Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jalpaiguri ...	*Nil*	Nights and mornings are cold; harvest operations are going on; no change to report in the prospect of the crops; cholera is disappearing; fever is still prevalent.
Darjeeling ...	*Nil*	Weather very cold in the early part of the week, but in the latter part the days were bright and sunny; the reaping of the *haimanti* paddy in the Terai is progressing; the deficiency in the outturn will not be seriously felt in this district; all the young crops of barley and wheat in the hills are progressing well.
Midnapore ...	*Nil*	Weather fine and seasonable; state and prospects of the crops are as good as before.
Howrah ...	*Nil*	Weather seasonable; rice harvest nearly reaped and quite safe.
Hooghly ...	*Nil*	Weather seasonable; the entire *amun* or late rice crop on the high land and about 8 annas of the crop on the low land have been cut.
Burdwan ...	*Nil*	Prospects of *rabi* or cold weather crops are favourable; *amun* or late rice crops are being harvested; fever is prevalent; cholera has broken out in some places.
Bancoorah ...	*Nil*	Weather seasonably cool; state and prospects of the crops are good.
Beerbhoom ...	*Nil*	Weather fine and cold; no change in the state and prospects of the crops since last report.
Sonthal Pergunnahs ...	*Nil*	Weather dry and cooler than the previous week; the harvest is progressing favourably.
Bhagalpur ...	*Nil*	*Aghani* harvest is almost over; Soopool officer reports that the outturn all over the sub-division will be 6 annas; the *rabi*, or cold weather crop, is still looking well; prices are steady, and nowhere is rice dearer than 20 seers; general health is very good.
Monghyr ...	*Nil*	Weather fair; nothing new to report; the rice harvest is now far advanced, and the *rabi* so far is looking well.
Purneah ...	*Nil*	Weather cold and foggy; a considerable portion of the *rabi* crops has been sown; the report from Kishengung states that all the *rabi* lands have been sown, and prospects are good; a 16 anna outturn is expected; at Dumdaha wheat and barley and all other *rabi* plants are looking well, and a 16-anna outturn is also expected; but the report from Kusba Amour is not favourable, as the *rabi* crops will suffer to a considerable extent for want of rain, and only a poor outturn is expected; the harvesting of the *aughani* paddy is progressing favourably; the sub-divisional officer of Arrareah reported that the greater [illegible] been gathered; the dis[illegible] e crops throughout [illegible]n, the moisture in [illegible] extent made up for the wa.
Darbhanga ...	...	Return not received.
Mozufferpore ...	*Nil*	Weather cold and clear; west wind prevailing; in Hazeepore sub-division the *rabi* crops are doing well generally; the sub-divisional officers, after going carefully over Lalgunge thana, reports that with the exception of a tract extending five miles in length on the north and east sides [illegible]re town, where the *rabi* crops without rain will h[illegible] prospects in this thana are as good as in other p[illegible] of the sub[illegible]ision. In Mozufferpore sub-division prospects [illegible]re unchanged; [illegible]ing the last week the Collector has personall[illegible] made very careful [illegible]nquiries and inspections of crops, both cut a[illegible]d standing, in 85 [illegible]illages of the Shewhur and Seetamarhee th[illegible]as in Seetamarhee sub-division, and has seen no reason to questi[illegible] the correctness of [illegible]is last estimates of rice and *rabi* crops; t[illegible]e *rahur* in nearly [illegible]ll villages is still very good; *kulthee* puls[illegible] being gath[illegible]; yield less than was expected; the poppy cro[illegible]nera[illegible] bad [illegible]ome points along the frontier, importation of [illegible]dian-corn[illegible] Nepal has lately re-commenced, and very large q[illegible]ntities pass through Bairugnia, a most important mart in the [illegible]th-west part of the sub-division; prices in the sub-division ar[illegible]early stationary.
Saru ...	*Nil*	Weather seasonable and cold, with westerly wind; the *aughani* or late rice has been harvested, and the new rice is coming into the market; prospects of the *rabi* or cold weather crops are excellent; rain is wanted; in some places the crops are being irrigated; indigo fields are being prepared for the next year's crop; poppy plant is every where very forward, and is looking very well; prices remain stationary; general health is good.
Chumparu ...	*Nil*	Weather nice and cool; no rain, though now and then the sky is overcast; there is nothing to report about the crops; though there has been no rain, the *rabi* crops are still looking well, and with rain will still yield a good harvest.
Patna ...	*Nil*	Weather still continues fine, with no appearance of rain; prospects of the crops remain unchanged; health of the district is good.
Gya ...	*Nil*	Weather clear and cool; the *dhan* crop has been harvested in most places; the outturn is expected to be from 8 to 10 annas; the prospects of the *rabi* are fair.
Shahabad ...	*Nil*	Weather bright and cold; rice crop is still being reaped; *rabi* promising well; health of the district is good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*			
Hazaribagh	...	*Nil*	Weather fine and seasonable; rain is much wanted for the cold weather crops, though they have not suffered much as yet from want of moisture; health of the district is good.
Lohardugga	...	*Nil*	No rain during the week; weather is cold and bright; rain is much wanted; if the present dry weather continues, the *rabi* crops will be materially affected; health of the district is generally good.
Maunbhoom	...	*Nil*	Weather very dry; the main rice crop has been harvested; the state and prospects of the cold weather crops are favourable.
Singhbhoom	...	*Nil*	Weather seasonable; rice crops are all harvested, and the outturn has been most favourable, but the weather is much too dry for the *rabi* crops; the general health is reported to be good.
Balasore	...	*Nil*	Weather fine, pleasant, and cool; the sky is clear and serene; about 3-4ths or 12 annas of the paddy crops have been cut; the *rabi* crops promise well, and in some places they have advanced; rice is selling within the district at from 32 to 44 seers per rupee; the general health during the week is good; small-pox has made its appearance among cattle in some localities within the jurisdiction of Balasore thana.
Cuttack	...	*Nil*	Weather cold with occasional clouds; rice crop is being reaped with an outturn above the average; winter crops coming on well; public health is fairly good, but a little cholera here and there.
Pooree	...	*Nil*	Weather seasonable; harvesting of the late paddy crops is going on; the winter sowings of oil-seeds and pulses are progressing well in Khurda the harvesting of rice crops continues and *moong* pulse is being sown.
			General Remarks.—No rainfall is reported from any of the districts for the week, except a very slight fall in Mymensing and in the interior of the Rungpore District. No change in the state and prospect of the crops to report. The winter crops promise well, but want rain. The harvesting of the main rice crop is in progress.
N. W. Provinces—			
	(Dec. 30th)

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 4th January 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
The Hon'ble J. R. Bullen Smith, C. S. I.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, C. B., K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.

INDIAN TELEGRAPH BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill to amend the law relating to Telegraphs in India be taken into consideration. He said that this was a Bill which was introduced into the Council in last July for the purpose of amending the defects in the laws which he had explained at the time. The Council would recollect that there were two previous Acts passed on the subject, the one in 1854 and the other 1860; and owing to an oversight in the Act of 1860 it was found that the Government could not make rules to regulate telegraphs which were worked under licenses granted under the Act of 1854. That fact was brought to their notice by the Advocate General, who had also drafted some clauses for the purpose of remedying it. That was the principal cause for introducing this Bill. At the same time the opportunity had been taken to bring the penalty clauses into accord with the Penal Code, which had been passed subsequently to the Act of 1860. In that state the Bill went to the Committee. The Committee made a few alterations which were all detailed in the Report. They consisted almost entirely of some amendments of the law with the view of preventing fraudulent tampering with the telegraph and the abstraction of messages, which we were told was an evil to be carefully guarded against in times of commercial excitement. The alterations made by the Committee were nearly all matters of detail and were described in the Report, and he did not think he need go into them further, because there was not one of them of sufficient importance to call for explanation to the Council.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

BURMA LAND REVENUE BILL.

The Hon'ble MR. EDEN presented the Report of the Select Committee on the Bill to declare the law relating to interests in land, and to regulate the assessment and collection of land-revenue, capitation-tax and other taxes in British Burma.

The Council then adjourned to Tuesday, the 18th January 1876.

CALCUTTA,
The 4th January 1876.

WHITLEY STOKES,
Secretary to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th JANUARY 1876.

GENERAL REMARKS.—No rain has fallen in Madras: it is wanted in Trichinopoly and Tanjore, but prospects are reported to be generally satisfactory. No rain has fallen in the Bombay Presidency except a slight shower at Shikarpur in Sind: the *rabi* continues to promise well, but cotton in Dharwar has been almost destroyed by blight. There has been no rain in the Central Provinces, Berar, Central India or Rajputana; prospects continue good. There have been slight showers in the Sub-Himalayan districts of Lower Bengal: otherwise there is no change; rain is generally required for the winter crops. Showers have also fallen in Oudh, and in Kumaun, Rohilkhand and Meerut in the North-Western Provinces; prospects are good. In the Punjab slight rain is reported from Dera Ismail Khan and Peshawar: prospects are everywhere favourable. Reports from Burmah are good. In Assam some rain has fallen in the upper districts: none in Sylhet, where it is wanted. None is reported from Mysore, where the condition of the crops remains unchanged.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Jan. 6th)	*Nil*	Two feet water over anicut; standing crops in places suffering from grub; markets well supplied; prices steady; cholera 16 seizures, 6 deaths, in Bezwada; fever general; small-pox in four taluks; epizoötic aphtha general; pasture sufficient.
Kurnool (5th)	*Nil*	Paddy harvest still in progress; markets moderately supplied; prices steady; water and pasture abundant; fever prevalent; cholera 11 seizures, 2 deaths; cattle disease in parts of three taluks.
Tanjore (6th)	*Nil*	Rivers very low; no fresh supply to tanks; water over anicuts none; cultivation a few dry crops in some places; standing crops not thriving in some parts for want of rain; harvest almost none; markets well supplied; prices almost steady; small-pox in Negapatam; cholera 41 seizures, 38 deaths; cattle disease in some parts, some loss; pasture generally sufficient.
Trichinopoly (5th)	*Nil*	Water-supply deficient for irrigation purposes; crops suffering from failure of rain; outturn below average; markets well supplied; prices steady; cholera 86 seizures, 53 deaths; cattle good; pasture beginning to be deficient.
Malabar (6th)	*Nil*	Harvesting of second crop approaching; markets well supplied; prices steady; bowel complaints in 7 taluks, 753 cases, 566 deaths; small-pox, fever and cattle disease slight; pasture withering. *General remarks.*—General prospects satisfactory.
Bombay— (Jan. 6th)		
Sind. (Jan. 5th)		
Kurrachee ...	...	Usual fever prevalent.
Shikarpur	...	Slight rain on 26th beneficial to *rabi*: cattle disease very prevalent in Lárkána and Rohri divisions; fever decreasing.
Hyderabad ...	...	Cotton picking continues; bolls injured by cold in Hála taluka; river high for time of year.
Upper Sind Frontier ...	...	No change; virulent fever, frequently ending fatally in Thul taluka.
Guzerat.		
Kaira ...	...	State of crops the same as before.
Surat ...	} ...	No change.
Ahmedabad ...		
Broach ...		
Khandesh and Nasik.		
Khandesh ...	...	No change in cotton; ague prevalent; cattle disease appearing.
Nasik ...	...	*Rabi* middling; cotton crop scanty; outturn about 6 annas; American succeeded best.
Konkan.		
Tanna ...	...	*Rabi* crops thriving; 4 deaths from cholera in a village in Bhiwandi taluka.
Deccan.		
Poona ...	...	Standing *rabi* crops well, but in some places one fall of rain is wanted.
Ahmednagar ...	...	*Rabi* crops good in seven and suffering in four talukas.
Sholapur ...	...	No change.
Satara ...	...	*Rabi* crops thriving.
Southern Mahratta Country.		
Belgaum ...	...	No change.
Dharwar ...	...	Late crops and health as before; exotic cotton almost destroyed by blight; early crop harvest over.
Kanara ...	...	Cold weather cultivation progressing favourably; cholera in a boat arrived at Honáwar from Malabar, 2 deaths; 4 cases on shore, 2 deaths.
Kaladgi ...	...	*Kharif* harvest not quite completed; *rabi* and cotton middling; 2 deaths from cholera.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather cold; *rabi* crops as before; health good.
Wadhwán ...	...	Weather cool; crops good; 10 cholera cases, 7 deaths.
Baroda ...	...	No change.
		General remarks.—Bad fever prevalent in Sind; cholera almost disappeared from Kattywar and Southern Mahratta Country; fever in Khandesh; no change in Guzerat; crops generally fair, except cotton in Dharwar, where it has been almost destroyed by blight.
Bengal—(Jan. 6th)		
Chittagong ...	*Nil*	Weather colder than last week, but still warm; the *amun* or late rice crop is being cut all through the district; rain is still much wanted for the cold weather crops; cholera is prevalent at Futtickcherry, Seetakund, and Hathazari.
Noakhally ...	*Nil*	Weather fair; the reaping of the *amun* crops are not yet completed; pulses, chillies, linseed, sessamum, &c., are progressing favourably.
Chittagong Hill Tracts...	...	Return not received.
Hill Tipperah ...	*Nil*	No rain during the week, and no change in the prospects of the crops; cholera still prevails in the Udaypore sub-division.
Backergunge ...	*Nil*	Weather cold and fine; state and prospects of the crops are fair; insects have done much damage to the rice crop throughout the Perozepore and Patoakhally sub-divisions; the Dowlutkhan reports are better than before, and those of the head-quarters sub-division are fair; fever and cholera are still very prevalent.
Furreedpore ...	*Nil*	Weather continues dry and seasonable; most of the paddy crop has been reaped; there are still a few cases of cholera in the northern parts of the district.
Dacca ...	*Nil*	Weather fine; state and prospects of the crops are good.
Mymensingh ...	*Nil*	Mornings foggy, days clear and cold; harvesting of *amun* or the late rice crop is almost completed; the *boro* seedlings are still being transplanted; mustard and other winter crops are doing well.
Tipperah ...	*Nil*	Weather cool and seasonable; the winter rice is still being reaped, and the outturn will, it is believed, be about twelve annas on the whole; the winter crops are generally in fair condition, but likely to suffer for want of rain, which is much wanted; cholera still prevails in various parts of the district.
24-Pergunnahs ...	*Nil*	Weather seasonable; reaping of the late rice is vigorously going on, and the winter crops promise well; cholera has abated at Satkhira, Baripore, and Basirhat, but it continues at Diamond Harbour.
Jessore ...	*Nil*	Weather generally clear; wind prevailed from the north-west; the *amun* or late rice crop is still being harvested; the outturn will be fair; the winter crop is progressing favourably.
Nuddea ...	*Nil*	Weather seasonable; the cold weather crops are generally good, but in places are poor from want of rain.
Moorshedabad ...	*Nil*	Weather seasonable; state and prospects of the crops are much the same as in last week, except that there has been a slight fall in the prices of rice.
Pubna ...	*Nil*	Weather seasonable; state and prospects of the crops are fair; the winter crops would be better for some rain; cholera is still prevalent.
Rajshahye ...	*Nil*	There has been no rain, and the weather continues to be clear, without any appearance of change; the *rabi* crops in parts of the district are suffering to some extent from the absence of rain; the *boro* seedlings lately transplanted are thriving; the *amun* or the late rice crop is nearly reaped, and the outturn is fairly good; there is no cholera prevalent at present.
Bogra ...	*Nil*	Weather fair; all the crops are doing well; the cutting of the *amun* or the late rice crop is approaching completion.
Maldah ...	*Nil*	Weather cool, morning foggy; *haimunti* paddy is still being reaped; *rabi* crop is thriving, but wants rain; *boro* seedlings are being transplanted; *Aulsi* crop is expected to yield a good outturn; rainfall is greatly wanted for the growth of wheat and barley; 6 deaths from fever and 6 from cholera.
Dinagepore ...	*Nil*	Weather fair and cold; harvesting is still going on and a moderate outturn is expected; 6 deaths from cholera reported from the interior.
Rungpore ...	*Nil*	Weather fair and pleasant, but not generally so cool as it is usually at this season of the year; no change in the state and prospects of the crops; harvest is general; cold weather crops are in fair condition.
Cooch Behar ...	*Nil*	Weather cold and fair; mornings rather foggy; *haimunti* paddy is almost reaped; mustard seeds promise well.
Jalpaiguri ...	·06	Weather seasonable; harvest is progressing favourably; prospects of the cold weather crops are good; cholera has abated; fever is also becoming less prevalent.
Darjeeling ...	·18	Weather very cold, threatening rain or snow; in the Terai the winter rice crops have been gathered to a great extent; the deficiency in the outturn will not be felt seriously; in the hills the young crops of wheat and barley are progressing, but they need rain.
Midnapore ...	...	Return not received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Howrah ...	*Nil*	Weather seasonable; a better harvest than has been known for a dozen years past.
Hooghly ...	*Nil*	Weather seasonable; only one-sixteenth of the *amun*, or late rice crop, in the low lands remains to be cut; winter crops are doing well.
Burdwan ...	*Nil*	*Amun*, or the late rice crop, has been harvested; prospects of the *rabi* crops are favourable; cholera is prevalent in some villages of the Jehanabad sub-division.
Bancoorah ...	*Nil*	Weather cool and seasonable; state and prospects of the crops are as good as before.
Beerbhoom ...	*Nil*	Weather warm; rice nearly all cut; winter crops are in good condition.
Sonthal Pergunnahs ...	*Nil*	Weather fair, but temperature rather variable, on the whole cool and seasonable; the rice harvest in parts of the district is almost completed; the want of rain is much felt, so far as the bulk of the cold weather crop is concerned.
Bhagalpur ...	*Nil*	The *rabi* is still looking well in most places; rain is wanted during this month; price of rice is 20 seers in Soopool; general health of the district is good.
Monghyr ...	*Nil*	Weather cold; the paddy crop is nearly all cut and harvested; the outturn for the district, as anticipated, being nearly an average one; the *rabi* is going on well.
Purneah ...	A slight shower on the morning of the 3rd.	The general complaint for want of rain still continues, though it has been cloudy during the week and the temperature cold, giving sign of rain, none fell up to the end of the week (1st instant); the weather continues cloudy; there is every chance of more rain falling within the current week; the state of the crop throughout the district notwithstanding the unfavourable prospects, is very fair; from 8 police stations the returns in respect to the crops promise well; and in only 4 police stations, *viz.*, Sudder, Kusba Amoor, Muttiari, and Bahadurgunge, the prospects of the harvest are not good, the *rabi* crop having suffered for want of rain; the sub-divisional officers of Arrareah and Kissengunge both report that the *rabi* crop is up to date promising, which is chiefly due to the humidity of the atmosphere and the moisture held in the soil, and if the expectation in regard to the rain be realized there is no doubt the prospects all over the district will be greatly improved; fever is somewhat prevalent in the district.
Durbhangah ...	·21	Return not received.
Mozufferpore ...	·0	Weather cold and seasonable, with westerly wind; the prospects of the *rabi* or cold weather crops continue excellent; a shower of rain will much benefit the crops, and will ensure a full harvest; in some places the crops are being irrigated; indigo fields are still being prepared for the next year's crop; poppy plant is everywhere doing well; prices of wheat, barley, and *cheena* have slightly fallen; general health is good.
Sarun ...	*Nil*	Weather nice and cool; there is nothing new to report regarding the condition of the crops; there has been no rain, still the *rabi* crops are looking well.
Chumparun ...	*Nil*	Strong wind for the last two days, which forebodes rain; no change in the prospects of the crops, *i. e.*, the rice crop is now being reaped, and the Collector does not think on the whole it will be a bad one; the prospects of the *rabi* crops are fair; health of the district continues good.
Patna ...	*Nil*	Weather cool and clear; west wind prevailing; the prospects of the crops remain unchanged, *i.e.*, the *dhan* crop has been harvested in most places; the outturn is expected to be from eight to ten annas; public health is generally good; a few cases of fever reported from the sub-division of Nowadah.
Gya ...	*Nil*	Weather cool, with west wind; reaping of paddy crop is almost completed; *rabi* crops towards Bhubboosh sub-division are suffering in places for want of rain; no reports from Buxar and Sasseram.
Shahabad ...	*Nil*	Weather fine and clear, but not so cold as it ought to be; the cold weather crops have sustained no injury as yet from the want of rain owing to heavy dews at night, but they undoubtedly will if rain holds off much longer; health of the district is good.
Hazaribagh ...	*Nil*	Weather seasonable; the cold weather crops are doing fairly; rain is, however, much wanted, there having been but very little rain since the end of October last.
Lohardugga ...	*Nil*	Weather very dry; little dews; all crops promise well, including wheat, barley, gram, *rye*, *soorgooya*, sugarcane, cotton, *koody*, *rahur*.
Manbhoom ...	*Nil*	Weather seasonable; some rain would benefit the *rabi* crops, but no unfavourable reports of them have been made; the district is healthy.
Singhbhoom ...	*Nil*	Weather fine and cold; no rain during the week; in some places paddy crops have been completely harvested, and in some they are being reaped; the *rabi* crops promise well; small-pox still prevails to a certain extent among cattle within the jurisdiction of Balasore thana; the general health is good; common rice is selling at from 32 to 44 seers per rupee.
Balasore ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Cuttack ...	*Nil*	Weather clear and cold; paddy crop is being reaped with excellent outturn; winter crops are flourishing; health of the district is good.
Pooree ...	*Nil*	Weather cloudy and very little cold; the *sarud* or the main rice crop is being reaped with a very good outturn; *moong* and some other pulses are also being gathered with a very good outturn; cotton is being sown; sugarcane is being cut and the yield is good. *General Remarks.*—No rainfall is reported from any of the districts for the week under review, except a very slight fall in Durbhangah, Jalpaiguri, Purneah, Darjeeling, Mozufferpore, Soopool in the district of Bhagulpur and Modhubany in the district of Durbhangah. There is nothing new to report regarding the condition of the paddy crops. The winter crops generally promise well, but require rain.
N. W. Provinces—		
Benares (Jan. 5th)	...	No change; signs of rain.
Agra ,,	*Nil*	Prospects favourable.
Meerut ,,	Slight rain during the week.	Prospects good.
Bareilly ,,	...	Slight rain in Pilibhít and Púranpur parganas; more wanted.
Almora (Jan. 3rd)	...	Weather stormy yesterday, with some rain and snow.
Punjab—		
Delhi (Jan. 5th)	*Nil*	Health and crops good.
Hissar ,,	*Nil*	Ditto ditto.
Umballa ,,	*Nil*	Ditto ditto.
Jullundar ,,	*Nil*	*Rabi* prospects fair; fever abating.
Lahore ,,	*Nil*	Health and crops good.
Mooltan ,,	*Nil*	Ditto ditto.
Dera Ismail Khan ,,	0·2	Ditto ditto.
Rawalpindi ,,	*Nil*	Prospects excellent; health good.
Peshawár ,,	0·9	Prospects good; slight fever. *General Remarks.*—Agricultural prospects everywhere favourable; public health generally good.
Oudh—		
Lucknow (Jan. 5th)	Slight showers.	Weather cloudy; prospects and public health continue generally good.
Sitapur ,,		
Fyzabad ,,		
Central Provinces—		
Upper Godavari (Jan. 1st)	...	Prospects favourable; fever continues; prices fluctuating.
Sambalpur ...	...	Harvest completed; outturn excellent; fever continues.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Raipur ...	...	*Rabi* prospects good; prices easy.
Chanda (2nd)	...	*Rabi* doing well; fever prevalent.
Chhindwara ...	...	*Kharif* harvesting; health good; prices steady.
Betul (3rd)	...	*Rabi* good; prices steady.
Balaghát ...	...	*Kharif* harvesting; *rabi* favourable; health good; prices steady.
Bhandara (4th)	...	Rice harvest good; *rabi* promising; fever prevalent; prices easy.
Nagpur (5th)	...	*Rabi* promising; small-pox and fever prevalent; prices stationary.
Wardha ...	...	*Rabi* promising.
Nimar ...	...	Cholera disappeared; prices fallen.
Hoshangabad ...	...	*Rabi* promising.
Narsinghpur ...	...	*Rabi* promising.
Jubbulpore ...	...	*Rabi* good; cattle disease prevalent.
Saugor ...	...	Prospects of *rabi* favourable; prices stationary.
Seoni ...	...	*Kharif* harvesting; *rabi* promising; health good; prices stationary.
Damoh (Jan. 6th)	...	Prospects good; prices stationary.
Mandla ...	...	Prospects good; health good; prices fallen. *General Remarks.*—Prospects of *rabi* continue good.
British Burma—(Jan. 6th)		
Arakan Division ...	...	Public health good; crops being reaped.
Pegu Division.		
Rangoon ...	...	Public health fair; cholera at Pegu almost entirely disappeared; reaping progressing; prospects of crops fair; cattle disease slight.
Bassein ...	...	Health fair; cholera in town now slight; crops good.
Henzada ...	...	Public health good; harvest excellent.
Prome ...	...	Health good; harvest nearly all gathered.
Thayetmyo ...	...	Health good.
Tenasserim Division ...	...	Health good, except at Mergui and Tavoy, where fever prevails; crops being reaped; cattle disease still prevails.
Assam—		
Gauhati (Jan. 6th)	0·11	Mornings raw and misty, days cold and clear; slight showers on night of 4th; reaping of *sali* continues; other crops and tea doing well; public health good.
Sylhet ,,	...	Reaping finished; outturn below average; rice market steady; spring crops want rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—		
Umraoti (Jan. 6th.)	...	*Jowari* cutting completed in most parts of provinces; expected outturn fair; cotton picking continued; outturn below usual average; *rabi* crops in good condition.
Mysore and Coorg—		
(Jan. 6th) ...	*Nil*	Prospects of season remain unimproved; public health on the whole good.
Rajputana—		
Serohi (Dec. 27th)	...	Water supply sufficient; health good; prospects promising; weather seasonable.

SUPPLEMENT TO

The Gazette of India.

No 3.} CALCUTTA, SATURDAY, JANUARY 15, 1876. {Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th JANUARY 1876.

GENERAL REMARKS.—No rain has fallen in Madras except a slight sprinkling in Tanjore: rain is wanted in parts, but prospects are reported generally fair. No rain is reported from Bombay, Sind, the Central Provinces, Berar, Rajputana or Central India: the prospects of the rabi continue good in all these provinces. In Bengal no rain has fallen during the week except a trifling shower at Darjeeling: the showers of last week in the districts immediately south of the hills have been of considerable benefit. Rain is wanted in the central and eastern districts and Chota Nagpore; prospects are however good, and the *amun* rice, the harvest of which is almost complete, has yielded a fair outturn generally. From the North-Western Provinces and Oudh no rain is reported: prospects are good, want of rain being felt seriously only in Bareilly. In the Punjab rain has fallen at Peshâwar and Rawal Pindi, none elsewhere: reports are favourable. No rain has fallen in Assam, Burmah or Mysore; in the last province the condition of the crops continues unimproved.

Presidency or Province and District		Rainfall for week preceding.	Nature of agricultural prospects.
Madras—			
Kistna	(Jan. 13th)	...	Rain wanted; 2 feet water over anicut; gram and castor sown; crops generally good; prices steady; markets well supplied; cholera 38 seizures, 18 deaths; fever and small-pox continue; cattle suffering from epizootic aphtha in some places; pasture sufficient.
Kurnool	(12th)	*Nil*	Season generally favourable; paddy, *cholum* and wheat harvested; growing crops thriving; markets well supplied; prices steady; water and pasture sufficient; cholera in Sirwell, 12 seizures, 4 deaths; fever prevalent; cattle healthy except in Ramallcota.
Tanjore	(13th)	·02 in Negapatam; elsewhere none.	Rivers almost dry; no fresh supply to tanks; water over anicuts none; cultivation a few dry crops in places; standing crops not thriving in parts for want of rain; markets well supplied; prices almost steady; small-pox in Negapatam; cholera increased—213 seizures, 159 deaths; cattle disease in parts; pasture generally sufficient.
Trichinopoly	(12th)	*Nil*	Drinking water sufficient; supply for irrigation purposes scanty in dry taluks; crops good in irrigated parts, suffering much elsewhere for want of water; outturn generally below average; prices steady; cholera 54 seizures, 46 deaths; foot and mouth disease among cattle at Srirungum fair; pasture sufficient in wet taluks, scanty elsewhere.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Malabar (Jan. 13th)	*Nil*	Harvesting of second crop approaching; markets well supplied; prices steady; bowel complaints in 7 taluks—281 seizures, 195 deaths; pastures withering.
		General remarks.—General prospects fair.
Bombay— (Jan. 13th)		
Sind. (Jan. 12th)		
Kurrachee ...	} ...	No change.
Hyderabad ...		
Upper Sind Frontier ...	...	Crops progressing favourably; season unhealthy.
Guzerat.		
Ahmedabad ...	...	Crops progressing favourably.
Kaira ...	...	*Rabi* crops and cotton thriving.
Surat ...	...	Cotton and *rabi* crops good; 10 cholera cases in Bulsar taluka, 6 deaths.
Broach ...		Crops good; fever continues; weather slightly cold.
Khandesh and Nasik.		
Khandesh ...	...	*Rabi* crops healthy; American cotton forms 75 *per cent.* of the crop in 5 talukas; fever prevalent.
Nasik ...	...	*Rabi* crops middling; fever and ague prevalent.
Konkan.		
Tanna ...	...	*Rabi* crops thriving; prospects fair; public health generally fair.
Deccan.		
Poona ...	...	Standing *rabi* crops generally doing well, but in some places one fall of rain is wanted.
Ahmednagar ...	...	} No change.
Sholapur ...	...	
Satara ...	...	*Rabi* crops good, except in Wai, Tásgaon and Wálwa, where they are middling.
Southern Mahratta Country.		
Belgaum ...	...	*Rabi* crops good; cotton middling.
Dharwar ...	...	Public health favourable, except in Hángal taluka.
Kanara ...	...	Second crop cultivation nearly finished along the coast; cholera in Honáwar and Yellápur—14 cases, 9 deaths.
Kaladgi ...	...	No change; 10 deaths from cholera.
Kattywar.		
Rájkot ...	...	Weather cold; *rabi* crops as before; fever and cough prevalent in Rájkot and Nagar talukas.
Wadhwán ...	...	Weather cool; crops good; cholera at Kattoodi, 3 cases, 1 death.
		General remarks.—Cholera still hanging about in the Southern Mahratta Country; much fever in Sind, Khandesh and Nasik; general prospects of *rabi* crops good.
Bengal—(Jan. 13th)		
Chittagong ...	*Nil*	Weather cool; rain is wanted for the cold weather crops; general health of the district is good, but cholera is still prevailing at Futtekcherri.
Noakhally ...	*Nil*	Weather cold and clear; the reaping of the *amun* or the late rice crop is not yet finished; pulses, chillies, linseed, sesamum, &c., are moderately progressing; cholera is abating.
Chittagong Hill Tracts...	*Nil*	Weather seasonable, very cold at night and foggy up to 9 o'clock in the morning; mustard is in flower; owing to the want of moisture in the soil a poor outturn is anticipated; tobacco and chilli are being sown.
Hill Tipperah ...	*Nil*	No change to report in the weather or of the prospects of the crops cholera still prevails in the neighbourhood of Udaypore.
Backergunge ...	*Nil*	Weather cold and fair; the usual Christmas rains have not come down yet; the harvesting of the paddy crops is nearly over; the ravages of insects are reported to have ceased; winter crops promise fair returns; cholera and fever are still prevalent.
Furreedpore ...	*Nil*	Weather seasonable; the prospects of the *rabi* crops continue favourable; there is a little cholera in the Goalundo sub-division.
Dacca ...	*Nil*	Weather seasonable; state and prospects of the crops are good.
Mymensing ...	*Nil*	Weather fair and cold; no rain has fallen in any part of the district; state and prospects of the crops are favourable; the planting out of the *boro* crop in the east of the district is nearly concluded.
Tipperah ...	*Nil*	Weather cool and seasonable; the reaping of the *amun* or the late rice crop is nearly brought to a close, and the outturn will, it is believed, be about 12 annas on the whole; the winter crops are in fair condition, but rain is much wanted; cholera is abating.
24-Pergunnahs ...	Return not received.	Weather seasonable; harvest of *amun* or the late rice crop progressing vigorously; cold weather crops are doing well; cholera and fever have somewhat abated.
Jessore ...	*Nil*	Weather cool; sky clear; harvesting of *amun* or the late rice crop is going on, and a 12 anna crop will probably be the average for the district; winter crops appear to be promising in the eastern half of the district, but in the Jhenidah and Sudder sub-divisions rain is much wanted.
Nuddea ...	*Nil*	Weather seasonable; the cold weather crops are generally a little below the average; rain is wanted, but there are no symptoms to expect an early fall; cholera is becoming less prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Moorshedabad ...	*Nil*	Weather seasonable; there was an appearance of rain on last Monday; the state and prospects of the *rabi* crops are fair; rain is wanted for them in Gorabazar, Goas, Harihurpara and Gokurn specially; common rice selling at 26½ seers per rupee; a few cases of cholera are reported from Harihurpara, Nowada, Goas and Jellinghee.
Pubna ...	*Nil*	Weather seasonable; state and prospects of the crops are fair; the winter crop would be very good with some rain; cholera and fever are prevalent.
Rajshahye ...	*Nil*	Fine weather, with no appearance of rain; no change is reported in the prospects of the crops, though rain still holds off and is much looked for; public health is generally good, but fever is reported to be prevalent in one or two quarters.
Bogra ...	*Nil*	Weather fine; *amun* or the late rice crop is still being cut; average yield is expected; cholera is abating.
Maldah ...	*Nil*	Foggy mornings and cloudy at times; the reaping of *amun* or the late rice crop and *haimunti* is almost completed; the outturn is fair; the *rabi* crop is suffering from want of rain, but is so far promising; *kalai* pulse is ripe, and a good crop; the early spring rice is being sown, transplanted and irrigated; 7 deaths are reported from cholera during the week.
Dinagepore ...	*Nil*	Weather cold, with foggy mornings and fine clear days; harvesting of the late paddy crop is nearly completed; the yield will be from 8 to 10 annas; 12 deaths from cholera are reported from the interior.
Rungpore ...	*Nil*	Weather seasonable; winter crops are promising well, but rain is wanted.
Cooch Behar ...	*Nil* (A few drops of rain on the 3rd.)	Weather very cold; days cloudy; harvest almost reaped; winter crops are promising; rain is wanted; health of the people is generally good.
Jalpaiguri ...	Return not received. (Slight rain on the 3rd.)	The early part of the week was unusually cold, sometimes cloudy; cold weather crops promise well; *haimanti* harvest operations nearly completed; ploughing for *bhadoi dhan* has commenced.
Darjeeling ...	·03	Weather very cold and misty; a slight fall of snow on Monday the 3rd instant; in the Terai the harvesting of the winter rice crop is nearly completed; the young crops of barley and wheat are suffering for want of rain; in the hills wheat and barley are progressing well.
Midnapore ...	Nil	Weather fine; state and prospects of the crops are as good as before.
Howrah ...	Nil	Weather fine; the harvest may be said to be over, a bumper crop having been reaped.
Hooghly ...	Return not received.	Weather seasonable; the harvesting of the *amun* or the late rice crop is nearly over; the outturn may be set at 13 annas; the potato harvest has commenced, and a good crop is expected; the vegetables have turned out well, and are selling unusually cheap in the bazar; prospects of *rabi* crops fine good; *boro* cutting has begun.
Burdwan ...	Nil	*Amun* or the late rice crop is harvested; prospects of [illegible] are good; [illegible] well; rice is becoming [illegible]
Bancoorah ...	Nil	Weather dry and cold; the winter rice crop has been harvested; the outturn has been a good average; the cold weather crops are as good as possible; cholera and fever are still reported.
Beerbhoom ...	Nil	Weather seasonable; harvesting of paddy crops is nearly over; the winter crops are promising well.
Southal Pergunnahs ...	Nil	Weather extremely variable, sometimes close and sometimes bracing; the harvesting of the paddy crop is nearly over; the *rabi* is no worse than anticipated; the mustard is beginning to be got in.
Bhagalpur ...	Nil (In previous week 36 at Sooksuri, 70 at Kurgaon and 20 at Mudhobani.)	The rain has fallen where it was most wanted; *rabi* prospects are still very good; condition of the people is good; general health of the district is very good.
Monghyr ...	Return not received.	Weather cold and seasonable; the paddy crop is nearly all cut and harvested, the outturn for the district, as anticipated, being nearly [illegible] annas; [illegible] doing well.
Purneah ...	Nil	Very [illegible] the *aghani* rice has been reaped, and the [illegible] is expectations; rain is wanted for the *rabi* and [illegible] have hitherto been very favourable.
Durbhangah ...	Nil (A slight shower on the morning of the 3rd instant; 39 at Mudhobani.)	Weather cloudy [illegible]th, since then fine and very cold; the report from [illegible] not been received; the *rabi* crops have been benefited by the [illegible] considerably; the prices of food grains are falling throughout the district; large importations into Mudhobani from Sarun and other districts are reported.
Mozufferpore ...	Return not received. (In previous week 62 at Seetamurhee.)	Weather cold and clear; prospects of the crops in Mozufferpore and Hajeepore sub-divisions remain unchanged; in Seetamurhee sub-division the crops have been much benefited by the fall of rain.
Sarun ...	Nil (Slight falls in Sewan on the 2nd and 3rd instant.)	Weather cold and foggy in the early part of the week, clear and seasonable for the last three days; both east and west wind; the prospects of the cold weather crops are generally favourable; rain in Sewan sub-division has done some good; peas are bearing fruit; indigo fields are still being prepared for the next year's crops; poppy everywhere forward; prices have fallen; general health of the district is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Chumparun ...	*Nil*	Weather nice and cool; the sky is overcast now and then; there is nothing new to report regarding the state of the late rice crop; the general shower of the long looked for rain fell on Sunday night; it has much improved the condition of the *rabi* and poppy crops.
Patna ...	Return not received.	No change since last report, that is, the rice crop is now being reaped, and the Collector does not think, on the whole, it will be a bad one; no rain, but heavy dews, which would seem to be sufficient moisture for the spring crops, as they look remarkably well; health of the district is good.
Gya ...	*Nil*	Weather cold and clear, with heavy dews at night; the rice crop is almost entirely reaped and stored; the prospects of the *rabi* are fair; where there is irrigation it will do well; rain is much wanted in other parts.
Shahabad ...	Return not received.	Weather clear and cold; paddy crops are harvested; prospects of the *rabi* crops are good.
Hazaribagh ...	*Nil*	Weather occasionally cloudy; the prospects of the winter crops are very bad for want of rain; not half the usual quantity has been sown, and only about half of what has been laid down has germinated, and what is growing is very backward, and will soon perish if rain hold off.
Lohardugga ...	*Nil*	Weather seasonable; the rice harvest seems to have been very good everywhere; the prospects of the cold weather crops are also reported to be very fair, but rain is required.
Manbhoom ...	*Nil*	Weather very dry, the dew is very slight; all crops are promising well.
Singhbhoom ...	*Nil*	Weather seasonable, no rain, but still there are no unfavourable reports of the *rabi* crops; the district is healthy.
Balasore ...	*Nil*	There was an appearance of rain towards the end of the week, the sky became clouded, and the barometer fell, the cloudiness has not passed away; main harvest nearly concluded; yield is excellent; cholera cases not so frequent, but still severe in the south of the district.
Cuttack ...	*Nil*	No change since last report; crops are doing well; there is still a little cholera and some cattle disease.
Pooree ...	*Nil*	Weather clear and a little cold; the *sarad* or the main rice crop is being harvested with good outturn; some pulses are being gathered, and others are progressing; cotton is being sown; sugarcane is being cut; in Khoordah the prospects of the winter crops are good, and the paddy crop is being harvested; cholera still lingers at some places.
		General remarks.—No rainfall is reported from any of the districts for the week under review except a very slight fall in Darjeeling. There is nothing new to notice as regards the state and prospects of the paddy crop, save that the harvesting has been generally completed and the outturn is a fair one on the whole. The prospects of the *rabi* or winter crops are generally promising, and the late fall of rain in places where it was wanted most has generally benefited the crops. There is still a want of rain in some places.
N. W. Provinces—		
Benares (Jan. 12th)	*Nil*	Prospects good.
Allahabad „	...	No change; prospects of *rabi* excellent.
Jhansi (13th)	...	Ditto.
Agra (12th)	*Nil*	Ditto.
Meerut „	*Nil*	Prospects good.
Bareilly „	*Nil*	Rain much wanted.
Almora (10th)	...	Weather clear; some snow on higher hills.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*continued.*		
Betul (Jan. 10th)	...	Weather cloudy; *rabi* favourable; health good; prices stationary.
Balaghât ...	...	Weather cloudy; rice threshing almost completed; health good; cattle disease prevalent; prices steady.
Bhandara (11th)	...	Weather clear and pleasant; *kharif* threshing continues; outturn of rice above average; fever continues; prices easy.
Nagpur (12th)	...	Weather cloudy; prospects fair; health good; prices steady.
Wardha ...	...	Weather clear; prospects of *rabi* favourable.
Nimar ...	...	Prospects of *rabi* favourable; prices stationary.
Hoshangabad ...	...	Weather clear and cold; *rabi* promising.
Narsinghpur ...	...	*Rabi* progressing.
Jubbulpore ...	...	Weather clear and cold; small-pox and cattle disease prevalent.
Saugor ...	...	*Rabi* promising; prices risen.
Seoni ...	...	*Rabi* progressing; health good.
Mandla ...	...	Prospects good.
Damoh ...	...	Health good; prices stationary.
		General remarks.—Prospects of *rabi* continue good; cotton below average.
British Burma—		
Arakan Div. (Jan. 13th)	...	Public health good; crops being reaped.
Pegu Division.		
Rangoon (Jan. 13th)	...	Prospects of standing crops good; [illegible] in Syriam and Hmawbee townships; cattle disease prevalent generally.
Bassein „	...	Health and crops good; [illegible]; small-pox prevalent.
Henzada „	...	Public health good; [illegible] progressing.
Prome „	...	Small-pox decreasing in Shwedaung; vaccination going on rapidly; harvest gathered.
Thayetmyo „	...	Health good.
Tenasserim Division ... (Jan. 13th)	...	Public health good; crops being reaped.
Amherst [illegible]		
Ga[illegible]ni (Jan. 13th)	*Nil*	Mornings foggy, days clear and cool; *sali* dhan almost reaped; good outturn not expected, as reported before; other crops and tea doing well; public health good.
Sylhet „	...	Cholera and small-pox prevalent; rain wanted.
Hyderabad Assigned Districts—		
Umraoti (Jan. 13th)	...	*Jowari* threshing in progress; outturn below usual average; *rabi* in good condition.
Mysore and Coorg—		
[illegible] (Jan. 13th)	Nil	Prospects of season continue unimproved; public health good; cholera nearly extinct.
Ba[illegible]		
[illegible] (Jan. 8th)	...	No change.
[illegible] „	...	
[illegible] (13th)	...	No change since last report.
Coorg „	...	No change; prospects and health good.
Central India—		
[illegible] (Jan. 12th)	...	Health and agricultural prospects continue good.
[illegible] „	...	
[illegible] „	...	
[illegible] „	...

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th JANUARY 1876.

GENERAL REMARKS.—No rain has fallen in Madras, where it is reported that much loss of the later crops is expected from the drought, and that the failure of drinking water is serious. None has fallen in Mysore, where the condition of the crops remains unsatisfactory. In Sind there has been light general rain which has benefited the *rabi*; elsewhere in the Bombay Presidency none has fallen: the condition of the *rabi* is fair. No rain has fallen in the Central Provinces, Berar, Rajputana or Central India: reports are favourable. In Bengal there has been no rain: the *amun* harvest is nearly at an end, and the outturn has been fair: the condition of the *rabi* crops is good, but rain is wanted. In the North-Western Provinces rain fell at Almora, and a few drops in Benares; there were signs of rain in Jhansi and Allahabad, but no fall; prospects are generally fair, but rain is much wanted in Rohilkhand In Oudh prospects are favourable, but rain would do good. Rain has fallen in some quantity at Rawalpindi and Peshawar, and showers at Jullundur, Lahore, and Dera Ismail Khan: prospects are good. Reports from Assam and British Burmah continue favourable.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Jan. 20th)	*Nil*	Standing crops generally good; markets well supplied locally; prices steady; cholera 55 seizures, 30 deaths in 3 taluks; fever general; small-pox in 2 taluks; epizoötic ophtha almost general; pasture decreasing.
Kurnool	(19th)	*Nil*	Season generally favourable; paddy, *cholum*, wheat, cotton and green gram harvested; other crops flourishing; markets well supplied; prices steady; cholera in Sirwell, 8 seizures, 4 deaths; fever prevalent; cattle healthy, except in Ramalkota and Nandial.
Tanjore	(20th)	*Nil*	Rivers almost dry; water in tanks scanty; water over anicuts none; cultivation a few dry crops in places; standing crops not thriving in parts for want of rain; harvest a few wet crops in places; yield fair; pasture generally sufficient; markets well supplied; prices almost steady; small-pox in Negapatam; cholera 159 seizures, 122 deaths; cattle disease in parts; some loss.
Trichinopoly	(19th)	*Nil*	Water-supply barely sufficient in irrigated parts; failing elsewhere; crops in irrigated parts tolerably good, suffering from want of water and rain elsewhere, especially in Udiarpolliem; outturn of wet crops generally up to average, dry crops rather below; markets well supplied; prices steady, except in Udiarpolliem, where somewhat risen; cholera 79 seizures, 58 deaths; foot and mouth disease prevail; pasture limited.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Malabar (Jan. 20th)	*Nil*	Harvesting of second crop approaching; outturn not very promising for want of seasonable rain; markets well supplied; prices steady; bowel complaints in 7 taluks, 229 seizures, 16 deaths; small-pox prevalent; cattle disease slight; pasture withering. *General Remarks.*—Much loss of later crops expected from drought; large remissions and high prices inevitable; but stocks of grain believed to be sufficient, and distress not anticipated, though relief works may prove necessary; failure of drinking water most pressing.
Bombay— (Jan. 20th)		
Sind. (Jan. 19th)		
Kurrachee ...	0·77 in Kurrachee on Friday: fall probably general.	*Rabi* crops in Kotri taluka in ear; prospects fair; fever and cattle disease prevalent; river continues encroaching on the town of Mánjhand; many houses carried away, and several more in danger.
Shikarpur ...	...	Light but steady rain during night of 14th, beneficial to *rabi* crops, which are very promising throughout the district; weather much colder; fever continues.
Hyderabad ...	...	Cotton picking over; *rabi* crops well; rain fell during the week.
Upper Sind Frontier ...	0·20	Crops continue fair; sickness decreasing.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	...	Crops thriving; cotton good.
Surat ...	...	Nine cholera cases in Bulsar taluka, 4 fatal; no change in state of crops.
Broach ...	...	Crops and public health good; cotton picking commenced in Ankleswar and Jambusar.
Khandesh and Nasik.		
Khandesh ...	...	Cotton crop unchanged; market dull; fever decreasing; cattle disease in Talode taluka.
Nasik ...	...	*Rabi* crops middling; fever and ague prevalent.
Konkan.		
Tanna ...	...	*Rabi* thriving; prospects fair; public health fair; small-pox prevails severely at Tanna.
Deccan.		
Poona ...	...	State of crops the same as before.
Ahmednagar ...	...	
Sholapur ...	...	No change.
Satara ...	...	
Southern Mahratta Country.		
Belgaum ...	...	Easterly winds have injured *rabi* and cotton crops; cholera has slightly re-appeared in Sampgaon.
Dharwar ...	...	Late crops as before; blight in indigenous cotton in two talukas; fever and cholera decreasing.
Kanara ...	...	Cold weather cultivation progressing favourably; cholera increasing on coast and in the interior.
Kaladgi ...	...	*Kharif* reaped; *rabi* commenced; cotton indifferent; one death from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Cholera raging in Morvi.
Wadhwán ...	...	Weather cool; crops good.
Baroda ...	...	*Rabi* and cotton crops continue well.
		General Remarks.—Slight fall of rain in Sind; cholera in Bulsar, Belgaum, Dharwar, Kanara and Morvi State; fever in Sind, Khandesh and Nasik; crops fair.
Bengal—(Jan. 20th)		
Chittagong ...	*Nil*	Weather cold in the mornings; dry and clear; the fall of no rain from the middle of October to the middle of January, a period of three months, is quite abnormal in this district; one of the chief industries of this district, that of tea, will, the Collector fears, suffer much thereby; the rice harvest is almost over, and the reapers are now migrating to Arracan to conduct the harvest operations there.
Noakhally ...	*Nil*	Weather fair and seasonable; the reaping of the *amun* crops has not yet been finished; pulses, chillies, linseed, *sesamum*, &c., are progressing fairly; cholera is still prevailing.
Chittagong Hill Tracts...	*Nil*	Weather very cold at night and morning; mustard is in flower; tobacco and chillies are being sown; there is no other crop on the ground.
Hill Tipperah ...	*Nil*	Weather seasonable; no change to report regarding the state and prospects of the crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Backergunge ...	*Nil*	Almost all the great *amun* rice crop has been cut, and the general outturn is good; the district generally is in a prosperous and satisfactory condition, but there is a considerable amount of sickness among the people; this cold weather cholera in a sporadic form has been more than usually prevalent, and there have been many deaths; this disease, though still present in detached localities, has abated.
Furreedpore ...	*Nil*	Weather continues dry and seasonable; rain would do good to the *rabi* crops.
Dacca ...	*Nil*	Weather seasonable; state and prospects of the crops are good.
Mymensing ...	*Nil*	Weather seasonable; crops are all doing well.
Tipperah ...	*Nil*	Weather cool and seasonable; there is nothing special to report; the reaping of the *amun* or the late rice crop is nearly brought to a close, and the outturn will, it is believed, be about twelve annas on the whole; the winter crops are in fair condition, but rain is much wanted; cholera is abating.
24-Pergunnahs ..	*Nil*	Weather seasonable; harvest of *amun* or late rice is well advanced; cold weather crops would be benefited by a little rain; cholera has abated in some of the thanas, but elsewhere it shows no symptoms of decrease; fever has not disappeared from Barripore and Baraset.
Jessore ...	*Nil*	Weather cold; wind was westerly in the early part of the week, it was easterly during the last two days; no sign of rain; harvesting of the late paddy crop is nearly finished; there is no change in the condition of the crops.
Nuddea ...	*Nil*	Weather cold at night; crops are generally rather poor, but on the whole not much below the average.
Moorshedabad ...	*Nil*	Weather very cold; the late sown crops of barley, wheat, gram and linseed are suffering much from want of rain; the early sown crops are comparatively better and forward; *teel* and mustard are being cut at some places.
Pubna ...	*Nil*	Weather seasonable; the state and prospects of the crops are fair; rain would do much good; cholera is abating in the sudder subdivision.
Rajshahye ...	*Nil*	Weather clear and cold; no appearance of change; the cold weather crops are still doing well; rain is however much wanted for the wheat, barley and different kinds of *dall* or pulse, which without rain will give less than average outturns; the public health is generally good; fever is reported in one or two quarters only.
Bogra ...	*Nil*	Weather fair; state and prospects of the crops are good.
Maldah ...	*Nil*	Weather cold and sometimes cloudy; the *rabi* crops have suffered from want of rain; the state of the other crops continues as before; the *kalai* pulse is good and the winter rice crops are fair; indigo is thriving; 4 deaths from cholera in thana Gorgoriba, and 5 from fever in thana Maldah, have occurred during the week.
Dinagepore ...	*Nil*	Weather very cold; the rice crop has been nearly cut and gathered; the winter crops have somewhat suffered from want of rain; only 1 death from cholera reported this week.
Rungpore ...	*Nil*	Weather seasonable; winter crops are doing well; rain is wanted.
Cooch Behar ...	*Nil*	Weather cold; mornings foggy; no change in the prospects of the winter crops since the last report, *i.e.*, the winter crops are promising; harvest is almost reaped; rain is wanted for the tobacco crop.
Jalpaiguri ...	Return not received.	Weather cold and seasonable; *haimanti* reaping is nearly finished; the crop has been a fair average one; the *sursoh* (mustard) crop is fair, but it is not as good as usual; other cold weather crops likewise are not as good as usual owing to the very dry season.
Darjeeling ...	*Nil*	Weather very cold and cloudy, threatening snow; no change since last report, but rain much wanted for the young crops of barley and wheat.
Midnapore ...	*Nil*	Weather fine and seasonable; state and prospects of the crops are fair; the cold weather crops will scarcely be above the average; the mulberry now coming on is somewhat more promising; small-pox is prevalent in the south-east of the district.
Howrah ...	*Nil*	Weather fine; the paddy crops are off the ground; the cold weather crops of this district are of course insignificant in amount, but they are doing well.
Hooghly ...	Return not received.	Weather very cold; *sowings*—nothing is reported to be going on as yet; *cultivation*—potatoes in some places are being banked up, and irrigation is industriously pursued, and in others they are being dug up; the harvest is a fair one; rain is wanted, but heavy dews preserve the moisture; *harvest*—the late paddy crop has been gathered, and the yield is thirteen annas; sugarcane cutting has begun, and the result is below the average in most places for want of rain, but it is good elsewhere; *biri* (or *kalai* pulse) is gathered, and the outturn is very fair; vegetables going on well.
Burdwan ...	*Nil*	Winter crops and sugarcane are doing well; cholera is prevalent in Culna and Jehanabad.
Bancoorah ...	*Nil*	Weather seasonably cold, wind from north; the winter rice crop is a good average one throughout the district; the spring crops are all doing well; health of the district is good.
Beerbhoom ...	*Nil*	Weather seasonable; winter crops are in good condition.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Sonthal Pergunnahs ...	*Nil*	Weather cold; occasional breezes from the north-west; the winter rice crop is all in with scarcely an exception; *kurti* and *kalai* pulse are being cut in the east with a ten-anna outturn; mustard is ready for cutting, and is about a six-anna crop.
Bhagalpur ...	*Nil*	Rain is required for the *rabi* crops; rice is nowhere dearer than 20 seers, and *murwah* is much cheaper. The condition of the people is reported to be good.
Monghyr ...	Return not received.	Weather fair; the paddy crops are all cut, and the prospects of the *rabi* continue favourable.
Purneah ...	Return not received.	Weather very cold; cloudless skies during the day; state and prospects of the crops in this district remain unchanged, *i. e.*, the *aghani* rice has been reaped, and the outturn is quite up to expectations; the *rabi* crop is still in want of rain.
Durbhangah ...	*Nil*	Weather fair and cool; reaping of paddy crop is almost completed; prices are falling; the late rain has done some good to the *rabi* crops; lands are being prepared for *moong* and *cheena;* importation from other districts are going on freely.
Mozufferpore ...	Return not received.	Weather very cold and clear; there is no material change in the prospects of the crops; heavy dews at night are very beneficial for *rabi*; public health is good.
Sarun ...	*Nil.*	Weather cold and seasonable; sky clear, both east and west wind; the outturn of the *aghani* rice in the different thanas has been reported as follows:—

Sudder Sub-division.

1. Chupra	...	6 Annas.
2. Bassantpore	...	10 „
3. Mushrak	...	8 „
4. Manjhee	...	8 „
5. Dighwara	...	4 „
6. Parsa	...	8 „

Sewan Sub-division.

1. Sewan	...	8 Annas.
2. Durowli	...	8 „
3. Buragaon	...	8 „
4. Baraulli	...	7 „

			Average for the sudder sub-division 7·3, average for the Sewan sub-division 7·7, or average for the district 7½ annas; the prospects of the cold weather crops are generally favourable; early peas are being harvested; wheat and barley are in ear; *rahur* pulse is doing well; poppy is everywhere forward; indigo fields are still being prepared for the next year's crop; prices stationary, with the exception of wheat, barley and gram, which have fallen; general health is good.
Chumparun ...	*Nil*	Weather nice and cool; the sky is now and then overcast; there is nothing new to report regarding the state of the crops; *rabi* and poppy crops are growing well.
Patna ...	Return not received.	Weather cold and clear; prospects of the crops remain unchanged, *i. e.*, the rice crop is now being reaped, and the Collector does not think, on the whole, it will be a bad one; no rain, but heavy dews, which would seem to be sufficient moisture for the spring crops, as they look remarkably well; health of the district is good.
Gya ...	*Nil*	Weather clear, with cold west wind; the prospects of the *rabi* crops are generally satisfactory; public health is good.
Shahabad ...	Return not received.	Weather bright and very cold; prospects of the *rabi* crops on the whole are good; a few cases of small-pox reported in the Sasseram sub-division.
Hazaribagh ...	*Nil*	Weather clear and cold; the clouds mentioned in the last report have disappeared; owing to the want of rain the *rabi* is being burnt up; it is doubtful, unless we have rain (of which there is at present no appearance), whether a six-anna crop will be saved.
Lohardugga ...	*Nil*	Weather colder than last week; no rain yet; the prospects of the crops are very good all over the district, but rain is greatly needed.
Manbhoom ...	*Nil*	There has been no change in the weather; it is still extremely dry, and the dews slight, but the crops promise well.
Singhbhoom ...	*Nil*	Weather seasonable; no unfavourable reports about the *rabi*; the district is healthy.
Balasore ...	Return not received.	Weather fine; sky has cleared again; ryots are busy in threshing out their crop of rice; cholera is continuing in the south of the district.
Cuttack ...	*Nil*	Crops are doing well; public health is improving.
Pooree ...	*Nil*	The harvesting of the main rice crop is nearly completed; the outturn is good; sugarcane is being cut; some pulses are being gathered, others are progressing, but they require a little rain; the plantation of the summer paddy crop, *dalna*, has begun.
		General Remarks.—No rainfall is reported from any of the districts for the week under review. The rice harvest is almost completed. The prospects of the spring crops generally continue favourable, but they would be benefited by more rain.
N. W. Provinces—		
Benares (Jan. 19th)	...	Weather the same; a few drops of rain fell this morning; prospects good.
Allahabad „	...	No change; clouds gathered but cleared off.
Jhansi (20th)	...	Signs of rain; other prospects unchanged.
Agra (19th)	...	Prospects favourable; two tehsildars report injury to *arhar* by frost.
Meerut „	*Nil*	Prospects as before.
Bareilly „	...	Rain is much wanted.
Almora (17th)	...	Rain fell last night, which is very useful, and it is still cloudy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—		
Delhi (Jan. 20th)	...	Rain wanted; crops doing well; health good.
Hissar „	...	Ditto ditto.
Umballa „	*Nil*	Crops and health good.
Jullundur „	·1	*Rabi* fair; health good.
Lahore „	Slight shower on the 16th.	Crops and health good.
Mooltan „	*Nil*	*Rabi* promising; health good.
Dera Ismail Khan „	·25	Health and crops good.
Rawalpindi „	2·50	*Rabi* favourable; health good.
Peshâwar „	1·7	Crops favourable; slight fever prevalent.
		General Remarks.—Public health good; harvest prospects favourable.
Oudh—		
Lucknow (Jan. 19th)	*Nil*	Prospects continue generally favourable, and public health good rain would do good.
Sitapur „	„	
Fyzabad „	„	
Central Provinces—		
Sambalpur (Jan. 15th)	...	Weather clear; harvest over; fever prevalent.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Chanda ...	...	Weather clear; prospects unchanged; health good.
Chhindwara (16th)	...	Prospects unchanged; health good; prices risen.
Betul (17th)	...	*Rabi* good; health good; prices stationary.
Balaghât ...	...	Weather clear; threshing of rice completed; health good; prices stationary.
Nagpur (19th)	...	*Rabi* favourable; health good; prices stationary.
Wardha ...	...	Weather clear; prospects of *rabi* favourable.
Nimar ...	...	Weather warm and sultry; cotton picking completed; prices stationary.
Hoshangabad ...	...	Weather cloudy; *rabi* fair.
Narsinghpur ...	...	*Rabi* most promising.
Saugor ...	...	Weather cool; *rabi* favourable; health good; prices unchanged.
Jubbulpore ...	...	Weather cloudy; *rabi* good; small-pox continues.
Seoni ...	...	*Rabi* promising; health good; prices falling.
Mandla } (20th)	...	Prospects and health good; prices stationary.
Damoh }		
		General Remarks—The general health of the province is good, and prospects of a plentiful harvest are unchanged.
British Burma—		
Arakan Divn. (Jan. 19th)	...	Public health good; crops being reaped.
Pegu Division.		
Rangoon (Jan. 19th)	...	Cholera and fever prevalent in Hline and Pegu; slight cattle disease.
Bassein „	...	Health and crops good; cholera disappeared.
Henzada „	...	Health good, except at Myanoung where cholera prevails; harvest progressing.
Prome „	...	Small pox at Shweedoung; cholera at Prome.
Thayetmyo „	...	Slight cholera.
Atoondoung „	...	General health good.
Thonkwa „	...	Health and crops good; slight cattle disease.
Tenasserim Division ...	...	Public health good, except at Shwegyeen where choleraic diarrhœa prevails; crops being reaped.
Assam—		
Gauhati (Jan. 20th)	*Nil*	Mornings raw and misty, days clear and cool; *salee* dhan almost reaped; tea and other crops doing well; public health good.
Sylhet „	...	No change since last report.
Hyderabad Assigned Districts—		
Umraoti (Jan. 20th)	...	*Rabi* in good condition.
Mysore and Coorg—(Jan. 20th)	... *Nil*	Prospects of season continue unsatisfactory; public health on the whole good; cholera fast disappearing.
Rajputana—		
Serohi (Jan. 10th)	...	Same as last report.
Meywar (14th)	...	Prospects and health good.
Marwar (8th)	...	Prospects favourable; weather cloudy; health fair.
Harowtee ...	...	Health and prospects good.
Ajmere (20th)	*Nil*	Health and prospects good.
Jeypore „	...	No change; prospects and health good.
Central India—		
Indore (Jan. 19th)	...	Health and agricultural prospects good.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...

f In the interior prices range as follow:—Wheat 21 seers, rice best sort 27 seers, rice common 29 seers, and gram 24 seers, per rupee.
g In the interior prices range as follow:—Wheat 33-12 seers, rice best sort 13-8 seers, rice common 22-8 seers, and gram 26-4 seers, per rupee.
h In the interior prices range as follow:—Wheat 30 to 31 seers, rice best sort 11-6 to 15 seers, rice common 22 to 23-11 seers, and gram 10 to 15 seers, per rupee.
i In the interior prices range as follow:—Wheat 26 seers, rice best sort 11 seers, rice common 23-8 seers, and gram 20 seers, per rupee.
j In the interior prices range as follow:—Wheat 6-8 to 10 seers, rice best sort 5-4 to 14 seers, rice common 12 to 20 seers, maize 20 to 40 seers, and gram 10 to 13-5 seers, per rupee.
k In the interior prices range as follow:—Rice best sort 16 to 19 seers, and rice common 18 to 22 seers, per rupee.
l In the interior prices range as follow:—Rice common 20 to 25-8 seers, and gram 16 seers, per rupee.
m In the interior prices range as follow:—Rice best sort 16 to 18-2 seers, rice common 18 to 20 seers, bulrush millet 30 to 40 seers, and gram 12 to 14 seers, per rupee.
n In the interior prices range as follow:—Wheat 13 to 26 seers, rice best sort 12 to 20 seers, rice common 17-9 to 28 seers, and gram 12 to 16 seers, per rupee.
o In the interior prices range as follow:—Rice best sort 15 to 18 seers, rice common 16 to 23 seers, per rupee.
p In the interior prices range as follow:—Rice best sort 18 to 20 seers, rice common 18 to 21 seers, per rupee.
q In the interior prices range as follow:—Rice best sort 16 to 18-8 seers, rice common 18 to 20-8 seers, and gram 16 seers, per rupee.
r In the interior prices range as follow:—Wheat 24 to 26-8 seers, barley 37-8 to 45 seers, rice best sort 12-12 seers, rice common 25 to 29 seers, lesser millet 42-8 to 45 seers, maize 3 to 37-8 seers, and gram 27 to 35 seers per rupee.
s In the interior prices range as follow:—Wheat 23 seers, barley 33 seers, rice best sort 11 seers, rice common 24 seers, bulrush millet 30 seers, great millet 31 seers, maize 30 seers, and gram 33 seers, per rupee.
t In the interior prices range as follow:—Wheat 20 to 27 seers, barley 30 to 40 seers, rice best sort 12-12 to 18 seers, rice common 20 to 25 seers, lesser millets 24 to 45 seers, maize 34 to 45 seers, and gram 23 to 27 seers, per rupee.
u In the interior prices range as follow:—Wheat 30 seers, barley 22-8 seers, rice best sort 15 to 18 seers, rice common 16 to 20 seers, lesser millet 30 to 32 seers, and gram 16 to 20 seers, per rupee.
v In the interior prices range as follow:—Wheat 20 to 22 seers, rice best sort 20 seers, rice common 21 to 23 seers, and gram 22 to 26 seers, per rupee.
w In the interior prices range as follow:—Wheat 18 to 20 seers, rice best sort 13 to 26-8 seers, rice common 20 to 33 seers, bulrush millet 40 seers, maize 40 to 55 seers, and gram 16 to 30 seers, per rupee.
x In the interior prices range as follow:—Wheat 22 to 25 seers, barley 30 to 60 seers, rice best sort 15 seers, rice common 26 to 28-4 seers, lesser millet 48 to 50 seers, maize 35 to 40 seers, and gram 22 to 30 seers, per rupee.
y In the interior prices range as follow:—Wheat 17-8 to 19 seers, barley 16 seers, rice best sort 24 to 27 seers, rice common 29 to 32 seers, bulrush millet 40 seers, maize 40 seers, and gram 16 to 19 seers, per rupee.

Prices Current of Food-grains throughout India for the 2nd half of December 1875 —continued.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 18th January 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.

BURMA LAND REVENUE BILL.

The Hon'ble MR. EDEN moved that the Report of the Select Committee on the Bill to declare the law relating to interests in land and to regulate the assessment and collection of land-revenue, capitation-tax and other taxes in British Burma be taken into consideration. In February last, he had obtained leave to introduce this Bill. At that time he had explained that its object was not to alter in any way the system of revenue administration in Burma, nor to impose new taxes or alter or interfere with the position of landholders and the interests they held in land. But the object was to bring within the scope of one law all matters connected with the revenue administration which had theretofore been managed by rules prescribed from time to time by the local administration. Those rules had been changed frequently to meet the growing requirements of the province; they had become confused and indistinct, and some of them had become obsolete. Under these circumstances, the Government of India four years ago ordered that the whole subject should be taken into consideration, and a draft Bill prepared for regulating these matters by law instead of by rules. A Committee was appointed composed of officers of great local and revenue experience, and by them a draft Bill was prepared. During the discussions which arose out of their enquiry, a number of questions cropped up connected with various interests in the land which the people possessed, and these were ultimately referred home to the Secretary of State by the Government of India. In due course the Secretary of State affirmed the views of the local administration and the Government of India. The Bill was revised by a Select Committee of this Council and was returned to Burma with a request that the Chief Commissioner would, after consulting the local officers on the subject, send in a further report. This had now been done, and we had received the report of the Chief Commissioner, with the opinions of the officers who had been consulted. The report was carefully considered by the Select Committee, who had adopted nearly all the alterations recommended by the Chief Commissioner and the Judicial Commissioner. The Bill as it now stood would, he thought, entirely meet the views of the local administration.

The second Part of the Bill contained the law relating to the rights over land which were based partly upon custom and partly on the old Buddhist law as adopted by Sir Arthur Phayre; they were of a very simple nature, and were declared in sections 7 to 9, by which it would be seen that any person who occupied land for twelve years continuously acquired the status of a landholder, and such occupation gave him a heritable and transferable right of use and occupancy in the land. There was one class of interests in land peculiar to Burma, and which was dealt with in sections 9 to 14. Under the existing practice, which this Bill proposed to confirm, any person who once acquired the status of a landholder might retain his interest in the land even if he left it and disappeared for twelve years. In practice, constant disputes and much misunderstanding were caused by persons leaving their land without giving any sign of their intention to return, and then coming back after a number of years and claiming to be put in possession, the land having in the meantime passed into the possession of others, who probably had never heard of the claimant as an occupier. To remedy this state of things, the Bill contained new provisions under which, when any person desired to leave his land with an intention to return, he could do so by giving notice to the revenue officer and registering his intention. Having done so, he could come back within twelve years and claim to be put in possession, certain precautions being taken with regard to the interests of temporary tenants; failing this notice, he lost his lien in the land. As the proposed change in the law might cause some inconvenience, three years' time was allowed to persons who were now absent from their lands to come in and claim to be put in possession of the land which they had so left vacant.

Section 15 was a section which would confer great benefit on the holders of land. At present there was no system under which a person could obtain a legal document showing his right to the land. Everything was now settled by the tax-collector's roll showing the occupation for the year. Under this section twelve years' occupancy would admit a person to the right of registry as a landholder.

By the 17th section, the Select Committee had arranged that all questions concerning the status of landholders should be decided by the revenue officials, and where a question of landholder's right to land was brought before a civil Court, it was directed to refer it to the revenue officers to decide whether a claimant had acquired the status of a landholder or not.

The third Part of the Bill related to the assessment and collection of revenue and taxes. MR. EDEN must explain that none of these taxes were new, and that they were all in force under the existing rules. The capitation-tax, the land-revenue, and the five per cent. cess were all now in force at the rates laid down in this Bill. There was nothing in the proposed law which in any way increased taxation.

The last Part of the Bill related to the collection of taxes and the recovery of rent, which had been arranged for by as simple a process as possible. When the assessment fell due, a notice was served on the defaulter, giving him ten days' time to appear and answer, and if he failed to do so, he was treated as a defaulter, and a proceeding was instituted before the Revenue Court for the recovery of the rent or tax. In the section which related to the recovery of rent from the land itself, the right of every landholder who had acquired a status by twelve years' occupancy had been carefully guarded; so that if he became a defaulter and the land was taken possession of by the Government, his right would be put up to auction, and any excess obtained beyond the debt due by him would be paid over to him. MR. EDEN did not think that there were any other parts of the Bill calling for special notice. In fact the Bill was really based on the system as it now existed.

The Motion was put and agreed to.

The Hon'ble MR. EDEN also moved that the Bill as amended be passed.

The Motion was put and agreed to.

NATIVE PASSENGER SHIPS' BILL.

The Hon'ble MR. HOBHOUSE presented the Final Report of the Select Committee on the Bill to consolidate and amend the law relating to Native Passenger Ships and Coasting Steamers.

BURMA LABOUR CONTRACT BILL.

The Hon'ble MR. HOBHOUSE also presented the Final Report of the Select Committee on the Bill to regulate the transport of Native labourers to British Burma, and their employment therein.

CHUTIA NÁGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR moved for leave to introduce a Bill to relieve from incumbrances certain estates in Chutia Nágpur. He said that when last year we were examining into the general condition of affairs in this rather important province on the frontiers of Bengal, we found a number of large landholders, virtually in the position of Native Chiefs, much in the same sort of position as taluqdárs in other parts of India. In Chutia Nágpur and elsewhere, we found that these Chiefs were falling into a serious state of indebtedness, which condition occasionally brought them into civil litigation, and ultimately placed them in the danger of having their estates sold for default. The mischief of such a state of things in a hilly country was obvious. The political effect was bad, of such important Chiefs, with a good deal of territorial authority, falling into debt, and disputes were likely to arise between the new proprietor who might have purchased the property and the tenantry who were too rude and uncivilized to understand the merits and utility of the transfer of land, and on the whole the political and social consequence of such sales taking place were much to be deprecated. In the earlier days, before 1859, the local authorities used to prevent such disadvantages in a summary manner; that was to say, when a Chief was approaching a state of bankruptcy, the local officers used to take up his affairs, including the management of the estate. They would stop all action of the ordinary Courts, have a schedule prepared of the debts after ascertaining their amount, arrange for their gradual liquidation, and prevent the Chief from incurring fresh debts, intermediately providing a respectable amount for his maintenance. But after 1859, this simple procedure became no longer lawful. In that year, the Civil Procedure Code was passed, and it had not since been possible to effect such arrangements. The local authorities from time to time endeavoured, in an indirect way and by the exercise of their influence, to prevent these Chiefs getting into debt, and did as much as they could in that way. But it was quite clear that in these days, when the reign of law became stricter and stricter, it was no longer possible for the local authorities to interfere unless they were armed with legal powers. That being the case, it became desirable to consider whether such a state of things could not be properly remedied. The case of Oudh, which was almost similar, seemed to furnish a proper precedent. By Act XXIV of 1870, an exactly similar process was established in Oudh for the relief of encumbered estates of the taluqdárs of that province, and he believed that its principle was held to be conducive to the welfare of the landed aristocracy of that province, the Bengal Government was desirous of having a similar law for the Chiefs of Chutia Nágpur. So, if His Lordship and the Council would permit him, HIS HONOUR would introduce a Bill for Chutia Nágpur, framed exactly on the model of the Act passed for Oudh.

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 25th January 1876.

CALCUTTA,
The 18th January 1876.

WHITLEY STOKES,
Secretary to the Govt. of India,

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 25th January 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *Presiding.*
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble J. R. Bullen Smith, C. S. I.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, C. B., K. C. S. I.
The Hon'ble Ashley Eden, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the motion that the Final Report of the Select Committee on the Bill to consolidate and amend the law relating to Native Passenger Ships and Coasting Steamers be taken into consideration.

Leave was granted.

BURMA LABOUR CONTRACT BILL.

The Hon'ble MR. HOBHOUSE moved that the final Report of the Select Committee on the Bill to regulate the transport of Native labourers to British Burma and their employment therein be taken into consideration. This was a matter upon which he need not detain the Council any length of time, because the alterations made in the original Bill were fully explained by him to the Council on presenting the first Report of the Committee, and there had been exceedingly little alteration since. The Bill was introduced so long ago as the month of August 1873, and he had before explained to the Council why it was not proceeded with. The reason, stated shortly again, was this, that when the Bill was introduced, there was no regular system of emigration into Burma. It had not been before the Council very long when the Bengal famine came, and with the famine a system of emigration to Burma was set up. The consequence was, that the Government of British Burma, which was then presided over by his hon'ble friend Mr. Eden, desired the Council to hold their hands in order that we might get experience of the actual working of emigration to Burma. Well, now that experience had been gained and the system so set up for emigration had proved satisfactory to the Government of British Burma, and the result was a considerable alteration of the basis on which the original Bill was framed. The basis of the original Bill proceeded entirely upon a private contract between the labourer and the employer. The basis of the present Bill was a contract between the labourer and the Government, or, to put it more technically, between the labourer and the Secretary of State in Council, who, for all purposes

of contract and purchase, represented the Indian public. MR. HOBHOUSE had before explained to the Council the effect and extent of that alteration, and showed that it led to a considerable change in the details of the Bill. Well, that alteration was made in July last. The Report of the Select Committee was published, and they had since received comments on the new Bill. The result was a very general agreement that the Bill was calculated to effect the objects desired by the Government. The only alteration of any importance that had been made since the publication in July last was this, that the Committee had again reverted to the system of private contracts so far as to admit the possibility of a labourer proceeding from India to Burma in order to serve a particular employer. The Bill still provided that the contract should be with the Secretary of State, but instead of being a contract to serve wherever the Chief Commissioner should direct, it was a contract to serve a particular employer in a particular place, and a provision was inserted whereby an employer who received the services of that labourer should be bound to repay to the Government all the expenses which the Government had incurred in importing the labourer into Burma. These expenses would be provided for, in the first instance, by some special bargain to be made on the assignment of the labourer to his employer. Gradually, as experience accumulated, it would be found what was the proper mode of regulating the transaction with the employer; and the Bill had given the Local Government power to make rules for the purpose of regulating these assignments. There were some other alterations of detail, but they were few and unimportant, and were all mentioned in the Report, and there was nothing else which called for any explanation.

The Hon'ble MR. EDEN, having a special interest in British Burma, thought it but right to say that the Bill, as settled by the Committee, appeared to him in every way adapted to meet the requirements of the Province. It appeared from the correspondence received from the local authorities of Burma, that there was some misapprehension as to the manner in which it was intended to work this Bill. There seemed to be a doubt whether any interference of the State by law would introduce into the country any great amount of labour. The present system of importing labourers, which had been alluded to by the Hon'ble Member, no doubt had been the means of bringing into the country a large increase of labour. But it had failed, partly from the difficulty of procuring good labourers ready to go from this side of India to Burma, and partly from the great cost of recruiting and sending them there. The consequence was that the men arrived in the country with a heavy load of debt, which they found it difficult to pay, and in many cases the amount advanced by the State was not recovered. But his object in now pressing for this Bill was chiefly to enable the Government of Burma to recruit in other fields. The circumstances of the Northern Ports of Madras were entirely different from the labour markets of Bengal. The people of the Northern Districts of Madras had long been in the habit of going to seek labour in Burma, but unfortunately they were exposed to great difficulty, oppression, and mismanagement under the system by which they were now transported and employed. At present they were put on board of Native ships, or it might be coasting steamers, without any contract or without any means of paying for their passage; they remained on board until their services were purchased by Native contractors who came on board, and on their paying the passage-money obtained from them an agreement to serve them for a very long period and on very low terms: and in one way or another these men managed to keep the labourers in their hands and deprive them of the real value of their labour. What he supposed would at once be done under this Bill was that the Chief Commissioner would appoint an Agent in the Northern Madras Ports, who would be in the same position as the Emigration Agent lately employed in Calcutta, and he would see the labourers put on board and arrange for their passage under a proper system; and as soon as they arrived in Burma, the Immigration Agent there would assign their labour and see that the men obtained the full value of their labour in the local market, without the interference of any middlemen. He thought that as soon as that was done there would be an enormous increase

in the number of labourers, and they would get rid of the present system, which was open to very great objection.

The only substantial objection which had been raised to the Bill by the employers of labour was that which had been alluded to by his hon'ble friend Mr. Hobhouse, namely, the power they desired to have of sending their own agents to Madras and elsewhere to recruit labourers for themselves. That objection had now been entirely met, and while we left the present system of free emigration entirely untouched, MR. EDEN thought that the Bill as it now stood would enable the Local Government to introduce into Burma a large amount of labour to the great benefit of the province, and to the great advantage of the overstocked districts of Madras.

His Honour THE LIEUTENANT-GOVERNOR, like the hon'ble member who had just addressed the Council, also had a special interest in this Bill; and he thought it right to express in general terms his entire concurrence in the objects and purport of the Bill. It was desirable that a certain proportion of the surplus labour in Bihár should be deported to the rich and comparatively untouched fields of employment in British Burma; and therefore it was most important that there should be appointed an Agent on behalf of the administration of Burma who should make arrangements in this country with labourers. With respect to emigration to the West Indian Colonies, one difficulty had been felt in that no proper contract could be entered into with the labourers in this country. The want had been felt regarding our colonial experience of the means and machinery whereby a contract could be made with the labourers before leaving Indian shores. No doubt if emigration to Burma was to prosper, the same want would be felt; and he observed with satisfaction that this Bill provided for these two particulars—*first*, that there should be Agents on behalf of the Government of Burma to make arrangements for Bengal labourers; and *secondly*, that the Agents should have power to enter into satisfactory contracts with the men in this country before leaving their homes. With that general observation, HIS HONOUR on behalf of the Bengal interests involved in these particulars begged to express his entire approval of the Bill.

PLEADERS, MUKHTÁRS AND REVENUE AGENTS' BILL.

The Hon'ble MR. HOBHOUSE also presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to Pleaders, Mukhtárs and Revenue Agents in Northern India. He was not about to make any motion, but as the Bill had assumed now a very shrunken appearance, it was perhaps better to explain to the Council how it came to be in the form in which it was now. The Bill was introduced a very considerable time ago, for the purpose, principally, of establishing a uniform law throughout India on the subject of these practitioners. There was also another object in the Bill, which was to alter the law respecting the remuneration of pleaders and mukhtárs as between themselves and their clients. There had been a great deal of correspondence on the Bill, as the Council would easily see by casting their eye through the margin of the Committee's Report. There would be seen a list of a number of papers, some very voluminous, which had come to the Committee, and the matter had been a considerable time in their hands. The result of the examination of these papers was that there was so much difference between the different parts of India with respect to the mode of conducting legal business, that it was not desirable to attempt a uniform law for the whole of India. All the Local Governments objected to it, and on an examination of their objections, the Committee thought the objections were sound. Again, with respect to remuneration there was an almost universal objection to the change, from pleaders and mukhtárs who were practising all over the country; they pointed out some practical objections to the alterations that were proposed, and they also entered into a considerable amount of evidence to show that the mischiefs which were supposed to result from the present system had no real existence, or were not nearly so great as was supposed. Well, the present system of remuneration, which left perfect freedom of contract between pleader and client, had

been affirmed by this Council in 1865, and had since been affirmed by the Executive Government, who had extended the Act of 1865 to other provinces of India, besides that of Bengal, for which it was passed. And on consideration of what was said on this subject, the Committee thought that there was not sufficient evidence to show them a clear way to alter the substantive principle which had been so recently affirmed by the Council. In fact it was better to let matters go on working as they were, and to leave it to our successors, if need be, to make any alterations. Well, when these two objects were abandoned, it was found that the great body of the Bill had better be abandoned too; for though some slight consolidation of the law might be effected, yet it was so exceedingly small that it was not sufficient to warrant our passing the Bill. The consequence was that the whole Bill would have been dropped but for one local object effected by it, and that was the object which was aimed at by the single section which it was proposed to retain. It affected a class of practitioners in Bengal alone, who were called "Revenue Agents." They were agents qualified to practise in the Revenue Courts; they were admitted on a certain amount of examination and on certificate, and had a recognized position in those Courts. One considerable department of practice in those Courts used to be what were called 'rent suits,' suits between landlords and tenants, and Revenue Agents conducted the practice in those suits at the time when the Act of 1865 was passed and for some years afterwards. They had thereby acquired considerable knowledge of the matter and had conducted their business, we were told, with satisfaction to their clients and the general benefit of the public. Well, an alteration of the law was made by a Bengal Act with respect to these rent suits, and instead of being instituted in the Revenue Courts, they were turned over to the Civil Courts. Now Revenue Agents had no right to practise in the Civil Courts, and the consequence of the shifting of rent suits from the Revenue Courts to the Civil Courts was this, that the Revenue Agents found themselves deprived of a kind of practice which they had before, and their clients—landlords and tenants—found themselves deprived of the services of men whom they, as we were told, had learned to value, and whose services they still desired to employ. The Government of Bengal, then represented by Sir George Campbell, applied for an alteration of the law to enable the Revenue Agents to practise in the Civil Courts, only in *rent* suits, not further than that, and a clause was put in the original Bill for that purpose. His hon'ble friend Sir Richard Temple took the same view; namely, that the alteration should be made, and the Bill would now just carry out that wish of the Government of Bengal; a wish which seemed exceedingly reasonable, whether we considered the interests of these Revenue Agents or their clients. The Committee had therefore retained that one section of the Bill and proposed to pass it in that form. At the next meeting of the Council, he hoped to move that the Report of the Select Committee be taken into consideration and the Bill passed.

His Honour THE LIEUTENANT-GOVERNOR had only to express, on behalf of the Government of Bengal, his obligations to the hon'ble mover of the Bill, and also to express the satisfaction with which he had listened to his hon'ble friend's explanation of the merits of the case. This Bill would open out to a very important and influential body of law practitioners in Bengal a particular field of employment which they were peculiarly qualified to occupy, both as regards the great landed interest in Bengal and also the interests of the ryots, and HIS HONOUR had no doubt they would discharge their functions to the satisfaction of the public. He said they were qualified, because they were subject to as strict a system of examination in these matters under the Board of Revenue as could be desired. He had no doubt that this Bill, if passed into law, would add, he would not say to their influence, because they possessed that already, but to their status, emoluments and respectability. The Council were aware that it was very important that a body of practitioners, who possessed so much influence and had a large practice in one particular class of business, should be legally allowed to practise in this other remunerative work, as this would add to their status and general trustworthiness.

CHUTIA NAGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR introduced the Bill to relieve from incumbrances certain estates in Chutia Nágpur, and moved that it be referred to a Select Committee with instructions to report in a month. He said that it would be in the recollection of the Council that at the last meeting he stated the objects and reasons for introducing this Bill, and he had only now to add that the draft Bill now on the table had been framed strictly on the model of the Bill passed into law some years ago for Oudh. Since the last meeting, he had learned incidentally that the effect of the Act in Oudh had not been quite so satisfactory in all respects as he had supposed when he addressed the Council. But still he was sanguine that the principle of the Act, and consequently the principle of this Bill, which was framed upon the model of that Act, was really sound and workable. If there had been any defects in the practical working of the Act in Oudh, he supposed they must have arisen from local circumstances. And if the experience of Oudh should be available to us in the Select Committee, he had no doubt that they should be able to make various improvements in detail. But still he was confident that the Act as it stood and this Bill were sound and good in the main; and if there were any improvements which could be made in the details, they could be effected in Committee. He had no doubt that one or two Hon'ble Members on his right, who had special experience in the working of the Act in Oudh, would consent to serve on the Committee, and give the Committee the benefit of their experience. With these remarks, he had now to introduce the Bill and to move that it be referred to a Select Committee with instructions to report in one month.

His Excellency THE PRESIDENT thought that it would be a great advantage, as suggested by His Honour the Lieutenant-Governor, that the deliberations of the Council upon this Bill should be assisted by the appointment of Mr. Inglis to the Select Committee, because, when he acted with so much advantage to the public service as Chief Commissioner of Oudh, he paid great attention to the working of the Oudh Taluqdárs' Act, which in some respects had not been altogether satisfactory, and therefore his presence on the Committee would enable him to make valuable suggestions with respect to this measure.

The Motion was put and agreed to.

His Honour THE LIEUTENANT-GOVERNOR then moved that the Bill be published in English in the *Gazette of India* and in the *Calcutta Gazette* in such languages as the Lieutenant-Governor of Bengal shall direct.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to relieve from incumbrances certain estates in Chutia Nágpur.
—The Hon'ble Messrs. Hobhouse, Inglis and Hope and the Mover.

The Council then adjourned to Tuesday, the 8th February 1876.

CALCUTTA,
The 25th January 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27th JANUARY 1876.

General Remarks.—No rain is reported to have fallen anywhere during the week. There is no improvement in the prospects of the season in Madras or Mysore. In Bombay the condition of the crops continues fair. From the Central Provinces, Berar, Central India and Rajputana prospects are reported good. In Bengal there is no change: the *rabi* crops continue to do well, though rain is wanted; the late rice harvest is almost over. In the North-Western Provinces and Oudh rain is said to be required. In the Punjab prospects are fair, but more rain would be beneficial. Reports are good from Burmah and Assam.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Jan. 27th)	*Nil*	One foot 4 inches water over anicut; standing crops good; castor suffering from grub; markets well supplied locally; prices generally steady; cholera 76 seizures, 36 deaths in three taluks; fever and small-pox continue; epizootic aphtha and dysentery here and there; pasture withering.
Tanjore „	*Nil*	Rivers almost dry; water in tanks scanty; water over anicuts none; cultivation a few dry crops in places; standing crops not thriving in localities for want of rain; harvest few wet crops; yield fair; markets well supplied; prices almost steady; small-pox in Negapatam; cholera increased, 309 seizures, 234 deaths; cattle disease in some parts, some loss; pasture generally sufficient.
Malabar „	*Nil*	Harvesting second crops begun; markets well supplied; prices steady; bowel complaints in 7 taluks, 465 seizures, 348 deaths; small-pox prevalent; fever and cattle disease slight; pasture scanty.
Trichinopoly ...	...	Not received.
Kurnool (26th)	*Nil*	Season generally favourable; paddy harvested; other crops thriving; markets well supplied; prices steady; fever prevalent; cattle healthy, except in Pattikonda, Ramalkota and Nandial. *General Remarks.*—No improvement and can be none till rain falls.
Bombay— (Jan. 27th)		
Sind. (Jan. 26th)		
Kurrachee ...	4·30 in Sehwan on 15th.	Rain general on 14th and 15th.
Hyderabad ...	...	Weather unseasonably warm; public health good; *rabi* well.
Upper Sind Frontier ...	...	Weather mild; prospects fair; fever decreasing.
Guzerat.		
Ahmedabad ...	...	No change.
Surat ...	...	
Kaira ...	...	State of crops the same as before.
Broach ...	...	Cotton being picked; cattle disease prevailing in Wágra taluka.
Khandesh and Nasik.		
Khandesh ...	...	*Rabi* crops as before; estimated yield of *kharif* already harvested is about 12 annas; fever prevailing.
Nasik ...	...	*Rabi* crops middling; fever prevalent.
Konkan.		
Tanna ...	...	*Rabi* thriving; prospects fair; small-pox largely prevails at Tanna.
Deccan.		
Poona ...	...	Standing *rabi* crops have in some places suffered for want of moisture; in others they are generally well.
Ahmednagar ...	...	*Rabi* harvest commenced in three talukas.
Sholapur ...	...	No change.
Satara ...	...	
Southern Mahratta Country.		
Belgaum ...	...	No change.
Dharwar ...	...	
Kanara ...	...	Cultivation satisfactory; 9 deaths from cholera.
Kaladgi ...	...	*Rabi* crops indifferent; reaping progressing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar.		
Rájkot ...	...	No change; cholera about Morvi continues.
Wadhwán ...	...	Weather cool; crops and public health good.
		General Remarks.—Heavy fall of rain in Kurrachee and Sehwan; cholera at Morvi; elsewhere nearly disappeared; fever in Sind, Khandesh and Nasik; crops generally fair.
Bengal—(Jan. 27th)		
Chittagong ...	*Nil*	Weather dry, cool and seasonable; rain is required; small-pox is very prevalent, and inoculation is being resorted to on a large scale; cholera continues prevalent.
Noakhally ...	*Nil*	Weather fair and seasonable; the reaping of the *amun* rice has been finished; pulses, chillies, linseed, *sesamum*, &c., are progressing fairly; cholera is still prevailing in certain parts of the district.
Chittagong Hill Tracts...	*Nil*	Weather very cold at night and morning; heavy fogs up to 9 A. M.; chillies and tobacco plants are suffering from want of rain; mustard is in flower; the crops on the ground are likely to be below the average owing to want of rain.
Hill Tipperah ...	*Nil*	Weather seasonable and no rain; nothing particular to report regarding the state and prospects of the crops; the late rice crop is still being reaped here and there; cholera prevails in the Udeypore sub-division.
Backergunge ...	*Nil*	Generally speaking all is well.
Furreedpore ...	*Nil*	Weather continues seasonable; rain would do good to the *rabi* crops; the health of the district is fair.
Dacca ...	*Nil*	Weather cloudy for the last two mornings; state and prospects of the crops are fair.
Mymensing ...	*Nil*	Weather cold, with foggy mornings; *moongh* and *maskalai* pulses have been harvested, the outturn being a fair average one.
Tipperah ...	*Nil*	Weather seasonable; state and prospects of the crops are fair; cold weather crops are being got in.
24-Pergunnahs ...	*Nil*	Weather seasonable; harvesting of *amun* is nearly brought to a close; winter crops look well; rain is wanted; cholera is prevailing at Diamond Harbour and Satkherah; fever is abating at Baraset.
Jessore ...	*Nil*	Weather is much warmer than last week; harvesting of late rice not yet quite finished; notwithstanding the want of rain, the prospects of winter crops are reported fair.
Nuddea ...	*Nil*	Weather is unusually warm, but no rain; the cold weather crops require rain, and in places the yield is poor.
Moorshedabad ...	*Nil*	Weather seasonable; the state of the crops is the same as reported last week; rain is still wanted; indigo is thriving; sugarcane is in a fair state; a few cases of cholera reported from Bhorutpore station.
Pubna ...	*Nil*	Weather clear and fine; the state and prospects of the crops are fair; rain would do much good; cholera is abating in the Sudder sub-division.
Rajshahye ...	*Nil*	The weather is warm for the season, and continues to be quite clear; the cold weather crops are in need of rain, but are otherwise doing well at present; the public health is everywhere good.
Bogra ...	*Nil*	Weather fair; *amun* or the late rice crop is almost entirely cut, and a fair average yield is expected; other crops promise well.
Maldah ...	*Nil*	Weather cool; state and prospects of the crops are favourable; rain is however required for the *rabi* crops; *boro* shootings are being transplanted and irrigated; indigo is doing well; 10 deaths are reported from fever during the week; no deaths from cholera have been reported during the same period.
Dinagepore ...	Return not received.	Weather not so cold as the last week; west wind has commenced to blow; nothing new to add about the state and prospects of the crops; the rice crop has been nearly cut and gathered; the winter crops have somewhat suffered from want of rain.
Rungpore ...	*Nil*	Weather seasonable; harvesting of *amun* rice is finished; mustard is being cut; other *rabi* crops are in good condition; rain is wanted.
Cooch Behar ...	*Nil*	Weather cold and fair; the want of rain is being much felt; it is feared that if there be no rain within a few days tobacco and other crops will suffer.
Jalpaiguri ...	Return not received.	Weather—nights very cold; no change to report in the prospects of the cold weather crops; no cases of cholera reported.
Darjeeling ...	Return not received.	Weather cold and cloudy, with occasional sunshine; rain is wanted for the barley, wheat, and *phupur* (buck-wheat), which are now on the ground; in the Terai harvesting of the winter rice is nearly completed; there will be about 3 annas only less in the outturn; cholera has been prevalent in the west of the Terai, but has now comparatively stopped.
Midnapore ...	*Nil*	Weather seasonable; prospects of the crops are fair; prices of food are generally very easy, with a further downward tendency; fever seems to be still on the increase.
Howrah ...	*Nil*	Weather is getting warmer; no crops of any importance on the ground.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hooghly ...	Return not received.	Weather seasonable; *sowings*—indigo sowings in some chur lands are just over; the seeds have germinated; *cultivation*—potatoe lands are irrigated where water is available; in places not so circumstanced digging up is going on, tubers being small; vegetable and spring crops are doing well, but one good shower of rain is greatly needed; *harvest*—rice harvest is over; storing is going on well; sugarcane is being cut in places and pressed; *Suckur-kund* or *Lall aloo*, a species of yam, coming into market in good condition and quantity.
Burdwan ...	*Nil*	Winter crops and sugarcane are doing well; cholera is prevalent in Culna and Jehanabad.
Bankoorah ...	*Nil*	Weather seasonable; no change in the state and prospects of the paddy crops; winter crops are doing well; health of the district is good.
Beerbhoom ...	*Nil*	Weather warm; no change in the state and prospects of the crops to report.
Sonthal Pergunnahs ...	*Nil*	Weather very variable in temperature; no rain, but occasional high wind; rice harvest is over; sugarcane cutting is progressing fairly.
Bhagalpur ...	*Nil*	*Rabi* crops are still good; price of rice shows no tendency to rise, and is, if anything, cheaper in parts of Soopool sub-division, between 20 and 30 seers; condition of the people is good; general health of the district is very good.
Monghyr ...	Return not received.*	Weather fair; the prospects of the crops continue fair, but rain would do much good now.
Purneah ...	Return not received.	Weather cold, with west wind; there is no change to be noticed on last week's report, except that the continued want of rain is much felt; the *rabi* crops will not come up to expectations, and pasturage for cattle is drying up; there is not much change in the markets; it is reported that the export of rice down the river Kosi has fallen off considerably.
Durbhangah ...	*Nil*	Weather dry and cold, with strong west wind; no important change in the prospects of crops since the last report, *i. e.*, reaping of the paddy crop is almost completed; prices are falling; the late rain has done some good to the *rabi* crops; lands are being prepared for *moong* and *cheena*.
Mozufferpore ...	Return not received.	Weather very cold; strong west wind; strong west wind in the early part of the week has been unfavourable to the *rabi* crops; wheat and barley are generally poor, and in many places have come into ear prematurely; *rahur* crops continue excellent, and will give a full 16-anna outturn; large quantities of grain are being imported into Seetamurhee from Nepaul and western districts; prices are easy.
Sarun ...	*Nil*	Weather cold and clear; west wind blowing; the prospects of the cold weather crops are generally favourable; poppy is very forward; some pulses are being gathered, others are progressing; slight injury to *rahur* and peas from frost in thanas Sewan, Buragaon and Digwarah, and to poppy and *rabi* crops from some kind of insects in Gopalgunge, which have been reported by the police; prices are favourable; general health is good.
Chumparun ...	*Nil*	Weather nice and cool; state and prospects of the crops are same as reported last week; there is nothing new to report regarding their state; *rabi* and poppy crops are growing well.
Patna ...	Return not received.	Weather seasonable; nothing new to report regarding the state and prospects of the crops; health of the district is good.
Gya ...	*Nil*	Weather seasonable, but rather drier than usual; west and north-west winds (often high); rain is wanted; paddy crop is nearly all cut, and the outturn is about 10 annas; the *rabi* crop is very fair up to date; public health is good.
Shahabad ...	Return not received.	Weather hot in the commencement of the week; cold again since last two days; strong west wind on Tuesday and Wednesday; winter crops are ripening; they are rather poor in some places towards Buxar sub-division, being injured by frost; rain is wanted for a full crop.
Hazaribagh ...	*Nil*	Weather cold; cloudless sky, with dry westerly wind; prospects of the crops remain the same as reported last week, *i. e.*, owing to the want of rain the *rabi* is being burnt up; it is doubtful, unless we have rain (of which there is at present no appearance), whether a 6-anna crop will be saved.
Lohardugga ...	*Nil*	Weather is very pleasant, but no rain yet; the prospects of the crops still continue good, but it is feared that damage may be done if rain does not fall shortly; a few cases of small-pox reported from Palamow sub-division.
Manbhoom ...	*Nil*	Weather warm for this season; from reports received the Deputy Commissioner is informed that the few crops on the ground are doing well; it appeared to him that for some crops, poppy for instance, rain would do good.
Singhbhoom ...	*Nil*	Weather seasonable; reports about the *rabi* crops are still favourable; the district is healthy.
Balasore ...	*Nil*	No rainfall during the week; weather fine, but warm for this season of the year; rice harvest is excellent; cholera and small-pox in the south of the district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Cuttack ...	*Nil*	Weather cold and dry; about 11/12ths of the late rice has been reaped with a good outturn; the prospects of the other crops are good; public health is generally good, but some cases of cholera and small-pox are reported.
Pooree ...	*Nil*	Weather clear and a little cold; the harvesting of the main rice crop is nearly completed; the outturn is good; sugarcane is being cut; *sarud* pulses are being harvested and others progressing; cotton plantation has commenced; summer paddy crop, *dalna*, is progressing.
		General Remarks.—No rainfall is reported from any of the districts for the week under review. There is nothing particular to notice regarding the state and prospects of the crops. The harvesting of the paddy crop has nearly come to a close. The *rabi* crops are generally doing well, but they want rain in certain districts.
N. W. Provinces—		
Benares (Jan. 26th)	*Nil*	Strong westerly breeze.
Jhansi („ 27th)	*Nil*	
Agra („ 26th)	*Nil*	In some places *urhar* injured by frost.
Meerut ...	...	No change.
Bareilly ...	*Nil*	High westerly breeze since last four days.
Almora („ 24th)	...	Weather clear and apparently settled.
		General Remarks.—Weather warm for season; rain required but not immediately necessary.
Punjab—		
Delhi (Jan. 26th)	*Nil*	Crops doing well, but rain wanted; health good.
Hissar „	*Nil*	Crops favourable; health good.
Umballa „	*Nil*	Crops and health good.
Jullundur „	*Nil*	*Rabi* prospects fair; health good.
Lahore „	*Nil*	Crops and health good.
Mooltan „	*Nil*	Ditto.
Dera Ismail Khan „	*Nil*	Ditto.
Rawalpindi „	*Nil*	*Rabi* prospects and health good.
Peshâwar „	*Nil*	Agricultural prospects good; slight fever prevalent.
		General Remarks.—Agricultural prospects fair, but more rain would be acceptable; health of province good.
Oudh—		
Lucknow (Jan. 26th)	*Nil*	Prospects and public health continue generally good; rain is much needed in parts.
Sitapur „	*Nil*	
Fyzabad „	*Nil*	
Central Provinces—		
Upper Godavari (Jan. 22nd)	...	Weather clear and cold; prospects favourable; fever and small-pox prevalent; prices risen.
Sambalpur ...	...	Weather clear; fever continues.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Raipur ...	...	Crops and health good; prices stationary.
Chanda („ 23rd)	...	Rice threshing; *rabi* injured in places by caterpillars and blight; fever continues.
Chhindwara ...	...	Weather clear and cool; *kharif* crops cutting; *rabi* favourable; health good; prices steady.
Betul („ 24th)	...	Weather cool and clear; *rabi* favourable; health good; prices stationary.
Balaghât ...	...	Weather clear; rice threshing completed; *jowar* cutting; health good; prices stationary.
Bhandara („ 25th)	...	Weather clear and pleasant; rice threshing completed; average outturn of *rabi* favourable; fever continues; prices easy.
Nagpur („ 26th)	...	Prospects of *rabi* fair; health good; prices steady.
Wardha ...	...	Weather clear; *rabi* promising.
Nimar ...	...	Days hot; gram cutting; prices fallen.
Hoshangabad ...	...	Outturn of cotton below average; *rabi* promising.
Narsinghpur ...	...	*Rabi* promising.
Jubbulpore ...	...	Weather clear and cold; *rabi* good; small-pox continues.
Saugor ...	...	Prospects of crops unchanged; health good.
Seoni ...	...	*Rabi* promising; health good; prices fallen.
Mandla ...	...	Prospects of crops favourable; health good; prices stationary.
Damoh ...	...	
		General Remarks.—From several districts a considerable amount of fever is reported. The prospects are still favourable, and in most districts prices are stationary, while in several they have fallen.
British Burma—		
Arakan Divn. (Jan. 27th)	...	Public health good; crops being reaped.
Pegu Division.		
Rangoon (Jan. 27th)	...	Harvest good; slight cholera in Hline and Twantay, none in Pegu; slight cattle disease general.
Basseiu „	...	Cholera, small-pox and cattle disease in town; slight cholera at Kyonpyan, Kyounggon.
Henzada ...	...	Cholera in Okpho and Laloon townships; none at Myanoung; general health good; harvest progressing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Prome (Jan. 27th)	...	Cholera at Prome; small-pox at Shwedoung; vaccination going on.
Thayetmyo „	...	Health good.
Thonkwa „	...	Health and crops good.
Tenasserim Division ...	...	Health good, except at Tavoy, where cholera prevails; crops being harvested; slight cattle disease in the Amherst district.
Assam—		
Gauhati (Jan. 27th)	*Nil*	Mornings cold, usually foggy; cool north-east wind; shock of earthquake on night of the 25th; prospects of tea and other crops favourable; public health good.
Sylhet „	*Nil*	Cholera and small-pox prevalent.
Hyderabad Assigned Districts—		
Umraoti (Jan. 27th)	...	*Rabi* thriving; public health good.
Mysore and Coorg— (Jan. 27th) ...	*Nil*	Prospects of season not improved; public health on the whole good; slight increase of cholera.
Rajputana—		
Ajmere (Jan. 27th)	*Nil*	Some fever and small-pox, otherwise health good.
Jeypore „	...	No change; prospects and health good.
Harowtee (Jan. 22nd)	...	No change.
Tonk „	...	
Central India—		
Indore (Jan. 26th)	...	Health and agricultural prospects good.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...

SUPPLEMENT TO

The Gazette of India.

Nº 6.} CALCUTTA, SATURDAY, FEBRUARY 5, 1876. { Register No. 75.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

ANNUAL REPORT ON THE OPERATIONS OF THE POST OFFICE OF INDIA FOR THE YEAR 1874-75.

No. 6684, dated the 31st December 1875.

From—F. R. HOGG, Esq., *Officiating Director-General of the Post Office of India,*

To—*The Secretary to the Government of India,* FINANCIAL DEPARTMENT.

I HAVE the honour to submit the annual report on the operations of the Post Office of India during the year 1874-75.

GENERAL POSTAL UNION.

2. The most interesting event of the year in the postal history of the world is the treaty under which the whole of the States of Europe, the United States of America, and Egypt formed themselves into a General Postal Union for the reciprocal exchange of correspondence, and agreed to adopt low and uniform rates of postage for all correspondence despatched from one State to another. So far back as 1872 the German Government first mooted the question to Great Britain, and an international postal conference, fixed originally for September 1873, took place in the autumn of the following year when the treaty was agreed to and signed. For some months negotiations have been in progress for the admission of India within the Union; it is probable that her membership will now soon be secured, and that this measure will be attended with a substantial reduction in the present very high rates of postage between England and India.

COMMUNICATIONS WITH PLACES ABROAD.

3. A direct exchange of mails between India and Germany was introduced with effect from the 1st October 1874, under which letters can be sent to Germany at the low rate of 5 annas 6 pie, and to countries served through Germany at 6 annas 6 pie per half ounce. Registration was also extended to packets of newspapers, books and patterns.

4. By the route termed "*viâ* Brindisi through Italy" the rates of postage on letters for Italy itself were lessened by one anna per half ounce, a much larger reduction being effected on behalf of letters for countries served through Italy; arrangements were made for serving Iceland and the Faroe Islands by this route, and registration was extended to packets of papers, &c.

5. By the routes termed "*viâ* Brindisi through French Office, Modane," and "*viâ* Marseilles through French Office, Alexandria," the system of charging by the half ounce instead of by the quarter ounce was introduced and the rates of letter postage reduced.

REVISION OF PENINSULAR AND ORIENTAL CONTRACT.

6. At the instance of the company, who sought for leave to pass through the Suez Canal with the Southampton mails on board, the contract for the conveyance of the East India and Japan mails was revised in August 1874. Among the concessions exacted from the company was a reduction in the subsidy to the extent of £20,000 per annum. This revision, effected without prior communication with India, substituted a through service between Southampton and Bombay for the formerly existing separate services between Southampton and Alexandria and between Suez and Bombay. Thus, the Brindisi line became subsidiary to the main line and the important light mail sent by land across Europe was subordinated to the heavy mail transmitted by long sea. The ill effect of this provision soon became exemplified in the case of the mail from London of the 6th October 1874, when the Brindisi portion was actually kept six days at Suez waiting for the Southampton and Mediterranean mails detained by the break down of the "Surat." And in reply to a remonstrance made by Her Majesty's Postmaster-General, the Directors of the Company declined "to render the despatch of the Brindisi mail independent of the outward Southampton steamers in case of accident or delay." Considerable indignation not unnaturally manifested itself in this country—a feeling that was aggravated by further delay in the arrival at Bombay of four mails within the next two months.

LOCAL STEAM SERVICES.

7. All the steam services for which provision was made in the new contract with the British India Steam Navigation Company have come into operation. The following is a list of the lines worked by this company on the 31st March last:—

(1.) Fortnightly communication between Calcutta and Kyouk Phyoo *viâ* Chittagong and Akyab, with a four-weekly extension to Sandoway during the fair season.
(2.) Fortnightly communication between Calcutta and Rangoon *viâ* Akyab.
(3.) Weekly communication between Calcutta, Rangoon and Moulmein.
(4.) Four-weekly communication between Calcutta, Singapore and intermediate ports.
(5.) Fortnightly communication between Moulmein and Singapore *viâ* Penang and Malacca.
(6.) Fortnightly communication between Madras, Rangoon and intermediate ports on the north-east coast.
(7.) Weekly communication between Calcutta and Bombay, touching at intermediate ports on the Coromandel and Malabar coasts.
(8.) Semi-weekly communication between Bombay and Karachi, with a weekly continuation to the Persian Gulf.
(9.) Four-weekly communication between Aden and Karachi.
(10.) Four-weekly communication between Calcutta and Port Blair with extensions to Camorta and Rangoon.

8. A yearly subsidy of Rs. 7,25,000 is paid for the maintenance of all these lines, except the Port Blair and Camorta line, for which special contract arrangements exist in respect to the transmission of Government stores.

9. I now give a list of steam services performed by companies other than the British India Steam Navigation Company. The only change is the new arrangement made by the local Administration of British Burma for weekly communication between the Capital and Bassein—

(1.) By the Irrawaddy Flotilla and Burmese Steam Navigation Company, for weekly communication between Rangoon, Mandalay and intermediate ports, with a monthly extension to Bhamo, the subsidy being Rs. 5,000 per mensem.
(2.) By the Irrawaddy Flotilla and Burmese Steam Navigation Company, for weekly communication between Rangoon and Bassein on a monthly subsidy of Rs. 1,000.
(3.) By the Burmese Steam Tug Company, for fortnightly communication between Moulmein, Tavoy and Mergui on a yearly subsidy of Rs. 18,000.
(4.) By Jardine, Matheson and Company (of Hong-Kong) and Apcar and Company (of Calcutta), for the conveyance of mails monthly between Calcutta, the Straits and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales (no subsidy).
(5.) By the Euphrates and Tigris Steam Navigation Company, for fortnightly communication between Busrah and Bagdad, the subsidy being Rs. 4,000 per mensem.

10. Of these services the first three are managed by the Chief Commissioner of British Burma, the fourth by this Department, and the last by Her Majesty's Government though paid from Indian revenue.

THROUGH RAILWAY TIME-TABLE, BOMBAY TO CALCUTTA.

11. The authorities of the Great Indian Peninsula Railway Company, having at last consented to run their mail trains over the Thul Ghât by night, a new time-table was introduced, with effect from the 1st March 1875, which secured an evening instead of a forenoon

departure from Bombay and an early morning in lieu of a night arrival at Calcutta. Thus the delivery in Calcutta of letters posted in Bombay was considerably accelerated. But this change brought the Calcutta and Bombay mails at different hours into the great junction station at Allahabad and necessitated the running of two postal trains daily between that place and Lahore, the one to correspond with the East Indian Railway, the other with the Great Indian Peninsula Railway running.

REVISIONS OF ESTABLISHMENT.

12. Prominent among the establishment revisions of the year stand those of the Calcutta Post Office and the mail cart and passenger service line to Darjeeling. For some time it had been recognised that the working of the Calcutta Post Office was not satisfactory, and that no real improvement could be expected without a large addition to the strength of establishment maintained. A thorough revision was carefully worked out and sanctioned, and its introduction has been followed by signs of marked improvement. On the Darjeeling line the rapid growth in the weight of the mail and in prices for grain and fodder compelled not merely the entertainment of additional cattle, but also the grant of more liberal allowances to the contractors who supplied them. These two measures entailed an enhanced cost exceeding Rs. 4,000 per mensem. It was hoped that this large additional expenditure might be covered by abolishing the expensive post line between Ahmedabad and Hyderabad (Sind). It was known that the correspondence concerned was insignificant as compared with cost of maintenance; and the conversion of the weekly into a semi-weekly service by sea between Bombay and Karachi was deemed a fitting opportunity for stopping communication by land between those places. The introduction of this economy was however successfully resisted by the Government of Bombay and in place of the entire abolition of the line, a reduction in the strength of its establishment was directed. Thus the expected saving of Rs. 65,000 per annum was reduced to one of only Rs. 12,000.

POSTAGE STAMP LABELS.

13. A nine-pie postage-stamp was substituted for the formerly existing eight-pie label: the obsolete six-anna eight-pie label was withdrawn from circulation; and a new postage stamp added of the value of one rupee.

RAILWAY INTERRUPTIONS AND INUNDATIONS.

14. More than ordinary trouble was experienced in dealing with interruptions to the mail service from floods and other causes. The most serious of these occurred on the northern extension of the Madras Railway where four bridges were rendered impassable, numerous culverts carried away, several miles of embankment scoured, and all communication both by road and wire between Cuddapah and Gooty, a distance of 96 miles, cut off. About the same time the south line of this railway was also seriously damaged. At considerable trouble and expense a new postal line had rapidly to be organised for the conveyance of the mail by way of Bellary and Bangalore—this line extended over a distance of no less than 191 miles and 35 runners were required at each stage. On the Great Indian Peninsula Railway line the overflow of the Soojan stream inundated the surrounding country and damaged the line for about five miles. Cordial help was given by the railway authorities, and the detentions of the mail were not therefore serious. Again on the East Indian Railway line the cyclone of October 1874 stopped for a time the passage of trains near Kanu Junction on the Chord Line, the Loop Line also was flooded for several days in the preceding month by the overflow of the Ganges. In both these instances I have pleasure in recognising the cheerful aid spontaneously rendered by the East Indian railway authorities in sending on the mail. In Sind the inundations of the Indus were unusually severe, so much so that nearly every postal line in the province suffered. On the Suigám line the mails were detained for three whole days.

CAMP POST OFFICES.

15. Three camp post offices and a postal line nearly 100 miles in length were temporarily entertained for about four months to serve the Duffla campaign, and a small service was organised to meet the postal wants of the expedition to the Naga Hills. Satisfaction was in both instances given to the military authorities concerned. Field post offices in connection with native fairs were temporarily established with success near Puri in Bengal, at Hardwár in the North-Western Provinces, at Thánesar in the Punjab, and at Barmán in the Central Provinces. In Bombay the experiment proved a failure.

LOTTERIES AND SWEEPS.

16. A serious source of temptation to dishonesty on the part of post office servants has grown of late years out of the numerous public lotteries and sweeps relating to the Derby and other notorious races. Subscriptions to these transactions are invited by newspaper advertisement and unregistered letters pass in great numbers through the post directed to the "Secretary, Derby Sweep" or some such designation: that the great majority of such covers contain remittances for the most part in currency notes is a fact that cannot be concealed, and the obvious tendency must be the demoralisation of some of those officials who have to deal with this class of correspondence. One grave instance of this kind came to my notice. Accidentally a tampered-with letter of this kind was found in the Murree post office; this led to a search when about 50 more covers all tampered with came to light. A searching enquiry ensued and the local postmaster

was prosecuted and committed to the Chief Court; from want of proof, however, he escaped conviction. It is a curious fact that none of these losses formed the subject of complaint, and but for the accidental discovery to which I have referred this case of wholesale theft would probably never have been known. Since then special measures have been adopted for the security of such covers, and those measures have, I believe, been attended with success.

NATIVE IGNORANCE IN POSTING.

17. The stupidity exhibited by some natives entrusted with the posting of letters almost exceeds belief. It has not unfrequently happened that letter boxes sent for repair have been found to contain old letters not dropped into the proper orifices but stuffed into cracks and crevices, the result of age or warping. The Chief Superintendent, Travelling Post Office, when on tour, chanced to see a a native at Harda posting letters in the mouth of a cistern for the supply of water to first class carriages on the Great Indian Peninsula Line. A precisely similar act was on another occasion witnessed by my assistant Mr. Alpin. I cannot but fear that many covers never reach the post office at all, through blunders on the part of the agency used to post them.

INJURIES TO MAIL RUNNERS.

18. In some parts of India the life of a mail runner is not unattended with danger. During the year under review two instances of murder and six of wounding occurred to foot runners while in the discharge of their duty, from the hands of highway robbers. One man was killed and one wounded by a tiger, another was severely hurt by a wild elephant and three men were badly torn by bears.

SECTION I.—POST OFFICES, LETTER BOXES, AND RURAL MESSENGERS.

19. Appendix No. 1 shews the number of new post offices and letter boxes that have been opened during the last two official years, and the result is given in an abstract form on the margin. A very considerable extension of postal facilities for the public has taken place, larger even than the extension of the previous year, which in its turn exceeded that of any year since 1868-69. More than half of this increase occurred in the postal circles of Bengal and Madras, where the transfer in some Collectorates of district post management to the Post-master-General opened out fresh fields for the operations of the department. During the year under report the total number of postal receptacles in India has increased by 614, and on the 31st March last stood at 7,346. No less than 250 rural messengers were entertained and 86 dismissed, the total number of servants under this head at the close of March standing at 1,417.

SECTION II.—POSTAL LINES.

20. The next Appendix (No. II), gives the total extent in miles of each class of postal lines at the close of the year as compared with the returns of the previous year. An abstract appears on the margin. The increase in railway line mileage is composed of the opening of the Hyderabad State Railway, extensions on the Rajputana State Railway, the opening of the branch lines between Hinganghát and Wardha (in the Central Provinces) and between Anund and Dacore (in Guzerat): it also comprehends additions on the Holkar State Railway line. Under the head of mail cart, &c., the mileage increase is the result of numerous extensions and reductions. Among the extensions may be named the substitution of mail carts for runners' lines between Madura and Palamcottah in Madras, between Roorkee and Fatehpur and between Bulandshahr and Chola in the North-Western Provinces, between Karnál and Delhi in the Punjab, between Rangoon and Gobinzac in British Burma, and between Lucknow and Rae Bareli in Oudh; also the opening of a tonga dák between Barsi road and Pandhárpur and a horse dák extension between Karwar and Yellápur in Bombay; and the establishment of a tonga dák between Akola and Hingoli in the Berars. Among the reductions may be named the abolition of the mail cart between Dudu and Bhurtpúr in Rajputana, between Palamcottah and Tuticorin in Madras, and between Mortakka and Choral in Central India. Under the head of runners and boats the decrease in mileage is due partly to extensions already recorded, partly to the utilisation of contract mail packets, and partly to sundry revisions too numerous for specification. The mileage increase under the head of Sea is consequent upon the opening of communication between Aden and Karachi by vessels of the British India Steam Navigation Company.

SECTION III.—CORRESPONDENCE.

21. Appendix III compares the correspondence returns with those of the previous year; the general results are given in an abstract form on the margin. There has been a considerable growth under each head and a very remarkable growth under the head of Parcels and Packets. As respects the former, it is necessary to explain that empty mail bags when returned are classed as parcels; this provides for their transit under a system of registration, intended to guard against loss, inasmuch as the purchase of mail bags forms a heavy item in the contingent expenses of the department. Thus the aggregate number of parcels is swollen to a large extent by entries which do not represent any real expansion in this class of business. Making every allowance however for this disturbing cause, there is yet room to conclude that the anticipations expressed in my last annual report are being realised, and that the reduced rates introduced in April 1873 have begun to operate by the return of a class of traffic which of late years had been either suppressed or found its way to other channels of transit.

Year.	Letters.	Newspapers.	Parcels.	Books, patterns and packets.	Total.
1873-74 ...	98,531,628	8,762,200	605,312	1,336,363	109,235,503
1874-75 ...	104,353,076	9,365,586	792,462	1,608,107	116,119,231
Increase ...	5,821,448	603,386	187,150	271,744	6,883,728
Percentage	5·90	6·88	30·91	20·33	6·30

22. I give on the margin a statement in which the letter returns have been analysed in greater detail. This calls for no remark beyond attention to the fact that the head "Registered" again exhibits a considerable increase. Registration carries with it no advantage in the shape of insurance and no responsibility on the part of Government; but it ensures the obtainment of a receipt from the addressee which can be produced as proof of delivery and thus serves a very useful end.

