Hissar ...	Showers.	Reaping in progress; health good.
Umballa ...	·9	Crops harvested; health good.
Jullundur ...	1·2	Crops being harvested; health good.
Lahore ...	*Nil*	Crops and health good.
Mooltan ...	*Nil*	Harvest nearly in; health good.
Dera Ismail Khan ...	1·3	Health and harvest good.
Rawalpindi ...	2·0	*Kharif* sowings commenced; health good.
Peshâwar ...	1·2	Harvest prospects and health good.
		General Remarks.—Harvest prospects fair; health of province good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Oudh—		
Lucknow (April 19th)	Slight showers with fall of large hail on the night of the 12th instant, in some districts.	Agricultural prospects continue favourable, and public health good.
Sitapur „		
Fyzabad		
Central Provinces—		
Upper Godavari (April 15th)	...	Hot; crops harvested; health good; prices steady.
Sambalpur ...	...	Days hot, nights cool; sugarcane planting; health good.
Bilaspur ...	...	Days hot, nights cool; prospects favourable; small-pox continues; prices steady.
Raipur ...	...	Hot; crops gathered; health good; prices easy.
Chanda („ 16th)	...	Threshing of *rabi* continues; cholera in some villages of Brahmapuri Tahsil.
Chhindwára ...	...	Close; crops harvested; health good; prices steady.
Betul („ 17th)	...	Nights cool, days hot; sugarcane doing well; 80 cholera cases, 30 fatal; prices risen.
Balaghât ...	...	Harvest gathered; 10 cases of small-pox; prices steady.
Bhandara („ 18th)	...	Clear and close; harvest gathered; yield favourable; fever and small-pox continue; prices easy.
Nagpur („ 19th)	...	Weather very hot; *kharif* ploughing commenced; prices steady.
Wardha ...	...	Clear; cattle disease prevalent.
Nimár ...	...	Hot; *kharif* ploughing continues.
Hoshangabad ...	...	Hot; *rabi* harvesting continues; cholera and small-pox prevalent; prices fallen.
Narsinghpur („ 19th)	...	Threshing of *rabi* continues; health good.
Jubbulpore ...	...	Clear and cool; *rabi* harvest excellent; small-pox and cattle disease continue; no fresh cholera cases reported.
Saugor ...	...	Hot; *rabi* harvest good, threshing continues; small-pox and cattle disease prevalent.
Seoni ...	...	Hot; threshing of *rabi* continues; health good; prices steady.
		General Remarks.—Prices of food remain steady, and the *rabi* crops are nearly all gathered; cholera cases continue to occur in the Hoshungabad District, but the disease has not spread either west to Nimar or east to Narsinghpur; in the Jubbulpore district no fresh cases are reported.
British Burma— (April 19th)		
Arakan Division.		
Akyab ...	...	81 deaths in town from cholera; no deaths reported from district.
Pegu Division.		
Rangoon ...	...	Public health generally good; no cattle disease reported.
Bassein ...	...	Health good; town satisfactory; cattle disease in Ngathaingyoung.
Henzada ...	...	Public health good.
Prome ...	...	Cholera, 10 deaths; small-pox increasing at Prome; better reports from Shewdoung.
Thayetmyo ...	...	Health good.
Tenasserim Division ...	...	Public health good.
Assam—		
Gauhâti (April 20th) ...	·41 Slight showers of rain on 17th and 18th.	Mornings cool, often cloudy; days hot; rain still needed for rice crop and tea; public health good.
Sylhet „	3·52	Rain has done good; transplanting of late rice has commenced.
Hyderabad Assigned Districts—		
Umraoti (April 20th)	...	Small-pox and fever in Ellichpore; other parts of province healthy.
Mysore and Coorg— (April 20th)	Very little rain in Mysore; none in Coorg.	Cattle suffering from murrain in five districts; cholera still prevalent in all districts, except Coorg and Mysore; increasing in Nundydroog division and in Chitaldroog, whence 144 deaths reported during the week.
Rajputana—		
Sirohi (Apl. 17th) ...	...	Health very good; strong hot winds blowing; harvesting completed.
Marwar („ 15th) ...	Slight fall on 11th.	Storm with thunder and lightning on 11th; weather getting hotter; harvest outturn good; small-pox still prevalent.
Meywar („ 7th) ...	...	Water supply, health and crops good; cloudy and warm winds.
Ulwar („ 19th) ...	...	Thermometer 87; health good; crops all cut; wells well supplied.
Bhurtpore („ 20th) ...	...	Calm cloudless sky; health good.
Jeypore ...	...	Harvest progressing favourably; weather seasonable; health good.
Ajmere ...	...	Sudden change; strong hot winds; health improved; grain being winnowed.
Central India—		
Indore (April 19th)	...	No change to notice; cholera still flits about Rewah.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Sutna „	...	

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

FINANCIAL DEPARTMENT.

REPORT AND STATEMENTS ON THE OPERATIONS OF THE PAPER CURRENCY DEPARTMENT FOR THE YEAR 1874-75.

From the Head Commissioner of the Department of Issue, to the Secretary to the Government of India, Financial Department, No. 722, dated Calcutta, the 29th March 1876.

I have the honor to submit, for the information of Government, the following report and statements on the operations of the Paper Currency Department under my control for the year 1874-75 :—

No. I.—Statement of the value of Government currency notes in circulation throughout India during 1874-75 and previous years.

No. II.—Statement of notes issued, received and cancelled during 1874-75.

No. VIII.—Statement of receipts and expenses of the Paper Currency Department for the year 1874-75.

TOTAL CIRCULATION.

2. The maximum, minimum and average value of notes in circulation throughout India on the last day of each month during the last two years have been as follows :—

Year.	Maximum.	Month.	Minimum.	Month.	Average.
	Rs.		Rs.		Rs.
1873-74	12,08,67,675	September 1873	9,24,97,610	March 1874 ...	11,14,51,907
1874-75	11,23,64,380	March 1875 ...	9,27,43,385	April 1874 ...	10,67,04,071

3. At the commencement of the year under report, the amount of the circulation was 925 lakhs ;—it rose to nearly 1,100 lakhs in the month of October, and did not vary materially from 1,100 during the remainder of the year, or up to the end of March 1875.

4. It will be observed that the minimum amount of notes in circulation in 1873-74 occurred in March 1874, and the minimum in 1874-75 in April 1874; the depression which occurred early in 1874 is thus reported as the lowest point of two succeeding years.

5. The average circulation dating from the commencement of currency operations has been as follows :—

		Rs.
In	1862-63	4,41,94,285
„	1863-64	5,23,25,000
„	1864-65	6,88,20,116
„	1865-66	7,72,57,983
„	1866-67	8,98,93,179
„	1867-68	9,28,50,848
„	1868-69	10,14,55,327
„	1869-70	10,66,90,777
„	1870-71	9,81,32,240
„	1871-72	11,41,57,442
„	1872-73	12,86,40,367
„	1873-74	11,14,51,907
„	1874-75	10,67,04,071

6. Although the average of the past year is less by Rs. 47,47,836 than that of 1873-74, there has been in the course of the year a steady return to the level of about 1,100 lakhs from the low point to which the circulation fell in the latter part of 1873-74 from causes particularly referred to in the Resolution of Government of the 5th March last.

7. The character and extent of the progress of the note circulation can be better estimated by an examination of the lowest amount of the circulation in successive seasons than by any comparison of averages. A statement in lakhs of rupees is subjoined for the past 7 years; the statement is arranged for the calendar year, which for this purpose is more convenient than the official year; the month in which the circulation was at the lowest is indicated by the figures in black type :—

CIRCLE.	1869.	1870.	1871.	1872.	1873.	1874.	1875.
Calcutta	**9** 355·2	**8** 320·2	**2** 335·2	**1** 415·2	**3** 431·2	**10** 438·9	**5** 465·2

8. The following amounts of notes were issued against silver bullion in the course of the year in Calcutta:—

		Rs.
In April	1874	24,20,000
„ May	„	28,85,000
„ June	„	8,00,000
„ July	„	2,00,000
„ December	„	34,29,000
„ January	1875	37,06,000
„ February	„	1,60,000
„ March	„	39,10,000
	TOTAL ...	175,10,000

against Rs. 1,00,62,000 in the preceding year.

9. In Bombay the amount of silver bullion purchased by the Currency Department was as follows :—

		Rs.
In April	1874	77,00,000
„ May	„	77,00,000
„ June	„	23,00,000
„ September	„	1,00,000
„ October	„	14,00,000
„ November	„	1,00,000
„ January	1875	32,00,000
„ February	„	29,00,000
„ March	„	26,00,000
	TOTAL ...	2,80,00,000

Of this sum, Rs. 2,27,00,000 were paid in notes and Rs. 53,00,000 in coin.

CALCUTTA SUB-CIRCLES.

10. The annexed statement shows the amount of sub-circle notes cashed at Calcutta in each month of the year; the aggregate encashments of Allahabad notes are 79½ lakhs less than in the previous year, of Lahore notes 39 lakhs more:—

Month.	Allahabad Notes.	Lahore Notes.	Total.
	Rs.	Rs.	Rs.
April 1874	9,40,985	8,54,810	17,95,795

TRANSACTIONS WITH THE PUBLIC.

11. The following table shows the value of Home Circle notes issued to, and received from, the public for cash or other notes during the last two years:—

Circle.	Notes issued.		Notes received.	
	1873-74.	1874-75.	1873-74.	1874-75.
	Rs.	Rs.	Rs.	Rs.
Calcutta	37,83,63,395	43,15,13,960	37,04,02,880	42,15,44,905
Madras	5,42,80,715	4,95,38,110	5,49,51,765	5,00,57,965
Bombay	12,00,50,755	13,42,02,720	13,79,27,090	12,70,44,945
Allahabad	2,52,67,815	2,48,82,275	*3,16,52,985	88,56,155
Lahore	1,23,98,575	2,04,01,785	52,26,470	69,94,220
Calicut	51,01,280	47,79,055	46,44,135	45,59,760
Cocanada	34,25,335	35,91,450	19,08,440	28,83,200
Nagpur	72,80,975	62,31,370	80,61,765	67,84,215
Kurrachee	47,31,020	50,80,435	59,86,815	62,58,325
Akola	60,24,710	23,57,600	56,93,555	21,73,880
Total	61,69,24,575	68,25,78,760	62,64,55,900	63,66,57,570
Increase in 1874-75	.....	6,56,54,185	.....	1,02,01,670

* This includes Rs. 2,58,28,840 received from the Calcutta Office.

12. The aggregate issues and receipts of the several denominations of notes were as follows:—

	Number of Notes for Rupees								Total.	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
										Rs.
Issues	5,35,748	18,90,947	10,33,175	4,03,143	6,88,724	1,22,469	4,13,888	7,593	51,45,689	68,25,78,760
Receipts	5,59,348	17,72,173	9,46,595	3,44,658	6,27,123	1,13,880	3,91,912	6,841	47,62,530	63,66,57,570
Excess of issues over receipts	26,400	1,18,774	86,580	58,485	61,601	8,589	21,971	752	3,83,159	4,59,21,90

13. During the year, 47,62,530 notes were received and 30,94,083 cancelled, being 65 per cent. of the total number received against 55·5 of last year.

14. The average number of notes that passed over the counters of the undermentioned offices on each working day during the past three years has been—

	Notes cashed.		
	1872-73.	1873-74.	1874-75.
Calcutta	8,686	9,868	10,814
Madras	1,285	1,784	1,912
Bombay	3,933	4,450	4,449
Allahabad	206	250	335

	Notes issued.		
	1872-73.	1873-74.	1874-75.
Calcutta	9,035	9,830	10,795
Madras	1,310	1,803	1,654
Bombay	4,032	4,111	4,631
Allahabad	359	498	503

15. The largest number of notes cashed at the Calcutta Currency Office on one day was over 20,000.

16. The daily average of cancellations during the same period has been—

	1872-73.	1873-74.	1874-75.
Calcutta	3,773	4,853	6,478
Madras	813	1,190	1,489
Bombay	2,347	2,808	2,907

17. In previous years the following statement gave the *gross* circulation of the several denominations on 31st March; this year, however, the *net* is shewn, agreeing therefore with the value of each circle on that date in Statement No. 1:—

Net circulation for 31*st March* 1875.

Circle.	Number of Notes for Rupees								Total.	
	5	10	20	50	100	500	1,000	10,000	Pieces.	Value.
										Rs.
Calcutta	2,11,702	5,72,617	3,11,905	65,883	91,747	10,975	19,958	99	12,84,686	5,18,75,130
Madras	66,514	51,012	60,906	20,552	35,469	3,326	1,597	20	2,09,689	94,96,110
Bombay	60,386	3,19,627	72,882	47,970	55,803	3,581	13,308	270	5,73,827	3,07,33,140
Allahabad	28,006	28,960	19,648	13,739	14,001	1,426	1,931	51	1,07,762	60,65,640

Outstanding Notes.

21. The following is a comparative statement by years of notes outstanding on 31st December 1873 and 31st December 1874 :—

Year.	Value outstanding, 31st December 1873.	Value outstanding, 31st December 1874.
	Rs.	Rs.
1863	5,97,260	5,56,330
1863	2,22,790	2,09,260
1864	2,57,420	2,12,420
1865	3,44,770	2,57,380
1866	4,38,980	3,04,080
1867	6,76,090	5,01,950
1868	11,88,460	8,17,320
1869	19,13,980	9,60,220
1870	41,45,130	18,14,220
1871	68,51,070	26,45,510
1872	2,14,51,985	81,98,795
1873	12,34,28,805	2,66,07,320
1874	.....	10,00,80,930

22. It is necessary to explain that the amount of "outstanding notes" includes, besides those in circulation, all notes held by the department for re-issue, and also such as, having been withdrawn from circulation by other offices than that of issue, have not as yet been cancelled in the registers of the office of issue.

Lost Notes.

23. The following figures show in a consolidated form the total number of notes of the various denominations lost from different causes, and value of which has been paid under indemnity :—

	Nature of Loss.	Number of Notes for Rupees								Total.	
		5	10	20	50	100	500	1,000	10,000	Number.	Value.
											Rs.
Half Notes ...	Lost by post	154	311	220	196	177	11	17	...	1,086	58,280
Ditto ...	Lost accidentally ...	48	148	111	63	86	11	4	...	471	25,190
Ditto ...	Mutilated	7	10	...	7	11	1	...	...	36	2,085
		209	469	331	266	274	23	21	...	1,593	85,555
Whole Notes ...	Lost by post	...	2	...	...	2	...	...	...	4	220
Ditto ...	Lost accidentally ...	...	...	3	7	13	1	1	...	25	3,210
Ditto ...	Mutilated	4	15	22	5	16	2	2	...	66	5,460
		4	17	25	12	31	3	3	...	95	8,890
	Wrongly joined ...	53	88	62	12	6	...	...	...	221	3,585
	Total ...	266	574	418	290	311	26	24	...	1,909	98,030

Total value of 1873-74, Rs. 70,925, and of 1872-73, Rs. 69,165.

24. No claim has been established against the department for the value of any notes the amount of which has been paid under indemnity.

Forged Notes.

25. No cases of forgery occurred in any of the circles, with the exception of Bombay, during the year under review.

At Bombay five forged notes for Rs. 100 each were presented for payment at the Currency Office or sent for inspection. It is supposed that all these notes were manufactured by one Gong, but the police enquiries have not led to any conviction. These notes have all been forwarded to the Government of India.

Gold.

26. No gold transactions took place during the year at any circle.

Small Silver coin and copper.

27. The receipts and issues of small change during the year were as follows :—

	Receipts.			Issues.			Net issues.		
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.
Half-rupees	28,644	0	0	4,53,633	8	0			
Quarter-rupees	25,258	12	0	6,95,482	4	0			
One-eighth rupees	11,605	14	0	5,15,757	12	0			
Copper	1,040	9	0	2,01,384	14	0			
Total ...	66,549	3	0	18,66,258	6	0	17,99,709	3	0
Ditto 1873-74 ...	19,665	0	0	12,75,757	0	0	12,56,092	0	0
						Increase ...	5,43,617	3	0

28. Thus the net issues of the year exceed those of the previous one by Rs. 5,43,617-3-0. In copper transactions alone there is an increase of Rs. 1,85,309-14-0, which amount may be traced to the Calcutta Circle, for its issues have been Rs. 1,84,540-3-0 : of this sum Rs. 21,981-3-0 were payments to public on account of worn copper coin.

29. Worn pice to the nominal value of Rs. 3,62,150 were received at the Calcutta Currency Office during the year. Small quantities of pice of coinages prior to 1835 still continue to be received, but the measures sanctioned by Government in order of 20th March 1873 have effected a marked improvement in the character of the copper coin in general circulation in Calcutta.

Coin Operations.

30. The following sums were received and issued at the respective offices during the year :—

Circles.	Received. Rs.	Issued. Rs.
Calcutta	3,78,61,745	2,88,46,790
Madras	37,39,625	47,29,505
Bombay	5,13,12,415	4,67,09,865
Allahabad	1,63,59,275	1,58,66,595
Lahore	1,62,76,690	1,38,74,615
Calicut	46,49,330	45,63,565
Cocanada	35,42,850	24,68,425
Nagpur	59,43,080	54,56,760
Kurrachee	41,33,850	49,23,465
Akola	23,39,790	21,56,070
Total ...	14,61,58,650	12,95,95,655

31. The following remittances of specie took place during the year under review :—

From Allahabad to Bombay	20 lakhs.
„ Lahore ditto	20 „
„ Nagpur ditto	20 „
„ Bombay to Kurrachee	6 „
„ Calicut to Madras	8 „
Total ...	74 „

Treasury Dealings in Notes.

32. The following statement shews the proportion of notes and coin held by Government Treasuries on the 31st March 1875 :—

Government or Administration.	Cash.	Notes.	Amount at disposal of Bank : details not known.
	Rs.		Rs.
Government of India	1,13,34,031	5,27,070	1,24,46,858
Lower Bengal	2,45,66,069	45,96,145	...
Assam	22,99,526	5,67,610	...
North-Western Provinces	1,66,26,839	21,92,225	...
Oudh	51,86,809	3,70,635	...
Punjab	1,10,60,621	9,81,240	...
Madras	1,86,66,782	41,14,025	60,96,950
Bombay	1,63,37,677	18,55,615	77,49,818
Central Provinces	39,17,696	1,82,445	...
British Burma	44,57,626	8,60,770	...
Totals of 31st March 1875 ...	11,44,53,676	1,62,47,780	2,62,93,626
Ditto 1874 ...		1,28,52,032	...
Ditto 1873 ...		1,84,84,445	...
Ditto 1872 ...		2,20,33,910	...

33. The transactions in notes at the several Treasuries in India during 1872-73, 1873-74, and 1874-75 have been as follows :—

	1872-73.	1873-74.	1874-75.
	Rs.	Rs.	Rs.
Receipts from Public in payment of Government dues...	3,05,52,145	3,29,27,095	2,96,69,920
Ditto in exchange for silver ...	3,37,90,700	3,18,89,050	2,89,17,665
Ditto for other notes	14,77,475	11,60,785	16,83,315
Total Receipts ...	6,58,20,320	6,59,76,930	6,02,70,900
Issues to Public in payment of Government dues ...	1,72,93,620	2,27,29,990	2,24,34,810
Ditto in exchange for silver	4,16,90,195	4,24,64,150	4,15,59,890
Ditto for other notes	15,99,505	11,60,785	16,83,315
	6,05,83,320	6,63,54,925	6,56,78,015

34. The total transactions in notes during the last five years have been the following :—

In 1869-70	... 635 lakhs.	
„ 1870-71	... 758 „	
„ 1871-72	... 1,095 „	
„ 1872-73	... 1,264 „	
„ 1873-74	... 1,323 „	excluding Branch Banks.
„ 1874-75	... 1,259 „	ditto.

which may be analysed thus,—

Government or Administration	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.	1874-75.
	Lakhs.	Lakhs.	Lakhs.	Lakhs.	Lakhs.	Lakhs.
Government of India	4	31	40	7	9	21
Lower Bengal	153	238	443	566	623	493
Ditto, Assam	...	..	...	...	...	36
North-Western Provinces	48	48	87	122	114	128
Oudh	8	7	13	22	36	41
Punjab	92	69	97	115	149	166
Madras	126	203	269	280	240	244
Bombay	179	132	92	93	90	89
Central Provinces	17	22	48	42	52	31
British Burma	8	8	6	17	10	5
Hyderabad	...	...	...	...	...	5
Total ...	635	758	1,095	1,264	1,323	1,259

35. The proportion of cash and notes in the following presidencies and provinces on the 31st March last was as follows :—

Government or Administration.	Cash.	Notes.
Lower Bengal	82 per cent.	18 per cent.
Ditto, Assam	76 „	24 „
North-Western Provinces	87 „	13 „
Oudh	93 „	7 „
Punjab	81 „	9 „
Madras	78 „	22 „
Bombay	89 „	11 „

36. Facilities are given for cashing notes at revenue treasuries as far as this can be done without inconvenience in other directions.

A list is subjoined (A) of Treasuries which, throughout the year, were able to cash notes at all times to the extent of the public demand on them; a second list (B) contains the names of Treasuries which were ordinarily able to cash notes on presentation; and a third, (C) the names of Treasuries at which this accommodation was not usually available.

CURRENCY AGENCIES.

37. During the year, 21 Currency Agencies have been open in the Bengal Presidency,—namely, 10 in Lower Bengal, 5 in the North-Western Provinces and Oudh, and 6 in the Punjab.

PROVINCE.	NOTES RECEIVED FOR SILVER.		NOTES ISSUED FOR SILVER.	
	1873-74.	1874-75.	1873-74.	1874-75.
Lower Bengal	8,82,900	7,73,100	16,02,400	12,15,900
Ditto, Assam	...	...	...	1,39,000
North-Western Provinces and Oudh ...	2,19,000	80,000	3,67,200	8,68,800
Punjab	1,08,000	*Nil*	17,82,000	14,88,500
TOTAL ...	12,09,900	8,53,100	37,51,600	36,52,200
			12,09,900	8,53,100
		TOTAL ...	49,61,500	45,05,300

38. Statement No. VIII shows the receipts of the department to have been Rs. 23,69,994-8-1.

The disbursements amount to Rs. 3,89,843-9-8, or Rs. 66,000 less than the expenses of last year, which is mainly accounted for by a decrease of Rs. 47,000 in the cost of Note Forms, and of Rs. 40,000 in the charges for remittance, while the expenditure under the other heads shows a slight increase.

The net profits of the year amount to Rs. 19,80,150-14-5 against Rs. 19,15,607-14-6 of last year.

It has been the practice heretofore, when distributing the interest realised among the circles, to calculate it in proportion to the average circulation of each circle. I am of opinion, however, that a more just and more useful comparison is obtained by taking the lowest amount in the year of the net circulation of each circle and distributing the interest in proportion to such amounts.

I give the amounts assignable on this principle, which, though not completely satisfactory, does in the main distribute the interest in proportion to the capacity of each circle to contribute to earn it.

APPEN

No.

No. 2300, dated 21st April 1876.

RESOLUTION—By the Government of India, FINANCIAL DEPT.

The average amount of notes issued under the Indian Paper Currency Act outstanding at the end of each month during the year 1874-75 was Rs. 10,67,04,071, being less by Rs. 47,47,836 (4·45 per cent.) than the average of 1873-74 and by Rs. 2,19,36,296 (17·05 per cent.) than the average of 1872-73.

2. It was explained in the Resolution upon last year's report that the depression in 1873-74 was due principally to the rapid depletion of the public balances to sustain the operations for the relief of the famine-stricken districts of Northern Bengal. These operations had not ceased at the beginning of the year 1874-75, and the public balances have not since resumed the level at which they stood before the famine. Obviously the amount of notes outstanding may be expected to expand when the Government reserves are large, and contract when they diminish. Moreover, the causes that produce an expansion or contraction of the public balances are very likely to produce analogous effects upon the balances of the Banks and at the disposal of trade generally. It is probable, in short, that the amount of money represented by notes issued under the Indian Paper Currency Act will bear some uniform proportion to the reserve of money held actually ready for use whether by the Government or private persons.

3. The minimum amount of notes outstanding was substantially the same in 1874-75 (Rs. 9,27,43,385) as in 1873-74 (Rs. 9,24,97,610), but taking the calendar year the minimum in 1875 (1,067 lakhs) shows a considerable increase over the minimum of 1874 (920 lakhs) owing to the pressure already spoken of having subsided.

4. Notes of the Allahabad and Lahore Circles for Rs. 2,58,41,005 were cashed in Calcutta under the peculiar provision of the law which makes the Government accept this obligation. The amount is rather less than the amount (Rs. 2,99,30,715) similarly encashed in the preceding year. These encashments are often largely connected with remittances of coin from Bombay to Calcutta, the cost of which is thus partly thrown upon the State.

5. The number of five-rupee notes in circulation is still small. The notes for Rs. 1,000 represent more than 60 per cent. of the whole amount outstanding, followed at a long distance by the notes for Rs. 10,000 representing 11 per cent., and for Rs. 100 representing 10 per cent.

6. Notes for Rs. 6,16,82,885 were cashed at offices other than those at which they were issued. Of this amount Rs. 4,10,32,815 were paid for notes the encashment of which was obligatory upon the Government under the law, and Rs. 2,16,50,070 were paid by the Government as a convenience to the public without any legal obligation. These amounts are besides the large sum paid for notes at the Government Treasuries throughout the country. No legal obligation lies upon the Government to encash any note at a Government Treasury. Nevertheless notes were encashed for all comers throughout the year at 115 treasuries and usually at 42 other treasuries. At only 30 treasuries this accommodation could seldom be given. Notes for Rs. 2,89,17,665 were encashed at the Government treasuries in 1874-75 and notes for Rs. 4,15,59,890 were issued for cash. These amounts shew rather a falling off from the two foregoing years, which is doubtless to be attributed to the contraction of the Government balances. The Government cannot give the same facilities in these matters with smaller balances as with larger balances.

7. The use of the Currency Offices as Agencies for the supply of small silver and copper appears to be increasing. The reform of the copper coinage in Calcutta has been satisfactorily accomplished at a considerable expense.

8. The statement contained in paragraph 32 of the proportion of notes and coin held in Government treasuries on the 31st March 1875 appears to be drawn upon a misleading principle. It is clear that for the purposes of this statement the Government balances at the Branch Presidency Banks must have been set aside and ear-marked as belonging to the Government, which is incorrect. The Government balances at the Branch Banks do not consist of particular coins and notes but of claims upon the Branch Banks.

9. The profits of the Department during the year were Rs. 19,80,151. The Government concur with the Comptroller General that the interest realised (or saved) should be distributed among the circles in proportion to the minimum, and not in proportion to the average amount of notes outstanding of each circle.

10. The Governor-General in Council has pleasure in acknowledging the careful administration of the Department by Mr. E. F. Harrison, the Head Commissioner, during the year. The principles upon which the Indian Paper Currency rests are, it is believed, absolutely sound; and the amount of the reserve invested not more than experience, which has now stood some severe tests, shows to be perfectly safe. The use of currency notes will doubtless increase with the requirements of trade in the interior of the country. Such progress and the growth of popular confidence in Paper Currency, however sound its basis, cannot but be slow, and any attempt by the Government artificially to promote the use of its notes before the circumstances of the country require them, is likely rather to retard than to increase their acceptability with the people.

ORDERED, that the report and this Resolution be published in the *Gazette of India* for general information.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27TH APRIL 1876.

GENERAL REMARKS.—Slight rain is reported from the Kistna, Kurnool, Tanjore, and Madura Districts of Madras. No rain has fallen in Bombay, except at Dharwar, and a shower at Sholapur: no crops remain on the ground. In Sind the river is rising. No rain is reported from the Central Provinces (where the harvest has closed with an excellent outturn), Berar, Rajputana, or Central India. In Bengal moderate rain has fallen in most of the Eastern and Central Districts and in Balasore: none in Behar, the Bhagalpur Division, Chota Nagpore, or other districts of Orissa: the harvesting of the *boro* rice and preparations for the early rice sowings continue. No rain is reported from the North-Western Provinces, Oudh, or the Punjab, except at Peshawar. The harvest is proceeding in all three provinces with a good outturn. Rain has fallen in Assam, more being still wanted in the upper districts. None is reported from Mysore, where want of drinking water is much felt: showers have fallen in Coorg. No rain is announced from British Burma.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (April 27th)	...	Slight rain in Narsarowpett; prices stationary; cholera 21 seizures, 7 deaths, in 3 taluks; small-pox in 5, and fevers in 4 taluks; epizoötic aphtha continues; dry fodder being used; markets well supplied locally.
Kurnool („ 26th)	...	Season generally good; rainfall very slight in Cumbum and Koilkuntla, none elsewhere; pasture and water scanty; dry fodder obtainable; markets well supplied; prices stationary, except in Cumbum, where *cholum* and paddy are rising, horse gram falling; cattle disease in 5 taluks; fever prevalent; cholera all over the district, except Sirwell taluk, severe in Pattikonda and Cumbum, seizures 266, deaths 114.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (April 27th)	Slight drizzle at Negapatam.	Rain scanty in some villages of Tritrapundi and Mannargudi taluks, elsewhere none; rivers dry; no water in tanks; water over anicuts none; cultivation, few dry crops here and there; standing crops withering in several localities; harvest almost over; pasture insufficient; prices almost stationary; markets well supplied; public health, cholera continues, number of seizures 34, deaths 26; small-pox and fever in some taluks; cattle disease in many places, some loss.
Malabar "	*Nil*	Markets well supplied; prices shew tendency to rise; bowel complaints in all taluks, except Kottayoom, Chirakal and Wynaad, 611 cases, 524 deaths; small-pox, fever, and cattle disease slight; pasture withered.
Madura "	...	Slight rain in some villages of Pereakolum taluk; crops withering; prices stationary; small-pox continues; people and cattle suffering much from intense heat; drinking water very scarce generally; cholera still continues in some parts of Dindigul and Pereakolum taluks.
		General Remarks.—General prospects same as last week; in Kistna, Kurnool and Tanjore Districts there has been some rain.
Bombay—(April 27th)		
Sind. (April 26th)		
Kurrachee ...	...	River at Kotri, gauge on 22nd, 7 feet 2 inches against 5 feet 8 inches on the same date last year; 3 fresh cases of small-pox in Kurrachee; no deaths; 12 cases recovering; weather close.
Shikarpur ...	...	Wheat crops mostly harvested; weather cooler.
Hyderabad ...	...	River rising fast.
Upper Sind Frontier ...	...	Weather warmer; *rabi* harvesting continues; cholera in Kachi decreasing, 115 deaths up to 18th.
Guzerat.		
Ahmedabad ...	...	No change.
Broach ...	...	
Surat ...	...	Nine cholera cases in Surat, 5 fatal; 2 at Olpád, 1 fatal; 7 at Bárdoli, 1 fatal; 6 at Chikhli, 1 fatal.
Kaira ...	...	Cholera in Nariád taluka, 98 cases, 51 deaths; 15 cases in Thásra taluka, 4 deaths; 3 cases in Mátar taluka.
Khandesh and Nasik.		
Khandesh ...	...	Fever continues in two talukas; weather hot; cotton market steady.
Nasik ...	...	Small-pox in Igatpuri.
Konkan.		
Tanna ...	...	Small-pox prevails in town of Tanna and in three talukas.
Deccan.		
Poona ...	...	No change.
Ahmednagar ...	...	
Sholapur	0·02	Weather very warm.
Satara ...	...	Sugar-cane crop good; cattle disease continues in Khánápur and Pátan; small-pox has appeared at Mahableshwar.
Southern Mahratta Country.		
Belgaum ...	...	Cholera continues in 6 talukas; slight thunder with rain.
Dharwar ...	1·0	Rice sowing in progress; sugar-cane thriving; public health and cattle disease the same as before.
Kanara ...		Ground being prepared for monsoon crop; cholera continues.
Kaladgi ...	...	Ground being cleared for next sowing; cholera continues, 147 deaths.
Kattywar.		
Rájkot ...	...	Weather very hot; water scarce; health good; cholera in Morvi taluka decreasing.
Wadhwán ...	...	Weather hot; cotton ginning progressing; cholera in Jhalawad, 252 cases, 104 deaths.
		General Remarks.—Cholera in Guzerat, Southern Mahratta Country and Kanara continues.
Bengal—(April 27th)		
Chittagong ...	A few drops.	Cholera extremely prevalent.
Noakhally ...	1·48	Cholera in some stations; other diseases more prevalent than usual.
Chittagong Hill Tracts...	1·85	
Hill Tipperah ...	1·98	
Backergunge ...	1·68	Cholera still continues, though not in epidemic form.
Furreedpore ...	*Nil*	Cholera abated.
Dacca ...	·37	Cholera worse.
Mymensingh ...	1·80	
Tipperah ...	*Nil.*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
24-Pergunnahs ...	*Nil*	Cholera prevalent in certain thanas.
Jessore ...	*Nil*	
Nuddea ...	·39	
Moorshedabad ...	·10	Cholera bad in Jellinghi, but abated in Rampore Hat and Jungypore.
Pubna ...	·45	Cholera abated.
Rajshahye ...	*Nil*	Cholera still prevalent in certain parts.
Bogra ...	A few drops.	
Malda ...	*Nil*	Twenty-nine deaths from cholera.
Dinagepore ...	·65	Cholera and small-pox prevalent.
Rungpore ...	·85	Cholera broken out in various directions; cattle disease on the north-east.
Cooch Behar ...	·34	
Jalpaiguri ...	1·97	
Darjeeling ...	·29	
Midnapore ...	*Nil*	
Howrah ...	*Nil*	
Hooghly ...	·10	Cholera abating at Sadr, but bad in parts of the interior.
Burdwan ...	·11	Cholera prevalent.
Bankoorah ...	·08	Few cases of sporadic cholera.
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	*Nil*	Health improving.
Bhagalpur ...	*Nil*	General health good, though small-pox and cholera reported from various parts.
Monghyr ...	Return not received.	
Purneah ...	*Nil*	Cholera still prevalent.
Durbangah ...	*Nil*	
Mozufferpore ...	Return not received.	
Sarun ...	*Nil*	Cholera in Revelgunge.
Chumparun ...	*Nil*	
Patna ...	Return not received.	A good deal of cholera, especially in the city.
Gya ...	*Nil*	Cholera and small-pox prevalent.
Shahabad ...	Return not received.	Cholera in Sasseram.
Hazaribagh ...	*Nil*	Cholera in the interior.
Lohardugga ...	*Nil*	Small-pox and cholera still prevalent in parts.
Manbhoom ...	*Nil*	Cholera rife, except in Purulea.
Singbhoom ...	*Nil*	Prevalence of cholera exaggerated in last report; it is bad only in the northern part.
Balasore ...	·49	Sporadic cholera still exists.
Cuttack ...	*Nil*	
Pooree ...	*Nil*	Cholera raging.
		General Remarks.—Rain more or less is reported to have fallen in nearly half the number of districts in Bengal, but in a few places there are still complaints of want of rain. The *boro* or spring rice crop is being harvested. Lands are being prepared for the sowing of early rice, but in many places the seeds have already been sown and are germinating fairly. The crop report in the district of Cooch Behar is unfavourable.
N. W. P.—		
Benares (April 26th)	...	No change.
Jhansi (" 27th)	...	
Agra (" 26th)	*Nil*	Nothing new.
Meerut " "	...	Weather clear; harvest progressing.
Bareilly " "	...	Nothing new.
Almora (" 24th)	...	Weather fine and suitable for sowing of rice crops.
Punjab—		
Delhi (April 26th)	*Nil*	Reaping almost completed; health good.
Hissar "	*Nil*	Outturn of harvest favourable; a few cases of small-pox.
Umballa "	*Nil*	Crops harvested; health good.
Jullundur "	*Nil*	Harvest progressing; health good.
Lahore "	*Nil*	Crops good; health good.
Mooltan "	*Nil*	Crops cut; health good.
Dera Ismail Khan "	*Nil*	Health and harvest good.
Rawalpindi "	*Nil*	Crops and health good.
Pesháwar "	·1	Agricultural prospects and health good.
		General Remarks.—*Rabi* crops nearly gathered in; outturn good; health of province good.
Oudh—		
Lucknow (April 26th)	*Nil*	*Rabi* being harvested; prospects favourable, and public health generally good.
Sitapur "		
Fyzabad "		

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godavari (Apl. 23rd)	...	Weather hot; health good; prices steady.
Sambalpur ...	...	Days hot, nights cool; fever prevalent.
Bilaspur ...	...	Crops harvested; small-pox and cattle disease continue; prices falling.
Raipur ...	...	Weather hot; *rabi* harvested; health good; prices easy.
Chanda ...	...	Threshing of *rabi* continues; cholera in places.
Chhindwára ...	...	Weather warm; sugar-cane thriving; health good; prices stationary.
Betul (24th)	...	Weather hot; *rabi* harvested; sugar-cane doing well; 12 cases of cholera, 7 fatal; prices falling.
Balaghât ...	...	Threshing of *rabi* completed; small-pox continues; prices risen.
Bhandara (25th)	...	Weather clear and close; threshing of *rabi* almost completed, outturn favourable; fever and small-pox continue.
Nagpur (26th)	...	Weather hot; ploughing for *kharif* continues; prices steady.
Wardha ...	...	Weather clear; cattle disease continues.
Nimar ...	...	Prices of *jowar* and *bajra* rising.
Hoshangabad ...	...	Weather hot; threshing of *rabi* continues; 99 cholera cases, 44 fatal; prices stationary.
Narsinghpur (26th)	...	Threshing of *rabi* continues; health good; prices falling.
Jubbulpore ...	...	Weather clear and cool for the season; *rabi* harvest excellent; small-pox and cattle disease continue.
Saugor ...	...	Weather hot; threshing of *rabi* continues; harvest excellent; health good; prices easy.
Seoni ...	...	Weather hot; winnowing of *rabi* continues; cholera broken out towards Keolari; prices steady.
Damoh ...	...	Prospects good; prices stationary.
Mandla ...	...	Prospects of *rabi* good; cholera continues; prices stationary.
		General Remarks.—The deaths from cholera are not numerous and the disease has not spread except to the Seoni district from Jubbulpore; no deaths are reported this week, and in Mandla, Betul and Hoshangabad the disease is abating.
British Burma— (April 27th.)		
Arakan Division.		
Akyab	...	Twenty-nine deaths in town from cholera; sporadic cholera prevails in portions of Akyab district.
Pegu Division.		
Rangoon ...	...	Public health good; slight cattle disease.
Thonkwa ...	...	Health good.
Henzada ...	...	Health good; one case of small-pox.
Prome ...	...	One death in town from cholera; small-pox prevails all over the district, increasing in Prome and Shewdoung
Thayetmyo ...	...	Cholera travelling up east bank, 50 deaths, none in town.
Bassein ...	...	Health good; cholera in Theogwin.
Tenasserim Division ...	...	Health good.
Assam—		
Gauhati (April 27th)	·72	Mornings clear and cool; days hot, often cloudy; slight showers during last four days; rain still needed for tea and rice crops; public health good.
Sylhet „	0·98	Prospects unchanged.
Hyderabad Assigned Districts—		
Umraoti (April 27th)	...	Land under preparation; public health good.
Mysore and Coorg— (April 27th)	1·20 in Coorg	No rain in Bangalore and three other districts; agricultural prospects in Coorg are good, but cholera has appeared; cholera is increasing in all districts of Mysore province, excepting the Mysore district; want of drinking water beginning to be felt everywhere.
Rajputana—		
Marwar (April 22nd)	...	Weather has been very warm during the week; hot winds blowing; small-pox still prevalent.
Bickanere („ 19th)	...	Hot winds blowing; heat intense; fever prevalent in town.
Meywar („ 14th)	...	Weather seasonable; health, water-supply, and prospects good.
Harowtee („ 15th)	...	Harvest completed; health good.
Ulwar („ 26th)	...	Health good; wells filled.
Bhurtpore („ 27th)	...	No change; *rabi* harvested, outturn fair.
Jeypore ...	...	Harvesting nearly finished favourably; health good.
Ajmere ...	...	Seasonable hot weather; health improved.
Central India—		
Indore (April 26th)	...	Rewah is not free from cholera and small-pox; otherwise all is well in Central India.
Gwalior „	...	
Neemuch „	...	
Rutlam „	...	
Satna „	...	

A. O. HUME,
Secretary to the Government of India.

G. A. SEARLE, *Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

The 4th April 1876.

Continuation sheets of the Supp[illegible] published at Calcutta on this date.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

CHRONOLOGICAL TABLE OF ACTS OF THE GOVERNOR GENERAL IN COUNCIL.

[*** With respect to entries in the fourth column the practice has been as follows:—

(*a*).—Where an Act has been wholly repealed more than once, the latter repealing Act has alone been entered.

(*b*).—Where an Act has been partially repealed and afterwards wholly repealed, the total repeal only is entered. A repeal of the unrepealed portions of an Act is treated as a total repeal.

(*c*).—Partial repeals covered by later partial repeals are omitted.

(*d*).—Where an Act has been locally repealed and afterwards repealed by an Act whose operation is unrestricted, the latter repealing Act has alone been entered.

(*e*).—Local repeals covered by later local repeals are omitted.]

Year.	Number.	Subject-matter.	How repealed or otherwise determined.

SIMLA;
The 1st May, 1876.

WHITLEY STOKES,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4TH MAY 1876.

GENERAL REMARKS.—Slight rain has fallen in Tanjore and Malabar, but none elsewhere in the Madras Presidency. In Bombay showers are reported from Poona, Sholapur, Dharwar and Kanara: in Sind the river continues to rise. No rain has fallen in the Central Provinces, Berar, Rajpootana, or Central India. In Bengal the rainfall has been slight, and for the most part confined to the Central districts: there has been a good fall in Cooch Behar; want of rain is generally felt, but prospects are for the present good. In Assam heavy and beneficial rain has fallen. No rain is reported from the North-Western Provinces, Oudh, or the Punjab: the harvest in the last-named province is nearly gathered. No rain has fallen in British Burma. From Mysore half an inch and in Coorg two inches are reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (May 4th)	*Nil*	Prices steady; cholera, 5 seizures, 2 deaths in Palnad; small-pox in 5, fever in 3 taluks; epizoötic aphtha and dysentery in 3 taluks; dry fodder is used; markets well supplied locally.
Kurnool („ 3rd)	*Nil*	Season generally good; second crop paddy being reaped in Nandial, threshing in other taluks; markets well supplied; prices stationary, except in Ramalkota and Nandial, where paddy and rice are falling; in the former *cholum, korra,* and horse gram rising; pasture and water scanty; dry fodder obtainable; cattle disease in 5 taluks; fever prevalent; cholera all over the district, seizures 200, deaths 119.
Tanjore („ 4th)	·76 at Negapatam.	Rain elsewhere scanty and partial; rivers almost dry; no water in tanks; water over anicuts none; cultivation, few dry crops here and there; standing crops generally not doing well; harvest almost over; pasture insufficient; prices almost stationary; markets well supplied; public health, cholera continues, number of seizures 39, deaths 10; small-pox and fever in some taluks; cattle disease in many places, some loss.
Malabar („ „	·10	Rain insufficient for cultivation; markets well supplied; prices show a tendency to rise; bowel complaints in all taluks, except Cherakal, 369 cases, 306 deaths; small-pox prevalent; fever and cattle disease slight; pasture withered.
Madura ...	...	Not received.
		General Remarks.—General prospects same as last week; in Tanjore and Malabar there has been some rain.
Bombay— (May 4th)		
Sind. (May 3rd)		
Kurrachee ...	...	River at Kotri on 29th April 7 feet 11 inches, against 6 feet 7 inches on the same date last year; great heat; 4 cases of small-pox remaining in Kurrachee, the rest have recovered; one case in Mirpur Batoro; measles in Malir Tapa.
Shikarpur ...	...	*Rabi* crops mostly harvested; hot winds prevailing; nights very cool; river 7 feet 7 inches, being 3 feet higher than last year; public health good.
Hyderabad ...	...	River rising; fever and small-pox continue.
Upper Sind Frontier ...	...	Dust-storms prevailing; *rabi* harvesting continues; *khárif* operations progressing; cholera in Kachi decreasing.
Guzerat.		
Ahmedabad ...	...	Cholera as before; in city 9 cases, 3 deaths.
Surat ...	...	Fifteen cholera cases in Surat, 12 fatal; 47 at Bárdoli, 7 fatal; 16 at Chikhli, 5 fatal.
Kaira ...	...	Cholera cases 95, deaths 50; cholera mostly prevalent in Nariád taluka.
Broach ...	...	No change.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Khandesh and Nasik.		
Khandesh ...	...	Small-pox and cattle disease prevailing in Peta Ráver; fever and cough continue.
Nasik ...	...	Small-pox in Igatpuri.
Konkan.		
Tanna ...	...	Small-pox prevails in town of Tanna and in 3 talukas.
Deccan.		
Poona ...	0·10	Hot weather continues; slight cattle disease in Purandhar and Indápur; public health good.
Ahmednagar ...	...	No change.
Sholapur ...	0·22	Slight cattle disease in Málsiras; weather continues warm.
Satara ...	...	Weather warm and cloudy; small-pox and cattle disease decreasing.
Southern Mahratta Country.		
Belgaum ...	...	Cholera continues.
Dharwar ...	0·91	
Kanara ...	...	Weather hot; preparations for monsoon crop continue; slight rain above Ghát; cholera continues.
Kaladgi ...	...	Cattle disease slightly prevailing; 107 deaths from cholera.
Kattywar.		
Rájkot ...	...	Weather continuing sultry; cholera prevailing in some villages of Dholaj; 53 cholera cases in Morvi district, 25 fatal.
Wadhwán ...	...	Weather hot; cholera in Jhalawad, 162 cases, 86 deaths.
		General Remarks.—Cholera continues in Guzerat, Kattywar, Southern Mahratta Country and Kanara; slight rain in Poona, Sholapur and Southern Mahratta Country.
Bengal—(May 4th)		
Chittagong ...	Few drops.	Cholera very prevalent.
Noakhally ...	*Nil*	Cholera still prevails in interior; fever slightly increased.
Chittagong Hill Tracts...	*Nil*	
Hill Tipperah ...	*Nil*	
Backergunge ...	·2	Cholera prevalent, but not so bad as it was before.
Furreedpore ...	·35	Cholera nearly left.
Dacca ...	·61	Cholera raging in Manickgunge.
Mymensingh ...	·1	
Tipperah ...	*Nil*	
24-Pergunnahs ...	*Nil*	Scattered cases of cholera reported from Basirhat, Baraset, Satkhira and Barripore.
Jessore ...	1·06	
Nuddea ...	*Nil*	
Moorshedabad ...	*Nil*	Cholera abated.
Pubna ...	*Nil*	Cholera disappeared, but a few sporadic cases both of cholera and small-pox reported from Serajgunge.
Rajshahye ...	*Nil*	Cholera abated.
Bogra ...	*Nil*	
Malda ...	·01	Four deaths from cholera.
Dinagepore ...	·185	Thirty-three deaths from cholera, 10 from small-pox, which is increasing, cholera decreasing.
Rungpore ...	·60	
Cooch Behar ...	1·63	Cholera very prevalent.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on Imports and Exports are not distinguished.

2. The figures for British Burma for 1876-77 include the collections at *Tavoy* and *Mergui* for March 1876 instead of for April 1876.

