
Tanjore	(26th)	1·99 at Negapatam.	Rain elsewhere insufficient; water supply in rivers moderate, in tanks scanty; water over upper anicut, north branch, 1 foot, south 5 inches; lower, north 4·50 inches, south 4 inches; cultivation wet and a few dry crops; standing crops not thriving in some parts for want of rain; harvest none; market well supplied; prices steady; cholera abating; 343 deaths this week against 362 last week; cattle disease in Sheally, Negapatam and Manargudi; pasture inadequate.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (August 25th)	Good rain the last few days.	Cholera in town very slight, a few cases in district, principally in Udiarpolliem.
Malabar (26th)	1·29	Rain insufficient; first crop cultivation good; markets well supplied; prices steady; bowel complaint, 22 serious cases and 13 deaths; fever in Ernad and Walluvanad; cattle disease in Wynaad; pasture flourishing. *General Remarks.*—General prospects satisfactory.
Bombay— (August 26th)		
Sind.		
Kurrachee (August 25th)	...	River risen 4 inches; caterpillars infest Kurrachee taluka; rats in Jati taluka.
Shikarpur ,,	...	Weather cooler; river 14 feet 9 inches, which is 1 foot 2 inches higher than last year; fever prevalent.
Hyderabad ,,	...	River steady; crops well; in Guni taluka rats attacking crops; fever has commenced.
Upper Sind Frontier ,,	...	Floods extending slowly; Jacobabad partly surrounded; river falling; damage to kharif crops not fully known.
Gujarat.		
Ahmedabad (August 25th)	·13	Total rainfall 11·66, more needed everywhere; cholera cases 175, deaths 32.
Kaira ,,	·28	Total rainfall 22·28; more rain required for rice; other crops good.
Surat ,,	·18	Total rainfall 31·20.
Broach ,,	·28	Total rainfall 40·20; public health good; slight cholera in Ankleswar; crops thriving.
Khandesh and Nasik.		
Khandesh (August 25th)	...	Rain wanted throughout the Collectorate for kharif and cotton crops; cholera abating, cases 391, deaths 142; cattle disease continues in two talukas.
Nasik ,,	·17	Total rainfall 27·29; sowing progressing; prospects fair; cholera continues slightly.
Konkan.		
Tanna (August 25th)	·34	Total rainfall 85·22; transplantation of crops completed in almost all talukas; cholera continues slightly in the districts.
Deccan.		
Poona (August 25th)	...	Condition of crops same as before; cholera has not quite disappeared.
Ahmednagar ,,	·10	Total rainfall 4·32; kharif sowing finished; land unsown in 77 villages in 2 talukas; crops withering in 8, and cholera abating in 6 talukas.
Sholapur ,,	...	Crops suffering from want of moisture; cholera decreasing.
Satara ,,	...	Crops flourishing, but have suffered slightly in 3 talukas from excessive rain; slight cholera throughout district.
Southern Mahratta Country.		
Belgaum (August 25th)	·09	Total rainfall 46·40; more rain required in northern and eastern talukas; cholera decreasing; crops good, but damaged by locusts and rats.
Dharwar ,,	·23	Total rainfall 21·60; kharif crops suffering for want of rain in 6 talukas; ground being prepared for sowing late crops.
Kanara ,,	1·	Total rainfall 23·8; crops good.
Kaladgi ,,	·12	Total rainfall 9·56; kharif already sown, but withering for want of rain; cholera in 6 talukas, severe in Indi, 14 cases fatal at Kaladgi and 85 in the district.
Kathiawar and Gaekwar's Territory.		
Rajkot (August 25th)	·12	Total rainfall 8·61; crops suffering for want of rain; price of grain rising; cholera at Bhounagar and Wala abating.
Wudwan ,,	·54	Total rainfall 11·35; crops good; cholera cases 5, fatal 3.
Baroda ,,	2·54	Cotton and kharif crops thriving; public health good. *General Remarks.*—During the past week there has been a general break in the monsoon; prospects generally good.
Bengal—		
Chittagong (Aug. 26th)	9·17	
Noakhally ,,	1·73	Fever has been more prevalent.
Chittagong Hill Tracts ,,	1·3	
Hill Tipperah ,,	2 18	Public health is good everywhere except in Koilashur where a good deal of fever prevails in the low lands.
Backergunge ,,	·82	Health of the people is good.
Fureedpore ,,	1·03	General health good.
Dacca ,,	1·39	
Tipperah ,,	6·23	
Mymensingh ,,	1·04	
24-Pergunnahs ,,	2 83	Fever increasing at Barripore, ordinary fever prevailing in sub-division Basirhat; two cases of small-pox reported from Satkhira.
Nuddea ,,	1·87	
Moorshedabad ,,	·76	Health good.
Jessore ,,	1·83	
Pubna ,,	·94	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Rajshahye (August 26th)	·83	10 cases of cholera have been reported in different places during the week, 5 fatal.
Bogra ,,	·44	
Maldah ,,	1·05	Cholera is still present in the English bazaar; in Maldah and Seebgunge thanas 17 attacks and 13 deaths.
Dinagepore ,,	2·41	
Rungpore ,,	7·59	
Cooch Behar ,,	·53	
Jalpaiguri ,,	5·33	Cholera still continues in two places in the district, a few cases only occurring.
Darjeeling ,,	4·87	
	Previous week 2·98	
Midnapore ,,	1·18	
Howrah ,,	3·10	
Hooghly ,,	3·13	General health good; small-pox in a few places.
Burdwan ,,	1·0	Health fair.
Bankoora ,,	3·19	
Beerbhoom ,,	2·08	
Sonthal Pergunnahs ,,	1·22	Cholera disappearing from Deoghur, but reported from a village in Hendowa.
Bhágalpur ,,	2·46	General health very good, but cholera has broken out in town at head-quarters.
Monghyr ,,	·72	
Purneah ,,	3·66	
Darbangah ,,	2·89	
	Previous week ·99	
Mozufferpore ,,	1·87	
Sarun ,,	·78	Cholera still bad in the jurisdiction of Roghonathpore, an outpost of thana Darowli in Sewan sub-division.
Chumparun ,,	1·84	
Patna ,,	·81	Health generally good.
Gya ,,	3·07	A little sickness reported.
Shahabad ,,	Not received.	
Hazáribágh ,,	3·29	Cholera abating.
Lohardugga ,,	6·20	Cholera still prevalent in Palamow.
Maunbhoom ,,	1·26	
Singbhoom ,,	2·64	Healthy.
Balasore ,,	6·50	Cholera has disappeared from the north, while sporadic cases are reported as still frequent in the south.
Cuttack ,,	2·51	Cholera has almost disappeared.
Pooree ,,	·38	
		General Remarks.—More or less rain is reported from all the districts of these Provinces during the week under report; but more rain is still wanted in parts of the districts of Burdwan, Bankoora, Dinagepore, Rungpore, Bogra, Cooch Behar, Patna, Gya, Mozufferpore, Sarun, Bhágalpur, Purneah and Maunbhoom. The harvesting of the early rice crop is progressing fast; the outturn is reported to be good. In Moorshedabad the loss of the early rice crop has been considerable, five annas loss at Lalbaugh and four annas at Jungipore. If the rivers continue to fall, a fair crop is expected in the Sudder sub-division. In Maldah the floods have done serious injury, and the total outturn is still uncertain; mulberry has suffered also. Half of the early rice crops has been destroyed in Chittagong; in the hill tracts the Kurnapoolie rose 6 feet above its usual height. Great damage done to plough cultivation in Hill Tipperah; the early rice in the valley of Koilashur has been completely destroyed by inundation, and great damage is reported to have been caused in Oodeypore; the loss is estimated at half in the plains and one-fourth in the hills. In Monghyr the bhadoi crop between the Ganges and the Gunduck has been generally damaged or destroyed by the flood, but the silting deposit on the soil will produce fine rabi crops. The transplantation of the amun or main rice crop is nearly completed in some districts, while more rain is wanted in others to complete it. In Balasore the rainfall not only exceeded the requirement, but has hindered the cultivation; generally speaking, however, it may be said that the prospects of the great rice crop are favourable in most places. Indigo has been an uneven crop this season; in some districts the yield has been a very good one, while in others it was a poor one. Jute is being cut. Sugarcane doing well.
N. W. P.—		
Benares (August 23rd)	Average rainfall 7·50.	There is some appearance of a break, which is much wanted.
Mirzapur (25th)	20·4 at head-quarters; *elsewhere less down to 5·7 at Chunar.*	Some injury in parts from heavy rain; a break required and seems to have arrived; prospects as before.
Azamgarh (24th)	3·7 at head-quarters.	Prospects on the whole still good; some days of clear weather would be beneficial; some early kharif grain crops ripe and ripening; indigo being cut.
Banda (26th)	Average rainfall 3·3.	Some damage to kharif from rain; weather improving.
Hamirpur (26th)	Average rainfall 4·3.	Sunshine much required; fine weather the last three days.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P.—*continued.*		
Jhansi (August 24th)	From 17th to 23rd instant, 3·2	Break urgently wanted; kharif prospects depend now on dry weather; rain has prevented bajra sowings.
Agra (25th)	No rain for some days.	Prospects favourable.
Meerut "	...	A break in the rains; prospects good.
Moradabad "	...	A break in the rains; reports good.
Bareilly "	1·1	Prospects good.
Allahabad (26th)	Average rainfall, 6·50	Much recently sown bajra swept away; a break appears now to have set in.
Cawnpore "	Average rainfall, 3·	A break wanted; prospects good.
Almorah "	...	Less rain during past week; crop prospects excellent.
Punjab—		
Delhi (August 25th)	...	No rain; agricultural prospects and health of district good.
Hissar "	...	No rain; strong westerly winds and cloudy weather; sowing in progress; young crops doing well since the ample rainfall; health generally good, though there are still a few cases of cholera.
Umballa "	...	No rain; crops good; cholera not yet entirely disappeared.
Jullundur "	...	No rain; crops good, except where injured by floods; a few cases of cholera, but health generally good.
Lahore "	...	No rain; health and agricultural prospects good.
Rawal Pindi "	·5	Prospects excellent; health good.
Mooltan "	...	No rain; crops under average; health good.
Dera Ismail Khan "	...	No rain; agricultural prospects favourable.
Peshawur "	...	No rain; sowing completed; still slight fever but small-pox abating.
		General Remarks.—Health and agricultural prospects generally good.
Oudh—		
Lucknow (August 25th)	1·7	Public health good; prices stationary; kharif prospects continue favourable.
Sitapur "	2·7	
Fyzabad "	3·3	
Central Provinces—		
Upper Godavari (Aug. 21st)	1·27	Prospects favourable; small-pox continues; prices easy.
Sambalpur "	5·97	Prospects good; cholera decreasing.
Bilaspur "	1·8	Prospects favourable; cholera and small-pox continue; prices steady.
Raipur (22nd)	·65	Rainfall ample; prospects good; cholera continues; prices easy.
Chhindwara "	1·96	Prospects unchanged; 222 cases of cholera, 122 fatal.
Chanda "	·04	Prospects good; cholera prevalent; rinderpest continues; prices rising.
Balaghât (23rd)	2·10	Transplantation of rice completed; fever and cattle disease prevalent; prices steady.
Bhandara (24th)	·22	Prospects of rice good; jowar in low lands damaged by over moisture; 24 cases of cholera, 10 fatal; fever and small-pox continue; prices easy.
Nagpur (25th)	·42	Jowar and cotton suffered from over moisture, other crops good; cholera continues; cattle disease prevalent; prices stationary.
Wardha "	1·42	Prospects favourable; cholera increasing.
Nimar "	1·24	Prospects favourable; 148 cases of cholera, 57 fatal; prices rising.
Hoshangabad "	1·73	Cholera continues.
Betul "	2·97	Crops partially damaged; 77 cases of cholera, 23 fatal.
Narsinghpur "	7·	A break much required; cholera continues.
Jubbulpore "	·95	Health good.
Saugor "	5·11	Crops injured by continuous rain; rabi ploughing stopped; cholera prevalent.
Seoni "	·95	Transplanting of rice continues; prospects and health good.
Damoh "	5·45	A break required; prices stationary.
Mandla "	1·60	A break required; small-pox decreasing; prices stationary.
		General Remarks.—In rice districts prospects good, jowari in low lands injured. In Narbadda Valley and Vindhyan districts a break much wanted, and autumn crops injured. Cholera still prevalent.
British Burmah—		
(Aug. 26th)		
Arakan Division ...	4·5 in Akyab.	Public health good; crops promising.
Rangoon "	...	Sowing impeded by heavy floods; public health good.
Prome "	...	Floods subsiding.
Thayetmyo "	...	River fallen; inundation subsiding; in Thoukwa rainfall heavy; crops good; health good.
Bassein "	...	Public health good.
Shwegyeen "	...	Fever, cholera and small-pox prevail; rainfall plentiful.
Amherst "	...	Fever, cholera and small-pox prevail; crops promise fair.
Tavoy "	...	Cattle disease prevails.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg—		
Mysore (August 26th)	·22⅛ in Bangalore Cantonment.	Cholera has not extended beyond the Mysore District; 96 deaths up to the 25th instant; want of rain much felt.
Coorg "	1·73	
Assam—		
Gauhati (August 26th)	6·21	Light rains during the early part of the week, heavy continuous rain on the last three days, still continuing; prospects of all crops and tea favourable; public health good.
Sylhet "	12·54	Transplantation of shali crop progresses; price of rice slightly higher; very heavy rains; river risen considerably.
Hyderabad Assigned Districts—		
Umraoti (August 26th)	1·45	Cholera still prevalent in the Woon District, gradually disappearing from other districts of the province; crops in good condition.
Rajputana—		
Sirohi (August 23rd)	...	Tanks and wells fairly filled; health good; prospects fair; more rain required; weather seasonable.
Aboo (26th)	...	No more rain; weather clear and pleasant.
Meywar (20th)	...	Good supply of water; health and prospects good; south-westerly breezes; clear sky and sun.
Marwar (14th)	1·96	Four months' supply in city tanks; well water rising; fever prevalent; prospects much improved and promising.
Harowtee States.		
Deolee (August 14th)	3·4	
Kota "	4·5	
Tonk "	2·5	
Jhalrapatun "	1·8	
Shahapoora "	2·3	
Ulwar (25th)	·72	Temperature 86°; crop prospects favourable; cholera still prevalent.
Jeypore (26th)	0·1	Agricultural prospects unchanged; public health good.
Dholepore ...	...	No rain; sky cloudless; prices of food-grain rising; rain much wanted.
Ajmere ...	...	Strong westerly winds; no rain; health good; crops good.
Central India—		
Indore (August 25th)	1·97	
Gwalior "	·32	
Neemuch "	·10	
Rutlam "	·75	
Baghelkhund "	1·90	
Sutna "		
Bhopal "	3·8	
Rajgarh "	11·6	
Bhilsa "	4·9	
Nursingarh "	3·2	
Kilchipur "	8·6	*General Remarks.*—Cholera decreased in Malwa, some cases in Gwalior; agricultural prospects favourable.
Nepal— (August 18th)	1·4	More rain wanted in the hills; cholera still in Katmandoo and its neighbourhood.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2ND SEPTEMBER 1875.

GENERAL REMARKS.—In Madras the rain has been partial, except in Malabar: most has fallen in the Northern districts: prospects are satisfactory. In Mysore more rain is much wanted. In Sind the river has fallen below last year's level, and unless it rises damage is apprehended to the kharif crops. In Bombay more rain is wanted in Gujarat, Khandesh and Ahmednagar; elsewhere enough has fallen and prospects are fair. In the Central Provinces a break has done good: the prospects of the rice crop are excellent, and those of other crops more promising. In Bengal there has been general and seasonable rain throughout the province: in some of the Eastern districts it has been excessive, floods having stopped rice transplantation; the indigo crop is excellent in Tirhoot, and prospects are generally satisfactory. There has been light rain in most districts of the North-West Provinces, except Bundelkhand, Meerut, Moradabad and Cawnpore: the break has done good generally, but more rain is wanted in Agra, Meerut and Moradabad. In Oudh there have also been light falls, and prospects are good. In the Punjab rain has fallen in Rawalpindi, but not elsewhere, except slight showers in Delhi and Peshawar; prospects are good. In Rajputana the break has been general, rain having fallen only at Mount Abu, in Bickanere and Jhalrapatan: in the Northern States and Ajmere more rain is much required. In Central India rain has failed only at Gwalior, where it is wanted: elsewhere prospects are satisfactory. Reports are good from Assam, Burma and Berar.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Sept. 2nd)	2·79 at Masulipatam. 6·35 at Repalli. 3·7 at Bapatla. 2·0 at Nandigama. 1·28 in four days.	Rain slight elsewhere; none in Sattanapully and Vissanapett; 3 feet water over anicut; canals full, except those requiring repairs; early crops sown; rain wanted in five taluks; transplanting improving; markets well supplied locally; prices steady; mild small-pox and fever; no cholera; slight cattle disease in five taluks; pasture sufficient.
Kurnool	(1st)		Rain good in five taluks, scanty in Sirwell and none in Cumbum and Markapur; crops suffering from want of rain in the last three taluks; markets moderately supplied; prices rising in Cumbum, generally steady elsewhere; fever prevalent; cholera has broken out in Sirwell, Pattikonda, Banganapilli and Kurnool town; 28 attacks and 10 deaths since 18th instant; cattle healthy; water and pasture sufficient; 1·5 feet water over Sunkesala anicut.
Tanjore	(2nd)	...	No rain at Negapatam; elsewhere sufficient; water-supply in rivers decreasing, in tanks scanty; water over anicuts none; cultivation wet and dry crops, standing crops not thriving in some parts for want of rain; harvest none; markets well supplied; prices steady; cholera abating; 158 deaths this week, against 243 last week; cattle disease in some localities; pasture procurable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (Sept. 1st)	...	Slight rain; water-supply barely sufficient; crops generally good; outturn in two taluks up to average; markets well supplied; prices steady; cholera disappearing, except in Udiarpolliem; condition of cattle good; pasture limited.
Malabar (2nd)	3·43	First crop good; markets well supplied; prices steady; bowel-complaints in Walluvanad and Palghat,—14 serious cases and 7 deaths; cattle disease in Wynaad; pasture flourishing. *General Remarks.*—General prospects satisfactory.
Bombay— (Sept. 2nd)		
Sind.		
Kurrachee (1st)	...	River on the 30th August 45 inches lower than on the same date last year; crops damaging rice crops in Shahbandar tapa; weather warm; nights still and close.
Shikarpur ,,	...	River 12 feet 2 inches, 1 foot 3 inches lower than last year; this fall will damage kharif crops.
Hyderabad ,,	...	River 2½ feet lower than last week; unless it rises crops will suffer, at present they are well.
Upper Sind Frontier ,,	...	Floods extending; height of water decreasing; weather hot; rain expected; kharif crops fair.
Gujarat.		
Ahmedabad (Sept. 1st)	·03	Total rainfall 11·69; crops suffering from drought; rain much needed; cholera cases 80, deaths 22.
Kaira ,,	·36	Total rainfall 22·64; more rain required; weather sultry.
Surat ,,	1·91	Total rainfall 33·11.
Broach ,,	1·96	Total rainfall 42·16; fever in Broach.
Khandesh and Nasik.		
Khandesh (Sept. 1st)	2·62 at Dhulia.	Rainfall very seasonable, total 12·96; crops revived and prospering; cholera abating rapidly,—cases 202, deaths 76; cattle disease in 2 pettas.
Nasik ,,	2·30	Total rainfall 29·69; agricultural prospects fair; cholera continues slightly.
Konkan.		
Tanna (Sept. 1st)	2·45	Total rainfall 67·67; more rain wanted; transplantation of crops completed; cholera slightly prevalent.
Deccan.		
Poona (Sept. 1st)	...	Rain throughout; standing crops well; cholera has not quite disappeared.
Ahmednagar ,,	3·54	Total rainfall 7·86; crops improving; cholera abating except in two talukas.
Sholapur ,,	3·2	Total rainfall 12·91, fall general; slight cholera in some talukas, none at Pandharpur.
Satara ,,	1·33	Total rainfall 33·62; crops good; slight cholera throughout the district.
Southern Mahratta Country.		
Belgaum (Sept. 1st)	2·34	Total rainfall 48·74; crops good; more rain required in 2 talukas.
Dharwar ,,	2·15	Total rainfall 23·75; more rain wanted throughout; early crops good in western talukas, middling in eastern.
Kanara ,,	5·	Total rainfall 28·8; crops good.
Kaladgi ,,	·03	Total rainfall 9·59; want of rain felt in all talukas; cholera continues,—36 deaths in 3 talukas, 9 at Kaladgi.
Kathiawar and Gaekwar's Territory.		
Rajkot (Sept. 1st)	·03	Total rainfall 8·64; the want of rain severely felt throughout the province; weather hot; crops withering.
Wudwan ,,	·11	Total rainfall 11·46; crops withering for the want of rain; one death from cholera.
Baroda ,,	·72	Kharif and cotton crops good, except in Okhamandal and Amreli mahals, where want of rain up to date has given rise to serious apprehension; public health good. *General Remarks.*—There has been a serious fall of the river in Sind; more rain is wanted in Gujarat, Khandesh and Ahmednagar; prospects otherwise fair.
Bengal—		
Chittagong (Sept. 2nd)	4·32	
Noakhally ,,	8·40	Fever and spleen cases as usual with some outbreaks of small-pox.
Chittagong Hill Tracts ,,	4·66	
Hill Tipperah ,,	8·71	Fever on the increase in the Koilashur Sub-division; in other parts the public health is good.
Backergunge ,,	1·75	
Fureedpore ,,	7·71	General health good.
Dacca ,,	0·22	
Tipperah ,,	·18	
Mymensingh ,,	4·60	
24-Pergunnahs ,,	1·40	Ordinary fever prevailing to some extent in Satkhira, 2 cases of small-pox and 1 case of cholera reported from that sub-division; fever increasing at Barripore.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Nuddea (Sept. 2nd)	2·87	
Moorshedabad ,,	4·70	Public health is satisfactory.
Jessore ,,	3·30	
Pubna ,,	11·18	
Rajshahye ,,	2·32	No cases of cholera or small-pox reported.
Bogra ,,	5·76	
Maldah ,,	2·63	21 deaths from cholera reported during the week.
Dinagepore ,,	3·16	
Rungpore ,,	1·89	
Cooch Behar ,,	6·86	
Jalpaiguri ,,	2·96	Cholera still continues in two places, but there are only a few cases.
Darjeeling ,,	5·08	
Midnapore ,,	0·46	
Howrah ,,	3·78	
Hooghly ,,	·80	A little small-pox and a little fever still exist, but general health is good.
Burdwan ,,	3·48	Fever slightly on the increase.
Bankoora ,,	8·73	
Beerbhoom ,,	3·46	
Santhal Pergunnahs ,,	3·11	A bad and sudden but short outbreak of cholera in the north of Kandowa, the disease was decreasing by the last report.
Bhágalpur ,,	2·03	General health is very good, but cholera is increasing in the town and appearing in a few villages in the Banka Sub-division.
Mongheyr ,,	4·60	
Purneah ,,	2·25	
Darbangah ,,	3·03