Year.	Paid.	Unpaid.	Registered.	Total.
	No.	No.	No.	No.
1873-74	66,337,551	29,963,359	2,230,819	98,531,628

Increase ...	4,341,620	1,268,200	211,628	5,821,448
Percentage ...	6·54	4·23	9·48	5·90

23. *Overland Parcel Post.*—On the margin appears a statement in which the business done by the conveyance of parcels between India and Europe, under arrangements with the Peninsular and Oriental Steam Navigation Company, during the first two years of the experiment, has been shewn. By each mail India obtained on an average 310 parcels as against 181 despatched: thus the proportion of parcels received from and sent to Europe during the year under review was as 7 is to 4. Already the revenue has improved to the extent of about 23 per cent. and there is ground for expecting in future years a still larger development of this new class of traffic.

	Total number of parcels despatched.		Average weight of each parcel.		Net revenue derived by the Indian Post Office, after deduction of Customs duty, and sums due to the Peninsular and Oriental Company.

24. *Registered Newspapers.*—No less than 90 registered newspapers were discontinued during the year under review, their places were, however, more than filled by 158 fresh publications, so that the result represents a net numerical increase of 68, thus raising the total number in existence on the 31st March last to 610. Of these, 335 were issued in an oriental language, 192 in a European language, and 83 in mixed tongues: their distribution among the several postal circles is shewn below:—

Foreign Correspondence.

26. The estimated number of letters and newspapers, exchanged between the United Kingdom and India by the Southampton and Brindisi routes, is exhibited in the following statement. It includes not solely exchanges with the mother-country, but also correspondence passing in transit through the United Kingdom.

	Detail of correspondence with the United Kingdom.		
	Route.	Estimated aggregate number of letters.	Estimated aggregate number of newspapers.
Despatched from India to the United Kingdom	*Viâ* Southampton ...	678,081	47,138
	Viâ Brindisi ...	1,432,479	278,485
Received in India from the United Kingdom	*Viâ* Southampton ...	355,982	512,893
	Viâ Brindisi ...	1,187,592	1,154,765
Total ...	1874-45 ...	3,654,184	1,993,281
	1873-74 ...	3,619,132	1,985,020

There has been an increase of about 2 per cent. in correspondence despatched from India and a slight fall of about ·4 per cent. in the total number of covers coming from the opposite direction. The entire correspondence exchanged exhibits an increase of about 1 per cent. under the head of Letters and half per cent. under that of Newspapers. It is to be remarked that this country despatched a larger number of letters to the United Kingdom than it received therefrom, the fact being that, during the year under report, India sent four letters for every three it got. Another remarkable feature of the returns under consideration is that the Brindisi route received larger custom from Great Britain and the countries served through it than from India. Generally the balance inclines the other way. On the present occasion, however, the quicker route carried 70 per cent. of letters and newspapers originating in India, as against 72 per cent. transmitted by Great Britain.

27. On the margin is an abstract shewing the total number of letters that travelled by each of the main routes used for the exchange with India of foreign mails other than the United Kingdom. It should be explained that the fall under the heads *viâ* Italy and *viâ* Trieste arises from the opening in October 1874 of the new route *viâ* Germany: while the large increase of letters exchanged by French packet is owing to the inclusion, in the returns for 1874-75, of letters contained in the French closed mails, a class that was entirely omitted from the returns for 1873-74.

		Sent and received in India.	
		1873-74.	1874-75.
		No.	No.
By British packet.	Letters exchanged *viâ* Italy	115,110	86,214
	Letters exchanged *viâ* France	76,162	86,370
	Letters exchanged *viâ* Trieste	19,604	14,645
	Letters exchanged *viâ* Germany	...	36,801
	Letters exchanged with Gibraltar, Malta, and ports east of Suez	365,517	342,501
	Letters exchanged by French packets of the Indo-China Line	12,896	38,088
	Total ...	589,289	604,219

28. *Dead-Letter Offices.*—Efforts to improve dead-letter office work were made by the opening of new offices at Mount Abu for Rajputana and at Rangoon for the disposal of covers addressed in the Burmese character. A special officer (Pandit Súndar Lál) was also deputed to inspect all but the most inaccessible dead-letter offices in India. This tour tended to the correction of error, uniformity of practice and a general improvement in work. There are dead-letter offices at Calcutta, Madras, Bombay, Allahabad, Lahore, Nagpore, Karachi,

Lucknow, Abu and Rangoon. The working of each office will be found in Appendix IV, and the general result is shewn by the following statement:—

	Number.		Percentage.	
	1873-74.	1874-75.	1873-74.	1874-75.
Covers received in the several dead-letter offices	2,472,216	2,562,467		
Covers transferred by one dead-letter office to another ...	459,308	505,467		
Balance ...	2,012,908	2,057,000		
Disposed of by redirection to addressees and by issue for return to senders	977,459	1,134,999	48·56	55·18
Deduct covers returned to the dead-letter office as undeliverable...	103,304	113,713	10·56	10·01
Balance actually disposed of ...	874,155	1,021,286	43·42	49·65
Undisposable ...	1,035,449	922,001	51·44	44·82

It exhibits a satisfactory improvement over the returns of the previous year, for the proportion of covers disposed of by delivery to the addressee or return to the sender has increased by about 6½ per cent., the undisposable balance being reduced to a corresponding extent.

29. Appendix V deals with the sale of ordinary postage stamps, and the following comparative abstract represents the percentage of rise and fall in those sales during the last three years:—

	8-pie and 9-pie labels.	½-anna labels.	1-anna labels.	2-anna labels.	4-anna labels.	8-anna labels.	½-anna envelopes.	1-anna envelopes.
	Decrease per cent.	Increase per cent.	Decrease per cent.	Decrease per cent.	Increase per cent.	Increase per cent.	Decrease per cent.	Decrease per cent.
1872-73, as compared with 1871-72	17·78	12·86	24·83	3·07	·22	5·34	7·04	18·47
1873-74 „ 1872-73	Increase. 2·62	1·31	3·50	3·86	2·78	4·79	Increase. 2529·2	Increase. 487·72
1874-75 „ 1873-74	Decrease. 26·15	2·87	Increase. 1·57	Increase. ·20	5·05	Decrease. 4·26	122·11	14·48

The decline in the sale of 8 or 9 pie labels is due to certain modifications in the rates of postage on foreign covers which have rendered the use of labels of other denominations more convenient. And the fall in the sale of 8-anna stamps is explained by the introduction of the new rupee stamp: if the nominal value of this new stamp had been spent in buying 8-anna labels the decrease of 4·26 would have been changed to an increase of 9 per cent. The enlarged demand for embossed envelopes continues to increase, and this is of course the natural result of their sale at the cost of the stamps borne, no charge being made for the paper. As compared with an increase of 4·27 per cent. in 1873-74, the gross value of stamps sold in 1874-75 has increased to the extent of 6·83 per cent.

30. Appendix No. VI shews that the sales of service postage labels have increased in gross value from Rs. 10,54,056 to Rs. 10,78,446.

SECTION IV.—DISTRICT POST.

31. The district post owed its origin to the need for maintaining the means of official communication between the head-quarters of each district and the revenue and police stations in the interior. Of late years, however, its constitution has in some parts of India been considerably modified by extensions of the Imperial service. New postal establishments, when called into existence, are often first placed under the care of the district branch of the service: their growth is watched, and, when a sufficient amount of correspondence has been developed, the establishment is tentatively made Imperial. If the revenue yielded is found sufficient to fulfil certain recognised conditions of self-support, the establishment is permanently transferred to the Imperial post, otherwise it is relegated back to the district post. Thus the Imperial post is steadily growing at the expense of the district post, whose sphere of operations is year by year being diminished. This is notably the case in Bombay where the district post can now boast of but one post office and three short runners' lines, the establishment consisting for the most part of a band of more than five hundred rural messengers charged with the collection and delivery of correspondence at outlying villages. It will thus be seen that the present tendency in many parts of India is to restrict the district post to those establishments that, though not self-supporting, have yet to be maintained, and to render it useful as a nursery for the Imperial branch of the service. This description is not applicable to Bengal where the law precludes the use of the zemindari dák fund on establishments other than those required to deal with magisterial and police inter-communications, and where the original object of the institution is therefore, in spite of altered circumstances, still maintained. The time has now, I think, arrived for some alteration in a law which tends to repress private correspondence and the matter has already engaged attention.

32. When reviewing my last annual report, the Government commented on the absence of information indicating the advancement of the district post or its comparative efficiency and progress in different parts of India. Under the peculiar organisation of the post office, it is not easy to furnish this information. For as district post offices become absorbed into the Imperial post the correspondence concerned ceases to appear in the district post returns: thus a

fall in the number of covers dealt with is not necessarily a sign of retrogression. Again, the conditions of life are not always the same in each province. Bengal specially, as already shewn, being crippled in the use of its funds and standing at a disadvantage as compared with many other postal circles. The excess of newspapers in Madras, and the large proportion of paid covers, to which the Government has drawn attention, is largely due to the circulation of official Gazettes issued by the several Collectors. Moreover the proportion of paid to unpaid covers must largely be influenced by the extent to which the "service-bearing" clause of the rules is resorted to for official correspondence by the several Government offices in different parts of the Empire. It must not be forgotten that the district post is intended primarily for official correspondence, and that the application of this organisation to the development of private correspondence must never be effected at the sacrifice of its original object. Finally the district post, though managed for the most part by the Postmasters-General, is under the control, not of this office, but of the several local Governments and Administrations.

33. When dealing with machinery of so complex a character it is dangerous to deduce arguments of advancement out of statistics that must always be liable to many disturbing influences, and hard to effect a fair comparison between the efficiency of institutions radically differing in constitution. Still the matter is full of moment: and the Imperial post office can hardly evince too large an interest in the operations of so useful an auxiliary.

34. A few observations will now be made on district post arrangements in some of the postal circles.

35. It was in the North-Western Provinces that the transfer of the district post to the management of the Postmaster-General was first effected. This change occurred in the year 1864, and comprehended all districts in the province except Kumaun and Garhwál, where control still rests with district officers. So rapid was the development of correspondence that almost all the offices classed as district offices in 1864 soon paid their expenses, and were transferred to the Imperial branch of the service, thus liberating funds for bringing the post office more home to the doors of the rural population. Nearly a lakh and a half of rupees was spent during the year in the North-Western Provinces on district post establishments of which about Rs. 90,000 was realised out of the new cesses levied under Act XVIII of 1871, and the balance (Rs. 60,000) contributed from Imperial revenue. Every tehsil and police station where a diary is kept, and every town possessing a minimum population of 5,000 inhabitants, has its post office or receiving house, and smaller places are equipped with letter boxes served by itinerant messengers attached to the nearest post office. Such messengers not only deliver correspondence within prescribed beats, but also carry with them light portable boxes in which covers for despatch are collected, and are provided with postage stamps for sale: each periodical visit has to be certified by the signature of the putwari or other respectable resident of the village. The number of district post offices or receiving houses fell from 375 in 1873-74 to 366 in 1874-75, and 34 offices were absorbed into the Imperial post.

36. In Bombay the control of the district post was made over to the Postmaster-General in 1865, when 75 offices were opened: with one exception these have all become self-supporting and were converted into Imperial offices; and the district post fund, formed by a contribution of Rs. 89,400 from Imperial revenue, is spent for the most part on rural messengers employed as in the North-Western Provinces in visiting villages supervised by Sub-Inspectors.

37. Major Bourke describes the arrangements for village delivery of correspondence in Madras as extremely backward. Correspondence was delivered through subordinate village servants who took no interest in any but official covers, illegal fees were exacted, letter boxes unknown, no attempt at system existed, and the entire money grants were rarely if ever spent. No endeavour was made to use the supervising agency of the Imperial post till 1867 when one district was experimentally transferred. Since then twelve other districts have been added, and great pains of late years have been taken by the Postmaster-General to work out a method of rural collection and delivery for each Collectorate by means of messengers, based on that existing in other provinces, but elaborated in greater detail. Great success has attended these efforts; but much yet remains to be done before regular postal communication can be established with every village in the province. There were 113 district post offices in Madras during the year under report, and the entire establishment was maintained by an Imperial grant of Rs. 1,08,000.

38. The transfer in the Punjab was not made till 1871-72, and the system of delivery is similar to that which obtains in the North-Western Provinces. During the year three offices have been made Imperial, thus reducing the total number of district post offices from 31 to 28. The expenditure of Rs. 1,18,041 was defrayed out of local cesses supplemented by an imperial grant of Rs. 45,000.

39. Since December 1867 the district post in the Central Provinces has been supervised by the Chief Inspector of the Post Office. During the year under report 15 offices were made Imperial, the total number of district offices standing at 56. The district dák cess yielded a revenue of Rs. 38,749 which was supplemented by an imperial grant of Rs. 8,700.

40. In the Assam Postal Circle eight district post offices were made Imperial and the number of district post offices increased from 17 to 20. For the most part the district post is very inefficient, being worked through the police who have other duties to perform. The management rests not with the authorities of the post office but with the district officers, who are, I believe, hampered through want of funds.

41. District post arrangements in Rajputana are confined to the Ajmere and Mhairwarra districts and are maintained by a local cess amounting to Rs. 40,036. Six offices during the year were made Imperial, thus reducing to six the total remaining number of district post offices.

The Rajputana postal circle is, for the most part, composed of Native States where postal arrangements are very defective; the advance of the Imperial post office is steadily resisted, and a large mass of correspondence finds its way to the dead-letter office from want of proper means of delivery.

42. In Bengal the duties of the district post office are discharged by the pound-keeper; the pound is located in the thanah, an undesirable locality for a post office; as the native tendency is to avoid the police enclosure. Again the agent for delivering correspondence is the chowkidar, who has other more legitimate functions to perform, and whose work as a postman is subject to little or no supervision; thus the distribution of district correspondence is very irregular. So that we have a system tending to repress correspondence whether originating from or destined for the interior of the country. Under the present state of the law, a better system cannot be substituted, for the zemindari dâk fund, amounting to more than three lakhs of rupees, must be expended on establishments required for police purposes and cannot be devoted to an improvement of the channels for the delivery and collection of correspondence. I am not without hope that the Government of Bengal will see fit to alter the law in this respect. During the year the management of the district post in five districts was undertaken by the Postmaster-General. As evidence of the superiority of trained supervision, it may be mentioned that the percentage of unpaid covers returned undelivered by the district post was 9 per cent. in the Calcutta division (the first division made over to the Postmaster-General) as against 34 per cent. in the Patna division (which still remained under the Magistrate on the 31st March last).

43. I give below in abstract form the general result of district post operations which shews an improvement in the proportion of covers received back undelivered:—

Letters and Newspapers.	Number.	Percentage.
Sent to district post for delivery	8,667,398	Being 3·22 per cent. of the total number received for delivery.
Portion of the above received back	293,876	Being 8·01 per cent. on the number sent to district post.
Received from district post	2,646,138	Being 2·32 per cent. on the total number received by the General Post Office for delivery.

SECTION V.—MISCELLANEOUS.

44. *Security taken from Post Office servants.*—Although the number of employés in the Post Office Department compelled to give security exceeded 10,000, five cases only occurred of defalcation decreed against security revenue. These defalcations amounted in all to a total of Rs. 880, while the income exceeded Rs. 20,000. After a short life of two years the security account shewed on the 31st March last a balance at credit of Rs. 36,105. As yet refunds on the death, retirement or resignation of pensionable subscribers have necessarily been exceedingly trivial: as the account grows in age these refunds will year by year be larger, but they never can equal the income derived. On the whole the prospects of the fund are exceedingly favourable, and the time has now, I think, come to consider how the excess balance can, with due regard to the interests of Government, be best utilised for the benefit of really meritorious subscribers. The statement of receipts and charges is given below:—

Receipts.	Number of Employés. First half-year.	Number of Employés. Second half-year.	Amount of Subscription. First half-year.	Amount of Subscription. Second half-year.	Amount of Subscription. Total.	Charges.	Amount.
	Rs.	Rs.	Rs.	Rs.	Rs.		Rs.
Balance on the 1st April 1874	...	..	...	...	17,286	Sums decreed

Total ...	10,864	10,678	5,417	5,339	10,756	Balance at credit	36,105
Grand Total ...	15,906	15,837	10,427	10,498	38,859	Grand Total ...	38,859

45. *Complaints from the public.*—Although the aggregate of these complaints has fallen from 3,674 to 3,496 and the total number of those classed as well grounded has declined from 1,318 to 1,180, I should be sorry to rely on these figures as evidence of increased efficiency. In a department that necessarily is for the most part worked by an agency badly educated and receiving small pay, irregularities will occur: the expansion of the department, the multiplication of delivery agencies, and other postal extensions in the interior of districts must be attended with an increase of these irregularities. Sometimes a very trivial mistake is made the ground for violent attack by members of the public: at other times they try to hush up acts of culpable negligence if not of dishonesty on the part of post office officials. It is thus manifest that statistics deduced from so capricious a source can furnish no fit material by which to gauge the efficient working of this department.

46. *Highway robberies.*—From the abstract given on the margin it will be seen that the number of highway robberies of the mail has fallen from 32 to 25 and the Government will doubtless view with satisfaction the marked diminution of this class of crime in foreign territory. In 19 of these 25 cases the mails were recovered wholly or in part, and in ten instances convictions against the offenders were secured. One noteworthy point is the large increase of crime in Bengal, a result which can doubtless be in some measure attributed to the prevalence of a famine. Out of a total of nine robberies in Bengal, no less than six occurred in Behar and two in the neighbouring province of Chota-Nagpur; the sole unsuccessful attempt took place also in the Patna Division. Vigorous action was taken by direction of the Postmaster-General, who reports the measures adopted and the result of those measures in the following terms, *viz.*:—

Postal Circles.	1873-74.			1874-75.		
	British Territory.	Foreign Territory.	Total.	British Territory.	Foreign Territory.	Total.
Bengal	5	1	6	9	0	9
Madras	1	0	1	2	0	2

Central Provinces	0	2	2	0	0	0
Rajputana	0	2	2	0	2	2
Total ...	21	11	32	19	6	25

"There is now reason to believe that a firm of receivers of stolen property located at Dumráon in Shahabad which had connections in Ranchi has been traced and will be brought to justice, and that these highway robberies in Patna and Hazaribagh may be repressed if not put an end to. The cases shewn as No. 3, No. 7, No. 8, No. 9, and the attempt at robbery are all due to the operations of this gang, and stolen notes lost in them have been traced to the hands of one Temal Ram, the principal man in the firm, who is now under trial before the Court of Sessions. That the Department have recognised the urgent call for investigating these robberies is shewn by the fact that in April last when the first two notes stolen were traced to Temal, a personal visit was paid to the Magistrate and the Sub-Divisional Officer at Buxar who was in charge of the enquiry, and the Inspector-General of Police was telegraphed and written to to depute a special police officer of superior rank to take up the enquiry. This man, Temal, upon whom stolen notes from different parts of the country have been found to converge, has been committed to the Sessions and his conviction appears probable. The actual perpetrators of only two of the Patna robberies were convicted, but it is worth notice that since the arrest of Temal which took place in April, and the last conviction, *viz.*, that of case No. 8, which took place in February, and led to the enquiries into the disposal of the notes which first put the police on Temal's track, these offences in Patna and in that neighbourhood have ceased, and it is trusted that the present year will shew a clearer sheet at its close."

47. Below appears a statement shewing the localities in which the robberies took place:—

48. Appendix No. IX is a statement shewing the numerical strength of the post office establishment as it stood on the 31st March last; the marginal abstract includes all grades below that of Postmaster-General.

Postal Officials.	1873-74.	1874-75.
	Rs.	Rs.
Inspectors	153	170
Postmasters, Deputy and Sub-Deputy Postmasters	2,784	3,093
Clerks	2,258	2,473
Peons, &c.	6,329	7,114
Road Establishment	13,822	13,076
Total ...	25,346	25,926

SECTION VI.—NON-POSTAL BRANCHES OF THE DEPARTMENT.

49. During the year under report six bullock train offices were closed as unremunerative, the total number working on the 31st March last being thus reduced to 42. No change occurred in the bullock train lines which remain as follows, *viz.*:—

A main line from Calcutta to Pesháwar with branches to Jubbulpore, Fatehgarh, Gwalior, Landour, Simla, Ferozepore, Baháwalpur (through Mooltan), Sialkot and Murree.

50. Nor has any change taken place in the Punjab Military Van Dâk lines which at the close of the year under report stood as given below:—

Meean Meer to Pesháwar.
Wazirabad to Sialkot.
Rawal Pindi to Murree (during the summer months only).
Amritsar to Pathankote (during the summer months only).

51. Turning to other passenger lines it may be noted that an extension of the Holkar State Railway has led to the abolition of the service between Mortakka and Choral Choki, and to the conveyance of the mail thence to Indore by contract instead of under departmental management. Travellers are now conveyed by the post office between Carágola and Siligori on the Darjeeling line, between Umballa and Kalka on the Simla line, between Moradabad and Káládhungi on the Naini Tal line, and between Mooltan and Baháwalpur.

SECTION VII.—FINANCIAL RESULTS.

52. The financial results of the year are, I think, highly satisfactory. Cash receipts have been augmented by Rs. 1,18,775, the revenue derived from the sale of ordinary stamps has advanced by Rs. 2,33,458. On the whole, excluding altogether the value of service postage stamps, the purely postal revenue has improved to the extent of Rs. 3,41,798, while the increase of expenditure has not been more than a lakh and a half of rupees. Thus, after deducting the sum realised by the sale of service stamps, the receipts of the purely postal service fall short of the total expenditure by only about seven lakhs of rupees, the smallest deficit that has been attained for the last nine years.

53. In the following statement the financial statistics will be found in an abstract form:—

Review of financial results.

Purely Postal Service.	1873-74.	1874-75.
	Rs.	Rs.
Receipts including Sale of Service Postage Stamps	55,78,658	59,48,782
„ excluding „ „	45,24,364	48,66,162
Disbursements	54,21,251	55,70,868
Net Revenue including Sale of Service Postage Stamps	1,57,407	3,77,864
Net deficit, if Service Postage Stamps be excluded	8,96,887	7,04,706
Non-Postal Branches.		
Bullock Train.		
Receipts	7,62,519	8,30,765
Disbursements*	6,78,018	6,22,799
	Surplus 84,501	Surplus 2,07,966
Punjab Military Van Dak.		
Receipts	3,08,587	3,04,026
Disbursements	2,67,652	2,73,814
	Surplus 40,935	Surplus 30,212
Passenger Service on Mail Cart Lines.		
Receipts	1,16,688	1,12,351
Disbursements	1,16,688	1,12,351

	1873-74.	1874-75.
	Rs.	Rs.
* Purely Bullock train	6,25,512	6,21,524
Road Steamer Charges debited to Bullock Train	51,144	.....
Postal	1,362	1,275
Total	6,78,018	6,22,799

Review of financial results—(continued).

	1873-74.	1874-75.
CONTRACT SUBSIDIES TO LOCAL STEAMERS ENGAGED PRIMARILY FOR NON-POSTAL BRANCHES.		
Disbursements	Rs. 7,69,963	Rs. 7,12,083

Briefly stated these results exhibit—

	Rs.	
(1).—A net revenue in the purely Postal Department of	3,77,864	If sale of service postage stamps be included.
(2).—A net deficit in the purely Postal Department of	7,04,706	If the sale of service postage stamps be excluded.
(3).—A net surplus in the Bullock Train Department of	2,07,966	Including charges not purely Bullock Train.
(4).—A net surplus in the Punjab Military Van Dâk of	30,212	

54. The joint earnings of the Bullock Train and Punjab Military Van Dâk represent an average monthly profit of Rs. 19,848.

55. It may here be explained that the figures given differ from those recorded in the books of the Comptroller-General to the extent of Rs. 91,058 on the credit side and Rs. 74,894 on the debit side. This difference is due to the inclusion by the Comptroller-General in the accounts of the year 1874-75 of entries made in adjustment of arrear accounts and not belonging to that year; and the exclusion of such entries from the financial statistics exhibited by me. In a report that professes to contrast the transactions of one year with another, the admission of arrear adjustments in the transactions of one year is not convenient and obviously tends to falsify the desired comparison.

	Rs.
Railway free service (estimated value)	2,14,000
English stores (estimate)	50,022
Value of service rendered to the post office by the Government Press	41,619
Rent of Government buildings occupied by post office (estimate) ...	1,80,605
Total ...	4,86,246

56. I now acknowledge on the margin certain items of charge not included in the regular accounts.

SECTION VIII.—GENERAL REVIEW OF PROGRESS SINCE 1854.

Progress of correspondence since 1854.

Number of letters and newspapers received for delivery in the year under report, as compared with the numbers received in the year prior to the introduction of the Post Office Act of 1854.

A year before the Act XVII of 1854 came into operation... 19,082,676 = 100
1869-70 ... ... 83,032,957 = 435
1870-71 ... ... 83,868,397 = 439
1871-72 ... ... 87,476,768 = 458
1872-73 ... ... 91,055,190 = 477
1873-74 ... ... 107,293,828 = 562
1874-75 .. .. 113,718,662 = 595

Year.	Percentage.
1853-54 last complete year of former rates	128
1855-56 first complete year	100
1867-68 thirteenth complete year	237
1868-69 fourteenth ditto	258
1869-70 fifteenth ditto	246
1870-71 sixteenth ditto	235
1871-72 seventeenth ditto	272
1872-73 eighteenth ditto	279
1873-74 nineteenth ditto	284
1874-75 twentieth ditto	305

NOTE.—The fall in 1870-71 is due to the payment in that year of a large arrear adjustment with the British Post Office.

57. Appendix XII is an estimate shewing the number of letters and papers received for delivery since the passing of the Indian Post Office Act, 1854. It will be seen from the marginal abstract that this class of correspondence has increased nearly six-fold.

58. Appendix XIII represents the growth of purely postal revenue since the year 1853-54. The abstract on the margin indicates the progress of income derived from private correspondence, that of 1855-56 (the first complete year after the reduction of postage rates in 1854) being represented by 100 and the revenue of the last eight years in like proportion.

SECTION IX.—NOTICES OF POST OFFICE OFFICIALS.

59. Among the principal officers of the department to whom special acknowledgment from me is due are Mr. T. W. Gribble, Officiating Postmaster-General, Bengal, and Major the Honourable E. R. Bourke, Postmaster-General of Madras, for industry in bringing greater postal facilities within reach of the rural population, and Mr. P. Sheridan for good work in the Travelling Post Office. The names of the following officers have also come before me for favourable notice: Mr. M. Percy for hard and successful efforts towards improving the Calcutta Post Office; Baboo Ananda Gopal Sen, Postmaster, Bankipur, for spending his leisure time in writing what the Postmaster-General terms "a well-written and convenient little compilation called, 'The Post Office of India,'"; Messrs. E. C. George, Barton Groves and J. DeCaster for energy and judicious action during the floods at Madras; Pandit Sundar Lal for the efficiency with which he conducted the special mission of inspecting dead-letter offices in the several postal circles; Khan Bahádur Cowasji, Superintendent of Mails, for exertions during the inundations in Sind; Girdhari Lal, Sub-Inspector in Oudh, for the perseverance with which he brought several important cases of post office theft to a successful issue; and Mr. Goodburn for excellent service in the Punjab Travelling Post Office.

APPENDIX No. I.

Statement shewing the Number of Post Offices and Letter Boxes which were opened during the years 1873-74 *and* 1874-75 *and the total number that stood at the end of those official years.*

(a) Including sale of Service Postage Stamps.
(b) The apparent reduction is to a large extent nominal, owing to the introduction of a new system of accounting for official postage under which a portion of the official correspondence between Government Officers in the same district is not brought to account.
(c) These amounts are less by Rs. 1,38,429 than they would have been under the former mode of calculation, owing to the deduction for the first time in 1869-70 of the discount on sale of stamps.
(d) Exclusive of Rs. 1,46,699, being the discount on sale of stamps.
(e) Exclusive of Rs. 1,46,164, being the discount on sale of stamps.
(f) Including Rs. 5,411 on account of Indian share of postage on covers conveyed by Indian Post to and from Ceylon.
(g) Excluding the sum of Rs. 29,379 an erroneous excess credit on account of official postage in the year 1871-72.
(h) Only sale proceeds of Service Stamps.
(i) Including Rs. 3,434 on account of Indian share of postage on covers conveyed by Indian Post to and from Ceylon.

No. 6444, dated Calcutta, the 20th December 1875.

From—F. R. Hogg, Esq., *Officiating Director General of the Post Office of India,*

To—*The Secretary to the Government of India,* Financial Dept.

As directed in your Resolution of the 4th February 1874, I have the honor to submit, for the information of Government, a list of Newspapers registered in India at the Offices of the several Post Masters General and Chief Inspectors of Post Offices, as they stood on the 31st March 1875.

List of Newspapers registered in India at the Offices of the several Post Masters General and Chief Inspectors, in existence on 31st March 1875.

The 20th December 1875.

F. R. HOGG,
Offg. Dir. Genl. of the Post Office of India.

No. 580, dated Fort William, the 28th January 1876.

REVIEW.—By the Government of India, FINANCIAL DEPARTMENT.

Read the Annual Report on the operation of the Post Office of India for the year 1874-75.

Read also letter from Director General of Post Office No. 6444, dated 20th December 1875.

Review.—The chief events of general interest during the year are the constitution in Europe of the General Postal Union, and the improvement of postal communications between India and European countries.

2. The Governor General in Council anticipates much advantage from the operations of the Union, to which India will, it is hoped, presently be admitted with the result of a considerable reduction of the rates of postage between India and Europe and America.

3. The reduction of the charges upon correspondence carried through Germany, Italy, and France, already effected, is satisfactory.

4. PARA. 6. The Government of India will regard with much dissatisfaction any recurrence of the delays in the delivery of the mails *vid* Brindisi, which are shewn to have happened in consequence of a revision of the mail contract with the P. and O. Company.

5. PARAS. 7—10. The several subsidised steam packet services are believed to have been satisfactorily performed during the year. In future annual reports the Director-General of the Post Office should especially notice the manner in which these services have been carried out,—whether the vessels of the several contracting companies are completely efficient, whether the contract packets have kept punctual time, and any other matters of public interest relating to the work for which so considerable a subsidy is paid from the public revenues.

6. PARA. 11. The Government wish to know whether any extra expense was caused to the Post Office by the revision of the through railway time-table between Bombay and Calcutta.

7. PARA. 12. It is satisfactory to find that the costly improvements effected in the Calcutta Post Office are bearing fruit. The proposal to abolish the expensive land line between Ahmedabad and Hyderabad (Sind) did not apparently bear any relation to the increased expenditure in Bengal. That measure was connected with the large consolidated subsidy to the British India Steam Navigation Company, and it is to be regretted that in the opinion of the Local Government the considerable saving upon which the Government of India had reckoned could not be effected.

8. PARA. 14. The Governor General in Council is glad to read the testimony borne to the energetic co-operation of the authorities of the Great Indian Peninsula and East Indian Railways on the occasions of the interruptions of railway traffic here reported. The satisfaction of His Excellency in Council will be communicated to the Agents of these two companies. The officers of the Post Office appear to have used all proper means to make the injury to the mail service as little as possible. The duty must have been especially arduous in the Madras Presidency.

9. PARA. 15. The experiment of establishing Camp Post Offices at large popular gatherings for fairs and other purposes should be continued.

10. PARA. 16. The attention of the Home Department will be invited to this complaint of the temptations to which the servants of the Post Office are exposed through gambling advertisements.

11. PARA. 19. The number of imperial Post Offices increased during the year by 230, from 3,178 to 3,408; and the number of letter boxes by 384, from 3,554 to 3,938. Altogether there are now 7,346 imperial postal receptacles in India, besides the receiving boxes carried by the rural messengers. This does not include the receptacles of the District Post. There are now 1,417 rural messengers employed under the Post Office. In future reports the numbers of these servants should be shewn separately in Appendix IX, and also in a separate column, after the present column 11 in Appendix XIII, so that the Government and the public may see at a glance the progress made in this department of the Post Office which is susceptible of almost unlimited development.

12. PARA. 20. The length of the postal lines has increased by 1,282 miles, owing to the opening of communication by sea between Kurrachee and Aden.

It now stands at 55,898 miles. The statistics for past years on this subject contained in Appendix XIII are interesting, exhibiting the gradual growth of the steam services by land and sea.

13. PARA. 21. There is again a very satisfactory growth in the correspondence carried by the Post Office, nearly 7 millions (6·30 per cent.) more covers having been borne in 1874-75 than in the previous years. Here, again, the figures given in columns 17—21 of Appendix XIII, are full of interest, shewing a steady growth in the use of the Post Office which may be safely regarded as a very gratifying proof of the intellectual progress of the country. The number of letters carried has all but quadrupled since 1854-55, and the newspapers have increased in scarcely a less ratio. The figures are indeed full of hope for the future of India. It is observed, however, that the correspondence in the Punjab and British Burma shews no increase, but a decrease. Some explanation of this phenomenon would be desirable.

14. PARA. 23. The overland parcel post is working well, and attracting more and more business: 25,563 parcels were thus carried in 1874-75.

15. PARA. 22. There is an increase again of registered covers by 211,628, or 9·48 per cent., from 2,230,819 to 2,442,447. It is important to remember that the Government accepts no special responsibility in respect to registered covers.

16. In order to make a comparison between these statistics and those of a country which has attained to a high degree of civilization, the following figures are taken from the report of Her Majesty's Post Master General for 1874—

	In the United Kingdom.	In British India.
Postal receptacles	22,000	7,346
No. of letters	967,000,000	104,353,076
No. of post cards	79,000,000	
No. of newspapers, books and packets ...	259,000,000	11,766,155
TOTAL ...	1,305,000,000	116,119,231
No. of registered letters ...	4,000,000	2,442,447

17. PARA 24. There was an addition of 68 periodicals to the whole number registered, making a total of 610. A column should be added to Appendix XIII, shewing the number of registered periodicals at the end of each year. The numbers are 430 in 1871-72, 478 in 1872-73, 542 in 1873-74, and 610 in 1874-75—another indication of the progress of civilization in India. The list of periodicals will be published in the Gazette with this review.

18. PARA. 26. The letters sent to Europe by the contract mail steamers (2,110,560) largely exceeds, as heretofore, the letters received by India (1,543,574); on the other hand, 325,623 newspapers were sent, and 1,667,658 received by this route. The letters sent both ways have increased from 3,619,132 to 3,654,134, and the newspapers from 1,985,020 to 1,993,281. These statistics also should in future be added in a column in Appendix XIII, with a column shewing the amount of the subsidy contributed by India to the P. and O. Company.

19. PARA. 28. In response to the considerable expenditure of late years upon this department, there has been a substantial improvement in the proportion of dead letters finally found undeliverable.

20. PARAS. 29-30. The increased sale of labels and envelopes to the public is satisfactory. But the proportion of the revenue received in cash, 31 per cent., is unsatisfactorily large. A column should be added after column 4 in Appendix XIII, shewing this proportion for each year, and the administration should endeavour to devise means for encouraging the greater proportional use of labels.

21. PARA. 30. The Director-General of the Post Office should report, with reference to the remarks in the review by the Government of India on paragraph 21 of last year's report, whether he can explain how it is that the sums paid for official postage in *Bengal* (Rs. 2,09,407), and the *North-Western Provinces* (Rs. 1,58,591), were so small considering the size and importance of these Provinces, as compared with the sums paid by *Bombay* (Rs. 2,01,403), *Madras* (Rs. 1,78,497), and the *Punjab* (Rs. 1,75,463); also, how it is that *Burma* paid only Rs. 10,851 for all its official postage. Probably in the provinces where the cost is excessive the rules are imperfectly understood. The Post Office officials should always suggest the rectification of any habitual disregard of the rules.

22. PARAS. 31—43. The Governor General in Council is glad to find that the subject of the District Post has engaged the special attention of the Director General. As explained by him, it is no doubt difficult to compare the statistics of the various provinces, in consequence of the difference of principle and practice as yet prevailing under different administrations. Still it may be gathered from Appendix VII what amount of postal work is performed by the several District Post establishments in aid of the imperial post. The following is an abstract:—

POSTAL CIRCLES.	COVERS RECEIVED FROM THE IMPERIAL POST OR FROM THE DISTRICT POST FOR DELIVERY BY THE DISTRICT POST.			COVERS POSTED IN THE DISTRICT POST FOR DESPATCH TO THE IMPERIAL POST OR TO THE DISTRICT POST.			COVERS RETURNED BY THE DISTRICT TO THE IMPERIAL POST UNDELIVERED.		
	Paid.	Unpaid.	TOTAL.	Paid.	Unpaid.	TOTAL.	Paid.	Unpaid.	TOTAL.

Central Provinces	64,077	46,883	110,960	63,658	49,419	113,077	1,384	8,915	10,299
Oudh ...	99,002	224,530	323,532	67,074	149,493	216,567	3,843	35,210	39,053
Rajputana ...	14,363	7,419	21,782	19,045	5,508	24,553	361	1,650	2,011
Assam ...	17,956	18,523	36,479	15,592	16,090	31,682	349	2,261	2,610
TOTAL ...	1,750,222	1,948,047	3,698,269	1,484,808	1,133,320	2,668,128	42,489	251,973	294,462

23. The Government of India watch with great interest the progress of these District Offices, which in some respects perform the important work of being pioneers of the imperial post. As each District Post Office becomes self-supporting it is taken over by the imperial department, and thus funds are liberated for the establishment of new offices by the District Post. It is in this direction that the Government of India mainly look for the development of the postal service among the agricultural population, which in fact can hardly be said as yet to have been reached; and in the extension of postal facilities among the vast masses of these, hand in hand with the extension of rural education, there is an unlimited field for the growth of correspondence.

24. It will be very satisfactory if the means can be found of so amending the law in Bengal as, without adding to local burdens, to enable the Post Office to make the best use of the funds provided by local taxation.

25. Enquiry will be made in the Foreign Department into the alleged disinclination of Native States to cooperate in the advance of the imperial Post Office. The Director-General should impress upon the officers of the department the importance of obtaining by tact and conciliation the countenance of the native authorities to the extension of the Post Office in their jurisdiction.

26. PARA. 44. It appears that the Mutual Guarantee Fund is increasing, and that it much more than suffices for the calls made upon it. The sum of Rs. 20,925 was deducted from the allowances of the officers of the department and added to the Fund during the year, and only Rs. 880 was decreed against it, leaving a balance of Rs. 38,859 at credit of the Fund. A large part of this balance will be eventually restored to the subscribers as they quit the department. Still the facts seem to indicate the desirability of reducing the subscriptions at any rate for the present, and the Governor General in Council is prepared to consider any proposal which the Director-General may think fit to make in this direction.

27. PARAS. 46 AND 47. The successful discovery of the gang whose operations are here described, is creditable to the Post Office administration and to the Police.

28. PARAS. 49—51. The bullock train and passenger services (Non-postal Services) yielded a profit of Rs. 2,38,178, being a large increase over the profit of last year (Rs. 1,25,436).

29. PARAS 52—55. The financial results shew a decided improvement as compared with 1873-74. The net cost of the whole department, if no charge be made for official postage, was Rs. 4,66,388, being Rs. 3,05,063 less than the corresponding charge (Rs. 7,71,451) last year. The net revenue, if credit be given for the charge for official postage, is Rs. 6,16,182, being Rs. 3,33,339 more than the corresponding figure of last year (Rs. 2,82,843).

30. PARA. 56. The indirect charges quoted in the margin of this paragraph are Rs. 4,86,246. In future, one-fourth of the whole charge for the establishments of the department should be added among these indirect charges as the cost of pensions and leave allowances; and a reasonable sum should be estimated as the share of the department in the cost of the several marine subsidies. If count be taken of these two items, the Post Office is still far from being a source of revenue to the State. Still, the Governor General in Council is satisfied with its progress towards this result.

31. PARA. 57. The Governor General in Council has directed in this review various additions to the valuable information already given in Appendix XIII. The Director-General of the Post Office, should add, in other columns, any other important facts bearing upon the history of the department, so as to make this appendix, which is already full of interest, contain a complete resumé of its progress.

32. PARA. 58. The Governor General in Council has read with pleasure the testimony borne by the Director-General to the good services of the following officers:—

Mr. T. W. Gribble, Post Master General, Bengal.
The Hon'ble E. R. Bourke, Post Master General, Madras.
Mr. P. Sheridan, Chief Superintendent, Travelling Post Office.
Mr. M. Percy, Post Master, Calcutta.
Baboo Anand Gopal Sen, Post Master, Bankipur.
Messrs. E. C. George, Barton, Groves, and J. DeCaster, Pandit Sundar Lal, Khan Bahadur Cowasji, and Girdhāri Lal.

33. The Government of India acknowledge the efficiency with which Mr. F. R. Hogg has administered the department during the year.

ORDERED, that this Report and Review be published in the *Gazette of India*, and that copies be sent for information and further consideration to the Public Works Department with reference to paragraph 8, the Home Department with reference to paragraph 10, and the Foreign Department with reference to paragraph 25.

Ordered also that a copy of the review be forwarded to the Director General of Post Office of India.

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

QUANTITIES OF CAST AND WROUGHT-IRON IMPORTED INTO INDIA DURING THE LAST FIVE YEARS.

No. 323 R., dated Fort William, the 3rd February 1876.

Read again—

Letter to Messrs. Rutherford and Co., Agents, Bengal Iron-works Co., No. 621 R. of the 6th March 1875.

OBSERVATIONS.—For the information of intending manufacturers of iron in India, it was agreed to publish, from time to time, in the Supplement to the *Gazette of India*, statements of the quantity and description of iron-work imported into India by the Government for the last three years.

2. The returns asked for at the time have been received in a shape which does not admit of their being abstracted in as much detail as is desirable, and revised returns have now been called for. Meanwhile, the following general statement may be useful.

3. The State Railways have during the last four years imported about 160,000 tons of wrought-iron, giving an annual average of 40,000 tons. The average annual supply of the other branches of the Public Works Department, Telegraph Department and Military Department has been—

Wrought-iron ...	...	3,250 tons.
Cast-iron ...	...	3,000 "
Iron not specified	...	2,750 "

The total annual average of all sorts therefore amounts to 49,000 tons.

ORDER.—Ordered, that this Resolution be forwarded to the Home Department for publication in the Supplement to the *Gazette of India* for general information.

H. DRUMMOND, *Colonel, R. E.,*
Deputy Secretary.

SUPPLEMENT TO THE STATEMENT OF PRICES-CURRENT OF FOOD-GRAINS FOR THE 1st HALF OF DECEMBER 1875, PUBLISHED IN PAGES 10, 11, 16 AND 17 OF THE SUPPLEMENT TO THE GAZETTE OF INDIA, DATED 8TH JANUARY 1876.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3rd FEBRUARY 1876.

GENERAL REMARKS.—The only rainfall reported during the week has been a trifling shower at Darjeeling, a shower at Gauhati, and light falls at Ráwalpindi, Peshâwar, Jullundur, Lahore and Delhi in the Punjab. In Madras prospects continue unchanged. In Bombay the *rabi* harvest has begun in the Deccan districts; the condition of the crops is fair. Reports are good from the Central Provinces, Berar, Central India, and the greater part of Rajputana: in Bhurtpore rain is wanted. In Bengal the rice crop is almost all reaped, with a fair yield upon the whole; the spring crops promise well, but require rain. In the North-Western Provinces and Oudh prospects are generally good, but rain is wanted. Rain is also required in the southern districts of the Punjab. There is no improvement reported from Mysore. Reports om Burmah and Assam are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 3rd)	*Nil*	Standing crops generally good; castor harvested; outturn one-fourth; markets well supplied; prices steady; cholera 33 seizures, 13 deaths in 4 taluks; fever general; mild small-pox in 4 taluks; epizoötic aphtha general; pasture withering.
Kurnool („ 2nd)	*Nil*	Season favourable; paddy and *cholum* harvested; other crops flourishing; markets well supplied; prices steady; fever prevalent; cholera in Cumbum taluk; cattle disease in Ramalkota and Pattikonda; pasture and water abundant.
Tanjore („ 3rd)	*Nil*	Rivers almost dry; water in tanks scanty; water over sluices none; cultivation—a few dry crops; standing crops not thriving in places for want of rain; harvest—some wet crops; yield moderate; markets well supplied; prices slightly rising; cholera continues, 287 seizures, 227 deaths; cattle disease in places, some loss; pasture insufficient.
Trichinopoly („ 2nd)	*Nil*	Prices steadily rising; all other items as last week; prospects not very favourable; cholera 109 seizures, 51 deaths.
Malabar („ 3rd)	*Nil*	Harvesting second crop almost completed; markets well supplied; prices steady; bowel complaints in 7 taluks, 469 cases, 358 deaths; small-pox prevalent in North Malabar; cattle disease slight, chiefly in Wynaad. *General Remarks.*—General prospects same as last week.
Bombay— (Feb. 3rd)		
Sind. (Feb. 2nd)		
Kurrachee ...	...	Heavy squall at Ghorabári on night of 1st instant.
Shikarpur ...	...	River slowly rising; cattle disease prevalent throughout the Collectorate; *rabi* crops healthy; public health fair.
Hyderabad ...	...	Weather cloudy and threatens rain.
Upper Sind Frontier ...	...	*Rabi* crops promising, but slightly affected by frost in Kashmor taluka; rain wanted; public health fair.
Guzerat.		
Ahmedabad ...	...	No change.
Surat ...	...	Cotton-picking commenced.
Kaira ...	...	Late crops and cotton thriving.
Broach ...	...	Public health and crops good.
Khandesh and Nasik.		
Khandesh ...	...	State of *rabi* and *kharif* crops the same as before; fever in five talukas.
Nasik ...	...	Rabi middling; fever prevalent.
Konkan.		
Tanna ...	...	*Rabi* thriving; prospects fair; small-pox in the town of Tanna.
Deccan.		
Poona ...	...	*Rabi* crops being reaped in some places; prospects as before.
Ahmednagar ...	...	Harvesting of *rabi* progressing.
Sholapur ...	...	Reaping of *rabi* progressing; outturn 8 *annas* in the *rupee*; in most talukas health good.
Satara ...	...	*Rabi* crops good; cotton crops in Mán indifferent.
Southern Mahratta Country.		
Belgaum ...	...	*Rabi* crops good; cotton indifferent, except in Sampgaon and Parasgad.
Dharwar ...	...	Harvest of late crops commenced; cholera increasing; fever and cattle disease decreasing.
Kanara ...	...	Cultivation favourable; 5 deaths from cholera.
Kaladgi ...	...	Anticipated outturn from *rabi* crops about 11 *annas* in the *rupee*; cotton generally indifferent; 26 deaths from cholera at Bádámi, and 2 at Bágalkot.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather cold; *rabi* crops as before; health good; cholera at Morvi continues.
Wadhwán ...	...	Weather cool; crops good; cotton-picking commenced in Sáylá taluka.
Baroda ...	...	Cotton-picking commenced in some districts; *kharif* and cotton prospects continue well. *General Remarks.*—Health and crops fair in Sind, Guzerat and the Deccan; fever prevalent in Khandesh and Nasik; cholera continues in Morvi, Kaladgi and Dharwar.
Bengal—(Feb. 3rd)		
Chittagong ...	*Nil*	Weather warmer than last week, the south wind having begun; cloudy, and a prospect of rain falling; rain is still wanted; small-pox is prevalent; inoculation being much practised; cholera is decreasing.
Noakhally ...	*Nil*	Weather cloudy and foggy; pulses, chillies, linseed, *sesamum*, &c., are progressing fairly; a little rain would do much good; cholera still prevails in certain parts of the district.
Chittagong Hill Tracts...	*Nil*	Weather cloudy this day; during the first part of the week it was very cold; mustard is being gathered in small quantities; tobacco and chillies are doing well.
Hill Tipperah ...	*Nil*	Weather cloudy and unsettled for the greater part of the week, and not so cold as in last week; no change to report regarding the state and prospects of the crops.
Backergunge ...	*Nil*	Weather cold and dry; rain is much wanted; state and prospects of the crops are fair; public health is improving.
Furreedpore ...	*Nil*	Weather continues seasonable; the *rabi* crops it is reported will suffer should no rain fall.
Dacca ...	*Nil*	Weather seasonable; rain would do good to the crops, but the heavy dews have prevented much damage.
Mymensing ...	*Nil*	Weather fine and dry, with westerly wind; this wind is unseasonable and may bring rain, which is much wanted; pulses are fair, and *boro* crop of rice so far favourable.
Tipperah ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops since last week.
24-Pergunnahs ...	*Nil*	Weather seasonable; harvesting of the late rice is nearly brought to a close; winter crops are promising well; cholera is abating at Barripore, but it shows no sign of decrease at Diamond Harbour.
Jessore ...	*Nil*	Weather much cooler than last week; strong westerly winds prevailing; late rice crop is nearly all harvested; rain is much wanted, both for the crops now standing and for ploughing for future crops.
Nuddea ...	*Nil*	Weather cool and pleasant; the drought is telling on the *rabi* crops in most parts of the district; the yield will be somewhat light, but the fine weather is ensuring a successful harvest of what there is.
Moorshedabad ...	*Nil*	Weather seasonable; there is no change to report in the state and prospects of the crops; if any change, there is a slight rise in the prices of rice and black pulse.
Pubna ...	*Nil*	High winds from south and west; there appears some hope of an early fall of rain; the *sóna* crop is being gathered, and the yield is poor owing to the want of rain; the spring crops are now beginning to suffer from the same cause; cholera is abating, but has not yet disappeared.
Rajshahye ...	*Nil*	Weather clear and cool, and no appearance of change; the rice harvest is nearly completed; the cold weather crops require rain badly; cutting of mustard crops has commenced in Nattore; public health is good.
Bogra ...	*Nil*	Weather fair; no change in the state and prospects of the crops since last report, *i. e.*, *amun*, or the late rice crop, is almost entirely cut, and a fair average yield is expected; other crops promise well.
Maldah ...	*Nil*	Weather cool; the *boro* crop of rice, the transplanting of which still continues, is doing well; the *rabi* crop is suffering throughout the district from want of rain; the *kaimunti* crop, which has been all reaped, has yielded a fair outturn; one death has taken place from cholera and 3 from fever during the week.
Dinagepore ...	*Nil* (No rain in previous week.)	Weather cold and generally fine, but cloudy on the 26th instant; the nor'-wester season has set in, but no storm as yet; the paddy crops are nearly off the ground; the prospects of the cold weather crops are fair, but would have been better if rain had fallen in time.
Rungpore ...	*Nil*	Weather cold and seasonable; tobacco crop is good; wheat is fair; mustard is nearly all gathered; rain is wanted.
Cooch Behar ...	*Nil*	Weather cold and fair; prospects of tobacco and other crops continue unfavourable for want of rain.
Jalpaiguri ...	...	The last few days have been cloudy and promised rain; rain is greatly needed; tobacco crop looks greatly dried up, and if rain does not fall soon, it will not be up to average.
Darjeeling ...	·20 (·26 in previous week.)	Weather very cold and misty, with occasional sunshine during the week; the slight rains during the previous week have done some good to the barley and wheat now on the ground; but more is wanted; in the Terai harvesting of the winter rice crop is going on; there will be a very small deficiency in the outturn.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Midnapore ...	*Nil*	Weather seasonable; state and prospects of the crops are fair.
Howrah ...	*Nil*	Weather fine, barometer is low; state and prospects of the crops remain unchanged.
Hooghly ...	Return not received.	Weather very cold and extraordinarily foggy on the 25th, 26th and 27th; *sowing*—sowings of a species of rice called *jali dhan* are going on in a small part of the chur lands in Bolaghur; *cultivation*—spring crops are doing well; late potatoes cost heavy irrigation; dews heavy; barley and wheat (small crops) sprouted well; rain is wanted at the end of a fortnight; *harvest*—rice is well closed; *kolai* or pulses closed; outturn is 12 to 14 annas; sugarcane is being cut and pressed; potatoes being dug up, the yield is from 12 to 14 annas; vegetables are abundant.
Burdwan ...	*Nil*	Prospects of winter crops and sugarcane are same as before, *i. e.*, they are doing well; general health of the district is comparatively good.
Bankoorah ...	*Nil*	Weather dry; west wind in the early part of the week; no change in the state and prospects of the paddy crops; winter crops are doing well; health of the district continues good.
Beerbhoom ...	*Nil*	Weather seasonable; winter crops are promising well.
Sonthal Pergunnahs ...	*Nil*	Weather colder, with less wind than last week; the little *rabi* crop there is has suffered a good deal from want of rain.
Bhagalpur ...	*Nil*	Rain is badly wanted for the *rabi*, though in many places the crops are very healthy; large importations into Soopool from Mudehpoora are reported, and, strange to say, common rice is cheaper in the Soopool sub-division than it is at head-quarters, and in many places cheaper than at Mudehpoora; prices of rice ranging from 20 to 25 seers; price of rice at Mudehpoora is 21 to 25 seers; *murwa* is selling at 29 to 32 seers in Soopool; condition of the people north of the Ganges is still good; general health of the district is very good.
Monghyr ...	Return not received.	Weather fair, with occasional high west-winds; the *rabi* prospects continue fair in the extensive low-lying deorahs; the crops are very good.
Purneah ...	*Nil* (No rain in previous week.)	Weather dry and getting warmer; westerly winds at the commencement and middle of the week; at present the wind is blowing from the east; rain is much wanted for the *rabi* crops and cattle pasturage, and more particularly for wheat and barley, which are suffering in consequence.
Durbhangah ...	*Nil*	Weather very cold, with west wind; no change in the prospects of the *rabi* crops since the date of the last report, except that indigo and tobacco have been considerably injured by frost in the south of the district; prices of food-grains in the Mudhoobunnee sub-division are stationary.
Mozufferpore ...	Return not received.	Weather cold and cloudy; there is no change in the prospects of the crops in the Sudder sub-division; prices are easy; in Hajeepore sub-division the crops look fairly well, except in the vicinity of Lallgunge, where 4 annas is expected; prices at Hajeepore and Lallgunge are very low on account of importation from Oudh and North-Western Provinces; in Seetamarhee sub-division every thing looks better since the last rain which in some parts of the north of the district is said to have been as much as 2 inches; the sub-divisional officer reports that opium prospects except about Shewhur are bad.
Sarun ...	*Nil*	Weather cold; cloudless sky with dry westerly wind; the prospects of the crops continue fair, but rain would do much good now; mustard and peas are being harvested in places; wheat and barley are in ear; *rukur* pulse is doing well, and fast reaching maturity; poppy is flourishing; sugarcane is being manufactured, and yielding fairly; prices (rice excepted) are favourable; general health is good.
Chumparun ...	*Nil*	Weather nice and cool; the *rabi* and poppy are growing well; late rice crop is harvested.
Patna ...	Return not received.	Weather seasonable; no change in the prospects of the crops since last report; health of the district is good.
Gya ...	*Nil*	Weather cooler, with high west and north-west winds almost incessantly; occasionally cloudy, with unfulfilled appearance of rain; from the east it is reported that if rain should fall the *rabi* crops may still be a full one, otherwise 12 annas, and from the west, that the crops are only fair and will suffer a good deal if there be no rain, still more in the far south-west; no return from Jehanabad is received.
Shahabad ...	Return not received.	Weather cold, with very high westerly wind in the commencement of the week; *rabi* crops are ripening; some injury is done by high westerly winds; in Buxar it is thought the crop will not be a full one.
Hazaribagh ...	*Nil*	Weather—cloudless sky, with strong westerly wind, no improvement in the prospect of the crops since last report, and the little pasturage there is will be dried up for want of moisture if these high winds continue.
Lohardugga ...	*Nil*	Weather still cool; very strong westerly winds throughout the week; no rain; the prospects of the *rabi* crops still continue good, but the cry for rain is becoming louder; the Assistant Commissioner of Palamow reports that the crops, particularly gram, are beginning to suffer from want of rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Manbhoom ...	*Nil*	Weather cool, but rain is wanted; the crops on the ground are doing well; there has been no rain, and the Deputy Commissioner presumes that the crops, which are not on any extended scale, have been irrigated from the numerous tanks; owing to the call upon these tanks for the winter rice and the crops now on the ground, the Deputy Commissioner is afraid that unless rain soon falls, there will be a great want of water for man and beast before long.
Singhbhoom ...	*Nil*	Weather seasonable; want of rain has not injured the *rabi*, but for the first ploughings some rain now will do good; the district is healthy.
Balasore ...	*Nil*	Weather fine, and towards the end of the week much colder; harvesting of the paddy crop is completed; outturn is excellent; miscellaneous crops are good; cholera and small-pox are in parts of the district, both in the north and south.
Cuttack ...	*Nil*	Weather cold and dry in the district, but not in the sudder station; all crops are doing well; public health is good.
Pooree ...	*Nil*	Weather clear and cold; harvesting of the main rice crop is almost complete; cotton plantation has been commenced; sugarcane is being cut; tobacco is being planted; the *dalwa* paddy crop is in progress.
		General Remarks.—No rainfall is reported from any of the districts for the week under review, except a slight fall in Darjeeling; the rice crop is almost all off the ground and the harvest is nearly completed; the yield will be a fair one on the average; the spring crops are promising well, but they need rain.
N. W. Provinces—		
Benares (Feb. 2nd)	*Nil*	Prospects of crops good.
Jhansi („ 3rd)	...	No change.
Agra („ 2nd)	*Nil*	Ditto.
Meerut ...	...	Ditto.
Bareilly ...	...	
Almora* (Jan. 31st)	...	Weather unseasonably warm; crops very good as yet, but rain is urgently wanted.
Allahabad (Feb. 2nd)	...	No change.
Punjab—		
Delhi (Feb. 2nd)	Slight shower on the 1st instant.	Crops doing well; health good.
Hissar „	*Nil*	*Rabi* prospects favourable, but rain wanted; health good.
Umballa „	*Nil*	Crops withering; health good.
Jullundur „	·4	More rain wanted; health good.
Lahore „	Slight shower on the 1st instant.	Crops and health good.
Mooltan „	*Nil*	*Rabi* prospects good, but rain wanted; health good.
Dera Ismail Khan „	...	Slight showers; health and harvest prospects good.
Rawalpindi „	1·	*Rabi* prospects favourable; health good.
Peshâwar „	·2	Agricultural prospects favourable; slight fever prevalent.
		General Remarks.—Agricultural prospects generally fair, but rain wanted in Southern districts; health of province good.
Oudh—		
Lucknow (Feb. 2nd)	...	Agricultural prospects continue favourable, and public health generally good; strong westerly wind; rain wanted.
Sitapur „		
Fyzabad „		
Central Provinces—		
Upper Godavari (Jan. 29th)	...	Clear and cold; prospects favourable; health improving; prices rising.
Bilaspur ...	...	Getting warm; prospects favourable; fever prevalent; prices steady.
Raipur ...	...	Clear; prospects good; cholera ceased; prices falling.
Sambalpur ...	...	Clear; harvest over; health good.
Chhindwara („ 30th)	...	Clear; strong winds; *kharif* cutting; *rabi* looking favourable; health good; prices steady.
Chanda ...	...	Weather fair; rice threshing; *rabi* partly injured by caterpillars and blight; fever prevalent.
Betul („ 31st)	...	Cloudy; prospects of *rabi* good; health improved; prices stationary.
Balaghât „		Clear; rice threshing completing; health good; prices steady.
Bhandara (Feb. 1st)	...	Cloudy; *rabi* promising; health improving; prices easy.
Nagpur („ 2nd)	...	Weather fair; prospects good; cattle disease in few places; prices unchanged.
Wardha ...	...	Clear; *rabi* crops favourable.
Jubbulpore ...	...	Clear and cold; *rabi* prospects good; cattle disease in two tahsils.
Saugor ...	...	Cold; *rabi* promises fair; cow and small-pox prevalent.
Nimar ...	...	Crops being cut; prices stationary.
Seoni ...	...	*Rabi* cutting commenced; health good.
Hoshangabad		Cool; *rabi* promises fair; cotton out-turn half average.
Narsinghpur ...	...	*Rabi* looking healthy.
		General Remarks.— *Rabi* everywhere promises well.

* In the report for the week ending the 27th ultimo, published in the Supplement to the *Gazette of India* of the 29th idem, the "General remarks" for the N. W. Provinces should be read as applying to the district of Almora.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—		
Arrakan Division (Feb. 4th)	...	Public health good.
Pegu Division.		
Rangoon (Feb. 4th)	...	No fresh cases of cholera reported; slight cattle disease in Hmawbee.
Bassein „	...	Health good.
Henzada „	...	Cholera over; public health good; harvest finished.
Prome „	...	Thirteen deaths from cholera since last report; small-pox continues at Shweedoung.
Thayetmyo „	...	Health good; rain threatening.
Thonkwa „	...	Health and crops good; crops being reaped; slight cattle disease.
Tenasserim Division „	...	Public health good; bulk of crops harvested; cattle disease abating in Amherst district.
Assam—		
Gauhati (Feb. 3rd)	0·16	Mornings misty and cold, days clear and cool; lands for *asu* being ploughed; mustard seeds, pulse, almost reaped, a fair outturn; tea season over, good yield.
Sylhet „	*Nil*	Price of rice risen slightly and cultivation commenced; cholera prevalent.
Hyderabad Assigned Districts—		
Umraoti (Feb. 3rd)	...	*Rabi* promising; public health good.
Mysore and Coorg— (Feb. 3rd)	*Nil*	Prospects of season continue unsatisfactory; cattle suffering from murrain in some of the Murnad taluks; cholera slightly increased in the three districts where prevalent.
Rajputana—		
Bhurtpore (Feb. 3rd)	...	Clear sun-shiny weather; no sickness; crops progressing favourably; rain much wanted.
Ajmere „	*Nil*	Small-pox still reported; otherwise health and prospects good.
Jeypore „	...	No change; health and prospects good.
Central India—		
Indore (Feb. 2nd)	...	Health and prospects good.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR THE YEAR 1874-75.

Nos. 29—43 I, dated Fort William, the 22nd January 1876.

Read—

Letter from the Government of the Punjab, Public Works Department, Irrigation Branch, No. 5175 I, dated 24th November 1875, forwarding a copy of the Revenue Report of Irrigation Works in the Punjab, by the Chief Engineer, for the year 1874-75, and of the Resolution of that Government reviewing the same.

OBSERVATIONS.—The area irrigated has increased, taking all the canals, both permanent and inundation, from 989,823 acres in 1873-74 to 1,208,703 acres in 1874-75. This increase of 218,250 acres is equivalent to an increase of 22 per cent. Except in 1869-70, the total area irrigated has never attained to so high a figure as in the year under review.

2. The total revenue of all the canals has increased from Rs. 16,38,951 in 1873-74 to Rs. 17,59,185 in 1874-75; the difference of Rs. 1,20,234 is equivalent to only 7 per cent. in revenue as against 22 per cent. in the area. This shows that the increase in area has been chiefly in the lower rated crops.

3. The working expenses have fallen from Rs. 11,76,470 to Rs. 11,62,289, but this favorable result is partly due to its having been found impossible, owing to the demand for water, to close the canals for the usual repairs.

4. The figures given in this Report differ from those in the finance accounts by Rs. 1,383; this difference is due to the inclusion in the Report of the fees paid to Lumberdars and Putwarees for fluctuating land revenue in the Montgomery District, and which being a civil charge necessarily do not appear in the finance accounts.

5. The operations of the year are considered by His Excellency in Council to have been satisfactory, and are creditable to the canal administration.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Secretary of State, and to the Financial, and Revenue, Agriculture and Commerce Departments for information.

Ordered also, that copies of the Resolution be forwarded to the Government of the Punjab and the several other* Local Governments and Administrations in the Public Works Department, Irrigation Branch, for information.

* The Governments of Madras, Bombay, Bengal and North-Western Provinces.
The Chief Commissioners of Oudh, Central Provinces, British Burmah, Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajpootana.

Ordered further, that this Resolution, the Resolution of the Local Government, and the Chief Engineer's Report, with a few selected tables, be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

C. H. DICKENS, *Colonel, R.A.,*
Secy. to the Govt. of India.

Proceedings of the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies, in the Public Works Department, No. 5174 I, dated 24th November 1875.

Read—

Revenue Report for 1874-75, by Chief Engineer, Irrigation Works, with enclosures.

RESOLUTION.—The aggregate expenditure during the year on all the works under the control of the Irrigation Department amounted to Rs. 29,25,487; of this, Rs. 7,35,588 was

contributed by Native States on account of the Sirhind Canal, so that the amount to be debited to Capital was Rs. 21,89,899. Of this, Rs. 9,12,063 was due to canals in operation, after deducting Rs. 12,155 written back on account of the Mádhopur Workshops, and Rs. 12,77,836 to canals under construction.

2. The total Capital invested up to the end of the year has been—

	Rs.
On Canals in operation	1,92,04,186
Ditto under construction	66,53,840
Mádhopur Workshops	5,66,211
	2,64,24,237
Contributed by Native States for Sirhind Canal	32,80,509
Total Expenditure	2,97,04,746

3. The total income of the canals under construction was Rs. 17,59,185 excluding, and Rs. 25,44,370 including, land revenue dependent on the works. The working expenses amounted to Rs. 11,62,289, so that the net revenue amounted to Rs. 5,96,896, or 3·26 per cent. on the Capital, excluding land revenue, and Rs. 13,82,081, or 7·56 per cent., if we include that item.

4. The above statement is based on the collections; if the assessments, or the amount earned by the operations of the year, be taken as the basis of the calculation, the percentages of profit become 4·32 and 9·83. The similar percentages for the preceding year were 3·42 and 8·45 respectively, which show a satisfactory improvement in the present year: this was due to the short rainfall in the cold season.

5. The charge for interest for the year amounts to Rs. 12,84,224, and the difference between net revenue and the charge for interest shows an excess of revenue amounting to Rs. 78,672. For canals in operation, including the Mádhopur Workshops, the excess of revenue is Rs. 3,51,575. By the assessments or earnings of the year, the profit becomes Rs. 5,59,850 for the whole works, and Rs. 8,32,753 for the works under construction.

6. The difference between the net revenue and the charge for interest on canals in the Punjab up to the 1st April 1875 showed a profit of Rs. 1,86,73,618, or nearly 71 per cent. of the Capital of Rs. 2,64,24,237 invested by Government on these works.

7. The year has been a successful one, both on the Permanent and Inundation Canals; the area irrigated has only been exceeded once since 1867-68, *viz.*, in the dry season of 1869-70, when 1,261,410 acres were irrigated, against 1,208,073 in the present year. The following table shows a comparison:—

AREA IRRIGATED.	1874-75.	1873-74.	1869-70.	Average since 1867-68.
	Acres.	Acres.	Acres.	Acres.
Permanent Canals... ...	662,660	543,893	730,470	671,402
Inundation „	545,418	445,930	530,940	474,975
TOTAL ...	1,208,073	989,823	1,261,410	1,146,377
RAINFALL.				For 10 years.
Permanent Canals.	Inches.	Inches.	Inches.	Inches.
Western Jumna Canal ...	28·14	32·36	18·18	28·13 for 5 stations.
Bári Doáb Canal	18·76	23·33	19·88	25·10 for 9 „
Inundation Canals.				
Delhi and Gurgáon Works ...	24·92	39·02	16·10	24·83 for 5 „
Upper Sutlej Inundation Canals	8·57	8·00	8·05	8·62 „ 4
L. S. and C. Inundation Canals	4·26	4·93	5·60	4·93 „ 3 } not quite regular.
Indus Inundation Canals ...	6·20	6·20	5·55	6·28 „ 2

8. The following table shows a comparison between the working expenses and income (assessments) of the last four years; it is very favorable to the year under review, but this is in some measure due to the want of rain in the cold season rendering it impossible to close the canals for repairs:—

	Working expenses.	PERCENTAGE ON INCOME.	
		Direct.	Total.
	Rs.		
1874-75	11,62,289	59	39
1873-74	11,76,470	66	42
1872-73	12,01,230	64	43
1871-72	12,50,205	60	41

WESTERN JUMNA CANAL.

9. There was an increase in the area watered of 71,100 acres, a decrease in the area of sugar-cane, but an increase of rice and cotton and wheat. In the latter it amounted to 74 per cent.

10. The profit by the assessments of the year was 20·29 per cent. on the direct, and 31·44 per cent. on the total income, being nearly 5 per cent. in excess of the former and 4 per cent. of the latter in the previous year.

11. The duty obtained from the water showed a decrease of 11 acres per cubic foot in the kharif, and an increase of 65 acres in the rabi.

12. The balance of water-rate uncollected at the end of the year was less than one-half of that at the end of 1873-74.

DELHI AND GURGAON WORKS.

13. There was a large decrease in the area irrigated, owing to the deficiency of the rain-fall, on which the filling of the reservoirs depends, but there was an increase in sugar-cane and cotton, the more valuable crops. The former crop has not been grown in this district since 1869-70 until this year.

14. The repairs were costly, being Rs. 10,215, or 80 per cent. in excess of those of the previous year, owing to the heavy rains of that year causing great damage to the banks.

15. There was a loss of 10·36 per cent. on the direct income, and a profit of 3·01 on total income; but there is a doubt about the correctness of the latter item, which could not be cleared up in time for this report. It is explained in Chief Engineer's Report.

BARI DOAB CANAL.

16. There was an increase in the area irrigated during the year of 47,667 acres, although there was a falling-off of 17,699 in the kharif. The decrease was in sugar-cane, rice and cotton, but this was more than compensated for by the large increase in wheat.

17. The profit by the assessments of the year was 3·07 per cent. on direct and 4·64 on total income, against 2·37 and 3·77 in the previous year. The working expenses also decreased, being 44 and 35 per cent. of the revenue, against 52 and 41 per cent. in 1873-74, but the impossibility of closing the canal was the principal cause of decrease.

18. The duty obtained from the water in this year was very slightly less in the kharif, and 11 acres per cubic foot more in the rabbi than in the previous year.

19. The proportion of the village areas irrigated is in many cases in excess of 20 per cent. of the gross area of their lands, indeed in 1874-75 the area irrigated was 24·5 per cent. of the gross area. Some steps will have to be taken to limit this proportion, in order to distribute the water fairly along the whole length of the canal, and to prevent excessive flooding.

20. There was again a large increase in the mill-rent, but this was in some measure due to their being in work on more days than in last year, owing to the canal not being closed.

21. The balances uncollected at the end of the year were very small—only Rs. 10,191 out of a demand of Rs. 5,87,753.

INUNDATION CANALS.

LOWER SUTLEJ AND CHENAB.

22. The area irrigated was the largest on record, being 273,688 acres, the crop of 1869-70 of 243,094 being the next; in 1873-74 it was only 197,064.

23. The direct revenue is very small indeed, but the total income shows a profit of Rs. 157·24 per cent. This is less than in the two previous years on account of a decrease in the miscellaneous revenue and an increase in the establishment charges. The increase in area irrigated does not add to the revenue, which is at present a fixed sum.

24. The cost of maintenance per acre irrigated and to the cultivators were ·97 and 1·66 respectively, against 1·24 and 2·09 in the previous year. The reduction is due to the increase in area irrigated, without a corresponding increase of charge.

UPPER SUTLEJ SERIES.

25. There was a loss by direct revenue alone of 23·18 per cent., and, including indirect, of 3·22 per cent.; last year the losses were 24·07 and 9·21 per cent. respectively. Taking the assessments of the year, the percentages were 23·18 and 0·24 per cent. respectively. This improvement is due to an increase in the area irrigated from 65,233 acres to 84,120 acres; 10,672 acres of this was in the more valuable crops—rice and cotton.

26. This is only the second year in which the system of a fluctuating charge has been introduced, and judging by the cost of the irrigation to the cultivators in the lower part of the Doab, the rates are too low; still it is not advisable to make another change at present.

INDUS SERIES.

27. There was an increase of 8,492 acres in the area irrigated over that in 1873-74, but this is principally in the less valuable crops.

28. There had been an error in the land revenue credited to these canals in the two previous years, which caused a deduction in the profits, so that the loss was 0·5 per cent. on the total income for 1873-74, and 9·67 in the present year.

29. The above are collections, the assessments of the year were still less, and the loss by them will be 14·69 per cent. This is due to the increase in the cost of maintenance, caused by damage from floods, while the revenue is stationary; but, as the land revenue will be increased in the next season from Rs. 80,938 to Rs. 1,69,718, a better result may be anticipated in future.

SHAHPUR CANALS.

30. The area irrigated was increased by 2,275 acres. The working expenses were Rs. 3,690, and the revenue Rs. 7,987, so that there was a profit of 19·82 per cent. on the Capital. In the previous year the profit was 5·41.

By order of the Hon'ble the Lieutenant-Governor,

H. W. GULLIVER, COLONEL, R. E.,
Joint-Secretary to the Government of Punjab, P. W. D.,
Irrigation Branch.

CHIEF ENGINEER'S REVIEW OF REVENUE REPORTS FOR 1874-75.

WESTERN JUMNA CANAL CIRCLE.

WESTERN JUMNA CANAL.

1. The addition to the Capital during the year has been Rs. 4,69,337; Rs. 4,83,668 was expended from the Extraordinary grant, and Rs. 3,850 from Ordinary funds, but the Suspense balance under the latter heading was decreased by Rs. 15,681, so that up to the end of the year the aCpital invested amounts to Rs. 88,11,496.

2. The principal expenditure was on the—

	Rs.
Jumna dam	2,50,022
New Main Line	52,369
New Delhi Branch	8,658
Distributaries	1,39,189

from Extraordinary funds; but for the diversion of the Pandhoi nallah Rs. 8,813 was charged to the Ordinary grant.

3. The Revenue Account as prepared by the Controller, based on collections, shows a net profit of Rs. 5,74,168 on the direct income, and Rs. 9,46,731 on total income, giving a percentage of 17·18 and 28·32 respectively on the Capital at the commencement of the year, Rs. 33,42,159. These percentages were 22·21 and 32·17 in the previous year.

4. If the assessments of the year be taken instead of the collections, the results show a profit of Rs. 6,78,219 on direct and Rs. 10,50,782 on total income, which give percentages of 20·29 and 31·44, against 15·36 and 27·32 in the previous year. This result is due to the great demand for water in the cold season of 1874-75.

5. The result for the past three years, based on the assessments or earnings of the year, has been as follows:—

		1874-75.	1873-74.	1872-73.
		Rs.	Rs.	Rs.
INCOME	Water-rates	9,47,929	8,10,302	9,03,116
	Miscellaneous	69,027	41,594	47,781
	Total Direct ...	10,16,956	8,51,896	9,50,897
	Indirect ...	3,72,563	3,72,563	3,72,563
	TOTAL	13,89,519	12,24,459	13,23,460
EXPENDITURE ...	Works, &c.	1,03,806	1,24,626	1,43,762
	Establishment	2,34,931	2,48,356	2,57,416
	TOTAL ...	3,38,737	3,72,982	4,01,178
PERCENTAGE ON CAPITAL	Direct income	20·29	15·36	18·44
	Total	31·44	27·32	30·95
	Area irrigated, acres ...	382,847	311,747	351,821

which shows a decrease in the cost of maintenance, as well as an increase in the revenue of the present year.

6. The charges for maintenance per acre irrigated have been as follows :—

	1874-75.	1873-74.	Average of five years.
Whole canal ...	·88	1·20	·96
Repairs of distributaries...	·03	·06	·06

The decrease in the present year is due to the demand for water in the cold season rendering it impossible to close the canal for repairs, and is quite abnormal.

7. The areas in acres irrigated since 1869-70 are shown in the following table :—

	Kharif.		Rabbi.		Total.	
	Rain-fall.	Area.	Rain-fall.	Area.	Rain-fall.	Area.
	Inches.	Acres	Inches.	Acres.	Inches.	Acres.
1874-75 ...	25·42	160,118	2·72	222,729	28·14	382,847
1873-74 ...	29·10	171,630	3·26	140,117	32·36	311,747
1872-73 ...	33·42	202,371	1·15	149,450	34·57	351,821
1871-72 ...	26·20	187,647	4·74	256,738	30·94	444,385
1870-71 ...	24·04	218,535	3·58	244,172	27·62	462,707
1869-70 ...	15·07	234,464	3·15	262,078	18·22	496,542

It will be seen that there had been a regular decrease during the preceding five years.

8. This decrease had been attributed in a great measure to the revision of the land revenue which is in progress, causing people to throw their lands out of cultivation in order to obtain a light assessment, but the rain-fall would appear to be the more effectual cause of variation in the area irrigated.

9. The lowest area irrigated was in 1862-63, 303,361 acres, with a rain-fall of 56·37 inches, when that of the preceding year had been 57·65 inches. The next lowest area was in 1873-74, 311,747 acres, rain-fall 49·90 inches, following 46·56 inches in 1872-73. The average rain-fall of ten years was 47·70 inches.

10. The station of which the most complete rain-fall register is extant is Dádúpur, and the above figures refer to that station, but there is very little irrigation near that place, and I am able to give an average of the last ten years for stations in different parts of the district watered by the canal. For two years in Dádúpur I have had to substitute the rain-fall in Umballa, but that will be sufficiently near for comparison.

Year.	Area irrigated.	Rain-fall.					
		Average of five gauges.	Dádúpur.	Karnál.	Rohtak.	Hissár.	Delhi.
	Acres.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
1865-66	397,963	30·10	46·13	27·30	18·40	28·60	30·10
1866-67	447,171	24·06	37·53	26·90	10·70	11·70	33·50
1867-68	331,037	37·15	68·68	33·00	24·10	22·80	37·30
1868-69	486,878	18·18	31·50	16·30	10·20	8·70	24·30
1869-70	496,542	18·22	30·97	13·22	16·20	8·90	21·80
1870-71	462,707	27·62	47·77	31·05	15·70	19·90	23·70
1871-72	444,385	30·94	70·17	28·62	15·50	10·70	29·70
1872-73	351,821	34·57	46·56	36·29	26·40	28·50	35·10
1873-74	311,747	32·36	49·90	40·70	20·30	12·50	38·40
1874-75	382,847	28·14	53·30	40·20	14·70	10·80	21·70
Average ...	411,309	28·13	47·70	29·36	17·22	16·31	29·54

So that during this period the two years of low rain-fall—1868-69 and 1869-70—produced the maximum of irrigation, 496,542 acres, and the high rain-fall of 1872-73, 1873-74, the minimum of 311,747. The great reduction from the area in 1866-67 to that in 1867-68 was caused by the increase of water-rate in the former year, as well as by the rain-fall, and that in 1873-74 probably was affected to a small extent by the settlement operations.

11. The principal crops watered have been as follow :—

	1874-75.	1873-74.	Average of six years.
	Acres.	Acres.	Acres.
Sugar-cane	33,439	42,068	88,733
Rice	50,029	43,818	43,756
Cotton	58,236	54,806	81,444
Wheat	151,067	86,355	145,328
Total ...	292,771	227,047	309,261

The Superintending Engineer explains the decrease in sugar-cane by the fact of a report getting about that the water-rate was to be largely raised, consequently the cultivators in Delhi, who are the greatest growers of that crop, ceased to plant it; but, on the failure of rain in the cold season, they sowed wheat instead.

The area under indigo has fallen from 12,165 in the previous year to 2,871, owing to the prices of the last season not having been remunerative.

12. The percentages of flow to lift irrigation, and of double-cropped land, were—

	Kharif.		Rabbi.		Year.		Double-cropped land.
	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	
1874-75	96·04	3·96	91·49	8·51	93·38	6·62	13·55
1873-74	94·24	5·76	79·00	21·00	87·39	12·61	9·92
Average of five years ...	94·59	5·41	85·29	15·71	90·07	9·93	12·17

The increase in double-cropped lands is due to the deficient rain-fall in the cold season.

13. The proportions of kharif and rabbi cultivation have been as follow :—

	Kharif.	Rabbi.
1874-75	41·83	58·17
1873-74	55·05	44·95
Average of six years	48·51	51·49

14. The areas irrigated in acres per cubic foot of supply below Dádúpur, where the regulator is situated, have been—

	1874-75.		1873-74.		Average of five years.	
	Kharif.	Rabbi.	Kharif.	Rabbi.	Kharif.	Rabbi.
On total supply	74	89	83	60	90	88
On supply utilized	85	122	96	77	103	105

These calculations are doubtful everywhere, and must remain so until more extended observations of the discharge can be made; but they are more especially so on this canal because of the large quantity of drainage water which enters the channel.

15. The average water-rate per acre irrigated and per cubic foot of supply utilized has been as follows :—

	Water-rate.			
	Per acre irrigated.		Per cubic foot of suply.	
	Kharif.	Rabbi.	Kharif.	Rabbi.
1874-75	3·01	2·03	262	260
1873-74	3·07	2·03	301	161
Average of five years	2·86	2·11	306	260

16. The cost of measurements and preparing the demand statements was per 100 acres—

	1874-75.	1873-74.	1872-73.
	Rs.	Rs.	Rs.
Measurement.			
Kharif	1·74	1·84	1·37
Rabbi	1·42	2·15	2·08
Demand Statement.			
Kharif	0·72	0·37	0·55
Rabbi	0·58	0·53	0·51

17. The state of the collections at the close of the year was as follows:—

	Balance from previous year.	Rabbi, 1873-74.	Kharíf, 1874-75.	Total.
	Rs.	Rs.	Rs.	Rs.
Demands	1,81,445	2,72,533	4,69,979	9,23,957
Realizations	1,81,445	2,72,533	3,86,074	8,40,052
Balance unrealized on 1st April 1875	...	...	83,905	83,905
Previous year	...	...	1,81,555	1,81,555

The balance brought forward differs from that at end of last year by the amount of remissions.

18. There was a slight improvement in the time of submission of the demand statements for the kharíf to the Deputy Commissioner, but the last were still one month and a half behind time. The rabbi statements were submitted within the prescribed period.

19. The discharges of the River Jumna, measured in the cold season at the Railway bridge, were, in December 1874, 736 cubic feet per second; in January 1875, 672.

DELHI AND GURGAON IRRIGATION WORKS.

20. There was no expenditure on Capital Account during the year; the total amount, exclusive of interest, being Rs. 1,83,410.

The amount of interest due for the year was Rs. 8,254, and the total amount to the end of the year Rs. 2,18,341.

21. The Revenue Account as given by the Controller, which is based on the collections of the year, shows a loss on the direct income of Rs. 16,186, or 8·82 per cent. on the Capital of Rs. 1,83,410.

22. With regard to indirect income, a sum of Rs. 24,528 has been annually taken credit for since 1866-67; this would give a profit of Rs. 8,342 or 4·55 per cent. on the above Capital; but the Financial Commissioner now states there is no authority for this in his Office, and it has consequently been omitted from the credits in the account statements supplied by the Controller. This has been done to save time; but Rs. 15,671 have been credited in the statement of Financial Results since 1845-46 as the indirect revenue due on account of the Najafgarh jhíl works, and Rs. 8,857 since 1866-67 on account of the Chandáni and Kotla jhíl works. The whole amounting to Rs. 24,528, being at the rate of six annas and five pie per acre on 22,143·5 acres. The question will be enquired into before the submission of the next report.

23. The assessments for the year are as follows:—

	Rs.
Water-rate	3,767
Miscellaneous	987
Total ...	4,754

So that, taking this as the basis of account, the loss would be Rs. 19,005 on the direct, and the profit on total income Rs. 5,523, being 10·36 and 3·01 per cent. on the Capital invested.

24. The repairs were very costly on account of the heavy rains in 1873-74 having damaged many of the bunds; the excess over the amount in the previous year was Rs. 10,215. There was a decrease on plantations and establishment charges, and there was an item of Rs. 271 charged to Profit and Loss on account of money lost from a treasure-chest.

25. The collections of the year were Rs. 6,586, against Rs. 4,455 in the previous year; but as above stated, the earnings of this year are only Rs. 4,754.

26. The reduction in water-rate is simply due to the decreased rainfall; the average difference throughout the district being 14·1 inches; none fell in April; little in May, and none at all in the cold season; consequently the reservoirs were not filled to the same extent as in the previous year. The decrease in miscellaneous revenue is only Rs. 33.

27. The areas irrigated in the last two years, and the average of the last five years, are compared in the following table:—

	1874-75.	1873-74.	Average of five years.
	Acres.	Acres.	Acres.
Kharíf	2,615	684	1,714
Rabbi	6,813	15,849	8,933
Total ...	9,428	16,533	10,647
	Inches.	Inches.	Inches.
Rainfall average of five stations	24·9	·39	24·6

The effect of a heavy rainy season is to flood the lands on the margin of reservoirs and prevent their being cultivated in the rains, but to increase the area of the rabbi crops largely. The results of 1874-75 and 1873-74 show this in a most marked manner.

28. The principal crops grown in the two years are compared with the average of the last five years in the following table:—

	1874-75.	1873-74.	Average of five years.
	Acres.	Acres.	Acres.
Sugar-cane	564	...	Only in this year.
Cotton	28	3	66
Rice	969	...	298
Wheat	5,697	13,423	7,459

29. The cost of measurements per 100 acres was Rs. 2·11 in 1874-75, against Re. 1·39 in the previous year; and that of preparing the demand statements Re. 0·79 and Re. 0·84 respectively.

UPPER BARI DOAB CIRCLE.

BARI DOAB CANAL.

30. The Capital debit to this canal, exclusive of interest, was increased during the year by Rs. 3,77,017; the total Capital up to the end of the year was Rs. 1,41,27,792. The principal expenditure was on the Kasúr and Sobraon Branches, and on the construction of permanent water-courses.

31. The addition to the charge for interest during the year was Rs. 6,27,096, making the total of interest unpaid to date Rs. 77,25,067.

32. The Revenue Account as given by the Controller, which is based on collections, shows that the profit of the year, exclusive of the water-advantage rate, amounted to Rs. 3,09,222, or 2·25 per cent. on the Capital at the end of 1873-74, Rs. 1,37,50,775. Including the water-advantage rate the profit amounts to Rs. 4,55,471, or 3·31 per cent. on the above Capital.

33. The profit of the last four years has been as follows:—

	1874-75.	1873-74.	1872-73.	1871-72.
Direct income	2·25	2·39	3·75	2·87
Indirect income	3·31	3·43	5·42	7·75

No fair comparison can be made with the returns of indirect income for 1871-72 and 1872-73, as many collections on account of arrears of water-advantage rate were made in those years. The small falling-off in this year from the previous year is due to the copious rainfall.

4. The earnings of the year, that is to say, the revenue of the kharíf and rabbi crops of 1874-75, were in excess of the collections by Rs. 1,13,092 for direct revenue, and Rs. 69,536 for indirect revenue, so that the profits, taking them into account, would have been 3·07 per cent. and 4·64 per cent. respectively.

35. There was an increase of cost in the maintenance of rájbahás and drainages due to heavy silt-clearances in the 2nd Division rendered necessary by the large demand for water in the cold season, and protection to both rájbahás and canal from the encroachments of the Ravi and the Chakki torrent. There was a decrease in the cost of the head bunds and main canal.

36. The area planted with trees was increased by 67 acres during the year, and the number of trees by 175,860; 2,505 acres out of 5,087, the area of the canal lands, are still unplanted for want of funds.

37. The total cost of maintenance, including minor works, establishment, and tools and plant, was Rs. 3,37,458 for 279,813 acres, or Re. 1·2 per acre, against 1·49 and 1·38 in the two previous years. The reduction was owing to the demand for water in the cold weather rendering it impossible to close the canal for repairs.

38. The gross assessments of water-rate of the year amounted to Rs. 6,91,457; but, after deducting the remissions, the net amount was Rs. 6,90,654, being an increase of Rs. 78,211 over those of last year. The miscellaneous revenue amounts to Rs. 69,118, which is an increase of Rs. 16,848 over that of the previous year. The principal increase, Rs. 17,570, was in mill-rent, owing to higher rates being obtained in the 2nd Division, and the mills running for more days. The decrease is principally in fines, which, considering it was a year of heavy demand for water, is most satisfactory.

39. The water-advantage rate assessed amounts to Rs. 2,15,785, against Rs. 1,79,388, being an increase of Rs. 36,397 over the previous year, but the average rate per acre is only ·869, against ·88; this is probably owing to the increase of area irrigated being mainly in the lower part of the canal where the water-advantage rate is lower than in the upper.

The areas at each rate were as follow in the two years :—

	Rate per acre. Rs. A. P.	1874-75. Acres.	1873-74. Acres.
	1 8 0	127	317
	1 4 0	2,053	2,109
	1 2 0	26,636	26,018
	1 0 0	100,611	83,063
	0 12 0	94,107	72,537
Half rates on land twice cropped ...	0 12 0	101	29
	0 10 0	928	859
	0 9 0	4,057	4,616
	0 8 0	14,067	10,542
	0 6 0	5,679	3,625
TOTAL ...		248,366	203,715

40. The balances uncollected are much less than in the previous year, being only Rs. 10,191 for water-rate, and Rs. 12,740 for water-advantage rate.

41. The remissions of water-advantage rate amount to Rs. 42,294—

	Rs.
From old balance	1,220
Rabbi, 1873-74	24,128
Kharif, 1874-75	16,946
	42,294

and were as follow :—

	Rabbi. Rs.	Kharif. Rs.	Total. Rs.
To Jágírdárs	20,074	13,159	33,233
To well lands	3,282	2,894	6,176
Other causes	755	910	1,665
	24,111	16,963	41,074
Old balance			1,220
TOTAL			42,294

Of the total balance uncollected, Rs. 2,272 is on account of the old arrears for the year previous to the rabbi of 1867-68. Nearly the whole of the amount due for the current year has been collected.

42. The Superintending Engineer has given a comparison of the rain-fall, not only for the whole year, but for the different seasons, from which it appears that the rains in the kharif were plentiful, while in the rabbi they were late and scanty, which fully accounts for the decrease in area irrigated in the former and increase in the latter season.

43. The following table shows a camparison between the area irrigated in the present and past years, and the average of the five preceding years :—

	Kharif. Acres.	Kharif. Per-centage.	Rabbi. Acres.	Rabbi. Per-centage.	Total.
Average, five years, 1868-69 to 1872-73	92,563	34·83	173,204	65·17	265,767
1873-74	100,913	43·5	131,233	56·5	232,146
1874-75	87,214	31·2	192,599	68·8	279,813

So that the area irrigated in the present year is below the average in the kharif when the rains, especially in June, were favorable, and above the average in the rabbi when they were scanty.

44. The following table shows a falling off in rice, cotton and sugar-cane, but an increase of 50,862 acres in wheat; this is due to the nature of the season, as above explained :—

Crops.	1867-68. Acres.	1868-69. Acres.	1869-70. Acres.	1870-71. Acres.	1871-72. Acres.	1872-73. Acres.	1873-74. Acres.	1874-75. Acres.
Rice ...	63,961	41,256	76,709	24,536	11,598	29,100	32,882	27,638
Cotton ...	21,101	8,205	11,671	10,640	20,387	27,537	27,868	17,612
Sugar-cane ...	10,600	9,811	11,623	6,994	6,287	9,170	10,305	8,900
Wheat ...	122,720	175,619	87,399	156,375	167,214	99,417	94,731	145,593

45. The amount of double-cropped land has increased by 6,146 acres in the last year, *viz.*, from 24,672 acres to 30,818, but it does not yet reach 3 per cent. of the gross area of the irrigating villages.

46. The proportion of flow irrigation is slightly less than in the preceding year, but the difference is small, the per-centage being as follows :—

	Year.	Kharif.	Rabbi.
1874-75	87·66	92·93	85·27
1873-74	89·98	92·94	87·70
1872-73	89·92	93·11	87·59
1871-72	89·33	92·14	88·30

There was more inducement to resort to lift irrigation in the rabbi of a dry season.

47. The average water-rate per acre irrigated and per cubic foot of supply entering the canal was as follows :—

	Kharif. Per acre.	Kharif. Per cubic foot.	Rabbi. Per acre.	Rabbi. Per cubic foot.
1874-75	3·17	124·25	2·15	202·20
1873-74	3·25	131·05	2·17	178·49
1872-73	3·16	151·59	2·17	173·22

The decrease in the rabbi water-rate of this year would be probably due to the increased proportion of lift irrigation, and the increase in rate per cubic foot of supply to the greater duty obtained.

48. The duty obtained per cubic foot of water entering the canal is shown below :—

	Kharif.	Rabbi.
1874-75	39·13	93·95
1873-74	40·24	82·44
1872-73	47·90	79·28
1871-72	34·73	108·25
1870-71	37·07	94·71

The Superintending Engineer remarks that he cannot account for the low duty of the water, as he has never seen irrigation more economically conducted than in the 2nd Division Bári Doáb Canal, where the greater part of the irrigation lies. He has had careful experiments made of the absorption and evaporation in the first 52 miles of the canal, which show a loss of 12½ per cent. of the volume in the month of May, and that, excluding and including the amount absorbed, the duty of the water, in acres per cubic foot, was—

	For August and September. 1st Division.	2nd Division.	Canal.	20th December to 10th February. 1st Division.	2nd Division.	Canal.
Complete volume	...	39·3	35·3	...	156	114·4
Excluding amount absorbed ...	79	52·4	...	43·4	178·4	...

Extended and careful measurements are necessary to arrive at any correct conclusion on the above points, and the accuracy of the recorded canal discharges should be constantly checked by observations.

49. The cost of maintenance per cubic foot of supply entering the head of the canal and per acre irrigated is shown. This includes establishment and repairs only.

	1874-75.	1873-74.
Per cubic foot of volume...	149·98	158·96
Per acre irrigated	1·11	1·40

but the gain in the present year is more apparent than real, being due in some measure to the impossibility of closing the canal.

50. The cost of repairs per mile of channel was—

	1874-75.	1873-74.
Canal	193·33	337·19
Rájbaha	64·	52·

The remark in the last paragraph explains the difference on the canal. The increase on the rájbaha is mainly due to the cost of spurs for protecting the Salámpur and Faríd nagar rajbahás from the encroachments of the Ravi and Chakki, which would be more properly charged to canal repairs.

51. There was a slight decrease in the cost of measurements per 100 acres, and a slight increase in that of preparing the demand statements compared with that in the previous year. There was also an improvement in the dates of submission of the demand statements to the Deputy Commissioner, notwithstanding the larger area which had to be assessed during the rabbi.

52. The Superintending Engineer also shows the discharges measured during the year both on the river and canal.

53. The Superintending Engineer has shown that the per-centage of decrease in area irrigated during the kharif, and increase during the rabbi of 1874-75, was in the—

	Decrease in kharif.	Increase in rabbi.
Gurdaspur District	24·18	33·57
Amritsar ,, ...	13·68	44·
Lahore ,, ...	8·80	52·63

which shows how much keener the demand for water is in the lower than in the upper part of the Doab. Colonel Brownlow has also pointed out that of villages whose lands aggregate 1,142,112 acres, 279,813 acres were watered in 1874-75, and 230,367 acres was the mean area watered in 1872-73 and 1873-74, being 24·50 and 20·17 per cent. respectively of the gross area, and suggests that villages should not be allowed to water more than one-fifth of their gross area. Some such limit will have to be fixed, as otherwise water will not be available in the rabbi for the lands on the Kasúr and Sobráon Branches.

LOWER SUTLEJ AND CHENAB INUNDATION CANALS.

54. The Capital was increased during the year by Rs. 2,852, making the total, exclusive of interest, Rs. 1,97,561. The amount of interest unpaid was Rs. 6,39,508.

55. The expenditure on Minor Works charged to Revenue consisted of Rs. 43 from Imperial Funds, Rs. 165 from the Fine Fund.

56. The Revenue Account as given by the Controller shows a loss by the direct income of Rs. 48,651, or 46·46 per cent. on the Capital of Rs. 1,04,709; but, including indirect income, there is a profit of Rs. 1,64,648, or 157·24 per cent.

57. The expenditure on maintenance during the past three years, excluding statute labor, is as follows:—

	1874-75.	1873-74.	1872-73.
	Rs.	Rs.	Rs.
Works from Imperial Funds	9,761	11,572	4,132
Fine Fund	12,956	23,708	31,965
Establishment	44,017	39,178	37,991
TOTAL ...	66,734	74,458	74,088

There is a decrease in the expenditure from Imperial and Fine Funds, and an increase in Establishment. The only point which requires remark is the increase in Establishments, due principally to the charge for measuring establishment, Rs. 4,733, of which Rs. 2,072 was on account of arrears of 1873-74, and the balance is due to the larger area which had to be measured.

58. The income of the last three years, excluding the value of statute labor, was as follows:—

	1874-75.	1873-74.	1872-73.
	Rs.	Rs.	Rs.
Miscellaneous revenue and water-rate	5,127	8,229	7,916
Drawn from Fine Fund	12,956	23,708	31,965
TOTAL ...	18,083	31,937	39,881

The decrease in miscellaneous revenue is due principally to the sale of less timber, which is always a fluctuating item.

59. The number of statute laborers present and absent during the last three years was as follows:—

	1874-75.		1873-74.		1872-73.	
	Number.	Per-centage.	Number.	Per-centage.	Number.	Per-centage.
Present	529,042	81·45	451,759	83·53	512,358	82·49
Remitted	35,365	5·44	33,449	6·19	35,533	5·72
Absent	85,132	13·11	55,586	10·28	73,199	11·79
TOTAL ...	649,539	...	540,794	...	621,090	...

The value of statute labor employed during the year is calculated by the Superintending Engineer at Rs. 1,98,391.

60. The amount levied as fines from absentees during the last three years has been—

	Rs.
1874-75	**42,566**
1873-74	**28,815**
1872-73	**36,942**

The balance at credit of the fund on 1st April 1874 was **Rs. 2,16,051**, and on 1st April 1875 Rs. 2,45,662. The Superintending Engineer wishes to propose some expenditure from this fund on the improvement of the canals during the ensuing year.

61. The following table gives the areas irrigated during the past five years:—

	KHARIF.		RABBI.		TOTAL.
	Acres.	Per-centage.	Acres.	Per-ceptage.	
1874-75	**163,605**	**59·77**	**110,083**	**40·23**	**273,688**
1873-74	**108,528**	**55·07**	**88,536**	**44·93**	**197,064**
1872-73	**149,143**	**61·50**	**93,361**	**38·50**	**242,504**
1871-72	**127,472**	**67·64**	**60,993**	**32·36**	**188,465**
1870-71	**133,365**	**66·01**	**68,671**	**33·91**	**202,036**

The proportion of rabbi irrigation has increased from 24 per cent. in 1867-68 to 40 per cent. in 1874-75; but Superintending Engineer considers that this is due to more careful check by the canal panchayat, since the area irrigated in the rabbi was taken into account in assessing the number of statute laborers to be provided by the cultivators. This is probably the case.

62. The cost of irrigation to the cultivators for the past five years is shown in the following table, taking assessments, not collections, as the basis of the calculation:—

	1874-75.	1873-74.	1872-73.	1871-72.	1870-71.
	Rs.	Rs.	Rs.	Rs.	Rs.
Value of labor supplied at six annas per man, the current rate in the district	1,98,391	1,69,410	1,92,135	2,01,418	1,69,407
The Zarnágah (Fine Fund) ...	42,566	28,315	36,942	36,465	41,051
Enhanced Land Revenue	2,13,299	2,13,299	2,13,299	2,13,299	2,13,299
Direct water-rate	679	679	636	682	682
TOTAL ...	4,54,935	4,11,703	4,43,012	4,51,864	4,24,439
PER ACRE ...	1·66	2·09	1·83	2·39	2·10

63. The cost of maintenance has been for some years shown in the Revenue Reports as consisting only of the first item of the above statement, but this appears to me to be quite

wrong, as I think all money expended on the maintenance of the canals from whatever source provided should be included; thus altered, the cost would have been as follows for the last three years:—

	1874-75.	1873-74.	1872-73.
	Rs.	Rs.	Rs.
As per para. 57	66,734	74,458	74,088
Value of labor as per preceding para.	1,98,391	1,69,410	1,92,135
TOTAL ...	2,65,125	2,43,868	2,66,223
Area irrigated	273,688	197,064	242,504
Rate per acre	·97	1·24	1·10
Instead of as previously reported	... ...	·83	·67

64. The Superintending Engineer in his para. 15 has given a statement of the principal crops irrigated. It will be seen that the indigo, cotton and all the more valuable crops are in excess of any previous year since 1869-70, with the sole exception of the wheat, which is 3,000 acres less than in 1873-74, but the indigo is 7,671 acres in excess of the most favourable year, 1869-70.

65. The proportion of flow to lift and of double-cropped land varies but little, and requires no remarks.

66. For the first time the Superintending Engineer has been enabled to give in his para. 19 an approximation to the duty obtained from each cubic foot of mean supply in the principal canals. It will be seen that the average is 46·90 acres per cubic foot, which, considering that three of the Chenab Canals dried early in the season, is a very favourable result.

67. The cost of measurement per 100 acres has decreased from 1·73 in 1873-74 to 1·51 in 1874-75, which Superintending Engineer explains is probably due to the larger area irrigated.

68. The rain-fall is slightly in excess of that of 1873-74 on the Chenab, and less on the Sutlej Canals; but the months in which it fell—July, August, September—were those in which it is most required; also this was a year of exceptionally high rise in the rivers, so that the season was altogether a favourable one for the working of Inundation Canals.

LOWER BARI DOAB CIRCLE.

UPPER SUTLEJ INUNDATION CANALS.

69. The Capital of these canals was increased by Rs. 48,606 during the year, so that the total debit at the end of the year, exclusive of interest, amounted to Rs. 4,91,316. The amount of interest unpaid amounted to Rs. 9,60,915.

70. The Revenue Account given last year erred in showing the fluctuating land revenue in Montgomery as direct revenue. The water-advantage rate in Lahore also does not appear to have been shown.

The correct statement would appear to be, taking the collections as the basis of account—

Expenditure as before		Rs.	1,17,034
Income—			
Water-rates	Rs. 5,453		
Miscellaneous	3,368		
Contributions	1,589		10,410
Loss by direct revenue			1,06,624
or 24·07 per cent. on Capital—			
Indirect revenue—			
Fluctuating land revenue, Montgomery District	63,479		
Water-rate, Lahore District	2,341		65,820
Loss by direct and indirect revenue Capital.			40,804 being 9·21 on

71. For the current year the account will be as follows:—

Expenditure		Rs.	1,10,640
Income—			
Water-rates	Rs. 3,952		
Miscellaneous	3,298		
Contributions	787		8,037
Balance loss by direct revenue, being a percentage of 23·18 on Capital			1,02,603
Indirect revenue—Fluctuating land revenue collections in Montgomery District			88,368
Loss by direct and indirect revenue being 3·22 per cent.			14,235

This account will be liable to correction when the amount of water-advantage rate in the Lahore District due to these canals has been ascertained; it had been omitted in the Financial Commissioner's statement, and could not be furnished in time for this report. If assessments of fluctuating land revenue be taken instead of collections, the results would be improved by Rs. 13,187, the amount not collected, so that the loss would only be Rs. 1,048.

72. The areas irrigated for the last five years are shown in the following table:—

	Kharif.	Rabbi.	Total.
	Acres.	Acres.	Acres.
1874-75	49,749	34,371	84,120
1873-74	33,935	31,298	65,233
1872-73	74,904	60,446	135,350
1871-72	64,213	22,830	87,043
1870 71	59,828	17,242	77,070

The area is larger than that of last year, but still falls short of that in previous years. It is only during the last two years that any assessment has depended on the measurements, so that it is possible that cultivators are much more careful about what fields are measured, and may, in the absence of a regular Canal establishment for distribution of the water, succeed in concealing some of the fields which have been irrigated.

73. The average water-rate per acre irrigated, including both direct and indirect assessments, has arisen from Re. 1·178 in 1873-74 to Re. 1·245 in 1874-75, which shows an increase in the more valuable crops. This has been—

	Acres.	Increase. Acres.
In rice from	4,581	
to	8,518	3,937.
In cotton from	7,645	
to	14,380	6,735

which is satisfactory.

74. That the operations of the year should result in a loss of Rs. 14,235, or 3·22 per cent. on the Capital, is certainly unsatisfactory, and would seem to show that the rates charged are not high enough. It will be seen in para. 82 that the cost of irrigation to the cultivators on the Lower Sutlej and Chenab Canals has been, for the last five years, Rs. 1·66, 2·09, 1·33, 2·39 and 2·10 per acre, or on an average Rs. 2·01, while the rates on these canals have only been Re. 1·245 and 1·178. But this is only the second year since they have been applied, and a further change is not advisable at present.

75. The average duty of the water for the last two years per cubic foot of discharge has been—

	Kharif.	Rabbi.
1874-75	46·4	124·6
1873-74	32·2	110·

76. The proportion of flow irrigation to that by lift is almost the same as last year, being—

	Flow.	Lift
For 1874-75	84·75	15·25
1873-74	81·89	18·11

The Superintending Engineer has given the average area irrigated by each Persian-wheel as 18·5 acres.

77. The cost of maintenance, exclusive of establishment, has been as follows:—

	1874-75.	1873-74.
Per mile of canal	219·1	241·6
Per mile of distributary	154·8	116·8
Per acre irrigated	0·667	0·91
Per cubic foot of supply	42	62·1

But the Superintending Engineer points out that full silt-clearance was not made owing to want of Budget provision.

78. The lands have for the second time been measured by the Patwáris. The cost was per 100 acres—

	1874-75.	1873-74.
In Lahore District	2·37	Not given
In Montgomery District	1·06	separately.
Total ...	1·22	1·39

But this year the work has been much better done.

The cost of preparing the demand statements per 100 acres was—

	1874-75.	1873-74.
In Lahore	0·98	Not given
In Montgomery	0·36	separately.
Total nearly ...	0·44	·35

79. The balance due at the end of the year was, in 1874-75, Rs. 13,187, against Rs. 4,098 in the previous year, but the amount of the demands was much larger, being Rs. 1,05,400, against Rs. 73,030. The above does not include the water-advantage rate in the Lahore District in either case.

80. The discharges of the River Sutlej, measured in the cold season, were, in December 1874, 7,248, and in January 1875, 6,286 cubic feet per second.

DERAJAT CIRCLE.

Indus Inundation Canals.

81. The Capital Account of these Canals was increased during the year by Rs. 31,017, making the amount at the end of the year Rs. 4,68,680. The interest charge for the year amounted to Rs. 20,069 and the total amount unpaid to Rs. 15,95,180.

82. The expenditure amounted to Rs. 1,91,736, and the collections to Rs. 68,475, so that there was a loss on the year's transactions of Rs. 1,23,261 by direct revenue only.

83. The indirect revenue was in the Controller's last year's return assumed at Rs. 1,71,599; but the Financial Commissioner has informed me that this increase does not take effect until 1st April 1875. Consequently the correct amount, both for last year and this, would have been Rs. 80,938, so that, including indirect revenue, there is this year a loss of Rs. 42,323 on the Capital of Rs. 4,37,613 at the commencement of the year, or 9·67 per cent.

84. A corrected statement of financial results for 1873-74 is attached hereto, which shows that there was a loss of Rs. 83,127 on the year, taking direct revenue only, and Rs. 2,189, including the indirect return; and the total profit up to the end of the year, exclusive of the charge for interest, was Rs. 4,75,612.

ABSTRACT OF FINANCIAL RESULTS OF THE INDUS INUNDATION CANALS FOR AND UP TO THE CLOSE OF 1873-74.

Names of Projects.	Capital Outlay.				Revenue.				Working Expenses.		Net Revenue.				Difference between Net Revenue and Charges for Interest.		Per-centage of Net Revenue on Capital Outlay.		Area of Land irrigated during Year.		
	During year.		To end of year.		During year.		To end of year.		During year.	To end of year.	During year.		To end of year.		Excluding Land Revenue.	Including Land Revenue.	Excluding Land Revenue.	Including Land Revenue.	Kharif.	Rabbi.	Total.
	Ordinary.	Total.	Ordinary.	Total.	Direct income by water-rate and miscellaneous receipts.	Total.	Direct income by water-rate and miscellaneous receipts.	Total.			Direct income.	Total.	Direct income.	Total.	During year.	To end of year.					
Indus Inundation Canals	254	254	4,37,613	4,37,613	1,55,870	1,55,870	5,25,174	5,25,174	1,58,059	17,49,260	—83,127	—83,127	80,938	80,938	—1,02,808	—14,51,850	—21,870	2,47,846	—19·00	—0·50	163,020

Names of Projects.	Charges for Interest.									
	During year.			To end of year.						
	Ordinary.	Extraordinary.	Total.	Ordinary.	Extraordinary.	Total.				
Indus Inundation Canals	19,681	...	19,681	2,27,764	...	2,27,764				

The same correction being made in this year's account leaves the balance as follows :—

NET REVENUE.

For the year.		*To end of year.*	
	Rs.		Rs.
Direct ...	— 1,23,261	Direct ...	— 13,47,347
Including Indirect ...	— 42,323	Including Indirect ...	+ 4,33,289

85. The earnings for the year were less than the collections by Rs. 21,982, so that the following would show the state of the Revenue Account based on them :—

NET REVENUE.

For the year.		*To end of year.*	
	Rs.		Rs.
Direct ...	— 1,45,243	Direct ...	— 13,69,329
Including Indirect ...	— 64,305	Including Indirect ...	+ 4,11,307

But it may be hoped that the total profits will steadily increase in future, as the indirect income will, from the commencement of the next year, be Rs. 1,69,718 instead of Rs. 80,938.

86. The large increase in expenditure is mainly due to the damage done by extraordinary floods in the Indus and hill torrents during July and August, which left heavier deposits than usual in the canals.

87. The direct income is a fixed amount, Rs. 45,000, supposed to represent half the cost of clearing the canals, of which in the current year it fell short by Rs. 9,734 by the accounts of the year, but the total loss was Rs. 26,208; the balance was expended after the close of the year. The loss in the previous year was only Rs. 1,630. The amount has been fixed for five years.

88. The miscellaneous revenue shows a decrease of Rs. 4,023 from that in the previous year; of this Rs. 1,471 is in fines, which is satisfactory; Rs. 2,398 is in sundry collections, which is thus explained by Superintending Engineer—

"The difference arises from the large receipts obtained during the previous year, which did not occur during the year under review."

89. The area of irrigation in the past five years, and the rain-fall at Dera Gházi Khan, have been as follows :—

	1874-75.	1873-74.	1872-73.	1871-72.	1870-71.	Average of five years.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Kharif	121,804	115,590	132,818	104,872	125,186	120,054
Rabbi	50,018	47,430	47,319	39,462	49,156	46,677
TOTAL ...	171,822	163,020	180,137	144,334	174,342	166,731
Rain-fall	9·90	8·10	7·70	3·00	6·50	...

So that there is an excess in the current year over last year, and over the average in both crops.

90. The only changes in the areas of the principal crops grown which require remark are the falling-off in indigo; this crop in this part of the country is kept three years in the ground, and the Superintending Engineer explains that severe frost killed many of the old plants. The area under cotton is the largest since 1870. Rice is the only crop in which there has been a falling-off since 1870, and this is always a precarious crop on Inundation Canals, where the time at which the water will be available is so uncertain. The decrease has been from 13,157 in 1870 to 9,839 in this year.

The following table shows a comparison between the two last years and the average of five years :—

	Average.	1874-75.	1873-74.
	Acres.	Acres.	Acres.
Rice	9,108	9,839	8,351
Indigo	15,967	14,953	19,909
Cotton	25,968	29,934	27,846
Wheat	41,989	45,3 0	42,638
Millets	53,493	54,229	48,348

91. The per-centage of irrigation by flow and lift varies but slightly—

	Flow.	Lift.
Average of five years	90·97	9·03
1874-75	91·81	8·19
1873-74	92·24	7·76

92. The measurements of the area irrigated were made this year by the Patwáris. The increase in cost, Rs. 4,025, as against Rs. 2,600, is not satisfactory, and will be enquired into. The rate per hundred acres measured was—

	Rs.
In 1874-75	2·34
„ 1873-74	1·59
„ 1872-73	1·47

The cost of compiling the measurement papers was only Re. 0·07, against Re. 0·24 per hundred acres in 1873-74; but this is because, under the system of fixed contributions, no demand statements are required.

93. The discharge of the river measured in the cold season has been as follows :—

December 1874.	January 1875.
26,219	27,733

94. Mr. Garbett states that the surface level of the water in January 1875 was 3·5 lower than in 1870. This must be enquired into, as the satisfactory working of Inundation Canals depends very much on the date when the water rises so as to fill them, and if it now has to rise 3 feet more than formerly before they begin to work, the results will be serious.

SHAHPUR CANALS.

95. There was no addition to the Capital during the year. The total up to date, exclusive of interest, is Rs. 21,221.

96. The expenditure on maintenance was ... ... Rs. 3,396
Share of establishment ... ... „ 294

Total ... „ 3,690

Collections ... ... „ 7,897

Balance profit ... ... „ 4,207

or 19·82 per cent. on the Capital.

97. The area irrigated was 6,355 acres, being an increase of 2,275 acres as compared with the previous year.

The average water-rate per acre was 1·24. The rate of maintenance 0·58, against 1·37 and 1·02 respectively in the previous year. This was a very favorable year for these canals, the river having risen higher than last year. Nearly half the area irrigated (3,142 acres) consisted of cotton crops, the remainder of the kharif crops were principally millets. About 1,200 acres, of which 708 were gram, were irrigated in the rabbi.

The management of these canals is in the hands of the Deputy Commissioner of Shahpur.

GENERAL.

98. The following estimates were submitted and sanctioned by the Government of India during the year :—

Distributary No. 12 on Western Jumna Canal;
Project for re-modelling and extending the Western Jumna Canal;
Estimate for protective embankment on right bank of Indus.

99. The Capital debits to each series of canals, exclusive of interest, according to the Provincial Audit Office, stand thus—

SERIES OF CANALS.	Capital, 1st April 1874	Additions during 1874-75.	Capital, 1st April 1875.	Add Contributions.	Grand Total Capital, 1st April 1875.

N.B.—1. The nett collections for years prior to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on imports and exports are not distinguished.

2. The figures for British Burma for 1875-76 include collections at Tenasserim and Moulmein for the months April to December only.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10th FEBRUARY 1876.