A. O. HUME,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11TH MAY 1876.

GENERAL REMARKS.—Slight rain has fallen in all districts of Madras except Kurnool: some has also fallen in Mysore. From Assam copious and very beneficial rain is reported. In Bengal there have been heavy falls in Dacca, Tipperah, Rungpore, Cooch Behar and Purneah, good rain in Bogra, Chittagong, Jalpaiguri, Darjeeling and Bhagalpur, and lighter falls in several other districts, except in the Chota Nagpore and Orissa divisions. No rain is announced from any other province. In Sind the Indus continues to rise. In Bombay and the Central Provinces preparations for the autumn crops are beginning. In Bengal the sowing of early rice is progressing, and rain is much wanted where it has not fallen. The harvest is over in the North-Western Provinces, Oudh, and the Punjab: in the latter province the outturn has been fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (May 11th)	...	Slight rain in Bunder and Nuzivid; prices generally steady; cholera, 39 seizures, 18 deaths in Repalli, Nuzivid and Narsarowpett taluks; mild small-pox general; fever in some taluks; no pasture left; markets well supplied locally.
Kurnool („ 10th)	*Nil*	Season generally good; second crop paddy being harvested in Ramalkota, and promising in other taluks; pasture and water scanty; markets well supplied; prices steady, except in Nundial and Pattikonda, in the former paddy and rice rising, in the latter *cholum* falling; cattle disease in 4 taluks; fever prevalent; cholera all over the district, except in Sirwell taluk, seizures 57, deaths 36.
Tanjore („ 11th)	·83 at Negapatam.	Rain elsewhere partial and scanty; rivers and tanks generally dry; water over anicuts none; cultivation, few dry grains here and there; standing crops generally not doing well; harvest, some dry grains; yield moderate; pasture insufficient; prices almost stationary; markets well supplied; public health, cholera continues, number of seizures 28, deaths 19; small-pox and fever in some localities; cattle disease in several parts; some loss.
Madura („ „)	·3 at Madura.	Weather cloudy at times; public health good; prices stationary; crops withering.
Malabar („ „)	·6	Rain insufficient for cultivation; markets well supplied; prices show a tendency to rise; cholera in all taluks, except in Cherakal and Kottayam, 320 cases, 295 deaths; small-pox prevalent; fever and cattle disease slight; pasture improving.
		General Remarks.—General prospects same as last week; no rain in Kurnool only.
Bombay— (May 11th)		
Sind.—(May 10th)		
Kurrachee ...	...	River at Kotri on 6th, 9 feet 5 inches against 6 feet 4 inches on the same date last year; Bughar flowing since 1st May; no fresh case of small-pox in Kurrachee since 30th April; 2 cases recovering; village of Jhandani in Sehwan taluka being eroded by river; encroachment continues; at Unarpur 5 houses carried away; weather cloudy and cool.
Shikarpur ...	...	River 4 inches higher than on the same date last year; weather hot; fever in 8 talukas; *peshras* crops looking well.
Hyderabad ...	...	No change.
Upper Sind Frontier ...	...	Weather hot; *rabi* crops nearly reaped; cotton and spring crops promising; cholera reported from Gandawah.
Guzerat.		
Ahmedabad ...	...	Cholera in Dhandhuka and Viramgám.
Kaira ...	...	Two hundred and thirty-one cholera cases, 104 deaths.
Surat ...	...	Sixteen cholera cases in city, 12 fatal; 46 cases in Wálod, 18 fatal.
Broach ...	...	Cholera has appeared in Broach, A'mod and Ankleswar; weather very warm.
Khandesh and Nasik.		
Khandesh ...	...	Weather warmer; cotton season closing.
Nasik ...	...	Small-pox in Igatpuri.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan.		
Tanna ...	...	Small-pox in Bassein and Panwel talukas, 20 deaths in Bassein, decreasing at Tanna.
Deccan.		
Poona ...	...	Weather continues hot; cattle disease in Khed and Purandhar; fever in Khed and Poona; with this exception public health good.
Ahmednagar ...	...	No change.
Sholapur ...	...	Cattle disease in Málsiras; weather warm.
Satara ...	...	Ground being prepared for monsoon crop; public health improving.
Southern Mahratta Country.		
Belgaum ...	...	No change.
Dharwar ...	...	Ploughing for early crops commenced; public health improving; no change as regards cattle disease.
Kanara ...	...	Weather cloudy; preparations continue for monsoon crop; cholera decreasing.
Kaladgi ...	...	Outturn of cotton 6 annas in the rupee; 158 deaths from cholera.
Kattywar.		
Rájkot ...	...	Weather very hot; cholera prevalent throughout the Province of Kattywar; no cases at Rájkot.
Wadhwán ...	...	Weather hot; cotton ginning continues; cholera in Jhalawad, 227 cases, 126 deaths.
		General Remarks.—Cholera prevalent in Kattywar and Guzerat; decreasing in Southern Mahratta Country.
Bengal—(May 11th)		
Chittagong ...	1·95	
Noakhally ...	*Nil*	General health better; stray cases of cholera.
Chittagong Hill Tracts...	„	
Hill Tipperah ...	„	
Backergunge ...	„	A good deal of sickness; cholera and fever still present.
Furreedpore ...	·08	
Dacca ...	4·13	
Tipperah ...	2·17	
Mymensingh ...	*Nil*	
24-Pergunnahs ...	·09	Cholera in Baraset, Barripur and Satkhira.
Jessore ...	·04	
Nuddea ...	·07	
Moorshedabad ...	·4	Cholera decreased.
Pubna ...	·41	Cholera abating in Pubna, but is present at Mowpore and Chohali.
Rajshahye ...	*Nil*	Cholera and small-pox nearly disappeared.
Bogra ...	1·79	
Malda ...	*Nil*	Thirteen deaths from cholera.
Dinagepore ...	Return not received.	Cholera abating; small-pox in several places.
Rungpore ...	2·92	
Cooch Behar ...	3·56	Cholera very prevalent but not severe.
Jalpaiguri ...	1·48	
Darjeeling ...	1·10	
Midnapore ...	·32	
Howrah ...	·16	
Hooghly ...	·39	Cholera abating.
Burdwan ...	·21	Cholera decreasing.
Bankoorah ...	·64	A few cases of cholera.
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	·53	Cholera and small-pox hanging about.
Bhagalpur ...	1·02	General health very good; small-pox and cholera less frequent.
Monghyr ...	·40 (Previous week *nil.*)	
Purneah ...	2·11	Cholera very prevalent in the north and spreading westward.
Durbangah ...	·3	Sporadic cholera and cases of small-pox.
Mozufferpore ...	·65	
Sarun ...	*Nil*	Cholera and small-pox at Sewan and Sadr station, but the former was only local and has considerably abated.
Chumparun ...	·21	
Patna ...	Return not received.	A good deal of cholera.
Gya ...	*Nil*	Cholera and small-pox prevalent.
Shahabad ...	Return not received.	Cholera prevailing; small-pox in Bhubhooah.
Hazaribagh ...	*Nil*	Cholera in the interior.
Lohardugga ...	...	
Manbhoom ...	*Nil*	Unhealthy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Singbhoom ...	*Nil*	Cholera abated in mofussil; no fresh cases in Sadr station.
Balasore ...	„	Cholera broke out with renewed virulence though sporadic; small-pox occasionally fatal.
Cuttack ...	„	General health fairly good, but a little cholera here and there.
Pooree ...	„	Cholera raging.
		General Remarks.—There has been rain in many districts of Bengal during the week; in the districts where rain has not fallen it is much wanted. The harvesting of *boro* or spring rice is going on; indigo, cotton, mulberry, *sessamum*, millets and jute are progressing favourably; sugarcane is still being planted; the sowing of early rice has become general, but is retarded in places from want of rain.
N. W. P.—		
Benares (May 10th)	...	No change; wind easterly.
Allahabad („ „)	...	No change.
Agra („ „)	*Nil*	Nothing new.
Meerut („ „)	...	No change.
Bareilly („ „)	...	Crops being cleared; sugarcane irrigation commenced.
Almora („ 8th)	...	No change.
Punjab— (May 10th)	*Nil*	Harvest fair; health of province good.
Oudh—		
Lucknow (May 10th)	*Nil*	*Rabi* harvested; prospects favourable; public health generally good.
Sitapur („ „)	„	
Fyzabad („ „)	„	
Central Provinces—		
Upper Godavari (May 6th)	...	Weather cloudy and close; few cases of small-pox.
Sambalpur ...	...	Weather cloudy and hot; few cases of cholera.
Bilaspur ...	...	Weather hot; small-pox and cattle disease continue; prices steady.
Raipur ...	...	Weather hot; ploughing for *kharif* commenced; health good; prices easy.
Balaghât ...	...	Ploughing for *kharif* continues; small-pox prevalent; prices steady.
Chanda (May 7th)	...	Harvest over; few cholera cases.
Chhindwára („ 8th)	...	Prospects unchanged; health good; prices steady.
Betul ...	...	Weather warm; sugarcane doing well; 124 cholera cases, 54 fatal; prices steady.
Bhandara (May 9th)	...	**Weather cloudy and close; ploughing for *kharif* continues; fever and small-pox prevalent; prices easy.**
Nagpur („ 10th)	...	**Weather hot; ploughing for *kharif* continues; few cases of cholera in Umrer tahsil; prices rising.**
Wardha ...	...	Weather cloudy; cow-pox prevalent.
Nimar ...	...	Weather hot; small-pox continues; 2 doubtful cholera cases.
Hoshangabad ...	...	*Rabi* harvesting continues; small-pox continues; cholera increasing.
Narsinghpur ...	...	Threshing and winnowing of *rabi* continue; health good.
Jubbulpore ...	...	Ploughing for *kharif* continues; fever, small-pox and cattle disease prevalent.
Saugor ...	...	Weather warm; winnowing of *rabi* completed, outturn good; cattle disease prevalent.
Seoni ...	...	Weather hot; winnowing of *rabi* completed; no cholera cases reported.
Mandla ...	...	Health good; no cases of cholera reported; prices stationary.
Damoh ...	...	Health good; prices stationary.
		* *General Remarks*.—Cholera seems spreading in the Hoshangabad district. The *rabi* harvest is nearly over in all districts, and preparations for the *kharif* are in progress.
British Burma— (May 11th)		
Arakan Division ...	...	Cholera still continues in Akyab and portions of the district, 7 deaths reported from Myouk-Toung hill tracts; fever prevalent in Akyab district, and cattle disease in two townships.
Pegu Division.		
Rangoon ...	...	General health good; slight cattle disease in Syriam and Pegu.
Bassein ...	...	Health good.
Henzada ...	...	General health good; slight cholera in Myanoung and Monio townships.
Prome ...	...	No cholera since 29th April; small-pox decreasing at Prome and Shwedoung.
Thayetmyo ...	...	Cholera disappearing; diarrhœa and fever general.
Tenasserim Division ...	...	General health good; 10 fatal cases of choleraic diarrhœa in Salween township.

* In the General Remarks attached to the Central Provinces Weather and Crop Report printed at page 534 of the Supplement to the *Gazette of India* of the 29th April 1876, for the words "the disease has not spread except to the Seoni district from Jubbulpore," read "the disease has not spread except to the Seoni district; from Jubbulpore no deaths are reported this week, &c."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauhati (May 11th)	3·36	More or less overcast; showers of rain daily, unusually cool for the season; rain favourable to the growth of rice crop and tea.
Barpetá („ „)	10·54	
Sylhet („ „)	16·93	Spring rice reaped with fair outturn; cultivation of later crops actively progressing.
Hyderabad Assigned Districts—		
Amráoti (May 11th)	...	Weather hot; cow-pox amongst cattle in Ellichpur district, many deaths from the disease, other parts of the province healthy.
Mysore and Coorg—		
(May 11th)	·80 in Bangalore Cantonment, none in Coorg.	Agricultural prospects are good in Coorg; cholera decreasing in Coorg and abated in Túmkúr and Chitaldroog, but other five districts shew an increase over last week.
Rajputana—		
Serohi (May 7th)	...	Weather seasonable; health very good; thermometer 101°.
Meywar (April 28th)	...	Steady hot winds; health good.
Marwar (May 6th)	...	No change since last week; health good; thermometer 98°.
Soojangurh (April 29th)	...	Weather exceedingly hot; thermometer 95°.
Harowtee (May 6th)	...	Weather seasonable; health good.
Ulwar („ 10th)	...	Heat great; health good.
Bhurtpore („ 11th)	...	Clear sky; mornings cool and pleasant.
Jeypore ...	....	No change; health good.
Ajmere ...	*Nil*	Hot high winds; health fair.
Central India—		
Indore (May 10th)	*Nil*	Prospects and health generally good; cholera and small-pox still about Rewah.
Gwalior („ „)	„	
Neemuch („ „)	„	
Rutlam („ „)	„	
Sutna („ „)	„	

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

CHRONOLOGICAL TABLE OF MADRAS REGULATIONS AND ACTS.

[*** With respect to entries in the fourth column the practice has been as follows :—

(*a*).—Where an Act has been partially repealed and afterwards wholly repealed, the total repeal only is entered. A repeal of the unrepealed portions of an Act is treated as a total repeal.

(*b*).—Partial repeals covered by later partial repeals are omitted.

(*c*).—Where an Act has been locally repealed and afterwards repealed by an Act whose operation is unrestricted, the latter repealing Act has alone been entered.

(*d*).—Local repeals covered by later local repeals are omitted.]

EXPERIMENTS IN ENGLAND ON THE MANUFACTURE OF IRON FROM INDIAN ORES. &c.

No. 1133 R., dated Simla, the 8th May 1876.

MEMORANDUM.—At the recommendation of the Geological Survey Department, specimens of iron ore supplied by the Bengal Iron Works Company, and samples of coal and limestone procurable in the vicinity of the iron mines, were sent to England for the purpose of experiment early last year.

2. The samples of coal were supplied by the Bengal Coal Company, Limited, by the new Beerbhoom Company, and by the Ranigunj Coal Association.

3. Her Majesty's Secretary of State has now furnished the results of some experiments conducted by Dr. C. W. Siemens, F. R. S.

4. Dr. Siemens reports as follows :—

"The iron ore which by analysis gave—

	I.	II.
Peroxide of iron	68·72	65·540
Protoxide of manganese	2·67	2·782
Lime and magnesia	2·10	Traces.
Alumina	5·14	8·820
Silica	10·17	12·930
Phosphoric acid	·44	·099
Water	11·13	10·100
	100·47	100·271

(I, by E. Riley; II, by H. Foster. There are also traces of sulphur)

contains about 48 per cent. of metallic iron, and is applicable to the production of wrought iron by the direct process, but requires the addition of lime and silica in order to produce a fusible slag.

"The limestone supplied is of an inferior quality, as it contains about 22 per cent. of silica, 6 per cent. of alumina, and only 36 per cent. of lime. The high percentage of silica renders it almost useless for blast furnace purposes, but makes it all the more suitable for admixture with the ore, as required in the direct process.

"The coal supplied varies in quality, part being highly bituminous, and part less so; it contains on the average about 56 per cent. of fixed carbon, and is well suited both for the production of gas in my gas-producer, and for mixing with the ore in the rotator. The materials were, therefore, favourable for yielding good results in the rotator, and my anticipations in this respect have been realized, although the number of trials are not sufficient to enable me to state definitely what yield of iron could be depended on in practical working. I have no hesitation, however, in giving the following estimate of the quantities of materials requisite to produce 1 ton of puddled bar:

Iron ore ... 2¾ tons.
Limestone ... 6 cwt.
Coal ... 15 „ in the rotator } = 2¼ tons of coal, containing 1¼ tons of fixed carbon.
„ ... 1½ tons in the producers }

"From these figures it would not be difficult to estimate the cost of materials per ton of iron produced, to which must be added cost of labour and general expenses, which may be taken roughly in this country at from 22 to 23 shillings per ton. This would not include the cost of rolling and further manipulation of the iron after leaving the rotator.

"QUALITY OF THE METAL.—The iron produced by the direct process differs in appearance from that made by ordinary puddling, in showing a darker fracture, which seems to be due to a finer sub-division of particles. On submitting it to chemical tests it is found to be very free from sulphur and phosphorus, containing as an admixture only a small proportion of silicon, to which cause also the dark fracture may be partly due. When tested by Mr. Kirkaldy, it gave satisfactory results as regards toughness and absolute strength; it has also proved to be an excellent material for the manufacture of cast-steel by what is known as the 'Open Hearth' or 'Siemens-Martin' process. When visiting the Darlaston works on the 6th of January last, I saw blooms made at Towcester from the Indian ore, rolled out into bars and thin sheets, and the opinion of the practical iron-workers was that the iron behaved extremely well."

It will thus be seen that both as regards the percentage of metallic iron in the ore and the quality of the manufactured iron, the results obtained by the experiments are satisfactory and encouraging.

ORDER.—Ordered, that this Memorandum be forwarded to the Home Department for publication in the Supplement to the *Gazette of India* for general information.

H. DRUMMOND, *Colonel, R. E.,*
Deputy Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18TH MAY 1876.

GENERAL REMARKS.—In Madras the rain has been slight and none has fallen in Kurnool and Malabar: in the latter district the want of rain is retarding agricultural operations. From Bombay the only rainfall reported is a shower at Kaira and slight rain in Satara and Sind: in the latter province the river is at present lower than at this time last year; rain is wanted for sowings in the South Mahratta Country. In Berar and the Central Provinces there has been no rain; preparations for the *kharif* are progressing. There has been no rain in Central India; in Rajputana showers are reported from Jeypore and Bhurtpore. In Bengal the weather has been stormy and rainy in the North, Central and Eastern districts: in the southern districts of the Delta and in Chota Nagpore and Orissa the fall has been insufficient: in the Bhágalpur and Patna divisions the rain has been very partial and scanty, and in some districts none has fallen. Ploughing and sowing are going on where the rainfall has permitted. No rain has fallen in Oudh. In the North-Western Provinces rain is reported from Agra, Meerut, Bareilly and Almora. In the Punjab there have been showers throughout the province except in Peshâwar and Ráwal Pindi. Good rain has fallen in Assam. In Mysore there has been an abundant fall, and prospects are now good. None has fallen in British Burma.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (May 18th)	...	Slight rain in 6 taluks; heat excessive; prices steady; cholera 53 seizures, 16 deaths in 5 taluks; small-pox prevalent; epizoötic aphtha and dysentery general; no pasture left; markets well supplied locally.
Kurnool („ 17th)	*Nil*	Season generally good; second crop paddy being harvested; pasture and water scanty; markets well supplied; prices rising in Cumbum; *cholum* and rice falling in Koilkuntla and Nundial, respectively; other articles stationary; cattle disease in 4 taluks; fever prevalent; cholera all over the district, seizures 99, deaths 56.
Tanjore („ 18th)	*Nil* at Negapatam.	Rain elsewhere scanty and partial; freshes in river just coming; no water in tanks; water over anicuts none; cultivation, few dry grains here and there; standing crops generally not doing well; harvest some dry crops; yield moderate; pasture insufficient; prices almost stationary; markets well supplied; public health, cholera continues, number of seizures 69, deaths 30; small-pox and fever in some parts; cattle disease in some localities, some loss.
Madura („ 17th)	1·1	Evenings cloudy, attended sometimes with slight rain; standing crops in some places beginning to look up; public health generally good; prices moderate; 64 cases of cholera, with 54 deaths in Shevagenga zemindari, a few cases in Madura town.

A. O. HUME.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

CHRONOLOGICAL TABLE OF BOMBAY REGULATIONS AND ACTS.

[*** With respect to entries in the fourth column the practice has been as follows:—

(*a*).—Where an Act has been partially repealed and afterwards wholly repealed, the total repeal only is entered. A repeal of the unrepealed portions of an Act is treated as a total repeal.

(*b*).—Partial repeals covered by later partial repeals are omitted.

(*c*).—Where an Act has been locally repealed and afterwards repealed by an Act whose operation is unrestricted, the latter repealing Act has alone been entered.

(*d*).—Local repeals covered by later local repeals are omitted.]

PART I.—REGULATIONS PASSED BY THE GOVERNOR OF BOMBAY IN COUNCIL.

SIMLA;
The 17th May 1876.

WHITLEY STOKES,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25TH MAY 1876.

GENERAL REMARKS.—Scanty rain has fallen throughout the Madras Presidency: prospects are reported satisfactory. In Bombay rain has fallen only in Dharwar; it is much wanted to enable the monsoon sowings to begin. Showers have fallen in some places in Sind, where the river is rising. From Berar, the Central Provinces, and Central India no rain is reported; ploughing for the *kharif* crop is going on. Showers have fallen in parts of Rajpootana. From Bengal general rain is reported, abundant in the Eastern and Central districts, scanty in Chota Nagpore and Orissa, and light and partial in Behar and the Bhágalpur division: in Patna, Shahabad, Sarun and Monghyr more has fallen; ploughing and sowing operations are proceeding vigorously. In Assam good rain has fallen and prospects are favourable. In the North Western Provinces showers fell at Jhánsi and Agra, and good rain at Almora. In Oudh the weather has been stormy. Showers are reported from Hissar, Umballa, Lahore and Ráwulpindi in the Punjab. Rain has fallen in Mysore and Coorg. None is reported from British Burma.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (May 25th)	·75 in Masulipatam.	Rain slight in 4 other taluks; heat continues excessive; prices stationary; cholera increasing, 251 seizures, 118 deaths in 7 taluks; small-pox and fever continue; epizoötic aphtha and dysentery general; markets well supplied locally.
Kurnool („ 24th)	·04 in Kurnool; none elsewhere.	Season generally good; second crop paddy is being harvested throughout the district; pasture and water scanty; markets well supplied; prices stationary; cattle disease in 4 taluks; fever prevalent; cholera all over the district, except in Sirwell taluk; seizures 175, deaths 89.
Tanjore („ 25th)	*Nil* at Negapatam.	Rain elsewhere scanty and partial; freshes in rivers moderate; no supply to tanks; water over anicuts none; no cultivation; standing crops generally good; harvest, few dry grains, yield moderate; pasture insufficient; prices stationary; markets well supplied; public health, cholera continues, number of seizures 90, deaths 60; small-pox and fever in some parts; cattle disease in some localities, some loss.
Madura („ 24th)	·7 at Madura ·9 at Pulney.	Rain scanty in Pereacolad and Dindigul; weather rather sultry; standing crops good; prices stationary; state of public health and cattle generally good; few cases of cholera reported.
Malabar („ 25th)	·6	Rain insufficient for first crop and dry cultivation; markets well supplied; prices slightly increasing; cholera in all taluks except Cherakal and Wynaad, 213 cases, 168 deaths; small-pox decreasing; fever and cattle disease slight; pasture slightly improved. *General Remarks.*—General prospects satisfactory; rain fell in all 5 districts.
Bombay— (May 25th)		
Sind.—(May 24th)		
Kurrachee ...	...	River at Kotri on 20th, 11 feet 4 inches; last year 7½ inches lower; disastrous fire in Mugalbhin on 7th, 99 houses and property valued at Rs. 11,693 destroyed; one fresh case of small-pox in Kurrachee; it is said to be prevalent in the surrounding villages of Mirpur Batoro; shock of earthquake at Bubak on 11th at 3 P. M. with a loud report; rain and hail in Sehwan and Dádú talukas on 13th.
Shikarpur ...	...	River rising; fever and cough prevalent; weather cloudy and close.

Noakhally ...	·84	Stray cases of cholera at Chaguluya and Bamni.
Chittagong Hill Tracts...	3·04	
Hill Tipperah ...	4·87	
Backergunge ...	3·49	Cholera still present, but in a less severe form.
Furreedpore ...	2·0	General health good.
Dacca ...	2·96	Cholera abated.
Tipperah ...	2·47	
Mymensingh ...	5·38	
24-Pergunnahs ...	·95	Health in general good.
Jessore ...	6·97	
Nuddea ...	6·07	
Moorshedabad ...	2·73	A few cholera cases in the Sadr sub-division.
Pubna ...	1·88	
Rajshahye ...	3·2	
Bogra ...	·89	
Malda ...	·36	
Dinagepore ...	·97	Cholera and small-pox still bad, the latter in the jail and extending into the town.
Rungpore ...	2·0	No fresh reports of cholera.
Cooch Behar ...	7·03	Cholera still prevails.
Jalpaiguri ...	2·66	
Darjeeling ...	1·12	
Midnapore ...	·62	
Howrah ...	2·43 (previous week 1·17).	
Hooghly ...	*Nil*	Cholera now reduced to normal state.
Burdwan ...	·28	Cholera decreased.
Bankoora ...	·5	
Beerbhoom ...	·55	
Sonthal Pergunnahs ...	·85	Health better in Deoghur.
Bhágalpur ...	·50	General health very good; small-pox almost died out, and only a little cholera here and there.
Monghyr ...	*Nil*	
Purneah ...	·44	Cholera disappearing.
Durbhunga ...	·97	Cholera still prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Mozufferpore ...	·40	Cholera rapidly spreading in Hazeepore sub-division.
Sarun ...	*Nil*	
Chumparun ...	·28	
Patna ...	Return not received.	Cholera still prevalent throughout the district, and there are a few cases of small-pox.
Gya ...	Ditto	
Shahabad ...	Ditto	Cholera on the increase in the Sub-divisions of Bhubbooah and Sasseeram.
Hazáribágh ...	1·05	Cholera still prevalent.
Lohardugga ...	·52	Small-pox still prevalent at Palamow; there have been a few more cases of cholera; public health otherwise good.
Manbhoom ...	·35	Cholera raging in the Northern Pergunnahs.
Singbhoom ...	1·24	Sickness is reported to be less.
Balasore ...	·5	Cholera still extremely destructive, and 150 deaths from this disease were reported during the second week.
Cuttack ...	1·51	Public health fairly good though there is still sporadic cholera.
Pooree ...	·1	Public health generally good.
		General Remarks.—More or less rain fell in almost all the districts of Bengal except in Patna, Shahabad, Sarun, and Monghyr, where it is anxiously looked for; the rainfall in the districts of the Chota Nagpore division has been very scanty for agricultural purposes. Ploughing and sowing operations are vigorously carried on everywhere. The prospects of the crops in general are favourable; standing crops of oilseeds, cotton, millet, indigo and young sugarcane are much benefited by the timely rainfall.
N. W. P.—		
Benares (May 24th)	...	No change; wind has been westerly, but now easterly; no clouds.
Allahabad („ 23rd)	...	No change.
Jhansi („ 25th)	...	Slight showers on the 21st.
Agra („ 24th)	...	No change.
Meerut („ „)	...	Slight rain on the 16th, 17th and 18th.
Bareilly („ „)	*Nil*	
Almora („ 23rd)	...	Three days' rain during week, of great use to rice crops springing up, and for preparation of ground for millet and pulse.
Punjab—		
Delhi (May 24th)	*Nil*	Health good.
Hissar („ „)	·3 with hail-storm.	Health good.
Umballa („ „)	·2	Health good; ploughing commenced.
Jullundur („ „)	*Nil*	Health good.
Lahore („ „)	·3	Health good.
Mooltan („ „)	*Nil*	Health fair.
Dera Ismail Khan („ „)	*Nil*	Health good; crops being gathered.
Rawalpindi („ „)	Slight rain	Health good.
Peshawar („ „)	*Nil*	Reaping in progress; health good.
		General Remarks.—Rain fell in several places in the early part of the week. Health of province good.
Oudh—		
Lucknow (May 24th)	...	Weather stormy and cloudy; prices continue low.
Sitapur („ „)	...	
Fyzabad („ „)	...	
Central Provinces—		
Upper Godávari (May 20th)	...	Weather very close and cloudy; small-pox continues; prices steady.
Sambalpur ...	...	Weather cloudy; 90 cholera cases reported.
Biláspur ...	...	Weather hot and cloudy; small-pox and cattle disease continue; prices steady.
Raipur ...	...	Weather hot; fields being prepared for *kharif* sowings; health good; prices easy.
Bálághát ...	...	Weather cloudy and close; ploughing for *kharif* continues; small-pox and cattle disease prevalent; prices steady.
Chánda (May 21st)	...	Weather cloudy; cholera continues.
Chhindwára ...	...	Sugarcane doing well; health good; prices steady.
Betúl („ 22nd)	...	Weather very warm; sugarcane doing well; ploughing for *kharif* continues; 125 cholera cases, 75 fatal; prices fallen.
Bhandára („ 23rd)	...	Weather cloudy and close; ploughing for *kharif* continues; fever and small-pox prevalent; prices easy.
Nágpur („ 24th)	...	Weather hot and cloudy; ploughing for *kharif* continues; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Wardha ...	...	Weather cloudy; preparation for *kharif* sowing continues.
Nimár ...	...	Weather sultry; small-pox continues.
Hoshangabad ...	...	Weather cloudy and sultry; 345 cholera cases, 162 fatal; small-pox continues; prices stationary.
Narsinghpur ...	...	Ploughing for *kharif* continues; 13 cholera cases, 7 fatal.
Seoni ...	...	Four cholera cases.
Damoh ...	...	Health good; prices stationary.
Mandla ...	...	
		General Remarks.—A few fatal cholera cases have occurred in the Narsinghpur district and in the districts of Hoshangabad and Betúl. The disease still continues to spread, and it also appears to be spreading in Sambalpur. The weather generally has been sultry and cloudy with indications of thunder-storms.
British Burma—(May 25th)		
Arakan Division.		
Akyab ...	...	Cholera has almost disappeared in town and district, only 2 deaths in town; cattle disease in one township; general health good.
Pegu Division.		
Rangoon ...	...	Slight cholera in Hmawbee township; general health good; slight cattle disease.
Thonkwa ...	...	General health good.
Bassein ...	...	A few cases of small-pox in town; slight cattle disease in Kyouk Choungyee.
Henzada ...	...	General health good.
Thayetmyo ...	...	General health good; 4 cases of small-pox in town.
Tenasserim Division ...	...	Public health good.
Assam—		
Gauhati (May 25th)	1·68	Sky generally overcast; frequent slight rain storms; unusually cool; rain favourable to the rice crops and tea.
Barpetá ...	4·47	
Sylhet (May 25th)	1·01	Crops same as last week; cholera and small-pox still prevalent; prices of rice nearly the same.
Hyderabad Assigned Districts—		
Amráoti (May 25th)	...	Cholera has re-appeared in Wun district, in mild form at present; no fever cases reported from Ellichpur district.
Mysore and Coorg—(May 25th)	·585 in Bangalore Cantonment; ·83 in Coorg.	Cholera has re-appeared in Coorg, and is increasing in the Mysore, Chitaldroog, Kadur and Kolar districts; serious mortality among cattle in the Chitaldroog District.
Rajputana—		
Serohi (May 21st)	...	Weather seasonable; high winds prevalent; thermometer 96°; health very good.
Meywar („ 19th)	...	Strong winds, not so hot; health good; rain required for *kharif* sowing.
Marwar („ 20th)	...	Stormy with drops of rain on 14th, lasted a few hours; thermometer 95·39°; health good.
Harowtee („ „)	·2 in Deolee; ·4 in Tonk; ·3 in Kotah; 2·3 in Shahpoora.	Storms followed by showers; no wind; heat great; health good.
Ulwar („ 24th)	1·66	General health good.
Jhallawar ...	...	Health good; tanks and wells very low.
Jeypore ...	...	Thunder and sandstorms, but little rain; public health continues good.
Bhurtpore ...	...	Occasional clouds, stormy weather and rain.
Ajmere ...	...	High dry winds; weather very hot.
Central India—(May 24th)		
Indore ...	*Nil*	Health good, except in Baghelkhand, where there is still some cholera and small-pox.
Gwalior ...		
Neemuch ...		
Rutlam ...		
Sutna ...		

A. O. HUME,

The demands have been fair during the month. Kharif waterings have commenced in the Central Divisions.

Eastern Jumna Canal.—Very little demand for rabi crops after the rain which fell on the 9th March 1876. There has been a general demand for (kharif) sugar sowings.

Dún Canals.—A small demand during the month.

Agra Canal.—Kharif irrigation commenced.

Bundelkhand.—A good demand in the month chiefly on the Jhansie Lakes.

Rohilkhand.—No demand for rabi crops this month.

Bijnor.—No remarks.

Traffic.—A slight decline from last month's returns in upward grain traffic, but far in advance of last season. Salt traffic downwards, continues good, large quantities now on canal banks waiting carriage. The improvement in raftage compared with last season's outturn is very favorable.

ALLAHABAD, the 29th April 1876.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 1ST JUNE 1876.

GENERAL REMARKS.—In Madras rain has fallen throughout the province, but except in the Kistna district it has been light: prospects are satisfactory. No rain is reported from Bombay except in the Kanara district: its want is becoming felt. Light showers have fallen in most districts of the Central Provinces, where preparations for the *kharif* continue. No rain has fallen in Berar or Central India. In Rajpootana showers are reported only from Tonk, Kota and Jeypore. In Bengal copious rain has fallen in the Eastern and Central districts. West of the Hooghly and in Chota Nagpore it has been scanty, and in Behar little has fallen; in Orissa no rain is reported from Pooree: the other districts have had a good fall. Agricultural operations are vigorously progressing. In Assam the rain continues and prospects are favourable. In the North-Western Provinces showers are reported only from Bareilly and Almora, and in Oudh from Fyzabad; but there are said to be signs of the setting in of the monsoon in the Eastern districts. In the Punjab no rain has fallen except at Rawalpindi; prospects are good. Rain has fallen generally in Mysore.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (June 1st)	2·90 at Guntur; in Narsarowpet Bapila and Gudivada about 1·5 in each.	Rain slight in Beswada, Repalli and Vinukonda; heat continues; prices generally stationary; cholera, 357 seizures and 190 deaths in 8 talukas; mild small-pox and fevers in Western talukas; epizoötic aphtha and dysentery general; markets well supplied locally.
Kurnool (May 31st)	Over 5 in Nundial.	No rain elsewhere; season generally good; pasture and water scanty; markets well supplied; prices rising in Kamalkota, and steady in other talukas; cattle disease in 3 talukas; fever prevalent; cholera abating, attacks 47, deaths 26.
Tanjore (June 1st)	·27 at Negapatam.	Rain elsewhere partial and scanty; rivers low; supply to tanks scanty; water over annicuts none; no cultivation; standing crops generally good; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera increased, number of seizures 176, deaths 113; small-pox, fever, and a new disease called *vurukkamma* in some parts; cattle disease in many places, some loss.
Madura (May 31st)	·7 at Madura 1·2 at Dindigul.	Rain partial and insufficient; weather hot in the day, cloudy and cool towards the evening; state of crops, prices and public health unaltered; cholera increasing in Madura town and Sheregunga zemindari.
Malabar (June 1st)	·35	Rain insufficient for first crop and dry cultivation; markets well supplied; price slightly increasing; cholera in all talukas except Chirkal, 236 cases, 200 deaths; small-pox, fever and cattle disease slight; pasture slightly improved. *General Remarks.*—General prospects favourable; rain in all five districts.
Bombay— (June 1st)		
Sind.—(May 31st)	...	
Kurrachee ...	...	River at Kotri on 27th, 11 feet 9 inches against 8 feet 10 inches last year; Kotri flowing; slight rain and hail in Dádú on 21st May, and hail in Dádú and Sehwan talukas on 20th; two fresh cases of small-pox in Kurrachee, both recovering; Western Nara closed for foundation of railway bridge.
Shikarpur ...	...	River 6 inches lower than on the same date last year; *kharif* operations commenced; fever prevalent in 9 talukas; disease among horned cattle in 2 talukas.
Hyderabad ...	...	River falling daily.
Upper Sind Frontier ...	...	Weather fair; water wanted; canals dry.
Gujerat.		
Ahmedabad ...	...	Cholera the same as before; in the city 14 cases, 10 deaths.
Surat ...	...	Twenty-two cholera cases in Surat, 5 fatal; 17 in Bárdoli, 8 fatal.
Broach ...	...	Cholera in Jambusar and Wágra talukas; clearing of fields commenced.
Kaira ...	...	Cholera cases 348, deaths 144; disease mostly prevalent in Thásra taluka; in other talukas it is decreasing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Khandesh and Nasik.		
Khandesh ...	...	No change.
Nasik ...	...	Small-pox in city.
Konkan.		
Tanna ...	...	Three cholera cases in a village in Bassein taluka, 1 fatal; small-pox prevails in 3 talukas; land being prepared for cultivation in Bhiwandi taluka.
Deccan.		
Poona ...	...	No change.
Ahmednagar ...	...	Weather cloudy; westerly wind; thunder-storm with hail in Akola taluka.
Sholapur ...	...	Nine deaths from cholera in Sholapur taluka.
Satara ...	...	No change.
Southern Mahratta Country.		
Belgaum ...	...	Prices rising; 242 deaths from cholera.
Dharwar ...	...	Rain wanted; rice sown in some places, in others sowing delayed for want of rain; cholera prevails.
Kanara ...	1·0 in Mundgod, Yellápur and Haliyál.	Sowing for monsoon crop commenced; cholera continues above Ghât.
Kaládgi ...	...	Three hundred and forty-nine deaths from cholera.
Kattywar.		
Rájkot ...	...	Weather very hot and cloudy; cholera continues in Sorath and Hállár.
Wadhwán ...	...	Weather warm; cholera in Jhalawad, 128 cases, 95 fatal; cotton season nearly over.
		General Remarks.—Cholera generally prevalent, except in the Deccan and Konkan; rain wanted everywhere.
Bengal— (1st June)		
Chittagong ...	4·99	
Noakhally ...	2·18	
Chittagong Hill Tracts...	1·29	
Hill Tipperah ...	1·05	
Backergunge ...	1·71	Cholera present but much abated; small-pox and cattle disease appeared in one thana.
Furreedpore ...	3·25	
Dacca ...	2·38	
Tipperah ...	Return not received.	
Mymensingh ...	7·51	
24-Pergunnahs ...	·91	Cholera nearly disappeared; fever lingers in Barripore.
Jessore ...	5·32	
Nuddea ...	·72	
Moorshedabad ...	3·03	
Pubna ...	4·56	
Rajshahye ...	2·29	
Bogra ...	3·65	
Malda ...	1·34	Sixteen deaths from cholera.
Dinagepore ...	1·22	Cholera abating, deaths from it during the week have been 271, total deaths since the outbreak are 373; small-pox increasing, deaths during the week have been 2; total deaths since the outbreak are 23 in number.
Rungpore ...	1·49	
Cooch Behar ...	1·21	Cholera slightly decreasing.
Jalpáiguri ...	·61	Cholera prevalent in Fallacotta and Siliguri.
Darjeeling ...	2·53	
Midnapore ...	·28	
Howrah ...	·6	
Hooghly ...	·94	Cholera ceased.
Burdwan ...	·53	Cholera abated.
Bankoora ...	·8	
Beerbhoom ...	1·45	
Sonthal Pergunnahs ...	1·05	
Bhágalpur ...	*Nil*	General health very good.
Monghyr ...	Return not received.	
Purneah ...	1·17	General health much improved.
Durbhunga ...	*Nil*	Cholera still prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Mozufferpore ...	Return not received.	Cholera increased in Hajeepore.
Sarun ...	·15	
Chumparun ...	Return not received.	
Patna ...	Ditto	Sporadic cases of cholera in all parts of the district with a few cases of small-pox.
Gya ...	·05	Public health good.
Shahabad ...	Return not received.	Cholera still prevalent.
Hazáribágh ...	·09	General health improving.
Lohardugga ...	*Nil*	Considerable number of cases of cholera in the town and some in the district; small-pox prevalent at Palamow; public health otherwise good.
Manbhoom ...	·1	Cholera subsiding.
Singbhoom ...	*Nil*	
Balasore ...	4·37	Cholera increasing; 210 deaths reported during the third week in May; mortality from small-pox ceased.
Cuttack ...	1·66	Cholera prevails in Kendraparah, elsewhere public health good.
Pooree ...	*Nil*	*General Remarks.*—There has been more or less rain in many districts of Bengal during the week; in the districts where rain has not fallen it is greatly needed; the rainfall has been very scanty for agricultural purposes in the districts of the Chota Nagpore division. Ploughing and sowing operations are vigorously going on in almost all the districts; the prospects of the crops are generally favourable. *Boro dhan* is being harvested in places; sowings of *aous* and jute are still going on in certain districts, but those that are already sown have germinated; land is being prepared for the sowing of *amun*. The standing crops of hemp, indigo, cotton, millet and mulberry are doing well.
N. W. P.—		
Benares (May 31st)	*Nil*	Monsoon appears to be setting in; air moist; sky cloudy; wind easterly.
Allahabad („ „)	...	No change.
Agra („ „)	...	
Jhansi (June 1st)	....	
Meerut (May 31st)	*Nil*	East winds.
Bareilly („ „)	Slight rain on the 30th.	
Almora („ 30th)	...	Weather cloudy and showery.
Punjab— (May 31st)		
Delhi ...	*Nil*	Health good.
Hissar ...	*Nil*	Ditto.
Umballa ...	*Nil*	Ploughing for *kharif*; health good.
Jullundur ...	*Nil*	Crops reaped; health good.
Lahore ...	*Nil*	Health good.
Mooltan ...	*Nil*	Health fair.
Dera Ismail Khan ...	*Nil*	Harvest good; health good.
Rawalpindi ...	Slight rain	Prospects and health good.
Peshâwar ...	*Nil*	Reaping nearly completed; health good.
		General Remarks.—Agricultural prospects so far favourable. Health of province continues good.
Oudh— (May 31st)		
Lucknow ...	*Nil*	Weather cloudy; east wind; prices low; cholera in some districts.
Sitapur ...	*Nil*	
Fyzabad ...	Slight showers.	
Central Provinces—		
Upper Godávari (May 27th)	·04	Weather cloudy and close; small-pox continues; prices unchanged.
Sambalpur ...	·87	Ploughing continues; cholera spreading.
Bilâspur ...	...	Weather cloudy; cattle disease continues; prices steady.
Raipur ...	·02	Ploughing continues; health good; prices easy.
Bálághát ...	Slight showers.	Ploughings progressing; cattle disease continues; prices steady.
Chánda (May 28th)	·02	Small-pox and fever prevalent.
Chhindwára ...	Slight showers.	Weather cloudy and stormy; ploughing continues; health good; prices steady.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*			
Betúl	(May 29th)	Few showers on 24th and 27th.	Sugarcane doing well; 59 cholera cases, 49 fatal; prices steady.
Bhandára	(„ 30th)	·50	Weather cloudy and close; ploughing continues; fever and small-pox prevalent; prices easy.
Nagpur	(„ 31st)	·57	Weather very warm and stormy; ploughing continues; cattle disease in places; prices rising.
Wardha	...	...	Weather cloudy; ploughing for *kharif* progressing.
Nimár	(„ 31st)	...	Weather cloudy and stormy; small-pox continues.
Hoshangabad	...	·47	Weather sultry and cloudy; cholera and small-pox continue; prices rising.
Narsinghpur	...	...	Ploughing progressing; 61 cholera cases, 31 fatal.
Jubbulpore	...	1·02	Weather cloudy and close; cholera, small-pox and cattle disease continue.
Saugor	(May 31st)	...	Weather cloudy and oppressive; ploughings continue; cholera at Rahatgarh; prices unchanged.
Seoni	...	1·26	Cholera at Chiri.
Mandla	...	Slight rain	Few cases of small-pox; prices easy.
Damoh	...	...	Health good; prices stationary.
			General Remarks.—Slight rain and storms have been pretty prevalent all over the province. Preparations for the *kharif* continue.
British Burma—(May 31st)			
Arakan Division	...	...	Cholera entirely disappeared in the town of Akyab; general health good; cattle disease still prevails in one township.
Pegu Division.			
Rangoon	...	...	Slight cholera in Hmawbee; slight fever in Hline and Ayriam; general health good; ploughing commenced in some parts; slight cattle disease, a few deaths reported.
Thonkwa	...	...	General health good.
Bassein	...	...	Reports not received, telegraphic communication interrupted.
Henzada	...	...	
Prome	...	...	
Thayetmyo	...	...	
Tenasserim Division	...	...	General health good; choleraic diarrhœa in Paphoon and outposts.
Assam—			
Gauháti	(June 1st)	·88	Sky more or less overcast during the day; slight storms in the mornings and evenings; state of crops same as before.
Sylhet	(„ „)	2·3	Prospects continue favourable.
Hyderabad Assigned Districts—			
Amráoti	(June 1st)	...	Weather cloudy but hot; ploughing for *kharif* going on; cholera in mild form in Wún district.
Mysore and Coorg—		·34 in Bangalore cantonment.	Rain pretty general in Mysore, but none in Coorg; cholera increasing in Coorg but diminishing in all districts of Mysore, one excepted.
Rajputana—			
Serohi	(May 28th)	...	Seasonable high wind; health very good; thermometer 102°.
Meywar	(„ 26th)	...	Hot winds abating; rain required for *kharif* sowing; health good.
Marwar	(„ 27th)	...	Hot winds blowing furiously; health good; thermometer 98°.
Bickanere	(„ 20th)	...	Thermometer 103°; weather cloudy; no epidemic.
Harowtee	(„ 27th)	0·1 in Tonk 0·1 in Kota	Heat very great; health good.
Jhallawar	(„ 31st)	...	Health good; tanks and wells very low.
Ulwar	...	...	Heat excessive; health good.
Bhurtpore	(June 1st)	...	Close and cloudy weather; severe hot winds.
Jeypore	...	0·28	No agricultural changes; health good.
Ajmere	...	...	Weather cooler; clouds about; health good.
Abu	...	*Nil*	Thermometer 84°.
Central India—			
Indore Gwalior Neemuch Rutlam Sutna	(May 31st)	*Nil*	Cholera still in Baghelkhand; elsewhere health and agricultural prospects continue good.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8TH JUNE 1876.