Singbhoom ,,	2·13	Some cases of cholera have been reported from pergunnah Bamunghatty.
Balasore ,,	·38	Health of the district fair, but some dengue and low fevers about.
Cuttack ,,	1·16	
Pooree ,,	3·14	*General Remarks.*—During the week under report seasonable rain has fallen throughout the districts; in some the fall was excessive. In parts of Noakhally the reaping of the early rice and transplanting of the late rice are stopped in consequence of the heavy rains. The plough cultivators of the Chittagong Hill Tracts, who lost their crops during the late flood, are re-sowing paddy broadcast, although a poor return is anticipated. In Tipperah the flooded tracts, about one-tenth of the entire area of the district, are still under water, and there is but little hope of any rice crop being reaped in those parts. In Moorshedabad the Bhagaruthy is again rising steadily, and the crops on low lands are again under water, and considerable damage is apprehended. In some parts of Maldah the early rice has been damaged by the floods. In the Hajeepoor Sub-division of Mozufferpore considerable damage has also been done by the floods which are annual occurrences. The outturn of indigo is unusually large in Darbangah and Mozufferpore. In pergunnah Soopur in Maunbhoom only one-fourth of the rice cultivation has been completed, and most of the Indian corn and other millets have failed in pergunnah Bagundi. In Pooree the crops in low lands are partially blighted by the floods; the harvesting of the early rice is progressing well, and the outturn is generally good; the transplantation of the late or main rice is still progressing and nearing completion; the prospects are as yet favourable.
N. W. P.—		
Benares (Aug. 30th)	Average rainfall 2·2	Weather during the past week favourable.
Mirzapur* (Sept. 1st)	2· at head-quarters, elsewhere less.	Prospects generally good.
Azamgarh (Aug. 31st)	1·4 at head-quarters.	Reports from all parts of districts favourable; prospects good.
Allahabad ,,	Average rainfall ·2	Late bajra sowing going on in places; undrowned crops very fine; ploughing for rabi commencing.
Cawnpore (Sept. 1st)	....	Fine weather; crops flourishing.
Banda (2nd)	Average rainfall 1·3	Sama, kukun and cotton crops injured in low lands.

* *Erratum.*—In the weather and crop report, published in the Extra Supplement to the *Gazette of India* of 14th ultimo, the words "kharif crops except sugarcane much injured by recent floods covering more than one-third of the district" entered against Mirzapur should be read as applying to Ghazipur.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
N. W. P.—*continued.*			
Hamirpur	(Sept. 2nd)	...	Fine weather throughout the week, doing much good to crops which promise well.
Jhansi	(Aug. 31st)	No rain from 21st.	Clear weather; kharif prospects good.
Agra	(Sept. 1st)	Slight rain.	More rain wanted.
Meerut	,,	...	Prospects good, but rain wanted.
Moradabad	,,	...	No change; more rain desired.
Bareilly	,,	·3	Prospects good.
Almora	(2nd)	...	Only a few heavy showers with plenty of sunshine; very favourable for the crops.
Punjab—			
Delhi	(Sept. 1st)	Slight rain	Sporadic cholera in city and district, otherwise health good.
Hissar	,,	*Nil*	Crops progressing, but more rain would be beneficial; cholera still lingers, and cases of fever occurring, otherwise health generally good.
Umballa	,,	...	Crops good; cholera has not quite disappeared.
Jullundur	,,	...	Crops good, except where injured by floods; a few cases of cholera, otherwise health good.
Lahore	,,	...	Health and crops good.
Rawal Pindi	,,	2·50	Prospects excellent; health good.
Mooltan	,,	*Nil*	Kharif crops nearly ripe; ploughing for rabi commenced; water in canals subsiding; health good.
Dera Ismail Khan	,,	...	Health good; harvest prospects favourable.
Peshawur	,,	·1	Kharif sowing completed; slight fever prevalent; small-pox abating. *General Remarks.*—Agricultural prospects and health of province good.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9TH SEPTEMBER 1875.

GENERAL REMARKS.—In Madras there has been general rain, slight in the southern districts, though 13 inches fell during the week at Negapatam. In Sind the river is still low and causes some anxiety: elsewhere throughout the Bombay Presidency there have been heavy falls of rain, and prospects are excellent. In the Central Provinces the rain has been general: prospects are good except in the Nerbudda Valley, where excessive rain has damaged the crops. Good rain has fallen in Berar. There has been rain throughout Bengal, heavy in the Chittagong Hill Tracts, Dacca, Cooch Behar, the 24-Pergunnahs, the Sonthal Pergunnahs and Balasore, elsewhere moderate; the prospects of the crops are good, and the harvest of the early rice continues, with an excellent outturn. Rain has fallen generally in the North-West Provinces, except in Banda: it was heavy in the eastern districts: prospects are good. In Oudh rain has fallen except in Sitapur. In the Punjab there has been no rain in Hissar, Lahore, Mooltan, Dera Ismail Khan or Peshawar: elsewhere the fall has been moderate: prospects are favourable. There has been rain throughout Rajputana except in Harowtee, Tonk, Marwar and Bickanere: the anxiety felt for the harvest in Jeypore and Ajmere has been removed. In Central India there has been general heavy rain. In Mysore the fall has been insufficient and more is much wanted. Reports are good from Burma and Nepal.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Sept. 9th)	2·19 at Masulipatam. 5·2 at Nandigama. About 2 inches elsewhere.	Five and a half feet water above anicut; canals generally full; early crops sown; transplanting improving; sajja in ear; some dry crops in Repalli suffering from grub; markets well supplied locally; prices steady; mild small-pox and fever in six taluks; slight cattle disease in four taluks; pasture sufficient.
Kurnool	(8th)	2·11 in four days.	Rain good throughout the district; standing crops in good condition; markets well supplied; prices of rice and paddy falling in Pattikonda, and rising in Sirwell, others generally steady; fever and small-pox prevalent; 22 cases of cholera in Kurnool, 6 fatal; 49 attacks and 24 deaths in four taluks; cattle healthy; water and pasture sufficient; one foot water over Sunkesala anicut yesterday.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Sept. 8th)	13·0 at Negapatam.	Rain elsewhere little and partial; water-supply in rivers slightly increasing, in tanks scanty; water over anicuts none; cultivation wet and dry crops; standing crops not thriving in some parts for want of rain; harvest, a few dry grains in some parts; markets well supplied; prices steady; cholera abating; seizures 243, deaths 184; cattle disease in some localities; pasture insufficient.
Trichinopoly „	...	Rain very slight, much wanted; wet crops fair, dry crops bad; cholera again slightly on increase; cattle healthy; pasture scanty.
Malabar (9th)	2·77	First crop good; markets well supplied; prices steady; bowel complaints in Walluvanad and Palghaut, 37 serious cases and 20 deaths; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay— (Sept. 9th)		
Sind.		
Kurrachee (8th)	...	River on the 6th 37 inches below last year; crops fair.
Shikarpur „	...	Much want of water; slight damage to crops from insects in Sijáwal; river 11 feet 10 inches, 1 foot above last year; fever prevalent.
Hyderabad „	...	River falling; fear of crops suffering in taluka Badin; weather warm; slight fever prevalent in talukas Tando Alahyar, Naushahro, Hyderabad and Guni.
Upper Sind Frontier „	...	Dust-storm with hot winds and drops of rain on the 2nd instant; flood fallen considerably but continues flowing; hopes entertained of swamped kharif crops reviving; cough and fever prevailing.
Gujarat.		
Ahmedabad (Sept. 8th)	6·07	Total rainfall 17·76; much improvement in crops and public health; cholera cases 28, deaths 5.
Kaira „	6·77	Total rainfall 29·41; crops and public health good.
Surat „	5·62	Total rainfall 38·73.
Broach „	9·74	Total rainfall 53·90; bajri crops injured by excessive rain.
Khandesh and Nasik.		
Khandesh (Sept. 8th)	2·64 at Dhulia.	Total rainfall 15·60; crops good, but slightly affected by excessive moisture above Bhalisgaon and Bhadgaon; cholera nearly extinct,—cases 42, deaths 24; cattle disease in 3 talukas.
Nasik „	3·19	Total rainfall 32·78; heavy fall throughout the Collectorate; crops suffering in two talukas from excessive moisture; prospects in others fair; cholera continues slightly.
Konkan.		
Tanna (Sept. 8th)	7·60	Total rainfall 95·27; crops thriving; cholera slightly prevalent.
Deccan.		
Poona (Sept. 8th)	3·82	Total rainfall 30·71; standing crops doing well; cholera has not quite disappeared.
Ahmednagar „	4·9	Total rainfall 11·95; crops good; cholera increasing in 3 talukas, decreasing in others.
Sholapur „	3·93	Total rainfall 16·84; kharif improving; rabi sowing commenced in Pandharpur; slight cholera prevalent.
Satara „	·72	Total rainfall 34·34; crops partly suffered from excessive rain; slight cholera prevalent.
Southern Mahratta Country.		
Belgaum (Sept. 8th)	1·70	Total rainfall 50·44; cholera in Athni, Chipori and in villages near Belgaum; crops doing well.
Dharwar „	·64	Total rainfall 24·39; early crops good, sowing of late ones progressing; rain wanted in Karajgi taluka and Sawanur State.
Kanara „	3·50	Total rainfall 98·50; season good.
Kaladgi „	2·31	Total rainfall 11·90; the fall was general; kharif doing well; cotton sowing commenced; cholera prevalent except in Hungund, 108 deaths.
Kattywar and Gaekwar's Territory.		
Rájkot (Sept. 8th)	3·59	Total rainfall 12·23; the fall was general; fears of scarcity of grain removed.
Wadhwán „	2·15	Total rainfall 13·61; crops good; cholera cases 23, deaths 9. *General Remarks.*—There has been a very heavy fall of rain in the last week, which has made prospects excellent, except in Sind, where the state of the river still causes some anxiety.
Bengal—		
Chittagong (Sept. 9th)	1·19	
Noakhally „	1·61	
Chittagong Hill Tracts „	6·87	
Hill Tipperah „	2·46	
Backergunge „	·11	
Fureedpore „	2·62	General health good.
Dacca „	3·89	
Mymensingh „	·97	
Tipperah „	2·37	
24-Pergunnahs „	4·56	Fever increasing at Barripore; 1 case of cholera reported from Satkhira.
Nuddea „	·78	
Moorshedabad „	2·93	Health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jessore (Sept. 9th)	·65	
Pubna „	1·61	Four cases of cholera reported during the week, 3 recovered.
Rajshahye „	1·65	
Bogra „	1·75	Twenty-nine attacks of small-pox and 4 deaths from cholera reported during the week.
Maldah „	1·38	
Dinagepore „	1·6	Much sickness; fever at head-quarters.
Rungpore „	1·56	
Cooch Behar „	7·27	
Jalpaiguri „	·64	Cholera still continues; a few cases here and there.
Darjeeling „	·97	
Midnapore „	·77	
Howrah „	·77	
Hooghly „	1·86	General health not quite so good; a little small-pox still; fever slightly on the increase.
Burdwan „	2·12	
Bankoora „	·43	
Beerbhoom „	1·54	
Sonthal Pergunnahs „	3·64	Cholera still in the Deoghur country.
Bhágalpur „	2·08	General health very good.
Monghyr „	·71	
Purneah „	·41	
Darbangah „	·40	
Mozufferpore „	·57	
Sarun „	1·41	
Chumparun „	1·18	
	Previous week 1·17	
Patna „	·83	Health generally good.
Gya „	·95	Cholera almost disappeared.
Shahabad „	·56	
Hazáribágh „	1·09	Cholera abating.
Lohardugga „	·26	Cholera still prevalent in Palamow.
Maunbhoom „	·84	
Singbhoom „	·28	Few cases of cholera in pergunnah Bamunghatty are still reported, but the rest of the district is healthy.
Balasore „	4·57	Cholera has at length disappeared.
Cuttack „	2·62	Public health is not very good; low fevers, dengue and a little cholera still about; a little cattle disease in Thanas Barisal, Bowfal, Gulsakhali and Baramuddi.
Pooree „	·24	*General Remarks.*—More or less rain has fallen in all parts of Bengal. Shocks of earthquake on the 3rd instant reported from several districts. The harvesting of the early rice still continues, and the outturn is very fair; upon an average the prospects of the bhadoi crops are on the whole good. The harvesting has commenced in places in Chumparun; this crop is said to be the best ever known in the district; the transplantation of the main rice crop is all but complete, and the prospects are favourable. The plough cultivators of the Chittagong Hill Tracts have re-sown parts of their rice land on which the previous sowings have been destroyed; the flooded tracts of Tipperah still continue under water. Jute is being cut. About 8,000 bigahs of standing crops in Sarun have been inundated by the bursting of the Gunduck embankments.
N. W. P.—		
Benares (Sept. 6th)	3·3 in districts north of Ganges. 5·6 at head-quarters, elsewhere less.	Rice and other crops have suffered from excessive rain; reports from south of Ganges favourable.
Mirzapur (8th)	2·1 at head-quarters.	Crops good except where drowned last month.
Azamgarh (7th)	Average rainfall 1·7, chiefly on the 6th instant.	Prospects good.
Allahabad „	Average rainfall ·4	Late bajra sowing going on in places; undrowned crops very fine; ploughing for rabi commencing.
Cawnpore (8th)	...	Weather most favourable.
Banda (9th)	Average rainfall 1·0	Dry weather during the past week has done good; kankun being cut.
Hamirpur „	·8 on the 6th instant.	Prospects good.
Jhansi (7th)	From ·5 to 5·4	Rice prospects bad; other crops good.
Agra (8th)	...	Prospects good.
Meerut „	...	Prospects good; rains set in again.
Moradabad „	1·8	Slight tantalizing rain.
Bareilly „	...	Prospects continue good.
Almora (9th)		Weather showery and very favourable for the crops.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—			
Delhi	(Sept. 8th)	1·9	Crops flourishing; cholera decreasing; health of district generally good.
Hissar	„	*Nil*	Rain now wanted for young crops, water in canal having become deficient; health generally good, but few cases of cholera in the district, where fever is also on the increase.
Umballa	„	1·	Crops good; cholera still prevalent.
Jullundur	„	·4	Crops good; cases of cholera in Kartarpur; health otherwise good.
Lahore	„	*Nil*	Crops good; some cases of cholera in villages and three in Lahore, otherwise health good.
Rawal Pindi	„	1·	Agricultural prospects excellent; health good.
Mooltan	„	*Nil.*	Kharif crops nearly ripe; ploughing for rabi in progress; health good.
Dera Ismail Khan	„	...	Health good; harvest prospects fair.
Peshawur	„	...	Kharif sowing completed; fever commencing.
			General Remarks.—Though cholera still prevails in certain localities, the health of the province is generally good; agricultural prospects favourable.
Oudh—			
Lucknow	(Sept. 8th)	2·7	Prices stationary; agricultural prospects favourable; public health generally good.
Sitapur	„	*Nil.*	
Fyzabad	„	2·3	
Central Provinces—			
Upper Godavari	(Sept. 4th)	3·64	Prospects favourable; small-pox continues; prices easy.
Sambalpur	„	·25	Crops doing well; rain wanted; cholera continues.
Bilaspur	„	1·21	Prospects favourable; cholera continues; prices easy.
Chanda	„	1·94	Crops doing well; cholera continues.
Raipur	(5th)	1·88	Prospects favourable; cholera decreasing; prices easy.
Chhindwara	„	2·34	Prospects continue good; 200 cases of cholera, 93 fatal; prices steady.
Balaghât	(6th)	2·40	Transplanting rice completed; fever prevalent; prices steady.
Bhandara	(7th)	3·45	Rice crops favourable; jowar partially injured; rabi ploughing retarded owing to continuous rain.
Nagpur	(8th)	2·20	Jowar injured by over moisture, other crops doing well; cholera and cattle disease continue.
Nimar	„	1·27	Prospects favourable; 67 cases of cholera, 36 fatal; prices stationary.
Hoshangabad	„	4·47	Cholera continues.
Betul	„	2·14	Weeding progressing; cholera continues.
Wardha	„	2·20	Prospects fair; cholera continues.
Jubbulpore	„	·80	Rain opportune; health good.
Saugor	„	2·80	A break wanted; rabi ploughing progressing; cholera continues.
Seoni	„	3·20	Rabi ploughing commenced; fever and bowel complaint prevalent.
Damoh	„	1·30	Prospects good; prices stationary.
Mandla	„	1·	Prospects good; small-pox declining; prices stationary.
Narsinghpur	„	2·	Prospects gloomy; cholera continues.
			General Remarks.—Prospects everywhere good for rice; jowari injured in low lands; on the whole, except in the Narbada Valley, prospects fair, there rain excessive.
British Burmah—			
Arakan Division—			
	(Sept. 8th)	...	Public health good; rain moderate; crops promise well.
Rangoon	„	...	Public health good; crops retarded by floods; slight cattle disease.
Thonkwa	„	...	Public health and crops good.
Bassein	„		
Thayetmyo	„	...	River rising higher than in 1874.
Henzada	„	...	Public health good; crops progressing.
Prome	„	...	Health and crops good; two cases of small-pox.
Tenasserim Division	„	...	Public health good; half crops expected at Shwe-gyeen; at Amherst crops inundated; reports favourable from other districts.
Mysore and Coorg—			
Mysore	(Sept. 9th)	·45 in Bangalore Cantonment.	Rain much wanted; scarcity at Mysore; crops suffering; cholera extending its area but inactive except at Mysore, where average daily deaths in past week were nearly twenty; population 57,000.
Coorg	„	4·39	Public health and crops good.
Hyderabad Assigned Districts—			
Umraoti	(Sept. 9th)	3·75	Cholera gradually subsiding, though prevalent in mild form in the Woon District; kharif crops in good condition.
Rajputana—			
Sirohi	(Sept. 6th)	1·	Total rainfall 17·84; health good; prospects improved since rain; weather sultry.
Aboo	(9th)	3·64	Total rainfall 72·95; weather cloudy with mists; more rain expected.
Meywar	(3rd)	1·9	Total rainfall 17·1; health and prospects good; sunshine and occasional showers.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—*continued.*			
Marwar	(Aug. 28th)	...	Rain much needed both for present and future harvests; oppressive heat indicative of rain; health good; total rainfall 8·46.
Bickanere	„	...	No more rain; crops progressing; sowings completed; health good.
Harowtee States.			
Harowtee		*Nil.*	Rain everywhere much required; cholera decreasing at Tonk.
Tonk			
Ulwar	(Sept. 8th)	1·75	Temperature 85°; cholera decreasing; crops promising.
Bhurtpore	(9th)	2·45	Winds easterly; fever prevalent.
Jeypore	„	1·3	Rain generally throughout the district; all anxiety removed; health good.
Ajmere	„	...	Seasonable rain secured harvest, still raining; cholera diminishing; public health otherwise good.
Central India—			
Indore	(Sept. 8th)	5·79	Rainfall has been heavy; cholera decreasing.
Gwalior	„	1·90	
Neemuch	„	3·40	
Baghelkhund	„	·90	
Sutna	„		
Bhopal Agency.			
Bhopal	(Aug. 28th)	1·8	
Rajgarh	„	*Nil*	
Bhilsa	„	·07	
Nursingarh	„	*Nil*	
Kilchipur	„	2·1	
Nepal—	(Sept. 1st)	4·4	Agricultural prospects fair; cholera not abated.
Assam—			*(Received too late for inclusion in the General Remarks.)*
Gauhatti	(Sept. 9th)	·08	Weather more or less settled; fine cool north-east winds; shocks of earthquake on 3rd and subsequent days; transplanting operations going on; prospects of crops and tea favourable; no cattle disease; public health generally good.
Sylhet	„	4·27	Rice crop being reaped; price of rice slightly fallen owing partly to importation, partly to new crops coming into market; small-pox declining.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 2nd September 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble T. C. Hope.