GENERAL REMARKS.—No rain is reported to have fallen during the week except a slight shower at Peshávar. No improvement is announced in prospects in Madras or Mysore. In Bombay the *rabi* harvest continues, and prospects are fair. Reports are good from the Central Provinces, Central India, Rajputana and Berar. In Bengal the spring crops are progressing favourably, but require rain. In the North-Western Provinces rain is wanted in Rohilkhand and Meerut. In the Punjab more rain would be beneficial. Rain is also required in Assam.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 10th)	*Nil*	Standing crops good; Bengal gram and castor suffering from grub in Repalli; outturn of *ulundu* one-fourth; markets well supplied; prices steady; cholera, 112 seizures, 50 deaths in 5 taluks; fever and small-pox continue; epizoötic aphtha abating; pasture scanty.
Kurnool („ 9th)	*Nil*	Season generally good; horse gram, white *cholum*, and paddy harvested, other crops flourishing; markets well supplied; prices—rice rising, other articles steady; fever prevalent; cholera and diarrhœa in Cumbum; cattle healthy except in Pattikonda; pasture and water abundant.
Tanjore („ 10th)	*Nil*	Rivers almost dry; water in tanks scanty; water over seventy acres; cultivation a few dry crops; standing crops not thriving in localities for want of rain; harvest wet and some dry crops; yield moderate; markets well supplied; prices rising; cholera continues, 326 seizures, 244 deaths; cattle disease in many places, some loss; pasture insufficient.
Trichinopoly („ 9th)	*Nil*	Rivers drying up; supply, however, sufficient in river channels in Museri, Kulitallai, and Udiarpolliem; tanks empty; wells resorted to in dry villages for drinking water; crops anything but good, except in river irrigated parts of Museri and Kulitallai; outturn generally below average; markets well supplied; prices rising; cholera increasing, 191 seizures, 101 deaths; foot-and-mouth disease generally among cattle; pasture scanty.
Malabar („ 10th)	...	Harvesting second crop almost completed; outturn not very good owing to want of seasonable rain; markets well supplied; prices steady; bowel complaints in 8 taluks, 1,396 seizures, 1,055 deaths; small-pox in North Malabar; cattle disease slight; pasture withered.
		General Remarks.—General prospects same as last week.
Bombay— (Feb. 10th)		
Sind. (Feb. 9th)		
Kurrachee ...	...	No change.
Shikarpur ...	...	Slight frost, but no damage to *rabi* crops, which are very promising throughout the Collectorate; land being prepared for spring crop cultivation; fever almost disappeared.
Hyderabad ...	...	Weather fine; *rabi* well; disease among goats in Sakrand taluka.
Upper Sind Frontier ...	...	Weather cloudy and cold; crops as before.
Guzerat.		
Ahmedabad ...	...	Crops well, except wheat crops in Daskrohi, which have suffered slightly from frost.
Surat ...	...	No change.
Kaira ...	...	
Broach ...	...	Crops good; slight fever in A'mod and Wágra; cattle disease in Ankleswar.
Khandesh and Nasik.		
Khandesh ...	...	*Rabi* prospects good; cotton traffic small from interior, owing to low rates; fever prevailing.
Nasik ...	...	*Rabi* middling; fever prevalent.
Konkan.		
Tanna ...	—	Agricultural prospects fair; *rabi* thriving; public health generally fair; small-pox continues at Tanna.
Deccan.		
Poona ...	—	No change.
Sholapur ...	—	
Satara ...	...	
Ahmednagar ...	—	*Rabi* harvest continues.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	...	*Rabi* crops being harvested; no change in cotton; a few cases of cholera in 3 talukas.
Dharwar ...	...	No change.
Kanara ...	...	Cultivation favourable; cholera spreading.
Kaladgi ...	...	*Rabi* harvest in progress; 30 deaths from cholera in Bádámi, 3 in Bágalkot and 1 in Hungoond.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather cold; *rabi* crops being harvested; cotton picking progressing; cholera raging in Morvi.
Wadhwán ...	...	Weather cool; frost at Chotila has injured wheat crops; cotton being picked.
Baroda ...	...	No change.
		General Remarks.—Crops and health generally fair, except in Morvi and Southern Mahratta country, where cholera is still prevalent, and Khandesh and Nasik, where there is a good deal of fever.
Bengal—(Feb. 10th)		
Chittagong ...	...	Mornings foggy; hot weather apparently coming on; a few drops of rain in parts of the district; tea gardens are much in want of rain; cholera and small-pox are still prevalent.
Noakhally ...	*Nil*	Weather fair; mornings were foggy and cloudy; pulses, chillies, *sessamum*, melon., &c., are progressing fairly; a little rain would do much good; cholera and small-pox still prevail in certain parts of the district.
Chittagong Hill Tracts...	*Nil*	Weather seasonable; mustard is being gathered; a very poor outturn owing to want of rain in September and October; the tea gardens are suffering from drought.
Hill Tipperah ...	*Nil*	Weather warmer than usual at this time of the year, and occasionally cloudy; mustard is being harvested and tobacco and chillies on the ground are doing well; public health is good.
Backergunge ...	*Nil*	Weather close for this season of the year; rain wanted; prospects of the crops are fair; still a few deaths from cholera and fever.
Furreedpore ...	*Nil*	Weather continues seasonable; during the last two days it has been unusually cold; the state of the *rabi* crops is the same as reported last week, *i. e.*, they will suffer should no rain fall.
Dacca ...	*Nil*	Weather cooler than last week; the state and prospects of the crops are fair.
Mymensing ...	*Nil*	Weather fine and dry, becoming prematurely warm; prospects of the crops are favourable; the want of rain is seriously injuring the grazing lands.
Tipperah ...	*Nil*	Weather still dry and somewhat warm; crops are fair; the winter crops require rain.
24-Perguṇnahs ...	*Nil*	Cloudy mornings in the beginning of the week; very cold during the last two days; the harvest of *amun*, or the late rice, is all but completed; cold weather crops are doing well; strong cases of cholera reported from thanas Hosnabad and Joynuggur; fever rapidly abating.
Jessore ...	*Nil*	Clear days, with foggy mornings; the winter crops have been rather poor, owing to want of rain, which is also required for the preparation of the ground for sowing the early rice.
Nuddea ...	*Nil*	Weather foggy in the early part of the week, but afterwards clear and cold; harvest is going on, and the outturn is a little below average as a rule.
Moorshedabad ...	*Nil*	Weather seasonable, cool; cold weather crops are generally very fair; rain would be of benefit to some but of injury to others especially to the advanced gram.
Pubna ...	*Nil*	Weather occasionally warm till the 4th instant, when the wind veered to the north-west and north, and the temperature is this day some 9° lower than on the 3rd instant; state and prospects of the crops are much the same as last week; the outturn of *maskalai* and *moung* pulses has been fair; that of *sarsa*, mustard, poor; the *dal* crops now on the ground will do fairly if we have rain soon; cholera in the epidemic form has ceased, and the health of the district is at its normal state.
Rajshahye ...	*Nil*	Fine weather with no appearance of rain; rain is much wanted for the *rabi* crops; public health is generally good; small-pox is reported in Mandah station.
Bogra ...	*Nil*	Weather fair; the *amun* rice crop is almost entirely cut.
Maldah ...	*Nil*	High wind with clouds of dust; indigo is doing well; the early spring rice is being transplanted and is thriving; the cold weather crops are maturing and require rain, and *kalai* pulse has almost been reaped; only one death from cholera and one from fever, during the week.
Dinagepore ...	*Nil*	Weather is getting warmer; harvesting of the paddy crops is over; the yield has been from 10 to 12 annas; the prospects of the other crops, on the whole, are fair.
Rungpore ...	*Nil*	Weather warmer; rain is much wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ...	...	Weather cloudy on some days of the week, and cold as usual; there were only a few drops of rain on Saturday night; rain is still wanted for tobacco and other crops; the tobacco crop is generally promising, but if there be no rain the outturn will be unsatisfactory.
Jalpaiguri ...	Return not received.	Weather during the week has been very changeable; no change to report in the prospects of the crops; rain is greatly needed; none during the week.
Darjeeling ...	Return not received.	Weather cold and cloudy; wheat, barley and mustard are doing well; ground is being prepared for rice and other crops.
Midnapore ...	*Nil*	Weather is getting warmer, but not unseasonable; rice crop is all harvested; *rabi* crops are fair.
Howrah ...	*Nil*	Weather fine; no change in the state and prospects of the crops.
Hooghly ...	Return not received.	Weather very cold since the 4th; foggy on the 1st, 2nd and 3rd; sowings of *jali dhan* is going on in a small part of the chur lands in Balaghur; spring crops are doing well; heavy dews doing much good to the crops; late potatoe irrigation going on; rain wanted; rice and *kalai* harvest closed; early potatoes are being dug up; sugarcane being cut and pressed; vegetables in large quantities are selling very cheap in the bazar; tanks are very low.
Burdwan ...	*Nil*	Winter crops and sugarcane are doing well; cholera in Culna and Jehanabad, and small-pox in Koosoogram.
Bankoorah ...	*Nil*	Weather somewhat warmer than last week; no change in the state and prospects of the crops since last week; health of the district is good.
Beerbhoom ...	*Nil*	Weather seasonable; winter crops are progressing favourably; a little rain would do much good.
Sonthal Pergunnahs ...	*Nil*	Weather in Dumka not so bad as last week; occasional high wind; little crop of any kind is on the ground; country is extremely dry.
Bhagalpur ...	*Nil*	*Strong* cold westerly winds, injurious to the *rabi*, which, if no rain falls soon, will not be more than an eight-anna crop; in places it is still very good; rice is cheaper in Soopool generally than in Banka or head quarters sub-division; *murwa* is about 30 to 35 seers the rupee in Soopool, but the sub-divisional officer reports he expects distress soon; the condition of the people is good, and general health is very good.
Monghyr ...	Return not received.	High cold westerly winds; no change in the prospects of the crops since last week, *i. e.*, the *rabi* prospects continue fair; in the extensive low-lying dearahs the crops are very good; *rabi* crop being cut; outturn on high lands expected to be about an eight-anna crop; on the high lands the crops are scanty in consequence of no rain having fallen since they were sown in October; the crops on the low-lying inundated dearahs continue good.
Purneah ...	*Nil*	Weather cold, with sharp westerly wind; no change in the state and prospects of crops since last week; rain is much wanted.
Durbhangah ...	*Nil*	Weather cold, with westerly wind; no report received from Madhoobany; elsewhere there is no change in the prospects of crops; and prices show a tendency to decline.
Mozufferpore ...	Return not received.	Weather is getting rather warmer; strong west winds prevail; the prospects of the *rabi* crops in Seetamarhee sub-division have been much improved by the last rain, but elsewhere they are unaltered; the present weather is very unfavourable for wheat and barley crops; continued importations from Nepaul and Chumparun, and abundant supplies of grain, which have lately come into the district from the North-Western Provinces and Oudh, have kept the prices of maize and barley exceedingly low; the principal markets are glutted; Mozufferpore dealers apprehend heavy losses on local stores; and a year of unexampled cheapness (except of rice) is now anticipated by the people; at Hazeepore and Mozufferpore maize has fallen from 25 and 28 seers (in October) to 40 seers per rupee (in February); and in the latter town barley to-day is 45 seers against 30 seers in October; at Seetamarhee maize and barley have fallen from 34 and 25 seers (in October) to 40 and 35 seers (in January); but notwithstanding vast importations of food during the last three months and stagnation of export rice trade, the price of common rice has remained stationary since 1st November, being 22½ seers against 35 seers in January 1875. The expansion and energy of private (import) trade have been marvellous, and anxiety on the score of future food supplies no longer exists; the latest accounts from Mr. Mosley, sub-divisional officer at Seetamarhee, report—"*Makai* pouring down from Nepaul" and "*Makai* carts swarming—coming from Nepaul."
Sarun ...	*Nil*	Weather very cold; cloudless sky with westerly wind; no change in the state and prospects of the crops since last report; the *rabi* crops are progressing favourably; mustard and peas are being harvested; wheat, barley and *ruhur* pulse are doing well and fast reaching maturity; poppy is everywhere forward; indigo prospects are indifferent; the steady westerly wind is drying up the moisture in the fields; prices (rice excepted) are favourable; general health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Chumparun ...	*Nil*	Rain is wanted; west wind is prevailing everywhere; there is no change in the state of the crops; if rain does not fall shortly, the *rabi* crops in the south of the district will probably suffer considerably.
Patna ...	Return not received.	Weather very cold, with strong westerly wind; the prospects of the *rabi* crops are favourable; health of the district is good.
Gya ...	*Nil*	High west winds, with very little intermission; warmer than usual, save the last two days; thermometer reached 87°; no sign of rain; public health is good; *rabi* crops are still better than might be expected after the long drought; very fair in much the larger part of the district.
Shahabad ...	Return not received.	Weather hot in the commencement, but now cold, with strong westerly wind; prospects of the *rabi* remain unchanged; rain is much wanted.
Hazaribagh ...	*Nil*	Weather cold, with high west winds; there is no change to report; the *rabi* crops continue to suffer from want of rain, while the high west winds are drying up the whole country.
Lohardugga ...	*Nil*	Weather cool, but disagreeable, owing to the strong west winds; the absence of rain has affected the crops in some parts of the Sudder sub-division, but not to any great extent yet; from Palamow the Assistant Commissioner writes—the strong west winds are drying up the crop; no signs of rain; the strong west winds still continue to blow; small-pox still exists in parts of Palamow, but the cases are not many.
Maunbhoom ...	*Nil*	Cold winds blowing; state and prospects of the crops same as last week; so far as the Deputy Commissioner has been able to judge, the few crops on the ground at present appear good, but he expresses an anxiety as regards the scarcity of water; unless there be rain soon, he is afraid there will be an unhealthy season; cholera is reported in one or two places.
Singhbhoom ...	*Nil*	Weather seasonable; such crops as remain are favourably reported, but some rain is now needed for preparation of land for the ensuing season; the district is healthy.
Balasore ...	Return not received	Weather continues fine; no rain has fallen in the district since the 24th October, and ploughing has accordingly not yet commenced; the cold weather crops have been good, and are now off the land; cholera and small-pox are prevalent.
Cuttack ...	*Nil*	Weather cold and dry; crops are doing well; a little rain would do good, but is not absolutely needed; cattle disease in places; health of the people is generally good.
Pooree ...	*Nil*	Weather clear, and very little cold; harvesting of the *earud* or the main rice crop is nigh completion; sugarcane is being cut; pulses are flowering, and some almost ripe; castor plants are growing well, and some flowering; tobacco plantations going on; *dalwa* paddy crop is in progress. *General Remarks.*—No rainfall is reported in any of the districts for the week under review. There is nothing new to report as regards the state and prospects of the paddy crops. The spring crops are progressing favourably, but they require rain in certain places.
N. W. Provinces—		
Benares (Feb. 7th)	...	Prospects same, but rain will improve them.
Allahabad („ 9th)	*Nil*	Prospects good.
Jhansi („ 10th)	...	No change.
Meerut („ 9th)	...	Rain wanted.
Bareilly („ 9th)	...	No change; rain much wanted.
Agra („ 9th)	*Nil*	Slight injury from frost.
Oudh—	...	Report not received.
Punjab—		
Delhi (Feb. 9th)	*Nil*	Crops thriving; health good.
Hissar „	*Nil*	Crops doing well, but rain wanted; health good.
Umballa „	*Nil*	Crops withering; health good.
Jullundur „	*Nil*	Rain desirable for crops; health good.
Lahore „	*Nil*	Health and crops good.
Mooltan „	*Nil*	Rain wanted; health good.
Dera Ismail Khan „	*Nil*	No report.
Rawalpindi „	*Nil*	Crops favourable; health good.
Peshâwar „	1	Agricultural prospects favourable; slight fever prevalent. *General Remarks.*—Agricultural prospects fair, but more rain would improve them; health of province good.
Central Provinces—		
Upper Godavari (Feb. 5th)	...	Clear and cold; prospects favourable; fever abating; prices stationary.
Sambalpur ...	...	Clear; health good.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Raipur ...	...	*Rabi* excellent; health good; prices easy.
Chhindwara (Feb. 6th)	...	Prospects unchanged; health good; prices steady.
Betul („ 7th)	...	*Rabi* favourable; health good; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*continued.*		
Balaghât	...	Threshing of crops completed; health good; prices steady.
Bhandara (Feb. 8th)	...	*Rabi* favourable; fever continues; prices easy.
Nagpur („ 9th)	●	Prospects fair; cattle disease continues; prices steady.
Wardha ...	...	Clear; *rabi* favourable.
Nimar ...	...	Cattle disease prevalent; prices stationary.
Hoshangabad ...	...	*Rabi* promising; outturn of cotton eight annas.
Narsinghpur ...	...	*Rabi* healthy and vigorous.
Jubbulpore ...	...	*Rabi* good.
Saugor ...	...	Prospects unchanged; small-pox and cow-pox prevalent.
Seoni	...	*Rabi* cutting continues; health good; prices stationary.
Damoh	...	Prospects good; prices stationary.
Mundla	...	*General Remarks.*—Prospects continue good.
British Burma ...	...	Report not received.
Assam—		
Gauhati (Feb. 10th)	*Nil*	Mornings cold and more or less misty, days becoming hotter; warm south-west winds; rain much wanted for crops; public health good.
Sylhet „	*Nil*	Prices stationary; cholera declining.
Hyderabad Assigned Districts—		
Umraoti (Feb. 10th)	...	*Rabi* crops nearly ready for cutting; expected outturn good.
Mysore and Coorg—(Feb. 10th)	*Nil*	Agricultural prospects not improved; cholera still prevalent in parts of the province.
Rajputana—		
Bhurtpore (Feb. 10th)	...	No change; crops thriving; rain wanted.
Ajmere „	...	No change to report in prospect.
Jeypore „	...	No change; prospects and health good.
Central India—		
Indore (Feb. 9th)	...	No change to record; all fairly prosperous.

Neemuch „	...	
Rutlam „	...	
Sutna „	...	

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 8th February 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K.C.B.
The Hon'ble A. Hobhouse, Q.C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir W. Muir, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble John Inglis, C.S.I.
The Hon'ble Sir Douglas Forsyth, C.B., K.C.S.I.
The Hon'ble T. C. Hope.
His Highness Mahárájá Iswaríparshád Náráyan Singh Bahádur, of Benares.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.

PLEADERS, MUKHTÁRS AND REVENUE AGENTS' BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill to consolidate and amend the law relating to Pleaders,

Mukhtárs and Revenue Agents in Northern India be taken into consideration. At the last meeting he said a few words in explanation of the dimensions which the Bill had assumed, and gave by no means a full, but a general, explanation of the meaning of the section left. He must now state rather more fully to the Council what was the exact bearing of that section. The law on this subject was at present regulated by Act XX of 1865, which was the Act for determining the status of pleaders, mukhtárs and revenue agents. Some provisions were made by that Act for the examination and admission of pleaders, and it was provided that pleaders, when duly admitted and enrolled, might appear, plead and act in any Revenue Office within the limits of the general jurisdiction of the High Courts in which they were enrolled. Then provisions were made for creating, under certain qualifications and certificates, practitioners called "revenue agents;" and when a person was duly admitted as a revenue agent by the Board of Revenue, he was admitted to practise as a revenue agent in the Revenue Offices within the limits of the territories under that Board. The Council would see that there were two classes of practitioners who, under the Act, might practise in the Revenue Courts,—duly admitted pleaders and duly admitted revenue agents. Now when that Act was passed, a considerable portion of the jurisdiction of the Revenue Courts consisted of an important class of suits between landlords and tenants, usually called rent-suits. The revenue agents therefore practised in those rent-suits and were very largely employed in them, because they consisted of a class who were employed by the zamíndárs to manage their general affairs, and who would possess, independently of their employment in the litigation, a considerable knowledge of their employers' affairs.

Well, the legislature of Bengal in 1869 passed a law for the purpose of transferring rent-suits from the Revenue to the Civil Courts. The consequence was that those practitioners who could only practise in the Revenue Courts were unable any longer to practise in the rent-suits, and the pleaders who could practise both in the Revenue Courts and in the Civil Courts were the only practitioners whose assistance either the zamíndár or the ryot could obtain in the conduct of their rent-suits. It was found that the Act worked hardship both to the practitioner, who was excluded from the practice he was qualified to exercise, and to the suitor, who could not employ the person whom it was most convenient for him to employ. And accordingly the Government of Bengal made an application to the Government of India for an alteration of the law. MR. HOBHOUSE had stated erroneously on the last occasion that the application was first made in the time of Sir George Campbell. He saw that it was first suggested at the end of the reign of Sir William Grey, and he would now read to the Council the words of Sir William Grey when making that application. In speaking of revenue agents he said:—

"The status of these men is primarily affected by Act VIII (B. C.) of 1869, which transfers the adjudication of rent-suits from the Revenue to the Civil Courts, where they are debarred from *pleading* with reference to the provisions of section 11, Act XX of 1865 of the Imperial Legislative Council. The words of this section would seem to declare that, though a mukhtár might appear and conduct cases in the Civil Courts, the actual pleading in such suits was beyond his competency in the present state of the law; while revenue agents were by the 25th section restricted entirely as regards their practice to the Revenue Offices. Even when shut out from pleading in the rent-suits to be brought in the Civil Courts, such of the rent-suits as were pending in the Revenue Courts at the time that Act VIII of 1869 came into effect promised to afford work to these men for some time, but even this chance of present employment has been withdrawn by the operation of Act III (B. C.) of 1870, in accordance with the provisions of which these suits have for the most part been removed from the Revenue Courts. The case of mukhtárs and revenue agents is therefore one of great hardship. The impoverishment, in consequence of the existing state of the law, of the revenue agents of the Backergunge district, who are represented to be an able body of men, has been specially reported by the Collector, and the Board of Revenue have deemed it necessary to recommend that, in the case of all revenue agents who might strike their names off the rolls, a proportionate refund of stamp-duty should be sanctioned on account of the unexpired portion of the current year covered by each cancelled certificate. A petition has also been received from certain zamíndárs and taluqdárs in the Backergunge district, representing the hardship of being compelled, under the amendments of the rent law, to have recourse to the more expensive agency of pleaders, instead of revenue agents, in rent-suits. The Lieutenant-Governor is constrained to recognise the force of the objection; and he fears, indeed, that the advantages of the legislation under Act

VIII (B. C.) of 1869 may, to a great extent, be neutralized by the costliness of the agency, which, under present circumstances, litigants are obliged to employ for the conduct of rent-suits.

"Under all these circumstances, seeing that the changes in the law adverted to press heavily, not only on the mukhtárs and revenue agents themselves, but upon a large body of the people; that in some districts pleaders are even now few in number; and that the men composing the classes of mukhtárs and revenue agents have been long practising with the approval of the Courts and acceptance to the public in this particular class of suits, the Lieutenant-Governor would be glad to see an alteration in the present law as to the position of mukhtárs and revenue agents."

The Council would perceive that there were two distinct grounds taken in that application; one was the ground of hardship to individual practitioners, and the other was the much broader ground of hardship to the community who wanted to have the assistance of revenue agents in rent cases.

The proposal there contained was submitted to the High Court, and that learned body differed in opinion; and he would state to the Council what were the opinions received. The bulk of the Judges were against the proposal; they were eight in number; they included the two able Native gentlemen who were then Judges of the High Court, Bábu Onoocool Chunder Mookerjee and Bábu Dwarkanath Mitter, and also the whole of the Civilian Judges then on the Bench. Any opinion coming from such a body must bear great weight. The statement of the Judges' opinions was rather long, and several of them had written separate Minutes; therefore he could hardly read all they had said to the Council. But he thought it would be accurate to say that the bulk of them concurred in the following reasons, and that no other material reason was given against the proposal. In the first place, as regarded hardship to the practitioner, they stated that it was only since 1865, the date of the Act which he had mentioned at the beginning of his speech, that the revenue agents occupied the particular position from which they complained that they were displaced by the legislation of 1869. Therefore the objectors said that the hardship to the revenue agents was not very substantial. Secondly, the objectors said that the proposed alteration of the law would deteriorate the status of the Bar. They stated that the mukhtárs and revenue agents who would be let in to practise under the alteration were an inferior set of men; that the High Court had been making endeavours for a number of years to raise the status of the Bar in the country with regard to practitioners of all kinds; and that this would be a retrograde step, and let in practitioners with lower qualifications. Thirdly, they said that the remedy proposed was insufficient, if the hardship were real, for it was only proposed to let the revenue agents in to practise in the Munsifs' Courts; whereas, to give a complete remedy, they ought to be allowed to practise in all the Courts wherever rent-suits were carried. Fourthly, they said that there was great practical difficulty in dividing rent-suits from other suits, and there would be much contention and litigation as to whether certain suits were rent-suits or other suits.

He was sure the Council would understand him when he said that this question was one on which he could not himself undertake to form any very original opinion, because he was not personally conversant with the matter. He could only undertake to give the opinions of other people instead of his own, and he would try to do that as fairly as he could, and he believed he had fairly given the opinions stated by the learned Judges. The Council would observe that these reasons addressed themselves to two main points—the status of the Bar, and the hardship on individual practitioners; and that, of course, was natural enough. These were the points upon which the learned Judges had the greatest amount of familiarity and to which they naturally addressed themselves; but they did not address themselves to the broader ground, namely, the hardship on the clients.

Three of the Judges dissented from the opinion of their colleagues. These were the then Officiating Chief Justice, Mr. Norman, Mr. Justice Phear, and Mr. Justice Paul. They took the same grounds that were taken by the Lieutenant-Governor, and they dissented from their learned brethren in thinking either that the status of the Bar would be deteriorated, or that there would be any difficulty in separating rent-suits from other suits. MR. HOBHOUSE would read to the Council a few words from the opinion of Mr. Paul, because he

was a gentleman who for a great many years had a large practice at the Indian Bar, and had thereby been brought into contact with practitioners of all kinds, and had seen in cases which came up to him how these practitioners did their work. He said:—

"I consider the mukhtár or revenue agency a cheap agency, and well adapted to the requirements of poor suitors.

"Speaking from my own knowledge, I should say that mukhtárs, who have hitherto practised as revenue agents, are ordinarily fully able to discharge the duties required of them. I do not think it can be said that, as a body, these revenue agents are incompetent to discharge their ordinary duties, and I therefore consider the total exclusion of these people would be an act of manifest and intolerable injustice.

* * * *

"I generally concur in the views put forward by the Chief Justice, and in that concurrence, and in the few observations I have made, I have entirely omitted from my mind the consideration of hardship. My opinion has been based on the general capacity of mukhtárs to discharge their ordinary duties, and on the sense of justice which ought to guide all legislation."

Mr. Paul, therefore, quite independently of the consideration of hardship to the individual practitioner, speaking in the interests of the suitors and the community, and speaking from his own knowledge how revenue agents did their business, was of opinion that they ought to be allowed to practise in rent-suits. MR. HOBHOUSE was sorry to say that this point was very much overlaid and hidden by the discussions about other matters which arose on the Bill. As he explained to the Council on the last occasion, there were other matters in the Bill of very great importance to the general interests of both client and lawyer all over India, and that an extremely voluminous correspondence had taken place regarding them; and he was afraid that the interests of Bengal suitors rather went to the wall in the controversy which was raised, and there had been a good deal of delay which he very much regretted. Owing to that delay, it was thought necessary, when the matter came on for discussion, to apply again to the Government of Bengal to know whether they retained the view which was put forward by Sir William Grey; and the Government of Bengal not only retained that view, but held that it would be proper in the interests of the community to admit all duly authorized revenue agents to conduct their clients' business in rent-suits. The clause in question therefore was somewhat altered, somewhat enlarged, and was put in the shape in which it now appeared before the Council. As it was originally drawn, it applied only to those persons who should be revenue agents whenever the Act happened to pass. It now provided that persons duly admitted by the Board as revenue agents should be admitted to plead in rent-suits. That was the form in which the Bill now was. He had endeavoured to give to the Council the conflicting views which had been put forth on the subject, and they could form their own opinion whether the report should be accepted.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA BAHÁDUR said that the provisions of the Bill were, he believed, generally approved of by the public; and the landed gentry of his country would, he thought, find it to their advantage if the mukhtárs had the power to plead their rent-suits in the Civil Courts. There was no necessity for the Bill to be published again in the Gazette for the information of the public, and he would suggest that it be passed at once into law.

His Honour THE LIEUTENANT-GOVERNOR thought that perhaps this was a measure on which he ought to say a few words at this present stage. He entirely concurred in the lucid and impartial statement made by the hon'ble member in charge of the Bill, and also in the remarks which had fallen from his hon'ble friend Rájá Nárendra Krishna, who, as the Council knew, was a Native gentleman of the greatest knowledge and experience in this subject. In fact, the hon'ble member's knowledge and experience in these matters were such as might be considered worthy of his high character and status in Native society. And the Council had just heard, though briefly stated, nevertheless strongly stated, the opinion on his part in favour of the Bill.

As regards the general merits of the question, it might be looked upon in two lights, namely, as regards the interests of the Bar and the interests of the clients.

Now as regards the interests of the Bar, he had heard, as everybody had heard, with the greatest respect and attention, the observations which fell from the learned Judges of the High Court. But with all deference to them and the great tribunal they represented, it must be remembered that this was really a question between two sections of the Native Bar. Both of those sections were constituted by one and the same Act; nevertheless they represented two branches of the same stock. There was a Native Bar on the revenue side and a Native Bar on the judicial side. Well obviously, if the Board of Revenue were to speak up on behalf of the Native Bar on the revenue side, it was not a matter to be wondered at. So, by parity of reasoning, if the learned Judges spoke up for the Native Bar on the judicial side, neither was that a matter to be wondered at. It was for the Government and this Council to judge between these conflicting claims.

As regards the merits of the case, it must be considered what was the class of suits to which the present question referred. Well, it referred to suits for rent, which represented the most important class of suits relating to the landed interests of Bengal. Now he put it to this Council whether it was not just that the revenue side of the Native Bar should be admitted to practise in rent-suits. Was it fair to the two sections of the Bar that a monopoly should be secured either by one or by the other? Now, in the present state of the law, it was secured to the judicial section of the Bar. This Bill did not seek to exclude that section, but it sought to admit both sections of the Bar—to give a fair and open field for the exercise of their respective talents. It was well known that no monopoly was sought for on behalf of the revenue section of the Bar, but a fair division, equal terms, were asked for on their behalf.

He might be asked, whether the revenue section of the Bar was likely to be qualified. In point of fact they were likely to be more qualified, perhaps, from their special experience than the judicial section of the Bar. As regards their inferior status and qualifications, which some of the learned Judges referred to, he was sorry that this should be the opinion of such competent authorities. But he would ask the Council to consider the sections of the Act under which these revenue agents were enrolled. The whole Native Bar, both revenue and judicial, was constituted by one Act of this Council (Act XX of 1865). It laid down very precisely the method by which the judicial section of the Bar should be constituted. Having done that, it proceeded to lay down in precisely a similar manner, *mutatis mutandis*, the manner in which the revenue section of the Bar was to be constituted. At the head of the judicial section of the Bar there was the High Court, which might be considered very proper. At the head of the revenue section was the Board of Revenue, which was obviously a proper authority; an authority not, perhaps, so high as the High Court, but which was still at the head of fiscal matters, and an authority which was almost equal in importance to any authority whatever as regards the vastness of their responsibilities and as regards the numerous and weighty public interests entrusted to them. Might he for one moment ask the attention of the Council to the very strict provisions of Act XX of 1865 regarding these agents? Before section 19, there was a heading "of agents practising in Revenue Offices." The section set forth that no person was to act in Revenue Offices unless qualified as therein provided; section 20 said that the names of revenue agents were to be enrolled; section 21 prescribed the form of certificate to which a stamp was to be affixed; section 23 provided that the Revenue Board was to ascertain the qualifications of revenue agents; section 24 prescribed that the Local Government was to appoint examiners; section 25 related to the enrolment of revenue agents in the Offices in which they should usually practise; section 27 provided that the Board should suspend or dismiss revenue agents practising before it who were found guilty of unprofessional conduct; section 28 prescribed the procedure to be adopted when a pleader was charged with unprofessional conduct before the Board; section 30 gave power to the Board to call for the record of a case; then section 33 provided that a dismissed agent was to surrender his certificate; section 34 laid down the penalty for an unqualified person practising as an agent; section 37 laid down that the Board

was to fix the fees to be demanded by revenue agents in civil and revenue proceedings. So that HIS HONOUR could not but think that these provisions were, *mutato nomine*, just as exactly, as strictly and as carefully arranged and drawn from beginning to end as on the judicial side, and you had exactly the same security for the qualification and standard of the revenue side of the Native Bar as you had on the judicial side; and it was not open to any authority to question the qualifications of these agents.

Well, then, as regards the interests of clients, it was but natural that landlords, one great class that had interest in land, should prefer to employ in their rent-suits the same gentlemen that they employed in all other classes of business before the revenue authorities; and it was but natural that the cultivators, the humbler classes, should desire to employ revenue agents whose services could be obtained at an amount not much cheaper than the services of the judicial section of the Bar, but still somewhat cheaper than the members of the judicial Bar. So that there was really an important interest to be served on behalf both of the landowning and the cultivating classes of the country in this matter. The improvements of the Bar (he used the word in its broadest sense), that was to say, the whole Native Bar, whether on the revenue or on the judicial side, was a matter of great importance in Bengal; and cases on the revenue side in the Revenue Offices were becoming just as intricate and important as on the judicial side. He did not know how far the members of this Council followed the course of local politics in Bengal, but it was probably known, more or less, to all the members that there were great revenue laws pending before the local legislature which would in some shape or other be passed into law sooner or later, and the slightest inspection of their character and extent would show the important classes of business which were likely to come up in increasing quantities before the Revenue Courts. He would instance the amendment of the law of partition; the law regarding the management of joint undivided estates; the law regarding the registration of possessory titles in land; and probably—he spoke, perhaps, without absolute authority—the law regarding agrarian disturbances was more or less likely to be passed in some shape or other. These were four important Acts, and doubtless owing to the constant attention given to all matters relating to land in Bengal, there would be some more Acts of a similar nature passed. Now, all these Acts threw a large class of quasi-judicial business on the Revenue Courts, and therefore the revenue Bar became necessarily an important part of the Native Bar; and it was but fair that they should have an equal share with the other section of the Native Bar in these rent-suits.

This matter had been for some time past under the consideration of the Government of Bengal, and as his hon'ble friend opposite (Rájá Nárendra Krishna) knew, and as was known to many other gentlemen and bodies of gentlemen connected with the land, it was a matter on which considerable interest was felt; and without in any way arrogating a position for them superior to their judicial brethren, HIS HONOUR did say that in this, which was an essentially revenue field—relating as it did to rent—revenue agents ought to have a fair and equal share and be admitted upon equal terms; and for such admission the Act in force prescribed a perfect and certain proc[illegible]. He was confident, if the Council were pleased to admit revenue agents on the terms on which the Local Government desired, that these men would prove themselves by their conduct and qualifications worthy of the concession.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed. He said that the Council had heard what conflicting opinions there were on this subject. If any of his hon'ble colleagues thought it was desirable that a republication should take place, or that more time should be allowed for consideration of the question, he was quite willing, with the consent of His Excellency the President, to vary his motion accordingly. Otherwise, he begged to move in the terms of the notice.

The Motion was put and agreed to.

NATIVE COINAGE BILL.

The Hon'ble SIR W. MUIR moved for leave to introduce a Bill to enable the Government of India to declare certain coins of Native States to be a legal tender in British India. He said—

"My Lord, it is well known to the Council that various currencies are in use throughout different parts of India, and that many and great evils result therefrom. The difference of coinages seriously embarrasses trade and perplexes dealers in the markets where they are current. And both to individuals and the State inconvenience and often heavy loss result from the same cause in the realization of rent and revenue. Only those who have been in parts of the country where different coins are current can know the extent of injury and hardship to which the people are subjected by demands being made on them in a different coinage from that which locally prevails. The pressure of each instalment of rent or revenue raises the premium on the coin which is in demand, often to the great detriment of the people. And the same thing occurs in all the dealings of the market. Uncertainty and loss prevail; and the only trade which thrives is that of the shroff or money-changer. The evil demands a remedy if one be possible.

"But it is evident that the evil must last as long as Native mints continue to issue coin each according to its own standard, differing from our standard and from that of each other in weight and value. And Native States possessing the privilege are naturally unwilling to resign it; because this privilege is highly valued by them as a mark and appanage of sovereignty.

"Now the proposed measure is designed to remove these objections, and to smooth the way to the adoption of a common currency throughout all districts both Native and British. It is provided in the measure which I hope to introduce, that whenever any State has signified its willingness, we shall undertake to mint for it a coinage in every respect equal as to weight and value with our own, so that it may be admitted as a standard and legal tender in British India as well as in such Native State. The device and legend on the coin will be such as unmistakably to denote that it is the coin of the Native State in behalf of which it is minted. And thus the dignity and sovereign rights of the State will be respected and maintained, while the currency will be uniform in weight and value with British money.

"To render the adoption of such a course possible certain preliminary securities are required.

"In the first place, it is evident that the arrangement to have any fixity and value, and to secure confidence in the market, must not be temporary, but must continue at any rate for some considerable period of years. For such period, at the least, the Native State must guarantee that it will close its mint and issue only the new money contemplated in this measure.

"Next, it must be stipulated that, if at the close of that term, or at any future period, the State should re-open its mint, it will never, in all time to come, coin any pieces of money at all resembling in appearance the money issued under this Bill. For it is evident that otherwise uncertainty might be thrown upon the legalized coin from the fact of another similar but unguaranteed coinage circulating side by side with the standard money in the British market, before it might be possible to demonetize and withdraw such standard money.

"These are the chief precautions for assuring the safety of the measure. There are other minor matters for which it is proposed to provide. For example, the device on both sides of the coin must be different from that on coins now made and issued by any Native State, and further such design must be first approved by the Government of India. Moreover, on all such coins the value in our money must be inscribed in the English language, a provision required to secure its ready recognition in British markets.

"The measure thus guarded will, it is believed, be perfectly safe, and it will be effective in so far as Native States will agree to co-operate with us in adopting it. But the extent and efficiency of its action will of course be entirely dependent upon their willingness to co-operate.

"It will naturally be asked whether we have any reason to anticipate that they will co-operate. We trust that they gradually will do so. And we have already received adhesions to the measure. The small State of Alwár has the honour of being the first which signified its readiness to fall in with such a scheme. And now Holkar has entered into negociations with the Government of India for the same purpose. His Highness has in this matter shown his usual wisdom and perception of economic benefits, and his ready and loyal appreciation of the common advantages which will accrue from the measure both to his own dominions and ours; and has accordingly signified his willingness to adopt the new coinage in supersession of his own.

"Thus there are two States with which we can commence at once; and when the benefits of a uniform and standard coinage come to be seen, as it may be confidently hoped they will in these instances be seen, we may reasonably expect that other States will follow their example. The progress may be slow; we trust that it will not; but even if it be gradual, the object to be secured is so large and so important that we can afford to wait and to keep it patiently in view. Meanwhile, every Native State which gives in its adhesion to the project will close one of the springs from which the varied currencies flow, and in so far diminish the mischief. And eventually we may cherish the hope that the sources of the evil will all be removed, and that a uniform currency will prevail over every part of the Peninsula and Continent of India."

The Motion was put and agreed to.

SINDH INCUMBERED ESTATES' BILL.

The Hon'ble MR. HOPE asked leave to postpone the motion for leave to introduce a Bill to relieve from incumbrances certain estates in Sindh.

Leave was granted.

The Council then adjourned to Tuesday, the 15th February 1876.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

THE LARVA OR BOT OF THE ŒSTRUS OVIS OR GADFLY OF SHEEP, AND THE TREATMENT OF SHEEP AFFECTED WITH THE LARVA.

From J. H. B. HALLEN, Esq., Inspecting Veterinary Surgeon, to Colonel H. K. BURNE, C. B., Secretary to the Government of India, Military Department, Fort William,—(No. 84H, *Agricultural*, dated Camp Hissar, the 20th January 1876.)

IN reply to your docket No. 1010, dated the 19th October last,* which I have deferred answering before, in order that after due enquiry my report may be as complete as possible, I have the honor to state that the *larva* or bot of the *œstrus ovis* or gadfly of sheep is known in most parts of the world as causing great annoyance to them, but I am inclined to believe its presence is seldom or ever attended with fatal results.

*With accompaniments herewith returned.

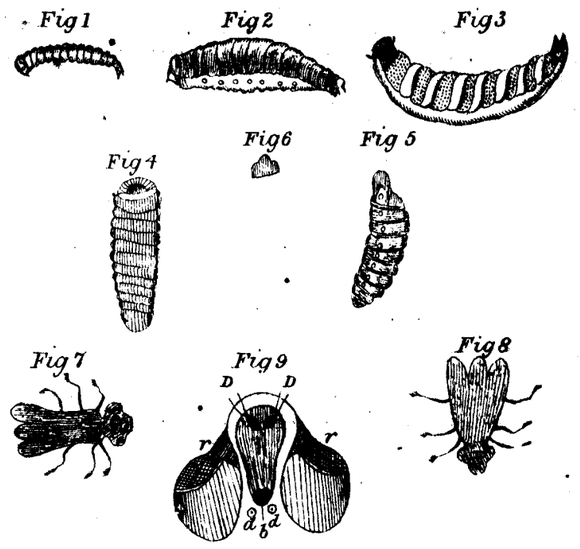
2. In inspecting the sheep of the Hissar cattle farm yesterday, I found many affected, but on enquiry was informed, as is generally allowed, that deaths are never known to occur from the presence of the *larva*. Most shepherds and all butchers are fully aware of the nature of the symptoms. Indeed it is rare to find all sheep of even a very small flock without some suffering from the presence of the *larva*.

Persons who are fond of sheep's head are generally aware of the necessity of carefully removing "the grubs" from the nostrils and sinuses of the head prior to cooking.

3. The late Mr. Bracy Clark's Essay on the *œstrus* in the 3rd Volume of the Linnœan Transactions affords the best English account of these bots; and Reaumur, a French writer in the *Memoires pour servir á l. Histoire des Insectes*, Volume IV., page 556, has written another interesting account.

In a conversation I recently had in Bombay with Mr. Lamb, Officiating Inspecting Veterinary Surgeon of that presidency, he showed me in a French Veterinary periodical a paper by Professor Roll, of Vienna, fully discussing the subject, and I suggested his forwarding a copy when giving his opinion, which he informed me he was about recording.

Professor Roll's account is the latest published.



I take the following extract from a description recorded by Youatt in his work on sheep, new edition, 1866:—

"Even in horned sheep the plates of the frontal bones are not so far separated from each other as in the ox, nor are the frontal sinuses so offensive (page 384), yet the sheep is subject to an excessive annoyance from which the ox is comparatively exempt. There is a fly of the Diptera order (flies with two wings and behind them two globular bodies supported on slender pedicles, called, and properly so, poisers) the *œstrus ovis* or gadfly of the sheep. It assumes its perfect winged form in some uncertain period from May

to July, and then is an intolerable nuisance to the sheep, especially in woody countries, and in the neighbourhood of copses. If only one appears, the whole flock is in the greatest agitation. They gather together with their heads in the centre, and their muzzles buried in the sand, if they can find any, and are in continual motion, stamping with their feet, and snorting, in order to guard their noses against the assault of their puny enemy; then one of them, who is more especially attacked, will burst from his companions and gallop across the field, looking fearfully behind him at every step."

"The *œstrus* impelled by powerful instinct, endeavours to deposit its eggs on the inner margin of the nose. By the warmth and moisture of the part they are almost immediately hatched, and the *larvae* or little maggots crawl up the nose, and find their way to the residence which Nature designed for them. In the act of passing up the nose, they seem to give great annoyance; for the sheep gallop furiously hither and thither, and seem almost mad."

"Having traced their circuitous course through an aperture under the turbinated bone into the maxillary sinus, they sometimes lodge there, others proceed thence into the frontal sinus, and some reach the cavity of the bone of the horn (p. 384). They are found occasionally in every cavity with which that of the nose communicates. When it has arrived at, or selected, its place of residence, the *larva* fixes itself on the membrane of the sinus by means of two tentacula or hooks which grow from the side of the mouth, and there it remains, feeding on the mucus secreted by this membrane from June or July to May or June."

1. The *larva* or bot of the *œstrus ovis* half grown. All these figures, except the last, are of the natural size.
2. The same at its full growth.
3. The under part of the *larva* showing the tentacula and the mode of progression.
4. The *œstrus ovis* in the pupa state.
5-6. The shell after the fly has escaped, and the manner in which it was effected.
7-8. The *œstrus* giving a side and a full length view of it.
9. The head of the *œstrus*, magnified, showing particularly the tentacula, and the apparent want of a mouth.

(Youatt on Sheep, new edition, 1866, page 365.)

"The *larva* is composed of eleven rings, which form a species of cone a little flattened. Figure 1 represents it having attained about one-half of its growth. It is white, with the exception of two small brown patches by the side of each other at its tail; these are the posterior stigmata which are sometimes erect, but generally enclosed within the last ring as in a purse. Below and in the same ring is the anus, concealed by some fleshy folds. On either side, as seen at figure 3, is a fleshy appendage, the use of which is not known. In figure 2, it is represented at its full size, and it will be seen that it is larger than the bot of the horse, but smaller than that which is sometimes found in the warbles on the backs of cattle. The head is armed with two crotchets (see figures 3 and 9,) they are strong, and of a brown color, and have the appearance of little horns. By means of them the bot attaches itself to the membrane of the cavity in which it is contained. The whiteness of the young bot has now partially disappeared. The most elevated of the rings, and particularly of those reaching from the middle of the back to the tail, have gradually changed to a pale, and afterwards to a dark brown; and on each ring are three or four round spots of a still darker colour. At the edge of each of the rings are a few short stems or bristles, and below them (see figure 2) are some small rounded spots of a darker colour."

"The fleshy portions between the rings on the belly of the *larva* are covered with small red spines, the points of which turn backward. They may be felt by drawing the finger lightly over the bot from the tail to the head. These spines probably assist in progression."

"At some time between the middle of April and the end of July, these *larva* have attained their full growth, and seek to escape from their prison. They give great annoyance to the sheep while this is taking place, who again are continually stamping with their feet, and violently sneezing. It is rarely that the exit of the grub from the nose is seen, owing to the impatience of the sheep, and his tossing of the head and continual sneezing."

"They who would make themselves acquainted with the appearance of the bot must purchase some sheep's heads at this time of the year, and saw them open. A great many will be found without any bots; a great many others will have one bot, some will have two, and a few will have three. It is not often that that number is exceeded, although, in a few instances, the head of the sheep has contained nearly a dozen of them."

"When the worms are caught in the act of expulsion from the nose, or are taken in their perfect state from the cavities of a newly killed sheep, they are very restless, and are continually marching, or rather dragging themselves rapidly along. When placed upon the hand, they find their way to the division of the fingers, and, using the points of their crotchets, they endeavour to force them apart. They soon get to the bottom of the loose earth or powder in the usual insect box; and if they are placed on the ground, and the soil is tolerably light, they very speedily bury themselves in it and are lost. Those however that are not arrived at maturity will quickly perish for want of the nutriment from which they were too soon taken. Those that survive in order to undergo their pupa state form to themselves no artificial covering, but their skin gradually contracts and hardens around them. In twenty-four hours it begins to resist the pressure of the finger, and at the expiration of the second day the *larva* has become a perfect chrysalis."

"Figure 4 gives an accurate representation of it. It is smaller than in its first stage of existence, but retains much of the same appearance, except that it has become of a more uniform brown black colour."

"According as the season is more or less favorable, or in proportion to the warmth of the bed or the box in which the insect has taken refuge, the time of the pupa stage of existence is lengthened or shortened. M. Valisnieri states that a worm which he took on July the 5th underwent its final change at the expiration of forty days; but sixty-three days passed before one that he found in April became a perfect fly. Notwithstanding the hardness of the chrysalis, they seemed to escape from their prison with perfect ease. A small part of the head of the pupa becomes detached, and the fly creeps out. Figures 5 and 6 give a sufficiently accurate idea of this."

"The fly is considerably smaller than the size of the *larva* would indicate. Its head and corslet, taken together, are as long as the body; and that is composed of five rings, tiger-coloured on the back, with some small points and larger patches of a deep brown colour. The belly is of nearly the same colour, but has only one large circular spot on the centre of each of the rings—See figures 7 and 8, which represent the *œstrus* of the natural size and appearance. The length of the wings is nearly equal to that of the body, which they almost entirely cover. They are prettily striped and marked. The poisers are concealed by the small and shelly portion of the wings."

"The head of the fly is singularly formed. It is large in proportion to the general bulk of the insect. The eyes have the appearance of net work, and are of a deep and changeable green colour. They occupy less space upon the head than those of most

other flies. In the small space between them are placed three other minute eyes in the form of a triangle. They may be discovered in a tolerable light, or by a lens of small power. The rest of the head is yellow and seemingly hollow. It appears as if it were perforated by a great number of small holes like a piece of sponge, and at the bottom of each of these cavities a small black spot appears. On the anterior and under part of the head are two short antennæ with large bulbous bases—see figure 9. There are very few hairs on the head, but many on the body, sides and legs. A little beneath and towards the throat are three little brown spots or projections in the form of a triangle."

The habitat of sheep is no doubt in mountainous districts, and I think it may be conjectured that only in their domesticated condition in the plains they become subject to the attack of the *œstrus*. The wild sheep of the Cashmere hills are I believe never found attacked, and probably from the fly not being in those regions.

With reference to the treatment of sheep affected, I am induced to think that if a solution of alum were poured down the nostrils morning and evening for a few days, it would cause the *larva* to let go their hold of the living membrane of the nostrils and sinuses of the head, and they would then be easily expelled, but I have in conversation with the officer in charge of the Hissar cattle farm arranged that medicinal remedies, for which I will give him prescriptions, shall be fairly tested, and I will in due course do myself the honor to report whether the results of the several kinds of treatment be attended with benefit or not.

From J. H. B. HALLEN, Esq., Inspecting Veterinary Surgeon, and Member, Special Stud Commission, to Colonel H. K. BURNE, C. B., Secretary to the Government of India, Military Department, Fort William,—
(No. 92, $\frac{\text{"Gadfly of Sheep"}}{\text{Treatment}}$, dated Camp Saharunpore, the 15th January 1876.)

In continuation of my letter No. 53, dated the 16th August last, and with reference to previous correspondence on the subject, I have now the honor to report, for the information of Government, with regard to the several kinds of treatment I have since adopted from time to time with sheep affected with the *larva* of the "*œstrus ovis*" or "gadfly of sheep."

2. During the months of August and September 1875, I obtained the heads of recently killed sheep affected with bots, and on removing the latter, carried out experiments as to the power of many likely kinds of mineral and vegetable drugs to kill them, noting particularly the strength of each solution or mixture in which the bots were placed. By these means I was enabled to judge of the lowest strength of the several kinds of drugs which affected more or less the *larvae*. These measures were necessary, because the drugs to be employed with the hope of causing the bots to let go their hold of the membrane lining the nasal chambers and sinuses, should be of a strength sufficient to effect the above, but not to damage the membrane of the nose or endanger the life of a sheep in the event of any being swallowed by the animal.

3. I found that it was not difficult to destroy the bots by solutions of a strength which would not endanger the life of a sheep; and after carefully watching the effects of different strengths of different medicines on living bots, placed in small glasses, I was enabled to arrive at an opinion as to which particular drug that could be easily obtained in the bazar, might be employed with a fair chance of success.

I then obtained living sheep affected with bots, and continued my experiments with them, making the different preparations and administering them myself, and I found after several days careful administering of, and watching the effects of the several preparations, that the remedy which had the best effect was that of a solution of alum of the strength of one part to twenty (20) to sixteen (16) parts of boiling water, administered when cold, and carefully poured into the nostrils of the sheep, morning and evening.

The sheep were kept tied on a clean pavement, and a boy was placed to watch them and secure any bots that might escape from their nostrils. Several *larvae* were picked up during the course of the day, and they were found to escape generally after the sheep sneezed.

4. Great care is requisite while administering the alum solution, so as to allow of the sheep at once stooping his head, sneeze, and cough, when the larynx became irritated by the alum. One sheep, after two or three days' treatment, showed symptoms of bronchial inflammation, which was doubtless caused by the irritating action of the medicine on the larynx and bronchial tubes.

5. Though the results were in a measure satisfactory as showing that a solution of alum will cause bots to let go their hold and become dislodged, still the care that is necessary in dosing the sheep is such that it can hardly be expected to be used by ordinary shepherds, and I fear the plan cannot be safely adopted with ordinary sheep, but might with advantage be employed with sheep of great value and worth the trouble and care that must be given in adopting the treatment.

6. I beg to add, with reference to paragraph 3 of my letter No. 84H, dated 20th January 1875, that I was informed by one of the European farmers of Dera Dun that hill sheep at Mussoorie are not affected, but that if they are removed from the Himalayas to the plains, and kept there for a time, they do become affected with bots.

I took opportunities of inspecting hill sheep that I saw in the neighbourhood of Mussoorie, and did not find any showing symptoms of having bots.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 17th FEBRUARY 1876.

GENERAL REMARKS.—The only rain reported during the week is a light fall in Delhi, Umballa, Jullundur, Lahore and Rawulpindi in the Punjab, slight showers in Bhurtpore, Ajmere and Jeypore, and a few drops in Sylhet. In Madras and Mysore prospects continue unimproved. In Bombay the *rabi* harvest is in progress: the outturn is expected to be fair. The *rabi* harvest has also commenced in the Central Provinces and Berar: prospects are good. In Rajputana and Central India the crops promise well. In Bengal the rice crop is now all reaped, and the harvesting of the *rabi* has begun: rain is much required for such crops as remain on the ground. Rain is said to be urgently wanted in Upper Assam. Prospects are reported good from the North-Western Provinces and Oudh, but rain is required, and in the Punjab more rain would also be beneficial.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 17th)	*Nil*	Standing crops generally good; gram, pulse, and chillies harvested; outturn about half; markets well supplied locally; prices steady; cholera 114 seizures, 54 deaths, in 5 taluks; fever in 7, and small-pox in 4 taluks; mild epizoötic aphtha continues; pasture scanty.
Kurnool („ 16th)	*Nil*	Season generally good; horse gram and *cholum* harvested in some, and being harvested in other taluks; other crops thriving; markets well supplied; prices steady; cholera in Cumbum and Nundial, 11 seizures, 5 deaths; diarrhœa in Cumbum; fever prevalent; cattle healthy, except in Markapur, Nundial and Puttikonda; pasture and water abundant.
Tanjore („ 17th)	*Nil*	River almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops; standing crops not thriving in several localities for want of rain; harvest wet and some dry crops; yield moderate; markets well supplied; prices almost steady; cholera continues, 254 seizures, 207 deaths; cattle disease in many places, some loss; pasture insufficient.
Trichinopoly („ 16th)	*Nil*	No change in water-supply since last report; crops suffering from want of rain; outturn generally below average; markets well supplied; prices rising; cholera prevailing in all taluks, 153 seizures, 76 deaths; 59 cases of small-pox in Kulitallai; foot and mouth disease prevailing among cattle.
Malabar („ 17th)	*Nil*	Harvesting second crop almost completed; outturn not very good owing to want of seasonable rain; markets well supplied; prices tending to rise; bowel complaints in 7 taluks, 1,046 seizures, 930 deaths; small-pox in North Malabar; cattle disease slight in Wynaad and Ernad.
		General Remarks.—General prospects same as last week.
Bombay— (Feb. 17th)		
Sind. (Feb. 16th)		
Kurrachee ...	...	*Rabi* crops coming into ear; *kharif* preparations progressing; heavy dews at night in southern talukas; weather getting warmer.
Hyderabad ...	...	Weather much warmer; crops well; river high for time of year.
Upper Sind Frontier ...	...	Crops progressing; weather mild.
Guzerat.		
Ahmedabad ...	...	Wheat in Parántij has suffered from frost; other crops continue well everywhere.
Surat ...	...	Cotton picking progressing.
Kaira ...	...	Gram reaped in some places; cotton being picked.
Broach ...	...	Wheat and *jawar* being reaped; other crops good.
Khandesh and Nasik.		
Khandesh ...	...	Reaping of *rabi* crops commenced in some talukas; prospects favourable; fever decreasing.
Nasik ...	...	*Rabi* middling; fever prevalent.
Konkan.		
Tánna ...	...	*Rabi* thriving; prospects fair; reaping commenced in Panwel taluka; small-pox continues in Tanna.
Deccan.		
Poona ...	...	*Rabi* crops being generally reaped; climate and public health good.
Ahmednagar ...	...	No change.
Sholapur ...	...	
Satara ...	...	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	...	No change in state of crops; a few cases of cholera still in five talukas.
Dharwar ...	...	Estimated outturn of wheat, gram, *jawari* and native cotton in Dharwar, Hubli, Gadag and Ron middling, in other talukas unfavourable; cholera increasing; fever and cattle disease decreasing.
Kaladgi ...	...	No change; 22 deaths from cholera in Bádámi taluka.
Kattywar.		
Rájkot ...	...	No change; cholera in Morvi decreasing.
Wadhwán ...	...	Weather moderate; cotton picking continues.
		General Remarks.—Crops generally fair; cholera still prevalent in Morvi and Southern Mahratta Country.
Bengal—(Feb. 17th)		
Chittagong ...	*Nil*	Weather cool; rain is wanted; cholera is decreasing; small-pox is still prevalent.
Noakhally ...	*Nil*	Weather cold and fair; the winter crops are promising well, but little rain would do much good; cases of cholera and small-pox still prevail in certain parts of the district.
Chittagong Hill Tracts...	*Nil*	Weather very cold at night during the last part of the week; mustard is being gathered; the hillmen have begun to cut jungle for their joom.
Hill Tipperah ...	*Nil*	Weather cold and fair; no change in the state and prospects of the crops since last week.
Backergunge ...	*Nil*	Weather cold; state and prospects of the crops are fair, but rain is wanted.
Furreedpore ...	*Nil*	Weather unusually cold during early part of the week, but towards its close somewhat warmer weather set in; still complaints of want of rain for *rabi* crops; health of the district is good.
Dacca ...	*Nil*	Weather was cool up to last three days; state and prospects of the crops are very fair.
Mymensing ...	*Nil*	Weather colder than last week; mornings cloudy; no crop of any consequence is on the ground at present; rain is much needed for tobacco and *khesari*.
Tipperah ...	*Nil*	No change in the weather since last week; the cold weather crops are all nearly harvested, and are pretty fair; *boro dhan* is now being planted out, and is suffering from want of rain.
24-Pergunnahs ...	*Nil*	Weather cold in the beginning of the week, getting warmer since; the harvest of *amun* or the late rice is all but completed; cold weather crops are doing well; cholera and fever have much abated throughout the district.
Jessore ...	*Nil*	Weather bright and clear; the cutting of winter crops continues; no change in the state and prospects of the crops; rain is wanted.
Nuddea ...	*Nil*	Weather is becoming sensibly warmer; there is nothing new to report regarding the state and prospects of the crops; the harvest is going on, but the outturn is generally poor.
Moorshedabad ...	*Nil*	Weather fairly cool and seasonable; prospects of crops are fair; *boro dhan* is still being sown and transplanted; a full harvest of cold weather crops not expected owing to absence of rain; indigo is fair; mustard is being reaped, and sugarcane is cut and crushed; public health is good.
Pubna ...	*Nil*	Weather clear and fine, and unseasonably cold; no change in the state and prospects of the crops since last report; a fresh outbreak of cholera has occurred near Oronkola; 25 deaths are reported.
Rajshahye ...	*Nil*	Weather clear and cold, but no appearance of rain; the *rabi* crops are suffering much from continued absence of rain, which is very much wanted for all kinds of crops.
Bogra ...	*Nil*	Weather fair; no change in the state and prospects of the crops since last report.
Maldah ...	*Nil*	Weather generally clear, days warmer, nights still cold; transplantation of the early spring rice is progressing and in places is completed; *rabi* crops are suffering from want of rain; their outturn does not appear to be very good at present; on the average a 9 to 10 anna yield is expected; rain is still wanted for the early winter crops.
Dinagepore ...	*Nil*	Weather fine; state and prospects of the crops on the whole are fair.
Rungpore ...	*Nil*	Weather getting warm; mustard has yielded a good average crop, in some places it is still being reaped; sugarcane and ginger crops are good; potatoe crop is larger than the average; wheat and pulses are poor for want of rain; tobacco is promising; *aous* being sown.
Cooch Behar ...	*Nil*	Weather very cold; the prospects of the tobacco crop have not improved, as there was no rain during the week.
Jalpaiguri. ...	Return not received.	Weather has been cold and pleasant; no sign of rain, which is greatly needed; nothing special to report as to the crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Darjeeling ...	*Nil*	Weather milder, with a little more sunshine; the few unimportant crops on the ground now are doing well; land is being prepared for sowing.
Midnapore ...	Return not received.	Weather fine and dry, *rabi* crops have been sown over a larger area than usual, but the outturn will only be moderate; there is sporadic cholera in many places.
Howrah ...	*Nil*	Weather is still fine; state and prospects of the crops remain unchanged.
Hooghly ...	Return not received.	Weather very cold on the 4th and 5th February but getting warmer subsequently; *boro* rice in the south is going on well; transplanting of *boro* rice into swamp lands from nurseries is going on well, but water is shallow; sugarcane being cut and pressed; sugarcane cuttings are being planted out; banking up of potatoe lands is closed, but irrigation is still carried on in late potatoe lands; early potatoes are being dug up, mangoe trees are now in flower; *rabi* crops are doing well, and a good outturn is expected; very late *amun* rice (*kalesh* and *maghi*) is still being harvested from swamp lands in the south; gram, pulses, *motur* and *musooree*, are being cut; yield is very good; vegetables are abundant, except brinjals.
Burdwan ...	*Nil*	The oil-seed crops are nearly all got in, and the outturn is fair. The later cold weather crops, pulses, barley, and sugarcane, are looking better than could be expected in the absence of the usual rain at this season; rain is much wanted; the tanks are getting very low, and cholera is beginning to appear in Culna and Jehanabad.
Bankoorah ...	*Nil*	Weather is getting warm; no change in the state and prospects of the crops since last week; health of the district is good.
Beerbhoom ...	*Nil*	Weather warm; in some parts the want of rain is damaging the winter crops.
Southal Pergunnahs ...	*Nil*	Nights cold; days getting warmer; prospects of *rabi* are not improved; general health is good.
Bhagalpur ...	*Nil*	Owing to continued drought the *rabi* is drying up on high lands; it is still very good in many places, especially near the *Kosi*; prices of rice and *murwah* are not rising in Soopool, though the sub-divisional officer reports the condition of the people in Naradigur, outside Court of Wards' jurisdiction, to be getting very bad; the Collector leaves for Soopool this week; in Mudehpoorah, where grain is just as dear, the sub-divisional officer says he hears of no complaints of prices, and the condition of the people is very good; general health of the district is very good.
Monghyr ...	Return not received.	Weather seasonable; state and prospects are much the same as last week.
Purneah ...	"	Weather was very cold during the first part of the week, but to-day the wind has changed to the east, and it has become warmer; the gram and pulses are still looking fair; wheat and barley are in ear, but the crop is a poor one; ploughing for *bhadoi* sowings is going on; prices continue the same as last week.
Durbhangah ...	*Nil*	Weather fine and cold, with west wind during the early parts of the week; much warmer the last two days; no change in the prospects of crops; prices are stationary for the most part, with slight decline here and there; relief officers employed in the Madhobani sub-division report several cases of distress, but the markets are still well supplied with grain, though the means of purchasing it are beginning to fail.
Mozufferpore ...	Return not received.	Weather is getting rather warmer; there is no material change in the prospects of the crop throughout the district.
Sarun ...	*Nil*	Weather cold; sky clear, with west wind prevailing; cold weather crops are generally very fair, and a good outturn may be expected; mustard and peas are being harvested; wheat, barley, and *rahur* pulse are doing well, and fast reaching maturity; poppy is flowering; indigo prospects indifferent; slight injury to peas and *ruhur* from frost within the jurisdiction of thana Buragaon, in the Sewan sub-division, has been reported by the police; prices are favourable; general health is good.
Chumparun ...	Return not received.	There is no change from previous week; the crops are flourishing, though except in the north, where the land has been irrigated, there will not be a full *rabi* crop if rain does not fall shortly.
Patna ...	Return not received.	Weather seasonable; prospects of the crops are favourable; health of the district is good.
Gya ...	*Nil*	Weather warmer; high westerly winds during the day; highest reading of thermometer 89° 4′ in the shade; *rabi* crops are fair throughout the district; very little injury from want of rain; public health is good.
Shahabad ...	Return not received.	Strong westerly winds in the south; oil seeds, poppy and tobacco are promising; but the *rabi* requires rain; a few cases of small-pox reported in Sasseram.
Hazaribagh ...	*Nil*	Weather cold, with high very drying west winds; there can be no change in the state and prospects of the crops till some rain falls; the *rabi* crops will be very short; the high winds are damaging the opium, and while the ground continues in its present hardened condition, the ryots cannot plough; *mahua* and mangoe are coming into blossom.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Lohardugga ...	*Nil*	Weather warmer than last week; high west winds; no rain: the gram and *makai* crops have suffered to some extent in some parts of the sudder division for want of rain; from Palamow the Assistant Commissioner reports that the outturn will be short owing to no rain; the westerly winds still continue to blow; general health is good; a few cases of small-pox still reported from Palamow.
Maunbhoom ...	*Nil*	Weather is still extremely dry, with scarcely any dew; reports from all parts of the district are to the effect that the crops promise well; but the reservoirs of water for cattle and irrigation are getting low.
Singbhoom ...	*Nil*	Weather is seasonable; state and prospects of the crops, &c., in every respect the same as last week.
Balasore ...	*Nil*	Weather fine and dry throughout the district; the rice harvest is finished, and agricultural operations are for the most part at a standstill; health of the district is somewhat improved.
Cuttack ...	*Nil*	Weather is drier than usual at this season, and occasionally warm; cold weather crops are being reaped with good outturn; public health is good; price of food-grain is low.
Pooree ...	*Nil*	Weather clear and very little cold; harvesting of the *sarad* or the main rice crop is completed; sugarcane is being gathered; some pulses are in pods and some are ripe; mustard seeds are being harvested; tobacco, cotton, and *dalwa* paddy crops are fairly progressing. *General Remarks.*—No rainfall is reported in any of the districts for the week under review. The paddy crops are all off the ground and harvested. The harvesting of *rabi* crops in some places has begun, but those that are still on the ground require rain. Relief officers employed in the Madhobani sub-division report cases of distress; but the markets are still well supplied with grain, though the means of purchasing it are apparently beginning to fail.
N. W. Provinces—		
Benares (Feb. 14th)	*Nil*	Crop prospects continue good.
Allahabad („ 16th)	...	Prospects good.
Jhansi („ 17th)	...	Prospects good.
Agra („ 16th)	*Nil*	Prospects favourable.
Meerut „	...	Rain wanted; cloudy weather.
Bareilly „	...	No change.
Punjab—		
Delhi (Feb. 16th)	·1	
Hissar „	*Nil*	Crops suffering from want of rain; health good.
Umballa „	·1	Crops withered; health good.
Jullundur „	·9	More rain wanted; health good.
Lahore „	Slight shower.	Crops and health good.
Mooltan „	*Nil*	Rain wanted; health good.
Dera Ismail Khan „	*Nil*	Health and harvest good.
Rawalpindi „	·1	Prospects fair; health good.
Peshâwar „	*Nil*	Harvest prospects fair; slight fever prevalent. *General Remarks.*—Harvest prospects so far good, but more rain needed; health of province good.
Oudh—		
Lucknow (Feb. 16th)		Public health good; agricultural prospects generally favourable; rain wanted.
Sitapur „		
Fyzabad „		
Central Provinces—		
Upper Godavari (Feb. 12th)	...	Prospects favourable; health good; prices fluctuating.
Sambalpur ...	...	Clear and cool; sugarcane pressing continues; health good.
Raipur ...	...	Clear; prospects excellent; health good; prices easy.
Chhindwara (Feb. 13th)	...	Clear; prospects favourable; health good; prices stationary.
Betul („ 14th)	...	Prospects continue good; health good; prices steady.
Balaghât ...	...	Warm; *rabi* cutting; health good; prices steady.
Bhandara (Feb. 15th)	...	*Rabi* continues favourable; fever continues; prices easy.
Nagpur („ 16th)	...	Warm; prospects fair; small-pox and cattle disease prevalent; prices risen.
Wardha ...	...	Clear; *rabi* cutting.
Nimar ...	...	Warm; cattle disease prevalent; prices easy.
Hoshangabad ..	...	Hot; *rabi* promising.
Narsinghpur ...	...	*Rabi* promising.
Jubbulpore ...	...	Warm, cloudy; prospects of *rabi* good; hooping cough and small-pox prevalent.
Saugor ...	...	Cool; minor *rabi* crops injured by frost in places.
Seoni ...	...	*Rabi* cutting continues; health good.
Damoh ...	...	Prospects good; prices stationary.
Mandla ...	...	*General Remarks.*—Prospects of *rabi* continue good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma (Feb. 17th)		
Arakan Division ...	...	Public health good.
Pegu Division.		
Rangoon ...	...	Slight fever in Pegu and Hpounglen; slight cattle disease.
Bassein ...	...	Small-pox continues.
Henzada ...	...	Public health good.
Prome ...	...	Cholera continues; 25 deaths since last report.
Shwedoung ...	...	Small-pox continues, but less fatal.
Thayetmyo ...	...	Health good.
Tenasserim Division ...	No report received.	
Assam—		
Gauhati (Feb. 17th) ...	*Nil*	Mornings cold and more or less misty, days becoming warm; south-west wind prevails; rain very urgently wanted; tea seeds being sown; public health good.
Sylhet „	...	Few drops of rain; weather cloudy.
Hyderabad Assigned Districts—		
Umraoti (Feb. 17th)	...	Cutting of *rabi* just commenced; expected outturn good: public health good.
Mysore and Coorg—(Feb. 17th)	*Nil*	Prospects of season unimproved; cholera still prevails in 4 districts of the province; 59 fatal cases reported during the week.
Rajputana—		
Haraotee (Feb. 5th)	*Nil*	Health and prospects good; tanks unusually low.
Tonk („ 5th)		
Bhurtpore („ 17th)	...	Slight shower on the 15th; clear, sunshiny weather.
Ajmere („ 17th)	...	High winds; cloudy; some light rain; fever, influenza and small-pox prevalent; crops promise well.
Jeypore („ 17th)	A few drops	Agricultural prospects continue promising; public health good.
Central India—		
Indore (Feb. 16th)	...	No change in Central India; health and prospects good.

In the report for the week ending the 20th January, published in the Supplement to the Gazette of the 22nd idem, in the remark column, opposite Malabar, for 16 deaths read 161 deaths.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 15th February 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C, M. G., C. B.
His Highness the Mahárájá of Vizianagram, K.C.S.I.
The Hon'ble John Inglis, C. S. I.
The Hon'ble Sir Douglas Forsyth, K. C. S. I.
The Hon'ble T. C. Hope.
His Highness Mahárájá Iswariparshad Naráyan Singh Bahádur of Benares.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.

CRIMINAL TRIBES (LOWER PROVINCES) ACT EXTENSION BILL.

His Honour THE LIEUTENANT-GOVERNOR moved for leave to introduce a Bill to extend the Criminal Tribes Act to the Lower Provinces of Bengal. The object of the Bill which he hoped to have leave to introduce was briefly this.

There were certain tribes in the Provinces under the Government of Bengal who lived by thieving, and whose social condition was in several respects a disgrace—he could not use a milder expression—to a civilized community and indirectly a discredit on the Government that tolerated it, if indeed it were tolerated. Well, as the Council knew, it was much more easy to describe an evil than to provide remedies for it, and he was not sure even that a perfect remedy could be provided. At all events, it seemed incumbent upon them to do what they could for the reclamation of these criminal people and trust to Providence for the result. The two particular tribes they had under notice were the Mugheya Domes of Bihár and the Bedyas of Eastern and Central Bengal. The Mugheya Domes were not only a nuisance to the well-disposed inhabitants, but were in several respects a dangerous class. The Bedyas were not so dangerous, but were of a thieving, predatory and wandering disposition, as he dared say some of his hon'ble colleagues on the left were well aware.

Sometime ago a Bill was passed by this legislature for registering and bringing under discipline some criminal tribes in the North-Western Provinces, and the Government of Bengal now desired to introduce a similar measure into these provinces; and inasmuch as the Bill for the North-Western Provinces was very carefully prepared and had been worked doubtless with some degree of success in that part of the country, he (THE LIEUTENANT-GOVERNOR) thought the best and simplest plan was to provide for its extension to the provinces under the Government of Bengal. One advantage of this course was brevity: a Bill with one or at most two sections would do all that was necessary, and give the Lieutenant-Governor of Bengal power to do all that it was desirable to do with regard to the predatory tribes whom he had just mentioned.

The Motion was put and agreed to.

NATIVE COINAGE BILL.

The Hon'ble SIR W. MUIR introduced the Bill to enable the Government of India to declare certain coins of Native States to be a legal tender in British India, and moved that it be referred to a Select Committee with instructions to report in a month. He said that he had entered last week so fully into the object of the measure and the provisions by means of which it was proposed to give effect to it, that little remained for him but to introduce the Bill. He would merely allude to the main outlines.

A condition antecedent to any action under this Bill was the expressed desire of a Native State to adopt its provisions, and in furtherance of the same to undertake certain obligations. These obligations would be found detailed in the fifth and following clauses of the fourth section. The first and chief was, that the Native State undertook to close its mint for a period of not less than thirty years, and to use the new money to be coined under this Bill as its legal currency. Then, if at the close of such period the mint were re-opened, no coin resembling the new coin was ever to be minted. We might hope that, after so long an experience of the benefits of the new system, it would become permanent; but, under any circumstances, the period allowed for the experiment must be a long one; and it was thought that any term less than thirty years would not be suitable for the purpose.

When the Native State had undertaken these obligations, then section two provided for the issue of a Notification, whereupon the new coins would become a legal tender in British India.

The earlier clauses of section four contained provisions regarding the coins to which the Bill would have reference. They are to be identical in weight and fineness with coins of British India. The devices on the obverse and reverse are to differ from that of any Native coins, and to be approved by the Governor General in Council; and the value of each coin is to be inscribed on it in the English language.

His Highness THE MAHÁRÁJÁ OF BENARES said that as inconvenience and loss were constantly being felt in consequence of the number and variety of coins, some good plan should be devised to remove this inconvenience.

It was mentioned in the statement of reasons for introducing this Bill, that it would be naturally unpleasant to the Chiefs of India to give up their privilege of coining, and provision had accordingly been made in the Bill to remove this feeling. In his opinion also this important matter was deserving of greater consideration, and he hoped that the Select Committee would give their best attention to it. It would perhaps be better that, instead of Government going to the trouble of striking coins in its own mint, it should hold Native States responsible for the correctness of their standard of value and weight; or another plan would be, that the weight and value of such coins, as compared with British rupees, should be tested and published. They would then circulate easily and without loss; and the object of the Bill would thus be preserved, and no other ideas would arise in Native States.

His Highness THE MAHÁRÁJÁ OF VIZIANAGRAM said that the establishment of a uniform coinage throughout India would give great facilities to trade, and would also remove serious inconvenience and loss, both to the public and the State. The provisions prescribed in the Bill would, he hoped, remove the objections made by several Native States to resign the privilege of issuing coin themselves. At the same time he hoped that the Select Committee, in considering the Bill, would bear in mind that the power of coining money had been enjoyed by Native States from a remote period.

His Excellency THE PRESIDENT said:—"I have no doubt that the Select Committee will take into consideration the observations which their Highnesses the Maháráját of Benares and the Maháráját of Vizianagram have made upon this Bill. It is, however, well to state distinctly that the provisions of the Bill will in no way interfere with the discretion of Native Princes. The introduction of a uniform currency would be of considerable advantage to the people of the Native States of India, because, as has been observed by His Highness the Maháráját of Vizianagram, the inconvenience of having coins differing from those of British India circulating in Native States which are gradually being brought into closer business relations with us, by the extension of railroads, is very great. The Bill has been carefully framed, so that there will be no interference whatever with the discretion of the Ruler of any Native State who may desire to take advantage of its provisions.

"The arrangement contemplated by the Bill is entirely of a voluntary character, and only such conditions have been imposed as appeared to the Government to be essential in order to secure a uniformity of the standard currency throughout India.

"I am happy to say that His Highness the Maháráját of Indore, in personal communication with myself, has expressed his desire to take advantage of this Bill in order to secure a uniform currency between His Highness' territories and those of the British Government; and I trust that other Rulers of Native States may see the advantage of adopting a similar course.

"At the same time I wish it to be distinctly understood that the Government of India, in introducing this Bill, desires in no way to exercise pressure, either directly or indirectly, upon Native States, and that it is entirely left to them to say whether they will, or will not, take advantage of the Bill."

The Motion was put and agreed to.

The Hon'ble SIR W. MUIR then moved that the Bill be published in English in the *Gazette of India* and in the respective Gazettes of the Local Governments in English and such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

PRESIDENCY MAGISTRATES' BILL.

The Hon'ble MR. HOPE presented the further Report of the Select Committee on the Bill to extend certain parts of the Code of Criminal Procedure to

the Courts of the Police Magistrates in the Presidency towns. He said that although he did not propose to move the Council to take this Report into consideration on the present occasion, yet he thought it might be convenient, considering that the measure had already been some four years under consideration, if he were to state, in as few words as possible, its origin and present scope. Act XXV of 1861 did not apply to the High Courts in their action in the Presidency towns or to Police Magistrates in such towns. When the amendment of that Act, which became law as Act X of 1872, was under consideration, although the principle was fully admitted that the system of procedure for the Mofussil ought, *mutatis mutandis*, to be extended to the Presidency towns, yet it was not thought desirable to incorporate such an extension with the revised Code itself, because that course might have given rise to considerable discussion and have postponed for an indefinite time the improvements in that Code which at the time were urgently required for the Mofussil. At the same time, however, in April 1872, Mr. Stephen obtained permission to introduce a separate Bill to carry out the object in view; and in doing so said of the procedure at that time obtaining, and up to the present time obtaining, in the Presidency towns as regards the Police Courts, that "it was quite impossible to say where it began or what it was," and that it caused "great waste of public time and money about matters of absolutely no importance at all."

In accordance with the permission then granted, the Hon'ble Mr. Hobhouse in July 1873 introduced a Bill which was referred to a Select Committee. In April 1874, he presented the Report of the Select Committee, the principal recommendation of which was that the Bill then before the Council should be divided into two. One portion relating to the High Courts alone was accordingly retained as the main Bill, which became law as Act X of 1875: the other portion was taken out and introduced as a distinct Bill, having reference to Police Magistrates alone; and that was the matter now under consideration.

The principle of the Bill was that it applied to the Presidency towns a variety of sections of the Code of Criminal Procedure. It, further, allowed the Magistrates of Police to try all cases summarily, and it made no distinction between the powers of Native and European Magistrates over Europeans, because it was considered, as regards both these matters, that the check of the Press and the Bar would prevent irregularities such as might arise in the Mofussil. At the same time the Bill gave no control to the Magistrates over the Police, because it was a large and important body and required a separate head, the Commissioner of Police. The Committee reserved for future consideration a suggestion made by the High Court at Calcutta that the powers of Police Magistrates should be extended in order to save the jurors and the Court from the necessity of trying a variety of trivial cases.

In March 1875, the Committee submitted a Report on this Bill, and, as the result of their communications with the High Court and the Local Governments, they proposed to give to Police Magistrates the powers of Magistrates of the first class in the Mofussil, subject to an appeal to the High Court from the sentences of such Magistrates which exceeded one year's imprisonment or Rs. 500 fine. As to the form of the Bill, it then consisted of a few sections and a large schedule, in which the various sections of the Code of Criminal Procedure to be applied were quoted by their numbers.

Since the presentation of that Report, the Committee had further considered the matter, and in deference to representations received from various quarters regarding the great inconvenience of a Bill which merely quoted in a schedule the sections of the Code of Criminal Procedure which were applicable to the Courts of Police Magistrates, they had come to the conclusion that it would be more convenient to the Magistrates themselves, to the Bar, and to the public, if they were to re-enact the whole of those sections *in extenso*. This course produced one great advantage, that it brought to light a variety of small anomalies, omissions and superfluities which the schedule contained. At this stage the Committee had to acknowledge the great assistance they had received from some elaborate Minutes by Major Waldon, the Senior Magistrate

of Police at Madras, and also from the attendance in Committee and valuable suggestions of Mr. Dickens, one of the Police Magistrates of Calcutta.

The Bill differed from the previous one only in a few points. It was proposed to alter the designation of "Police Magistrates" to that of "Presidency Magistrates." Theoretically, if there was one thing that Magistrates ought not to be, it was policemen, and practically they had no control over the police; further, the cases tried by them were not merely what were called, in common parlance, police cases, but cases of all degrees of magnitude, including those referred to the High Courts.

Further, the Committee proposed to abolish the Court of Petty Sessions at Bombay, which had fallen almost entirely into disuse. The powers conferred on it by Bombay Act IV of 1866 had never been availed of; and in 1874 the only work done by it was the hearing of twelve opium cases and thirteen municipal appeals. Under these circumstances, and as no such Court existed at Calcutta or Madras, the Committee had provided for its abolition, reserving the hearing of municipal appeals to the Senior Magistrate, who was "Revenue Judge" for all land matters at the Bombay Presidency.

Another change was a very material improvement in the mode of record, with the view of affording facilities to the High Courts in dealing with all cases which came up before them on appeal or by way of *certiorari*. And the Committee thought that, with these additional provisions and with the check always supplied by the Press, the Bar, and the public, there was no danger of the enlarged powers proposed to be entrusted to Presidency Magistrates being in any way misapplied.

The chapter on local nuisances the Committee proposed to omit, because it was found that the whole of these matters were already provided for by the local Municipal Acts, and the introduction of that chapter might only give rise to questions of conflicting jurisdiction.

The Committee trusted the Bill would be found to be a complete document and useful to all concerned, and that it would remove what the late Lieutenant-Governor, Sir George Campbell, had called "that floating undefined English law which rendered the procedure of the Presidency Police Courts altogether uncertain, altogether obscure, and altogether beyond the powers of the public to comprehend."

MR. HOPE had said that he did not propose to make any motion for the consideration of the further Report on this Bill. He would therefore only move that the Bill be republished. It was proposed to wait a short period, about a month, to receive any suggestions that might occur to those acquainted with the subject, and then to take the Bill into consideration with a view to its being passed at an early date.

The Motion was put and agreed to.

CHUTIA NAGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR presented the Report of the Select Committee on the Bill to relieve from incumbrances certain estates in Chutia Nágpur.

The following Select Committee was named:—

On the Bill to enable the Government of India to declare certain coins of Native States to be a legal tender in British India—The Hon'ble Messrs. Hobhouse and Bayley, His Highness the Mahárájá of Vizianagram, the Hon'ble Mr. Bullen Smith, His Highness the Mahárájá of Benares and the Mover.

The Council then adjourned to Tuesday, the 22nd February 1876.

CALCUTTA,
The 15th February 1876.

WHITLEY STOKES,
Secretary to the Govt. of India,
Legislative Department.

h In the interior prices range as follow :—Wheat 21 seers, rice best sort 24 seers, and rice common 26-8 seers.
i In the interior prices range as follow :—Wheat 33-12 seers, rice best sort 16 seers, rice common 21 seers, and gram 26-4 seers.
j In the interior prices range as follow :—Wheat 16 to 21 seers, rice best sort 11-4 to 21 seers, rice common 20 to 23-11 seers, and gram 10 to 18 seers.
k In the interior prices range as follow :—Wheat 26 seers, rice best sort 11 seers, rice common 23-8 seers, and gram 20 seers.
l In the interior prices range as follow :—Wheat 8 seers, rice best sort 5 to 14 seers, rice common 11 to 24 seers, lesser millets 14 seers, maize or Indian corn 20 to 40 seers, and gram 10 to 13 seers.
m In the interior prices range as follow :—Wheat 8 to 13 seers, rice best sort 13 to 20 seers, rice common 15 to 26 seers, and gram 8 to 13 seers.
n In the interior prices range as follow :—Rice best sort 16 to 19 seers, and rice common 19 to 20 seers.
o In the interior prices range as follow :—Wheat 26 seers, barley 40 seers, rice best sort 10 seers, rice common 19 to 26 seers, and gram 16 seers.
p In the interior prices range as follow :—Rice best sort 16 to 20 seers, rice common 19 to 21 seers, paddy 36 to 40 seers, and gram 12 to 21 seers.
q In the interior prices range as follow :—Wheat 13 to 18 seers, rice best sort 13 to 20 seers, rice common 17-13 to 26 seers, and gram 10 to 16 seers.
r In the interior prices range as follow :—Rice best sort 19 seers, and rice common 23 seers.
s In the interior prices range as follow :—Rice best sort 15 to 19 seers, and rice common 16 to 22 seers.
t In the interior prices range as follow :—Wheat 25 to 30 seers, barley 40 to 47-8 seers, rice best sort 20 seers, rice common 21-4 to 27-8 seers, lesser millets 45 seers, maize 35 to 41-4 seers, and gram 28 to 37-4 seers.

u In the interior prices range as follow :—Wheat 23 to 26-8 seers, barley 34 to 45 seers, rice best sort 11 to 14 seers, rice common 24 to 29 seers, bulrush millet 30 to 31 seers, great millet 27 to 32 seers, lesser millets 40 seers, maize 31 to 40 seers, and gram 32 to 34 seers.
v In the interior prices range as follow :—Wheat 24 seers, barley 35 seers, rice best sort 14 seers, rice common 18 seers, lesser millets 30 seers, maize 34 seers, and gram 28 seers.
w In the interior prices range as follow :—Wheat 19 to 22-8 seers, barley 35 seers, rice best sort 14 to 21 seers, rice common 22-8 seers, lesser millets 30 to 36 seers, maize 32 to 34 seers, and gram 20 to 24 seers.
x In the interior prices range as follow :—Wheat 20 to 29 seers, barley 30 to 45 seers, rice best sort 14 to 18 seers, rice common 20 to 26 seers, lesser millets 15 to 25 seers, maize 34 to 45 seers, and gram 23 to 28 seers.
y In the interior prices range as follow :—Wheat 20 to 25 seers, barley 31 seers, rice best sort 20 to 22 seers, rice common 21 to 26 seers, murhwa 33 seers, and gram 19 to 33 seers.
z In the interior prices range as follow :—Wheat 22 to 26 seers, rice best sort 20 to 21 seers, rice common 24 seers, and gram 24 to 26 seers.
aa In the interior prices range as follow :—Wheat 18 to 26 seers, barley 45 to 47 seers, rice best sort 20 to 26 seers, rice common 23 to 29 seers, bulrush millet 50 to 56 seers, maize 38 to 55 seers, and gram 21 to 28 seers.
bb In the interior prices range as follow :—Wheat 20 seers, rice best sort 18 seers, and rice common 26 seers.
cc In the interior prices range as follow :—Wheat 22 to 25 seers, barley 30 to 45 seers, rice best sort 13 seers, rice common 25 to 27-8 seers, lesser millets 45 to 49 seers, maize 35 to 37-8 seers, and gram 22 to 30 seers.
dd In the interior prices range as follow :—Wheat 17-8 to 20 seers, barley 16 seers, rice best sort 19 to 24 seers, rice common 25 to 29 seers, maize 40 seers, and gram 16 to 22-4 seers.

Prices Current of Food-grains throughout India for the 2nd half of January 1876 —continued.

REVIEW OF THE ACCOUNTS OF TRADE AND NAVIGATION FOR 1874-75.

No. 124.

Extract from the Proceedings of the Government of India, in the Department of Revenue, Agriculture and Commerce, dated the 24th February 1876.

[STATISTICS.]

READ—

The Annual Statement of the Trade and Navigation of British India with Foreign Countries and of the Coasting Trade between the several Presidencies and Provinces in the year ending the 31st March 1875.

READ also—

A Review of the figures contained in the statement, compiled by Mr. J. E. O'Connor, Assistant Secretary in the Statistical Branch of this Department.

RESOLUTION.—The publication of these accounts has been somewhat delayed, but the delay was unavoidable, owing to the discovery of serious errors in the accounts of the coasting trade of Madras and Bombay for the year and for previous years. The nature of these errors is explained at page 75 of the review prepared by Mr. O'Connor. The errors in question in the Madras accounts represented the entire omission from all published statements of the value of the coasting trade between British ports in that province, amounting in 1874-75 to no less a sum than £4,974,716. In Bombay the errors consisted of a similar omission up to the year 1873-74 of the value of a trade which amounted in 1874-75 to £18,049,870, and of a discrepancy of over two millions sterling between the annual account of trade and navigation published in that presidency and the annual account (Part II) published by the Government of India compiled from figures furnished monthly by the local authorities, the trade with Cutch, Kattywar, and Foreign Konkan having been omitted from the local monthly returns. It does not appear that any blame is to be attributed to the officers who compiled the accounts in Madras and Bombay, the instructions given for the preparation of the forms prescribed by the Government of India in 1871 having been misunderstood.

2. On the discovery of these errors a complete revision of the figures for the year and for the previous four years became necessary, and much delay ensued in the issue of the volume, which was in the press as long ago as October 1875. The delay, however, has been more than compensated by the rectification of vital errors which had run through successive volumes of statistics published by the Government of India. It is believed that under the strict system of classification which has now been adopted, the recurrence of such mistakes is impossible.

3. The review of the Accounts is so full, that further comment on the results of the trade of the year is unnecessary. The Governor-General in Council wishes it to be understood that the opinions expressed in the review are those of the compiler individually, and that His Excellency in Council is not prepared to endorse them. But whether the facts justify in every case the conclusions drawn from them or not, the facts themselves are clearly set out and the details carefully arranged, and the paper is a useful résumé of the extent and direction of Indian trade in all important particulars for 1874-75 and for various periods preceding that year. Copies will therefore be circulated with copies of this Resolution and of the accounts on which the review is based, for general information.

(True Extract)

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24th FEBRUARY 1876.

GENERAL REMARKS.—Slight rain in Sind, showers, heavy in places, in the Southern Delta districts of Lower Bengal, half an inch of rain in Balasore, a good fall in Sylhet, and showers in the North-Western districts of the Punjab and at Lahore, comprise all the rainfall reported during the week. In Madras no change has taken place. In Bombay the *rabi* harvest continues: the crops are generally fair. In the Central Provinces and Berar the *rabi* is also being reaped with a good outturn. Prospects are reported good in Rajputana and Central India. In Bengal there are few crops on the ground, and those require rain. In the North-Western Provinces and Oudh prospects are favourable. In the Punjab the crops promise well, but more rain is wanted. In Upper Assam rain is urgently required. In Mysore there is no improvement in the condition of the crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 24th)	*Nil*	Navigation canals closed; standing crops generally good; varagu harvested; outturn three-fourths; markets well supplied locally; prices steady; cholera, 90 seizures, 30 deaths, during past week in 6 taluks; fever general; small-pox in 4 taluks; mild epizoötic aphtha continues; pasture scanty; dry fodder being used.
Kurnool („ 23rd)	*Nil*	Season generally good; white *cholum* and horse gram harvested; other crops flourishing; markets well supplied; prices steady; fever prevalent; cholera slight in Cumbum, Markapur, and Nandial; cattle healthy, except in Markapur, Nandial, and Pattikonda; pasture and water abundant.
Tanjore („ 24th)	*Nil*	Rivers almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops in places; standing crops withering in several localities; harvest wet and some dry crops; yield moderate; markets well supplied; prices almost steady; cholera continues, 310 seizures, 165 deaths; cattle disease in many places, some loss; pasture insufficient.
Trichinopoly („ 23rd)	*Nil*	Water-supply for irrigation purposes deficient; both wet and dry crops suffering from want of water; outturn generally below average; markets well supplied; cholera decreasing, 52 seizures, 28 deaths; foot and mouth disease prevailing slightly among cattle; pasture scanty.
Malabar („ 24th)	*Nil*	Markets well supplied; prices tending to rise; bowel complaints in 6 taluks, 426 seizures, 366 deaths; small-pox prevalent in North Malabar; cattle disease slight in Wynaad; pasture withered. *General Remarks.*—General prospects same as last week.
Bombay— (Feb. 24th)		
Sind. (Feb. 23rd)		
Kurrachee ...	...	No change in *rabi* prospects; 4 cases of small-pox in Kurrachee.
Shikarpur ...	...	Insects damaging fenugreek in Ubauro, and gram and rape crops in taluka Labdarya; river falling; slight rain on evening of 20th; public health improving.
Hyderabad ...	...	Weather changing; sickness prevalent in consequence.
Upper Sind Frontier ...	...	Drizzling rain on night of 20th; *rabi* crops continue fair; canal-clearing again taken in hand by zamindars, and every effort will be made to keep the floods out.
Guzerat.		
Ahmedabad ...	...	Preparations for harvesting commenced.
Surat ...	...	No change.
Broach ...	...	
Kaira ...	...	Crops thriving.
Khandesh and Nasik.		
Khandesh ...	...	Reaping of *rabi* progressing; fever in five talukas.
Nasik ...	...	*Rabi* middling; reaping progressing; fever decreasing.
Konkan.		
Tanna ...	...	*Rabi* crops being reaped in some talukas; prospects fair; small-pox decreasing in the town of Tanna.
Deccan.		
Poona ...	...	Reaping of *rabi* progressing; climate and public health good.
Ahmednagar ...	...	*Rabi* harvesting finished in two talukas; outturn estimated at ten annas in the rupee.
Sholapur ...	...	Harvesting of *rabi* continues; health good.
Satara ...	...	Late crops good; harvesting commenced.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	...	Cotton crops indifferent; cholera continues.
Dharwar ...	...	No change.
Kanara ...	...	Second crop favourable; cholera continues above Ghát.
Kaladgi ...	...	Cotton picking progressing; 7 deaths from cholera in Bádámi taluka.
Kattywar.		
Rájkot ...	...	Weather hot; fever and cough prevalent; cholera in Morvi taluka; out of 66 cases, 29 fatal.
Wadhwán ...	...	Weather warm; cotton picking continues; 24 cholera cases, 15 fatal. *General Remarks.*—Crops generally fair; cholera in Kattywar and Southern Mahratta Country; fever in Khandesh and Nasik.
Bengal—(Feb. 24th)		
Chittagong ...	*Nil*	Weather warm, with strong south-west wind, cloudy; rain is wanted every where; small-pox is the same as last week.
Noakhally ...	*Nil*	Weather daily getting warmer; wind generally south; mornings foggy; the last three days of the week were somewhat cloudy; pulses, chillies, &c., are progressing; a shower of rain is much wanted; cases of sporadic cholera still prevail in certain stations.
Chittagong Hill Tracts...	*Nil*	Weather seasonable; high wind from south-east this day; the hill-men are busily engaged in cutting jungle for the purpose of jooming.
Hill Tipperah ...	*Nil*	Weather cloudy and unsettled for the greater part of the week; nothing particular to report regarding the state and prospects of the crops.
Backergunge ...	*Nil*	Weather warm for the season; rain is much wanted; state and prospects of the crops are fair, but injured by want of rain.
Furreedpore ...	0·4	In the early part of the week weather was dry, but towards its close it was seasonably warmer; on Friday night there was a little rain which may have been of some benefit to the crops; health of the district is fair.
Dacca ...	0·11	Weather cooler; the rain has been general, but slight; state and prospects of the crops are good.
Mymensing ...	*Nil*	Weather has become very much warmer; some days the sky was much overclouded, but the desired rain has not fallen; the *boro* rice crop will be a small one, owing to the great want of rain; the mustard crop is also deficient for the same reason.
Tipperah ...	*Nil*	Weather moist and warm, with southerly wind, cloudy sky; rain is much wanted for the spring rice; the cold weather crops are in fair condition.
24-Pergunnahs ...	2·70	Weather colder than last weak since the 19th; harvesting of *amun* is over, and the cutting of winter crops continues; health of the district is generally good.
Jessore ...	(A slight shower on the morning of the 19th instant.)	Weather bright and clear; peas and mustard continue to be gathered spring rice seedlings promise well; rain is generally much wanted.
Nuddea ...	0·01	A few drops of rain fell on the night of the 18th, and the weather, which had become very warm, is rather cooler; indigo is doing pretty well; the harvest is going on; the crops are generally poor, but as there has been no loss from insects or blight, the result will not be greatly below average; general health of the district is good.
Moorshedabad ...	*Nil*	Weather is getting warmer; crops are fair; *rabi* being reaped; indigo and mulberry plants thriving; sugarcane is being pressed; mustard and linseed are being harvested; public health is good; two cases of cholera reported from thana Bhurutpore.
Pubna ...	*Nil*	Foggy mornings, but the days are warm; the millet seedlings are above the ground, but rain is much wanted; the *choitalli* crops are nearly ripe; two fresh cases of cholera reported; otherwise the general health of the district is good.
Rajshahye ...	*Nil*	No rain since last report, and at present no appearance of it; the cold weather crops have suffered considerably from the drought, mustard and *musuri dal* perhaps more than others; *boro dhan* is still doing pretty well; there is no sickness reported beyond a very few cases of small-pox about Manda.
Bogra ...	*Nil*	Weather fast becoming hot; very cloudy, and rain threatening; there are very small crops on the ground; sugarcane and the late *rabi* crops seem healthy.
Maldah ...	*Nil*	High winds have been prevailing during the last few days; the transplanting of *boro dhan* is still being carried on; the dry weather has caused a decrease of 3 annas in the outturn expected from the *rabi* in thana Sahibgunge; indigo is doing favorably; if no rain falls the heat, which is now daily increasing, will cause damage to the *rabi* crops, which are now beginning to ripen in some parts of the district; one death from cholera is reported to have occurred during the week.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Dinagepore ...	*Nil*	Weather is generally fine and getting very warm; high winds are frequent; it drizzled a little on the morning of the 18th instant, but the rain drops were scarcely perceptible on the ground; the prospects of the winter crops are on the whole fair; mustard is being reaped in places, and the outturn will be about 8 annas; ground is being prepared for the *bhadoi* rice, but it will suffer a good deal if rain does not fall in time.
Rungpore ...	Return not received.	Weather warmer; rain is much wanted for the wheat crop; at the time of writing there appears a probability of a fall shortly; the other crops are doing fairly well.
Cooch Behar ...	*Nil*	Weather has become somewhat hotter; wind is rising, but no signs of rain as yet; the prospects of the crop continue to be unfavourable from want of rain; general health is good.
Jalpaiguri ...	Return not received.	During the early part of the week there were strong westerly winds, which were unusually hot for the time of the year; on Thursday a drop or two of rain (not enough to measure) fell; after this it became much colder, and continues so; rain is greatly needed; the tea gardens in the Duars are suffering much from the long drought; young plants are dying off; the tobacco crop will be very far under mark this year owing to want of rain.
Darjeeling ...	Return not received.	Weather is growing warmer; sunshine during the week with high wind; scarcely any crops of importance on the ground now; what there are, are doing well; land is being prepared for sowing.
Midnapore ...	Return not received. (*Nil* in previous week.)	Weather is getting very hot; rain would be beneficial, but without it the *rabi* crops are fair average crops.
Hewrah ...	1·27	A fall of rain occurred on Friday afternoon and the following night; the rain has done good to such crops as are on the ground.
Hooghly ...	·11	Weather is getting warmer; sky overcast on the night of the 18th and morning of the 19th, with slight drizzling on the former date; sowings of sugarcane, onions, and *jali dhan* are going on; want of rain retards indigo and *sessamum* sowings; transplantation of *boro dhan* is going on; *pattal*, cucumbers, and water-melons are doing well still, but stand in immediate need of rain to ensure a full harvest; ploughings of rice lands obstructed for want of rain; very late *amun* on swampy lands is still being gathered; the *rabi* harvest is over in some places; in others, some of the crops, wheat and barley, have not ripened as yet; a 12-anna crop is expected; pressing of sugarcane is going on still; potatoes being dug; other vegetables falling off; tanks are very low; water much in demand, both for irrigation and drinking purposes.
Burdwan ...	*Nil*	Rain is much wanted; a good crop of potatoes in Culna; cases of small-pox near Ajudhya.
Bankoorah ...	*Nil*	Weather is somewhat warmer than last week; no change in the state and prospects of the crops since last report; health of the district is good.
Beerbhoom ...	*Nil*	Weather is seasonable; rain wanted for the winter and spring crops, and for the standing crops of indigo.
Sonthal Pergunnahs ...	*Nil*	Weather is very dry, but much colder the last two days in Doomka; no change in the prospects of the crops; *rabi* is middling all round.
Bhagalpur ...	*Nil*	Very strong west winds; rain much needed for the *rabi*, it will soon be too late to be of any benefit; condition of the people reported very good everywhere except in portions of Soopool sub-division; general health is very good.
Monghyr ...	Return not received.	Weather is fair, with high westerly winds; no change in the prospects of the crop since last week; on low lands sown early the crops are very good, on high lands they are scanty; the Collector, who has seen most of the *rabi* in his district, considers that nearly an average crop will be reaped; prices are easy; sweet potatoes are plentiful, and are selling at 2½ maunds per rupee.
Purneah ...	*Nil* (*Nil* in previous week.)	Strong west wind; the pasturage for cattle is drying up; the crops in the south are good, but those in the middle and north of the district are poor; supply of rice in the markets plentiful, and trade with Morung brisk.
Durbhangah ...	*Nil*	Weather fine and cool, with strong west wind. Tajpore sub-division—*rabi* crops will produce from 6 to 8 annas; on Dearahs 12 annas there is no fear of scarcity. Mudhoobany sub-division—mustard is being harvested; *rabi* crops in Bhala Pergunnah looking well; indigo lands ready for next sowing; mango trees flowering this year; prices of food grain remain stationary. Head-quarter sub-division—no change in the prospects of the crops for the better; prices remain stationary; importation is going on on a large scale.
Mozufferpore ...	Return not received.	Weather is getting warmer; strong west winds continue; the sub-divisional officer of Hazeepore estimates that the average outturn of *rabi* crops in his sub-division will be eight annas; the Collector makes the same estimate for *rabi* crops in Mozufferpore Sub-division; prices everywhere are very low (rice excepted); no report received from Seetamarhee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Sarun ...	*Nil*	Weather cold and dry, sky clear, with west wind prevailing; there is nothing new to report regarding the state and prospects of the crops; the *rabi* crops are fast reaching maturity, and are being harvested in places; poppy is flowering; indigo-seed is being sown in fields, in which there is sufficient moisture, but the prospect is generally indifferent; prices are favourable; general health is good.
Chumparun ...	*Nil* (*Nil* in previous week.)	There has been no rain anywhere throughout the district, though the weather has been cloudy; the strong west winds of the last few days have somewhat injured the crops, though they are still promising fairly, and may yet yield well if rain falls.
Patna ...	*Nil*	Weather cold, with strong west wind; prospects of crops are fair; health of the district is good.
Gya ...	*Nil*	Weather decidedly warm, with two cooler days at the end of the week; generally high winds; *rabi* crops are fair throughout the district, but hardly to be called good; wheat and barley will soon ripen; mustard is being cut; public health is good.
Shahabad ...	Return not received.	Weather hot in the first part of the week; it is now cold, with high west wind; *rabi* harvest is in progress; prospects of the crops remain unchanged; a fair crop is expected, especially where the Soane irrigation was extended.
Hazaribagh ...	*Nil*	Weather seasonable, becoming warm; no change to report regarding the state and prospects of the crops; the foot and mouth disease has broken out among the cattle in the vicinity of Bursat, Grand Trunk Road.
Lohardugga ...	*Nil*	Weather is very unsettled, heavy clouds have been hanging for the last two days, but no rain has fallen yet; no change in the prospects of the crops since last report; from Palamow the Assistant Commissioner reports that the *rabi* crops have suffered much from want of rain, and the yield will be very small; general health is very good.
Maunbhoom ...	*Nil*	Weather windy and disagreeable wind from the west; the few crops on the ground are reported doing well; rain, however, is wanted, and would do the country good.
Singbhoom ...	*Nil*	Days very hot; no sign of rain; no unfavourable reports about the crops that still remain, but rain is much wanted for the ploughing to begin; cholera has been reported from the southern parts of the Kolhan.
Balasore ...	·5	Weather is much warmer; rice is cheap and plentiful; a few cases of cholera and small-pox.
Cuttack ...	*Nil*	Weather dry and hot, except in the early mornings; no change in the state and prospects of the crop since last report; public health is good.
Pooree ...	*Nil*	Weather clear; nights slightly cold, and days beginning to be warm; the *dalwa* paddy is progressing well, but requires a shower of rain; *kulatha* pulse, mustard, and some pulses are being gathered, other pulses are in pod; cotton is progressing.
		General Remarks.—A slight rainfall is reported from Dacca, Furreedpore, Nuddea, Hooghly and Howrah. The rainfall at the 24-Pergunnahs is 2·70 inches. The rain of Friday week although considerable in Calcutta was not heavy in the Provinces and did not extend to Behar, Northern Bengal or to Orissa. There is nothing new to report as regards the state and prospects of the crops save that the cutting and harvesting of the *rabi* crops continue, but those that are still on the ground require rain.
N. W. Provinces—		
Benares (Feb. 23rd)	*Nil*	Crop pros pecs remain good.
Allahabad („ 22nd)	...	Prospects good.
Jhansi („ 24th)	...	No change; *arhar* and gram reaping commenced.
Agra („ 24th)	*Nil*	No change.
Meerut („ 23rd)	*Nil*	Weather cloudy.
Bareilly („ 23rd)	*Nil*	
Punjab—		
Delhi (Feb. 23rd)	*Nil*	Rain wanted for crops; health good.
Hissar „	*Nil*	Crops generally favourable, but rain wanted in unirrigated tracts; a few cases of small-pox in some villages, but district generally healthy.
Umballa „	*Nil*	Health and crops good.
Jullundur „	*Nil*	Rain wanted for crops; health good.
Lahore „	A shower on the 21st instant.	Health and crops good.
Mooltan „	*Nil*	Rain wanted; health good.
Dera Ismail Khan „	·2	Health and crops good.
Rawalpindi ...	·3	Harvest prospects favourable; health good.
Peshâwar (Feb. 23rd)	·5	Crops good; slight fever prevalent.
		General Remarks.—Harvest prospects fair, but more rain wanted; public health generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Oudh—		
Lucknow (Feb. 23rd)	*Nil*	Strong westerly wind; agricultural prospects generally favourable; public health good.
Sitapur „		
Fyzabad „		
Central Provinces—		
Upper Godavari (Feb. 19th)	...	Prospects favourable; small-pox prevalent; prices rising.
Sambalpur ...	...	Harvest over; health good.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Raipur ...	...	*Rabi* excellent; health good; prices easy.
Chánda (Feb. 20th)	...	*Rabi* good; fever prevalent.
Chhindwára ...	...	*Rabi* favourable; health good; prices steady.
Betul (Feb. 21st)	...	Reaping of *rabi* continues; health good; prices stationary.
Balaghât ...	...	*Rabi* cutting; health good; prices steady.
Nagpur (Feb. 23rd)	...	*Rabi* favourable; prices steady.
Wardha ...	...	Reaping of *rabi* progressing.
Nimár ...	...	Cattle disease continues; prices stationary.
Hoshangabad ...	...	*Rabi* promising; prices unchanged.
Narsinghpur ...	...	Reaping of *rabi* commenced; good outturn expected.
Jubbulpore ...	...	Clear; prospects of *rabi* good.
Saugor ...	...	Prospects fair; health good; prices easy.
Seoni ...	...	Reaping of *rabi* continues; health good; prices rising.
Bhandara ...	...	Prospects good; prices stationary.
Damoh ...	...	
Mandla ...	...	
		General Remarks.—Prospects continue good.
British Burma—		
Arakan Divn. (Feb. 23rd)	...	Public health good.
Pegu Division.		
Rangoon „	...	Health good; slight cattle disease in Hmawbee and Hline.
Bassein „	...	Small-pox continues.
Henzada „	...	Public health good.
Prome „	...	Sixteen deaths from cholera since last report; small-pox continues rife at Shwaydoung.
Thayetmyo „	...	Public health good.
Thonkwa „	...	Ditto.
Tenasserim Division ...	...	Ditto.
Assam—		
Gauhati (Feb. 24th) ...	*Nil*	Hot winds from west prevail; mornings clear and cool; preparation for the *ásu* cultivation is going on; tea being sown; rain urgently wanted for crops; public health good.
Sylhet „	...	Fair rain-fall on night of 23rd and morning of 24th will do much good.
Hyderabad Assigned Districts—		
Umraoti (Feb. 24th)	...	*Rabi* reaping in progress.
Mysore and Coorg— (Feb. 24th)	*Nil*	Agricultural prospects unimproved; want of water beginning to be felt; cholera slightly prevalent in some districts.
Rajputana—		
Bhurtpore (Feb. 24th)	...	No change; clouds dispersed; health good.
Ajmere („ 24th)	*Nil*	Weather pleasant; small-pox and fever prevalent; harvest prospects good.
Jeypore („ 24th)	...	Prospects continue favourable; health good.
Central India—		
Indore (Feb. 23rd)	...	Agricultural prospects and health good.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 22nd February 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K.C.B.
The Hon'ble A. Hobhouse, Q.C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir W. Muir, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
His Highness the Mahárájá of Vizianagram, K.C.S.I.
The Hon'ble John Inglis, C.S.I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.

CHUTIA NAGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR moved that the Report of the Select Committee on the Bill to relieve from incumbrances certain estates in Chutia Nágpur be taken into consideration. As the Council were aware, the Bill had been framed very carefully on the model of the Act which had been previously passed for Oudh. There were, perhaps, one or two points of detail to which he should draw the attention of the Council. The first question before the Committee was what kind of property should be liable to the conditions of this Act. After some consideration and discussion, they decided to adopt in the title of the Bill the words "immoveable property," as being the most complete expression which could be adopted to include all the various estates, tenures and sub-proprietary rights which might exist in the Province of Chutia Nágpur. It was thought better to adopt one comprehensive phrase than to resort to various local phrases which might or might not fit into precise legislative drafting. It would be observed that the Committee had provided that so long as an estate continued to be managed, the landholder and his heir should be incapable of entering into any contract which might involve them or either of them in pecuniary liability. They had also provided in regard to improvident leases, that the manager should have power either to set aside a lease or to cause the lessee to pay a proper consideration therefor. With reference to this provision which had been made by the Committee, he would draw the attention of the Council to section 3 of the Bill, which might be considered, perhaps, as one of its most important sections. It would be observed that the effects of an order bringing an estate under management were to be, *first*, the barring of any suits which might have been brought in reference to the estate, the freedom of the owner from personal arrest, and that his immoveable property should not be liable to attachment for prior debts. There was to be a cessation of all power of arrest, and immoveable property was also to be free from attachment, and the section ended with this important clause, that the holders of the property should be precluded from entering into any contracts involving them in any pecuniary liability. The Committee had carefully considered also whether when an estate, that was to say, immoveable property, was brought under management, at the same time any moveable property which the landholder might possess should also be brought under management. But on consideration they decided not to attempt to make any provision of that sort, but to restrict the main provisions of the Bill to immoveable property, that being the sort of property which carried with it those political consequences with regard to which this Bill was intended to deal. They had also considered, on some representations made to them, whether an appeal should be allowed to the Board of Revenue at Calcutta. But they thought that as two appeals were already provided in the Bill, one to the Deputy Commissioner of the district and the other to the Commissioner of the province, it was not desirable to allow a third appeal. They considered that the Commissioner of the province who was the head of the executive, and the Political Superintendent over all these Native Chiefs, should be the final appellate authority.

His Honour thought those were the principal points in the Bill to which the attention of the Council should be directed. He might add one other point perhaps. It was this, that the Committee framed the provisions of the Bill so that there should be no encouragement to the local authorities to bring under their management estates which were hopelessly insolvent. Estates in that condition could not possibly be extricated without either injustice to the creditors or expense to the State, and he need hardly add that neither of those conditions would be accepted. The provisions of the Bill had been so framed that the Act would not work satisfactorily unless the obligations of the estate were such that there was some reasonable hope of discharging them. Those were the estates which we wished to save and bring under management. If there were estates which were hopelessly insolvent, and the creditors of which were willing to submit their claims to the arbitration of the district officers and the Managers under this Bill, to bring them as it were to a sort of Insolvent Court, no doubt they could do so, and for such cases the provisions of the Act would also be very suitable. But except with the consent of the creditors, it was not desirable that hopelessly insolvent estates should be brought under management, and the provisions of the Act had been framed to that effect.

He thought he had now mentioned all the important points in the Bill. There were also some verbal amendments or slight alterations with regard to which he need not trouble the Council.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA said that this Bill was framed by Government with the best intention of preventing the estates of the landed gentry at Chutia Nágpur from falling into the hands of usurers. It would appear that the landholders of that province did not lead provident lives, or had not the tact of properly managing their affairs. Not possessing a knowledge of the world, which taught men to live within their means or incomes, hence these landholders incurred large debts, and generally mortgaged their estates to such usurers who brought suits against them in the Civil Courts for the recovery of their loans. When these money-lenders obtained decrees they enforced them, and either purchased the estates of their debtors or foreclosed their mortgages, and thus became owners of such lands. In order to prevent such lands coming into the hands of the usurers, the Government would appoint Managers for the management of the proprietors' estates, and when their debts were liquidated, their estates would be restored to them in due time. We could not sufficiently admire the principle upon which this measure was based, and the landed gentry of that part of the country, where the provisions of this Bill would apply, ought to be grateful to the present wise and experienced Lieutenant-Governor of these provinces for introducing this Bill; but RÁJÁ NÁRENDRA KRISHNA would also remark that the money-lenders of that province might apprehend that, under the authority vested in the Managers, they might not care so much to pay off the just debts incurred by the landholders as to see them white-washed completely, whether or not the creditors got the actual sums which they had advanced. He hoped the worthy Lieutenant-Governor would prepare rules for the guidance of these officers which would justify the hopes of the creditors of receiving back their monies with interest at some reasonable rate. This measure clearly showed how very considerately His Honour wished to deal with respectable people fallen into involved circumstances. In conclusion, he begged to recommend that in special cases the final appeal for the settlement of a debt should rest with the Board of Revenue, when the aggrieved party might adduce reasonable grounds for the interference of the Board.

The Hon'ble MR. HOPE said the Council were no doubt aware that they had had in force in Bombay for some years two Acts of a similar nature to the one which was now under the consideration of the Council. As he happened to hold the post of Collector of Ahmadábád at the time the first of these, Act VI of 1862, the object of which was to relieve the Ahmadábád

Taluqdárs from debt, came into force, and as the Broach Thákurs' Relief Act was passed in consequence of representations which he made when Collector of that district, he thought that he ought not to allow the present opportunity to pass without placing before the Council a few of the results of the working of those two Acts. Act VI of 1862 came into force at the close of that year, and it had taken effect in 469 estates. The amount of claims adjusted by the manager had been 1,634, and the amount claimed by the creditors was 24 lákhs. But as the amount found upon a careful investigation to be justly and reasonably due was only 13¼ lákhs, the balance might be taken as a sort of measure of the extortion to which these unfortunate taluqdárs had been subject. Out of this 13¼ lákhs about 12 lákhs had been paid off up to the present time, and only 1¼ lákh still remained unpaid; and although the currency of the Act had been only thirteen and a quarter years, yet no less than 377 out of the 469 estates had already been released from attachment. As regards the Broach Thákurs on the other hand, their number was small; there were only five. The number of claims was 445, the sum claimed was 5½ lákhs, and the amount awarded was Rs. 3,15,000. As the Act had only been four years in operation, none of the estates had yet been released, but the amount paid off out of the Rs. 3,15,000 was Rs. 1,20,000. But we might hope that all these estates would be released in a reasonable time—at any rate in considerably less than twenty years, the period contemplated at the passing of the Act. Now these Taluqdárs and Thákurs were all of them Rájputs of the most ignorant description, and the country in which they lived had passed but recently under British rule. The technicalities of our laws pressed most heavily upon them. Money-lenders were not slow to take advantage of the law and the ignorance of those with whom they dealt, and the result was that when these Acts were brought in the condition of these Taluqdárs and Thákurs was pecuniarily hopeless, and politically very prejudicial to good order. The Acts had put them upon their legs again, and had indirectly done more than that, because one of the results of the Acts was the appointment of a Manager and the establishment of a taluqdári school where the sons and young relatives of these Thákurs had been gathered together in a sort of college and received a proper education, so that we might hope they would not fall into the mistakes of their fathers. How far the whole measure would prove beneficial to their successors, or how far a landed aristocracy could be preserved by legislation, were points which time alone could show. But he hoped the Council would agree with him in thinking that the results which had been happily obtained were sufficiently satisfactory to warrant the extension of a like measure to other parts of India, which might be similarly situated.

The Hon'ble MR. HOBHOUSE said the only observation he had to make was in respect to the suggestion that there should be a further appeal than was given by the Bill. He was not surprised that persons who were accustomed to see every thing disposed of according to the ordinary course of law should desire that the best assistance that could be had on such occasions should be called in to decide the rights of these creditors. At the same time this Act was one of a rare class, a very special kind of Insolvency Act, passed to meet a particular state of things, and it was necessary for the proper working of it with due economy and due rapidity that the Manager who took the estate in hand should not be exposed to all the litigation in all the Courts to which the ordinary affairs of solvent people were open. Therefore in the other Acts which had been passed on similar subjects and in this Act, it was proposed to keep the decision in the hands of the district officers. There were no less than two appeals given from the decision of the Manager, and if there were a third it must be, as his friend Sir Richard Temple had intimated to the Board of Revenue, who sat in Calcutta, and who, no doubt, had considerable advantages by sitting in Calcutta, from the circumstance that they could be attended by Counsel. At the same time an appeal from a remote district of the kind to Calcutta was attended with very considerable expense, and the various creditors of the estate would probably find the assets to which they might resort for payment considerably diminished by the increase of litigation. It seemed to him better that the local officers should decide on these points. He did not understand that it was proposed to have an appeal to the District Judge or to the High Court, for if so, it would let in all the ordinary course of law, even involving an appeal to the Privy Council. It was necessary in these cases to have a somewhat summary, somewhat arbitrary, procedure; otherwise we should not see the end of the business. His friend Mr. Hope had just given the Council a most instructive account of the operations under similar Acts. He did not understand from him that there had been any discontent in the working of the previous Acts; but on the contrary, that persons who had claims against these estates were being paid in a more regular and punctual way than if they had to resort to the ordinary process of law without the intervention of such machinery as this. It seemed to him that such machinery, although it might be different from the ordinary course of the law, would be to the benefit of the persons concerned, and that we better not hamper it by giving a third appeal to a distant place such as Calcutta.

His Excellency THE PRESIDENT observed that in clause 17 it was provided that the Manager should act in conformity with rules passed under the proposed Act, and by clause 19 the Commissioner was empowered from time to time to make rules consistent with the Act in all matters connected with its enforcement. He should like to know what was the nature of the rules to be laid down for the purpose of determining debts.

The Hon'ble MR. INGLIS said that the rules to be framed under section 19 would lay down the procedure to be followed by the Managers when investigating and determining the claims brought against the estates taken under charge, the rate of interest to be allowed, and the order in which the admitted claims of the creditors were to be paid off.

His Honour THE LIEUTENANT-GOVERNOR was about to make a remark on the very point which His Excellency had just mentioned. These rules were not intended to provide for any thing inconsistent with the object of the Act. It was laid down in section 8 that the Manager was to determine the amount of the debts and liabilities justly due to the several creditors, and therefore the rules would, he presumed, provide for matters of detail, such as the manner in which notices should be served on the creditors, the form in which the statements of claims should be drawn up, the order of paying debts and liabilities found to be due, the rate of interest to be paid, and the security to be given by the subordinate officers. The rate of interest would be the only really important matter which would come under the operation of these rules. His Honour was anxious to draw the attention of his hon'ble friend Rájá Nárendra Krishna to section 12. The object was not to undertake the management of property which was hopelessly involved, but only property the condition of which admitted of its recovery, and then after it had been set in order to restore it to the owner. He was particularly careful to explain that it was not intended to take those estates under management which were so irretrievably involved that it would be impossible to reclaim them.

His Excellency THE PRESIDENT said:—"After the remarks made by my Hon'ble friend Mr. Hobhouse, I think that it would be desirable, in view of the further consideration of the question of appeal, to postpone the motion that the Bill be passed. At the same time it will be well to consider the scope of the rules by which the procedure of the Manager will be guided in determining the debts of creditors. It must be remembered that, while for political reasons, the Government of India in this case, and in former cases in other parts of India, have passed laws with the object of clearing certain encumbered estates from their debts, it is far from the intention of Government to interfere in any way with the proper and legitimate rights of those persons who have lent money on security to the owners of the estates; and, in all these measures, every care must be taken that justice is done to the fair rights of those persons. That is the intention of the Legislative Council in this Bill; and it of course must be provided that—as the Lieutenant-Governor has pointed out—the rules which are to be enacted under the Bill shall be such as that only forms of procedure, coupled, perhaps, with some regulation of the rate of interest to be allowed, shall be comprised in the rules, so that they shall not interfere with the duty of the Manager in determining the amount 'justly due' to creditors. He must act, as the Hon'ble Mr. Hobhouse has pointed out, something like a Commissioner of Bankruptcy going into the merits of each case, without any bias, and come to a conclusion as to what the liabilities really are. I have no doubt that the rules were only intended to have this

effect, and probably it may be found that the introduction of a few words into clause 8 will make this clear."

The further consideration of the report was postponed.

CRIMINAL TRIBES ACT EXTENSION BILL.

His Honour THE LIEUTENANT-GOVERNOR also introduced the Bill to extend the Criminal Tribes Act, 1871, to the Lower Provinces of Bengal, and moved that it be referred to a Select Committee with instructions to report in one week. He said that it would be in the recollection of the Council that at the last meeting he described the tribes of a nomad and criminal character to which it was intended to apply this Act. So he had nothing to add on this occasion, save just briefly to state that this Bill was simply an extending Bill, and that the object was effected by inserting in the first section the word "Bengal;" so as to make the Act apply not only to the territories under the Lieutenant-Governor of the North-Western Provinces, but also to those under the Lieutenant-Governor of Bengal.