General Remarks.—Rain, generally slight and partial, is reported from all the districts of Madras; prospects are favourable. None has fallen in Mysore or Coorg. In Bombay the only falls were in the Belgaum and Dharwar districts, and a shower in Broach; rain is much wanted generally. Light rain is reported from almost all the districts of the Central Provinces, and preparations for the *kharif* are going on. Slight rain has fallen at Rewah, but none elsewhere in Central India or in Rajputana. In Bengal rain has fallen during the week in all districts except Nuddea, Bankoora, Beerbhoom and Balasore; it has been scanty in the districts of the Bhágalpur and Patna Divisions and Chota Nagpore; agricultural operations are actively progressing where the rain has permitted. In Assam good rain continues to fall, and prospects are favourable. In the North-Western Provinces showers fell at Benares, Allahabad and Agra, and rain is reported from Kumaun; elsewhere none has fallen. No rain has fallen in Oudh. In the Punjab showers are reported from Lahore, Ráwulpindi and Peshávar; prospects are fair.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(June 8th)	1·50 in Bezwada.	Rain slight elsewhere in district; prices steady; cholera 213 seizures, 89 deaths in 6 taluks; mild small-pox in 6, fever in 4 taluks; epizoötic aphtha and dysentery general; markets well supplied locally.
Kurnool	(„ 7th)	Over ·5 in Markapur.	Rain slight in Ramalkota, Pattikonda and Koilkuntla taluks, none elsewhere; season generally good; pasture and water scanty; markets well supplied; prices of *cholum* and horse gram rising, paddy falling, other articles falling in some and rising in other taluks; cattle disease in 4 taluks; cholera, attacks 91, deaths 36.
Tanjore	(„ 8th)	·28 at Negapatam.	Rain elsewhere slight and partial; rivers low; supply to tanks none; water over anicuts none; cultivation a few dry crops in some places; standing crops generally good; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, number of seizures 173, deaths 123; fever, small-pox and *surukhammai* in some parts; cattle disease in many places, some loss.
Madura	(„ 7th)	1·4 at Madura.	Rain in some parts of Madura taluk; no change in other respects; fever cases reported, cholera in the town and Shevagenga zemindari.
Malabar	(„ 8th)	·8	Rain insufficient for wet and dry cultivation; markets well supplied; prices slightly increased; cholera in all taluks except Cherakal, 265 cases, 209 deaths; small-pox, fever and cattle disease slight; pasture slightly improved.
			General Remarks.—General prospects favourable; rain in all 5 districts.
Bombay—	(June 8th)		
	Sind.—(June 7th)		
Kurrachee	...	...	River on 3rd, 11 feet, 13 inches lower than on the same date last year; Western Nara opened on 30th; 5 cases of small-pox in Kurrachee; 7 cases recovering; slight rain in Phulji; on 21st the Gáj came down in flood covering 2,000 acres, and filling all tanks.
Shikárpur	...	...	River 1 foot 8 inches higher than on the same date last year; fever in 12 talukas.
Hyderabad	...	...	River rising again; weather cooler.
Upper Sind Frontier	...	...	Begari, gauge 8 feet 6 inches, supply abundant; land being cleared for *kharif*; cholera reported in Thul and Shadiher.
	Guzerat.		
Ahmedabad	...	...	Cholera in city, 12 cases, 3 deaths.
Kaira	...	...	Cholera cases 249, deaths 126; disease greatly prevalent in Thásra taluka.
Surat	...	...	Six cholera cases in city, 5 deaths; 36 cases at Bárdoli, 9 deaths.
Broach	...	...	Slight rain at Ankleswar; a few cholera cases in Broach, Jambusar and Ankleswar; clearing of fields progressing.
	Khandesh and Nasik.		
Khandesh	...	...	No change.
Nasik	...	...	Small-pox in city.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan.		
Tanna ...	...	Land being prepared for cultivation; small-pox in three talukas.
Deccan.		
Poona ...	...	Weather continues hot; fever in city; slight cattle disease in Junnar and Indápur; district generally healthy.
Ahmednagar ...	...	Weather cloudy; indications of rain.
Sholapur ...	...	Nine deaths from cholera in taluka Sholapur.
Satara ...	...	Weather cloudy; want of rain much felt.
Southern Mahratta Country.		
Belgaum ...	0·66	More rain wanted for sowing; cholera still continues.
Dharwar ...	0·40	
Kanara ...	...	Rain much wanted; great scarcity of water; cholera continues.
Kaládgi ...	...	Cholera in all talukas, 305 deaths.
Kattywar.		
Rájkot ...	...	Health good; weather sultry; cholera slightly prevailing in some villages of Hállár.
Wadhwán ...	...	Weather warm; cholera in Jhalawad, 84 cases, 45 fatal.
		General Remarks.—Rain much wanted; cholera general in Guzerat, Kattywar, Southern Mahratta Country and Kanara.
Bengal— (June 8th)		
Chittagong ...	2·15	Cholera diminished.
Noakholly ...	8·53	Health good.
Chittagong Hill Tracts...	4·17	
Hill Tipperah ...	3·55	
Backergunge ...	2·8	Health improved.
Furreedpore ...	·72	General health good.
Dacca ...	1·96	
Tipperah ...	2·17 (3·16 in previous week.)	
Mymensingh ...	·88	
24-Pergunnahs ...	·10	Health in general good.
Jessore ...	·55	
Nuddea ...	*Nil*	
Moorshedabad ...	·89	Health good.
Pubna ...	1·27	
Rajshahye ...	·63	Public health generally good.
Bogra ...	1·36	
Malda ...	A few drops.	No deaths from cholera.
Dinagepore ...	·31	Small-pox still bad, there were 84 cases since the outbreak, and 25 deaths up to date; cholera continues, there were 620 cases since the outbreak, and 416 deaths up to date.
Rungpore ...	1·42	
Cooch Behar ...	4·7	Cholera still prevalent in Sadr sub-division, but in Mechliganj there is none.
Jalpáiguri ...	12·24	
Darjeeling ...	4·30	
Midnapore ...	7·14	
Howrah ...	·19	
Hooghly ...	1·40	General health is normal.
Burdwan ...	1·58	A few cases of cholera.
Bankoora ...	*Nil*	Cholera still reported.
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	·06	
Bhágalpur ...	·20	General health good; a little cholera here and there.
Monghyr ...	1·80	
Purneah ...	·33	
Durbhunga ...	·7	Cholera and bowel-complaint still prevalent.
Mozufferpore ...	1·87	
Sarun ...	A few drops.	Cholera reported from Sewan and Durowlie.
Chumparun ...	·88 (·24 in previous week.)	
Patna ...	·23	Cholera reported from all parts of the district.
Gya ...	·01	Public health fairly good.
Shahabad ...	·16	Cholera still prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hazáribágh ...	·44	Cholera still prevalent.
Lohardugga ...	·28	A considerable number of cholera cases in Ranchee; small-pox still prevalent in Palamow, public health otherwise good.
Manbhoom ...	·06	Cholera still bad, 119 deaths reported during the week at head quarters.
Singhbhoom ...	2·91	No reports of sickness.
Balasore ...	*Nil*	Cholera raging violently in the centre and south of the district and along the east coast; number of deaths reported during the fourth week in May is 297, as compared with the previous week the mortality from cholera shows an increase of 41 per cent.
Cuttack ...	1·53	Cholera rather bad along sea coast, elsewhere public health good.
Pooree ...	1·98	
		General Remarks.—The rainfall has been general in all districts, except those of the Patna and Bhágalpur Divisions, where there has been little or no rain during the week; more rain is still eagerly expected in places where it has been very scanty. The state and prospects of the crops are generally favourable. Agricultural operations are being carried on almost everywhere, but are backward in some places for want of sufficient rain. The *aous* or *bhadoi* crop is generally doing well; *haimunti* or late paddy is being sown in certain districts. Young sugarcane is thriving. The prospects of indigo, jute, mulberry, *sessamum*, *bheena*, &c., are fair.
N. W. P.—		
Benares (June 7th)	·1 on afternoon of 2nd June, with storm.	
Allahabad („ „)	1·0 on the 3rd.	Clouds since disappeared, weather sultry.
Jhansi („ 8th)	*Nil*	
Agra („ 7th)	1·8 on the 2nd.	Clear weather since; westerly wind.
Meerut („ „)	*Nil*	Weather oppressive.
Bareilly („ „)	*Nil*	
Almora („ 6th)	...	Heavy rain in some parts; none in others.
Punjab— (June 7th)		
Delhi ...	*Nil*	*Kharif* sowings commenced on irrigated lands; health good.
Hissar ...	*Nil*	Lands being prepared for *kharif;* 9 cases of supposed cholera near Jhajjar, 3 deaths.
Umballa ...	*Nil*	Health good.
Jullundur ...	*Nil*	Ditto.
Lahore ...	Showers on 1st June.	Ditto.
Mooltan ...	*Nil*	Crops good; health fair.
Dera Ismail Khan ...	*Nil*	Harvest being gathered; health fair.
Rawálpindi ...	Slight rain.	Agricultural prospects and health good.
Pesháwar ...	·3	*Rabi* harvested; ploughings for *kharif* commenced; health good.
		General Remarks.—Agricultural prospects so far fair; public health generally good.
Oudh— (June 7th)		
Lucknow ...	...	No rain, heat intense; cholera in some districts; preparations for *kharif* in progress.
Sitapur ...	...	
Fyzabad ...	...	
Central Provinces—		
Upper Godávari (June 3rd)	·23	Weather cloudy; health good; prices falling.
Sambalpur ...	1·01	Weather cloudy and close; ploughing for *kharif* continues; cholera prevalent.

Raipur ...	·56	Weather cloudy; ploughing continues; health good.
Bálághát ...	·80	Weather cloudy and stormy; ploughing for *kharif* continues; small-pox and cattle disease prevalent; prices steady.
Chánda (June 4th)	·77	Weather cloudy; ploughing continues; cholera and cattle disease prevalent.
Chhindwára ...	...	Weather cloudy; ploughing continues; health good; prices steady.
Betúl („ 5th)	·67	Ploughing continues; cholera decreasing; prices fallen.
Bhandára („ 6th)	...	Weather cloudy and close; ploughing for *kharif* progressing; fever and small-pox continue; prices easy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Nagpur (June 7th)	1·97	Ploughing for *kharif* continues; cattle disease in places; prices steady.
Wardha ...	·30	Health good.
Nimar ...	...	Weather cloudy; small-pox continues.
Hoshangabad (June 7th)	·19	Weather sultry; 175 cholera cases, 77 fatal; prices stationary.
Narsinghpur ...	Slight showers.	Ploughing continues; 216 cholera cases, 97 fatal.
Jubbulpore ...	·28	Weather cloudy and sultry; small-pox and cattle disease continue; no cases of cholera since the 3rd.
Saugor ...	·23	Cloudy, oppressive; cholera in 3 places; 61 cases reported, 27 fatal.
Seoni ...	·40	Cholera disappeared.
Damoh ...	...	Health good; prices stationary.
Mandla ...	1·50	Small-pox continues; prices stationary. *General Remarks.*—In most districts rain has fallen during the week; cholera seems disappearing.
British Burma—	...	No report received.
Assam—		
Gauháti (June 8th)	1·37	Sky more or less overcast; weather sultry; rice crops look well; prospects of tea favourable.
Barpetta („ „)	2·45	
Sylhet („ „)	2·78	Prospects everywhere favourable.
Hyderabad Assigned Districts—		
Amráoti (June 8th)	·38	Cholera has re-appeared in Bassein district; cow-pox still severe among cattle in Ellichpur district.
Mysore and Coorg—		
Bangalore (June 8th)	...	**South-west monsoon still holds off, and in Coorg agricultural operations are thrown back; cholera prevalent in the Mysore, Hassan, and Shimoga districts and also in Coorg.**
Rajputana—		
Serohi (June 4th)	...	Weather seasonable; health good; thermometer 99°.
Meywar („ 2nd)	...	Hot winds abating; rain required; health good; thermometer 90·8°.
Marwar („ 3rd)	...	Weather very close and hot with occasional clouds; health good; thermometer 98°.
Bickanere (May 27th)	...	Thermometer 112°; hot winds blowing; health good.
Harowtee (June 3rd)	...	Wind fitful; heat great; health good.
Jhallawar („ 8th)	...	Health good; tanks and wells very low.
Ulwar ...	*Nil*	Average temperature 100°; health good; wells supplied; ploughing general.
Bhurtpore ...	...	Temperature high; health fair.
Jeypore ...	...	Heat intense; public health continues good.
Ajmere ...	...	Weather hot; health good.
Abu ...	...	No sign of rain; temperature 85° at noon.
Central India—(June 7th)		
Indore, Gwalior, Neemuch, Rutlam, Sutna ...	...	Slight rain at Rewah; no other change since last report.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15TH JUNE 1876.

GENERAL REMARKS.—The monsoon appears to have set in throughout the greater part of Madras, Bombay south of the Nerbudda, Coorg, British Burma, and the Eastern and Central districts of Bengal. There are signs of its approach in the Central Provinces, and it is said to have set in at Benares, but as no rain is reported to have fallen this appears doubtful. In Madras the fall has been copious in Malabar and fair in the Northern districts, but deficient in the South-Eastern tracts; prospects are satisfactory. Some rain has fallen in Mysore, where more is much wanted. In Sind the river is high, and *kharif* cultivation is beginning. In Guzerat there has been no rain, but it has fallen throughout Khandesh, the Deccan districts, and the Southern Mahratta Country. In the Central Provinces there have been showers in many districts, and in Berar fair rain has fallen. None is reported from Rajputana or Central India. In Bengal the fall has been abundant in the Eastern and Central districts, deficient in Orissa, and partial in Chota Nagpore. No rain has fallen in Purneah and most of the districts of Behar: in Chumparun there has been a good fall; agricultural operations are progressing actively. No rain is reported from the North-Western Provinces (except showers at Almora), Oudh, or the Punjab. In Assam the rain continues and prospects are good. In Burma the amount of rainfall is not given, but it is said to have been insufficient at Rangoon and Bassein.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(June 15th)	·25 at Masulipatám; 3·0 at Bezwada; 2·25 at Palnad.	Rain slight elsewhere; no river fresh yet; monsoon promises badly; prices generally steady; cholera, 418 seizures, 192 deaths, in 8 taluks; small-pox in 6, fever in 3 taluks; the new disease called *surukkammai* exists in 4 taluks; epizoötic aphtha and dysentery general among cattle; markets well supplied locally.
Kurnool	(„ 14th)	Nearly 1·0 in Kurnool town; 2·0 in Sirwall, and slight in other taluks.	Season generally good; pasture scanty; dry fodder obtainable; water sufficient; markets well supplied; prices stationary except in Nandial and Pattikonda, in the former horse gram, in the latter *cholum*, paddy and korra rising; cattle disease in 3 taluks; cholera in 6 taluks, seizures 160, deaths 39.
Tanjore	(„ 15th)	·14 at Negapatam.	Rain elsewhere slight and partial; rivers low; no supply to tanks; water over anicuts none; cultivation a few dry grains in some places; standing crops generally good; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, 145 seizures, 110 deaths; small-pox and *surukkammai* in some parts; cattle disease in some places.
Madura	(„ 14th)	*Nil*	Passing clouds; *cholum* crop being harvested in Melur; outturn fair; standing crops good, except in Tirumangalam and parts of Palney taluk; small-pox still prevalent in several taluks; cholera, seizures 129 and 29 in Shevagenga and Ramnad zemindaries, deaths 77 and 16.
Malabar	(„ 15th)	9·76	Markets well supplied; prices slightly increased; cholera in all taluks, except Chirakal, Walluvanad and Wynaad, 169 cases, 147 deaths; small-pox, fever and cattle disease slight; pasture improving. *General Remarks.*—General prospects satisfactory; rain in all the above districts except Madura.
Bombay—	**(June 15th)**		
Sind.—(June 14th)			
Kurrachee	...	...	River at Kótri on 10th, 13 feet 9 inches against 10 feet 11½ inches on the same date last year; *kharif* cultivation commenced; 6 fresh cases of small-pox.
Shikárpur	...	...	River 2 feet 4 inches higher than on the same date last year; cholera near Ghotki, Rohri Division, 31 cases, 1 death; rice cultivation commenced; strong hot winds.
Hyderabad	...	...	River falling; weather cool; people healthy.
Upper Sind Frontier	...	...	Weather unusually cool; *kharif* preparations progressing; Hegari Kashmor bund breached; health fair.
Guzerat.			
Ahmedabad	...	...	Cholera the same as before; 14 cases in the city, 3 deaths.
Surat	...	...	Five cholera cases in the city, all fatal; 49 cases in Wálod, 19 deaths.
Kaira	...	...	Cholera cases 205, deaths 94; severe outbreak of cattle disease in Mehmadabad taluka; recent report favourable; weather very hot.

N. B.—In the Weather and Crop Report printed at page 649 of the Supplement to the Gazette of India of the 3rd June 1876, opposite Surat for the words "17 in Bárdoli, 3 fatal," *read* "67 in Bárdoli, 18 fatal."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Broach	...	Weather very sultry; occasional cholera cases in Jambusar and Ankleswar talukas.
Khandesh and Nasik.		
Khandesh ...	3·60	Agricultural operations commenced.
Nasik ...	0·21	Small-pox decreasing.
Konkan.		
Tanna ...	0·75	Cholera prevails in a village in Dáhánu taluka; small-pox continues in Panwel and Bhiwandi; land being prepared for cultivation during monsoon.
Deccan.		
Poona ...	2·15	Rain has fallen more or less in all talukas; slight cattle disease in Indápur and Purandhar; district generally healthy.
Ahmednagar ...	0·93	More rain wanted.
Sholapur ...	1·22	Eleven deaths from cholera in taluka Sholapur.
Satara ...	1·79	More rain wanted; cholera in Wálwa and Tásgaon talukas.
Southern Mahratta Country.		
Belgaum ...	1·52	Total rainfall 2·18; sowing commenced; 139 deaths from cholera.
Dharwar ...	0·54	Total rainfall 5·57; cholera decreasing; rain wanted for sowing early crops, except in Gadag and Mugad Peta.
Kanara ...	6·50	Cholera decreasing.
Kaládgi ...	1·50	Cholera continues in all talukas, 303 deaths.
Kattywar.		
Rájkot ...	...	Weather hot; rain wanted; water supply scanty; cholera decreasing.
Wadhwán ...	0·05 at Wánkáner.	Weather warm and cloudy; cholera in Jhalawad, 79 cases, 40 fatal.
		General Remarks.—Cholera decreasing in Kattywar, Guzerat, Southern Mahratta Country and Kanara; monsoon burst mildly in Bombay on 14th instant; rain general in Southern Mahratta Country and Deccan.
Bengal— (June 15th)		
Chittagong ...	Return not received.	Cholera abated.
Noakholly ...	1·87	Stray cases of cholera reported from Bauni and Lakhipur, and fever and diarrhœa from Lakhipur.
Chittagong Hill Tracts...	4·02	
Hill Tipperah ...	3·24	
Backergunge ...	3·02	Cholera present in only one thana; cattle disease in three thanas.
Furreedpore ...	5·25	
Dacca ...	2·36	
Tipperah ...	5·03	
Mymensingh ...	2·55	
24-Pergunnahs ...	1·72	Health in general good.
Jessore ...	3·24	
Nuddea ...	7·99	
Moorshedabad ...	3·42	
Pubna ...	9·22	
Rajshahye ...	·6	Health in general good; no further report of cholera or small-pox.
Bogra ...	2·49	
Malda ...	1·32	Seven deaths from cholera and 5 deaths from small-pox.
Dinagepore ...	·62	Small-pox still bad, there were 84 cases since the outbreak and 25 deaths up to date; cholera also continues, there were 635 cases since the outbreak and 425 deaths up to date.
Rungpore ...	Return not received.	
Cooch Behar ...	3·53	Cholera very bad during the last week.
Jalpáiguri ...	4·04	Cholera abating in the eastern parts of the district, but prevalent all over the western half.
Darjeeling ...	4·14	
Midnapore ...	2·23	
Howrah ...	·86	
Hooghly ...	·22	Public health is normal.
Burdwan ...	1·49	A few cases of cholera in Ráona.
Bankoora ..	·86	Cholera still reported from different parts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Beerbhoom ...	3·76	
Sonthal Pergunnahs ...	2·04	
Bhágalpur ...	·13	General health of the district very good, but cholera still reported from various villages.
Monghyr ...	1·98	
Purneah ...	*Nil*	Cholera abating in the south.
Durbhunga ...	*Nil*	
Mozufferpore ...	Return not received.	Cholera abating.
Sarun ...	A few drops of rain.	Cholera has again broken out in several places in the Sewan sub-division.
Chumparun ...	3·27	
Patna ...	Return not received.	Cholera reported from all parts of the district, and a few cases of small-pox.
Gya ...	·05	Public health fair.
Shahabad ...	*Nil*	Cholera still prevalent.
Hazáribágh ...	·02	General health improving.
Lohardugga ...	2·65	Some cholera cases still at Ranchee and its vicinity and a few in the districts; cholera and small-pox still reported from Palamow.
Manbhoom ...	2·33	Cholera declining.
Singhbhoom ...	·49	
Balasore ...	·24	Cholera continuing its ravages, and the mortality still increasing; 358 deaths reported during the week ending the 4th June; the disease is confined entirely to the southern half of the district.
Cuttack ...	*Nil*	Cholera still bad along the sea coast; inland public health good.
Pooree ...	·29	
		General Remarks.—Seasonable rain has fallen in almost all the districts of Bengal during the week. Agricultural operations are being briskly carried on everywhere. The prospects of the crops in general are favourable; *boro* or spring rice is being harvested; *aus* or early rice is still being sown in a few places; the sowing of *amun* or late rice is progressing; jute, *sessamum*, indigo, millets, *cheena* and young sugarcane are generally doing well.
N. W. P.—		
Benares (June 15th)	...	Rains appear to have set in.
Allahabad („ 14th)	...	No change.
Agra („ „)	*Nil*	Clear weather; westerly wind.
Meerut („ „)	...	Strong west winds; weather seasonable.

SUPPLEMENT TO

The Gazette of India.

Nº 27. CALCUTTA, SATURDAY, JUNE 24, 1876. Register No. 33.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS FOR FASL KHARIF, 1875, IN THE NORTH-WESTERN PROVINCES.

No. 725-730A, dated Allahabad, the 9th May 1876.

RESOLUTION.—By the Government of the N. W. P., PUBLIC WORKS DEPARTMENT.

READ the following papers:—

A.—8 Comparative statement of irrigation and rainfall for kharif, 1875-76.
B.—8 Statement of crops irrigated by districts.
C.—8 Statement of crops irrigated by canal divisions.

OBSERVATIONS.—The scanty rainfall of the months of May aad June rendered the season of 1875 far more favourable to irrigation than that of the previous year in which the monsoon rains were early and plentiful; nevertheless, the irrigated area was larger than that of the preceding year by 39,901 acres, and the revenue water-rate by only Rs. 31,212.

TABLE I.

YEAR.	Acreage.	Revenue.	Water-rate.
	Acres.	Rs.	Rs.
1868-69	484,485	12,19,344	11,29,288
1869-70	501,625	13,39,807	12,23,412
1870-71	396,399	12,07,265	11,07,924
1871-72	333,117	10,42,814	9,37,963
1872-73	353,619	11,01,288	10,07,345
1873-74	401,576	13,17,661	11,95,579
1874-75	389,883	13,94,241	12,84,818
1875-76	429,784	14,09,798	13,16,030

TABLE II.

YEAR.	Sugarcane.	Rice.	Indigo.	Cotton.	Fourth-class crops.
1868-69	97,555	1,11,019	76,687	52,992	1,41,256
1869-70	1,04,596	1,17,548	1,30,248	55,883	83,979
1870-71	1,12,141	98,479	1,18,897	35,070	28,087
1871-72	94,816	76,850	1,19,617	20,365	9,228
1872-73	1,02,043	83,607	1,30,982	14,793	12,504
1873-74	1,30,284	73,875	1,49,073	16,354	28,035
1874-75	1,41,662	58,343	1,56,396	4,923	21,532
1875-76	1,09,431	80,304	1,65,734	21,735	46,184

Table II shows an increase in the following crops :—

	Increase.
Rice	21,961
Indigo	9,338
Cotton	16,812
Grains	24,652

While in sugarcane there was a serious decrease of 32,231 acres.

This decrease occurred on all the canals; that on the Ganges Canal being 15,924, on the Eastern Jumna Canal 14,745, and on the rest in smaller proportions. By districts the decrease is distributed for as below :—

Saharanpur	4,870
Bulandshahr...	1,384
Muzaffarnagar	4,363
Etawah	1,500
Meerut	12,501
Cawnpore	3,164
Mainpuri	1,424
Bareilly	1,795

Now that rice has been made a first-class crop for sanitary reasons, the fluctuations in its area are important.

The increase was—

Ganges Canal	10,882
Eastern Jumna Canal	7,976

of which 7,596 acres was in the Muzaffarnagar district; 8,597 in Saháranpur, and 2,339 in the Meerur district.

Muzaffarnagar	1,874
Meerut	3,906
Aligarh	1,404
Muttra	1,526
Agra	807
Gurgaon	1,621
Bulandshahr	4,848

Of the increase in cotton, 8,381 acres was due to Ganges Canal; 3,414 to the Agra, and 5,011 to the Eastern Jumna Canal, and this increase was apportioned among the districts shown in the margin.

The increase in indigo was entirely on the Ganges Canal; the Farukhabad, Etáwah, and Cawnpore districts showing a gross increase of 14,586 acres, against which, however, there is a large decrease to set off in the Bulandshahr and Aligarh districts.

Speaking generally of the results of the season, it may be said that owing to the falling-off of the sugarcane crop, which was due to causes other than the season, the increase in revenue is very much less than it has been for the last four years; during which, in consequence of the increase of this highly rated crop, the increase in revenue has been out of all proportion to the increase of area, as shown by the marginal figures.

	Area increase or decrease.	Revenue.
1872-73 ...	+20,592	+69,382
1873-74 ...	+47,957	+1,78,234
1874-75 ...	−11,693	+89,239
1875-76 ...	+39,901	+31,212

Rice, in spite of the considerable enhancement of rates, has largely increased, and cotton has risen again to the area irrigated in 1871, from which it had gradually fallen.

Order.—Ordered that copies of this Resolution be submitted to the Governments of India, Bengal, and Panjab, Government in the General Department, North-Western Provinces, and Provincial Branch, Secretary to the Board of Revenue, North-Western Provinces, and published in the *Government Gazette*.

W. H. GREATHED, Col., R.E.,
Secretary to Government, N.-W. P., P. W. D.

G. A. SEARLE, *Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

The 7th June 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22ND JUNE 1876.

GENERAL REMARKS.—Up to the 21st instant the monsoon was still holding off throughout the greater part of the North-Western Provinces, the Punjab and Southern and Central Rajputana; elsewhere it appears to have set in, although in many places the rainfall as yet has been deficient. In Madras rain is reported from all districts except Madura. In Bombay the fall has been scanty in the Deccan Districts, Khandesh and Násik; sowings for the *kharif* have commenced. In Sind the river is high. In the Central Provinces the rain has been partial, and in most districts more is awaited before sowings can begin. Sowings have commenced in Berar. The rain reported from Central India is only from Sutna, Gwalior and Rutlam. In Rajputana there has been rain in Harowtee, Jeypore, Bhurtpore, Ulwar, Ajmere and Mount Abu. In Bengal the rain has been general, copious in the Eastern and Central Districts (except Jessore, Nuddea, Moorshedabad and Pubna), and lighter in Behar; prospects are very good. In Assam abundant rain has fallen. In the North-Western Provinces heavy rain fell at Jhansi, and showers at Almora and Allahabad; no report from the Eastern Districts has been furnished. Rain has fallen in Oudh, and preparations for the *kharif* are in progress. In the Punjab showers fell at Jullundur, Dera Ismail Khan, Lahore and Mooltan. Good rain has fallen in Mysore and Coorg.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (June 22nd)	·03 at Masulipatam; 3·5 at Nandigama; 3·0 at Sattanapally; 2·5 at Repalli, Bapetla and Guntur.	Rain slight elsewhere, 2 feet water over anicut; river full; navigation canals filling; cultivation not commenced yet; prices rising in Gadivada and Nandigama; public health bad, cholera 515 seizures, 248 deaths in 9 taluks; small-pox in 6, fever in 2 taluks; *surukumariatha* continues in 7 taluks, but no deaths from it; epizootic aphtha and dysentery general; markets well supplied locally.
Kurnool („ 21st)	Over 1·0 in Markapur; ·5 in Nundial and Pattikonda; slight in other taluks.	Season generally good; dry lands being ploughed; pasture scanty; dry fodder obtainable; water sufficient; markets well supplied; prices stationary, except in Nundial and Nandikothoor; in the former rice and horse-gram falling, and paddy and *cholum* rising; in the latter rice and horse-gram rising; cattle disease in 4 taluks; cholera seizures 145, deaths 71.
Tanjore („ 22nd)	Slight drizzle at Negapatam.	Rain elsewhere scanty and partial; rivers nearly dry; no supply to tanks; water over anicuts none; cultivation a few dry grains in some places; standing crops beginning to wither; harvest few dry grains here and there; yield moderate; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, number of seizures 210, deaths 176; small-pox and *surukkammai* in some parts; cattle disease abating.
Madura („ 21st)	*Nil*	Weather hot and occasionally cloudy; standing crops suffering almost everywhere for want of rain; prices risen in many taluks; small-pox and fever still prevalent in some parts; cholera seizures 87, deaths 54, mostly in Shevagenga and Ramnad zemindaris.
Malabar („ 22nd)	8·65	Markets well supplied; prices slightly increased; cholera in all taluks except Cherakal and Walluvanad, 271 cases, 213 deaths; small-pox, fever and cattle disease slight; pasture improving.
		General Remarks.—General prospects satisfactory, except in Madura; rain fell in the other 4 districts.
Bombay— (June 22nd)		
Sind.—(June 21st)		
Kurrachee ...	...	River at Kotri on 17th, 13 feet 3 inches against 12 feet last year; 6 fresh cases of small-pox in Kurrachee; disease also in Mirpur Batoro.
Shikárpur ...	...	River 11 inches higher than on the same date last year; weather sultry; public health good.
Hyderabad ...	...	River rising; great heat for 4 days succeeded by high, cool winds from south and south-west; small-pox in the town of Hyderabad.
Upper Sind Frontier ...	...	Weather sultry and hot.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	0·25	Cholera continues in Viramgám, Sánand and Dholka; 4 cases and 3 deaths in the city of Ahmedabad.
Kaira ...	0·37	Cholera cases 121, deaths 71.
Surat ...	6·07	Two fatal cholera cases in city; 16 cases in Wálod, 6 fatal.
Broach	3·69	Slight cholera in Hánsot and Jambusar.
Khandesh and Násik.		
Khandesh ...	...	Sowings commenced; rain wanted; health good.
Násik ...	0·16	Total rainfall 0·37, more wanted for sowing early crops.
Konkan.		
Tanna ...	9·55	Cholera continues at Gholwad in Dáhánu taluka; small-pox prevailing in Bhiwandi and Bassein talukas; sowing operations commenced.
Deccan.		
Poona ...	0·47	Total rainfall 2·62; rain has fallen more or less in all talukas; slight cattle disease still exists in Indápur and Purandhar; sowing not yet commenced; public health good.
Ahmednagar ...	0·55	Total rainfall 1·18; more wanted for sowing.
Sholapur ...	...	Total rainfall 1·22; 24 deaths from cholera in taluka Sholapur; sowing of *kharif* commenced in taluka Karmála.
Satara ...	0·67	Total rainfall 2·46; sowing operations commenced; 9 deaths from cholera in Tásgaon, 3 in Wai, 12 in Válwa.
Southern Mahratta Country.		
Belgaum ...	2·83	Total rainfall 5·01; 179 deaths from cholera; sowing of *kharif* crops in progress.
Dhárwar ...	0·49	Total rainfall 6·06; sowing of rice delayed in some talukas for want of rain; progressing in others; cholera decreasing.
Kánara ...	17·25	Total rainfall 23·75; rice sowing and planting going on; cholera continues above Ghát.
Kaládgi ...	3·60	Total rainfall 5·13; cholera in all talukas, 215 deaths.
Kattywar.		
Rájkot ...	0·63 at Rájkot.	Monsoon has set in; cholera abating.
Wadhwán ...	1·43	Cholera in Jhalawad, 58 cases, 26 fatal. *General Remarks.*—Cholera decreasing; more rain wanted in the Deccan.
Bengal— (June 22nd)

GOVERNMENT OF INDIA.

FOREIGN DEPARTMENT.

TRADE RETURN OF THE TURKISH ARABIA AGENCY FOR THE YEAR ENDING WITH THE 12TH OF MARCH 1876.

No. 1 (Commercial), dated Baghdad, the 20th March 1876.

From—J. P. NIXON, Esq., Political Agent and Consul General in Turkish Arabia,

To—The Right Hon'ble the EARL OF DERBY, Her Britannic Majesty's Principal Secretary of State for Foreign Affairs, Foreign Office, London.

With reference to my letter dated 13th March 1875, I have now the honor to submit the Trade Returns of the Baghdad Custom House for the year 1875-76 or 1292 Hijira, the Turkish official year, which closed on the 12th March 1876.

2. In comparison with the previous year there has been a large decrease in the imports.

The total imports into Baghdad for the years 1874-75 amounted in value to £452,492, and for the year 1875-76 the imports had decreased according to the Customs Return to £210,632.

This great decrease has occurred in the trade with Persia, for the imports from that country in 1874-75 amounted in value to £205,208, whereas the imports from Persia in 1875-76 amount only to £65,578, exhibiting a deficiency of £139,630, thus clearly proving that the Persian trade has obtained an outlet in another direction either to Russia or elsewhere; but to compensate for this the exports from Baghdad, as shown in my returns for last year, amounted in value to only £41,736, but in the year 1875-76 they have reached the sum of £230,472. The increase seems to be chiefly on one article, as wool to the value of £8,693 only paid duty at Baghdad in the year 1874-75, whereas in the year 1875-76 wool valued at £184,634 passed through the Custom House. The facilities offered for pressing wool at Baghdad have doubtless influenced this increase, besides the steam communication on the river has greatly improved, but I gather also that a great impetus has been given to trade by the native merchants embarking in speculations with foreign countries, which business they looked on previously with suspicion.

3. In my report of last year I pointed out that there had been a diminution of the trade of Baghdad with Persia. Since then His Excellency the Ambassador at Constantinople has addressed me a letter on the subject, and I have taken the opportunity of privately conversing with the Governor General of Baghdad about it. He assures me he will do all in his power to

revive the trade and explained to me that he had received a letter of thanks from the Shah of Persia for his kind treatment of Persian subjects. Of course my intervention is simply limited to friendly advice and counsel in order to obtain a renewal of free intercourse between the two countries, but the Persians complain of the arbitrary acts of the Turkish authorities in regard to their quarantine arrangements, the want of safety to travellers, and especially to the levy of an *ad valorem* duty of 75 per cent. on Persian tobacco. Formerly the Persians used to trade greatly with Baghdad, as the shrines of Nejjeff and Kerbella in the neighbourhood are places of pilgrimage to which Sheeahs of the Mahomedan faith flock from all countries, and it is to the absence of the Persian pilgrims we must partially ascribe a decrease of the imports, as most of the pilgrims come to trade as well as perform their devotions. Whether it be true or not I cannot say, but it is stated that the Shah of Persia prohibited his subjects from visiting Arabia in order that they might be induced to visit the Sheeah shrine of Meshed instead.

4. The province of Baghdad is gradually being drained of all its specie which is sent as fast as collected in gold to Constantinople, in fact I am informed that in another year or two very little of the gold coinage will be found in the province.

5. The Turks have also for some years past prohibited the exportation of horses from Arabia. This has greatly inconvenienced our stud arrangements in India, and is yearly losing the Turkish Government a large sum of money as they lose the export tax. The trade is of course not stopped, as the exportation goes on from the Persian port of Mohamerah to which place they are smuggled. This mischievous restriction however discourages the breeding of horses, and I think would be removed if a proper representation were made to the Porte on the subject, as it involves a regular loss of revenue which Turkey can ill afford.

6. I venture again to draw attention to the monopoly exercised by the Turkish Government in only permitting two English steamers to ply the rivers between Baghdad and Bussorah, because the Turks desire to retain the monopoly of the carrying traffic in their own hands.

7. The Tigris and Euphrates rivers are two arteries of the commerce which it is to be hoped will one day be thrown open to the world, although, as we are the only power that has the privilege of having steamers in the upper waters of Mesopotamia, as a matter of policy it might militate against our interests if the rivers were opened up; however, we are gradually beginning to be the farmers of the Turkish flotilla, as the agents of the British India Steam Navigation Company now hire the Turkish steamers for their through traffic.

8. In April 1875 an epidemic broke out in the marshes of the Euphrates, and Dr. Colvill of this Agency was deputed to examine and enquire into the matter. He visited Hillah and travelled from thence down the Euphrates to Bussorah, examining the sick on his way. The epidemic he pronounced to be veritable plague. This year it has been very rife at Hillah and will doubtless acquire strength every year until it culminates in a great disaster. The disease, a malignant infectious typhoid fever, is bred and fostered in the marshes of Mesopotamia, indeed that country in the course of a few years will for the most part become one vast marsh, unless something be done to guide the waters of the Euphrates into its old channel. The fact is, the whole of the vast engineering scheme of the ancients for irrigating Mesopotamia has been so neglected that it will require the science of a decade to control the Euphrates which now yearly discharges a great quantity of its surplus waters into the Tigris about three miles below the city of Baghdad. The level of the bed of the river Tigris is much lower than that of the Euphrates, and its waters were made use of to irrigate Mesopotamia formerly. One point is quite apparent, that as regards this disease, until some scheme is set on foot for draining the marshes, we shall have a yearly increasing mortality, and the danger of the disease spreading to India staring us in the face.

9. In consequence of the disease above referred to we have now nearly every year internal quarantine established in Baghdad; its usefulness is somewhat equivocal, as it tends to collect crowds of people into camps and thus encourages contagion, but it must not be forgotten that with this disadvantage it has the advantage of enabling some supervision to be exercised; but the quarantine is not effective, inasmuch as the country is an open plain and people can therefore avoid the roads. This is evident as the people leave Hillah in every direction. The Turks have, however, acted with a good deal of energy and done every thing in their power to stop the spread of the disease.

10. There is a large standing army in the province of Baghdad which is well armed and disciplined. The officers as a class are also efficient and their scientific attainments are not to be ignored. I mention this as we are very apt to despise the armies of other nations until we are brought into actual conflict with them.

11. During the past year Redif Pasha, the Governor General of Turkish Arabia, was recalled to Constantinople and replaced by Abdul Ruhman Pasha. At the same time an opportunity was taken of dividing the province, and Bussorah was made a separate Vilayet or Government. Midhat Pasha, the Sheikh of the Montefik Arabs and the conqueror of El-Hassa, was made Governor-General. Our relations have been on a satisfactory footing hitherto and no difficulties have occurred in the transaction of business. We have a great number of Indian Mahomedan subjects resident in the province of Baghdad who reside chiefly at the shrines of Nejjeff, Kerbella and Kauzemain, and the weekly steam communication with Bombay causes a large influx of devotees to the shrines, but there is scarcely a complaint that reaches me that is not readily adjusted. I should say, from personal observation, that Abdul Rahman Pasha is an able Governor General and one of that enlightened school of Turks which is represented by Midhut Pasha at Constantinople.

12. The British Government has had its attention recently drawn to the opening of the old trade route from Ispahan to Bussorah *viâ* the Karoon river by Mr. Mackenzie, an Agent of the British India Steam Navigation Company, who recently travelled the route. During the cold weather I visited the Karoon river and went up that estuary as far as Ahwaz. Up to this point the river is navigable, but at this point a ridge of rocks crosses the river which stops the navigation. This ridge however once surmounted, there is again a water way to Schuster, from thence there is a route which can be traversed by pack mules to Ispahan. The road is however difficult and you have to surmount several mountain passes of about 6,000 feet in height. The distance from Ispahan to Schuster is about 260 miles, it would be a great point if this route could be opened by the construction of a road, but I see no hope of this being accomplished by the Persians, indeed the difficulties are enormous, but as a route for the carriage of opium and silk by mules its shortness recommends it to serious attention, but it will be long before the routes *viâ* Bushire to Ispahan and Baghdad to Teheran will be superseded.

13. The territory between Schuster and Ispahan is occupied by the Bachtyari tribe who speak a language of their own called "loor." They are Persian Illyats or Gipsies and are friendly in their disposition to strangers. It would certainly be a grand route to open if we could make a road along the bed of the Karoon which comes down from the mountains distant about 60 miles from Ispahan.

14. I regret that we have been unable to obtain returns of the customs at the port of Bussorah.

15. I have requested Mr. Robertson, Assistant Political Agent, Bussorah, to visit Schuster and report on the route to Ispahan.

16. A memorandum marked "Confidential" on the Political Affairs of Turkish Arabia is enclosed in a separate cover.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29TH JUNE 1876.

GENERAL REMARKS.—The monsoon rains still hold off throughout the North-Western Provinces and the Punjab (though in the latter province showers have fallen): the fall where they have set in has been very scanty in almost all the districts of Bombay, in Berar, the Central Provinces, Central India and Mysore. Rain is reported from all the districts of Madras except Madura. In Bombay none has fallen in Guzerat, except in the Surat district: it is much wanted everywhere. In Sind the river is rising. In the Central Provinces sowings are retarded in many districts for want of rain, and it is much required in Berar and Central India. In Rajputana the monsoon still holds off in the north: the rainfall telegraphed appears to be chiefly of last week. In Bengal abundant rain has fallen in almost all districts, including Behar, Bhágulpur and Chota Nagpur; prospects are very good. No rain is reported from the North-Western Provinces, with the exception of the ordinary hot-weather showers at Jhánsi, Agra, Meerut and Almora. Slight rain has fallen in Oudh. In the Punjab there have been showers in all districts, and sowings have begun. In Assam the usual intermission of rain at this period of the year seems to be setting in: prospects are good. Reports from British Burma are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (June 29th)	2·41 at Masulipatam: ·80 at Nandigama.	Rain slight and insufficient elsewhere; 9 inches water over anicut; navigation canals opened; prices stationary; cholera continues, seizures 359, deaths 165; small-pox, fever and *suruku-mariatha* continue; epizoötic aphtha and dysentery among cattle; markets well supplied locally.
Kurnool („ 28th)	Over ·5 in Ramalkota, Nandikothoor and Cumbum; ·25 in Nundial.	Season generally good; dry lands being ploughed; pasture scanty; dry fodder obtainable; water sufficient; markets well supplied; prices stationary; cattle disease in 2 taluks; cholera, seizures 100, deaths 16.
Tanjore („ 29th)	·09 at Negapatam.	Rain elsewhere scanty and partial; rivers nearly dry; no supply to tanks; water over anicuts none; cultivation almost none; standing crops only a few, they are withering; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, number of seizures 297, deaths 221; *surukammai* in some parts, no loss; cattle disease abating.
Madura („ 28th)	*Nil*	West wind blowing strong; *cholum* being harvested in Dindigul, outturn poor; standing crops withering almost everywhere; fever and small-pox continue; cholera has re-appeared in some taluks, seizures 103, deaths 63, mostly in Shevagenga and Ramnad zemindaries.
Malabar („ 29th)	4·63	Markets well supplied; first crop not promising for want of seasonable rain; prices steady; cholera in all taluks except Cherakal, Walluvanad and Cochin, 242 cases, 222 deaths; small-pox and fever slight; pasture improving.
		General Remarks.—General prospects unchanged; rain in 4 districts, none in Madura.
Bombay— (June 29th)		
Sind.—(June 28th)		
Kurrachee ...	...	River at Kotri on 24th, 14 feet 8 inches, against 13 feet last year; 7 fresh cases of small-pox in Kurrachee; cattle in Jerruck and Shâhbandar suffering from disease; fever and cough prevalent in 4 talukas; locusts appeared in Kohistan, but did no damage.
Shikárpur ...	...	River fell 18 inches on Monday; *kharif* sowings progressing favourably; slight rain on 21st and 27th.
Hyderabad ...	...	River rising gradually; weather fairly cool; nights still; rain looked for; 16 fresh cases of small-pox in Hyderabad town.
Upper Sind Frontier ...	0·05	Weather hot; dust-storm followed by rain; *kharif* crops on Desert Canal most promising; health fair.
Guzerat.		
Ahmedabad ...	...	Cholera the same as before, 2 cases in city, 1 death.
Kaira ...	...	Weather very hot; 143 cholera cases, 67 deaths.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Surat	1·07	Total rainfall 7·14; one fatal cholera case in city.
Broach	...	*Kharif* sowings commenced; slight cholera at Hánsot, Jambusar and Ankleswar.
Khandesh and Násik.		
Khandesh ...	0·82 at Dhulia.	Total rainfall 4·42; more rain badly wanted; seeds sown after first fall scorched in many parts, sowing in others delayed for want of sufficient rain; public health good.
Násik ...	0·28	Total rainfall 0·65; more rain wanted; sowing of early crops delayed.
Konkan.		
Tanna ...	1·43	More rain wanted for agricultural purposes; cholera at Gholwad abated; small-pox in 2 talukas; sowing operations completed in 2 talukas, progressing in others.
Deccan.		
Poona ...	0·08	Total rainfall 2·70; slight cattle disease in Indápur and Purandhar; cholera in 2 villages of Máwal.
Ahmednagar ...	0·30	Total rainfall 1·78; sowing delayed for want of sufficient rain.
Sholapur ...	0·40	Total rainfall 1·62; more rain wanted; sowing retarded; cholera in Sholapur taluka, 15 deaths.
Satara ...	0·41	Total rainfall 2·87; want of rain generally felt; 50 deaths from cholera in Wálwa, 30 in Wai, 31 in Tásgaon, and 4 in Jauli.
Southern Mahratta Country.		
Belgaum ...	0·40	Total rainfall 5·41; sowing in some talukas suspended from want of rain; 58 deaths from cholera.
Dharwar ...	0·09	Total rainfall 6·15; more rain much wanted; sowing of rice, &c., almost completed; cholera slightly prevalent.
Kanara ...	1·75 at Karwar.	Total rainfall 25·50; more rain wanted; cholera continues.
Kaládgi ...	0·04	Total rainfall 5·14; *kharif* sowing commenced in 3 talukas; 197 deaths from cholera.
Kattywar.		
Rájkot ...	0·78	Cholera decreasing.
Wadhwán ...	0·72	Total rainfall 2·15; weather warm; sowing commenced in some places; cholera in Jhalawad, 72 cases, 34 fatal.
		General Remarks.—Small-pox in Kurrachee and Hyderabad; cholera decreasing in Southern Mahratta Country and Guzerat, spreading in Satara districts, and has appeared in 2 villages in Poona; rain much wanted everywhere.
Bengal— (June 29th)		
Chittagong ...	6·91	
Noakholly ...	5·97	Stray cases of cholera and small-pox at Bamni.
Chittagong Hill Tracts...	1·86	
Hill Tipperah ...	2·32	
Backergunge ...	2·36	General health good; cattle disease present in certain thanas.
Furreedpore ...	1·82	General health good.
Dacca ...	·41	
Tipperah ...	4·94	
Mymensingh ...	7·81	
24-Pergunnahs ...	2·68	Public health generally good.
Jessore ...	6·28	
Nuddea ...	3·66	
Moorshedabad ...	3·15	Health good.
Pubna ...	2·75	
Rajshahye ...	5·1	Public health good.
Bogra ...	5·81	Fever slightly prevalent.
Malda ...	9·07	Outbreak of small-pox in Kaliachuk thana, confined to one village; 30 cases with 7 deaths reported last week.
Dinagepore ...	5·89	Small-pox stopped; cholera abated.
Rungpore ...	7·89	
Cooch Behar ...	9·11	Cholera in Mehahganj, but less prevalent in other sub-divisions.
Jelpáiguri ...	8·08	
Darjeeling ...	11·85	
Midnapore ...	·41	
Howrah ...	6·18	
Hooghly ...	1·80	Public health normal.
Burdwan ...	2·80	Public health fair.
Bankoora ...	6·78	
Beerbhoom ...	7·21	
Santhal Pergunnahs ...	11·48	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Bhágalpur ...	3·	General health very good.
Monghyr ...	Return not recd.	
Purneah ...	11·41	
Durbhunga ...	1·82	
Mozufferpore ...	Return not recd.	
Sarun ...	·36	Cholera reported both from Sewan and Gopalgunge, but not with fatal results.
Chumparun ...	2·56	
Patna ...	Return not received.	Cholera still prevalent throughout the district, especially in the Bickrum thana jurisdiction.
Gya ...	2·59	
Shahabad ...	·95	Cholera still prevelent.
Hazáribágh ...	1·54	
Lohardugga ...	4·88	A few cases of cholera; small-pox at Palamow.
Manbhoom ...	3·88	
Singhbhoom ...	7·2	
Balasore ...	·57	Health in the north of the district good; in the south cholera growing fatal; 467 deaths reported.
Cuttack ...	·59	Cholera very bad along the sea coast, elsewhere public health good.
Pooree ...	1·	Cholera raging.
		General Remarks.—There has been rain in all the districts of Bengal during the week under review; ploughing and sowing operations are being vigorously carried on; the prospects of the crops are generally good; *aous* sowings in the district of Hooghly are over; *bitri dhan*, a sort of *aous* in the district of Cooch Behar, though it has suffered in some places, is a fair average crop; early rice crop in the south-east of Mymensingh is being cut; the sowing of *amun* or the late rice crop has far advanced, and in some places the *amun* seedlings are being transplanted. Jute, indigo, *til* or *sessamum*, young sugarcane, millets, and other minor crops are doing fairly well.
N. W. P.—		
Benares (June 28th)	*Nil*	No inconvenience felt on account of rain not having fallen; heat great.
Allahabad („ „)	...	No change.
Jhánsi („ 29th)	...	Slight rain in parganas Mau and Garotha; strong westerly winds drive away the clouds.
Agra („ „)	...	Clear weather and west wind; showers in places, but regular rains have not commenced.
Meerut („ 28th)	Slight rain.	Weather oppressive.
Bareilly („ „)	No rain since 22nd.	Weather clear.
Almora („ 27th)	...	On Tuesday a storm from west, with rain generally throughout the district; on Wednesday another from west over about half the district; slight rain from south on Friday, weather since unseasonably clear and cool with few isolated showers.
Punjab— (June 28th)		
Delhi ...	3·	Health good.
Hissár ...	1·3	Sowings commenced; health generally good; a little cholera about.
Umballa ...	·2	Health good; *kharif* not yet sown.
Jullundur ...	·5	Sowings commenced; health good.
Lahore ...	·7	Health fair.
Mooltan ...	1·2	Health good.
Dera Ismail Khan ...	·5	Health good.
Rawálpindi ...	1·	Prospects and health good.
Pesháwar ...	·2	*Rabi* being harvested; *kharif* ploughing progressing; health good.
		General Remarks.—Fall of rain during past week general throughout province; agricultural prospects good; public health fair.
Oudh— (June 28th)		
Lucknow ...	1·7	*Kharif* preparations in progress; cholera continues.
Fyzabad ...	·1	
Sitapur ...	*Nil*	
Central Provinces—		
Upper Godávari (June 24th)	1·64	Rain insufficient for sowing; 1 death from cholera; prices risen.
Sambalpur ...	4·72	Weather cloudy; sowings commenced; cholera decreasing.
Bilaspur ...	6·18	Sowings commenced; fever and cattle disease continue; prices steady.
Raipur ...	4·48	Sowings in active progress; health good; prices easy.
Bálághát (June 24th)	·40	Weather cloudy; ploughing continues; rain wanted for sowings; health good; prices unchanged.
Chanda („ 25th)	·29	Weather cloudy; more rain wanted; sowings commenced in places; cholera in all tahsils.
Chhindwára ...	2·30	Weather cloudy; *kharif* sowings being pushed on; health good; prices stationary.
Betúl („ 26th)	1·12	*Kharif* sowings continue; more rain wanted; 12 cholera cases, 3 deaths; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Bhandara (June 27th)	1·15	*Kharif* sowings continue; more rain wanted; fever and small-pox continue; prices stationary.
Nágpur („ 28th)	·41	Sowings of cotton commenced in places; more rain wanted; prices fallen.
Wardha ...	·03	Sowings delayed for want of sufficient rain; cholera continues.
Nimár ...	·35	Weather cloudy; sowings delayed for want of rain; small-pox decreasing.
Hoshangabad ...	...	Weather cool; 296 cholera cases, 196 deaths; prices unchanged.
Narsinghpur ...	...	Rain wanted for sowing; 623 cholera cases, 332 deaths; prices slightly risen.
Jubbulpore (June 28th)	·30	Weather cloudy; more rain wanted; cholera, small-pox, and cattle disease continue.
Saugor ..	·65	Weather cloudy; fields under preparation for sowing; cholera continues; prices unchanged.
Seoni ...	2·15	*Kharif* sowings continue; cholera broken out near Kahani.
Mandla (June 28th)	·40	Slight cholera and small-pox; prices stationary.
Damoh ...	·30	Cattle disease prevalent; prices stationary.
		General Remarks.—But scanty rain has fallen in most districts and sowings are delayed in consequence; where seed has been already put in, there is danger of its dying. Cholera is still spreading in the Narsinghpur district.
British Burma— (June 29th).		
Arracan Division ...	11· in Akyab.	Public health good; cattle disease in portions of Akyab and Kyoukphyoo districts; ploughing commenced throughout the division.
Pegu Division.		
Rangoon ...	4·27	Public health good; cattle disease general, bad in Syriam.
Bassein ...	...	Cattle disease in Ngapootan, Myoungmya and Labootbulah; health good; rainfall favourable.
Henzada ...	...	Rain sufficient; ploughing progressing; slight cholera and cattle disease in Myanoung; health good.
Prome ...	...	Few cases of small-pox in Prome; otherwise health good.
Thayetmyo ...	...	General health good; rains set in.
Thonkwa ...	...	Health good; ploughing commenced; rainfall scanty; cattle disease in Pyapoon township.
Tenasserim Division ...	...	Public health good.
Tonghoo ...	3·	Ploughing commenced.
Shwegyeen ...	19·	Prospect of crops good.
Assam—		
Gauháti (June 29th)	·65	Slight showers on first three days, clear and hot since; *asu* being reaped; prospects of tea the same as before; public health good.
Sylhet („ „)	3·97	Weather very seasonable.
Hyderabad Assigned Districts—		
Amráoti (June 29th)	·46	Rain much required; sowing operations progressing; cholera still in Wun district; during week 74 were attacked and 39 have died.
Mysore and Coorg—

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 22nd June 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble J. F. D. Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

PRESIDENCY MAGISTRATES BILL.