OPIUM BILL.

The Hon'ble SIR W. MUIR introduced the Bill to amend the law relating to Opium, and moved that it be referred to a Select Committee with instructions to report in three months. He said that in accordance with the permission he had received at the last meeting of the Council, he had now the honour to introduce the Bill to amend the law relating to Opium. On that occasion he had explained the necessity which existed for the measure. The provisions were very simple. Under section 3 it was proposed to enact that the cultivation and manufacture of opium, its possession, transport or sale, should be permitted only in accordance with rules framed under the Act; and by section 4 the Local Governments were empowered, with the sanction of the Governor General in Council, to make such rules. The remainder of the Bill provided appropriate penalties for contravention of the law. These were in accordance with the provisions of the law as they now existed in Bengal for the control of the cultivation, possession, transport and sale of opium.

The present measure had no bearing whatever on the system for realizing the Government revenue from opium. Although the measures now proposed had heretofore been in force only on this side of India, yet they were equally required everywhere. The advocates of the Bombay system, under which the Government revenue was realized by an export duty, disapproved of the State manufacture and monopoly prevailing in Bengal, and desired that endeavour should be made to substitute the export-duty arrangement for it; and he himself had long shared these views. But if such experiment were to be made to-morrow in any part of Behar, the North-Western Provinces or Oudh, it would be necessary to have equally stringent checks as now existed in Bengal—perhaps checks of even greater stringency—for controlling the cultivation and manufacture, the possession, transport and sale of opium; and these checks were equally required under the existing system in Bombay and Madras. The Bill therefore, as now introduced, had no reference whatever to the policy of the Government in this respect, either one way or the other.

The Motion was put and agreed to.

The Hon'ble SIR W. MUIR also moved that the Bill be published in the several *Gazettes* of the Local Governments in English and such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

MERCHANT SEAMEN'S ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to amend the law relating to Merchant Seamen. He said that the Council were aware that we had already upon the stocks a Bill for the general consolidation of our law relating to Merchant Shipping and for introducing certain amendments into it. But that Bill had been suspended, owing to the delay in proceeding with a similar Bill which was before the British Parliament. The subject was one in which it was necessary that the Indian legislation should be framed very carefully with reference to the Imperial legislation, because, not only was the subject-matter closely related, but the Imperial Acts, to a great extent, included India, and therefore we had Imperial laws in working, and in detailed working, in India. Some of those laws were subject to the operations of this legislature; others of them were not, and therefore we had to be exceedingly careful in all our legislation to see what was the course of legislation in England. Under those circumstances the Secretary of State was of opinion, some years ago, that we had better not proceed with our general consolidation Act, and it was waiting at this moment for the action of the British Parliament. From time to time, however, isolated matters had arisen with regard to which it was desirable to amend the law; and the Council would remember that only in the beginning of this year we passed an Act for the purpose of amending our Merchant Shipping Act with reference to one separate but important topic, namely, the constitution of tribunals for enquiries into casualties affecting ships and the conduct of officers.

There were one or two other points, none of them perhaps of very much importance, but all requiring some amendment of the law, with which we found ourselves in a position to deal. Therefore we thought it better to deal with those as the opportunity had arisen instead of waiting, perhaps for two or three years, until we were enabled to consolidate the whole of the law. He would just mention the principal of those topics.

One related to the subject of distressed seamen. In the English Acts there were certain provisions which enabled the Governments of all British possessions to send British seamen, who were in a state of distress, back to England on board British ships, and to provide for the payment of the expenses out of certain funds over which the Board of Trade had control. Well, it had been found that disputes arose with respect to the fact whether a seaman was a distressed seaman or not, and it had occurred that the Master of the vessel objected to receive the seaman on the ground that he was not. It was obvious that such a dispute might arise in any case, and when those disputes had once arisen, they had a great tendency to multiply themselves. They all arose under a critical state of circumstances; that was, when a ship was just going to sail, and when it was very inconvenient to decide the dispute by any lengthened process. Therefore it was proposed in the first place to provide a summary method of deciding such disputes, and, in the second place, to impose a penalty payable in India on the Master of any vessel who, after the proper certificate was given that the seaman was a distressed seaman, declined to receive him on boardship.

The next topic related to the discharge of seamen, and to seamen who were imprisoned in India. It was obvious that if there was an unlimited power of discharging British seamen in foreign countries, a great many of them would simply become a burden upon the society of the country where they were discharged. Now the English Merchant Shipping Act provided, in order to meet that difficulty, that no seaman should be discharged without the sanction of certain authorities in the country where it was proposed to discharge him. But that mere requisition of sanction had been found insufficient. There was no penalty attached to it which we could enforce in this country, and besides that, there had been disputes of rather a grave nature respecting the power of the authority in question to withhold his sanction under certain circumstances; that was to say, it had been disputed whether it was a purely discretionary power, or a ministerial power which he was compelled, as a public servant, to exercise under certain circumstances. We proposed therefore, in the first place, to make our law quite clear upon that subject, and to put it beyond doubt that the power was simply a discretionary power. He (MR. HOBHOUSE) believed it to be a discretionary power according to the present law. It was certainly held so in England, and the

Board of Trade had issued instructions in which they had asserted that the matter was one beyond dispute. The matter, however, was not beyond dispute in India, for a judgment had been passed by one Court of Law, luckily opposed by the judgment of another, to the effect that the power was a ministerial and not a discretionary power. It was proposed however to make that point clear. It was also proposed to add a penalty payable in India in case the Master of a ship discharged any seaman without the requisite sanction.

But one great temptation for the discharge of seamen here was found to be the unlimited facility that existed for getting lascars to serve on boardship for the voyage home. Some Masters preferred to have those lascars, partly because they were less expensive than seamen, partly for other reasons; and therefore it was proposed by the Government of Bombay (and their suggestion was adopted) that power should be given to the Local Governments to prohibit the engagement of Native seamen without sanction from the Government; at all events in cases in which British seamen had been discharged. That, it was conceived, would strike at the root of the evil.

Another mode in which British seamen were detached from their ships was when they got into prison, and it was alleged that the Masters who desired to get rid of men preferred complaints against them for breaches of discipline and other petty offences, which probably would not have been preferred if the Masters did not desire to get rid of their men. Now in section 88 of Act I of 1859, power was given to Magistrates to release all sailors imprisoned for breaches of discipline if the Masters of the ships were willing to take them back; but it was often found that the Masters were not willing to take them back: in fact, the very object of getting them into prison was that they should be there when the ship was sailing, in order that the ship might obtain lascars and so depart from India. That mischief would partly be met by the proposal that the Government should have a veto on the engagement of Native seamen; and it was proposed further to meet it by giving power to Port authorities to call upon Masters to accept back those seamen who were imprisoned for petty offences, and if they did not choose to accept them back, to require them to deposit a sufficient sum to cover the expense of the subsistence of the men during their stay in India, and of their passage home. That, it was thought, would be a test of the *bona fides* of the objection to receive back the men.

Then, with regard to the subject of desertions, there was at present a defective machinery for giving notice to the Government of desertions directly they took place, and we proposed to require Masters of ships to inform Government whenever a desertion took place. We proposed also that, when a sailor was imprisoned for desertion, the Master should deposit in the local Shipping Office his wages and effects, and that there should be some machinery for settling claims between Masters and men.

Another topic we proposed to deal with was the increase of space on board ships. It seemed to be the prevailing opinion that the present law did not provide a sufficient amount of space. It was not intended to introduce any new principle of legislation on this point. Measurements of space were given by the present Merchant Shipping Act, and it was proposed slightly to increase the space required.

The Motion was put and agreed to.

BURMA COURTS BILL.

The Hon'ble MR. HOBHOUSE also presented the Final Report of the Select Committee on the Bill to consolidate and amend the law relating to the Courts in British Burma.

The following Select Committee was named—

On the Bill to amend the law relating to Opium—The Hon'ble Messrs. Hobhouse, Eden, and Hope, and the Mover.

The Council then adjourned to Thursday, the 16th September 1875.

SIMLA;

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16TH SEPTEMBER 1875.

GENERAL REMARKS.—In Madras there has been good rain in the north, but scanty in the southern districts: prospects are satisfactory. In Sind the river is still falling and many canals have failed: great damage to the kharif crops is reported. There has been general moderate rain throughout the Bombay Presidency, except in Satara, where a fall of 15½ inches has caused some damage to houses and crops: prospects are good. In the Central Provinces the rain has been heavy and continued; the rice crops are doing well, but other staples have been injured by the rain, and in the northern districts preparations for the *rabi* have been retarded. In Bengal general rain has fallen in all districts: the early rice harvest still continues, with a good yield; the prospects of the main rice crop are generally favourable. There has been general rain throughout the North-West Provinces and Oudh: prospects are very good. In the Punjab no rain has fallen in Mooltan and Dera Ismail Khan: the fall has been moderate in the northern districts. In the Delhi and Hissar Divisions and at Jullundur the fall has been extraordinarily heavy (25 inches at Delhi, 17 at Rohtak, 15 at Jullundur): the floods have damaged house property largely and crops to some extent: but the rain has nevertheless been of great benefit. In Rajputana good rain has fallen in the Northern States, none in Bickanere, Deoli, Shahpoora or Tonk: elsewhere it has been moderate: prospects are generally good. There has been heavy rain throughout the Central India States, which has caused some damage to crops. Reports are good from Burmah and Berar. In Assam Proper no rain has fallen and its want is felt. In Mysore the want of rain is great and the prospects of the crops are critical.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Sept. 16th)	1·17 at Masulipatam. 3·0 at Palnad.	Rain slight elsewhere; canals generally full; 14 feet water over anicut; heavy flood expected; dry crops sown; standing crops good; rain wanted in some taluks; markets well supplied locally; prices steady; public health good; cattle disease in three taluks; pasture sufficient.
Kurnool	(15th)	1·29 in four days.	Rain moderate in four taluks; none elsewhere; standing dry crops withering in Markapur for want of rain, good in other places; markets moderately supplied; prices generally steady; fever prevalent; cholera, 29 cases in Kurnool, 3 fatal; 172 cases in five taluks, 96 fatal; water and pasture sufficient, except in Markapur; cattle disease in two taluks; 1·7 foot water over Sunkesala anicut yesterday.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Sept. 16th)	No rain at Negapatam.	Rain elsewhere partial and scanty; water supply in rivers slightly increasing, in some tanks full, in others small; water over upper anicut, south branch, 5 inches; cultivation, wet and dry crops; standing crops not thriving well for want of rain; harvest, a few dry grains in some parts; markets well supplied; prices steady; fever in some parts; cholera much abated, seizures 203, deaths 139; cattle disease in some localities; pasture insufficient.
Trichinopoly (15th)	No rain.	Wells failing in some dry villages; dry crops withering; outturn of rape and gingelly seed up to average; prices slightly risen in the town, elsewhere steady; cholera still increasing in town; cattle healthy; pasture scarce.
Malabar (16th)	0·24	First crop harvest begun; markets well supplied; prices steady; bowel complaint in Palghaut and Tangacheri, 13 cases and 6 deaths; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay— (Sept. 16th)		
Sind.		
Kurrachee (15th)	...	Gauge at Kotri marked 154 inches on the 13th, shewing a fall of 3 feet since the 6th; estimated loss of crop 6¼ annas; heavy rain in Kohistan on the 3rd.
Shikarpur „	...	River 10 feet 4 inches, 2 feet 5 inches less than last year; insufficiency of water all over the district; kharif crops suffering; fever prevails; cattle disease in Kambar taluka.
Hyderabad „	...	River still falling; smaller canals dry; no other change.
Upper Sind Frontier „	...	No change; rabi sowings commenced.
Gujarat.		
Ahmedabad (Sept. 15th)	...	Crops good; cholera cases 55, deaths 3.
Kaira „	·03	Total rainfall 29·44; prospects excellent.
Surat „	·33	Total rainfall 39·06.
Broach „	1·07	Total rainfall 54·97; health good.
Khandesh and Nasik.		
Khandesh (Sept. 15th	·76 at Dhulia.	Total rainfall 16·86; kharif and cotton crops as before; cholera cases 9, deaths 5; cattle disease in three talukas.
Nasik „	2·40	Total rainfall 35·18; crops suffering in two talukas from excessive rain; prospects otherwise fair; cholera continues slightly.
Konkan.		
Tanna (Sept. 15th)	3·95	Total rainfall 99·22; agricultural prospects fair; slight cholera in four talukas.
Deccan.		
Poona (Sept. 15th)	·78	Total rainfall 31·49; crops well, although injured in some places by heavy rain; cholera slightly exists.
Ahmednagar „	1·46	Total rainfall 13·41; crops well; cholera decreasing except in two talukas.
Sholapur „	·55	Total rainfall 17·39; slight cholera throughout the district.
Satara „	15·50	Total rainfall 49·84; injury from excessive fall to crops and houses in some places; in Satara taluka crops swept away; cholera disappearing.
Southern Mahratta Country.		
Belgaum (Sept. 15th)	1·01	Total rainfall 51·45.
Dharwar „	·21	Total rainfall 24·60; more rain wanted in four talukas; early crops good; sowing of late crops progressing; cholera in Ibubari taluka, cases 23, deaths 13.
Kanara „	2·25	Total rainfall 100·75; crops good.
Kaladgi „	·10	Total rainfall 12·; kharif sowing completed; crops thriving; cholera in seven talukas, 114 deaths.
Kattywar and Gaekwar's Territory.		
Rájkot (Sept. 15th)	...	Crops good; more rain wanted.
Wadhwán „	...	Crops good; one death from cholera.
Baroda „	9·9	*General Remarks.*—The fall in the river in Sind is causing great damage to the crops, the smaller canals being dry; elsewhere prospects very good, except where excessive rain has injured the crops.
Bengal—		
Chittagong (Sept. 16th)	4·43	
Noakhally „	3·78	
Chittagong Hill Tracts „	3·2	
Hill Tipperah „	1·24	
Backergunge „	3·49	
Furreedpore „	4·61	General health good.
Dacca „	1·77	
Mymensingh „	3·83	
Tipperah „	2·40	
24-Pergunnahs „	·72	Fever increasing at Barripore.
Jessore „	2·38	
Nuddea „	2·30	
Moorshedabad „	2·37	Cholera has appeared in thana Burwa in the Sadr Sub-division, health otherwise good.
Pubna „	2·97	
Rajshahye „	1·97	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Bogra (Sept. 16th)	1·73	
Maldah „	3·31	
Dinagepore „	2·07	
Rungpore „	1·13	
Cooch Behar „	·48	
Jalpaiguri „	3·75	Cholera seems to have ceased.
Darjeeling „	6·74	
Midnapore „	1·24	
Howrah „	3·67	
Hooghly „	·59	Fever more prevalent.
Burdwan „	3·16	Fever slightly increased.
Bankoora „	2·89	
Beerbhoom „	1·75	
Sonthal Pergunnahs „	3·14	Cholera still continues to break out in new places but not very extensively.
Bhágalpur „	1·35	General health very good; cholera decreasing, but still prevails in the town and a few villages in the Banka sub-division.
Monghyr „	2·51	Much sickness in the town.
Purneah „	1·82	
Darbangah „	3·58	
Mozufferpore „	1·37	Cholera reported to have broken out again in Belunda thana.
Sarun „	1·92	General health good.
Chumparun „	3·8	
Patna „	3·62	Health generally good.
Gya „	·90	
Shahabad „	2·20	Some fever and cholera still hanging about in one or two villages.
Hazáribágh „	1·34	Cholera nearly disappeared.
Lohardugga „	9·96	Cholera in Palamow decreasing.
Maunbhoom „	3·66	
Singbhoom „	4·18	Cholera in Bamunghatty is reported to have ceased.
Balasore „	2·29	
Cuttack „	3·25	Public health good.
Pooree „	2·24	*General Remarks.*—Seasonable rain has fallen in all the districts. Early rice is still being reaped and the yield is very fair. Upon an average the prospects of the bhadai crops are on the whole good, and it is being harvested in places with good results. The transplantation of the main rice seedlings is still being pushed on, but in a few districts the full area of land has not been planted with rice in consequence of insufficient rain; the prospects of this crop are generally favourable.
N. W. P.—		
Benares (Sept. 13th)	Average rainfall 1·3.	Rice and other crops have suffered from excessive rain; reports from south of Ganges favourable.
Mirzapur (15th)	1·2 at Kourh, elsewhere less.	Prospects continue good; river rising.
Azamgarh „	4·2 at headquarters.	Prospects continue favourable; early kinds of rice being cut; outturn reported good.
Allahabad „	2·1	Rain still persistently falling.
Cawnpore „	3·5	Rain most beneficial; prospects good.
Banda (16th)	Average rainfall 2·4	Cotton reported injured in parts; prospects good.
Hamirpur „	Average rainfall 2·4	Prospects good.
Jhansi (14th)	2·9	Prospects good.
Agra (15th)	From ·2 to 7·1	Prospects favourable.
Meerut „	...	Fine after heavy rain; prospects good.
Moradabad „	...	Favourable rain; agricultural prospects excellent.
Bareilly „	1·2	Prospects good.
Punjab—		
Delhi (Sept. 15th)	25·3	This great rainfall has caused much damage to crops and house property; cholera lingers in city and in one or two villages in the district.
Hissar „	6·	Crops promising; the heavy rains have saved the kharif, and will prove beneficial to the rabi sowings; health generally good, but fever prevalent in Hissar District.
Rohtak „	17·	
Umballa „	4·7	Crops good; cholera still prevalent.
Jullundur „	15·1	Extensive floods and much damage done to crops and houses; cases of cholera in Kartarpore; health otherwise good.
Lahore „	1·8	Agricultural prospects good; health generally good, but a few cases of cholera.
Mooltan „	*Nil*	Indigo crops under sickle; prospects of rabi excellent; health good.
Dera Ismail Khan „	*Nil.*	Health good.
Peshawur „	·6	Agricultural prospects favourable; fever prevailing. *General Remarks.*—Rainfall in the southern districts of the Punjab unusually heavy; damage to buildings very great, while crops have also been damaged by the floods. The rainfall in the Hissar Division is greater than has been known for years, but it was needed and all crops there will benefit. General health of the Province good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Oudh—			
Lucknow	(Sept. 15th)	3·2	Kharif prospects continue favourable; prices stationary; public health generally good.
Sitapur	,,	1·8	
Fyzabad	,,	1·4	
Central Provinces—			
Sambalpur	(Sept. 11th)	9·	Rain beneficial; prospects good; cholera decreasing.
Bilaspur	,,	3·47	Rice crops progressing; cotton suffered; cholera decreasing; prices easy.
Raipur	(12th)	·78	Prospects good; cholera decreasing; prices easy.
Chhindwara	,,	9·33	Jowar damaged; other crops favourable; 124 cases of cholera, 50 fatal; prices steady.
Balaghât	(13th)	3·90	Prospects favourable; fever prevalent; prices steady.
Bhandara	(14th)	1·77	Rice crops promising; jowar in low lands suffered; rabi ploughing stopped in consequence of continuous rain; cholera, fever and small-pox continue; prices stationary.
Nagpur	(15th)	1·27	Jowar suffered by over moisture; other crops good; cholera decreasing; fever prevalent; prices cheaper.
Wardha	,,	2·	Kharif suffered from too much rain; cholera decreasing.
Nimar	,,	7·37	Superior crops being cut; cholera decreasing; prices risen.
Hoshangabad	,,	11·70	Crops damaged; cholera continues.
Betul	,,	7·45	Cholera continues.
Narsinghpur	,,	4·	Rain damaged standing crops; cholera disappeared.
Jubbulpore	,,	7·	Prospects good; 7 deaths from cholera.
Saugor	,,	2·89	A break wanted; rabi ploughing stopped; cholera and cattle disease continue; prices stationary.
Seoni	,,	4·75	Rabi ploughing continues; prospects favourable; health good.
Damoh	(16th)	9·20	Kharif crops except rice injured; prices stationary.
Mandla	,,	1·30	Prices stationary.
			General Remarks:—Rice crops promise well, but continued rain injures other standing crops, and prevents land being prepared for rabi partially in Northern Districts.
British Burmah—			
Akyab	(Sept. 15th)	...	Public health good; rainfall abundant; crops promise well.
Rangoon	,,	...	Health good; rain plentiful; crops flourishing; cattle disease prevalent in Myanoung, disappearing in Tharrawaddy.
Bassein	,,	...	
Henzada	,,	...	
Prome	,,	...	Health good; cultivation progressing.
Thayetmyo	,,	...	Health good, except slight fever; inundation subsiding.
Thonkwa	,,	...	Rain abundant; crops and health good.
Tenasserim Division	,,	...	Health good; crops partially inundated.
Amherst	,,	Abundant.	
Mysore and Coorg—			
Mysore	(Sept. 16th)	*Nil.*	Crops suffering from want of rain; cholera still inactive, except at Mysore, where deaths in town and district during the past week averaged 22¾ daily. Epidemic has extended in Tumkur District.
Coorg	,,	1·4	
			General Remarks.—Prices slightly risen in parts; agricultural prospects not hopeful.
Assam—			
Gauhati	(Sept. 16th)	*Nil.*	Weather clear, dry, and hot; transplanting operations of sáli almost finished; prospects of crops not unfavourable, but rain wanted; prospects of tea reported not very cheering; public health good.
Sylhet	,,	2·93	Rivers falling; weather fine.
Hyderabad Assigned Districts—			
Umraoti	(Sept. 16th)	2·60	Province nearly free from cholera, except in one taluk of Woon District; agricultural prospects good.
Rajputana—			
Aboo	(Sept. 16th)	1·47	Total rainfall 74·52; weather cloudy with slight mists, more rain probable.
Meywar	(10th)	2·3	Total rainfall 19·4; water-supply, health and crops good; sunshine and occasional showers.
Bickanere	(4th)	*Nil.*	Weather exceedingly hot; standing crops withering for want of rain.
Marwar	(14th)	1·89 since the 4th.	Tanks received two months' additional supply and wells rising; health good; crops much improved, but outturn will not be as abundant as expected.
Harowtee States—			
Deolee	(Sept. 4th)	*Nil.*	Cholera at Tonk; health elsewhere good.
Shahpoora	,,	*Nil.*	
Tonk	,,	*Nil.*	
Kota	,,	·40	
Jhallawar	,,	·50	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—*continued.*			
Ulwar	(Sept. 15th)	2·37	Temperature 84°; prospects of crops excellent; cholera present but decreasing; tanks filled.
Bhurtpore	(16th)	3·45	Weather cloudy; crops progressing favourably; fever still prevalent.
Jeypore	,,	3·50	Agricultural prospects excellent; public health good.
Ajmere	,,	3·20	Crops satisfactory; cholera not quite gone from Ajmere, none in rest of district; otherwise health good; heavy rains wanted.
Central India—			
Indore	(Sept. 15th)	3·39	Heavy rain has damaged crops, sweeping them away in places; health improving.
Gwalior	,,	4·7	
Neemuch	,,	6·13	
Rutlam	,,	3·7	
Baghelkhund	,,	2·60