The Hon'ble MR. BAYLEY wished to say one word in explanation as regards the necessity of this Bill. He believed objection had been taken to the original action of this Council and of the Government of India in framing the previous Bill so as to exclude the Lieutenant-Governorship of Bengal. He could only say that this subject was fully and deliberately submitted to the then Lieutenant-Governor of Bengal, who at the time—MR. BAYLEY confessed he even then thought that this was a mistake—signified his desire expressly that the Bill should not be extended to the Lower Provinces. Experience had shown that the Lieutenant-Governor was wrong; but the error was not committed either by the Government of India or by this Council.

The Motion was put and agreed to.

His Honour THE LIEUTENANT-GOVERNOR then moved that the Bill be published in English in the *Gazette of India* and in the *Calcutta Gazette* in such languages as the Lieutenant-Governor of Bengal shall direct.

The Motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT presented the Report of the Select Committee on the Bill to provide Reformatory and Industrial Schools. He should postpone any detailed remarks on the Bill as amended by the Select Committee until the next meeting of the Council, when he proposed to move that the Bill in its amended form be taken into consideration. But perhaps he might on this occasion allude very briefly to one important and material alteration recommended by the Select Committee, which limited the scope of the Bill, which, in fact, limited its operation to one of the two classes of juvenile offenders to whom it was intended to apply. Under section 8 of the Bill as originally framed, it was made applicable to unconvicted offenders who were found to be frequenting the company of criminals or who were without any ostensible means of livelihood. This was a point on which there had been a good deal of difference of opinion. Strong objections had been taken to the section in question by some members of the Native community, especially by the representatives of the British Indian Association. It was also objected to by the Government of Bombay; and on full consideration it appeared to the Select Committee that the measure, which was a somewhat novel measure in Indian legislation, should be carried out in a tentative form, and that, on the whole, it would be best to confine legislation to the case of convicted offenders and defer legislation regarding the classes referred to in the original Bill until we had seen how the Bill as now amended should work by the test of experience.

The following Select Committee was named:—

On the Bill to extend the Criminal Tribes Act, 1871, to the Lower Provinces of Bengal——The Hon'ble Messrs. Hobhouse and Bayley and the Mover.

The Council then adjourned to Tuesday, the 29th February 1876.

CALCUTTA,
The 22nd February 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2nd MARCH 1876.

GENERAL REMARKS.—Rain fell during the week in Shikarpur in Sind; in fair quantity in the south-eastern and lower Delta districts of Bengal and in Sylhet, to some extent in a few other districts of Central Bengal and Upper Assam and in the north-western districts of the Punjab. None is reported from other parts of India. No change is announced from Madras or Mysore. In Bombay the *rabi* harvest continues. In the Central Provinces and Berar the harvest is also in progress and the expected outturn good. Reports from Central India and Rajputana are favourable. In Bengal, except for the rain, which has been beneficial where it has fallen, no change is reported. In Upper Assam rain is much wanted. The *rabi* cuttings are commencing in the North-Western Provinces: prospects are generally good. The same is the case in Oudh. In the Punjab rain is much wanted in the southern districts: in the north-eastern districts prospects are good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Mar. 2nd)	*Nil*	Standing crops good; markets well supplied; price of paddy and rice slightly risen owing to large exports to Madras; cholera 209 seizures, 99 deaths in 6 taluks; fever in 8 and small-pox in 3 taluks; mild epizoötic aphtha general; dry fodder being used.
Kurnool	(„ 1st)	*Nil*	Season generally good; gram and *cholum* harvested; outturn generally fair; other crops flourishing; pasture and water abundant; markets well supplied; prices steady; fever prevalent; cholera in a few villages in Cumbum, Pattikonda and Markapar taluks; cattle disease in 4 taluks.
Tanjore	(„ 2nd)	*Nil*	Rivers almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops in places; standing crops withered in several localities; harvest wet and some dry crops; yield moderate; markets well supplied; prices almost steady; cholera increased, 364 seizures, 254 deaths; some cases of small-pox in Negapatam; cattle disease in many places; some loss; pasture insufficient.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Trichinopoly (March 1st)	*Nil*	Rivers almost dry; tanks generally empty; drinking water obtained from wells; crops anything but good, except in river-irrigated parts, outturn much below average; markets well supplied; prices steady; cholera subsiding, 146 seizures, 48 deaths; cattle suffering from foot-and-mouth disease in parts; pasture scarce; general prospects not satisfactory.
Malabar („ 2nd)	*Nil*	Markets well supplied; prices increasing; bowel complaints in 6 taluks, 589 seizures, 467 deaths; small-pox prevalent, especially in North Malabar; cattle disease slight in Wynaad; pasture withered.
		General Remarks.—General prospects same as last week.
Bombay—(March 2nd)		
Sind. (March 1st)		
Kurrachee ...	...	Small-pox continues in Kurrachee, and has appeared elsewhere in district; slight rain in Dádú taluka on 20th.
Shikarpur ...	...	River rising; crops healthy, except in taluka Labdarya, where *makâ* is attacked by blight; rain fell on the 20th, 25th, and 26th; large hailstones fell at Máruwálo, taluka Ubauro, on the 26th; public health fair.
Hyderabad ...	...	*Rabi* crops looking well; small-pox in Badin taluka, 13 cases, 1 fatal.
Upper Sind Frontier ...	...	Weather fair; *rabi* crops in Jacobabad taluka badly wanting rain; cotton and *peshras* sowings commenced in Kashmor and Thul talukas.
Guzerat.		
Ahmedabad ...	...	Harvesting progressing; cholera in Viramgám and Dhandhuka.
Surat ...	...	*Rabi* crops being reaped; 10 fatal cholera cases in the city; 2 cases in Chorási taluka, but not fatal.
Kaira ...	...	*Rabi* crops mostly reaped.
Broach ...	...	Crops and public health good; cotton being reaped.
Khandesh and Nasik.		
Khandesh ...	...	*Rabi* crops as before; fever continues in Pimpalner; cotton market very dull; best Hinganghat cotton at Rs. 36, and Dharwari at Rs. 38 *per pallá*.
Nasik ...	...	*Rabi* crops middling; reaping in progress; fever decreasing.
Konkan.		
Tanna ...	...	Reaping of *rabi* progressing; prospects fair; small-pox prevailing in town of Tanna.
Deccan.		
Poona ...	...	*Rabi* crops as before; hot weather has commenced; small-pox prevails; public health generally good.
Ahmednagar ...	...	Harvesting of *rabi* continues.
Sholapur ...	...	Weather warm.
Satara ...	...	No change.
Southern Mahratta Country.		
Belgaum ...	...	Cattle disease prevails in Sampgaon, Parasgad and Gokák.
Dharwar ...	...	No change.
Kanara ...	...	Second crop satisfactory; cholera continues above Ghát.
Kaladgi ...	...	Cholera in Bágewári, Bágalkot and Bádámi talukas, 24 deaths.
Kattywar.		
Rájkot ...	...	Weather hot; fever and cough prevalent; cholera in Morvi, out of 51 cases 16 proved fatal.
Wadhwán ...	...	Weather indifferent; cotton picking nearly over; 2 cholera cases, 1 fatal; cholera also in Chura taluka.
		General Remarks.—Small-pox in Kurrachee, Bombay, Tanna, and Poona; cholera in Kattywar, Ahmedabad, Surat and Southern Mahratta Country; crops as before.
Bengal—(Mar. 2nd)		
Chittagong ...	1·66	Weather getting warm and there is appearance of rain; crops still want rain; small-pox decreasing.
Noakhally ...	0·21	Weather unsettled; the first three days of the week were cloudy, but the next three days were fair and cool; there was slight rain on the night of the 23rd; wind is variable, but generally north-west; pulses, chillies, linseed, and *sessamum* are progressing favourably; strong cases of cholera reported from Nalchera.
Chittagong Hill Tracts...	*Nil*	Weather very cold at night during the latter part of the week; jungle is being cleared for jooming.
Hill Tipperah ...	0·68	Weather cloudy and unsettled; the rain on the night of Friday (19th) cooled the air for a day or two, but a strong and hot north-west wind has now set in, which looks like the beginning of the hot weather; rain is much needed for ploughing operations.
Backergunge ...	0·74	All is well.
Furreedpore ...	...	Weather cool and cloudy; drizzling rain on the evening of Wednesday the 23rd February; state of the *rabi* crops is the same as reported last week; health of the district is fair.
Dacca ...	0·85	Heavy rain on Wednesday all over the district, heaviest to east; crops are very favourable.
Mymensing ...	*Nil*	There were a few drops of rain on the 18th and 24th; on the 24th there was a strong easterly wind; the weather was considerably colder than last week; rain is much wanted for the preparation of *aous* lands, and also to save the *boro* rice now on the ground.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Tipperah ...	0·77	Weather slightly warmer than last week; a few showers of rain; the spring rice will be much benefited by the late rain.
24-Pergunnahs ...	1·78	Weather seasonable; reaping of winter crops, which are good, is continued; public health is fair.
Jessore ...	0·38	Weather variable; there was a shower on the night of the 24th instant; the spring rice seedlings promise well; the ground for the early rice is being ploughed, but the cultivators want more rain.
Nuddea ...	0·09	Slight showers are reported from nearly all the sub-divisions; the weather has changed again, and become cooler, though the sun is gaining power; the harvest is progressing, and the outturn will be a little below average; the health of the people is good.
Moorshedabad ...	*Nil*	Weather getting warmer; crops are fair; transplantation of *boro dhan* is over; lands are being prepared for the *aous dhan; arhun* and mustard are being reaped; prospects of sugarcane, mulberry, and indigo are fair. A few cases of cholera are reported from Moorshedabad and Bhurutpore.
Pubna ...	0·01	Mornings foggy; days clear and fine; rain is much wanted for the spring crops, the prospects of which are now not good.
Rajshahye ...	*Nil*	No change in the state of the crops since last report; rain is very much required; public health is good.
Bogra ...	*Nil*	Weather fair, gradually getting warm; state and prospects of the crops are good.
Maldah ...	*Nil*	Weather bright, with exception of Thursday morning, which was cloudy; no rain, however, fell; two annas of the *rabi* crops in Thana Kaliachak and one anna in Thana Khurbah have been destroyed by the dry weather; the prospects of the *boro* crops are good; one death from cholera occurred during the week.
Dinagepore ...	*Nil*	Weather fine, getting warm; no change in the state and prospects of the crops since last week.
Rungpore ...	*Nil* (*Nil* in previous week.)	Weather cooler, probably from effect of rain falling elsewhere; no rain in this district; some of the *rabi* crops have been damaged from continued drought.
Cooch Behar ...	*Nil*	During the week an unpleasant west wind blew nearly every day; the weather has become less warm; there were a few drops of rain on the 18th; the prospects of the tobacco crop have not improved owing to want of rain; fields are being ploughed for *bidree* (a species of *aous dhan*) sowing; the prospects of *cheena* and *kaon* (millet) are also unfavourable.
Jalpaiguri ...	Return not received.	The weather has been cool and pleasant; rain is greatly needed; sowing of *boro* now commences, and unless rain falls the crop must be a failure; this crop is a valuable one, as the lower classes in the south of the district greatly support themselves on it for the two or three months before the *bhadoi* crop ripens; a rather sharp outbreak of cholera is reported north of the stations, and between Titalya and Silligoree; 23 deaths are said to have occurred; the prolonged drought is said by the oldest inhabitants to be quite exceptional.
Darjeeling ...	*Nil* (*Nil* in previous week.)	Weather mild; sunshine during the week; no crops of importance are on the ground; land is being prepared for sowing.
Midnapore ...	*Nil* (*Nil* in previous week.)	Weather is growing hot; rain is wanted, but no immediate prospect of it.
Howrah ...	*Nil*	Weather fine; no change in the state and prospects of the crops.
Hooghly ...	·12	Weather seasonable; sowings of sugarcane and *jali dhan* are still going on; *potols*, water-melons, and such like plants, are in flower; want of rain is very much felt; *rabi* crops are being cut, and pressing of sugarcane is going on; potatoes being dug up; vegetables are falling off.
Burdwan ...	0·44	Cholera reported in Burdwan, Culna and Jehanabad.
Bankoorah ...	*Nil*	Threatened rain on the 23rd; the winter crops are generally being harvested; the outturn is above the average; a few deaths from cholera have been reported.
Beerbhoom ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops to report.
Sonthal Pergunnahs ...	*Nil*	Cold nights and mornings; extremely dry and hot in the day time; frequent strong gales from the west and south-west; a few drops of rain fell in the north of the district on the 20th instant; no change in the state and prospects of the crops; the *boro dhan* is looking healthy, and *mohooas* and mangoes will do well.
Bhagalpur ...	*Nil*	There was no rain, except a few drops at head-quarters on the 28th February; wind from the east, and rain is expected; Collector at Dugmura reports that grain is cheap, rice is selling at 24 seers 12 chuttacks per rupee; all *rabi* crops close to villages and irrigated appear very good; general condition of the people is good, though there are many of the very poor badly off; many will find employment in cutting *rabi* crops before long; rain just now would do more harm than good to wheat and mangoes.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Monghyr ...	*Nil*	Weather fair, with occasional high west winds; five months have now passed without rain, but the crops on the low lands are fair; on the high lands they are scanty; on the whole a somewhat short *rabi* crop will be cut.
Purneah ...	*Nil*	Strong west winds for the greater portion of the week; the state and prospects of the *rabi* crops are the same as last week; rain is much wanted.
Durbhangah ...	*Nil*	Wind changeable, with great variation of temperature; no signs of rain; prospects of crops as previously reported; the *rabi*, wherever it has germinated, does not appear to have suffered much from want of moisture; the mustard crop is being cut, and other crops will follow; importations of grain to Madhoobunnee continue; the price of rice in that sub-division has risen slightly, while that of Indian-corn has fallen.
Mozufferpore ...	Return not received.	Weather is getting warm; west wind still prevails; in Hazeepore sub-division tobacco and *rabi* crops are being cut in some places; in Mozufferpore sub-division prospects are unchanged; in Sitamarhee sub-division there is nothing new to report, except that the price of maize has somewhat risen, and tanks in some places have been dry.
Sarun ...	*Nil*	Weather cold and dry; sky clear, with strong west wind; prospects of the crops remain unchanged; the *rabi* crops are being harvested; a fair outturn is expected; indigo is being sown, but the prospect is indifferent; the steady west wind is fast drying up the moisture of the ground; poppy is flowering, and in places the pods are being tapped; general health is good.
Chumparun ...	*Nil*	Strong west wind blowing; night cool and middle of the day rather hot; the condition of the *rabi* crops is the same as reported in the last week.
Patna ...	*Nil*	No rain as yet, though there now appears to be a chance of some; if it comes, the Collector is afraid it would be too late to do much good, and would do considerable damage to the spring crops now being harvested; a good deal of small-pox in the Barrh sub-division, and sporadic cases of cholera throughout the district.
Gya ...	*Nil*	Weather seasonable; rather cooler than last week; westerly winds as before, state and prospects of the crops are much the same as before; *rabi* crops are very fair on the whole, but the poppy is said to have suffered somewhat from the extremely dry winds; public health is excellent.
Shahabad ...	Return not received.	Weather cold with strong westerly wind; *rabi* crops still promise well; peas and *musur* pulses are being harvested; opium is being collected.
Hazaribagh ...	*Nil*	Temperature very variable; strong cold cutting west winds prevail; no change to report regarding the state and prospects of the crops; foot-and-mouth disease is prevalent among cattle in different parts of the district. Fever is also prevalent, owing to great and rapid changes of the temperature.
Lohardugga ...	*Nil*	Weather cloudy off and on, but no rain; no change to report regarding the state and prospects of the crops; the rain still keeps off; general health is good.
Maunbhoom ...	*Nil*	Weather too dry; the crops on the ground are reported as doing well; sugarcane has been stored; the absence of rain is likely to prove disadvantageous.
Singbhoom ...	*Nil*	Weather same as last week; there are no crops to report about cholera in Southern Kolhan is abating.
Balasore ...	*Nil*	A single shower fell during the week; rain is wanted for tillage and on account of the pasturage which is very scanty; cholera and small-pox are still lingering in the district.
Cuttack ...	*Nil*	Weather dry and somewhat hot; cloudy since last night; sugarcane and cotton in want of water; prices are low, and exportation getting brisk; winter crops all harvested; public health is good.
Pooree ...	*Nil*	Weather generally clear; days becoming warmer; the *dalwa* paddy crop is progressing well, but requires a shower of rain; there appears to be a good crop of mangoes this year; other crops are progressing; cholera has again made its appearance in parts of Khoordah.
		General Remarks—A slight rainfall is reported from the central and eastern districts of Bengal. The rainfall at Chittagong is 1·66. On Wednesday morning there was heavy rain at Calcutta. The state and prospects of the crops remain much the same as reported last week. Fields are being prepared for cultivation of early rice in certain districts.
N. W. Provinces—		
Benares (Mar. 1st)	...	Crop prospects good.
Allahabad („ 1st)	...	Crops being cut in parts of district; prospects good.
Jhansi („ 2nd)	...	No change.
Agra („ 1st)	*Nil*	Ditto.
Meerut („ 1st)	*Nil*	Prospects unchanged.
Bareilly („ 1st)	*Nil*	.....

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—		
Delhi (Mar. 1st)	*Nil*	Crops suffering for want of rain; health good.
Hissar „	...	Crops so far favourable except in unirrigated tracts, which are suffering for want of rain; health generally good; small-pox in some places.
Umballa „	*Nil*	Crops withering; health good.
Jullundur „	...	Rain wanted; health good.
Lahore „	...	Health and crops good.
Mooltan „	...	Rain badly wanted; health good.
Dera Ismail Khan „	·1	Health and crops good.
Rawalpindi „	Showers.	Harvest prospects favourable; health good.
Peshâwar „	·4	Harvest prospects good; slight fever prevalent.
		General Remarks.—Southern districts suffering from drought health of province good.
Oudh—		
Lucknow (Mar. 1st)	*Nil*	Agricultural prospects and public health generally good.
Sitapur „	*Nil*	
Fyzabad „	*Nil*	
Central Provinces—		
Upper Godavari (Feb. 26th)	...	All crops cut; outturn good; small-pox continues; prices fluctuating.
Sambalpur ...	...	Harvest over; seven cases of cholera on Sambalpur and Raipur road.
Bilaspur ...	...	Nights cool; days hot; prospects favourable; fever continues; prices steady.
Raipur ...	...	*Rabi* excellent; health good; prices easy.
Chánda (Feb. 27th)	...	*Rabi* slightly injured by insects; health good.
Chhindwára ...	...	*Rabi* cutting; health good; prices steady.
Betul ...	...	Nights cool; days hot; *rabi* continues good; health good; prices; steady.
Balaghât (Feb. 28th)	...	Hot; *rabi* cutting; health good; prices steady.
Bhandara („ 29th)	...	Clear and close; *rabi* favourable; fever prevalent; prices easy.
Nagpur (Mar. 1st)	...	*Rabi* cutting; cattle disease continues; prices fallen.
Wardha ...	...	*Rabi* cutting almost completed.
Nimâr ...	...	Warm; cattle disease increasing; prices fallen.
Hoshangabad ...	...	Hot; *rabi* promises fair; prices unchanged.
Narsinghpur ...	...	*Rabi* cutting continues; harvest promises bountiful.
Jubbulpore ...	...	Clear and cool; *rabi* harvesting; small-pox and cattle disease prevalent; prices falling.
Saugor ...	...	*Rabi* cutting; health good; prices easy.
Seoni ...	...	*Rabi* cutting continues; health good.
Damoh ...	...	Prospects good; prices stationary.
Mandla ...	...	*General Remarks*—Prospects continue good.
British Burma—		
Arakan Divn. (Mar. 1st)	...	Public health good.
Pegu Division.		
Thonkwa „	...	Health good.
Henzada „	...	Ditto.
Prome „	...	Ten deaths from cholera since last report; small-pox continues at Shwedoung.
Thayetmyo „	...	Health good.
Bassein „	...	Small-pox continues.
Tenasserim Division ...	...	Public health good; slight choleraic diarrhœa in Amherst district.
Assam—		
Gauhati (Mar. 2nd) ...	·16	Weather becoming warm; mornings clear; land being ploughed for *asu*; rain required for crops; tea seeds being sown; public health of Gauhati good; small-pox at Sunderdea on the decline, but has made its appearance at Barpetá sub-division.
Sylhet „	1·08	Heavy rain to day; cholera and small-pox prevalent; rain has done much good.
Hyderabad Assigned Districts—		
Umraoti (Mar. 2nd)	...	*Rabi* cutting continues; expected outturn good.
Mysore and Coorg—(Mar. 2nd)	*Nil*	Prices of food grains high but stationary; relief work in progress where necessary; want of water and fodder felt by cattle; cholera sporadic, but not increasing at present.
Rajputana—		
Sirohi (Feb. 28th)	...	Tanks nearly dry; small-pox cases in Erinpoora cantonment; prospects good; weather seasonable.
Meywar („ 18th)	...	Health and prospects good; north-east winds much cooler again.
Marwar („ 26th)	...	Health good; prospects promising; cloudy and comparatively cooler.
Haraotee („ 26th)	...	No change.
Tonk („ 26th)	...	
Bhurtpore (Mar. 2nd)	...	Weather alternately fair and cloudy; crops thriving; several cases of small-pox reported.
Ajmere („ 2nd)	*Nil*	Weather pleasant; small-pox prevalent; crops well advanced and excellent.
Jeypore („ 2nd)	...	No change; prospects favourable; health good.
Central India—		
Indore (Mar 1st)	...	No change; every thing favourable.

G. A. SEARLE, *Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

The 24th February 1876.

Printed and Published for the Govt. of India at the Office of Supdt. Govt. Printing, 8, Hastings Street, Calcutta.

SUPPLEMENT TO

The Gazette of India.

No. 11.} CALCUTTA, SATURDAY, MARCH 11, 1876. {Register No. 75.

OFFICIAL PAPERS.

A Supplement to the Gazette of India will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.

Non-Subscribers to the Gazette may receive the Supplement separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.

No Official Orders or Notifications, the publication of which in the Gazette of India is required by Law, or which it has been customary to publish in the Calcutta Gazette, will be included in the Supplement. For such Orders and Notifications the body of the Gazette must be looked to.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ADMINISTRATION REPORT OF THE TELEGRAPH DEPARTMENT FOR THE YEAR 1874-75.

Nos. 59—76T, dated Fort William, February 24, 1876.

RESOLUTION—By the Govt. of India, P. W. Department.

Read—

Letter from the Officiating Director General of Telegraphs in India, No. 303, dated 4th December 1875, forwarding the Administration Report of the Telegraph Department for the year 1874-75.

Capital.

Observations.—The total Capital expenditure of the Department for the year has been Rs. 11,94,678, and is thus made up—

Rs.		Rs.
*11,68,014 as shown in Appendix A.	Expended by Telegraph Department	7,09,446
26,659 as shown in para. 4 on account of Ceylon.	Expended by Public Works Department	4,09,796
	Expended by other Departments ...	75,431
11,94,673	Total ...	11,94,673*

The gross Capital outlay both in India and Ceylon amounts to Rs. 2,94,17,120, of which sum Rs. 56,17,510 represents abandoned lines and buildings. The above total is thus made up—

	Rs.
Gross expenditure on Indian lines	2,93,84,639
Expended by India on Ceylon lines	32,481
Total ...	2,94,17,120

The value of the Ceylon lines including those taken over without payment is, however, Rs. 2,76,036, so that the Capital of the joint concern is—

	Rs.
India	2,93,84,639
Ceylon	2,76,036
Total ...	2,96,60,675

or nearly 3 millions sterling.

REVENUE.

2. The Revenue expenditure has been—

	Rs.
In India	25,69,052
„ Ceylon	94,787
Total ...	26,63,839

The Revenue receipts have been—

		Rs.
In India...		†21,73,586
In Ceylon		72,446
Total ...		22,46,032

† Including Rs. 1,38,984 *pro formâ* message revenue.

So that there has been a nett deficit during the year of Rs. 4,17,807 in the shares of—

	Rs.
India	3,95,466
Ceylon	22,341
Total ...	4,17,807

This result shows a marked improvement over the results of the previous year's operations when the net deficit amounted to Rs. 5,61,666.

The nett improvement of Rs. 1,43,859 is thus made up—

		Rs.
Increase in revenue of all kinds ...		2,26,415
Deduct net increase in expenditure		*82,556
Net ...		1,43,859

* It is explained that Rs. 15,471 of this is nominal only.

Further details will be found in the Report.

3. The figures above given relate to the *earnings* of the year, not to the total *cash receipts*.

	Rs.
Excluding the *pro formâ* revenue the difference, between the two is	1,34,005
which is thus accounted for—	
Difference between message revenue earned and collected ...	15,624
Earned but not recovered from Railways and guaranteed Offices	64,953
Treated in accounts as reduction of expenditure ...	52,157
Miscellaneous	1,271
Total ...	1,34,005

4. The total number of paid messages was 837,391 against 745,468 in the year previous, and the total message revenue Rs. 19,16,878 in 1874-75 as compared with Rs. 17,83,431 in 1873-74.

The net results are seen below :—

Class of message.	Increase in number.	Increase in revenue.
		Rs.
State	11,989	44,024
Private	79,934	89,423
	91,923	1,33,447

They may, on the whole, be considered satisfactory.

5. *Signal Office expenditure.*—The figures relating to this portion of the Report do not appear to have been furnished by the Controller. This point will form the subject of a separate communication.

6. It is not known why, in the table given in para. 19, the number of Signal Offices in Ceylon has been excluded from column 2, and included in all the other tables.

7. Appendix D gives useful details with regard to the Signal Offices, but the results as regards each Office require to be searched out. It will be advantageous to have in future Reports an abstract of Appendix D confined to 4 columns, (1), expenditure; (2), revenue; (3), profit, and (4), loss. It will then be apparent at a glance which Offices pay and which do not.

8. *Complaints.*—The decrease in the percentage and even in the actual number of complaints is very satisfactory. The percentage has decreased from ·241 in 1868-69 to ·038 in the year under review, the decrease occurring every year.

The following abstract shows the nature of the complaints made, and the number under each head :—

	Number.
Non-delivery	143
Delay in delivery	54
Error in message	106
Miscellaneous	21
Total ...	324
In the year previous ...	335
Decrease ...	11

Of the total number of complaints made—

101 were admitted,
185 were rejected as groundless,
38 „ „ on technical grounds,
324 total.

9. *The speed of transmission* has greatly increased of late years. Taking five of the principal lines, the mean time of transmission is shown to have decreased from 12 hours 52 minutes in 1868-69 to 1 hour 14 minutes in 1874-75, or if the cyclone month of October be excluded, to 1 hour 3 minutes. This is highly satisfactory.

10. *Messages exchanged with Railways.*—These show a marked increase. Details will be found in Appendix H, which gives the transfers to and from each Railway.

The results are summarized in the following tables, in which comparison is also made with the previous year :—

	1874-75.					
	Transferred from			Transferred to		
	Inland.	Foreign.	Total.	Inland.	Foreign.	Total.
Guaranteed Railways ...	23,498	70	23,568	24,638	114	24,752
State Railways ...	3,298	...	3,298	2,668	1	2,669
Totals ...	26,796	70	26,866	27,306	115	27,421

	1873-74.					
	Transferred from			Transferred to		
	Inland.	Foreign.	Total.	Inland.	Foreign.	Total.
Guaranteed Railways ...	18,176	77	18,253	22,082	84	22,166
State Railways	477	...	477	312	...	312
Totals ...	18,653	77	18,730	22,394	84	22,478

Analysing them further, the subjoined table shows how much of the increase is on the State and how much on the Guaranteed Railways :—

	Increase for previous year.	
	Transferred from	Transferred to
Guaranteed Railways	5,315	2,586
State Railways	2,821	2,357
Totals ...	8,136	4,943
Grand Total ...	13,079	

The gross increase then is divided between the Guaranteed and State Railways in the proportion of two-thirds to one-third. The percentage of increase is however only 20·1 in the former case, and 626·5 in the latter. This result is chiefly due to the number of new State Railway lines which have been brought into operation.

The increase as regards the Guaranteed lines is common to all the lines except the Sindh, Punjab and Delhi Railway, on which there has been a decrease, the cause of which should be explained.

11. In preparing Appendix H for the Report for the current year, it will be advisable to so arrange it as to distinguish the total of the Guaranteed Railways from the total of the State Railways, and the Director General of Telegraphs is requested to arrange that this shall be done.

12. *Undelivered messages.*—The total number has risen from 1,991 in 1873-74 to 2,292 in 1874-75. Increase 301. The percentage of increase as compared with the total number of paid messages is however only about ·008.

The total number of undelivered messages is thus divided—

Insufficient address	945
Wrong „	370
Addressees left	811
Refused by addressees	81
Other reasons	85
Total ...	2,292

13. *Press messages* show a total increase of 1,831 as compared with the previous year. There has been a diminution in the number of those sent by Reuter's Agents, and an increase by the Agents of others. The value of the 4,206 messages at ordinary rates was Rs. 90,273, while the sums actually paid amounted to only Rs. 17,821, thus showing a rebate in favor of the "Press" of Rs. 72,452.

14. *Interruptions* continue to decrease in duration and proportion, and notwithstanding the increase in the number of miles of wire, the actual number of interruptions has decreased, even if those caused by the October cyclones are taken into account.

15. *Number of Offices.*—These remain at 225 as in the previous year, 15 having been opened and the same number closed elsewhere.

16. *Signalling Establishment.*—The Governor General in Council observes with satisfaction that the Director General of Telegraphs reports that their character for zeal, intelligence and good conduct has been fully maintained.

17. *Military Signallers.*—One Captain and 23 soldiers qualified as Signallers during the year. Forty-two soldiers were employed in 20 Military and 22 Departmental Offices.

18. *Electrical.*—The *duplex* system has been successfully introduced between Calcutta and Bombay and between Madras and Bombay, and it is intended to extend the system to the more important circuits. The credit of this success is due to the Electrician of the Department, Mr. Schwendler, whose services have been elsewhere noticed.

19. *Inland tariffs.*—It is reported that there have been no changes in the rules for the transmission of inland messages, though several were under consideration, but this does not seem to be altogether correct, because in August 1874 the Government of India approved of the introduction of reduced rates between certain specified towns. It is desirable that the financial and other results of those local rates should be stated in the Report for the current year.

20. *International communications.*—These are reported to have been well maintained, and no new ones opened in connection with India.

21. *International traffic.*—The growth of this class of traffic shows an increase of 6·09 per cent. over the previous year in value, and of 15·65 per cent. in number ; 38,342 messages were despatched from India, of which number

32,509 went to the west and 5,833 to the east; 29,886 messages were received in India from the west, and 4,974 from the east; total 34,860; 28,441 messages crossed India in transit to other places, which were divided as follows:—

East to west	14,290
West to east	14,140
West to west	31
	28,441

22. The traffic by the Indo-European route continues to increase, while that by Turkey continues to decrease, and practically the whole of the traffic is carried by only two out of the three routes in very nearly equal proportions, as noted below:—

	Per cent.
Red Sea route	50·52
Indo-European route	47·91
Turkish route	1·57
	100·00

The statement given does not, however, distinguish between the proportions of the eastward and westward traffic, as was required by para. 40 of the Resolution on the Report for 1873-74; and without such distinction it is impossible to see the effect of the large share that the Eastern Company has of the Eastern Extension Company's traffic. The Director General's attention is drawn to the former orders, with request that they may be complied with in the preparation of the next Report.

23. Appendix M. shows that Rs. 5·2 were collected on the average as the terminal charge on each message from and to India; and Rs. 6·4 as the average transit charge on each message crossing India. It will be useful if in the next Report the proportion that these bear to the distances traversed by terminal and transit messages is given, and a comparison made with the inland traffic revenue, as it will help in the consideration of the question of the proper terminal and transit charges for India, a question which has been frequently before the Government of India.

24. *Summary of traffic operations.*

25. *Extension of Inland lines and wires.*—The following may be noticed here (1), the successful erection of an aerial span of 5,070 feet in length (nearly a mile) over the Kistna River at Bezwarrah in Madras; and (2), the change brought about in the features of the country between Deesa and Hyderabad (in Sindh) owing to the continued floods of the Indus River, which will necessitate considerable alterations of that line of telegraph.

26. At the end of the year the number of miles of line, of wires, and of cables stood as follows as compared with the previous year:—

	1874-75.	1873-74.	Increase.	Decrease.
Miles of line	16,649	15,980	669	...
„ of wire	33,798	32,556	1,242	...
„ of cable	103	107	...	4

27. It is stated in para. 82 that 3,049 miles of wire are on Railways in the proportion of 1,811 on State Railways and 1,238 on Guaranteed Railways, but the number of miles of line on each class of Railway is not given. This

was asked for in para. 34 of the Resolution on last year's Report, in which it was also desired that a table might be furnished showing the lengths of each line and the number of wires of which it was composed, but no attempt to supply this has apparently been made. The omission should be supplied in the Report for the current year.

28. *Cyclones and floods* occasioned much damage both in Bengal and Madras.

29. *The Store Branch* exhibits a nominal profit of Rs. 9,726 under the head of Workshops, and of Rs. 3,698 under Press. These sums will defray in part the interest on the block, &c. No mention is made as to any reduction in the number of Store Agencies, as desired in para. 51 of the Resolution on the last year's Report.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Secretary of State, and to the Local Governments and Administrations noted on the margin, to the Government of Ceylon, and to the Commissioner in Sindh.

Madras, Bombay, Bengal, North-Western Provinces, Punjab, Oudh, Central Provinces, British Burmah, Mysore, and Coorg; Assam, Hyderabad, Central India and Rajpootana.

Ordered also, that para. 33 and Appendix L. be communicated to the Military Department for information.

Ordered further, that a copy of this Resolution be forwarded to the Director General of Telegraphs for information and attention.

Ordered lastly, that a copy of this Resolution and of the Director General's Report with Appendices A. and B. summary of D., F., G., H., K. and M., be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR 1874-75.

THE temporary absence on duty in Europe of Colonel Robinson, R. E., who was during the year, and still is, Director General, has rendered it necessary to confine this report to a bare record of the year's operations, and to such explanations only as are required to render them intelligible.

2. The report is accompanied by the following statements and diagrams:—

Appendix A.—Statement shewing capital and revenue expenditure during, and up to, end of the year.

„ *B.*—Return of the number and value of inland and foreign messages sent, and of foreign messages received and passed in transit during the year; shewing also the increase and decrease under each head on the figures for the previous year.

„ *C.*—Statement shewing details of Account adjustment with Foreign Telegraph Administrations, and the extent of the cash-checking operations of the check office.

„ *D.*—Return of the number of messages to, from and through each station, their value, and the net revenue and expenditure of each signal office for the year.

„ *E.*—List of offices, arranged according to the number of messages despatched during the year.

„ *F.*—Synopsis of complaints.

„ *G.*—Statement shewing the times occupied in the transmission of messages between the stations mentioned, for each month of the year.

„ *H.*—Statement shewing the number and value of messages transferred to and received from railways.

„ *I.*—Return of undelivered messages for the year.

„ *J.*—Abstract of Press messages for the year.

„ *K.*—Statement of interruptions, excluding Ceylon.

Appendix L.—List of soldiers who qualified as signallers during the year, and return of those employed in signal offices.

„ *M.*—Analysis of foreign traffic, shewing the number of paid foreign messages despatched and received by each route, and the Indian share of collections during the year.

Diagram No. 1.—Map of telegraph lines in India on 1st April 1865.

„ „ 2.—Map of telegraph lines in India on 1st April 1875.

„ „ 3.—Shewing expenditure in signal offices only (excluding Ceylon), total revenue, and net message revenue from 1868-69 to 1874-75.

„ „ 4.—Shewing the *number* of inland and foreign paid messages transmitted from 1855-56 to 1874-75.

„ „ 5.—Shewing the annual collections on inland and foreign messages from 1851-52 to 1874-75.

„ „ 6.—Shewing the yearly average time of transmission of messages between Calcutta-Kurrachee, Calcutta-Bombay, Calcutta-Madras, Bombay-Kurrachee, Bombay-Madras, and Galle-Madras from 1867-68 to 1874-75.

GENERAL.

Revenue and Expenditure.

3. *Appendix A.*—Exhibits the capital outlay of the department during the year and to the end of the year; the receipts and charges on revenue account during and up to the end of the year, and also the net deficit similarly calculated.

4. The capital expenditure against budget grants was—in India Rs. 6,82,787; in Ceylon Rs. 26,659, Total Rs. 7,09,446, as compared with Rs. 5,96,640 during 1873-74. The amounts expended by the Public Works Department on telegraph buildings was Rs. 4,09,796, and a further sum of Rs. 75,431 was spent in other departments, making a total capital charge for the year of Rs. 11,94,673.

The gross expenditure on capital account in India and Ceylon up to the end of the year is shewn to be Rs. 2,94,17,120, including a sum of Rs. 56,17,510, the estimated value of abandoned lines and buildings.

5. The following are the particulars of the Revenue Account:—

				Rs.
Expenditure in India and Ceylon				26,63,839
Receipts.	*India.* Rs.	*Ceylon.* Rs.	*Total.* Rs.	
Revenue from paid messages ...	18,45,048	71,830	19,16,878	
Interest and maintenance charges on State railway lines and offices	73,296	...	73,296	
Interest and maintenance charges on guaranteed railway lines and offices	66,168	...	66,168	
Guarantees	19,664	...	19,664	
Minor Undertakings ...	14,881	498	15,379	
Miscellaneous	15,545	118	15,663	
TOTAL ...	20,34,602	72,446	21,07,048	
Pro formâ message revenue ...	1,38,984	...	1,38,984	
TOTAL *Cash and Pro formâ* ...	21,73,586	72,446	22,46,032	22,46,032
NET LOSS, RUPEES ...				4,17,807

6. As stated in the last administration report, the net loss on working was in 1872-73 Rs. 7,32,117, and in 1873-74 Rs. 5,61,666. These figures shew a progressive reduction in the difference between earning and expenditure, which appears to justify the expectation that this difference will, in a few years, be entirely removed.

7. As compared with the previous year, there was a net improvement of Rs. 1,43,859, made up as follows:—

	Rs.	Rs.	
Increase in paid message revenue		1,33,447	
Increase in *pro formâ* message revenue		502	
Increase in other receipts of all kinds		92,466	
			2,26,415
Expenditure.	Rs.		
Increase under line repairs	*9,276		
Increase under repairs by P. W. D. ...	3,504		
Increase under establishment and plant ...	74,455		
		87,235	
Decrease in Ceylon	2,451		
Decrease under "profit and loss" ...	2,228		
		4,679	82,556
NET IMPROVEMENT, RUPEES ...			1,43,859

8. The foregoing figures represent the earnings of the year, not the actual cash receipts. These, as shewn in the appropriation accounts, amounted to Rs. 19,73,043 against Rs. 19,41,025 in 1873-74—an increase of Rs. 32,018.

9. It may be convenient to place on record the principal causes of the apparent discrepancy between the amount of revenue earned and received during the year:—

Total revenue (excluding *pro formâ* charges) as shewn in the Revenue Accounts of the year		21,07,048
Total cash receipts as shewn in the Controller's appropriation accounts		19,73,043
DIFFERENCE, RUPEES ...		1,34,005
	Rs.	
Message revenue earned	19,16,878	
Message revenue collected, as shewn in appropriation accounts	19,01,254	
	Rs.	15,624
Payments not relating to the year made to other telegraph administrations ...	36,004	
Refunds, more paid than granted during the year	66	
	36,070	
Stamps.	Rs.	
Excess sales	4,143	
Other Receipts.		
Difference between amounts recovered and due on the year's transactions	16,303	
	20,446	
	15,624	
Railway Lines and Offices.		
Amount shewn in appropriation accounts as reduction of expenditure instead of revenue	42,195	
Earned but not recovered during the year ...	55,251	
		97,446
Guaranteed Offices.		
Amount shewn in appropriation accounts as reduction of expenditure instead of revenue	9,962	
Earned, but not recovered during the year ...	9,702	
		19,664
Miscellaneous.		
Forms &c, supplied to Ceylon, but excluded from "Charges" under Ceylon appropriation account	1,271	1,271 1,34,005

To summarise,—a sum of Rs. 52,157, although properly revenue, has in the Controller's appropriation accounts been excluded from receipts and shewn as a reduction of expenditure; a sum of Rs. 64,953 is still due from railways and

* This increase is nominal only. The actual cost of line repairs during 1874-75, including the exceptionally heavy expenditure caused by cyclones, was Rs. 6,195 less than during 1873-74. The difference, Rs. 15,471, being value of stores issued but not used, and for which credit is not given in the Controller's accounts until 1875-76.

office guarantors; a sum of Rs. 1,271, a charge against Ceylon, has not been shewn in the Ceylon appropriation account, and the remainder, Rs. 15,624, is the unavoidable difference between the message revenue earned, and the sums collected during the year.

10. *Extent and value of message traffic.—Appendix B* is the usual annual return of the number and value of private and State messages, under the heads inland and foreign, transmitted during the year 1874-75, and during the previous year, from each division of the department. The proportions earned during the year by each class of messages were:—

Class of Messages.	Private.	State.	Total.
Inland	56·02	13·42	69·44
Foreign	29·98	·58	30·56
Total ...	86·00	14·00	100·00

11. The numbers and values of private and State messages, and of free news messages transmitted during the past eight years, are shewn in the following statement. It will be seen that, as compared with 1867-68, the increase in the value of paid messages amounts to nearly 69 per cent., and that there has been a satisfactory increase in their value as compared with the previous year 1873-74.

Abstract of the number and value of paid messages, shewing percentage of increase or decrease as compared with 1867-68.

Year.	State. Number.	State. Value.	State. Percentage of Value. Increase.	State. Percentage of Value. Decrease.	Private. Number.	Private. Value.	Private. Percentage of Value. Increase.	Private. 1874-75.	78,531	18·02	...	758,860	11·78	...	7,365	27·47	...	38,531	4·68	...	*404	...	...	883,727	12·15	...	225

* This class of message was not shewn separately in previous returns.

13. The total number of messages of all kinds despatched during the year 1874-75, was 883,727 against 788,048 in 1873-74, an increase of 12·15 per cent. Of this number, 837,391 were *paid* messages divided as follows:—

Class.	Private.	State.	Total.
Inland	78·64	9·22	8·786
Foreign	11·98	·16	12·14
Total ...	90·62	9·38	100·00

As compared with 1867-68, the total number of messages has increased 136·5 per cent., and the number of paid messages 169·4 per cent.

14. The following are the net results as compared with the previous year:—

Class of Message.	Actual. Increase. Inland. No.	Actual. Increase. Inland. Value.	Actual. Increase. Foreign. No.	Actual. Increase. Foreign. Value.	Actual. Increase. Total. No.	Actual. Increase. Total. Value.	Actual. Decrease. Inland. No.	Actual. Decrease. Inland. Value.	Actual. Decrease. Foreign. No.	Actual. Decrease. Foreign. Value.	Actual. Decrease. Total. No.	Actual. Decrease. Total. Value. 15. There is again a considerable increase in the number of State telegrams, due mainly to the same causes as were explained in last year's report. Of this increase, upwards of 80 per cent. occurred in Bengal and Assam, and is attributable to famine operations, and in the latter division partly to the formation of the Chief Commissionership. Apart from the exceptional causes which, during the past two years, have led to the extended use of the telegraph for State purposes, a steady rate of progression is doubtless unavoidable and is unobjectionable, and may be accepted as an indication of the increasing value of the telegraph in the adminstration of the country.

16. It may, perhaps, be worthy of notice that, whereas in private messages, the tendency is towards greater compression, in State messages the reverse is the case. The average annual cost of private and State *inland* messages during 1873-74 and 1874-75 was as follows:—

Class.	1873-74. Rs.	1874-75. Rs.
Private	1·72	1·63
State	3·26	3·33

17. *Appendix C* exhibits the details of the account adjustments with other administrations, and the extent of the cash-checking operations in the check office. It will be seen that the total value dealt with during the year amounted to Rs. 81,72, 675.

Signal Office Expenditure.

18. *Appendix D* is a detailed return shewing the number of messages despatched to, from, and through each office; the revenue earned, and the expenditure incurred at and on account of each. Some improvements have been introduced into this return as compared with those submitted in previous years, so as to render it a more complete account of signal office transactions.

19. The items of expenditure in the following statement consist of establishment, rent, travelling charges, and local contingencies only; additional charges properly debitable to signal offices are repairs of buildings by Public Works Department, value and carriage of stores, and value of printed forms; these are all included in *Appendix D*, but are excluded here, to continue the comparison made in previous years before the expenditure under these minor heads was properly distributed.

Year.	Number of signal offices (excluding Ceylon.)	Total number of *sent* messages of *all* kinds (including Ceylon).	Total paid message revenue (including Ceylon).	Signal office expenditure (excluding Ceylon).	Decrease in expenditure as compared with 1868-69.	Remarks.
			Rs.	Rs. A.	Rs. A.	
1868-69 ...	186	433,552	11,56,093	13,47,706 6	...	Expenditure includes pay and allowances of signal establishment and servants, and of superior officers specially attached to offices; rent of offices, travelling expenses of signalling establishment; amount spent in restoring communication; expenses of bank offices, and all contingent charges.
1869-70 ...	190	543,435	12,10,640	13,13,425 1	34,281 5	
1870-71 ...	197	629,233	13,01,546	12,49,022 8	98,683 14	
1871-72 ...	192	702,706	15,76,593	12,36,566 2	1,11,140 4	
1872-73 ...	195	726,341	17,03,478	12,78,166 3	69,540 3	
1873-74 ...	217	788,572	17,83,431	12,60,401 0	87,305 6	
1874-75 ...	216	883,726	19,16,878	12,58,951 14	88,754 8	

	Rs. A.
In 1868-69 the cost of 186 offices amounted to	13,47,706 6
In 1874-75 the cost of 216 offices (or 231 offices including those opened and closed during the year) amounted to ...	12,58,951 14

20. Notwithstanding the steady increase in the number of offices and in traffic, there has been a reduction in expenditure on this account amounting to nearly five lakhs of rupees during the past six years, irrespective of a sum of over $2\frac{1}{3}$ lakhs, the net amount paid during the same period on account of increment of pay to the signalling establishment.

21. A list of offices arranged according to the number of sent messages despatched from each during the year is given in *Appendix E*, of which the following is an abstract, and a comparison with the two previous years.

Number of sent paid Messages per annum.	Number of Offices.		
	1872-73.	1873-74.	1874-75.

Speed of Transmission.

23. The average monthly speed of transmission was materially affected by the cyclone in Bengal in October, when many miles of our main lines out of Calcutta were completely destroyed, and also by the cyclone and inundations on the Madras coast.

It is satisfactory to be able to report that, without claiming any allowance for these exceptional causes of delay to traffic, there has been again an improvement in the average speed of transmission.

Appendix G **shows the monthly *maxima*, *minima*, and mean time intervals between Calcutta-Madras, Calcutta-Bombay, and Calcutta-Kurrachee; between Bombay-Madras, Bombay-Kurrachee, and between Galle and Madras.**

A comparison with the return submitted for 1873-74 will shew an average increase of speed of 12 per cent., or of 22 per cent., if the month of October be omitted.

The following statement exhibits the calculated yearly time intervals on five of the principal routes for the past eight years:—

Approximate average time occupied by telegrams in transmission between the following principal stations.

Year.	Calcutta and Kurrachee.				Bombay and Kurrachee.				Bombay and Madras.						Calcutta and Bombay.				Calcutta and Madras.						Remarks.
	Calcutta-Kurrachee.		Kurrachee-Calcutta.		Bombay-Kurrachee.		Kurrachee-Bombay.		Bombay-Madras.		Madras-Bombay.		Mean.		Calcutta-Bombay.		Bombay-Calcutta.		Mean.		Calcutta-Madras.		Madras-Calcutta.		Mean.

Free News Messages.

24. Seven thousand three hundred and sixty-five were despatched during the year; their nominal value was Rs. 98,606-8 as compared with Rs. 98,157-4 in 1873-74. Details of the number despatched from each division and from each office will be found in *Appendix D.*

25. *Messages exchanged with Railways.*—The number and value of messages exchanged with the different railway systems are given in detail in *Appendix H.*

The number, 54,280, is still far from satisfactory, but there was an increase of 31·72 per cent. over 1873-74, while in that year the excess over 1872-73 was only 10·85 per cent. This result justifies the belief that a healthy impetus has been given to this traffic, and that the far greater development of which it is capable may be looked forward to with some degree of confidence.

26. *Departmental Service Messages.*—The number transmitted during the year was 38,531, being 4·36 per cent of the total number of sent messages, which contrasts favorably with 4·67 the percentage for 1873-74; particulars will be found in *Appendix D.*

Undelivered Messages.

27. An analysis of undelivered messages is shewn in *Appendix I* for each month of the year. The proportion of the number undelivered to the total paid messages agrees very closely with the figures for 1873-74; but an examination of the return will shew that the number is quite beyond our control.

Of the total number undelivered, nearly 60 per cent. was due to insufficient or incorrect addresses, and 35 per cent. to the addressees having left the station.

Press Messages.

28. There has been an increase in the number of Press messages. See *Appendix J;* but the total is still out of proportion to the facilities afforded.

It is satisfactory, however, to notice that the increase that has taken place is in messages sent by ordinary or occasional newspaper correspondents, as distinguished from those sent by Reuter, from which it may be assumed that the special advantages afforded by the Press rules are beginning to be known and appreciated.

The total number was 4,206; their value at ordinary rates was Rs. 90,273, and the amount charged Rs. 17,820-12. The corresponding figures for last year were, number 2,375, value Rs. 55,724-12, amount charged Rs. 11,536.

Interruptions.

29. *Appendix K* shews the number and duration of interruptions during the past 7 years, The total number of interruptions was 16·45 per cent., and their aggregate duration 5·88 per cent. less than in 1873-74, but these figures include the results of the disastrous cyclone in Bengal, and the cyclone and inundations on the coast near Madras, and excluding from the calculation the month in which they took place, the interruptions during 1874-75 were in number 19·39 per cent. and in aggregate duration 28·9 per cent. less than in the previous year.

NUMBER OF OFFICES.

30. The number of offices open in each division on the 31st March, and the names of those opened and closed during the year, are shewn below :—

Number of Offices open on the 31st of March 1875.

DIVISIONS.	CLASS. 1st	2nd	3rd	TOTAL.

SIGNALLING ESTABLISHMENT.

31. The character for intelligence, zeal and general good conduct earned by the signalling staff during previous years has been fully maintained during 1874-75.

(a) Transferred to Indus Valley State Railway.
* Temporary offices opened during famine.

32. The following is a list of the casualties that occurred in this branch, shewing a considerable reduction. The death-rate was very nearly the same as in 1873-74, but the resignations have, it will be seen, decreased from 20 to 10.

List of Casualties during 1874-75.

GRADES.	Death.	Dismissal.	Desertion.	Declared unfit for further service.	Invalided.	Pensioned.	Resignation.	Services dispensed with.	TOTAL.
Telegraph Masters	1	...	...	...	...	...	...	...	1
Signallers (General)	8	15	2	2	1	1	10	2	41
Signallers (Local)	1	...	...	...	...	...	...	...	1
TOTAL ...	10	15	2	2	1	1	10	2	43

33. *Military Signallers.*—Twenty-four soldiers, including one officer, qualified as signallers during the year. A nominal roll of these is annexed, *Appendix L.* At the close of the year 42 soldiers were employed as signallers, 20 in military offices, and 22 at ordinary departmental stations.

ELECTRICAL.

34. The experiments in "Duplex Telegraphy" referred to in paragraph 39 of the administration report for 1873-74, resulted in the successful introduction of Mr. Schwendler's system on the line between Calcutta and Bombay in June 1874, and between Madras and Bombay in February of this year. Arrangements are in progress for extending this system to other heavily worked circuits.

35. The number of testing stations has been increased, and the principle of making regular electrical observations has been continued and extended with beneficial results. Various improvements in the manufacture of our apparatus have also been effected.

INLAND TARIFF.

36. No changes either in the tariff, or in the rules for the transmission of inland messages, were introduced during the year.

37. The numbers and values of *paid private* inland messages despatched yearly during the last eight years are shewn in the following table.

Inland Private Messages.

YEAR.	No.	VALUE.	PERCENTAGE OF INCREASE. Compared with 1867-68. No.	Compared with 1867-68. Value.	Compared with previous year. No.	Compared with previous year. Value.	Average cost of each Message.	REMARKS.
		Rs. As.					Rs.	
1867-68 ...	241,287	7,63,880 11	...	...	...	...	3·16	
1868-69 ...	301,297	7,96,417 10	24·87	4·25	24·87	4·25	2·64	One rupee per 10 words tariff in force from October 1868.
1869-70 ...	401,924	8,17,595 2	66·58	7·03	33·39	2·66	2·09	
1870-71 ...	473,710	8,63,469 11	69·33	13·38	17·86	5·62	1·82	3 words counted as one in address from March 1870.
1871-72 ...	523,023	9,22,639 14	116·76	20·78	10·40	6·85	1·77	Free address conceded, and 6 word unit adopted, from 1st January 1872.
1872-73 ...	548,846	9,96,149 15	127·46	31·71	4·93	7·96	1·82	Double charge for Code abolished from 1st January 1873.
1873-74 ...	592,243	10,18,210 1	145·45	33·29	7·90	2·21	1·72	
1874-75 ...	658,522	10,73,835 3	172·92	40·58	11·19	5·46	1·63	

As compared with 1867-68 (the year previous to the introduction of an uniform tariff for all distances), there has been an increase of 172·92 per cent. in number, and 40·58 per cent. in value, and of 11·19 per cent. in number, and 5·46 in value over 1873-74.

38. The average cost to the public of an inland private message was in 1867-68 Rs. 3·16, and in 1874-75 Re. 1·63.

39. The statistics of inland traffic, both State and Private, for the past eight years are given in the following statement:—

Return of the Number and Value of Inland Traffic.

Year.	* STATE.								PRIVATE.								TOTAL PAID MESSAGES.								Remarks.

* Includes Foreign State Messages.

40. Although no changes in inland message rules were made during the year, several were under consideration, and three received the sanction of Government and came into operation on the 1st April 1875.

These are (1) the opening of 1st class telegraph offices to the public at all hours night or day, including the periods on Sundays and certain holidays during which they have been hitherto closed; (2) the extension to all officers of Government of the privilege, hitherto only granted to certain specified officials, of sending State messages of great urgency without prepayment, subject to the condition of the charges on them being paid within 24 hours of despatch; (3) the equalisation of the local tariff in Ceylon.

International Tariff and Communications with Foreign Countries.

41. The following are the only extensions to be noted:—

A cable was laid between Odessa and Constantinople by the Black Sea Telegraph Company on the 1st July 1874. On the 24th June 1874, communication was established with Brazil, Para, Bahia, Rio de Janeiro, Santos, Santa Catarina and Rio Grande do Sul. An extension from Rio Grande do Sul to Monte Video was opened on the 8th August 1874, and from Monte Video to Buenos Ayres, and from Para to Cayenne, on the 15th October.

Maintenance of Communication.

42. *The Eastern Telegraph Company.*—The service by the lines of this company has been excellently well maintained, notwithstanding an interruption on the Falmouth-Lisbon section, which continued from the commencement of the year till the 27th July. There was also an interruption, lasting from 21st to 28th July, on the Lisbon-Vigo cable. The average time occupied in the transmission of messages by this route continues very satisfactory; the *maximum* time between Great Britain and Calcutta having been 32 hours 34 minutes, and the *minimum* 18 minutes.

43. *Indo-European Company* (*Route* viâ *Teheran.*)—The only serious interruption on this line was one between Odessa and Kertch lasting 3 days 8 hours. The minor interruptions, including those on the Government lines between Kurrachee and Teheran, aggregated 3 days 19 hours. Considering the length of this line and the many difficulties encountered in its maintenance, this result is most satisfactory. The average time intervals have been very low, the *maximum* during the year having been 28 hours 52 minutes, and the *minimum* 24 minutes, between Great Britain and Calcutta.

44. *Turkish Route to Europe.*—There were 22 interruptions reported on this route, aggregating nearly 30 days in duration. One exceeded 15 days, and 4 one day, and of the remainder, 9 lasted upwards of 12 hours. Notwithstanding these interruptions, the time intervals were, as regards English messages, low, 22 hours 51 minutes being the *maximum*, and 5 hours 14 minutes the *minimum*. This result must be attributed solely to the continued falling off in the amount of traffic, the total number of messages received in India from the whole of Europe by this route averaging little more than one per diem. The causes that have led to this decrease in traffic have already been explained in previous reports. The *maximum* and *minimum* time occupied by messages received at Calcutta from Continental Europe were 63 hours 4 minutes, and 3 hours 21 minutes.

45. *Eastern Extension Telegraph Company.*—The following interruptions occurred on the cables of this Company.

Singapore-Saigon 23rd to 30th October.
Saigon-Hongkong (1) 16th to 30th April, and (2) 23rd September to 23rd October.
Singapore-Batavia (1) 18th to 3rd August, and (2) 11th to 17th December and six interruptions, aggregating 272 hours 10 minutes, took place on the Australia land line.

From Australia to Calcutta, the *maximum* and *minimum* time intervals were 164 hours 3 minutes, and 3 hours 9 minutes; and from China to Calcutta the *maximum* and *minimum* time intervals were 165 hours 12 minutes, and 40 minutes.

46. *The Great Northern Telegraph Company.*—Between Hongkong and Amoy 1 interruption occurred, lasting 23 days; between Amoy and Shanghai 3, aggregating 32 days, and between Shanghai and Nagasaki 1, lasting 8 days. There were 7 other interruptions reported on the Amur route to Europe, of which one lasted 17 days. The *maximum* and *minimum* time occupied by messages from China to Calcutta *vid* the Amur and Europe, were respectively 316 hours 46 minutes, and 2 hours 24 minutes.

47. *Communication with America.*—It may be interesting to shew the speed with which telegrams are now transmitted between America and Calcutta.

The following are the *maximum* and *minimum* time intervals for the year:—

	Maximum. H.	M.	*Minimum.* M.
Viâ Suez	35	36	56
Viâ Teheran	31	26	17

Growth of Foreign Traffic.

48. The Indian revenue from International Traffic amounted to Rs. 5,85,728 against Rs. 5,52,127-15 in 1873-74, an increase of 6·09 per cent. The total number of messages amounted to 1,01,643 against 87,886, an increase of 15·65 per cent. The rates of increase of 1873-74 over 1872-73 were 6·97 per cent. in value, and 12·54 per cent. in number.

Full particulars of this traffic are given in *Appendix M*, of which the following is a summary:—

Messages despatched from India.

	Number.		
Westward—			
Viâ Bombay	16,492		
Viâ Kurrachee	16,017		
		32,509

49. The following statement shews the proportion of the traffic in both directions carried by the Red Sea, Teheran and Turkish routes during the past four years.

Year.	Red Sea Route.	Teheran Route.	Turkish Route.	Total.
1871-72	52·81	29·11	18·08	100·00
1872-73	65·05	30·20	4·75	100·00
1873-74	53·14	44·13	2·73	100·00
1874-75	50·52	47·91	1·57	100·00

The decrease of traffic by the Turkish route has already been noticed.

50. The following statements contain the statistics of foreign traffic during the past eight years:—

Foreign Traffic.

Return of the number and value of Foreign Messages.

YEAR.	STATE.	PRIVATE.						TOTAL PAID MESSAGES.

Remarks.
Tariff reduced.
10 word tariff introduced 1st January 1870.
Viâ Suez and Teheran on 15th February 1871, and *viâ* Turkey on 10th December 1871.
Tariff increased 10-word message abolished from 10th December 1871.
Including 15 messages, value Rs. 96-9, from West to West; 10-word tariff with word increment to Great Britain and America introduced on 15th November 1873.
Including 31 messages, value Rs. 138-4, from West to West.

* No separate account kept.

The value of the foreign traffic amounted to 30·56 per cent. of the total message revenue, against 30·96 per cent. in 1873-74, and 30·30 in 1872-73.

Tariff Changes.

51. The only change that calls for notice here is the reduction, from 85 to 75 francs, of the rate from India to Egypt. This reduced rate took effect on the 1st July 1874.

Summary of Traffic Operations.

52. Compared with previous year, 1873-74—

Inland traffic increased 11·89 per cent. in extent, and 8·10 per cent. in value.

Foreign traffic increased 15·65 per cent. in extent, and 6·09 per cent. in value.

Total paid message traffic increased 12·33 per cent. in extent, and 7·48 per cent. in value.

Total revenue earned (excluding *pro formâ*) increased 12 per cent.

The average speed of transmission has increased 12 per cent., or, excluding from the calculation the month in which the cyclone occurred, 22 per cent.

The percentage of complaints has decreased 14 per cent.

The percentage of undelivered messages remains unaltered.

Fifteen new offices were opened, and fifteen, including ten unremunerative, offices opened in connection with the Bengal Famine, were closed.

Interruptions have decreased 16·45 per cent. in number, and, excluding those caused by cyclones, 19·39 per cent. in number, and 28·9 per cent. in aggregate duration. Notwithstanding the increasing charges due to annual increments to salaries, signal office expenditure has slightly decreased.

The net reductions on this account from the year 1869-70 amount to nearly 5 lakhs, and to more than 7 lakhs if allowance be made for the unavoidable yearly increases to the salaries of the signalling staff.

Extensions of Lines and Wires.

53. The number of miles of line on the 31st March 1875, including Ceylon, was 16649·25 against 15980·35 at the close of the previous year. The number of miles of wire in use was 33797·75 against 32555·52, and of cables 103·3 against 107·09.*

The miles of line and wire on railways and on roads, respectively, are shewn below :—

	Miles of Line.	Miles of Wire excluding Cables.
On Railways	... 5884·75	18785·75
On Roads	... 10764·5	15012·
Total	... 16649·25	33797·75

54. The attached diagrams 1 and 2 shew at a glance the progress made during the past ten years.

The following is a list of the principal works carried out during the year :—

Arracan.

55. Between Akyab and Ooreating, 20 miles of wooden posts were renewed, and at the same time improvements were made in the original alignment.

Assam.

56. On the left bank of the Ganges, opposite Caragola, about 100 wooden posts were renewed.

(2.) A span of 2,830 feet was erected over the Teesta River. It consists of two masts, 97 and 103 feet high, with a steel wire rope of 7 strands, each ·06 inch diameter, and of a total weight of 350lbs. per mile, the *minimum* breaking strain being 26 cwt.

(3.) The Soorma and Khoosearah Rivers, respectively, 678 and 917 feet wide, were spanned with iron wire on wooden masts, 110 feet high.

(4.) Nineteen miles of line between Sylhet and Silchar, originally constructed across the fields, were brought alongside the road.

* These figures differ slightly from those given in last year's Administration Report, and are obtained from more complete returns compiled since that report was written.

(5.) Six miles of line between Julpigoree and Cooch Behar were transferred from the old to the new road.

Bellary.

57. Between Hyderabad, Deccan, and Bellary, 18 miles of line across country far away from roads, were dismantled and a line along the road, 14 miles in length, substituted.

Bengal.

58. The following lines were made during the year :—

(1.) In Allahabad two lines on wooden posts, aggregating 6¼ miles, were erected from the main to branch offices.

(2.) In Benares an extra wire, 2¾ miles long, on existing posts, from the main office to a branch office in the city.

(3.) A new line 8 miles long, on wooden posts, from Jamalpore to Monghyr.

(4.) A new line, 59 miles in length, on uninsulated wooden posts, from Dehree to Arrah, for the use of the Irrigation Department.

(5.) A wire, 8½ miles long, to connect the Bankipore office with the Dinapore station of the East Indian Railway.

(6.) A temporary line, 22 miles long, on light jungle wood posts, from Burhee to Hazareebaugh, for the use of His Excellency the Viceroy.

(7.) The following work was also in progress :—

Strengthening the line between Burdwan and Raneegunge (where it suffered so severely from the cyclone of October 1874), by means of staying every post.

Bombay.

59. A new line on iron posts, 60 miles in length, was made from Dundooka to Bhownugger.

(2.) An addition of 1½ mile was made to the lines in Nassick, in consequence of the office being moved to the cutcherry.

(3.) The re-construction with Siemen's posts of the line from Wadwan to Rajkote was in progress. The wooden posts erected in 1870 had been completely destroyed, partly by white-ants and partly by decay.

British Burmah.

60. A second wire, 168 miles long, was erected on the existing posts from Rangoon to Prome.

(2.) A new line was erected from Prome to Myanoung and Henzada, in all 106½ miles. It crosses the Irrawaddy by a span of 1,300 feet on 2 masts 130 feet high to an island, and thence by a cable 2,200 yards long. The Bassein River is also crossed by a span on 100 feet masts.

(3.) The town lines in Rangoon were re-constructed with sawn teak posts for 4½ miles.

(4.) A second wire was erected for 9 miles, from Thayagoon to Laingha, on the British frontier, in order to loop in Thyetmyo, instead of working it on a derived circuit.

Ceylon.

61. A loop line, 8 miles in length, was constructed from Mehintelle, on the main line between Kandy and Manaar, to Anuradhapura.

(2.) The lines in the town of Kandy were re-constructed.

(3.) The line Newara Eliya to Badulla, 37 miles in length, was commenced and almost finished.

(4.) The repairs on the existing wooden post lines were very heavy this year, costing Rs. 7,679 exclusive of establishment charges; 875 new wooden posts (or more than 10 per cent.) were erected, and 253 miles of jungle cleared, besides minor works of repairs to stays, struts, insulators, &c.

Dacca.

62. A new cable, 3,290 yards in length, was laid across the Pudda River at Goalundo.

This cable consists of a strand of 7 copper wires, each ·036 inch diameter insulated with three layers of gutta-percha to a total diameter of ·32 inch, served

with four layers of tanned jute and guarded by 12 galvanized iron wires, each ·254 inch diameter, giving, when finished, a total diameter of inch 1·224, and a breaking strain of 18½ tons. The gutta-percha core was received from England, and the cable was made in our own machine in the Calcutta workshops.

Ganjam.

63. In consequence of the construction of an anicut over the Byturnee River at Aquapada, it became necessary to remove the telegraph crossing, and a single span made over the river higher up-stream, where it is 1,450 feet broad. This span consists of a three strand homogeneous iron rope, supported on iron masts, each 57 feet high.

Indore.

64. The span across the Chumbul at Dholpore, erected in 1873, having been carried away by a flood, a new site was selected at the village of Bhir, 3 miles down-stream.

The new span is 2,350 feet from mast to mast, made of steel wire similar to that over the Teesta; one mast is 58 feet and the other 78 feet high.

(2.) The road-line from Kundwa to Indore was dismantled (except a short length near the Nerbudda at Kundwa), in consequence of the completion of the line along the Holkar State Railway.

Madras.

65. A new span was erected over the Kistna at Bezwarrah; this consists of a wire rope 5,070 feet from mast to mast.

The rope is made of 7 strands of iron wire, each strand ·145 inch diameter, and the ends are passed round grooved marble balls, fastened by iron straps to low square teak posts set in rock on each side of the river. To improve the insulation afforded by the marble balls, each post is enclosed in a wooden box, through a slit in the side of which the rope passes. No regular insulators could be made to stand the strain of such a span; but this arrangement has been very successful, and has improved the insulation of the whole line considerably.

(2.) A new crossing was made over the Soonamookee River, by erecting two 30 feet iron masts on screw piles in the sandy bed of the river.

(3.) The line from Paumben to Ramesaram (8 miles), originally made with wooden posts, was at the end of the year in progress of re-construction with iron posts.

Malabar Coast.

66. The line from Goa to Carwar was dismantled, and the line from Carwar to Dharwar finished.

On this line, where it passes through the forest below the ghâts, trees have, as far as possible, been used as supports. The insulators are suspended from wrought-iron brackets attached to the trees by spike nails.

(2.) The line from Mysore to Bangalore was insulated.

Nagpore.

67. The line from Sironcha to Doomagodium, hitherto kept up for the use of the Irrigation Department, and the line from Hingunghat to Kotaree, were dismantled.

Oudh and Rohilkund.

68. The following works were carried out to complete the construction of the lines on the Oudh and Rohilkund Railway, *viz.* :—

I.—Bringing the wires on to the Ganges bridges at Rajghat and Cawnpore, on to the Ramgunga Bridge, the Goomta Bridge at Jounpore, and the Saie Bridge at Jellalgunge.

II.—Extending the line at Cawnpore to the East Indian Railway Station.

III.—Connecting the Government and Railway offices at Alligurh, Bareilly, Benares and Cawnpore.

(2.) A branch line, 1¾ miles long, was made to cantonments in Lucknow.

(3.) A span of 350 yards, supported on sâl posts 50 feet high, was erected across the Kosi River, between Moradabad and Kaladungi.

(4.) A line was made from Lucknow to Seetapore, 54 miles.

(5.) A temporary line was made for famine purposes from Fyzabad to Goruckpore (86 miles).

Punjab.

69. Thirty-two miles of the line from Kohat to Bunnoo were erected, but the work had to be stopped on account of unexpected difficulties in crossing the Koorum River.

(2.) The lines from Jheelum to Rawul Pindee, and Roorkee to Rajpore, were insulated.

(3). Cherat was connected with Peshawur by a line (28½ miles) in length, of which 14¼ miles were on existing supports.

Rajpootana.

70. The lines between Deesa and Hydrabad were maintained with great difficulty, and at considerable expense.

Over 30 miles of line were inundated by a flood from the Narra River, which was said to have been the highest known since 1826.

The final result of this flood has been that what was formerly a desert is now for some miles a series of permanent lakes, through which the line has to be constantly patrolled in boats.

Sind.

71. In order to eliminate the cables which have always been a source of expense and danger, a span of 6 wires was erected over the Indus at Kotree. The distance between the masts on either bank is 1,950 feet.

(2.) One mast is 143 feet 9 inches, and the other 150 feet, clear of the ground; each is made with lower masts consisting of tripods of cast-iron tubes, braced together on sockets, set for 10 feet in masonry with concrete foundations. These tripods are made in segments of 6 feet 3 inches each, are 93 feet 9 inches and 100 feet high respectively, and each carries a wrought-iron topmast 50 feet high, clear of the tripods.

(3.) The wires across the span are each a 7-strand steel wire, weighing 450 lbs. per mile, and giving a breaking strain of 33 cwt.

(4.) The experience gained in erecting these masts showed that even double the height might be gained without difficulty by the use of masts of this description.

Tirhoot.

72. In order to join Durbungah, in Tirhoot, with the main system, a Hooper's core cable, 3,620 yards long, was laid across the Ganges at Mokameh. The wire thence is supported partly on wooden and partly on iron posts to Dulsing Serai, and from Dulsing Serai to Durbungah on bamboos.

STATE RAILWAYS.

Wurdah Valley Railway.

73. This line was extended from Hingunghat to Wurrora, a distance of 25 miles.

Punjab Northern State Railway.

(2.) A line was made from Lahore to Shadrah, 5 miles

Indus Valley State Railway.

(3.) The lines were extended from Bhawulpore to Khanpore, and from Kotree to Sehwan, but the work on neither sections was quite finished off at the end of the year.

Rajpootana State Railway.

(4.) This line was extended for 52 miles, from Sambhur junction to Ajmere.

Holkar State Railway.

(5.) The line was extended from Barwai, on the north bank of the Nerbudda, to Indore, 49 miles, completing the whole length from Kundwah to Indore, except between Burwai and Mortukka, on each bank of the Nerbudda. These stations are temporarily connected (until the Nurbudda bridge is finished) by a loop line connected to the old span across the river.

Cyclones and Floods.

74. On the night of the 15th October 1874, a severe cyclone caused very considerable damage to the lines extending from a little south of Burdwan to Mancoor, and from Raneegunge to Balasore. The station lines in Burdwan were completely wrecked, 110 posts between Burdwan and Mancoor were broken, and numerous others blown down.

75. On this section of line, communication was temporarily restored by means of insulated wire run across the principal breaks, and by the erection of a temporary bamboo line with field insulators in the station of Burdwan. This arrangement had to last for several weeks, as the permanent repairs could not be effected until the water subsided.

76. The fact that the whole country was under water considerably impeded repairs. Horses could not be used; it was impossible to camp near the work, and therefore for the first few days everybody employed had to walk from 10 to 20 miles in addition to his day's work. All labor had to be brought from Calcutta, none being procurable locally, as the villagers were engaged in repairing their own damaged huts.

77. Between Midnapore and Jelasore (45 miles), 110 posts were destroyed, the wires were broken and in many places entangled with fallen trees, and the Kussai and Subanreeka River crossings were swept away, besides other minor damages. In this section, also, the inundations delayed the repairs.

78. In the Madras Presidency considerable damage was also caused by floods. Near Nellore, 3 miles of line and one of the masts of the river crossing were washed away. Much difficulty was experienced in repairing these damages, and especially in re-constructing the Penaar span, which was eventually accomplished by means of rockets.

79. Between Madras and Raichore, the Railway bridges across the Penaar, Chittravattee, Parpugnee, and Cheyaar, were more or less injured, and telegraphic communication interrupted.

80. South of Madras, also, floods carried away the Palar crossing, and caused other damages.

Temporary Bamboo Lines.

81. The result of a year's experience of these extensive temporary lines is note-worthy.

In the *first* instance, with regard to their durability, it was found on the Northern Bengal Railway that 60 per cent. had to be changed, principally on account of damages from "*goons*." *Secondly*, with regard to the necessity for insulation in open ground exposed to the sun, they appear to remain sufficiently clean for one monsoon; but where the line passes through trees and remains constantly in the shade, they become coated with a kind of spongy mildew, which, giving a permanent damp surface, is fatal to insulation. *Thirdly*, the plan of erecting the bamboos in pairs with the wire lying in the fork bound at the top is successful, but it is found that at angles two are insufficient for iron wire, and that tripods are necessary. *Fourthly*, when necessary to use insulators with bamboos, the best form is one that hangs with the wire below it, as the insulator is tied to the fork of the two bamboos by the wire binder that holds them together.

Guaranteed and State Railway Telegraphs.

Railways.	Miles of wire.	Offices.
State	1811·13	79
Guaranteed	1238·22	63
Total ...	3049·35	142

82. On the 31st March 1875, the number of miles of wire rented to Railways and maintained by this Department was 3049·35, and the number of Railway telegraph offices technically managed was 142.

Store Branch.

83. The following has been the yearly cash expenditure for the past five years:—

	Rs.
1870-71	4,05,474
1871-72	3,97,150
1872-73	4,11,355
1873-74	2,92,040
1874-75	3,18,820

The excess expenditure during 1874-75, as compared with 1873-74, is in part accounted for by an abnormal payment of Rs. 17,700 for purchase in the local market of American compound copper and steel wire.

84. The cost of store-keeping generally throughout India amounted to Rs. 66,789, or 2·5 per cent. of Rs. 25,72,418, the value of stores received and issued throughout the year.

85. The number of store agencies was 126 in 1873. It has since been reduced to 117 on 31st March 1874, and to 106 on 31st March 1875.

86. The following is a summary of the workshop accounts:—

Dr.	Rs.	*Cr.*	Rs.
To Balance from last year ...	19,597	By work done	2,44,321
„ Materials	1,69,196	„ Miscellaneous recoveries ...	6,400
„ Establishment	21,065	„ Balance	34,470
„ Labour	53,709		
„ Suspense	4,019		
„ Stores for working ...	7,879		
„ Nominal profit	9,726		
Total ...	2,85,191	Total ...	2,85,191

The small profit of Rs. 9,726 shewn above is, however, only nominal, as nothing is charged for interest on block, &c.

87. The miscellaneous and spasmodic nature of much of the work, and the disadvantage at which the workshops are placed on this account, were referred to in the Report for 1873-74. The year 1874-75 has been one of some pressure as regards the demand for instruments, due principally to the requirements of the State Railways, and to the introduction of the duplex system of working.

88. In the working of the Press, the account stands as follows:—

Dr.	Rs.	*Cr.*	Rs.
To Materials	39,834	By work done	34,948
„ Labour	5,817	„ surplus stores	14,401
„ Nominal profit	3,698		
Total ...	49,349	Total ...	49,349

shewing a nominal profit of Rs. 3,698, to pay for interest on block, &c. Our rates for printing are considerably lower than those ruling in any other Press in Calcutta.

Simla,
The 28th Sept. 1875.

R. MURRAY, *Lieut.-Colonel,*
Offg. Director General of Telegraphs in India.

APPENDICES.

APPENDIX A.

Summary of financial results of the Indian Telegraph Department for the year 1874-75, on total expenditure.

h In the interior prices range as follow:—Wheat 17 to 21 seers, barley 22-8 seers, rice best sort 21-4 to 23-8 seers, rice common 21-6 to 24-12 seers, and gram 17 to 20-8 seers.
i In the interior prices range as follow:—Wheat 16 to 20 seers, rice best sort 11-6 to 20 seers, rice common 22 to 33-11 seers, lesser millet 40 seers, and gram 10 to 15 seers.
j In the interior prices range as follow:—Wheat 8 seers, rice best sort 5-8 to 14 seers, rice common 11 to 24 seers, lesser millet 14 seers, maize 20 to 40 seers, and gram 10 to 13 seers.
k In the interior prices range as follow:—Wheat 11-6 to 13 seers, rice best sort 12 to 16 seers, rice common 15 to 20 seers, and gram 13 to 13-8 seers.
l In the interior prices range as follow:—Wheat 19 seers, barley 30 seers, rice best sort 14 to 20 seers, rice common 19 to 23 seers, and gram 18 seers.
m In the interior prices range as follow:—Wheat 26 seers, barley 40 seers rice best sort 19 seers, rice common 9 to 26 seers, and gram 16 seers.
n In the interior prices range as follow:—Rice best sort 18 to 20 seers, rice common 12-3 to 22 seers, paddy 35 to 40 seers, and gram 12 to 21 seers.
o In the interior prices range as follow:—Wheat 19 to 19 seers, rice best sort 13 to 20 seers, rice common 17-12 to 26 seers, and gram 13 to 18 seers.
p In the interior prices range as follow:—Rice best sort 16 to 20 seers, and rice common 18 to 24 seers.
q In the interior prices range as follow:—Rice best sort 15-8 to 20 seers, and rice common 18 to 23 seers.
r In the interior prices range as follow:—Wheat 25 to 27 seers, barley 40 to 45 seers, rice best sort 20 seers, rice common 25 to 27 seers, lesser millets 45 seers, maize 33-1 to 35 seers, and gram 27-8 to 33-1 seers.
s In the interior prices range as follow:—Wheat 22 to 26-8 seers, barley 34 to 45 seers, rice best sort 11 to 14 seers, rice common 24 to 28 seers, bulrush millet 30 to 31 seers, great millet 25 to 32 seers, maize 31 to 40 seers, and gram 30 to 35 seers.
t In the interior prices range as follow:—Wheat 20 to 23-8 seers, barley 35 seers, rice best sort 14 to 20 seers, rice common 18 to 21 seers, lesser millets 28 to 32 seers, maize 30 to 35 seers, and gram 25 to 30 seers.
u In the interior prices range as follow:—Wheat 25 to 27 seers, barley 40 to 45 seers, rice best sort 11 to 14 seers, rice common 17 to 19 seers, lesser millet 21 seers, maize 36 to 40 seers, and gram 30 to 31 seers.
v In the interior prices range as follow:—Wheat 20 to 27 seers, barley 30 to 50 seers, rice best sort 12 to 16 seers, rice common 19 to 27 seers, lesser millets 24-8 to 50 seers, maize 24 to 45-8 seers, and gram 22 to 28 seers.
w In the interior prices range as follow:—Wheat 20 to 25 seers, barley 34 seers, rice best sort 20 to 22 seers, rice common 21 to 25 seers, murwa 30 to 32 seers, maize 37 seers and gram 18 to 24 seers.
x In the interior prices range as follow:—Wheat 22 to 26 seers, rice best sort 20 seers, rice common 24 seers, and gram 24 to 26 seers.
y In the interior prices range as follow:—Wheat 18 seers, rice best sort 22 to 24 seers, rice common 26 to 30 seers, bulrush millet 40 to 60 seers, maize 40 to 60 seers, and gram 16 to 30 seers.
z In the interior prices range as follow:—Wheat 20 seers, rice best sort 18 seers, and rice common 36 seers.
aa In the interior prices range as follow:—Wheat 24 seers, barley 30 to 60 seers, rice best sort 12 seers, rice common 26-8 seers, lesser millets 45 to 50 seers, maize 32-8 to 45 seers, and gram 24 to 30 seers.
bb In the interior prices range as follow:—Wheat 18 to 20 seers, barley 16 seers, rice best sort 18 to 24 seers, rice common 24-8 to 32 seers, maize 40 seers, and gram to 20 seers.

Prices Current of Food-grains throughout India for the 1st half of February 1876 —continued.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on imports and exports are not distinguished.

2. The figures for British Burma for 1875-76 include collections at *Tavoy* and *Mergui* for the months *April* to *January* only.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

COOLING OF RAILWAY CARRIAGES DURING THE HOT SEASON.

Nos. 665—71 R., dated Fort William, March 6, 1876.

RESOLUTION—By the Government of India, PUBLIC WORKS DEPT.

Read again—

Public Works Department Resolution Nos. 497-510 G—R, dated the 6th March 1874.

Read also—

Letter from the Consulting Engineer to the Government of India for Guaranteed Railways at Lucknow, No. 2726, dated the 18th December 1875, forwarding a Report by the Locomotive Superintendent, Oudh and Rohilkhund Railway, on the trial made with punkahs in the upper class carriages of the line during the hot season of 1875.

OBSERVATIONS.—The importance of devising some means for alleviating the discomfort attendant on Railway travelling during the hot season in certain parts of India has been for a long time felt, and various experiments have from time to time been made on different Railways with this object. The letter from the Consulting Engineer, Lucknow, now read, gives an account of experiments made on the Oudh and Rohilkhund Railway, with a punkah invented by Mr. Cooke, Locomotive Superintendent of that Railway.

The views expressed by passengers of the use of Mr. Cooke's punkah are encouraging, but as yet the apparatus has only been applied to 1st class carriages. Full details of the cost of working this punkah, compared with the number of passengers carried, have not been furnished, but from statistical information of the average filling of carriage stock on the Oudh and Rohilkhund Railway and other lines in India, it is probable that the expense of working would not exceed per unit passenger mile for 1st class $\frac{1}{3}$rd of a pie, for 2nd class $\frac{1}{4}$ of a pie, and for 3rd class $\frac{1}{10}$ of a pie. Traffic statistics on the Railways in India show a very material decrease in the number of travellers during the hot months, and it is evident that means to avert the discouraging influence of the heat against travelling should be sought not only as a matter of humanity, but also in the interest of the Railways.

RESOLUTION.—The Consulting Engineer, Lucknow, should be directed to request a continuance of the experiment made with Mr. Cooke's punkahs during the coming hot season on the Oudh and Rohilkhund Railway, and that their application be extended to the carriages of the lower class; careful accounts of expense incurred being kept in order to determine the cost per unit passenger mile.

The Director of State Railways should be instructed to organize similar trials on State lines, and the attention of all Railway Managers should be directed to the subject.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Madras and Bombay for information; also to the Consulting Engineers to the Government of India for Guaranteed Railways at Calcutta, Lahore and Lucknow, for communication to the several Railway Companies and for reports of the action taken by each; also to the Director of State Railways for information and guidance.

Ordered also, that this Resolution be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

H. DRUMMOND, Colonel, R. E.,
Deputy Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th MARCH 1876.

GENERAL REMARKS.—No rain has fallen in Madras, where prospects continue unchanged. There has been a general and beneficial fall in Sind, but none elsewhere in the Bombay Presidency: the harvest is progressing. In Berar and the Central Provinces the *rabi* cuttings continue; the outturn is expected to be good. In Bengal there has been general rain in the Eastern and South Central Districts, the Sonthal Pergunnahs, Balasore and parts of Chota Nagpore; none in Behar: the rain has facilitated ploughing for the cultivation of early rice. No rain has fallen in the North-Western Provinces except in Kumaon; in Rohilkhand the crops are reported to promise badly; elsewhere prospects are good. None has fallen in Oudh; prospects are good. In the Punjab there has been more or less rain in all districts except Delhi, Hissar and Umballa; in these it is badly wanted. In Assam there have been good falls, and prospects are good. From Rajputana a slight fall is reported from Bhurtpore.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 9th)	*Nil*	Standing crops good; cotton harvested; outturn about half; markets well supplied; cholera 95 seizures, 34 deaths; small-pox and fever in 5 taluks; mild epizoötic aphtha continues; dry fodder being used.
Kurnool („ 8th)	*Nil*	Season generally good; cotton being gathered; other dry crops almost harvested; pasture and water sufficient; markets well supplied; prices steady; cholera in Pattikonda, Cumbum, and Koilkuntla; fever prevalent; cattle disease in 4 taluks.
Tanjore („ 9th)	*Nil*	Rivers almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops in places; standing crops withering in several localities; harvest wet and some dry crops; yield moderate; markets well supplied; prices almost steady; cholera continues, 255 seizures, 161 deaths; small-pox in some parts; cattle disease in many places, some loss; pasture scanty.
Trichinopoly („ 8th)	*Nil*	Water supply scanty; condition of crops anything but good; outturn below average; markets well supplied; prices generally steady, slightly risen in Kulitallai; cholera prevailing in all taluks, 211 seizures, 107 deaths; foot-and-mouth disease among cattle; pasture scarce.
Malabar („ 9th)	*Nil*	Markets well supplied; prices steady; bowel complaints in 7 taluks, 370 seizures, 297 deaths; small-pox prevalent, especially in North Malabar; cattle disease slight in Wynaad and Walluvanad.
		General Remarks.—General prospects same as last week.
Bombay— (March 9th)		
Sind. (March 8th)		
Kurrachee ...	...	Rain in Kohistan, Dádú and Kotri; severe dust-storms in Kurrachee on Saturday evening; weather cloudy; rain expected; *rabi* being harvested; crops in five talukas attacked by insects, in four by blight.
Shikarpur ...	...	Rain general on 3rd and 4th.
Hyderabad ...	...	Reaping of *rabi* commenced; weather cloudy; rain threatening; cattle disease in Badin taluka.
Upper Sind Frontier ...	0·26	Rain beneficial; oil-seed crops ripening, quality fair; market active.
Guzerat.		
Ahmedabad ...	...	Cholera disappearing from Dhandhuka and is decreasing in Viramgám.
Kaira ...	...	*Rabi* crops mostly harvested.
Surat ...	...	Eleven fatal cholera cases in the city.
Broach ...	...	In Jambusar cotton pods slightly damaged owing to unseasonable rain.
Khandesh and Nasik.		
Khandesh ...	...	Reaping of *rabi* nearly completed; export of full-pressed cotton bales from Jalgaon, from 1st November 1875 to 29th February 1876, 24,842 bales, rate 40; fever in Pimpalner and Chopra talukas.
Nasik ...	...	*Rabi* crops middling; reaping progressing.
Konkan.		
Tanna ...	...	Reaping of *rabi* progressing; prospects fair; small-pox in town of Tanna.
Deccan.		
Poona ...	...	*Rabi* crops nearly harvested; weather continues hot; small-pox prevails; public health generally good.
Ahmednagar ...	...	No change.
Sholapur ...	...	Cattle disease in Málsiras; health good.
Satara ...	...	No change in the state of crops; cattle disease slightly prevalent in Pátan.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum (Mar. 8th)	...	Cholera prevails slightly throughout the district; prospects of cotton indifferent.
Dharwar ...	...	Cotton picking progressing; fever continues in 7 talukas, causing mortality; cholera in 9, and cattle disease in almost every taluka.
Kanara ...	...	Cultivation favourable; cholera continues above Ghát.
Kaladgi ...	...	*Rabi* nearly reaped; cotton picking progressing; 10 deaths from cholera.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Health generally good; cholera in Morvi taluka, 243 cases, 74 deaths; in Rajkot 5 cases, 3 deaths.
Wadhwán ...	...	Weather warm; cotton ginning commenced; 20 cholera cases, 7 deaths.
Baroda ...	...	Picking of cotton continues.
		General Remarks.—General fall of rain in Sind; harvest progressing generally; cholera in Rájkot, Wadhwán, Surat and Southern Mahratta Country; small-pox in Bombay, Tanna and Poona.
Bengal—(Mar. 9th)		
Chittagong ...	·30	Weather cloudy, with fogs; rain in parts of the district; small-pox prevalent in the town.
Noakhally ...	1·2	Weather unsettled, generally cloudy or foggy; there was a good shower on the 24th ultimo, with rather a high wind and hailstorms; slight rain on the 29th of February and 1st March; wind variable; pulses, chillies, linseed, and *sessamum* are progressing favourably; a few severe cases of small-pox reported from Begumgunge and Luckipore, and of cholera from Hatra and Bamni.
Chittagong Hill Tracts...	·97	Weather cool; some showers of rain on the 24th and 25th instant. The hill people are busily engaged in joom-cutting.
Hill Tipperah ...	0·27	Weather cloudy; hot in the middle of the day, cool at mornings and nights; *boro* paddy promises well; preparations are being made for sowing *shaita* paddy.
Backergunge ...	·18	Plenty of rain at the head-quarter sub-division, and a fair amount in Perozepore; but rain is still much wanted in the Patnakhally and Dowlutkhan sub-divisions; prospects of the crops are fair, but barely an average.
Furreedpore ...	·59	Weather unsettled since 1st instant, with frequent thunderstorms from north-west; the rain will do much good and enable ploughing to go on.
Dacca ...	1·98	Weather cool for the season; rain is general; crops are good; the rain has not done particular good to any standing crop, but has allowed ploughing.
Mymensing ...	0·70	Weather is unsettled; a decided improvement in the prospects of the *boro* crop in consequence of the rainfall.
Tipperah ...	1·48	Good showers of rain; state and prospects of the crops are favourable; ploughing has commenced for the rice crops.
24-Pergunnahs ...	1·47	Weather cloudy with occasional rain; cold-weather crops are nearly off the ground; the rain will enable cultivators to prepare the ground for the spring sowings; cholera and fever have much abated.
Jessore ...	·89	Changeable wind from all parts of the compass, and some smart showers; the rain has done good to the spring rice, and made the ground for the early rice fit for ploughing, in which the ryots are consequently busily engaged.
Nuddea ...	0·72	There has been general rain; the rain will do some harm to ripe crops on the ground or just cut, but it will be of great service in enabling the cultivators to prepare their land for the early rice.
Moorshedabad ...	1·60	Weather cloudy; heavy showers, temperature close and warm; crops are fair; *boro dhan* promising; a good outturn is expected of the *rabi* crops, peas, lentils, linseed and gram, which are being cut; the heavy showers have damaged the mangoe blossoms and slightly the wheat and barley; some cases of cholera reported from Rampore Haut.
Pubna ...	1·38	Weather cloudy and rainy; there have been good showers during the week, which it is hoped will prove very beneficial to the crops; general health of the district is good. No case of cholera reported since the last return.
Rajshahye ...	0·7	Very slight rain on the 3rd at head-quarters and at Godagari, and in the Nattore sub-division; there is no change in the state and prospects of the crops; the rain that has fallen has been quite insufficient to do any good, and much more is urgently required; the general health is good, excepting a few cases of small-pox.
Bógra ...	...	A few drops of rain fell at the Sadr station, but not appreciable by the rain gauge; weather was stormy with a little rain, which was in places actually not less than half an inch which the rain gauge should indicate; the lands are now being broken up with a view to sowing at the commencement of the rains; the rain, however small, has been exceedingly beneficial.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Maldah ...	0·06	Slight rain fell on this day at the Sadr station, but how far in the interior is not yet reported; heat is increasing in the day time, but the early morning continues cool; *sarsa* and rye being cut in thana Nawabgung; the sowing of the *bhadoi* (*joli*) has commenced in the thana Gorgoriba; *rabi* is still suffering from want of rain; a quarter of the expected outturn of the *rabi* crops in thana Gomastapore has been lost from drought; no failure is yet reported from other thanas, but more rain is wanted.
Dinagepore ...	*Nil*	Weather warm and cloudy; a few drops of rain fell in the station on the morning of the 2nd and 3rd instant; *rabi* crops on the whole are good; tobacco is a 16-anna crop, sugarcane 8 to 10 annas, and mustard 8 annas.
Rungpore ...	*Nil*	Rain threatening, but none has yet fallen; ploughing for *aus* rice is general; tobacco is promising; wheat and pulse damaged for want of rain.
Cooch Behar ...	*Nil*	Weather is somewhat warmer than last week; the prospects of the crops continue unfavourable owing to want of rain; health of the district is good.
Jalpaiguri ...	*Nil*	Weather very pleasant, but in the early part of the week the afternoons were getting rather warm; Friday was cloudy, and apparently there was a storm, and rain must have fallen in the Bhootan Hills; this has cleared the air in Jalpaiguri greatly; tobacco crop is not as good as usual; *bhadoi* sowing will shortly begin; rain is greatly needed.
Darjeeling ...	0·17	The cold weather has continued longer than usual; the March winds are setting in. On the 3rd there was a sprinkling of rain with high wind and mist, threatening more rain; the sowing throughout the district is progressing favourably; a little more rain would be beneficial, and by the appearance of the sky it may be expected soon.
Midnapore ...	0·90	Weather warm and cloudy; rain has been of much service; prospects of the crops are favourable.
Howrah ...	3·03	Heavy rain with severe thunder-storms early in the week; there are no crops to be now influenced by the weather.
Hooghly ...	1·47	Weather cloudy; drizzling rain on the 1st, and copious shower on the night of the 2nd; sugarcane cuttings still being planted out; rain of 2nd instant general, and most beneficial to young sugarcane, mangoes, cucumbers, water-melons, &c.; ploughings of paddy lands greatly facilitated; slight damage caused to the potatoes and *rabi* crops, which are still on the ground; potatoes and sugarcane still being gathered; *rabi* almost over, except wheat; green food abundant, except brinjals; *sakarkand* harvest is over.
Burdwan ...	1·66	Rainfall at Culna 0·59, at Cutwa 0·76, at Bood-Bood 0·83, at Raneegunge 0·95, at Jehanabad 2·98; the late rain has done good to crops still in the field; ploughing has commenced; cholera is reported in Bood-Bood and Jehanabad.
Bankoorah ...	0·12	Slight rain in different parts of the district, also fog; some injury has been done to the mangoe blossoms by the rain and fog; nothing else worthy of notice; a few cases of cholera reported.
Beerbhoom ...	0·02	Slight showers in places; a few drops at the Sadr station; no change in the state and prospects of the crops; rain is still wanted.
Sonthal Pergunnahs ...	0·15	On Thursday there was a good shower of rain close to Dumka, and a little rain in Dumka; the rain was only enough to cool the air and freshen a little indigo; there is no *rabi* that could profit by it, and it was not enough for early ploughing.
Bhagalpur ...	*Nil*	Cloudy weather; wind veering from east to west; crops ripening fast; harvesting will be general in a fortnight or three weeks; prices show no tendency to rise; new wheat is expected to sell at about a rupee a maund in Soopool sub-division; general condition of the people is very good; some of the lowest classes are naturally badly off; general health is very good; small-pox in Bhagalpur town, but not many cases.
Monghyr ...	*Nil*	Weather fair; no change in the state and prospects of the crops since last week; the harvest has commenced in some parts and crops are being cut, without a drop of rain having fallen on them since the day they were planted; the Jamooe sub-divisional officer reports an 8-anna *rabi* crop is being cut, but in the Sadr and Begooserai sub-divisions nearly an average crop is expected; food is remarkably cheap—cheaper, it is alleged, than it has been for years; this is accounted for by the fact that a recent good harvest in Lower Bengal has caused very little exportation from Behar.
Purneah ...	*Nil*	Weather cloudy, with variable winds; the country is very dry, but the *rabi* crops on the low grounds near the Ganges and Koosi rivers are fair; in the north, where, however, *rabi* is not much grown, there has been a failure; only about a 3-anna or 4-anna crop will be gathered; prices inclined to fall.
Durbungah ...	*Nil*	Weather cloudy on the 29th February and 2nd instant; Tajpore sub-division—the early *rabi* sowings are being harvested; tobacco has nearly all been gathered. Madhoobunnee sub-division—no change in the prospects of crops; *rohur* is being cut; price of rice in Madhoobunnee bazar has slightly risen during the week; in Khijouli prices have slightly fallen; in other places they are stationary. Durbungah head-quarters—no particular change in the prospects of crops; importation is going on on a large scale.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Mozufferpore ...	Return not received.	The weather has been alternately bright and cloudy during the week; on the 4th instant it was clear and warm with strong west wind; the cutting of the *rabi* crops is progressing; prices remain easy.
Sarun ...	*Nil*	Weather cold and dry; sky clear, with fleeting clouds on Thursday and Friday mornings; west wind prevailing; no change in the state and prospects of the crops to report; the *rabi* crops are being harvested; a fair outturn is expected; indigo is being sown; opium is being collected; there were a few drops of rain on Wednesday night; prices favourable; general health is good.
Chumparun ...	Return not received.	There has been no rain as yet any where throughout the district, though the weather has been cloudy during the past week, and the clouds continue to increase; there will probably be a short *rabi* crop in the south-east of the district and no rain which now falls can do much to benefit the growing crops; in the north and west of the district, where the land has been irrigated, and the rainfall more copious than in the east, the prospects of the crops are excellent.
Patna ...	*Nil*	A few drops of rain have fallen in the last week, but not sufficient to lay the dust or to be measured; rain now would do more harm than good, as all the grain that has not been already collected in the threshing floors is being cut; a good deal of small-pox prevails throughout the district.
Gya ...	...	Weather very dry in the Sadr station, save a very slight shower for a few minutes one night; cloudy, and appearance of rain in the north and east; state and prospects of the crops are, as before, very fair, but short of good; poppy slightly impoverished in the north and west; public health is very good.
Shahabad ...	Return not received.	Weather clear and hot during the day; gram and wheat being gathered, a good crop; poppy promises to turn out a very good crop; small-pox has appeared in five or six villages in the Bhubooah sub-division.
Hazareebagh ...	·02	Weather still variable but seasonable; rain fallen, inappreciable; prospects of the crops remain unaltered; foot-and-mouth disease diminishing.
Lohardugga ...	...	A slight shower of rain accompanied by thunder and lightning; weather cooler since; the *rabi* crop has suffered in the Palamow sub-division, and in a part of the Sadr division also; a slight shower of rain fell on Thursday evening, but too slight to admit of registration; the general health of the district continues good; a few cases of small-pox and cholera reported from Palamow sub-division.
Maunbhoom ...	0·15	Weather seasonable; nothing fresh to report about the crops; there was a shower of rain and some heavy mists lately; more rain will be required before ploughing will commence.
Singbhoom ...	*Nil*	A shower of rain on the night of the 2nd instant, which has made the weather seasonable again; no crops to report about; no further reports of cholera.
Balasore ...	0·56	Throughout the week the sky has been clouded; rain has threatened almost daily without falling; the early ploughing is still delayed for want of rain; cholera and small-pox are still rather frequent and fatal; it is to be feared that cholera is increasing.
Cuttack ...	...	Weather is still dry and hot; a few drops of rain fell on Friday, but not enough to register; rain is now required for the early ploughing; winter crops all harvested; sugarcane, castor-seed, and cotton getting on well from artificial irrigation; public health is good.
Pooree ...	*Nil*	Weather dry and hot, except in the morning; cloudy at intervals; the *dalwa* paddy is generally progressing well, but in few places requires a shower of rain; the state of the other crops is generally good.
		General Remarks.—More or less rainfall is reported from almost all parts of Bengal except the Behar division. The rain has been beneficial to crops which are still on the ground, but it has slightly damaged the *rabi* and other crops which are being harvested. The rain has facilitated ploughing, and fields are being prepared for the cultivation of early rice.
N. W. Provinces—		
Benares (Mar. 6th)	...	Harvest prospects good.
Jhansi („ 9th)	...	No change.
Agra („ 8th)	...	Cloudy and threatening rain.
Meerut („ 8th)	*Nil*	Prospects unchanged.
Bareilly („ 8th)	*Nil*	*Rabi* crops looking very bad.
Almora („ 7th)	...	Weather showery, but very little rain.
Punjab—		
Delhi (Mar. 8th)	*Nil*	Crops average; health good.
Hissar „	*Nil*	*Rabi* prospects depressed owing to drought; health good.
Umballa „	*Nil*	Ditto ditto ditto.
Jullundur „	1·2	Harvest prospects fair; health good.
Lahore „	·4 on the 5th inst.	A good fall of rain yesterday; crops good; some small-pox in city, otherwise health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*		
Mooltan (Mar. 8th)	...	A drizzle; rain wanted; health good.
Dera Ismail Khan „	·3	Health and crops good.
Rawalpindi „	1·	Harvest prospects favourable; health good.
Peshâwar „	·7	Harvest prospects good; slight fever prevalent.
		General Remarks.—Rainfall past week very beneficial to crops, but rain badly wanted in southern districts. Health of province generally good.
Oudh—		
Lucknow (Mar. 8th)	*Nil*	Weather cloudy; agricultural prospects favourable and public health good.
Sitapur „	*Nil*	
Fyzabad „	*Nil*	
Central Provinces—		
Upper Godavari (Mar. 4th)	...	*Rabi* cutting; health good; prices fallen.
Sambalpur ...	...	Harvest over; health good.
Bilaspur ...	...	Prospects favourable; fever continues; prices steady.
Raipur ...	...	Prospects excellent; health good; prices easy.
Chánda (Mar. 5th)	...	*Rabi* doing well; fever prevalent.
Chhindwára ...	...	*Rabi* cutting; fever prevalent; prices steady.
Betul (Mar. 6th)	...	Hot; *rabi* good; reaping continues; health good; prices stationary.
Balaghât ...	...	*Rabi* cutting continues; small-pox prevalent; prices steady.
Bhandara (Mar. 7th)	...	Prospects continue favourable; fever prevalent; prices steady.
Nagpur („ 8th)	...	*Rabi* cutting; cattle disease continues; prices risen.
Wardha ...	...	*Rabi* cutting completed.
Nimár ...	...	Cattle disease continues; prices fallen.
Hoshangabad ...	...	*Rabi* promises fair; prices risen.
Narsinghpur ...	...	*Rabi* reaping continues; harvest promising well.
Jubbulpore ...	...	Clear and cool; rabi harvesting continues.
Saugor ...	...	*Rabi* reaping continues; prices risen.
Seoni ...	...	*Rabi* cutting continues; health good; prices rising.
Damoh ...	...	Prospects good; health good; prices stationary.
Mandla ...	...	Prospects continue good; prices fallen.
		General Remarks.—*Rabi* harvest good; reaping continues.
British Burma—	...	No report received.
Assam—		
Gauhati (Mar. 9th) ...	·99	Mornings clear and cool; rain-storms on nights of 3rd, 4th, and 5th; days warm; state of crops and tea is same as before.
Sylhet „	3·39	*Aus* cultivation progressing; cholera and small-pox prevalent.
Hyderabad Assigned Districts—		
Umraoti (Mar. 9th)	...	*Rabi* cutting continues; expected outturn good.
Mysore and Coorg— (Mar. 9th)	...	Prospects of season not improved; scarcity of water and fodder for cattle serious in parts, but prices stationary and markets generally well supplied; health generally good.
Rajputana—		
Jeypore (Mar. 9th)	...	Crops ripening hopefully; public health good.
Ajmere („)	*Nil*	Weather warmer and cloudy; winds; crops not affected; health generally good.
Bhurtpore („)	Slight rain on the 4th.	No change.
Central India—	...	Health and agricultural prospects continue good.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 29th February 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
His Highness the Mahárájá of Vizianagram, K.C.S.I.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.
The Hon'ble J. R. Bullen Smith, C.S.I.

CHUTIA NAGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR presented the Final Report of the Select Committee on the Bill to relieve from incumbrances certain estates in Chutia Nágpur. He said, the Council would remember that at the last meeting a particular point was referred back to the Select Committee, namely, the point relating to the determination of certain rules which were to be set forth by the local authorities on matters in accordance with the objects of the Act. The Committee had considered the question relating to the rules, and now proposed to make the point somewhat more definite and distinct than it was before. It proposed that the Manager should determine, not only the amount due of the debt, but also the interest due in respect thereof at the date of determination. Moreover, with a view to uniformity,—for there were other Acts of the same nature in other provinces of India,—the Committee proposed that the rules, instead of being made by the local authorities, should be made by the Local Government itself, and that the approval of these rules should be vested in the Government of India. It was considered that, inasmuch as these rules when framed would have the effect of law, the same authority which sanctioned the Act, should sanction also these rules. The Committee had also enumerated the principal subjects in regard to which rules were to be made, namely, security from subordinate officers, notices, procedure, precedence of debts and allowance of interest.

CRIMINAL TRIBES ACT EXTENSION BILL.

His Honour THE LIEUTENANT-GOVERNOR also presented the Report of the Select Committee on the Bill to extend the Criminal Tribes Act, 1871, to the Lower Provinces of Bengal.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA said that, with regard to the broad features of the Act which His Honour the Lieutenant-Governor asked for leave to extend to the Bengal Presidency, he had no objections to offer, and he fully agreed with His Honour that the criminal tribes of Bengal should be placed under the same sort of surveillance to which they were subjected in the North-Western Provinces. But he must draw His Excellency the President's attention to the wording of section 21 of the Act, requiring the owners or occupiers of the land on which any

persons belonging to a criminal tribe might reside, to give information to the nearest police-station of their stay and departure from their haunts. His Excellency was well aware that the zamíndárs of Bengal generally did not reside on their estates, which were often situated at a great distance from their dwelling-places, and they could not be expected to have any personal knowledge of the movements of these persons. The zamíndárs would be liable to be punished, under section 22 of the Act, on failing to give the information to the police officers. If this section were applied to the absentee zamíndárs of these provinces, it would be a measure outraging the principles of equity and justice, and would be liable to abuse in its operation. He must, therefore, ask His Excellency to expunge the words from the section, so far as it related to the zamíndárs, before the Act was extended to these provinces.

His Excellency THE PRESIDENT explained that the Hon'ble Member would have an opportunity of discussing that point at the next meeting of the Council, or whenever the motion for the consideration and passing of the Bill was made. At present there was no motion before the Council.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Report of the Select Committee on the Bill to provide Reformatory and Industrial Schools be taken into consideration. He said that at their last meeting he had mentioned one of the principal alterations which the Select Committee had made in the Bill. He referred to the removal of the section which formed section 8 of the original Bill, and which provided for the application of the Bill not only to juvenile offenders who had been convicted of specific offences, but to boys under the age of fourteen who were found to frequent the company of reputed robbers, house-breakers, thieves, public gamblers, or vagrants, or who were found to be without any ostensible means of livelihood. He had stated on that occasion that there was a strong feeling amongst the Native community against that particular section. He had mentioned also that the Bombay Government were opposed to it. With the permission of the Council, he would read a few lines from the report made by the Government of Bombay. It stated that—

"His Excellency in Council entertains considerable doubts whether this section can be worked without the risk of some injustice. Moreover, if the power is exercised without discrimination, accommodation could not be provided for the large number of children of vagrants, beggars and paupers who are to be found in all large Indian cities. If the section is maintained, Government considers that the age of admission should be limited to under eight years, inasmuch as, after leading a roving life up to fourteen, little impression will be made on a boy who is sent for only two or three years to a reformatory. But whatever may be the decision of the Government of India on this point, this Government is persuaded that the class alluded to in section 8 of the Act should not be sent to the same institutions as those to which juvenile offenders described in section 6 and juvenile prisoners described in section 7 are sent."

He had reason to believe that the feeling of the Native community against this particular section was in several parts of India very strong indeed. He was at the same time aware that there was a good deal to be said on the other side of the question. There could be no doubt that amongst the classes aimed at in that particular section, there might be many youthful criminals, if he might so speak, whose consignment to a reformatory would be most beneficial both to themselves and to society. The point was noticed with some force in one of the reports submitted by the Government of Bombay. One of the Commissioners of Police in that Presidency spoke of one of the classes to which SIR ALEXANDER ARBUTHNOT referred in these terms:—

"A Batak child takes to theft by instinct, just as a pointer puppy points. There is an hereditary transmission of a predatory instinct in all these tribes that is only to be eradicated by many years of careful training, and finally placing them in a position to earn an honest livelihood on easy terms. The only chance of reclaiming them is to take them in hand while they are still mere infants, and retaining them till habits of self-respect are matured."

There was no doubt a good deal of force in the opinions given on that side of the question. But it was equally certain that there was a very strong popular feeling against it. It might be said that the popular feeling to which he had referred, was a feeling very much in the nature of a sentiment; but it was

a sentiment which it would be unwise to overlook, and there was nothing more difficult to overcome than a sentiment of this nature. It defied criticism and was impervious to argument. The right course, it appeared to him and to his colleagues in the Select Committee, was in this matter to proceed tentatively, and to postpone legislation on this point until, as he had said the other day, it was shown by the test of experience that the particular measure provided for in the amended Bill was attended with really practical and beneficial results. It was essential that in such legislation we should as far as possible carry the opinion of the people with us. This, as he had said, was one of the main alterations which the Select Committee had made in the Bill.

Two other alterations which might be said to be closely connected with the one he had just alluded to, were the excision of the section which enabled municipalities to establish or contribute to the cost of reformatories, and the removal of the provision which enabled the Government to charge the cost, or a portion of the cost of these institutions, to the parents of the children who might be confined in them. This latter point was very closely connected with the removal of section 8 of the original Bill. For he need hardly say that it would scarcely be equitable that in the case of convicted juvenile offenders their relatives should be charged for their maintenance. There would be no more justification for such a charge than there would be for similarly charging the maintenance of the adult criminals in our jails.

In regard to the question of municipalities being saddled with these charges, although the section as it stood was merely an enabling section, he gathered from the reports which had been received by the Select Committee that very strong objections were entertained on the point. It was felt that our municipalities had, as it was, plenty to do with all the resources available to them, whether it were in our capitals or our country towns. Every anna they could collect without oppression and without imposing undue burdens upon the people was wanted for matters more intimately connected with municipal administration than the maintenance of reformatories could be said to be. And it might not be unfairly urged that there was no more reason for charging municipalities with the cost of juvenile reformatories than there was for charging them with the cost of the maintenance of jails or of the Courts for the administration of justice.

Another alteration which the Select Committee had made in the Bill, was raising the age at which juvenile offenders could be sent to reformatories from fourteen to sixteen, and raising the age to which they could be detained in reformatories from sixteen to eighteen. On the latter point, he thought there was a very general consent. It was felt that the age of sixteen was too low a maximum, and that in order that the operation of the system might be really beneficial, it was necessary that it should be in the power of the authorities to detain boys in reformatories up to the age of eighteen. In regard to the maximum age for admission, the Select Committee had thought it wise to follow the provisions of the Code of Criminal Procedure on this point as they now stood. In section 318 of that Code, the age of sixteen was laid down as the limit of age up to which juvenile offenders could be sent to reformatories.

Another alteration of some importance was contained in section 7 of the amended Bill, which corresponded with section 6 of the original Bill. In section 6, it was provided that whenever any boy, who in the judgment of the Court before which he was charged was under the age of fourteen years, was convicted of an offence punishable under the Indian Penal Code with transportation or imprisonment, the Court might, in lieu of sentencing him to transportation or imprisonment, direct him to be sent to a reformatory school. It was now provided that the Court should be obliged to pass sentence, and that when, having passed sentence either of transportation or imprisonment, the Court considered that the offender was under the age of sixteen and was a proper person to be an inmate of a reformatory school, it might direct that, instead of undergoing the sentence, he should be sent to a reformatory school and be there detained for a period which should not be less than two years and not more than seven years, subject to certain rules subsequently provided for. In a succeeding section, the maximum limit of the period of detention was fixed at eighteen years. There was also a provision made

in one of the succeeding sections which enabled the Government at any time to order the discharge of a youthful offender from a reformatory school, and to order him to undergo the residue of his sentence at such place as the Local Government thought fit. The Committee considered that these were improvements on the provisions of the original Bill, inasmuch as, under the original Bill, no sentence would have been passed, and the youth who was sent to a reformatory, however undesirable it might be to retain him in the reformatory, would have to be kept there, or at once set free. It was of course possible, in fact probable, that there would be cases, however much care might be taken in commuting the original sentence, in which it would be found that the detention of a youth in a reformatory would be beneficial neither to himself nor to those who were associated with him.

There was an important provision which had been added by the Select Committee in section 22 of the amended Bill. It laid down that the Governor General in Council might from time to time make rules for regulating the periods for which Courts and Magistrates might send youthful offenders to reformatory schools according to their ages, the nature of their respective offences, or other considerations. This was a point which had engaged the attention of the Select Committee, and their feeling was that in carrying out the provisions of legislation of this description which, both to the Courts as well as to the general community, would be sometimes of course somewhat of a novel character, it would be very desirable that the Courts and Magistrates should have the advantage of that guidance which might be supplied to them by the Government, acting on the reports and advice of the executive officers who would be employed in administering and controlling these institutions. These officers would probably be in a far better position to judge of the actual working of such institutions than the Courts could be, and would be able to offer suggestions to the Government which, when embodied in the rules, would be of invaluable assistance for the guidance of judicial officers in the working of the Act. He thought he had now noticed all the principal alterations made in the Bill by the Select Committee.

There were a few verbal alterations which probably would not escape the notice of hon'ble Members, but with which he need not now detain them. It only remained for him to make the motion which stood in his name that the Report of the Select Committee be taken into consideration, and to express his hope that this measure, if it received the approval of the Council and became law, would be a valuable means of draining the jails of juvenile offenders who were brought up in crime, and who so largely contributed to the increase of the criminal population of this country. Much had been done of late years for the improvement of our jails and the general system of jail management; much money had been spent upon these institutions; and much care had been bestowed upon them. Great efforts had been made to render the jails reformatories, as well as places of punishment, for adults; and what had been done in this direction appeared to make it all the more obvious that it was the duty of this Council no longer to defer carrying into effect those measures which the experience of other countries proved to be best adapted for the reclamation of the young.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA said that the Bill as it now stood would prove beneficial to juvenile offenders who might be sentenced to various periods of long imprisonment. It would allow these criminals to be transferred to a reformatory where they would receive an industrial education which might be of use to them in life. He might inform His Excellency the President that in Bengal youthful criminals as a class, as far as he (RÁJÁ NÁRENDRA KRISHNA) was aware, did not exist; and if the legislature had passed a law to punish and reform every youth below the age of eighteen on the report of a police officer that he had no means of honest livelihood and kept the company of bad characters, and directed that he must be confined in a reformatory school and there learn some handicraft in the course of a few years, the Government would create a class of men who, after release, would be regarded with distrust in this country. The reformatory section of the jail should be kept separate from the rest in which old offenders were confined, as

it was always desirable that juveniles should be completely dissociated from veteran offenders.

He was glad to bring to His Excellency's notice the careful attention which the Hon'ble Mover had paid to his suggestions. But for that and the powerful support accorded to him by the Hon'ble Mr. Hobhouse, the Bill would not have received its present mild and unobjectionable form. He therefore begged to request that the Bill be passed into law.

The Motion was put and agreed to.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved that the Bill as amended be passed.

His Excellency THE PRESIDENT said:—"I wish to say, before this Bill passes, that, for my own part, I consider it to be a very important amendment in our penal laws. As the Hon'ble Mover of the Bill has informed the Council, in many countries great attention has been paid to the improvement of jails, not only with the object of making them places of punishment, in which the sentences given may deter offenders from repeating their crimes, and, by their example, deter others from committing similar crimes, but also, with the desire of introducing, as far as possible, a reforming element into prison discipline. I believe, however, that in this latter respect the result of experience has not been encouraging with regard to the reformation of adult offenders, however admirably prison discipline may have been carried out. Men who, by a gradual course of crime, becoming worse and worse as years go on, constitute the criminal classes in great towns, are, I fear, seldom influenced for the better by prison discipline.

"The only measures which, so far as I am aware, have been really successful in reforming offenders, are those which have been carried out in France, in England, and possibly also in other countries, for the reformation of juvenile offenders.

"It has been found that if a boy, on his first offence, instead of being treated as an ordinary criminal and sent for three months or less to an ordinary jail and there subjected to the prison discipline applied to common offenders, is sentenced for a much longer period—say from three to five years—and sent to a reformatory institution where he is kept under restraint and taught some industrial occupation or trade, he under those influences, and by the operation of the ordinary laws of human nature, is usually discharged from the reformatory with a fair prospect of giving up his evil courses; he takes up the industrial occupation he has learnt in the reformatory, and becomes a useful member of society.

"I believe that the results of the reformatory institutions in England have been, that out of every hundred boys sent to them, no less than eighty have, by experience, been found to have been thus reclaimed.

"It seemed to the Government that a measure so hopeful as this, might with perfect propriety be applied to India; and the result of our consideration of the subject was the introduction of the Bill which is now about to be passed.

"We are much obliged to the Select Committee and to the Hon'ble Mover of the Bill for the pains they have taken with it, and also to Rájá Nárendra Krishna, who has served on the Committee, for his suggestions. The Committee have limited, in the first instance, the operation of the Bill to juvenile offenders, leaving it for future consideration whether it shall be extended to boys who have no ostensible means of livelihood, and who associate with bad characters, but have not actually committed offences against the law. I believe that this modification of the Bill is wise; but, at the same time, I hope that the operation of reformatory institutions will be so successful that, at some future time, the legislature may be able to extend the provisions of this Act to the other class to which it has been applied in England. There are, of course difficulties in India, with respect to this measure, which do not exist in England; but I feel satisfied that by the co-operation of the enlightened members of society, both European and Native,—for it is essential that Natives of India of different religious persuasions shall be associated with the management of

these institutions,—this measure will be successful, and that the results will show that the same principles which are applicable to juvenile offenders in England and in other countries, are equally applicable to juvenile offenders in India.

"To me, in visiting, as I have done, the jails of Calcutta, it was painful to see boys of a very tender age confined in those prisons. I have seen in one of these jails young boys wearing narrow iron bracelets. These iron bracelets were, if I may so say, ornamented by a number of small pieces of iron, like keys, running along the bracelet, each small piece being the token of a separate conviction for an offence. There was certainly one boy that I saw, who could not have been more than twelve or thirteen years of age, and who had five separate convictions so denoted by the little pieces of iron running along the iron bracelet on his wrist. I was grieved to feel that if these boys had been, on their first offence, sent to a reformatory institution, they would, in all probability, have been saved from the life of crime to which, I fear, they are doomed under present circumstances.