The Hon'ble MR. HOPE presented the further Report of the Select Committee on the Bill to regulate the procedure and increase the jurisdiction of the Courts of Magistrates in the Presidency Towns, and moved that the Bill be published in the *Gazette of India*, and in the Gazettes of the several Local Governments.

He said that on the last occasion when he had the honour to address the Council on this subject, in presenting the previous Report, he pointed out the differences between the Bill then laid on the table and its predecessor. The most essential characteristic of the Bill as then presented was, that it embodied, *in extenso*, the whole of the provisions of the Criminal Procedure Code applied to Presidency Towns, which previously had been applied by simply quoting the sections in the schedule. The only alteration at all of importance was a slight improvement in the record, by which Magistrates, in appealable cases, were required to state their reasons for a conviction and to give a brief summary of the substance of the evidence on which they had based it. At the same time he had intimated that as the Bill had been, in its then existing form, for about eleven months before the public, and no objections had been raised to its provisions, it was proposed to proceed with it in the course of about a month. It very soon, however, became apparent that the presumption that "silence gives consent" was premature in this instance, and that, in fact, the Bill had been entirely overlooked by the public, and by many who were materially affected by it, and that there were strong objections entertained to various portions of it in different quarters. Under these circumstances he need hardly say that the intention to push on the Bill immediately was abandoned, that all the suggestions and objections which were made were carefully considered by the Committee, and that, in consequence, it was not until the present time that the Committee were in a position to report further upon the subject. This delay he could not consider otherwise than with unmixed satisfaction, not only on account of the general expediency of allowing ample time for the consideration of all suggestions and objections that might be made,

but also on account of the great amount of really valuable matter which had been laid before the Committee in consequence. The Report which he was now presenting would speak for itself, and at very considerable length. He need hardly say that in the case of a large measure of this kind, the material alterations in which were summarized in no less than twenty-seven paragraphs, it was scarcely to be expected that every Member of the Committee should entirely concur in every one of the separate matters noticed. For his own part, he could only say that he should be sorry to be considered as entirely responsible for every single thing embodied in the Bill. At the same time, speaking impersonally as the Member in charge of the Bill, he might, perhaps, draw attention to one or two of the more serious changes made, without expressing any individual opinion upon them.

The principal change he would first notice was that relating to the powers of Magistrates. By the provisions of the Bill as last presented to the Council, the extended powers which it was proposed to give to the Magistrates were intended to be exercised almost in the same summary manner as the powers which the Magistrates now possessed were exercised. The only alteration then made was that which he had just noticed, and the result still was that the High Court were liable to be left, in hearing a case on appeal, with very little indeed to go upon, and, in dealing with a case on *certiorari*, as it was called, might be left with nothing at all. The present Bill materially altered that. It was now rendered obligatory upon every Magistrate, in the first place, to record his reasons in every case in which he inflicted imprisonment, or any fine exceeding rupees 50; secondly, he was required to draw up a formal charge in every case of an offence punishable with more than six months' imprisonment; and thirdly, he was required to record the whole evidence in full in every case which was appealable to the High Court. But, more than that, the limit of appeal, which in the previous Bill was fixed at sentences exceeding twelve months' imprisonment, and rupees 500 fine, had, in the present Bill, been reduced to six months, and rupees 200 fine—that was to say, that the Magistrates would exercise free of appeal very much the same powers as they exercised at present, only subject to certain restrictions which were not now imposed upon them. Whether, considering the increased facility which, by this very great improvement of the record, was given to the High Court for dealing with a case on *certiorari* (which was an inferior sort of appeal), there was any necessity for also curtailing the relief which the previous arrangement of twelve months' appeals afforded to the High Court, was, perhaps, a matter which only experience could determine.

The next important point was that which related to the power of the Government to appeal against acquittals. This power had been considerably objected to in certain quarters, and, he could not but think, upon grounds which showed that the nature of the provision was not quite thoroughly understood. It was supposed that this was a power which the Government, in its executive capacity, reserved for itself, and did not allow to the subject generally, for the purpose of obtaining its own ends in cases in which it was personally interested. Nothing could be more erroneous than this supposition. In point of fact the power which the Government would exercise, would be simply of the same nature, and exercised in the same way as that which it already had as public prosecutor in an original criminal case. If it were reasonable that the Crown, on behalf of the public, should undertake the prosecution, as it did in every criminal case, it appeared equally reasonable that the Crown should have the power of going up to the higher Court, in the interest of the public, in any instance in which it appeared that there had been a gross failure of justice in the lower Court; and, further, he might say that, in practice in the Mofussil, this power was almost invariably exercised by the Crown at the instance of private prosecutors in cases instituted by themselves. The Crown only moved on the advice of its law officers, and usually had not the slightest personal interest or concern whatever in such cases.

The last point he would notice was that the previous Bill followed perfectly closely the arrangement of the Mofussil Criminal Procedure Code, and, as closely as was practicable, the wording of that Code, only making such verbal alterations as were absolutely indispensable. The present Bill effected a total change in this respect—the arrangement of the chapters had been very much changed, their contents had been consolidated, and an improvement in the language had been introduced in every instance where there appeared to be the slightest room for it. It might, perhaps, be thought that this complete change in phraseology, where the subject was the same, might lead to conflicting rulings upon the Criminal Procedure Codes of the Presidency towns and the Mofussil, and to considerable doubts as to what the law was, or ought to be. But, on the other hand, we did not find in practice that any inconvenience had arisen from the differences now existing between Act X of 1875 and the Mofussil Code, and the Bill which he now submitted to the Council might, perhaps, be very usefully applied in due time towards the improvement of the Mofussil Criminal Procedure Code itself. With these remarks he thought he might conclude. He would merely add that the Committee would recommend that ample time should be allowed for any further objections and suggestions to be made, and that consequently it would probably be advisable that the Bill should not be proceeded with until next cold weather.

The Motion was put and agreed to.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble MR. HOPE also moved for leave to introduce a Bill to relieve from incumbrances the estates of Jágírdárs and Zamíndárs in Sindh. He said that he might perhaps appropriately commence by explaining who those Jágírdárs and Zamíndárs were. The Jágírdárs in Sindh consisted of about 170 families, of whom some sixteen were great Beluch chiefs of very high rank and antiquity, who had been living in the country for many centuries. Then there were the families of the old Amírs of Sindh, who were dispossessed at the time of our annexation. Below them were the Sardárs of various degrees of importance, and there were also what were called Pattídárs, who were chiefly Afghán settlers; and finally, Khyrátdárs or charitable grantees, who were persons of more or less social and religious status—many of them Kázís. These Jágírdárs were a class deserving, he thought, of our highest sympathy and consideration. At the battle of Miáni we found that they were the most resolute and gallant soldiers, and once the conquest was effected, they settled down under our rule in loyalty and contentment.

The Zamíndárs in Sindh, generally, were simply the landowners or proprietors of the soil. They were persons who had no subordinate holders under them, but who worked their lands either personally or by labourers whom they engaged, usually on annual contracts: they were not superior holders in any sense. The definition of a Zamíndár in Sindh, therefore, differed from that of a Zamíndár in other parts of India. It was not of course intended that a measure of this description should apply to all the landowners of Sindh, and it was therefore necessary to draw an artificial line so as to show who were to be considered Zamíndárs for the purposes of the proposed Act. This line had been drawn at the payment of not less than Rs. 300 per annum direct to Government. By means of this definition he might say that we virtually got all the landed gentry of the country, and a certain small number perhaps of the very superior yeomanry, and we had to deal with a class who were in many instances of as old standing as the Jágírdárs, and who were held in great estimation and consideration by the people.

Having briefly explained who the Jágírdárs and Zamíndárs were, he would observe that under the Amírs of Sindh their condition was, on the whole, one of very fair prosperity. They were not subject to many of the temptations to profligacy and extravagance to which they were now exposed. There were also fewer means of indulgence. There was then less money in the country; and there was no regular law for the recovery of debts, the consequence being that there was much more difficulty in obtaining paper credit. There

was also less necessity for obtaining cash loans, because the Government did not press severely on them for cash payments for their lands, but carried on a system of sharing the annual produce of the lands in kind, which fell heavily upon them in good years perhaps, but did not press in bad ones; consequently, as a class, he believed they were not much, if at all, indebted. If an individual did fall into difficulties, he generally had the liberal assistance of his Government to get him out; he either obtained some remission of his rent, or perhaps an extra jágír if he was in favour, or some sort of composition was made by which he was enabled to pay by instalments. When our British rule supervened, he (MR. HOPE) regretted to say that a very rapid change took place in the condition of the Jágírdárs and Zamíndárs. As early as 1859—indeed before that—their growing indebtedness attracted the attention of Sir Bartle Frere, who passed certain rules for limiting their power of involving themselves and extricating them from the difficulties into which they had got. Again in 1868 Sir William Merewether brought very seriously to the notice of Government the extent to which this evil had spread; and further on, in 1872, Mr. James, Assistant Commissioner in Sindh, portrayed with great force and ability the history and present miserable condition of the Zamíndárs in certain portions of the Haidarábád Collectorate. This led to a general enquiry into their condition, and the upshot was that it appeared that out of about 170 Jágírdárs in Sindh, no less than 70 were involved in debts amounting to 10 lákhs of rupees. It was also found that 600 Zamíndárs were involved, their liabilities being 20 lákhs of rupees, or 30 lákhs in the whole. No doubt some of these debts were small, but, after eliminating all Jágírdárs who were not indebted more than two years' income, and all Zamíndárs who were not indebted more than two years' Government assessment, there was still a residue of 45 Jágírdárs whose debts amounted to 9 lákhs, and of 370 Zamíndárs whose debts amounted to 17 lákhs. The pressure of debt among the Jágírdárs occurred chiefly in the Haidarábád Collectorate, while the pressure upon the Zamíndárs was greatest in the Frontier Districts, under the Political Superintendent, and in the others bounding upon them. With regard to the Haidarábád Jágírdárs, the fact that nearly $6\frac{1}{2}$ lákhs had been incurred by the immediate families of the Amírs of Sindh, whom we dispossessed in 1843, would show that the case was entitled to very great consideration. Accompanying these financial results we had the most forcible representations from officers of the Bombay Government of the utter state of destitution and distress into which these people, as a class, had fallen. In a great number of instances indeed, MR. HOPE feared, our proposed measure would come too late, as many of them had been already sold up and their lands had passed into the hands of Hindús and other persons; still a good deal might yet be done, and considering who these people were, he thought we ought to try and save them, more especially when we recollected that in India, when classes of this description were ousted from their hereditary possessions, they did not, as in other countries they would do under similar circumstances, amalgamate with the lower orders and gradually disappear in the mass of the population, but remained on in their ancient villages and lands, a perpetual source of quarrelling and disaffection.

As to the origin of all this state of things, there were, naturally, great differences of opinion prevailing, and the controversy had been carried on with a great deal of ability on both sides; but, speaking very broadly, he might attribute it to four main causes. First, there was the natural improvidence and prodigality which characterized the Mussulman nobility in almost all parts of India that we were acquainted with. Next to that were the peculiar natural circumstances of the Province of Sindh; in Sindh water was almost everything, but unfortunately there was perpetually either too much or too little of it, so that it often occurred that there was not merely a partial or slight failure of crops but a total absence of any crop at all. Besides that, in the period with which we were now dealing, there had been some very bad seasons which had given an additional push to some unfortunate men who happened to be previously involved. Another cause, he must frankly admit to be the operation of the Revenue Survey settlement introduced into Sindh. The Sindh survey commenced many years ago under Sir Bartle Frere, and took a definite form by the application of Act I of

1865. The problem of making a settlement at all in Sindh, instead of going on as the Amírs used to do, from hand to mouth, no doubt, was an exceedingly difficult one, and was treated by the officers who had to deal with it with great conscientiousness and ability; but the result was that in some cases it had been found in the course of one or two years' experience that the rates were too high, while in others a settlement was made which was not suitable. Further, the application of the settlement was in some instances somewhat harsh and unintelligent; and, finally, the people themselves, being so little accustomed to a measure of the kind, could not sufficiently understand it to avail themselves of all the advantages which it really offered to them. And he must not omit to mention the perpetual change of officers, which he thought he might say was one of the greatest plagues which affected districts all over India, for an officer no sooner got into a district and learned something of its circumstances and people than he was by necessity changed to some new district. Lastly, he must mention the action of the Civil Courts, which took a complete form by the application of the Code of Civil Procedure to Sindh in 1865. There could be no doubt that by this Code, and still more by the mode in which it was worked, the facilities for the recovery of debts by the creditor were enormously increased. He did not wish to be understood as attributing to the Civil Courts all the misfortunes of the Jágírdárs and Zamíndárs of Sindh, but the action of the Courts might fairly take its place among the other causes which he had mentioned. Of course, it would be understood that all this had not been going on without various efforts to improve matters. The rules of Sir Bartle Frere to which he had referred, prohibited a Jágírdár from alienating his jágír beyond a certain extent, and in the frontier districts General Jacob wholly refused to take notice of debts at all; but the Code of Civil Procedure of course put an end to these expedients, which no doubt were somewhat rude, and must at some time have given place to a more regular system. However, the present condition of these people was as bad as it could be, notwithstanding the expedients thus adopted, and there was no question that the measure for relief which had been urged upon the Government ever since 1868 ought to be passed without delay.

As to the nature of the Act, it was contemplated that it should be of the same kind as those which already existed for Oudh, the Broach Taluqdárs, the Ahmadábád Taluqdárs, and for the Chutia Nágpur Chiefs, the last of which was passed but very recently. He should of course reserve an explanation of the details of the proposed Bill for the occasion of its introduction. He was quite aware of the objections which might be made, on economical grounds, to Bills of the general scope of the present one; but as those objections had been fully considered on the three previous occasions on which the subject had been before the Council, and had been held to be outweighed by political and general considerations in favour of the measure, he need not now go into them. Some of those considerations, however, had special force as applied to Sindh, arising from the fact that we had not only an aristocracy but a superior class of gentry involved, and likewise a peculiar nationality to deal with which required cautious treatment. MR. HOPE thought he could not conclude his remarks more appropriately than by reading the following passage from the speech of Sir John Strachey in 1870, when the Oudh Taluqdárs' Bill was introduced in the Council:—

*** "there would be many people who would say that if these estates had been mismanaged by the taluqdárs and thus became encumbered with debts, the sooner they passed into the hands of solvent proprietors, the better. Not only in Oudh, but in other parts of Northern India with which he had been personally acquainted, he had never believed that that principle was a right one to apply. He had always believed, and he thought the experience of 1857 had shown it to be the case, that this was a matter in which we could not afford to ignore the feeling of the people of the country. It shocked every feeling of propriety and justice in the Natives of Northern India, that we should allow estates which had been held in the same family for generations to pass into the hands of strangers—generally of the money-lending class—in satisfaction of decrees of civil Courts for debt. He thought there could be no doubt that the experience of 1857 showed conclusively the mischief thus done. The transfer, under the operations of our Courts, of many ancient estates into the hands of strangers was found, in 1857, to be a great cause of political weakness, by depriving the Government of the support

of the chiefs whom the people themselves looked on as their leaders; and it also became a cause of internal commotions and bloodshed among the people themselves."

The Motion was put and agreed to.

BOMBAY MUNICIPAL DEBENTURES BILL.

The Hon'ble MR. HOPE also moved for leave to introduce a Bill to amend the law relating to the transfer of Bombay Municipal Debentures. He said that the matter was a very simple one, and he would explain it in a few words. In 1865 a local Act was passed enabling the Bombay Municipality to raise money on mortgage, and it was provided by that Act that such mortgages should be transferred by deed duly stamped. As a matter of fact the public in general overlooked this provision entirely, and transferred mortgages in the same way as they transferred Government paper—without any stamp or deed but simply by endorsement. This practice was now found to affect the sale of those debentures, because in consequence of it no present holder could transfer his interest to another with a valid title. The object of the Act in the first place, therefore, was to relieve parties from the penalties which they had already incurred from this course and to validate the transfers which they had made; and, secondly, to assimilate the law to what it was in Madras and Calcutta by allowing such transfers to be made by endorsement.

The Motion was put and agreed to.

MERCHANT SEAMEN'S BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill to amend the law relating to Merchant Seamen.

REGISTRATION ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE also moved for leave to introduce a Bill to amend the Indian Registration Act, 1871. He said that the Council would be aware that when we touched on an Act like the Registration Act, which consisted largely of mechanical details, there were always a good many small points which had been observed from time to time, and noted in the Legislative Department, in which amendment was required. Those points would be mentioned in the Statement of Objects and Reasons, and to some extent when he introduced the Bill, if the Council gave him permission to do so. He would only now mention the principal one—the only one in which it could be said that any principle was involved—which he conceived would be a sufficient reason for the Council giving him permission to introduce the Bill.

Everybody knew that the object of a Registration Act was to give certainty to titles and to prevent the operation of fraudulent and secret transactions by which a man's right in the property which he had acquired might be defeated. For that purpose the Registration Act adopted the following arrangements. It took a certain class of documents—documents of the more important kind—and required that they should be registered. There was no option given to the holder of such a document; he must register it within a certain time, and under certain conditions, in order that the document should be valid. Then another class of documents was taken—documents of less importance—as to which an option was given to the holder whether he would register them or not. For the purpose of giving the registration of the first class, which he might call "compulsory documents," an advantage, it was provided that, unless registered, they should be invalid for certain purposes, which in fact included almost all purposes for which a document should be used, and that they should take effect against any oral agreement relating to the property comprised in them; and for the purpose of giving the holder of documents of the second class, which might be called "optional documents," a motive to register, it was provided that the registered document should have priority over oral agreements and over all unregistered documents of the same class; so that the holder of a document duly registered was perfectly safe against all unregistered documents

of the same class, or against all oral agreements respecting the property comprised in his document. But it seemed to have been overlooked that the owner of a compulsory document might be exposed to danger from an unregistered document of the optional class. For instance, supposing he (MR. HOBHOUSE) purchased land and that he paid for it and got his conveyance, and that he registered his conveyance with due formalities on the 1st of January 1876. He was perfectly safe against all conveyances of the same land, though they might have been executed in the year 1875; and he was perfectly safe against oral agreements concerning the same land, though they might have been made and though consideration might have been given for them in the year 1875. But supposing his vendor, in December 1875, had signed an agreement and received consideration for that agreement to the effect that if Rs. 50 was not paid in February 1876, the donor, or holder, of the document should have a charge upon the land, he was not safe against such an agreement as that. That was one of the optional class. The document need not be registered, and there was nothing in the Act which gave priority over an unregistered document of that class. Now, it was obvious that if a transaction of that kind took place, there must be a fraud somewhere. Either there was such an agreement, and then it would be a fraud in his vendor not to have disclosed it to him; and it was right that the holder of the unregistered document should suffer for that fraud because he had had the option of registering his document and had not availed himself of it; one had taken every precaution allowed to him by the law, and the other had not, and it was right that the latter should suffer. Or there was no such agreement, and then there would be a fraud on the part of the person alleging it. Either way it was clear that the holder of the registered document ought to have the advantage. We had been warned by a high judicial authority in Bombay that suspicious transactions had already taken place owing to this omission in the Act; that the people at large were becoming acquainted, through the publicity given by litigation, with the gap that there was in the Act; and he apprehended that a great many frauds would be executed. That had led us to undertake the task of amending the law, and it would, he imagined, be a sufficient reason for the Council to give him leave to introduce the Bill.

The Hon'ble MR. COCKERELL said that although it was not usual on the occasion of the permission of the Council being asked for the introduction of any measure, and before the substance of such measure was brought under consideration, to raise any discussion on questions of detail, yet the matter to which he desired to draw attention, though in one sense falling within the category of details, involved a question of principle which rendered it eligible for consideration at this early stage of the proceedings, whilst its undoubted importance made it desirable that the question should be considered without unnecessary loss of time.

The system of enforced registration of instruments affecting any interest in immoveable property was first introduced by the enactment of Act XVI of 1864. The details of that enactment having been found incomplete, the law was entirely revised in 1866. Again in 1871, experience of the working of the law having brought to light several imperfections, fresh legislation was undertaken, and Act VIII of that year contained the present law on the subject.

That law restricted the absolute obligation to register instruments affecting immoveable property to cases in which the value of the interest affected was not less than Rs. 100; and the question which he now desired to raise was, whether that restriction should be maintained.

The legislature very naturally at the outset hesitated to extend the obligation to register to the point of including every transaction, however minute, in relation to immoveable property. Great as was the advantage to be anticipated from a complete system of registration of titles and interests in land, yet in the first working of the measure, when the entire machinery for registration was, for lack of experience, necessarily imperfect, there was a risk, or even a probability, of a more than counterbalancing evil resulting from such a step in the harassment of a large number of persons, by their being compelled to travel in many cases great distances to get their documents registered, and

further to incur much expense and inconvenience through excessive delay in the transaction of their business at the registration office. It was the anticipation of such annoyances and possible hardship to the people which, so far as he knew, had alone stood in the way of the attainment of a complete public record of rights and titles in immoveable property.

A system which admitted of so wide a gap for the escape of documents relating to interests in land from registration,—for in many parts of the empire so marked had been the progress of the sub-division of such interests in late years, that individual shares in property of a value below the pecuniary limit of compulsory registration abounded,—was necessarily and avowedly imperfect.

When the existing restriction was originally fixed he believed that it was declared to be a tentative measure; and although he had not been able, within the short period in which he had notice of any proposal to bring forward a Bill for amending the present law on this subject, to obtain access to the connected records or papers, yet he felt sure that he was correct in saying that on each of the occasions to which he had referred, on which the reconsideration of the law had come before this Council, the expediency of abolishing all restriction of the absolute obligation to register had been mooted and more or less earnestly advocated.

In these circumstances he ventured to suggest that the time had now come when the existing restriction might be safely removed and the registration of all documents affecting any interest in immoveable property rendered compulsory. Five years had now elapsed since the present law was enacted, and he was strongly of opinion that the objections to the extension of the compulsory system to the most minute written transactions affecting interests in land had been in great measure, if not wholly, obviated, in at least many parts of the empire, by the greatly improved working machinery which time and experience had brought into operation.

Moreover the consideration and adoption of the course which he was now advocating were peculiarly pertinent to the present occasion; for there was before the Council a large measure for amending and reforming the whole procedure of the Civil Courts, and a most important section of that measure was the improvement of the system in force for the execution of the Courts' decrees. It was, he might say, an essential condition of any substantial improvement in that direction that we should have a complete public record by means of which rights, titles and interests in land could be sifted and ascertained with absolute certainty down to the lowest degree; and such a record must be wanting so long as the existing limitation was maintained.

For these reasons, he would ask the hon'ble and learned mover to consider the propriety of so framing the Bill which he was about to introduce as to make the registration of all deeds relating to immoveable property compulsory, or to consent to the sending of a special requisition to all Local Governments and Administrations to advise the Council as to the propriety of the change proposed with a view to its being adopted and incorporated in the Bill whilst it was before a Select Committee.

He felt strongly that the present opportunity for making this very important change should not be lost, if after a general consultation of experienced local officers competent to give an authoritative opinion on the subject, the change should appear desirable.

The Hon'ble MR. HOBHOUSE said that he had only one or two remarks to make on his hon'ble friend's observations. Mr. Cockerell had no doubt raised a large question of principle, which he was perfectly entitled to raise on the present occasion. He would not discuss it now, because he presumed that his hon'ble friend would have something more to say about it, and in greater detail, when he (MR. HOBHOUSE) came to introduce the Bill, which was the correct time for discussing the principle of the measure. He began by stating that this was a measure which could hardly be said to have any principle, being all detail, but he found now that it had a principle, because the question was whether we

should undertake the large operation of making our registration system extend to all documents, or whether we should only undertake the smaller operation of making the system now existing more perfect than it was. His hon'ble friend had stated that he had not seen the papers on the subject, and he would undertake that, between that time and the introduction of the Bill, he would give him a very thick bundle which was lying on his table, which he would find very interesting, and which would take him some time to read; but he did not think that he would find that we had materials for entering into such a large operation as he wished to undertake. He thought that before we could commence any such operation, we should have to make a great deal of inquiry, which would take time, possibly a couple of years. When, however, his hon'ble friend had read the papers, he could form his own judgment whether it was wise to press for a wider measure, or whether it was better to undertake the smaller measure which he now asked for leave to introduce to the Council.

The Motion was put and agreed to.

STAGE CARRIAGES ACT AMENDMENT BILL.

The Hon'ble MR. BAYLEY moved for leave to introduce a Bill to amend the Stage Carriages Act, XVI of 1861. He said that the proposed amendment was a very small one. The Act of 1861 provided certain regulations with the object of bringing stage carriages within the control of the law, and preventing the great abuses which had previously existed from horses being driven in an improper condition and the carriages being overladen, and from intoxication or carelessness of drivers and other similar evils. The first and the last sections provided that it should apply to every carriage drawn by one or more horses which should be used for the purpose of conveying passengers for hire, and that such carriage should be deemed to be a stage carriage within the meaning of the Act. The twenty-first section provided that the term 'horse' should include ponies and mules; but it was found by experience, in the North-Western Provinces especially, that carriages of this kind were often not drawn by horses, ponies, or mules, but by camels or oxen, and that the same abuses which the Act was intended to prevent existed with regard to those conveyances. The whole object of the Bill, therefore, was that the law which now applied to carriages drawn by horses should be applied to those drawn by camels and oxen.

The Motion was put and agreed to.

OPIUM BILL.

The Hon'ble SIR WILLIAM MUIR moved that His Honour the Lieutenant-Governor of the Panjáb be added to the Select Committee on the Bill to amend the law relating to Opium. He explained that as opium was grown in the Panjáb, Sir Henry Davies was interested in the Bill, and was quite ready, as he was present in Simla, to act upon the Committee.

The Motion was put and agreed to.

The Council adjourned to Thursday the 29th June 1876.

SIMLA;
The 22nd June 1876.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6TH JULY 1876.

GENERAL REMARKS.—The monsoon rains still hold off in the Punjab and the greater part of Rajputana, and it appears doubtful whether they have set in in Oudh and some districts of the North-Western Provinces; where they have commenced the fall in several districts of Bombay, the Central Provinces, Central India, and Mysore has been very scanty, and in Guzerat none is reported to have fallen.

In Madras the fall has been very light, except in Malabar. In Bombay the fall has been sufficient for sowings to begin in Násik, the Deccan districts, and the Konkan; in Guzerat none has fallen, and it is much wanted; and in the Southern Mahratta Country more is required. In the Central Provinces the fall has been below the average up to date, and the prospects of the earlier sowings are not so favourable as they would otherwise be. The fall has been deficient throughout the Central India Agency, and from Rajputana only a few showers are reported: rain is much required. In Bengal copious rain has fallen in the Eastern and North—Central districts, and also in the Southern Delta: it has been light in the Upper Delta districts and parts of Orissa; in several districts of Chota Nagpore it has also been scanty; in Behar good rain has fallen in Patna, Chumparun and Shahabad, very little at Gya, and not much in Sarun and Durbhunga; cultivation is reported to be progressing satisfactorily. In the North-Western Provinces the setting in of the rains is reported from Benares, Allahabad and Bareilly; the *kharif* sowings have not yet begun west of Benares. In Oudh only showers are reported to have fallen, and rain is much wanted. In the Punjab there has been no rain, except half an inch at Umballa, and showers at Delhi, Hissar and Lahore: rain is much needed. In Assam the season is favourable. Rain has fallen in Coorg, but from Mysore very little is reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 6th)	*Nil* at Masulipatam; ·80 at Narsarowpett; ·55 at Bezwada.	Rain insufficient elsewhere; 1 foot and 1 inch water over anicut; tanks in Sattanapally and Narsarowpett received little water; prices stationary; mild small-pox, fever, guinea-worm and *suruku-mariadda* continue; cholera throughout the district, seizures 526, deaths 212; cattle unhealthy; dry fodder available; market well supplied locally.
Kurnool („ 5th)	Very slight in Nundial and Nandikotkur; none elsewhere.	Season rather unfavourable; pasture scanty; water sufficient; markets well supplied; prices stationary, except in Nundial, where *cholum* is rising and paddy falling; rinderpest in Nandikotkur taluk; cholera all over the district, 229 attacked, 96 deaths.
Tanjore („ 6th)	Rain at Negapatam; elsewhere none.	Freshes in rivers slight; supply to tanks almost none; water over anicuts *nil*; cultivation, inferior paddy in some places; standing crops only a few, they are not thriving; no harvest; pasture insufficient; markets well supplied; prices inclined to rise; public health, cholera continues, number of seizures 308, deaths 283; small-pox and *surukkammai* in some parts; cattle disease abating.
Madura („ 5th)	Slight rain in Melur and Paracolam.	*Cholum* being harvested in most taluks, no change in other respects; cholera seizures 79, deaths 46, mostly in Shevagenga and Ramnad zemindaries.
Malabar („ 6th)	11·67	Markets well supplied; prices slightly increased; cholera in all taluks, except Cherakal, 367 cases, 308 deaths; small-pox and fever slight; pasture flourishing.
		General Remarks.—General prospects unchanged; rain in all 5 districts.
Bombay— (July 6th)		
Sind.—(July 5th)		
Kurrachee ...	...	River at Kotri on 1st, 13 feet 9 inches, against 10 feet 5 inches last year; locusts passed through Sehwan on 23rd June, but did no damage to crops; town of Mánjhand eroded by river; Gáj came down in flood; 6 fresh cases of small-pox in Kurrachee; weather cloudy; rain threatening.
Shikárpur ...	...	River 4 inches lower than on the same date last year; cotton picking commenced; slight rain on night of 28th; measles in taluka Ubauro.
Hyderabad ...	...	River has fallen 23 inches up to 4th, but is still 25 inches higher than on the same date last year; some injury to young rice apprehended in some talukas; transplanting delayed; small-pox still in Hyderabad; furious gales day and night, much dust.
Upper Sind Frontier ...	...	Weather cloudy and close; *peshras* crops looking well; river falling; water-supply scanty.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	...	No cholera in city.
Kaira ...	...	Cholera cases 153, deaths 86; weather very hot.
Surat ...	...	Twenty-two cholera cases at Mándvi, 13 deaths, 19 at Wálod, 12 deaths.
Broach ...	...	Rain much wanted.
Khandesh and Násik.		
Khandesh ...	2·03 at Dhulia.	Total rainfall 6·45; no rain has fallen in Sháháda and Ráver; fall irregular and insufficient in other talukas; progress of cultivation retarded; public health good; cattle free from disease.
Násik ...	3·74	Total rainfall 4·39; the fall of rain has been general; sowing progressing.
Konkan.		
Tanna ...	15·53	Total rainfall 27·26; cholera has disappeared from Gholwad, is decreasing near Umbargám, but has appeared at Agáshi in Bassein taluka, 14 cases 7 deaths; sowing operations nearly completed.
Deccan.		
Poona ...	3·82	Total rainfall 6·52; sowing of *kharif* partially commenced; slight cattle disease in three talukas; cholera in Indápur, Haveli and Máwal.
Ahmednagar ...	2·71	Total rainfall 4·49; sowing commenced in some talukas.
Sholapur ...	1·05	Total rainfall 2·67; cholera in Sholapur, Pandhapur and Málsiras, 37 deaths; *kharif* sowing commenced.
Satara ...	6·44	Total rainfall 9·31; sowing operations progressing; 31 deaths from cholera in Wai, 17 in Tásgaon, 31 in Wálwa, and 41 in Jauli.
Southern Mahratta Country.		
Belgaum ...	4·41	Total rainfall 9·82; sowing continues; cholera decreasing.
Dharwar ...	1·21	Total rainfall 7·36; more rain badly wanted in most talukas; cholera has almost disappeared.
Kanara ...	12·0	Total rainfall 37·50; more rain wanted in parts.
Kaládgi ...	1·69	Total rainfall 6·83; more rain generally wanted; cholera decreasing, 125 deaths.
Kattywar.		
Rájkot ...	1·41 at Rájkot.	Rain much wanted; crops partly sown are drying up; weather hot and cloudy.
Wadhwán ...	...	Crops withering; cholera in Jhalawad, 47 cases, 25 fatal.
		General Remarks.—More rain generally wanted; cholera is decreasing in Southern Mahratta Country, but is apparently extending in Satara and Poona districts; small-pox in Kurrachee and Hyderabad.
Bengal— (July 6th)		
Chittagong ...	8·45	
Noakholly ...	12·33	Three fatal cases of small-pox; cholera much abated.
Chittagong Hill Tracts...	3·97	
Hill Tipperah ...	3·72	
Backergunge ...	3·36	Public health good; cattle disease present in certain thanas.
Furreedpore ...	·11	General health good.
Dacca ...	2·01	
Tipperah ...	2·94	
Mymensingh ...	2·2	
24-Pergunnahs ...	5·21	Public health generally good.
Jessore ...	·38	
Nuddea ...	·75	
Moorshedabad ...	·86	
Pubna ...	·39	
Rajshahye ...	2·67	Public health good.
Bogra ...	1·13	
Malda ...	2·02	
Dinagepore ...	5·94	Small-pox and cholera nearly ceased.
Rungpore ...	Return not received.	
Cooch Behar ...	8·06	Cholera dying out but not entirely disappeared.
Jalpáiguri ...	9·9	
Darjeeling ...	10·34	
Midnapore ...	Return not received.	Sporadic cases of cholera reported from the district.
Howrah ...	1·31	
Hooghly ...	Return not received.	Public health normal.
Burdwan ...	2·66	Public health fair.
Bankoora ...	1·57	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Beerbhoom ...	·38	
Sonthal Pergunnahs ...	·69	
Bhágalpur ...	2·22	General health very good.
Monghyr ...	3·36 (Previous week *nil.*)	
Purneah ...	8·46	
Durbhunga ...	·45	General health of the district good.
Mozufferpore ...	Return not received.	Public health good.
Sarun ...	·28	Cholera still prevails, but fatal results do not appear to be frequent.
Chumparun ...	2·19	
Patna ...	3·06	Cholera cases still reported from all parts of the district.
Gya ...	·07	Public health fairly good.
Shahabad ...	1·59	Cholera abated.
Hazáribágh ...	2·49	
Lohardugga ...	·37	Cholera in the Sadr sub-division; in Palamow both cholera and small-pox still prevalent.
Manbhoom ...	2·45	
Singhbhoom ...	·59	
Balasore ...	2·11	Cholera less violent and less widely spread; mortality among cattle reported from one locality.
Cuttack ...	·94	Cholera still bad on the sea-coast; public health otherwise good.
Pooree ...	·14	Cholera raging.
		General Remarks.—There has been seasonable rain in almost all the districts of Bengal except in Mozufferpore; cultivation is going on satisfactorily. State and prospects of the crops are generally good; transplantation of *amun*, or late rice crop, has considerably advanced; the cutting of early rice crop has begun in some places in Jessore; *bitri dhan*, a species of *aous*, is being reaped in the districts of Cooch Behar and Jalpáiguri. Sugarcane, jute, *sun*, indigo, cotton, *til* or *sessamum*, *cheena*, and other minor crops are all doing well.
N. W. P.—		
Benares (July 5th)	1 to 2 inches on the 5th.	Rains set in; weather cool; wind north-east; maize, *sawan* and *marwa* must give short crops, but if rainfall is now steady little general harm will result from the late setting in of the rains.
Jhánsi („ 6th)	Showers on 5th.	Great heat during week; clouds gathered from 2nd, some good showers without appearance of rains setting in; *kharif* sowings not commenced.
Agra („ 5th)	1·2 in Jalesar, none elsewhere.	Wind easterly; clouds gathering.
Meerut („ „)	Slight rain on 4th.	
Bareilly („ „)	...	Rains set in, weather cloudy.
Almora („ 3rd)	...	Weather extremely hot, north-west storm over part of district; cloudy on Sunday.
Allahabad („ 5th)	...	Rains apparently set in but mildly.
Punjab— (July 5th)		
Delhi ...	·05	Sowings commenced; health good.
Hissar ...	...	A shower, much wanted; sowings in progress; health good.
Umballa ...	·6	Sowings commenced; health good.
Jullundur ...	*Nil*	Heat intense, ploughing delayed; health good.
Lahore ...	Showers	Health fair.
Mooltan ...	*Nil*	Health good.
Dera Ismail Khan ...	*Nil*	Health good.
Rawálpindi ...	*Nil*	Health good.
Pesháwar ...	*Nil*	*Rabi* nearly harvested; *kharif* ploughing in progress; health good.
		General Remarks.—Rain much needed; intense heat somewhat retarding *kharif* operations; health of province on the whole good.
Oudh— (July 5th)		
Lucknow ...	·2	Rain much wanted; cholera continues in some districts.
Fyzabad ...	Light showers	
Sitapur ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (July 1st)	1·69	Weather cloudy; sowings commenced; 6 deaths from cholera; prices steady.
Sambalpur ...	1·5	Weather warm; rice suffering from want of rain; cholera prevalent.
Biláspur ...	1·30	Weather close; sowings continue; fever prevalent; prices rising.
Raipur ...	·29	Weather cloudy; rice sowings continue; health good; prices easy.
Bálághát ...	·50	Weather close and cloudy; rain wanted; rice withering for want of moisture; fever and cattle disease continue; prices rising.
Chanda (July 2nd)	·66	Weather cloudy and close; more rain wanted to commence sowings; cholera continues; prices steady.
Chhindwára ...	2·30	Weather close; sowings continue; health good; prices steady.
Bhandara (July 4th)	·90	Weather cloudy and close; rice germinated suffered from want of rain; fever and small-pox continue; 3 cases of cholera; prices easy.
Nágpur („ 5th)	1·30	Weather cloudy; sowings commenced; prices stationary.
Wardha ...	1·83	Sowings commenced; cholera confined to 2 villages.
Nimár (July 5th)	3·3	Weather cloudy; sowings commenced in places; small-pox continues.
Hoshangabad ...	...	Rain wanted; cholera continues.
Narsinghpur ...	2·0	Sowings continue; cholera prevalent.
Jubbulpore ...	1·95	Ploughing commenced; small-pox abating; cholera and cattle disease continue.
Saugor (July 5th)	2·9	Rice and cotton prevented from being sown suffering from want of rain; cholera continues; prices stationary.
Seoni ...	2·90	Rice sowings continue, cholera reported from the south of the district.
Damoh ...	1·20	Cholera at Tejgarh has risen.
Mandla ...	·40	Five deaths from cholera; prices risen.
Betul (July 3rd)	·35	Sowings suspended for want of rain; cholera continues; prices steady. *General Remarks.*—In most districts rain has fallen during the week, but the quantity fallen up to date is below the average. The earlier sowings have suffered in consequence, and unless rain falls steadily, the prospects of the rice crops will be critical. Cholera still continues prevalent in the districts of Hoshangabad, Narsinghpur and Jubbulpore.
British Burma—		No report received.
Assam—		
Gauháti (July 6th)	3·35	Weather very unsettled: occasional heavy showers; generally hot and sultry; prospects of rice crops hopeful and of tea good; public health good.
Sylhet („ „)	6·86	Prospects continue favourable.
Hyderabad—		
Amráoti (July 6th)	4·37	*Jowari* sowing commenced; cotton sowing progressing; cholera lingering in Wun district; of 28 attacked 11 have died.
Mysore and Coorg—	·03 in Bangalore Cantonment; 9·18 in Coorg.	Rain much needed in some parts, especially in the Chitaldroog district and two taluks of the Shimoga district, where condition of the people and cattle causes some anxiety; cholera more or less prevalent.
Central India—(July 5th)		
Indore ...	3·43	Deficient rainfall throughout the Agency; cholera still prevalent in Bagh[illegible]kund.
Gwalior ...	·10	
Neemuch ...	*Nil*	
Rutlam ...	·45	
Sutna ...	1·47	
Rajputana—		[illegible] heal[illegible]
Serohi (July 2nd)	*Nil*	High winds prevalent; health good; thermometer 99°.
Abu („ 6th)	Slight drops	Misty mornings; cloudy; thermometer 77°.
Marwar („ 1st)	*Nil*	Prices rising; health good; thermometer 93·42°.
Harowtee ...	1·2 in Deoli; *Nil* in Kota, Tonk and Shahpoora.	Rain passed off and urgently required; heat very great; health good.
Ulwur (July 5th)	0·20	Rain still holding off: health fair; temperature 96°.
Jeypore („ 6th)	0·7 on 4th	More rain required for general sowing; cloudy; health good.
Meywar ...	*Nil*	Winds variable.

EXTRA SUPPLEMENT TO

The Gazette of India.

No. 30. SIMLA, MONDAY, JULY 10, 1876. Register No. 33.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 29th June 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

MERCHANT SEAMEN'S BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill to amend the law relating to Merchant Seamen be taken into consideration. This Bill was introduced into the Council last September for the purpose of making some amendments on isolated points in our Merchant Shipping Law, which had beenbrought to the notice of the Government

by the various maritime authorities. The Council was aware, as he had explained at the time of the introduction of the Bill, that we had pending a general measure for amending and consolidating our Merchant Shipping Law. That measure had now been before us for—he thought he was not wrong in saying—nearly ten years; but it had been put upon the shelf for the reason that a similar measure had been knocking about the House of Commons, and the House of Lords, for the amendment of the law upon the same subject in England. The Merchant Shipping Law was one of those laws which it was of great importance for us to make agree as nearly as circumstances would permit with the law of England. In the first place, the English Merchant Shipping Act of 1854 was directly operative in India, partly by its own force, partly by being the basis upon which our Indian Merchant Shipping Act was framed, and with which it interlaced a great number of points; and the other principal English Shipping Act, namely, the Act of 1862, also directly affected us, and it was one of those Acts which we were not able to affect by our legislative powers. It was therefore very necessary for us to follow the English law as closely as Indian circumstances would admit, and on that ground the Secretary of State advised us to put our great Merchant Shipping Bill on the shelf, and defer the consolidation of our own law until we saw into what shape the English Parliament would put the law of England. We had reason however to believe that this year this very long story would come to an end, and then we should be in a position to consolidate our own law. On that ground we had been advised by the Government of Bombay—a maritime Government interested in the question—to postpone this Bill; but it seemed to him that we had better not postpone the consideration of those points which must be dealt with when the law was finally settled, and which were now quite ripe for decision. They had been the subject of discussion for some years, and of communication between the Supreme Government and the various local maritime Governments; and they had also been the subject of communication between ourselves and the Board of Trade, who had approved of the contents of the Bill as introduced into Council. Even if the Merchant Shipping Bill now before Parliament should pass this session, it was quite certain that a considerable time must elapse before we could fully consider the subject here, and say exactly how much of the measure was suitable, or how much unsuitable, to Indian circumstances, and before we could propound, in conjunction with the Secretary of State and the Board of Trade—who must be taken into consultation upon such points as those—the exact measure which we should consider suitable for India. To effect this a considerable time must elapse, and, in the meantime, he thought that we had better deal with the various points suggested to us from the different maritime ports in India.