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23RD SEPTEMBER 1875.

GENERAL REMARKS.—In Madras the fall of rain during the week has been scanty: prospects are however generally satisfactory. In Mysore the condition of the crops is still reported to be critical owing to want of rain: 16½ inches are however reported to have fallen at Bangalore. In Sind the river has risen, and rain has also fallen. Elsewhere throughout the Bombay Presidency there has been general and abundant rain, except in Dharwar and parts of the Baroda territory. In Ahmedabad there have been floods: in Broach, Khandesh, and Nasik the cotton is reported to have been injured by excessive rain, and the same cause has slightly damaged the crops in Poona, Ahmednagar and Belgaum; prospects are however generally good. In the Central Provinces and Berar the rain has been general: damage to the cotton crop has been caused by excessive rain in the Nerbudda Valley, and preparations for the *rabi* retarded. In Bengal moderate rain has fallen in all districts, except in Orissa, where it has been heavy: more is said to be wanted in Rungpore, Purneah and parts of Gya: the prospects of the late rice crop continue satisfactory. There has been general rain in the North-West Provinces and Oudh: a break is wanted in Bundelkhand; prospects are generally good. In the Punjab slight rain has fallen in Delhi, Lahore, Rawal Pindi, Mooltan, Dera Ismail Khan and Peshawar: the condition of the crops (where not damaged by floods) is satisfactory. Throughout Central India copious rain has fallen, and in Western Malwa the crops are suffering from its excess. In Assam more rain is wanted. Reports from Burmah are satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Sept. 23rd)	·92 at Masulipatam. 3·5 at Repalli. Slight elsewhere.	Six feet water above anicut; dry crops sown; embankments burst in places; crops recently submerged in parts of Devi and Repalli; markets well supplied; prices steady; small-pox and fever in four taluks; 4 deaths from cholera in Narsaropett; slight cattle disease in four taluks; pasture sufficient.
Kurnool (22nd)	0·76 in three days.	Rain good in two taluks, moderate in five, none in Cumbum; standing crops generally good, except in Markapur, where they are withering from insufficient rain; markets moderately supplied; prices steady; fever prevalent; cholera abating in Kurnool town; 331 attacks and 160 deaths reported in five taluks; water and pasture sufficient; seven feet water over Sunkesala anicut.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Sept. 23rd)	0·87 at Negapatam, elsewhere none.	Water in rivers decreasing; no fresh supply to tanks; water over anicuts none; cultivation wet and dry crops; standing crops not thriving for want of rain, and good supply in rivers; harvest a few dry grains in some parts; markets well supplied; prices steady; fever in some parts; cholera 228 seizures, 165 deaths; cattle disease in some localities, some loss; pasture insufficient.
Trichinopoly (22nd)	...	Good rain last night; cholera decreasing, but not actually gone.
Malabar (23rd)	0·71	First crop harvest begun; markets well supplied; prices falling; fever and small-pox prevail slightly in Ernad and Walluvanad; bowel complaint in Palghaut and Walluvanad, 77 cases, 28 deaths; slight cattle disease in two taluks; pasture abundant.
		General Remarks.—General prospects satisfactory.
Bombay— (Sept. 23rd)		
Sind.		
Kurrachee (22nd)	...	River risen 19 inches; heavy rain in Kurrachee on Saturday, also in districts; fever and colds prevalent.
Upper Sind Frontier „	·82	Rabi sowing progressing.
Gujarat.		
Ahmedabad (Sept. 22nd)	2·80	Total rainfall 20·56; extraordinary heavy floods in Sabarmati; good portion of city under water, large portion of Ellis bridge carried away; crops good; cholera cases 5, deaths none.
Kaira „	2·34	Total rainfall 31·78; kharif crops flourishing.
Surat „	3·26	Total rainfall 42·32.
Broach „	3·15	Total rainfall 56·12; cotton and other crops injured by excessive rain.
Khandesh and Nasik.		
Khandesh (Sept. 22nd)	3·5 at Dhulia.	Total rainfall 19·41, fall general; kharif and cotton crops injured by excessive rain; in Chalisgaon and Chopra cholera cases 7, deaths 3; cattle disease in Shahada.
Nasik . „	1·23	Total rainfall 34·16; crops suffering in some places from excessive rain; prospects otherwise fair; cholera continues slightly.
Konkan.		
Tanna (Sept. 22nd)	11·15	Total rainfall 110·34; agricultural prospects fair; cholera very slightly prevailing in six talukas.
Deccan.		
Poona (Sept. 22nd)	1·30	Total rainfall 32·79; slight injury done to crops in some places by heavy rain; cholera continues.
Ahmednagar „	3·39	Total rainfall 16·80; kharif crops suffering in some places; rabi sowing impeded by excessive rain; cholera generally decreasing, cases 86, deaths 33.
Sholapur „	1·37	Total rainfall 18·76; slight cholera; crops good.
Satara „	1·4	Total rainfall 50·88; state of crops same as before; rabi sowing progressing; slight cholera in Máu.
Southern Mahratta Country.		
Belgaum (Sept. 22nd)	·55	Total rainfall 52 inches; crops damaged by floods; in Chikori and Athni cholera continues.
Dharwar „	·18	Total rainfall 24·78; rain much wanted in almost all talukas; kharif crops good; cotton sowing progressing; cholera in several villages of Hubli taluka and at Hebli in Dharwar taluka.
Kanara „	5·75	Total rainfall 107·; crops on coast ripening; fever, dysentery, and cattle-disease prevail.
Kaladgi „	2·17	Total rainfall 14·17; kharif crops good; rabi sowing progressing; cholera continues, 90 deaths in seven talukas.
Kattywar and Gaekwar's Territory.		
Rájkot (Sept. 22nd)	1·41	Total rainfall 13·64; crops thriving.
Wadhwán „	·62	Total rainfall 14·23; crops good.
Baroda „	1·89	Kharif and cotton crops thriving; serious apprehension continues in Okhámandal and Amreli; public health good.
		General Remarks.—River risen again in Sind; apprehensions for safety of crops in parts of Baroda State; elsewhere rainfall heavy, especially in Gujarat, and propects excellent.
Bengal—		
Chittagong (Sept. 23rd)	·31	
Noakhally „	5·11	
Chittagong Hill Tracts „	·8	
Hill Tipperah „	·87	Public health good except at Koilashur, where it is said that fever prevails.
Backergunge „	1·78	
Furreedpore „	1·14	
Dacca „	·63	
Tipperah „	·60	
Mymensingh „	·17	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
24-Pergunnahs (Sept. 23rd)	·80	Fever increasing at Barripore and Sudder Sub-divisions.
Nuddea „	·90	
Moorshedabad „	·83	Much fever prevalent at Lalbagh Sub-division; cholera in Burwa; health otherwise good.
Jessore „	·65	
Pubna „	·45	
Rajshahye „	2·88	10 cases of cholera reported during the week, 4 proved fatal.
Bogra „	1·75	
Maldah „	·13	
Dinagepore „	1·39	Much fever at head-quarters and Neetpoor and probably elsewhere, though from some places reports say health is good; outbreak of cholera in Poteeram lately, 22 deaths reported.
Rungpore „	·1	
Cooch Behar „	1·42	
Jalpaiguri „	2·87	There were three fatal cases of cholera in the Jail which have not been followed by others. A few cases occur in the interior here and there and from time to time without apparent connection.
Darjeeling „	1·10	
Midnapore „	1·59	
Howrah „	·29	
Hooghly „	1·3	General health fair; a few cases of small-pox and cholera; fever more prevalent.
Burdwan „	2·9	Fever slightly increased.
Bankoora „	1·09	
Beerbhoom „	1·20	
Sonthal Pergunnahs „	1·51	Cholera decreasing.
Bhágalpur „	·70	Cholera abated in town, but is prevalent in villages in the Banka Sub-division; elsewhere general health is very good.
Monghyr „	·64	
Purneah „	1·97	
Darbangah „	2·95	
Mozufferpore „	1·32	
Sarun „	1·42	General health good.
Chumparun „	·78	
Patna „	Not received.	Health good.
Gya „	1·05	
Shahabad „	1·26	
Hazáribágh „	2·88	
Lohardugga „	1·66	Cholera much abated.
Maunbhoom „	·26	
Singbhoom „	1·26	Healthy.
Balasore „	5·28	
Cuttack „	10·45	Public health improving.
Pooree „	2·16	
		General Remarks.—More or less rainfall is reported from all the districts of Bengal; but in Rungpore, Purneah and parts of Gya, more rain is wanted. Early rice and jute are still being harvested, and the transplanting of the late rice crop is still going on in a few places; the prospects of the late rice are as a whole statisfactory; kalai pulse and sonee oilseeds are being sown.
N. W. P.—		
Benares (Sept. 22nd)	Average rainfall ·9.	No change as to crops.
Mirzapur „	1·1 at Kourh, elsewhere less.	Prospects generally good; early rice commenced harvesting.
Azamgarh „	3·9 at head-quarters.	Prospects fair; some days of clear dry weather needed now for ploughing of rabi lands.
Allahabad (21st)	Average rainfall 2·8	
Cawnpore (22nd)	Average rainfall 2·3	Prospects continue favourable.
Banda (23rd)	Average rainfall 2·9.	Kakun sama cut; cotton blossoming.
Hamirpur „	Average rainfall 3·2.	Dry weather required.
Jhansi (21st)	4·6	Some damage to crops in Mau from heavy rains.
Agra (22nd)	From ·1 to 6·2	Prospects generally good; slight damage to bajra from rain and to jowar from insects.
Meerut „	...	Favourable weather now; prospects good.
Moradabad „	Little or no rain.	Rice harvest commencing in parts; prospects good.
Bareilly „	1·5	Agricultural prospects continue good.
Almorah „	Slight.	Weather very favourable for the crops; in many parts rice cut.
Punjab—		
Delhi (Sept. 22nd)	1·5	Cholera dying out in city but lingering in a few villages in district; crops on low lands suffered from floods, on high ground in flourishing condition.
Hissar „	*Nil.*	Kharif promising; ground being prepared for rabi; health good.
Umballa „	*Nil.*	Crops good; cholera still hanging about district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*		
Jullundur (Sept. 22nd)	*Nil.*	Crops good where uninjured by flood; cholera abating in Kartarpore; fever about, but health generally fair.
Lahore „	·6	Agricultural prospects good; health generally good, but cholera hanging about.
Rawal Pindi „	1·5	Prospects excellent; health good.
Mooltan „	·5	A second flood from Ravi and Sutlej has damaged crops; fever about, otherwise health good.
Dera Ismail Khan „	1·8	Health good.
Peshawur „	1·1	Agricultural prospects favourable; fever about.
		General Remarks.—Agricultural prospects may be considered good, though damage has been caused by the unusual floods of this season; cholera still lingers, and a few districts are suffering from the usual autumnal fevers, otherwise health good.
Oudh—		
Lucknow (Sept. 22nd)	6·9	Prices stationary; public health generally good; kharif prospects favourable, and preparations for the rabi in progress.
Sitapur „	2·5	
Fyzabad „	1·2	
Central Provinces—		
Upper Godavari (Sept. 18th)	5·3	Stormy weather; prospects favourable; health good; prices easy.
Sambalpur „	2·42	Prospects good; cholera continues.
Bilaspur „	2·70	Crops promising except cotton; cholera decreasing; prices easy.
Raipur (19th)	2·16	Prospects favourable; cholera decreasing; prices easy.
Chhindwara „	1·37	Kutkijowar damaged by continuous rain; 97 cases of cholera, 42 fatal; prices stationary.
Chanda „	2·54	Jowar damaged; other crops doing well; cholera and cattle disease continue; prices steady.
Balaghât (20th)	·90	Prospects favourable; fever prevalent; prices steady.
Bhandara (21st)	3·83	Except jowar other crops favourable; rabi ploughing continues; cholera, cattle disease and small-pox lingering; prices steady.
Nagpur (22nd)	1·80	Jowar suffered, other crops doing well; cholera abating; cattle disease continues; prices stationary.
Wardha „	3·	Crops damaged by excessive rain; cholera almost extinct.
Nimar „	1·66	Cotton slightly damaged, other crops well; cholera decreasing; prices stationary.
Hoshangabad „	2·55	Cholera continues.
Betul „	2·64	Cholera continues.
Narsinghpur „	2·	Crops considerably damaged by excessive rain; cholera disappeared.
Jubbulpore „	2·97	Prospects good; no fresh cholera cases.
Saugor „	·74	Break wanted; rabi ploughing stopped; cholera ceased.
Seoni „	·90	Prospects good; a break required for rabi ploughing; health good.
Damoh „	1·70	Kharif crops except rice injured; prices stationary.
Mandla „	1·10	Prospects of rice good, other crops damaged by continuous rain.
		General Remarks.—Rice crops promise well, but jowari and cotton have suffered from wet. In Nerbudda Valley rain has done damage to crops, and it is difficult to prepare land for rabi.
British Burma—		
Arakan Division.		
Akyab (Sept. 22nd)	...	Public health normal; crop prospects good.
Pegu Division.		
Rangoon (Sept. 22nd)	...	Public health good; extensive destruction of crops in Hline from inundation. Rainfall 23 inches in excess of last year.
Bassein „	...	Health good; crops doing well.
Henzada „	...	Public health good; crops flourishing; slight cattle disease.
Prome „	...	Healthy; crops promising.
Thayetmyo „	...	Health good; river fallen greatly; rain required.
Thonkwa „	Rain copious.	Health and crops good.
Tenasserim Division.		
Amherst	52·5	Public health good; crops partially inundated in Amherst, Shwegyeen and Toungoo.
Toungoo	4·5	
Mysore and Coorg—		
Mysore (Sept. 23rd)	16·50 in Bangalore Cantonment.	Cholera spreading slowly in Nandidroog and Ashtagram divisions; deaths at Mysore number 443 up to date; last week's average for town and district 21; dry crops suffering severely from want of rain, especially in Mysore District.
Coorg „	1·71	*General Remarks.*—Agricultural prospects still doubtful.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauhati (Sept. 23rd)	·06	Cool north-east wind; weather clear and dry; transplanting operations almost finished, but rain wanted; season for tea tolerably good; public health good.
Sylhet „	·75	Prices steady; field work progresses.
Hyderabad Assigned Districts—		
Umraoti (Sept. 23rd)	1·74	Cholera gradually disappearing from the province; kharif crops suffered slightly in a few places from excessive rain; land under plough for rabi sowing.
Central India—		
Indore (Sept. 22nd)	2·90	
Gwalior „	2·37	
Neemuch „	5·13	
Rutlam „	6·79	
Baghelkhund (Sutna) „	4·70	
Bhopal Agency.		
Sehore (Sept. 11th)	5·5	
Beorah „	13·3	
Bhilsa „	8·1	
Nursingarh „	5·9	
Kilchipur „	·05	
		General Remarks.—Continuous rain has damaged crops in Western Malwa; health is generally good.
Nepal— (Sept. 15th)	2·1	Agricultural prospects fair; cholera somewhat less.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Thursday, the 16th September 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble T. C. Hope.

BURMA COURTS BILL.