"I would say one word more on the subject of this measure, and that is, that a great responsibility will rest upon Magistrates and the Local Governments in carrying the Act into operation. It is, I think, hopeless to expect the Act to work properly if these reformatory institutions are started by filling them with a class of boys who have already four or five separate convictions against them, that is to say, who are confirmed thieves and bad characters, and whom, if put into a reformatory institution, there would be little hope of reclaiming. The manner in which I trust the Act will be carried into effect is, that great care will be taken in the selection of boys for those institutions, and that, for the next part, boys should be put in them on their first offence, so that the salutary influences of industrial education may be applied to those who offer the best prospect of being permanently benefited."

His Honour THE LIEUTENANT-GOVERNOR was anxious to make one remark, and it was this, that he for one, and those who thought with him, very cordially supported the measure as far as it went, and they hoped that the Bill, if passed, would immediately bear fruit, and be of utility, by the immediate establishment of a reformatory in Calcutta. But he should not like the Council to be under the impression that he concurred in the Bill in its limited shape. It was now confined to those juveniles who had actually committed offences. He was anxious to inform the Council that the Bill would not be sufficient for the reformation of these classes, who were growing up into crime; and he thought it much to be regretted that his Hon'ble friend Rájá Nárendra Krishna, had succeeded in carrying that amendment in Select Committee, as it deprived the Bill of at least half its usefulness. He was anxious to impress on the Council that there were hundreds, and indeed thousands, of persons of tender age who were growing up in this capital in a state which infallibly led to crime. Their becoming criminals was only a question of time, and it was a question, not of uncertainty, but one of unfortunate certainty; for confirmation of that opinion he confidently appealed to the knowledge of every Member round the table. Therefore, he was at a loss to understand on what principle the Select Committee had so far yielded to what he considered the mistaken opinion of his Hon'ble friend. His HONOUR supposed the Hon'ble Member thought it was dangerous to place such power in the hands of the Police, who might be empowered to lay hold of a boy who, in their opinion, was a criminal in the initiatory stage. He begged to point out, in answer to that objection, that nothing would be easier than to bring a boy before a Magistrate, and nothing was easier than for the Magistrate to come to a determination whether a boy had any ostensible means of livelihood, and whether he was, or was not, forming habits, and growing up in associations, which would lead to crime. In this country, he appealed to the knowledge of every Member of the Council who had experience in the working of the criminal law, bad livelihood was an offence known to the criminal law. There was not an adult who might not be brought up on a charge of bad livelihood, and the working of the bad livelihood law with strictness, judgment and consideration was about the most important matter for the protection of society in the whole

range of the criminal law. He ventured to affirm that there was no matter of such consequence to the interests of the country as the restraint of bad characters. There was no part of India which so much needed it as Bengal proper. There was in no province more bad characters who were at large, or more at liberty to pursue their evil courses, than in Bengal. If that was so in the case of adults, he wanted to know on what reasonable principle could a distinction be made in reference to juveniles. If it was easy to prove before a Magistrate that an adult had grown up as a bad character, then what possible difficulty could there be with reference to juveniles? He deemed it necessary that there should be no mistake, and therefore he wished to say that he, and those who agreed with him, considered that the omission made by the Select Committee was most unfortunate, and that it deprived the measure of half its usefulness. He would have moved a substantive amendment, but, he understood, it was doubtful whether it would be supported after such a restriction had been accepted by the Select Committee; and therefore he must perforce content himself with accepting the Bill in its mutilated shape. As far as it went, he agreed with all that had fallen from the Hon'ble mover of the Bill, and he concurred in his anticipations. And he only hoped that, if the present scheme were found insufficient, there would be no hesitation at some future time to extend the measure to those juvenile persons who, although not actually convicted of any crime, were growing up in criminal courses. If he thought there was any chance of the matter being further considered, he would have moved an amendment. He believed it to be of the highest importance, when a Bill was framed on the point now before the Council, namely, the reformation of criminal youth, that it should contain a provision of the kind to which he had referred.

The Hon'ble MR. HOBHOUSE said that as His Honour the Lieutenant-Governor had referred to the decision of the Select Committee in terms of dissent, he thought it right—having been one of that Committee who decided to take the prudent and cautious course, which generally led to the success of a new experiment—to say that, whatever opinions there might have been to the contrary, the great body of the local opinions which had been received was most decidedly against any attempt to extend the measure to boys who were not convicted of any offence. He would read to the Council a report which was received from the general Committee of the Justices of the Peace for Calcutta on this Bill, which was only a specimen of the opinion prevailing on the subject. They said:—

"We are of opinion, having regard to the condition of this country, the almost impossibility of European Magistrates understanding the social customs of the lower classes, and, above all, the great difficulty in securing trustworthy evidence, that to pass an enactment enabling a Magistrate to arrest a boy under fourteen years of age, not charged with any offence, and order his confinement in a reformatory for a period varying from two to seven years would be a most arbitrary and unjust proceeding. In this country, children are seldom left in the deserted state which is too often the case in England. Here the ties of relationship are held to be sacred, and any orphan left by its parents in a state of destitution would, as a rule, be pretty certain to be adopted by some near relative.

Surely, for a Magistrate to step in between a child and its parent, guardian or natural protector, and to declare that the child shall be confined in a reformatory jail, and there maintained and educated under the orders of Government for a period varying from two to seven years, is a proposition which cannot be justified by any philanthrophic arguments. It may be that, in some exceptional cases, such a course might be for the benefit of the child; but we are unanimously of opinion that a Native child confined with a number of other declared vicious companions would, in all probability, learn far more vice than if left with its natural guardians. Of moral training it could get but little from the class of persons likely to be placed in charge of such reformatories; besides, to separate morality from the dogmas of religion is not possible, and the question of moral training is therefore surrounded with difficulties which it would be most embarrassing for the Government to deal with.

For these reasons we strongly object to the provisions of section 8, whereby a Magistrate may order a boy, convicted of no offence against the law of the land, to be detained in confinement for a period of not less than two years, and not more than seven years; and we consider that the proposed section will do more harm than good; and, moreover, that any such arbitrary attempt to interfere with the education and training of the Native children of this country would be misunderstood and misinterpreted throughout the land, and might produce serious consequences. We hold, then, that the proposal is wrong in principle, impracticable in working, and, as applied to this country, fraught with political danger."

The Committee had received many arguments of the same kind from different parts of the country. He did not now go into the question whether their arguments were sound or unsound; whether they might or might not be countervailed by other arguments such as those used by the Lieutenant-Governor; or whether, when people had actual experience in the working of reformatories in the case of convicted offenders, they would not look with a more favourable eye upon a Bill which dealt with the case of young persons likely to become offenders. They had here a body of people representing the very class of persons who would have to administer the law, telling them that, in their opinion, the enactment would be utterly opposed to the notions of Indian Society; and he thought it would be inexpedient to pass the law as originally proposed in the face of that opinion. And he might mention that Native opinion was absolutely unanimous in the same direction. Therefore, though he did not profess to know enough of Indian Society to say whether that opinion was right or wrong, what he did say was that, in passing a measure necessarily so tentative, so experimental as this, to begin prudently, to deal first with those subjects in which we could see our way clearest, and in which our action would excite least opposition, was the course best calculated to ensure success instead of failure for the movement.

The Hon'ble MR. HOPE did not think he ought to allow the occasion to pass without correcting an impression which had been conveyed, perhaps unintentionally, by the remarks which fell from the Hon'ble Rájá Nárendra Krishna, that the important change made in the Bill since it was introduced had been made in consequence of the support of certain members of the Committee, of whom MR. HOPE was not one. He had only to say for himself that this change met with his concurrence, and, in agreeing to it, he was influenced by the general representations which had been received from various parts of the country from local officers, and not, as far as he was aware, by any representations made in Committee. There could be no doubt that, as urged by His Honour the Lieutenant-Governor, this alteration did rob the Bill of a large portion of the advantages which, it had been hoped, would result from it. But, at the same time, it appeared to him that the practical difficulties brought to their notice by local officers in different parts of the country were so serious, that they placed beyond their reach the advantage which, more than any other, he would have desired had it been possible to attain it.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA observed that he was of opinion that the Hon'ble Mr. Hobhouse objected to the Bill being passed in its original form.

The Hon'ble SIR ALEXANDER ARBUTHNOT said that, with reference to the remarks which had fallen from His Honour the Lieutenant-Governor, he had very little to add to the reply given by his Hon'ble friend Mr. Hobhouse. As he had said in his opening observations, he believed that there was a great deal of force in the arguments which might be adduced by those who thought with the Lieutenant-Governor on this subject. He himself fully admitted that if the measure could have been enacted, and could have been satisfactorily worked with the general consent of the people —with the general consent of the leaders of Native opinion—it would have rendered the Bill a very much more beneficial measure than it was now likely to be. But he held, as he said before, that this was a description of legislation in which it was eminently the duty and the policy of the Government to proceed with care and with caution, and, so far as was possible, not to go in advance of that which might be required as a fair representation of popular opinion. Now in this matter he was not prepared to say that, if they could take the opinion of the Native community in general, they should find them in favour even of the more modified form of legislation which the Committee recommended this Council to adopt. He gathered that at present there was, if not a positive antagonism, a considerable indifference, and a certain amount of opposition, to the establishment of reformatories for the reclamation of juvenile offenders of any class. There was, he believed, a very general feeling that, even in the case of convicted offenders, the powers which this Bill would give to

the judicial authorities of largely enhancing the periods for which juvenile offenders might be detained in reformatories, were open to question. Therefore, he thought it was of the greatest importance that, while they followed the principle of legislation which had been adopted, though in an imperfect form, some fifteen years ago by the framers of the Code of Criminal Procedure—while they supplemented that measure in such a way as to render it of real utility in regard to the persons at which it aimed—they should for the present go no further. He thought that the fact that the framers of the Code of Criminal Procedure, who he had no doubt had carefully considered this as well as the other provisions of that Code, did not consider it expedient to include any provision in the enactment of 1861 as to unconvicted offenders, was deserving of their serious consideration, and that they, at this time, ought not to decide to go further. The Lieutenant-Governor had said that the question of persons of the particular class to which he referred falling into crime was merely a question of time. These words, "a question of time," reminded SIR ALEXANDER ARBUTHNOT that in this matter the question of time was one of the essential points. As His Excellency had remarked, they should look forward to the time, and he hoped not a very distant time, when they should be able to carry this legislation further in the direction desired by the Lieutenant-Governor. But he felt persuaded that at the present time it would greatly enhance the unpopularity of the measure, and probably, as his friend Mr. Hobhouse had observed, it would go far to render it inefficacious. He therefore thought the Council would do well to adhere to the Bill in its present limited form, and to pass it in that form.

His Highness THE MAHÁRÁJÁ OF VIZIANAGRAM apprehended there could be no question as to the expediency of the main object proposed by the Bill, namely, the separation of youthful criminals from the evil influences of jails and the training of them to some honest industry. How, having regard to the circumstances of the country, that object might be best attained was another matter, and one in which a perusal of the papers sent round with a copy of the Bill showed that a very considerable diversity of opinion existed. As the measure was confessedly in great part an experimental measure, and approving as he did of the object of the Bill, and seeing that the mode of carrying out that object was the result of a very careful consideration of the opinions of all those whose opinions were of most weight in this matter, he begged to give his vote in favour of the passing of the Bill. If after coming into operation, it were found that the object of the Bill was not well attained by the procedure therein prescribed, he presumed there would be no difficulty in making the necessary change.

There was one point to which he would allude as desirable in his humble opinion, and that was that the education to be given in these reformatory schools should be chiefly in the direction of teaching some handicraft or useful manual industry, rather than mere book-learning. The Bill left these matters to be dealt with by rules to be framed at the discretion of the Board of Management with the sanction of the Local Government. HIS HIGHNESS would suggest whether it would not be well to direct by the Bill the course it was desired that the education provided in these schools should take.

The Hon'ble SIR ALEXANDER ARBUTHNOT observed, with reference to the concluding remarks of His Highness the Mahárájá of Vizianagram, that the industrial training of youthful offenders was provided for in the twenty-first section of the Bill, and there could be no doubt that, by the rules sanctioned by the Local Government, adequate provision would be made for that which was one of the main objects of the Bill, namely, the industrial training of juvenile offenders. It was also distinctly provided for in the fifth section.

The Motion was then put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY moved for leave to introduce a Bill to provide for the management of the Public Museum at Calcutta. He said that it was but ten years since a Bill with a very analogous title, namely, a Bill to provide

for the establishment of a Public Museum in Calcutta, had been introduced in Council, and became law as Act XVII of 1866. The object of that measure was to give effect to an arrangement entered into between the Government of India and the Asiatic Society of Bengal, by which the Asiatic Society gave their valuable collection to form the nucleus of a public museum. It was one condition—he might say the main condition—of this surrender, that a building should be erected to contain their collection and others which from time to time might be incorporated with it. Another provision was that in the same building accommodation should be provided for the Asiatic Society themselves. Measures had been taken to give effect to those conditions, and a building had been erected which was now approaching completion. But it had been found that the accommodation actually provided was not sufficient to give to the Asiatic Society the room that they required without unduly cramping the space required for the exhibition of the collection which had now been accumulated; for, although, as provided by the Act, plans for the building were submitted to, and approved by, the Council of the Asiatic Society, yet the delay which had unavoidably occurred in the construction of the building, and the unexpected growth of the collection, had caused larger demands than had been expected for the reception of the latter. The Government had appointed a Committee to consider how the difficulty could best be remedied, and they recommended that an offer should be made to the Asiatic Society of a sum of Rs. 1,50,000 for surrendering the accommodation to which they were, as above explained by law, entitled. The Council of the Asiatic Society having been consulted, signified their acceptance of this offer. And the object of the Bill he asked leave to introduce was to provide legally for the new arrangement and to cancel the provision which Act XVII of 1866 contained for securing this accommodation in the Museum building to the Asiatic Society. It might have been thought that a simple repeal of certain sections of Act XVII of 1866, notably the twelfth section, would have sufficed to effect this object. But it had been found that many of the minor provisions of the Bill had been framed in reference to that condition, and that it was also desirable to introduce certain minor amendments which the working of the Act had shown to be necessary during the ten years it had been in operation. It was therefore proposed to repeal Act XVII of 1866, and to re-enact it with the omission of the provision to which he had alluded for securing accommodation to the Asiatic Society in the Imperial Museum, and with certain minor amendments, which, as he had said, experience had shown to be necessary. If he got leave to bring in the Bill, he hoped to introduce it at the next meeting of the Council, and then to explain what particular amendments were proposed.

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 14th March 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th MARCH 1876.

General Remarks.—In Madras rain has fallen in Malabar, Madura and Tanjore: none elsewhere: no change in prospects is reported. In Bombay some rain is reported from Sind, half an inch at Kaira, and storms in Belgaum and Dharwar; the *rabi* harvest in Guzerat and the Deccan progresses. There has been slight rain in a few districts of the Central Provinces below the Satpuras; the harvest proceeds with a good outturn. In Berar the *rabi* is being reaped. Reports from Central India and Rajputana are good. In Eastern and Central Bengal (with the exception of the Northern districts) there has been a good deal of rain, which has helped the ploughings for the early rice, jute and sugarcane; in Behar there have been showers, and some heavier falls in Chota Nagpore: but here the crops are too far advanced to be improved by rain, and it is likely to do more harm than good. There has been general rain in the North-Western Provinces and Oudh, which has done good: hail did some damage in Jhánsí. In the Punjab there has also been general rain, which has improved the prospects of the *rabi*. There has been rain in Sylhet, but none in Upper Assam, where it is much wanted.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Mar. 16th)	*Nil*	Standing crops good; markets well supplied locally; cholera, 80 seizures, 18 deaths; fever in 6 and small-pox in 4 taluks; mild epizoötic aphtha general; dry fodder being used.
Kurnool	(„ 15th)	*Nil*	Season generally good; cotton being harvested; second crop paddy thriving; other crops nearly harvested; pasture and water sufficient; markets well supplied; price of rice rising, other articles steady; cholera in Pattikonda and Koilkuntla taluks; fever prevalent; cattle disease in 3 taluks.
Tanjore	(„ 16th)	·05 At Negapatam.	Rain elsewhere very scanty and partial; rivers almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops in places; standing crops withering in several localities; harvest wet and some dry crops; yield moderate; markets well supplied; prices steady; cholera abated, 120 seizures, 89 deaths; small-pox in parts of Negapatam; cattle disease in places, some loss; pasture insufficient.
Madura	(„ 16th)	1·0	Agricultural prospects not good; public health generally good; small-pox and cholera continuing to small extent.
Malabar	(„ 16th)	1·65	Markets well supplied; prices steady; bowel complaints in 7 taluks, 377 seizures, 332 deaths; small-pox prevalent, especially in North Malabar; cattle disease in Wynaad and Walluvanad; pasture withered.
			General Remarks.—General prospects of these districts same as last week, except in Tanjore, Madura and Malabar, where there has been some rain.
Bombay—	**(Mar. 16th)**		
Sind.	(March 15th)		
Kurrachee	...	...	Squall with rain on 15th; westerly breeze has set in; a considerable extent of low land in Kotri taluka is being eroded by river; cattle disease prevalent, also a little fever; river at Kotri, gauge on 4th, 5 feet 4 inches, against 3 feet 10½ inches on the same date last year; *moong* and *adhaon* crops coming on.
Shikarpur	...	...	Weather cloudy, warmer, and threatening rain, but no damage reported to *rabi*.
Hyderabad	...	...	Weather cloudy and sultry; rain-fall general, more expected; reaping of *rabi* progressing; crops slightly injured by wet and blight.
Upper Sind Frontier	...	...	Weather cloudy and warm; oil seed crops being reaped; other *rabi* crops fair.
Guzerat.			
Ahmedabad	...	...	Cholera continues in Viramgám; *rabi* harvest almost completed.
Kaira	...	0·6	*Rabi* crops almost reaped.
Surat	...	...	10 cholera cases in Surat, 8 fatal; 12 in Mándvi, 4 fatal; 13 at Bárdoli, 3 fatal.
Broach	...	...	Public health and crops good.
Khandesh and Nasik.			
Khandesh	...	...	Weather hot; fever and cough prevailing.
Nasik	...	...	Reaping of *rabi* progressing.
Konkan.			
Tanna	...	...	Reaping of *rabi* progressing; prospects fair; small-pox still prevails in town of Tanna.
Deccan.			
Poona	...	...	No change.
Sholapur	...	...	
Satara	...	...	
Ahmednagar	...	...	Harvesting of *rabi* nearly finished.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	1·99	Thunder-storm; cholera in 3 talukas.
Dharwar ...	0·36	Cholera increasing; fever less prevalent; crops and cattle disease as before.
Kanara ...	...	State of crops and public health the same as before.
Kaladgi ...	...	20 deaths from cholera in Bágalkot taluka.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Health generally good; 214 cholera cases in Morvi taluka, 90 deaths; cholera has appeared in villages under Dhráfa.
Wadhwán ...	...	Cotton ginning continues; weather warm; cholera in Dhrángadrá taluka, 7 cases, 4 fatal; 3 cases in Wadhwán taluka, 2 fatal; 2 in Chura taluka; 4 cases in Kuntharia, 2 fatal; in Dasára 1 case fatal; 6 cases in Chotila, 2 fatal.
Baroda ...	...	Hot weather has set in. *General remarks.*—Rain in Sind pretty general; heavy storm in Belgaum; *rabi* harvest almost completed in Guzerat and part of the Deccan; cholera prevalent in Kattywar, Ahmedabad, Surat and Southern Mahratta Country.
Bengal—(Mar. 16th)		
Chittagong ...	·01	Weather cold in the evenings and mornings, but hot in the daytime; crops much benefited by the rain, which has also enabled the people to begin ploughing the land.
Noakhally ...	4·04	Weather generally cloudy; slight rain on the 2nd and 5th, and a thunder-storm, with a heavy shower of rain, early on the 7th; wind is variable; for the last two days wind was from the south; pulses, chillies, linseed and *sessamum* are progressing favourably; ploughing has begun for the early rice crop; stray cases of cholera still reported from Hattya and Bamni.
Chittagong Hill Tracts...	1·4	A thunder-storm on the 7th instant; *joom* cutting still continues; a heavy shower of rain has done much good to the tobacco and chillies.
Hill Tipperah ...	1·18	Weather cloudy and unsettled; no change in the state and prospects of the crops since the last report.
Backergunge ...	1·44	Rain has fallen, which has greatly improved matters; the condition of crops and cattle is good; the health of the people is said to be indifferent in the following thanas, *viz.*, Backergunge, Mendigunge, Bawfol, Golachipa and Boramuddin.
Furreedpore ...	0·98	Weather showery; the state and prospects of the crops are good; they are benefited by the rain; three men killed by lightning; general health is good.
Dacca ...	0·15	Weather cool for the season; much fog; state and prospects of the crops are favourable; ploughing is going on actively.
Mymensing ...	0·15	Weather decidedly warmer; stormy on the 10th; scarcely any crops on the ground; the fields are being prepared for the *aous* rice.
Tipperah ...	·52	Weather fine, with occasional storms; the prospects of the spring rice are good; there are no other crops of importance in the field.
24-Pergunnahs ...	0·95	Weather variable; there was a shower on the 7th March 1876; reaping of winter crops is over; health is generally good.
Jessore ...	·36	Weather tolerably cool, with seasonable showers; spring rice seedlings are doing well; the rain has been favourable, and ploughing for, and sowing of, the early rice is in rapid progress.
Nuddea ...	0·10	Weather cooler in consequence of the rain; the rain has done much good in enabling the cultivators to plough; the harvest is far advanced, and is turning out, as was expected, rather poor.
Moorshedabad ...	*Nil*	Mornings windy and cloudy; temperature close and warm; *boro dhan* is doing well; cold weather crops are being reaped; cholera increasing at Rampore Haut, and many deaths reported.
Pubna ...	·20 at Serajganj.	Weather warm and cloudy; the state and prospects of the crops have been improved by the late rain, which has also facilitated ploughing for the next rice crops.
Rajshahye ...	...	There was rain at Bilmariah and Shingrah on the 2nd and 3rd March, which has done some good where it fell, but it was not sufficient; a few isolated cases of cholera are reported; also a few cases of small-pox.
Bogra ...	*Nil*	Weather cloudy and threatening but, with the exception of one day, warm; almost all the crops have been harvested; a little rain is required to allow the lands to be broken up.
Maldah ...	*Nil*	Days hot, mornings and evenings still cool; high wind on Friday; *rabi* crops being reaped; the outturn has been reduced by the continued drought; the *boro dhan* looks well, and promises to yield a good crop; indigo is being sown in Thana Gorgoriba; 2 deaths from cholera and 2 from small-pox have occurred during the week; 4 attacks of cholera are reported as having occurred during the same period.
Dinagepore ...	*Nil*	Weather cloudy and getting warm; *rabi* crops on the whole are good; tobacco is a 16-anna crop; sugarcane 8 to 10 annas, and mustard 8 annas.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.* (Mar. 16th)		
Rungpore ...	·02	Rain threatening; *rabi* crops fair, but the crops will not be first rate for want of rain; sowing of *bitri* paddy deferred for want of rain; tobacco doing well; pulses and wheat are partially damaged by present drought.
Cooch Behar ...	*Nil*	The cold weather has disappeared; during the greater portion of the week an east wind blew; there was no rain; the *bitri (aous) dhan* has been sown in many places for this crop as also for *cheena* and *kaon* (millet); rain is very much wanted; the mustard crop has been nearly reaped, the outturn is satisfactory; tobacco will be cut within a few days.
Jalpaiguri ...	·04	A little rain fell on Thursday night, but not enough to have any appreciable effect; the weather is getting warmer and clouds hang about, so it is to be hoped more rain is coming soon; nothing new to report as to crops.
Darjeeling ...	0·20	Weather is still continuing cold; there has been a good deal of wind, with occasional showers of rain during the week; the sowings in the plains and the young crops of wheat and barley in the hills are progressing favourably; the recent rain will do much good.
Midnapore ...	1·19	Weather is getting very warm and is cloudy; rainhas been of much service to what crops there are.
Howrah ...	...	There were a few drops of rain, but the fall was inappreciable; there is no change in the prospects of the crops.
Hooghly ...	·40	Weather is getting warm and is cloudy at intervals; sugarcane cuttings are still being planted out; *aous*, *teel*, and indigo lands are being prepared for sowing; cucumbers, &c., much benefited by rain; potatoe, *rabi*, and sugarcane harvest almost over; the yield of the first two is very good, and that of the third is fair.
Burdwan ...	·54 at Sadr ·52 at Culna.	Wheat, barley and sugarcane are being cut; potatoes selling at 60 seers the rupee in Culna. Cholera increasing in the west of the district.
Bankoorah ...	0·79	Slight rain on the 10th; some heavy showers with hail on the 11th; nothing of importance to note regarding the crops; the rain will allow of preliminary ploughings; cholera cases are still reported.
Beerbhoom ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops; rain is wanted.
Senthal Pergunnahs ...	...	A few drops on Saturday night, with thunder; rain threatening but not coming down; mangoe and *mowha* crops promise well; nothing else on the ground.
Bhagalpur ...	...	Three smart showers north of Soopool on the night of 9th; a few drops at head-quarters on the night of 11th; no rain is reported elsewhere; no rain is wanted now till after the *rabi* harvest; rain would do more harm than good; wheat harvest ripening fast, and reaping commenced in several places; the Collector, who is still in the Soopool sub-division, reports *rabi* crop to be fair, and condition of the people generally very good, the very poor naturally badly off; no tendency to a rise in prices.
Monghyr ...	...	Weather fair; no change in the state and prospect of the crops since last report; the harvest has fairly commenced, and prices continue easy.
Purneah ...	·06 at Kishengunge.	Weather very cloudy; there were a few drops of rain here; the state and prospects of the crops are the same as last week; there is no change.
Durbhunga ...	·1	Weather cloudy, with east wind; the week's rainfall was heavier to the east than at the Sadr station; the state of the crops is reported the same as during the previous week.
Mozufferpore ...	·15	Weather cloudy and rather cold; there is no alteration in prospects of crops; importations of Indian corn are decreasing; rice is being imported into the district from south and west; prices remain easy.
Sarun ...	...	Weather cool, clear and dry, with fleeting clouds on Wednesday and Thursday; west wind prevailing; no change in the state and prospects of the crops since last report; the *rabi* or winter crops are being harvested, and are expected to yield fairly; cotton and *rahur* are doing well; indigo is being sown; the early sowings have germinated; opium is being collected; there was a slight fall of rain on Thursday night, hardly sufficient to lay the dust; prices favourable; general health is good.
Chumparun ...	0·14 *Nil* in previous week.	Weather hot at noon and cool at night; there is nothing new to report regarding the state of the *rabi* crops; there was a slight shower of rain on the night of the 10th instant.
Patna ...	...	Weather seasonable; small fall of rain on the morning of 10th instant, not enough to do harm or good; crops fast being harvested, and produce generally reported well of; a good deal of small-pox generally throughout the district, but not of a bad type.
Gya ...	...	Weather generally fair, with intervals of cloudiness and appearance of rain; one very slight shower; wind less than last week, mostly westerly, occasionally easterly; thermometer reached 93° 2′, but on the whole the warmth has been very moderate; state and prospects of the crops are, as before, very fair, but short of good; public health is good, save some sporadic small-pox.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
(Mar. 16th)		
Shahabad ...	...	Easterly wind on Friday morning prevailing, cloudy, attended with a slight fall of rain and hail. The *rabi* crops are being harvested; prospects of crops good if no further rain falls; poppy is being tapped; mangoe promises to yield an excellent outturn; there are many cases of small-pox in the head-quarters division.
Hazaribagh ...	*Nil*	Weather seasonable; no alteration in the state of the crops; wheat and barley being cut; outturn reported very poor; rain wanted to enable the ploughing to commence; general health of the district is good.
Lohardugga ...	·08	Weather seasonable; two thunder-storms on the 10th instant; little or no rain; some of the *rabi* crops are now being cut; the harvest will be a short one owing to the long drought; general health is good; small-pox is still reported from Palamow.
Maunbhoom ...	0·06	Rain has fallen during the last days of the week, which will be generally welcomed, though possibly the *mohwa* crops may be affected injuriously; nothing fresh to report about the state and prospects of the crops.
Singbhoom ...	0·14	Weather seasonable; no crops to report about; the district is healthy.
Balasore ...	1·35	Occasional showers are beginning to fall, but more rain is required to soften the ground for the plough; cholera and small-pox continue very fatal.
Cuttack ...	·05	Weather uncertain; foggy mornings and hot days, with high winds; crops doing well, but rain is wanted.
Pooree ...	*Nil*	Weather dry and hot; the *dalwa* paddy crop is good, but in some places will fail for want of rain; the state of the other crops is generally good; no tillage for next year's crop commenced for want of rain.
		General Remarks.—There has been more or less rain in almost all the districts of Bengal during the week. The rain was greatly needed and has enabled the cultivators to plough their lands for early rice, jute and sugarcane. No crops of importance are now on the ground, and those that are still standing are being fast harvested.
N. W. Provinces—		
Benares (Mar. 15th)	...	Crop prospects good; harvest nearly gathered.
Agra („ 15th)	From ·1 to ·3	Storms and slight rain; no material damage; early harvest commenced; all crops ripening fast.
Meerut („ 15th)	...	Rain throughout the district; prospects good.
Bareilly („ 15th)	Slight rain on the 9th and 10th instant.	
Jhansi („ 16th)	...	A hail-storm from the westward on the 9th instant; crops injured in 34 villages of Pargana Mau; some losses in Pargana Jhansi; weather cloudy.
Allahabad („ 15th)	...	Harvest promises well.
Punjab—		
Delhi (Mar. 15th)	1·4	Health good.
Hissar „	·3	Crops backward on unirrigated lands, otherwise harvest prospects fair; a few cases of small-pox.
Umballa „	·6	Health good; crops suffering.
Jullundur „	1·	Harvest prospects fair; health good.
Lahore „	·50	Crops and health good.
Mooltan „	(Slight showers.)	Harvest prospects fair; health good.
Dera Ismail Khan „	·4	Crops and health good.
Rawalpindi „	2·	Prospects fair; health good.
Peshawar „	·7	Prospects good; slight fever prevalent.
		General remarks.—The fall of rain during the past week, which was general over the province, has improved the prospects of the *rabi*; health of province generally good.
Oudh—		
Lucknow (Mar. 15th)	·7	Weather continues cloudy; crops being cut; prospects favourable; public health good.
Sitapur „	·4	
Fyzabad „	·1	
Central Provinces—		
Upper Godavari (Mar. 11th)	Little drizzling rain on 11th.	Weather cloudy; threshing of *rabi* continues; health good; prices stationary.
Sambalpur ...	...	Weather cool; harvest over; health good.
Bilaspur ...	Slight rain on 9th.	Weather cloudy; prospects favourable; small-pox and cattle disease prevalent; prices steady.
Raipur ...	...	Weather clear; *rabi* harvesting; health good; prices easy.

A good demand for grain crops throughout the month in all divisions.

Eastern Jumna Canal.—General demand in Saháranpur, where clouds induced zemindars to postpone irrigation.

Agra Canal.—Demands for grain crops.
Dún Canals.—No remarks.
Bundelkhand.—Ditto.
Rohilkhand.—Ditto.
Bijnor.—Ditto.

Traffic.—Compared with the return of the corresponding period of last year, there is a slight increase in "up" grain traffic. Cotton and oil-seeds show an advance on last month's outturns. Rafting operations still small, though a decided improvement on those of last month.

ALLAHABAD,
The 1*st March* 1876.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 14th March 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.
The Hon'ble J. R. Bullen Smith, C.S.I.
The Hon'ble F. R. Cockerell.

NEW MEMBER.

The Hon'ble F. R. COCKERELL took his seat as an Additional Member.

CHUTIA NÁGPUR INCUMBERED ESTATES BILL.

His Honour THE LIEUTENANT-GOVERNOR moved that the Final Report of the Select Committee on the Bill to relieve from incumbrances certain estates in Chutia Nágpur, be taken into consideration. He said that at the last meeting, when he presented the Report, he had explained the several points to which the Report adverted. He would not now repeat that explanation.

The Motion was put and agreed to.

His Honour THE LIEUTENANT-GOVERNOR also moved that the Bill as amended be passed. He said that the Final Report related to the framing of rules by the Lieutenant-Governor for the preparation of the schedule of debts, particularly the rates of interest payable thereon, and the Report of the Committee had dealt completely with that particular subject. He believed the Bill might now safely be passed. He had recently had the advantage of travelling in the portion of the provinces to which the Bill would apply, and he could assure the Council that the provisions of the Bill, if passed, would prove useful to the interesting and important tracts to which it referred.

The Motion was put and agreed to.

CRIMINAL TRIBES ACT EXTENSION BILL.

His Honour THE LIEUTENANT-GOVERNOR then moved that the Report of the Select Committee on the Bill to extend the Criminal Tribes Act, 1871, to the Lower Provinces of Bengal, be taken into consideration.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA said, at the last meeting of the Council he had the honour to represent the hardship and injustice to which the zamíndárs of these provinces would be subjected if the provisions of sections 21 and 22 of the Criminal Tribes Act of 1871 were applied to them. He had on that occasion fully stated to the Council that the zamíndárs could not possibly have any personal knowledge of the movements of these criminal tribes, in consequence of their not living on their estates. His Excellency was aware

that the mofussil Police was now superintended by competent European officers, and these tribes could scarcely escape the vigilance of such officers when they might attempt to reside in some places. Besides, there were other sources of gaining information of their whereabouts. With reference to the letter of Mr. Secretary Mangles, communicating the views of His Honour the Lieutenant-Governor of Bengal on the subject of RÁJÁ NÁRENDRA KRISHNA'S proposed amendment, he begged to observe that these criminal tribes did not permanently reside in a particular spot, like the offenders alluded to in section 90 of the Criminal Procedure Code, who might be supposed to be the residents of the locality where they committed crimes; and even the agents of the landlords had no means of successfully watching, or knowing, the movements of these criminal tribes, which could only be ascertained by an efficient detective Police. The sections of the Criminal Tribes Act did not make the agents of zamíndárs liable to penalty, but threw the whole responsibility upon the landholders, on failure to give the information recited therein; but the Criminal Procedure Code section included zamíndárs, or their agents, clearly intending thereby that the non-resident zamíndárs should not be held liable for not giving the information required under that section. However much he might appreciate the duty of the zamíndárs in helping the Police, he considered it a great hardship towards them if they were required to do things which lay beyond their power. He therefore begged to move that the following clause be added to the Bill:—

"2. Nothing in this Act shall be deemed to extend to any part of the territories under the government of the Lieutenant-Governor of Bengal so much of sections 21 and 22 of the Criminal Tribes Act, 1871, as requires owners and occupiers of land to give information at police-stations."

The Hon'ble MR. INGLIS said, that he should vote against the amendment proposed by the Hon'ble Rájá Nárendra Krishna, as he was certain that if the owners and occupiers of land in villages where a criminal tribe or class that had been brought under the Act resided, were relieved from the duties imposed on them by section 21, it would be impossible for the Local Government to carry out the purposes for which the Act was about to be extended to Bengal. Section 21 required the village headmen, the village chaukídárs, and the owners and occupiers of land in villages where a criminal tribe may have been directed to reside by the Local Government, to give certain information regarding them to the Police. If the amendment were passed, the only persons then remaining responsible for giving this information would be the village headmen and the village chaukídárs. The term "village headmen" meant, in the North-Western Provinces, the Panjáb and Oudh, the village lambardárs, from whom engagements for the payment of the Government revenue had been taken as representatives of the village community. These men held a recognized position in their villages and exercised considerable influence over the co-sharers, the tenants, and all other residents in the estate, and were perhaps the best men to whom the Police could look to for the information wanted about these criminal tribes. There were, however, no such men in Bengal, and, consequently, the only persons who would be bound to assist the Police in the manner prescribed by section 21, if the Hon'ble Member's amendment were carried, would be the village chaukídárs; and he need scarcely say that if that were the case, it would be hopeless to expect that the Act could be worked successfully.

The duty of assisting the Police by giving information regarding the commission of crimes, the resort of bad characters to their estates, and other similar matters, was imposed on the landholders of Bengal many years ago, shortly after the permanent settlement, when the police powers they had previously exercised were taken from them, and the police in the mofussil were placed directly under the charge of the district officers. He would read to the Council the provisions of the old Regulations which imposed these duties on the landholders of Bengal. Section 2 of Regulation VI. 1810 provided that,—

"All zemindars, talookdars, and other proprietors of lands, whether malgoozary or lakheraj, all sudder farmers and under-renters of land of every description, all dependent talookdars, all naibs, and other local agents, all native officers employed in the collection of the revenues and rents of lands on the part of Government or of the Court of Wards, are hereby declared

especially accountable for the early and punctual communication to the Magistrates, and police darogahs, either publicly or secretly, as the informants may judge proper, of all intelligence which they may obtain respecting the resort to any place within the limits of the estate or farm held or managed by them, of any person or persons of the different classes of people ordinarily known by the appellation of dacoits, cozauks, thugs, or buddecks, or of any other description of robbers."

Then section 10 of Regulation I. 1811 enacted,—

"All zemindars, talookdars, and other proprietors of lands, whether malgoozary or lakheraj, all sudder farmers and under-renters of land of every description, all dependent talookdars, all naibs and other local agents, all native officers employed in the collection of the revenue and rents of lands on the part of Government or of the Court of Wards, are hereby declared accountable for the early communication to the Magistrate either secretly or publicly, of all information which they may obtain respecting the residence of any notorious receiver or vendor of stolen property within the limits of the estate or farm held or managed by them."

Then section 4 of Regulation III. 1812 enacted,—

"Regulation VI. 1810 defines the duty required from the zemindars and others, with respect to the resort of criminals within the limits of the estates or farms held or managed by them.

"With the view of affording to the Magistrates more early and punctual information of public offences committed within the limits of their respective jurisdiction, all zemindars, talookdars, and other proprietors of lands, whether malgoozary or lakheraj, all sudder farmers and under-renters of land of every description, all dependent talookdars, all naibs and other local agents, all native officers employed in the collection of the revenue and rents of lands on the part of Government or of the Court of Wards, are hereby declared especially accountable for the early and punctual communication to the Magistrates or Police darogahs, of all information which they may obtain respecting the commission of robberies, and likewise regarding the offence of breaking into houses, tents, or boats, or other places of habitation, perpetrated within the limits of the estate or farm held or managed by them."

Then section 2 of Regulation VIII. 1814 enacted,—

"With the view of affording to the Magistrates more early and punctual information of public offences committed within the limits of their respective jurisdictions, all zemindars, talookdars, and other proprietors of lands, whether malgoozary or lakheraj, all sudder farmers and under-renters of land of every description, all dependent talookdars, all naibs and other local agents, all native officers employed in the collection of the revenue and rents of lands on the part of Government or of the Court of Wards, are hereby declared especially accountable for the early and punctual communication to the Magistrates or Police darogahs, of all information which they may obtain respecting the commission of murders, and likewise regarding the offences of arson and theft, perpetrated within the limits of the estate or farm held or managed by them."

Lastly, section 33 of Regulation XX. 1817 provided that,—

"The police darogahs shall take every favourable opportunity, when employed on local inquiries, as well as on other occasions, of explaining to the zemindars, talookdars, and other proprietors of land, malgoozary or lakheraj, to the sudder farmers and under-renters of land, dependent talookdars, naibs, and other local agents, and to all native officers employed in the collection of the revenues and rents of land, on the part of Government or the Court of Wards, the duties incumbent upon them, and the responsibility attached to them under the provisions of Regulations IX. 1808, VI. 1810, I. 1811, III. 1812, VIII. 1814, and any other Regulations in force, to communicate to the Magistrates and police darogahs, either publicly or secretly, all information which they may obtain respecting the commission of murder, robbery, house-breaking, arson, or theft, within the limits of the estate or farm held or managed by them respectively; or respecting the resort of any known robbers, of whatever description, or the residence of any notorious receiver or vendor of stolen property, within such limits, as well as to afford their assistance in the apprehension of proclaimed offenders, and of all persons for whose apprehension warrants may have been issued by the local Magistrate in pursuance of section IX, Regulation III. 1812; and generally to co-operate with, assist, and support the police officers of Government in maintaining the peace, preventing, as far as possible, affrays and other criminal acts of violence, or apprehending the offenders under the rules and restrictions which have been enacted and promulgated in the Regulations."

These sections of the old Regulations were repealed by Act X of 1872 (the Criminal Procedure Code), but their substance was re-enacted in sections 89, 90 and 162 of that Act. Section 89 applied to the public generally and provided that—

"Every person aware of the commission of any offence made punishable under sections one hundred and twenty-one, one hundred and twenty-one A, one hundred and twenty-two, one hundred and twenty-three, one hundred and twenty-four, one hundred and twenty-four A, one hundred and twenty-five, one hundred and twenty-six, one hundred and thirty, three hundred and two, three hundred and three, three hundred and four, three hundred and eighty-two, three hundred and ninety-two, three hundred and ninety-three, three hundred and ninety-four, three hundred and ninety-five, three hundred and ninety-six, three hundred and ninety-seven, three hundred and ninety-eight, three hundred and ninety-nine, four hundred and two, four hundred and thirty-five, four hundred and thirty-six, four hundred and forty-nine, four hundred and fifty, four hundred and fifty-six, four hundred and fifty-seven, four hundred and fifty-eight, four hundred and fifty-nine, or four hundred and sixty of the Indian Penal Code, shall, in the absence of reasonable excuse, the burthen of proving which shall lie upon such person, give information of the same to the nearest Police officer or Magistrate."

Section 90 applied specially to landholders and persons specially connected with the land, and provided as follows :—

"Every village headman, village watchman, owner or occupier of land, or the agent of any such owner or occupier, and every native officer employed in the collection of revenue or rent of land on the part of Government or the Court of Wards, is bound forthwith to communicate to the nearest Magistrate, or to the officer in charge of the nearest Police station, any information which he may obtain respecting—

(*a*) the residence of any notorious receiver or vendor of stolen property at the village of which he is headman or watchman, or in which he owns or occupies land, or collects rent or revenue, as the case may be;

(*b*) the resort to any place within the limits of such village of any person or persons known or reasonably suspected of being a thug or robber;

(*c*) the commission or intention to commit suttee or other non-bailable offence at or near such village;

(*d*) the occurrence of any sudden or unnatural death."

Then section 162 provided,—

"The Magistrate of the District may direct a warrant or warrants to landholders, farmers or managers of land, for the arrest of any escaped convict, proclaimed offender, or person who has been accused of a non bailable offence, and who has eluded pursuit.

"Such landholder or other person shall acknowledge the receipt of the warrant and shall be bound to execute it, should the person for whose arrest it was issued enter on or be in his estate, farm or land under his charge."

The Council would thus see that the duty imposed upon the landholders of Bengal by section 21 of the Criminal Tribes Act was no new duty imposed upon them for the first time, but that they had been obliged to perform similar duties for many years past. With reference to the remark made by the Hon'ble Mover of the amendment that these criminal tribes had no fixed place of residence, and that therefore it would be impossible for the owners of land in any particular village to give the information required by section 21 to the Police, he would observe that section 21 only came into operation after the report required by sections 2 and 3 of the Act had been submitted to the Government of India, and the measures proposed had received the sanction of the Governor General in Council, and then applied only to the owners and occupiers of land in villages where the criminal tribes, regarding which the report was submitted, might have been directed to reside; so that the difficulties anticipated by the Hon'ble Rájá Nárendra Krishna consequent on the migratory character of these tribes, would not be felt by the landowners who were required to give information regarding them.

He would for these reasons vote against the amendment; but he would submit, for the consideration of the Council, that the objection urged by the Hon'ble Rájá Nárendra Krishna against the section as it stood, namely, that it was hard to impose these duties upon non-resident landholders, might be removed by the insertion in that section of the words "or the agent of any such owner or occupier." These words were inserted in section 90 of Act X of 1872 to meet a similar objection to the section as first drafted. If these words were added, the responsibility of resident landholders, and of their agents in case of their absence, would be maintained, and that he thought was all that was wanted.

The Hon'ble MR. BAYLEY wished to add a few words to what his hon'ble friend Mr. Inglis had just stated. He thought that, as regards the

history of the law in its present condition, Mr Inglis had said almost everything that was to be said. He would only draw attention to a few qualifying words in section 21, which were in themselves, he thought, sufficient to meet the objections made by the hon'ble mover of the amendment; that was to say, to the words by which owners and occupiers of land were only required to give such information as was in their power. Now he thought that nobody could reasonably suppose that a Magistrate, however crass or stupid he might be, would think that a man, a hundred miles off, could have special knowledge, or be able to have such knowledge, of an offence committed on his estate. MR. BAYLEY could not say that he had any objection to the amendment proposed by his hon'ble friend Mr. Inglis, because it brought this particular law into exact harmony with the wording of the general law of the Criminal Procedure Code. But he must say this, that he could not see that the fact of a man being absent entirely absolved him from all responsibility in regard to his property. It seemed to him that there were influences and responsibilities connected with landed property, and which always must be connected with it, which every man must and ought to exercise and to bear in the villages within his estates. The mere fact of systematic absenteeism was, he thought, a very serious political evil, and one which nothing should be done to encourage. Of course, if the responsibility was imposed on the agent of the absentee landlord, practically the pecuniary part of it would fall on the absentee himself, and therefore to a certain extent the fact of his absenteeism would not enable him entirely to escape the duties he was bound to perform; indeed, in this sense, Mr. Inglis' amendment was an improvement on the Bill. He believed the bulk of the larger zamíndárs in Bengal were men who would fulfil the duties imposed upon them by the general law without the stimulus of punishment. But he was bound to say that he had known, and he could point to the public records of the Government to show, instances in which in other parts of India zamíndárs of large influence and power and property had been actually convicted of systematically harbouring the very criminal tribes which were dealt with by this law. He thought, therefore, that so far as regards the amendment which had been proposed by Rájá Nárendra Krishna, there was no sound reason why it should be passed; but at the same time he for one was quite ready to accept his hon'ble friend Mr. Inglis' amendment.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA observed that, by the existing law of the country, zamíndárs were not allowed to summon their ryots to their kachahrís, and consequently they had not the same power over their ryots as they had before, and could not exercise the same influence in their estates as they did in former days.

His Honour THE LIEUTENANT-GOVERNOR merely had to remark that he was entirely opposed to the amendment as put by his hon'ble friend Rájá Nárendra Krishna, but that he quite accepted the revised amendment moved by the Hon'ble Mr. Inglis. He would recommend that the precise wording of the Criminal Procedure Code be adopted in the present Bill. The Criminal Procedure Code was passed subsequently to the Criminal Tribes Act, and the improved wording of the Code might be very well incorporated into the Bill before the Council. And he thought Rájá Nárendra Krishna ought to be content with it. His hon'ble friend laid great stress upon the difficulty which absentee landlords might have in giving information. Now he must remind his hon'ble friend that the remarks which had just fallen from the Hon'ble Mr. Bayley did still describe the duties and obligations of zamíndárs in Bengal. It might be that, as Rájá Nárendra Krishna stated, zamíndárs had not quite the power they once had, but they still had a great deal of legitimate influence, and not only influence, but the means of obtaining information; either they or their agents. If there was any zamíndár who was absent from his estates, he certainly was bound to have a responsible manager on the spot, from whom information could be obtained; and HIS HONOUR could not see that any zamíndár, who cared for his estate and managed it as well as his hon'ble friend managed his own estate, could possibly object to his agent being responsible to give information of the coming and departure of the members of these criminal tribes.

But he would desire to remind the Council that the zamíndárs in Bengal as a class were not absentees. There were some gentlemen who resided in the capital, no doubt greatly for the general good of the community; but the great majority of them did still dwell in or near their estates, or at all events in the interior of the country, and were quite well able to afford all the local information needed in order to keep these tribes in order. And he need hardly do more than corroborate most distinctly on behalf of the Bengal Government what was stated by his hon'ble friend Mr. Inglis, that this obligation was nothing more than an integral part of the original obligations which rested upon all zamíndárs in the country—obligations which were not only common to zamíndárs in Bengal, but common to landholders in all parts of the country. It seemed to him that the substance of the amendment moved by Rájá Nárendra Krishna was this, that whereas zamíndárs were by the common law of the country required to give information to the Police of all bad characters, thieves and escaped offenders, in fact of every kind of bad character, yet there should be some exception to this general obligation with reference to these criminal tribes, that was to say, that the zamíndár was bound to give information of every kind of bad character, except the members of these criminal tribes. That seemed to him a *reductio ad absurdum*. So HIS HONOUR hoped the Council would be pleased to affirm those obligations as to these criminal tribes, and declare, as urged by his hon'ble friend Mr. Inglis, that without the co-operation of the owners and occupiers of land, it would be impossible to keep these offenders in order. The Hon'ble Rájá seemed to consider that the Police were sufficiently strong in Bengal to check these persons without the assistance of the landholders. Now, without any disparagement to the Police, HIS HONOUR maintained that they were not strong enough in such a vast area and amongst so great a population to keep all these criminal wanderers in order without the co-operation of the people who lived in these villages.

So with these observations, he would press upon the Council to reject the amendment proposed by Rájá Nárendra Krishna, and to accept the revised amendment proposed by his hon'ble friend Mr. Inglis.

The Hon'ble MR. COCKERELL said that, having only just joined the Council, he had not, before coming into that room, any opportunity of becoming aware of the intention of his hon'ble friend Rájá Nárendra Krishna to move such an amendment as that now before the Council; and he could not help expressing his surprise at the theory propounded by the Hon'ble Member's motion, namely, that the principle by which the proposed legislation would impose certain responsibilities upon the owners or occupiers of land in the matter of giving information to the police, regarding the resort of professional criminals within the limits of such land, was a new principle. It was almost unnecessary to add that this was a wholly erroneous theory. The fact that it was so had been clearly established by the citation of the various enactments of the past three-quarters of a century by the Hon'ble Member opposite (Mr. Inglis).

Then as to the modifications of the amendment suggested by that Hon'ble Member to meet the apprehensions expressed by the Mover of it in its present shape, he (MR. COCKERELL) would not say that there was any positive objection to them, but he would prefer dispensing with them altogether; for he must say that he leaned completely towards the view expressed in the remarks of another Hon'ble Member (Mr. Bayley) that the absenteeism of any considerable section of the landed proprietary body was an evil which, at all events, we should in no way encourage by special distinctions in our legislation in the matter of the duties and responsibilities attaching to their position. Moreover, in such cases as the present, the proposed distinction would be merely nominal; this would be evident upon an examination of the manner in which this particular provision of the law would be likely to operate, for in practice a Magistrate would regard the omission to report the advent of criminal tribes within the limits of any estate as an act of negligence which would be suitably punished

by a fine. The Hon'ble Mover of the amendment, he (MR. COCKERELL) was sure, would not dispute the assertion that in such case the fine would not fall upon the local agent or manager as a personal loss, but would be charged in the zamíndárí account and treated wholly as an item of expenditure incurred on account of the estate and to be met from its assets.

Then, again, it must be remembered that zamíndárs had considerable duties and responsibilities imposed by the law and the conditions of the settlement in regard to land-revenue, and they were bound to discharge certain functions in connection therewith. In regard to these matters there was no distinction between resident and non-resident proprietors; all were responsible alike. The Collector looked to the registered proprietor of the land and addressed his "parwána" or precept to him, enjoining the fulfilment of his legal obligations. As a matter of fact, in the case of the absentee landowner, his local agent habitually represented him, by receiving the communications addressed to his principal and acting up to them; but the theory of the principal's responsibility was always maintained, and the conditions attaching to that position strictly enforced.

For these reasons, he (MR. COCKERELL) would reject the amendment *in toto*' as he considered that the proposed modifications would, in practice, be found unnecessary.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA observed that, in addition to the fine, the Magistrate could, under the law, inflict a month's imprisonment, so that his hon'ble friend Mr. Cockerell was not right in supposing that the Magistrate could only inflict a fine.

His Excellency THE PRESIDENT said:—"As far as I understand this question, the desire of Rájá Nárendra Krishna was to exempt an owner of land, who was not resident on his property, from any personal liability for not giving information in these cases. The amendment of the Hon'ble Member goes further than that, because it exempts all owners and occupiers of land, whether resident or not, from the obligation, which was doubtless not his intention. It seems to me, then, that this reason is conclusive against making an exception in the terms proposed by the Hon'ble Member, and that the proposal made by my hon'ble friend Mr. Inglis is the right one, namely, that the provision contained in the Code of Criminal Procedure laying upon owners and occupiers of land the responsibility of giving certain information should be applied to this case. Mr Inglis proposes to add after the words 'owner or occupier of land,' the words 'or the agent of any such owner or occupier.'

"I think the Hon'ble Member will see that that amendment will sufficiently meet the case."

The further consideration of the Report was postponed.

DRAMATIC PERFORMANCES BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill for the better control of dramatic performances. He said:—"This subject, the subject of stage plays, is one on which our law stands in need of amendment. If, indeed, a play is of a defamatory, an obscene, or a seditious character, those who exhibit it may be punished for the offence of defamation, obscenity or sedition. But the Government have been advised that they have no power to prevent the performance of any such play, unless, indeed, in the very rare instances in which it could be said that it was so certain to lead to a breach of the peace as to constitute the actors and audience an unlawful assembly.

"This imperfection of our law has been brought pointedly under our attention by some cases which have recently happened, and of which I will mention two. In the course of last year there was composed a work in a dramatic form, called the *Chá-ka-Darpan*, which I am told means The Mirror of Tea. I do not know who was the author, or what his motives were, but the work itself was as gross a calumny as it is possible to conceive. The object was to exhibit as monsters of iniquity the tea planters and those who are engaged in promoting emigration to the tea districts,—bodies of men as well conducted as any in the empire. These gentlemen, who are carrying on their business to the benefit of everybody concerned, and perhaps with a greater proportion of benefit to the labourers they employ than to anybody else, have what is called a Mirror held up to them in which the gratification of vile passions, cruelty, avarice and lust, is represented as their ordinary occupation. I do not know that this play was ever acted, but it is written, and in all respects adapted, for the stage, and it might, for any power of prevention the Government have, be acted at any moment.

"Another case has happened more recently. A highly respectable Hindú gentleman, of good position in society, one of the legal advisers of Government, and one of the legislature of Bengal, gave an entertainment at his house which some of his caste-fellows disapproved of. What he did was perfectly lawful, perfectly innocent, perfectly honourable, but some of his neighbours did not like it. So in order to punish him, they got up a play in which, in the coarsest way, and under the thinnest disguise of name and place, the gentleman is represented as deliberately selling his own honour and that of his family in order to get promotion and money.

"Now men are free to choose their own company, and they have a right to withdraw from the society of any one who infringes any rule, however absurd, which they may lay down; but they have no right to spread falsehood and calumny for the purpose of inflicting pain upon him. Yet this play was publicly acted, an honourable gentleman was held up to the scorn of the ignorant multitude as one of the basest of mankind, and though the acts might be punishable when done, the Government had no direct legal power of stepping in to prevent it.

"It was on account of the defect in the law that His Excellency the **Viceroy thought it right to issue an Ordinance giving power to the Government of Bengal to prohibit objectionable performances of this kind. And it is a Bill on the model of that Ordinance which I am now asking leave to introduce.**

"Now in all times and countries, the drama has been found to be one of the strongest stimulants that can be applied to the passions of men—

> "'Segnius irritant animos demissa per aures
> Quam quæ sunt oculis subjecta fidelibus.'"

said an acute man of the world who knew human nature well. The same philosopher tells us that no feat seems to him to be too difficult for the dramatist, who can produce any effect and illusion that he pleases on the mind of the spectators:

> "'Irritat, mulcet, falsis terroribus implet,
> Excitat, et modo me Thebis, modo ponit Athenis.'"

Seeing is believing' says our proverb. Certain it is that we accept conduct and language on the stage which if we read the same things in a book, we should at once reject as false, absurd and incredible; so powerful is the effect produced by the actual living representation before our eyes. And in times of excitement no surer mode has been found of directing public feeling against an individual, a class, or a Government than to bring them on the stage in an odious light. It is doubtless for these reasons that the laws of civilized countries give to their Governments great controlling power over the stage. I will not trouble the Council with the laws of other countries, indeed I have not sufficiently studied them, but I will state briefly what is the law of England. By that law, it is not lawful for any person to have or to keep any house or other place of public resort for the public performance of stage-plays without the authority either of Royal Letters Patent or of the Lord Chamberlain's license, or of a license given by Justices of the Peace.

"Then there are rules requiring licensees to give bonds for good conduct, and there are powers given to the Lord Chamberlain and to the Justices to suspend licenses and to shut up theatres.

"The most stringent rule of all is the one which gives to the Lord Chamberlain complete control over the stage. First, it is required that a copy of every new play or alteration in a play shall, seven days before it is acted, be sent to the Lord Chamberlain, who has absolute discretion to allow or disallow its performance. Secondly, the Lord Chamberlain is empowered to forbid the acting of any play, even though already put upon the stage, 'whenever he shall be of opinion that it is fitting for the preservation of good manners, decorum, or of the public peace so to do.'

"The Council will see how very sweeping and overshadowing a law is thought necessary in England, in order to preserve a due control over this subject. We shall not propose to take such large powers as those which are vested in the Lord Chamberlain, but shall propose to take what will probably be quite effective in this country. If, however, my present motion is accepted, I will explain the precise nature of the Bill when I introduce it. The question now is, whether I have assigned to the Council sufficient reason for placing in the hands of Government a larger control over dramatic performances than Government now has. I trust they will be of opinion that I have done so."

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY introduced the Bill to provide for the management of the Public Museum at Calcutta, and moved that it be referred to a Select Committee with instructions to report in a week. He obtained, at the last sitting of the Council, leave to introduce the Bill, and he then explained that the principal reason for which he asked that leave was, that the Government had entered into an arrangement with the Asiatic Society by which that body should surrender their right, under Act XVII of 1866, to special accommodation in the building which had been provided for the Imperial Museum at Calcutta, in consideration of a sum of money paid to them. And he said also that the opportunity was taken of re-enacting Act XVII of 1866 with certain minor amendments. The Bill he had therefore now the honour to introduce repealed Act XVII of 1866, and re-enacted it with the following amendments. The provision securing to the Asiatic Society the possession of certain parts of the Museum building had been omitted, and certain minor provisions which the existence of that obligation entailed, such as to provide certain rooms for the Society, to provide for the repairs of the building and the incidence of the expense of these repairs, had been omitted. The remaining new provisions of the Bill were merely to remedy certain inconveniences which had been found in working the existing Act. The first of these was in regard to the number of Trustees. The present number was thirteen; but it had been found very difficult, in consequence of a considerable portion of them being necessarily hard-worked officials, always to get a quorum at meetings of the Trustees, to transact business. It was proposed therefore slightly to raise the number of Trustees, namely, from thirteen to sixteen, and to give the appointment of these Trustees in exactly the same proportion as formerly was given to the Government and the Council of the Asiatic Society, and to secure the appointment of a similarly increased proportion of official Trustees. Then, again, provision was made that no officer was to be appointed by the Trustees without the approval of the Governor General in Council, or of the Secretary of State for India in Council, and that no new office should be created or salary fixed without the previous sanction of the Government. And as regards salaries, pensions and leave rules, it was provided that the officers of the Museum should be subject to the rules applicable to the Uncovenanted Civil Service. These latter provisions of the Bill represented exactly what was the existing practice, to which it was found convenient to give legal sanction.

He did not think he need detain the Council with any further explanation of the provisions of the Bill. The Bill had been submitted to the criticisms of the Trustees of the Museum and of the Council of the Asiatic Society, and the different Departments of Government concerned, and it had been modified in accordance with their wishes. He therefore proposed to refer it to a Select Committee with instructions to report in a week, as he anticipated that very slight, if any, alterations would be found necessary in the Bill.

The Motion was put and agreed to.

PRESIDENCY BANKS BILL.

The Hon'ble SIR W. MUIR presented the Report of the Select Committee on the Bill for constituting and regulating the Banks of Bengal, Madras and Bombay. He said it would be expedient that he should allude briefly to the alterations made in Committee in the Bill. The communications received on the subject from various quarters had all been very carefully examined in Committee, with the advice and assistance of his Hon'ble friends the mercantile Members of Council, and conclusions which he believed to be satisfactory had been come to upon them.

The first important change (chapter VIII, section 37, clause (*d*)) related to the limit of Six hundred thousand rupees which had been placed on unsecured loans to any single person. In introducing the Bill, he had explained that this restriction had been imposed in conformity with suggestions made by the Bombay Commission. It had been, however, thought better, instead of laying down a hard and fast limit, to leave the amount to be fixed by the bye-laws which would be made by the directors subject to the confirmation of the Governor General in Council. Thus, the limit would be proportioned to the requirements of each Bank, which no doubt might differ largely; and the amount would also be capable of variation and adjustment from time to time according to the circumstances of the period. It would be admitted, he thought, that this was an important improvement.

Next, the scope of the Banks had been enlarged so as to enable them to advance on the securities of the United Kingdom of Great Britain and Ireland (chapter VIII, section 36, clause (2)). This might prove an important convenience to the Banks, and was certainly a safe extension of their business.

Thirdly, it was declared that the responsibility of proprietors was a limited responsibility (chapter II, section 4). The Committee, indeed, had no doubt that even under the previous drawing, the liability was already a limited one; but the point having been raised, it was thought proper, in order to give greater confidence to the proprietors, distinctly to declare the limitation.

Fourthly, referring to the continuance of the Agency of the Bank of Bengal at Bombay, and the possible establishment of other similar Agencies, it had been thought advisable to enact that these, if established, should be subject to similar restrictions as had been imposed on the Bombay Agency of the Bengal Bank (chapter VIII, section 42). The equity of such a provision was plain.

Fifthly, the disqualification for directorship attaching to banking business had been confined to the management of Joint-stock Banks (chapter VI, section 27, clause 2). The ordinary banking business done by houses of business was not deemed to be a disqualification; and, indeed, it had been represented from Madras that, unless this relaxation were made, it would be impossible at that Presidency to obtain a satisfactory and effective Board.

Sixthly, it had been strongly represented that directors should be protected in the *bond fide* discharge of their duties. The usual clause common in England for such purpose had therefore been added, indemnifying the directors against loss, except such as might happen from wilful act or default, and making them responsible only for their own several acts (chapter VI, section 31). This would give a satisfactory and reasonable confidence and security to the directors personally.

Lastly, the scale of votes to which shareholders were entitled had been revised (chapter XI, section 56). The subject was noticed when introducing the Bill, and it was then said that it might be proper to give greater weight to capital than at present. This had now been done, but on the other hand, the scale had also been taken lower. The minimum capital to secure a share was formerly Rs. 4,000; a capital of Rs. 2,000 would now carry a vote; Rs. 10,000 would carry two votes, and so on, every Rs. 10,000 giving a vote up to Rs. 50,000. Thereafter, Rs. 25,000 gave an additional vote up to Rs. 200,000, for which the proprietor was entitled to the maximum of twelve votes (chapter XI, section 56). This scale appeared to be equitable, and, it was hoped, would give general satisfaction.

No other points of importance needed notice. But it was proposed that the Bill be republished for general information, as it concerned a subject on which the public throughout the three Presidencies were interested, and on which it was proper that they should have the fullest information before the measure became law.

NATIVE COINAGE BILL.

The Hon'ble SIR W. MUIR also presented the Report of the Select Committee on the Bill to enable the Government of India to declare certain coins of Native States to be a legal tender in British India.

OPIUM BILL.

The Hon'ble SIR W. MUIR asked leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the law relating to opium. A letter had been received from Bombay on the subject, and the Select Committee wished to re-examine the Bill in the light of its comments before finally presenting their report.

Leave was granted.

BOMBAY REVENUE JURISDICTION BILL.

The Hon'ble MR. HOPE presented the final Report of the Select Committee on the Bill to limit the jurisdiction of the Civil Courts throughout the Bombay Presidency in matters relating to the land-revenue, and for other purposes.

SUNDRY BILLS.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Mr. Cockerell be added to the Select Committees on the following Bills:

To consolidate and amend the laws relating to the Procedure of the Courts of Civil Judicature.

To consolidate and define the law relating to land-revenue in Oudh.

To declare and amend the laws to be administered in Oudh.

To amend the law relating to Civil Appeals in the Lower Provinces of the Presidency of Fort William.

To amend the law relating to Merchant Seamen.

To amend the law relating to certain kinds of Specific Relief.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to provide for the management of the Public Museum at Calcutta——The Hon'ble Mr. Hobhouse, Sir A. J. Arbuthnot, and the Mover.

The Council then adjourned to Tuesday, the 21st March 1876.

CALCUTTA,
The 14th March 1876.

WHITLEY STOKES,
Secretary to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd MARCH 1876.

GENERAL REMARKS—In Madras rain has fallen in Kistna, Kurnool and Tanjore, causing some improvement in prospects. Showers have also fallen throughout Mysore and Coorg, doing good to the coffee crop. In Bombay rain is reported from Sholapur, Dharwar and Kanara: the *rabi* harvest is drawing to a close. In the Central Provinces showers have fallen in several districts: the harvest is good and prospects favourable here and in Berar. In Central India no rain is reported to have fallen, but showers are announced from Rajputana: prospects are good. In Bengal there has been moderate rain in the south-central and eastern districts, in Chota Nagpore, and in parts of Orissa: very little has fallen in Behar. The rain has facilitated sowings of early rice and the preparation of land for other crops. The harvest is being gathered in the eastern and commencing in the western districts of the North-Western Provinces: prospects are good here and in Oudh. In the Punjab the only rainfall reported is from Mooltan and Dera Ismail Khan: prospects are favourable. In Assam there has been no rain, and it is much wanted: some has fallen in Sylhet.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 23rd)	·10 in Bezwada; ·25 in Sattinapally.	Hail in Gudivada; standing crops good; cholera 91 seizures, 29 deaths during past week; fever in 6, small-pox in 5 taluks; mild epizoötic aphtha; dry fodder used; markets well supplied locally.
Kurnool („ 22nd)	Over ·5 inch in 2 taluks, none elsewhere.	Season generally good; cotton being gathered; second crop paddy thriving; other crops nearly harvested; pasture scanty; dry fodder obtainable; water sufficient; markets well supplied; prices—rice rising, other articles steady; cattle disease in 4 taluks; fever prevalent; cholera in Markapur and Pattikonda taluks.
Tanjore („ 23rd)	*Nil* in Negapatam.	Rain slight in some villages of Pattukottai and Mannargudi taluks, elsewhere none; rivers almost dry; water in tanks none; water over anicuts none; cultivation, a few dry crops in some places; standing crops withering in several localities; harvest wet crops, yield moderate; pasture insufficient; prices almost stationary; markets well supplied; public health—cholera abating, number of seizures 107, deaths 74; small-pox in some parts of Negapatam and Mannargudi taluks; cattle disease in many places, some loss.
Madura („ 23rd)	*Nil*	Standing crops withering; health generally good; cholera and small-pox continuing; cattle disease slightly prevalent; pasture scarce.
Malabar („ 23rd)	*Nil*	Market well supplied; prices steady; bowel complaints in Kurumbranad, Calicut, Ernad, Walluvanad, Ponany, Palghat and Cochin, 404 cases, 298 deaths; small-pox prevalent, especially in North Malabar; cattle disease in Wynaad and Walluvanad; pasture withered.
		General Remarks.—General prospects of these districts same as last, except in Kistna, Kurnool and Tanjore, where there has been some rain.
Bombay— (Mar. 23rd).		
Sind (March 22nd).		
Kurrachee ...	...	*Rabi* crops in talukas Kurrachee and Ghorabari attacked by insects; sugarcane being sown; weather cool; breeze westerly.
Hyderabad ...	...	No change.
Upper Sind Frontier ...	...	Weather fair; prospects of mangoe crop excellent; *rabi* as before.
Guzerat.		
Ahmedabad ...	...	No change.
Surat ...	...	7 cholera cases in Surat, 2 fatal; 26 at Bardoli, 7 fatal.
*Kaira ...	...	Cotton good; other *rabi* crops the same as before.
Broach ...	...	Cotton being reaped; public health good.
Khandesh and Nasik.		
Khandesh ...	...	Reaping of *rabi* completed; slight fever in 4 talukas; cotton market active.
Nasik ...	...	*Rabi* crops mostly harvested.
Konkan.		
Tanna ...	...	Reaping of *rabi* completed in almost all talukas, outturn fair; small-pox prevails slightly at Tanna.
Deccan.		
Poona ...	...	Weather continues hot; small-pox prevails; with this exception, public health generally good; cattle disease prevails slightly in Indapur.
Ahmednagar ...	...	Harvesting of *rabi* finished.
Sholapur ...	1·52	
Satara ...	...	No change.

* *N. B.*—In the column of rainfall opposite Kaira, published in the *Supplement to the Gazette of India*, dated the 18th instant, for "0·6" read "0·06".

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	...	No change.
Dharwar ...	0·36	Total rainfall 0·82; cholera increasing, especially in Bankapur and Hangal talukas.
Kanara ...	2·25 at Haliyal.	Weather cloudy; crops and public health the same as before.
Kaladgi ...	...	Cholera in 3 talukas, 36 deaths; cattle disease in Muddebihal taluka.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather hot and cloudy; health generally good; cholera in Morvi taluka, 61 cases, 22 deaths.
Wadhwan ...	...	Weather cloudy; cholera throughout Jalawad, 108 cases, 40 deaths; in some places under Limri cattle died of small-pox.
Baroda ...	...	Picking of cotton and reaping of *rabi* crops continued. *General Remarks.*—Cholera in Kattywar, Surat and Southern Mahratta Country; small-pox in Bombay, Tanna and Poona; harvesting of *rabi* crops nearly completed.
Bengal—(Mar. 23rd)		
Chittagong ...	·41	Weather cool, with south-west wind; more rain is wanted; cholera is prevailing in Satkania and Chukuria.
Noakhally ...	0·07	Weather generally fair, with foggy mornings on the 9th, 10th, 11th and 14th; there was a slight shower of rain on the night of the 12th instant; wind generally south; chillies, pulses, linseed and *sesamum* are progressing favourably and some of them are being gathered; ploughing for the early rice crop and sowings of early and late rice together in the very low grounds have begum; cholera appeared in Nulcherah and in the town; cases of small-pox are also reported from several stations.
Chittagong Hill Tracts...	·6	Weather seasonable; no crops on the ground, except tobacco; *joom* cutting continues.
Hill Tipperah ...	0·15	Weather seasonable; no change in the state and prospects of the crops since last report.
Backergunge ...	0·45	Weather warm and fair, with rain at intervals; winter crops have not turned out well from want of rain; summer sowings not yet begun.
Furreedpore ...	·31	Weather windy and rather hot; cold weather crops are being reaped in places with fair results; ploughing is going on briskly; general health is good.
Dacca ...	0·25	Weather seasonable; crops are good.
Mymensing ...	0·01	Weather dry and hot; the late rain has allowed of ploughing for the early rice being taken in hand; prospects of the crops are favourable.
Tipperah ...	*Nil*	Weather warmer than usual; one or two sharp storms with hail; spring rice is getting on well; no other crops of importance on the ground.
24-Pergunnahs ...	0·78	Weather cloudy in the beginning of the week, with occasional light showers, and warm in the latter part; lands being prepared for *aous* or early rice sowings; the harvest of the winter crops is over; health is generally good; a few cases of cholera have been reported from Satkhera and Barrackpore sub-divisions.
Jessore ...	1·60	Weather bright and clear; spring rice and *til* (oil seed) promise well; ploughing for and sowing of the early rice are being vigorously pushed on.
Nuddea ...	0·16	Weather hot, with occasional storms; the cultivation of the land for the rice sowings has been going on everywhere; the cold weather crops are almost all off the ground; a few cases of cholera are reported, but on the whole there seems to be less than usual.
Moorshedabad ...	·05	Weather getting warmer; nights cool; most of the cold weather crops have been harvested; wheat, however, is uncut still in some places, and the barley also is not all reaped; the outturn is somewhat poor owing to want of rain; cholera is still spreading at Ramporehaut, and a few cases have also occurred in Goas station.
Pubna ...	0·64	Weather fine and hot; prospects of the crops are fair; with occasional showers (which may be expected) all will be well; cholera is said to have re-appeared in the neighbourhood of Aronkhalee, but no details have been received; 2 cases of small-pox have been reported at the Pubna thana, 1 of which proved fatal.
Rajshahye ...	*Nil*	Weather is becoming very warm; high winds and no rain, except an unimportant fall in one quarter on the 12th instant; the *rabi* crops are suffering from want of rain; rain is also wanted for the early sowing of rice.
Bogra ...	Few drops.	No change in the character of the weather; few drops of rain fell, but not appreciable by the rain-gauge; there are no crops to speak of now on the ground.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Maldah ...	...	Heat increasing; there has been a slight shower of rain in thana Sahibgunge; a few drops of rain fell at the Sadr station on Saturday night; the second transplantation of the *boro* is now going on; the plants look well; loss of the *rabi* crop has been caused by the want of rain in thanas Gomastapore and Gazole; the sowing of the *jali bhadoi* continues; 4 deaths from cholera have occurred during the week; 6 attacks of cholera and 12 of small-pox have also been reported during the same period.
Dinagepore ...	*Nil*	Weather warm; strong west winds; rain is much needed for ploughing and sowing the *bhadoi* rice crop; the harvesting of mustard and sugarcane is nearly finished; *boro* rice is being transplanted.
Rungpore ...	*Nil*	Rain is threatening; prospects of the crops are much the same as last week; in thana Nagessari on the night of the 3rd instant there was a heavy shower of hail, which did some slight damage to the *rabi* crops.
Cooch Behar ...	*Nil*	There was no rain; occasional rough east winds; the *bitri* (*aous*) *dhan* is still being sown; the prospects of the *bitri dhan*, the *cheena* and the *kaon* crops will be unfavourable if there be no rain.
Jalpaiguri ...	*Nil*	Weather getting warmer; the rainfall of previous week in the Sadr station was not ·4 but ·04; ploughing for *bhadoi dhan* is nearly completed; rain is much wanted; a cholera case admitted in the charitable dispensary on the morning of the 18th instant.
Darjeeling ...	*Nil*	Weather windy and misty; the sowing is progressing favourably, but a little more rain would be of great benefit.
Midnapore ...	*Nil*	Weather close and warm; south wind during the night in the Sadr station; strong south wind in Contai; crops are doing well.
Howrah ...	0·99	The hot weather has fully set in; no crops on the ground; the ground is being prepared for the rice harvest.
Hooghly ...	*Nil*	Rain on the night of 11th instant, but clear subsequently; sugarcane cuttings are still being planted out; paddy lands being ploughed up; cucumbers, &c., mangoes and jack fruits are doing well; the *rabi* crops, wheat and barley are still being reaped; potatoes, watermelons, cucumbers and green mangoes coming to the bazar for the first time in small quantities.
Burdwan ...	1·30 at Culna, 0·65 at Jehanabad.	Some hail fell at Raneegunge on Saturday; cholera is abating in the town of Raneegunge, but it is still very prevalent in many parts of the district; small-pox has appeared in thana Montessur.
Bankoorah ...	0·08	Weather dry and hot; no change of importance regarding the state and prospects of the crops; cholera has been very prevalent in Bankoorah and its vicinity.
Beerbhoom ...	*Nil*	Weather hot, with westerly wind; no material change in the state and prospects of the crops; rain is wanted.
Sonthal Pergunnahs ...	0·02	Weather cloudy occasionally all over the district; a few drops of rain reported in different places; *rabi* outturn reported good in Rajmehal, and bad in Godda; mangoe and *mowha* crops good everywhere so far.
Bhagalpur ...	*Nil*	Very strong westerly winds; the *rabi* crops are being rapidly reaped; no rain is wanted till the outturn is housed; *aghani* rice and *moong* has already been sown in low lands, and is germinating; ploughing is going on every where; mangoe promises to be a wonderful crop, and a very useful one to the poorer classes in the north; general health is very good, but small-pox is prevalent here and there, but not in a very severe form.
Monghyr ...	*Nil*	A few drops on Thursday morning; no change since last week; nearly six months have passed without rain; the harvest is becoming general throughout the district; prices continue easy.
Purneah ...	*Nil*	High dry west wind; rain is wanted for the *bhadoi* sowings; no change in prospects of crops or in prices since last week.
Durbangah ...	*Nil*	Weather cloudy at times; the *rabi* crops in the Tajpore and Sadr sub-divisions are being harvested, and a fair outturn is expected; the *rabi* crops in Madhoobunnee promise an indifferent yield; the condition of the people and of the market supplies in Tajpore and Sadr sub-divisions is satisfactory; in Madhoobunnee prices show an upward tendency, but the markets are well supplied; there is an increasing demand for labor in Madhoobunnee.
Mozufferpore ...	Return not received. In previous week ·15	Weather warm and often cloudy, with violent west wind; the *rabi* harvest is rapidly progressing, and there will be an 8-anna outturn in each sub-division; mangoe blossoms are unusually fine this year; health of the district is generally good.
Sarun ...	·12 in Sewan.	Weather generally fair and dry, but there has been more than once a likelihood of rain; high west wind is blowing; hot during the day, but cool at night; there is no alteration in the prospects of the crops; the *rabi* or winter crops are being harvested; Cotton and *rahur* doing well; indigo is still being sown, but prospects are not generally good; the steady west wind is fast drying up the soil; opium is being collected, mangoe in full blossom, and an excellent crop is expected; prices favourable; general health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Chumparun ...	Return not received.	Sky now and then cloudy; hot during the day and cool at night; the *rabi* crops are almost ripe for the sickle; the rainfall of last week has not benefited the crops; the cultivators will harvest a little less than an average crop.
Patna ...	*Nil.* In previous week ·04.	Weather seasonable; no rain, which, if it fell now, would do more harm than good; all the crops being harvested; a good deal of small pox and cholera prevailing throughout the district, but in a sporadic form.
Gya ...	Slight shower.	Strong west winds, and getting hot during day-time; cooler than usual in the morning and evening; maximum reading of thermometer is 94° 2'; indications of rain at one time—passed of; *rabi* crops are nearly all reaped in most parts of the district; public health is good generally, but a few cases of cholera and small-pox reported.
Shahabad ...	Return not received.	Weather hot, with high west wind; reports on the *rabi* on the whole are good; several cases of small-pox are reported in the sub-divisions of Sasseram, Bhubhooab, and head-quarters.
Hazaribagh ...	*Nil*	Weather seasonable, but becoming very warm; there is no change in the state of the crops; the outturn of *rabi* crops is very short; a few cases of cholera and small-pox reported.
Lohardugga ...	·13	Weather seasonable; a little rain fell on Saturday the 11th; the *rabi* crops are being harvested, but the outturn will be much below the average; the *mohwa* promises well; general health is fair; small-pox is still reported from Palamow, and a few cases of cholera from Chota Nagpore Proper.
Maunbhoom ...	0·29	Rain is wanted; there being but little crops on the ground, there is nothing to report.
Singbhoom ...	0·37	Weather seasonable; no crops to report about.
Balasore ...	·55	Heavy showers of rain have fallen in the centre and north of the district, and ploughing for the main rice crop has commenced; in the south of the district a little rain has fallen, but not enough for commencing field work; cholera is prevalent towards the north.
Cuttack ...	A few drops.	No rain in the Sadr station; a few very slight showers reported from interior; mornings foggy and cool, but very hot later in the day; no crops of importance on the ground, except little cotton, sugarcane and tobacco; small-pox at Kendrapara; with this exception public health is good.
Pooree ...	A few drops.	Weather very hot; three-fourths of the *dalwa* paddy crop may be expected, the remaining fourth part will fail for want of rain; the state of the other crops is fair; cholera is raging in Pooree; rain is much needed throughout the Khoordah sub-division.
		General Remarks.—There has been slight rainfall in the Western, Central and Eastern Districts of Bengal and in the Behar and Chota Nagpore divisions. The crops still standing on the ground are inconsiderable; sowing of early rice and planting of sugarcane cuttings are going on in places. The cultivators are busy in preparing lands for the ensuing crops.
N. W. Provinces—		
Benares (Mar. 22nd)	...	Harvest nearly gathered and good.
Allahabad („ 21st)	...	Prospects very good.
Meerut („ 22nd)	...	Harvest begun; prospects good.
Bareilly („ 22nd)	*Nil*	*Rabi* harvest commenced.
Punjab—		
Delhi (Mar. 22nd)	*Nil*	Crops nearly ripe; health good.
Hissar „	*Nil*	Crops ripening; small-pox still in some villages.
Umballa „	*Nil*	Crops suffering; health good.
Jullundur „	*Nil*	Harvest promising; health good.
Lahore „	*Nil*	Crops and health good.
Mooltan „	(Slight showers.)	Crops fair; health good.
Dera Ismail Khan „	(Ditto)	Health and crops good.
Rawalpindi „	*Nil*	Harvest fair; health good.
Peshâwar „	*Nil*	Harvest prospects good; slight fever prevalent.
		General Remarks.—Harvest prospects and public health on the whole good.
Oudh—		
Lucknow (Mar. 22nd)	*Nil*	Crops being harvested; prospects favourable; public health good.
Sitapur „	*Nil*	
Fyzabad „	*Nil*	
Central Provinces—		
Upper Godavari (Mar. 18th)	·06	Prospects favourable; health good; price of *jowari* falling.
Sambalpur ...	·70	Harvest over; health good.
Bilaspur ...	...	Cloudy; prospects favourable; fever, small-pox and cattle disease prevalent; prices steady.
Raipur ...	·10	*Rabi* gathering; health good; prices easy.
Chânda (Mar. 19th)	(Slight showers.)	*Rabi* gathered; jori cotton unfavourable; health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*continued.*		
Chhindwára ...	(Slight rain on 14th.)	Cloudy; wheat damaged in places by hail-stones; health good; prices steady.
Betul (Mar. 20th)	·25	Reaping of *rabi* continues; wheat damaged in places by hail-stones; cholera appeared, 16 deaths; prices stationary.
Balaghât ...	·40	Cloudy and close; *rabi* cutting continues; small-pox prevalent; prices steady.
Bhandara (Mar. 21st)	...	Reaping of *rabi* continues; fever and small-pox prevalent; prices easy.
Nagpur („ 22nd)	·50	*Rabi* gathered; small-pox in places; prices fallen.
Wardha ...	...	Clear; health good; prices easy.
Nimár ...	...	*Rabi* threshing; cattle disease in places; prices stationary.
Hoshangabad ...	...	Hot; outturn of *rabi* fair; prices rising.
Narsinghpur ...	...	Reaping of *rabi* nearly finished; harvest very good.
Jubbulpore ...	...	Cloudy; *rabi* gathering, threshing; small pox and cattle disease prevalent.
Saugor ...	...	*Rabi* reaping continues; prices falling.
Seoni ...	...	Cloudy and hot; *rabi* cutting continues; health good; prices risen.
Damoh ...	...	Prospects good: prices fallen.
Mandla ...	4·50	Prospects good; cholera in places.
		General Remarks.—In most districts the weather during the past week has been cloudy and hotter than is usual at this season; cholera has made its appearance in Mandla and Betul, and small-pox in five districts. The harvest where reaped has been good, and prospects are generally favourable; prices have in some districts fallen, in others are falling or stationary, and have only risen in Seoni and Hoshangabad.
British Burma—		
Arakan Divn. (Mar. 16th)	...	Health good.
Pegu Division. (Mar. 16th)		
Rangoon ...	...	Health good; slight cattle disease.
Bassein ...	...	Health good, except in town, where a few deaths from small-pox and cholera have occurred.
Henzada ...	...	Health good.
Prome ...	...	Cholera broken out again; small-pox prevalent.
Tenasserim Divn. (Mar. 16th)	...	Public health good, except in Amherst, where choleraic diarrhœa still prevails.
Assam—		
Gauhati (Mar. 23rd) ...	*Nil*	Mornings clear and cool; dry hot winds from west prevail; days warm; rain much wanted for crops generally.
Sylhet „	...	Ploughing continues; rain fell last night.
Hyderabad Assigned Districts—		
Umraoti (Mar. 23rd)	...	*Rabi* cutting completed; outturn good.
Mysore and Coorg— (Mar. 23rd)	...	Showers of rain have fallen throughout the province and in Coorg where the coffee has benefited; prices stationary generally but have, fallen in some parts; sporadic cholera still prevalent.
Rajputana—		
Sirohi (Mar. 13th) ...	...	Weather cloudy; health good; very good harvest being cut.
Meywar („ 17th) ...	...	Weather cloudy and pleasant; water-supply, health and harvest good.
Marwar („ 18th) ...	·12 during night of 15th instant.	Weather cloudy throughout; harvest good, but the sharp shower damaged standing crops; small-pox prevalent.
Harowtee („ 11th) ...	Showers in the Deolie and Jhallawar districts.	Health and harvest good; weather cloudy, close and unseasonable.
Harowtee („ 18th) ...	*Nil*	Weather still cloudy and unseasonable.
Tonk („ 18th) ...		
Bhurtpore (Mar. 23rd)	...	No change; harvest proceeding; weather still cloudy.
Ajmere „	...	Weather still cloudy; sickness prevalent; crops satisfactory.
Jeypore „	...	No agricultural changes; public health good.
Central India—		
Indore (Mar. 22nd)	...	Health and prospects generally good in Central India, though cholera and small-pox are prevalent in towns near the railway in Baghelkund.

W. BROADFOOT, *Captain, R. E.,*
Secy. to Govt., Punjab P. W. D., Irrig. Branch.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 21st March 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
His Honour the Lieutenant-Governor of Bengal.
His Excellency the Commander-in-Chief, G. C. B., G. C. S. I.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q.C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir W. Muir, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble John Inglis, C.S.I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.
The Hon'ble F. R. Cockerell.

CRIMINAL TRIBES ACT EXTENSION BILL.

His Honour THE LIEUTENANT-GOVERNOR moved that the Bill to extend the Criminal Tribes Act, 1871, to the Lower Provinces of Bengal, be passed. He said, it would be in the recollection of the Council that the Report of the Select Committee on this Bill was presented at the last meeting; that a certain amendment was proposed and passed on the subject on that occasion; and that the passing of the Bill was postponed until to-day, in order that the amendment agreed to at the last meeting might be put into due form. The amendment accordingly had been framed, and nothing now remained, he believed, than to pass the Bill as amended at the last meeting. With these remarks he had to ask that the Bill be passed according to the motion set out in his name.

The Hon'ble MR. INGLIS said that on Tuesday last the Council decided that certain words should be inserted in section 21 of the Act, indicating that, in the case of non-resident landowners, the duty of giving information to the Police devolved upon the agents employed by such landowners in the management of the estate where a criminal tribe that had been brought under the provisions of the Act resided. This amendment rendered necessary a few other alterations in other sections of the Act. These were entered in the list before the Council. The two last amendments related to a totally different matter, and he would, with the permission of the Council, ask leave to withdraw them, as, on consideration, he hardly thought them necessary. He therefore confined his motion to those alterations only which were rendered necessary by the resolution adopted at the last meeting. They were:—

That the following words be added to the title (namely), "*and to amend the same Act.*"

That the following words be inserted in the preamble after "Bengal" (namely), "and to amend the same Act in manner hereinafter appearing."

That the following section be added to the Bill (namely),—

"2. Section eighteen of the said Act shall be read as if in the second clause, after the words 'persons reside,' the following words were inserted (namely), 'or the agents of such landowners or occupiers.'

"Section twenty-one of the said Act shall be read as if in the first clause, after the words 'persons reside,' the following words were inserted (namely), 'or of the agent of any such owner or occupier,'

"and as if in the fourth clause, after the words 'occupier of land,' the following words were inserted (namely), 'or of the agent of such owner or occupier.'

"And section twenty-two of the same Act shall be read as if, after the words 'occupier of land,' the following words were inserted (namely), 'or the agent of such owner or occupier'."

The Motion was put and agreed to.

The Motion that the Bill be passed was carried.

DRAMATIC PERFORMANCES BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill for the better control of dramatic performances, and moved that it be referred to a Select Committee with instructions to report in two months. He said that he gave to the Council last week the reasons for passing a measure on this subject. He had now to explain the nature of the Bill which he proposed. What was proposed was that whenever the Government was of opinion that any dramatic performance was scandalous or defamatory, or likely to excite feelings of disaffection to the Government, or likely to deprave and corrupt the persons present at the performance, or to be in other way prejudicial to the interest of the public, the Government might prohibit the performance. The copy of the Bill in his hands spoke only of the Local Government. It was intended, however, to give this power to the Governor General in Council as well as to the Local Government. The Bill provided that a copy of the order might be served on the persons about to take part in the performance or on the owner or occupier of the house or place in which it was to take place; and then penalties were imposed for disobedience to the order, and power was given to the Magistrate to seize the scenery, dresses and other articles which were used in the play which was prohibited.

So far the Bill only gave power to prohibit such dramatic performances as the Government had reason to think objectionable. In section 9, we proposed to take further power in particular cases in which the Government might have reason to believe that it was necessary to put particular local areas under further control. And the powers conferred by section 9 were nearly the same as those which, as he explained to the Council on the last occasion, the Lord Chamberlain had in England. It was proposed that, after notification in the particular place, no dramatic performance should take place except in some licensed house; that those about to perform should be bound to give prior notice to the Government, who might then prohibit the performance if they thought fit. The Council would see that we did not establish necessarily any kind of censorship; that the Government would, in the first instance generally depend on the information it might receive as to the nature of the piece to be performed. If it found that the law was evaded: if it found that in a given place, persons continued to exhibit objectionable performances secretly or suddenly, it might then apply to that particular place in which such things were done the more stringent provisions of the law, which would compel them to take out licenses and to give notice of what they were about to do.

The Hon'ble RÁJÁ NÁRENDRA KRISHNA said the Bill introduced by the Hon'ble Mr. Hobhouse to-day, was a measure which could not fail to check a reprehensible tendency in some of our young misguided authors, who abused their imaginative powers in writing objectionable plays for the stage. No members of a nation that aspired to be reckoned as a civilized race should indulge in personalities, scandal and obscene exhibitions, in order to satisfy their spite or vent their fury on people who did not act according to their standard of propriety, or to excite impure merriment. This Bill very properly proposed to stop the enactment of seditious and obscene representations in theatres. But while he recognised the necessity of such a measure, he would fail in his duty if he did not point out to His Excellency how difficult was the censorship to

be exercised in these matters, especially when these dramas were written in a language foreign to our rulers. He would, therefore, suggest that due attention should be directed in the Select Committee for the selection of persons who would be required to pronounce an opinion as to the objectionableness of a play under the proposed enactment.

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY presented the Report of the Select Committee on the Bill to provide for the management of the Public Museum at Calcutta. The Committee, he said, had made no changes in the Bill.

BOMBAY REVENUE JURISDICTION BILL.

The Hon'ble MR. HOPE moved that the Reports of the Select Committee on the Bill to limit the jurisdiction of the Civil Courts throughout the Bombay Presidency in matters relating to the land-revenue, be taken into consideration; and in doing so, he would touch very briefly upon the more material changes which the Select Committee had now made in the Bill as previously laid before the Council. In their last report, paragraph 2, they had said with reference to the second paragraph of clause (*c*), section 4, that the "provisions regarding claims to set aside sales for arrears of land-revenue have been framed on the understanding that the Land-Revenue Code Bill, now pending in the local legislature, which contains safeguards against improper sales, will become law." This Bombay Revenue Code was still before the local legislature, and it was not easy to say when such a large measure was likely to be passed into law. Therefore, the Committee had thought it better to insert in the first section of the Bill a proviso, to the effect that so much of section 4 as related to claims to set aside, on the ground of irregularity, mistake or any other ground except fraud, sales for arrears of land-revenue, should come into force on such day as the Governor-General in Council directed in that behalf. For his own part, MR. HOPE confessed that he thought this precaution was somewhat unnecessary, and that it arose from the erroneous supposition that the present Bombay law did not provide sufficient safeguards for the recovery of revenue. But the new Code would be no material amendment in that respect; the present law, as far as he was able to see, and as it had been administered by him for a series of years, was perfectly good and sufficient. And if it was thought that it was not sufficiently clear for the use of some of the inferior establishments, it would be very easy for the Bombay Government at once to issue an executive circular of explanation on the subject. However, the matter was not of very great importance either way, and the provision the Committee had inserted had at any rate the recommendation of erring on the side of precaution.

The next change which had been made was that of striking out the clause (*b*) which was in the first section and which had reference to sites (under the provisions of sections 5 and 6 of the Bombay Act IV of 1868) of towns and cities. MR. HOPE had pointed out at the time that this proviso was in reality quite superfluous, since exactly the same object was already attained by the greater proviso in section 4 itself; and on further consideration the Committee had struck it out altogether on these grounds.

The Committee had also made a material alteration as regards the date from which the Bill was to have effect. Previously it was provided that the Bill should have effect upon all suits which had been filed after the 7th August 1873. Probably, when this date was inserted in the Bill, it was expected that the Bill would very soon become law, and that it would be necessary to bar a flood of suits which might be filed during the interval devoted to the passing of the Act. But as it had happened, they had been assured by the Bombay Government that there had been no such great flood of suits. They had been assured that the number of these suits had been very insignificant, and therefore they had made the material alteration of admitting the whole of such suits which had

been presented to the Civil Courts, and only making the Act take effect from the passing of it. The next change he had to point out was that, in order to make it perfectly clear that the Bill applied to all lands and land-revenue, and to remove doubts raised in certain quarters as to the meaning of the word "land" in the Bombay Regulation XVII of 1827, the Committee had inserted in the interpretation-clause that land included the sites of villages, towns and cities. They had also, in section 17, added a declaration that so much of the Regulation as was for the time being in force in any part of the territories to which this Act extended should be deemed to have been in force, and to have always been in force, in the sites of villages, towns and cities in such parts. This was in accordance with the actual interpretation of the law since 1827, and with the continuous practice ever since these sites passed under British rule; so that, he apprehended, there could be no objection to a more specific definition of land as it in reality existed. They had also improved the definition of "land-revenue" and "revenue-officer," because it had been pointed out that the wording which had been previously adopted might, under some circumstances, include objects which were not strictly of the nature of land-revenue; that was to say, advances made under the Land Improvement Act, and such other things which were not of the nature of revenue demands, but rather of the nature of loans, and therefore might properly remain within the jurisdiction of the Civil Courts.

There was only one other point on which he need trouble the Council by noticing. It was stated in the report that "we have empowered the Governor General in Council and also the Local Government to refer, for the decision of the High Court, questions arising in trials and investigations which, but for the proposed Act, might have been dealt with by a Civil Court; and we have required the case to be disposed of conformably to such decision." He was obliged to say that he was unable altogether to approve of this section, or the form in which it had been drafted, inasmuch as it allowed a reference of any question to the Civil Courts. A suggestion for a provision of this sort had come in somewhat general terms from a high quarter, and MR. HOPE thought that if it had been worked out from the model of section 204 of Act XVIII of 1873 (the North-Western Provinces Rent Act), which permitted the Collector to refer cases relating to questions of law to Civil Courts; it would have been altogether unobjectionable and exceedingly desirable, and also consistent with the line which had been drawn in this Bill in the proviso and other parts of section 4, which had been fully explained in their last Report. The section, as now drafted, allowed the reference of any question to the Civil Court; it left the Local Government without any indication of what was the intention of the legislature as to what class of cases it was contemplated might be referred to the Civil Courts. It would therefore be open to the Local Government either to leave it entirely a dead letter, or so to work it as to make the whole rest of the Act a dead letter. However, as the other members of the Select Committee did not agree with him on this point, he had signed the report, but had just mentioned to the Council the actual difficulty which occurred to him. Any remarks which it might appear necessary to make upon the policy of the measure, as a whole, and the desirability of its being passed, he proposed to defer until the motion that the Bill be passed came before the Council on a future day.

The Hon'ble MR. HOBHOUSE said he was not going to make any observations now about the main principles of this measure, because they would be more appropriate when the motion was made for the Bill to be passed. But he had one or two observations to make on the details which arose upon the Report of the Select Committee. The Council would see that in their last Report in October 1875, the Select Committee introduced very large modifications in the Bill: the present Report altered it very little, only in matters of detail, none of which appeared to him to affect the principle of the Bill.

With regard to the postponement of the operation of the clause marked section 4, clause (*c*), the Committee did not entertain any doubt that sales were conducted in the Presidency of Bombay with care and with judgment. At the

same time when you came to shut people out from taking the opinion of the Civil Court on the validity of a sale, the Committee thought it necessary to provide in the law itself for certain methods of procedure—certain formalities which, however they might be provided for now by executive order, were not provided for by positive law. It was so done when a similar Act was passed for the North-Western Provinces. Simultaneously with a provision which prohibited the Civil Courts from interfering in these matters, provisions were enacted which established a more formal and regular procedure by the Revenue officers.

With regard to pending suits, he could confirm what was said by the Hon'ble Mr. Hope. The Bill originally provided that it should apply to all suits which might be instituted after it was introduced. It was then expected that there would be a great number of suits filed in consequence of the introduction of this measure, and he believed that in Canara such was the case—he could not say positively that it was in consequence of the introduction of the measure, but the Canara litigation was one of those phœnomena which led to the introduction of the measure. When the Bill was introduced, the Government were told that there were six hundred suits filed in Canara against the Government, and the number had since increased to about one thousand. The extra four hundred must, he supposed, have been instituted after the Bill was introduced. In point of substance, these suits had been disposed of by the decision of one of them; for they all depended upon one principle, which was decided against the plaintiffs. If the judgment had gone differently, if it had gone against the Government, there would have been required one thousand distinct decisions, a thousand enquiries, a thousand accounts, and so forth; however judgment had been given in favour of the Government, and so the whole of these thousand suits had been practically disposed of by the decision on one single plaint. We were then not afraid of the amount of suits instituted between the date of the introduction of the Bill and the present time. Moreover the Bill had been pending much longer than was expected, and it would be a harsh measure to tell a person, who had instituted his suit two years ago, and who had prosecuted it up to this moment, and perhaps had very nearly got a decree, that his suit was barred, and that his cost and labour went for nothing. The Committee had therefore made the Act apply only to suits instituted after the passing of the Act, believing that in doing so, they should not do the Government or the revenue any material harm, thinking that this amount of consideration to the suitor was reasonable.

With respect to the definition of the word "land" a great deal of objection had been raised. We had been told that it was a sweeping and enormous definition; that it was impossible to conceive anything which should not fall within the definition. The Committee, however, had thought fit to retain the definition, with the one alteration referred to by his hon'ble friend. The fact was that there was nothing in the definition which would not flow naturally from the use of the word "land," properly construed. He himself, speaking as a lawyer, wished the definition to be wholly omitted, not as being wrong, but as being superfluous. But he was told—as he had often been told before in similar cases—that it was better to leave in these words; that the Act was to be construed by a number of persons who were not very familiar even with the English language, and who were not at all familiar with English legal language. This definition included nothing which was not included in the definition of "immoveable property" in the General Clauses Act; therefore, it was the general meaning of the words "immoveable property" and it was also the general meaning of the word "land." He did not think the definition in this Bill extended the meaning of the word one jot or tittle beyond what it extended of its own force. He was indeed informed that some difficulty had arisen in the Presidency as regards sites of villages, towns and cities. How that difficulty had arisen, he did not know. But how any one could conceive that the word "land" did not of its own force include the sites of villages, he could not imagine. Every Revenue officer for the last fifty years had acted on the supposition that land meant land, whether it was the site of a village or not, and if there were doubts as to the validity of their proceedings, it was

better to allay them. To that extent, the Committee had extended the definition, but they had not proposed to contract it as had been suggested to them.

With respect to the definition of the term "land-revenue," the Committee had made an alteration (section 5, clause *(f)*) which excluded suits to set aside cesses or rates. The Bill had described these as "any cess or rate authorized by the Government." It was objected that the clause might empower the Government to impose a cess or rate without any authority whatever, and the Civil Courts would not be able to interfere. Of course such a thing never was intended for one moment: the possibility of the Government acting wholly without the warrant of law was not contemplated. But in order to meet the objection that had been taken, the Committee had provided that the cess or rate must be authorized by the Government under the provisions of any law for the time being in force.

The only other point in the Report which he considered it necessary to notice was that which related to what were now sections 12 and 14 of the Bill. These were the sections which enabled the Government to refer any question that they thought proper for the decision of the High Court. Now, although it might be very proper to remove whole classes of cases from the cognizance of the Civil Courts, yet it seemed to him that there was no case in the world in which there might not arise some question which those who had to decide the case might prefer to have decided by the more rigid methods of a Civil Court. These sections therefore left a safety-valve in such cases, and whenever the executive Government thought that they had got a case on which they would prefer the decision of the Civil Court, they were empowered to take it. The principle of such a provision was not an uncommon one. It was known in England, and when particular subjects were committed to the jurisdiction of Commissioners, not being a Court of law, it was sometimes provided that if in their discretion they desired to have a judicial decision on a particular point, they might refer the case for the purpose to some particular Court or other, such as the Court of Chancery, the Judicial Committee of the Privy Council, or any other Court which might be named. The Committee had imported that provision into the Bill, and they were exceedingly sorry that they could not carry the judgment of Mr. Hope with them. But as it was, the provision seemed to the rest of the Committee desirable, and not in any way to contravene the broad principles of the Bill in those cases which affected the incidence, the amount, or the assessment of the revenue. Such cases, except in certain instances, were still generally withdrawn from the cognizance of the Civil Courts, but the assistance of the highest of those Courts might be obtained when wanted.

Those were the only points on which he wished to make any observations, and he hoped the Council would accept the recommendations of the Select Committee.

His Excellency THE PRESIDENT said:—"The Council are very much indebted to the Hon'ble Members who have served from time to time upon the Select Committees to which this Bill has been referred. The Bill has now been before the Legislative Council for nearly two years and a half, and the Government of India both in its executive capacity, and also meeting, as we now do, in Legislative Council, has considered with the greatest possible care and attention the objections which have from time to time been raised against the provisions of this Bill. All those doubts and objections which the Government and the Select Committees considered worthy of attention have now been met; and whatever may be the opinions of some people upon the provisions of the measure, this I think we may say—that no Bill has ever received more careful and patient consideration. I may add that I believe that in the whole of India there will not be found men more capable of giving a sound opinion upon the matters contained in this Bill than the Members of the Select Committee. Mr. Hope who, from his own personal knowledge of the subjects dealt with by the Bill, has been able to render most valuable assistance. We have

had on the Committee the assistance of Sir William Muir, whose knowledge of land-revenue in the North-Western Provinces is so well known, and Sir Alexander Arbuthnot, who is a high authority on questions relating to the land-revenue in Madras. Mr. Bayley, who has had large experience upon the same subject, has also afforded valuable assistance to the Committee. No man, to my personal knowledge, could have devoted more careful and continuous attention to any measure of importance, such as this undoubtedly is, than my hon'ble friend Mr. Hobhouse has to this measure. Therefore, I believe that the Council will do well to accept the amendments proposed by the Select Committee in the Report now presented, reserving any discussion which Hon'ble Members may wish to raise upon the principle of the Bill till this day week, when it is proposed that it should be passed into law."

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Mr. Inglis be added to the Select Committees on the following Bills:—

To declare and amend the laws to be administered in Oudh.

To regulate the procedure and increase the jurisdiction of the Courts of Magistrates in the Presidency Towns.

To amend the law relating to Opium.

To amend the law relating to Merchant Seamen.

The Motion was put and agreed to.

PRESIDENCY MAGISTRATES AND OPIUM BILLS.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Mr. Cockerell be added to the Select Committees on the following Bills:—

To regulate the procedure and increase the jurisdiction of the Courts of Magistrates in the Presidency Towns.

To amend the law relating to Opium.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill for the better control of dramatic performances——The Hon'ble Mr. Inglis, the Hon'ble Rájá Nárendra Krishna and the Hon'ble Mr. Cockerell and the Mover.

The Council then adjourned to Tuesday, the 28th March 1876.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 21st March 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th MARCH 1876.

GENERAL REMARKS.—In Madras there has been a good fall of rain in Malabar, and light showers in parts of Kistna, Kurnool and Tanjore. The standing crops have suffered in the last named district and in Malabar. Showers have fallen throughout Mysore and Coorg. In Bombay there has been some rain in Belgaum and Dharwar; hail and strong winds have done some little damage to the standing crops in parts of Kurrachee. Slight and unevenly distributed rain is reported from Eastern Bengal and the south of Orissa. Spring crops generally promise well, but rain is required in some parts to admit of ploughing. In Sylhet there has been some seasonable rain with good results, but rain is much needed in other parts of Assam. No rain is reported from the North-Western or Central Provinces or from Oudh. In all the harvest is nearly over, and the outturn has generally been good. In the Punjáb rain has fallen in Mooltan, Dera Ismail Khan, Rawalpindi and Peshawar, and harvest prospects throughout the Province are fair. In Rajputana a good harvest is being reaped.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 30th)	·20 at Vinukonda; none elsewhere.	Standing crops good; prices stationary; cholera, 33 cases, 16 deaths, during past week; fever and small-pox continue; mild epizootic aphtha; dry fodder used; markets well supplied locally.
Kurnool („ 29th)	·09 in Kurnool; over ·5 in Cumbum; none elsewhere.	Season generally good; second crop paddy flourishing; cotton being gathered; other crops almost harvested; pasture scanty; water sufficient; dry fodder obtainable; markets well supplied; prices steady; foot disease in four taluks, and rinderpest in one taluk; fever prevalent; cholera in Cumbum, Pattikonda and Ramalkota taluks, 66 seizures and 28 deaths in 2 villages around Kurnool in 48 hours.
Tanjore („ 30th)	Rain at Negapatam; none elsewhere.	Rivers almost dry; water in tanks none; water over anicuts none cultivation a few dry crops in some places; standing crops withering in several localities; harvest, wet crops to small extent; yield moderate; pasture insufficient; prices almost stationary; markets well supplied; public health, cholera abating, number of seizures 79, deaths 43; small-pox in some parts of Negapatam taluk; cattle disease in many places; some loss.
Madura („ 30th)	*Nil*	Crops fading, harvest almost completed; yield bad; health good; cholera, small-pox and fever continue; prices stationary.
Malabar („ 30th)	1·10	Rain favourable for garden cultivation; markets well supplied; prices steady; bowel complaints in all taluks except in Cherakal and Wynaad, 212 cases, 167 deaths; small-pox prevalent, especially in North Malabar; cattle disease in Wynaad and Walluvanad; pasture withered.
		General Remarks.—General prospects of these districts same as last, except in Kistna, Kurnool, Tanjore and Malabar, where there has been some rain.
Bombay— (Mar. 30th).		
Sind (March 29th).		
Kurrachee ...	...	Rain general on 15th in Bádámi tapa, taluka Dádú, accompanied with hail-stones; strong winds in Sehwan have blown down crops; river rising; on 25th, six feet eight inches against four feet ten inches on the same date last year.
Shikárpur ...	...	Weather daily getting warmer; wheat harvest commencing; crops good; mangoe blossoms injured by blight in Lárkána taluka.
Hyderabad ...	...	Weather sultry; fever prevailing in Hyderabad and Mirpur Khás talukas; small-pox still in Badin taluka; river rising; *rabi* reaping progressing.
Upper Sind Frontier ...	...	Weather cloudy; *rabi* crops being reaped, very superior in Deha Thul and Tangwáni.
Guzerat.		
Ahmedabad ...	...	Weather warm; cholera in Dhandhuka and Viramgám.
Kaira ...	...	Weather cloudy; no change as regards crops.
Surat ...	...	Three cholera cases in Surat, 2 deaths; 7 cases in Bárdoli, 6 deaths; 4 cases in Mándvi, 2 deaths.
Broach ...	...	No change.
Khandesh and Nasik.		
Khandesh ...	...	Weather hot; fever in three talukas.
Nasik ...	...	*Rabi* crops harvested; cattle disease in Niphád taluka; small-pox in Igatpuri taluka.
Konkan.		
Tanna ...	...	Reaping of *rabi* completed; small-pox in almost all talukas.
Deccan.		
Poona ...	...	No change.
Ahmednagar ...	...	
Sholapur ...	...	Weather very warm; health good.
Satara ...	...	Harvesting of late crops nearly completed; public health good, except in Mán, where measles have appeared.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	0·21	Cholera continues in 5 talukas.
Dharwar ...	0·08	Total rain-fall 0·90; no material change in the state of crops and public health, excepting an increase of cholera in Ránibennur and Gadag talukas.
Kanara ...	...	Reaping of *rabi* on coast commenced; cholera continues in Balaghat.
Kaladgi ...	...	*Rabi* reaping completed in 4 talukas; cholera in 4 talukas, 38 deaths; cattle disease in Muddebihál taluka.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Health good; 134 cholera cases in Morvi taluka, 61 deaths.
Wadhwán ...	...	Weather cloudy; cholera throughout Jhalawad, 204 cases, 96 deaths.
Baroda ...	...	Reaping of *rabi* and cotton crops finished. *General Remarks.*—*Rabi* harvest nearly finished; cholera in Kattywar, Ahmedabad, Surat and Southern Mahratta Country; small-pox in Bombay, Tanna and Poona.
Bengal—(Mar. 30th)		
Chittagong ...	·43	Weather cool; rain has fallen generally over the district; cholera in Putteah and south of the district.
Noakhally ...	0·08	Heat is daily increasing; the mornings of the 17th, 18th and 19th were cloudy, and the morning of the 21st foggy; wind is generally from the south; a gale with a heavy storm passed over Luckipore on the 16th and several houses were blown down; chillies, pulses, linseed and *sessamum* are progressing favourably, and some of them are being gathered; ploughing for the early rice crop and sowings of early and late rice together in the low grounds are now going on; cholera is very bad in the town and in several stations; cases of small-pox are also reported from Bamni.
Chittagong Hill Tracts...	·75	A heavy shower of rain, accompanied with squalls, on the 19th instant; *joom* cutting still continues; hill-men have commenced to burn *joom* here and there.
Hill Tipperah ...	*Nil*	Weather seasonable; no change in the state of the crops since last report.
Backergunge ...	1·09	Weather warm and fair; annual sowings are beginning; cholera is reported from the Patuakhally sub-division.
Furreedpore ...	*Nil*	Weather hot; *boro* or *jali* rice and *aous* are doing well; winter crops, which are poor for want of rain, but have been kept alive by heavy dews, will soon be reaped; cholera is prevalent.
Dacca ...	0·1	Weather cool for the season; crops little on ground; prospects good; cholera extending.
Mymensing ...	*Nil*	Weather very dry; *boro* rice is favourable; rain is much wanted for the millet crop.
Tipperah ...	·11	Weather warmer, cloudy, and threatening rain; spring rice is being reaped; prospects of the crops are good.
24-Pergunnahs ...	*Nil*	Weather dry and warm; no crops on the ground; land is being prepared for spring sowings; cholera cases reported from sub-divisions Diamond Harbour, Barripore, Baraset and Basirhat.
Jessore ...	*Nil*	Weather bright and clear; spring rice continues promising; ploughing for, and sowing of, the early rice continues.
Nuddea ...	*Nil*	Weather hot and dry; hot winds in the middle of the day; all crops have been harvested, except the late *rohur*; *rohur* and indigo are looking well; a few cases of cholera are reported.
Moorshedabad ...	*Nil*	Weather getting warm, windy; state of the crops is the same as in previous week; *rabi* and cold-weather crops reaped; *boro dhan* thriving; indigo, mulberry and sugarcane in fair condition; cholera has broken out in Sujagunge, Burwa, Jellinghee, Bhurrutpore and Gour thanas.
Pubna ...	*Nil*	Weather hot and fine; the crops now on the ground are of no great importance; more rain would do good; much cholera reported to the south of Aronkola; medical relief is being given.
Rajshahye ...	*Nil*	Great heat and no rain; no change for the better in the state and prospects of the crops since last report; rain is anxiously looked for; cholera cases are increasing in frequency.
Bogra ...	*Nil*	Weather hot in the day; rain is much wanted for ploughing; most of the crops are reaped and have given a fair outturn; the hardness of the ground will delay sowing, except where there is water out, but the Collector does not apprehend any ultimate ill from this.
Maldah ...	*Nil*	Weather is becoming hot; wind from south-west to north-east; it was rather cloudy on the 25th instant; state and prospects of the crops are much the same as last week; *rabi* is generally being reaped; slight loss from want of rain; 11 deaths from cholera during the week; 3 cases, none terminating fatally, reported of small-pox.
Dinagepore ...	*Nil*	Weather very warm during the day; hot west winds blowing for the last three days; no change in the state and prospects of the crops since last week.
Rungpore ...	*Nil*	Weather hot and dry; strong hot winds; *rabi* crops are being gathered in, they are not so good as last year owing to want of rain; in the Kurigram sub-division *aous* is some inches high; *cheena* and *kaon* are generally up; rain is wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ...	*Nil*	It is becoming warm; there was an east wind during the greater portion of the week; the want of rain is being very much felt; the prospects of the *bitri* (*aous*) *dhan* and of the *cheena* and *kaon* (millets) crops are unfavourable.
Jalpaiguri ...	*Nil*	No sign of rain; the want of rain begins to assume a serious aspect, as without it there will be little chance for the *bhadoi dhan* crop, for the successful cultivation of which the ground is at present too parched and burnt up; any real failure of the *bhadoi* crop would be attended with distress in Boda and other southern parts, where the last *haimunti* crop was a poor one.
Darjeeling ...	*Nil*	Rain is much needed; temperature is alternately warm or chilly, according as the weather has been bright or misty, throughout the week; in the hills the young crops of wheat, barley, buck-wheat and Indian-corn are progressing favourably; in the plains none of the seed has come up, except a little wheat; all doing well; but rain is greatly needed.
Midnapore ...	0·6	The weather is already very hot; the late rain has done good to the mulberry and indigo; cholera, in a sporadic form, still continues, as does small-pox in the south-east of the district.
Howrah ...	*Nil*	Weather warm and bright; in many places the ground is being prepared for the next crop.
Hooghly ...	*Nil*	Weather seasonable; gourds and *jhinga* are being planted out; the late rains have proved beneficial to onions, *pautols*, water melons, &c., *jali dhan* and indigo; mangoes doing variously; land is being prepared for paddy cultivation; more rain is wanted; *rabi* harvest is almost over; a serious outbreak of cholera at Serampore; cholera and small-pox scattered in several places of the district.
Burdwan ...	·19	Rain wanted for the *teel* and cotton crops; cholera has nearly ceased in the town of Raneegunge, but is still prevalent in the interior of that sub-division, and in Culna and Jehanabad.
Bankoorah ...	*Nil*	Weather hot and dry; nothing to note regarding the state and prospects of the crops; cholera is diminishing.
Beerbhoom ...	*Nil*	Weather hot, with strong westerly wind; no change in the state of the crops; rain is wanted.
Sonthal Pergunnahs ...	*Nil*	Weather very hot and windy; prospects of mango and *mahua* are excellent; cholera bad in many places in the district, chiefly from Godda, round the west and south-west; small-pox reported from two villages in Rajmehal.
Bhagalpur ...	*Nil*	Strong winds during the greater part of the week; *rabi* harvest nearly over; prices still easy; general health is very good; a little small-pox about.
Monghyr ...	Return not received.	High west winds; no change in the state and prospects of the crops since last week; the Jamooe sub-divisional officer reports that the *rabi* crop in his jurisdiction will be less than a six-anna crop; this sub-division, however, is chiefly a rice tract; the sub-divisional officer at Begoosaraie reports that the harvest is far advanced; that the *rohur* crop is good, but that the wheat, which is the principal crop, will be an eight-anna crop only; the Collector, however, judging from what he saw during his tour, calculates that, taking high and low lands together, nearly an average *rabi* crop will be cut throughout the district; the mangoe crop promises to be the best known for many years, and the *mahua* crop, as usual, is good; prices continue easy; six months have now passed without rain.
Purneah ...	*Nil*	Strong west wind; the whole country is quite dried up; there has been no rain for more than six months, and it is much wanted for the spring sowings of all sorts; the pulses are being reaped and are turning out fairly; the season has been unhealthy; small-pox has been very prevalent, and cholera has now made its appearance.
Durbangah ...	*Nil*	Weather dry, strong west winds prevailing; the *rabi* crops are being harvested; the crop in the Tajpore sub-division is reported to be nearly, if not quite, as good as originally estimated; prices stationary.
Mozufferpore ...	Return not received.	Weather cloudy in the early part of the week, but latterly hot, with very high west wind; there is nothing new to report about the state of the crops; the *rabi* harvest is still going on.
Sarun ...	*Nil*	Sky now and then cloudy; hot during the day and cool at night; high west wind is blowing; no change in the state and prospects of the crops since last report; the *rabi* harvest is still going on, and a fair outturn is expected; indigo prospects are not generally good; opium is being collected, and the weighment will shortly commence; *cheena*, *moongh* and *Josoria dhan* are being sown; the mangoe crop promises unusually well this year; general health is good.
Chumparun ...	*Nil* (Previous week *Nil*)	There has been no rain, though the weather has been cloudy; the prospects of the crops are fair, and the produce of the *rabi* will be on the whole larger than was at one time anticipated; there will be a very good eight-anna crop.
Patna ...	*Nil*	Weather seasonable; no rain as yet; crops nearly all harvested, and generally yielding well; cases of cholera and small-pox reported generally throughout the district, but not more in one part than another.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Gya ...	*Nil*	High west winds and seasonable; highest reading of thermometer in shade 98° 8′; nothing new to report from last week; *rabi* is generally harvested everywhere.
Shahabad ...	Return not received.	Weather hot, with high westerly winds; *rabi* harvest is nearly completed; result is about a ten-anna crop. Small-pox is still prevalent.
Hazaribagh ...	*Nil*	Weather seasonable; temperature steadily increasing; no change to report; the *rabi* crop has all been cut and carried; cases of cholera and small-pox increasing in number.
Lohardugga ...	*Nil*	Weather seasonable, rather warm; the *rabi* harvest is now over in Palamow, and nearly over in Chota Nagpore Proper; the outturn is much below the average; the *mahua* crop promises excellently; small-pox and measles very prevalent, and cholera has appeared in several parts.
Maunbhoom ...	*Nil*	Weather too dry; the ryots have done very little ploughing in the district for want of rain; if rain does not fall soon, the *gorra dhan* will not be sown, and the ryots will, to the extent of that crop, be losers.
Singbhoom ...	*Nil*	Weather seasonable; no crops to report about; district is healthy.
Balasore ...	*Nil*	The weather is unsettled, and the direction of the wind is for the season singularly variable; in the north of the district ploughing has become pretty general; in the south it has not yet commenced; cholera and small-pox are still prevalent.
Cuttack ...	...	Rain-fall of one inch reported from the interior; weather close and oppressive; no crops on the ground; public health is good.
Pooree ...	·02	Weather seasonable; the *dalwa* paddy crop has failed in many places for want of rain; the state of other crops is good; a good shower of rain fell in the Khoorda sub-division, where ploughing may be commenced.
		General Remarks.—There has been slight rain-fall in Burdwan, Dacca, Chittagong and Tipperah during the week. The crops that are still standing on the ground are of no great importance. Sowing of early rice has begun in some places. Land is being prepared in tracts where rain has fallen. The harvest of spring rice is promising.
N. W. Provinces—		
Benares (Mar. 29th)	...	Harvest gathered and good.
Allahabad („ 28th)	...	Harvest nearly gathered; outturn exceptionally good.
Meerut („ 29th)	...	Prospects good.
Bareilly („ 29th)	...	No change.
Almora („ 27th)		
Punjab—		
Delhi (Mar. 29th)	*Nil*	Harvesting in progress; health good.
Hissar „	*Nil*	*Rabi* fasl ripening; health good; a few cases of small-pox.
Umballa „	*Nil*	Health good; crops suffering.
Jullundur „	*Nil*	Crops fair; health good.
Lahore „	*Nil*	Crops and health good.
Mooltan „	Slight rain	Crops and health good.
Dera Ismail Khan „	·25	Health and harvest good.
Rawalpindi „	·50	Prospects fair; health good.
Peshâwar „	·25	Prospects good.
		General Remarks.—Harvest prospects generally fair; public health good.
Oudh—		
Lucknow (Mar. 29th)	*Nil*	Cloudy; agricultural prospects favourable, and public health good.
Sitapur „	„	
Fyzabad „	„	
Central Provinces—		
Upper Godavari (Mar. 25th)	...	Hot; prospects favourable; health good; prices falling.
Sambalpur ...	...	Cloudy; harvest over; 10 more cholera cases.
Bilaspur ...	...	Prospects favourable; small-pox and cattle disease prevalent; prices steady.
Raipur ...	...	Harvest gathered; yield average; health good; prices easy.
Chánda („ 26th)	...	Cloudy; *rabi* threshing; 11 cholera deaths.
Chhindwára ...	...	Clear, warm; *rabi* cutting continues; health good; prices steady.
Betul („ 27th)	...	Warm; reaping of *rabi* completed; 93 cholera cases, 37 deaths; prices steady.
Balaghât ...	...	Clear, warm; *rabi* cutting continues; small-pox prevalent; prices steady.
Bhandara („ 28th)	...	Close, cloudy; *rabi* gathered; fever and small-pox continue; prices easy.
Nagpur („ 29th)	...	Cloudy, close; *rabi* threshing; small-pox increasing; prices steady.
Wardha ...	...	Clear; small-pox prevalent; prices stationary.
Nimár („ 29th	...	Cloudy; prices stationary.
Hoshangabad ..	...	Hot; outturn of *rabi* fair; cholera broken out in few villages; prices rising.
Narsinghpur ...	...	Reaping *rabi* finished; harvest very good.
Jubbulpore ...	...	Cloudy; *rabi* harvesting, threshing continues; small-pox and cattle disease prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*continued.*		
Saugor (Mar. 29th)	...	Cloudy; *rabi* cutting continues; harvest good; prices falling.
Seoni ...	...	Hot; *rabi* cutting continues; prices stationary.
Damoh („ 29th)	...	Prospects and health good.
Mandla ...	...	Prospects good; cholera decreasing.
		General Remarks.—The harvest has been got in in most districts, and prices are easy; cholera is reported in 5 districts of Sambalpur, Chanda, Hoshangabad, Betul and Mandla.
British Burma—		
Arakan Divn. (Mar. 30th)	...	Several fatal cases of cholera have occurred in the town and district of Akyab; in other respects public health is good.
Pegu Division. „	...	Public health generally good except at Prome, where small-pox is very prevalent; a few deaths from cholera have also been reported from the same place.
Tenasserim Divn. „	...	Health good.
Assam—		
Gauhati (Mar. 30th) ...	·05	Weather becoming hot; winds from north-east; a slight shower of rain and hail on 29th; rain much needed for crops generally; small-pox at Barpeta and Sindurdia.
Sylhet „	1·64	Weather seasonable; field work progresses.
Hyderabad Assigned Districts—		
Umraoti (Mar. 30th)	...	*Rabi* gathered; few cases of small-pox in Elichpur; other districts healthy.
Mysore and Coorg— (Mar. 30th)	...	Showers have fallen throughout Mysore and Coorg; prices show a tendency to rise, and no improvement can be looked for at present in prospects of season; cholera prevalent in Chitaldroog and Kadur, and to a less extent in other districts.
Rajpootana—		
Sirohi (Mar. 27th) ...	...	Wells good; health good; harvest very good; weather cloudy and warm.
Meywar („ 24th) ...	...	Wells, health, and harvest good; weather cloudy and pleasant.
Marwar („ 25th) ...	...	High winds from south-west; weather cloudy, a few drops on the 20th noon; small-pox still prevails; harvest promising.
Harowtee („ 18th) ...	...	Weather cloudy and unseasonable; health and prospects good.
Ulwar („ 22nd) ...	...	Wells good; health excellent; crops splendid.
Bhurtpore („ 30th) ...	...	Harvest proceeding; weather still cloudy; health good.
Jeypore ...	...	Crops being harvested favourably; health fair.
Ajmere ...	...	Weather cloudy, but no rain; sickness still prevalent; prospects of crops satisfactory.
Central India—		
Indore (Mar. 29th)	...	No change to record; weather seasonable; cholera and small-pox still hanging about in Rewah and Sohawul.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN BENGAL FOR THE YEAR 1874-75.