The first point in the Bill was contained in section 3, which related to the rather difficult and troublesome subject of distressed seamen. The Merchant Shipping Acts gave large powers to the Governments of all dependencies of the British Empire to take up seamen who were left on their shores, and to send them back to their homes at the expense of certain funds which were under the control of the Board of Trade. But it was a great mischief having those distressed seamen at all, and it was desirable to contract the limits of the mischief as much as we possibly could. This Bill was principally concerned with that particular subject; it provided for a more speedy way of shipping distressed seamen, and avoiding disputes about who were, and who were not, distressed; and it sought also to prevent the mischief from growing into undue proportions by placing a certain restriction upon the discharge of seamen. Section 3 dealt with the one subject of distressed seamen. Now every British ship-owner was bound to receive a distressed seaman, but he might raise a dispute in every case whether or no the man was a distressed seaman, and that dispute might be carried into a Court of Law, and decided in the ordinary way upon proceedings taken against the Captain for refusing to receive such seaman. Now that was a dispute which might arise under very critical circumstances—it would be most likely to arise just when a vessel was going to start—which it would

be utterly impossible to settle in time unless by some summary method. The Board of Trade had suggested that we should enact the infliction of certain penalties upon Captains refusing to receive seamen. There were penalties in England upon Captains for offences of this kind, but they had not been, and were not now, liable to penalties in India. But when we came to consider the subject, and to look at the cases which had actually arisen under the Merchant Shipping Act, we found that penalties would hardly meet the point, because we could not inflict a penalty unless it was first decided whether the Captain refused to receive the distressed seaman, whereas the issue raised was whether the man was a distressed seaman or not. We therefore proposed to make the decision of the local authorities binding upon the Captain. If he felt that in any case he was an injured man, he must lay his case before the Board of Trade, and complain if we had acted wrongly. But we proposed to cut short those disputes by saying that a certain certificate given by the local authorities should be evidence that the seaman was distressed, for the purpose of compelling the Captain to receive him, and of enabling him to claim indemnity from the funds under the control of the Board of Trade. That was section 3. He should explain that we had received a communication from the Bengal Chamber of Commerce on the subject, and they desired that from this certificate there should be an appeal. The Bengal Government very properly observed upon that, that an appeal would defeat the whole object of the measure, because it would introduce those very disputes and delays which were apt to occur now, and which the section was intended to get rid of.

Then we came to sections 4 and 5, which related to the discharge and engagement of seamen. With respect to the discharge of seamen it was provided by the British Merchant Shipping Act that they should not be discharged except with the sanction of certain local authorities; that was intended for the purpose of preventing improper discharges by which seamen were thrown upon the charitable funds of the place where they happened to be. But a dispute arose in India whether that sanction of the local authorities was entirely within the discretion of the sanctioning authority, or was a ministerial act which he was bound to perform, upon the master or seaman or both showing a case for the discharge: and it was actually decided by a Judge of the High Court of Calcutta that the sanction was only a ministerial act. That was quite contrary to the view of the Board of Trade, and to the view that had been acted upon all over the British Empire. Of course the Bombay ship-owners were not slow to avail themselves of the advantage of the Calcutta decision, and they raised the question in Bombay, when a decision was come to in opposition to the Calcutta decision and in accordance with the view of the law prevailing everywhere else. We had always acted on that view; still, as we were amending our law, we thought it better to put it entirely beyond question, and make it quite clear that this sanction for the discharge of seamen was to be exercised at the discretion of the local authorities. We also added a penalty leviable in India, in addition to the penalty leviable in England, for the discharge of seamen without proper sanction.

Section 5 was intended again to give the Local Governments control over improper discharges, and the principle upon which it was founded was this. It was very frequently found that Captains of vessels desired to get rid of their European crews, either to save money or for some other reason, and to replace them by Natives of India. The result was that the European crew ran loose on our shores without employment, loafed about, and fell into the category of what we called 'distressed seamen'—a very undesirable class of people to have. Therefore we proposed to give Local Governments the power to forbid the engagement of any Native of India to serve as a seaman on board any ship specified in the order of prohibition; and it was conceived that such a provision would strike at the root of the evil. The suggestion had been made by the Government of Bombay; it had been adopted by this Government, and was approved by the Board of Trade.

It was opposed, however, by the Bengal Chamber of Commerce, and what they said about sections 4 and 5 was this:

"The object of these two sections appears to be the very desirable one of preventing the accumulation of vagrants in Calcutta, which, as already remarked, is a public nuisance of no small magnitude, and in that respect the sections are approved: but at the same time their provisions involve the important issue of interference with agreements between master and seamen. In many cases men are shipped for the voyage only, and the Committee apprehend that the Local Government has not the power to set aside such special contracts.

"Seamen thus paid off can always be sent home as distressed seamen in case of there being no regular employment for them, but as a rule there is always a demand in this port for able-bodied men.

"The refusal to allow ships to take native crews in the place of Europeans is, in the Committee's opinion, indefensible on the broad principle of interference with freedom of trade, and would be especially unjust in cases where vessels or steamers come to India with the object of regularly trading to and in the East. It is true that, under these sections, with the sanction of Government, seamen may be discharged and native crews engaged; but if the seamen agree to take their discharge, and lascars are willing to take their place, it should be an obligation on the part of Government both to grant the discharge and to sanction the engagement."

Of course, we did not assume powers to set aside any special contracts as between masters and seamen; what we said was, that whatever the contract, or whatever the rights of the parties might be as between one another, they could not bind us by making arrangements to cast a number of distressed seamen on our shores; the very object of the provisions in the English Act 1854 was to prevent that operation, and we were only now making the provisions of that Act more efficient in India. The Bengal Government, in forwarding the remarks of the Chamber of Commerce, made very much the same observations that he (MR. HOBHOUSE) had made. They said that it was public policy to prevent those discharges of seamen, and that they were prevented by means of giving to the local authorities a discretionary power of veto upon them. We were now only making this means more efficient, and it seemed perfectly right that we should do so.

Section 6 related to desertion, and all it provided was that the Master of the ship should report the desertion to the Local Government. He thought that everybody approved of that. The only difference between the Bill as introduced and as it now stood before the Council as amended by the Committee was, that section 6 of the former Bill provided that the Master or owner of a ship should be equally bound to report. It was pointed out by the Chamber of Commerce, and by the two mercantile gentlemen who sat upon the Committee, that the owner of a ship never knew anything about those things, whereas, in cases of desertion or absence, the Master must always know, and he was the proper and only person on whom the obligation should lie. The Committee therefore altered section 6 of the present Bill in that sense.

Sections 7 and 8 were again connected with the same subject of discharged and distressed seamen; only they related to those seamen who were put in prison. Now again we were told that it was a common thing for Masters of vessels to make complaints against seamen for breaches of discipline and petty offences; to get them put in prison, and then immediately to fill up their places with Natives; and so in fact to leave the seamen a charge upon our hands. That was the mischief struck at by sections 7 and 8. We had a clause in our Shipping Act (section 88, Act I of 1859) to the effect that if a seaman was imprisoned for certain offences—being those petty offences against discipline which he had mentioned—a Magistrate might, with the consent of the Master of the vessel, relieve him from imprisonment and send him back on board ship. We proposed to extend the operation of that law. It was suggested by the Board of Trade that we might make it compulsory upon the Master to receive back the man; but we thought that that would be going too far, and that if the quarrel between the Captain and the man had proceeded to a certain point, there might be danger in forcing the man back upon the Master. What we therefore proposed was this: In the first place, we

proposed that the Master should not be able to engage Natives, without sanction, while any of his men were in prison; in the second place, we proposed that the local authorities should be able to tender the man to the Master, and that if the master did not receive him, he should deposit a sufficient amount of money to defray the expenses of taking the man home according to the scale of cost usual in the case of distressed seamen. We also proposed to extend the provisions to other petty offences. Those provisions were again objected to by the Bengal Chamber of Commerce, and he would read what the Chamber said with regard to those two sections 7 and 8:

"The Committee have no objection to offer to the former of these sections except in so far as it is applicable in connection with the section following. The provisions contained in section 8 are, in the judgment of the Committee, most unjust and prejudicial to the ship, while at the same time it offers to the seaman inducements to commit offences so as to bring him under its operation. It seems to be overlooked that a ship has to take away another man in the place of the prisoner if she refuses him; and the Committee cannot see why the prisoner so refused should not work his way home in another vessel. The provisions of the section are tantamount to giving the man, at the expense of his late ship, a three months' holiday after his imprisonment; and if his offence has been such as to compel the Master to refuse to receive the prisoner, the law should rather protect the Master than a refractory seaman, who may at sea repeat the offence for which he was punished ashore, and be a troublesome and unwelcome member of the crew on the return voyage. It should be *optional* with the Master, and *not compulsory* on him, to take back a seaman after his imprisonment."

The Bombay Chamber of Commerce made an observation somewhat similar to the first of the objections of the Bengal Chamber, namely, that the provision was apt to encourage insubordination on the part of the seamen; and the Governor of Madras had made a similar remark. It seemed to MR. HOBHOUSE that all those observations lost sight of the reason for this clause. As for the observation that the provisions of the section were tantamount to giving the man, at the expense of the ship, a three months' holiday after his imprisonment, MR. HOBHOUSE did not understand what it referred to. All the good that could happen to him would be that he would be sent home as a distressed seaman; not a single penny was to come into his pocket, nor was he to have any benefit from our provisions. But as regarded insubordination, the theory, supported by opinions from the maritime officers, was, that those quarrels were, he would not say, got up by the Master, but laid hold of by him in order to get rid of the man; because it was found that once the man was in prison, the Master engaged Native seamen and was off with the ship. The Lieutenant-Governor of Bengal gave the proper answer to those objections in sending on the remarks of the Chamber of Commerce. When he forwarded those remarks, he endorsed the observations of the Shipping Master of Calcutta, which were to this effect:

"The change in the law to be made by the 7th section is advisable, and, followed by section 8, will render it impossible for a Master to get rid of his European sailors by procuring their imprisonment and then declining to take them out of jail to go on their voyage. The whole tendency of these leading sections of the Bill is effectually to remedy the evil which has been so long felt in Indian ports, of British seamen being thrown out of their proper employments, and becoming helpless and destitute on the hands of Government."

It seemed to him that this was quite a sufficient reason for retaining sections 7 and 8 in the Bill in the form in which they now were. The alterations made in them by the Committee had the effect of diminishing the amount of the deposit which the Master was bound to make in case he refused to receive a seaman. As the Bill was introduced, it required him to deposit a sum sufficient to defray the cost of the passage of the seaman to the port from which he was shipped, and of his subsistence during such passage, and also of his lodging and subsistence during his detention at the place at which he was imprisoned until he embarked. It now only required him to deposit a sum calculated by the Local Government to be sufficient to defray the cost of passage, according to the scale of cost usual in the case of distressed seamen. As regarded the contention of the Chamber of Commerce that it should be optional with the Master to take back a seaman, it would be optional. But we should test his good faith by requiring him, in case he refused to take the seaman back, to defray a cost which would otherwise be thrown on the Government of India or the Board of Trade, namely, that of conveying him to his own home.

The other two sections he need not explain at any length. One referred to the space to be allowed on board ship. It somewhat enlarged the space given by the present law. We were advised from some quarters that the space given by the English law was still larger, and that we had better make our space the same as that allowed by the English law. He was quite incompetent to advise the Council on that point, or even to explain exactly why the existing or the proposed measurements were chosen for India. If it was necessary to make our law in accord with the English law, no doubt that would be done by the Consolidation Bill, and the matter would be considered in the Department over which Sir Alexander Arbuthnot presided. It had been very carefully considered after communication with the Local Governments in that Department, and the amount of space specified by the Bill was settled as being the best at this moment. At all events, it was an increase on the present space, and he thought we might allow the proposed arrangements to stand, reserving it for consideration afterwards whether the space should be further enlarged in accordance with the English law.

By the tenth section it was proposed to remove a certain ambiguity which existed in the corresponding section of the present law, which related to the payment of wages in India in English currency. It was proposed to confine the operation of this section to those cases in which the rate of wages was stipulated for in British currency. The existing section extended to cases in which stipulations had been made for payment in other currencies; but it was found impossible to apply a definite rule to such cases, and it was thought better to leave them to the general operation of the law. It was convenient to have a cut-and-dry rule for stipulations made for payment in British currency, and the section provided that payments should follow the rate of exchange for the time being fixed by the India Office and the Treasury for their pecuniary transactions. That was the present practice, and, he believed, quite a legal one, though some doubt had been expressed about its legality.

Having now gone through all the sections of the Bill, he had only to add that, although we were now sitting at Simla, the whole substance of the amendments by the Committee had been settled at Calcutta. We had had the advantage there of the presence of Mr. Bullen Smith and Mr. Cowie, who had paid great attention to this matter, and attended the sittings of the Committee, and several alterations had been made at their instance; he had mentioned one which occurred in sections 7 and 8, namely, the amount to be deposited by the Master of a ship. The Committee had also, in deference to their opinion, and to the opinion of the Bengal Chamber of Commerce, omitted the definition of the word 'owner' of a ship. As the Bill was introduced, it made the owner of a ship include the agent of a ship; what the mercantile gentlemen said was that the agent of a ship did not occupy such a position as ought to expose him to the various provisions of this Bill. The Committee therefore omitted that definition and kept in only the words 'owner' or 'master,' as the case might be. At the same time they had modified sections 4, 5 and 8, by making the expressions rather more general, so that if the agent of a ship should occupy the same position as the owner, which might be the case for all we knew in Bombay, then the provisions would apply; and if the agent should commit offences which were struck at by the Bill, he would find himself exposed to penalties.

After the amendments agreed on at Calcutta had been put into proper form and the draft report prepared, they were laid before our two mercantile Members, who, as the Council would observe, had signed the report.

The Hon'ble SIR ALEXANDER ARBUTHNOT wished to make one remark with reference to section 8 of the Bill, in addition to the observations addressed to the Council by his Hon'ble friend Mr. Hobhouse. That section contemplated the possible existence of circumstances under which the Local Government would exempt a Master or owner from receiving again on board ship seamen who had undergone imprisonment. Mr. Hobhouse did not, SIR ALEXANDER ARBUTHNOT thought, advert to the words "without assigning reasons satisfactory to the Local Government" which occurred in the clause. There might of course be extraordinary circumstances which would render it very hard on the Master of a ship to be compelled to receive back a seaman, and that was provided for in the section.

The Hon'ble MR. BAYLEY would make one remark with regard to sections 4 and 5 of the Bill. A case that recently came before him officially, illustrated, he thought, very accurately what the working of those sections was likely to be. A vessel arrived at the port of Rangoon not very long ago the Master of which made certain complaints against his seamen. They on their part met those complaints by assertions of brutal treatment on the part of the Captain himself; unfortunately, the officer before whom those complaints were urged was unaware of his actual powers, and he allowed the matter to be compromised, and the Master to discharge the seamen without their case being fully inquired into. The result was, that the Master shipped a lascar crew. On the voyage home one of those lascars was undoubtedly done to death by the Captain, and several of the others were most brutally treated. If the proposed sections had been then in existence, MR. BAYLEY thought that, in the first place, it was probable the officer before whom the complaints had been laid, though he might have permitted the discharge of the seamen, would pretty certainly have inflicted a penalty on the Captain; as a matter of course, he would not have permitted the Captain to engage a lascar crew, and the horrible scenes which subsequently occurred would, undoubtedly, have been avoided.

Colonel the Hon'ble SIR ANDREW CLARKE said that, with reference to section 3,—unless the English Merchant Shipping Act especially provided for it and limited the number of seamen that any ship could be compelled to receive on board as distressed seamen,—the wording of this clause, as it stood, might lead not only to very considerable hardship to the owners and Masters, inconvenience to its ordinary crews, but might even imperil the actual safe-conduct of a ship in its subsequent passage to its destined port. This would be hard on a British ship clearing for a foreign port from which had sailed a ship of another nationality having left in our port some fifteen or twenty men to receive them for passage back to it; it would be hard on the ship of the same nationality, but it was not clear if we could compel a foreign ship to receive its own countrymen. This was a large power to confer, even if exercised only by the higher officials of Local Governments; but it would be in reality left in the hands of the Harbour Master and his subordinates.

His EXCELLENCY THE PRESIDENT said he apprehended that section 3 of the Bill, to which the Hon'ble Member referred, only applied to British ships. The section distinctly declared that any Master of a British ship refusing to accept seamen as distressed seamen would be liable to the penalty.

Colonel the Hon'ble SIR ANDREW CLARKE said that he also alluded to the case of a Master of a British ship having to receive a large number of foreigners on board; that would, if possible, be a still harder case.

His EXCELLENCY THE PRESIDENT thought that the matter would naturally be one of reasonable arrangement with the local authority. He should think it improbable that the local authority would insist upon an inordinate number of British seamen being shipped on the same ship.

Colonel the Hon'ble SIR ANDREW CLARKE thought that if the matter was entirely dependent upon the Local Government, the occurrence would probably not arise, but it would be very likely to arise from a Harbour Master being allowed to assert his right to place on board ship the number of men he might have on his hands, and the difficulty of the matter was enhanced by the Master being deprived of the right to appeal.

The Hon'ble MR. HOBHOUSE explained that the law upon which we were operating was not Indian law but English law. We were only laying hold of certain clauses in the Merchant Shipping Act of the British Empire, and doing our best to make those clauses work in India. But the obligation to receive a distressed seaman when the fact of the distress was ascertained was contained in the English Act, and it was without statutory limit, though

of course there must be a practical limit, which would be settled, he had no doubt, by arrangement between the local authorities and the Master of the ship. That law had been in operation ever since the year 1854, perhaps longer, but he had not traced back its history beyond 1854. The Masters of ships were not a class to be silent when any injury was done them; in point of fact, complaints did come to the Board of Trade of the improper action of the authorities in the dependencies of the Empire, amongst others in India. There had been three or four of those complaints which he had had to look into made by Masters of ships, but he had never yet heard of a complaint of too many men being forced on board ship. Of course, there might be such complaints without his hearing of them. But the Bill had been very carefully considered, not only by the maritime authorities in India, but by the several Chambers of Commerce who represented the interests of the Masters of ships, and nobody had made that objection, namely, that there was a danger of too many men being forced on board ship. It seemed therefore to MR. HOBHOUSE that we had better let that question alone; nobody appeared to be suffering any grievance, and we should be introducing a limitation that might be inconvenient if we were now to insert a provision that a Master of a ship should not be bound to take in more than a certain number of men.

Colonel the Hon'ble SIR ANDREW CLARKE remarked that the section in question imposed a very much heavier penalty for refusing to receive distressed seamen than the English Act. However, as he now understood from Mr. Hobhouse that those directly interested were content with this particular provision in the Act, he would not trouble the Council further on the subject.

His Excellency THE PRESIDENT said that he was under the impression that the Bill left the right of appeal to the Master of a ship who had cause to complain of having been forced to take too many seamen on board; but the appeal was to the Board of Trade.

The Hon'ble MR. HOBHOUSE explained that there would be no legal appeal at all. It would be an executive matter, and complaints would be sent in in the nature of the complaints now made. There were a great many arbitrary discretions given to the local authorities, and every now and then the Masters of ships complained that those powers were improperly exercised, and the officers concerned were either justified or were warned not to do the same thing in future, as the case might be.

The Hon'ble SIR WILLIAM MUIR inquired, with reference to section 3, to whom was the refusal of a Master to be given in the case of his declining to receive a distressed seaman. Was it to the Local Government, or to a subordinate authority?

The Hon'ble MR. HOBHOUSE said that it was to an officer appointed by Government, usually the Shipping Master of the port.

His Excellency THE PRESIDENT presumed that the question of whether the seaman was entitled to a free passage was to be settled by the Secretary to the Local Government.

The Hon'ble MR. HOBHOUSE said that the Secretary, or an officer specially appointed by the Local Government, must sign the certificate of his distress.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE then moved that the Bill as amended be passed.

The Motion was put and agreed to.

REGISTRATION ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill to amend the Indian Registration Act, 1871, and moved that it be referred to a Select Committee with instructions to report in four months. He said that he would mention to the Council one or two of the principal points on which it was proposed to make amendments in this Act.

The first section proposed to empower the Local Government to appoint more than one Sub-Registrar to a sub-district. There seemed to be some doubt whether such a power was contained in the Act, and the section now distinctly empowered the Government of Bengal to appoint one or more Sub-Registrars.

The second section proposed to make an addition to section 17 of the Act. Section 17 was that important section which indicated those documents of which the registration was compulsory. There were several exceptions made to the operation of the section, and the latter part of it provided that the prior compulsory clauses should not apply to certain deeds and documents. We proposed to add to this that they should not apply to any document which merely created a right to obtain another document which would create the right in question; that was to say, supposing there was an agreement by a man to execute a conveyance of land, the agreement need not be registered. The owner of the agreement would have an option to register it, which might be advantageous to him under certain circumstances. For the agreement would give him no absolute right to the land; and if before he got his conveyance, another person took a conveyance and registered it, acting honestly, the agreement would be displaced. But it might be hard to compel the owner of such an agreement to register it, for he would have to register his conveyance when it was completed, and in that case there would be two registrations for one transaction.

The next amendment was in section 18. Section 18 was the section which indicated those documents of which the registration was optional, and in the last clause of that section (clause 7) a number of instruments were mentioned some of which would fall within the description contained in section 17, the compulsory section. So that there was in the strict literal construction of the two sections a conflict between them, while the meaning was that section 18 should only comprise those instruments which were not already laid hold of by section 17; and he believed that in the Presidency of Madras an opinion had been expressed by high authority that the clause of section 18 was calculated to take out of section 17 altogether every single instrument which was enumerated in that clause. It was therefore proposed to alter the wording, so as to make it clear that section 17 entirely overrode section 18 in that particular respect.

Section 5 of the Bill simply amended the drafting of section 31 of the Act, which related to the presentation and deposit of documents at private residences. Then there were some rather long amendments set forth in sections 7 and 8, which entirely related to the deposit of wills. It was found that the present clauses did not entirely satisfy the conditions of the case, and so it was proposed to make some slight changes in detail; but there was no alteration of principle.

Section 9 was the most important section in the Bill, and it was the section which he had explained at length at the last meeting. The remaining sections in the Bill were concerned with effecting either mere amendments in drafting or the removal of some ambiguities which had been brought to notice. They were all however matters of exceedingly small detail which it would be a waste of time to explain to the Council on this occasion, but which would of course receive the necessary consideration in Select Committee.

The Hon'ble MR. COCKERELL said that unless the very rapid passing of the Bill into law was deemed to be imperative—and such would not appear to be the case from the terms of his hon'ble and learned friend's motion as it now stood (namely, that the report of the Select Committee should be made *within four months*)—he trusted that the question which he had raised at the last meeting of the Council would meet with due consideration, and that the Local Governments might, if possible, be consulted in regard to it whilst the Bill was in Committee.

He had stated on the occasion referred to that a compulsory registration of all documents affecting title or interest in immoveable property was the aim

and object of the projectors of the present system, and that this intention had been kept prominently in view on each successive occasion of the registration law coming under revision by the legislature. He would now, in support of that statement, with the permission of the Council, read a few extracts from speeches made on those occasions, to show exactly what had been said in regard to the course which he was now advocating.

So far back as 1834, the Court of Directors of the East India Company proposed the enactment of a law making registrations of deeds relating to immoveable property without any limit or reserve compulsory, under such penalties as might be deemed requisite. A project of legislation in that direction was then set on foot and referred from time to time to various Committees, until in 1864 a Bill containing the main substance of the present law on the subject was matured in Committee. On bringing up the Committee's report for consideration by the Council, the Member who had charge of the Bill, after adverting to the varied labours which had extended over so many years in the elaboration of the measure then under consideration, said :—

* * * * * "The result has been the preparation of a law for the registration of assurances which, *although it does not extend compulsory registration so far as was advocated at one time*, will be an immense improvement upon the present law according to which registration is optional. The several Committees to whom the original Bill, of which the Bill now before the Council is an amended form, was referred, have, I think, wisely refrained from making the law too stringent on its first introduction, leaving its extension to the future, when the people at large from their experience of this limited measure shall have become fully sensible to the advantages of registration and be prepared to receive without fear a more complete and extensive law on the subject. The measure as it is now presented to the Council will, it is trusted, secure the formal registration of every important transaction relating to immoveable property over a large portion of the empire, and, by bringing together in central offices in each district all documents relating to such landed property, greatly facilitate all transfers of land by rendering comparatively easy the investigation of title. The prevention of suits founded on false claims, supported by false witnesses and forged documents will in a considerable degree be attained as regards landed property of importance." * * * * * * * * *

Then again in 1866, when the law came under revision, the mover of the amending Bill on the occasion of its introduction said in reference to the particular question now before the Council:

* * * * * *

"But if any alteration were about to be proposed in the main features of the existing law—if the list of documents the registration of which was now optional or compulsory was to be revised—he thought that alteration ought to take place in quite a different direction from that desired by these gentlemen." [This was in reference to a proposal put forward by certain indigo-planters to extend the period of short-term leases the registration of which was to be optional.] "When alteration of this nature took place he hoped it would be *to make the registration of all documents relating to immoveable property compulsory*, rather than to increase the number of those, the registration of which was now optional.

"There was no doubt that the line drawn by the present law was very arbitrary. It was quite possible for a man to evade the law altogether by dividing his estate into small lots of less than Rs. 100 in value each, and then the public would lose the advantage of being able to inspect the register of titles. So again the registration of a deed of sale of a piece of land valued at less than 100 rupees was optional, but a lease of the same piece of land for thirteen months must be registered." * * * * *

And when the Report of the Select Committee on this amending Bill came before the Council, it was explained that—

* * * "the Committee had carefully considered the question of enforcing the compulsory registration of all instruments relating to immoveable property. As the law now stood, the registration of such instruments was not compulsory if the value of the property to which they related was less than 100 rupees, and under the present Bill this exemption was continued. No doubt *it was extremely desirable that all such instruments should be registered, however small in value the property might be to which they related; but for the present* they thought it better to leave it to the option of the parties whether instruments relating to property of trifling value should be registered or not. It formed, indeed, no part of the intention with which this revision of the law was undertaken to extend the area of compulsory registration. Notice had not been given to the public of so important a change. It was true that *there was a strong and growing feeling in favour of such extension*, but they were on the whole of opinion that it would be wiser to invite through the local administrations a full expression of public opinion on this important question before legislating further in this direction." * * * * *

The revision of the law was again undertaken in 1870 as a part of the general consolidation of enactments then being carried out. On the introduction of the amending and consolidating Bill the following remarks were made in connection with this special subject :—

* * * "There was one important alteration of the law not included in the Bill as it now stood which was strongly advocated in some quarters, and especially by the Government of the North-Western Provinces.

"At present the registration of deeds affecting title to immoveable property not exceeding 100 rupees in value was optional. This exception to the general rule regarding instruments affecting that class of property was probably intended to prevent the conditions of the law working harshly in the case of transactions of a petty character; but as in this country the mass of transactions did partake of that character, the effect of the exception was to check very materially one of the chief objects of the registration-system—the attainment of a complete record of title to immoveable property.

"The very large number of documents of this class which were now registered, though their registration was optional, pointed to the conclusion that to make such registrations compulsory would entail no hardship or serious inconvenience, whilst the gain to the completeness of the record of title to immoveable property which the registration-system was specially designed to afford would be very great."

He had read these extracts to show that the original introduction and subsequent retention of the existing limitation of compulsory registration of deeds relating to immoveable property were simply provisional. It was a precautionary measure and intended to have temporary operation only.

Indeed, it must be obvious that the chief end and object of a system of compulsory registration of deeds affecting titles and interests in immoveable property, namely, the creation of a complete public record by means of which rights and titles in such property might be thoroughly sifted and investigated by interested persons, and the consequent prevention of frauds in regard to the transfer of such property, could not be fully, or even satisfactorily, attained under anything short of the enforcement of an unlimited legal obligation to register such documents.

It seemed, then, to him that with such a strong case for an unreserved obligatory registration of deeds of title to immoveable property, the only reasonable grounds for objecting to the removal of the present tentative limitation must be either that the number of transactions to be affected by such a change was too insignificant to make it worth while to alter the law in this direction, or that the registering machinery was even yet too defective to admit of such an extension of the area of enforced registration, without causing serious inconvenience and expense to a class or classes least able from their circumstances to bear the burden.

Now, as regards the first point, his means of information were not such as to enable him to say confidently that transfers of, and dealings with, titles in immoveable property of very small value, which formed the subject of written instruments, were common in all parts of the empire; but he believed that in most of the provinces such minute transactions would on enquiry be found of very frequent occurrence, and at least he could with certainty affirm such to be the case in the provinces of Bengal, with the circumstances of which he was best acquainted. In regard to this subject he must further tax the patience of the Council by reading another extract. The Registrar-General of Bengal in 1870, in reference to the amendment of the law then under the consideration of the Legislative Council, wrote :—

"It has been asked whether the time has not arrived when the limit of Rs. 100 should be withdrawn, thereby rendering compulsory the registration of all documents affecting immoveable property, no matter what their value.

"At first I was inclined to advocate a change of this nature, but on more mature consideration I do not feel satisfied that the advantages which it may be supposed would accompany the change outweigh the inconvenience to which people would be put by the proposed extension. Optional as is at present the registration of assurances of less than Rs. 100 in value no less than Rs. 1,36,163 such assurances have been registered within the last three years, against 4,06,058 compulsory registrations.

"Nor do these figures convey any adequate impression of the number of such assurances that would have to be placed on record were their registration to be made compulsory. It is sufficient, perhaps, to state that, with the law as it stands, upwards of 60 per cent. of the total number of documents registered are for a less value than 100 rupees. With these figures before me, I should anticipate a very considerable increase of registration were the proposed change in the law to be carried into effect; and I think that, unless the number of registration offices were also largely multiplied, the people would be put to very great inconvenience and hardship."

This statement showed that during the three years immediately preceding 1870 fully 25 per cent., or one-fourth, of the total registrations of deeds affecting immoveable property involved interests of less than 100 rupees in value; and this notwithstanding the fact that the bringing of such documents was a purely voluntary act on the part of the persons registering, to perform which they were placed under no compulsion by the provisions of the law as they then stood. It was fair to assume that if so large a proportion of written instruments affecting interests in immoveable property of less than 100 rupees in value were forthcoming for registration when such registration was optional, the number would be largely increased on the extension of the compulsory system; hence that, so far from the written transactions in regard to the transfer of minute interests in immoveable property being numerically or even proportionately too insignificant to make it worth while to legislate for their inclusion under the compulsory system, in Bengal at least, the numbers of such transactions were considerable, and in comparison with those covered by the present system probably even more numerous.

He (MR. COCKERELL) would submit, then, that if what was certainly the case as regards written transactions involving the transfer of interests in immoveable property in Bengal, in any approximate degree represented the state of things going on in the other older provinces of the empire, then there were very strong grounds, having regard to the stated objects of a system of compulsory registration, for removing the limitation to the completeness of that system.

The question then appeared to him to be narrowed to the single issue as to whether the existing registration machinery was yet sufficiently popularized and matured to admit of the classes who would be brought to the registration offices under an extension of the obligatory rule, resorting to those offices without dissatisfaction or inconvenience, and with but little expense and loss of time.

The hon'ble and learned mover had been so good as to send to him (MR. COCKERELL) the whole of the papers before the Government in reference to difficulties and doubts that had occurred in connection with the working of the registration law since its enactment in 1871. That correspondence was certainly very bulky, and contained a great deal upon the subject of the registration of assurances; and it did not include any proposal or suggestion in the direction of the course which he was now advocating. Indirectly, however, these papers did furnish arguments for making compulsory registration absolute; for they afforded abundant evidence of the fact that great progress had been made in the improvement of the registering machinery, and familiarizing the people at large with the registration-system, its objects and advantages. In Bengal, a former Lieutenant-Governor (Sir George Campbell), about four years ago, introduced a system of rural registration offices the design of which was to bring the means of registering documents within easy reach of the people and to make the operation as little expensive as possible.

This system would appear to have attained very decided success, and to have resulted in the multiplication of registration offices in the interior of the districts, so as to give an annual increase of upwards of thirty such offices.

From these figures it was fair to assume that the registering machinery in Bengal had, since the time when the Registrar-General's above cited communication on the subject was made, been brought into such a condition of

maturity and efficiency as would enable it to cope with the extra labour that would be thrown upon it by the removal of the existing limitation to compulsory registration.

The papers to which he had referred further showed that in the North-Western Provinces the registration-system had been rendered familiar and acceptable to the public, as was evidenced by the large proportion of optional registrations; that in the Bombay Presidency between two and three hundred sub-registry offices had been established, and that elsewhere the number of instruments brought for registration was progressively increasing. Contemporaneously with the multiplication of registry offices, there had been a general reduction of fees and cheapening of the process of registration.

It had been shown conclusively, moreover, that the popularity of the registration-system depended largely upon the degree of expense entailed by it on persons having documents to register, inasmuch as each reduction of fees was followed by an increase in the number of optional registrations. All that was wanted, therefore, was to multiply the number of registering officers and registration offices, and to reduce the registering fees, so as to place the means of registering as near as possible to all persons having documents requiring registration, and to effect such a reduction of fees as to make the cost of registration a scarcely appreciable tax or burden in any case. Now this multiplication of registry offices and reduction of registration fees was a question of money; and if the Registration Department was worked at a loss, or only just self-supporting, it might reasonably be urged in opposition to his (MR. COCKERELL'S) proposals that the introduction of the admitted necessary conditions of an unreserved system of compulsory registration of assurances relating to immoveable property was impracticable; but he found from the published returns of the income and expenditure of the Registration Department that in every province of the empire there was a more or less considerable margin of profit in the working of this Department. Going back to 1871-72, he found the following figures:—

			Rs.
Net profits in	Central Provinces about	... ...	13,000
,,	Bombay ,,	... ...	22,000
,,	Bengal ,,	... ...	90,000
,,	N. W. Provinces ,,	... ...	1,20,000
,,	Madras ,,	... ...	1,00,000
,,	Panjáb ,,	... ...	60,000
,,	Oudh ,,	... ...	18,000

So that even in Oudh, to which the registration-system as regulated by the general law was only applied in 1871, there was a large proportionate excess of income over expenditure.

He had seen later returns in regard to the registering operations of some of these provinces, and they showed even larger profits: for instance, the profits in Bombay had risen to more than 50,000, and those in Bengal considerably above a lákh.

Now, the Government in creating the present system of registration had, he believed, emphatically disclaimed any intention of making out of it revenue for appropriation to other purposes: it was only desired that the Department should pay its expenses—be self-supporting. Even after the income from this source had been assigned to Local Governments as a provincial asset, the principle of this policy had been adhered to, and one Lieutenant-Governor at least (Sir George Campbell) had in this Council insisted upon the necessity of the maintenance of an equilibrium between receipts and expenditure, declaring that the exaction of revenue out of registration for other purposes was contrary to good policy.

Assuming, then, that the Government had no intention of departing from this avowed policy in regard to the receipts of the Registration Department, he believed that they would be found sufficient to bear the increased cost of adequate registering agency and the reduction of fees necessary to the carrying

out of a complete system of enforced registration of documents affecting titles to immoveable property without hardship or material inconvenience to the people. In this belief he would press upon the consideration of the Committee to which this Bill might be referred the question of the propriety of removing the existing limitation of compulsory registration in respect to *all* interests in immoveable property.

Passing from this very important question, which he had felt it his duty to bring prominently before the Council, he would now offer just two or three remarks on the details of the Bill.

In regard to section two, he wished to ask his Hon'ble and learned friend the mover whether in the event of a person who had executed an agreement to mortgage his property subsequently selling that property to another person, the latter, supposing him to be a purchaser in good faith, could be ousted from his purchase as the result of a suit by the person in whose favour the prior agreement had been executed against the vendor to compel the specific performance of the latter's agreement? Because if, as MR. COCKERELL apprehended, the purchaser could be so ousted, then he would clearly be a sufferer from the section referred to, under which the registration of the agreement, though it would operate in the case supposed as a material incumbrance on the property, would be optional.

Section 3 of the Bill also, he thought, was clearly wrong, inasmuch as, if he rightly construed its effect, it would operate to make the registration of such documents as (1) copies of decrees of the Civil Courts, (2) awards, (3) partition-deeds, and (4) bills of sale, if they affected interests in property the value of which was not less than 100 rupees, compulsory. He ventured to think that this result of the section as now drawn could hardly have been considered by its framer, because as regards the copies of decrees the provision would be tantamount to a complete reversal of the maturely determined rule on the subject adopted by the Council when the law was last under revision. The question of the enforcement of the registration of decrees was not only fully discussed in Committee, but the rejection of such a rule was adopted after a full debate on the subject by a large majority of the Council. And although that discussion and determination of the question applied only to the case of decrees of a Civil Court, yet the arguments upon which that decision was come to would apply with equal force to written awards when made by, or under the direction of, a public officer and placed amongst the records of a public office, to partition-deeds when the property was revenue-paying land and the partition was made by revenue-officers, and also to certificates of sale when furnished by a revenue or other public officer. In all such cases the reason for exempting the documents from obligatory registration is, that the object for which such registration is designed has, as regards them, been already attained, through their having been placed amongst the public records accessible to all persons interested in obtaining information in regard to the property affected by them.

The Hon'ble SIR WILLIAM MUIR begged to say a few words in reference to what had fallen from Mr. Cockerell. His Hon'ble friend had quoted the opinion of the Government, North-Western Provinces, as favourable to the extension of compulsory registration to immoveable property below the limit of rupees 100. Having been the head of the administration in those Provinces at that time, the inference might be drawn that he was himself in favour of such extension. He could not of course call to mind now the correspondence which had passed so long ago. But his views were opposed to the extension in question; and so far as his recollection served, he thought there must have been some misapprehension as to the quotation which had been made by his Hon'ble friend. His opinion certainly at present was against the extension of registration in the direction proposed by Mr. Cockerell; and he entirely concurred with what had fallen from his Hon'ble and learned friend Mr. Hobhouse on the subject in last week's debate. SIR WILLIAM MUIR also concurred in the remarks which had been quoted by Mr. Cockerell from the report of the Registrar-General of Bengal. Looking to the vast number of transactions connected with the transfer of

small landed properties, the ignorance of the great mass of the agricultural population concerned, and their limited means, he (SIR WILLIAM MUIR) should regard any attempt at the compulsory registration of all documents conveying rights in such small holdings as inexpedient. It would be an unnecessary expense to the small landholders, and a burden which they would feel to be most onerous. And certainly in his opinion the time had not come for any such extension.

He had thought it the more incumbent on him to express his opinion on this matter, as if silent he might have been regarded as holding views in accordance with what had been quoted as the opinion of the North-Western Provinces Government, and the more especially as when the subject next comes before the Council, he would in all probability not be present there.

The Hon'ble MR. HOBHOUSE remarked that, if his motion was agreed to without amendment, he should hold, as Chairman of the Committee, that it was not competent to entertain so wide a question as the propriety of enlarging the area of registration. He therefore would suggest that his Hon'ble friend Mr. Cockerell should move an amendment.

His Excellency THE PRESIDENT suggested that the Hon'ble Mr. Cockerell should place his amendment in a definite form before the Council.

The Hon'ble MR. COCKERELL then put the question which he had raised before the Council in the form of a motion in the following words:—

"And that the Committee be further instructed to consider the propriety of removing all limitation to the compulsory rule in regard to the registration of instruments affecting any interest in immoveable property."

The Hon'ble MR. HOPE said that he had not intended to trouble the Council with any remarks on this subject to-day; but after what had fallen from his Hon'ble friend Mr. Cockerell, he felt that he could not allow the occasion to pass without expressing very strongly his dissent from the proposal to extend registration in the manner which Mr. Cockerell would desire. No doubt the transactions, to which his Hon'ble friend had referred, of rupees 100 and under were exceedingly numerous; we had no idea how numerous they were; but what he would deduce from that fact was that we had all the more reason for being extremely cautious in any attempt to carry our registration-system further down than it was at present, and in not, without most thorough inquiry, and without a concurrence of recommendation from all the Local Governments, compelling the registration of every petty transaction relating to property in land. This registration was in reality a very serious burden. It demanded money and time which poor people could exceedingly ill afford to lose—time not merely occupied in attending the registry office, but in marching perhaps 60 or 70 miles there and back, with all the expenses of the journey. He would also point out that it seemed to him that the very object for which the registration-system was introduced into the country gradually failed in proportion as you descended to the lower transactions. The great advantage of a registration-system was that a man who was about to purchase, or deal in property in any way, might know how far it was previously involved, and so might not subsequently be surprised at finding it burdened with debts or other incumbrances of which he had had no previous notice. But the more you got down to the small transactions amongst the body of the people, the better known every man's little affairs were. If a man, for instance, mortgaged his field for rupees 30, everybody in the neighbourhood would have heard him talk about it for a month or more, and perhaps have half a dozen disputes in public with the village baniyá who might be going to lend him the money. Those were petty matters which he was quite sure would always be perfectly well known and in which registration was not required at all. He would not now detain the Council with any further expression of his opinion on this subject, although that opinion might, he believed, be supported at much greater length; and he trusted that the Committee might not be considered to have had any instructions on the subject unless a motion were made regularly to the Council and it was decided that they should have such instructions.

The Hon'ble MR. BAYLEY said that he understood that his Hon'ble friend Mr. Cockerell would put a formal motion before the Council that it should be an instruction to the Committee to consider the question of making compulsory the registration of all conveyances relating to land; and if so, he thought it was his duty to oppose it, because the point involved was one eminently for decision by the Executive Government and not by the Legislative Council, for the decision really turned on a question of executive administration. He did not wish to detain the Council very long, but as he had been in charge of the Registration Department—as Secretary in the Home Department or as a Member of Government—for a period of fourteen years, he thought he might speak with authority as to the present condition of registration. He did not think anybody would dispute that it was very desirable, if it were possible, that every written document which passed in any shape should be registered. If it were possible, he thought registration would be even more important with regard to moveable property than with regard to immoveable property, because, with reference to the latter, to a certain extent, there was already some sort of a system of registration in most Provinces, and, in some measure, a man might generally pretty well ascertain the title to the property which he was about to purchase; but the frauds which were committed with regard to contracts for moveable property were far more numerous and difficult to prevent, and if the documents creating such contracts could possibly be registered, he had no doubt that nobody who had really considered the subject would say that it would be most desirable. The real difficulty was that, practically, a perfect system of registration would be impossible, at least for very many years to come. When registration was first made over to Local Governments as an item of their provincial financial system, he recollected especially taking the objection that it would allow the Local Governments to expend the profits from registration otherwise than upon registration itself, which was not the policy which the Government of India desired to pursue; and he recollected when the question was again discussed after Lord Northbrook's arrival, that he directed him (MR. BAYLEY) specially to watch the action of the Local Governments in that respect. Having therefore paid special attention to the progress of registration he was bound to say that he could not accuse any Local Government of unfairness; but at the same time after watching the working of the different systems of registering machinery, although he was not in a position to speak with absolute authority without reference to official records, his impression from all the facts which were before the Executive Government was, that it would be very difficult to apply the compulsory system of registration even to those minor transactions to which Mr. Cockerell proposed to extend it. He thought, without wishing to flatter Sir William Muir, that his system of registration for the North-Western Provinces was distinctly the best and the most perfect of any in India, and the Council had already heard what Sir William Muir had said upon the subject, and how he considered it incapable of doing the work which his Hon'ble friend Mr. Cockerell proposed to put upon it. In some of the Provinces which MR. BAYLEY did not wish particularly to name the facilities for registration were very inferior; he was perfectly certain that it would be a most cruel hardship on the people to compel all the minor documents relating to immoveable property to be registered. Of course he had no objection to a reference to the Local Governments if His Lordship and the Council desired it to be made executively, and he had very little doubt himself what the result of that reference would be. He also wished to correct one statement which his Hon'ble friend had made regarding Bombay. The Bombay Government had been trying some experiments with regard to the mode of registration for the last few years, in which he (MR. BAYLEY) confessed he took some part; it was thought right that the Local Government should do what they considered proper in the matter, and on that ground they were allowed to carry out their measures without interference. The practical result, however, had been very greatly to reduce their income. There had been a bare equilibrium in last year's accounts. The Secretary of State indeed had noticed it, and there was very likely to be a deficiency this year. He thought that that state of things might be remedied, but it could only be remedied by a total re-adjustment of the system, and this would take some time to bring about. He did not

wish to take up the time of the Council further; but as the motion to give this instruction to the Committee was about to be put to the Council, he wished to oppose it, although, as he had explained before, he had no objection to an enquiry as to the expediency of the measure being made executively. He had only to add that he did not concur in all the objections raised by his Hon'ble friend regarding the minor points in the Bill, which seemed to be matters more properly for discussion in Select Committee than by the Council.

The Hon'ble MR. HOBHOUSE said that the observations which he had to make had been almost entirely anticipated by the remarks of his Hon'ble friend Mr. Bayley. He was quite certain that we could not enter upon any such question in the way that was proposed without consulting the Local Governments, and he felt certain that no Local Government would give us any opinion upon it without consulting the district officers in its own jurisdiction and those who were working the registry offices. Both the Collectors and the Registrars must be consulted. According to his experience, a consultation of that sort, extending all over India, would occupy at least a year and a half; then the matter would have to be very carefully considered here, and that again would occupy much time. He thought that the Select Committee would be placed in a false position if they were required to undertake any such work; it must be done by the Executive and thoroughly thrashed out before it could be usefully dealt with in Committee.

Then as to the necessity of passing this Bill. He did not mean to say that it contained anything of such pressing necessity, that we might not take the ordinary time to receive criticisms and do the work carefully. And if there were nothing in the Bill but trivial alterations, he would be content to shelve it, and to say, "Let all these little amendments bide their time, and let Government take the whole question into consideration." But there was one section in the Bill which related to a pressing question, and that was the section he had already explained, by which we proposed to deal with a defect which had already given rise to fraudulent practices. We had it stated by an eminent judicial authority in Bombay that suspicious cases had turned up owing to the gap in the Act, and he was apprehensive that as the law in the Act became known extensive frauds would be committed. He (MR. HOBHOUSE) therefore thought we ought not to make any long delay before we proceeded to remove that particular defect, though we need not be in such a hurry as to risk error.

With regard to the concluding observations made by his Hon'ble friend Mr. Cockerell, he thought he could give a perfectly satisfactory answer in reference to the question he asked about section 2. The case he put was this: A person executed an agreement to mortgage; between the agreement and the execution of the mortgage the property was fraudulently sold by the owner and the purchaser proceeded to register his conveyance; and then he asked whether that purchaser was safe. He (MR. HOBHOUSE) conceived that if it was an honest purchase, the purchaser would be perfectly safe, though his vendor might have tricked the intending mortgagee. Therefore no difficulty would be likely to arise under the section. As to section 3, his impression was that some of the observations made by Mr. Cockerell were just, and care would have to be taken in Committee how that section was to be worded. He was not quite sure how the clause would construe if the exact words now used were retained, but he thought it might raise a question as to decrees of Court. Those however were matters which would be carefully settled in Committee. He would only say now, as a general principle, that it was not intended to enforce the compulsory registration of any of those instruments which were deliberately made optional when the Act was passed.