The Hon'ble MR. HOBHOUSE, in moving that the Final Report of the Select Committee on the Bill to consolidate and amend the law relating to the Courts in British Burma be taken into consideration, said that he ought rather to move that both reports of the Committee, the final and preliminary reports, be taken into consideration, because though the preliminary report had been before the Council several months, it had not been brought up formally for consideration. The fact was that this Bill had been for a considerable time before the Council, having been introduced as long ago as the month of April 1874. This was the second time, since he had been in India, that he had to introduce a Bill to amend the Burma Courts Act. There was considerable difficulty always in making complete arrangements for a system of Courts, because there were a great many small points to attend to, and many things were not found out until the Courts had begun to work. But in British Burma there was a peculiar source of complication, for whereas in other Provinces—Bengal for instance—there was only one Supreme Court of Judicature, in British Burma there were no less than four, having different areas of jurisdiction, either geographical or legal, or mixed geographical and legal. There were the Judicial Commissioner, the Recorder of Rangoon, the Special Court which consisted of the Judicial Commissioner and the Recorder of Rangoon sitting together, and the High Court at Calcutta. All those tribunals were in their several ways Supreme Courts of Judicature; and that circumstance made the arrangements for British Burma peculiarly complex and difficult. Therefore it was no wonder that every now and then we had applications from the judicial authorities of British Burma saying that something was wanted which they had previously not observed, or that something which had been put into the Act did not work with perfect smoothness.

When he introduced this Bill, there were three objects for which legislation was wanted. One was that certain jurisdiction had been given to Deputy Commissioners, and it was found that the provision for that jurisdiction did not quite answer the wants of the Province, for in some districts it was not desirable to have an officer as high as a Deputy Commissioner; but there was an officer below the rank of Deputy Commissioner, and it was desirable that that officer should exercise the jurisdiction that the Act attributed only to Deputy Commissioners. Secondly, it was desired to relieve the Recorder of Rangoon from certain

duties, of a somewhat mechanical nature, in the way of recording evidence, writing judgments, and so forth, which were imposed upon the Judges by the Code of Civil Procedure, and with which it was very undesirable to occupy the time of such a Judge as the Recorder. The third object was to revive certain Acts which were repealed by the first Burma Courts Act passed in 1872, but which we found, in process of time, to be wanted for the purposes of British Burma.

When the Bill went into Committee, they had a considerable number of suggestions from the authorities in British Burma, who also desired that as so much alteration had been made by the amending Act of 1873, and would be made by the new amending Act, the original Act should be redrawn with the incorporation of all the alterations. To that desire the Committee acceded, and they made a preliminary report in February last showing that the Act had been redrawn, and exhibiting in detail all the substantial alterations that had been introduced. The draft was then republished. It had since undergone further criticism in British Burma, and had also had the advantage of the presence of the Hon'ble Mr. Eden here. The Committee had now made a further report, and the time was come for the final consideration of the Bill.

The alterations that had been made in the existing Acts were very numerous, but mostly of a very small kind. He hoped that they would be useful, and that they would prove sufficient for a time at all events. It would not, however, be very edifying to the Council if he were to attempt to carry them through the detailed alterations that had been made. The only changes which, as it seemed to him, could be at all called alterations of principle were as follows. The Bill gave to the Recorder of Rangoon an enlarged jurisdiction which it was found desirable that he should have. It gave him an increased area of jurisdiction, which the growth of the large towns in British Burma rendered it expedient that he should have. Rangoon was now a considerable centre of commerce; a large amount of shipping came into the harbour, and that rendered it necessary to have a Judge who should decide upon two classes of cases. One class was that of admiralty cases; and it was proposed to give to the Recorder admiralty jurisdiction throughout the territorial waters of British Burma. But inasmuch as the jurisdiction was entirely new and in many respects rather of a special and important kind, it was also proposed to give an appeal to the High Court at Calcutta. The other class was that of insolvency cases. Of course, as commerce increased, there would be a greater number of defalcations amongst commercial men, and therefore it was thought desirable to set up an insolvency jurisdiction for the four principal towns of British Burma, namely, Rangoon, Maulmain, Akyab and Bassein.

He thought that those were the only two matters of principle involved in the alterations. Among the larger details of the alterations, besides the three original objects he had referred to, he might mention that the area of the Recorder's jurisdiction had been enlarged in some other respects—he meant the legal, and not the geographical area. For instance, the Bill gave him power to try certain cases which clearly ought to be tried at Rangoon, but which, under the existing Acts, did not fall within his jurisdiction for the reason that the cause of action had arisen elsewhere. In these cases however the parties or their agents were resident at Rangoon, evidence was procurable at Rangoon, and all circumstances pointed to the convenience of trying cases at Rangoon. The Bill also gave to the Recorder the powers of a High Court over Magistrates within the legal area of his jurisdiction and over the Small Cause Courts within the same area.

Then the Bill altered the mode of procedure in the Special Court. When the Act of 1872 and the amending Act of 1873 were passed, no staff of officers was provided for that Court. The consequence was that although the Court could sit and hear appeals, it could not do many things which a Court had to do by its ministerial officers; and the Acts at present on the Statute-book provided for those things being done either by the Judicial Commissioner or the Recorder of Rangoon. Now the Chief Commissioner had seen his way to provide a proper staff of officers: the Bill, therefore, altered the procedure by giving the Special Court power to do those things which the two other Judges were ordered to do before.

Then, again, some more extensive powers had been given both to the Judicial Commissioner and the Recorder of Rangoon with respect to the matters

of costs in their Courts and of the legal practitioners who practised before them; and the Bill went on to relieve both the Judicial Commissioner and the Special Court from the same class of mechanical duties from which he (MR. HOBHOUSE) had already said it had been found expedient to relieve the Recorder.

Those were the larger details of the Bill now before the Council, and when he had called those the larger details, the Council might imagine what the smaller details were. They were in fact of a purely professional and technical kind; they were all mentioned in the reports, and it would, he thought, be no use to draw the attention of the Council further to them. The whole of the Bill had been prepared in very close communication with the authorities in British Burma, both judicial and executive, and, as he had said, the matter had derived great advantage from the presence of Mr. Eden at Simla during this season. MR. HOBHOUSE could only hope that it would be the last amending Act that he should have to introduce into the Council for British Burma. He could not believe that it would be the last that the Council would have to consider; because, as he had remarked, the present arrangements were very complicated, and he had no doubt that, as time went on, the authorities of British Burma would see their way to simplifying them. However, that was a matter for the future; he hoped that, for the present, the proposed Bill would be the means of making things work smoothly in British Burma.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE then moved that the Bill as amended be passed.

The Motion was put and agreed to.

PANJÁB CHIEF COURT APPEALS BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to provide an appeal from certain decrees of the Chief Court of the Panjáb. He said that this was a matter of great simplicity. The Chief Court of the Panjáb, as we all knew, consisted of three Judges. They were principally an Appeal Court, but they had coming before them a certain amount of original business. The amount was not very large in quantity; but of course in quality it consisted of cases of the greatest difficulty and magnitude that arose in the Panjáb. Well, those cases, according to the distribution of business, were frequently heard before a single Judge; but the Panjáb Chief Court Act provided no appeal from that single Judge to the Chief Court itself. The consequence was that cases, which were heard in the first instance before a single Judge, were subject to no appeal whatever within the limits of India, and those cases had to go up to the Privy Council if the parties desired to appeal them at all. He need hardly enlarge upon the inconvenience of that practice. Of course it might be said that cases should be heard before two or before the three Judges of the Chief Court, and so a greater amount of legal power should be brought to bear upon them. But, in the first place, every Court was the best judge of its own method of transacting business, and the Chief Court considered that the business ought to be transacted in many cases by a single Judge; and in the second place, arguing from his own experience of legal business, he thought it right that the bulk of business of the first instance should be transacted by a single Judge, and he believed that such business was much better done by a single Judge than by a plurality of Judges. He therefore thought that it was quite right that the Panjáb Chief Court should go on transacting business of the first instance by a single Judge, and the Judges themselves were extremely desirous that there should always be an appeal from the judgment of that Judge, and that the judgment should be checked by his colleagues. It was therefore proposed to introduce a Bill for the purpose of providing an appeal from the judgment of a single Judge or even two Judges of the Panjáb Chief Court to the full Court.

The Motion was put and agreed to.

The Council then adjourned to Thursday, the 30th September 1875.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30TH SEPTEMBER 1875.

GENERAL REMARKS.—Fair rain has fallen in Madras, except in Malabar; prospects are satisfactory. In Mysore prospects have been improved by a fall of 3½ inches. In Sind the river continues high and the crops are doing well. The rainfall in the Bombay Presidency has been generally slight: prospects are good, except where damage has been done by the floods of the Sábarmati in Ahmedabad and Kaira. These floods are now seen to have been the result of the exceedingly heavy falls which occurred throughout Southern and Central Rajputana, where damage has also been caused by the excessive rain. Throughout the Central Provinces and Berar there has been a break, with only light showers in places: prospects are good except in Hoshangabad, Narsinghpur and Damoh, where the excessive rain has damaged the crops. In Central India the week's fall has been heavy, particularly in Malwa, where the excess of rain is also complained of. In Indore and Baghelkhand no rain has fallen. In Bengal the rain has been general and moderate, except in Burdwan, Gya, parts of Chota Nagpore and Orissa, where it has been heavy: in the last province some floods have occurred. The prospects of the late rice crop are very favourable. In Upper Assam more rain is wanted. Moderate rain has fallen in the North-West Provinces and Oudh, where the crops generally promise well. In the Punjab abundant rain has fallen in Hissar, Umballa, Jullundur, Lahore and Rawal Pindi, moderate rain in Delhi, little in Dera Ismail Khan and Peshawar, and none in Mooltan: prospects are good except where floods have caused damage. Reports from Burma continue favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Sept. 30th)	5·68 at Masulipatam. 6·0 at Kuncondah. 4·0 at Bezwara. 2·66 in six days.	Rain comparatively slight elsewhere; 5½ feet water over anicut; dry crops being sown; paddy transplanted in taluks; maize, sajja, gingelly suffering from excessive rain and grub; cumboo green gram harvested; outturn about half; markets well supplied; prices steady; cholera in Narsaropett, 7 cases only yet reported; cattle generally healthy; pasture very abundant, except in a few villages injured by floods.
Kurnool (29th)		Rain good in four taluks, moderate in others; dry crops good except in Markapur; white jonna and cotton being sown; markets well supplied; prices generally steady; cholera abating; 3 attacks in Kurnool and one death; 177 attacks and 74 deaths in taluks; cattle attacked with foot-disease; water and pasture sufficient except in Markapur; one foot water over Sunkesala anicut yesterday.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Sept. 30th)	3·45 at Negapatam.	Rain elsewhere tolerably good; rivers slightly rising; supply to tanks scanty; water over lower anicut, north branch 1 inch, south 1 inch; cultivation wet and dry crops; standing crops benefited by late rains; harvest a few wet and dry crops; yield fair; markets well supplied; prices steady; cholera continues; attacks 247, deaths 183; cattle generally healthy; pasture insufficient.
Malabar „	*Nil.*	First crop harvested; sowing of second crop begun; prices steady; small-pox, fever and cattle disease abating; bowel complaint in Walluvanad, Palghat and Ponany, 61 cases and 23 deaths; pasture abundant.
Trichinopoly ...	...	Good rain; cholera slightly increasing in town, decreasing in district. *General Remarks.*—General prospects satisfactory.
Bombay— (Sept. 30th)		
Sind.		
Kurrachee (29th)	...	River on 27th seventeen inches higher than on the same date last year; crops fair.
Shikarpur „	...	River 15 feet 3 inches; water supply abundant; kharif harvesting commenced insects attacking crops in Rohri taluka; fever increasing.
Hyderabad „	...	River continued at a good height during the week: much benefit will thereby accrue to cultivation; harvest will be only slightly below the average, save in Tando division; fever in a few talukas.
Upper Sind Frontier „	...	Kharif crops on desert canal excellent; on Begari and branches good but backward; those in Deh, Akhilpur, Rhindvah, Jamidera and south bank of Nuŋwah destroyed by flood are now drying up; rabi crops being sown; weather warm; fever prevailing.
Gujarat.		
Ahmedabad (Sept. 29th)	1·32	Total rainfall 21·88; much damage from floods to crops and culturable lands along the banks of the Sábarmati; extent not yet ascertainable.
Kaira „	1·40	Total rainfall 33·40; considerable damage caused to houses and crops in the villages on the Sábarmati by recent floods.
Súrat „	·05	Total rainfall 42·37.
Broach „	·36	Total rainfall 56·48; crops good except those already reported to be injured.
Khandesh and Nasik.		
Khandesh (Sept. 29th)	·27 at Dhulia.	Total rainfall 19·68; kharif cultivation generally injured by rain, but cotton plants improving from recent break; prospects good; cholera at Virdel, 4 cases, 2 deaths; cattle disease in Nizampur and Sháhada.
Nasik „	·98	Total rainfall 35·14; bajri crops suffering from excessive rain; cholera continues slightly.
Konkan.		
Tánna (Sept. 29th)	3·29	Total rainfall 113·63; agricultural prospects fair; cholera still slightly prevailing in almost all talukas.
Deccan.		
Poona (Sept. 29th)	...	Standing crops have in some places suffered from moisture; cholera has not quite disappeared.
Ahmednagar „	...	Kharif crops fair; sowing of rabi commenced; cholera generally decreasing, 20 cases, 19 deaths.
Sholapur „	1·55	Total rainfall 20·31; slight cholera.
Satara „	·05	Total rainfall 50·93; in Wai crops on elevated tracts have withered; in Tásgaon those adjoining the river banks have been swept away, the rest middling; slight cholera in some talukas.
Southern Mahratta Country.		
Belgaum (Sept. 29th)	·09	Total rainfall 52·09; more rain required; cholera continues.
Dharwar „	...	Early crops in almost every taluka require rain; cotton sowing much retarded from its want; cholera in 11 villages.
Kanara „	·18	Total rainfall 107·18; rice harvest commenced near Karwar; prospects good.
Kaladgi „	3·84	Total rainfall 18·01; cholera continues, 63 deaths in eight talukas.
Kattywar.		
Rájkot (Sept. 29th)	0·66	Total rainfall 14·64; more rain required; crops good.
Wadhwán „	...	Crops good.
Jhinjuwára „	...	Crops damaged by the Rupani river overflowing. *General Remarks.*—Prospects good in Sind and the Presidency generally; serious damage from floods in Ahmedabad and Kaira.
Bengal—		
Chittagong (Sept. 30th)	7·90	
Noakhally „	*Nil.*	
Chittagong Hill Tracts „	1·16	
Hill Tipperah „	·12	Fever still at Koilashur.
Backergunge „	·28	
Furreedpore „	·03	Public health continues good.
Dacca „	·81	
Mymensingh „	1·35	
Tipperah „	·14	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
24-Pergunnahs (Sept. 30)	1·86	Fever increasing at Barripore and Basirhat.
Nuddea „	1·41	
Moorshedabad „	1·41	Fever prevalent in some places; cholera has reappeared at Burwa.
Jessore „	·53	
Pubna „	1·53	Fever prevails in the town.
Rajshahye „	2·55	Thirty-one cases of cholera reported chiefly in Belwanah Thana during the week, 12 proved fatal; there have been a few cases of small-pox about Nattore.
Bogra „	2·39	
Maldah „	2·08	Twenty-one attacks and 7 deaths from cholera were reported during the week; in one village 14 attacks of small-pox were reported.
Dinagepore „	·41	Much fever at head-quarters; small-pox at Roygung, 50 cases and 6 deaths.
Rungpore „	·61	
Cooch Behar „	1·93	
Jalpaiguri „	2·39	Sporadic cases of cholera continue to occur.
Darjeeling „	2·53	
Midnapore „	2·47	
Howrah „	2·35	
Hooghly „	2·0	Small-pox continues in 20 isolated places; cholera reported in two places rather prevalent, but character of general health is good.
Burdwan „	6·16	Public health generally good.
Bankoora „	1·03	General health good.
Beerbhoom „	2·87	
Sonthal Pergunnahs „	·39	Cholera has almost disappeared.
Bhágalpur „	·56	General health very good; cholera here and there in Banka sub-division.
Monghyr „	Not received.	
Purneah „	·89	Cholera is disappearing.
Darbangah „	·25	
Mozufferpore „	1·10	
Sarun „	·66	Cholera is reported at Bashrum.
Chumparun „	1·76	
Patna „	·23	Health good.
Gya „	4·32	Public health good.
Shahabad „	·66	
Hazáribágh „	·66	
Lohardugga „	2·90	Cholera dying out.
Maunbhoom „	2·02	
Singbhoom „	3·06	Healthy.
Balasore „	·95	
Cuttack „	3·20	
Pooree „	5·91	
		General Remarks.—Moderate rain has fallen in almost all the districts, except in the Orissa Division, where the fall was rather heavy, and caused floods in parts of Cuttack and Balasore. The Ganges has again risen, and caused slight damage in the south of the district of Darbungah. The general rainfall of the week has done much good to the crops, but more is still required. In Tipperah the inundation has subsided, and the ryots are ploughing the lands and transplanting the late rice. The harvesting of the aus rice and other bhadoi crops and the transplanting of the late rice are still going on. The general prospects of the great rice crop are very favourable. Preparation of land for the ensuing cold-weather crops has commenced in places.
N. W. P.—		
Benares (Sept. 29th)	Average rainfall 1·1.	No change as to crops.
Mirzapur „	3·1 at Chunar, elsewhere less.	Prospects continue good.
Azamgarh (28th)	2·1 at head-quarters.	Prospects fair.
Allahabad „	Average rainfall ·5.	
Cawnpore (29th)	1·	Weather fine and favourable.
Banda (30th)	Average rainfall 2·5.	Dry weather wanted; prospects continue favourable.
Hamirpur „	Average rainfall ·8.	Every prospect of a good harvest.
Jhansi (28th)	*Nil.*	Weather cloudy; prospects on the whole good.
Agra (29th)	From ·1 to 1·1	Prospects good; slight damage to bajra and jowar on account of continued rains.
Meerut „	...	Heavy rain on Saturday last, fine now.
Moradabad „	Average rainfall 2·4.	Crops good.
Bareilly „	·8	Agricultural prospects good.
Almorah (30th)	...	The heavy rain on Saturday has only done some damage to the rice straw, and not to the grain or to the millet crop which still promises very well.
Punjab—		
Delhi (Sept. 29th)	2·7	All except submerged crops doing well; health of district good; cholera almost disappeared.
Hissar „	5·7	Rain appears to be general; the standing kharif crops progressing favourably; rabi ploughing in progress; health good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*			
Umballa	(Sept. 29th)	7·	Crops good; cholera still hanging about.
Jullundur	„	8·6	Extensive inundations for the third time within six weeks; a few cases of cholera at Kartarpore; otherwise health good.
Lahore	„	7·3	Crops good; cholera still lingers, but general health satisfactory.
Rawal Pindi	„	5·50	Cutting of kharif commenced; slight fever prevails.
Mooltan	„	*Nil*	Fever prevalent; otherwise health good.
Dera Ismail Khan	„	·9	Health good.
Peshawur	„	·1	Agricultural prospects favourable; fever prevalent.
			General Remarks.—General health of the province remains good, though cholera still lingers in certain districts. Agricultural prospects may also be considered generally good, though there has been considerable damage to crops by the heavy, and for the time of year, unusual rainfall throughout the districts from Lahore to the Jumna.
Oudh—			
Lucknow	(Sept. 29th)	*Nil.*	Public health generally good; prospects continue favourable; prices stationary.
Sitapur	„	1·6	
Fyzabad	„	·1	
Central Provinces—			
Upper Godavari	(Sept. 25th)	1·45	Prospects favourable; cholera prevalent.
Sambalpur	„	2·54	Prospects excellent; cholera continues.
Bilaspur	„	1·28	Prospects favourable except cotton; fever prevalent; prices easy.
Raipur	(26th)	2·97	Prospects good; rabi ploughing continues; cholera decreasing; prices easy.
Chanda	„	1·	Prospects good except jowar; cholera and cattle disease continue; prices easy.
Chhindwara	„	1·55	Prospects good; cholera abating; prices steady.
Balaghât	(27th)	·20	Prospects favourable; fever prevalent; prices steady.
Bhandara	(28th)		Weather clear; prospects favourable except in low land jowar; rabi ploughing continues; cholera decreasing; fever, small-pox and cattle disease continue; prices easy.
Nagpur	(29th)		Weather clear; prospects favourable except jowár; cholera and cattle disease lingering; prices stationary.
Wardha	„	...	Weather clear; crops promising; cholera almost extinct.
Nimar	„	·34	Minor crops reaped; jowar slightly damaged; cholera continues; prices risen.
Hoshangabad	„	...	Weather clear; prospects unchanged; cholera continues.
Narsinghpur	„	...	Weather clear; prospects unchanged.
Jubbulpore	„	·77	Prospects good; cotton doubtful; health good.
Saugor	„	...	Weather clear; prospects of rice kodoo favourable; rabi ploughing progressing; prices rising.
Seoni	„	·40	Rabi ploughing continues; health good.
Damoh	„	...	Weather clear; rice prospects good; other crops much injured; prices risen.
Mandla	„	...	Weather clear; prospects unchanged; prices stationary.
			General Remarks.—Excepting jowari other crops promise well. In Hoshangabad, Narsinghpur, and Damoh, the excessive rain has done much injury; except in these districts, prospects favourable.
British Burma—			
Arakan Division.			
Akyab	(Sept. 29th)	3·50	Public health good; agricultural prospects good.
Pegu Division.			
Rangoon	(Sept. 29th)	...	Health good; slight cattle disease; prospects of crops fair.
Thonkwa	„	Plentiful.	Health and crops good; slight damage to leaves of paddy plant by caterpillars.
Bassein	„	...	
Henzada	„	...	Health good; crops flourishing; slight cattle disease.
Tenasserim Division.		...	Public health good, except at Tavoy, where there are some cases of small-pox and fever; crops partially inundated and destroyed in Amherst, Shwegyeen and Tonghoo districts; rainfall good.
Mysore and Coorg—			
Mysore	(Sept. 30th)	1·095 in Bangalore Cantonment.	The scarcity at Mysore has been relieved by a fall of 3 inches 62 cents during the past week; prices which had risen alarmingly have fallen, and the cholera epidemic shews symptoms of abatement; deaths during past week average for Mysore town and district 16; epidemic still prevails in the Hassan and Tumkur districts, and one taluq of Bangalore District.
Coorg	„	·98	*General Remarks.*—Agricultural prospects improved, but more rain needed.
Assam—			
Gauhati	(Sept. 30th)	·39	Mornings cloudy and cool, days clear and hot; transplanting operations almost finished; prospects of all crops and tea favourable, but rain wanted; public health good.
Sylhet	„	10·62	Field-work progresses; rain has done good; rice market steady.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—			
Umraoti	(Sept. 30th)	·02	Jowari slightly injured from excessive moisture; other crops good; cholera still lingering in the Woon District.
Rajputana—*			
Aboo	(Sept. 30th)	8·37	Total rainfall 114·95; slight drizzle and mists continue, much desired break since 26th.
Sirohi	(20th)	...	Excessively heavy rains; crops in danger for want of sunshine; bajra injured by high wind; health good.
Erinpoora	(27th)	Over 12 inches rainfall in beginning of week.	Crops injured by rains and wind; fair outturn expected; health good.
Meywar	(24th)	17·3	Total rainfall 40·2; health good; danger of loss of crops from excessive rain; great destruction to bunds and bridges, and falling of houses in city.
Marwar	(18th)	2·50	City tanks got six months' supply from recent rains; crops greatly injured; health good.
Harowtee States—			
Deolee	(Sept. 18th)	2·7	Prospects good; fever prevalent.
Kota	„	0·3	
Tonk	„	0·6	
Jhallawar	„	1·5	
Bhurtpore	(23rd)	3·21	Sickness decreased; prospects good; weather continues cloudy; daily rain.
	(30th)	1·41	Weather cleared.
Jeypore	„	5·5	Incessant heavy rain since Sunday, still raining; health good.
Ajmere	(23rd)	0·4	Good rain and general since 17th; cholera still exists in Ajmere itself; health otherwise good and agricultural prospects very satisfactory.
	(30th)	11·1	Unparalleled rain for 8 days; tanks filled; rabi prospects assured, but early kharif crops damaged; still some cases of cholera, fortunately confined to Ajmere city; health otherwise good.
Central India—			
Indore	(Sept. 29th)	*Nil.*	Rainfall in Western Malwa has been 20 inches beyond average and done much damage to autumn crops; health generally good; cholera decreasing.
Gwalior	„	·43	
Neemuch	„	3·64	
Rutlam	„	4·68	
Baghelkhand (Sutna)	„	*Nil.*	
Bhopal Agency.			
Sehore	(Sept. 18th)	2·02	
Beorah	„	8·03	
Bhilsa	„	5·04	
Nursingarh	„	·09	
Kilchipur	„	6·07	
Nepal—	(Sept. 22nd)	2·	Agricultural prospects fair; cholera decreasing.