Nos. 133—47 I, dated Fort William, the 20th March 1876.

Read—

Letter from the Government of Bengal, in the Public Works Department, Irrigation Branch, No. 852 I—A, dated the 16th December 1875, forwarding a copy of the Revenue Report of Irrigation Works in Bengal for the year 1874-75, and of the Resolution of that Government reviewing the same.

OBSERVATIONS.—The Government of India is glad to observe that this Report has been received two months earlier than its predecessor, but it is, nevertheless, still one month in arrears. It is hoped that future Reports will be received in due time.

2. The operations of the year having been reviewed in detail by the Local Government, only the general results, together with a few points requiring attention, will be noticed in this Resolution.

3. The gross revenue realized has increased from Rs. 1,47,688 to Rs. 2,17,590, or 47 per cent.; and the increase, it is reported, would have been much greater but for the disastrous effects of the cyclone which occurred in October last, and which necessitated large remissions of demands.

4. Notwithstanding, however, this increase of revenue, the net deficit is about the same as in the previous year, being Rs. 1,43,800 against Rs. 1,43,268, a result mainly due to postponement of collection and remissions as well as to the heavy repairs necessitated by that cyclone.

5. The assessments of the year amounted to Rs. 2,72,370, or Rs. 77,530 in excess of those of the previous year; the net deficit to Rs. 89,020 against Rs. 96,120 in 1873-74.

6. The total area of irrigation has increased from 48,920 acres to 94,777, or nearly cent. per cent., which is very satisfactory.

7. The increase of Rs. 37,848 over the navigation dues realized in the previous year is very satisfactory, the average being Rs. 592 per mile of navigable canal in use, against Rs. 419 in the year previous. This increase would also have been much larger had it not been for the enforced closure of the Midnapore Canal for 3½ months during the height of the traffic season, for the purpose of repairing the damage caused to the canal by the cyclone.

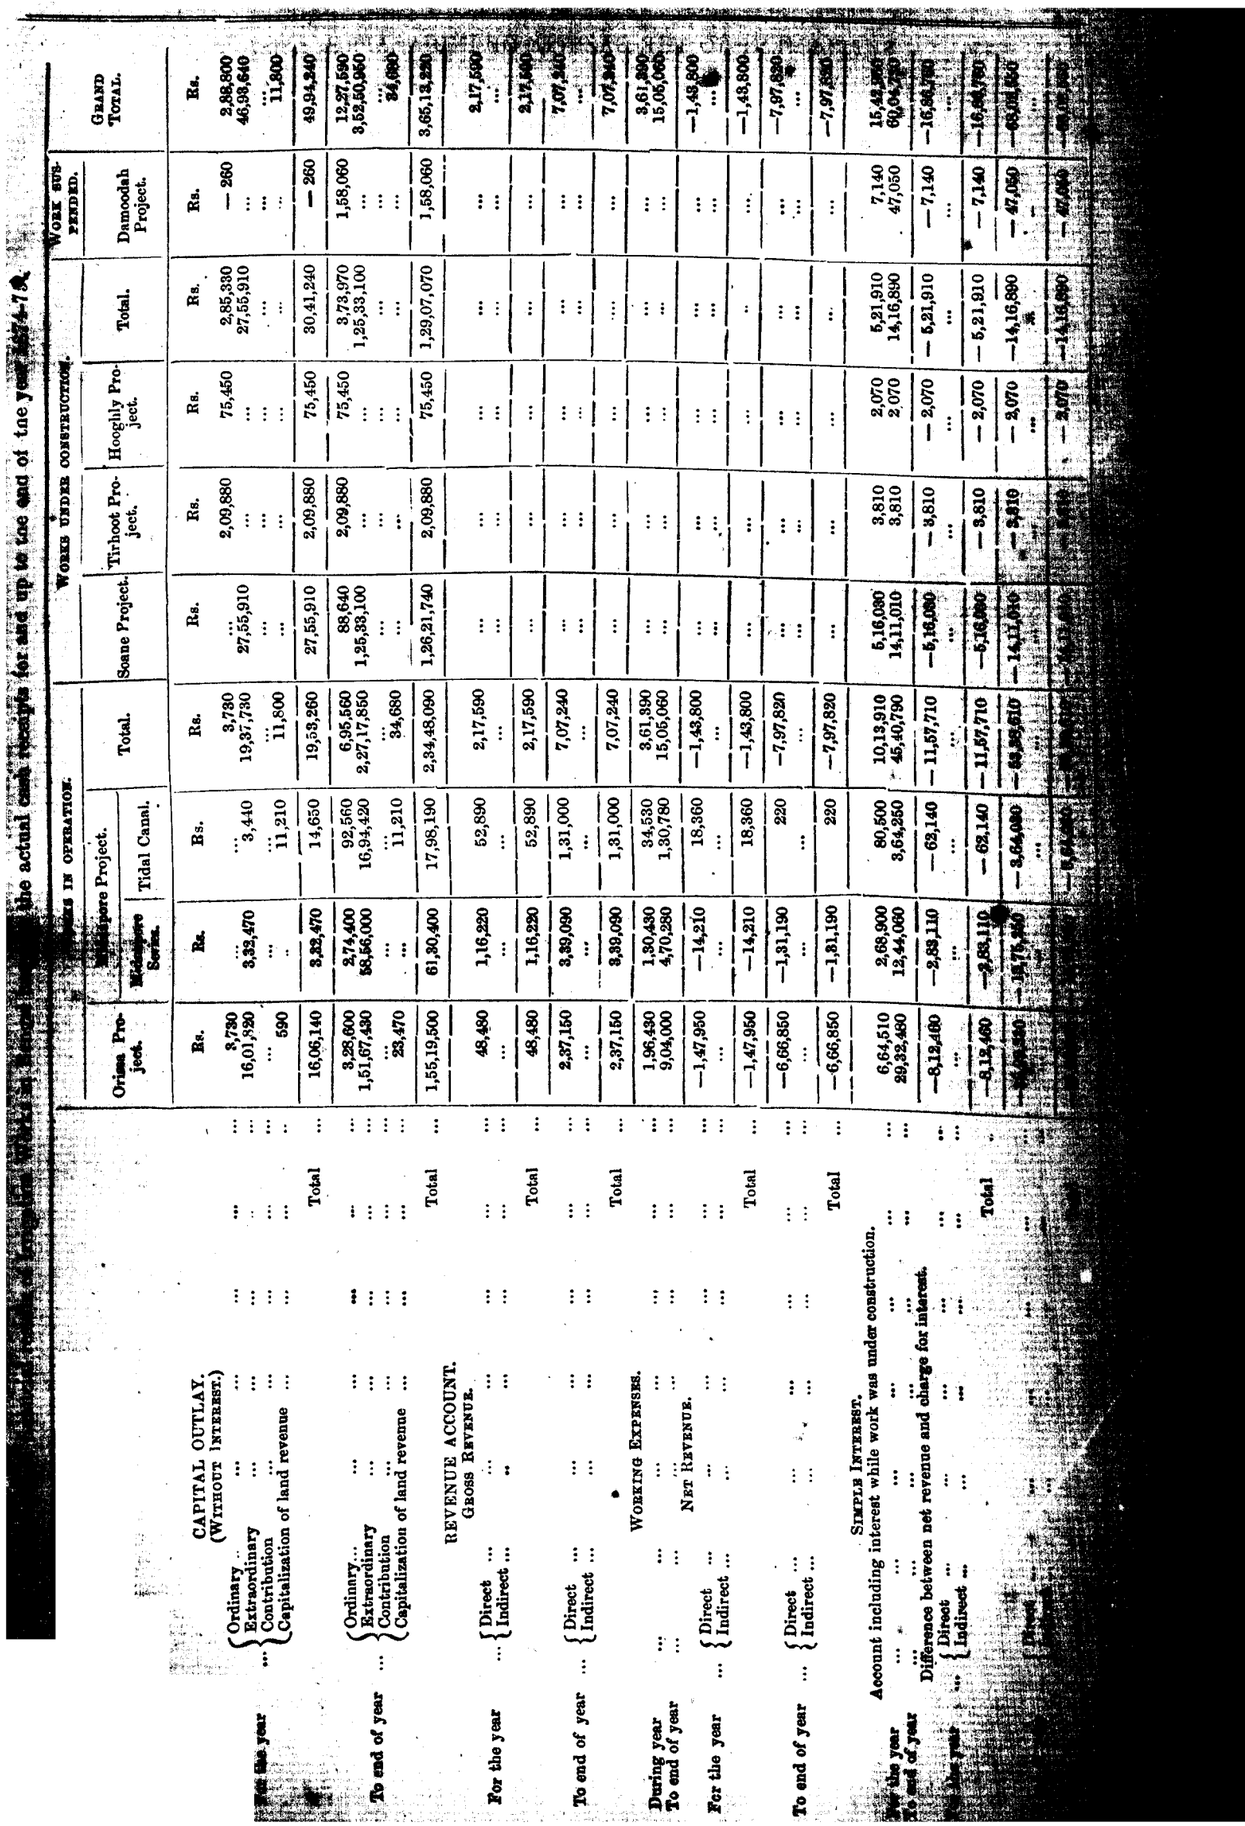
8. Adverting to the remarks made in para. 16 of the Chief Engineer's Report regarding the need for extending the navigable canals in Orissa to points of commercial importance, instead of allowing them to stop as at present at places of no importance, the Government of India would observe that recommendations of this nature should not be made by the Chief Engineer in his annual Reports, but should be separately submitted, with reference to the data given in those Reports. It is for the present understood by the Government of India that all proposals made by the Local Government for the extension of these canals have been included in the estimates now about to be sanctioned and reported to Her Majesty's Secretary of State for India.

9. The Governor General in Council is glad to see that the canal rules which have been in force since the year 1872-73, and which were devised to meet the exceptional circumstances of Orissa, are said to have on the whole worked well.

10. It is observed that the appointment of Revenue Superintendent on the Orissa Canals has been abolished, and the duties of that Officer transferred to the Collector of the District; this is an important administrative change, which will effect a considerable saving in the working expenses of the canal, and His Excellency in Council trusts that the arrangement will work as satisfactorily as it has done in the District of Midnapore.

11. At the commencement of the year under review, the irrigation prospects promised to be much in excess of any previous year, but in consequence of the cyclone these expectations were unfortunately not realized. Notwithstanding this serious drawback the operations of the year have been fairly successful, and show considerable improvement over the results of previous years.

12. The "statement of areas of crops irrigated and approximately estimated value of produce" given in Statement A for the Orissa Canals is a very useful one. A similar statement for the Midnapore Canals should be appended to future Irrigation Reports.



ORDER.—Ordered, that copies of this Resolution, the figured statements attached thereto, and of the Report, be forwarded to the Secretary of State, and the Financial and Revenue, Agriculture and Commerce Departments for information.

Ordered also, that copies of this Resolution and the statements above referred be forwarded to the Government of Bengal, and to the several* other Local Governments and Administrations, in the Public Works Department, Irrigation Branch, for information.

Ordered further, that this Resolution, with the Statements attached thereto, the Resolution of the Local Government, and the Chief Engineer's Report, together with a few selected statements, be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

Extract from the Proceedings of the Hon'ble the Lieutenant-Governor of Bengal in the Public Works Department, Irrigation Branch, No. 836I.-A., under date the 10th December 1875.

The total capital outlay on irrigation works in Bengal to the end of 1874-75 amounted to Rs. 3,65,16,108, of which Rs. 49,97,142 were expended during the year.

2. The outlay is debitable as follows:—

Canals more or less incomplete, but in operation and yielding revenue, *viz.*,—

	Rs.	Rs.
Orissa Canals	1,55,19,508	
Midnapore Canal	61,30,403	
Tidal „	17,98,183	
		2,34,48,094

Canals partly finished but not yet in operation, and projects under investigation, *viz.*,—

	Rs.	Rs.
Sone Canal	1,26,24,628	
North Behar Irrigation Scheme	2,09,873	
Hooghly ditto ditto	75,454	
Damooda Canal (in abeyance)	1,58,059	
		1,30,68,014

3. The gross revenue for the year, from all sources, was Rs. 2,17,593 against Rs. 1,47,688 for the previous year.

4. The cost of maintenance and repairs was Rs. 2,98,298, and of revenue management Rs. 61,687.

5. The receipts, therefore, fell short of the working expenses by Rs. 1,42,392. The deficit was mainly due to the Orissa Canals, and is thus accounted for, *viz.*,—

	Rs.
Orissa Canals, deficit	1,47,942
Midnapore Canal „	12,807
Total deficit ...	1,60,749
Tidal Canal surplus	18,357
Net deficit ...	1,42,392

6. The Tidal Canal is a navigation work and derives no income from irrigation. It is the only canal which has as yet paid any interest upon capital. The surplus for the year was at the rate of 1·02 per cent. upon the outlay.

7. The charges for interest upon the capital invested in revenue paying canals amounted, for the year, to Rs. 10,13,912, and to the end of the year to Rs. 45,40,783.

8. The excess of working expenses over income was, for the year, Rs. 1,42,392, and to the end of the year Rs. 7,97,789.

9. The combined charges for interest and deficit on working were, for the year, Rs. 11,56,304, to the end of the year Rs. 53,38,572.

10. The total accumulated debt on account of interest and excess of expenses over income, on all the irrigation works in the Province, was, for the year, Rs. 16,86,757, and to the end of the year Rs. 68,02,515.

11. The cost of maintenance and repairs, though still in most cases in excess of the income of the canals, is moderate, and shews but a very small percentage upon the capital outlay.

12. The cost of revenue management was excessive in Orissa owing to the small demand for water. In Midnapore it was as low as 16·4 per cent. upon the collections of water-rates only.

13. The total area irrigated was 94,777 acres against 48,920 acres in the previous year.

14. In Orissa, the year was one of excessive rainfall, 80 inches having been registered. The demand for water was nevertheless in excess of former years; the areas irrigated having been in—

	Acres.
1872-73	4,753
1873-74	12,571
1874-75	22,459

The highest area is still but a small fraction of that for which water is available.

15. In Midnapore the rainfall, which was 52 inches, was slightly below the average. There also however an increase of irrigation is apparent. The area irrigated was in—

	Acres.
1871-72	6,028
1872-73	14,130
1873-74	36,349
1874-75	72,318

16. A cyclone, which passed over the district in October 1874, devastated the crops of the irrigated portion, rendering necessary large remissions of water-rates and considerable postponements of collections.

17. There was no irrigation from the Sone Canals during the year, none of them being in a sufficiently forward state.

18. The navigation receipts were in—

	Rs.
Orissa	21,412
Midnapore	44,886
Tidal Canal	52,209
TOTAL ...	1,18,507

or Rs. 37,848 in excess of the collections of the previous year.

This increase was in spite of the closure of the Midnapore and Tidal Canals for special repairs during the three most profitable months of the year.

19. Two hundred miles of canal were in use. The receipts were therefore at the rate of Rs. 592 per mile.

20. The statistics of the canal traffic are important. The tonnage of cargoes carried in boats paying tolls during the year was—

	Tons.
Orissa	57,312
Midnapore	168,090
Tidal Canal	132,282
TOTAL ...	357,684

21. The total value of this tonnage is computed at £1,800,000 sterling.

22. On the whole a steady growth is apparent in the revenues from all the canals.

23. The outlay on construction, inclusive of surveys and investigation of new projects during the year, was—

	Rs.
Orissa Canals	16,06,144
Midnapore Canal	3,32,471
Tidal "	14,648
Sone Canals	27,58,810
North Behar Irrigation Surveys	2,09,873
Hooghly Irrigation Scheme	75,454
Damoodur Canal (in abeyance)	—258
TOTAL ...	49,97,142

The principal outlay took place in Orissa and on the Sone. In the latter project the works were vigorously pushed forward, but none were actually brought into use.

Some progress was made with the projects for small irrigation works in North Behar.

24. The thanks of the Lieutenant-Governor are due to Colonel Gulliver, R.E., for his able management of the Irrigation Department during the year. The services of Messrs. Levinge and Walker, Superintending Engineers, also merit acknowledgment.

By Order of the Lieutenant-Governor of Bengal,

F. T. HAIG, *Colonel, R. E.,*
Jt. Secy. to the Government of Bengal
in the P. W. Dept., Irrgn. Branch.

Note on the Canal Revenue Reports for the year 1874-75 *by* COLONEL F. T. HAIG, R.E., *Chief Engineer, Bengal Irrigation Branch.*

ORISSA PROJECT.

1. The capital invested in the Orissa Project, which comprises the Mahanuddy and the Brahminy and Byturny Series of Canals, amounted to the end of the year 1874-75 to Rs. 1,55,19,508, inclusive of Rs. 23,468 for capitalised land rent, but exclusive of interest. The following statement shows the state of the Capital Account at the beginning and close of the year under report :—

	MAHANUDDY SERIES.			BRAHMINY AND BYTURNY SERIES.			TOTAL.		
	Outlay to end of 1873-74.	Outlay during 1874-75.	Outlay to end of 1874-75.	Outlay to end of 1873-74.	Outlay during 1874-75.	Outlay to end of 1874-75.	Outlay to end of 1873-74.	Outlay during 1874-75.	Outlay to end of 1874-75.

2. The detail for the year's expenditure on the Mahanuddy Series under the head "Works" is as follows :—

	Rs.
Head Works	5,859
Pooree "	31,176
Toldundah Canal	33,609
Matchgong "	66,873
High Level " (Section I)	20,114
Kendraparah "	1,43,751
Pattamoondee "	2,07,095
Boundary Pillars	3,223
TOTAL ...	5,11,700

The expenditure of the year on the Brahminy and Byturny Series under the same head amounted to Rs. 5,70,787, *viz.*, Rs. 3,17,414 on Section II and Rs. 2,53,373 on Section III of the High Level Canal.

3. The state of the interest account is shown below :—

	Mahanuddy Series.	Brahminy and Byturny Series.	TOTAL.
	Rs.	Rs.	Rs.
Interest charges to end of 1873-74	21,87,803	80,160	22,67,963
Ditto for 1874-75	5,77,985	86,524	6,64,509
TOTAL INTEREST CHARGES TO END OF 1874-75...	27,65,788	1,66,684	29,32,472

4. The following is the Revenue Account of the Mahanuddy Series to the end of 1874-75 :—

	EXPENDITURE.				RECEIPTS.		
	Previous.	1874-75.	TOTAL.		Previous.	1874-75.	TOTAL.
	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.
Repairs and Maintenance ...	4,55,366	1,17,547	5,72,913	Water-rates ...	75,981	20,382	96,363
				Tolls	61,926	21,412	83,338
Establishment ...	2,45,883	60,810	3,06,693	Miscellaneous ...	50,778	6,691	57,469
Tools and Plant ...	5,683	18,070	23,753	Total Receipts ...	1,88,685	48,485	2,37,170
Profit and Loss ...	640	...	640	Deficit	5,18,887	1,47,942	6,66,829
TOTAL EXPENDITURE...	7,07,572	1,96,427	9,03,999	TOTAL ...	7,07,572	1,96,427	9,03,999

No Revenue Account has yet been opened for the Brahminy and Byturny Series, the canals comprised in them not being yet completed.

5. The total deficit or unpaid charges, inclusive of interest, up to the end of 1874-75, on account of the Orissa Project, amounted to Rs. 35,99,301, of which Rs. 8,12,451 was for 1874-75 and the remainder, or Rs. 27,86,850, for previous years.

Details of Revenue Account compared with former years.

(1.) RECEIPTS.

6. The following statement gives a comparison of the gross income for the past three years :—

YEAR.	Water-rates.	Navigation.	Miscellaneous.	TOTAL.
	Rs.	Rs.	Rs.	Rs.
1872-73	19,071	10,044	7,508	36,623
1873-74	17,412	18,577	7,846	43,835
1874-75	20,382	21,412	6,691	48,485
TOTAL ...	56,865	50,033	22,045	1,28,943

It will be seen that the total collections have progressively increased from Rs. 36,623 in 1872-73 to Rs. 48,485 in 1874-75.

The assessments for water-rates have increased in a still higher proportion. The collections under this head in 1872-73 were swollen by the recoveries of large arrears from former years.

(2.) EXPENDITURE.

7. The following table shows the expenditure chargeable to Revenue for the past three years:—

	1872-73.	1873-74.	1874-75.
I.B.—MAINTENANCE AND REPAIRS—

TOTAL EXPENDITURE	2,38,002	1,29,191	1,96,427

Maintenance and Repairs.—The expenditure of the year, which amounted to Rs. 1,17,547, is greater than that of 1873-74 by Rs. 43,042, and less than that of 1872-73 by Rs. 46,337.

The cause of the short expenditure in 1873-74 was explained in that year's Report. The total expenditure on repairs in that year amounted to Rs. 1,46,813, exclusive of Rs. 2,073 expended on plantations, of which Rs. 74,381 were written back, leaving Rs. 74,505 as the expenditure of the year.

The following table shows the cost of canals, &c., on which repair expenditure was incurred and the percentage on cost:—

	Capital Outlay to end of 1874-75.	Outlay on repairs in 1874-75.	Percentage.
	Rs.	Rs.	
Head Works	28,93,996	41,254	1·4
Toldundah Canal	9,48,984	19,013	2·0

Toldundah „	64·5	2·3	64·5	47·2	65	52
Matchgong „	66·5	12	74	0·74	77	54
TOTAL ...	...	5,788	...	16,333	...	21,166

Establishment.—The cost of the Engineering Establishment was charged at a certain percentage on outlay; hence it increased with the increased outlay. Compared with 1873-74, the cost of the Irrigation and Navigation Establishments was decreased by Rs. 3,591 and Rs. 134 respectively.

Tools and Plant.—The large expenditure under Tools and Plant was incurred chiefly on account of repairs to boats, the cost of which was ordered to be charged for the year under report to "Revenue."

The total expenditure of the year on Maintenance was Rs. 1,96,427. This is Rs. 12,831 in excess of the average of the two preceding years, but the excess under Tools and Plant alone is Rs. 17,387.

IRRIGATION.

8. The total area irrigated during the year under report was 22,459 acres, against 12,571 acres in 1873-74, and 4,753 in 1872-73.

9. The distribution of this area according to seasons and the corresponding figures for the two previous years are shown in the following statement:—

	1872-73.	1873-74.	1874-75.
	Acres.	Acres.	Acres.
Khurreef	3,799	9,104	19,740
Rubbee	941	3,291	2,452
12-month crops	13	176	267
TOTAL ...	4,753	12,571	22,459
	Inches.	Inches.	Inches.
10. The rainfall in each year was—	73·	40·31	80·74

11. The increase in the khurreef irrigation is encouraging, but less so than the above figures might at first sight seem to warrant. A truer test of the stability of the demand for water for the rice crop is afforded by a comparison of the areas for which leases were taken previous to 1st May in each year, *i. e.*, previous to the commencement of the rainy season. These were as follows:—

	Areas leased for previous to 1st May. Acres.
1872-73	3,646
1873-74	4,504
1874-75	19,268
to which may be added—	
1875-76	12,531

The true explanation of the variations seems to be that in 1873-74, which was a year of scanty rainfall, the great superiority of the irrigated to the unirrigated crops acted as a temporary incitement to early leasing the following year, but that proving to be a year of excessive and abnormal rainfall, the comparison between the two kinds of crops was less favorable to irrigation, and consequently in the present year the demand for early leases fell again from 19,268 to 12,531 acres.

Nevertheless on the whole a steady and satisfactory increase in the early khurreef irrigation is apparent.

The falling off of 839 acres in the rubbee irrigation, as compared with the previous year, is due to a decrease in the dalwa or winter rice irrigation. This is no matter of regret, as this crop consumes an excessive quantity of water, the value of which is by no means represented by the rate charged.

The rapid increase of the area under 12-month irrigation is satisfactory, the greater part being sugarcane, paying a rate of Rs. 6 per acre.

12. The total demands for the year were Rs. 30,699, of which Rs. 27,479 were on account of water-rates for the year, and the remainder on account of miscellaneous sources and outstanding balances.

Of this amount, Rs. 23,611, or 77 per cent., were collected, Rs. 690, or 2 per cent., remitted, and Rs. 6,398, or 21 per cent., remained to be recovered.

This is much too large a balance, and the percentage, though below that of former years, ought, in a district where the water-rates are so extremely light, to be greatly reduced.

13. The proportions of flow and lift irrigation were as follows:—

	1872-73.			1873-74.			1874-75.		
	Flow.	Lift.	Total.	Flow.	Lift.	Total.	Flow.	Lift.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Khurreef	3,747	52	3,799	8,859	245	9,104	19,486	254	19,740
Rubbee	780	161	941	2,655	736	3,291	1,954	498	2,452
Perennial ...	12	1	13	100	76	176	177	90	267
TOTAL ...	4,539	214	4,753	11,514	1,057	12,571	21,617	842	22,459

In the cases of rubbee and 12-month crops the ratio of lift to flow appears to have been excessively high for the two past years. Explanation has been called for.

14. The following table shows the duty obtained from the water on the several canals for the last three years; the crops irrigated throughout the year are included under the head "Rubbee":—

	Discharge in 1874-75.	Area irrigated in 1874-75.	AREA PER CUBIC FOOT.		
			1874-75.	1873-74.	1872-73.
	C. ft. per sec.	Acres.	Acres.	Acres.	Acres.
Kendraparah Canal—					
Khurreef	337	8,859	26·3	17·6	8·5
Rubbe	233	2,246	9·6	12·9	4·3
High Level Canal—					
Khurreef	176	7,166	40·7	16·1	1·05
Rubbee	114	93	0·8	0 25	0·41
Toldundah and Matchgong Canals—					
Khurreef	104	3,715	35·7	8·5	...
Rubbee	92	380	4·1	4·7	...

The figures are of no particular interest, the discharge of the canals being enormously in excess of the demand. There are as yet no means for comparing the duty obtained with the supply actually utilised.

15. The water-rates charged in 1874-75 were the same as in the previous year. The earnings from this source amounted to Rs. 25,108 against Rs. 18,145 in 1873-74, being an increase of Rs. 6,963.

NAVIGATION.

16. The following table shows the lengths of canal open for traffic and the toll collections for the past three years:—

CANAL.	Length open for traffic.	TOLL COLLECTIONS.			RATE OF TOLLS PER MILE OF CANAL.		
		1872-73.	1873-74.	1874-75.	1872-73.	1873-74.	1874-75.
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
High Level Canal	37	1,551	1,497	2,450	42	40	66
Kendraparah „	40	8,023	16,087	18,252	206	412	468
Toldundah „	27	468	987	707	17.	36	26
Matchgong „	6	2	6	3	...	...	...
TOTAL ...	110	10,044	18,577	21,412	85	157	181

The High Level, Toldundah and Matchgong Canals as yet end nowhere, and until they are extended so as to reach some places of importance or to connect with some line of traffic, the returns must be insignificant.

The Kendraparah Canal is the principal route for the export and import traffic by sea. The increased collections on this canal are due chiefly to the recoveries of arrears due for the previous years.

17. The following is a comparative statement of the traffic for the past three years:—

CANAL.	Number of boats passing through the Canal (including empty boats).			Value of Traffic.			Tonnage, exclusive of tonnage of empty cargo boats.		
	1872-73.	1873-74.	1874-75.	1872-73.	1873-74.	1874-75.	1872-73.	1873-74.	1874-75.
	No.	No.	No.	Rs.	Rs.	Rs.	Tons.	Tons.	Tons.
High Level Canal, Section I ...	772	1,067	2,414	51,415	1,03,040	2,49,870	3,190	6,375	8,603
Kendraparah „ ...	3,947	6,166	4,821	47,10,968	42,55,389	30,10,897	26,313	50,377	41,758
Toldundah „ ...	382	884	507	21,270	30,844	20,286	2,452	9,108	6,951
TOTAL ...	5,101	8,117	7,742	47,83,653	43,89,373	32,81,053	31,955	65,860	57,312

In spite of a considerable increase on the High Level, due probably to increasing traffic with the Brahminy River, there was a falling off of 8,548 tons in the total traffic as compared with the previous year. This is accounted for by the cessation of the export of rice to the famine districts.

The collections for 1874-75, however, were more by Rs. 2,835 than the collections for 1873-74, which is the result of the system, which prevailed in Orissa, of allowing credit for tolls to merchants and others. The Lieutenant-Governor has lately ordered that this system shall be abolished and that cash payments shall be insisted on in all cases.

18. The Officiating Revenue Superintendent has remarked on the following points:—

1.—*The closure of the Canals for annual repairs.*—This point has been settled, and orders have been issued directing the closure of the two canals, in which navigation is at present of less importance than irrigation, from 20th February to 20th March, and of the Kendraparah Canal, which is the main navigation line to the coast, from 15th April to 15th May.

2.—*The working of the Canal Rules.*—These rules have been in force since the year 1872-73. Devised to meet the special and exceptional circumstances of Orissa, they have upon the whole worked well. Confidence has been restored; there is a thoroughly good understanding between the Revenue Officers and the people, and the memory of the troubles of the early years of irrigation in Orissa, and the ill-feelings to which they gave rise, have both passed away.

3.—*Surreptitious Irrigation.*—There appears to be some conflict of opinion as to the extent to which this now prevails. In the year under review, however, there was less temptation to theft of canal water in consequence of the abundant rainfall. The number of cases reported was 54, embracing an area of 124 acres. In 40 of these the double rate of assessment was imposed. The surest method of checking illicit irrigation is by refusing leases for small and isolated patches of land, and compelling the people to combine and to lease only for large and compact areas. Increased efforts are being made by the Irrigation Officers with this view.

19. The Canal Revenue administration remained as before during the year, but an important change has since been made in the abolition of the appointment of Canal Revenue Superintendent and the transfer of his duties to the Collector: a large reduction of expense will thus be effected, and the system will, it is expected, work as satisfactorily as it has done in Midnapore.

There was a reduction of Rs. 3,591 in the cost of the Irrigation Revenue Establishment as compared with 1873-74, but the total charge under this head is still in excess of the revenue collected.

MIDNAPORE CANAL.

20. The capital debit to this canal, exclusive of interest, was increased in 1874-75 by Rs. 3,32,471, as detailed below:—

Expenditure.

	Rs.
Head Works	33,333
Canal ,,	49,780
Distributaries	67,825
Drainage and Protective Works	43,118
Midnapore Field Survey	17,418
Total Works	2,11,474
Establishment	75,832
Tools and Plant	16,086
Suspense Accounts	34,403
Total Outlay	3,37,795
Deduct Receipts on Capital Account	5,324
Net Outlay	3,32,471

21. The aggregate capital debit at the end of the year 1874-75 amounted, exclusive of accumulated interest, to Rs. 61,30,403.

22. The interest charges for, and up to the end of, the year under report amounted to Rs. 2,68,897 and Rs. 12,44,059 respectively.

23. The following is the Revenue Account based on actual collections:—

Expenditure.	Rs.	*Receipts.*	Rs.
Extensions and Improvements	1,403	Water-rates	67,015
Maintenance and Repairs	90,782	Navigation	44,886
Establishment	37,528	Miscellaneous	4,316
Tools and Plant	714		1,16,217
		Balance, loss at 0·23 per cent. on the capital of Rs. 61,30,403	14,210
Total	1,30,427	Total	1,30,427

24. The loss for the year inclusive of interest was Rs. 2,83,107; and the total loss to end of the year amounted to Rs. 13,75,237, of which Rs. 1,31,178 was for excess of charges over income and Rs. 12,44,059 for interest.

25. Based on the assessments of the year, the result of the year's operations was as follows:—

Expenditure.	Rs.	*Receipts.*	Rs.
Extensions and Improvements	1,403	Water-rates	1,17,069
Maintenance and Repairs	90,782	Navigation	44,886
Establishment	37,528	Miscellaneous	4,316
Tools and Plant	714		
	1,30,427		
Balance, profit at 0·58 per cent. on capital of Rs. 61,30,403	35,844		
Total	1,66,271	Total	1,66,271

26. The following table, extracted from the Collector's report, exhibits a steady and progressive increase in the irrigation revenue:—

Year.	Area irrigated.			Revenue.			Rainfall.
	Khurreef.	Rubbee.	Total.	Water-rent.	Miscellaneous.	Total.	
	Acres.	Acres.	Acres.	Rs.	Rs.	Rs.	Inches.
1871-72	5,233	795	6,028	12,728	3,178	15,906	64·27
1872-73	13,406	724	14,130	21,876	3,670	25,546	59·17
1873-74	35,996	353	36,349	79,443	1,913	81,356	48·88
1874-75	70,424	1,894	72,318	1,17,069	3,842	1,20,911	52·00

The amounts given under the heads of Water-rent and Miscellaneous are those of assessments. The difference between these and the collections will be hereafter explained.

27. The following table shows the revenue expenditure for the past three years:—

Items.	1872-73.	1873-74.	1874-75.
	Rs.	Rs.	Rs.
(IA.)—Extensions and Improvements.			
(2.)—*Main Canals and Branches.*

III.—Tools and Plant.			
12.—Miscellaneous	...	...	714
Total Expenditure	86,998	1,20,557	1,30,427

The expenditure under "Extensions and Improvements" was incurred in connection with shelter for the revenue officials.

Repairs and Maintenance.—The expenditure under this head, compared with 1873-74, shows an increase of Rs. 4,246. It includes, however, the special repairs rendered necessary by the cyclone of October 1874. These cost more than Rs. 25,000. The cost of the ordinary repairs, therefore, was about Rs. 65,000, considerably less than in the previous year. This was equivalent to a charge of 1·06 per cent. upon the total capital sunk up to the end of the year. Including extraordinary repairs the percentage was 1·48 per cent.

The following table shows the average mileage charge for maintenance and repairs for the last three years. The cost for the year under report is exclusive of the special cyclone repairs above-mentioned:—

	1872-73.			1873-74.			1874-75.		
	Length open.	Cost.	Average per mile.	Length open.	Cost.	Average per mile.	Length open.	Cost.	Average per mile.
	Mls.	Rs.	Rs.	Mls.	Rs.	Rs.	Mls.	Rs.	Rs.
Main Canal, including Head Works	38	51,534	1,356	48	76,422	1,592	48	56,083	1,170
Distributaries	102¾	11,310	110	146	10,114	69	178	8,917	50

Per acre irrigated the charges were—

	1872-73.	1873-74.	1874-75.
	Rs.	Rs.	Rs.
Main Canal	3·8	2·1	0·8
Distributaries	0·8	0·3	0·1

In the Report for 1873-74, the average mileage cost of repairs to the canal was shown as Rs. 1,350 for 1872-73 and Rs. 1,490 for 1873-74, instead of Rs. 1,356 for 1872-73 and Rs. 1,592 for 1873-74, as shown in the above table. The latter are the correct figures, and

include the cost of repairs to the Head Works and other miscellaneous items, which were omitted in the calculations of the previous year *

Establishment.—There is an increase under the head of Engineering, but the total does not exceed 2½ per cent. on cost of repairs.

There is also an increase in the totals under the other two heads, but a marked decrease in the percentages on collections as compared with the two previous years, as shown in the following table:—

Revenue Establishment.	1872-73.			1873-74.			1874-75.		
	Cost of Establishment.	Collections.	Percentage on Collections.	Cost of Establishment.	Collections.	Percentage on Collections.	Cost of Establishment.	Collections.	Percentage on Collections.
	Rs.	Rs.		Rs.	Rs.		Rs.	Rs.	
Irrigation	9,316	23,556	39·5	10,701	35,823	29·8	11,006	67,015	16·4
Navigation	5,133	20,994	24·4	5,896	34,104	17·3	7,097	44,886	15·8

Had it not been for the disastrous cyclone of October 1874, and the consequent impoverishment of the great mass of the cultivators in the irrigated area, which greatly increased the difficulties of collection and rendered necessary large remissions of revenue, the percentages for that year would have been still lower than those above exhibited. It will be observed that with a progressive increase of revenue there is a steady diminution in the cost of management.

The large increase in the cost of the navigation establishments is explained by the fact that, though the lock and other working establishments remained the same as in the previous year when the canal was first opened throughout, the charges on this account for that year were for only a few months, whereas for 1874-75 they are for the whole year.

IRRIGATION.

28. The Collector's Report in the appendix is one of much interest, and will well repay perusal.

29. The year under review promised, in its early part, results in the shape of increased irrigation and revenue far in advance of any previous year. The rainfall was irregular and below the average, being 52 inches against 62 inches, and in July especially was very deficient. A great impulse had been given to the cause of irrigation by the great profits made by those who had irrigated in the previous year, and 70,000 acres had been leased. The irrigated crops were flourishing, and promised an abundantly remunerative outturn. But all these hopes were blasted by the cyclone of October 1874, which passed right over the irrigated tract, levelling the crops with the ground, breaching the canal in two places, and thus inundating and almost completely destroying the crops over a large tract of country. The irrigated crops suffered even more than the unirrigated, being heavier and less able to resist the fury of the storm. The unirrigated were even partly compensated for the damage done by the wind by the abundant rainfall which accompanied it. The result was, that the outturn of the irrigated crops was found to be only from 6 to 12 per cent. better than that of the unirrigated. Large remissions of water-rate were consequently made by Government, and the irrigation revenue has been correspondingly reduced.

31. The area irrigated during the year was 72,318 acres, wholly rice, of which 70,424 acres were khurreef and 1,894 rubbee. The total differs from that given in the comparative statement of irrigation separately submitted to the Government of India, *viz.*, 66,843 acres, by 5,475 acres in excess. The latter was the total of the areas leased, as taken from the zemindaree papers. The figures now given are the correct ones, and were obtained from the Revenue Survey Maps, which were ready in time for use as the basis of the final assessments of the year.

32. The area thus irrigated was distributed as follows between the several sections of the canal. It will be seen that it amounted to a very considerable proportion of that for which water was presumably available:—

	Area irrigated.	Area provided with Distributaries.
	Acres.	Acres.
Ranges Nos. 4 and 5 (under the Midnapore Weir)	60,866	89,150
Range No. 3 (under the Panchkoorah Weir)	9,786	18,750
Ranges Nos. 1 and 2 (Tidal Range)	1,666	11,500
TOTAL ...	72,318	1,19,400

* Another error occurred in the Report for 1873-74. The lengths of the distributaries open at the end of 1872-73 and of 1873-74, as therein stated, *viz*, 177½ and 197½ miles, were taken from the Superintending Engineer's Report; but that officer has since explained in his Report* for 1874-75 that channels in progress from which water *could not* be given were by an oversight added to those from which water *could* be given; hence the mistake. In the foregoing table the correct lengths are given, and the mileage rates have been calculated accordingly.

33. The proportion of flow to lift irrigation was 72,250 to 68 acres.

34. The average discharges during each of the irrigating months of the distributaries under the Midnapore Weir are stated by the Executive Engineer to have been as follows:—

	Cubic feet per second.
June	509
July	1,009
August	858
September	1,036
October	545*
TOTAL ...	3,957

The average for the whole khurreef season was thus 791 cubic feet per second. The area irrigated was 60,866 acres, which gives a duty of 77 acres per cubic foot of discharge.

In the Return of Irrigation Operation for the half-year ending 30th November 1874, the average supply entering the canal, as measured by the discharge through the head sluices, is shown as 663 cubic feet per second only. The same average as deduced from the discharges given in Appendix IB. attached to Superintending Engineer's Report is still less, *viz.*, 550 cubic feet. The Superintending Engineer accounts for the difference between these discharges and that of the distributaries by the drainage and surplus irrigation water which finds its way into the canal. Some allowance no doubt is to be made on the former account. One large drain, the Patooa Khal, discharges into the canal and so supplements the supply from the river. Still the explanation is not sufficient, and further investigation is necessary.

The discrepancies above noted, however, explain the difference between the high irrigating duty, 103 acres per cubic foot obtained in 1873-74, as stated in the Report for that year, and that above stated, *viz.*, 77 acres only. The former was the duty as measured by the discharge through the head sluices. The latter is the same as measured by the discharge of the distributaries. If the former discharge be taken, then the duty in each year would be—

1873-74	103
1874-75	91·8, or 110·6

according to which of the two Returns of the head sluice discharge is taken.

Further accuracy upon this important point is very desirable, but it seems probable that the duty actually realized is not so high as stated in the Report for 1873-74.

It is to be borne in mind that the above remarks have reference to the duty obtained from the supply entering the heads of canals and distributaries, not to that from the discharge actually *utilized*. We have not as yet any statistics of the latter.

35. The machinery for the detailed distribution of water by means of village channels is as yet most imperfect. Only a certain number of these channels have been constructed, and that by Government; none have yet been made by private parties. The existing channels are not maintained in good order; it is found, in fact, almost impossible for the Engineer establishment to maintain them, and until the new Irrigation Bill becomes law, and special provision has been made for the construction and proper maintenance of such channels by private owners, there will be much waste and delay in the distribution of water.

36. The collections are still much in arrears. At the commencement of the year under report there were arrears from former years amounting to Rs. 57,905. Of this amount Rs. 26,612 were collected in the year, leaving Rs. 24,383 still due at its close. The general poverty of the ryots and the heavy losses inflicted by the drought of 1873 and the cyclone of 1874 are pleaded by the Collector as reasons for lenient treatment of the defaulters.

For 1874-75 the demands were Rs. 1,18,070, of which Rs. 44,257 only were collected. Of the balance, Rs. 27,122 were remitted on account of losses by the cyclone, and further remissions will, in the opinion of the Collector, be necessary.

On the whole it appears likely that it will be another year or two before anything like a clear balance sheet can be exhibited.

37. The expansion of irrigation in the year under report rendered necessary an increase in the revenue establishment, which was raised to four tehsildars instead of two, with a corresponding increase in the subordinate establishment. Even thus reinforced, the Collector states the full energies of the establishment are taxed to lease 4,000 acres a week, every competent subordinate being vested with the power of leasing under the rules; and it is with difficulty that 50,000 acres can be leased by the 15th June. But though the present system does thus admittedly throw a large amount of work upon the executive establishment, which is avoided when leases previous to the supply of water are not required, all the officers engaged in administering it are agreed that it is the best adapted to the special circumstances of Bengal. It has, Mr. Harrison remarks, upon the whole worked well, as it has undoubtedly given the ryots confidence, and enabled them to see that no bribery or unlawful fees or cesses are necessary to enable them to obtain their fair share of water. Each ryot knows the precise demand he will have to meet; that nothing more will be asked for from him, and that, on the other hand, a simple coercive procedure is available to compel payment if he tries to be recusant. Further, even in point of expense, it appears that the cost of revenue administration in Bengal will be no higher than in other Provinces. It has been reduced already in Midnapore to an amount

* The figures given for October in the Collector's 24th paragraph are erroneous.

considerably below that in the North-West. The assessments and collections of water-rate alone, exclusive of miscellaneous items for the past two years, has been—

	Assessment.	Collections.	Cost of Revenue Establishment.	Percentage on Assessment.	Percentage on Collection.
	Rs.	Rs.	Rs.		
1873-74	79,443	35,823	10,701	13·4	30·0
1874-75	1,17,669	67,015	11,006	10·7	16·4

As the heavy arrears and remissions of revenue in these two years were due solely to such exceptional causes as the drought of the first year and the cyclone of the second, it will be allowed that the cost of management should be calculated upon assessments rather than collections, and thus regarded the result is very favorable. It is to be remembered, however, that the charges, as above exhibited, include nothing for cost of distribution which is managed by the Engineer Department, and, in the North-Western Provinces, is included in the cost of revenue management. At the same time it is very questionable whether in Midnapore, where the irrigation is almost wholly confined to the khurreef crops, the distribution of the water costs anything at all, as it is done by the establishment required for maintenance of the works, and which, if not thus employed during the rains, would have little or nothing to do.

38. The Collector recommends the introduction of five-year leases. The subject will receive consideration.

NAVIGATION.

39. The navigation receipts for the year amounted to Rs. 44,886 against Rs. 34,104 in 1873-74 and Rs. 20,994 in 1872-73, showing an increase of Rs. 10,782 over the former year and Rs. 23,892 over the latter.

40. The increase is due to the opening of the canal to its full length. For the year under report, however, it was considerably below what it would have been but for the heavy losses caused by the cyclone throughout the district and the damage done to the canal, which had to be closed for repair during three and a half of the best months for traffic.

41. The following table gives a comparison on various points of the traffic in the last three years :—

		1872-73.	1873-74.	1874-75.
Number of miles open at the end of the year		24	53	53
Toll collections	Rs.	20,994	34,104	44,886
Rate of tolls per mile	„	874	643	848
Number of boats, including empties ...		26,407	29,997	29,967
Tonnage of boats, exclusive of empties ...	Tons	1,03,314	1,20,098	1,68,090
Value of traffic	Rs.	76,25,108	91,65,525	1,18,23,308

42. The principal articles carried were—

	1872-73.	1873-74.	1874-75.
	Tons.	Tons.	Tons.
Articles of food	39,574	50,541	61,407
Stimulants	2,971	4,382	4,327
Clothing	7,601	7,073	7,355
Staples of manufacture	11,269	14,610	14,760
Building materials	4,895	5,028	7,240
Fuel	18,173	15,009	5,606
Cooking utensils and domestic implements	2,533	1,951	1,766
Miscellaneous	16,630	16,366	65,629

HIDGELLEE TIDAL CANAL.

43. The following additions were made in 1874-75 to the Capital Account of this canal, which stood at Rs. 17,83,535 on the 1st April 1874 :—

	Rs.
Works	4,505
Establishment	866
	5,371
Deduct reduction of Suspense Balances	1,014
	4,357
Deduct receipts on Capital Account	915
	3,442
Add capitalization of the rent of land taken up for the works ...	11,206
Expenditure of the year	14,648

44. The total capital invested up to 1st April 1875 was, therefore, Rs. 17,98,183, exclusive of interest.

45. The interest for the year 1874-75 amounted to Rs. 80,506, which, added to Rs. 2,83,746, the interest up to the 1st April 1874, gives Rs. 3,64,252 as the total amount of interest up to the 1st April 1875.

46. The Revenue Account for the year is as follows :—

Receipts.	Rs.	*Expenditure.*	Rs.
Water-rates	13	Maintenance and Repairs	24,023
		Establishment.	
Navigation	52,209	General 6,338	
		Navigation... 2,874	
			9,212
Miscellaneous	669	Tools and Plant	1,299
		TOTAL ...	34,534
		Balance profit, being 1·02 per cent. on the capital of Rs. 17,98,183	18,357
TOTAL ...	52,891	TOTAL ...	52,891

47. Compared with 1873-74, there was a saving of Rs. 6,674 in the expenditure, while there was an increase of Rs. 21,676 in the receipts.

48. There is little or no irrigation under this canal.

49. The following is a comparative statement of the traffic for the last three years :—

		1872-73.	1873-74.	1874-45.
Miles of canal open		26	29	29
Toll collections	Rs.	14,454	27,978	52,209
Rate of toll per mile of canal ...	„	556	965	1,800
Number of boats		7,721	13,918	15,443
Tonnage of boats exclusive of empties	Tons	19,153	63,077	1,32,282
Value of traffic	Rs.	10,35,238	14,33,724	28,96,109

50. The principal articles carried were—

	1872-73.	1873-74.	1874-75.
	Tons.	Tons.	Tons.
Articles of food	15,430	53,669	87,525
Stimulants	1,257	1,852	3,005
Clothing	23	194	306
Staples of manufacture	67	786	971
Building materials	851	1,249	3,183
Fuel	509	575	1,144
Coking utensils and domestic implements	32	318	336
Miscellaneous	927	14,042	35,100

There was an increase of traffic, it will be observed, under all heads; the total being more than double that of the previous year. The increase in the number of boats, however, was only 11 per cent., indicating an improvement in the navigation, larger boats being used, or larger loads carried.

The number of loaded boats was 8,585, which gives an average tonnage of 12 tons only. Small as this is, it is more than double that on the Midnapore Canal. This is no doubt partly accounted for by the wretched condition of the open reach of the latter canal between the Damooda and Roopnarain Rivers. Until that reach is locked, not much improvement in this respect can be looked for, but it is evident that when these canals are completed so as to afford a constant and good depth of water for navigation, the introduction of larger boats may be expected to lead to a considerable reduction in the cost of carriage, and a proportionate increase of traffic. It is to be noted that the great increase of traffic in the Tidal Canal during the year under report was in spite of a closure of three months for the purpose of silt clearance.

SONE CIRCLE.

51. There was no irrigation from any of the canals in this circle during 1874-75, none of them being in a sufficiently forward state.

The completion of the Arrah Canal had, in fact, been greatly delayed by the use of the canal for irrigation in its unfinished state during the crisis of 1873.

52. The Capital Account to April 1875 is as follows :—

		Works, and Tools and Plant.	Establishment.	TOTAL.
		Rs.	Rs.	Rs.
Capital on 1st April 1874		82,05,870	16,59,948	98,65,818
Expenditure in 1874-75		22,45,096	5,82,656	28,27,752
		1,04,50,966	22,42,604	1,26,93,570
Deduct reduction of Suspense Balances ...	Rs. 41,769			
Deduct receipts on Capital Account ...	27,173			
		68,942	...	68,942
Total on 1st April 1875		1,03,82,024	22,42,604	1,26,24,628

53. The following is an abstract of the year's outlay on works:—

	Rs.	Rs.
Head Works	2,64,311	
		2,64,311
Right bank.		
Main Canal	50,550	
Patna Branch	3,57,669	
Distributaries	4,643	
Drainage and Protective Works	5,432	
		4,18,294
Left bank.		
Main Canal	1,15,392	
Distributaries	13,922	
Drainage and Protective Works	10,359	
Extension	1,77,172	
		3,16,845
Arrah Branch	3,33,448	
Distributaries	4,74,687	
Drainage and Protective Works	4,118	
		8,12,253
Buxar Branch	2,25,619	
Distributaries	52,263	
		2,77,882
Sone Irrigation Survey		26,414
TOTAL SONE CANAL ...		21,15,999

54. The total charge for establishment was Rs. 5,82,656, which gives a percentage of 27·54 per cent. on the expenditure on works; but the cost of the survey establishment amounted to Rs. 56,583, deducting which the percentage is 24·86.

55. The interest account is as follows:—

	Rs.
Amount of interest due on 1st April 1874	8,94,983
Charge for 1874-75	5,16,034
Total due on 1st April 1875	14,11,017

TIRHOOT IRRIGATION SCHEME.

56. In connection with the Gunduk Embankments, which were undertaken as famine relief works, preliminary surveys were in progress in 1874-75, under the orders of the Government of India, with a view to the construction of irrigation canals from the Gunduk in Sarun and Chumparun, and of minor irrigation works in Ramnuggur, Madhoobunnee and in other districts affected by the drought of 1873, which are most exposed to future danger. These surveys have been completed, and rough estimates for one project have just been received from the Superintending Engineer.

57. The following is the Capital Account:—

	1874-75. Rs.
Works	67,483
Establishments	1,27,850
Tools and Plant	13,477
Suspense Balances	1,066
TOTAL ...	2,09,876
Deduct receipts on Capital Account	3
NET OUTLAY ...	2,09,873

There was no expenditure in previous years.

58. The following table gives the detail of the year's expenditure under the head "Works"—

	Rs.
Preliminary expenses in connection with the survey operations ...	20,037
Temporary bungalows	2,441
Excavation of High Level Canal	2,370
Ditto of Bank Channel	42,635
TOTAL ...	67,483

59. The interest account for the year amounted to Rs. 3,809.

HOOGHLY IRRIGATION SCHEME.

60. The detailed estimates for the Joojootee or Hooghly Irrigation Scheme are now before the Government of India. Progress is at present at a stand pending the settlement of the question of the sum which will have to be paid to the zemindars for the beds of the old rivers which it is intended to improve and utilize for irrigation purposes. Expenditure was incurred on the works under sanction of the Government of India as famine relief works and charged to capital.

61. The Capital Account is as follows:—

	Rs.
Works	59,701
Establishment	10,738
Tools and Plant	5,015
TOTAL OUTLAY ...	75,454

62. The amount of interest is Rs. 3,071.

DAMOODA CANAL.

63. The following is the Capital Account:—

	Rs.
Capital on 1st April 1874	1,58,317
Expenditure in 1874-75	94
TOTAL ...	1,58,411
Deduct receipts on Capital Account	352
Capital on 1st April 1875	1,58,059

The expenditure was incurred on petty works in connection with the bungalow for the Executive Engineer at the Head Works.

The receipts on Capital Account consist of—

	Rs.
Rents of buildings	285
Sales of Tools and Plant	62
Sales of produce	5
TOTAL ...	352

Interest Account.

	Rs.
Interest on 1st April 1874	39,910
Charge for 1874-75	7,136
Interest up to 1st April 1875	47,046

GENERAL REMARKS.

64. The aggregate capital invested on irrigation works up to 1st April 1875 is shown in the following table:—

	Capital on 1st April 1874.	Additions during 1874-75.	Capital on 1st April 1875.
Extraordinary.	Rs.	Rs.	Rs.
Orissa Works	1,39,13,364	16,06,144	1,55,19,508
Midnapore Canal	57,97,982	3,32,471	61,30,453
Tidal „	17,83,535	14,648	17,98,183
Canals not yet producing revenue.			
Sone Canal	98,65,818	27,58,810	1,26,24,628
Ordinary.			
Tirhoot Irrigation Scheme	...	2,09,873	2,09,873
Hooghly „ „	...	75,454	75,454
Damoodur Canal	1,58,317	—258	1,58,059
TOTAL ...	3,15,18,966	49,97,142	3,65,16,108

It will be observed from the foregoing statement that the total capital invested to 1st April 1875 amounted to Rs. 3,65,16,108, of which the outlay in 1874-75 was Rs. 49,97,142.

65. The following table shows the state of the account for maintenance and interest charges:—

	Balance of Charges unpaid.		Interest.		Total.	
	For the year.	Total.	For the year.	Total.	For the year.	Total.
Extraordinary.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa Works ...	1,47,942	6,66,829	6,64,509	29,32,472	8,12,451	35,99,301
Midnapore Canal ...	14,210	1,31,178	2,68,897	12,44,059	2,83,107	13,75,237
Tidal „ ...	—18,357	—218	80,506	3,64,252	62,149	3,64,034
Sone „ ...	...	...	5,16,034	14,11,017	5,16,034	14,11,017
TOTAL ...	1,43,795	7,97,789	15,29,946	59,51,800	16,73,741	67,49,589
Ordinary.						
Tirhoot Irrigation Scheme ...	...	...	3,809	3,809	3,809	3,809
Hooghly ditto ...	...	...	2,071	2,071	2,071	2,071
Damoodur Canal ...	...	...	7,136	47,046	7,136	47,046
TOTAL ...	...	...	13,016	52,926	13,016	52,926
TOTAL ...	1,43,795	7,97,789	15,42,962	60,04,726	16,86,757	[illegible]

66. The following table compares the revenue of each series with the Budget and Regular Estimates:—

	Revenue.	Budget Estimate.	Regular Estimate.
	Rs.	Rs.	Rs.
Mahanuddy Series	48,485	42,000	43,000
Midnapore Canal	1,16,217	98,000	1,18,000
Tidal „	52,891	36,000	91,489
TOTAL ...	2,17,593	1,76,000	2,52,489

The cause of the falling off in the revenue of the Tidal Canal, compared with the Regular Estimate, was the cyclone of October 1874, in consequence of which the traffic on both the Midnapore and Tidal Canals was interrupted during three months of the busiest part of the year.

67. The following statements, flood diagrams, and reports are annexed:—

STATEMENTS.

1. Comparative Statements of rainfall and irrigation in 1874-75 and 1873-74 (2 statements).
2. Comparative Statement of total traffic on the Orissa and Midnapore Canals in 1874-75 and 1873-74.
3. Comparative Statements of private traffic on the Orissa and Midnapore Canals in 1874-75 and 1873-74 (2 statements).
4. Capital Account of the Orissa Project to end of 1874-75.
5. Capital Account of the Midnapore Project to end of 1874-75.
6. Capital Account of the Sone Project to end of 1874-75.
7. Capital Account of the Tirhoot Project to end of 1874-75.
8. Capital Account of the Hooghly Project to end of 1874-75.
9. Capital Account of the Damooda Project to end of 1874-75.
10. Schedule of Capital, Revenue and Ordinary Imperial Receipts.
11. Revenue Account of the Orissa Project to end of 1874-75.
12. Revenue Account of the Midnapore Project to end of 1874-75.
13. General Abstract of financial results of irrigation works in Bengal for and up to the close of 1874-75.
14. Summary of financial results of irrigation works in Bengal for and up to the close of 1874-75.
15. List of officers employed in 1874-75.

FLOOD DIAGRAMS.

ORISSA CIRCLE.

Of the Rivers Salandi, Byturny, Patia, Brahminy, Beropa, Mahanuddy at Jobra and Naraj, and Katjuri (8 diagrams).

SOUTH-WESTERN CIRCLE.

Of the Rivers Cossye at Midnapore and Panchkoorah, and Damooda at Raneegunge (3 diagrams).

Of the tide at the three Tidal Locks of Oolooberiah, Bansberiah and Dainan (1 diagram).

GUNDUK CIRCLE.

Of the River Gunduk (1 diagram).

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th APRIL 1876.

GENERAL REMARKS.—The Madras reports show showers in Kistna, Tanjore, Malabar and Kurnool. More rain is required in Tanjore and Madura. There has been a little rain in Mysore, but none in Coorg. Rain is reported from Dharwar in Bombay. The *rabi* harvest is progressing favourably throughout the province. Cholera is prevalent in Kattywar and in some of the southern districts. There has been some rain in Orissa and in parts of Eastern Bengal. Rain is much required for agricultural operations throughout the northern and north-eastern parts of the province and in some of the central districts. The outturn of the spring crop has been fair. Sporadic cholera is generally reported. Rain has again fallen in Sylhet, but its want is being felt throughout the rest of Assam. No rain is reported from the North-Western or Central Provinces, Oudh, Rajputana or Central India, and hardly any from the Punjáb. Small-pox is still prevalent in parts of Rajputana and the Central Provinces, but elsewhere the public health is generally good. The harvest has nearly been completed and the outturn has been fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Apl. 6th)	*Nil*	A little rain in Narsarowpett; standing crops good; markets well supplied locally; prices generally steady; cholera, 12 seizures, 2 deaths in Repalli; small-pox in 5, and fever in 4 taluks; mild epizoötic aphtha continues; dry fodder being used.
Kurnool („ 5th)	·75 in one day.	Slight rain in outlying villages of Ramalkota taluks; none elsewhere; season generally good; second crop paddy thriving; cotton being gathered; markets well supplied; prices steady, except in Nundial, where rice is falling and *cholum* rising; fever prevalent; cholera in 6 taluks in Pattikonda and Ramalkota, 381 seizures, 112 deaths; water sufficient; pasture scanty; dry fodder obtainable.
Tanjore („ 6th)	*Nil* at Negapatam.	Slight rain in some villages of Negapatam taluk, elsewhere none; rivers almost dry; no water in tanks; water over anicuts none; cultivation a few dry crops in places; standing crops withering in several localities; harvest wet and some dry crops to small extent; yield moderate; markets well supplied; prices almost steady; cholera abating, 56 seizures, 31 deaths; small-pox in parts of Negapatam and Mannargudi; cattle disease in many places, some loss; pasture insufficient.
Madura („ 6th)	*Nil*	*Codai* crops fading; cholera abating; small-pox continues; pasture scarce.
Malabar („ 6th)	·10	Markets well supplied; prices steady; bowel complaints in all taluks, except Cherakal and Wynaad, 389 seizures, 322 deaths; small-pox prevalent, especially in North Malabar; cattle disease in Wynaad; pasture withered.
		General Remarks.—General prospects of these districts same as last, except in Kistna, Kurnool, Tanjore and Malabar, where there has been some rain.
Bombay—(April 6th).		
Sind (April 5th).		
Kurrachee ...	...	Wheat in Mánjhand taluka has suffered from blight; river on 1st April 9 inches lower than on 29th March.
Shikárpur ...	...	Weather continues warm; nights cool; river rising.
Hyderabad ...	...	Weather warmer; slight fever in 6 talukas; small-pox still in Badin taluka; *rabi* crops mostly harvested.
Upper Sind Frontier ...	...	Weather fair, well suited to *rabi* harvesting actively in progress; estimated outturn in talukas Jacobabad, Thul and Kashmor, 12, 15 and 13 annas in the rupee respectively.
Guzerat.		
Ahmedabad ...	...	} No change.
Broach ...	...	
Surat ...	...	Cholera in Surat, one case fatal; in Bárdoli, 25 cases, 7 deaths.
Kaira ...	...	Cotton picking almost completed; weather warm; public health good.
Khandesh and Nasik.		
Khandesh ...	...	Cotton market dull; fever continues.
Nasik ...	...	*Rabi* crops harvested; small-pox in Igatpuri taluka.
Konkan.		
Tanna ...	...	Small-pox still prevails in Salsette, Kalyán and Panwel talukas.
Deccan.		
Poona ...	...	Hot weather continues; slight cattle disease in Indápur; public health good.
Ahmednagar ...	...	} No change.
Sholapur ...	...	
Satara ...	...	Harvesting of *rabi* completed; cattle disease in Pátan and Khánápur.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.* *Southern Mahratta Country.*		
Belgaum ...	...	No change.
Dharwar ...	0·67	Total rainfall 1·57; cotton picking almost over; sugarcane planting commenced; no improvement in public health.
Kanara ...	...	Second crop being harvested; cholera prevalent.
Kaladgi ...	...	*Rabi* all reaped, outturn 10 annas in the rupee; cotton indifferent, picking nearly completed; cholera in 5 talukas, 116 deaths.
Kattywar.		
Rájkot ...	...	Health generally good; cholera in Morvi district, 153 cases, 63 deaths.
Wadhwán ...	...	Weather cloudy; cholera throughout Jhalawad, 120 cases, 99 deaths. *General Remarks.*—Cholera prevalent in Kattywar, Southern Mahratta Country and Kanara; hot weather fairly set in.
Bengal—(April 6th)		
Chittagong ...	*Nil*	Weather warm; cold-weather crops getting on well owing to the recent rain; cholera in the south of the district.
Noakhally ...	0·41	Heat daily increasing; mornings generally cloudy; on the 26th the morning was densely foggy; high winds; a little rain on the 23rd, and a thunder-storm on the night of the 28th; chillies, pulses, linseed, &c., are in good order; ploughing for the early rice crop, and sowing of early and late rice together, are now going on; cholera is very bad in the town and out in the district, especially along the pilgrim route from Chundernath.
Chittagong Hill Tracts...	·6	Weather seasonable; showers of rain on the 24th and 25th; *joom* cutting is nearly over, its burning has commenced; both cholera and small-pox have broken out at Rangamattee.
Hill Tipperah ...	0·55	Weather hot, with occasional storms; no change in the state and prospects of the crops.
Backergunge ...	·45	The crops are in a satisfactory condition; a good deal of cholera in a sporadic form prevails.
Furreedpore ...	0·72	Weather windy, with a storm and rain on one day; state of the crops is fair; ploughs at work generally; cholera is very prevalent, especially at Belgachi station, Eastern Bengal Railway, and Goalundo.
Dacca ...	0·7	Weather seasonable; state and prospects of the crops are good.
Mymensing ...	*Nil*	Weather dry and hot, with variable winds; great want of rain, to allow of sowing of the early rice crop.
Tipperah ...	1·10	Weather hot; high south wind; a few drops of rain; the spring rice is being reaped; prospects are good.
24-Pergunnahs ...	0·38	Weather hot; windy; more rain is required for the preparation of ground for spring sowings; cases of cholera continue to be reported from every part of the district.
Jessore ...	*Nil*	Weather clear and dry; wind from south; October indigo, *teel* oil-seed, and spring rice promising; rain is generally wanted; cholera is prevalent at the Sadr station, and here and there in the district.
Nuddea ...	0·20	Rain in nearly all the sub-divisions, but heavy only in Meherpore and Chooadangah; there are no crops on the ground except indigo, which is fair; the preparations for sowings of early rice have progressed; cholera is spreading; it is bad in the north of the Meherpore sub-division and in the Sadr.
Moorshedabad ...	*Nil*	Temperature generally close and hot, cloudy and sometimes windy; cold weather crop almost entirely gathered; outturn of about 10 or 11 annas; prospects of the *boro dhan* good; indigo, mulberry and sugarcane are fair; cholera is prevailing at Rampore Haut, Jungypore, at thanas Sujagunge, Goas, Jellinghee and Bhurutpore; also prevails in Berhampore.
Pubna ...	*Nil*	Weather hot; state and prospects of the crops are fair, but rain is much wanted; cholera is spreading.
Rajshahye ...	·22	There was slight rain at a few places on the 28th; insufficient, however, to benefit the crops; the *rabi* crops have suffered considerably from want of rain; such as have been already cut have given scarcely half the average outturn; in Mandah, Janore and Bagmara, the prospects of the *boro dhan* crop are decidedly unfavourable; in other parts, such as Poothea and Burrigong, the crop is at present in a much better condition; several cases of cholera have been reported in various quarters; also some cases of small-pox.
Bogra ...	*Nil*	No change in the character of the weather since last week; state and prospects of the crops are same as before; rain is wanted for ploughing.
Maldah ...	*Nil*	Weather getting warmer, with occasional dust-storms; cloudy on the 1st instant, with a promise of rain very shortly; no change in the state of the crops; *rabi* is being reaped; during the week 19 cases of cholera reported, 8 terminating fatally; this disease is reported to be increasing.
Dinagepore ...	*Nil*	Weather very hot; strong west winds; prospects of the *boro dhan* crop are bad; rain is much wanted to enable sowings of *bhadoi* rice; cholera is prevailing in a few villages, but not in an epidemic form.
Rungpore ...	*Nil*	Weather hot, with strong westerly wind; sowings of rice delayed from continual drought.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ...	*Nil*	Weather is getting hot; there has been west wind as well as east wind during the week; people have not yet been able to sow *bitri dhan* (*aous*) in all their fields for want of rain; the seeds sown have not germinated; the prospects of the *cheena* and the *kaon* crops continue unfavourable.
Jalpaiguri ...	*Nil*	The want of rain is very serious in the drier parts of the district; the early *dhan*, which should now be in the field, cannot be sown till rain falls, the ground is so dried up, and in the damper parts of the Duars, where the *bhadoi dhan* is sown very early, it is now reported as being dried up in places.
Darjeeling ...	*Nil*	Not a drop of rain, although the appearance of the sky has often been threatening; rain is greatly needed; high winds at times; the young crops are doing well, but they will suffer if there is no rain soon.
Midnapore ...	*Nil*	Weather seasonable; the rain is derived from partial thunder-storms, which are not general, and less in the south than in the north; every fall is beneficial; cholera and small-pox continue in certain portions of the district.
Howrah ...	·10	Sky clouded with indications of rain; heavy storm on Wednesday, but an inappreciable fall of rain; ground is still under preparation for sowings; more rain would be appreciated.
Hooghly ...	·30	Weather close and sultry; cloudy at intervals; no sowings reported as going on; land is being prepared for *aous*, *rohur* and late indigo; cucumbers, *pautolls*, early indigo and *jali dhan*, still doing well; mangoes indifferent from want of water; rain greatly needed; wheat and barley harvest almost over; cholera is bad all over the district, especially in Hooghly and Serampore; small-pox is abating; fever ceased.
Burdwan ...	·47 at Culna, ·15 at Bood Bood. *Nil* at Cutwa.	Cholera is abating in Raneegunge, but prevalent in Culna.
Bankoorah ...	*Nil*	Weather generally dry and hot, but there was some rain on the north-eastern border of the district; no change in the state and prospects of the crops; rain is wanted specially for indigo; cholera is abating.
Beerbhoom ...	*Nil*	Weather dry, with hot westerly wind; no change in the state and prospects of the crops; rain is wanted.
Sonthal Pergunnahs ...	*Nil*	Great promise of rain, though none has fallen; *mahua* being gathered with good outturn; mangoe crop promises well; both crops said to be slightly injured from want of rain in Rajmehal; cholera appears to be stopping.
Bhagalpur ...	*Nil*	Weather cloudy, with but little west wind; no crops on the ground now except some late *rohur*, newly-planted sugarcane, and newly-sown *aghani* rice and *moong*; mangoe promises a good crop; rain now would be of great value for agricultural operations; condition of the people is good, though there are cases of cholera and small-pox here and there.
Monghyr ...	*Nil*	Weather cloudy; no change in the state of the crops since last report; the *rabi* crop is now nearly all gathered in; prices continue easy.
Purneah ...	*Nil*	Very high west wind; mornings cloudy, threatening rain; rain is much wanted for the ploughing and sowing of *bhadoi* crops and for the *moong*, *kowni* and *cheena*, which is now coming on; rice is getting dearer, but wheat and gram are cheapest; the health of the district is bad; small-pox and cholera are prevalent; the latter especially bad in the north.
Durbangah ...	*Nil*	Mornings and evenings are pleasant; west wind during the day; cloudy skies; the *rabi* is being harvested all over the district, but the character of the yield cannot be stated definitely for a week or ten days longer; it promises, however, to be an average crop in Tajpore and the southern portion of the Sadr sub-divisions; about three-fourths of an average crop in the east of the latter sub-division; and scarcely half an average crop in Madhoobunnee.
Mozufferpore ...	Return not received.	It has been very cloudy for some days, and there is much hope of rain soon falling; the reaping of the *rabi* harvest is nearly completed; the price of rice has risen, but other food-grains remain cheap; some sporadic cases of small-pox and cholera have occurred.
Sarun ...	*Nil*	Weather hot and dry, with high west wind blowing; sky every day covered with clouds with no result; no change in the state of the crops; the *rabi* crops have been harvested, and are being threshed and stacked; opium has been collected, and the weighments have commenced; cotton is doing well; *cheena* and *moong* promise well; indigo prospects are generally indifferent; prices favourable; general health is good.
Chumparun ...	*Nil*	There have been continual west winds, which have done some damage, but the weather has been very cool; the crops are being reaped and the produce is fair.
Patna ...	*Nil*	Weather seasonable; crops are nearly all harvested; yield is good; sporadic cases of cholera and small-pox generally throughout the district, and a good deal of measles and chicken-pox.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Gya ...	...	Hot westerly wind in the beginning of the week; east wind and cloudy latterly, with a few drops of rain at Gya and Jehanabad; highest reading of the thermometer is 101°; no crops on the ground; cholera and small-pox reported from a few places.
Shahabad ...	Return not received.	Weather generally cloudy; *rabi* harvest is almost finished; the opium outturn is good; small-pox is still prevalent.
Hazaribagh ...	*Nil*	Weather seasonable; no crops on the ground at present; cholera and small-pox diminishing.
Lohardugga ...	*Nil*	Weather very hot for the time of the year; the *mahua* is flowering freely, and will probably be a full crop; rain is now looked for, for ploughing; small-pox, measles and cholera are still reported.
Manbhoom ...	*Nil*	Weather seasonable; no change in the character of the weather, and in the state and prospects of the crops.
Singbhoom ...	*Nil*	Weather seasonable; there are no crops to report about; the weather is warm, and if there is no rain soon, the Deputy Commissioner is afraid there will be sickness.
Balasore ...	·80	Weather unsettled and wind variable; in spite of threatening appearances rain has held off; ploughing, however, proceeds; cholera and small-pox cases much less frequent.
Cuttack ...	·05	No rain in Sadr station; several slight rainfalls reported from interior; it is extremely hot and close; no crops on the ground; public health is good.
Pooree ...	*Nil*	Weather hot and cloudy; three-fourths of the *dalwa* paddy crop are being reaped, while the remaining fourth part is failing for want of rain; the state of crops in general fair; mangoe crop is short; cholera prevails, but the influence is less. *General Remarks.*—There has been slight rainfall in the districts of Dacca, Tipperah, Cuttuck and Balasore during the week; sowing of early rice is becoming general, but deferred in places for want of rain; the outturn of spring crop is fair.
N. W. Provinces—		
Benares (April 5th)	...	The harvest gathered is good.
Allahabad („ 5th)	...	The harvest gathered is very good.
Jhansi („ 6th)	...	*Rabi* harvested; produce average.
Agra („ 5th)	*Nil*	No change.
Meerut („ 5th)	...	Harvesting going on.
Bareilly („ 5th)	...	No change; crops being cut.
Almora („ 3rd)	...	Weather fine and settled; some more rain required.
Punjab—		
Delhi (April 5th)	*Nil*	Crops under sickle; health good.
Hissar „	„	Crops being cut; a few cases of small-pox.
Umballa „	„	Crops average; health good.
Jullundur „	„	Crops fair; a little small-pox.
Lahore „	„	Health and crops good.
Mooltan „	„	Crops and health good.
Dera Ismail Khan „	·06	Health and harvest good.
Rawalpindi „	Slight rain	Prospects fair; health good.
Peshâwar „	·7	Agricultural prospects and health good. *General Remarks.*—Harvest prospects fair; public health generally good.
Oudh—		
Lucknow (April 5th)	*Nil*	Public health generally good; *rabi* being harvested; prospects favourable.
Sitapur „	„	
Fyzabad „	„	
Central Provinces—		
Upper Godavari (April 1st)	...	Hot; prospects favourable; health good; prices steady.
Sambalpur ...	...	Harvest over; 4 cholera deaths.
Bilaspur ...	Few drops of rain on the 28th Mar. last.	Cloudy; prospects favourable; small-pox and cattle disease prevalent; prices steady.
Raipur ...	...	Harvest gathered; health good; prices easy.
Chánda („ 2nd)	...	Threshing of *rabi* continues; cholera in few villages.
Chhindwára ...	...	Cloudy; harvest gathered; health good; prices steady.
Betul („ 3rd)	...	Harvest gathered; 94 cases of cholera, 45 deaths; prices fallen.
Balaghât („ „)	...	Cloudy, close; harvest gathered; few cases of cholera; prices steady.
Bhandara („ 4th)	...	Threshing of *rabi* continues; fever and small-pox prevalent; prices easy.
Nagpur („ 5th)	...	Cloudy, close; threshing of *rabi* continues; fever prevalent; prices stationary.
Wardha ...	...	Cloudy; small-pox prevalent; prices stationary.
Nimár ...	...	Cloudy; *kharif* ploughing commenced; prices fallen.
Hoshangabad ...	...	Hot; *rabi* fair; cholera in few villages; prices stationary.
Narsinghpur ...	...	Threshing of *rabi* continues; harvest good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*continued.*		
Jubbulpore (Apl. 5th)	...	Harvest excellent; small-pox and cattle disease prevalent; 24 cholera cases, 9 deaths.
Saugor ...	...	Threshing of *rabi* continues; small-pox prevalent; prices easy.
Seoni ...	...	*Rabi* cutting continues; health good.
		General Remarks.—The weather has been more cloudy and hotter than is usual at this time of the year; a good harvest has been reaped and prices are easy; cholera is slightly on the increase and has made its appearance in the Jubbulpore district.
British Burma—		
Pegu Division.		
Rangoon (Apl. 5th)	...	Health good; slight cattle disease.
Thonkwa ...	...	Health good.
Prome ...	...	13 deaths in town from cholera; 1 in Shwedoung; small-pox raging in Prome and Shwedoung.
Thayetmyo ...	...	Health good; small-pox at Mindoon.
Bassein ...	...	Slight cholera and small-pox, otherwise health good.
Henzada ...	...	Cholera at Zaloon, otherwise health good.
Arakan Divn.		
Akyab ...	...	88 deaths in town from cholera; slight cholera in district.
Tenasserim Divn. ...	...	Public health good.
Assam—		
Gauháti (Apl. 6th) ...	·12	Mornings clear and cool; slight shower on the 31st; hot dry westerly winds during the day; rain very much needed for tea and rice crops; small-pox at Barpetá and Sindurdia on the decrease.
Sylhet „	1·70	More rain wanted; field work progresses.
Hyderabad Assigned Districts—		
Umraoti (Apl. 6th)	...	*Rabi* completely gathered, outturn good; land being prepared for ensuing cultivation.
Mysore and Coorg—**(Apl. 6th)**	·16 in Bangalore Cantonment; none in Coorg.	Prices of grain shew tendency to rise; cholera in five districts, increasing in Nagar Division.
Rajputana—		
Sirohi (April 3rd) ...	...	Harvesting completed; health good and seasonable.
Marwar („ 1st) ...	...	Weather cloudy; slight shower on 27th; harvest promising but slightly damaged by late high winds; water getting scarce; small-pox still prevalent.
Meywar (Mar. 31st) ...	...	Health and crop good; weather cloudy; sun required.
Harowtee („ 25th) ...	...	Health and crops good.
Ulwar (April 5th) ...	...	Gram and barley being cut; splendid crops; weather fine, health good.
Bhurtpore („ 6th) ...	...	Clear sunshiny weather; gram being harvested.
Jeypore („ 6th) ...	...	Harvesting progressing favourably; health fair.
Ajmere ...	...	Delightful weather; harvesting progressing satisfactorily; small-pox still prevalent.
Central India—		
Indore (April 5th)	...	Every thing generally favourable; few cases of cholera about Rewah.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...	

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORT ON THE TRADE AND CUSTOMS OF BRITISH BURMA FOR THE YEAR 1874-75.

Extract from the Proceedings of the Government of India, in the Department of Revenue, Agriculture and Commerce, No. 234, dated Calcutta, the 7th April 1876.

STATISTICS.

READ—

Report on the Trade and Customs of British Burma for the year 1874-75.

RESOLUTION.

The foreign (sea-borne) trade of British Burma during 1874-75 amounted in value to £5,258,078 against £5,319,502 in 1873-74, and £5,548,701 in 1872-73. There has thus been a continuous decrease in trade during the last two years. The whole of the decrease occurred in the export trade, and mainly in the staple of rice, of which large quantities were diverted to Bengal during the scarcity, instead of being sent as usual to European markets.

2. The imports of the province for the last five years are as follow:—

Year.	Merchandise.	Treasure.	Total.
	£	£	£
1870-71	1,064,557	48,033	1,112,590
1871-72	1,382,416	48,439	1,430,855
1872-73	1,680,201	72,920	1,753,121
1873-74	1,783,055	56,041	1,839,096
1874-75 . . .	2,160,352	54,906	2,215,258

These figures shew a very satisfactory, uninterrupted increase in the import trade of the province during the last five years.

3. The exports for the same period are as follow:—

Year.	Merchandise.	Treasure.	Total.
	£	£	£
1870-71	2,436,607	16,052	2,452,659
1871-72	2,790,752	16,384	2,807,136
1872-73	3,776,980	18,600	3,795,580
1873-74	3,465,599	14,807	3,480,406
1874-75	3,037,492	5,328	3,042,820

The figures for the first ten months of the current year indicate a considerable recovery in the export trade.

4. Most of this trade is confined to the following countries, *viz.*:—

The United Kingdom,
Germany,
Holland,
The Eastern Coast of Africa and Mauritius,
The Straits, and
Siam.

The value of the trade with these countries in 1874-75 amounted to £5,192,808, or nearly 99 per cent. of the whole sum of the foreign trade. The figures for each country are—

		£
United Kingdom	Imports	1,772,054
	Exports	2,475,196
	Total	4,247,250
Germany	Imports	21,473
	Exports	28,457
	Total	49,930
Holland	Imports	12,209
	Exports	14,447
	Total	26,656
East Coast of Africa	Imports	1,290
	Exports	18,969
	Total	20,259
Mauritius	Imports	348
	Exports	11,599
	Total	11,947
Straits Settlements	Imports	367,555
	Exports	402,006
	Total	769,561
Siam	Imports	25,188
	Exports	41,917
	Total	67,105

Practically the bulk of the foreign trade is confined to the United Kingdom and the Straits.

5. Burma also possesses an extensive coasting trade with other parts of India, chiefly with Bengal. The value of this trade in 1874-75 amounted to £4,767,636 thus divided :—

		£
Bengal	Imports	2,318,777
	Exports	1,787,083
	Total	4,105,860
Bombay	Imports	9,091
	Exports	182,314
	Total	191,405
Madras	Imports	253,336
	Exports	216,924
	Total	470,260
Indian Ports not British	Imports	99
	Exports	12
	Total	111

6. From the United Kingdom the principal imports into Burma are cotton goods, coal, liquors, machinery, metals, provisions, salt, silk goods, and woollen goods. The exports to the United Kingdom are :—cotton (raw), rice, cutch, hides and skins, and timber (chiefly teak).

The chief import from Germany is liquor for which rice is exchanged.

To Mauritius, Burma sends teak. No merchandise is received from Mauritius in return.

To Africa rice and teak are sent; the imports are insignificant.

The Straits supply Burma with some cotton goods, fruits and vegetables, liquors, metals (tin and iron), provisions, silk (raw and manufactured), spices, sugar and sugarcandy, tea, and umbrellas. Of these the silk, tea, umbrellas and a good deal of the provisions are Chinese goods for which Singapore is a depôt. Burma sends in return to the Straits rice (in large quantities), hides and skins, and jade stone.

The direct trade between Burma and China seems in a fair way towards extinction. From China direct there were no imports in 1871-72 and 1874-75, the imports in 1870-71 amounting to £174, in 1872-73 to £843 and in 1873-74 to £46. The exports are represented by the following figures :—

	£
1870-71	19,025
1871-72	32,872
1872-73	76,210
1873-74	10
1874-75	*Nil.*

There are no details in the report or in the local annual volume of the trade of the province with Holland and Siam. The omission has been brought to the notice of the Chief Commissioner.

7. In the coasting trade the chief imports from Bengal are :—apparel, candles, cotton goods, fruits and vegetables, jute manufactures (nearly all gunny bags), metals, silk goods, spices, tobacco and woollen goods. Many of these articles are of European origin, *e. g.*, most of the apparel, candles, cotton goods, metals, silk goods, and woollen goods. It may be expected that in course of time Burma will obtain such goods direct in larger quantities, and that the coasting trade, so far as such goods are concerned, between Calcutta and Burma will fall off.

Burma sends to Bengal, *i.e.*, to Calcutta, cotton (raw), rice and paddy, cutch, lac (stick), and wood (mostly teak). There is also some export of earth-oil to Calcutta and Chittagong.

From Madras, Burma receives cotton goods, fruits, oils (vegetable), provisions, and tobacco, and sends in return rice and teak.

The imports from Bombay are unimportant. The exports to that presidency are chiefly represented by teak wood, the value of which during the year was £171,903 out of a total value of £182,314.

There is no trade between Sind and Burma.

8. The foreign and coasting trade is thus divided between the different ports of the province :—

		£
Rangoon	Foreign	4,008,894
	Coasting	3,136,442
Akyab	Foreign	441,600
	Coasting	796,295
Moulmein	Foreign	431,589
	Coasting	759,435
Bassein	Foreign	321,689
	Coasting	117,483
Tavoy	Foreign	18,931
	Coasting.	*Nil*
Mergui	Foreign	11,872
	Coasting	135
Ramree	Foreign	388
	Coasting.	*Nil*

(By coasting trade here is meant trade with other provinces.)

9. The sea-borne trade of Burma is thus really confined to Rangoon, Akyab Moulmein and Bassein, and Rangoon is the centre of the trade of the province. Naturally so, this port being the outlet for all the produce of the valley of the Irrawaddy and of Upper Burma, as well as the most convenient place for the reception of imports for distribution in these parts. The staple of the export trade of Akyab and Bassein is rice, to which Moulmein adds teak. The principal exports from Rangoon are rice, cotton, cutch, hides, lac, jade, caoutchouc

and timber. There is a decline shewn in the foreign trade of most of the ports (except Rangoon), the causes of which are explained in paragraph 55, page 29 of the Chief Commissioner's report.

10. In this report the Chief Commissioner treats of exports first and of imports afterwards. It will be best however to reverse this order, and to treat first of imports and afterwards of the articles of export with which the imports are paid for.

11. The principal imports are, *apparel*, candles, *cotton piece-goods*, fruits and vegetables, coal and coke, dyeing and colouring materials, glass, grain and pulse, *jute manufactures*, *liquors*, *machines and machinery*, matches, *metals*, oils, opium, paper, *porcelain and earthenware*, *provisions*, *salt*, seeds, ships (parts of), *silk goods*, *spices* (mainly *betelnuts*), *sugar*, tea, *tobacco*, umbrellas, and *woollen goods*. Of these the most important in point of value are the articles which have been italicised.

12. In the import of *Apparel* from foreign ports there has been a steady increase every year during the last five years, the value having risen from £9,062 in 1870-71 to £26,677 in 1874-75. These imports are supplemented by a large coasting trade, the value of which last year was £54,738. Most of the trade was with Bengal (Calcutta).

13. Candles are imported rather extensively, the Buddhists consuming them largely in their religious ceremonies. The value of the imports from foreign ports has swelled from £7,111 in 1870-71 to £12,120 in 1874-75. From Calcutta also considerable quantities are received, the value of the imports from India last year was £7,531, most of which was sent from Calcutta. Nearly all the imports are received in Rangoon.

14. *Cotton goods.*— The trade in these articles shews a considerable increase, the values of the imports for the last five years having been as follow :—

	£
1870-71	526,667
1871-72	651,600
1872-73	728,491
1873-74	702,427
1874-75	840,220

The temporary and slight depression of 1873-74 having given way to a great reaction in the year of report. Most of these goods are imported from the United Kingdom, but a not inconsiderable trade is done with the Straits whence goods of European manufacture are re-exported to Burma.

15. In addition to the stock of cotton goods received from foreign countries, a very large traffic in these goods is carried on with India, whence supplies are regularly sent to Burma. The value of the goods so sent for the last five years was—

	£
1870-71	340,834
1871-72	289,378
1872-73	287,119
1873-74	330,249
1874-75	343,331

These imports are principally from Bengal, and the bulk of them consists of twist and grey goods.

16. The imports of Coal and Coke are increasing, though not very much. The value reached £58,770 in 1874-75 against £33,740 in 1870-71, but a part of this increase is due to higher prices, not to larger quantities imported. The great rise in price of English coal of late years has much affected its consumption in India. The import of coal into Burma from Bengal is not important.

17. The imports of Glass and Glassware, excluding Bottles, but inclusive of Beads and False Pearls, Plate and Sheet Glass and other ware, present a steady increase. The Burmese shew a liking for glass tumblers which are, it is understood, used to a great extent in preference to the lacquered bamboo drinking vessels of their own manufacture.

The figures for the last five years are—

	Foreign trade. £	Coasting trade. £
1870-71	4,985	7,744
1871-72	5,642	7,505
1872-73	9,074	7,439
1873-74	6,671	9,491
1874-75	7,354	12,516

18. *Jute manufactures.*—The foreign trade in these goods is of most limited dimensions. Nearly all the importations are from Calcutta in the shape of gunny bags. The value of these goods has largely and constantly increased during the last five years, as the following figures shew :—

	£
1870-71	123,556
1871-72	174,852
1872-73	256,886
1873-74	346,556
1874-75	355,533

This trade expands with the expansion of the rice trade, the bags being used chiefly for the packing of rice.

19. In *Liquors* also the increase of trade has been great, the increase being particularly noticeable in spirits—

	£
1870-71	95,217
1871-72	95,515
1872-73	107,648
1873-74	120,038
1874-75	132,903

The coasting trade in liquors is rather less than a tenth of the foreign trade, having amounted last year to £12,871.

20. The importation of *Machinery* shews a decrease as compared with 1873-74, but the value of the imports is still nearly five times what it was five years ago. The figures are—

	£
1870-71	20,697
1871-72	49,021
1872-73	75,796
1873-74	101,429
1874-75	93,909

The coasting trade in machinery is unimportant. Dead weight of this kind does not very easily find freight, and such articles are as a rule sent straight to their ultimate destination.

A good deal of this machinery is, it is said, required by His Majesty the King of Burma, and a very large quantity is required for rice mills, timber mills, and other industries which are making way in the province. Most of the machinery comes from the United Kingdom.

21. *Metals.*—The value of the imports shews a large and progressive increase, some portion of which is due to a rise in prices, but the quantities are increasing too. The figures of value for the last five years are—

	£
1870-71	34,250
1871-72	57,398
1872-73	66,255
1873-74	77,747
1874-75	127,237

The bulk of the imports consists of various kinds of iron, the value of this metal amounted during the year to £86,327.

An extensive coasting trade is also carried on in manufactured metals chiefly, the value of the imports of these goods having been duing the year £67,106.

22. The imports of *Porcelain and Earthenware* shew a continued increase, the figures of value being—

	£
1870-71	18,433
1871-72	19,304
1872-73	27,079
1873-74	33,036
1874-75	47,463

There is also a small but increasing trade done in these articles with India.

Earthenware is rapidly getting into favour with the Burmese, and for domestic purposes it seems to be preferred to the lacquered bamboo vessels which have hitherto been used by the people, especially in large towns and their neighbourhood. The trade may therefore be expected to increase.

23. *Provisions* were imported to the value of £53,370 during the year, this amount being divided in pretty equal proportions between England and the Straits. The value of the imports from India was rather less than from foreign ports; Madras and Bengal both export largely to Burma.

24. Imports of Salt shew a large increase, the figures being as follow:—

	£
1870-71	29,691
1871-72	43,105
1872-73	63,005
1873-74	50,166
1874-75	68,515

Regarding the export of salt to Upper Burma valued in 1873-74 at £39,594, and in 1874-75 at £37,825, the Chief Commissioner remarks that "a large proportion of these exports is made at one per cent. duty which amounts to one pie per maund only, so that the population of Upper Burma and many of the states bordering thereon, may be said to eat their salt duty-free, while in Bengal Rs. 3-4-0 per maund are levied." The one per cent. duty is levied under treaty with the King.

25. The imports of *Silk*, raw and manufactured, are very large. The figures for raw silk, which is nearly all Chinese silk imported *viâ* the Straits are as follow:—

	£
1870-71	38,290
1871-72	50,563
1872-73	59,662
1873-74	79,809
1874-75	91,892

And the imports of piece-goods are for the same period—

	£
1870-71	98,458
1871-72	121,137
1872-73 (including thread, £942)	161,561
1873-74 (including thread and other manufactures of silk, £2,573)	211,592
1874-75 (including other manufactures, £778)	291,199

These are chiefly obtained from England.

26. Large quantities of silk piece-goods are also imported from Bengal, as will be seen by the figures for the last three years appended—

	£
1872-73 (including other manufactures of silk, £682)	184,174
1873-74 (including thread, £837)	213,992
1874-75 (including thread and other manufactures, £19,082)	270,730

The increase in the importation of these goods indicates the prosperity of the people, no Burmese wearing cotton when he can afford silk.

27. Under the head of *Spices*, the principal importations consist of betelnuts from Bengal. These are sent to Burma every year in immense, but fluctuating quantities.

28. The importation of *Tobacco* from foreign countries is small, but the coasting trade is very great. The value of the tobacco imported from India during the last five years was—

	£
1870-71	124,554
1871-72	130,797
1872-73	126,362
1873-74	204,778
1874-75	155,868

Much of this is consumed by the Burmese who smoke largely, but grow very little tobacco as yet, though the country ought to produce the weed extensively. Some portion also is returned to India manufactured into cheroots.

29. *Woollen goods* have slightly fallen off in value as compared with last year (£62,142 against £62,333). The coasting trade has also slightly diminished (£83,948 against £85,843), but the value in both cases is far in excess of the imports of previous years.

30. The total value of all imports of merchandise is shewn below—

Foreign trade.

	£
1870-71	1,064,557
1871-72	1,382,416
1872-73	1,680,201
1873-74	1,783,055
1874-75	2,160,352

The trade has therefore steadily increased year after year without interruption, until last year it was double what it was five years before.

Coasting trade.

	£
1870-71	1,233,771
1871-72	1,323,067
1872-73	1,467,860
1873-74	1,966,113
1874-75	1,949,919

The small decrease noted here as compared with last year is the nett result of a number of fluctuations; but, on the whole, all important articles have improved or not fallen off materially, with the exception of tobacco and betelnuts, in which the decrease was large. In the case of betelnuts the falling-off is not explained, but the trade seems liable to great oscillation. The falling-off in tobacco is no doubt the result of the higher prices offered in the European markets for Bengal tobacco.

31. The items comprising the bulk of the export trade are: caoutchouc, cotton (raw), gums (cutch), hides and skins, lac (coasting trade), precious stones and pearls, provisions, rice and paddy, stones (jade), wood and timber. Of these the most important are rice and paddy and timber (mainly teak).

32. The trade in Caoutchouc is comparatively new. The first separate mention of trade with foreign ports was in 1873-74 when the value of the exports was £2,053 only; in 1874-75 the recorded value was £13,128. The coasting trade in this article is small. The development of the production of this article in Burma is engaging the attention of the local Forest Department. Most of the rubber now exported comes down from Upper Burma, and it is all sent to England.

33. Cotton (raw) is exported entirely from Rangoon. A considerable proportion of the exports is the produce of Upper Burma. The trade last year was rather larger than in 1873-74, but there is a great falling-off as compared with previous years—

	£
1870-71	126,798
1871-72	291,106
1872-73	249,356
1873-74	59,611
1874-75	78,900

It is nearly all sent to England, only a very small quantity going to the Straits. On the other hand the coasting trade in cotton shews a large increase—

	£
1870-71	59,661
1871-72	17,804
1872-73	38,868
1873-74	62,074
1874-75	109,863

In 1871-72 and 1872-73 there seems to have been exceptional activity in the trade with foreign ports and exceptional depression in the coasting trade, the latter reviving in the last two years while the former fell off. The Chief Commissioner says there was a good demand for Burmese cotton in Calcutta last year.

34. Gums, cutch.—The Chief Commissioner at page 14 (paragraph 22) of his review gives a brief account of the manner in which cutch is made. It is

produced in Prome and Thayet, and considerable quantities are brought down from Upper Burma. Exports to foreign ports have been for the last five years—

	Quantity. Cwt.	Value. £
1870-71	102,089	71,485
1871-72	117,263	73,159
1872-73	233,611	160,339
1873-74	124,609	79,690
1874-75	151,148	111,227

Of the total exports during the year nearly £108,000 went to England. A good deal of business is done in the coasting trade in this article also—

	£
1870-71	47,866
1871-72	43,426
1872-73	67,373
1873-74	52,630
1874-75	47,248

Of the cutch sent to India the greater part comes to Calcutta whence it is re-shipped to Europe or America. It is satisfactory to find that the wasteful method of cutting down cutch-producing trees which has hitherto prevailed has been stopped.

35. Hides and skins.—The two years 1872-73 and 1873-74 saw a very great increase in this trade, but this year it has fallen to a point not much above the level of 1871-72. The figures of quantity and value are—

		Nos.	£
1870-71	To foreign ports	187,142	30,538
	To coasting ports	9,068	1,425
	Total	196,210	31,963
1871-72	To foreign ports	291,478	51,775
	To coasting ports	13,768	1,806
	Total	305,246	53,581
1872-73	To foreign ports	385,143	71,141
	To coasting ports	46,359	8,928
	Total	431,502	80,069
1873-74	To foreign ports	448,110	114,172
	To coasting ports	28,743	6,047
	Total	476,853	120,219
1874-75	To foreign ports	273,523 & 48 cwts.	59,790
	To coasting ports	50,343	8,165
	Total	323,866 & 48 cwts.	67,955

With reference to this trade the Chief Commissioner says (page 15 of the report), "The supplies from Upper Burma decreased considerably, and there was also a falling-off within British territory, which, if due to less cattle disease, is a matter for congratulation." This it will be observed is a different view to that taken by Sir Richard Temple in his minute prefixed to the report on the administration of Bengal for 1874-75. His Honour remarks: "The place which hides and skins have assumed among the exports is remarkable, and the facilities which these provinces afford for cheaply breeding and rearing cattle render the expansive power of this trade practically boundless." Other authorities differ from Sir Richard Temple and hold that the expansion of the trade in hides is due rather to causes which must excite regret than to any particular facilities which Bengal and the *North-Western Provinces possess for the breeding of cattle to be slaughtered for the sake of their hides. The

* Of course a considerable proportion of the hides exported from Calcutta comes down from Cawnpore and other marts in the North-Western Provinces, and these exports by no means represented only the produce of Bengal.

difference of opinion which exists in such an important matter illustrates the necessity for trustworthy agricultural statistics. If such statistics existed, the question would be reduced to one of fact and there would be no room for uncertainty as to whether Bengal is a good cattle-breeding country, and the annual export from it of seven millions and upwards of hides is a matter of congratulation; or whether the expansion of the trade should be regarded with regret as being the natural consequence of increased mortality in beasts caused by drought, pestilence, starvation and poisoning.

36. Lac.—As yet the export of lac to foreign countries is very small. In Burma the manufacture of shell-lac has only recently commenced, and has as yet attained but limited dimensions. The export of stick-lac to foreign countries is not a profitable operation. Consequently the greater part of the lac produced in Burma is sent to Calcutta whence it is re-shipped as shell-lac to Europe and America.

39. The quantity and value of the exports of stick-lac to foreign countries are as follow:—

	Cwt.	£
1870-71	568	667
1871-72	Nil	494
1872-73	65	104
1873-74	77	123
1874-75	164	388

Exports to India, *i. e.*, chiefly to Calcutta were—

		£
1870-71	not stated	17,134
1871-72	„	16,291
1872-73	13,906	29,355
1873-74	21,483	79,092
1874-75	14,893	40,774

The decrease in the trade results it is understood from the action of the King of Burma, who has monopolised the article, most of which is still produced in Upper Burma. The Chief Commissioner states that His Majesty has established a manufacture of shell-lac and lac-dye at Mandalay.

40. The Chief Commissioner also says that shipments of shell-lac made at Rangoon have met with favour in Europe. There is no doubt a large opening for increased supplies of shell-lac, but merchants must expect to find that the well-known and long-established Calcutta marks will not easily be competed with. It would be a good thing to devote all possible attention first to the propagation of the raw material, of which the supply is running short in India as well as in Burma, and afterwards if there is a sufficient supply, to keep a fairly organised factory at steady work, to attend to local manufacture.

41. Rice and paddy.—Of the export of rice from Burma to foreign ports it is unnecessary to repeat here the figures given in the review of the trade of India for 1874-75, (paragraph 179, page 67). It may be remarked here that the exports for the first ten months of the current year are greatly in excess of the exports for the same period of 1873-74 and 1874-75, and that the trade is in a very prosperous condition.

The exports to Indian ports have been for the five years—

	Cwt.	£
1870-71	482,634	93,914
1871-72	460,284	87,756
1872-73	397,803	60,650
1873-74	3,949,864	1,154,924
1874-75	2,827,200	742,172

The great increase in the last two years being due to the scarcity in Bengal in 1874, during the prevalence of which enormous quantities of rice were imported from Burma.

41. Stone (jade).—The trade in jade stone is confined to Rangoon, whence it is exported, practically only to the Straits. This article is produced in Upper Burma only and is dealt in only by the Chinese. The two great and indeed only sources of supply of this article are Upper Burma and the Yarkand territory. From Yarkand the supply for China, which consumes pretty well the whole of the production, has fallen off very greatly, if not altogether, since the expulsion of the Chinese from that country, and, as a natural consequence,

the trade with Burma has greatly increased. The value of the exports for the last five years has been—

	£
1870-71	39,720
1871-72	45,538
1872-73	37,250
1873-74	50,232
1874-75	80,136

42. The export of Precious stones and pearls to foreign countries is insignificant, but the coasting trade is tolerably extensive, though fluctuating. The figures for the last five years of export to Indian ports are—

	£
1870-71	18,716
1871-72	31,323
1872-73	26,050
1873-74	15,088
1874-75	22,393

The fluctuations are sufficiently explained by the fact that the trade in precious stones (which are nearly all rubies) is a monopoly possessed by the King of Burma. There is some reason to believe too, that the figures by no means represent the whole of the trade, large quantities of rubies being brought away from Burma on the persons of dealers and through the post, no information reaching the Custom-house at Rangoon in either case. The Chief Commissioner, it is observed, is of this opinion. The largest portion of these rubies are brought to Calcutta, whence traders (European and native) distribute them all over India. They are also dealt in by Madras traders (chettys) to a smaller extent.

43. The trade in Seeds with other presidencies shews some very remarkable fluctuations, regarding which no explanation is offered in the local report. The figures are—

	£
1870-71	450
1871-72	3,425
1872-73	23,422
1873-74	13,597
1874-75	102

The foreign trade is insignificant.

44. The trade in Tobacco is increasing, but its extent is as yet but small. It will perhaps be doubted whether the figures which represent the extent of the coasting trade may be trusted. Certainly it might be considered that more than £3,000 worth of cheroots, &c., are annually sent from Burma to Bengal and Madras. Yet the figures for Bengal and Burma correspond pretty closely. According to the Burma returns the value of the exports to Bengal were £1,845, and according to the Bengal returns the imports from Burma were £1,914.

45. The export of Wood, *i. e.*, of teak to foreign ports, is falling off. The value for the last five years was—

	£
1870-71	219,895
1871-72	291,262
1872-73	358,007
1873-74	382,633
1874-75	325,180

The coasting trade on the other hand shews an increase—

	£
1870-71	258,609
1871-72	243,952
1872-73	339,701
1873-74	403,127
1874-75	473,949.

In this, as in previous reports of the Chief Commissioner, attention is drawn to the causes of the decline in this important staple of Burmese trade, the largest next to rice. These causes are stated by the Commissioner of Moulmein at paragraph 48 (page 25) of the Chief Commissioner's report, and have been brought to the notice of the Forest Department.

46. The grand total of the export trade for the last five years is shewn below—

To Foreign Ports.

	£
1870-71	2,436,607
1871-72	2,790,752
1872-73	3,776,980
1873-74	3,465,599
1874-75	3,037,492

To Indian Ports.

	£
1870-71	596,396
1871-72	547,078
1872-73	756,680
1873-74	1,933,656
1874-75	1,620,066

Though the foreign trade has fallen off during the last two years, in consequence of circumstances connected with the abnormal features of the rice trade during that period, it is far in excess of the trade of previous years.

The coasting trade too has largely increased, and in both sections (foreign and coasting) the trade of the current year, as far as can be ascertained from the information available at present, shews a complete recovery, and the total will probably at the present rate exceed that of any previous year. The province is in fact in a prosperous condition.

47. *Treasure.*—The import of gold from foreign countries is small, the amount not having exceeded £27,427 in any year of the last five years. Last year the imports were £16,647 against £16,011 in the previous year. From Indian ports gold is brought to a larger extent, the average imports for the five years having been £32,831, last year the import amounted to £34,459, an increase in the previous year (£32,650).

The export of gold may be said not to exist at all, none having been sent out of the country during the five years, except £640 in 1871-72.

Imports from foreign ports of silver are also small, £36,743 last year against £41,682 in 1873-74, and £59,006 in 1872-73.

But from Indian ports a considerable amount is imported, as is shewn by the following figures—

	£
1870-71	867,416
1871-72	721,189
1872-73 (including imports on account of Government, £ 4,598)	1,401,744
1873-74 " " " £554,560)	2,165,990
1874-75 " " " £ 21,450)	596,567

The largely increased exports of rice in 1872-73 and 1873-74 caused a continued flow of silver into the province in those years.

The export of silver to foreign countries is insignificant, and the export to Indian ports is also in ordinary years not large.

Last year however there was a great increase, a good deal of coin sent from Bengal to Burma for the purchase of rice having been returned when the demand abated. Exports amounted to £566,267 against £345,440 (including £665 on account of Government) in 1873-74.

48. *Customs revenue.*—The import duties amounted to £116,302 against £96,697 in the previous year, shewing a satisfactory increase, but the import revenue is not a true index of the condition of trade, for large quantities of goods are imported for consumption in Upper Burma and these goods under treaty pay only uniform duty of 1 per cent. *ad valorem.*

The value of such merchandise amounted in 1874-75 to £606,517, on which only £6,065 were realised as duty, instead of about £30,000, which would have been realised at the rates payable by traders generally. The value of goods cleared at this special rate under treaty is increasing every year, as the following figures shew—

(*Page* 40 *of Chief Commissioner's report.*)

	£
1870-71	268,562
1871-72	333,203
1872-73	432,050
1873-74	481,099
1874-75	606,517

Upper Burma thus reaps a large benefit from the special concession made in 1864 by the British Government.

49. The largest items of import revenue are cotton goods on which £25,906 were realised; spirits which realised £33,766, salt (£8,582) and silk goods (£10,477). In all these articles the revenue shews a large increase on previous years.

50. Except from rice practically no export duties are realised in Burma. The duty on rice produced during the last five years—

	£
1870-71	221,288
1871-72	239,275
1872-73	352,076
1873-74	314,280
1874-75	278,429

with a revival in the exports to foreign countries, the present year's returns will probably exceed those of 1872-73.

51. *Tonnage.*—With the falling-off in the demand for tonnage caused by the great activity in the rice trade during 1872-73 and 1873-74, the present year shews a great diminution in shipping from and to foreign ports. The figures for square-rigged vessels and steamers are—

		No.	Tons.
Entries.	1870-71	370	225,533
	1871-72	685	359,753
	1872-73	810	463,504
	1873-74	622	411,393
	1874-75	584	427,394
Clearances.	1870-71	534	360,780
	1871-72	739	404,885
	1872-73	869	563,205
	1873-74	706	501,874
	1874-75	585	443,696

52. On the other hand the intercourse by means of vessels of the same class with other presidencies shews an increase, nearly all of which was in the trade with Calcutta—

		No.	Tons.
Entries.	1870-71	429	277,505
	1871-72	308	201,379
	1872-73	277	217,256
	1873-74	546	414,024
	1874-75	531	425,084
Clearances	1870-71	312	163,848
	1871-72	258	150,833
	1872-73	214	130,929
	1873-74	455	313,670
	1874-75	479	337,684

The employment of native craft seems to be on the decline.

53. It has not been found possible to reconcile the figures contained in the report of the Chief Commissioner either with the figures of the annual trade volume for British India, or with those of the local volume. The discrepancies will be brought to the notice of the Chief Commissioner who will also be reminded that his report should have been framed in accordance with the instructions issued in April 1875, the distinction between the coasting and the foreign trade being clearly made throughout. The denomination of articles should also have been in the terms employed in the annual volume of trade and navigation. Future reports should be published with this volume and should in arrangement follow the plan therein observed. If this be done and the tables at the end are based on or copied from those in that volume, the report will be easier to examine and will be prepared with much less trouble than at present. The compilation of separate tables in different forms for the same results every year must necessarily be a source of great trouble and expense. The comparison and checking of the figures has caused much needless labour which might have been saved if the instructions of last April had been carried out.

54. The Chief Commissioner reports on the inland trade at pages 40 to 46. The most noticeable feature in this trade is that it is increasing in spite of numerous obstructions.

ORDER.—Ordered, that a copy of this Resolution be published in the Supplement to the *Gazette of India*, and that the attention of the Chief Commissioner be invited to the points noted in paragraphs 43 and 53, a statement of the discrepancies referred to in the latter paragraph, being also forwarded for his information.

(True Extract.)

A. O. HUME,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 28th March 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding*.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Nárendra Krishna Bahádur.
The Hon'ble J. R. Bullen Smith, C.S.I.
His Highness Mahárájá Iswaríparshád Náráyan Singh Bahádur, of Benares.
The Hon'ble F. R. Cockerell.

NATIVE PASSENGER SHIPS BILL.

The Hon'ble MR. HOBHOUSE moved that the Reports of the Select Committee on the Bill to consolidate and amend the law relating to Native Passenger Ships and Coasting Steamers, be taken into consideration. He said that this matter had been before the Council some considerable time, and on one or two different occasions. When they met last at Simla, he had explained to the Council the extreme complication of the present law, and that in point of fact the present law was found to be quite unworkable. He had also mentioned that a Bombay gentleman, Mr. Kittredge, who was very well acquainted with the business of passenger ships, had suggested a new principle on which the measure might be framed. This principle had first been provisionally adopted, and they had communicated with the Local Governments on the subject; and, finding that the principle was a sound and workable one, they had determined on recommending it to the Council. The Bill had been published, and nothing had occurred to make them wish to recede from the position taken up. In fact, all that had happened since the measure was last before the Council was that one or two small alterations had been made in details.

The principle that was adopted was to divide voyages, not according as ships were going east or west, nor into coasting voyages and others, but into short and long voyages. A long voyage was defined as one in the course of which a ship

was fully five days out of port, and a short voyage included all other voyages. These, in fact, represented two different and distinct classes of business; one represented the passenger trade to the more distant countries, and the other represented the coasting voyages, which were, at the present moment, provided for under that not very intelligible name by a separate law. Then, a set of rules had been laid down applying to all voyages, another set of rules applying to short voyages, and another applying to long voyages; those applying to short voyages were less stringent than those applying to long ones; that was to say, in the case of long voyages more precautions were taken. These alterations in the principle of the Bill necessitated considerable alterations in the details. All these were set out in the Bill, as presented to the Council in September 1875, and in the Report of the Select Committee which was then presented. He would only now mention one or two of the larger details in the Bill.

They had endeavoured to consult the convenience of shipowners in respect of certificates and surveys. Complaints had been made that shipowners had been holding perfectly good and valid certificates for many purposes, but yet the law required them to take out fresh certificates before the commencement of a fresh voyage, and these fresh certificates sometimes entailed a needless survey, the cost of which in the first instance was borne by the shipowners, but of course must, as in all such cases, be borne ultimately by those who used the ships. Now they had divided certificates into two classes—the one relating to the more permanent qualities of a ship, and the other to the temporary incidents which affected ships. Such matters as the seaworthiness of the ship, her equipment, and capacity were the permanent elements of a ship, and it was proposed that they should be comprised in one certificate, which was called certificate A; and if a shipowner held a certificate of this sort from the Board of Trade or the Indian Government, not more than six months old, that would cover the particulars required by certificate A, and no new certificate would be required. The other temporary incidents were such things as the number of the crew, supplies of provisions, water, and so forth, which might vary with every voyage; and for these the Committee proposed a second certificate called certificate B, of which there must be a new one at the commencement of every voyage. And in order to check recklessness in ordering surveys, at the expense of the owners, it was provided that, if the surveyors who conducted the survey reported that there was not, in their opinion, any good and substantial reason why the survey should have been ordered, the expense of such survey should be borne by the Local Government.

Another rather important alteration of the law was for the purpose of checking frauds which were committed in the passenger trade to India. For instance, they found that at Singapur a ship might put out of port with the number of passengers allowed by the law of Singapur; but after going ten miles out to sea, or after going to the coast of Sumatra, she might take in a larger number of passengers than was allowed by either the laws of Singapur or India, and convey them to an Indian port. At present the Indian law did not touch such an offence; it was an offence against the law of Singapur, and the moment the ship was three miles away from Singapur, she might laugh at that law. Now, as a general rule, it was not their business to interfere with the law of other countries, but this was a matter in which the interests of both countries were concerned, and they did not want that overcrowded vessels should enter Indian ports, and bring with them the risk of disease. They had therefore provided that if any ship entered an Indian port with an excess of passengers, more than was allowed by the Indian law, or more than was authorized by the license which the ship held from its port of departure, it should be deemed an offence committed against Indian law, and the captain should be punished accordingly.

He did not think there was necessity for him to draw the attention of the Council to any other matters, for all the other details were of a small kind, and he had no doubt the Council had satisfied themselves as to the propriety of this Bill in respect of these details.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed. He had only to add that they were very much obliged to the gentleman who had been at some pains to assist them in this matter. Mr. Kittredge, whom he had previously named, had taken a great interest in it, and Messrs. Mackinnon, Mackenzie and Co., the agents of the British India Steam Navigation Company, who had taken much pains to submit the case from their point of view, and who, in pressing their own interest, had only done that to an extent which was perfectly reasonable, proper and in the interests of the public. Two of their late colleagues, Mr. Eden and Sir Douglas Forsyth, had also taken great pains in framing the Bill, and they had held interviews with the Calcutta gentlemen engaged in the trade, and had enabled the Committee to adjust technical details with more confidence than would otherwise have been the case. He hoped that the Council would approve of the measure, and that it would be found to meet the requirements of the case.

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY asked for leave to postpone the motion that the Report of the Select Committee on the Bill to provide for the management of the Public Museum at Calcutta, be taken into consideration.

Leave was granted.

NATIVE COINAGE BILL.

The Hon'ble SIR W. MUIR moved that the Report of the Select Committee on the Bill to enable the Government of India to declare certain coins of Native States to be a legal tender in British India, be taken into consideration. When he asked leave to introduce the Bill, he had explained its provisions fully, and they were also discussed at a subsequent meeting. It was found in Committee that it was necessary to make only a few alterations. They had changed the definition of "Native States" in accordance with certain expressions used in a treaty; and it was now explained to mean any Indian State which was under the protection or political control of Her Majesty, or of which the Government had acknowledged the supremacy of the British Crown. In sections 3 and 4 they had struck out the words "or issued by," so as to preclude the power to issue, under the proposed Act, coins manufactured in England or any place other than a mint of the Government of India; and to section 4, clause (*f*), they had added some words to make it clear that the coins declared by a Native State to be a legal tender, should be so only in the cases in which payment made in such coins would, under the law for the time being in force, be a legal tender in British India. Words had also been introduced empowering the Governor General in Council to impose on any metal sent for coinage, under the proposed Act, the duty leviable on the same metal under the Indian Coinage Act, 1870; in all such cases, compensation would be arranged for, in the engagement entered into with the Native States, as the equivalent of such duty.