The Hon'ble MR. COCKERELL said that as he understood the adoption or rejection of the amendment which he had proposed to be the question now before the Council, he believed that he was in order in saying a few words by way of reply to certain observations which had fallen from certain hon'ble members opposite. His hon'ble friend opposite (Sir William Muir) had questioned the correctness of his statement as to the Local Government of the North-Western Provinces having in 1870 advocated the extension of the compulsory rule. He

(MR. COCKERELL) could only say that the statement referred to was contained in a speech made in this Council upon the introduction of the Bill for the amendment of the registration law which subsequently became Act VIII of 1871. He presumed that the statement made in that speech rested on the authority of a communication from the Government of the North-Western Provinces about that period, but he had not had time yet to refer to the correspondence which took place in connection with that enactment, and so he could not on this occasion cite the precise authority upon which the statement rested. In regard to a remark from another Hon'ble member opposite (Mr. Bayley), he (MR. COCKERELL) should explain that the returns from which he had taken his figures representing the excess of receipts over expenditure in the Registration Department of the Bombay Presidency were for the years 1871-72 and 1872-73. Very possibly since that latter period the receipts had fallen off, but he had not obtained access to later returns, and could not therefore speak as to their effect upon the present question.

It only remained for him to say that as the feeling of the Council appeared to be decidedly against the course contemplated by the amendment, he would, with the President's permission, withdraw it. He had brought forward this question because he deemed it expedient that whenever the registration law came under revision by the Council, the original object and scope of the measure, and the imperfect extent to which they had been as yet carried out, should be kept steadily in view.

The Hon'ble SIR ANDREW CLARKE took exception to the principle involved in the objection raised by the Hon'ble Mr. Bayley in stating that the question was not one for decision by the Legislative Council but for the Executive Government.

His Excellency THE PRESIDENT remarked that if he understood his hon'ble friend Mr. Bayley correctly, he did not say that the case was one for the decision of the Legislative Council, but that any communication with the Local Governments could only be efficiently carried out in executive form, not by the Select Committee, who would probably take a year or more to consider the subject; and that he had no objection to undertake this enquiry on the part of the Executive Government. His Excellency presumed that that course would probably meet the wishes of his Hon'ble friend Mr. Cockerell. He thought that it had been clearly demonstrated by his Hon'ble friend Mr. Hobhouse that it would be impossible for the Committee satisfactorily to carry out those inquiries without hanging up the Bill for an indefinite period of time.

The Hon'ble MR. BAYLEY explained that what he meant, was that the actual efficiency of the registration-system was a matter which the Executive only could ascertain and decide upon.

The Hon'ble MR. COCKERELL then withdrew his motion and the original Motion before the Council was put and agreed to.

The Hon'ble MR. HOBHOUSE then moved that the Bill be published in the *Gazette of India*, in English, and in the Gazettes of the various Local Governments, in English and such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble MR. HOPE introduced the Bill to relieve from incumbrances the estates of Jágírdárs and Zamíndárs in Sindh, and moved that it be referred to a Select Committee with instructions to report in six weeks. He said that on the last occasion when he had the honour to address the Council on this subject, he explained the necessity for, and the objects to be attained by, this Bill. He would now briefly state the measures by which it was proposed to effect those objects. He had pointed out that the Council had already passed four Acts somewhat similar to the Bill now before the Council. All those had certain phases in common; that was to say, we had an order vesting the estate in a manager, and upon the passing of that order all

processes of the Civil Court which were pending, ceased and were barred, and no fresh proceedings could be instituted while the management existed. The debtor also was rendered incompetent to charge the estate further. We, likewise, had a provision for enquiry into the debts by the manager, and a scheme for liquidation, and powers were given to raise money. In those general features the Bill now introduced corresponded with the other Acts on this subject to which he had referred. Those Acts also differed in certain material points. The Ahmadábád Act of 1862, which was the first, could only be put in motion by the Executive Government itself, and the Executive Government was limited, in applying the Act, to estates the debts of which were not less than five years' income of the property; and it was further limited in that the management was not allowed to continue, in any instance, more than 20 years. The Chutiá Nágpur Act both allowed the Government to interfere when the estate in any way came into Court, and also provided for the Government being set in motion by the application of the parties themselves. The Oudh and Broach Acts again took what might be called a further step; they could only be applied when the party himself moved; the Government had no power to initiate any action. In that respect the Sindh Bill now introduced would follow the Oudh and Broach Acts. Another feature which the Ahmadábád Act did not contain, but which the Oudh, Broach and Chutiá Nágpur Acts did, was the provision that the Government should be at liberty, within six months, to withdraw from its interference with the property. If it found that the property was so hopelessly involved that it was quite impossible ever to extricate it, the Government was enabled within six months to throw up the whole affair and leave it to the Civil Court. The Sindh Bill now introduced followed that principle generally, but with this difference that, instead of only within six months, the Government was allowed to withdraw at any time before the final order sanctioning the liquidation-scheme was passed.

Again, the Chutiá Nágpur Act contained distinct instructions as to what the Government was empowered to provide for by rules, and in this respect the Sindh Bill followed the Chutiá Nágpur Act. That Act had also the peculiarity that it could apply to any landholder throughout the Province, but it was not intended, as he had explained last week, to go as far as that in Sindh, and the line had been drawn at landholders who paid direct to Government not less than rupees 300 per annum and upwards. Finally, the Sindh Bill, now introduced, had one novelty which none of the other Acts contained; it provided for a careful preliminary enquiry, based upon a statement made by the party himself on oath, as to the amount of his debts and liabilities, before any order of management could be issued at all. On the whole the course of legislation from 1862 had been in the direction of greater caution in applying these Acts and a more distinct definition of the purposes to which the power of making rules should be directed.

The Motion was put and agreed to.

The Hon'ble MR. HOPE moved that the Bill be published in the *Gazette of India*, in English, and in the *Bombay Government Gazette* and the *Sindh Official Gazette*, in English and such other languages as the Local Government might think fit.

The Motion was put and agreed to.

BOMBAY MUNICIPAL DEBENTURES BILL.

The Hon'ble MR. HOPE also introduced the Bill to amend the law relating to the transfer of Bombay Municipal Debentures, and moved that it be referred to a Select Committee with instructions to report in a month.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill be published in the *Gazette of India* and the *Bombay Government Gazette*, in English.

The Motion was put and agreed to.

STAGE CARRIAGES ACT AMENDMENT BILL.

The Hon'ble MR. BAYLEY introduced the Bill to amend the Stage Carriages Act, and moved that it be referred to a Select Committee with

instructions to report in a month. He said that he had already explained that the object of this Bill, introduced chiefly at the request of the North-Western Provinces Government, was to place certain carriages drawn by camels under the operation of the existing law. As it was known that similar carriages were also drawn by oxen, and that as the abuses which necessitated the introduction of the proposed Act, applied in an almost equal degree to conveyances of this description, it had been proposed to include the oxen under the Bill; and as the object of the Bill was one to which nobody could take any objection, it was also proposed to extend it to the whole of India. A provision was however inserted that the Bill was not to supersede or set aside the provisions of any local law on the same subject. The reason of that was that there were certain municipal regulations in towns which met the object of this law and other objects besides, and which might be contravened, and be very difficult to work, if the Act was permitted to interfere with them.

The Motion was put and agreed to.

The Hon'ble MR. BAYLEY also moved that the Bill with the Act which it extends, be published in the *Gazette of India*, in English, and in the Gazettes of the various Local Governments, in English and such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

TREASURE TROVE BILL.

The Hon'ble MR. BAYLEY asked leave to postpone his motion for leave to introduce a Bill to amend the law relating to Treasure Trove.

Leave was granted.

OPIUM BILL.

The Hon'ble SIR WILLIAM MUIR asked leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the law relating to Opium.

Leave was granted.

OUDH LAWS AND LAND-REVENUE BILLS.

The Hon'ble MR. INGLIS moved that His Honour the Lieutenant-Governor of the Panjáb be appointed a Member of the Select Committee on the Bill to declare what laws are in force in Oudh, and on the Bill to consolidate and define the law relating to the settlement and collection of land-revenue in Oudh. He explained that as Sir Henry Davies had a few years ago been Chief Commissioner of Oudh, the Select Committee were anxious to take the opportunity of his presence at Simla to obtain his assistance in settling the Bills now under consideration. His Honour had also kindly consented to act.

The Motion was put and agreed to.

The following Select Committees were named:—

On the Bill to amend the Indian Registration Act, 1871,—The Hon'ble Mr. Bayley, the Hon'ble Mr. Inglis, the Hon'ble Mr. Hope, the Hon'ble Mr. Cockerell and the Mover.

On the Bill to relieve from incumbrances the estates of Jágírdárs and Zamíndárs in Sindh,—The Hon'ble Mr. Hobhouse, the Hon'ble Sir Alexander Arbuthnot, the Hon'ble Mr. Cockerell and the Mover.

On the Bill to amend the law relating to the transfer of Bombay Municipal Debentures,—The Hon'ble Mr. Hobhouse and the Mover.

On the Bill to amend the Stage Carriages Act,—The Hon'ble Mr. Hobhouse, the Hon'ble Mr. Cockerell and the Mover.

The Council adjourned to Thursday, the 6th July 1876.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 6th July 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble A. Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

TREASURE TROVE BILL.

The Hon'ble MR. BAYLEY asked leave to postpone his motion for leave to introduce a Bill to amend the law relating to Treasure Trove.

Leave was granted.

OPIUM BILL.

The Hon'ble SIR W. MUIR presented the Report of the Select Committee on the Bill to amend the law relating to Opium.

He said that the Bill had been greatly enlarged and improved. It now embraced and consolidated the whole of the existing laws relating to opium throughout India excepting only the Bengal law. In amalgamating the Bombay law with the provisions of the Bill he wished to acknowledge the valuable assistance the Committee had received from his Hon'ble friend Mr. Hope.

The laws on the subject for Bombay and for the Panjáb, and the miscellaneous enactments on the subject elsewhere, had been all repealed, and such of their provisions as were approved had been consolidated in the revised Bill. And thus for the future there would be but one law throughout India regulating the procedure for opium. As originally drawn, the Bill was confined to provisions for the growth of the poppy, and the possession, sale and transport of the drug. As amended, it provided also for the import, export and warehousing of opium; in respect of all which matters the Government would have power to make rules giving it an absolute control.

The law under which the opium monopoly on this side of India was conducted had been left untouched, as it was purely local in its application. When introducing the Bill, he had explained that it had no immediate bearing on the systems or methods under which the opium revenue was administered. Personally he entertained strong objections to the Bengal system of a State monopoly and manufacture; and for his own part he should greatly prefer to see the Bombay system of levying the revenue by an export duty introduced, under proper checks as to cultivation, on this side of India also. He trusted that some day the experiment would be made in some of the districts of Upper India to see whether the Bombay system could not be successfully substituted

for the monopoly without any undue financial risk. There was nothing in the proposed law that would not consist with such a trial. But the Bill of itself introduced no change; things would remain as they were until it should be the will of the Government to make any change. The Bill in fact had no bearing either one or the other on the policy of Government in respect of the diverse systems prevalent in different parts of India.

There were no other parts of the Bill requiring special explanation. But he might mention that great pains had been taken by the Committee in drawing sections 14 and 15 so as to give full power of seizure and arrest without too greatly enlarging the discretion of the Police and other subordinate establishments. It had been their care on the one hand to confer such absolute and summary power as was needed for the suppression of smuggling and other illicit practices, and on the other to limit, as far as possible, the openings and occasions for oppression and abuse. With the same view it had been provided in section 21 that any officer making an arrest or seizure should report the same within eight-and-forty hours to his departmental superior.

The Bill had been so considerably enlarged and amended that the Committee had taken measures for its republication in the *Gazette of India* and the local Gazettes.

REGISTRATION ACT AMENDMENT BILL.

The Hon'ble MR. COCKERELL asked the President's permission to make a personal explanation in reference to certain statements made during the debate on the Registration Bill at the last meeting of the Council.

THE PRESIDENT having accorded the permission asked for, MR. COCKERELL proceeded to remind the Council that during that debate he had read an extract from a speech made by the Mover of the Registration Bill of 1870-71 on the occasion of its introduction into the Council, attributing to the local Government of the North-Western Provinces opinions in favour of the extension of the compulsory system of registration, which he (MR. COCKERELL) was advocating, and that the Hon'ble Member who was formerly Lieutenant-Governor of the North-Western Provinces (Sir W. Muir) had virtually contradicted this statement on the ground that he had been at the head of the Government of the North-Western Provinces at the time referred to, and that he was not now, and had not then been, in favour of extending the area of compulsory registration. The statement must have been made upon some misconception of the real facts of the case.

In reply to this assertion, he (MR. COCKERELL) could only then say that the statement referred to by him was contained in a speech made towards the close of the year 1870; that he had no doubt as to the statement having been made on sufficient grounds, but he had not had time to refer to all the connected papers and ascertain the precise authority upon which it was made.

As the speech from which he (MR. COCKERELL) had then quoted was his own—for he had charge of the Registration Bill of 1870-71—it concerned him very materially to trace the authority for the statement referred to, and to show that it had not been made without good foundation.

Since the last meeting of the Council he had been able to trace the correspondence which contained the authority for the statement in question, and he would now, with the permission of the Council, read extracts therefrom, which would show conclusively that that statement was *absolutely* correct.

In a letter addressed by the Government of the North-Western Provinces to the Government of India, dated 29th August 1870, the Secretary Mr. Elliott wrote—

* * * * * *

(Para. 7.) "The country has now become accustomed to the Registration Act, and His Honour submits as worthy of consideration whether the provisions of that Act might not be extended to alienations of landed property under rupees 100 in value." * * *

It was noticeable that this communication was not made in connection with any projected alteration of the Registration law, but in reference to certain other proposals for special legislation to prevent fraudulent transfers of property, and it was apparently an entirely spontaneous suggestion not founded upon the reports or recommendations of subordinate officers.

Very shortly afterwards in a letter addressed to the Government of India bearing date 14th September 1870, and having direct reference to the amendment of the Registration law, Mr. Secretary Elliott wrote:

* * * (Para. 2) "Adverting to paragraph 3 of Mr. Johnston's letter," [Mr. Johnston being at that time the Registrar-General of the North-Western Provinces, and having then, as previously, expressed himself strongly in favour of the extension of compulsory registration,] "suggesting the abolition of the limit of rupees 100 as regards the compulsory registration of instruments affecting immoveable property, I am to refer to the remarks contained in paragraph 7 of my letter No. 488A, dated 29th August, in which this change was advocated," thus confirming the previously expressed view in favour of the course which he (MR. COCKERELL) had recommended.

Several months after the date of this letter, the Government of the North-Western Provinces, in forwarding a communication from the local High Court, which strongly opposed the proposal to extend compulsory registration, observed in reference to that communication:

"The Court's remarks on this head are entitled to much weight, and on a reconsideration the Lieutenant-Governor would withdraw his previous recommendation proposing the abolition of the limit."

This letter was dated the 21st March 1871, and Act VIII of 1871 was passed on the 24th March of that year. So that not only had he (MR. COCKERELL) no knowledge of this recantation of its former deliberately expressed opinion, on the part of the Government of the North-Western Provinces, when he made the statement founded on the earlier communications above referred to, but inasmuch as the later letter did not reach the Government of India until after the passing of the Act—and with that event his personal connection with the question ceased entirely—this change of views never came to his knowledge, and he was not aware of it when he last addressed the Council on the subject. In tracing the authority for the original statement he had been led to the discovery of this enunciation of a change of opinion on the part of the Government of the North-Western Provinces in regard to the question lately under discussion.

As regards the contradiction of the statement under such circumstances, he could only suppose that the Hon'ble Member (Sir William Muir), whilst mindful of the view to which he had been apparently converted by the High Court, and continuing to maintain that view, had forgotten that he had at one time held or expressed a directly opposite opinion.

SIR WILLIAM MUIR begged permission to add a few words to the effect that the statement which had just been made by his Hon'ble friend Mr. Cockerell was quite correct as to the facts. Mr. Cockerell having on a former occasion quoted the opinion of the North-Western Provinces Government, he (SIR WILLIAM MUIR) had felt bound to say that his views differed from those assigned to him in the passage quoted, and that he thought there must have been some misapprehension on the subject. The misapprehension into which his Hon'ble friend had fallen had now been satisfactorily explained, from his not having been cognizant of the final report submitted by him (SIR WILLIAM MUIR) as Lieutenant-Governor, in which he had, on mature consideration, expressed his opinion as adverse to the change now advocated by Mr. Cockerell. The explanation was therefore entirely satisfactory both as respected himself and his Hon'ble friend.

The Council adjourned to Thursday, the 27th July 1876.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on Imports and Exports are not distinguished.

2. The figures for British Burma for 1876-77 include the collections at *Tavoy* and *Mergui* for April and May only.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

Regina *vs.* Fuller.

Assault on a Servant resulting in his death.

From Arthur Howell, Esq., Officiating Secretary to the Government of India, to the Secretary to the Government of the North-Western Provinces,—No. 1093J, Simla, the 7th July 1876.

I am directed to acknowledge your letter No. 318, dated the 18th May last, forwarding, at the request of the Government of India, copy of the judgment of Mr. Leeds, Joint Magistrate of Agra, in the case of the Crown *versus* R. A. Fuller, together with a letter from the High Court of the North-Western Provinces, expressing the Court's opinion on the sentence inflicted on Mr. Fuller by the Joint Magistrate.

2. The facts of the case are as follows: One Sunday morning, Mr. Fuller, an English Pleader at Agra, was about to drive to Church with his family. When the carriage was brought to the door, the syce failed to be in attendance, but made his appearance when sent for. For this cause Mr. Fuller struck the syce with his open hand on the head and face and pulled him by the hair, so as to cause him to fall down. Mr. Fuller and his family drove on to Church; the syce got up, went into an adjoining compound, and there died almost immediately.

3. The Joint Magistrate of Agra, before whom Mr. Fuller was placed to take his trial, framed the indictment under Section 323 of the Indian Penal Code for "causing hurt to one Katwaroo, his syce," and it appeared from the evidence of the Medical Officer who had conducted the *post mortem* examination that the man had died from rupture of the spleen, which very slight violence, either from a blow or a fall, would be sufficient to cause, in consequence of the morbid enlargement of that organ. The evidence in the case does not shew any other assault; at least the Joint Magistrate disbelieved (apparently on good grounds) all that portion of the evidence which referred to any other assault. The Joint Magistrate found Mr. Fuller guilty of "voluntarily causing what distinctly amounts to hurt," and sentenced him to pay a fine of Rs. 30, or in default to undergo fifteen days simple imprisonment; directing the amount of the fine to be made over to the widow of the deceased. At the request of the Local Government, the High Court expressed an opinion on the case, which was to the effect that the sentence, though perhaps lighter than the High Court would have been disposed to inflict under the circumstances, was not especially open to objection.

4. The Governor General in Council cannot but regret that the High Court should have considered that its duties and responsibilities in this matter were adequately fulfilled by the expression of such an opinion. He also regrets that the Local Government should have made no enquiry, until directed to do so by the Government of India, into the circumstances of a case so injurious to the honour of British rule, and so damaging to the reputation of British justice in this country.

5. The Governor General in Council cannot doubt that the death of Katwaroo was the direct result of the violence used towards him by Mr. Fuller. He observes that the High Court assumes the connection between the two events as being clear. Yet on reading Mr. Leeds' judgment he does not find that that gentleman ever considered the effect or even the existence of this connection. Mr. Leeds did, indeed, consider whether Mr. Fuller ought not to be subjected to a more serious charge, but only because there was evidence given of further violence used by him, which evidence Mr. Leeds rejected, on grounds which are here assumed to have been sufficient. He seems, however, to have

viewed an assault resulting in the death of the injured man in just the same light as if it had been attended by no such result.

6. The class of misconduct out of which this crime has arisen is believed to be dying out; but the Governor General in Council would take this opportunity of expressing his abhorrence of the practice, instances of which occasionally come to light, of European masters treating their native servants in a manner in which they would not treat men of their own race. This practice is all the more cowardly, because those who are least able to retaliate injury or insult have the strongest claim upon the forbearance and protection of their employers. But bad as it is from every point of view, it is made worse by the fact, known to all residents in India, that Asiatics are subject to internal disease which often renders fatal to life even a slight external shock. The Governor General in Council considers that the habit of resorting to blows on every trifling provocation should be visited by adequate legal penalties, and that those who indulge it should reflect that they may be put in jeopardy for a serious crime.

7. The Governor General in Council cannot say whether Mr. Fuller would have been convicted of a more serious offence, such as that of causing grievous hurt, or that of culpable homicide, had he been charged with it. But this he can say with confidence, that in consequence of Mr. Fuller's illegal violence his servant died, and that it was the plain duty of the Magistrate to have sent Mr. Fuller to trial for the more serious offence; a course which would not have prevented him from being punished (indeed he could thus have been more adequately punished) for the lesser offence, if that alone had been proved.

8. But besides his error of judgment in trying this case himself, the Governor General in Council thinks that Mr. Leeds has evinced a most inadequate sense of the magnitude of the offence of which Mr. Fuller was found guilty. The offence was that of "voluntarily causing hurt." That is an offence which varies infinitely in degree, from one which is little more than nominal, to one which is so great that the Penal Code assigns to it the heavy punishment of imprisonment for a year *and* a fine of Rs. 1,000. The amount of hurt and the amount of provocation are material elements in determining the sentence for such an offence. In Mr. Fuller's case, while the provocation was exceedingly small, the hurt was death. For this, Mr. Leeds, while saying that he intends to inflict a punishment something more than nominal, inflicts only a fine of Rs. 30. The Governor General in Council considers that with reference either to the public interests, or to the compensation due to Katwaroo's family from a person in Mr. Fuller's position (and it does not appear from the papers that Mr. Fuller has made any other compensation), such a sentence is wholly insufficient. He considers that Mr. Leeds has treated the offence as a merely nominal one, and has inflicted a merely nominal punishment; and that to treat such offences with practical impunity, is a very bad example and likely rather to encourage than repress them.

9. For these reasons, the Governor General in Council views Mr. Leeds' conduct in this case with grave dissatisfaction. He should be so informed, and should be severely reprimanded for his great want of judgment and judicial capacity. In the opinion of the Governor General in Council, Mr. Leeds should not be entrusted, even temporarily, with the independent charge of a district, until he has given proof of better judgment and a more correct appreciation of the duties and responsibilities of Magisterial officers for at least a year.

ARTHUR HOWELL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13TH JULY 1876.

GENERAL REMARKS.—The monsoon rains are now general except on the Western frontier of the Punjab, but in many places the falls have hitherto been very scanty.

In Madras very slight rain has fallen, except in the Northern districts and Malabar. In Sind the river is now reported to be rising, though later than last year. Rain has fallen generally throughout Bombay, including Guzerat; more is much required in Kaira, Khandesh, Kattywar and the Southern Mahratta country generally. In the Central Provinces the fall has been generally fair, but in Raipur, Bhandára, Chánda and Bálaghát insufficient for the rice crop. In Berar there has been a good fall. In Mysore the rain has been scanty and more is much needed; partial distress is apprehended. In Central India and Rajputana there have been copious and general falls and prospects are good. Rain is reported from all districts of Bengal except Chumparun; it has been abundant in the Eastern and Central districts and Chota Nagpore, but scanty in the districts of Behar north of the Ganges; prospects are generally satisfactory. In the North-Western Provinces general rain has fallen. In Oudh the fall has been light, and more is wanted. In the Punjab rain is reported from all districts except Mooltan, Dera Ismail Khan and Peshâwar. Abundant rain has fallen in Assam and Burma.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 13th)	2·40 at Masulipatam; 2·30 at Nandigama; ·20 at Vinukonda.	No rain elsewhere; 7 feet 7 inches water over anicut; prices risen in Bander and Nandigama, steady elsewhere; cultivation operations commencing; cholera throughout the district, 581 attacks, 321 deaths, otherwise health good; cattle healthy save in Narsarowpeta; pasture improving; markets well supplied locally.
Kurnool („ 12th)	Very slight rain in Nandikotkur, Sirwell and Kurnool.	No rain elsewhere; season rather unfavourable; pasture scanty; water sufficient; markets well supplied; prices stationary, except in Pattikonda and Sirwell, where *cholum*, horsegram and paddy are rising; fever prevalent; cholera nearly all over the district, seizures 348, deaths 164; 1·5 feet of water over Sunkesala anicut in Tumbudra.
Tanjore („ 13th)	·04 at Negapatam.	Elsewhere a drizzle; freshes in rivers good; supply to tanks none; water over lower anicut, North branch, 1 foot 5 inches; South, 1 foot 8 inches; cultivation inferior; paddy and a few dry crops in some places; standing crops not thriving in some parts for want of rain; no harvest; pasture insufficient; markets well supplied; prices slightly rising; public health, cholera continues, seizures 370, deaths 290; *surukkammai* abating; cattle generally healthy.
Madura („ 12th)	...	Slight rain only in parts of Dindigul taluk; state of agricultural prospects very poor; prices rising; water and pasture for cattle very scarce; state of public health unaltered; cholera, seizures 103, deaths 70, all in Ramnad and Shevagenga zemindaries.
Malabar („ 13th)	8·37	Rain sufficient for cultivation; markets well supplied, but prices rising; cholera in all taluks, except Chirakal, 138 deaths; cattle healthy; pasture flourishing. *General Remarks.*—General prospects unchanged; rain in all 5 districts; good freshes in Tanjore.
Bombay— (July 13th)		
Sind.—(July 12th)		
Kurrachee ...	...	River at Kotri on 10th, 12 feet 6 inches, last year 13 feet 2 inches; its fall has occasioned great fear of failure of crops; accounts from districts gloomy; several canals dry; slight rain in Shâhbandar on 18th ultimo.
Shikârpur ...	...	River rising steadily; *kharif* prospects good; fever in 6 talukas.
Hyderabad ...	...	River again rising gradually; rice seedlings suffering; indigo in Naushahro attacked by small locusts; 14 fresh cases of small-pox in town; weather cool.
Upper Sind Frontier ...	...	Weather hot and close; *kharif* sowings general; cholera reported from Kachi.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	1·10	Total rainfall 1·35; cholera in city, 6 cases, 5 deaths.
Kaira ...	2·48	More rain required; sowing operations commenced; 148 cholera cases, 67 deaths.
Surat ...	0·09	Total rainfall 7·45; 3 fatal cholera cases in city; 21 cases in Mándvi, 16 fatal; 11 in Válod, 1 fatal.
Broach ...	1·23	Total rainfall 4·92; cholera continues in Ankleswar, Hánsot and Jambusar; crops good.
Khandesh and Násik.		
Khandesh ...	0·95 at Dhulia.	Total rainfall 7·40; more rain wanted throughout the Collectorate; crops withering; central and eastern districts in very bad state; 2 cholera cases in Sháháda taluka; weather cloudy.
Násik ...	1·49	Total rainfall 5·88; fall of rain general; sowing progressing; public health good.
Konkan.		
Tanna ...	2·46	Total rainfall 29·72; more rain wanted; cholera continues in Agáshi in Bassein taluka, 5 cases, 1 fatal, also in a few villages in Dáhánu; small-pox in 3 talukas; transplantation of rice crops commenced.
Deccan.		
Poona ...	0·10	Total rainfall 6·62; sowing of *kharif* generally commenced; slight cattle disease still exists in 3, and cholera in 2 talukas.
Ahmednagar ...	...	Sowing of *kharif* commenced.
Sholapur ...	0·30	Total rainfall 2·97; cholera continues, 278 deaths.
Satara ...	2·40	Total rainfall 11·71; sowing operations partially completed; 139 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	0·80	Total rainfall 10·62; more rain much wanted; cholera increasing in Belgaum taluka.
Dharwar ...	0·14	Total rainfall 7·50; rice crops withering, and sowing of other crops delayed for want of rain; slight cholera in 5 talukas.
Kanara ...	8·50 in Karwar.	Total rainfall 46·0; cholera abating; crops fair.
Kaládgi ...	0·40	Total rainfall 7·23; more rain wanted for sowing operations; cholera continues, 186 deaths.
Kattywar.		
Rájkot ...	1·12	Total rainfall 2·53; want of rain severely felt; cholera in some parts of the province.
Wadhwán ...	0·68	Total rainfall 2·83; cholera in Jhalawad, 45 cases, 23 deaths; want of rain felt.
		General Remarks.—Rain much wanted everywhere; cholera still continues in nearly every district.
Bengal— (July 13th)		
Chittagong ...	6·12	
Noakholly ...	9·32	Stray cases of small-pox and cholera reported from Bamni.
Chittagong Hill Tracts...	5·37	
Hill Tipperah ...	·85	
Backergunge ...	2·89	Cholera disappeared; general health good; cattle disease present in certain thanas.
Furreedpore ...	5·1	General health good.
Dacca ...	3·36	
Tipperah ...	3·48	
Mymensingh ...	5·51	
24-Pergunnahs ...	1·86	Public health generally good; fever again broken out at Barripore and adjoining villages.
Jessore ...	2·45	
Nuddea ...	5·75	Cattle disease at Maheshpur thana.
Moorshedabad ...	3·27	Public health good, except at Nalháti, where 6 deaths from cholera occurred.
Pubna ...	·96	
Rajshahye ...	10·4	
Bogra ...	8·32	
Malda ...	4·79	
Dinagepore ...	2·19	
Rungpore ...	1·84 (previous week 1·)	
Cooch Behar ...	5·14	Public health good, but cholera still prevails in places.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jalpáiguri ...	·37	Cholera prevalent in Maynaguri and Patgram.
Darjeeling ...	6·45	
Midnapore ...	8·46 (previous week 2·14.)	
Howrah ...	6·23	
Hooghly ...	2·11 (previous week 1·04)	Public health fair.
Burdwan ...	1·25	Public health fair.
Bankoora ...	8·12	
Beerbhoom ...	2·66	
Sonthal Pergunnahs ...	3·72	
Bhágalpur ...	·83	General health very good.
Monghyr ...	Return not received.	
Purneah ...	1·43	
Durbhunga ...	·6	Public health good.
Mozufferpore ...	·96	Public health good.
Sarun ...	2·05	Cholera still prevalent, it is abating in Gopálganj.
Chumparun ...	*Nil*	
Patna ...	.02	Cholera cases still reported from all parts of the district.
Gya ...	2·76	Cholera still prevalent.
Shahabad ...	·28	
Hazáribágh ...	9·96	
Lohardugga ...	3·26	Cholera still reported, it is still prevalent in Palamow, but less than before; small-pox same as before.
Manbhoom ...	1·52	
Singhbhoom ...	·73	Some cases of cholera reported.
Balasore ...	8·36	The week ending 2nd July shews an amelioration in the cholera epidemic in the south of the district, the number of deaths from cholera reported during the period has been 290.
Cuttack ...	1·73	Cholera increasing and spreading.
Pooree ...	·61	Cholera prevalent in parts.
		General Remarks.—There has been seasonable rain in all the districts of Bengal during the week; agricultural operations are carried on actively everywhere; the prospects of the crops are generally satisfactory; *aous* and jute are being harvested in the districts of Rungpore and Bogra; *bilri dhan*, a species of *aous*, is being reaped in Cooch Behar; transplantation of *amun* seedlings is in progress; indigo, mulberry sugarcane, jute, *sun* and other crops of minor importance are all doing well. The rising of the Soane has inundated the surrounding country and caused some damage to property and life.
N. W. P.—		
Benares (July 12th)	From 1·2 to 2·6 fell up to the 11th.	Although enough rain fell for sowings of other *kharif* crops, it is not sufficient for rice.
Agra („ 13th)	...	Fairly general rain fell in the 3 parganas north of the Jumna, where ploughing has commenced; no rain to date in the parganas south of the Jumna, but rain now falling in Agra.
Meerut („ 12th)	Slight rain throughout district.	Generally hot and cloudy.
Bareilly („ „)	·7	Weather cloudy.
Almora („ 10th)	...	On Wednesday wind changed from west to south, and rain commenced on evening of Thursday, since then weather cloudy and showery.
Allahabad („ 12th)	...	Weather cloudy and warm; one or two slight and partial showers; rain much wanted.
(„ 13th)		Heavy showers since fallen.
Jhánsi („ 14th)	11· from 5th	Prospects good.
Punjab— (July 12th)		
Delhi ...	1·0	Health good.
Hissar ...	2·6	Ploughing and sowing in progress; health good.
Umballa ...	2·5	Health good; sowing commenced.
Jullundur ...	3·3	Health good; ploughing commenced.
Lahore ...	8·9	Agricultural prospects good; health fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*		
Mooltan ...	*Nil*	Health fair; agricultural prospects good.
Dera Ismail Khan ...	*Nil*	Ditto ditto.
Rawálpindi ...	·3	Ditto ditto.
Pesháwar ...	*Nil*	Rain wanted; *rabi* harvested, *kharif* ploughings progressing; health good.
		General Remarks.—Except along the western frontier, rain generally fell during the past week heavily in the Central Districts; agricultural prospects good; cholera in a few localities, but the health of the province is generally good.
Oudh— **(July 12th)**		
Lucknow ...	1·3	More rain wanted everywhere; public health generally good.
Sitapur ...	1·2	
Fyzabad ...	·3	
Central Provinces—		
Upper Godávari(July 8th)	·63	Weather cloudy; sowings continue; 3 deaths from cholera; prices steady.
Sambalpur ...	2·71	Rain opportune for young rice; sowings continue; 70 cholera cases, 24 fatal.
Biláspur ...	3·84	Sowings continue, prospects fair; fever prevalent; prices rising.
Raipur ...	·12	Weather cloudy; rice sowing completed; rain wanted; health good; prices rising.
Bálághát ...	4·10	Rice plants revived in some places by recent rains; in others second sowing has been necessary; health good; prices steady.
Chanda (July 9th)	·52	Sowings delayed for want of rain; cholera continues.
Chhindwára ...	1·9	Cotton slightly damaged; health good; prices steady.
Bhandara („ 11th)	·27	Weather cloudy and close; rice crop suffering for want of rain; fever and small-pox continue; 17 cases of cholera; prices rising.
Nágpur („ 12th)	...	Weather cloudy; sowings delayed for want of rain; crops sown are suffering from same cause; prices rising.
Wardha ...	·90	Sowings progressing; no cholera.
Nimár ...	1·67	Sowings continue; small-pox decreasing.
Hoshangabad ...	2·50	Cholera continues.
Narsinghpur (July 12th)	3·0	Sowings continue; cholera prevalent.
Jubbulpore ...	8·31	Sowings continue; small-pox abating; cholera and cattle disease prevalent.
Saugor ...	11·18	Ploughing and sowings progressing; cholera continues.
Seoni ...	1·30	Cholera continues; prices rising.
Damoh ...	11·20	Sowings continue; health good; prices stationary.
Mandla ...	4·35	Sowings progressing; 3 deaths from cholera; prices stationary.
		General Remarks.—Rain which was much needed has fallen, but more is urgently wanted in Raipur, Bhandara, Chanda, and Bálághát, where rice is the staple crop, and in most other districts the rainfall up to date is short and prices have in consequence risen; cholera is still prevalent in Narsinghpur, Jubbulpore, Saugor and Damoh, and decreasing in Hoshangabad.
British Burma— (July 13th)		
Arrakan Division ...	...	Public health good; cattle disease abating in Akyab district; rains seasonable; ploughing progressing favourably.
Pegu Division.		
Rangoon	5·69	Total rainfall up to date 37·50; slight fever reported; crops in good condition; rainfall abundant; cattle disease increasing everywhere, very prevalent in Pegu, Syriam and Angyee townships.
Bassein	...	Slight cattle disease; rain steady; health good; cultivation commenced, seedlings healthy.
Henzada	...	Weather favourable; rain sufficient in Henzada, but insufficient in Myanoung and Tharawaddy; cholera still prevalent in Okpho; slight cattle disease in Tsanynay, otherwise public health good.
Prome	2·22	Health good; ploughing commenced.
Thayetmyo ...	...	Health good; rains very short; total rainfall registered up to 8th July 11·50.
Thonkwa	...	Health and crops good; rainfall plentiful; severe cattle disease in Phyapoon, Pantanaw, and Yandoon divisions.
Tenasserim Division.		
Amherst ...	17·94	Public health good; fever at Kyouk Kajee; cattle disease abating; crops well advanced and healthy.
Tounghoo ...	6·17	Ploughing commenced; public health indifferent.
Shwegyeen ...	1·2	Crops good; fever prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauhati (July 13th)	3·32	Sky overcast; weather sultry with irregular showers; *asu* being reaped, *sali* planting commenced; state of tea the same as before.
Sylhet („ „)	10·19	Reaping continues; prospects good.
Hyderabad Assigned Districts.—		
Amráoti (July 13th)	2·58	*Jowari* sowing nearly completed; cholera decreasing in Wún district; of 20 attacked 4 have died.
Mysore and Coorg— **(July 13th)**	·80 in Bangalore Cantonment. 5·89 in Coorg.	Rain still much needed throughout Mysore and there are indications of severe distress in parts of the Shimoga and Chitaldroog districts; cholera still prevails more or less in all districts.
Central India—**(July 12th)**		
Indore ...	2·03	Rainfall general and very beneficial; health good except in Baghelkund where cholera continues.
Gwalior ...	·66	
Neemuch ...	6·85	
Rutlam ...	5·13	
Sutna ...	5·27	
Rajputana—		
Abu (July 13th)	4·30	Weather close and cloudy; thermometer 77°.
Serohi („ 9th)	3·07	Heavy rain on night of 8th; locusts reported to west and south of Serohi.
Marwar („ 8th)	*Nil*	Locusts passed Mullanee to south; partial tillage; in Marwar and Pathunpore health very good.
Bikaneer („ 1st)	1·10 on 26th.	Much rain fell in districts; sowing commenced; health good; flight of locusts from north-east to south-west on 3rd.
Meywar („ 7th)	1·50	South-west winds and cloudy sky; health good.
Harowtee („ 8th)	...	Health good; field operations in full progress.
Deolee ...	3·20	
Tonk ...	0·60	
Kota ...	3·90	
Shahpura ...	7·0	
Ajmere (July 13th)	...	Rain during week, promise of more.
Jeypore ...	0·75	Ploughing and sowing everywhere active; health good.
Bhurtpore ...	5·40 on 12th and 13th.	Ploughing partial hitherto; health good.
Ulwur („ 12th)	1·16	Rain partial; sowing commenced; great scarcity of forage.
Nepal— **(July 5th)**	·03	Rain much wanted for the transplanted rice in the hills; Indian-corn promises to be good.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

ACCIDENT ON PUNJAB NORTHERN STATE RAILWAY ON 23rd MAY 1876.

Nos. 1760—1 R, dated Simla, the 5th July 1876.

RESOLUTION—By the Government of India, P. W. DEPARTMENT.

Read—

Letter from the Consulting Engineer to the Government of India for Guaranteed Railways at Lahore, No. 705, dated the 31st May 1876, reporting the result of his investigations into the causes of this accident.

OBSERVATIONS.—It is gathered from this report that the accident arose from a spark from the engine of the afternoon train of the 23rd May 1876 falling behind the roof-lamp of a third class carriage where it was sheltered long enough to set alight the painted canvas covering the roof. Ultimately as the driver slackened speed, in obedience to the signals of the guard, the flames burst down into the carriage and frightened two women and one man into jumping out whilst the train was in motion. The man was only slightly hurt, but the women suffered severe injuries, from the consequences of which one has had a leg amputated between the foot and knee.

It is evident that had these passengers remained in the carriage until the train stopped, they would not have been injured.

A standing order exists on the Punjab Northern State Railway to the effect that all carriage doors on one side shall be locked. On the occasion in question the door through which the woman jumped was left unlocked on the wrong side. For this breach of regulations the Consulting Engineer considers the Station Master at Goojranwalla responsible, and also the guard in charge of the train.

The Consulting Engineer notices the absence of cord communication between the guard and driver on the trains on this Railway, but in this case it is clear that had this precaution even been adopted, it would have had no effect on the results. Attention is also drawn to the inefficiency of the spark-arresters used on the engines.

The Director of State Railways has fined the Station Master, Goojranwalla, and the guard of the train, such sums as he considers adequate for the breach of the regulations by which they were required to see that the carriage doors are properly secured.

RESOLUTION.—The Director of State Railways should submit a report to the Government of India on the spark-arresters in use on the Punjab Northern Railway, and if he agrees with

the Consulting Engineer in the opinion that the plate spark-catchers as fixed in the smoke-boxes of the Sindh, Punjab and Delhi Railway engines are more effective, he should authorize that mode of arresting sparks to be adopted forthwith in the engines of the State Railway.

With regard to the absence of cord communication between guard and driver, the attention of the Director of State Railways should be invited to letter No. 1049 R of the 17th April 1876, and early report called for why this precaution prescribed by the Railway Regulations was omitted in the present instance.

ORDER.—Ordered, that a copy of this Resolution with enclosure be forwarded to the Director of State Railways for information and guidance.

Ordered also, that a copy be forwarded to the Home Department for publication in the Supplement to the *Gazette of India* for general information.

H. DRUMMOND, *Colonel, R. E.,*
Depy. Secy. to the Govt. of India.

No. 705, dated 31st May 1876.

From—COL. C. POLLARD, R. E., Consg. Engr. to Govt. of India for Guaranteed Rys., Lahore,
To—The Secretary to the Government of India, P. W. Dept.

I have the honor to report that a third class carriage on the Punjab Northern State Railway attached to the down afternoon train on the 23rd instant caught fire, and two women passengers who jumped from the carriage whilst the train was in motion were very seriously injured. One woman has undergone amputation of the leg, and the other who was injured in the foot lies, I believe, in a somewhat critical state, although up to this the foot has been saved.

2. Deeming the accident to be of a serious nature, I considered it right to hold an official investigation to determine if blame in any way rested on the Railway officials or running staff attached to the train. This investigation was held on the morning of the 26th instant in the presence of the gentlemen named in the margin, and I have the honor now to lay the evidence before you, accompanied by the deposition of one of the injured passengers, Ismat Bibi (the woman who has lost her leg), Appendices A. and B.

Mr. A. Grant, Manager, Punjab Northern State Railway.
Mr. P. J. Bruff, Executive Engineer in charge of Open Line.
Mr. Thomas, Locomotive Superintendent.
Mr. Keene, Traffic Superintendent.

3. From these papers you will gather that about the 24th mile a spark from the engine set fire to a third class carriage, the third behind the fuel truck. From an inspection of the burnt carriage it is clear that the spark falling behind the roof-lamp projection was sheltered from the draught of the moving train and remained alight long enough to set fire to the painted canvas covering the roof. The roof planking then caught, and the draught between the double roof quickly fanned the smouldering fire into a flame. As long as the train was running full speed the smoke and fire appears to have been wafted back, but when speed was slackened, in obedience to the guard's signals, flames burst down into the carriage through the lamp-hole, and occasioned the panic which resulted in some of the passengers (two women and one man) jumping out whilst the train was in motion.

4. The fire was evidently very quickly discovered by the guard, who took all proper steps to bring the train to a stand. He was promptly answered by the driver, and there is no doubt but that the running staff were on the alert, and had the passengers remained in the carriage, no injury would have happened to life or limb.

5. I would here draw attention to the fact that two passengers jumped on the road or west side of the line and were both injured, whilst the man who jumped on the east side was unhurt. I find from the evidence that a standing order exists that the doors of passenger carriages are to be locked on the west side and left unlocked on the east side. Had this been done, the woman could only have got out on the east side; and although it is by no means certain* they would have escaped unhurt, still there is a probability that they would have done so, as the chances of accident to a passenger falling from a moving train are undoubtedly increased by the possibility of the road fencing throwing him back under the wheels. Here then is a breach of orders which may or may not have indirectly caused the accident, and for this breach of regulations the Station Master, Goojranwalla, and J. Smith, guard of the train, are to blame.

* The woman Ismat Bibi attributes her accident to her having missed the step and so fallen under the train.

6. The guard, driver and native attendants on the train were prompt and energetic under the emergency, und their course of action towards the sufferers was humane and judicious.

7. I now proceed to make a few observations on the facts that this accident has elicited. It has come out that no communication, other than what can be made by brake and flag signals, exists between guard and driver, and in the present instance both these train officials concur in thinking the cord communication should be added: Mr. Bruff, Executive Engineer of the Open Line, sees no advantage in this. I strongly press upon the Government the necessity of insisting on a cord communication being fixed to every passenger train. Imperfect as this method confessedly is, it has the merit of being the best and simplest yet introduced,

7. Q.—What did you do with the injured passengers?

off, the canvas covering the roof leaving it of course much more inflammable. The painting should be more frequently renewed, and I think the silica paint might be advantageously used in this situation.

9. The spark-arrester in use on the metre gauge engine is very similar to, if not identical with, Brown and Cosser's spark-catcher which was fitted to the Stephenson's engines on the Scinde, Punjab and Delhi Railway. It was abandoned there in favour of the plate spark-arrester which is now in general use on the wood-burning engines. I think the attention of the Manager, Punjab Northern State Railway, should be turned to this subject. Fires are apparently on the increase, and it is by no means certain that the basket spark-arrester is the best suited to the engine. Other patterns should be tried and the results noted.

No. 1675, dated 25th May 1876.

From—P. J. BRUFF, Esq., Executive Engineer in charge Open Line,
To—The Engineer-in-Chief and Manager, Punjab Northern State Railway.

I have the honor to report for your information that a third class carriage (No. 813) attached to No. 2 down mail of 23rd instant, was observed to be on fire about the 34th mile; but before the train was brought to a stand-still, one man and two women jumped out, one of the latter with a child in her arms. The man sustained only some bruises, but the women were severely hurt, one having her leg broken and the other her foot. The child was not hurt. The fire, it appears, originated from a spark from the engine lodging in between the double roof of the carriage near the lamp-hole; the upper roof was burnt through near the lamp-hole, the lower one and one side of carriage was badly charred before the fire could be extinguished.

It appears that this train left Goojranwalla at 2-47 right time, and when the fire was observed at the 34th mile was running at about 24 miles an hour. Guard Smith in charge of train observed smoke issuing from the front of the train, on which he immediately signalled to the brakesman in third class carriage brake, putting on his own brake hard at same moment. The driver immediately perceiving that the brake was put on, shut off steam, doing his best to pull the train up. The moment steam was shut off the two women jumped out, one at 160 yards and the second at 140 yards from place where train was brought to a stand-still, the man not jumping till within about 20 yards of halting-place, when the speed was nearly stopped; but the bruises he received were caused by his jumping backwards, instead of forwards, consequently rolling over several times.

On train being brought to a stand-still the guard went back and found the women with injuries mentioned above lying on the ground; they were put into different carriages for conveyance to Lahore, the fire in meanwhile being extinguished by driver and native firemen. On arrival at Kamoki, distant 5 miles, it was telegraphed to Lahore to have Native Doctor present on arrival and charpoys for conveyance of the injured to the hospital, where they were immediately conveyed on arrival at 5-30. The leg of the one woman was amputated between foot and knee the same evening, the injuries of the second one being not so severe as at first imagined. The one door only was locked according to orders. It is stated that there were 12 people in the carriage at the time.

Further particulars will be elicited at the official enquiry to-morrow, which I am unable to obtain now, as both driver and guard were obliged to leave again early next morning with trains, one at 4 A. M. and the other at 4-40 A. M.; so that with exception of information I was able to glean on evening of accident on arrival of train, I have not been able to obtain any.

APPENDIX A.

Evidence taken at the official enquiry into the accident that happened on the Punjab Northern State Railway on 23rd May 1876.