* The report for the week ending the 23rd September was not received in time for publication and is included in the present report.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Simla on Wednesday, the 29th September 1875.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble T. C. Hope.

LAW REPORTS BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill for the improvement of Law Reports. He said that the Committee had made no change in the Bill and had recommended that it be passed.

PANJÁB CHIEF COURT APPEALS BILL.

The Hon'ble MR. HOBHOUSE also introduced the Bill to provide an appeal from certain decrees of the Chief Court of the Panjáb, and moved that it be referred to a Select Committee with instructions to report in a week. He said that Act IV of 1866, which regulated the Chief Court of the Panjáb, provided no appeal from decrees made by a single Judge of the Court in the exercise of original civil jurisdiction. The consequence was that appeals from such decrees would only lie to the Judicial Committee of the Privy Council, and much waste of time and money was caused by this state of things. The Bill which he now introduced was intended to supply the defect which he had indicated, and the opportunity had been taken to enable the Appellate Court to remand suits and order retrials, and to empower the Judges to make references to a full Bench as to points of law. The Bill had been prepared in close communication with Mr. Justice Boulnois and Mr. Justice Campbell, and he (MR. HOBHOUSE) desired to express his obligations to those learned persons for the assistance which they had afforded. That circumstance also justified his proposing so short a time for the Committee's report. It was desirable to pass the Bill quickly, because the hearing of several cases had been postponed in expectation of this alteration in the procedure of the Chief Court. And seeing the nature of the Bill, and with whose assistance it had been prepared, it was difficult to suppose that anything would be gained by publication or any lengthened consideration.

The Motion was put and agreed to.

MERCHANT SEAMEN'S LAW AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE also introduced the Bill to amend the law relating to Merchant Seamen, and moved that it be referred to a Select Committee with instructions to report in three months. He said that the object of this Bill

was to make a number of small but important changes in the law relating to Merchant Seamen, which could not conveniently be postponed until that law was consolidated and amended. He had mentioned the points when he procured leave to introduce the Bill and had now to show how the Bill dealt with them.

The first object was to determine disputes whether or not a seaman was "distressed" within the meaning of the sections of the Merchant Shipping Act, 1854, relating to distressed seamen. For that purpose, section 3 provided that the Local Government might certify of any seaman that he was distressed, and that the Master of a ship should be bound to receive such a seaman, and it imposed a penalty in case of refusal.

The next object was to put a check upon the practice of discharging European seamen, which, it was alleged, was often done merely for the purpose of supplying their place with lascars. Sections 4 and 5 were directed to this object. Section 4 repeated the existing law to the effect that no Master should discharge a seaman without written sanction from a Government officer. But it somewhat varied the terms of the existing law in order to preclude a doubt which had been raised whether the officer had complete discretion to give or withhold his sanction. And whereas at present there was no special penalty for breach of this law, it was now proposed to impose one. Section 5 gave the Local Government power to prohibit a Master from engaging Native seamen. This would put a great reserve of power into the hands of the Government, which would probably be used seldom, but which it might use on finding that improper and causeless discharges of European seamen were taking place.

By section 6 provision was made that where a European seaman deserted, the master or owner should report the desertion to the Local Government.

Sections 7 and 8 extended the provisions of section 88 of Act I of 1859, and contained certain rules as to European seamen imprisoned for breaches of discipline or other petty offences on the complaint of the Master. The previous sanction of the Local Government was in that case rendered necessary to the engagement of Natives of India. The Local Government was also empowered to tender an imprisoned seaman to the Master, and, if the Master refused to receive him, the Master might be required to deposit, not only the wages, &c., due to the seaman, but also such sum as might be sufficient to defray the cost of his passage home and of his lodging and subsistence till he started.

The Bill then contained a clause (section 9) slightly increasing the space required by Act I of 1859, section 70, for European and for Native seamen.

Lastly, a clause had been added to remove a doubt which had been raised as to the meaning of an expression in section 54 of that Act. That section declared in effect that where a seaman's wages were payable in India under an agreement wherein the wages were expressed to be payable in pounds sterling or some other non-Indian denomination of coin, the seaman was entitled to the amount estimated according to the "established par value" of the coin. The Bill declared that the expression in question should be taken to mean the rate of exchange for the time being fixed by the Secretary of State for India in Council to regulate transactions between himself and the Government of India. MR. HOBHOUSE believed that this was the true construction of the Act, and it certainly was the one which had been acted on; but it was not clear. A high legal authority had expressed a contrary opinion, and it was desirable to place the matter beyond question.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill be published in the *Fort St. George Gazette*, the *Bombay Government Gazette*, the *Calcutta Gazette*, and the *British Burma Gazette*.

The Motion was put and agreed to.

BOMBAY REVENUE JURISDICTION BILL.

The Hon'ble MR. HOPE moved that the Hon'ble Sir W. Muir and the Hon'ble Sir A. J. Arbuthnot be added to the Select Committee on the Bill to

limit the jurisdiction of the Civil Courts throughout the Bombay Presidency in matters relating to the Land-Revenue.

The Motion was put and agreed to.

OBSOLETE ENACTMENTS REPEAL BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill for the repeal of certain obsolete enactments. He said that the Council were aware that the Legislative Department had undertaken the task of producing a revised edition of the Acts and Regulations now in force in British India. Of this work the first volume, containing the general Acts of the Governor General in Council from 1834 to 1863, both inclusive, was now in the hands of Hon'ble Members; the first half of the second volume had already been printed; and it was hoped that the remainder of the general Acts (by which he meant Acts extending or extendible to the whole of British India or to the Presidency Towns) would be published early next year. It was proposed then to publish a volume containing (*a*) the unrepealed Madras Regulations, (*b*) the Acts of the Governor General in Council relating exclusively to the Madras Presidency, and (*c*) the Acts of the Local Council. In preparing for this volume it had been ascertained that, notwithstanding the numerous repeals effected by Acts X of 1861, XVII of 1862 and III of 1873, and also by Madras Act II of 1869, there still remained in the surviving Madras Regulations a not inconsiderable amount of obsolete matter. The primary object of the Bill which he now asked leave to introduce was to excise this matter. At the same time the opportunity would be taken to remove from the Indian Statute-book certain Acts and portions of Acts of the Governor General in Council, and certain fragments of Bombay Regulations and Acts, which might now be safely dispensed with.

The Motion was put and agreed to.

The following Select Committees were named :—

On the Bill to provide an appeal from certain decrees of the Chief Court of the Panjáb: The Hon'ble Mr. Hope and the Mover.

On the Bill to amend the law relating to Merchant Seamen: The Hon'ble Mr. Eden, the Hon'ble Sir A. J. Arbuthnot and the Hon'ble Mr. Hope and the Mover.

The Council then adjourned to Wednesday, the 13th October 1875.

SIMLA;
The 29th September 1875.

The Gazette of India.

No. 41. SIMLA, SATURDAY, OCTOBER 9, 1875. Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7TH OCTOBER 1875.

GENERAL REMARKS.—In Madras there has been good and general rain: prospects are favourable. In Sind the river continues unusually high. Elsewhere in the Bombay Presidency no rain has fallen, except slight showers in Tanna and Dharwar; more rain is required in the Southern Mahratta Country; elsewhere prospects are very good. In the Central Provinces and Berar the monsoon is drawing to a close: *rabi* operations continue. In Bengal the rain, though general, has been scanty in most districts: more is said to be urgently required in the Patna and Bhágalpur Divisions: the prospects of the late rice crop continue to be generally good; the transplantation of seedlings is almost finished. In the North-West Provinces and Oudh the rains appear to have come to an end; light showers are reported only from Benares, Sitapur, Allahabad, Banda and Jhansi; prospects are good. In the Punjab no rain has fallen at Delhi, Umballa or Mooltan; elsewhere the weather is still unsettled: the crops promise well. In Rajputana sufficient rain has fallen in the Southern States, heavy rain in the Harowtee tract, and little or none in the north; prospects are generally favourable. In Central India rain has fallen in some quantity in Bhopal, little elsewhere; the excessive rains have damaged the crops in Bundelkhand, Bhopal and Malwa. In Mysore light falls have improved agricultural prospects. More rain is wanted in Upper Assam. Reports from Burma continue favourable; in the Rangoon district floods have done some damage.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Oct. 7th)	1·75 at Masulipatam.	Rain sufficient elsewhere; 3¼ feet water above anicut; later dry crops sown; cumboo harvested; markets well supplied; prices steady; no further cholera cases reported; mild fever and small-pox continue; cattle generally healthy; pasture abundant.
Kurnool	(6th)	1·3 in two days.	Rain good in four taluks; moderate in others; a partial fall in Markapur; sajja being harvested in Cumbum; outturn fair: markets well supplied; standing crops generally good; prices steady; fever prevalent; 164 attacks from cholera, and 50 deaths; cattle attacked with foot-disease in parts of the district; water and pasture sufficient; 0·7 feet of water over Sunkesala anicut yesterday.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*			
Tanjore	(Oct. 7th)	3·80 at Negapatam.	Rain good elsewhere; freshes in river, and supply to tanks moderate; water over lower anicut, north branch 4½ inches; south 4 inches; cultivation wet and dry crops; standing crops generally good; harvest a few wet and dry crops; yield fair; markets well supplied; prices steady; fever in parts; 188 attacks from cholera, and 126 deaths; cattle disease in some parts, some loss; pasture generally sufficient.
Trichinopoly	(Oct. 6th)	...	Return from Perambular and Udiarpolliem not received; good and general rain last few days; cholera still hanging on in town; very little in district.
Malabar	(Oct. 7th)	0·05	Sowing of second crop begun; prices steady; small-pox abating; 72 cases of bowel complaint in Walluvanad, Palghaut and Ponany, and 32 deaths; cattle disease abating; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay—	(Oct. 7th)		
Sind.			
Kurrachee	(6th)	...	River on 4th at Kotri 40 inches higher than on the same date last year; harvest begun in Jerruck and Sháhbandar divisions; prospects of crops fair.
Shikarpur	„	...	Slight rain in talukas Mehar, Tigar and Kakar; on 27th ultimo Gaj water reached Kakar taluka; river 12 feet 8 inches, being 5 feet 3 inches higher than last year; all canals full, and breaches reported in taluka Nasirabad as causing considerable damage; disease among horses in taluka Larkárna.
Hyderabad	„	...	River still at an unusual height; water no longer required for crops.
Upper Sind Frontier	„	...	Weather cooler; rabi operations progressing favourably.
Gujarat.			
Ahmedabad	(Oct. 6th)	...	Crops good, except in villages along the Sábarmati.
Kaira	„	...	Crops and public health good.
Surat	„	...	Seventeen cholera cases at Párdi.
Broach	„	...	Rice, kodra and bajri ready, jowari being sown.
Khandesh and Nasik.			
Khandesh	(Oct. 6th)	...	State of kharif and cotton as before; cattle disease in Edalabad Petha.
Nasik	„	...	Agricultural prospects fair; cholera decreasing.
Konkan.			
Tanna	(Oct. 6th)	0·14	Total rainfall 113·77; agricultural prospects fair; cholera still slightly prevailing in four talukas.
Deccan.			
Poona	(Oct. 6th)	...	Crops in the same condition as before; cholera has not quite disappeared.
Ahmednagar	„	...	Kharif crops fair; sowing of rabi progressing; cholera in seven talukas, 79 cases, 35 deaths.
Sholapur	„	...	Cholera in Málsiras taluka.
Satara	„	...	Crops injured by excessive rain, partially improving; sowing of rabi generally in progress; slight cholera.
Southern Mahratta Country.			
Belgaum	(Oct. 6th)	...	Rain much wanted; cholera continues.
Dharwar	„	0·42	Total rainfall 25·20; kharif crops much in want of rain; its scarcity has prevented cotton sowing in some places; cholera prevails in 19 villages.
Kanara	„	...	Rice harvest continues in Karwar.
Kaladgi	„	...	Kharif and rabi crops well; cholera continues, 55 deaths.
Kattywar and Gaekwar's Territory.			
Rájkot	(Oct. 6th)	...	Crops good; no change in weather.
Wadhwán	„	...	Crops good; two deaths from cholera in Limri district.
Baroda	„	...	Cotton and kharif crops healthy; accounts from Amreli satisfactory; public health good. *General Remarks.*—Prospects good; monsoon coming to an end; more rain still wanted in the Southern Mahratta country, where crops have suffered for want of it.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 14TH OCTOBER 1875.

GENERAL REMARKS.—In Madras there has been sufficient rain, except in Malabar, and prospects are promising.. In Sind the river has fallen, though still much higher than last year. In the Bombay Presidency there has been no rain, with the exception of slight falls in Nasik, the Deccan Districts, and Belgaum and Dharwar: rain is said to be needed in the Deccan and Southern Mahratta Country; the kharif harvest has commenced in Guzerat and the Deccan. No rain has fallen in Berar or the Central Provinces, except showers in Nimar and Seoni: prospects are good except in the Nerbudda Valley, where the crops were damaged by excessive rain. No rain has fallen in Central India, or in Rajputana except in Marwar: prospects are generally excellent. In Bengal there has been slight general rain in the Eastern Districts and Chota Nagpore, scanty and partial falls in the central portion, and none in Behar: drought is said to threaten the upland sowings of the late rice; the harvest of the early rice has come to an end. No rain has fallen in the North-Western Provinces, except half an inch at Agra, or in Oudh: in both provinces the promise of the crops is excellent. In the Punjab there have been light showers in Delhi, Hissar and Jullundur, elsewhere no rain: prospects are good. No rain has fallen in Assam, and damage to the rice in the upper districts is anticipated. No rain is reported from Burma, where prospects are good. In Mysore rain is much needed.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Oct. 14th)	0·61 at Masulipatam. 2·0 at Repalli and Gudivada.	Rain slight elsewhere; 2 feet water over anicut; canals full; later crops sown; staple crops suffering from too much rain in places; markets well supplied; prices steady; cholera has disappeared; cattle dysentery in five taluks; pasture abundant.
Kurnool	(13th)	No rain at Kurnool, but good rain in 7 taluks and moderate in Ramalkota.	Crops in good order; markets well supplied; prices generally steady; 265 attacks and 106 deaths from cholera; fever and cattle disease in some taluks; water and pasture abundant; 0·4 feet water over Sunkesala anicut yesterday.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*			
Tanjore	(Oct. 14th)	1·47 at Negapatam.	Rain elsewhere good; freshes in rivers and supply to tanks moderate; water over upper anicut, south branch 4 inches; lower, north 1·5 inches, south 1 inch; cultivation wet and dry crops; standing crops good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; 188 attacks and 148 deaths from cholera; cattle generally healthy; pasture generally sufficient.
Trichinopoly	(13th)	...	Good rain all over the district; nearly 2 inches in town; slight freshes down the Cauvery; crops in good order; outturn generally up to average; markets well supplied; prices steady; cholera still prevalent; public health otherwise good; condition of cattle good; pasture sufficient.
Malabar	(14th)	0·55	Rain insufficient; sowing of second crop in progress; markets well supplied; prices steady and low; small-pox and fever slight; bowel-complaint in Palghaut, Ponany and Walluvanad, 118 cases and 59 deaths; cattle disease slight; pasture good. *General Remarks.*—General prospects satisfactory.
Bombay—	(Oct. 14th)		
Sind.			
Kurrachee	(13th)	...	River fallen 9 inches since the 4th, but was higher on the 11th by 46 inches than on the same date last year; rain with hail fell in Dádú taluka on the 27th and 28th ultimo; fever and cattle disease generally prevalent.
Shikarpur	„	...	River fallen 34 inches; it is 4 feet higher than last year; rabi sowing commenced; fever and cough prevalent.
Hyderabad	„	...	Reaping of kharif crops, excepting rice, progressing; fever slightly prevalent; weather pleasant.
Upper Sind Frontier	„	...	Weather mild; rabi sowings progressing favourably in talukas Kashmor and Thul; land continues under water in Jacobabad taluka; fever and cough prevalent.
Guzerat.			
Ahmedabad	(Oct. 13th)	...	No change.
Kaira	„	...	Crops good; bajri being reaped.
Surat	„	...	Cholera raging at Bulsar and Párdi; 39 cases in Bulsar taluka, deaths 14.
Broach	„	...	Kharif crops ready for harvest; rabi cultivation commenced; health good.
Khandesh and Nasik.			
Khandesh	(Oct. 13th)	...	Reaping of bajri and til commenced in some talukas; state of cotton crops unchanged; cholera has re-appeared in Chálisgaon, 2 cases and 2 deaths; cattle disease as before.
Nasik	„	0·56	Total rainfall 35·70; early crops fair; sowing of late crops in progress; cattle disease in one village in Kalwan; cholera decreasing.
Konkan.			
Tanna	(Oct. 13th)	...	Agricultural prospects fair; cholera very slightly prevailing in 4 talukas.
Deccan.			
Poona	(Oct. 13th)	0·78	Total rainfall 33·57; kharif crops being reaped; sowing of rabi progressing; cholera slightly exists in two talukas.
Ahmednagar	„	·19	Total rainfall 16·99; more rain wanted; sowing of rabi nealy finished in some talukas; kharif crops fair; cholem in 5 talukas; 56 cases, 29 deaths.
Sholapur	„	0·03	Total rainfall 20·34; slight cholera in Málsirao; sowing of rabi nearly completed.
Satara	„	0·26	Total rainfall 51·19; more rain wanted; kharif crops middling; rabi sowing progressing, except in some places where it is impeded for want of rain; harvesting commenced in Mán; cholera decreasing.
Southern Mahratta Country.			
Belgaum	(Oct. 13th)	1·17	Total rainfall 53·26; crops suffering from want of rain; cholera continues and has re-appeared in Athni.
Dharwar	„	0·80	Total rainfall 26; more rain required for kharif crops; sowing of cotton continues, but that of late crops delayed for want of rain; cholera in 24 villages.
Kanara	„	...	Harvesting continues on the coast.
Kaladgi	„	...	Kharif crops in ear; rain wanted; cholera continues, 41 deaths.
Kattywar and Gaekwar's Territory.			
Rájkot	(Oct. 13th)	...	Crops good; bajri being harvested in some places.
Wadhwán	„	...	Crops good; kharif harvesting commenced; cholera in Mujidad decreasing.
Baroda	„	...	Cotton crops thriving; kharif ready for reaping; public health good. *General Remarks.*—General prospects good; kharif harvest commenced in parts of Guzerat and the Deccan; more rain required in the Southern Mahratta Country.
Bengal—