The Motion was put and agreed to.

The Hon'ble SIR W. MUIR also moved that the Bill as amended be passed.

The Motion was put and agreed to.

BOMBAY REVENUE JURISDICTION BILL.

The Hon'ble MR. HOPE moved that the Bill to limit the jurisdiction of the Civil Courts throughout the Bombay Presidency in matters relating to the land-revenue, as amended, be passed; and in doing so, he proposed to offer a few remarks upon the principle of the Bill, and the objections which had been raised against it. He had taken steps to have himself supplied officially with all the criticisms which had been offered upon the Bill in the public prints of the Bombay Presidency, both in English and the Vernacular, and to the best of his belief, he had received and had carefully perused all such criticisms. He did not propose to attempt to correct all the misrepresentations, or to answer all the vague declamations which had been scattered broadcast through-

out the presidency upon the subject. But he would take up a few points of more or less importance which might be considered as typical of the style of criticism which the Bill had had to endure.

First, there was what he might call personal criticism which had been directed against himself, and there was case criticism which had been based upon certain civil suits which had been recently before the public in the Bombay Presidency. To criticism of these two descriptions, he did not propose to reply, because it appeared to him that whether an individual revenue officer had acted correctly or not in any particular case, or whether the Government happened to be successful, or the reverse, in any particular suit, was a matter altogether irrelevant to the great public measure now under consideration. It seemed to him to be the duty of the Government and the Council to consider any measure which might be brought before them on the broad and general grounds of public policy which its advocates affirmed necessitated it, and not to turn aside, or be influenced by any circumstances which might arise out of the conduct of individual persons, or the accidents of any particular case.

He would next point out that the scope of the Bill had been almost universally and in a most remarkable manner misrepresented or misunderstood. It had been stated over and over again that the object of the Bill was "to place all landowners in the Bombay Presidency at the mercy of zealous revenue officers." We were told that "all revenue suits would be barred" by it; that "the revenue officer will be the sole judge of the validity of a man's claim to any property," and so on. It was only necessary to mention such statements for their incorrectness to occur to every Member of the Council, and he need not recapitulate the details of the Bill in order to disprove them. It would be sufficient to state that so far from placing all landowners at the mercy of the revenue officers, this Bill only affected certain owners of land, and so far from placing them all at the mercy of revenue officers, it would admit a large section of them to the privilege of resorting to the Civil Courts which they did not now possess. Similarly with regard to property, it would allow suits in the Civil Courts in respect of property in the new provinces which were hitherto not permissible, provided the claim rested on any one of a large class of proofs.

He also observed that a very ingenious attempt had been made to assert that in point of fact, the new provinces of the Bombay Presidency were legally and practically in the same position as the old ones; and that all which had been said to the contrary in the discussions upon the subject was simply so much nonsense, and was merely calculated to blind the eyes of those who did not know any better. In proof of this ingenious assertion, the two great cases of exemption and assessment had been taken. Regarding exemptions, it had been contended that this was so because by the Inám Act, and the Summary Settlement Act, II of 1863, a large portion of the *inám* or alienated lands had been settled, and consequently, the Civil Courts had now returned to their full jurisdiction over inám lands; and in support of this a case decided by the High Court was quoted. This was absolutely irrelevant. It had never been contended that when a claim to exemption had once been adjudicated on or disposed of by the revenue officers under those Acts, those officers would have any further power to interfere with the property. By the old law even such adjudicated property became just like any other private property, and ceased to possess any special character; and according to the old law that judgment was very properly passed. Under the present Bill, the law would still remain the same. If it were said that practically the whole of these inám cases in the new provinces had been decided, and therefore this Bill affected nothing, then it might be replied that, under the operation of the similar Act, VII of 1863, the whole of the inám cases in the old provinces must have been decided too, and there was no necessity to make the outcry about the Bill which was being made. As a matter of fact, however, what the Bill did touch was the residue of all this class of cases, and similar cases which must from time to time arise in the course of settlement both in the new and in the old provinces. With reference to the point of assessment, on the other hand, it was simply stated that it was now unnecessary to reserve to Government any special powers relating to assessment, because the revenue assessments over the whole of the new provinces had been completed.

This statement entirely ignored the fact that, although the original survey and assessment had been completed at dates ranging up to above thirty years ago, a revision of the assessment was now going on in full force and would continue to be in progress throughout the whole of the next thirty years, until the second series of leases fell in, and the process had to be repeated. Therefore, it was obvious that it was just as necessary for the Government to have this power of control of assessment for revised surveys as it was for them to have it for original surveys.

He would now invite the attention of the Council to the memorial from certain inhabitants of the Bombay Presidency which had been printed as Paper No. 10. This memorial had been signed by a considerable number of the leading pleaders of the Presidency town, and at the head of them was the name of the Hon'ble Vishvanáth Náráyan Mandlik, who was also a Member of the local Legislative Council. This document was worthy of great consideration, not only from the position and ability of those who had signed it, but from the remarkable nature of its contents. He noticed in the fourth paragraph that the memorialists deliberately attributed to the Civil Courts a jurisdiction which the Judges of the High Court had recently stated they were not aware had been imputed to them even in "the wildest arguments of legal practitioners." With this singular conflict of opinion between legal authorities, he would leave his hon'ble friend Mr. Hobhouse to deal more in detail.

It was next urged in the same memorial that in the course of his (MR. HOPE's) speech at Simla, he had not "adduced one solitary proof showing that the judicature in the exercise of its functions had ever abused the powers conferred on it by the legislature." It might not perhaps have been altogether impossible to have adduced some decisions which, in the opinion of revenue officers, and some others, might have appeared contrary to law, contrary to facts, or contrary to Native custom. But to have explained such defects fully would have involved going through the entire history of the cases themselves, which would necessarily have elicited replies and recriminations, and caused ill-feeling, while after all the whole would have been altogether irrelevant, for the reason which he had given at the commencement of his address that day, namely, that he did not think that in a measure of this kind, the Council ought to be influenced by individual cases either one way or the other. He thought the Council would consider that he had exercised a wise discretion in abstaining from such a course as that which the memorialists appeared to be disappointed at his not having adopted. The allegation was not that the Courts had misused the powers they possessed, but that they ought not to possess the powers that they did.

In another part of the same memorial, paragraph 8, it was stated that the memorialists "had been dismayed to find that the objectionable features of the first Bill appear in all their reactionary aspect in the modified Bill; whereas the alterations effected in it tend still more to the exclusion of the Civil Courts from the exercise of their salutary powers. The principle of exclusion and denial of justice in open Court has thus been made only more general and more positive than before." He scarcely knew how to deal with a statement of this description, because he thought there would have seemed to the most casual observer to be a distinction between the two Bills, and the modifications made in the second in favour of the subject were of the most striking character. The first Bill proposed to raise the old provinces entirely up to the level of the new, i. e., to exclude the Courts entirely in all questions of revenue. The present Bill would not only deprive the old provinces of less than was at first intended, but would admit the new provinces to a larger measure of Court jurisdiction than they had ever possessed since they passed under British rule. The Bombay Government had been more candid than the memorialists, and had fully recognised the material modifications which had been made in the Bill since its first introduction.

Again, it was stated in paragraph 9 of the memorial that "in virtue of section 4, clauses (*c*) and (*d*) and section 6, any mámlatdár or mahálkari, or any officer (or their peons) acting in these capacities, may give assistance of this kind, and enrich one man at the expense of another, without leaving to the injured man any means of redress, or some roundabout remedy which will, vir-

tually prevent their obtaining redress." This remark had reference to the provision which enabled the Collector to render assistance to superior holders in recovering rents from their tenants; and it was only necessary to refer to section 5 to see that there was the fullest provision there for all suits between landlords and tenants proceeding without interference, just as they did under the present law.

It was next stated, with regard to what was called *watan* property, that it had "always been dealt with as private property, which could be sold and purchased at one time like all other property." To ascertain how totally mistaken this view was, it was only necessary to look at section 20 of Bombay Regulation XVI of 1827, which was the old law on the subject, to see that the alienation of service lands was extremely restricted, and could not take place beyond the limits of the family of the original holder, and now Act III of 1874 of the local legislature had perpetuated the same provision in a more explicit and equally definite form.

He might, perhaps, have occasion again to refer later on to this memorial in a casual manner; but as a whole, he would now dismiss it with an expression of his regret that such a document should bear the signatures of some men whose friendship he valued, and of many whose talents he respected, but whose influence, when thus exerted, he deplored.

He would now pass on to another class of objections which had been raised. It was said that the "statesmen of former days wished to make the people here as happy as those of England by conceding to the former the rights and privileges enjoyed by the latter," whereas now the object of the Bill and the policy of the Government in general, in this and other matters, was to turn India into "a mere Empire, governed by a Great Moghul and a host of rapacious tax-gatherers." It was also said that the principle of the Bill was "unconstitutional," and the changes were rung upon what was constitutional and unconstitutional in an infinity of forms. He could not but think that those who made objections of this description were not fully aware of what "the rights and privileges of the British people" really were in matters of revenue. The simple fact, however, happened to be that there was "no proceeding in a Civil Court in England for the recovery of over-paid or over-assessed taxes; the aggrieved parties can only apply to the Commissioners" appointed for the purpose, that was to say, to the Revenue Officers of Government. And the Court of Exchequer had ruled that it "will not upon motion enter upon any question of rateability to assessed taxes," and that "an assessment under the Assessed Taxes Acts is final and conclusive, unless appealed against" to the Revenue Officers. That was a broad and general statement which applied more or less to all classes of what might be called the Queen's taxes in England. With regard to local taxation, the principle was very much the same; the Appellate Court was different, being usually the Court of Quarter Sessions. But with regard to such taxation also, the law was perfectly explicit, that "no rate * * * or any order, or award or other matter, or thing, made, done, or transacted, in, or relating to the execution of this Act, shall be * * * removed or removable by certiorari or other writ or process whatever into any of the superior Courts." But there was a further point in connection with the English law which was worthy of notice. That was that the Statute of 43 Geo. III, c. 99, which was called the Land Tax Act, contained a proviso that at the time of the hearing of an appeal "no barrister, solicitor or attorney, or any person practising the laws, shall be allowed to plead before the said Commissioners on such appeal for the appellant or officers, either *vivâ voce* or by writing." And this proviso applied to all appeals which followed this statute. Now he ventured to think, that this was one of "the rights and privileges of the British people," which those who raised an objection of this kind would perhaps admit, on reconsideration, that they would rather *not* enjoy. And the Council could picture to themselves the number of memorials signed by pleaders throughout the country, with which they would have been flooded if the committee had ventured to put such a section as this into the Bill before them. He must confess that the allegation of the Bill being "unconstitutional" was so far borne out that it did not contain this well-established provision of the English law.

Another point which had been raised was that the line which had been drawn in the Bill between different kinds of claims was indefensible. This line the Council would recollect was, that whenever a case or a claim rested upon an express enactment or the provisions of a *sanad*, or upon a deed or a judgment, or other specific basis, the Civil Court should decide; but where a case turned upon a tenure or a custom or any matter more or less of a technical nature, the revenue Courts should deal with it. It was said that this line was totally indefensible. Why, it was said, could not the Courts decide as well revenue officers on "the genuineness or authenticity of documents," on oral evidence, and on "the validity of informal guarantees?" Why could they not judge of the "political effect of political events more or less distant or obscure," and why could not Government give them all the information it might happen to possess? Now in the first place, with regard to political considerations, it was obviously not the business of the Civil Courts to enter into them; it was the duty of the Civil Court to decide on the evidence before it, and if it were to go wandering away from the specific matters before it into any such general considerations as to how the country ought to be governed, it would be entirely neglecting its own proper functions and trespassing on the domain of the executive Government.

Then with regard to the remaining objections as to documents and so on, he must point out, that it had never been said that the revenue officers were better qualified to decide upon *all* documents and so on, but the allegation was merely in reference to the particular nature of revenue documents and revenue tenures, and the like, of which they were presumed to possess special knowledge. With regard to this branch of the subject, he would remark that it might be considered from two different points of view. In the first place, the forms, principles and procedure of the Courts were necessarily in themselves not so favourable for the working out of elaborate revenue cases which might become precedents, as would be the revenue procedure. The Court was necessarily bound to decide upon what was placed before it; it must go upon the particular statements which might happen to be extracted, unintentionally or without full consideration, from individual witnesses and sometimes under cross-examination. The Court would, perhaps, under some theory of *technique* refuse to admit in the course of the hearing certain evidence to rebut other evidence with which one of the parties considered he had been surprised. The Court would draw inferences unfavourable to one party from the absence of evidence which would probably have been produced in the Lower Court, if it had ever entered into any one's head that it was required. Many other instances could be given where a Court could not exhaustively and properly deal with this sort of questions, whereas the revenue officer was bound to investigate the matter to the bottom; he might send for any information he required. If he could not make out from the complaint, and the evidence upon which it was based, what the case rested on, he might send for people considering themselves aggrieved, converse with them, find out what they really meant, let them amend their statements, and deal with the case accordingly. In support of this, MR. HOPE would point out that if it were not for such essential distinctions in the procedure of the Civil Courts, there would be no reason whatever, excepting the difference of Appellate Courts, for excluding from the Civil Courts revenue matters in such a province as the Panjáb, where the same officer sat as a Judge in the morning and as a Collector in the evening; and there would be very little reason for having a similar distinction as regards similar suits in provinces like the North-Western Provinces, where the officers who were the Judges had obtained their posts by simple transfer from the office of Collector, and were just as much up in revenue matters as the Collector himself.

Besides this, he must, however, add that in Bombay there was a special disability of the judicial department for dealing with revenue matters; and it was this, that there the revenue and judicial departments were separated from one another, almost, he might say, from the commencement of every individual's service. Instead of passing into the grade of Judge after having been fifteen or twenty years in the country in revenue employ, it was not at all uncommon for young civilians to enter the judicial department as soon as they had passed their examinations, or at any rate, three or four years after entering the

service, and when, in a great number of instances, their knowledge of the country and of the people could be, at the best, but skin deep. He was not now offering any opinion as to whether the system of separation of the two branches in Bombay was a proper system or the reverse. It might be that this system was highly favourable to the cultivation of judicial knowledge. All that he contended was that it could not also permit the acquisition of revenue knowledge. There could be no doubt that the Bombay judicial department, as a whole, were a body of trained lawyers who were inferior to none in India, whether in or out of the civil service. All that he contended was, not that they were not so, but that from the fact of their being so, they could not also be trained revenue officers.

However, let us take, MR. HOPE proceeded, an illustration of this point. Let us suppose some elaborate revenue case—a case, we would say, in which intricate and obscure land tenures were involved, where it was necessary to consult the revenue records and accounts of the country for a couple of hundred years; where it was indispensable also to know the whole revenue history of the district and the surrounding districts for years before the country had passed under British rule; where documents were bristling with revenue terms, half of them partially obsolete, and there was very little of real law at the bottom. Such a case we should probably see taken up in the first instance by an experienced Assistant Collector, who would go through it, take evidence, collect accounts and documents, and submit his own view on it to the Collector. The case would then be considered by the Collector, possibly by two or more Collectors, and when it had been thoroughly sifted, it would be handed up to the Revenue Commissioner, who, in Bombay, was an officer of the very highest standing and authority, and had revenue control over one-half of the presidency. From him it would go up to the Government, and if there was any legal point in it, the legal adviser of the Government would no doubt be consulted. It would then be taken up by the Revenue Member of the Council, and finally the orders of the Government would be issued.

On the other hand, we might imagine the same case in the hands of the district Court and the High Court. We should find the Courts and the Counsel on *both* sides striving with great zeal, honesty and ability, to make out what the whole thing was about. We might find dictionaries of doubtful authority consulted as to the meaning of revenue terms; we should probably find one side or the other pinned by the Court to ill-weighed statements made by individual witnesses. Old printed reports about one thing, might be supposed to apply to another really quite different. We might also find a whole mass of papers and accounts, perhaps some four or five hundred, handed over to the translators down at the presidency—papers in regard to some of which the entire value depended upon some idiomatic term of the Native language; and the result of such translation might be somewhat similar to what might be that of an English charter or title-deed some two hundred years old, when rendered into Hindústáni by a European. And on these data the Court, with great care and industry, would pass as good a judgment as it could.

And yet, after all, if it so happened that the decision of the Court was different from the decision of the chain of revenue officers, we should probably at once find a whole series of persons who would be ready to denounce, as something little less than criminal, the views which the revenue officers had taken. We should be told that this was "a just judgment," giving the people "their rights," of which over-zealous and indiscreet, if not rapacious and dishonest revenue officers, had banded together in order to deprive them. Yet on what principle could such an assumption be defended? Would the very parties who put it forth, act upon a similar assumption in the relations of private life? Suppose a man's house was leaking, would he call a consultation of doctors; or if his health was affected, would he convene a committee of engineers? The only ground upon which MR. HOPE could understand such an assumption being tenable, would be, that the Courts had necessarily and intrinsically a monopoly of all equitable feeling, knowledge and common sense. He need scarcely say, that no judicial officers would ever dream of claiming such a monopoly as that, which was practically ascribed to them by their too zealous advocates.

MR. HOPE was well aware, that it might be said that this argument went too far; that altogether, it proved a great deal too much. It might be said that if the revenue Courts were really as good as he tried to make them out to be, we ought to hand over to them the decision of all revenue matters between private parties, and not merely those in which the Government was concerned. There were three answers to this objection, first,—that usually private relations were not by any means so complicated as, and were more of the nature of simple contract than, the relation between the State and the subject. Likewise, it might be said, that where the State was involved, the interests were more important than mere private interests, because, although it might not matter to the nation generally whether A or B had a particular piece of land, it mattered very much to them, whether or not they were all to be taxed in order that A might enjoy an exemption. Thirdly, he might add that, to a certain extent, we did at present entrust such matters to the revenue Courts. In the Burma Land Revenue Bill, for instance, which was passed not long ago, there was an express provision that if the Civil Court found any doubt about the status and rights of a landowner, it was to stay proceedings, and refer to the Collector to decide the question. Similarly with regard to rent. We were all aware that rent suits had been in various parts of India transferred from the Collector to the Civil Courts only recently, and there was still a great difference of opinion whether this transfer was a wise and workable one or not.

He would now change the subject to another point. It had been said in the memorial of the Hon'ble Vishvanáth Náráyan Mandlik and others, that the Courts were "the only specific assurance to the people of the justice and sound policy which actuates Government in its dealings with its subjects." And the decisions of the Civil Court again had been said by another critic to be in "ninety-nine cases out of a hundred against the Government." Now he was not prepared with a return of the whole of the civil suits in the Bombay Presidency and their general result. But he did happen to have a return of the suits filed in the large Collectorate of Surat for nine years, *i. e.*, between the years 1866 and 1874, both inclusive. This was a period, as it so happened, during which a series of the most important interests were dealt with in that Collectorate. Nearly the whole of the alienations were disposed of under the provisions of Act VII of 1863, the Summary Settlement Act; and thus thousands upon thousands of cases of disputed area, tenure, &c., were investigated and decided. Besides that, the revenue survey was introduced throughout the whole Collectorate; and finally, the city surveys, which related to landed property in large towns, were carried out in the town of Surat with a population of above 100,000, and in two other towns with a population of 10,000 and 15,000 respectively; so that altogether it would have been difficult to select a period in which those terrible fellows, the revenue officers, could have worked more havoc amongst the rights of the people, or in which the protecting genius of the Civil Courts might have been more needed to throw "the *ægis* of law" over the oppressed. Yet, what were the facts? There were altogether within those nine years one hundred and one suits, of which he might remark that very nearly one-half were either instituted before he had anything to do with the Collectorate, or related to matters which had happened independently of him. He merely happened to have had the troublesome task of defending most of them. If we deducted thirteen cases which turned upon two others, the decision of individual points in which governed the whole number, and three more which were now pending, we got a balance of eighty-five. Of these, fifty-three were decided entirely in favour of Government; five more were partially decided in its favour; two were withdrawn by the plaintiffs themselves, and three more, which Government had gained, were still under appeal, which made sixty-three to the credit of the Government. On the other hand, fifteen had been won by the plaintiffs, five had been compromised by the Government, including two in which the Government had got favourable decrees in the lower Court which they did not think it safe to pursue, as the wording of the law was doubtful and contrary to the intentions of the legislature, and two were under appeal. That made twenty-two cases given against the Government as against sixty-three decreed in their favour; or, in other words, instead of ninety-nine out of every hundred cases going in favour of the people, three out of every four were

decided in favour of the Government. Now, he could only say that if this was the "only specific assurance to the people of the justice and sound policy" of the Government, as stated by the Hon'ble Vishvanáth Náráyan Mandlik and the other memorialists, they were assured by very little, and it seemed to him that it would be more appropriate to apply to the action of the Civil Courts than to the Bill before the Council the language of the Hon'ble Mr. Vishvanáth and his fellow memorialists, namely, that it was "a sweeping measure of exceeding stringency, and as against the subject, with but a small modicum of utility." He could scarcely understand such enthusiastic advocacy of popular resort to the Civil Courts on the part of the Hon'ble Mr. Mandlik and his friends, except by supposing that they adopted the somewhat homely maxim, which, though well known, had not yet found a place in legal text-books, that "a woman, a dog, and a walnut-tree, the more you beat them the better they be."

It might be asked, if the Government generally won all these suits and the people liked it, why should you alter the law? The Canara case has been decided in your favour; six Ratnagiri cases have been decided in your favour; the Chief Justice has delivered an extra judicial speech in your behalf. What more can you want? Cannot you let well alone? It was true that the users of this argument were equally ready with the opposite one—You have lost such and such a case. Therefore, of course, "the fate of the Revenue Jurisdiction Bill is sealed." However, letting that pass, he would but briefly observe that the change was required because of the enormous amount of friction, the immense delay, and the waste of time and money which all these suits caused; because of the political embarrassments which Sir Barrow Ellis had explained to the Council, and the fiscal difficulties involved in even a single erroneous decision which Mr. Hobhouse had dwelt upon; and because, as he himself had already said to-day, the Government could not look to individual suits, but to the broad general principle of any measure which they were considering.

He had now only one more point to refer to, and it was this. It was said that "however just and independent revenue officers may be, * * * it cannot but be that their minds perhaps unconsciously are biassed in favour of the Government," and it was asserted, as a matter of fact, by a different critic, that they were prejudiced and did habitually decide in favour of the Government and to the detriment of the people. Now, he thought that those who made such allegations as these, did not bear in mind that a revenue officer had two interests, as had been pointed out by his honourable friend Mr. Hobhouse; and that the one in favour of keeping the people quiet, of collecting the revenue smoothly, and so gaining with his superiors the character of a man of tact and moderation, who could rule his district to the benefit of the Government and the satisfaction of the people, prevailed more, so far as he had experience infinitely more, than the mere desire to add a few rupees to the revenue; which would perhaps never be noticed even by the Accountant-General. Such an accusation, too, could at best apply only to the men who were quite in the lowest grade of superior revenue officials, who might perhaps sometimes get over-interested in a case they had worked out in detail. It could not apply to all the superior officers, who were often, perhaps, much more ready to criticise the acts of those below them than to adopt the views which they offered. On the last occasion on which he had the honour of addressing the Council, he had referred to the "conscientious liberality of the revenue officers themselves, who he knew from his own experience, and otherwise, habitually decided, and had decided thousands of cases, in favour of the subject which if they had been referred to the Civil Courts must, under the rigid rules by which the Courts were conducted, have been decided in favour of the Crown," and in support of this, he should like to lay before the Council one illustration. It was that of the city surveys. These surveys involved the setting out of boundaries of all properties in large cities, and enquiries into the tenures and titles under which they were held, with the names of the parties possessing them, as also the measurement of the whole and the issuing of title-deeds. In short, these surveys were a matter of the very greatest importance, and it was said when they were first started, that the rights of the people would inevitably be trampled on by the revenue officers,

with much more of the same sort of declamation as we had been favoured with in this matter. These surveys had now been completed in four large cities, Broach, Surat, Bulsar and Rander, after having lasted over a period of above ten years. In Broach, with a population of from 30 to 40,000, the survey had lasted five years, and seven different officers had been engaged on it. The number of decisions was 20,047, the *sanads* issued were 9,596, but the appeals were only 445, or little more than two per cent., though a considerable portion of them were decided in favour of the appellants. As to civil suits, there were only three, of which one was decided entirely in favour of the Government, another partly so, and the third was withdrawn on the death of the plaintiff. Again, in Surat, with a population of 107,000, the survey had lasted nine years, and there were ten different officers engaged on it. The decisions were 47,133, the sanads issued were 26,404, and the appeals 491, or scarcely more than one per cent. This was not from any want of encouragement to appeal, because nearly one-half of the appeals were decided in favour of the appellant. The civil suits were nineteen; of these five were still pending, eight were decided in favour of the Government, two were withdrawn by the plaintiffs, and out of the remaining four, one was lost and three were compromised by the Government themselves, two of them, because it was not thought safe to push on appeal the interpretation of a law which did not very well express the intention of the legislature. At Bulsar, with a population of about 15,000, there had been 5,247 decisions, and at Rander about the same number, with the same other general features. Only one question, involving ten cases, had been taken to Court and decided against Government. Now, considering that these surveys had lasted so long a time, and that these cities were so large and rich, containing a population of wealth and intelligence, that there was an abundance of educated pleaders about the district Court, and that there was also there "Her Majesty's opposition," who might be counted on one's fingers, but who were always ready to make the most of everything that occurred, Mr. Hope thought that if the revenue officers had possessed any such biassed, indiscreet and rapacious tendencies as were ascribed to them, "what was bred in the bone" must have "come out in the flesh," and this whole district must have been driven into outcry or rebellion. Yet the fact was just the reverse. It appeared to him that this imputation of bias to the revenue officers was as unjust and unreasonable as would be the opposite allegation, that the Civil Courts had a tendency to consider every Collector as a wrong-doer, and to yield readily to the fascinations of posing in the attitude of protectors of the poor. Both would be equally false and untenable, and such allegations were both unjust to the great department at which they were levelled, and unworthy of the quarter, whatever it might be, from which they proceeded.

In conclusion, he would briefly recapitulate the grounds on which the Council were asked to pass this measure. First of all, the state of the law was uncertain, so uncertain that we had the leading pleaders of Bombay at issue with their own Chief Justice and High Court. The law likewise was exceedingly anomalous, as it was found that in the new provinces there was an unnecessary exclusion of the Civil Courts, while in the old provinces there was an extreme admission of them, so extreme an admission as to be greater than that which existed in any other part of India or even in the United Kingdom. Further, this uncertainty and extreme admission of the Courts was not unlikely to lead to consequences which were embarrassing both fiscally and politically; and the chances of such embarrassment were enhanced by the peculiarity of Bombay judicial officers not also having revenue experience. Upon those who objected to the Bill lay the burden of showing why one portion of one Presidency of India should be treated quite differently from the rest of India and England, and that they had altogether failed to do. On the contrary, they had been obliged to take refuge in a variety of exaggerations and misrepresentations which had been more or less fully exposed. Under these circumstances, he thought the Council might pass the Bill without hesitation, in the full confidence that it would redress the glaring anomalies which now existed, and remove the risk of complications and difficulties in the future.

The Hon'ble Mr. Hobhouse said:—"My Lord, when I spoke about this measure in October last, I told the Council that I was not competent to discuss

anything but its most general principles, and that many, if not most of its details, were such as required more experience than I had to handle in this Council. I did not think then that it would have become necessary for me to address the Council again upon those principles; but I find that it is necessary, because an entirely new view of the existing law has since been promulgated, and it has been urged upon us that such new view is quite satisfactory, that the principal motive for the Bill is removed, and that the Bill itself may safely be dropped.

"It certainly is true that if the law be what we are now told it is, the most important provisions of this Bill, by far the most important in my opinion, amount to little more than a declaration of that law. And though I think there would still be ample reason for passing this Bill, others in this Council or elsewhere may think differently, and it is therefore incumbent on me to recapitulate the view of the law upon which we have hitherto acted, and to state what I understand to be the true view, and under what circumstances the new light has reached us.

"Now our late colleague Sir B. Ellis, when he first launched this measure, based its expediency on the state of the law which he described. I will read some passages from the report of his speech on that occasion.

"He mentioned a decision of the High Court of Bombay, in a suit brought by one Wamnají, to the effect that an assessment was faulty because it exceeded a sixth part of the assets of the estate. The report then proceeds as follows:—

"'The result was that the ordinary principles which regulated the Bombay system of survey and assessment were entirely upset; for there was under that system no local or other rule which required one-sixth of the gross profits to be the limit in assessment. The result, then, of the decision of the High Court—if we acquiesced in it—was that the principles of our settlement throughout the country would have to be modified contrary to the opinion of those who were best able to judge. Such was the effect in this particular suit. In other cases, equally injurious effects might follow if the present practice were continued. For example, certain modes of assessment, and certain principles of assessment, might have been adopted by the State. Those modes and principles might not commend themselves to the learned Judges, and in cases practically involving broad political questions, and matters of State policy, the opinions of the Judges of the High Court might overrule the deliberate decision of the Government here or in England. There were other minor evil consequences, which followed on the present system. He need hardly say that if, under the Ryotwarri system in Bombay, every man was allowed to question in a Court of law the incidence of the assessment on his own fields, the number of cases which might arise was likely to be overwhelming. The suit to which MR. ELLIS had referred, one of Rs. 4 only, was an instance of the small amounts which might be brought into Court, and if cases of this kind were frequent, and the Survey officers had to give evidence in each of them, the result would be that their time would be so fully occupied with such matters that they would be unable to attend to their duties, and the whole machinery of the Survey and Settlement Department would be disorganized. Moreover, it might be questioned whether Judges learned in the law, however skilled they might be to decide the cases ordinarily brought before them, were best fitted to deal with matters requiring special and technical knowledge, and which had been settled and decided by officers who had been all their service trained in this special branch of knowledge.'

"The reasons then given, briefly stated, were two. *First*, that the law cast on the Judges duties which they could not perform so well as Revenue officers. *Secondly*, that if every man might question in a Court of law the incidence of an assessment on himself, the public business could not go on.

"The Council are aware that the provisions of the Bill have been the subject of very animated controversy in the Presidency of Bombay. In fact, there came in petitions and utterances from several quarters, some of them from very well-informed gentlemen, adverse to the Bill, or to what the objectors supposed to be contained in it. But when we met at Simla in October last to reconsider the matter, we did not find a suggestion from any one that we were wrong in our estimate of the law. When I addressed the Council, I pointed out that the opponents of the measure, though in my judgment they were by no means wholly wrong, had not done justice to their case, because they insisted on maintaining in unaltered simplicity a law the terms of which were dangerously wide, which might have worked well enough with the machinery which existed fifty years ago, but which could not be considered as workable now. I then pointed out the nature of the law as Sir B. Ellis had done before, with somewhat, though not with very much, more of detail. The only difference between us was that he attributed the state of things to the ruling in

Wamnají's case, whereas I considered that ruling to be a right and necessary one, and showed that the results which were complained of, and those which were apprehended, were necessarily involved in the Regulation we are seeking to alter, namely Regulation XVII of 1827.

"That was the position of the case in October last. But it happened that in the month of December a division of the High Court of Bombay had occasion to deliver judgment in a revenue case known as the Kabilpur case, and in the course of that judgment they referred to the views of myself and Sir B. Ellis, and stated that they thought us wrong. It is right that I should read to the Council a full account of the exposition made by the learned Judges, one of whom is the very able Chief Justice, Sir M. Westropp, and the other a learned Civilian, Mr. Justice Melvill. They quote some sections of the Regulation, the material ones of which I read to the Council before. They run as follows:—

"'II. *First.*—All land, whether applied to agricultural or other purposes, shall be liable to the payment of land revenue to Government, according to the established principles which govern the assessment of that description of land to which it belongs, except such as may be proved to be either wholly or partially exempt from the payment of land revenue, under any of the provisions contained in Chapters IX and X of this Regulation.

"'*Second.*—Provided, however, that nothing contained in the preceding clause, or in the enactments therein cited, shall be understood to affect the right of Government to assess to the public revenue all lands, under whatever title they may be held, whenever and so long as the exigencies of the State may render such assessment necessary.

"'IV. *First.*—When there is no right on the part of the occupant in limitation of the right of Government to assess, the assessment shall be fixed at the discretion of the Collector, subject to the control of Government.

"'*Second.*—When there is a right on the part of the occupant in limitation of the right of Government, in consequence of a specific limit to assessment having been established and preserved, the assessment shall not exceed such specific limit.

"'IX. *First.*—The Collector's decision upon any question arising out of the provisions of the preceding sections shall, in the first instance, be obeyed and acted upon as the rule.

"'*Second.*—But if any person should deem himself aggrieved by any such decision, he may either present to the Collector a petition, addressed to Government, praying for redress; or may file an action against the Collector in the Civil Court, under the ordinary rules, or he may pursue both methods at the same time.'

"**The principal sections are section IV and section IX, on which these observations are made:—**

"'Section IV, clause 1, enacted that '*When there is no right on the part of the occupant in limitation of the right of Government to assess*, the assessment shall be fixed at the discretion of the Collector, subject to the control of Government.'

"'The special subjection of the *discretion* of the Collector to the control of Government, on the principle of the maxim *expressio unius est exclusio alterius*, precludes the construction that the Collector's *discretion* is subject to the control of the Civil Courts.

"'Section IV, clause 2, of the same Regulation enacted that 'When there is a right on the part of the occupant in limitation of the right of Government, in consequence of *a specific limit* to assessment having been established and preserved, the assessment shall not exceed such specific limit.'

"'This clause deals with 'rights,' not with 'discretion,' and contains no provision, either express or implied, that 'rights' are to be excluded from the consideration of the Civil Courts. That portion, therefore, of clause 2 of section IX, which gives a resort to the Civil Court, would operate upon questions of right arising out of a specific limit to the assessment.

"'Section IX, clause I, enacts that, "The Collector's decision upon any question arising out of the provisions of the preceding sections shall, in the first instance, be obeyed and acted upon as the rule.

"'The second clause of the same section is important. It enacted as follows:—'But if any person should deem himself aggrieved by any such decision, he may present to the Collector a petition, addressed to Government, praying for redress, or may file an action against the Collector in the Civil Court, under the ordinary rules, or he may pursue both methods at the same time.'

"'*Third.*—The Collector shall forward to Government, without delay, any petition presented to him under the preceding clause; but the reference to Government shall have no effect upon any suit instituted in the Civil Court.

"'The observations already made upon clauses 1 and 2 of section IV, show that in order to give to those clauses respectively their full and just effect, the second clause of section IX must, in matters of assessment, be read distributively, or as it is called, *reddendo singula singulis*. Thus Government must be regarded, when a petition is presented to it by a person assessing himself aggrieved by a decision of the Collector, as having authority to deal with it as Government may please, the discretion of the Collector being in all respects subject to the control of Government.

"'But in the case of an action in the Civil Court, the latter can only interfere with regard to (*i. e.*, adjudicate upon) the legal right or title of the plaintiff to exemption or partial exemption from payment of land revenue, by reason of the existence of a specific limit to the assessment in the case. This construction at once harmonises all three clauses, without violating the provisions, express or implied, contained in any of them, and also attains the object set forth in the preamble.

"'Those two clauses of section IV are most important, when taken in connexion, as they must be, and, as we believe, they always have been, with the second clause of section IX, as fixing a boundary beyond which the Civil Courts may not travel in questions of assessment of land revenue.

"'We have, therefore, with most astonishment learned that, in a quarter which is entitled to better information, it has been stated that the discretion of the Collector is, in all matters of land assessment, subject to that of the Civil Courts—that there is not a single question which can arise in the course of a settlement, whether it relates to the fertility of soils, or the prices of produce, or any other matter, if any there be, even more impossible for a Court of law to investigate, which may not be taken out of the skilled hands that can deal with it and carried before a tribunal that knows nothing about it. It has been also said that the Civil Judge may even control the broadest principles of an assessment; that he may disapprove of the portion of the assets which the Government think it right to take; that he may think that the assessment ought to be governed by prevailing rates of rent instead of the productiveness of the soil and the rates of prices, or he may think the contrary, that he may even decide that the exigencies of the State are not such as to warrant the imposition of such an assessment as the Collector has decided to impose, that in all these cases the decision of the Revenue officer is expressly made disputable in a civil action; that, in short, the whole land revenue system of the country is, by this Regulation, made subject to the control of the Civil Courts.

"'With all due respect for the high quarter in which this view of the jurisdiction of the Civil Courts of this Presidency in its older provinces has been thus expressed, we must most emphatically state, as we have already stated in the progress of this case, that the Civil Courts have not any such jurisdiction as has been thus ascribed to them; and that, so far as the Judges of this Court know, the Civil Courts have never asserted that they have or ever had any such jurisdiction. Nay, further, those Judges are not aware that, even in the wildest arguments of legal practitioners in those Courts, any such jurisdiction has been imputed to the civil tribunals.'

"They then refer to the Canara case, saying that if the jurisdiction in question had existed, they would have been called upon to exercise it then; but that in point of fact the question had never been raised.

"And they add—

"'We took that opportunity of disclaiming any such jurisdiction, in consequence of remarks made some time previously in the same quarter as that already mentioned, but by a different speaker, which attributed to the Civil Courts an extent of authority which they never possessed, and, so far as we know, never claimed.'

"Then after commenting on Wamnají's case and some others, they continue as follows:—

"'We are inclined to the opinion that the jurisdiction should be regarded as thus circumscribed even independently of the fourth section of that Regulation. For we should be disposed to hold that section IX (which empowers a person deeming himself aggrieved by the decision of the Collector, to file an action against the Collector in the Civil Court) does not authorize the Court to exercise any control over the Collector unless he transgress the law. That is the proper and well-understood sphere of action of Courts of Justice, and, unless a contrary intention be clearly indicated, the legislature should not be regarded as intending to confer upon them any greater power. The preamble, which points out that the intention of the legislature was to provide means for determining as to the title to exemption from payment of revenue when the Revenue officers deem that title to be insufficient, is completely consistent with that view. The ninth section should, we think, be interpreted in that light. Neither in that section nor in any part of the Regulation is there, in our opinion, the faintest intimation of a desire on the part of the legislature that the Civil Judges should be transformed into Revenue Commissioners, or Collectors of a superior grade. We should no more deem the Civil Courts entitled to relegate to themselves the duties of those offices, than Lord Selborne, sitting in Chancery, did to assume functions assigned by Statute to a School Board (L. R. 9 Chan. App. 122) or Sir G. Jessel sitting in the Rolls Court did to appropriate to himself functions conferred upon a Railway Clearing Committee (L. R. 20 Eq. 383).'

"That is a pretty full account of what is laid down by the learned Judges, and I confess that I read it with great satisfaction, because, though it does not command my assent, it supplies a complete justification of the most important

provisions of this Bill. Those provisions are to be found in section 4 (*b*), where it is enacted that no Civil Court shall exercise jurisdiction over—

"'(*b*) objections—

"'to the amount or incidence of any assessment of land-revenue authorized by Government, or

"'to the mode of assessment, or to the principle on which such assessment is fixed.'

"So complete is the justification that we have actually been urged to drop the Bill, or, at all events, this portion of it, on the ground that it enacts nothing new. It is therefore my duty to assign to the Council the reasons why I think the Bill to be expedient and indeed necessary.

"In the first place we must not imagine that because we are told that certain controversies have not been raised in Court, there are none such in the country. The view of the law which I submitted to the Council in October last was formed after a perusal of the arguments of the opponents of this Bill and upon a careful comparison of them with the terms of the Regulation itself. The memorials which have been sent in to us have come from intelligent and influential people, associations of landholders and others, who either have among their numbers a strong infusion of vakíls, or have been assisted by vakíls in the preparation of their memorials. I take a paper coming from the Desais of Chikli and read thus:—

"'The authority which the Civil Courts now possess in the older districts, that is, in Guzerát and the Konkan, in matters relating to land, is unrestricted. Our humble prayer is that this authority may be continued intact.'

"I turn to the petition of the Ahmadábád Association and find the following passages:—

"'Your Excellency's petitioners beg to urge that, from a political point of view, the Bill would seem to be highly inexpedient. The policy of the Government of India in the matter of land-revenue is not so indefensible as to require the protection of a special legislative measure to uphold it. They believe that the policy is sound enough on the whole to bear the light of a public judicial enquiry. They would, therefore, ask respectfully Your Excellency in Council to reject a measure which cannot but create suspicions as to the intentions of Government, and serious discontent and alarm among the agricultural classes of Guzerát and the Konkan, and which, in some measure, at least must impair the character of the Government for impartiality and fair dealing.

"'Your Excellency's petitioners beg to state that section 2 of Regulation XVII of 1[illegible] states that 'all land whether applied to agriculture or other purposes shall be liable to the payment of land revenue to Government according to the established principles which govern the assessment of that description of land to which it belongs.' These established principles have never been enumerated by Government, and as far as Your Excellency's petitioners are able to observe, Government have been guided by a desire to increase the revenue, and have, in many respects, departed from the established and well-known principles of taxation of land, which had been generally accepted by former Governments. Under the Hindú system there was a body of watandars and zamíndárs, who represented village communities and interceded between the ryots and the Government, so as to get a reduction in unreasonable extortions and correcting errors which led to over-taxation. This class of people has been set aside, and no Revenue Authority or Survey Commissioner ever thinks it worth his while to consult them. The Revenue and Survey Departments settle the assessment to any amount without any check or representation from the people. The principles on which assessments are fixed may be known to Government, but they are not explained to the people or to their representatives. The consequence has been that the revenue has been enormously increased by means which were never resorted to by former Governments. All perquisites and fees of zamíndárs known as hakks, and allowances granted to village communities, as Chillas and Malveras and Gam Kharchas, have been abolished as far as the recipients are concerned, but instead of any reduction being made on that account by the land-tax, it has been increased by that amount. The inám and mirás tenures are virtually upset. New modes of levying revenue from land have been invented, such as the sale of the right of occupancy, of fruit-trees, quit-rent on pasture lands, sale of stone, earth, sand and water, city-lands and settlement on freehold lands, watans, ináms and many others, and some of these are made to yield extortionate sums, as in the case of brick-makers and potters. To these may be added ábkárí and salt-revenue, which yield very large sums of revenue. In consequence of these causes a taluqa which yielded two lákhs of revenue, now yield six. The pressure of the land-tax on these taluqas, which were settled during the American war, and the high prices then reigning, is crushing, to say nothing of opium, stamp, municipal, judicial and registration taxes, and various tolls, which form separate items of revenue. The crushing nature of this taxation is testified by the extraordinary amount of debt, which exists in each village, the number of fields annually relinquished, the extent of waste-lands in each taluqa, the generally wretched condition of [illegible], and the number of the vagrant and begging population, strolling in every corner of

the country. Under all these circumstances, it is necessary that the ryot should be protected against the errors, indiscretion and over-zeal of survey officers, anxious always to show an increase as the result of their labours. The judicial Courts are, under the circumstances already enumerated, the only refuge for the poor ryot, and constitute the only remedy against the ever-increasing pressure of taxation. To deprive him of this remedy is, Your Excellency's petitioners most earnestly submit, equally unjust and inexpedient.'

"I ask whether you could have any clearer assertion that the whole policy of Government in raising land-revenue and the whole principles of assessment are subject to control by the Civil Courts.

"But I have, if possible, even stronger evidence of the prevalence of this view in well-informed quarters. The Council will remember that one of the early clauses of this Regulation expressly reserves to the executive a right to assess 'all lands under whatever title they may be held, whenever the exigencies of the State may render such assessment necessary.' That is to say, a supreme political necessity is to override all contracts, all bargains, all claims to exemption or privilege of any kind. That a Court of law should have a voice in such a matter would be most inconvenient, and I put it as the most extreme case of inconveniences arising out of the literal construction of the Regulation. Is there, then, a question, or is there not, whether such a jurisdiction exists? Now the last memorial we have on this matter is dated the 26th February 1876, two full months after the delivery of the judgment in the Kabilpur case. It is signed by Vishvanáth Náráyan Mandlik and twenty-one others. Mr. N. Mandlik is an eminent vakíl, and is moreover a Member of the Legislative Council of Bombay. I am told that of the twenty-one others, at least seven or eight are practising vakíls. Then, what does this body of skilled legal practitioners tell us? They refer to the section in question, and proceed thus:

"'And yet the framers of this very section did, it will be perceived, modify and define the limits of the comprehensive claim they had themselves assigned to the State, by providing, in sections 8 and 9 of the same Regulation (XVII of 1827), for certain powers to the Civil Courts in the older districts of the presidency to adjudicate in all matters of dispute between the State and the subject. The legislature of that period considered such safeguards against the possible arbitrary proceedings of Revenue officers to be necessary, and the lapse of fifty years has only tended to confirm the wisdom of this provision.'

"We heard yesterday from the Ahmadábád Association that they concur in these views.

"Now I think it will be plain to the Council that there lies before us a formidable controversy if we suffer this law to remain unaltered. I never told the Council that the whole of the jurisdiction which the two learned Judges now disclaim had been assumed or pressed upon Civil Courts in any case. I said it was certain to be so pressed. I pointed out how one question after another had been found to fall within the jurisdiction of the Court; how at last it had been found, contrary to a former extra-judicial opinion, that even the rules and principles on which the officers did their business might be enquired into there; how it had been decided that a Collector must come into Court and give evidence about the rules or principles of his assessment; and I said that all the rest must follow in time. I find no instance stated in which the Civil Court has rejected a suit summarily on the mere ground of want of jurisdiction, unless it be under Acts passed for the express purpose of abridging the extravagant powers conferred by this Regulation. In every case I have come across, the Government, if they would not be cast in the suit, have been compelled to prove exactly what their operations were. And if I were asked why I advise a further abridgment of powers the existence of which is disputed, I answer as the fox did to the lion :—

Quia me vestigia terrent
Omnia te adversum spectantia, nulla retrorsum.

"I need not say that if I had known that there were Judges on the Bombay bench who differed from the views expounded by Sir B. Ellis, I should have addressed the Council far otherwise than I did. I should, indeed, have thought it incumbent on me to state my own opinion; but I should have accompanied it with the information that there were others who, as far as authority goes, were better entitled to be heard than myself, and who were of a different opinion. But the learned Judges never sent us any statement or hint that we had mistaken the

law. It seems that two of them thought it right in the Canara case to answer Sir B. Ellis' speech in Council. But though the Canara case was decided, now I believe nine or ten months ago, no copy of the judgment has been procurable by me for love or money up to the present moment. I have asked, and the Government of India has asked, many times for a copy, and we have always been told that it is not ready. In last addressing the Council on this subject, I mentioned the disadvantage I laboured under in not having seen the judgment in the Canara case. No doubt the learned Judges have very good reasons for the course they have taken; it is their business, and I say nothing against it. But I have to justify myself for not laying before the Council all the available materials for judging of this legal question; and I do so by saying that, until the publication of the Kabilpur judgment in December 1875, I was in total ignorance that anybody had expressed or formed an opinion that a wrong construction of the Regulation had been suggested to the Council in the month of August 1873.

"But then it may be said that whether there is or is not a controversy with landowners or with the legal profession, the Judges have settled the law. To that I answer, *first*, that they have not settled it, and, *secondly*, that the settlement they would propose would not be altogether satisfactory.

"It has been my duty on a previous occasion to explain to this Council the broad and well-known difference between judicial and extra-judicial opinions. The former are called for by the circumstances of the case; they have been the subject of argument; they are delivered under all the responsibility which lies on the Judge to do exact justice between the suitors; and they may be challenged by appeal. They are in fact the actual application of the law to the facts of the case, and are law until set aside by competent authority. But the latter have not the same conditions attached to them; and though they are to be received with great respect, they are not law. Now in this case the remarks which have fallen from the learned Judges are both in substance and in form extra-judicial. Nothing can be more explicit than their statement, that they are not dealing with anything in the case before them, but simply with the speeches made in this Council. In the Kabilpur case they say, speaking of the Canara case :—

"'It was not, however, so much as for one moment contended, by the learned and very able counsel for the plaintiffs, that * * * * * the Court had any jurisdiction to interfere in the assessment, or discretion left to it by law with respect to the extent of the enhancement.'

"And again :—

"'We took that opportunity of disclaiming any such jurisdiction, in consequence of remarks made some time previously in the same quarter as that already mentioned, but by a different speaker, which attributed to the Civil Courts an extent of authority which they never possessed, and, so far as we know, never claimed.'

"In the Canara case, therefore, the Court was answering Sir B. Ellis. In the Kabilpur judgment I have already read passages showing that they were answering myself and not addressing themselves to any point made in the case.

"These remarks therefore come with great weight, as everything on such a subject must come from such a quarter; but they are not, and do not profess to be, a judicial declaration of the law as applicable to the case before the Court. They must have the same effect, neither more nor less, as they would have had if the Judges had followed the more usual course of stating their views to the Council through their Registrar.

"Moreover, I am bound to state my conviction that, if the point had been raised and argued, the learned Judges would have found the stress of the argument too strong to resist. For this conviction I must state my reasons, though I fear that the brevity I am compelled to observe will hardly allow of justice being done to the subject.

"It will be observed that, in expounding the Regulation, the learned Judges lay stress upon section IV, which says that where there is no limit of the right to assess, the assessment shall be fixed at the discretion of the Collector, subject to the control of Government, and they say that the Civil Courts are thereby excluded by implication. That might be so if it were not for

the express words of the overriding section IX, which contains nothing whatever that is at variance with section IV, but only shows exactly how far the Collector's decision is to operate, and how it is controlled. In any question, without exception, arising out of the preceding sections (the section preceding section IX) the Collector's decision is to be the rule *in the first instance only*. If any person deems himself aggrieved by such decision, he may petition Government or bring his action, or do both.

"The conclusion drawn by the learned Judges is that the jurisdiction given to the Courts is confined to 'the legal right or title of the plaintiff to exemption or partial exemption,' and that the extensive words of section IX must be cut down by what is called the distributive construction, or *reddendo singula singulis*. But to confine the jurisdiction to cases of exemption is not reconcileable with, in fact it would almost if not wholly nullify, the language of section IX. That section provides for controlling the Collector's decision upon any question arising out of the *preceding* sections, and the controversies about exemptions are dealt with in certain *succeeding* sections, which prescribe the duties of the Collector and of the Courts. According to the ordinary meaning of words, a limit to assessment is the same thing with an exemption; and if that be the construction of the Regulation, section IX would be nullified by the suggested construction. I believe, however, that according to the decisions, there may be a limit to assessment which is not an exemption within the meaning of the Regulation; still the great bulk of exemptions are dealt with by the subsequent and not the preceding sections, and so these sweeping words of section IX would be cut down to insignificant dimensions. I conceive, therefore, that it must be the other numerous proceedings that are mentioned, and not the exemptions, which are contemplated by section IX.

"The same consideration throws great difficulties in the way of any distributive construction at all. That construction is of use where a number of different directions are applied indiscriminately to a number of different particulars. If then it is found that a manifest absurdity results from applying the whole of the directions to the whole of the particulars, but that each direction is sensible if applied to some one particular, you may legitimately distribute the language so as to apply each direction to its appropriate subject. But in order to use such a construction, you must first have your antecedent string of different particulars to which the directions are indiscriminately applied. But I have shown that these particulars are either not to be found at all, or are found in too small quantities to satisfy the extensive words of section IX in the sections of this Regulation which precede that section.

"There is another element in section IX which is equally fatal to a distributive construction. It is of the essence of a distributive construction that the directions shall find each its own subject, and shall not overlap or jostle one another. But here we find that the aggrieved man is told not merely that he may take the one course or the other, but that *he may take both at the same time*. I cannot conceive any words more conclusive to show that the jurisdiction of the executive and of the judiciary was meant to be a concurrent jurisdiction, to extend to the very same subjects at the very same time. To each is given a control over the Collector by identically the same set of words in identically the same set of circumstances.

"The learned Judges then intimate an opinion that the language of section IX ought to be cut down independently of any canon of construction, and simply because, if literally construed, it would extend the power of Courts of justice beyond their proper and well-understood sphere. And they refer to the case of a School Board and a Railway Clearing Committee. But I may be permitted to express a doubt whether the sphere of the Company's Courts, as constituted fifty years ago, seemed to Indian statesmen of that day quite the same thing as the sphere of the Courts he is familiar with may seem to a lawyer of the present day. At all events, I cannot understand that anything is legally beyond the sphere of Courts of justice which the law enjoins them to do. If Lord Selborne had found an Act of Parliament which said that a School Board should decide in the first instance, and then that any person aggrieved might file a Bill in Chancery, he would doubtless have done his best to decide the case, even though it might seem to him that the law had

thrust upon him uncongenial duties, far removed from the proper sphere of a Court of justice. The English Judges referred to had not got to deal with this very intractable Regulation which makes all Collectors' decisions controllable by the Civil Courts.

"The plain truth is, that the Regulation does throw into Civil Courts controversies which are not suitable for them, at all events as they are now constructed, and that is the very reason why we come to alter the law. It is a gratifying thing to find that some eminent Judges would alter it if they could in the same direction, but that is the work of the legislature, not their work. We must remember that Judges cannot make law; they can only declare and apply it. It so happens that quite recently in the course of my duty of reading Law Reports, I have read a decision of the Privy Council in which they express disapproval of the practice of introducing new law because the existing one appears to the Judge to be impolitic. Referring to a case decided in India, they say—

"'The Chief Justice observes—'The recognition of the right to redeem was, having regard to the previous decisions of the Sadr Adalát, perhaps somewhat a strong measure. It had, however, for a long time previously, been considered a desirable course to adopt, and eminent Judges of the High Court, who had formerly been Judges of the Sadr Adalát, regretted that their predecessors had, for the most part, enforced the conditions for purchase in *gahan lahan* mortgages, as such a course had been found to promote most oppressive and grasping conduct on the part of money-lenders in the Mofussil.' It would be difficult to have a more candid admission of the assumption by the Courts of the functions of the legislature.'

"They then comment upon this, and show that the Judges, who cannot deal with the matter comprehensively and with reference to all its bearings, as the legislature can, must take the law as they find it, and not attempt to alter it piecemeal by their decisions.

"Now I think that the law propounded by the learned Judges is a great improvement on the Regulation as it stands; that it is dictated by thorough good sense and good policy; and the only fault I find with it is that, as the line is at present drawn, it does not exclude from the Civil Courts some classes of cases that ought not to come before them. But for the reasons I have assigned, I fear that if the question were properly argued before them, as it has not been, the Courts would be constrained to admit that they have more jurisdiction than they now think, or if they did not, that the Court of Appeal would take different view.

"But suppose the case to be otherwise, what would be the result of omitting to pass a law on the ground that the view propounded by the Judges is sound? We have it admitted on all hands that the literal construction of the Regulation is to give unrestricted jurisdiction to the Civil Courts over the Revenue officers. This literal construction has to be cut down either by some highly artificial handling, or by a Judge's estimate of what is the proper and well-understood sphere of a Court of justice. Now I think that lawyers will agree with me that of all the glorious uncertainties of the law, none is more glorious than the construction of a document when once the plain literal meaning is thrown overboard. In what manner the *disjecta membra* shall be pieced together again, what does and what does not fall within the sphere of a Court of justice, are questions on which, as sure as night follows day, one Judge will differ from another. The two learned Judges who have delivered the Kabilpur judgment would confine their jurisdiction to claims of exemption. Even that seems to me very vague, for all claims are claims to pay something less, and it would require many decisions before it was settled what kind of claim is cognizable as a claim of exemption and what is not. But there are a number of other things besides exemptions, which may be subjects of controversy. There are certain 'established principles,' as our Ahmadábád friends remind us, mentioned in the Regulation as 'applicable to different descriptions of land.' I should say that if any jurisdiction was clearly and indisputably conferred on Civil Courts by section IX, it was a jurisdiction to enforce these 'established principles.' And I hardly see what controversy might not be brought in, at least with a very little astuteness in framing the plaint, under these expressions. It is clear that the Ahmadábád gentlemen think they open a very wide door indeed. I think so too. The litigation, uncertainty and confusion which would ensue before the law got

settled on a clear footing would be very great. And though I fully believe that by a long continued application of the same good sense that now prevails in the Civil Courts, the law would, after a great many arguments and decisions, get ultimately settled on a footing that would leave us little to complain of, the result might be otherwise. Indeed, at the present moment, those who delivered the Kabilpur judgment would draw the line of demarcation between Civil Courts and Revenue authorities in what I venture to think the wrong place. It is their opinion that the Canara case ought to have fallen, as undoubtedly it did fall, within their jurisdiction; whereas it seems to me that the question there raised was a broad political question, to be dealt with by the executive or, if necessary, by the legislature, rather than by the methods of a Court of law. They think the same of Wamnaji's case; whereas in that case the primary question was whether the Collector had or had not applied to the plaintiff's land the right principles of assessment. And apparently they think very lightly of the evil of having Revenue officers vexed with litigation about a quantity of business details, which, if a system is to work at all, must be left to those who work it.

"I have in my hands a letter from a Revenue officer, Colonel Francis, in which he states the inconvenience of the present law. He gives a list of six recent cases. Of these he says:—

"'In one case, the Court is required to decide whether the Warkas lands have been properly measured, in another, to declare whether we are authorized in rejecting the fractional parts of a rupee' (he should have said of an anna) 'in fixing the amount of assessment, in another whether Warkas lands should be measured into Pot Nos., and in another, whether the cost of boundary-marks has been properly apportioned. All these involve questions of detail affecting the manner in which the survey operations are carried out, and in some cases, considerations of a purely professional nature, and it may safely be said that the Court cannot possibly possess the knowledge requisite to give a right judgment in such matters.'

"He then speaks of the case of Wamnaji, which has been so often mentioned, and shows that it involves disputes on the value of rice, ricestraw, and so forth.

"Upon this letter a gentleman who thinks the present law ought to be preserved makes the criticism I am about to quote—

"'This letter contained an indictment against the Civil Courts for allowing persons to appeal to them against the 'proceedings of the Survey Department in matters relating to the measurement, classification and assessment of the land,' and he appended to his letter a statement of six suits of the above nature which have been filed in the District Court of Rátnagiri. But on referring to these, it appears that in five out of the six cases the Courts decided against the plaintiff and in favour of Government, while the sixth case was the famous one of Wamon Sudasiv, which failed to be decided in the favour of Government only owing to the want of ordinary care and attention on the part of the Collector and Survey Commissioner!'

"Now I quote that, because it is a not unfair specimen of some lines of criticism applied to this Bill, and I propose to make one or two observations upon it. In the first place, a critic of this kind appears to think that, if you can only win your case after taking pains and spending time and money enough, it is the same thing as if you cannot be sued at all. It seems that in every one of these cases the officer was right; for it is admitted that in Wamnaji's case the Court was misled by the plaintiff. But in every one of the cases time, labour, money, was expended on both sides. If the plaintiffs had succeeded, there would be something to show for all this. But they have failed, except in the one case in which the Collector thought there was no jurisdiction, that he was not bound to show to the Civil Courts that he had applied the principles of assessment rightly, and, relying on that plea, left the case undefended on the merits, so that the plaintiff walked over the course. Nothing could more completely justify the second main reason given by Sir B. Ellis for this Bill, namely, that the machinery of the Survey and Settlement Department was likely to be disorganized by a quantity of trifling suits. When you add that the trifling suits mostly end in nothing but costs to the suitors, and an occasional injustice owing to oversight, it seems to me that instead of diminishing the force of the reason, you have considerably augmented it.

"There is another part of the same criticism to which I object. Colonel Francis' letter is called an indictment against the Civil Courts, and this again

is only an illustration of the vehement personal feeling with which this measure has been taken up, as though it were an attack on the able gentlemen who conduct the judicial business of the province. I really cannot conceive how any one who will consider what this measure is, and on what reasons it has been based, can allow himself to use such language. There is no indictment against the Civil Courts in Colonel Francis' letter, unless an assertion that some Judge made a sad mistake about the price of rice-straw, can be considered such. His complaint is that the law sets them to do unsuitable work. There is certainly no such indictment in our proceedings, for no one here has suggested that the Civil Courts have done anything they ought not to do. When I last spoke, I took the opportunity of saying that I found fault with the law, but that the Courts were blameless. Having now read some more of the literature of this subject, I can say something more. Probably the judicial officers will not much value my opinion, but I am speaking to the Council, not to them, and I want the Council to know the truth about the spirit in which this measure has been promoted

"On examining the cases mentioned by Colonel Francis, I find that the Judges who tried them—three different Judges—all followed much the same course: they took evidence on the whole case as they were bound to do; but when they found that the dispute merely came to one of opinion between man and man, or of judgment how proceedings should be conducted, they held that the officer's judgment must prevail, and that the plaintiff had no case to bring into Court. That seems to be a most reasonable way of dealing with a difficult jurisdiction. We must, indeed, bear in mind that none the less was jurisdiction exercised, and that the Collector had to appear, plead and give an account of the whole of his proceedings. It is one thing to be wholly debarred from enquiring into a given subject, and quite another to hold that, after all enquiry has been made, you won't interfere with mere matters of opinion or discretion. A judicious administration of an unsuitable jurisdiction very much diminishes the mischief, but does not destroy it. Still I think that in these cases, and in every other case, now a good many, that I have read about the jurisdiction of the Civil Courts, they have shown great sense and moderation. It is this very good sense and moderation with which they have worked the law, as I believe, that has prevented its defects from becoming intolerable much sooner. They have too wide a jurisdiction, and uncongenial duties are thrown upon them; but that is not their fault, it is the fault of the law which we are asking you to amend.

"Now I trust that the Council will be of one mind that there must be some line drawn to abridge the excessive jurisdiction of the Courts, and that the matter is one to be settled by the legislature, and not by a great number of judicial decisions. If so, the only question is what line shall we draw. This has always seemed to me a most difficult thing to decide, and am sure we have not been disposed to dogmatize about it. We have propounded a plan and invite criticism upon it. Our language has been;

Si quid novisti rectius istis,
Candidus imperti; si non, his utere mecum.

"I am sorry to say that we have received very little assistance from without. Of course nobody ever is eager in support of a tax bill, though many are eager against it. So it is with a Bill intended for the more efficient collection of the revenue. We have been loudly called upon to leave the law alone, but have had no better dividing lines of jurisdiction pointed out to us. So the different branches of Government, and the members of the Committee have discussed the matter with one another, and have done the best they could to strike a fair and reasonable line. The Bill was considerably modified in October last, and it has been modified again now, with the effect of giving considerably more jurisdiction to the Civil Courts than it did when it was first framed.

"I noticed before one of the most favourite arguments against the Bill, namely, that it made men judges in their own cause, which was said to be contrary to a fundamental principle of all law. I am glad to see that this particular objection has been dropping out of the controversy, and if a deathblow has been administered to one fallacy, that is a comfort. I have indeed seen myself

mildly and good-humouredly bantered in some public prints for being so simple as to think that Collectors are under as strong temptations to lower the revenue unduly as to raise it unduly. I still retain however that simple belief, because my experience supports it; and I find myself reinforced by a most unexceptionable witness, being no other than the High Court of Bombay. In the course of the judgment from which I have quoted so much, they say this—

"'In the Canara case, on the other hand, it was manifest that the opposition offered to the survey and assessment, and the consequent litigation, were, in a great measure, due to the sympathy of some of the Collectors having been excited in favour of the landholders, by imperfect investigations and erroneous views as to the authority and acts of Sir Thomas Munro. We are not for a moment to be understood as saying that those Collectors intentionally sought to raise that opposition or litigation, but their opinions, confidently expressed in Reports to Government, were on record in their kachahrís, and information, contained in the archives of a kachahrí or other public office in this country, has a singular facility in making its exit if there be any person interested in assisting it to do so. Consequently the views of those Collectors were well known throughout the province of Canara. If the decision of the Canara case had been left to those officers, or had it been based on their reports, the result would have been the opposite of what it was in Court.'

"If that does not prove that the Revenue officers have their sympathies with the people they assess, I don't know what it does prove. The Collectors would have taken off a burden which the Court decided was to be laid on.

"I am not sure whether it is a revival of the same fallacy in another shape, or whether it is a totally new one, because it is couched in such very vague terms; but we are now told from one or two quarters that our proceedings are in violation of all principles of jurisprudence.

"I wish the gentlemen who say so would have pointed to the system of jurisprudence which they have in their minds. The only way I know of learning principles of jurisprudence is to look and see what is embodied in actual laws. Now we are dealing with the subject of revenue; and I shall be surprised if our opponents can show us any system of revenue jurisprudence, except this Bombay Regulation, which is not based on the principle of protecting Revenue officers from litigation for acts done within the sphere of their duty. I referred before to the case of income-tax. The principles of jurisprudence recognized there are that Revenue officers (in India Collectors, in England Commissioners) and not the Courts of law, shall settle disputes between the tax-payer and the tax-collector. Perhaps the case of land-tax may supply even a closer illustration. When the land-tax was made perpetual, the maximum amount for given localities was fixed by law. Then assessors were appointed to distribute that amount over different properties. From the assessors there is an appeal given to the Land-tax Commissioners; and then it is—

"'declared, that all appeals once heard and determined by the said Commissioners on the day appomted shall be final, without any further appeal upon any pretence whatsoever.'

"And again—

"'all questions and differences which shall arise touching any of the said rates, duties, and assessments in *England*, *Wales* and *Berwick-upon-Tweed*, or the collecting thereof, shall be heard and finally determined by the said Commissioners, in such manner as by this Act is directed, upon complaint thereof made to them by any person or persons thereby grieved, without further trouble or suit in law in His Majesty's Court of King's Bench, or any other Court whatsoever.'

"Now there is the most complete protection against litigation given to the officers acting within the sphere of their duties. If they proceed to assess a property not within the scope of the Act at all, the Civil Court may take cognizance of such a case. So may the Civil Courts according to our Bill. Or supposing they assess a property expressly exempted by the Act, such as the endowment of a hospital, the Civil Court may interfere. And so it is according to our Bill. In each case, if the officer acts beyond his sphere, he may be sued; if he keeps within it, he may not be sued, except that even then section 5 of our Bill permits him to be sued under certain circumstances.

"Of course we have not and cannot have an exact analogy between the two countries. In India it is a strong additional reason for exempting Revenue officers from civil suits that the land-revenue is levied at the discretion of the Ruler. And when we come to claims of exemption, the analogy fails to a greater extent. For, in England, there are no exemptions except those which

are provided in the Statute itself, and we agree that of Statutes Civil Courts are the best interpreters. In India the circumstances are totally different. Exemptions are claimed under every conceivable species of circumstances, of all degrees of remoteness, obscurity, lawlessness, or corruption; and it is distinctly the Revenue officer's ordinary duty in India, and a very important part, too, of that duty, to sift to the bottom every claim of exemption, otherwise the public treasury would be seriously encroached upon. To find then whether, in the case of exemptions, we are violating principles of jurisprudence, we must turn to the study of our Indian laws, for the phœnomena exist only in India. Our opponents have not told us where they find the violated principles. Under Native Rulers the process used with regard to exemptions was a very simple one: for though they might have been created by formal grant, and with expressions denoting absolute perpetuity, 'for ever,' 'from generation to generation,' 'as long as the sun and the moon endure,' they were usually treated as extinct by the death of either grantor or grantee, and sometimes revoked without waiting for any such death. We do not act in nearly such summary fashion; but an officer must have regard to the origin of privileges against the public right, and to the knowledge of all parties how precarious a possession they were. The objectors to the Bill should show how its dealing with exemptions violates such principles as regulate our jurisprudence in other parts of India. They should show, for instance, in what other part of India such suits as the 1,000 Canara suits could have been instituted. Certainly such a phœnomenon has not occurred elsewhere: we say it could not occur, and I believe that assertion to be correct.

"The plain fact is that it is this Regulation which violates the principles of jurisprudence prevalent elsewhere, and it is we who are seeking to introduce sound principles which shall be in harmony with the requirements of the case.

"After all, one of the great difficulties which our opponents have to meet, and which they never attempt to meet, is this. Are they prepared to say that in this comparatively small corner of India, our legislation is right, and that it is wrong everywhere else? They say the people are content; but they are not more content here than elsewhere. And the Revenue Department of the Government are not content; they find that the revenue suffers; they believe that injustice is done to the public at large owing to the unfamiliarity of the Civil Courts with these intricate revenue matters; they find their time taken up in defending petty revenue suits, mostly decided in their favour, though they have great difficulty in giving proper attention to them; they find that much cost is incurred and their business grievously disturbed. Our opponents have never attempted to compare one part of India with another, not even the two great divisions of Bombay, or to tell us what advantages exist in the old provinces of Bombay to compensate for the mischiefs I have mentioned.

"I am extremely sorry to have detained the Council so long, but the subject is one of difficulty, and it has been overlaid with such an amount of misapprehension, exaggeration, fallacy and error as cannot be removed except at some length. Here is our Bill. It is founded on the broad principle of protecting the Revenue officer when he is acting within the sphere of his duty. It treats the investigation of claims of exemption or privilege as being within the sphere of his duty, but here it makes exceptions in favour of the jurisdiction of Civil Courts in several cases adapted to ordinary legal methods. In framing it, we have been guided partly by the law of England, partly by the law of other parts of India, partly by the peculiar circumstances of Bombay. It is utterly untrue that the Bill is animated by hostility to Civil Courts. It leaves to the Civil Courts of Bombay a large amount of jurisdiction which Civil Courts do not possess in other parts of India. It brings within that jurisdiction a very large area which is now completely shut out from it, namely, the new provinces of Bombay. It does not affect questions regarding ownership of land, nor rent-suits. It may be that we have not struck quite the best dividing line of jurisdiction. I am not sanguine enough to suppose that we have not made mistakes which the course of business will expose. But with all shortcomings, I

confidently commend this Bill to the Council as a very great improvement on the existing law."

His Excellency THE PRESIDENT said :—"I wish to make one or two observations on this Bill. The first is that our hon'ble colleague Mr. Hope, in the remarks which he has addressed to the Council, very properly declined to dwell upon certain observations which have been made on the subject of his own connection with the Bill. I wish, however, in justice to him, to express my own feeling upon the matter. I entirely agree with my hon'ble friend Mr. Hobhouse, in regretting that this Bill should have excited a kind of personal feeling on the other side of India, and I still more regret that, in certain quarters, observations have been made with regard to our hon'ble colleague Mr. Hope, which I consider altogether unjustifiable.

"As regards Mr. Hope's connection with this Bill, it must be recollected that the Bill was originally brought before the Council, at the instance of the Government of Bombay, by our late hon'ble colleague Sir Barrow Ellis, who introduced the measure to the Council and supported it with that knowledge of the revenue affairs of the Bombay Presidency which he possesses in a greater degree perhaps than any other man.

"After Sir Barrow Ellis left the Council, Mr. Hope gave his assistance on the Select Committee, and on several occasions when the Bill has been discussed. He has always been ready to consider with impartiality all reasonable objections urged against the Bill, and we are greatly indebted to him for his assistance in the consideration which the Council has given to the Bill. Mr. Hope's connection with the Kabilpur case tried by the High Court of Bombay, has been alluded to by one of the members of the Government of Bombay. Upon that matter Mr. Hope has, in the proceedings before the Council, made some observations to which I wish to give greater prominence by reading them now, as I think they are perfectly proper and right. Mr. Hope says that the Kabilpur case is one 'requiring an enormous amount of technical knowledge of accounts, tenures and past revenue history for some two hundred years; that a series of experienced Revenue officers—1st Assistant Collector, two different Collectors, Revenue Commissioner, Chief Secretary and Revenue Member of Council, the latter advised by the Legal Remembrancer and a Judicial officer on special duty,—took one view of it, and that the District Judge and a Bench of the High Court, consisting of the Barrister Chief Justice and a Civilian who entered the Judicial department when he had been eighteen months in the country and is totally ignorant of revenue matters, took another view of it.'

"That statement shows that the observations made by a member of the Government of Bombay, reflect (if a difference of opinion on so complicated a case can rightly be considered to be a subject of blame at all) as much upon his own colleagues, and upon the constituted advisers of the Government of Bombay, in revenue matters, as upon Mr. Hope in the performance of his duty as Collector of Surat. Mr. Hope, however, has very properly explained that his own personal concern in the Kabilpur case is immaterial to the issue which is before the Council. The Bill must be considered on its merits, and its merits alone, and the question of its merits, so far as regards its principal features, has been so exhaustively dealt with by my hon'ble friend Mr. Hobhouse on the present occasion, that it leaves but little for me to say. The Bill was originally introduced in consequence of the existence of a certain Regulation—No. XVII of 1827—which extended to a part of the Bombay Presidency. The ninth section of that Regulation runs as follows :—

"'The Collector's decision upon any question arising out of the provisions of the preceding sections' [which refer to the assessment of the land-revenue] 'shall, in the first instance, be obeyed and acted upon as the rule. But if any person should deem himself aggrieved by any such decision, he may either present to the Collector a petition, addressed to Government, praying for redress, or may file an action against the Collector in the Civil Court, under the ordinary rules, or he may pursue both methods at the same time.'

"It was the opinion of the Government of Bombay, of Sir Barrow Ellis, and of every one, so far as I am aware, who, until recently, has expressed an opinion upon the construction of this Regulation, that under it all matters connected with the assessment of the land-revenue in that part of the Bombay

Presidency over which the Regulation extended might be brought before the Civil Courts. That opinion was confirmed, as has been shown by Mr. Hobhouse, by cases in which various questions relating to the assessment of the land-revenue were actually brought before the Civil Courts. No doubt the Courts have dealt with such suits very wisely, and have held that the plaintiff had no case for relief when all he could shew was that of two courses fairly open to the Collector he had followed the one which the plaintiff did not think right; but this seems to me to be quite a different thing from a refusal to entertain such suits at all. It was held by the Bombay Government, and by the Government of India, that it might occasion very great inconvenience and embarrassment if this jurisdiction was maintained, and a Bill was therefore introduced for the purpose of preventing the Civil Courts from dealing with those particular matters connected with the assessment of the land-revenue, with which the learned Judges could hardly have sufficient practical knowledge to deal satisfactorily, and which are not dealt with by the Civil Courts in other parts of India, the most important matters being 'the amount or incidence of any assessment of land-revenue,' the 'mode of assessment, or the principle on which such assessment is fixed,' and 'the validity or effect of the notification of survey or settlement, or of any notification determining the period of settlement,' this class of cases being placed under head (*b*) of clause 4 of the Bill now before the Council.

"It appeared to the Government of India that if the law, as we understood it, remained as it was, the whole assessment of the land-revenue of a district might be brought before the Civil Courts to the great embarrassment of the Government and of all parties concerned. The other principal class of cases which are excluded from the Civil Courts are—

"claims against Goverment—
to hold land wholly or partially free from payment of land-revenue, or
to receive payments charged on or payable out of the land-revenue.'

"During the two and a half years that this Bill has been under consideration, great pains have been taken to provide that all such questions of right connected with these claims as are properly cognizable by the Civil Courts should be admitted for trial in those Courts; and I believe that Members of the Council will be satisfied with the proviso contained in the latter part of the fourth clause of the Bill, which expressly reserves to the Civil Courts cognizance of claims for exemption from land-revenue of the kinds specified; in fact, the Council have taken every pains to admit to the Civil Courts all cases in which it is right and desirable that they should possess jurisdiction, and to confine the jurisdiction of the revenue authorities—which jurisdiction, I may observe, is substantially analogous to the jurisdiction given to officers connected with the revenue in England in certain cases—to those practical questions which such officers alone are the best able to decide.

"That is the shape in which the Bill now stands.

"In respect to the extra-judicial opinion which has been given by the High Court of Bombay, upon the construction of Regulation XVII of 1827, I so entirely concur with everything which has fallen from my hon'ble friend Mr. Hobhouse, that I would only say that if the opinion of the High Court be right, it affords a strong argument in favour of the most important portion of the Bill which the Council are now asked to pass, because, as I understand it, the construction put upon the Regulation by the High Court would confine the jurisdiction of the Civil Courts very much in the same manner as is done by section 4 (*b*) of this Bill. But I must express my entire concurrence with Mr. Hobhouse that this construction of the Regulation is contrary to its plain language. So far as I can understand the argument used by the learned Judges, they have restricted that language by a distributive construction which the context apparently does not warrant, and this interpretation is to my mind so doubtful, that I think it most desirable to do what is proposed to be done by this Bill, namely, to make the meaning of this Regulation perfectly clear by a distinct enactment of the legislature.

"If, therefore, Members of the Council agree, as I do, with the opinion of my hon'ble friend Mr. Hobhouse upon this matter, namely, that it will not be safe to leave the law in a state of doubt, which I believe would be the case if

we do not proceed with this Bill, and if they are satisfied that every pains have been taken to admit the jurisdiction of the Civil Courts in these matters, wherever it can properly be exercised, I have no hesitation in expressing my opinion that they will do well to pass the Bill into law."

The Motion was put and agreed to.

The Council then adjourned to Tuesday, the 4th April 1876.

CALCUTTA,
The 28th March 1876.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 4th April 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir W. Muir, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
His Highness the Mahárájá of Vizianagram, K.C.S.I.
The Hon'ble John Inglis, C.S.I.
The Hon'ble T. C. Hope.
The Hon'ble Rájá Nárendra Krishna Bahádur.
The Hon'ble F. R. Cockerell.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY asked for leave to postpone the motion that the Report of the Select Committee on the Bill to provide for the management of the Public Museum at Calcutta, be taken into consideration.

Leave was granted.

OBSOLETE ENACTMENTS BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill for the repeal of certain obsolete enactments.

The Council then adjourned to Tuesday, the 11th April 1876.

CALCUTTA,
The 4th April 1876.

WHITLEY STOKES,
Secretary to the Govt. of India,
Legislative Department.

SECOND SUPPLEMENT TO

The Gazette of India.

No 16. CALCUTTA, THURSDAY, APRIL 13, 1876. Register No. 33.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

General.

REVIEW OF THE BUDGET ESTIMATES OF THE PUBLIC WORKS DEPARTMENT FOR 1876-77.

Dated Fort William, March 31, 1876.

OBSERVATIONS.—The Governor General in Council considers it desirable that the Public Works Budget-Estimate should be reviewed in a Resolution in that Department, at greater length than is possible in the Resolution on the General Budget-Estimate of the Empire.

2. The Imperial Budget-Estimate for Public Works and Telegraphs for 1876-77 provides for an expenditure of Rs. 7,16,79,100. Of this sum, Rs. 40,93,100 is chargeable to the Ordinary revenues, and the balance of Rs. 3,75,86,000 is Extraordinary, or Capital outlay not met or only partially met from the Ordinary revenues of the year, but provided for more or less from available cash balances or by loan.

3. The entire expenditure is divided under the following main heads,—Military Works Rs. 1,22,84,000, Civil Buildings, Roads and Miscellaneous Rs. 36,36,800, Telegraph Rs. 48,79,200, Irrigation Works Ordinary Rs. 94,00,000, and Extraordinary Rs. 90,86,000, charges for Land and Control of Guaranteed Railways Rs. 9,25,000, State Railways Ordinary Rs. 29,68,100, of which Rs. 27,28,500 is for working expenses, and Extraordinary Rs. 2,85,00,000.

4. The total sum provided for expenditure in 1876-77 is less than that included in the Budget-Estimate of 1875-76 by Rs. 54,14,900. Excluding the working expenses of State Railways, the reduction is Rs. 65,44,400. Of this reduction, the sum of Rs. 11,30,400 falls under Ordinary, and is due to the financial necessities arising from the fall of exchange. The balance Rs. 54,14,000 falls under Extraordinary, and to the extent of Rs. 30,00,000 is due to a reduction of this class of outlay determined on early in 1875, and the remainder to the state of the finances. The reductions distributed amongst the main heads of charge fall as follows :—Military Works Rs. 10,04,000, Civil Buildings and Roads Rs. 2,15,200, and Irrigation Extraordinary Rs. 39,14,000, Telegraph increase Rs. 34,200, Guaranteed Railways (charges for land and control) increase Rs. 15,000—State Railways,—Ordinary increase Rs. 39,600, and in working expenses increase Rs. 11,29,500 and Extraordinary reduction Rs. 15,00,000.

5. Besides the Imperial expenditure, the Budget-Estimates of the Public Works Department show the expenditure of the Guaranteed Railway Companies,

which all passes through the Government Treasuries, and results in certain charges against the Ordinary revenues of the State. Capital outlay is at present only going on on two Railways; in the rest, part of the capital invested in stores is being gradually set free by the use of stores for maintenance. The net result estimated for 1876-77 is that the reduction of capital expenditure will exceed the outlay by Rs. 8,00,000. The charges under maintenance and working expenses amount to Rs. 4,58,00,000, which large sum is much more than covered by the earnings to be mentioned hereafter. The guaranteed interest payable by the Government chiefly in England is estimated at £ 4,680,000, which at the rate of exchange fixed in the contracts is equivalent to a charge of Rs. 5,07,35,000 in India, but the remittance of this sum will, at the rate estimated in the Financial statement, cost the Government Rs. 5,47,90,243. The excess charge due to this cause, however, does not fall in Public Works Department estimates. For the Madras Irrigation and Canal Company the charge for interest is at an even sum of £ 50,000 (Rs. 5,85,365). The charge for working expenses of the Canal is estimated to amount to Rs. 1,55,000.

6. Compared with the Budget-Estimate of 1875-76 the Guaranteed Railway capital shows an increase in *receipts* of Rs. 5,18,000, and the working expenses are greater by Rs. 14,45,000, due to the greater length of line over which the operations extend in the later year, and the increased traffic expected.

7. The Public Works Budget-Estimate also includes the receipts which are recorded in the General Accounts as Public Works Revenue. These consist of Miscellaneous receipts in the Military Works and Civil Buildings Branches, receipts from the Wurora Colliery, and fees from students of the Royal Civil Engineering College, Cooper's Hill. The estimated total of all these receipts amounts to Rs. 8,30,000; the Telegraph gross revenue to Rs. 29,02,000, the Irrigation direct gross revenue to Rs. 52,75,500, and the State Railway gross receipts to Rs. 41,52,000.

8. Besides these there are the gross receipts of the Guaranteed Railways which are estimated to amount to the large sum of Rs. 8,55,00,000, of which Rs. 19,50,000 must be returned to the Companies in the shape of share of surplus profits, and the balance after paying working expenses goes in abatement of the guaranteed interest payable by the Government. The gross receipts of the Madras Irrigation and Canal Company amount to Rs. 75,000.

9. Compared with the Budget-Estimate of 1875-76 the receipts estimated for 1876-77 on account of Public Works Ordinary are under Buildings and Roads Rs. 1,10,000 less, under Telegraph Rs. 2,000 more, under Irrigation Rs. 44,50[illegible] less, and under State Railways Rs. 18,09,000 more.

10. The estimated Guaranteed Railway gross receipts are Rs. 46,75,0[illegible] greater due to extension of the lines in operation and to growth of traffic.

11. Before proceeding to the details of the operations proposed for 1876-[illegible], it will be convenient to review the receipts and expenditure so as to give a brief summary of the present state of the net earnings of the Irrigation Works and Railways, both State and Guaranteed, compared with the capital outlay incurred.

12. Commencing with the Irrigation, it is necessary for the present to separate the works in the Madras and Bombay Presidencies, because from their peculiar circumstances no conclusion has yet been arrived at as to what is proper to be taken as the officially recognized income due to the works. A sum of about 2½ crores of rupees (2½ millions sterling if the rupee were worth two shillings) is received in Madras and Bombay as the revenue of artificially irrigated land. The actual capital outlay incurred by the British Government, so far as the accounts show on works of Irrigation in those two Presidencies up to end of 1875-76, is about Rs. 3,67,53,000. From a *primâ facie* view irrigation there is consequently extremely profitable. Amongst the works in the Madras Presidency, however, are to be mentioned those of the Madras Irrigation and Canal Company, whose paid up capital on which interest is paid is £ 999,666, and the guaranteed interest £ 49,983, the operations of the year being expected to result in a loss to Government of Rs. 80,000 in addition to the guaranteed interest. That irrigation in Madras is profitable as a rule there is no reason to doubt; but when it is attempted to arrive at an accurate estimate the difficulties are immense. In the first place there are the old

works of which the circumstances of construction whether from forced labor or otherwise are utterly unknown. The irrigation due to them must of course be eliminated in considering the results of the British expenditure of capital. But the older records do not show the source from which the water for irrigating the lands classed as irrigated was taken. Large numbers of these old works have been more or less improved, and extended by the British Government, and it is not possible to say how much of the increase of irrigated land is due to such improvements, or how much is due to the growth of population and increase of prosperity generally. Again in regard to later works even, the tracts irrigated by these were not destitute of means of irrigation before, some more or less imperfect means of irrigation in most cases existed, and the British works, though giving fresh irrigation to large tracts, in others partly increased the supply of water, and partly rendered it more reliable and easy of attainment. In Sindh (and the same remarks apply more or less to the Inundation Canals in the Punjab) the land cannot be cultivated at all without the water supplied by the Inundation Canals; and the revenue from the water is not distinguished from that charged on the land. Here again the problem of separating the increase of revenue into what is due to the works, and what to other causes, is most difficult. The investigations now in hand have for their object first to ascertain what conclusion can be established from the existing records, and secondly, to devise some simple rule which may be accepted as a safe approximation to the income due to the works where the records fail.

13. In the North Western Provinces and (excluding the inundation canals) in the Punjab, however, these difficulties do not exist to any serious extent. It has always been the system there to levy water-rates independently of the land revenue, and the land revenue itself has been assessed on a different system, and the assessment periodically revised, on which occasions the increase due to irrigation is specially investigated by the Settlement Officers. The only two works which existed prior to British rule are the Eastern and Western Jumna Canals. It is known that they had ceased to flow long before the British Government undertook their restoration; in many places the lines were even obliterated, and the old masonry works yet existing are few and comparatively unimportant. No exact estimate has been framed of the value of the old work which was available, but probably the outside value did not exceed 10 lakhs of rupees. Including Bengal with the North Western Provinces and the Punjab, the British Government has spent up to the end of 1874-75 Rs. 11,16,45,060 as capital outlay on works of irrigation. To this must be added Rs. 1,13,09,000 for the estimated outlay to April 1876, making a total of capital outlay Rs. 12,29,54,060. The Budget-Estimate of the current year gives Rs. 49,65,460 as the gross receipts due to the works in operation, and Rs. 33,70,167 for the working expenses, leaving a net income of Rs. 15,95,293. To this again has to be added Rs. 19,21,387, the sum included in the public accounts under Land Revenue as the increase of that revenue due to irrigation. This makes up the total net earnings to Rs. 35,16,680. This is equal to 2·8 per cent. on the capital. Excluding the capital outlay on works not yet in operation, the capital charge is Rs. 10,12,29,142, and the percentage of profit 3·4 per cent. Considering that some of the works have only just begun to irrigate, and that the account is clogged with the Orissa works, on which the progress of irrigation is almost hopelessly slow, the result upon the whole is not discouraging. It will be seen further on that the Irrigation Works even now compare not unfavorably with the railways in the return they give on capital spent.

14. The capital outlay on the State Railways up to April 1875 is Rs. 8,50,57,880, and adding Rs. 3,04,64,100 for the estimated outlay to April 1876, the total capital is Rs. 11,55,21,980. The Budget-Estimate of 1876-77 gives Rs. 41,52,000 for gross receipts, and Rs. 27,28,500 for working expenses, being Rs. 14,23,500 for net profit This is only 1·23 per cent. But it is to be recollected that only 632 miles of railway are open to April 1876, while the capital outlay was expended on 1,743 miles finished and unfinished. The prospects of the finished lines will be reviewed separately hereafter.

15. The paid up capital of the Guaranteed Railways is £ 97,198,320 mostly paid in London. The gross receipts estimated for the year 1876-77 amount to Rs. 8,55,00,000, the gross working expenses to Rs. 4,58,00,000, and the net profits to Rs. 3,97,00,000, out of which the Government will have to pay to certain Companies surplus profits to the extent of Rs. 19,50,000, leaving Rs. 3,77,50,000; again from this must be deducted Rs. 9,25,000 for the Government outlay connected with the Guaranteed Railways, leaving Rs. 3,68,25,000; this converted at the contract rates of 1*s.* 10*d.*, 1*s.* 11*d.* and 2*s.* per rupee represents £ 3,385,000. This gives a return of 3·62 per cent. on the capital expended, excluding the Government outlay on land. This is the return the Government gets for the money raised on guarantee, in abatement of the charge of £ 4,680,000 for guaranteed interest, leaving a net charge to the State of £ 1,295,000. But considering the present rate of exchange the Government loses more than this including remittance to London where the guaranteed interest has to be paid. At the estimated rate of exchange of the year the net sterling earnings of these Railways are £3,145,469, and the average return 3·24 per cent. and the net estimated cost to Government is Rs. 5,47,90,243 —Rs. 3,68,25,000 = Rs. 1,79,65,243.

MILITARY WORKS.

16. The sums allotted to the several Local Governments and Administrations for the main heads of service are as follows:—

	Rs.
Original Works	59,75,943
Repairs	37,36,740
Establishments	25,96,200
Tools and Plant	1,69,867
Barrack Department, *viz.*, furniture, &c., &c.	6,88,500
	1,31,67,250
Of this total, the sum of	8,83,250
is to be met from stock in hand, to the extent of Rs. 7,00,000, and from a probable short expenditure of Rs. 1,83,250, thus leaving the actual net grant in cash	1,22,84,000

This net grant is as above stated less than that for the year 1875-76 by a sum of Rs. 10,04,000.

17. As the grant for 1876-77 is a very limited one, considering the numerous requirements of the troops throughout the country, the objects which have been held in view in the determination of the details under the heads of "Original Works" and "Repairs" have been,—first, to provide for the proper state of repairs of existing buildings, and 2nd, to limit the outlay on Original Works to works in progress, or such works as may appertain to general projects which have been sanctioned, and are already in course of execution.

18. The entries under the head of Original Works may be thus classified—

	Rs.
Accommodation for troops	31,79,959
Drainage Works	85,675
Water-supply	4,59,000
Fortifications	1,34,400
Works for Ordnance Department	4,59,900
„ for Commissariat Department	1,98,300
„ for Dockyards	60,000
Military Communications	3,29,500
Miscellaneous	54,400
Minor Works	9,84,809
	59,75,943

ACCOMMODATION FOR TROOPS.

19. The bulk of the grant has been devoted to the perfecting of the great scheme of improved barrack accommodation for the European soldiers, which has been, for several years, in progress. It has been generally admitted that this scheme, so far as it has been already carried out, has tended materially to the improvement of the health and comfort of the troops, and it will, for some years to come, constitute the chief demand upon the available resources of the Military Works Branch.

A few of the most important projects may be here noted.

20. A sum of Rs. 40,000 has been set apart for completing several important buildings for the Depôt at Darjeeling. Upwards of 1 lakh of rupees has been allotted to Allahabad, chiefly for completing the buildings for the Battery of Artillery. The buildings for the Regiment of Infantry having been already completed. A sum of Rs. 1 lakh has been set apart for the gradual provision of permanent barracks at Lucknow in lieu of the temporary structures which were hurriedly run up in 1859-60. A similar sum has been provided for a like purpose at Fyzabad. Sums of Rs. 1,24,000 and 1,86,000 have been provided for the hill stations at Raneekhet and Chukrata, and will go far towards completing the accommodation at these two stations. A provision of Rs. 1,20,000 has also been made for perfecting the accommodation at Mooltan.

For the Madras Presidency the three chief items are,—General Hospital at Madras, Rs. 85,000; new double-storeyed Hospital at Poonamallee, Rs. 40,000, Barracks at Wellington, Rs. 73,300. For the Bombay Presidency the important entries are barracks and other buildings at Poonah, Rs. 1,33,000; Artillery and Infantry Barracks, Ahmedabad, Rs. 1,80,000. The existing barracks at Kamthi are in an unsatisfactory condition; a sum of Rs. 82,000 has therefore been provided for their improvement.

New barracks have for some time been in progress for the British Cavalry Regiment at Trimulgherry, Hyderabad; a sum of Rs. 14,80,000 has already been expended on them, and the allotment for 1876-77 is 3 lakhs. It is a matter of great importance that the whole of the Regiment should be removed as soon as possible from its present unhealthy location at Secunderabad.

New buildings have for some time been in progress for the Regiment of British Infantry at Rangoon. Barracks for two companies have been completed, and the allotment for the year 1876-77, *viz.*, Rs. 81,000, will admit of the completion of two more barracks and of good progress being made on two others.

The existing barracks at Mhow for the Horse Artillery are very defective. It has been therefore determined to commence upon a new range with an allotment of 1 lakh.

A sum of Rs. 40,000 has been allotted for the improvement of the accommodation of the Native troops at the Andaman and Nicobar Islands.

DRAINAGE WORKS.

21. The necessity for the improved drainage of Cantonments has not been lost sight of. Several comprehensive projects for the drainage of important Cantonments, such as Peshawur, Lucknow, Meerut, Umballa, Cawnpore, &c., are in course of preparation. These will be duly attended to when ready, and when funds can be made available, but it has not been possible to make a large allotment for the year 1876-77. Several works of importance, though not involving much expense, have, however, been provided for; amongst these may be noted, completion of drainage of Infantry lines, Meean Meer, Rs. 9,000; drainage of barracks at Bangalore, Rs. 15,000; drainage of Cuttack, Rs. 7,675; drainage of a swamp at Kamthi, Rs. 12,000.

WATER-SUPPLY.

22. Here, again, it has not been possible to make as much provision as might have been desired for this very important service; but the requirements of several Cantonments, at which the supply is less satisfactory than at others, have been attended to.

The following are the principal works to be undertaken :—

A project, involving an expenditure of upwards of 20 lakhs of rupees has been submitted for conveying a supply of water for the Umballa Cantonment from the River Guggur, which is several miles from the station. Such an expenditure for a single station would be excessive, and fortunately there is every prospect of completing the requirements of the Cantonment by extending the present arrangements, by which water is brought in from wells sunk in the beds of the adjoining rivers, Tangra and Tangri. An allotment of Rs. 10,000 has been made for experiments, and for improving the present ducts and reservoirs.

A sum of Rs. 36,000 has been set aside for completing the scheme for Dalhousie, which has been in progress for some time.

An allotment of Rs. 90,000 has been made for bringing a supply from the River Bara to the Cantonment of Peshawur where the existing supply has long been pronounced unwholesome. A project for distributing this supply is under preparation, and will be undertaken during 1877-78.

Progress will also be made with the new project for Meean Meer, for which Rs. 60,000 has been allotted.

Provision has been made to the extent of Rs. 17,000 for completing a scheme which has been for some time in progress at Bellary.

A sum of Rs. 23,000 has been set apart for improving the supply at Aden. Sums have also been set apart for improving the supply at Asseergurh Rs. 10,000, and Trimulgherry Rs. 30,000.

The present water-supply at Nasirabad is very deficient and unwholesome. A comprehensive scheme is in progress, in furtherance of which a grant of Rs. 1,43,000 has been made.

The present supply at Mhow is also very unsatisfactory. A project is now under preparation for an improved supply, and an allotment of Rs. 30,000 has been made for a commencement during 1876-77.

Fortifications.

23. It is not intended to do much under this head during the year. Provision however has been made for improving the defences at Ferozepoor, Bombay, Aden, Punjab Frontier Outposts, and Thayetmyo.

Works for Ordnance Department.

24. The most important items for which provision has been made under this head are—

Completion of Powder Magazine and Arsenal Workshops at Allahabad, Rs. 58,000 ; completion of Workshops at Ferozepoor, Rs. 44,000 ; new Arsenal buildings at Rawulpindee, 2 lakhs ; Small Arms Factory and Powder Magazine at Kirkee, Rs. 68,000.

Commissariat Buildings.

25. The only important items are an allotment of Rs. 50,000 for a set of new buildings at Cawnpoor now well advanced, and another of Rs. 32,400 for completing the requirements at Pachmarhi.

Dock-yards.

26. The provision of Rs. 60,000 is for completing certain buildings in the Dock-yard at Kidderpoor which have been in progress during 1875-76.

Military Communications.

27. The only important entries are for the two roads connecting the Hill Stations of Chukrata and Dalhousie with the plains, *viz.*, Rs. 1,77,000 and Rs. 1,15,000. It is expected that these two roads will be nearly completed during the year.

Miscellaneous.

28. Under this head are a few works relating to Stud buildings, removal of brick-fields, &c., &c.

Repairs.

29. Under this main head of service provision is made not only for the ordinary repairs of Buildings, Roads, Fortifications, &c., but also for payment of rent for buildings which it is necessary to hire for the troops in consequence of the deficiency of Government buildings at various stations.

The sum set down in the Budget for 1876-77, *viz.*, Rs. 37,36,740, is a large one, but for some years past the demand for new buildings has been so pressing that it has not been possible to attend, as fully as might have been desired, to the proper repair of existing buildings. It has now become necessary therefore to take up this service in a thorough manner.

The great number of temporary buildings which still exist all over the country require an unusually large expenditure for their repair, and for the year in question the estimates have been considerably raised by the damages caused by some severe shocks of earthquake in the District of Peshawur, and by unusually heavy storms and floods at Meean Meer, Lahore and Sealkote.

CIVIL BUILDINGS AND ROADS.

30. The total Imperial grant assigned in Budget orders for 1876-77 to this section of outlay amounts to Rs. 36,36,800.

By services the main divisions are—

	Rs.
New Buildings	3,88,931
Buildings in progress and Minor Works	6,05,800
Repairs	8,88,476
Establishments	8,30,610
Tools and Plant	21,983
Coal operations	1,57,000
Charges in England	7,65,000
Total	36,57,800
Deduct debitable to Budget-Estimate of Indo-European Telegraph Department	21,000
	36,36,800

The amounts allotted to each Province are as follows :—

	Rs.
Madras	1,00,500
Bombay	1,78,250
Bengal	4,58,200
North Western Provinces	3,46,000
Punjab	61,500
Central Provinces	1,91,000
British Burmah	38,700
Assam	32,400
Oudh	23,800
Hyderabad	30,000
Rajpootana	4,07,150
Central India	6,90,900
Coorg	1,36,000
Port Blair	41,000
Inspector General, Military Works	1,00,000
Lahore and Peshawur Road	36,400
Charges in England	7,65,000
Total	36,36,800

Madras.—The provision for new works is limited chiefly to what is required for the Salt works.

The new combined Post and Telegraph Office at Madras, the estimate for which has recently been sanctioned by the Government of India, has been struck out of the Budget with great reluctance as it is a work that is much required. It is hoped that it may be found possible to provide funds for its commencement in 1877-78.

BOMBAY.—The provision under Civil Buildings is chiefly on account of completing the buildings already far advanced for the Telegraph Offices and quarters for Signallers. The most important is that for housing the Signallers at Bombay, a work which it is expected will be completed by the end of 1876-77.

BENGAL.—The provision for Civil Buildings is Rs. 1,98,061 for Original Works, and Rs. 1,51, 989 for Repairs. Of the amount under Original Works about Rs. 60,000 is for renewals and improvements to Government House, Calcutta; about Rs. 52,000 for Opium Buildings at Bankipore, Goolzarbagh and Sewan; and about Rs. 70,000 for Telegraph Buildings, of which the principal are—

1.—Completion of new Telegraph Office, Calcutta.

2.—Construction of new Telegraph Office at Saugor Island.

3.—Ditto ditto at False Point.

The Repair expenditure is almost entirely for the numerous public buildings in Calcutta.

NORTH WESTERN PROVINCES.—Of the provision of Rs. 50,100 under Civil Buildings Original Works, Rs. 16,000 is for the Postal, and Rs. 30,600 for the Opium Department; Rs. 2,28,900 are provided under Establishments to meet the cost of the Thomason Civil Engineering College at Roorkee and the Press attached thereto.

PUNJAB.—The only large work likely to be undertaken is the proposed new Telegraph Office at Umballa, for which a provision of Rs. 20,000 has been made.

The grant for Repairs is for Postal and Telegraph Buildings in various places, and for Government property at Simla.

CENTRAL PROVINCES.—Of the grant of Rs. 25,200 for Original Works Civil Buildings, Rs. 7,500 is for Post Offices, and Rs. 17,700 for completing Telegraph buildings in progress; Rs. 2,000 is allowed for Repairs, and Rs. 6,800 for Establishments, total Rs. 34,000.

The balance of the Imperial grant is for the prosecution of coal works at Wurrora, Rs. 1,34,200, and for coal explorations in the Satpoora Range, Rs. 22,800, total Rs. 1,57,000.

BRITISH BURMAH.—The provision for new buildings is Rs. 23,500, of which Rs. 7,700 is for Postal and Rs. 15,300 for Telegraph Offices. The provision under the latter is for new Offices at Amherst and Diamond Island, necessitated by recent extensions of line, and quarters for Signallers at Akyab.

ASSAM.—Provision has been made for a new Telegraph Office at Gowhatty, for a new Post Office at Sylhet, and for various other smaller works, including temporary Telegraph Office for the extension of the line from Gowhatty to Dibrooghur.

OUDH.—The grant under Civil Buildings is for Opium and Postal Departments, and calls for no remarks.

HYDERABAD.—The provision for Civil Buildings is small, and it is for various petty works which do not call for notice.

RAJPOOTANA.—The principal portion of the allotment under Civil Buildings has been provided for the Mayo College at Ajmere.

Another work of interest is the restoration of the Adhaee-din-ka-Jhompra, a beautiful temple, which was falling into decay, and which is to be restored under the direction of General Cunningham. The cost of restoration will be about Rs. 10,141.

Under Communications the main works in progress are the metalling of portion of the Neemuch to Nusseerabad Road, and the opening up of the Oodeypore link of the Mhow and Nusseerabad Road.

Repairs to roads will cost Rs. 93,590.

In this Province Rs. 19,200 of the Public Works expenditure is met by contributions from Native Chiefs.

It should be noticed here that the operations of the Department in Rajpootana have been increased by the transfer to it of the stations of Deesa and Aboo from Bombay and reduced by the transfer to Central India of the Station of Neemuch.

CENTRAL INDIA.—The expenditure under Civil Buildings is for small works which do not require notice.

The outlay under the head Communications is chiefly provided for the following roads under construction :—

Mhow and Neemuch.
Dhar.
Devas and Ashta.
Gwalior and Etawah.
Nowgong and Sutna.
Sutna and Bela.
Jhansi and Nowgong.

A portion of the expenditure incurred is met by contributions from Native States.

The estimated cost of repairs to roads is Rs. 2,88,000.

The operations of the Department in Central India have been increased by the transfer to it of the station of Neemuch from the Rajpootana Administration.

COORG.—The provision for new works, Civil Buildings, is chiefly for Court-houses. And under Communications for various roads to open out the Province and improve the Coffee Districts.

PORT BLAIR.—A building to house the new saw-mill machinery is to be constructed at a cost of Rs. 4,500.

The rest of the expenditure contemplated is for houses for the Establishment and for Minor Works.

INSPECTOR GENERAL OF MILITARY WORKS.—The provision for Civil Buildings both for Original Works and Repairs is all in connection with Churches and Cemeteries attached to Military Cantonments. There is no one work of special interest.

LAHORE AND PESHAWUR ROAD.—This road is in charge of the Director of State Railways. It was handed over to him when it was in contemplation to lay the rails of the Punjab Northern State Railway on the road embankment. That idea has now been abandoned, and the road will probably be restored to the Local Government.

The sum shown is the difference between the actual cost of maintenance and that allotted for the purpose to the Local Government in the Provincial Service assignment.

CHARGES IN ENGLAND—

	Rs.
These are :—	
On account of furlough allowances	4,90,000
Royal Civil Engineering College at Cooper's Hill	2,30,000
Miscellaneous	45,000
Total ...	7,65,000

30. MYSORE.—Besides the expenditure included in the Imperial grant, the Public Works Department supervises outlay to the following extent from funds provided from the Mysore Revenues :—

		Rs.
Civil Buildings—		
Original Works	...	2,38,900
Repairs	...	20,000
Communications—		
Original Works	...	2,51,600
Repairs	...	3,56,000
Miscellaneous Public Improvement—		
Works	...	2,23,000
Repairs	...	1,000
Total	...	10,90,500
Establishment and Tools and Plant	...	3,36,500
Total	...	14,27,000

31. The following are the principal new works, and works in progress under Buildings costing above Rs. 10,000 :—

		Amount of Estimate.	Grant for 1876-77.	REMARKS.
		Rs.	Rs.	
1.*	Enlargement of the Government High School at Bangalore	42,940	31,000	
2.	Residence of Principal	12,500	12,500	
3.	Museum at Bangalore	35,000	10,000	Rs. 25,000 has been already spent on this work.
4.	Improvements to the house at Bangalore purchased for the Residence of the Maharajah including Out-houses and Stabling	1,14,886	50,000	Rs 72,886 has been already spent.
5.	Court-house at Kolur	13,000	5,000	
6.	District Jail at Chituldroog ...	29,102	10,000	
7.	Improvements to the Civil Hospital, Mysore	11,055	8,000	
8.	Court-house at Belur	13,622	1,000	Rs. 12,622 already spent.
9.	District Jail at Hassan	39,337	5,000	Rs. 31,350 already spent.
10.	Civil Hospital, Chickmagalur ...	10,790	2,800	Nearly completed.
11.	Court-house at Soraba	15,677	10,000	
12.	„ „ Yedahulli ...	15,677	10,000	
13.	Additions to District Jail, Shimoga ...	18,350	5,000	

Considerable progress is being made in the opening out of the Province by roads, and the grant under this head amounts as before stated to about 2½ lakhs of rupees for new works, and about 3½ lakhs for the maintenance of those already constructed. The country is a difficult one owing to its wild and broken nature; to the great scarcity of labor; and the great unhealthiness that prevails for many months in the year; progress is therefore necessarily very slow.

31 a. HYDERABAD ASSIGNED DISTRICTS.—The allotment for "Original Works" is as follows and as in Mysore is provided from local revenues :—

	Rs.
Civil Buildings	2,23,400
Communications	2,73,400
Miscellaneous Public Improvements	10,000
Agricultural	19,800

Under the head "Civil Buildings" the following is a list of those costing Rs. 10,000 and upwards, and of the sums allotted to—

	Rs.
First class Tehsilee, Ellichpoor	14,500
Lock-up at Ellichpoor	8,000
Town Police Station at Oomraotee	10,000
Civil Hospital, Ellichpoor...	10,000
Forest Bungalow, Chiculda	10,000
Tehsilee at Peer Mungrool	18,000
„ at Darwa	20,000
„ at Panderkoora	7,200
Workshops at Yeotmal	15,000
Grant in-aid for Schools	20,000
For Police Buildings	40,000

The grant under "Communications" is for various road projects, though of considerable local importance, they are none of them of general interest outside the Province.

The grant for "Miscellaneous Public Improvements" is for a tank for improving the water-supply of the Town of Booldana.

The grant under "Agricultural" is for the restoration of tanks.

INDIAN TELEGRAPH.

RECEIPTS.

32. The estimate has been accepted for the even sum of Rs. 21,54,000, and is thus made up—

	Rs.
Indian Telegraphs	20,69,000
Ceylon „	85,000
The Budget-Estimate for 1875-76 was for	20,72,000
and the Regular Estimate	20,83,000
so that the estimate for the current year shows an increase over the former of	82,000
and over the latter of	71,000

This is due to the ordinary development of traffic.

CHARGES.

33. The Budget has been passed for the sum of ... 38,29,200

Of this sum, Rs. 10,20,509 are for Capital outlay, Rs. 1,74,909 being for establishment and other charges, and Rs. 8,45,600 for actual construction operations on the following lines of Telegraph :—

STATE RAILWAY TELEGRAPHS.

	Rs.	Rs.
Northern Bengal Railway	2,00,000	
Rangoon and Irrawaddi Valley Railway (to complete)	39,000	
Minor Works on Indus Valley and Tirhoot Lines	10,000	
		2,49,000

GUARANTEED RAILWAY LINES.

Madras to Tanjore	99,300	
Anund to Dakore, and other works on Bombay, Baroda and Central India Railway	18,400	
		1,17,700

ORDINARY TELEGRAPH LINES.

Gowhatty to Dibroogurh	1,50,000	
Cuttack to False Point	38,300	
Extra wire, Ahmedabad to Wudwan ...	14,100	
Ditto Lahore to Kotree ...	1,21,900	
Ditto Calcutta to Chittagong (to finish)	65,900	
New line Bassein to Diamond Harbour (to finish)...	44,800	
Minor Works	43,900	
		4,78,900
Total ...		8,45,600

34. The reductions which financial reasons have rendered necessary have prevented the full amounts necessary to finish the whole length of all these works being provided. It is hoped, however, that it may be possible, by carefully watching the expenditure and re-appropriations, to provide funds at least to the extent necessary for completing the Assam line, which is urgently required for political and military as well as commercial reasons, and the full provision for which has been reduced with considerable reluctance by the Government of India.

The Rangoon and Irrawaddi Valley Line will, it is hoped, be completed before the rains set in.

The Madras to Tanjore Line for the use of the South Indian Railway and of the Government Telegraph Department will, it is hoped, be completed during 1876-77, and also the transfer of the wires of the Bombay, Baroda and Central India Railway Company to the Government posts, the purchase of which has been completed.

Of Ordinary telegraph lines it is expected that the one from the Cuttack to False Point line is being constructed chiefly in the shipping interests, and will be completed this year. A part of the working expenses has been guaranteed by the merchants connected with the Orissa trades. The improvement of the Calcutta to Chittagong Line, and of the Bassein to Diamond Island Line

has been delayed by the want of stores. The improvement of the one line and the construction of the other is for the benefit of the trade with British Burmah. The extra wire to be put up on the Lahore to Kotree Line will strengthen the communication for messages to Europe passing through Kurrachee.

35. Rupees 40,000 has been added to the estimate on account of leave and furlough allowances in England, which charge was formerly made in a different Budget-Estimate.

36. The following is a comparison of the estimate for 1876-77 with those of the previous year :—

	Rs.
The Budget-Estimate for 1875-76 was passed for the sum of	39,43,000
The Regular Estimate was for the same amount, but it has been necessary to add to it on account of purchase of Telegraph lines of the Bombay, Baroda and Central India Railway the sum of ...	2,52,000
Thus raising the amount to	41,95,000
The Budget-Estimate for 1876-77, as has been stated, has been passed for	38,29,200
So that there is a decreased charge for 1876-77 as compared with the previous year, of ...	3,65,800
Or excluding the extraordinary item for the purchase of the Bombay, Baroda and Central India line, of	1,13,800

37. The division of charge between India and Ceylon is as follows :—

	Rs.
India	37,10,638
Ceylon	1,18,562
Total ...	38,29,200

The Indian charges are debitable to main heads as follows :—

	Rs.
Cash outlay on Works	3,13,175
Repairs	6,78,398
Signalling Establishment	19,71,731
Purchase of stores	7,07,334
Leave and furlough allowances	40,000
Total ...	37,10,638

The Ceylon charges are debitable to main heads as follows :—

	Rs.
Repairs	53,047
Signalling Establishment	65,515
Total ...	1,18,562

38. Taking now receipts and expenditure together and comparing the Budget-Estimate of 1876-77 with that for the current year, we have—

	1875-76.	1876-77.
	Rs.	Rs.
Estimated Revenue	19,94,000	20,69,000
Revenue charges	26,87,000	26,90,000
Anticipated deficit	6,93,000	6,21,000

so that there is a net improvement of about Rs. 72,000.

The Ceylon telegraphs on the contrary show less favourably compared with 1875-76—

	1875-76.	1876-77.
	Rs.	Rs.
Estimated Revenue	88,500	85,000
Revenue charges	91,500	1,18,500
Anticipated deficit	3,000	33,500

This result is occasioned—

First, by the Revenue for 1875-76 having been found to have been over-estimated by about Rs. 7,500.

Secondly, by the opening of several new Offices and lines which will add to the expenses without correspondingly increasing the profits, and by other causes.

INDO-EUROPEAN TELEGRAPH.

RECEIPTS.

	Rs.
39. The Regular Estimate for 1875-76 shows ...	9,65,000
Whereas in the Budget-Estimate the calculation was for ...	8,28,000
Increase ...	1,37,000

This increase is due to the interruption of the Red Sea cable from about the middle of November to the end of February, an accident which occasioned a considerable increase of traffic on the Indo-European lines—

	Rs.
The Budget-Estimate for 1875-76, as mentioned above, showed	8,28,000
In that for 1876-77 the calculated receipts are taken at ...	7,48,000
Showing a decrease of ...	80,000

But in 1875-76 there was an exceptional payment by Turkey on account of debt due to the Telegraph Department, so that, excluding this exceptional item, there is an anticipated excess of Rs. 33,000 in the normal receipts of the Department.

CHARGES.

40. Those debitable to the Capital Account amount to Rs. 43,204 for works, by far the largest portion being for the replacement of the existing wooden standards by iron ones, and Rs. 6,480 for Establishments. Total Rs. 49,684. The cost of renewals and repairs has been set down at Rs. 75,428, of which Rs. 49,000 will be spent in the Persian Gulf Section and Rs. 26,428 in the Persian Section.

41. The cost of Establishment chargeable to Revenue is Rs. 6,39,797, which sum includes Rs. 41,140 for political purposes.

The political charges are thus made up—

	Rs.
Subsidies to Native Chiefs	31,280
Moiety of Political Agent's salary and that of escort ...	7,860
Other charges	2,000
Total ...	41,140

42. Summarizing the various items of charge, we have—

Additions to Capital	49,684
Cost of repairs	75,428
Purchase of stores	1,01,000
Revenue Establishments	6,39,797
Charges for Red Sea Telegraph	1,80,270
,, in Marine Department	89,900
,, in Public Works Department	23,130
Total ...	11,59,209
Deduct store issues	88,250
Total Budget-Estimate ...	10,70,959
Amount admitted	10,50,000
Disallowed ...	20,959

The sum disallowed is chiefly on account of "Duplex" apparatus, the provision of which is, for the present, postponed.

43. The Budget-Estimate for the previous year was framed on a total charge of Rs. 9,02,000, so that there is an increase this year of Rs. 1,48,000, of which amount Rs. 1,13,000 is for items hitherto incurred in other Departments, so that the net increase is really only Rs. 35,000; this has been occasioned by the need for improving the Mekran Coast land-line.

44. Excluding the charges for "additions to Capital" and the "Red Sea Telegraph," which last is not properly debitable to the Indo-European Telegraph, being the sum annually payable by the Government of India for the first Red Sea cable, which proved to be a failure, the estimated working expenses for 1876-77—

	Rs.
amount to	8,20,000
and the estimated revenue to	7,48,000
Anticipated deficit ...	72,000

so that the earnings of these lines of telegraph very nearly cover their working expenses, and actually did so during 1875-76, owing to the accident which befell the Red Sea cable. There is, however, no approach made to covering the interest for the capital outlay, which now stands at Rs. 1,16,68,000.

IRRIGATION.

EXTRAORDINARY.

45. The total grant from Extraordinary funds for the year 1876-77 amounts to Rs. 90,86,000 distributed to the several Provinces as per margin.

	Rs.
Madras	4,56,000
Bombay	6,50,000
Bengal	29,00,000
North Western Provinces	22,00,000
Punjab	28,80,000
	90,86,000

The works for which this sum is provided were all, with one exception, in progress during the year 1875-76, the aggregate outlay during which year under Extraordinary is estimated to amount to Rs. 1,12,64,000*a*.

	Rs.
(*a*) Madras	5,00,000
Bombay	4,80,000
Bengal	41,46,000
North Western Provinces	36,38,000
Punjab	25,00,000
	1,12,64,000

46. In Madras the most important works in progress are extensions and improvements to the Godavery and Kistna series of canals, including irrigation channels, drainage and river embankments. The existing works admit of considerable extensions all of which have not yet been estimated but for the eastern and western portions of the Godavery Delta the estimate amounts to Rs. 34,87,900, of which Rs. 20,05,000 is computed to have been expended up to the end of 1875-76. The cost of completing the works in the central portion has not yet been estimated. The aggregate area of irrigation now exceeds 500,000 acres,—length of navigable channels 423 miles, length of distributary channels 1,470 miles. The grant for next year amounts to Rs. 3,54,300.

The grant for works in the Kistna Delta amounts to Rs. 75,950 to be expended in the eastern section on widening and improving existing channels. An estimate for completing another portion of the system was received during the year, but was not sanctioned pending some further information and a report on the financial results of the existing works. The area now irrigated by these works is about 200,000 acres, the length of navigable channels 192 miles, and of distributaries about 500 miles.

The Streeviguntum Anicut Project is intended to supply irrigation to a portion of the District of Tinnevelly as well as water to the town of Tuticorin, by a weir across the River Tambrapoorney and channels led off thence on the right and left banks which will supply several existing tanks as well as direct irrigation. The work is nearly completed, and is expected to irrigate about 35,000 acres. A revised estimate, amounting to Rs. 11,38,087, was sanctioned during the year, of which the computed outlay to the end of 1875-76 amounts to Rs. 11,00,000. The grant for next year is Rs. 49,250.

The Pennair Project for irrigation in the Nellore District from a weir across the Pennair River near the town of Nellore, for which Rs. 26,500 is provided, is also approaching completion. This weir was extensively injured by the heavy floods of 1874. The necessary repairs and additions have been provided for out of the Ordinary grant for irrigation works.

Two new projects were submitted during the year. One called the Sungum Project for a weir across the Pennair River, about 13 miles above that at Nellore, with channels therefrom to supply tanks already existing, whence the water could be distributed for irrigation. The outlay was estimated at Rs. 31,76,000 not including book charges. It has not yet been sanctioned as an Extraordinary work pending further consideration of the expected financial results.

The second scheme contemplates irrigation in the Madura District by the formation of a large storage reservoir near the head of one of the feeders of the Perryaur River in the Native State of Travancore on the western face of the Ghauts where the rain-fall is always more copious than on the eastern side. From this reservoir it is proposed to convey the water across the Ghauts by a tunnel through the ridge to the Madura Valley. As the project involves some points of considerable difficulty, it is necessary to proceed with

caution, and the proposals are now under consideration by the Government of India. The outlay, including interest during construction, is estimated at Rs. 60,27,620.