Guard J. Smith was called and examined:

1. *Q.*—Were you on duty with the down train on the evening of the 23rd instant?
   A.—Yes.
2. *Q.*—How did you find out one of the carriages was on fire?
   A.—I saw smoke, and at once put my brake hard down and signalled to the driver to stop.
3. *Q.*—How soon did the driver discover your signals?
   A.—At once, and the train came to a stand in about 4 or 500 yards.
4. *Q.*—Is there any communication between guard and driver?
   A.—No. There is not.
5. *Q.*—When were the passengers injured—before or after you signalled to the driver?
   A.—After speed was slackened.
6. *Q.*—How many people were in the carriage, and how many jumped from it?
   A.—Twelve people were in the carriage and three of them jumped. Two of these were injured.

7. *Q.*—What did you do with the injured passengers?
A.—Cleared out a 3rd class carriage and put them into it. From the next station I telegraphed to have medical aid ready on arrival at Lahore, and when the train came in I sent them to the Mayo Hospital.
8. *Q.*—Was the smoke thick when you saw it first?
A.—No, it was very slight at first, but on stopping flames burst out.
9. *Q.*—Were any of the people in the train burnt?
A.—No; no one was touched by the fire.
10. *Q.*—How many carriages were there on the train?
A.—I think fourteen.
11. *Q.*—Whereabouts in the train was the carriage that took fire?
A.—The third from the fuel truck.
12. *Q.*—Are fires on the increase since the hot weather set in?
A.—Yes, I think they are.
13. *Q.*—Whereabouts did the accident take place?
A.—At the 34th mile, near the police post.
14. *Q.*—Did the occupants of the carriage know it was on fire when you signalled to the train to stop?
A.—No. They say they did not.
15. *Q.*—How many cases of fire have you known since you have been on the line?
A.—I have been four months on the line, and have myself seen four or five cases.
16. *Q.*—Have you any difficulty in communicating with the driver?
A.—At times the dust is so thick I cannot see signals. In the present case there was no dust. I think a communication cord would be advantageous.
17. *Q.*—How far from the spot the train came to a stand did the passengers jump?
A.—One woman about 160 yards, another about 140 yards, and a man about 20 yards.
18. *Q.*—On which side did they jump?
A.—The women both jumped out on the side next the road, and fell between the mud fence and the ballast; the man jumped out on the side of the open country.
19. *Q.*—Were the doors locked?
A.—They were unlocked on the side next the open country (the east), but locked on the side next the trunk road, with the single exception of the one through which the women jumped.

2ND WITNESS.

Driver H. Burss called:
20. *Q.*—How long have you been a driver on this line?
A.—About fourteen months.
21. *Q.*—You were driving the down train on the 23rd when the two women were injured?
A.—Yes, I was.
22. *Q.*—Describe the accident.
A.—I found the guard was putting his brake down and I saw flag signals for me to draw up.
23. *Q.*—In what distance did you bring your train to a stand.
A.—In about the length of three telegraph posts (about 300 yards).
24. *Q.*—Do you find any difficulty in communicating with the guard?
A.—No. If he wants to communicate with me, he puts his brake down and signals. If I want to communicate with him, I whistle and put down my brake.
25. *Q.*—Have you ever seen the dust so thick or the atmosphere so murky that you could not see signals?
A.—Yes; I have a case occurred only a few days back when I could not have seen a signal five yards off.
26. *Q.*—Was this the usual state of the line or a special case?
A.—It was a dust-storm. Ordinary running does not throw up much dust.
27. *Q.*—Did you know why the guard was stopping you?
A.—I looked back and seeing smoke issuing from the carriage, I guessed what it was for.
28. *Q.*—From what you saw of the fire, do you think the occupants of the carriage would have been scorched had they stayed where they were?
A.—No; I don't think they would have been burnt.
29. *Q.*—Did you see the passengers jump from the carriage?
A.—I saw one only—the man.
30. *Q.*—How far was he from the place you pulled up the train?
A.—I can't say exactly. It was not far.
31. *Q.*—In what distance could you bring your train to a stand running 20 miles an hour?
A.—I have done it in the distance of three telegraph posts (about 300 yards).
32. *Q.*—Do you think the means of communication on your line between guard and driver are sufficient?
A.—I think they want improving. The communication cord is better than the brake only.
33. *Q.*—Who put the fire out?
A.—I did, whilst the guard was attending to the injured passengers.
34. *Q.*—Has your engine a spark-arrester?
A.—Yes, it has one of the ordinary pattern in use on the line.

35. *Q.*—Does it work satisfactorily?
A.—I think it does.
36. *Q.*—How many fires have you been aware of since you came on the line?
A.—I have had three or four myself.
37. *Q.*—Are fires more frequent since the hot weather set in?
A.—Yes, they certainly have been.
38. *Q.*—Do you think these fires take place from sparks from the funnel or cinders from the ash-pan?
A.—From the funnel cinders could not be thrown so high. On the Scinde, Punjab and Delhi Railway I have known a carriage set on fire from below, and Mr. Bocquet constructed his patent ash-pan to stop that.
39. *Q.*—How much water did you use in putting the fire out?
A.—About four buckets-full.

3RD WITNESS.

Bhowannie, Native Brakesman, was called:
40. *Q.*—Were you present when the train caught fire on the 23rd May?
A.—Yes, I was there.
41. *Q.*—Describe what took place?
A.—I was on the look-out, sometimes on one side, sometimes on other side of the train. Looking out on the west side, I observed smoke coming out of a carriage and made signal to stop.
42. *Q.*—Did the passengers in the carriage seem conscious at the time that it was on fire?
A.—No, not at all then. There was no calling out, no noise, and no signals made.
43. *Q.*—When did they seem aware of the fact of the fire?
A.—Not till the train had slackened speed.
44. *Q.*—Did you see the passengers jump from the train?
A.—I saw one man only: he was not injured.
45. *Q.*—How far was the spot you saw him jump from the spot the train came to a stand?
A.—The engine was going very slowly, but I do not think it came to a stand for some 300 paces after that.

4TH WITNESS.

Mr. Thomas, Locomotive Superintendent, called:
46. *Q.*—Have you a drawing of the spark-arresters in use on your line?
A.—No, I have not. It is a basket spark-arrester similar to those in use on the Scinde, Punjab and Delhi Railway. The engines came from England with these spark-arresters fitted.
47. *Q.*—Do you think they are efficient?
A.—Quite as efficient as any I have seen.
48. *Q.*—How often are they examined?
A.—Every day by the Foreman; but on account of fires getting more prevalent, I carefully examined the spark-arresters of all the passenger engines myself a few weeks back. I found no aperture larger than the top of my little finger.
49. *Q.*—Do you think the quicker running has led to an increase of fires?
A.—It may have, but I cannot say I have positively observed that it did so.

5TH WITNESS.

Mr. Bruff, Executive Engineer in charge of Open Line, called:
50. *Q.*—Do you think the quicker running has increased the number of fires?
A.—Yes; last year only one fire was reported. We were then running 10 miles an hour, but we had only one up and one down train a day.
51. *Q.*—Do you think a cord communication between guard and driver is necessary?
A.—No; I think the brake signal is sufficient.
52. *Q.*—Can you say if it has been found sufficient on the Rajputana line?
A.—It was found sufficient there, and I do not think any circumstances exist on this line to render it more necessary here than there. On the passenger train of 16 vehicles there are two brake-vans.

C. POLLARD, *Col., R. E.*,
Consulting Engineer.

APPENDIX B.

Musamat Ismat Bibi, aged 25 years, daughter of Abdoolla, native of Bhera in the Shahpur District, says that she booked herself from Wazirabad station for Lahore, in company with her three children, her uncle, and her younger sister. After the train left the Goojranwalla Station the roof of the carriage caught fire, on which she, along with the other passengers, made a loud outcry in order to attract the attention of the people: but no notice was taken of their cry. The fire gradually began to spread and the carriage was full of smoke, and on account of excessive heat and the rapid increase of fire passengers began to get out of the carriage. She also with her little child in her lap tried to alight, but unfortunately missed the steps and fell down. Afterwards she became insensible till she was brought into the hospital.

LAHORE,
The 27th May 1876.

RAM KISHEN,
Resident House Surgeon,
Mayo Hospital.

The above statement was read to the woman in our presence and was approved by her.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20TH JULY 1876.

GENERAL REMARKS.—In Madras little or no rain has fallen in Madura and Tanjore: prospects in Madura and Kurnool are reported to be still unfavourable. In Mysore slight rain has fallen throughout the province, but not sufficient for the growing crops. In Sind the river has risen and anxiety is removed: general rain has also fallen. In most districts of Bombay the fall has been good and sufficient, but more rain is much wanted in Khandesh, Ahmednagar, Sholapur, Kaládgi and Belgaum. In the Central Provinces general and abundant rain has fallen and prospects are good. Good rain is reported from Berar. In Central India the falls have also been copious, and good rain is reported from all parts of Rajputana except Marwar. In Bengal seasonable rain has fallen, and cultivation is everywhere going on briskly except in Behar, where the supply is still insufficient. In the North-Western Provinces the rains are general, though hardly sufficient in the Allahabad district. In Oudh the fall has been scanty, and more is urgently required. There has been a good fall all over the Punjab, and prospects are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 20th)	·47 at Masulipatam.	Rain good throughout district; 3 feet water over anicut; cultivation prospects fair; prices steady; cholera abating, seizures 456, deaths 192, in 10 taluks, otherwise healthy; cattle healthy; pasture improving; market well supplied locally.
Kurnool („ 19th)	·5 at Nandikotkur.	Season rather unfavourable; rain very slight in other taluks; crops not sown for want of rain; pasture very scanty; markets well supplied; prices rising in Ramalkota and Koilkuntla taluks; stationary in others; fever prevalent; cholera all over the district, seizures 673, deaths 293, severe in Koilkuntla taluk; 1·2 feet water over Sinkesala anicut in Tumbudra.
Tanjore („ 20th)	...	A drizzle at Negapatam and elsewhere; freshes in rivers decreasing; supply to tanks none; water over upper anicut, North branch, 1 foot 2 inches, South, 2 feet 2 inches; cultivation inferior; paddy in some places; standing crops not thriving in some parts for want of rain; no harvest; pasture insufficient; markets well supplied; prices slightly rising; public health, cholera increasing, seizures 481, deaths 424 in 7 taluks; fever and small-pox in some localities; cattle disease in 2 taluks, some loss.
Madura („ 19th)	*Nil*	Weather hot and occasionally cloudy; agricultural prospects getting poorer; wells running dry; prices rising; cholera, seizures 89, deaths 53, mostly in Shevagenga and Ramnad zemindaries.
Malabar („ 20th)	7·04	Cultivation, both first crop and *modan* good; grain supply sufficient, but prices rising; cholera in Walluvanad, Ernad, Palghaut, Ponany, Calicut and Kottagour, 248 deaths; fever slight; cattle healthy; pasture flourishing.
		General Remarks.—General prospects still uncertain; in Madura and Kurnool still unfavourable.
Bombay— (July 20th)		
Sind.—(July 19th)		
Kurrachee ...	2·0 at Sehwan and Kurrachee, 1·14 at Tatta.	River at Kotri, gauge on 17th, 14 feet 11 inches, last year 14 feet 5 inches; cheerful accounts from the districts owing to its rise; Gáj came down in flood on 6th, covering 500 acres; locusts appeared in Jati on 6th, no damage.
Shikárpur ...	...	River rising steadily; canals well supplied; heavy clouds about; weather cooler.
Hyderabad ...	1·05	Thirty-one fresh cases of small-pox, one death; 79 cases from commencement, 5 deaths; river continues rising; heavy rain on evening of 18th, fall continued on 19th; locusts seen in Kandiaro taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Upper Sind Frontier ...	0·79 on 18th.	Weather sultry; sowing of *kharif* continues; water abundant; health fair.
Guzerat.		
Ahmedabad ...	4·26	Total rainfall 5·61; agricultural operations going on; cholera in city, 10 cases, 7 deaths.
Kaira ...	7·28 at Kaira.	Good rain throughout Collectorate; cholera cases 33, deaths 19; sowing progressing favourably.
Surat ...	8·44	Total rainfall 15·89; 4 fatal cholera cases in Mándvi.
Broach ...	4·65	Total rainfall 9·57; crops good; cholera continues at Jambusar, Hánsot and Ankleswar.
Khandesh and Násik.		
Khandesh ...	0·38 at Dhulia.	Total rainfall 7·78; more rain is immediately wanted throughout the district.
Násik ...	3·42	Total rainfall 9·30; fall of rain general; sowing progressing; slight cholera in Niphád taluka.
Konkan.		
Tanna ...	13·96	Total rainfall 43·68; 3 deaths from cholera at Tárápur in Máhim taluka; small-pox continues in 3 talukas; transplantation of rice crops progressing.
Deccan.		
Poona ...	2·11	Total rainfall 8·73; sowing of *kharif* progressing; slight cattle disease in 3, and cholera in 5 talukas.
Ahmednagar ...	0·08	Total rainfall 4·57; more rain much wanted; *kharif* sowing going on; cholera in 3 talukas, 55 cases, 12 deaths.
Sholapur ...	0·78	Total rainfall 3·75; more rain wanted; cholera in all talukas.
Satara ...	3·30	Total rainfall 15·01; fall of rain general; sowing nearly completed; 175 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	3·17	Total rainfall 13·79; fall of rain still insufficient in most talukas; cholera in town.
Dharwar ...	1·41	Total rainfall 8·91; rain wanted in eastern and southern talukas; rice crops have slightly improved; cholera in 3 villages of Kod, and in 1 of Ron taluka.
Kanara ...	15·56 in Karwar.	Total rainfall 61·50.
Kaládgi ...	...	Sowing retarded for want of rain; 156 deaths from cholera.
Kattywar.		
Rájkot ...	3·30	Total rainfall 5·83; weather cloudy; cholera decreasing.
Wadhwán ...	3·60	Total rainfall 6·43; sowing continues, where completed, crops doing well; cholera in Jhalawad, 22 cases, 21 fatal.
		General Remarks.—Rain general in Sind, and seasonable fall in Guzerat, the Konkan and parts of the Deccan; more wanted in Khandesh, Ahmednagar, Sholapur, Kaládgi and Belgaum; cholera decreasing, but has appeared in Násik districts; small-pox appears to be spreading in Hyderabad.
Bengal— (July 20th)		
Chittagong ...	6·44	
Noakholly ...	6·0	
Chittagong Hill Tracts...	7·01	
Hill Tipperah ...	1·82	
Backergunge ...	4·41	Cattle disease present in eleven thanas.
Furreedpore ...	·71	General health good.
Dacca ...	3·22	
Tipperah ...	Return not received.	
Mymensingh ...	·83	
24-Pergunnahs ...	7·21	Fever in Barripore and neighbourhood; general health good.
Jessore ...	1·28	
Nuddea ...	·42	
Moorshedabad ...	2·01	
Pubna ...	·95	General health not bad.
Rajshahye ...	3·3	
Bogra ...	·51	
Malda ...	1·36	
Dinagepore ...	1·04	Seven cases of small-pox.
Rungpore ...	·25	
Cooch Behar ...	1·27	Cholera disappearing; general health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jalpáiguri ...	1·62	
Darjeeling ...	10·83	
Midnapore ...	4·24	
Howrah ...	1·94	
Hooghly ...	2·05	Public health good.
Burdwan ...	1·71	
Bankoora ...	7·85	
Beerbhoom ...	6·28	
Sonthal Pergunnahs ...	3·05	
Bhágalpur ...	·59	General health very good.
Monghyr ...	1·15 (In previous week ·68).	
Purneah ...	·84	
Durbhunga ...	·21	
Mozufferpore ...	·83	Public health good.
Sarun ...	·46	Cholera still prevalent; declining in Gopálganj.
Chumparun ...	*Nil*	
Patna ...	·52	Sporadic cases of cholera throughout the district.
Gya ...	1·59	Fever prevalent; cholera abated.
Shahabad ...	·71	
Hazáribágh ...	·38	A good deal of cholera in the interior.
Lohardugga ...	2·32	Cholera increasing in Palamow; small-pox still prevalent there.
Manbhoom ...	6·49	Cholera abating; public health much improved.
Singhbhoom ...	2·26	
Balasore ...	4·55	Deaths from cholera have increased and range from 500 to 700 per week.
Cuttack ...	3·40	Cholera and other diseases prevalent in many parts.
Pooree ...	·64	Cholera bad in several places; cattle disease in Serai Pergunnahs.
		General Remarks.—There has been seasonable rain in almost every part of Bengal, except Behar, where the supply is still insufficient. Cultivation is going on briskly, and the crops are generally flourishing. In Palamow and the low lands of Midnapore the state of the crops is not good. *Aous dhan* is looking well; in certain districts it is being harvested. The transplantation of *amun* seedlings is progressing rapidly; the sowing of the *bhadoi* crops is going on in Durbhunga, Sarun and Bhágalpur. Indigo manufacture fairly progresses in Nuddea, Jessore and Moorshedabad. Sugarcane, jute, indigo and other minor crops are generally doing well.
N. W. P.—		
Benares (July 19th)	Daily rainfall from 4· to 4·5	Season now very favourable.
Allahabad („ „)	...	Rainfall intermittent and hardly sufficient; ploughing and sowing commenced.
Agra („ 20th)	...	Good rain during week in almost all parts of district; ploughing and sowing general; cotton suffered from rains holding off so long.
Meerut („ 19th)	Slight rain	Ploughing commenced.
Bareilly („ „)	2·2	Sowing of rice, *bajra* and *jowar* commenced.
Almora („ 18th)	...	Rains general all over the district.
Jhansie („ 21st)	1·7	Sowings continue.
Punjab— (July 19th)		
Delhi ...	·9	Health good.
Hissár ...	2·0	Crops progressing favourably; health good.
Umballa ...	1·2	Sowing commenced; health good.
Jullundur ...	8·5	Crops progressing; health good.
Lahore ...	4·9	Health and crops good; excessive rain has caused much damage to house property in city.
Mooltan ...	Slight rain	Prospects of harvest good; health fair.
Dera Ismail Khan ...	Showers.	Harvest good; 17 cases of cholera, 8 fatal.
Rawálpindi ...	·6	Prospects of harvest good; 3 cases of cholera in Murree, 2 fatal.
Pesháwar ...	1·2	*Rabi* harvested; *kharif* ploughings in progress; health good.
		General Remarks.—Rainfall all over the province; agricultural prospects good; public health on the whole fair.
Oudh— (July 20th)		
Lucknow ...	·5	More rain urgently required; public health generally good.
Sitapur ...	1·4	
Fyzabad ...	Slight rain.	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (July 15th)	4·71	Weather cloudy and rainy; sowings continue; health good; prices stationary.
Sambalpur („ „)	1·96	Early rice coming up well; cholera lingering.
Bilaspur ...	3·83	Sowings continue; fever prevalent; prices unchanged.
Raipur ...	2·0	Weather cloudy; sowings completed; health good; prices stationary.
Bálághát ...	6·20	Rain opportune; prospects good; no epidemic; prices rising.
Chanda (July 16th)	4·79	Weather cloudy; rain opportune; *kharif* sowings commenced; slight cholera.
Chhindwara („ „)	3·39	Cloudy; *jowar* coming up well; health good; prices steady.
Betúl („ 17th)	2·28	Sowings continue; cholera decreasing; prices stationary.
Bhandara („ 18th)	5·91	Rain opportune; transplanting of rice commenced; fever and small-pox continue; 20 cases of cholera; prices easy.
Nágpur („ 19th)	4·70	Rain opportune; sowings resumed; prices falling.
Wardha ...	3·88	Sowings continue; cholera has broken out at Kachangaum.
Nimár ...	1·8	Cholera and small-pox abating.
Hoshangabad ...	5·4	Sowings progressing; cholera decreasing.
Narsinghpur ...	2·0	Sowings nearly completed; cholera decreasing.
Jubbulpore ...	1·75	Sowings progressing; cholera, small-pox, and cattle disease continue.
Saugor ...	1·91	Sowings continue; cholera increasing; prices rising.
Seoni ...	4·20	Cholera continues; prices rising.
Mandla ...	4·45	Prospects good; 7 deaths from cholera; prices stationary.
Damoh ...	1·40	Prospects good; no epidemic; prices stationary.
		General Remarks.—Opportune rain has fallen during the week; cholera seems dying out in Betúl, Hoshangabad, and Narsinghpur, but is still prevalent in Jubbulpore, and seems increasing in Saugor.
British Burma—		No report received.
Assam		
Gauhati (July 20th)	3·05	Weather hot and sultry; slight showers daily; prospects of rice crops and tea good; public health good.
Sylhet („ „)	4·84	Prospects good.
Hyderabad Assigned Districts.—		
Amráoti (July 20th)	1·88	*Jowari* sowing completed; choleraic diarrhœa increasing in Ellichpur cantonment and city.
Mysore and Coorg—		
(July 20th)	·37 in Bangalore Cantonment. 12·50 in Coorg.	Slight rain fallen throughout the province, but insufficient generally for the growing dry crops; cholera has increased in Mysore and Hassan districts, decreased elsewhere.
Central India—(July 19th)		
Indore ...	3·11	Agricultural prospects good; cholera in Rewah and Myhere.
Gwalior ...	8·31	
Neemuch ...	5·65	
Rutlam ...	7·81	
Sutna ...	5·12	
Rajputana—		
Abu (July 20th)	8·66	Weather foggy; drizzling; thermometer 70°.
Serohi („ 16th)	1·50	Tanks full; wells filling; health very good; ploughing and sowing in full swing.
Marwar („ 15th)	·20	Water scarcely procurable; wells almost dry; health good; partial young crops good; rainfall in some parts, but very little at Jodhpore, where rain is much required.
Meywar („ 14th)	4·02	Tanks and wells well supplied; prospects of crops and health good; cloudy sky.
Harowtee („ 15th)	...	Health and prospects good.
Deolee ...	4·20	
Tonk ...	3·90	
Kota ...	2·60	
Ajmere (July 20th)	1·90	Showers general; health good.
Jeypore ...	2·75	Sowings progressing favourably; health good.
Bhurtpore ...	1·20	Sky overcast; wind easterly; agricultural operations general; prices steady; health good.
Ulwur (July 19th)	1·50	Rain general; field operations active; health good.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

CHRONOLOGICAL TABLE OF BENGAL REGULATIONS AND ACTS.

*** With respect to entries in the fourth column the practice has been as follows:—

(*a*).—Where an Act has been partially repealed and afterwards wholly repealed, the total repeal only is entered. A repeal of the unrepealed portions of an Act is treated as a total repeal.

(*b*).—Partial repeals covered by later partial repeals are omitted.

(*c*).—Where an Act has been locally repealed and afterwards repealed by an Act whose operation is unrestricted, the later repealing Act has alone been entered.

(*d*).—Local repeals covered by later local repeals are omitted.]

PART I.—REGULATIONS.

s In the interior the prices range as follow:—Wheat 12-8 to 32 seers, rice best sort 14 to 15 seers, rice common 18 to 19 seers, lesser millets 50 seers, and gram 11 to 22-8 seers.

t In the interior the prices range as follow:—Wheat 30 seers, rice best sort 11 seers, rice common 23-12 seers, and gram 36 seers.

u In the interior the prices range as follow:—Wheat 8 to 10 seers, barley 12 seers, rice best sort 5-8 to 13 seers, rice common 8 to 18 seers, lesser millets 14 seers, maize 15 to 32 seers, and gram 11 to 16 seers.

v In the interior the prices range as follow:—Wheat 10 to 13-8 seers, rice best sort 10 to 16 seers, rice common 12 to 18 seers, and gram 10 to 16 seers.

w In the interior the prices range as follow:—Wheat 20 seers, barley 45 seers, rice best sort 16 seers, rice common 17 to 20 seers, and gram 22 seers.

x In the interior the prices range as follow:—Wheat 25 seers, barley 40 seers, rice best sort 8 to 19 seers, rice common 19 to 25 seers, and gram 16 to 25 seers.

y In the interior the prices range as follow:—Wheat 13 to 30 seers, rice best sort 12 to 18 seers, rice common 17-4 to 25 seers, and gram 9-8 to 23 seers.

z In the interior the prices range as follow:—Rice best sort 12 to 14 seers, and rice common 15 to 16 seers.

a In the interior the prices range as follow:—Rice best sort 12-8 to 16 seers, and rice common 17 to 21 seers.

b In the interior the prices range as follow:—Wheat 22-8 to 25 seers, barley 30 to 35 seers, rice best sort 12 seers, rice common 18-12 to 24 seers, lesser millets 40 seers, maize 30 seers, and gram 27-8 to 28-12 seers.

c In the interior the prices range as follow:—Wheat 23 to 26 seers, barley 30 to 40 seers, rice best sort 13 to 14 seers, rice common 20-8 to 24 seers, bulrush millets 36 seers, great millet 28 seers, maize 27 seers, and gram 30 to 37 seers.

d In the interior the prices range as follow:—Wheat 20 to 26 seers, barley 22-4 to 45 seers, rice best sort 11 to 21-8 seers, rice common 16 to 22-8 seers, lesser millets 21 to 45-8 seers, maize 29-12 to 40 seers, and gram 29-12 to 36 seers.

e In the interior the prices range as follow:—Wheat 20 to 27-8 seers, barley 35 to 40 seers, rice best sort 13 to 17 seers, rice common 18 to 25 seers, lesser millets 32 to 39 seers, maize 36 to 43 seers, and gram 31 to 38 seers.

f In the interior the prices range as follow:—Wheat 21 to 23-8 seers, barley 26 to 35 seers, rice best sort 19 to 19-4 seers, rice common 20 to 22 seers, murwa 26 seers, maize 33 seers, and gram 35 to 36 seers.

g In the interior the prices range as follow:—Wheat 24 to 25 seers, rice best sort 16 to 18 seers, rice common 18 seers, and gram 27 to 28 seers.

h In the interior the prices range as follow:—Wheat 20 to 30 seers, rice best sort 20 to 24-8 seers, rice common 23 to 25-8 seers, lesser millets 40 to 50 seers, maize 36 to 40 seers, and gram 24 to 36 seers.

i In the interior the prices range as follow:—Wheat 20 to 21 seers, barley 28 seers, rice best sort 12 seers, rice common 22 to 23 seers, lesser millets 35 seers, maize 32 to 34 seers, gram 20 to 22 seers.

j In the interior the prices range as follow:—Wheat 20 seers, rice best sort 18 seers, rice common 19 seers, and gram 24 seers.

Prices Current of Food-grains throughout India for the 2nd half of June 1876 —continued.

G. A. SEARLE, *Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

The 7th July 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27TH JULY 1876.

GENERAL REMARKS.—In Madras rain has fallen in all districts, but the season is reported unfavourable in Kurnool. In Mysore slight rain has fallen all over the province, but not enough for the growing crops. In Sind there has been a considerable quantity of rain: the river is high, and some damage has been done by floods in Shikárpur. In the Bombay Presidency the fall has been general; in Khandesh, Dharwar, Ahmednagar, Sholapur and Kaládgi more is required: elsewhere prospects are good. There has been abundant rain in almost all districts of the Central Provinces, and sufficient in Berar. The fall has also been good throughout Central India and Rajputana. In Bengal seasonable rain has fallen everywhere: the *aous* rice crop is being cut with a good yield, and the *amun* is being transplanted. In Behar the winter rice is backward from the late period at which the rains set in. The rains are general throughout the North-Western Provinces, and prospects are good. In Oudh more rain is still wanted in some parts. Rain has fallen throughout the Punjab, though not in much quantity at Dera Ismail Khan, Lahore, Jullundur and Peshâwar; prospects are good. Reports from Assam and Burma are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (July 27th)	1·07 at Masulipatam.	Rain generally good throughout the district; 10·5 feet water over anicut; cultivation prospects remain fair; prices risen in Repalli, fluctuating in Palnad and Narsarowpeta, steady elsewhere; cholera abating, attacks 405, deaths 177 in 10 taluks, otherwise healthy; cattle generally healthy; pasture improving; markets well supplied locally.
Kurnool („ 26th)	Over 1·0 in Kurnool town.	Season unfavourable; rain very slight in Ramalkota and Nandikotkur taluks, none elsewhere; pasture scanty; dry fodder procurable; water sufficient; markets moderately supplied; prices rising in Ramalkota and Cumbum, stationary in other taluks; fever prevalent; cholera nearly all over the district, seizures 66, deaths 30; 2·8 feet of water over Sunkesala anicut in Tumbudra.
Tanjore („ 27th)	·35 at Negapatam.	Rain elsewhere partial and scanty; freshes in rivers nearly full; supply to tanks none; water over lower anicut, north branch, 2 feet 5 inches, south, 2 feet 6 inches; cultivation, paddy and few dry crops in some places; standing crops not thriving in some parts for want of rain; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 466, deaths 374; cattle-disease in some taluks.
Madura („ 26th)	2·2 . at Melur.	Slight rain at Madura and in some other parts; weather cloudy with strong winds blowing from the west; standing crops generally poor; scarcity of water continues; prices still rising; cholera, seizures 145, deaths 65, mostly in Ramnad zemindari.
Malabar („ 27th)	9·24	Rain favourable; cultivation of first crop and *modan* good; operations for second crop commenced; grain supply sufficient; prices rising; cholera in Walluvanad, Ernad, Ponany, Palghaut, Calicut and Kotéyom, 325 cases, 284 deaths; cattle healthy; pasture flourishing. *General Remarks.*—General prospects improved on west coast; elsewhere unchanged.
Bombay— (July 27th)		
Sind.—(July 26th)		
Kurrachee ...	4·50 at Kurrachee. 3·82 at Tatta.	River at Kotri, gauge on 24th, 16 feet 6 inches, last year 15 feet 6½ inches; rice plants in 3 talukas have suffered from previous want of water.
Shikárpur ...	3·0 at Shikárpur.	River on 25th, 15 feet 1 inch, 5 inches higher than on the same date last year; town of Ghotki three parts washed away by floods, much cotton in Rohri division destroyed; crops in other parts looking well; fever and cough prevalent in 5 talukas.
Hyderabad ...	...	River 16 feet 8 inches on 25th, last year 15 feet 8 inches; rain fell everywhere between 17th and 21st; small-pox still in town, 12 fresh cases.
Upper Sind Frontier ...	3·12	Flood water through Kashmor Begari *band* reached the Sonewah; from Begari it is expected to cross the Jacobabad-Shikarpur road at Sultan-ke-gate.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	2·59	Total rainfall 8·20; agricultural operations progressing; cholera in city, 43 cases, 24 deaths.
Kaira ...	1·54	Agricultural prospects good; 13 cholera cases, 9 deaths.
Surat ...	2·19	Total rainfall 18·08; one fatal cholera case in Mándvi.
Broach ...	0·50	Total rainfall 10·07; crops good; cholera abating.
Khandesh and Násik.		
Khandesh ...	0·99 at Dhulia.	Total rainfall 8·77; more rain wanted; *bajri* sowing commenced; cotton crop withering; cattle disease at Pimpalner.
Násik ...	1·10	Total rainfall 10·40; rain general; cholera in Niphád taluka, and a few cases in Igatpuri and Násik.
Konkan.		
Tanna ...	6·20	Total rainfall 49·88; cholera of a severe type in Kalyan, town of Tanna and adjacent villages; small-pox continues in 3 talukas; transplantation of rice crops progressing.
Deccan.		
Poona ...	1·75	Total rainfall 10·44; sowing of *kharif* in progress; slight cattle disease in 2, and cholera in 5 talukas.
Ahmednagar ...	0·95	Total rainfall 5·52; more rain wanted for sowing purposes; cholera in 4 talukas, 90 cases, 44 deaths.
Sholapur ...	0·7	Total rainfall 3·82; about 125 deaths from cholera; throughout the district rain much desired; cattle disease in Karmála and Sángola.
Satara ...	5·77	Total rainfall 20·78; sowing of *kharif* completed; 127 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	8·12	Total rainfall 21·91; sowing in full progress; cholera decreasing.
Dharwar ...	6·08	Total rainfall 14·99; rice crops good; sowing of early *jowari* in progress; rain wanted in Eastern and Southern talukas; cholera decreasing.
Kanara ...	6·0 at Karwar.	Total rainfall 67·50.
Kaládgi ...	...	*Kharif* partially sown now withering for want of rain; 121 deaths from cholera.
Kattywar.		
Rájkot ...	0·92	Total rainfall 6·75; sowing operations in progress.
Wadhwán ...	0·12	Total rainfall 6·85; crops healthy; cholera in Jhalawad, 18 cases, 16 fatal.
		General Remarks.—Cholera increasing in Satara, Poona, Ahmednagar, Tanna, Násik and City of Ahmedabad; decreasing elsewhere; floods in Shikárpur Collectorate have done some damage; more rain wanted in Dharwar, Sholapur and Khandesh; general prospects elsewhere favourable.
Bengal— (July 27th)		
Chittagong ...	5·83	Cholera in the south of the district.
Noakholly ...	15·03	
Chittagong Hill Tracts...	3·03	
Hill Tipperah ...	1·47	
Backergunge ...	6·43	Cattle disease still in Mehdiganj, Golachipa and Gulshakhali.
Furreedpore ...	3·13	General health good.
Dacca ...	1·22	
Tipperah ...	3·19 (In previous week 3·92)	Public health good.
Mymensingh ...	2·7	
24-Pergunnahs ...	2·44	Fever still in Barripore; public health generally good.
Jessore ...	6·12	
Nuddea ...	3·58	
Moorshedabad ...	2·82	
Pubna ...	6·0	Three cases of small-pox in Gopalpur; general health good.
Rajshahye ...	1·67	
Bogra ...	3·55	
Malda ...	2·89	Two cases of small-pox.
Dinagepore ...	2·65	Some cases of cholera, probably dysentery.
Rungpore ...	3·15	
Cooch Behar ...	1·71	Cholera in Mekhaliganj.
Jalpáiguri ...	6·52	
Darjeeling ...	4·41	
Midnapore ...	·87	

In the Supplement to the *Gazette of India* of the 22nd instant, page 779, in the rainfall column, opposite Kurrachee *for* "1·0 at Sehwan and Kurrachee" *read* "·82" &c.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Howrah ...	3·34	
Hooghly ...	·38	Public health normal.
Burdwan ...	1·41	Cholera in Montessur.
Bankoora ...	1·14	
Beerbhoom ...	5·46	
Sonthal Pergunnahs ...	3·16	
Bhágalpur ...	1·05	
Monghyr ...	Return not received.	
Purneah ...	5·48	General health much improved.
Durbhunga ...	1·74	
Mozufferpore ...	·71	
Sarun ...	·75	Cholera still prevalent, but fatal results do not appear to be frequent.
Chumparun ...	·32	
Patna ...	1·01	Cholera still prevalent, especially in Behar sub-division.
Gya ...	5·06	Fever and cholera still prevalent, especially in Aurungabad.
Shahabad ...	1·14	
Hazáribágh ...	3·93	Public health bad; cholera prevailing more or less intensely over the greater part of the district.
Lohardugga ...	6·45	Cholera and small-pox still in Palamow, but decreasing; an outbreak of cholera in Ranchi; now much abated.
Manbhoom ...	2·94	A few isolated cases of cholera; general health much improved.
Singhbhoom ...	8·01	
Balasore ...	1·62	Deaths from cholera considerable, but decreasing.
Cuttack ...	2·96	Cholera still bad; public health otherwise improved.
Pooree ...	·76	Cholera continues bad in many parts.
		General Remarks.—There has been more or less rain in almost all the districts. The state and prospects of the crops in Bengal proper are generally good. *Aous* or early rice is being cut and the yield is good on the whole. The transplanting of *amun* or late rice is in progress on all sides except in certain parts of the Hooghly and Burdwan districts. Indigo has been somewhat injured by excessive rain in Nuddea and Jessore. The jute crop looks generally promising and is being harvested in Rajshahi, Rungpore and Bogra. In Behar the little rain that has fallen has done good to the *bhadoi* crops, but the winter rice is backward from the abnormal drought; the want of sufficient rain in that province, especially Chumparun, is complained of. Sugarcane, indigo and other minor crops are generally doing well.
N. W. P.—		
Benares (July 26th)	From 2·7 to 6·8	Season prosperous; river rose to 36½, but fell 1 foot last night.
Allahabad („ „)	About 2·5	Ploughing and sowing continue.
Jhansie („ 27th)	4·4	Fine weather much needed to complete sowings in black soil.
Agra („ 26th)	...	Moderate rain throughout the district; season favourable.
Meerut („ „)	...	Rain sufficient; ploughing active.
Bareilly („ „)	3·7	
Almora („ 25th)	...	No change since last report.
Punjab— (July 26th)		
Delhi ...	3·0	Prospects and health good.
Hissár ...	2·0	*Kharif* sowings still in progress; health good.
Umballa ...	3·4	Crops and health good.
Jullundur ...	·3	Crops flourishing; health good.
Lahore ...	·1	Crops good; health fair.
Mooltan ...	1·2	Prospects good; health fair.
Dera Ismail Khan ...	Showers	Some cholera, but health generally good; prospects good.
Rawálpindi ...	9·0	Much damage done by heavy rain; cholera at Murree, Rawalpindi, and other parts of the district.
Pesháwar ...	·9	Ploughing and sowing progressing; health good.
		General Remarks.—Harvest prospects good; health of the province on the whole fair.
Oudh— (July 26th)		
Lucknow ...	2·9	More rain still wanted in some parts; public health generally good.
Sitapur ...	1·7	
Fyzabad ...	1·3	
Central Provinces—		
Upper Godávari(July22nd)	2·96	Weather cloudy; sowings continue; 2 cholera cases; prices steady.
Bilaspur ...	7·87	Prospects of rice crops good; cotton slightly injured; fever continues; prices steady.

In the Supplement to the *Gazette of India* of the 22nd instant, page 781, in the rainfall column, opposite Jhansie *for* "1·7" *read* "7·0".

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Raipur ...	6·99	Prospects favourable; health good; prices easy.
Bálághát ...	13·10	Transplanting of rice commenced; health good; prices steady.
Chanda (July 23rd)	1·39	Weather cloudy; transplanting of rice commenced; cholera continues.
Chhindwara ...	3·72	Prospects good; no epidemic; prices steady.
Betúl („ 24th)	2·62	*Kharif* sowings completed; cholera continues; prices steady.
Bhandara („ 25th)	2·65	Transplantation of rice begins to be pushed on; cholera, fever, and small-pox continue; prices easy.
Nágpur („ 26th)	6·71	Weather cloudy; sowings continue; prices steady.
Wardha ...	4·53	Sowings completed; no cholera.
Nimár ...	1·53	Cholera and small-pox decreasing.
Hoshangabad (July 26th)	4·10	Cholera disappearing; prices stationary.
Narsinghpur ...	5·0	Sowings completed; cholera decreasing.
Jubbulpore ...	9·57	Sowings progressing; cholera continues.
Saugor ...	10·22	Sowings stopped; cholera continues.
Seoni ...	2·62	Sowings continue; 22 cholera cases.
Damoh (July 26th)	16·90	Prospects of rice good, other crops injured; 2 cases of cholera; cattle disease prevalent; prices stationary.
Mandla ...	·80	Prospects good; 5 deaths from cholera; prices stationary.
		General Remarks.—During the week, the rainfall has been plentiful except in the districts of Chanda, Bhandara, Seoni and Mandla. In Jubbulpore and Saugor, cholera is still prevalent. Prices are easy.
British Burma— (July 27th)		
Arrakan Division ...	17·0 in Akyab.	Outbreak of choleraic diarrhœa in Kyoukphyoo, 24 deaths in town and 14 in suburbs; 11 deaths from cholera in Myonhoung in Akyab district; otherwise public health good; cattle disease continues in two townships of the Akyab district; rainfall seasonable; paddy sowing progressing favourably everywhere.
Pegu Division.		
Rangoon	5·28	Prospects generally good; health good; cattle disease severe.
Syriam	...	(Report not received.)
Bassein	...	Cattle disease in Ngapootaw, Payayhla and Kwinboukgyee; rain steady; health good; paddy seedlings healthy.
Henzada	2·50	Weather favourable; rain sufficient; crop prospects good; slight cattle disease in Kanoung; cholera still in Okpho; otherwise public health good; 5 cases of cholera in Pounday, 2 in Mahathaman; cultivation progressing.
Thayetmyo ...	3·35	Health good; ploughing commenced.
Thonkwa	...	Health and crops good; rainfall abundant; cattle disease continues throughout the district.
Tenasserim Division.		
Amherst ...	14·88	Health good; crops progressing.
Shwegyeen ...	8·3	Health good; fever at Kyouk Kajee; crops progressing.
Tounghoo ...	5·0 in Salween.	Health indifferent; crops progressing; cholera in Kolado and Phapoon townships.
Mergui ...	...	Health good.
Tavoy ...	...	
Assam—		
Gauhati (July 27th)	2·96	Sky overcast; weather rainy, alternating with clear hot days; *aus* almost reaped; transplanting of *salí* commenced; prospects of tea favourable; public health good.
Sylhet („ „)	3·76	Prospects continue good.
Hyderabad Assigned Districts—		
Amráoti (July 27th)	·99	Prospects good; during fortnight 166 cases of cholera in Wún district, 45 deaths.
Mysore and Coorg—		
(July 27th)	·17 in Bangalore Cantonment. 16·09 in Coorg.	Slight rain has fallen throughout Mysore but still very insufficient for the growing dry crops which in several districts are in a critical state; want of pasture for cattle seriously felt; public health generally good.
Central India—(July 26th)		
Indore ...	2·50	Health and agricultural prospects generally good; cholera still in Rewah and Myhere.
Gwalior ...	·75	
Neemuch ...	1·45	
Rutlam ...	1·56	
Sutna ...	4·94	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (July 27th)	5·77	Good rain with breaks now and then; thermometer 75°.
Serohi („ 23rd)	·60	Tanks full; wells filling; health and prospects of crops good.
Bikanir („ 15th)	·92	Total rainfall 2·2; health fair; sowing operations progressing.
Meywar („ 21st)	3·5	Tanks and wells well supplied; health and prospects of crops good; weather cool and pleasant.
Jhallawar („ 26th)	...	Rainfall 7·29 up to 21st instant; health good; prospects of crops fair.
Harowtee („ 15th)	...	Total rainfall in Shahpura 16·40; sowings nearly completed; weather seasonable; health good.
Shahpura ...	...	
Jeypore (July 27th)	1·8	
Bhurtpore ...	3·20	Prospects very good; health good.
Ulwur (July 26th)	1·61	Crops promising, except cotton.
Ajmere („ 27th)	...	Total rainfall 3·0; no change since last week.
Nepal— (July 18th)	4·7	State of agricultural prospects fair.

A. O. HUME,
Secretary to the Government of India.

IMPROVEMENT OF THE POSITION OF ROMAN CATHOLIC PRIESTS ATTACHED TO THE ARMY IN INDIA.

No. 5698.

Extract from the Proceedings of the Government of India, Military Department,—under date the 20th July 1876.

READ the following correspondence regarding the improvement of the position of Roman Catholic Priests attached to the army in India :—

Despatch in the Financial Department to the Secretary of State, No. 80, dated 3rd March 1876.

Reply from the Secretary of State, *Ecclesiastical*, No. 3, dated 27th April 1876.

RESOLUTION.—In accordance with the proposals made in the above Financial despatch, which have been accepted by Her Majesty's Government, the Right Hon'ble the Governor General in Council is pleased to sanction the following increase in the allowances now granted to the Roman Catholic priests ministering to the troops in India :—

All such priests, of whom there are at present 42 in the Bengal Presidency, 18 in Madras and 16 in Bombay, will receive a minimum allowance of Rs. 200 a month.

Within a limit of 13 priests in the Bengal Presidency, 6 in Madras and 5 in Bombay, any such priest who has ministered to the troops continuously for seven years will receive an allowance of Rs. 250 a month.

Within a limit of 11 priests in the Bengal Presidency, 5 in Madras and 4 in Bombay, any such priest who has ministered to the troops continuously for fifteen years will receive an allowance of Rs. 300 a month.

The Archbishop and Vicar Apostolic of Western Bengal, and the Bishops and Vicars Apostolic of Madras and Bombay, will be requested to furnish the Controllers of Military Accounts in their respective presidencies with a return of the Roman Catholic priests who may, within the above limits, be entitled to receive the higher allowances of Rs. 250 and Rs. 300 a month now sanctioned, and to keep those officers informed from time to time of the changes that may be necessary in this list.

These lists should be supported by a record of the continuous services of the priests for whom the increased allowances are claimed.

The horse allowance of Rs. 30 a month now specially granted at some stations will be given to all Roman Catholic priests attached to the army.

The allowances sanctioned in this Resolution will have effect from the 1st July 1876.

ORDER.—Ordered, that a copy of the above Resolution be forwarded for information and guidance to the Governments of Fort St. George and Bombay and others noted in the margin.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 27th July 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Honour the Lieutenant-Governor of the Panjáb.
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

OUDH LAND-REVENUE BILL.

His Honour THE LIEUTENANT-GOVERNOR presented the Report of the Select Committee on the Bill to consolidate and define the law relating to the settlement and collection of land-revenue in Oudh. He said that the Bill was originally introduced in 1872 by Sir John Strachey, in consultation with the Chief Commissioner, Sir George Couper, and the Judicial Commissioner, Mr. Currie, who had been intimately connected with the affairs of the Province from its annexation. The Bill was originally drawn on the lines of the Land-Revenue Act for the Panjáb, but intermediately the Bill for the North-Western Provinces was brought forward and the original Bill was considerably modified in accordance with the provisions approved for the North-Western Provinces Land-Revenue Act. Subsequently, the measure was submitted to all the officers of experience in Oudh, and had been minutely revised, and the recommendations of the local officers had been carefully considered by the Select Committee. He had only now to explain the amendments, or rather the more important amendments, which had been made in Committee. The Council were aware that the proprietary rights in the soil in Oudh were divided among, first, Taluqdárs and other proprietors, in direct relations with the Government; secondly, village communities holding wholly or partly in common, who were jointly responsible for the rents for which they were liable to their superiors; and thirdly, subordinate holders, who had no common fiscal liabilities, but were in possession of holdings for which they paid rent to their superiors. It was owing to the relations between those several classes that the present Bill differed in some of its provisions from the Bills which were approved and passed for the Panjáb and the North-Western Provinces; and the principal amendments which had been made by the Committee related mostly to the relations between those several classes. He would now go through those amendments.

Section 26, as it was originally drawn, allowed the Chief Commissioner to select with which of the two classes, having property in the same mahál, a settlement should be made. Instead of that, it was now provided that in taluqdárí mahals the settlement must be made with the Taluqdár. That was in conformity with the fact, as the settlement had actually been made in the

Province, and it was also in accordance with the status conferred upon the Taluqdárs by the Government under certain political engagements. Further, it was certainly for the advantage of the Government revenue that the settlement should be made with the Taluqdár, who had, generally, the larger interest in the property. By section 32, it had been made necessary that the sanction of the Governor General in Council should be obtained before any Taluqdár should be excluded from the settlement of his entire taluqá. That was also done in consideration of the peculiar status conferred upon the Taluqdárs under the political engagements previously referred to. It had been thought proper that with regard to so severe a measure as the entire exclusion of proprietors of what were frequently very large estates from settlements of this kind that the sanction of supreme authority should be first obtained. In practice it had been found that the Taluqdárs had had considerable difficulty in realizing their dues from village communities. Many of those village communities had been in antagonism with the Taluqdárs in former days, and they had not shown that readiness in paying their dues to the Taluqdár that might have been expected from them. It had, therefore, been thought necessary to make some provisions by which the Taluqdár, who was directly liable to the Government for the payment of the revenue, should have certain facilities for collecting his rents from those village communities.