Pubna	„	*Nil.*	Fever almost disappeared from the town.
Rajshahye	„	*Nil.*	The health of the district is satisfactory.
Bogra	„	...	
Maldah	„	...	
Dinagepore	„	...	Much fever continues with an occasional case of cholera.
Rungpore	„	...	
Cooch Behar	„	...	
Jalpaiguri	„	...	Cholera has not altogether ceased.
Darjeeling	„	·05	
Midnapore	„	*Nil.*	
Howrah	„	...	
Hooghly	„	Not received.	
Burdwan	„	*Nil.*	
Bankoorah	„	...	
Beerbhoom	„	·77	
Sonthal Pergunnahs	„	·38	
Bhágalpur	„	*Nil.*	General health remarkably good.
Monghyr	„	*Nil.*	
Purneah	„	*Nil.*	
Darbangah	„	...	
Mozufferpore	„	*Nil.*	
Sarun	„	...	Cholera still hovering about Darowli.
Chumparun	„	Not received.	
Patna	„	*Nil.*	Health good.
Gya	„	...	
Shahabad	„	No rain from 30th Sept. to 13th Oct.	
Hazáribágh	„	·02	
Lohardugga	„	·11	General health good.
Maunbhoom	„	*Nil.*	
Singbhoom	„	·02	
Balasore	„	*Nil.*	General health satisfactory.
Cuttack	„	*Nil.*	Cholera has re-appeared in several places.
Pooree	„	1·47	*General Remarks.*—Hardly any rain has fallen in the Burdwan, Presidency, Rajshahye, Cooch Behar, Patna, Bhágalpur and Orissa Divisions. In Patna and Bhágalpur there has been no rain at all. Seasonable but slight falls are reported from almost all the districts of the Dacca, Chittagong and Chota Nagpore Divisions. Want of rain is felt in most of the districts, and the late rice in the high lands in many places is suffering from drought. If rain does not fall soon the prospects of the cold weather sowings will be affected in some places. The harvesting of the early rice and bhadoi crops is complete. Sowings of the cold weather crop have already commenced.
N. W. P.—			
Benares	(Oct. 11th)	*Nil.*	
Mirzapur	(13th)	...	Harvesting in progress; rabi sowing commenced in south; weather fine.
Azamgarh	(12th)	*Nil.*	Prospects good.
Allahabad	„	...	Early rice being cut; prospects of rabi good.
Cawnpore	(13th)	...	Fine weather; harvest ripening; spring sowings beginning.
Banda	(14th)	...	Rains apparently over; grain being sown; prospects good.
Hamirpur	„	*Nil.*	No change.
Jhansi	(12th)	...	Prospects continue good.
Agra	(13th)	·6 at Jalesar.	More than average harvest expected.
Meerut	„	...	Weather favourable for crops.
Moradabad	„	...	Fine weather; general agricultural prosperity.
Bareilly	„	*Nil.*	Rabi sowings commenced.
Almora	(14th)	...	Rains quite ceased; millet crops just being cut; report received of a destructive hail-storm in Pargana Danpur, which did great damage but over a limited area.
Punjab—			
Delhi	(Oct. 13th)	·2	All except submerged crops doing well; a few cases of cholera in village near Delhi, otherwise health of district good.
Hissar	„	·1	Weather still cloudy; kharif flourishing; prospects of rabi promising; health generally good; cholera on decline at Bhiwáni.
Umballa	„	*Nil.*	Crops good; cholera still prevalent in district.
Jullundur	„	·3	Crops much damaged by inundation and high winds; cholera still hangs about Kartárpur, otherwise health of district fair.
Lahore	„	*Nil.*	Health and agricultural prospects good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*			
Rawal Pindi	(Oct. 13th)	*Nil.*	Kharif crops under sickle; ploughing for rabi sowings in progress; health good.
Mooltan	„	*Nil.*	Rabi sowing in progress; slight fever prevailing, otherwise general health good.
Dera Ismail Khan	„	*Nil.*	Health good.
Peshawur	„	*Nil.*	Agricultural prospects favourable; slight fever prevailing.
			General Remarks.—The extent of the damage to crops in the inundated districts cannot yet be estimated. With this exception the agricultural prospects as well as the general health of the province may be considered good.
Oudh—			
Lucknow	(Oct. 13th)	*Nil.*	Prospects of kharif harvest continue favourable; prices stationary; public health generally good.
Sitapur	„	...	
Fyzabad	„	...	
Central Provinces—			
Upper Godavari	(Oct. 9th)	...	Weather clear; prospects favourable; cholera lingering; prices stationary.
Sambalpur	„	...	Weather clear; prospects excellent; rice harvesting; cholera abating.
Chanda	„	...	Weather clear; prospects of kharif good; rabi sowings commenced; cattle disease continues; prices easy.
Raipur	(10th)	...	Weather clear; prospects of kharif good; rabi sowings commenced; health good; prices easy.
Chhindwara	„	...	Weather clear; early kharif crops being cut; rabi ploughing continues; cholera lingering; prices steady.
Balaghât	(11th)	...	Weather clear; early rice cutting; rabi ploughing continues; fever prevalent; prices steady.
Betul	„	...	Weather clear; early kharif crops reaping; rabi sowings commenced; cholera abating; prices steady.
Bhandara	(12th)	...	Weather clear; early rice reaping; rabi sowings commenced; cholera, fever and small-pox continue; prices stationary.
Nagpur	(13th)	...	Weather clear; rabi sowings continue; cholera almost disappeared; cattle disease prevalent; prices stationary.
Wardha	„	...	Weather clear; cotton in blossom; cholera lingering.
Nimar	„	Showers on the 7th.	Early kharif crops being reaped; rabi ploughing continues; cholera abating; prices stationary.
Hoshangabad	„	...	Kharif below average; rabi promising; cholera continues.
Narsinghpur	„	...	Fields preparing; rabi sowing.
Jubbulpore	„	...	Prospects of kharif good; rabi sowings commenced; cattle disease continues.
Saugor	„	...	Early rice reaping; rabi sowings commenced; health good; prices stationary.
Seoni	„	·10	Early kharif cutting; rabi sowings commenced; health good.
Damoh	„	...	Early rice cutting; rabi preparations progressing; health good; prices stationary.
Mandla	„		
			General Remarks.—The kharif promises well except in the Nerbudda Valley; preparations for late sowings going on everywhere.
British Burma—			
Arakan Division	(Oct. 13)	...	Public health good; agricultural prospects very good.
Pegu Division.			
Rangoon	(Oct. 13th)	...	Prospects of standing crops very fair; improvement in sowing operations in Pegu and Poungleng owing to subsidence of flood; public health good.
Bassein	„	...	Prospects of crops in Ngathaingyoung improving; cattle disease in Ngapootan.
Henzada	„	...	Public health good; slight cattle disease in Opho; crops flourishing.
Prome	„	...	District and town healthy; crops promising.
Thayetmyo	„	...	Health good; crops promising.
Thonkwa	„	...	Health and crops good.
Tenasserim Division	„	...	Public health good; crops progressing; rainfall favourable.
Mysore and Coorg—			
Mysore	(Oct. 14th)	·175 in Bangalore Cantonment.	Seven deaths from cholera in Mysore town during the week and 71 in the district; epidemic serious in adjoining district of Hassan and in one taluq of Bangalore District.
Coorg	„	·54	*General Remarks.*—Rain much needed everywhere.
Assam—			
Sylhet	(Oct. 14th)	*Nil.*	Weather fine; rivers falling; reaping aus crop completed; prices steady.
Gauhati	„	...	Weather clear and cool; damage to paddy anticipated for want of rain; prospects of tea tolerably good; public health good.
Hyderabad Assigned Districts—			
Umraoti	(Oct. 14th)	...	Kharif crops in good condition; rabi sowing commenced; cholera decreasing in Woon.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—			
Aboo	(Oct. 14th)	*Nil.*	Cold weather set in.
Meywar	(8th)	...	Floods did great damage; crops which have escaped promise well; health good.
Marwar	(2nd)	1·02	Weather clear with bright sunshine; prospects very good; fever and diarrhœa prevailing.
Harowtee	„	*Nil.*	Fever everywhere prevalent; cholera still hanging about.
Tonk	„	...	Crops good.
Jeypore	(14th)	*Nil.*	Agricultural prospects and health excellent.
Ajmere	„	...	Health good; barley and wheat crops must succeed.
Bhurtpore	„	...	No change; rabi sowings commenced.
Central India—			
Indore	(Oct. 13th)	*Nil.*	Agricultural prospects favourable; health generally good.
Gwalior	„	...	
Neemuch	„	...	
Rutlam	„	...	
Baghelkhand	„	...	
Sutna	„	...	
Nepal—	(Oct. 6th)	1·2	Agricultural prospects fair; cholera still about but decreasing.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21ST OCTOBER 1875.

GENERAL REMARKS.—The rains have ceased over the greater part of India. In Madras there have been sufficient falls in most districts and prospects are satisfactory. In Sind the river still continues high; the reaping of the kharif is progressing, with promise of a good outturn. In the Bombay Presidency generally there has been no rain during the week, and its want is much felt in the Southern Mahratta Country and parts of the Deccan: otherwise prospects are good, and the kharif promises very well. In Berar and the Central Provinces there has been no rain: the kharif is being reaped and rabi operations pushed on. In Bengal there has been slight rain, heavy in some places, in most of the Eastern and Central districts and Orissa. In Behar none has fallen except a slight shower in Patna: it is urgently wanted in the Patna and Bhágalpur Divisions, and if none falls some failure of the main rice crop is expected; elsewhere prospects are good, but more rain would be of much service. No rain has fallen in the North-Western Provinces, Oudh, or the Punjab, where prospects are generally excellent. In Rajputana and Central India the rains have ceased, and agricultural prospects are promising. Rain is wanted in Mysore, where a fall of 1·89 inches is reported: prospects are not good. In Upper Assam slight, and in Sylhet heavier rain has fallen: the crops are in good condition, except the rice in the upper districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Oct. 21st)	0·14 at Masulipatam; none elsewhere.	Two feet 5 inches water over anicut; canal supply insufficient in Gudivada; later dry crops sown; dry paddy and some other dry crops require rain; markets well supplied locally; prices steady; mild fever and small-pox; cattle unhealthy in three taluks; pasture sufficient.
Tanjore "	1·98 at Negapatam.	Rain elsewhere good; freshes in rivers and supply to tanks moderate; water over lower anicut, north branch 8·5 inches, south 8 inches; upper, south 3 inches; cultivation wet and dry crops; standing crops good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; cholera slightly increased, seizures 287, deaths 205; cattle generally healthy; pasture generally sufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (Oct. 20th)	...	Good rain all over the district, varying from one and a half to three and three-quarter inches, except in one taluk; water-supply sufficient; crops in good order; outturn of rice and cumboo below average; markets well supplied; prices generally steady; cholera prevailing to some slight extent; condition of cattle good; pasture improving.
Malabar (21st)	0·87	Sowing of second crop in progress; markets well supplied; prices steady; fever slight; 91 cases of bowel-complaint in Palghaut, Ponany and Valluvanad, and 59 deaths; cattle disease slight; pasture good.
Kurnool ,,		Not yet received.
		General Remarks.—General prospects satisfactory.
Bombay— (Oct. 21st)		
Sind.		
Kurrachee (20th)	...	River gauge at Kotri on 18th 10 feet 10 inches against 9 feet on the same date last year; rats injuring crops in Játi taluka and tapas Sita and Shábbandar; barani crops in Sehwan Kácha suffering from want of rain; river eating into trunk-road to Shikarpur 14 miles above Sehwan, the Kachas of Deh, Bheon and Kanot, and the village of Unarpur; cattle disease and fever generally prevalent; total rainfall in Kurrachee 5·49 inches.
Shikarpur ,,	...	River 7 feet 2 inches, 27 inches above last year; weather unseasonably hot; fever and cough very prevalent
Hyderabad ,,	...	Rice reaping commenced; fair kharif outturn expected, considering defective inundation; fever more general—light for time of year.
Upper Sind Frontier ,,	...	Weather sultry; rabi sowings and crops as before; canals still full; fever prevalent.
Guzerat.		
Ahmedabad (Oct. 20th)	...	Kharif harvest and rabi sowing commenced.
Kaira ,,	...	Crops good; bajri being reaped.
Surat ,,	...	Cotton and other crops good; 43 cholera case in Bulsar taluka, 16 deaths.
Broach ,,	...	Kharif crops being harvested; fever prevalent; rabi sowing progressing.
Khandesh and Nasik.		
Khandesh (Oct. 20th)	...	Sowing of rabi in progress; cotton crop unchanged and promising, Hingunghat Rs. 36, American Rs. 40 per palla; cattle disease in Edalabad Petta.
Nasik ,,	...	Reaping of early crops commenced; sowing of rabi progressing; rain wanted; cholera disappearing; cattle disease in one village.
Konkan.		
Tanna (Oct. 20th)	...	Harvesting of kharif crops progressing; sowing of rabi commenced; cholera slightly prevailing in Máhim, Murbád Kályan and Bassein talukas.
Deccan.		
Poona (Oct. 20th)	...	Condition of crops as before; cholera sightly exists in two talukas.
Ahmednagar ,,	...	Rain wanted; kharif harvest commenced; rabi sowing finished in some talukas; slight cholera in seven talukas, 23 cases, 7 deaths.
Sholapur ,,	...	Rain wanted; slight cholera in Sángola.
Satara ,,	...	Harvesting of kharif progressing—average harvest expected; rabi, where sown, withering; cholera prevalent.
Southern Mahratta Country.		
Belgaum (Oct. 20th)	...	Crops suffering much from want of rain; cholera continues in a malignant form, especially in Gokák and Sampgaon 338 deaths.
Dharwar ,,	...	Owing to want of rain kharif crops withering, and sowing of late crops delayed; cholera in 72 villages.
Kanara ,,	...	Weather fair; harvest continues on coast; rain wanted above Ghat.
Kaladgi ,,	...	Crops middling; rain required; cholera continues, 23 deaths.
Kattywar and Gaekwar's Territory.		
Rájkot (Oct. 20th)	...	No change in the weather; ten cholera cases in Rájkot city.
Wadhwán ,,	...	Crops good; fever prevalent; one cholera case, but not fatal.
Baroda ,,	...	Reaping operations commenced; cotton crops and public health good.
		General Remarks.—Kharif harvest generally promises well; rain much wanted in the Southern Mahratta Country.
Bengal—		
Chittagong (Oct. 21st)	Not received.	
Noakhally ,,	·50	
Chittagong Hill Tracts ,,	Not received.	
Hill Tipperah ,,	*Nil.*	
Backergunge ,,	*Nil.*	Health of the people is generally good, but five fatal cases of cholera reported from Matibhanga in Dowlutkhan.
Furreedpore ,,	·40	General state of the health of the district continues good.
Dacca ,,	·10	
Mymensingh ,,	·04	
Tipperah ,,	*Nil.*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
24-Pergunnahs ,,	Not recd.	Fever is increasing at Barripore; ordinary fever is prevailing in the sub-division of Basirhat.
Jessore ,,	*Nil.*	
Nuddea ,,	·55	
Moorshedabad ,,	·40	Fever somewhat prevalent.
Pubna ,,	·21	Fever has much decreased in Pubna, but a case of cholera has been reported in the town and two cases at Berah.
Rajshahye ,,	·41	3 cases of cholera reported; one fatal.
Bogra ,,	1·30	
Maldah ,,	*Nil.*	
Dinagepore ,,	Not received.	Much fever and occasional cholera.
Rungpore ,,	·23	Cholera has broken out in Govindgunge.
Cooch Behar ,,	*Nil.*	
Jalpaiguri ,,	*Nil.*	
Darjeeling ,,	Not received.	
Midnapore ,,	2·93	
Howrah ,,	*Nil.*	
Hooghly ,,	Not received.	General health fair, but many cases of fever in the Mofussil.
Burdwan ,,	1·74	
Bankoorah ,,	·72	
Beerbhoom ,,	*Nil.*	
Sonthal Pergunnahs ,,	·08	
Bhágalpur ,,	*Nil.*	General health is very good; cholera roported from Noradeegur, pergunnah Soopool.
Monghyr ,,	No received.	
Purneah ,,	Not received.	
Darbangah ,,	*Nil.*	
Mozufferpore ,,	Not received.	
Sarun ,,	*Nil.*	
Chumparun ,,	*Nil.* (No rain in previous week also)	
Patna ,,	·09	Health good.
Gya ,,	*Nil.*	
Shahabad ,,	Not received.	
Hazáribágh ,,	*Nil.*	
Lohardugga ,,	*Nil.*	
Maunbhoom ,,	*Nil.*	
Singbhoom ,,	*Nil.*	Healthy.
Balasore ,,	·75	
Cuttack ,,	·09	Sporadic cholera prevailing.
Pooree ,,	A few drops	*General Remarks.*—More or less rain is reported from the majority of the districts in the Burdwan Presidency, Rajshahye, Cooch Behar and Orissa Divisions; the rice crops have been benefited, but more rain is still wanted in the districts of Rajshahye, Rungpore, Jalpaiguri and Cooch Behar. Rain is very urgently wanted Cold weather sowings have commenced in places. The prospects of the main rice crops in the Eastern Districts and in places where it has not been affected by the drought continue favorable, but some more rain would do good. No rain has fallen in the districts of Behar, excepting very slight falls in Patna and the Sonthal Pergunnahs, and the rice crop is suffering. If it does not rain very soon, failure of the highland rice will be almost certain, and the outturn of the lowlands will be indifferent. Paddy is being cut in places for fodder. Irrigation is being resorted to where practicable. Rain is also wanted in the Chota Nagpore Division.
N. W. P.—		
Benares (Oct. 18th)	*Nil.*	Fine weather.
Mirzapur (20th)	...	Kharif outturn good, except in submerged tracts; rabi sowings general.
Allahabad (19th)	...	Early rice being cut; prospects good.
Cawnpore (20th)	...	No change.
Banda (21st)	...	Rice being cut and cutting picked; kharif nearly ripe; prospects good.
Hamirpur ,,	*Nil.*	Prospects good.
Jhansi ,,	*Nil.*	Kharif harvest good; rabi sowing continues.
Agra (20th)	*Nil.*	Kharif harvest above average; rabi sowings in progress.
Meerut ,,	...	Rabi sowings progressing; rain crops ripening.
Moradabad ,,	...	Weather favourable for harvesting autumn and sowing spring crops.
Bareilly ,,	...	No change.
Azamgarh (21st)	*Nil.*	Prospects good; sowing of rabi in progress.
Punjab—		
Delhi (Oct. 20th)	*Nil*	Kharif being gathered; land under preparation for rabi; health of district good.
Hissar ,,	...	Kharif promising; rabi sowings in progress; fever prevalent in Sirsa and Hissar Districts; cholera still hangs about.
Bhewani ,,	....	Health generally good.
Umballa ,,	...	Crops and health good.
Jullundur ,,	....	Crops much damaged by inundation and high winds; fever prevalent; health otherwise good.
Lahore ,,	...	Prospects of harvest good; health satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*			
Rawal Pindi	(Oct. 20th)	...	Kharif being gathered; health good.
Mooltan	,,	...	Kharif being gathered; rabi sowings in progress; slight fever prevailing; otherwise health good.
Dera Ismail Khan	,,	...	Health and prospects of harvest good.
Peshawur	,,	...	Harvest prospects favourable; slight fever prevalent.
			General Remarks.—Agricultural prospects as well as general health of the Province may be considered good.
Oudh—			
Lucknow	(Oct. 20th)	*Nil*	Prices stationary; public health good; prospects favourable.
Sitapur	,,	*Nil*	
Fyzabad	,,	*Nil*	
Central Provinces—			
Upper Godavari	(16th)	...	Weather clear and cold; rice cutting; outturn good; cholera disappeared.
Sambalpur	,,	...	Weather clear and cold; rain wanted for late rice; early rice reaping; cholera disappeared.
Bilaspur	,,	...	Cotton and tilli much injured; other crops fair; cholera reappeared; prices steady.
Raipur	(17th)	...	Prospects of kharif good; rabi sowings commenced; health good; prices easy.
Chanda	,,	...	Prospects of kharif, except jowari, good; cattle disease continues.
Chhindwara	,,	...	Weather clear and cool; paddy threshing; rabi sowings commenced; cholera continues; prices steady.
Balaghât	,,	...	Early rice reaping; rabi ploughing continues; fever prevalent; prices fallen.
Betul	(18th)	...	Early kharif crops reaping; rabi sowings progressing; cholera disappeared; prices steady.
Bhandara	(19th)	...	Early rice cutting; jowar on low lands a failure; rabi sowings continue; cholera, small-pox and fever continue; prices easy.
Nagpur	(20th)	...	Prospects of kharif good; rabi sowings continue; fever prevalent; prices fallen.
Wardha	,,	...	Jowar on high land requires rain; cholera and cattle disease continue.
Nimar	,,	...	Jowar slightly damaged by blight; rabi sowings commenced; cholera continues; prices fallen.
Hoshangabad	,,	...	Kharif crops below average; rabi sowings progressing; cholera continues.
Narsinghpur	,,	...	Prospect of crops good; rabi sowings commenced.
Jubbulpore	,,	...	Kharif prospects good; rabi sowings progressing; fever prevalent.
Saugor	,,	...	Early rice reaping; rabi sowings progressing; health good.
Seoni	,,	...	Early kharif crops cutting; rabi sowings progressing; health good.
Mandla } Damoh }	(21st)	...	Rabi sowings progressing; health good; prices stationary.
			General Remarks.—On the whole prospects continue fair and preparations for rabi are being pushed on.
Mysore and Coorg—			
Mysore	(Oct. 21st)	1·39	Latest reports from all districts state that no rain has fallen except slight showers at Bangalore; cholera increasing in taluks adjacent to Bangalore and extending in Hassan district; during the week one fatal case only in Mysore town, 92 in the district; epidemic also appeared in Coorg.
			General Remarks.—Agricultural prospects not good; prices slightly risen.
Assam—			
Gauhati	(Oct. 21st)	·1	Mornings pleasantly cold; slight showers on nights of 16th and 17th; river fogs beginning to appear; salee dhan suffering for want of rain; prospects of all other crops and tea favourable; public health good.
Sylhet	,,	2·36	Rice market steady.
Hyderabad Assigned Districts—			
Umraoti	(Oct. 21st)		Kharif crops in good condition; rabi sowing continued; cholera decreasing in Woon.
Rajputana—			
Siroki	(Oct. 18th)	...	Fair supply of water; fair preparation for the rabi crop; weather seasonable; health good.
Marwar	(9th)	...	Water in wells still continues to rise; health good; prospects favourable.
Meywar	(15th)	...	Health good; weather clear and pleasant.
Harowtee	(9th)	...	Crops excellent; fever prevalent.
Joypore	(21st)	...	Harvesting progressing satisfactorily; ploughing for rabi sowings commenced; weather and health good.
Khairpore	,,	...	Weather unchanged and prospects continue good.
Ajmere	,,	*Nil.*	Health good; prospects satisfactory.
			General Remarks.—General rains ceased and cold set in.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central India—			
Indore	(Oct. 20th)	*Nil.*	Health and prospects fair.
Gwalior	,,	,,	
Neemuch	,,	,,	
Jhalam	,,	,,	
Bhelkhund	,,	,,	
Suha	,,	,,	
Nepal—	(Oct. 13th)	*Nil.*	Agricultural prospects good; cholera has ceased.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 28TH OCTOBER 1875.