47. The largest work in progress in Bombay is that known as the Moota Moola Project, estimated to cost Rs. 54,29,892, of which Rs. 43,73,000 is the computed outlay to end of the year 1875-76, the grant for next year being Rs. 5,19,217. The works consist of a masonry dam across the River Moota which is now 91 feet high, the total height being 99 feet. The reservoir thus formed is intended to supply irrigation to about 70,000 acres in the Poona Collectorate by channels led off right and left from the dam, and water to the City and Cantonment of Poona and Cantonment of Kirkee. The issue of water to the City and Cantonments as well as for a limited area of irrigation commenced about two years ago. The returns next year are expected to amount to Rs. 73,150, the working expenses being Rs. 25,586.

The Bigarree and Sukkur Canals are two of the large inundation canals in Scinde drawn from the River Indus. The Bigarree Canal has for some years supplied the Station of Jacobabad and lands along its course with irrigation. The work on it consists of improvements and additions to the existing channels. The total outlay is estimated at Rs. 12,90,289, of which the computed expenditure to the end of 1875-76 is Rs. 4,58,000. The grant for the current year is Rs. 50,000. Funds for the Sukkur Canal will in future be provided from the Ordinary grant. The cultivation in Scinde is almost entirely dependent on the inundation canals; without them, imperfect though they are, the country would be a desert.

The remaining six projects are comparatively small, and are all nearly completed. Two, the Mooktee and Ekrook, are storage reservoirs, for which Rs. 6,100 and Rs. 27,991 are provided in the grant for next year. The other four, the Hathmuttee in the Ahmedabad District, the Palkhair, Lakh and Krishna in the Deccan, are channels led off from rivers for irrigation.

Estimates for a large scheme for irrigation from the Taptee River in the Surat District, which was projected some years ago, and on which some preliminary work was executed, are under consideration. The cost, excluding book charges, is estimated at Rs. 49,93,523, and the irrigable area at 123,000 acres.

48. In Bengal the grants for 1876-77 for the works in Orissa and Midnapoor are Rs. 9,45,776 and Rs. 2,89,229 respectively. These with the Tidal Canal in Hidgellee, which is completed, are separate sections of the Orissa scheme which was purchased by Government from the East Indian Irrigation and Canal Company. They were originally intended to form portions of a connected system; but are now worked as separate projects. The Tidal Canal is only a channel for navigation from the Hooghly River for a distance of 34 miles. The Midnapoor Series drawing its supply of water from the River Cossye will irrigate about 140,000 acres in all, and affords navigable communication from Midnapoor to the Hooghly. The total estimated cost of the Tidal and Midnapoor section is Rs. 94,58,032, of which the computed outlay to end of 1875-76 is Rs. 82,11,413; the balance is required to complete works on the Midnapoor Series.

The portion ot the Orissa section to which it has been determined to limit expenditure for the present consists only of the channels in progress, and distributaries to supply irrigation to 206,172 acres. Direct navigable communication will be afforded from Cuttack to the harbour of False Point by the Kendrapara Canal on the completion of the extension now under construction; and also to the natural channels which communicate with the port of Chundballee to the eastward by a branch from the Kendrapara Canal also approaching completion. The High Level Canal, which it was originally intended to carry through Balasore to join the Hooghly, now stops short at Bhuddruck on the Salundee, beyond which no work is in progress. The total estimated cost of the works as now limited amounts to Rs. 1,92,95,684 not including book charges, of which the computed expenditure to end of 1875-76 is Rs. 1,69,44,424.

For the Soane project the grant for next year is Rs. 16,64,995. Revised estimates for the portions of the scheme to which it has been

decided to limit operations for the present have been lately sanctioned by the Secretary of State, aggregating Rs. 2,71,03,665* not including book charges, of which the computed outlay to the end of 1875-76 amounts to Rs. 1,50,91,360. The irrigable area is estimated at 1,043,683 acres, or nearly 1,631 square miles, and length of navigable channel 217½ miles. The net return is ultimately expected to reach 8¼ per cent. on the aggregate outlay. The great weir across the Soane River at Dehree 2½ miles from bank to bank was virtually complete in 1874. The two principal branches, the Arrah and Patna, on the left and right banks of the Soane River, will, it is expected, be open for navigation throughout to the Ganges River early in the ensuing year. The Buxar branch is in progress; the distributaries from the Arrah Canal are well advanced, and those from the Patna branch are expected to be complete in 1877-78. Water being much required in September last, temporary arrangements were made for passing a supply over the unfinished weirs in both the Patna and Arrah branches, and a considerable area was irrigated. Satisfactory though it was to be able thus to afford relief just when required the admission of water into the channels at this early stage has been an unfavourable circumstance as regards the works in retarding their completion.

* With book charges Rs. 3,14,70,449.

The progress on both the Orissa and Soane works will be somewhat retarded by the unfortunate necessity of reducing the grants originally intended for next year by an aggregate sum of Rs. 10,00,000.

49. In the North Western Provinces three series of works are being carried out by Extraordinary funds—

The first is the rectification and completion of the Ganges Canal, which comprises rectifications of existing channels and works, additions to the branch lines, completion of the system of distributaries and drainage. The estimates for this work aggregate Rs. 85,88,431, of which Rs. 23,88,858 will be spent on rectification of the existing channels. The total cost of this great work, inclusive of the above additions, is computed at Rs. 3,18,33,905, of which Rs. 2,83,06,642 nearly is the outlay up to the end of 1875-76. The grant for 1876-77 amounts to Rs. 3,82,000, which will be spent chiefly on rectifications and alterations of existing works.

For the Agra Canal the grant for 1876-77 is Rs. 2,18,000. This canal began to yield revenue in the winter of 1874-75. The main channel, 110 miles in length, is virtually complete; the navigable junctions to Agra and Muttra will probably be finished by the commencement of the ensuing rainy season, or shortly after, and the distributaries are all in an advanced state. The navigable channel connecting the Hindun with the Jumna River above the great weir is approaching completion. The total estimated cost of the works is Rs. 76,44,440 exclusive of book charges, and the computed outlay to end of 1875-76 Rs. 73,20,255. The area of irrigation is expected to be 380,000 acres when fully developed. The weir across the River Jumna at the head of this canal, about 7 miles below the City of Delhi, is the first work of the kind ever constructed in North India, and has so far been a complete success, having withstood the action of the floods of four rainy seasons, some of them higher than any yet recorded.

The last work in progress is that known as the Lower Ganges Canal drawing its supply of water from the Ganges River at a point about 3 miles below Rajghât, the crossing place of the Railway from Allyghur to Moradabad. A masonry weir is being constructed across the river whence the main supply channel will be carried, skirting the edge of the high land until it enters it with a moderate depth of excavation. The works are intended to provide irrigation for the lower Districts of the Ganges-Jumna Doab, which the existing Ganges Canal is unable to supply, as well as to a portion of the tract now irrigated from that canal, thus setting free a share of the water of the upper canal for the irrigation of lands higher up the Doab which are still in need of it. The main channels of the project will also be navigable. The aggregate length of new channels as projected will be about 550 miles and of distributaries 940 miles. The cost of the works was originally estimated at

Rs. 2,05,30,000, but this, a revised estimate lately prepared, but not yet submitted, shows will be largely exceeded owing to increases in rates of work and other causes. The weir differs from that across the Jumna at the head of the Agra Canal being of masonry with a vertical drop, whereas the latter is chiefly of stone without mortar in the form of an inclined plain down stream. The deep foundations would, it was expected, be completed across the river by the coming rainy season: good progress has been made on the weir sluices and canal head works. The works for training the river above the weir, a most important part of the design, which have been in progress since the commencement, have so far been most successful. Excavation of channels and masonry works are in progress along a considerable length of the main canal. Altogether the progress has been very rapid on this scheme up to date and would probably be still greater were it possible to supply funds to the full extent of the demand. It has, however, been found necessary as in the case of the Bengal works, owing to financial exigencies, to curtail the grant for next year from Rs. 26,00,000 to Rs. 16,00,000; as a considerably larger sum than even that first given could be economically spent, it will now be necessary in all probability to stop work on all except the most urgent portions of the works in progress. The computed outlay on this work to the end of the year 1875-76 amounts to Rs. 92,58,200.

For similar reasons to those given above the grant for the completion works of the existing Ganges Canal has been reduced by Rs. 4,00,000.

In explanation of the manner in which the reductions were determined on, it may be said that it was considered better to select a few for reduction rather than make an equal reduction in all. The object in such cases is to get as many projects as possible into a condition to be serviceable and to earn revenue. As Railways are usually more quickly constructed than canals, it was resolved to make the required reductions in the latter. And amongst the canals the selection of these and other projects for reduction has been made on the grounds that the general financial results would suffer less by checking progress on works the completion of which is still at a distance, than by deferring the completion of those nearly finished. One exception has been made in the case of the Sirhind Canal, the progress on which it seemed to the Government of India unadvisable to check Native States being co-sharers in the undertaking and having hitherto punctually contributed their proportion of the annual outlay.

During the year a new project was under consideration for irrigating a portion of Bundlecund where irrigation is much needed owing to the precarious and usually scanty rainfall, by a masonry dam across the river Betwa raised 25 feet above the deepest point of the head, whence channels are projected to distribute the water on the left bank of the river. The cost of the works is estimated at Rs. 30,26,248 exclusive of book charges, and the probable area irrigable 80,000 acres. It has not yet been decided whether the expected financial results would justify the carrying out of the scheme by extraordinary funds.

50. In the Punjab the grant for 1876-77 is distributed among four works, three of which are in progress, one has lately been sanctioned by the Secretary of State.

The Baree Doab Canal, for which the grant is Rs. 5,00,000, has been yielding revenue since the year 1860. The total cost of the works exclusive of book charges is expected to be Rs. 1,62,50,224, of which the computed outlay to the end of the year 1875-76 amounts to Rs. 1,45,33,466, the total area of the irrigation when fully developed is estimated at 543,000 acres. The works on which expenditure is now being incurred are two new branches which are approaching completion, and will probably be ready next year for the admission of the water, additions to the masonry weir across the River Ravee at the head of the canal, and the completion of the distributary system. The weir across the Ravee was extensively injured by the extraordinary floods of 1875, but the necessary additions will be completed before the ensuing rainy season.

The work on the Western Jumna Canal comprises a masonry weir across the River Jumna with regulating heads for both Eastern and Western Jumna Canals in lieu of the temporary bunds and embankments by which the canals have hitherto been supplied. The weir was completed across the entire width of the river before the rains of 1875, and withstood the floods most successfully though they were higher than any with two exceptions, recorded during the last fifty years. The regulating heads will probably be ready for the admission of water in the course of next year. The other works have for their object the removal of the sanitary evils under which the irrigated tracts have long suffered, and consist of a new line of main channel from above Kurnaul to a few miles above the city of Delhi, the construction of a complete system of distribution in lieu of the old village water-courses, and the drainage of the irrigated tract. Two of the distributaries are in progress, and preliminary operations for commencing the new main channel. The progress is necessarily slow compared with that possible on an entirely new project, owing to difficulties inseparable from working in an extensively irrigated tract and for the most part water-logged soil. The sanctioned estimate for these works amounts to Rs. 72,19,210 exclusive of book charges. No additional irrigation is contemplated, though the prevention of wastage by the improvement of the system of distribution may eventually lead to some increase. The grant for next year for these works amounts to Rs. 7,50,000.

The largest work in hand at present is the Sirhind Canal, drawing its supply from the Sutlej River near the town of Roopur where it debouches into the plains, which will irrigate portions of the British districts of Ferozepoor and Loodiana and the Native States of Puttiala, Jheend and Nabha. The total estimated cost of the works amounts to Rs. 3,08,73,880, of which the above Native States will contribute about Rs. 1,18,70,000, the outlay to end of 1875-76 is computed at Rs. 1,19,54,590, the grant for 1876-77 being Rs. 25,00,000, of which the share payable by Native States is Rs. 10,00,000. The irrigable area from the British branches is estimated at 783,000 acres. The progress up to date is briefly as follows:—The regulating head is in an advanced state and the weir across the river commenced. Of five bridges on the main supply channel, 40 miles in length, one is complete, three well in hand. Stone for the heavy works in the Sutlej Valley is coming in plentifully by railway from quarries in the hills near Roopur: of the five branches by which the distribution of water below the main feeder is to be made, work is in progress on four. The deep excavation (45 feet deep 200 feet wide at bottom) at the head, some two miles in length, on the completion of which in great measure depends the time when the work can be brought into operation, will probably be finished in about 2 years. Upwards of 2,000 prisoners are employed on this portion of the work, the spoil from which is carried up to ground level by locomotive engines and trucks. The experiment of prison labor has been very successful in this instance, one of the very few in which it has been tried on so large a scale; the men work willingly, and there is little sickness among them.

The last project is the Swat Canal which has been lately sanctioned by the Secretary of State at an estimated cost of Rs. 16,67,848, exclusive of book charges. It is intended to supply irrigation to a portion of the Eusufzaye District in the north-east of the Peshawur Valley, where the rain-fall is always scanty and very precarious, not only with the view of benefitting the present inhabitants of the Valley, but as seems likely to be the case, of inducing some of the lawless borderers from beyond the frontier to settle within British territory on lands which are now thinly populated on account of the want of water, and consequent precariousness of the means of subsistence. The prospects of a return on the outlay are fair, but even if the work were not directly remunerative, the political advantages would make it worth-while to incur the expenditure. The project comprises a weir across the Swat River close to the border not far from the frontier post of Abuzaee with head works to supply existing irrigation channels on the right bank, and the new canals on the left, which will distribute the water on the high-level plain between the Swat and Kalpanee Rivers, on the latter of which the cantonment of Hotee Murdan

is situated. The area irrigable is estimated at 124,340 acres exclusive of 41,981 acres now irrigated by cuts from the river which will be supplied by the head works on the right of the weir, and by the main channel on the left bank. The grant for next year is Rs. 1,30,000 which will suffice for the operations of the first year.

ORDINARY.

51. The Ordinary grant for 1876-77 amounts to Rs. 94,00,000, of which Rs. 19,32,705 will be an addition to the Capital outlay on the works, Rs. 65,15,118 provides for the current expenses of works in operation for which Capital and Revenue Accounts are kept, and Rs. 9,52,177 are charges debitable to works for which no Capital or Revenue Accounts are kept up.

	Capital.	Current expenses.	Outlay on works for which no Capital or Revenue Accounts are kept.	Total.
	Rs.	Rs.	Rs.	Rs.

	19,32,705	65,15,118	9,52,177	94,00,000

The principal works provided for under the head of Capital are as follow—

52. In Madras Rs. 20,811 are provided for an extension of the Nellore Weir across the Pennair River which will be completed in the course of next year. Rupees 27,500 for extension of another weir across the Poonniar in the South Arcot District, which will also be completed or nearly so during the year 1876-77. For the Madras Water-supply Project from the Red Hills Tank the grant is Rs. 36,807. The estimate for this work amounts to Rs. 13,00,543, of which the computed expenditure to end of 1875-76 is Rs. 12,89,916. For the Chumbrumbaukum Tank the grant is Rs. 19,870, the total estimated cost being Rs. 5,08,634, of which the computed expenditure to end of current year is Rs. 4,12,797. For improvements to the embankments along the River Pennair, estimated at Rs. 1,10,400, a grant of Rs. 47,700 is allowed.

The expenditure on repairs to existing works was heavy during the year 1875-76, and must continue so probably for some years owing to the damage caused by the extraordinary floods in September and October 1874. In a return lately received the outlay required for urgent repairs only is estimated at Rs. 11,00,000, and to place the works generally in a safe condition not less than Rs. 15,00,000 more. A much larger sum could be spent during the next year if funds were available.

53. In Bombay Rs. 97,600 is provided for completing an embankment, 40 miles in length, along the right bank of the Indus to shut off the inundation which in 1874 threatened the destruction of the Station of Jacobabad. The total estimated outlay is Rs. 7,02,556, of which the computed expenditure to end of the current year is Rs. 6,22,556. For the Desert Canal along the northern frontier of Scinde the grant is Rs. 1,22,000, the estimated cost being Rs. 8,34,811, and the outlay to end of current year computed at Rs. 2,77,541. For the Sukkur Canal Rs. 31,720 is allowed, for the Western Narra works Rs. 50,680, and for the Eastern Narra Rs. 73,200. These are all inundation canals supplying irrigation for the summer crop, but little or none for the winter crop. Work in Scinde progresses slowly owing to the scarcity of labor; but of the value of these works incomplete and imperfect as they are, there is no doubt whatever, though it is not yet possible to show the financial results in exact figures. Three storage tanks, for which the aggregate grant is Rs. 93,004, will be completed during the year, the total estimated cost being Rs. 5,87,581, and the computed expenditure to end of 1875-76, Rs. 5,13,677. The grant for current expenses on works in operation amounts to Rs. 10,92,043 against Rs. 10,24,761 in 1875-76.

54. In Bengal the only grant under the head of Capital is Rs. 81,480 for investigations in Tirhoot connected with projected irrigation works in the tract which suffered from famine in 1873-74. Up to the end of the year 1875-76, the computed expenditure on these and the Gunduck embankment surveys is Rs. 3,25,880. The great difficulty in projecting works in this tract which would be likely to be of service in a year of drought is the uncertainty of the water-supply from any except the large rivers, and from these the cost of drawing the water is necessarily greater than from the smaller rivulets which intersect that country. The result of the investigations hitherto is that a supply in a dry season can only be relied on from the large Rivers Gunduck and Kosi, and from two others of comparatively small capacity, the Bagmattee and the Kumla. The investigations now in progress are therefore limited to projecting the most economical mode of providing the supply required from the above sources. It is said that irrigation is not required in these tracts except in years of deficient rain-fall, so that the prospects of a return on the outlay are not encouraging. Of the total grant for works for which no Capital or Revenue Accounts are kept, amounting to Rs. 6,03,676, the greater portion (Rs. 5,38,396) is for construction and maintenance of flood embankments in various districts of the Province. The grant for current expenses, Rs. 5,83,844, will be expended on the four large works constructed from Extraordinary funds, and includes charges for assesment of revenue as well as maintenance of the works; the increase above the outlay of the year 1875-76 is due to the Soane Canals which will commence to irrigate regularly for the first time.

55. In the North Western Provinces under the head of Capital, Rs. 32,000 are provided for drainage and protective works on the Ganges Canal; for rectifications on the Eastern Jumna Canal the grant is Rs. 1,21,500, and for two of the Rohilkhund Canals, the Kailas and Kitcha, which will probably be completed during the year, Rs. 1,22,450.

The grant for current expenses is distributed among seven series of works. It amounts to Rs. 14,25,850 against Rs. 13,31,950 in the year 1875-76; the increase being mainly due to the development of irrigation on the new Agra Canal, and to a portion of the cost of renewals of two of the old locks on the Ganges Canal, amounting to Rs. 99,100, being charged to Maintenance.

56. In the Punjab, Capital outlay is provided as follows:—Rs. 47,500 for completing a canal in the Bunnoo Valley, the unfinished works of which were purchased from a native gentleman of Esakheyl, who was unable to complete them, for Rs. 33,338. For distributaries from one of the Sutlej Inundation Canals which will be nearly completed during the year, the grant is Rs 11,710; and for the completion of surveys and irrigation projects in the Derajat, Lower Baree, and Rechna Doabs, which have been in progress for some years, Rs. 1,00,000 is provided. The grant for current expenses is Rs. 13,60,473 against Rs. 11,46,222 in the year 1875-76, distributed among seven series of works. The large increase is mainly due to the outlay necessary for the repairs of extensive injuries to the works on the Baree Doab, Upper Sutlej and Western Jumna Canals by the extraordinary floods in August and September 1875; the fall of rain in the Baree Doab on one occasion was 23 inches in about 36 hours, and this extended over a very large area.

57. The grants for British Burmah, under both Capital and Revenue, will be expended on construction of maintenance and embankments along the River Irrawaddy and its effluents. These works, though no direct returns from them are shown, have been most successful in the reclamation of large areas of land and protection of cultivation from the river inundations.

58. In Rajpootana the greater portion of the Capital grant, amounting to Rs. 78,000, is provided for the completion of the Jalea reservoir, one of the new storage works which has been in progress the last few years, another, the Rajaosie, for which the grant is Rs. 1,250, will also be completed during the year. The maintenance grant provides Rs. 47,740 for the old tanks, of which there are a large number in the Province. For three of the new reservoirs, the Bheer, Bulad and Rajaosie lately brought into operation, the aggregate grant is Rs. 5,524. All the irrigation works in the Province are storage reservoirs, dependent for their supply upon the local rain-fall.

59. The aggregate Capital outlay on Irrigation Works throughout India up to the end of the year 1874-75 as booked in the registers of the Public Works Department amounts to Rs. 15,04,77,970 (*a*). Of this, the expenditure shown for Madras and Bombay, aggregating Rs. 3,46,47,220, is not absolutely correct, their accounts not having been yet completely adjusted; the expenditure in Burmah, Rs. 22,74,870, has been altogether on flood embankments and protective works; the works in Oudh and the Central Provinces, on which the outlay has been Rs. 7,83,840, have been abandoned. In Rajpootana the outlay, Rs. 11,26,980, which includes expenditure on old works, is as nearly correct as it is possible now to make it. In the three Provinces of Lower Bengal, North-West and the Punjab, the aggregate outlay was Rs. 11,16,45,060, and in these only can a comparison be usefully made of expenditure and returns.

	Rs.
(*a*) Madras	1,77,37,550
Bombay	1,69,09,670
Burmah	22,74,870
Rajpootana	11,26,980
Oudh	4,41,250
Central Provinces	3,42,590
Bengal	3,65,13,220
North Western Provinces ...	4,53,56,900
Punjab	2,97,74,940
	15,04,77,970

60. The gross direct revenue for the year 1875-76 is estimated at Rs. 52,89,000, of which Rs. 50,37,400 are derived from the three above-named Provinces, the bulk of it being collected on the nine series of works of which the Capital debit at end of 1874-75, and the revenue and working expenses as computed up to the end of 1875-76, are shown in the margin.

	Capital outlay at end of 1874-75.	Revenue. Direct.	Revenue. Indirect.	Total.	Working expenses.	Net profit.	Percentage of net profit on Capital at end of 1874-75.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa ...	1,55,19,500	43,000	...	43,000	2,15,323	—1,72,323	—1·11
Midnapoor ...	61,30,400	1,50,000	...	1,50,000	1,74,113	—24,113	—0·39

Soane ...	1,26,21,740	60,000	...	60,000	1,18,923	—58,923	—0·47
Ganges ..	2,76,77,210	21,70,100	5,61,000	27,31,100	10,48,924	16,82,176	6·08
Eastern Jumna ..	21,94,690	6,15,300	2,21,000	8,36,300	2,16,428	6,19,872	28·24
Agra ..	64,48,640	47,300	...	47,300	91,321	—44,021	—0·68
Western Jumna ...	38,11,510	10,50,000	3,72,000	14,22,000	4,00,000	10,22,000	26·82
Baree Doab ..	1,41,27,800	7,11,850	2,00,000	9,11,850	3,50,000	5,61,850	3·97
	9,03,29,680	48,91,550	13,54,000	62,45,550	26,45,102	36,00,448	3·98

The gross direct revenue expected amounts to Rs. 48,91,550 and the working expenses to Rs. 26,45,102, leaving a net profit of 2·48 per cent. on the outlay; and adding the indirect return, or portion of land revenue due to the works, the total net profit will be Rs. 36,00,448 or 3·98 per cent. The aggregate profits from the large works are less than for some years previously owing to the inclusion in the Capital account of the outlay on two new series of works, the Soane and Agra Canals, which yield revenue for the first time, while their current expenses are necessarily large compared with the revenue, which could not be expected to be very considerable in the first year of their working existence.

In paragraph 13 a general view of the return expected in the Budget-Estimate for 1876-77 has already been given.

61. The revenue from the Agra Canal, however, is very largely in excess of what was anticipated; cultivators everywhere seem eager for the water, although the rates levied on this canal are higher than on any other similar work in Northern India; altogether the prospects of a rapid development of the irrigation are hopeful.

On the Soane Canals a much larger return would have been obtained had the works been ready for the issue of the water, but it has been explained elsewhere that irrigation was given this year only under the pressure of apprehended scarcity on account of the failure of rain in September last. It is expected that regular irrigation may commence for the autumn crop of 1876-77.

The development of the irrigation on the Orissa Canals is still very slow. The completion of direct navigable communication from Cuttack to False Point harbor and the port of Chandballee will, it is hoped, tend to increase cultivation in Orissa by facilitating the export of produce.

The working expenses of both the Punjab series of canals were exceptionally heavy, especially on the Baree Doab Canal, owing to emergent repairs consequent on the damage from the floods of August and September last. The new masonry weir across the Ravee at the heads of the latter canal was breached so extensively that it was necessary again to have recourse to temporary bunds to keep up the canal supply during the last winter season. The repairs however have been vigorously pushed on, and the dam is expected to be in working order again before the floods of next rainy season.

On the Ganges Canal the financial results are eminently satisfactory, and are likely to improve still further.

62. On a portion of the outlay on the works of the Madras Irrigation and Canal Company, amounting to Rs. 99,96,960, the guaranteed interest payable annually by the State is Rs. 4,99,830 in addition to which the annual deficit, or difference between the working expenses and the revenue is now and has been for some years also paid by Government; this for the current year is computed at Rs. 1,67,000, for 1876-77 at Rs. 80,000. Land is also given free under the terms of the agreement, and there is an annual expenditure on account of State control; these two items are estimated for 1876-77 at Rs. 10,500. The development of the irrigation and consequent growth of revenue on these works has hitherto been very slow.

		1875-76. Rs.	1876-77. Rs.
Receipts	...	45,000	75,000
Expenses	...	2,12,000	1,55,000
		1,67,000	80,000

63. In Mysore the funds for the Irrigation Works are provided altogether from the revenue of that State; the work to be done is almost all in restoring the old series of tanks and channels which had fallen into a very general state of disrepair, and on these works depends mainly the cultivation throughout Mysore. Of tanks upwards of 37,000 have been registered, and the list is still incomplete. For restoration and improvements of tanks and channels from rivers Rs. 8,33,847 is provided for 1876-77, and for current expenses on works in operation Rs. 2,46,153, making a total of Rs. 10,80,000 against a computed outlay to end of year 1875-76 of Rs. 8,97,000. The returns from these works are included in the land revenue.

STATE RAILWAYS.

EXTRAORDINARY.

64. The total amount of contemplated capital outlay under this head for State Railways during 1876-77 is £2,850,000, of which £2,120,000 will be spent in India, and the balance £730,000 in England in the purchase of stores. These amounts have been fixed after careful consideration of the circumstances and wants of each Railway, and with the view of pushing forward to completion first those Railways already nearly finished, on which the earnings will most quickly afford remuneration for outlay, and next those of which the completion is for other reasons important.

65. The Rajpootana Railway has realized in 1875-76 Rs. 20,37,550 gross traffic earnings. The amounts now estimated for as capital outlay are for the completion of its workshops at Ajmere, staff quarters and the station at Agra, and will practically complete the line. This Railway, 402 miles in length, consists of single lines on the metre gauge from Delhi and Agra which unite at Bandikui, and thence goes on to Ajmere and Nasirabad. The whole of this extensive system of Railways, which has opened up a country hitherto without communications, except unbridged roads of the rudest kind, has been completed for traffic within 5 years from the date on which it was commenced and at a cost of something less than 2½ millions sterling. The authority of the Secretary of State is now awaited to a project to extend the Railway from Ajmere through Marwar to Ahmedabad in the Presidency of Bombay and on sanction being received will be proceeded with as means become available by the completion of other projects.

66. The Holkar State Railway also on the metre gauge, is 85½ miles long, and is estimated to cost £1,150,000. Its greater mileage cost is due to the

expensive character of the works required to bridge the Nerbudda, and to effect the ascent of the Vindhya Range in order to reach the plateau of Central India. The capital expenditure now estimated for the Holkar line will put the Railway in a position to be opened for traffic from end to end with the exception of the Ghaut Section from Choral Chowki to Mhow, and the Nerbudda Bridge, both of which should be opened early in the succeeding year.

67. The Wardha Valley Railway will be completed, with the exception of the bridge over the Wanna, during the year 1876-77, 18 miles being already open, a length of 23 miles being nearly finished, and the remaining 5 miles to Warora well advanced. The chief object of this line is to supply cheap coal to the Great Indian Peninsula Railway Company. It has been made on the broad gauge, and it is proposed that that Company shall work it under an agreement. When finished it is estimated to cost £400,000.

68. It was finally decided in July 1874 that the Punjab Northern Railway should be constructed on the broad gauge. In the meantime the works on the metre gauge on the Grand Trunk Road were so far advanced, and the bridge over the Ravi completed, that in April 1875 the line was opened for traffic from Lahore to Wuzirabad, 62 miles. A further opening of 40 miles of the temporary narrow gauge line is anticipated during 1876-77, and the conversion throughout to broad gauge from Lahore to Jhelum, 103 miles, will also be completed during the year. The aggregate length of the 3 bridges over the Ravi, Chenab and Jhelum is nearly 3½ miles, and the aggregate cost of them about a million sterling.

69. On the Indus Valley Railway it is expected that 150 miles will be opened for traffic during the year 1876-77, *viz.*, from Mooltan to Lodhran, 53½ miles, at the north end, and from Kotree to Sehwan, 96 miles, at the south end. The chief works on this line are the bridges over the Sutlej and Indus. Besides these, however, are the heavy works required to protect the line from the exceptional floods to which these great rivers are liable. To one of these exceptional floods (a similar one it is said was experienced 50 years ago) the line was subjected in August of last year from the spill of the Sutlej, and about 50 miles of the embankments and works were more or less damaged. The question of the best mode of overcoming the difficulties attaching to these flood incursions is now undergoing careful investigation. Whether the short sections of this Railway which are expected to be opened for traffic during the year 1876-77 should be worked by the State or by the agency of the Sindh, Punjab and Delhi Railway Company has occupied the attention of the Government, and is not yet settled. The gauge of this Railway like that of the Punjab Northern was changed from metre to broad, and though this has caused some extra expense, it will not materially delay the construction of the works which are being pushed on to completion as rapidly as possible.

70. The Northern Bengal Railway from Sara on the banks of the Ganges to a point at the foot of the Darjiling Hills, 205¾ miles, is well on to completion. It is expected that a section of 75 miles will be opened for traffic during 1876-77, and the remainder of the line in the following year. Arrangements are being made for a steam-ferry over the Ganges and for the construction of a Railway about 13 miles in length from Poroda on the Eastern Bengal Railway to Damookdia opposite Sara. The Northern Bengal Railway is on the metre gauge, but the short section from Poroda to Damookdia south of the Ganges will be on the broad gauge, as the break of gauge will necessarily with the least inconvenience take place at the crossing of the river.

71. The Neemuch State Railway, the total length of which is 302½ miles from Indore to Nasirabad, is under construction at present only throughout its first section from Indore to Rutlam, 85 miles. The portion of it from Indore to Oojein, 35½ miles, is to be opened during 1876-77, and the remainder, 49½ miles, to Rutlam by December 1877. The section from Rutlam to Neemuch, 93⅛ miles, will then be proceeded with. The section from Neemuch to Nasirabad,

134 miles, will then only remain to connect Central India by the shortest line with Delhi and Northern India.

72. The Rangoon and Irrawaddy Valley metre gauge Railway is from Rangoon to Prome, 161 miles. This project was sanctioned in September 1874, and is expected to be opened throughout in June 1877. During 1876-77 a length of 50 miles can be opened after the rains at the Rangoon end of the line.

73. The Sindia Railway intended to connect Agra with Gwalior is a broad gauge line, 72 miles long, the principal work on which will be a large bridge over the River Chumbul. This Railway has only just been commenced, the contract for its construction having been recently given to Messrs. Glover and Co. of Bombay.

74. The Tirhoot Railway was closed for traffic from the 12th June to the 1st November 1875, and it is expected to be kept permanently open henceforward. But some work has still to be done in making portions permanent, in altering the alignment of a part, and in the construction of a branch from Somastipur to Mozafarpur. It is expected that this Railway, the total length of which, as at present under construction, is 71 miles, will be completed during 1876-77.

75. It is thus anticipated that, during the year 1876-77, 424 miles of Railway will be added to the length of State lines open for traffic, and a further length of 325 miles be so far advanced as to be opened early in the succeeding year.

Ordinary.

76. The net earnings for the year 1876-77 are estimated to reach a sum of £142,000, or about 75 per cent. in excess of those of the year just past.

The estimates have been cautiously made, and there is every reason to believe they will be reached.

It will be observed that both the Calcutta and South-Eastern and Nulhatee State Railways are expected to be worked at a loss, owing to expenditure in India and England on rolling-stock and sleepers.

The traffic on the Rajpootana State Railway has grown so rapidly that, having in view the additional rolling-stock, of which it has stood greatly in want, and which has been furnished, the increased estimate of net earnings appears fully justifiable.

For a similar reason, and in consideration of abnormally high working expenses during the past year owing to heavy charges for demurrage and compensation, a considerable increase in the net revenue of the Holkar Railway is anticipated.

On the other Railways the increase of open mileage is expected to yield the net earnings estimated.

Surveys.

77. The expenditure on these is to be met from Ordinary funds.

The object of the Tirhoot Survey is to investigate and estimate for the construction of a Railway to connect Tirhoot and Northern Behar with the Northern Bengal Railway at some point between Rungpore and Julpigoree.

This, with the extension also under survey towards Goalpara and Gowhatty in Assam, will connect populous tracts with regions in Assam greatly in want of development by labor.

The Establishment for the Western Rajpootana Survey is maintained to make petty improvements such as may be found necessary in the alignment of the projected Railway, for the construction of which the authority of the Secretary of State has been asked.

The small expenditure on account of the Hooblee and Carwar Survey is merely for the purpose of keeping down jungle, so as to secure the work already accomplished in the survey for that line, and to be ready to take up the project at any moment.

For the further development of the Province of British Burmah, surveys are to be prosecuted for Railways from Rangoon to Sittang and Toungoo, and from Prome to Allanmyo opposite Thyetmyo.

It is intended to push on to completion the Railway from Jhelum to Rawalpindee, and surveys for the extension thence to Attock have already been put in hand, and will be continued during the ensuing year.

78. It is considered desirable to revive the project for a chord line of Railway to connect the North-Eastern and South-Eastern extensions of the Great Indian Peninsula Railway, east of and above the Ghauts; and provision has been made to survey the line between Dhoond and Munmar in order to the preparation of complete estimates. Besides securing the traffic with Bombay from being interrupted by an accident to either the Thull or Bhore Ghaut incline of the Great Indian Peninsula Railway the construction of a chord line between Munmar and Dhoond will cheapen the cost of coal supplied from the Wurrora Collieries to the railways south of Poona, and enable it to be used with economy to some extent even on the Railways in the Presidency of Madras.

79. A project for a Railway from Nagpore to Chutteesghur has for some years been under the consideration of Government, and has lately been submitted for the orders of the Secretary of State. An extension thence eastward through Raipore, Bilaspore and Korba to Ranchi, and on to Raneegunge, or some other suitable point on the East Indian Railway will be made the subject of investigation when survey parties are available.

GUARANTEED RAILWAYS.

Land and Control.

80. The amounts budgetted for under Land show a considerable decrease as compared with the Budget for 1875-76, except in the cases of Bengal and Oudh.

The small increase in Bengal is for compensation for lands taken up on the East Indian and Eastern Bengal Railways to the extent of Rs. 22,000, and a further provision of Rs. 15,000 is made for compensation for lands which may have to be taken up during the year. The remainder of the increase is to meet the running requirements of the Oudh and Rohilkhund Company, for which Rs. 1,10,000 is required.

The amounts under control which represent the cost of the establishments of the Consulting Engineers and Government Examiners show a decrease in every case but Madras, where there is a small increase of Rs. 5,500.

Capital Budget-Estimates.

81. These show in all cases, except those of the South Indian and Oudh and Rohilkhund Railways, on which considerable construction works are still in progress, credit balances, or, in other words, that the payments to Government to the credit of Capital will exceed the withdrawals. The Secretary of State has been asked to authorize the construction of a Branch Railway from Moradabad to Ramnuggur by the Oudh and Rohilkhund Railway Company as part of the Railways provided for in their contract, and surveys are in progress for a proposed extension from Moradabad to a junction with the Sindh, Punjab and Delhi Railway at or near Saharunpore.

Revenue Budget-Estimates.

82. In the year 1876-77, it is anticipated that the results will be more favorable than in the year just expired, which has been marked during its passage by much depression in trade at various periods. The late and short crop of cotton in Bombay has seriously affected the traffic receipts of the Great Indian Peninsula, which in other points justified the anticipation of more favorable results. The depression in the jute trade has similarly affected the receipts of the Eastern Bengal Railway, which, however, now show signs of improvement.

The Jubbulpoor Line forming the link between the East Indian Railway Main Line and the Great Indian Peninsula Railway, has felt the depression which has told to a certain extent on both its neighbours.

83. The traffic of the Madras Line was very seriously diminished by the extensive breaks upon its line from various bridges having given way in consequence of heavy floods and inundations in the early part of the official year 1875-76. These breaks have been repaired. The carriage of large quantities of laterite and stone for the harbour works in the Madras roads will to a certain extent improve the revenue of the Company.

The attention of the Madras Government has also been recently given to the best steps to be taken to improve the traffic of the Madras Railway, and it is hoped that a more satisfactory revenue will be the result.

The net receipts of the South Indian Railway were considerably under the anticipated amount, due entirely, it may be said, to the fact of a shorter length of line than was expected having been opened during a sufficient period of the year to have any important effect upon the earnings. This disappointment is due to the difficulty in obtaining labor in that part of the country. The supply is limited, and the ordinary pay of laborers does not appear a sufficient inducement to a comparatively well-to-do and contented people. A considerable length of line, however, 215 miles, has been opened on this Railway during the year, 97 in September 1875, and 118 in January 1876, and the increase of traffic during the later weeks of the year justifies favorable anticipations of the future of this Railway.

84. The progress of the traffic on the Bombay and Baroda Railway has been steady, and it may be hoped will continue so. The Western Rajputana Railway projected to connect Ajmir with Ahmedabad may be expected to bring a large accession of traffic to this line.

85. The traffic of the Sindh, Punjab and Delhi Railway shows prospects of improvement. The actual receipts of the Railway earned from passenger and goods traffic were in excess of the estimated amount, but not to the full extent shown in the Regular Estimate for the year 1875-76. Of the large increase of 46½ lakhs shown in the net receipts over the Budget-Estimate, 36½ lakhs are due to a transfer from Revenue to Capital of certain charges on account of reconstruction of the line broken up by floods in 1871 and 1872, these having been previously charged to Revenue. The remaining 10 lakhs represent actual increase of traffic.

86. The general result of the Public Works Budget for 1876-77 is an estimated improvment, or, in other words, a decrease in the burden to the State of guaranteed interest of £328,458 as compared with the Budget-Estimate, and of £119,128 as compared with the Regular Estimate of 1875-76.

ORDER.—Ordered that this Resolution be published as a Supplement to the *Gazette of India*.

C. H. DICKENS, Colonel, R. A.,
Secy. to the Govt. of India.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

WARORA COLLIERY WORKS AND THE CHANDA COAL AND IRON MINES.

Nos. 914—16 R., dated Fort William, the 3rd April 1876.

Read—

Letter from Secretary to the Chief Commissioner, Central Provinces, No. 705, dated 28th January 1876, forwarding copy of a Minute by the Chief Commissioner on the Warora Colliery Works, and the Chanda Coal and Iron Mines.

Letters from ditto, Nos. 1203 and 1218, dated the 24th February 1876.

OBSERVATIONS.—The Government of India have perused with interest the Minute by the Chief Commissioner of the Central Provinces. Suggestions are made as to the provision of coal-cutting machinery for the Warora Colliery Works estimated to cost £2,500, and certain experiments are recommended to be made in England with the raw material coal, iron ore and limestone found in the Chanda District of the Central Provinces.

RESOLUTION.—The Chief Commissioner may direct the preparation and submission of an indent for sanction of the proposed coal-cutting machinery, but the Government of India desire that the attempt to carry out this industry by laborers should not be abandoned without a further effort. It is thought that some of the difficulty hitherto experienced in procuring workmen may be removed by the completion of the Wardah Valley Railway. Inducements should be held out to laborers to settle near the coal mines by offering them facilities for building huts and by permission to occupy land rent-free; also an experiment should be made of inducing head-men to bring gangs to work under them.

A definite proposal of the quantities of each kind of the raw material, which it is considered desirable to send to England for the purpose of experi-

ment, should be reported by the Local Administration, and an estimate of all expenses should be submitted for the sanction of the Government of India, including freight to port of despatch and freight to England.

The reduction of the expensive staff now employed at the mines is desirable, and the subject should receive careful consideration.

ORDER.—Ordered, that this Resolution be communicated to the Chief Commissioner, Central Provinces, for information and guidance.

Also that a copy, together with a copy of the letter and Minute by the Chief Commissioner, Central Provinces, be communicated to the Revenue, Agriculture and Commerce Department for information.

Ordered also, that a copy of these papers be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

H. DRUMMOND, *Col., R.E.*,
Deputy Secretary.

No. 705, dated the 28th January 1876.

From—T. W. ARMSTRONG, Esq., Secy. to Chief Commr., Central Provinces, P. W. Dept.
To—The Secretary to the Government of India, PUBLIC WORKS DEPT.

WARORA COLLIERY AND CHANDA COAL AND IRON MINES.

In continuation more particularly of paras. 1 to 9 of Central Provinces' letter No. 8206 of the 31st ultimo, and with reference also to Central Provinces' No. 6158, dated 22nd September 1875, I am directed to forward herewith a Minute by the Chief Commissioner on the Warora Colliery Works and the Chanda Coal and Iron Mines, with two enclosures.*

* Appendix A.
Appendix B.

2. Mr. Morris solicits that early orders may issue on the concluding part of para. 10 of his Minute, the proposals therein made being of great importance as regards the manufacture of iron at Warora from local fuel.

Minute by the Chief Commissioner on the Warora Colliery Works and the Chanda Coal and Iron Mines.

Having lately visited Warora, and spent several days there in inspecting the Colliery works and discussing matters relating to them with Mr. Ness, the Mining Engineer, and with the Chief Engineer, I think it may be of interest to the Government of India, and of use for future guidance, if I record my opinion on the works, and state shortly their prospects and how they should be in future managed. I shall also take this opportunity of making some remarks on the cognate subject of iron industry in the Chanda District, and submit such suggestions as occur to me, which may, I think, enable Government to deal with the question now in discussion before them, as to how the iron industry should be developed, whether by direct Government agency, or whether by Companies or Associations, aided to a greater or less degree by Government.

Preliminary Remarks.

2. The external aspect of Warora is much changed from what it was a few years back. It was then a mere village, only distinguished from villages of an equal population and importance by its being the Head Quarters of a Tahsil, and possessing a Dâk Bungalow for the convenience of travellers from Nagpur to Chanda and Sironcha. The road connecting Nagpur and Chanda, though known as the Great Southern Road, was neither metalled nor bridged, and for weeks during the rains Warora was more or less isolated, and a journey to or from it attended with much inconvenience. Now all this is altered. The Sections of the Great Southern Road from Warora to Chanda are metalled, while material lorries and even goods trains can run to Dahigaon, five miles on the Hinganghat side of Warora, and the Railway to Warora itself will be open in the course of two or three months. Thus Warora is easily accessible both from Nagpur and from Chanda, and this alone is a great change; but the town or village itself has undergone a greater transformation. The old portion has been left pretty much as it was, but at different parts there are excrescences in the shape of clusters of huts, some of these clusters being inhabited by men employed on the works of the Warora Extension Railway, and others by workmen employed on the Colliery. But the great feature which has changed Warora are the buildings occupied by European employés, and by the pit itself with its work-shops, machinery, and out-houses.

Aspect of Warora.

3. There are at present two pits, and without actual inspection of them it is hard to realise the difficulties which there have been to contend against, and the amount of work done to overcome them. Although to a professional man the written reports and papers which have from time to time been submitted may have indicated clearly and precisely enough

The pit.

the amount and kind of labour done at Warora, I must say that the actual sight and examination of the works has impressed me very favorably in regard to the amount of energy and work which have been required and given to bring matters into the position in which at present they are. That there have been delays and disappointments is perfectly true, and these have been chiefly due to the want of proper machinery, the absence of skilled or intelligent labour, and the length of time wasted in the conveyance of heavy material along imperfect country roads. This last cause of delay has been removed, and the first will, I hope, not be again felt. The labour difficulty is, however, one which it is more difficult to deal with, and I shall have to refer to it again.

4. The small sketch appended shows whence the coal is now actually raised, and whence it will be got when the works get more advanced. Hitherto the coal has been raised from the galleries connecting the pumping and the winding shafts, and the total amount of coal so raised has been about 1,200 tons of all kinds. With the exception of some 50 or 60 tons sent for trial to the Great Indian Peninsula Railway, all this coal has been consumed at the works. At the time of my visit the daily yield was about 10 tons, 5 of which were consumed on the works.

Coal now raised.

5. The quantity of coal extracted depends mainly on the number of working places under ground. Of these there are at present only 8, but by the end of January (the present month) the Mining Engineer calculates on having 14, and 20 by the end of February. In fact, the number of places will be increased in a ratio proportionate to the extensions of working, and with more places at which work can be done more men will be employed under ground and a greater outturn of coal given. Another element which must be considered when estimating the yield, is the greater experience and skill which these under-ground workers will gain; at present they are learners, but shortly having attained experience they will be more efficient.

Probable increased yield.

6. The Mining Engineer very confidently expects that Seam No. 2, which is 15 feet in thickness, is well adapted to what is termed "Long wall work," in distinction to the "Pillar and Stall work." The advantage of the former kind of work is two-fold; in the first place it will very materially (by $\frac{1}{3}$rd) reduce the skilled or pickmens' labour, and in the second place by adopting it, *large* coal, as distinguished from *small* coal, will be got. Important as the first of these advantages is, *viz.*, the saving in skilled labour, it seems to me altogether dwarfed by the second, and I presume that in this matter the opinion of the Mining Engineer may be accepted. What he says is, that if 100 men produce 10 tons of coal and 8 tons of "Slack," or small coal, per day, by the "Pillar and Stall system," the same number of men will by "Long wall work" produce 18 tons of coal and only 2 to $2\frac{1}{2}$ tons of small coal ("Slack") for the same physical effort.

Method of working.

7. It will be perceived that if this opinion of the Mining Engineer is correct, then the question of the manufacture of patent fuel, important as it was considered at one time to be, has in a manner settled itself. The question was one of importance, because it was believed that No. 2 Seam of coal would be worked on a system that produces a large percentage of small coal, and that the coal being very friable would easily and with little exposure crumble. Under the proposed system of working the quantity of "Slack" or small coal will be so reduced in quantity, that it can for several years to come be entirely used up in the boilers and furnaces on the work. For the present, then, the patent fuel question may remain in abeyance.

The Patent Fuel Question.

8. I will now make some remarks on the "Labour Question." It is easy enough to state the difficulties which beset this question, but less easy to suggest a remedy for them. The difficulties, broadly stated, are two, the one that the supply of labourers is small; the other, that the labour procurable is inefficient. The first difficulty is one that in England or in European countries would be easily conquered, and the natural suggestion is, make the work more attractive in the way of pay, and it will attract sufficient men, while the second difficulty, it may be contended, is merely temporary, one for which time will bring the cure. To a certain limited extent, I can give my assent to both these propositions, and the only reason why they cannot be accepted as a complete remedy and solution of the question is because India is not England or Europe. Labourers find an easier, more familiar and more congenial employment in working as coolies on the Warora Railway works, than in working as coolies on the mines under ground. To work under ground is not only unfamiliar toil, but toil, the irksomeness and inconvenience of which, *real as these are*, are magnified by the unreasoning fear of danger, and higher wages do not suffice to attract workmen. The same difficulty was experienced at the Mohpani Coal Mine in the Narbada Valley, and the same difficulty at Warora is intensified, first, because the undertaking is a later one, the first of its kind in that part of the country; secondly, because work at Warora is much more below the surface, and more disagreeable owing to the constant influx of water. Again, the habits of Indian workmen are against *constant* work, however remunerative it may be. In fact, to all familiar with Indian experiences, the paradox must often have presented itself, that the remunerativeness of certain work is the very reason why it is not persevered in. This is the case at the Warora

The Labour Question.

mines. The coolies in a few months save up between 30 and 40 rupees, and they then leave for their native country, Rewah, Bundelkhand, or the North-West Provinces, there to spend their gains; precisely at the moment when they are really becoming useful, they leave the works. To enter into engagements, for a period of service, with such persons, would be useless; they have no stock in trade, and can flit in a single night leaving no trace behind them.

The charges for pumping machinery and establishments are about the same, whether the outturn of coal per diem is 10 tons, or 50 or 100, so that the question to be determined is, whether a further employment of machinery would not obviate the necessity of employing many coolies. As far as I am able to judge, I believe that the introduction of coal-cutting machinery is the best means to meet this difficulty of labour, and the additional advantage of the "Long wall" system of working, to which I have already referred, seems to be that coal-cutting by machinery is much more feasible by it than by the "Pillar and Stall" system. The coal-cutting machinery woud also use up much of the small coal or "Slack," and its introduction seems to hold out double hopes, both of rendering us independent in a great measure of cooly labour, and of enabling us to consume a considerable quantity of small coal, and thereby still further diminishing the quantity which might eventually have to be worked up into "Patent Fuel." Mr. Ness, the Mining Engineer, has some knowledge of coal-cutting machinery, and he should be required to submit estimates, &c., in full detail, showing how far its employment would be advantageous, what such machinery would cost, &c.

Present Establishment.

9. The present establishment at the work seems to be inordinately large, I mean the superior European establishment; and now that the works have all been erected and are in working order, I think the establishment may be susceptible of material reduction. A highly-paid pit foreman seems hardly required, and this seems to be borne out by the fact that this man was deputed on some work in the Narbada Valley for six months, and his absence not felt. The sub-engineer also seems rather superfluous, now that the machinery has been set up, and I am not sure that it was intended that he should be permanently employed at Warora. A blacksmith seems required, and on works at Warora there must always be plenty to occupy his time. A carpenter, however, on high pay is certainly a most unnecessary luxury. When I was at the works there was little or no carpentry work in hand, and only two or three native carpenters were employed.

I should like the Chief Engineer, in consultation with the Mining Engineer, to consider and report to me whether a pit foreman on Rs. 250 per mensem, a sub-engineer on the same pay, and a carpenter on Rs. 180 per mensem are required on the Warora works. If they are not, and if their services cannot be utilised elsewhere in the Central Provinces, the matter should be placed before Government, with such particulars as regards the qualifications, antecedents and covenants of these men, as may enable Government to determine whether they can be profitably employed elsewhere in India, or whether they should be settled with, according to the terms of their written agreements.

Experiments with Iron ore at Warora.

10. As is known to Government some experiments in Iron ore manufacture have been made at Warora. They were not successful, but the want of success was not such as to indicate that this branch of industry cannot be successfully prosecuted in Chanda.* The conditions under which the experiments were made were unfavorable, and no more.

The experiments were carried on on the blast furnace principle, and they showed that the Iron Ore and Coal would not properly combine with each other in the furnace. The cause of this was in the Coal not in the Iron. The Iron was of excellent quality, and contained a very small proportion, only 4 or 5 per cent., of impurities; whereas the Coal contained about 30 per cent. I understand that in England the whole percentage of impurities is about 32½ per cent., which is nearly the same as at Warora; but the difference is that in England the impurity is pretty equally distributed between the Iron and Coal, whereas at Warora the impurities in Coal greatly preponderated, and the amount of heat necessary to fusion was not brought to bear on the Iron Ore.

The Iron made from this experiment was of fine quality, and no difficulty was experienced in working it in the blacksmith's forge into wrought iron, and samples of this wrought iron were shown to me at my inspection.

The experiment would probably prove more successful if the Iron and Coal were burned in separate chambers, and some direct methods of working have, I am told, recently been introduced into England. I would however not recommend the prosecution of further experiments of a similar kind at Warora, but am in favour of sending full working samples of *all* our raw materials to England, with full particulars. The Secretary of State could then have experiments of different kinds made under professional superintendence, and on the result of these experiments would depend our future action at Warora, and in the Chanda District generally, with reference to the manufacture of Iron.

* Copies of the Mining Engineer's reports, No. 838, dated 12th October 1875, and No. 872, dated 22nd October 1875, giving full details, will be found annexed, Appendix A.

The Iron industry in the Chanda District.

11. This brings me to the general question of the Iron industry in the Chanda District, and in the letter No. 96, dated 21st September, from the Government of India, Department of Revenue, Agriculture, and Commerce, I am asked, "regarding the mining of Coal and "the mining and smelting of Iron in the Chanda District, and the importance of stimulating "this particular industry in the Central Provinces," to suggest, "the terms on which leases "for working the Mines should be offered to the public." On this point, I would ask a reference to my letter No. 7868, dated 3rd December 1874, to the Secretary, Government of India, Department of Revenue, Agriculture, and Commerce, and more specially to its 6th paragraph,* and I would further remark as follows.

I take leave to doubt whether even Government, certainly whether the public, are sufficiently aware of the exact circumstance of the Iron and Coal questions of Chanda, and in writing thus, I do not refer to sufficient exploration and data, but to actual existing ones. Iron and Coal are coupled together as if they existed together in close proximity, and though distance is only comparative, and in England 50 miles would be but a small obstacle, such a distance would be found, and is found, a very serious drawback in India. Now Coal has been ascertained to exist in sufficient quantity at two places in the Chanda District, *viz.*, at Warora and at Bandar; Iron at three *viz.*, at Pipalgaon, Lohara, and Ratnapur, and the sketch map, which I append, shows the exact position of these localities, and the alternative lines of Railway which have been surveyed or remain to be surveyed. Now if the Lohara Iron is to be worked, and it is the best, there is the initial need for a line of Railway either to Warora or to Bandar, and thence to Hinganghat. The more direct route to Warora which has not yet been surveyed is 53 miles, the other 66 miles possesses the advantages of connecting Pipalgaon, where Iron is found, and Bandar, where there is Coal. Whichever line is necessary, the expenditure on a Railway would probably at the lowest calculation not fall very far short of a quarter of a million pounds sterling. Now the Government of India may have more information on the subject than I have, but as far as I am aware, no Company nor any individual intending to raise a Company, has ever made either local enquiries in the Chanda District on the subject, or has asked me or the Chief Engineer for such information and details as we at present could give. And it seems to me that Government would be wrong to encourage any Company to enter into any undertaking in a hap-hazard, rash, speculating manner, for the encouragement given at the outset to such a Company would of course be made the occasion for demands for all sorts of concessions in the future. The fact that one Company has made to Government an application for mining concessions proves only that the Company is alive to the circumstance that Government has a valuable property in its Chanda Iron and Coal Mines, but it cannot be safely inferred that the said Company is able to work the Mines. Looking to the great expense to which Government has already been as regards *Coal* at *Warora*, I am very decidedly of opinion that it would be most unwise in Government to make over to any Company the Coal-fields there. These it should now maintain and work as a State property. All the Coal that can be raised from these can be consumed on Government Railways (State or Guaranteed), and it would be very imprudent in Government to make over this property to a Company, and place themselves in the position of mere customers of the Company.

The position as to Iron is different. No expense of any real consequence has been as yet incurred, no machinery ordered out, and no European labour imported, so that, as regards Iron mining, Government is not at present embarrassed with the question of heavy preliminary expenses. At the same time the arguments why Government should maintain in its own hands its whole property in the Chanda Mines are very weighty. As far as we know, Iron and Coal are the only very important minerals which the Chanda District possesses, and they are things in which there is comparatively little private trade, or indeed none. For both, Government is the only consumer of importance; exclude the wants of our Railways and of the Department Public Works, and I fancy no Company would be rash enough to propose to itself starting Iron or Coal works in Chanda. The question then is whether Government shall supply itself with Coal and Iron from its own Mines, or shall abandon these properties to Companies, and then purchase from them what is required. The greatest argument against leasing these properties is, that if Government lease them, they abandon all chance of greatly cheapening the cost of maintaining and working Railways, and of constructing Public Works generally.

But by retaining, in their own hands, the Warora Coal Mines, Government will secure for themselves sufficient Coal to supply all the wants of this part of India, and it will always be possible for Government to regulate directly the price of Coal, and indirectly the price of Iron. It is under these circumstances possible for Government to leave the development of the Iron industry to Companies. The point on which I should insist would be, that these Companies should only exercise mining privileges over small tracts of country, and should not have roving indefinite rights. The Warora Coal bed is but a small tract of country, yet sufficient for the wants of many years, and Companies should be restricted to equally small and defined areas, and competition should thus be called into play, and everything tending to monopoly be avoided.

I would accordingly invite Companies to make applications for working Iron over *definite* areas in the Chanda District, and for working Coal at Bandar, or elsewhere, *other than Warora*; and to stimulate the development of this trade by Companies, I would recommend that the

* Copy annexed, Appendix B, for facility of reference.

lines of Railway necessary should be constructed by Government. It seems to me that whether the Railway carries minerals dug out by Government or by Companies, it is equally remunerative, and the object in constructing it equally obtained, and the expense in constructing a Railway to the Iron and Coal Mines would probably be too great for any private Company. The construction by Government of such Railway or Railways would also do away with the necessity for deferring the levy of a Government royalty for a long period.

I think, then, that Government might invite applications for Iron-mining over defined tracts, and for Coal-mining, elsewhere than Warora; and I would propose that Government should take a certain royalty on all manufactured Iron, and on all Coal not used in manufacturing the Iron. Leases containing conditions as to the amount of Iron to be manufactured within a given time, &c., should, I think, be for a definite period, not exceeding say 30 years, and provision should be made for Government resuming the lease on its expiration, taking over buildings, machinery, &c., on an equitable valuation.

The foregoing are, I think, the broad terms on which Government should invite applications. The subsidiary rights to be conceded to Companies, as to quarrying stone or getting wood for building purposes, acquiring land for the same, &c., would have to be determined on a consideration of the locality where the Company proposed to start works; and intending Companies would quite understand that in proposing to lease the larger right of mining, Government was prepared to make the other minor concessions requisite for such a purpose.

I think that Government should not act with too much haste, and should beware of going to the extreme, and unduly stimulating Companies, by granting concessions and privileges, the extent and nature of which are not clearly apprehended, either by the Company or by Government.

APPENDIX A

To Minute by Chief Commissioner of the Warora Colliery Works, and the Chanda Coal and Iron Mines.

No. 838, dated the 12th October 1875.

From—W. Ness, Esq., Mining Engineer, Warora Colliery Division,
To—The Secretary to Chief Commissioner, Central Provinces, P. W. Dept.

REPORT ON THE EXPERIMENT OF IRON.

In reply to your No. 6393 of 6th instant, I have the honor to submit the following report, as requested, on the Iron experiment as conducted here up to date.

2. The course pursued was on the ordinary Blast Furnace principle, with a furnace 24 feet high from the charging place to the bottom of hearth, the hearth being 2½ feet diameter, the top of boshes 6½ feet, the throat 3 feet 9 inches and having 500 cubic feet internal capacity; it was blown with 3 tuyeres of 2 in. diameter each and having blowing power sufficient for supplying about 500 cubic feet of air per minute at a pressure up to 4 lbs. to the square inch; for further particulars of furnace see plan herewith sent.

3. The first trial was made from the 26th to the 28th of August. On the latter date, from the giving way of one of the tuyeres, and allowing water to get into the hearth, it got so cold, that the furnace had to be let out, at which time about 2 cwt. of Iron had been reduced and was afterwards taken out of the hearth in one solid piece. The second trial with this furnace was again commenced on the 21st and was closed on the 25th September 1875; with the exception of the giving way of one of the tuyeres in the first trial, the experiments were conducted in the same manner in both cases and were as follows.

4. The furnace after being thoroughly dried was filled for about ⅔ths of its capacity with rough dry timber and set fire to; on the top of this a few feet of charcoal was placed and then regular charges of Iron ore and Coal, &c., were made consisting of 1 cwt. Coal to ¼ cwt. of Lohara Iron ore, ¼ cwt. Rutnapur Iron ore, 20 lbs. limestone and an occasional blank charge of Coal or Charcoal, this course being continued till the furnace was full; in 24 hours after lighting the furnace the molten slag began to come down into the hearth, then blast was let on quietly and in 3 hours thereafter the slag made its appearance at the cinder notch, the pressure was increased to about 1½ lbs. per square inch on the 2nd day, during this time the slag formed and came off in larger quantities and the hearth quickly filled with spongy iron which would not liquify, seeing this I increased the blast and added more blank charges of Coal and kept on increasing the temperature of the hearth till I fused the fire bricks, the tymph plate and even the bottom of the hearth; still the Iron that had settled down was so mixed with the ashes of the Coal that it would not liquify and only kept accumulating till the Iron reached the top of the tuyeres and then a stop was put to all further proceedings till the mass was dug out, which is over a ton in weight.

5. My reason for taking the course I have just described being, generally, that in the aggregate the amount of foreign matter in many of the mixtures used in blast furnaces at home are not much less than is found in the mixture I expected to succeed with here, for example it is not unusual in England and elsewhere to find 5 per cent. of ash in the Coal and 15 per cent. of silicates in the Iron ores; when the quantity required of these two to make a ton of Iron are taken we have a total of 10 per cent. from Coal + 22½ from Iron ore, total 32½ per cent., whereas at Warora we have 30 per cent. from the Coal and about 5 per cent. from the Iron ore, or a total of 35 per cent. of foreign matter, besides what is found in the limestone used for a flux, which is similar in quantity in both cases. This excess of 2½ per cent. I fully expected to be overcome by part of the ash in the Coal acting as a flux, but in practice it has not, and what has added much to the non-success of the experiment is the tendency the Coal has on entering the furnace to decrepitate, and when it reaches the neighbourhood of the tuyeres impoverished, to retain part of its fixed carbon, and in this semicarbonized state is imbedded amongst the Iron in the hearth, although there is evidence of an excessive heat in the hearth from the fire bricks (which are of the best quality) being melted for 6 inches in the thickness of the lining; subsequent to these trials in the large furnace I erected an open hearth or catalan forge and endeavoured to reduce the ore in it; this I had no difficulty in doing, but from the abundance of ash from the Coal, the particles of Iron were kept separate, so that no quantity of Iron could be got to stick together. I thereafter in this furnace melted a quantity of the Iron from the large furnace and in bringing it to nature,* the same features were observed, the Iron would not *ball up* from the quantity of ash.

* To the state of wrought iron.

6. At this present time I am preparing a small reverberatory furnace to notice the intensity of the heat from the Coal without bringing it into contact with the ore, and if possible to refine some of the Iron already made.

7. This I shall be able to do in the next few days, and will send the result in continuation of this report. In the meantime it appears that the Coal has the *necessary heat* for reducing the ore if the ashes could be kept separate, and therefore there is reason for believing that some method by which this can be done will meet what is required in the case in question.

8. In a paper recently read by Mr. J. L. Bell before the Iron and Steel Institute of Great Britain, he describes an arrangement he visited in America as conducted by Mr. Blair, which appears to be of the kind required. I here give a quotation from the *Colliery Guardian*, dated 14th May 1875:—

9. "An establishment had been erected on the banks of the Monongahela river near Pittsburgh for carrying on the Blair process of making steel; in principle he says there is no novelty in Mr. Blair's method which consists of deoxidising ore and melting the Iron sponge so obtained in an open hearth with pig Iron. The first step in the process has been tried over and over again by Clay, Chenot and others, and Dr. Siemens has paid an immense amount of attention to the second. The consumption of charcoal and fuel was considerable, and did not seem to Mr. Bell to be a good substitute for the combined action of the blast and puddling furnaces. Mr. Blair claims great advantages for his apparatus in the saving of fuel. He then describes the process more fully in the following terms.

10. "Mr. Blair conducts the operation in an upright retort but circular in section, 4½ feet in diameter and 40 or 50 feet high. In the upper 8 or 10 feet however is inserted a metal pipe about 4½ feet in diameter, so that for this distance from the top the working space is an annulus 4½ inches across. Heat produced by burning carbonic oxide obtained from a Siemens producer is applied to the outside of the retort, and heat is similarly communicated to the inside of the 3½ feet pipe. Ore and charcoal are charged into the top of the annular space which is thus exposed to heat from the out and inside, instead of as with Chenot having the heat only applied to the exterior. The Sponge is retained by Mr. Blair, as with Chenot, in the lower portion of the pipe, which is kept closed until it cools. One such retort as that described gives about two tons of sponge in the twenty-four hours. The difficulty which besets this and all other modifications of dealing whith Iron, in so fine a state of division as it exists in Iron sponge, is its proneness to oxidation. Hitherto it seems to me, the direct process as it is termed has met with the most success at Landore. The pig Iron after being melted has blocks of ore thrown in; the carbon and silicon of the bath reduce the oxide and the metallic Iron is instantly taken up by the bath of liquid metal. Very different must be the action on sponge which when thrown into the furnace will float on the melted pig and being exposed to carbonic acid at a very high temperature will to some extent infallibly be reconverted into oxide. So far as I was able to learn two parts of pig Iron and one of sponge lost about 20 per cent in the furnace. Now if it be true, as I have heard stated, that a mixture of wrought and pig Iron can be fused in an open hearth with a loss of 6 per cent, it follows that a considerable portion of the sponge used in Mr. Blair's process must be reconverted or reoxidised. The specimens of Steel I had an opportunity of examining indicate entire success so far as a mere question of quality in the product is concerned. There seems to be no doubt that in obtaining the sponge Iron, Mr. Blair has made a notable step in advance of M. Chenot, and I am far from wishing it to be understood that I indicate an unfavourable opinion on the future commercial merits of the scheme."

11. In addition to the above, I have a communication from Mr. F. Bloomer, dated New York, 18th July 1874: "I have found a man out here who is making Iron direct from the ore; his whole process is very ingenious and very scientific; he simply deoxidises his ore, fluxes off the silica and gives you a bloom that will roll right away into a good bar in two processes. His apparatus is very simple, efficient and inexpensive. I am to have the use of it in England and so am going again to his place to try experiments and learn all the ins and outs thoroughly. He lives at Pittsburgh and has quite a large work of his own." I again hear from the same person after his arrival in England in a letter dated August 26th 1875, in which he says, he has succeeded in making Iron at Pelsall, Staffordshire, on the principle above described, and that it is quite successful and better Iron than has ever been made there before, because uncombined with silicon and carbon.

12. In reference to your paras. 2 & 3 of No. 6393 of 6th instant, I have not seen any other notes of Mr. J. Lowthian Bell's on the Coal and Iron Mines and Iron works in the United States than those referred to in extract herewith sent, but from these and other extracts I have given, I think it would be worth while knowing whether the Coal and Iron ores here are applicable by the same process as pursued by Mr. Blair, and feeling the importance of the question, and that so much depends on the result of such a trial, I think it would be preferable to send a few tons of the ore and Coal to Mr. Blair, and the proper results obtained, rather than risk an erection of the kind in the first instance here, where there are no men accustomed to the working of furnaces, and from description only it would in all likelihood be imperfectly done.

13. I may again state that the ore is one of the richest in Iron known; the Coal, although not of fine quality, is nevertheless capable of producing high temperatures, and on an open grate yields it readily; it has also, I think, been clearly proved in the trials already made that the Coal will not suit the purpose if in any form it is brought into contact with the ore.

No. 872, dated the 22nd October 1875.

From—W. Ness, Esq., Mining Engineer, Warora Colliery Division,
To—The Secy. to Chief Comr., Central Provinces, P. W. Dept.

SMELTING OF IRON ORES, PIPULGAON AND LOHARA.

In continuation of this office No. 838 of 12th instant, I have the honor to state that the proposed trials referred to in paras. 6 and 7 of said letter, have been made and have resulted in showing that the Coal, when burned on a separate fire grate, is capable of melting and boiling grey cast Iron, and although the trial furnace was of a rude description, and without a proper reverberatory arch, the time taken and quantity of Coal used did not appear to be much in excess of what is commonly required for such purposes. I therefore feel convinced that with a regenerative furnace both quantity and intensity of heat can readily be obtained from this Coal for the reduction of the Iron ores by a direct process, and instead of making further erections or trials here, I would recommend that information be obtained of the various direct processes which are established and have succeeded on a commercial scale, and to one or more of these a few tons of the Coal and ore should be sent for trial.

2. In conclusion, the course I recommended should be taken and which has resulted in these trials being made (*viz.* by the blast furnace and then refined by the Bessemer process) is just the course that will not answer for the reasons given in previous leteer herein referred to, but sufficient evidence has been elicited during these trials to show that successful Iron manufacture is not a hopeless thing with such raw materials as we have here.

3. The Iron ore is so exceptionally pure that if a proper method or arrangement were arrived at for reducing it uncombined with foreign matter, even at a little extra expenditure in Coal, still this will be more than recouped in having a better quality of Iron, and the other costs of plant and arrangements necessary for its production will likely be lessened.

4. I must add that I have not seen any "direct process" of Iron-making that is a commercial success, but I hear that during the last 12 months, one or two works have been established in England, on a different principle from that of Mr. Blair's in the United States, and working satisfactorily; about these I have instituted enquiries which will be duly communicated.

APPENDIX B

To Minute by Chief Commissioner on the Warora Colliery Works and the Chanda Coal and Iron Mines.

No. 7868, dated the 3rd December 1874.

From—Lieut.-Col. Jas. O. Mayne, R.E., Offg. Secy. to Chief Commissioner, Central Provinces, P. W. Dept.,
To—The Secretary to the Government of India, Department of Revenue, Agriculture and Commerce.

LEASES FOR WORKING THE COAL AND IRON MINES OF THE CHANDA DISTRICT.

I am directed to acknowledge the receipt of your letter No. 177, dated 16th instant, raising the question of the terms on which leases for working the coal and iron mines of the Chanda district might fairly be conceded by Government, and notified for general information.

2. In reply, the Chief Commissioner desires me to state that, while fully concurring in the Resolution of Government, that all the facts ascertained regarding the mineral resources of the Chanda district should be duly published, he thinks it would at present be premature to go further than this, and invite tenders for working the mines, by proclaiming the terms on which such applications would be favorably entertained.

3. The main reason why Mr. Morris considers that the time has not yet come when any lease of the Chanda coal and iron mines could be advantageously granted by Government, is that as regards the manufacture of iron, the stage of experiment only has been arrived at, so that in this essential point everything still remains unsettled. It has been proved that coal, well adapted for locomotive purposes, exists over a large area. It remains to be proved whether any of this coal, as removed from the pit, can be utilized for blast furnaces, if so, what proportion of the coal extracted can be so utilized, and as regards the remainder whether it can be successfully used in the form of "Patent fuel." This has been pointed out in the Minute

of the Chief Commissioner forwarded with this Office letter to the Secretary, P. W. D., No. 5227, dated 13th August 1874.

4. Such being the case, the terms which would now be offered by capitalists would be based on the difference that exists between what may be termed an anticipated or conjectural, as contrasted with an assured, success. On the former supposition a capitalist might ask, for instance, a 99-years lease and 25-years absolute exemption from all royalty, as quoted in clause (*e*), para. 3 of your letter under reply; but in the event of Government having *already* carried its experiments in iron manufacture to a successful issue, Mr. Morris concludes that one-sided concessions of this kind could not for a moment be entertained.

5. Should, however, Government decide to publish at once the terms on which a lease of the Chanda coal and iron mines will be granted, then the Chief Commissioner would strongly recommend that the terms offered to capitalists should be based on the assumption that the existing iron-manufacturing experiments had already been successful. This would involve the insertion of a condition to the effect that Government should be reimbursed all the expenditure hitherto incurred in the effort to develope the mineral resources of the tract which have been so long neglected. If the basis on which any proposed lease should issue, as above suggested, be approved of, then the Chief Commissioner will be prepared to submit detailed terms for the consideration and orders of the Government of India. But until this preliminary point is authoritatively settled, Mr. Morris does not feel in a position to forward any definite proposals.

6. At the same time the Chief Commissioner considers it a question of very serious import to the country, whether Government should not keep in its own hands the working of mines such as exist in Chanda. The coal and iron will for many years be mainly in demand for State Railways and Guaranteed Lines, and any privileges conceded to a Company must involve profits derived largely from Government as a customer, in the one case directly, in the other indirectly. As a State undertaking the rates for coal and iron would have some reference to the cost of production; whereas in the case of a Company their interests would only require them to under-sell imports from England. The difference between the two rates thus chargeable might be very considerable, and would form a permanent tax on the resources of the country. Is it either necessary or expedient that such a tax should be deliberately accepted by Government merely to encourage and attract private enterprise? Mr. Morris will not now offer a decided opinion on this point, but he inclines to the view that, at any rate for the present, the policy of conceding important privileges to capitalists would be a mistake.

7. In conclusion, I am to state that the surface rights in all malguzari lands belong to the village proprietors, who would claim full compensation for the damage involved in the course of mining operations. When surface rights have been adjusted, the full control over all minerals rests in Government.

No. 1203, dated the 24th February 1876.

From—T. W. Armstrong, Esq., Secretary to the Chief Commissioner, Central Provinces, P. W. Dept.,
To—The Secretary to the Government of India, Public Works Department.

COAL AND IRON ORE AND LIMESTONE AT WARORA.

Adverting to paragraph 10 of the Chief Commissioner's minute on the Warora Colliery Works, dated 7th January 1876, being enclosure to Central Provinces' letter No. 705 of the 28th idem, I am directed to forward copy of paragraphs 1 to 6 of Mr. Ness' report No. 133 of the 4th current, and to ask for the early consideration of Government to the proposals therein made.

2. If these are sanctioned I am to solicit that orders may be sent stating what quantity of each kind of raw material is to be forwarded to England, and it will be advisable most likely to provide sufficient iron-ore, coal and limestone for more than one experiment, and perhaps for two or three under the same process. It is not improbable that an experiment might fail or be attended with results not quite clear or wholly satisfactory, and in such case a repetition of the experiment would be very advisable if not indispensable.

3. If the proposal made to send the various raw materials to England for experiment is accepted by the Government of India, and in case the orders of the Secretary of State have to be obtained, the Chief Commissioner would suggest that such be asked for by telegram to England.

No. 133, dated the 4th February 1876.

From—W. Ness, Esq., Mining Engineer, Warora Colliery Division,
To—The Chief Engineer, Central Provinces.

I have the honor to state, in reply to your No. 709 of 28th ultimo, that there is a difficulty in naming definitely what quantity of raw materials should be sent for trial to England or elsewhere as working samples for the manufacture of iron until it is known by what process it is to be tried; for instance, in Siemen's direct process one ton of iron-ore and the same quantity of coal are sufficient for a charge; very little, if any, limestone is used by this process.

2. If Blair's method is tried, it will take five tons each of coal and iron-ore for a charge. In either of these methods I do not expect limestone would require to be used with this iron-

ore, and in any case one cwt. limestone for each ton of iron-ore would be sufficient if the coal is not brought into direct contact with the iron-ore.

3. If both these processes were to be tried, I should recommend 6 tons coal, 6 tons iron-ore and 6 cwt. limestone to be sent for Siemen's process, giving equal quantities of Lohara and Pipulgaon iron-ores, and for Blair's process 10 tons of each Lohara and Pipulgaon iron-ore and 20 tons of coal, and say, 20 cwt. limestone. In reference to this latter, it may not be advisable at present to have it tried in England, as there is only one furnace of the kind which has recently been put up, and the operators must be in a measure learners, and a change of the raw materials may put them out. Mr. Blair has his establishment at Pittsburgh, United States.

4. Another process has been submitted by me to an association of forge and mill managers for discussion, by which it is proposed to use such a furnace as we have now got here, and instead of mixing the coal with the ore, to burn it in three small Siemen's furnaces, which suppply carbonic oxide, only this to be driven into the furnace where the prepared ore is placed. The secretary of the association by last mail informs me that a company is now being organized in England for the purpose of practically testing a similar method. This process would also require 20 tons coal and about the same quantity of iron-ore, and very little limestone.

5. These quantities of coal can be packed in bags of 200 lbs. each, and the ore and limestone in timber boxes. I cannot see any use of Rutnapur ore being sent; it is a common brown iron-ore, and there will be little call for it in a direct process. I may state, however, that we have got about five tons here in a calcined state, and that more can be had from Rutnapur if required.

6. Any limestone that would be supplied should be from Kundalla, as it has been proved to be the most uniform in quantity.

COAL-CUTTING MACHINERY FOR WARORA COLLIERY.

No. 705 of 28th January 1876. One Enclosure.

With reference more particularly to para. 8 of the Chief Commissioner's minute, dated 7th ultimo, enclosure to Central Provinces' letter as per margin, I am directed to forward, for the consideration and orders of the Government of India, extract paras. 1 to 4 inclusive of Mining Engineer, Warora Colliery Division's No. 132 of the 3rd current.

2. If Government approve of the proposals made by Mr. Ness for the purpose of coal-cutting machinery for the Warora Colliery, I am to say that the Chief Commissioner recommends that the same be ordered from England at an early date.

No. 132, dated the 3rd February 1876.

From—W. Ness, Esq., Mining Engineer, Warora Colliery Division,
To—The Chief Engineer, Central Provinces.

WARORA COLLIERY WORKS, &c.

I have the honor to acknowledge receipt of your No. 704 of 28th ultimo, with copy of Chief Commissioner's minute, dated 7th ultimo, on the Warora Colliery Works and the Chanda Coal and Iron Mines.

2. In reference to your first request, I should state that there are several kinds of coal-cutting machines now at work in Britain; three of these are known as, *1st*, the wheel machine in which cutters are placed on the periphery of the wheels which project about 3 feet on one side; *2nd*, those having a rigid job which project 2½ to 3 feet on one side of the machine, and over the end of which cutters are made to revolve; *3rd*, the pick machine in which a pair of picks with a shank 3½ to 4½ feet in length are made to strike in a similar manner to that of a trained pickman. There are four modifications of the first—*1st*, one by J. Scarisbruck Walker, Engineer &c. Wigan; *2nd*, J. Eaglesham, Coalmaster, Kilmarnock, *3rd*, R. Winstanley and Barker, Manchester; and *4th*, by Isaac Grey Bass, Sheffield. The second, or Gib machine, is by Messrs. Baird, Gartsherry, Coatbridge, N. B. The third by Messrs. Firth, Leeds. There are several other machines which I am not familiar with, but after specially devoting some time to this matter in England in 1872 and 1873, I adopted the pick machine as being the most suitable; and where the under-cutting is so irregularly hard as it is here, I think the same kind of machine the best for Warora mines. Under different management this may not be acquiesced in, still as more than one machine will be required by-and-bye, I would only recommend one to be obtained in the first instance. All the other fittings required for coal-cutting machinery are equally applicable for one or other of the different machines described. The other plant required is a blowing engine with two cylinders of equal size, say 20-inch diameter and 4 feet stroke, both of which are laid on the same bed, the piston rod of the steam cylinder being made to pass through a stuffing box at the other end of it, and coupled on to

the piston rod of the air cylinder (such an engine would supply sufficient compressed air for three coal-cutting machines working at the same time). Also two steam boilers, an air receiver and conducting pipes to lead the compressed air to the machines in the workings. I here subjoin a rough estimate of the cost of all that would be required for this work delivered F. O. B. in London or Liverpool:—

Blowing Engine 20" diameter 4 feet stroke complete	£	450	0 0
Two Boilers 5 ft. diameter × 30 ft. long, with fittings and mountings ...	„	250	0 0
Air-receiver 5 ft. diameter × 20 ft. long	„	50	0 0
One Firth's coal-cutting machine, with duplicate fittings and spare joints ...	„	200	0 0
300 ft. 6 M. W. J. pipes ... ... / 200 „ 4 „ „ ... ... / 200 „ J. R. Hose bends, couplings, &c....	„	110	0 0
Total ...	£	1,060	0 0

or say £1,100 and for other two machines at £200 each = £400, or in all £1,500. To this may be added £1,000 for carriage and fitting in position at these works, including foundations, &c., or say £2,500 in all.

3. In three months from the present time there should be room for one machine; in three to four months more, there should be room for a second, and in twelve months or thereby (from the present time) for three machines. I estimate that at least 50 tons a day should be obtained from each or a total of 150 tons of coal besides slack, with from 200 or 300 coolies. Without such machinery I expect not less than 1,000 coolies will be required under-ground; for this number it will take twelve months or more to open sufficient working places, were it even practicable to get so many coolies to go regularly to this work.

4. I am aware that comparisons may be made with what I have stated as likely to be obtained from cooly labor here, and that better results may be shewn to be got at other mines in India, but the difficulty at Warora in the first instance is, that there is no natural parting for under-cutting the coal, which would be found hard for even the best of pickmen, and, second, the coolies are all, as the Chief Commissioner remarks, "only learners." To meet the first somewhat I am so laying out the work that one course of under-cutting will serve for two *breasts* of coal, but any benefit from this cannot be felt for four or six months to come when the work will be fairly opened; the second drawback will doubtless right itself in time, as youngsters are being trained to the work who will know no other kind of employment.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on imports and exports are not distinguished.

2. The figures for British Burma for 1875-76 include collections at *Tavoy* and *Mergui* for the months *April* to *February* only.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th APRIL 1876.

GENERAL REMARKS.—With the exception of very slight and partial showers in Kurnool and Tanjore, no rain has fallen in the Madras Presidency. The drought has affected the supply of pasture in Kurnool, Tanjore, Malabar and Madura. In the last-named district, drinking water is said to be failing. Cholera is prevalent in most districts, and in Kurnool a considerable number of fatal cases have occurred. Cholera is also slightly on the increase in Mysore and Coorg. The Bombay reports show a little rain in Dharwar, but none elsewhere. There has been a severe outbreak of cholera in Belgaum, and the disease is still prevalent throughout Kattywar and the Southern Mahratta Country. Harvest operations have nearly come to an end. Showers have fallen in most of the districts of Eastern Bengal and in parts of the Burdwan Division and of Orissa. Isolated falls are reported from Rungpore and Bhagulpore. The want of rain for ploughings and sowings is being much felt in all the northern and central districts. The outturn of the spring crop has been fair. Sporadic cholera is generally reported. There has been a moderate fall of rain in Assam and more is expected. No rain is reported from the North-Western Provinces, Oudh or Central India, and very little from Rajputana, the Panjáb and Central Provinces. Throughout these provinces the outturn of the harvest has been satisfactory, and, with the exception of Rewah and parts of the Central Provinces, where a little cholera has appeared, the state of the public health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Apl. 13th)	...	No rain; prices steady; cholera 40 seizures, 15 deaths; small-pox and fever in four taluks; mild epizoötic aphtha continues; dry fodder is being used; markets well supplied locally.
Kurnool („ 12th)	·5	Season generally good; cotton is being harvested, second crop of paddy flourishing; pasture scanty; dry fodder obtainable; water sufficient; markets well supplied; prices stationary except in Nandial where rice and horse gram are rising and chollum falling; fever prevalent; cholera in 7 taluks, severe in three, 582 seizures and 184 deaths.
Tanjore („ 13th)	...	Rain at Negapatam, none elsewhere; rivers dry; no water in tanks nor any over anicuts; few dry crops here and there; standing crops withering in several localities; harvest almost over; pasture insufficient; prices stationary, markets well supplied; cholera abating, number of seizures 25, deaths 18; cattle disease in many places, some loss.
Madura („ „)	*Nil*	Crops withering; cholera, sporadic fever and small-pox continue; pasture and drinking water scarce; heat intense.
Malabar („ 13th)	*Nil*	Markets well supplied, but prices have a tendency to increase; bowel complaints in all taluks except Wynaad and Cherakal, 280 cases, 261 deaths; small-pox prevalent, especially in North Malabar; cattle disease in Wynaad; pasture withering.
		General Remarks.—General prospects of these districts same as last, except in Kurnool and Tanjore, where there has been some rain.
Bombay—(April 13th).		
Sind (April 12th).		
Kurrachee ...	...	One case of small-pox in Kurrachee recovering; one case in Sijawal fatal.
Shikárpur ...	...	*Rabi* reaping general; wheat crops very good; river rising; hot winds prevailing.
Hyderabad ...	...	No change.
Upper Sind Frontier ...	...	Dust-storm; weather warmer; *rabi* crops being reaped.
Guzerat.		
Kaira ...	...	Three deaths from cholera in Matar taluka.
Surat ...	...	Thirteen cholera cases at Bardoli; two fatal.
Ahmedabad ...	...	Cholera in city, 8 cases, 1 fatal; cholera also in Viramgam, Dhandhuka, and Sanaud.
Broach ...	...	No change.
Khandesh and Nasik.		
Khandesh ...	...	Weather hot; fever in two talukas.
Nasik ...	...	*Rabi* crops harvested.
Konkan.		
Tanna ...	...	Small-pox still prevails in four talukas.
Deccan.		
Poona ...	...	Weather hot; slight cattle disease in Indápur and Purandhar; public health good.
Ahmednagar ...	...	No change.
Sholapur ...	...	
Satara ...	...	Cattle disease in Karad, Satara, Khánápur, and Pátan; small-pox has just appeared in Karad.
Southern Mahratta Country.		
Belgaum ...	...	Deaths from cholera 272; heat severe.
Dharwar ...	·23	Sugarcane promising; no improvement in public health.
Kanara ...	...	Second crop harvest nearly completed; sugarcane being planted; cholera prevalent.
Kaladgi ...	...	155 deaths from cholera in six talukas.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar.		
Rájkot ...	...	Health generally good; cholera in Morvi taluka, 77 cases, 45 fatal; in Bhojabedi under Dhráfa, 7 cases, 6 fatal.
Wadhwán ...	...	Weather hot; cotton-ginning continues; cholera throughout Jhalawad, 200 cases, 82 deaths.
		General Remarks.—Cholera prevalent in Kattywar, Guzerat, Southern Mahratta Country, and Kanara; small-pox in Bombay, Tanna and Satara districts; hot weather generally set in.
Bengal—(April 13th)		
Chittagong ...	A few drops.	Weather hot, with no prospect of more rain just at present; no change in the state of the crops since last report; cholera is still prevalent in the south of the district.
Noakhally ...	0·87	Heat daily increasing; there has been an occasional breeze from the south; thunder and lightning on the 30th, the heat became less oppressive afterwards; the cold-weather crops are in good order; ploughing for the early rice crop, and sowing of early and late rice together are now going on; cholera is bad in Amirgunge and Nalcheera; in the town it has somewhat abated.
Chittagong Hill Tracts...	1·33	Some showers of rain on the 30th and 31st ultimo; owing to the falls of rain during the last two weeks *joom*-burning has been delayed this year; cholera has broken out at Rangamattee.
Hill Tipperah ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops since last report.
Backergunge ...	1·03	The crops are good, but there has been rather a serious outbreak of sickness all over the district; cholera is present in almost every thana, and there have been many deaths.
Furreedpore ...	*Nil*	Weather warmer; less wind; ploughing and sowing on the late rain going on all over the district; prospects of crops, so far as visible, are good; cholera is still prevalent, but a little less.
Dacca ...	0·60	Weather seasonable; cloudy; state and prospects of crops are good.
Mymensing ...	*Nil*	Mornings up to 8 A. M. cool, days very hot; prospects of crops are unfavourable owing to want of rain, which is much needed for the sowings of *aous*.
Tipperah ...	·46	Weather fair and hot, with one heavy shower on Sunday; the *boro* rice is doing well; no other crops of importance on the ground.
24-Pergunnahs ...	*Nil*	Weather seasonable; no crops on the ground; the land is being prepared for cultivation; health is generally good except at Barripore, where prevalence of cholera and fever is reported.
Jessore ...	·81	Weather hot; spring rice and millet are being gathered, and rice giving good crops; rain is wanted for the sowing of early rice and indigo; the rice sown in the low lands is doing well.
Nuddea ...	...	Slight rain in Bongong and a storm at Ranaghat, but generally there has been no rain; no crops on the ground except October indigo, which is doing well; rain is much required for early rice and spring sowings of indigo; cholera is prevalent in Kooshtea and part of Meherpore sub-division.
Moorshedabad ...	*Nil*	Weather cooler than usual at this time of the year, especially at night; *boro dhan* and mulberry are promising; price of rice is nearly stationary; outturn of the cold weather corps is nearly up to the average; cholera is still prevalent in the Rampore Haut, Jungypore, Nulhattee, and Jellinghee Thanas.
Pubna ...	*Nil*	Days hot and nights cool; state and prospects of the crops are fair, but rain is much needed; cholera continues.
Rajshahye ...	*Nil*	Very hot in the day time, but nights are particularly cool; no change for the better in the prospects of the crops, which need rain more than ever; the *rabi* crops have been nearly all gathered in, the outturn, taken all round, being about half of the average; a large number of cases of cholera have been reported in many parts of the district.
Bogra ...	*Nil*	Weather hot and heavy; rain much wanted; *chuna* and *til* have just begun to flower; cultivation of sugarcane has commenced; the state of other crops continues the same as last week.
Maldah ...	*Nil*	Weather very dry; rain is urgently needed; matters will soon get serious if some rain does not fall soon; *rabi* has suffered and *boro* is suffering; cholera is spreading, and there have been 16 deaths this week; timely rain would stop a good deal of this.
Dinagepore ...	Return not received.	Weather hot in the day and cool at night; state and prospects of the crops are the same as in last week.
Rungpore ...	1·18	Weather cooler; rain is badly wanted; sowings are going on for the next harvest, but nevertheless partially deferred for want of rain; wheat is still being cut; the outturn is less than an average one; tobacco has been cut; its fermentation has been spoiled by the dryness of the atmosphere; the prospect for Rungpore tobacco this year is decidedly bad. Cholera has decreased.
Cooch Behar ...	*Nil*	It has grown hot; people are giving up hopes of getting any *bitri dhan* this year; for want of rain this crop will fail; the prospects of *chuna* and *kaon* continue unfavourable.

Presidency or Province and District.	Rainfall for week preceding	State of agricultural prospects.
Bengal—*continued.*		
Jalpaiguri ...	Return not received.	Still no rain, and the want of it begins to be very serious; it is most unusual; wind westerly; atmosphere very thick; so much so that till near 9 A. M. and from 4½ P. M., the sun appears like a red ball with little heat; the result is that the mornings and afternoons are dark and gloomy, though there are no clouds about; this the Deputy Commissioner believes is greatly due to jungleb urning in the duars, and rubbish-burning in the fields all over the district, and owing to there not being the usual rain, which ordinarily at this season clears the atmosphere of the smoke and dust now in it; price of rice is rising all over the district; *bhadoi dhan* sowing retarded for want of rain; general health of the district is pretty good.
Darjeeling ...	·18	Weather most unusual; the ground is looking parched and dry; the young crops do not seem to have suffered yet for want of rain, but rain is greatly needed.
Midnapore ...	A few drops.	Weather seasonable; *boro* paddy is the only crop on the ground at present; its prospects are good; small-pox continues in certain portions of the Tumlook sub-division.
Howrah ...	·16	Weather warm and bright. No change in the state and prospects of the crops.
Hooghly ...	·45	Weather very hot; slight hailstorm with rain on the 1st instant; foggy on the morning of the 7th; onions being planted in some places; sowings of *sessamum* and sugarcane retarded from want of rain; *jhinga* and *potole* lands are being irrigated; cucumbers, &c., doing well; rain is greatly needed; *rabi* harvest is over; result is very good; cholera is still very bad in Hooghly and Serampore.
Burdwan ...	*Nil*	Rain is much wanted; tanks are getting low; no crops on the ground but cotton and *til*; cholera is still prevalent, especially in Culna.
Bankoorah ...	*Nil*	Weather dry, but cooler than last week; no change in the state and prospects of the crops; rain is much wanted; cholera is abating.
Beerbhoom ...	*Nil*	Westerly winds continue; no change in the state of the crops; rain is wanted for early ploughing.
Sonthal Pergunnahs ...	*Nil*	Hot westerly winds blowing; *mohwa* crops are good; mango crop is promising well; cholera is decreasing, but has not disappeared.
Bhagalpur ...	2·22	Mornings still cool; westerly winds have apparently ceased; rain would be most beneficial for all agricultural operations; condition of the people is good; general health is very good, but cholera seems to be increasing.
Monghyr ...	·5	Weather fair; the *rabi* crop is all harvested; the mango and *mohwa* prospects continue good, and prices are unusually low, although the district is in the seventh month without rain.
Purneah ...	Return not received.	The high winds have subsided, and it is getting hotter; rain is urgently wanted; the sowing of *bhadoi* rice is going on, and in the low lands there is still a good deal of moisture; mangoes promised well, but are falling off in consequence of the drought; cholera is very bad in the north.
Durbangah ...	*Nil*	Cloudless skies; westerly winds; the *rabi* harvest is nearly completed; preparation for ensuing sowings have been commenced, but the want of rain, now much felt, retards them; prices slightly higher than last week; the supply of food-grain is sufficient; importations have not increased in quantity, neither have they diminished; the necessity of employment for the poorer classes in Mudhubani is increasing; the health of the district is generally good.
Mozufferpore ...	Return not received.	Weather very clear and bright, with cool mornings and evenings; all signs of rain have disappeared. The *rabi* crops have nearly all been cut; the price of common rice is rising steadily, and is now 15 seers per rupee at Mozufferpore, but pulses and millets remain cheap; numerous fires—all accidental—have lately occurred, causing much loss of property; cholera and small-pox are increasing.
Sarun ...	*Nil*	Weather very cool for the time of the year; the Joint Magistrate of Sewan gives a very favourable report of the general crop outturn of his sub-division, estimating it at more than 14 annas all round, the Deputy Collector of Gopalgunge estimates it at but little less.
Chumparun ...	Return not received.	Westerly winds still continue to blow daily, and will do much damage if they last much longer; unless rain falls soon, the prospects of the Indian-corn crops will be injured, as owing to the prevalent westerly winds the soil is becoming too hard for ploughing or digging; the *rabi* crops are being harvested and the yield is fair.
Patna ...	Return not received.	Weather seasonable; hot during the day, but still cool at night; all the crops have now been harvested, and the yield has been fairly good; some sporadic cases of cholera and small-pox throughout the district, with a good deal of measles and chicken-pox.
Gya ...	*Nil*	Weather hot; westerly winds prevailed during the week; the highest reading of the thermometer 99°6'; no crops on the ground; public health on the whole is good; a few cases of cholera and small-pox are reported.
Shahabad ...	Return not received.	Weather hot; rabi crops are harvested and the outturn is moderate; cholera is reported from Buxar and Bhubbooah sub-divisions, sporadic instances of small-pox are still reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Hazaribagh ...	*Nil*	Weather seasonable; it is very warm; no crops on the ground; *mohwa* promising a full crop; cholera and small-pox still continue.
Lohardugga ...	*Nil*	Weather seasonable; the *mohwa* is plentiful; rain is much wanted for ploughing; a few cases of cholera and small-pox are still reported.
Maunbhoom ...	*Nil*	Too dry for want of rain; ploughing has not commenced, and the early rice crop, reaped in Bhadur, will suffer; *mohwa* has turned out tolerably good.
Singbhoom ...	*Nil*	Weather seasonable; no crops to report about; rain is much wanted for the preparation of land; the *mohwa* and jungle-fruits are reported very plentiful, but the mango is very deficient; the Deputy Commissioner reports that as yet the district is healthy, but that if the rain keeps away much longer, the water in the tanks will get low and unwholesome, and unhealthiness will follow.
Balasore ...	·66 At Bhudruck ·72	The weather continues very unsettled, and the absence of the south wind, usual at this season, is remarkable; in the north of the district the earth has been sufficiently moistened and ploughing is general; in the south ploughing has commenced; cholera and small-pox have not yet disappeared, and still cause occasional deaths.
Cuttack ...	·1	No rain in the sadr station; a few slight showers in the interior; weather very hot and sultry for the time of the year, with occasional high winds; rain is much wanted to soften the earth for ploughing; no crops of importance on the ground; a little small-pox and cholera have appeared.
Poorce ...	*Nil*	Weather hot and cloudy at intervals; rain is much needed throughout the district; dalwa paddy crop is being reaped; the state of other crops is good; mango crop is short. *General Remarks.*—There has been slight rainfall in the districts of Hooghly, Dacca, Monghyr, Cuttack, Midnapore, Darjeeling and Balasore during the week. The rainfall in Bhagalpur has been 2·22 and Rungpore 1·18. The sowing of early rice has become general, but is deferred in places for want of rain. The harvest of spring or *boro* rice is fair.
N. W. Provinces—		
Benares (April 12th)	...	Nothing new to report.
Allahabad („ „)	...	No change.
Jhansi („ 13th)	...	Slight showers on 11th.
Agra („ 12th)	...	Thunder and slight rain; *rabi* harvest being gathered above average.
Meerut („ „)	...	Weather very cloudy; harvest progressing.
Bareilly („ „)	...	High easterly wind since yesterday; weather cloudy.
Punjab—		
Delhi (April 12th)	...	Slight showers; reaping in progress; health good.
Hissar	*Nil*	Harvest being gathered; health good.
Umballa	...	Showers; crops cut; health good.
Jullundur	1·5	Injury to crops feared; health good.
Lahore	·6	Health and crops good.

Letter from Government of Bombay, No. 347 of 20th March 1876.

Telegram, dated 6th April 1876, from Madras Public Works, to Public Works Department, Government of India.

OBSERVATIONS.—His Royal Highness the Prince of Wales travelled on the Great Indian Peninsula Railway from Parell to Poona and back in

November 1875, and from Jubbulpore to Khundwa, and from thence to Dadur Junction in March 1876. The instructions issued by the Railway authorities were clear and distinct, and the service was performed with discretion and punctuality. The general arrangements made by the Railway Officers met with the approval of His Royal Highness, who was pleased to express personally his satisfaction to the Railway Agent.

On the Bombay, Baroda and Central India Railway, His Royal Highness travelled from Bombay to Baroda in November 1875, also to Muckenpura and Mehmoodabad, and thence back to Bombay on the 23rd November 1875. On the 11th March 1876, His Royal Highness also travelled on this line from Dadur Junction to Bombay. The service was performed with safety, but the arrangements on the departure of His Royal Highness from Baroda, on the evening of the 23rd November 1875, were somewhat unsatisfactory.

In the Madras Presidency, His Royal Highness travelled from Tuticorin to Trichinopoly, and on to Erode on the South Indian Railway, and from Erode to Madras on the Madras Railway in December 1875. The service rendered on the Madras lines was satisfactory.

On the East Indian Railway, His Royal Highness the Prince of Wales travelled in January 1876 from Howrah to Bankipoor, and thence to Benares, also from Cawnpoor to Delhi; and from Delhi to Ghazeeabad, in going to the Punjab, and from Ghazeeabad to Agra in returning thence. In February His Royal Highness travelled from Agra to Alligurh and in March from Cawnpoor to Allahabad, and on to Jubbulpore.

The orders issued concerning the details of working the Royal train by the authorities of the East Indian Railway were such as to ensure punctuality in running, combined with all possible precautions for safety.

On the conclusion of the journey to Jubbulpore His Royal Highness was pleased to accord his thanks personally to the Officiating Agent and Traffic Manager for their attention to him, and to commend the Railway arrangements in connection with the several State ceremonials of arrival and departure of trains during the different journeys made upon the line by His Royal Highness.

On the Sindh, Punjab and Delhi Railway, His Royal Highness travelled from Ghazeeabad to Lahore, and from Lahore to Ghazeeabad in January 1876. The train service was performed with safety and punctuality, and the satisfaction of His Royal Highness was expressed concerning the general arrangements.

On the Oudh and Rohilkhund Railway, His Royal Highness travelled from Benares to Cawnpoor *vid* Lucknow in January 1876; from Alligurh to Moradabad in February 1876, and from Bareilly to Cawnpoor in March 1876. The train service was performed with punctuality and safety.

His Royal Highness the Prince of Wales travelled over several of the State Railways in different parts of India.

On the Punjab Northern State Railway His Royal Highness proceeded from Lahore to Wazirabad and back to Lahore in January 1876. In connexion with this journey, the ceremony of driving the last rivet for the completion of the bridge over the Chenab River was performed by His Royal Highness. The arrangements made for the ceremony and afterwards at the Wazirabad Station met with the approval of His Royal Highness, which was personally expressed to the Engineer-in-Chief of the State Railway.

On the Rajputana State Railway, His Royal Highness travelled from Agra to Bhurtpore and back in January 1876, and from Agra to Jeypore and back in February 1876.

The train service on each occasion was well performed, and the general arrangements were good, and His Royal Highness was pleased to express his approval to the Manager.

His Royal Highness travelled over the open line of the Holkar State Railway in March 1876. The service was done well and elicited an expression of approval from His Royal Highness.

RESOLUTION.—Taking into consideration the length of the journeys, aggregating in all 4,829 miles, performed by His Royal Highness the Prince of Wales on Indian Railways, and the difficulties with which the Railway authorities had to contend, consequent on an augmented traffic at a time when efforts were needed to ensure the safety of the Royal train, and the personal convenience and comfort of His Royal Highness the Prince of Wales, the Governor-General in Council is pleased to record his high appreciation of the services rendered by the Railway Officials of all ranks.

This good result has been attained both by the well considered arrangements and comprehensive directions of those in chief authority and by the loyal exertions of all the members of the different Railway Departments.

ORDER.—Ordered, that this Resolution be forwarded to the Governments of Madras and Bombay, the Consulting Engineers at Calcutta, Lahore, and Lucknow, and to the Director of State Railways, for information and for communication to the Officers concerned under their orders. Also to the Home Department for publication in the Supplement to the *Gazette of India*.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th APRIL 1876.

GENERAL REMARKS.—There has been but little rain in the Madras Presidency since last report. Light showers have fallen in parts of Kistna, Tanjore and Malabar. Heavy rain is much needed in Tanjore and Madura, where the water-supply is scanty. Cholera has been severe in Kurnool and Malabar. Cholera is also prevalent in parts of Mysore. There has been no rain in Bombay. Cholera continues in Kattywar, Guzerat and parts of the Southern Mahratta Country. Timely rain is reported from most districts in Bengal, and the preparation of the land for sowing is being briskly proceeded with. Cholera is still prevalent. Heavy rain has fallen in Sylhet, and there have been showers in Gauháti, but more rain is generally required in Upper Assam. There has been some rain in the North-Western Provinces, Oudh and the Punjab. The harvest prospects are fair and the public health is good. There has been no rain in the Central Provinces or Central India. In the Central Provinces the *rabi* harvest has been nearly completed and the outturn has been good. There is still some cholera in Hoshungabad, Betul and Chánda.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Apl. 20th)	...	Slight rain in Narsarowpett and Mujivid; prices generally stationary; cholera, 21 seizures, 7 deaths, in Repalli taluk; mild small-pox and fever in some taluks; epizoötic aphtha continues; dry fodder being used; markets well supplied locally.
Kurnool	(„ 19th)	*Nil*	Season generally good; second crop of paddy thriving; cotton being gathered; pasture scanty; water sufficient; dry fodder abundant; markets well supplied on average; prices stationary, except in Nundial, where white and green *cholum* rising; fever prevalent; cattle disease in 6 taluks; small-pox in the Nundikotkur taluk; cholera in all the taluks, except Sirwell; severe in Pattikonda and Cumbum; seizures 662, deaths 325, in the district.
Tanjore	(„ 20th)	Rain at Negapatam, elsewhere none.	Rivers dry; no water in tanks; water over anicuts none; cultivation, few dry crops here and there; standing crops withering in several localities; harvest almost over; pasture insufficient; prices almost stationary; markets well supplied; cholera continues, number of seizures 23, deaths 20; cattle disease in many places; some loss.
Malabar	(„ 20th)	·05	Markets well supplied; prices have tendency to rise; bowel complaints in all taluks, except Kottayam, Cherakel and Wynaad; 480 cases, 401 deaths; small-pox, fever and cattle disease slight, pasture withered.
Madura	...	*Nil*	Crops withering; heat intense; small-pox continuing; pastures scarce. *General Remarks.*—General prospects same as last week, except Kistna, Tanjore and Malabar, where there has been some rain.
Bombay—	**(April 20th).**		
Sind	(April 19th).		
Kurrachee	...	...	River on 15th 6 feet 6 inches against 4 feet 9 inches on same date last year; *rabi* crops almost everywhere harvested; cotton crops promise well, except in Shabunder division; *jowari* crops in Kotri taluka want water; crops in Ghorabani taluka attacked by insects; fever and cattle disease prevalent; small-pox in Jati taluka, 7 cases in Kurrachee, all recovering.
Shikárpur	...	...	Wheat harvest very good; weather much warmer; public health improving.
Hyderabad	...	...	*Kharif* operations proceeding; fever still in four talukas; small-pox and cattle disease in Badin taluka; hot winds commenced.
Upper Sind Frontier	...	...	Weather sultry; *rabi* harvesting continues; cholera prevalent in Kachi frontier, district free.
Guzerat.			
Ahmedabad	...	...	Cholera spreading now in Daskrohi, Dholka, Sanand, Viramgam and Dhandhuka; in Ahmedabad city, 11 cases, three fatal.
Kaira	...	...	Cholera in Nariad taluka, cases 95, deaths 26.
Surat	...	...	Three deaths from cholera in Surat; 5 cases at Chikhli, 2 deaths.
Broach	...	...	Cotton reaping completed; weather very sultry.
Khandesh and Nasik.			
Khandesh	...	...	No change.
Nasik	...	...	Small-pox in Igutpuri taluka.
Konkan.			
Tanna	...	...	Small-pox in town of Tanna and Panwel Bassein and Wara talukas.
Deccan.			
Poona	...	...	Hot weather continues; cattle disease in Indápur, Khed and Purandhar; public health good.
Ahmednagar	...	...	No change.
Sholapur	...	...	
Satara	...	...	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country.		
Belgaum ...	...	Murrain prevails in some talukas.
Dharwar ...	...	Public health improving, cattle disease decreasing.
Kanara ...	...	State of crops and public health same as before.
Kaladgi ...	...	Cholera in 5 talukas, 168 deaths.
Kattywar.		
Rájkot ...	...	Health good; cholera in Morvi and its villages; 49 cases, 18 deaths.
Wadhwán ...	...	Weather warm; cholera in Jhadawad; cases 245, deaths 126.
		General Remarks.—Cholera in Kachi frontier in Sind, and prevalent in Kattywar, Guzerat and Southern Mahratta country.
Bengal—(April 20th)		
Chittagong ...	0·87	Weather warm, with prospects of more rain; crops promising fairly; cholera in the south of the district.
Noakhally ...	0·98	Weather generally hot and cloudy, occasionally foggy in the morning; thunder and lightning on the 10th instant; the two successive nights were cloudy and attended with high wind; the cold weather crops are in good order; ploughing for the early rice crop and sowing of early and late rice are going on; present prospects are good from the seasonable showers that were falling at the time of report; cholera is very bad in almost every station.
Chittagong Hill Tracts...	...	Not received.
Hill Tipperah ...	0·95	Weather seasonable; rice in plains will be benefited by the late rain.
Backergunge ...	0·03	More rain is wanted; the state of the crops is good, but cholera continues in a sporadic form in the following thanas: *viz.*, Barisaul, Nalchiti, Jhalokati, Mendigunge, Gournadi, Perozepore, Mottearia, Merzagunge, Bowful, Golachipa, Gulchakhati, and Dowlutkhan; there have been a good many deaths; in other respects the condition of the district is satisfactory.
Furreedpore ...	2·4 3·22 at Goalundo and ·50 at Madaripore.	Storms on Wednesday and Thursday with high wind and rain, and on Wednesday with hail in places as large as hens' eggs; *bortjali* rice is doing well; the rain is enabling higher lands to be sown.
Dacca ...	2·62	Heavy storms all over the district; state of the crops is very favourable; storms have reduced cholera.
Mymensing ...	1·04	Weather seasonable, showers throughout the district; state of the crops is favourable; early sowings of rice are in full progress.
Tipperah ...	3·41	Weather stormy; very hot in the first part of the week, but after some heavy storms the thermometer fell as low as 73°; the autumn rice has been nearly all sown, and lands are being prepared for the winter rice.
24-Pergunnahs ...	·10	Weather sultry; no crops on the ground; lands are being ploughed for the cultivation of *aous* or early crop; cholera has appeared in the Satkhira, Busserhat, and Baraset sub-divisions.
Jessore ...	3·39	Weather somewhat variable; heavy rain on the 13th; the reaping of the spring rice continues; the rain has been most beneficial, and will enable the ryots to push forward the sowing of the early rice.
Nuddea ...	3·38	The rain appears to have been general; it has been most timely for the sowing of early rice and of indigo.
Moorshedabad ...	2·50	Two heavy showers have fallen; temperature considerably cooler; mornings cloudy; the recent rain will much facilitate ploughing and sowing operations; mulberry and indigo crops are promising; sowing of the *aous* or early crop commenced; cholera has decreased since the rain.
Pubna ...	3·54 Serajgunge 0·50	Weather sultry till the afternoon of Tuesday, the 11th; it was stormy till noon on Thursday last; ample rain has fallen throughout the Sudder sub-division; state of the crops is good in Pubna, but more rain is wanted in Serajgunge.
Rajshahye ...	1·04	The weather has been very unsettled, the wind varying almost daily; it has been cloudy and cool; there was moderate rain on the 12th and heavy rain on the 13th every where, except in Manda and Bhundhaikhara, where there had been no rain; much good has been done by the rain to the standing *til* (Sessamum) crops, and it has enabled the cultivators to plough and prepare their lands for the rice sowings; cholera continues to be very severe in Beauleah, Chorghat, Pootea and Bilmaree.
Bogra ...	1·43	Stormy weather; the great heat at last tempered by the rainfall; ploughing going on everywhere, and, with seasonable rains, good crops may be expected.
Pubna ...	2·62	Since the rainfall the weather is cool and agreeable; the rain was accompanied with thunder and lightning, and the wind south-easterly; rain has fallen at last just in time to save the crops from loss; state of the crops is same as before; ten deaths from cholera.
Rungpore ...	·96	Weather cool in consequence of recent rain; state and prospects of the crops are better than last week; the land is being prepared for the *bhadoe* crops, but more rain is needed.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Rungpore ...	·55 1·54 at Kurigram sub-division, 0·27 at Gaibanda, and 0·84 at Bagdogra.	Weather very cool; there was rain on the 11th and 12th instant; it has been general, and the fall has been larger to the east; rain has retrieved the position of the *aous* crop; it is sprouting everywhere and sowings are being rapidly pushed on; up to this last fall there had been no good rain since August; three and a half inches of rain fell in driblets during the month of September, and ¼ inch on the 17th October, since which time there has been no rain at all registered at the Sadr station.
Cooch Behar ...	·06	There were a few drops of rain on Tuesday night; rain may set in very soon, as clouds are visible; the weather is hot during the day; there is at present no hope of getting *bitri dhan* this year; the want of rain is very much felt; the prospects of the *cheena* and *kaon* crops are very unfavourable; the price of rice is gradually rising; coarse rice is selling in the bazar here at the rate of Rs. 2-14 a maund.
Julpigooree ...	·64	Rain has fallen generally over the district, but not in sufficient quantity; it looks, however, as if there will be more rain; the commencement of rain removes much of the apprehension felt of late; nothing new in the state of the crops, but prospects owing to rain are better.
Darjeeling ...	0·02	Rain fell on the 11th, 12th, 13th and 14th, and chiefly on the 13th; this will do a great deal of good, but more is needed; the rain that fell on the hills is said to have extended to the plains; the Deputy Commissioner has not yet received any formal report from the Terai, but it is hoped that this timely rain will have greatly benefited the young crops in the plains as it has on the hills.
Midnapore ...	1·75	Threatening weather all the week, culminating on Thursday afternoon in a very severe thunder-storm and very heavy downpour; lightning struck the station in three or four places; the strong wind has done some mischief, especially to fruit trees, but the rain was much needed.
Howrah ...	·05	Cloudy sky and great heat, with very little rain; no crops to report on.
Hooghly ...	·72 (1·16 on the night of the 12th.)	Weather close and sultry from the 9th to the 11th; cloudy from the 12th; the weather is much cooler since the 12th; sugarcane being planted out; land being ploughed up for the *aous* and *amun* paddy; more rain is wanted for the preparation of the soil; the rain of the 12th has proved very beneficial to the crops on the ground; *jhinga*, *pantolle*, cucumbers, and other vegetables are doing well; onions, water-melons, cucumbers, &c., are being [illegible]; cholera is slightly on the decrease.
Burdwan ...	1·33 0·82 at Culna.	Cotton and *til* (oil seed) are doing fairly; rain is wanted; cholera still prevalent.
Bankoorah ...	·19	Weather dry for the greater part of the week; slight rain on the 13th; rain is much wanted; cholera is nearly gone.
Beerbhoom ...	1·26	Weather changeable; westerly and easterly winds alternating; state and prospects of the crops are favourable; early ploughing has begun since the recent rainfall.
Sonthal Pergunnahs ...	1·49	A little rain is reported from Deoghur and Godda; violent storm with heavy rain on Wednesday evening all the way from Madhupore to Dumka, 40 miles; mangoe crop somewhat damaged; mowha has been nearly all gathered; health improving.
Bhaugalpur ...	*Nil* 2·1 at Banka, 1·48 at Soopool, and 2·0 in the east of Mudehpoorah.	Easterly winds; heavy storm from south-west on the evening of the 12th instant, and a severer one, but with less rain, from north-east on the morning of the 13th idem; rain general throughout the district; the benefit of this rain after so long a drought cannot be over-stated; prices have fallen everywhere; general health very good, though there is still some small-pox and cholera about.
Monghyr ...	Return not received.	Weather fair; there was a storm of wind and rain from the north-west on Thursday morning; there are now no important food crops on the ground; *bhadoe* sowings will commence when the ground is sufficiently moist; prices continue easy.
Purneah ...	*Nil*	High west wind, but cool and pleasant; the rain which fell on Thursday has done much good; ploughing and sowing are going on briskly; Indian-corn is doing well.
Durbangah ...	2	Seasonable weather; rain has fallen; the *rabi* or cold weather crops have now been harvested; the outturn in the Tajpore and Sader sub-divisions has verified previous estimates; in Mudhoobanee the outturn has been in no thana above half an average crop, in some below it, while in the northern tracts the failure has been complete; in those tracts, however, *rabi* is not extensively sown; the late rain was general over the north and central regions of the district, and has proved of great benefit, especially to the indigo crop, regarding which serious apprehensions had been entertained; preparation of the soil for the *bhadoe* sowings has received a needed impulse, but the time for sowing *moong*, pulse, &c., has passed by.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*concluded.*		
Mozufferpore ...	Return not received. 1·6 at Seetamarhee.	West wind at the beginning and high east wind at the end of the week, with cool morning and evening; the rainfall during the week has enabled the people in some places to prepare their fields for the *bhadoi* sowing; the *rabi* harvest is completed throughout the district; prices are stationary; cholera and small-pox are disappearing at Seetamarhee sub-division owing to the late fall of rain.
Sarun ...	·05	For the greater part of the week the prevailing wind was a westerly one; the wind, however, veered to the east on Tuesday night, and since then has remained in that direction, blowing very hard; the rain fell on Wednesday night; the weather seems still unsettled; no change in the state of the crops since last report.
Chumparun ...	*Nil*	The rain has been fairly distributed over the district; it has much improved the soil for the coming crops, and has not injured those that are being reaped.
Patna ...	*Nil*	Weather seasonable; all the crops have now been harvested; health of the district is generally good; though there are sporadic cases of both cholera and small-pox in all parts of it.
Gya ...	*Nil*	High winds, generally westerly, but easterly on one or two days; much cooler than usual at this time; no crops on the ground worth mentioning; there is some cholera and a little small-pox.
Shahabad ...	Return not received.	Weather cloudy, with strong easterly wind; *rabi* harvest completed; the outturn is expected to be a 12-anna one; cholera and small-pox are still reported.
Hazaribaugh ...	*Nil*	Weather seasonable; no crops on the ground to report about; *mowah* is abundant; cases of cholera and small-pox are still reported.
Lohardugga ...	*Nil*	Strong east wind during the 12th and 13th, but no rain; the *mowah* has been a fine crop; rain is much wanted for ploughing; small-pox and cholera are still reported.
Maunbhoom ...	*Nil*	Weather too dry; it has been little cooler owing to fall of rain in the neighbourhood; sugarcane is being put out; the ryots are in places preparing their fields for *gora dhan* by means of water from reservoirs, but rain is badly wanted in parts of the district, especially near Purulia; there has been a good deal of sickness in the district, but the Deputy Commissioner believes that matters have improved a little of late.
Singbhoom ...	*Nil*	Weather seasonable; there have been two dry storms, from which the intense heat has slightly decreased; no crops to report about; the drought has caused great want of pasturage for cattle, and it is reported that unless there is a change soon, there will be difficulty in bringing lands under cultivation later; cholera of a fatal type is reported to be prevailing in the north-east and western parts of the district.
Balasore ...	1·57	Weather continues unsettled; occasional heavy storms bring with them rain, and ploughing is now general; there are no crops of any importance on the ground; fewer cases of small-pox have been reported last week; cholera still causes much mortality.
Cuttack ...	·05	Weather hot and dry; one or two slight showers, very partial, and not enough to soften the ground for ploughing; public health is good, with the exception of a little cholera and small-pox here and there.
Pooree ...	A few drops	Weather hot and occasionally cloudy, with strong southerly wind; rain is much wanted; tillage for the ensuing rice crops awaits rain; *dalua* paddy is being reaped; the state of the other crop is fair; cotton is in flower; the mangoes are beginning to ripen, but the crop has been very poor; cholera is raging in Pooree and parts of Khoordah.
		General Remarks.—There has been more or less rainfall in almost all the districts of Bengal during the week; there is no change in the state and prospects of the crops save that the prospects in the district of Cooch Behar are now reported to be unfavourable; the late rain has facilitated ploughing and sowing of early rice.
N. W. Provinces—		
Benares (April 19th)	...	Nothing new to report.
Allahabad („ „)	...	No change.
Jhansi („ 20th)	...	
Meerut („ 19th)	Rain and hail on the 12th.	Harvest progressing.
Bareilly („ „)	1·1	
Punjab—		
Delhi (April 19th)	...	Reaping in progress; health good.