GENERAL REMARKS.—The north-east monsoon appears to have set in in Madras, where heavy rain has fallen in the Northern Districts; in Tanjore and Trichinopoly the fall has been generally slight. In Mysore also there has been good rain, and the prospects of the crops have improved. In Sind the river is falling and the harvest continues. In Bombay moderate rain has fallen in the Deccan Districts and Southern Mahratta country, where more is wanted; elsewhere none has fallen; the kharif harvest continues and the outturn is good except in Belgaum and Dharwar, where want of rain has reduced it. In Bengal moderate rain has fallen in almost all the Eastern and Central Districts, Orissa and Chota Nagpore; 10 inches fell in Cuttack: it has been light in the Rajshahye and Cooch Behar Divisions; none has fallen in the Patna and Bhágulpur Divisions, where the rice crop is suffering much in consequence, and the preparations for the cold weather sowings are impeded. No rain fell in the North Western Provinces or Oudh except a slight shower at Lucknow; prospects are good, except of the rice in a few districts, which has suffered from the early cessation of the rains. No rain is reported from the Punjab, where the harvest promises well. There has been rain in several districts of the Central Provinces which has in some places damaged the cotton, but has been on the whole beneficial. Rain has also fallen in Berar. No rain is reported from Rajputana or Central India, where prospects are promising. None has fallen in Assam or British Burma.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Oct. 28th)	Rainfall general at Masulipatam. 9·05 at Gudivada. 13·95 at Repalli.	Water 10·5 feet over anicut; canal supply sufficient; later dry crops being sown; standing crops good; markets well supplied locally; prices steady; cholera 12 seizures in Narsaropett, 3 deaths; cattle dysentery in five taluks; pasture sufficient.
Kurnool (27th)	3·75 in five days.	Season favourable; rain good throughout; water flowing over Cumbum tank; in Calingula standing crops good; jouna, korra, and sajja being harvested; water and pasture abundant; markets moderately supplied; prices falling in Ramalkota, steady elsewhere; fever prevalent; cholera disappearing, 27 seizures, 18 deaths; 0·5 feet water over Sunkesala anicut.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*			
Tanjore	(Oct. 28th)	0·7 at Negapatam.	Rain elsewhere partial and scanty; freshes in rivers and supply to tanks moderate; water over upper anicut north branch 7 inches, south 10 inches; lower north 6 inches, south 5 inches; cultivation wet and dry, standing crops good; harvest a few wet and dry crops; yield fair; markets well supplied; prices almost steady; cholera abating, 174 seizures, 139 deaths; cattle generally healthy; pasture generally sufficient.
Trichinopoly	(27th)	...	Rain slight except in Udiarpolliem, where the fall was over two inches; cholera prevailing to some slight extent; no other changes of importance.
Malabar	(28th)	2·75	Rain favourable for second crop cultivation; markets well supplied; prices steady; fever and cattle disease slight; pasture good; bowel complaints in Palghat, Walluvanad, Ponany and Cochin, 204 cases, 143 deaths. *General Remarks.*—Prospects satisfactory.
Bombay—	(Oct. 28th)		
Sind.			
Kurrachee	(27th)	...	River falling gradually; jowari and rice being harvested; preparations for spring crops being made generally; public health fair.
Shikarpur	,,	...	No change since last report; river 6 feet, 1 foot 9 inches higher than last year.
Hyderabad	,,	...	Kharif harvesting general; rabi sowings commenced; weather close; fever the same as before.
Upper Sind Frontier	,,	...	Weather cooler; roads continue impassable; kharif crops being reaped; rabi fair; fever and cattle disease prevailing.
Guzerat.			
Ahmedabad	(27th)	...	Kharif harvest and rabi cultivation progressing.
Kaira	,,	...	No change since last report.
Surat	,,	...	Reaping of kharif crops progressing; cholera cases in Bulsar 13, deaths 6.
Broach	,,	...	Crops good; fever prevalent.
Khandesh and Nasik.			
Khandesh	(Oct. 27th)	...	Kharif harvest nearly finished; prospects of cotton unsatisfactory; 25 per cent. of crop injured by excessive moisture; ague and cough prevalent; cattle disease as before.
Nasik	,,	...	Rabi sowing suspended in some places from want of rain; cattle disease in one village in Kalwan.
Konkan.			
Tanna	(Oct. 27th)	...	Reaping of kharif crops progressing; sowing of rabi commenced; cholera still very slightly prevailing in three talukas.
Deccan.			
Poona	(Oct. 27th)	0·14	Total rainfall 33·71; reaping of kharif progressing; sowing of rabi completed; cholera has disappeared.
Ahmednagar	,,	0·48	Total rainfall 17·47, more wanted, rabi sowing nearly finished; cholera in three talukas; 40 cases, 23 deaths.
Sholapur	,,	1·07 a timely fall.	Total rainfall 21·41; slight cholera in Sangola and Malsiras.
Satara	,,	0·40	Total rainfall 51·59, more wanted; crops middling; rabi sowing retarded for want of rain; slight cholera in Tasgaon.
Southern Mahratta Country.			
Belgaum	(Oct. 27th)	0·60	Total rainfall 53·86; average outturn of kharif one-half of a full crop; 304 deaths from cholera.
Dharwar	,,	0·65	Total rainfall 26·65; early crops withering, and sowing of late crops delayed in some places owing to want of rain; cotton plants in fair condition; cholera in 86 villages.
Kanara	,,	0·40	Total rainfall 107·58; weather cloudy; coast harvest continues; rain wanted above Ghat.
Kaladgi	,,	1·38	Total rainfall 19·38; kharif slightly withering; rabi healthy; rain required for both crops; 30 deaths from cholera.
Kattywar and Gaekwar's Territory.			
Rájkot	(Oct. 27th)	...	Harvesting continues; 14 cholera cases in Rájkot city, 5 deaths; cholera also about Mánakwára.
Wadhwán	,,	...	Weather cloudy and warm; crops good; cholera at Limri.
Baroda	,,	...	No change since last report. *General Remarks.*—Kharif harvest generally fair, except at Belgaum and Dharwar, where the loss from want of rain is serious; more rain wanted to ensure safety of rabi crop.
Bengal—			
Chittagong	(Oct. 27th)	Not received.	
Noakhally	,,	·65	
Chittagong Hill Tracts	,,	·88	
Hill Tipperah	,,	·29	
Backergunge	,,	1·0	General health of the people is good, but cholera is said to be prevalent in the sub-division of Dakhin Shabazpore.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Furreedpore	(Oct. 28th)	·22	The general health of the district continues good.
Dacca	,,	·1	
Mymensingh	,,	1·41	
Tipperah	,,	Not received.	
24 Pergunnahs	,,	·35	Fever prevailing in sub-divisions Barripore, Basirhat, Baraset and Satkhira; 17 deaths from cholera reported from Diamond Harbour.
		2·88 during previous week.	
Jessore	,,	·38	Cholera has made its appearance in the Jhenedah sub-division, elsewhere the general health is good.
Nuddea	,,	·37	
Moorshedabad	,,	·88	Fever somewhat prevalent, but decreasing.
Pubna	,,	·28	The health of the town of Pubna has greatly improved; 3 deaths from cholera at Berah.
Rajshahye	,,	·45	15 cases of cholera reported, 5 fatal.
Bogra	,,	·04	
Maldah	,,	·02	20 attacks and 15 deaths from cholera were reported during the week.
Dinagepore	,,	*Nil.*	Fever is very bad, worse than in other years; occasional cases of cholera.
Rungpore	,,	,,	
Cooch Behar	,,	,,	
Jalpaiguri	,,	,,	
Darjeeling	,,	*Nil.*	
Midnapore	,,	·57	
Howrah	,,	3·15	
Hooghly	,,	Not received.	Fever is very prevalent, especially at Connagore, where it seems epidemic; about 500 persons are reported to have been attacked and 25 deaths; little cholera in Rishna.
Burdwan	,,	·4	
Bankoorah	,,	4·0	General health good.
Beerbhoom	,,	1·3	
Sonthal Pergunnahs	,,	1·0	
Bhágalpur	,,	*Nil*	General health good; cholera still prevalent in the west of Soopool sub-division.
Monghyr	,,	Not received.	
Purneah	,,	*Nil.*	
Darbangah	,,	*Nil.*	
Mozufferpore	,,	Not received.	
Sarun	,,	*Nil.*	General health good.
Chumparun	,,	*Nil.*	
Patna	,,	*Nil.*	Health of the district is generally good; but there have been a very large number of cases in some of the villages in the Dinapore sub-division.
Gya	,,	*Nil.*	
Shahabad	,,	Not received.	
Hazáribágh	,,	*Nil.*	
Lohardugga	,,	0·14	General health good.
Maunbhoom	,,	1·14	
Singbhoom	,,	·36	Healthy.
Balasore	,,	1·48	
Cuttack	,,	10·16	Cholera still occurs here and there.
Pooree	,,	1·74	*General Remarks.*—Seasonable rain is reported from almost all the districts of the Burdwan Presidency, Dacca, Chittagong, Orissa and Chota Nagpore divisions, which has benefitted the main rice crop, but more is still wanted, excepting in Cuttack, where the fall has been heavy. Very slight rain has fallen in nearly half the districts of the Rajshahye and Cooch Behar division. No rain has fallen in any of the districts of the Patna and Bhágalpur divisions, excepting slight showers in places and moderate falls in the Sonthal Pergunnahs. Rain is much wanted in Behar. The prospects of the rice crop are good in most districts of Bengal; in Behar they are bad, and the cold weather sowings also promise badly. The high land rice in the districts of the Patna, Bhágalpur, Rajshahye and Cooch Behar divisions is dying off, and in places it is being cut for fodder; the low land rice where there has been rain and where irrigation is practicable may be expected to give a moderate yield. Cold weather crops are being sown, but in many places there is a want of sufficient moisture.
N. W. P.—			
Benares	(Oct. 25th)	*Nil*	Rabi sowing progressing; complaints from some quarters that rice crops have suffered in consequence of early close of rains.
Mirzapur	(27th)	...	Kharif crops being harvested; no rain, although some here and there needed for late rice; rabi sowings commenced.
Azamgarh	(28th)	...	No change.
Hamirpur	,,	...	
Meerut	(27th)	...	Sowings going on steadily; damage to crops by flood less than first anticipated.
Allahabad	(26th)	...	Good kharif harvest; rabi sowings begun.
Cawnpore	(27th)	*Nil*	Prospects continue favourable; cotton being picked; weather cloudy and close.
Banda	(28th)	*Nil*	Minor kharif crops reaped; rabi sowings in progress.
Jhansi	,,	...	No change; prospects good.
Agra	(27th)	...	Weather continues favourable.
Moradabad	,,	...	Agricultural prospects continue favourable.
Bareilly	,,	...	Weather fine and seasonable.
Almora	(28th)	...	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Punjab—			
Lahore	(Oct. 27th)	*Nil*	Harvest prospects favourable; kharif being gathered, and rabi sowings commenced in places; usual autumnal fevers in places, but health of province generally reported good.
Oudh—			
Lucknow	(Oct. 27th)	Slight sprinkle.	Weather cloudy; public health good; prospects generally favourable, except in the Terai; the late rice has suffered from the early cessation of the rains.
Fyzabad	,,	*Nil*	
Sitapur	,,	*Nil*	
Central Provinces—			
UpperGodavari	(Oct.23rd)	·37	Rain favourable for crops; health good; prices easy.
Sambalpur	,,	1·75	Rain beneficial to crops; cholera disappeared.
Bilaspur	,,	...	Cloudy; rice suffered in places from want of rain; rabi sowings continue; fever prevalent; prices steady.
Raipur	(24th)	1·66	Rain opportune; health good; prices risen.
Chhindwara	,,	...	Cloudy, with slight showers of rain; rabi sowings completed; cholera decreasing; prices steady.
Balaghât	(25th)	1·0	Lighter kind of rice reaping; rabi sowings progressing; fever prevalent; prices fallen.
Bhandara	(26th)	·98	Rain beneficial; rabi sowings continue; cholera, fever, small-pox and cattle disease continue; prices easy.
Nagpur	(27th)	3·61	Rain beneficial; cotton slightly damaged; cholera continues; prices fallen.
Wardha	,,	7·83	Cotton damaged; jowar favourable; rabi sown; cattle disease prevalent.
Nimar	,,	...	Cloudy, slight rain; cholera continues; prices risen.
Hoshangabad	,,	...	Cool and clear; rabi sowings progressing; cholera continues.
Jubbulpore	,,	·12	Prospects of kharif good; rabi sowings continue; fever prevalent.
Saugor	,,	·05	Rice reaping approaching completion; rabi sowings progressing; prices declining.
Seoni	,,	1·40	Kharif cutting; rabi sowing progressing; health good.
Narsinghpur	,,	...	Slight rain on 24th; rabi sowings progressing; fever prevalent.
			General Remarks.—Heavy rain in Wardha Valley injured cotton and rabi sowings, but for rabi the rain is advantageous.
British Burma—	(Oct. 27th.)		
Arakan Division	...	...	Public health good; agricultural prospects favourable.
Pegu Division—			
Rangoon District	...	...	Health good; slight cattle disease; crops favourable, except where lately inundated.
Bassein	... ...	...	Health and crops good.
Henzada	... ...	...	Health and crops good; slight cattle disease.
Prome	... ...	...	Health and crops good.
Thayetmyo	... ...	...	Health good; crops promising.
Tenasserim Division	...	...	Public health good; crops promising.
Mysore and Coorg—			
Bangalore (Cantonment)	(Oct. 28th.)	1·51	No cholera this week in Mysore town, and 50 deaths in the district; general indication of abatement throughout Mysore and Coorg Provinces.
Coorg	,,	2·18	
			General Remarks.—Recent rains have done good, but failure of crops reported in Chitaldroog.
Assam—			
Gauhati	(Oct. 28th)	*Nil*	Mornings cold and foggy; days cool and dry; saleedhan suffering for want of rain; prospects of other crops and tea favourable; public health good.
Sylhet	,,	...	Rain wanted; rice market steady.
Hyderabad Assigned Districts—			
Umraoti	(Oct. 28th)	1·40	Kharif crops in good condition; rabi sowing continues; cholera almost subsided.
Rajputana—			
Sirohi	(Oct. 25th)	...	Supply of water fair in tanks, wells full; health generally good; fever somewhat increased; crop prospects fair, preparing for rabi; weather seasonable.
Marwar	(22nd)	...	Water still rising in wells; health good; prospects favourable; heat very great.
Harowtee	(19th)	...	Health good, but fever prevalent; prospects good.
Ulwar	,,	...	Health good; rains having been very favourable, grain is being sown largely.
Ajmere	(28th)	*Nil*	Clouds about; health good; prospects satisfactory.
Jeypore	,,	*Nil*	Agricultural affairs progressing satisfactorily; health excellent.
Bhurtpore	,,	...	Kharif crop being harvested; health good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central India—			
Indore	(Oct. 27th)	...	No change; all fair.
Gwalior	,,	...	
Nemuch	,,	...	
Rutlam	,,	...	
Bagelkhund	,,	...	
Sutna	,,	...	
Nepal—	(Oct. 20th)	*Nil*	Rice crop now being cut in the hills; prospects excellent.

A. O. HUME,
Secretary to the Government of India.