Section 40, therefore, made the under-proprietors jointly and severally responsible for the payment of the dues determined by the Settlement Officer. That, it was believed, would not only be for the benefit of the Taluqdárs, but also for the benefit of all superior proprietors in direct relations with the Government. Section 159 enabled proprietors to apply to the Deputy Commissioner to realize arrears of rent due under a sub-settlement or lease as arrears of revenue. That amendment rested very much on the same reasons as those which he had given with regard to section 40. It had not been thought proper to give the Taluqdár himself the power of realizing his rent as arrears of revenue from the under-proprietors; but it had been considered necessary, when he was in extreme difficulties, owing to the recusancy of those under-proprietors, that he should be enabled to go to the Deputy Commissioner, who would assist him to realize his dues in the way described, thereby saving him great expense and much litigation. On the other hand, some of the amendments were in favour of the inferior classes having interest in the land. Section 135 empowered the Deputy Commissioner to make sales subject to incumbrances. In the present day, sales for arrears of revenue were not common, but, of course, that was the ultimate safeguard of a land-revenue, and it was necessary to contemplate such a possibility. But this amendment mitigated the severity of the original law and protected the subordinate holders whom he had already referred to as having an interest in the land, and, under certain circumstances, it maintained their right intact when the whole mahál was sold for arrears of revenue. Again section 158, which declared when a proprietor was to be deemed a tenant with a right of occupancy, differed from the Panjáb Law. That amendment was also in favour of the old village proprietors, and he considered it a great improvement on the Panjáb Act.

Those, he thought, were all the principal amendments touching on the relations of the several classes having various rights in the soil; but an important innovation had been made in chapter V. According to the proviso which would be found in section 95, the imperfect partition of a joint estate could, under this law, be made with the consent of recorded co-sharers holding with the aggregate more than a moiety of the property. There had been some discussion as to the propriety of that proviso; but it was strongly supported, on practical grounds, by the whole of the Revenue Officers in Oudh, as well as by the Chief Commissioner and the Judicial Commissioner, and His Honour himself entirely approved of it. The theoretical objection to it was, that you ought not to maintain the joint fiscal liability of the co-sharers of a man who wished to get the sole management of his share; but, in practice, it had always been found that the people themselves were perfectly content with what was called 'imperfect partition'—that was to say, leaving the common fiscal liability

of the co-sharers in the mahál untouched and granting the individual holder the sole management of his land.

By section 174, persons whose property was under the superintendence of the Court of Wards were declared incompetent, without the sanction of the Court, to create charges upon such property. Such a restriction had been proved by experience to be absolutely necessary to the restoration of encumbered estates to a state of solvency.

There was, also, in section 14, an administrative change which was, he thought, an improvement on the original Panjáb Act. It left the specification of documents which were to compose the settlement record to the determination of the Chief Commissioner. He thought that this matter might well be left to the Chief Commissioner's discretion from time to time, and that its exclusion from the body of the Act was an improvement.

Under section 208, the Chief Commissioner was empowered to make rules for the appointment of patwárís; but he would explain that although this provision was put into the Bill, and it would certainly be much the best administrative measure, still there were some objections of the Taluqdárs which remained to be considered, and which his hon'ble friend Mr. Inglis who had most carefully watched over the Bill during its progress would now consult them about.

The Committee had ordered the republication of the Bill, and he believed it would be brought up again after two months time; but it had been so thoroughly considered by every body who was entitled to have a voice in the matter, including the Taluqdárs, that he hoped that the Bill, which had now been so long before the Council, would be passed at Simla during the present year.

His Honour had only to add that he had gladly availed himself of His Excellency the President's permission to take part in maturing the Bill, having been so long associated with all the classes concerned in Oudh, and retaining a lively interest in the prosperity of the Province.

His Excellency THE PRESIDENT remarked that the Government was very much obliged to His Honour for his assistance in placing the Bill in the shape in which it was now before the Council.

OUDH LAWS BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill to declare what laws are in force in Oudh.

He said that there was no motion before the Council, and he might present the Report without saying a word. But as three years had elapsed since the Bill was introduced, and no report had been made in the meantime, it would facilitate the final consideration of the Report, which he hoped would take place before they left Simla, if he stated now the principal operations that had been performed, and the existing frame of the Bill.

The reason why this matter had been so long delayed, was that it was closely connected with the Oudh Land-Revenue Bill now in the hands of his friend Sir Henry Davies, and it had been thought desirable to pass the two at the same time. And though no great amount of discussion had arisen on the Laws Bill, a great deal had arisen on the Land-Revenue Bill. That discussion had been carried on principally between the Local Government, its officers, and the Associations or leading individuals who represented the landed interest in Oudh. It was that circumstance which had prevented the Committee from reporting to the Council. Last year there were many meetings of the Committee, and much work was done upon both Bills; but it was found more convenient to send the results to the Local Government for local discussion than to bring them before the Council, and publish them in the usual way. They had now passed the Bills through Committee again, and had reached the stage in which republication was desirable; and he hoped it would prove to be the penultimate stage of this long business.

When he introduced the Laws Bill, he explained to the Council at considerable length what was the condition of the law which made such a Bill as this desirable. Considering the lapse of time and the great changes which had

taken place in the composition of the Council, it might be necessary for him, when they came to consider the Report, to recapitulate the heads of that explanation. But it was not necessary for the present purpose. He would now only remind the Council that the principal sources of law in Oudh were three:—

First, there were the enactments which, in their inception or by subsequent extension, were expressly applied to Oudh, either alone or as part of British India.

Secondly, there was the spirit of the Panjáb Civil Code corrected by Oudh customs; and the Panjáb Civil Code was itself the spirit of the Bengal Regulations corrected by Panjáb customs.

Thirdly, there was a quantity of executive orders, unknown and unascertainable except by judicial decision, which were supposed to have acquired the force of law by virtue of the Indian Councils Act of 1861.

The Bill was framed for the purpose of getting rid of the extreme uncertainty and obscurity which hung over the two latter sources of law, and of laying a solid foundation for Oudh law similar to that which was laid for Panjáb law by the Panjáb Laws Act.

The principles of the Bill were as follows: It took hold of the Bengal Regulations which were wanted in Oudh, and expressly extended them to Oudh with the modifications which experience had shown to be proper. All other Bengal Regulations it repealed. It embodied those executive orders which were meant to have the force of law; and all other orders which might be held to have acquired a legislative character under the Councils Act it repealed. Those repeals got rid of the shifting and uncertain elements which at any moment might be unexpectedly erected into law, or unexpectedly denied to be law. It set up personal laws and customs in such matters as marriage, inheritance and other domestic questions of families and communities. It also set up local customs and mercantile usages in all questions. And the most bulky, though not the most important, part of the Bill contained certain special provisions, of which some had grown up as law in Oudh by virtue of judicial decisions, some were taken from the Panjáb Civil Code, and a small portion were innovations supposed to be desirable to introduce.

Such was still the form of the Bill, but the part which contained the special laws had been considerably abbreviated, as might be seen by comparing the two drafts. And he had now to state what alterations the Committee had made and why.

In the Bill as introduced the special laws occupied the third part, and the first chapter of that part related to the subject of Minority. That was now omitted for the following reasons: So far as regarded European British subjects, the Legislature had provided for their case by the Act of 1874 passed since the introduction of this Bill. As regarded Natives, several questions were raised by them, which led the Committee to reconsider the expediency of making any express enactment on this subject. And they thought that the wants of the community would be fully provided for by Act XL of 1858, which related to non-Europeans, and by the family or local customs prevalent in Oudh. That course had been adopted in the Panjáb, and they had the authority of Sir H. Davies for saying that it was perfectly satisfactory. They had therefore given that turn to the Bill.

The next chapter related to the Court of Wards, and it had been found more convenient to transfer it to the Land-Revenue Bill, because the Revenue procedure was properly applicable to that Court. It had accordingly disappeared from the Laws Bill.

The next chapter related to betrothals of Hindús and Muhammadans, and he might apply to it very nearly the same observations which he had made on the Minority chapter, except that there was no enactment relating to the subject, and that the law would rest entirely on custom.

In that which was originally the fifth chapter and was now the second, the chapter which related to pre-emption, the principal alteration was that the Committee had applied the right of pre-emption to foreclosures of mortgages

as well as sales. Here again they had followed the Panjáb precedent. The Council must not disguise from themselves that this was a considerable extension of the custom of pre-emption; a custom to which many experienced officers objected, as one peculiar to the Muhammadans, and not known to the Hindús till introduced to them by our Government, and as interfering with the lawful transactions of mankind. On the other hand, it was said, that however introduced, the privilege was much valued, and that it beneficially retarded the disintegration of the village communities. That those communities had been held together by external pressure, and that they must dissolve under the influences of prolonged peace, equal laws, fixed revenue assessments, and increasing value of land, seemed certain. But when any social change, however inevitable, took place with great rapidity, it was both a painful thing and a dangerous one; and the practice of pre-emption appeared to supply a welcome and a healthy check to the too rapid progress of disintegration. The Hindú societies appeared to feel the relief afforded by it, and the Taluqdárs' Association told them that the privilege was beneficial to the Hindús. The Oudh authorities concurred with those of the Panjáb in recommending an extension of the principle, and the Committee had followed that advice.

Another portion of the original Bill which had disappeared was a part of the fifth chapter relating to the subject of partition of estates. But it had only been transferred to the Land-Revenue Bill for the same reasons which applied to the Court of Wards.

A portion of chapter VI of the original Bill consisted of provisions for insolvency. The principal reason why they were inserted was that the Panjáb Laws Act contained such provisions. But they appeared to be little used in the Panjáb, and, when used, to be little esteemed. Nor was it easy to see why there should be a special law on this subject for such a province as Oudh. The subject was one which was being dealt with in the new edition of the Civil Procedure Code, which was now before the Council, and on which the Committee hoped to present a Report before they left Simla. It would be better to include Oudh in the general law, and therefore this subject was struck out of the category of special laws for that province.

Another portion of Part III of the original Bill related to cases where a person died intestate leaving moveable property which was unclaimed. The Committee found that those cases were sufficiently provided for by a section of the Police Act of 1861, which extended to Oudh, and they therefore struck out the provision from this Bill.

Another portion of the same Part related to juries in civil cases in Lucknow. That practice rested on the authority of a letter from the Foreign Department, written prior to the Councils Act of 1861, and it was quite peculiar to the city of Lucknow. Fault was found with it by the Jalsa-i-Tahzíb, one of the Native Associations. The Chief Commissioner had stated that it was very rarely put in force, and that there was no reason why Lucknow should differ in this respect from all the rest of India. The Committee had therefore omitted it from the special laws of Oudh.

Chapter VIII of the Bill as introduced related to hidden treasure. That, however, was a subject on which it was intended to pass a general measure. Indeed, a notice to that effect was in the list of business, a little while ago, in the name of his friend Mr. Bayley, but dropped out again. At present the measure remained a hidden treasure in the breast of his hon'ble friend. But it would soon come to light, and it would be better to pass no special or local law in the meanwhile.

Chapter IX of the Bill as introduced related to military cantonments and bázárs. It was a reproduction of the Bengal Regulation; one of those Regulations of which the spirit passed to the Panjáb and from the Panjáb to Oudh. He mentioned at the time that lawyers were very shy of dealing with these military affairs, and it turned out that it would have been better to let them alone. When the Regulation, which was more than sixty

years old, came to be expressed in modern legal language, differences of opinion arose as to the propriety of re-enacting the whole of it, and as to the modifications it might be expedient to effect. And then the Commander-in-Chief very reasonably objected to have a local law, differing in some, though it might be in slight, particulars from the general law, for a subject of such general concern as that of cantonments. So the Committee had left the law where it stood, on the footing of Regulation XX of 1810, only taking care to provide for the express application of that Regulation to Oudh.

The principal additions the Committee had made to the Bill would be found in the fifth chapter. They related to Village and Road Police, and had been drawn from the Police Act passed for the North-Western Provinces in the year 1873.

There were of course a number of smaller alterations which were mentioned in the Report he was now presenting. He had stated to the Council the nature of the larger alterations which accounted for the different appearance which the Bill had now assumed.

The Council adjourned till Thursday, the 17th August 1876.

SIMLA;
The 27th July 1876.

WHITLEY STOKES,
Secretary to the Government of India,

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3RD AUGUST 1876.

GENERAL REMARKS.—In Madras the fall of rain has been scanty in the Northern and Central districts, and prospects have not improved. In Mysore there has been slight but beneficial rain throughout the province. In Bombay good rain has fallen in most districts, but more is required in Khandesh, most of the Deccan districts, Kaládgi, and part of Dharwar. In Sind the river is high, canals full, and prospects good. In the Central Provinces there has been generally abundant rain, but more is wanted in Bhandara and Nágpur. More rain is required in Berar. The falls throughout Central India and Rajputana have been good. In Bengal favourable rain has fallen, except in Behar, where it is still insufficient in some districts; prospects are excellent in Bengal proper: in Behar the transplantation of the winter rice is backward, but other crops are good. Copious rain has fallen throughout the North-Western Provinces, Oudh, and the Punjab, and prospects are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Aug. 3rd)	*Nil* at Masulipatam.	Rain moderate elsewhere; 16¾ feet water over anicuts; more rain is wanted; cultivation prospects not improving; prices stationary; cholera continues, attacks 1,005, deaths 313, in 10 taluks; otherwise healthy; cattle generally healthy; markets well supplied locally.
Kurnool („ 2nd)	Nearly 1·0 in Pattikonda; ·5 in Sirwall.	Season unfavourable; very slight rain in other taluks; pasture scanty; markets well supplied; prices of *jonna*, rice and horse gram rising; other articles rising in Ramalkota; stationary elsewhere; fever prevalent; cholera all over the district, seizures 135, deaths 69; 4·2 feet of water over Sunkesala anicut in Tumbudra.
Tanjore („ 3rd)	1·14 at Negapatam.	Rain elsewhere slight and partial; rivers full; moderate supply to few tanks; water over upper anicut, north branch 1 foot 5 inches, south 2 feet 7 inches; lower, north 4 feet 10½ inches, south 5 feet 10½ inches; cultivation, paddy throughout district, some dry crops in some places; standing crops not thriving in some parts for want of rain; no harvest; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 324, deaths 274; fever and small-pox in some localities; cattle disease in some parts.
Madura („ 2nd)	1·0 at Madura.	Similar rainfall in other parts of the district; weather generally cloudy and cool; prices stationary; cholera, seizures 76, deaths 38, mostly in Shevagunga and Ramnad zemindaries.
Malabar („ 3rd)	3·11	Cultivation of first crop and *modan* good; preparations for second crop over; prices rising; grain supply sufficient; cholera in all taluks, except Chirakal and Kurumbranad, 308 deaths; cattle healthy; pasture good. *General Remarks.*—General prospects unchanged.
Bombay— (Aug. 3rd)		
Sind.—(Aug. 2nd)		
Kurrachee ...	0·35 at Tatta.	River at Kotri on 31st, 17 feet 8 inches, last year 16 feet 1 inch; crops well, save a little damage here and there in low ground from rain, and elsewhere from birds; locusts passed eastward over Kohistan, but did no damage.
Shikárpur ...	...	River 15 feet 6 inches, being 11 inches higher than on the same date last year; floods increasing; weather sultry; fever in 8 talukas.
Hyderabad ...	...	River still rising; canals full; cultivation progressing; small-pox still in Hyderabad city, 38 fresh cases; some mortality among cattle in Guni taluka.
Upper Sind Frontier ...	...	Floods extending slowly; weather fair.
Guzerat.		
Ahmedabad ...	0·89	Total rainfall 9·09; agricultural operations favourable; cholera in city, 38 cases, 10 deaths.
Kaira ...	3·39	Total rainfall 4·93; crops good.
Surat ...	7·03	Total rainfall 25·11; 1 cholera case in city fatal, 21 in Mándvi, 13 fatal.
Broach ...	6·19	Total rainfall 16·26; cholera abating; *kápas* slightly injured at Jambusar owing to excessive rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Khandesh and Násik.		
Khandesh ...	0·51 at Dhulia.	Total rainfall 9·28; more rain much wanted; sowing operations progressing; *kharif* prospects, including cotton, on the whole very unfavourable; cattle disease as before; fever in Jalgaon.
Násik ...	0·82	Total rainfall 11·22; rain generally wanted; sowing suspended in some parts; slight cholera in 4 talukas.
Konkan.		
Tanna ...	11·04	Total rainfall 60·92; cholera of a severe type continues at Tanna and Kalyán; 30 cases at Tanna, 12 fatal; small-pox continues in 2 talukas; transplantation of crops progressing.
Deccan.		
Poona ...	0·47	Total rainfall 10·91; sowing of *kharif* progressing; young plants suffering in Bhimthari and Indápur talukas for want of more rain; slight cattle disease continues in 3, and cholera in 7, talukas.
Ahmednagar ...	0·02	Total rainfall 5·54; more rain immediately wanted; cholera in 6 talukas, 83 cases, 32 deaths.
Sholapur ...	0·89	Total rainfall 4·41; cholera continues; 55 deaths at Sholapur; *kharif* suffering from want of rain.
Satara ...	5·79	Total rainfall 26·57; crops thriving; 147 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	2·41	Total rainfall 24·32; sowing of *kharif* nearly completed; crops promising.
Dharwar ...	1·56	Total rainfall 16·55; rice crops good; sowing of *jowari* almost completed; rain wanted very badly in the eastern talukas; cholera decreasing.
Kanara ...	10·50 at Karwar.	Total rainfall 78·0; heavy floods, not much damage.
Kaládgi ...	...	Want of rain generally felt; *kharif* sowing retarded; cholera continues in northern talukas, 125 deaths.
Kattywar.		
Rájkot ...	3·70	Total rainfall 10·45; sowing operations completed; health good.
Wadhwán ...	0·79	Total rainfall 7·64; crops good; in some places in Jhinjhuwára cotton plantations spoiled by heavy rains; cholera in Jhalawad, 43 cases, 28 fatal.
		General Remarks.—Prospects favourable in Sind; small-pox still in Hyderabad; cholera in Násik, Tanna, Poona, Sholapur, Satara, Kaládgi and Ahmedabad; rain much wanted in Khandesh, and in parts of the Deccan; agricultural prospects favourable in Guzerat.
Bengal— (Aug. 3rd)		
Chittagong ...	7·45	
Noakholly ...	1·88	Public health good; stray cases of cholera in Bamni.
Chittagong Hill Tracts...	5·73	
Hill Tipperah ...	2·12	
Backergunge ...	1·5	Fever in Golachipa and Gulshakhali; cattle disease in Golachipa, Gulshakhali, Mendiganj and Bonful.
Furreedpore ...	1·3	General health not good; fever making its appearance.
Dacca ...	8·34	
Tipperah ...	12·21	
Mymensingh ...	3·27	
24-Pergunnahs ...	4·26	Fever in Basirhat and Barripore.
Jessore ...	2·22	
Nuddea ...	2·75	
Moorshedabad ...	1·47	Fever in the east of the district.
Pubna ...	·87	
Rajshahye ...	1·35	
Bogra ...	·7	
Malda ...	·31	Three deaths from and 16 attacks of small-pox.
Dinagepore ...	Return not received.	Public health good.
Rungpore ...	2·24	
Cooch Behar ...	2·42	Cholera nearly disappeared.
Jalpaiguri ...	7·94	Cholera disappeared from Buna; still prevalent in Maynaguri, Phálgrám and Jalpáiguri thanas.
Darjeeling ...	10·18	
Midnapore ...	4·71	
Howrah ...	3·75	
Hooghly ...	3·07	Public health fair.
Burdwan ...	3·98	Public health generally fair.
Bankoora ...	3·03	
Beerbhoom ...	2·07	
Shahabad (Patna, &c.) ...	3·52	General health good.

In the Supplement to the *Gazette of India* of the 29th July 1876, page 813, in the rainfall column opposite Sholapur for "0·7" read "·87."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Bhágalpur ...	8·71	General health good.
Monghyr ...	Return not received.	
Purneah ...	2·33	
Durbhunga ...	1·57 from 27th July to 1st August.	1·75 inches of rain fell at Mudhoobunnee; heavy rain in the interior of Sadr sub-division.
Mozufferpore ...	Return not received.	
Sarun ...	·57	Cholera still prevalent; in Siwan sub-division the proportion of fatal cases somewhat increased.
Chumparun ...	Return not received.	
Patna ...	2·36	Cases of cholera still reported from all parts of the district.
Gya ...	7·06	Cholera abated in Aurungabad; prevalent elsewhere, as also fever.
Shahabad ...	2·21	
Hazáribágh ...	2·55	Much sickness prevails; general health still continues bad.
Lohardugga ...	6·71	Cholera and small-pox still prevalent in Palamow but decreasing; cholera in Ranchi abated since last week.
Manbhoom ...	2·51	
Singhbhoom ...	4·09	
Balasore ...	4·15	A marked decrease in the mortality from cholera.
Cuttack ...	1·18	Cholera less prevalent.
Pooree ...	4·54	Cholera raging in several places; a new disease *Jhima Rog* or prickling disease has appeared it is said from Madras Presidency.
		General Remarks.—The rainfall has been good and favourable except in Behar, where complaints are still made of insufficient rain. In Bengal proper the general condition of the crops is satisfactory. The cutting of jute and early rice is progressing; indigo manufacture is going on but a good outturn is not expected; transplantation of the late rice is nearly completed; sugar-cane, mulberry and other minor crops look promising. In Behar the *bhadoi* crops are generally coming on well, but the transplantation of winter rice is retarded from want of rain. In Orissa there have been floods in many places, causing some local damage.
N. W. P.—		
Benares (Aug. 2nd)	From 3·1 to 6·7	River risen to 37 feet.
Allahabad („ 1st)	Average fall 4·75	A break required.
Jhansie („ 2nd)	4·7	Continued rains have impeded *kharif* ploughing and sowing, except in light soil.
Agra („ „)	...	Rain continues; season favourable.
Meerut („ 2nd)	...	Rain general; field operations active.
Bareilly („ „)	4·0	
Almora („ 1st)	...	Very favourable weather for crops.
Punjab— (Aug. 2nd)		
Delhi ...	3·8	Crops promising; health good.
Hissár ...	5·6	Harvest prospects excellent; health good generally; cattle disease slightly prevalent.
Umballa ...	3·8	Crops and health good.
Jullundur ...	3·5	Crops flourishing; health good.
Lahore ...	·6	Crops good; health fair.
Mooltan ...	2·3	Crops flourishing; health good.
Dera Ismail Khan ...	·9	Health good.
Ráwalpindi ...	·25	Sowing in progress; cholera still bad at Murree and prevalent in other parts of the district.
Pesháwar ...	2·8	Ploughing and sowing progressing; health good.
		General Remarks.—General rainfall over province; agricultural prospects good; public health on the whole fair.
Oudh— (Aug. 2nd)		
Lucknow ...	4·1	*Kharif* operations in progress and prospects improved; public health generally good.
Sitapur ...	2·8	
Fyzabad ...	3·0	
Central Provinces—		
Upper Godávari (July 29th)	3·67	Weather cloudy; sowings continue; few deaths from cholera; prices steady.

Bilaspur ...	2·45	Prospects in Mungeli good; in other tahsils rain has done some damage; fever prevalent; prices steady.
Bálághát ...	2·90	Transplanting of rice continues; small-pox prevalent; prices steady.
Chanda (July 30th)	2·52	Weather cloudy; transplanting of rice continues; cholera in all tahsils; prices stationary.

In the Supplement to the *Gazette of India* of 29th July 1876, page 813, in the rainfall column opposite Fyzabad for "1·3" read "·3."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Chhindwara ...	1·52	Health good; prices steady.
Betúl (July 31st)	2·88	Prospects good; cholera abating; prices steady.
Bhandara (Aug. 1st)	·54	Rain wanted for transplanting rice; *jawar* doing well; cholera, fever and small-pox continue; prices steady.
Nágpur („ 2nd)	·23	*Kharif* sowings completed; transplantation of rice delayed for want of rain; prices steady.
Wardha ...	·61	Prospects good; no cholera.
Nimár (Aug. 2nd)	·29	Weeding commenced; cholera and small-pox decreasing.
Hoshangabad ...	1·20	Cholera decreasing; prices unchanged.
Narsinghpur ...	5·0	Sowings completed; cholera decreasing.
Jubbulpore ...	5·38	*Kharif* sowings progressing; cholera decreasing.
Saugor ...	3·62	Crops suffering from excessive rains; 542 cholera cases, 277 fatal.
Seoni (Aug. 2nd)	1·75	Rain wanted; 55 cholera cases, 26 fatal.
Mándla („ 3rd)	3·20	Weeding and transplanting of rice continue; 10 deaths from cholera; prices stationary.
Damoh ...	9·40	Break required; 49 deaths from cholera; prices stationary.
		General Remarks.—General prospects good; in some parts more rain is wanted.
British Burma—	...	No report received.
Assam—		
Gauháti (Aug. 3rd)	1·41	Sky overcast; weather sultry; slight irregular showers; *ass* almost reaped; transplanting of *sali* commenced; prospects of tea favourable; public health good.
Sylhet („ „)	4·55	Prospects continue good.
Hyderabad Assigned Districts—		
Amráoti (Aug. 3rd)	·40	Agricultural prospects fair; rain required; choleraic diarrhœa still in Ellichpur cantonment and city; cholera lingering in Wún district, 101 cases, 39 deaths.
Mysore and Coorg—		
(Aug. 3rd)		
Bangalore ...	·79 in cantonment.	Slight rain has continued to fall throughout Mysore with beneficial effects in most districts; public health generally good.
Coorg ...	11·60	
Central India—(Aug. 2nd)		
Indore ...	2·0	Agricultural prospects good; cholera still in Baghelkhand.
Gwalior ...	2·06	
Neemuch ...	3·59	
Rutlam ...	1·42	
Sutna ...	2·03	
Rajputana—		
Abu (Aug. 3rd)	3·6	Total rainfall 24·22.
Serohi (July 30th)	·10	Fair supply of water in tanks and wells; weather cloudy; prospects fair; health good.
Marwar („ 29th)	1·35	Heavy rain on 27th; locusts reported in northern provinces; ten months' supply from recent rains; prospects favourable; health good.
Bikanir („ 22nd)	1·58	Total rainfall 3·60; weather cloudy; much rain reported in some districts; flight of locusts from east to west on 18th; health good.
Meywar („ 28th)	3·1	Total rainfall 12·93; health and prospects good; sunshine required for crops.
Jhallawar („ 28th)	3·30	Health good.
Harewtee („ 29th)	...	
Deoli ...	3·1	Weather pleasant; health and prospects good.
Tonk ...	3·8	
Kota ...	5·9	
Ajmere (Aug. 3rd)	3·2	Total rainfall 3·7; health and prospects excellent.
Jeypore ...	11·38	Weather seasonable; prospects unchanged; health good.
Shahpore ...	4·30	Almost continuous rain; health good.
Oodeypur (Aug. 2nd)	1·26	Prospects decidedly good.
Nepal— (July 25th)	3·8	Agricultural prospects in the hills fair.

Total Inundation Canals ...	...	...	...	...	...	...	...	58,122	...	...	...	58,122	The total decrease in perennial canal irrigation is 25,166 acres. This is principally in cotton, and it is said that one reason for it is that the cultivators dread a recurrence of the very heavy rain of last season which damaged their cotton, they have accordingly not sown as much as usual. It is still rather early in the season to predict what the ultimate results will be; but unless the decrease, as compared with the irrigation up to the similar period of last year, diminishes, special reports on the subject will be called for.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

ALLAHABAD,
The 12th July 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10TH AUGUST 1876.

GENERAL REMARKS.—In Madras fair rain has fallen, and prospects are improved, though in Kurnool the season is still said to be unfavourable. Prospects have slightly improved in Mysore, though the rainfall is still very deficient. In Sind the river is high, and some damage has been caused by floods, but prospects are good. Elsewhere throughout the Bombay Presidency the rainfall has been very light, and more is much required in nearly every district. The fall has also been slight in the Central Provinces except in the eastern districts, and more rain is needed. More is also required in Berar and Central India. In Rajputana prospects are generally good, but rain is required in some places. In Bengal and Assam the fall has been copious, and in Behar enough rain has at last fallen: prospects are good and operations are being vigorously pushed on. The rains have been good in the North-Western Provinces and Oudh, and prospects are favourable. In the Punjab slight rain has fallen only at Delhi, Umballa and Ráwulpindi: prospects are however good. Reports from Burma are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Aug. 9th)	2·40 at Masulipatam.	Rain plentiful throughout the district; heavy fresh in river; damage caused by floods in Repalli taluk and Walloor and Devarakota zemindaries; prices risen in 3 taluks, elsewhere stationary; cholera abating, 528 seizures, 171 deaths; cattle healthy.
Kurnool (,, ,,)	1·0 at Nundial.	Season unfavourable; rain very slight in other taluks; sowing operations impeded owing to scarcity of rain; markets moderately supplied; prices of *jonna*, rice and horse gram rising; other articles stationary; fever prevalent; cholera nearly all over the district, seizures 109, deaths 40.
Tanjore (,, 10th)	1·54 at Negapatam.	Rain elsewhere generally good; rivers nearly full; moderate supply to some tanks; water over upper anicut, south branch 8 inches, lower anicut, north branch 1 foot 8 inches; lower anicut, south branch 1 foot 10 inches; cultivation, paddy throughout the district; some dry crops in some places; standing crops doing well *generally*; harvest, paddy in few villages, yield moderate; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera decreasing, seizures 174, deaths 159; fever and small-pox in some localities; cattle disease in some parts.
Madura (,, 9th)	...	Slight rain in each taluk; weather generally cloudy and cool; sowing and transplanting proceeding to some extent; prices fluctuating; state of public health and of cattle unaltered; cholera, seizures 70, deaths 58, all in Shevagunga and Ramnad zemindaries.
Malabar (,, 10th)	1·61	Cultivation of first crop and *modan* good; second crop thriving; prices rising; markets well supplied; cholera in Calicut, Walluvanad, Ernad, Palghaut, Ponany and Koteyom, 254 deaths; cattle healthy; pasture good. *General Remarks.*—General prospects improved, Kurnool excepted.
Bombay— (Aug. 10th)		
Sind—(Aug. 9th)		
Kurrachee ...	...	River at Kotri on 7th, 17 feet 11 inches against 16 feet 9 inches on the same date last year; rain in districts and in the neighbourhood of Kurrachee; serious breach in Sháwah in Sháhbandar district; small-pox in Belo taluka, 2 cases, 1 death; 20 cattle died in Sákro taluka.
Shikárpur ...	...	River falling, but 6 inches higher than on the same date last year; crops well; fever prevalent in 8 talukas; locusts seen in Mirpur taluka, no damage.
Hyderabad ...	...	River continues to rise, but no damage; fever and small-pox in Hyderabad; 29 fresh cases of small-pox; cattle disease in Dero Mohbat and Kandiáro talukas; *kharif* prospects good.
Upper Sind Frontier ...	...	Kashmor bund badly breached; *kharif* crops damaged extensively; weather unsettled; health fair.
Guzerat.		
Ahmedabad ...	...	Rain needed everywhere; cholera in city, 91 cases, 28 deaths.
Kaira ...	0·10	Transplantation of rice commenced; crops well.
Surat ...	0·17	Total rainfall 25·32; 26 cholera cases in Bárdoli taluka, 6 fatal, 8 fatal cases in Mándvi.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Broach ...	...	Slight cholera in Ankleswar and in 1 village of Jambusar talukas; crops good.
Khandesh and Násik.		
Khandesh ...	...	*Kharif* prospects very bad; fever and cattle disease prevalent; cholera in Nasirabad, 2 cases, 1 fatal.
Násik ...	0·32	Total rainfall 11·54; more rain generally wanted for early crops; slight cholera in 4, and cattle disease in 1 taluka.
Konkan.		
Tanna ...	1·25	Total rainfall 62·17; rain much wanted; cholera abating at Tanna but continues at Kalyán; small-pox in two talukas; transplantation of crops completed in most of the talukas.
Deccan.		
Poona ...	...	*Kharif* sowing nearly completed; young plants require more rain; slight cattle disease in 2, and cholera, more or less, in 6 talukas.
Ahmednagar ...	...	Want of rain much felt; cholera in 6 talukas, 117 cases, 58 deaths.
Sholapur ...	0·17	Total rainfall 4·58; slight cattle disease in Karmála; cholera throughout the district; 23 deaths at Sholapur and 20 at Bársi; rain wanted.
Satara ...	0·24	Total rainfall 26·81; 205 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	·28	Total rainfall 24·60; more rain generally wanted; cholera in Athni, 27 deaths.
Dharwar ...	0·14	Total rainfall 16·69; crops in western districts fair; in eastern districts continued scarcity of rain is becoming serious, as the poorer classes fail to get employment.
Kanara ...	2·50 at Karwar.	Total rainfall 80·50; 9 deaths from cholera above Ghâts.
Kaládgi ...	...	*Kharif* sowing retarded; cholera prevalent, 102 deaths.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·04	Total rainfall 10·49; weather cloudy; crops thriving.
Wadhwán ...	...	Want of rain generally felt; state of crops the same as before; cholera in Jhalawad, 12 cases, 3 fatal.
Baroda ...	0·07	Total rainfall 20·39; cotton and *kharif* crops healthy; public health good.
		General Remarks.—Some damage by floods owing to breaches in the bands in Sind; cholera generally prevalent, though not to a great extent; rain urgently required in nearly every district.
Bengal— (Aug. 10th)		
Chittagong ...	3·36	
Noakholly ...	13·68	Two deaths from cholera in Bamni; general health good.
Chittagong Hill Tracts...	10·78	
Hill Tipperah ...	5·47	
Backergunge ...	7·58	
Furreedpore ...	9·79	Fever making its appearance; general health not quite good.
Dacca ...	5·19	
Tipperah ...	7·99	
Mymensingh ...	3·88	
24-Pergunnahs ...	7·63	Ordinary fever in Busseerhat and Satkhira; malarious fever in Barripore and neighbourhood.
Jessore ...	12·70	
Nuddea ...	7·83	
Moorshedabad ...	7·78	
Pubna ...	6·75	
Rajshahye ...	9·15	
Bogra ...	8·92	
Malda ...	7·65	
Dinagepore ...	1·55 (previous week 2·48)	Occasional cholera.
Rungpore ...	3·74	Cholera decreasing.
Cooch Behar ...	4·15	General health fairly good.
Jalpáiguri ...	2·44	
Darjeeling ...	2·79	
Midnapore ...	2·61	
Howrah ...	7·13	
Hooghly ...	1·63	Fever slightly on the increase; public health normal.
Burdwan ...	3·86	Public health fair.
Bankoora ...	3·09	
Beerbhoom ...	6·25	

In the Supplement to the *Gazette of India* of the 5th August 1876, page 826, in the rainfall column opposite Sholapur *for* "·99" *read* "·59."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Sonthal Pergunnahs ...	9·64	A little cholera in Deoghur and Godda.
Bhágalpur ...	5·96	General health very good.
Monghyr ...	Return not received.	
Purneah ...	7·89	
Durbhunga ...	2·24	
Mozufferpore ...	4·48	
Sarun ...	4·77	Cholera still prevalent; number of fatal cases appears to be diminishing.
Chumparun ...	3·17	
Patna ...	5·99	Cholera still in all parts of the district.
Gya ...	3·87	Cholera and fever abating; public health somewhat improving.
Shahabad ...	2·95	
Hazáribágh ...	2·61	Much sickness prevails.
Lohardugga ...	6·20	Public health improved; cholera much abated in Ranchi; in Palamow small-pox decreasing, but cholera still prevalent.
Manbhoom ...	7·80	
Singhbhoom ...	3·39	
Balasore ...	3·90	Mortality from cholera steadily decreasing.
Cuttack ...	·12	Cholera very nearly ceased; public health generally improved.
Pooree ...	·31	Cholera continues in various places.
		General Remarks.—There has been seasonable rain in almost all the districts. State and prospects of the crops are generally good, the harvesting of *aous* progresses, and the transplanting of *amun* is nearly completed. In Behar there has now generally been enough rain, and transplantation is being briskly pushed on, but Durbhunga and Chumparun are backward. The *bhadoi* rice is well forward and will soon be cut.
N. W. P.—		
Benares (Aug. 9th)	From 1·2 to 3·0	River fallen to 27 feet; season favourable.
Allahabad („ 8th)	3·75	Prospects good.
Jhansie („ 10th)	·2	Ploughing and sowing in progress.
Agra („ 9th)	2·0	Season favourable.
Meerut („ „)	...	Rain sufficient; prospects good.
Bareilly („ „)	1·8	
Almora („ 8th)	...	Incessant rain during past week, sunshine required.
Punjab— (Aug. 9th)		
Delhi ...	·4	Crops promising; health good.
Hissár ...	*Nil.*	Crops healthy; grass abundant; a little fever, but health generally good.
Umballa ...	·8	Crops and health good.
Jullundur ...	*Nil.*	Crops excellent; health good.
Lahore ...	*Nil.*	Crops good; health indifferent.
Mooltan ...	*Nil.*	Crops and health good.
Dera Ismail Khan ...	*Nil.*	Crops and health good.
Ráwalpindi ...	·25	Crops good; cholera still prevalent.
Pesháwar ...	*Nil.*	Ploughing and sowing progressing; health good.
		General Remarks.—Harvest prospects good; health of province on the whole fair.
Oudh— (Aug. 9th)		
Lucknow ...	1·9	Prospects favourable; public health good.
Sitapur ...	4·2	
Fyzabad ...	1·5	
Central Provinces—		
Upper Godávari (Aug. 5th)	·76	Weather cloudy and close; sowings continue; cholera prevalent; prices falling.
Sambalpur ...	1·31	Weather cloudy; prospects good; cholera continues.
Bilaspur ...	·31	Break beneficial to crops; fever continues; prices steady.
Raipur ...	·30	Prospects favourable; health good; prices falling.
Bálághát ...	·40	Transplanting of rice stopped for want of rain; health good; prices risen.
Chanda (Aug. 6th)	...	Transplanting of rice stopped for want of rain; other *kharif* crops doing well; cholera increasing.
Chhindwara ...	...	Crops doing well, but more rain wanted; health good; prices stationary.
Betúl (Aug. 7th)	·60	Prospects good; cholera continues; prices stationary.
Bhandara („ 8th)	·95	Fears entertained of damage to rice crop for want of sufficient rainfall; *jowar* favourable; fever and cholera continue; prices risen.
Nágpur („ 9th)		Weather cloudy; want of rain much felt; prices risen.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Wardha ...	...	Crops good; weeding completed; rain wanted; several deaths from choleraic diarrhœa.
Nimár ...	·20	Rain wanted; cholera and small-pox continue.
Hoshangabad ...	·67	Cholera decreasing; prices unchanged.
Narsinghpur ...		Rain wanted; cholera decreasing; prices unchanged.
Jubbulpore ...	·33	Prospects favourable; cholera and cattle disease continue; prices risen.
Saugor ...	·18	Break beneficial; cholera continues.
Seoni ...	·30	Rain wanted; cholera continues; prices high.
Damoh (Aug. 10th)	...	Sowings completed; *rabi* ploughing commenced; prospects of *kharif* good; cholera continues.
Mandla ...	·10	Prospects good; rain wanted; weeding and transplanting continue; prices steady.
		General Remarks.—Rain generally wanted except in eastern districts.
British Burma—(Aug. 10th)		
Arrakan Division ...	2·0 in Akyab during week *ending 7th* instant.	Cholera has prevailed to some extent during the past week at Kyoukphyoo, but has since abated, report does not give the number of deaths; general health otherwise good; cattle disease in one *township of Akyab district*; paddy sowing progresses favourably everywhere.
Pegu Division.		
Rangoon ...	1·2	Agricultural prospects *fair*; cattle disease not so prevalent; public health good.
Bassein ...	3·50	General health good; crops progressing favourably; weather hot.
Henzada ...	2·0 in week ending 5th August.	Weather favourable.
Myanoung ...	2·50 in week ending 29th July.	Cultivation progressing; slight cattle disease in Mengye; several cases of cholera in Okpho; otherwise public health good.
Tharawaddy ...	3·50 in week ending 29th July.	
Prome ...	·59	Three deaths from cholera in town, 9 in district; cultivation progressing.
Thayetmyo ...	·52	Health good; few cases of choleraic diarrhœa; weather very hot.
Thonkwa ...	Slight rain	Health and crops good; cattle disease on the decline.
Tenasserim Division.		
Amherst ...	4·27	General health good; fever at Kyoukkyee; cholera at Phapoon; crops progressing favourably; cattle disease abating in Amherst.
Shwegyeen ...	6·3	
Tounghoo ...	2·8	
Assam—		
Gauháti (Aug. 10th)	4·15	Weather clear and hot for the most part of the week; heavy rain on the night of the 3rd; *asu* almost reaped; transplanting of *salí* is progressing; prospects of tea and rice favourable; returns not received from Barpeta.
Sylhet („ „)	10·87	All crops doing well.
Hyderabad Assigned Districts—(Aug. 10th)		
Amráoti ...	·06	Prospects not unfavourable, but rain much needed; cholera has re-appeared in Amráoti district and still lingering about Wún; attacks 114, deaths 46.
Mysore and Coorg—(Aug. 10th)		
Bangalore ...	1·04 in cantonment	Markets generally well supplied, but much distress still exists among the poorer classes; agricultural prospects have slightly improved however though the rainfall is very deficient; public health good generally.
Coorg ...	5·04	
Central India—(Aug. 9th)		
Indore ...	*Nil*	No rain at Mhow or Indore since last return; much wanted; health good throughout Central India except at Myhere and its vicinity, where cholera still clings.
Gwalior ...	·41	
Neemuch ...	·02	
Rutlam ...	·61	
Sutna ...	3·08	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Aug. 10th)	·39	Total rainfall 24·61; clear and cloudy alternately.
Serohi („ 6th)	·10	Total rainfall 6·0; tanks getting low; wells well supplied; more rain required; health good; high winds and cloudy.
Marwar („ 5th)	·10	Total rainfall 5·66; weather cloudy; tanks all but full, health good; prospects favourable.
Bikanir („ 2nd)	·74	Total rainfall 4·34; weather cloudy; health good; crops progressing.
Meywar („ 4th)	·10	Total rainfall 13·10; health and crops good; tanks and wells well supplied; cloudy; sunshine required.
Jhallawar („ „)	2·55	Total rainfall 27·37; prospects poor.
Harowtee („ 5th)		
Deoli ...	1·9	Health and prospects good; *til* not sown owing to incessant rain.
Tonk ...	2·2	
Kota ...	1·4	
Ajmere (Aug. 10th)	*Nil*	Weather cloudy; health and prospects good.
Jeypore ...	*Nil*	Weather continues cloudy; sunshine required for the crops; health good.
Bhurtpore ...	*Nil*	Clear and cloudy alternately; sowing and weeding general; health good.
Ulwur (Aug 9th)	·20	Prospect still good, but rain much wanted.
Nepal—(Aug. 2nd)	5·21	State of agricultural prospects fair.

A. O. HUME,
Secretary to the Government of India.

Printed and published for the GOVT. OF INDIA, *in the* GOVT. CENTRAL BRANCH PRESS, *Simla.*

	Rs.
The gross return derived by Government from these works by direct receipts of water-rate and miscellaneous items of revenue during the year under review was	27,17,374
Deducting expenses of maintenance	13,08,607
The net direct revenue was	14,08,767
Adding to this the increase of land revenue due to the works, which increase is reported to amount to	8,58,873
The total net revenue amounts to	22,67,640

This result, based on the *cash receipts* of the year, gives a net profit of 5·91 on the capital outlay to end of 1874-75.

5. If, instead of dealing with the actual receipts, the calculations are based on the earnings of the year, *i. e.*, on the assessments (instead of on the collections) of the water-rate on the area irrigated during the year, the results are as follow:—

	Rs.
Gross direct revenue	29,39,281
Deduct working expenses	13,08,607
Net direct revenue	16,30,674
Add indirect revenue...	8,58,873
Total net profit ...	24,89,547

or 6·49 per cent. on capital outlay to end of 1874-75.

6. These results do not materially differ from those of the previous year, which were 6·08 and 6·58 per cent. respectively, but if the Agra Canal be excluded from the calculations and the comparison made on those works only which were in operation during the previous year, both cases shew an increase in the profits of 1¼ per cent.* It is observed that the receipts are in all cases less than the assessments. This is believed to be due to the increase in assessments being attended with a proportionate increase in the portion of which the collection is deferred.

	1873-74.	1874-75.
* By realizations	6·08	7·24
„ assessments	6·58	7·85

7. The net realized income shews a return of 5 per cent. on the entire outlay, including unfinished and abandoned works; in the previous year it was 4·64 per cent.

8. The charges for simple interest during the year on the *entire* expenditure amounted to Rs. 17,43,522, so that the net realizations shew a clear excess over all charges of Rs. 5,24,118, which is increased to Rs. 7,46,025 if the calculation be made on the assessment of the year. In this respect also there is satisfactory improvement compared with the results of the previous year.

9. The balance of accumulated *simple* interest charges, after reduction of net revenue against the canals in operation, is steadily decreasing, as the figures for the last six years shew: thus—

	Rs.
Balance in 1869-70 of simple interest remaining unpaid ...	1,03,80,137
„ 1870-71 „ „ ...	1,00,92,635
„ 1871-72 „ „ ...	97,28,875
„ 1872-73 „ „ ...	96,81,554
„ 1873-74 „ „ ...	92,97,488
„ 1874-75 „ „ ...	88,09,734

10. In the 6th paragraph of the resolution it is remarked that the Government of India has expressed a wish that the percentage of profits should be calculated from the actual collections instead of from the assessments. The instructions on this point have apparently been misunderstood. They were, that the calculations should be made on actual collections *as well as* on assessments, but that, in the case of accumulated interest charges, the results on any given date should be calculated on the actual receipts up to that date. The Government of India agree with the views expressed in the 14th paragraph of the Chief Engineer's report, that the results of the year are best exhibited by the assessments, those of a series of years by the realizations.

11. The working expenses amounted to Rs. 13,08,607, or Rs. 73,407 in excess of the previous year: this increase was occasioned mainly by expensive renewals on the Ganges Canal and by the opening of the Agra Canal.

12. The owner's rate has been assessed this year for the first time. The assessment is given as Rs. 19,722, but it is said that the return is still very incomplete.

13. The area irrigated amounted to 1,142,452 acres, the largest yet obtained since the famine year of 1868-69. The figures for the last ten years are given below:—

	Acres.
1865-66	800,519
1866-67	983,390
1867-68	761,460
1868-69	1,441,918
1869-70	1,089,673
1870-71	1,050,808
1871-72	852,494
1872-73	940,586
1873-74	1,049,334
1874-75	1,142,452

14. In the 4th column of Table I in para. 9 of the Resolution of the North-Western Provinces Government "average" has been misprinted "acres," and the figures for 1874-75 are omitted.

15. The following figures taken from Table "D" in para. 16 of the Report show the cost of revenue management for the past four years on the Ganges and Eastern Jumna Canals:

	Per acre irrigated.	
	Ganges Canal.	Eastern Jumna Canal.
1871-72	1·571	1·032
1872-73	1·456	1·196
1873-74	1·175	1·24
1874-75	1·107	1·104

The decrease on the Ganges Canal is very satisfactory.

16. The gross revenue of the Ganges Canal per cubic foot of head discharge and per mile of canal is also satisfactory,—the former being Rs. 480 and the latter Rs. 3,862, which approximate closely with the figures for the much older Eastern Jumna Canal.

17. There is a considerable increase in the outstanding balances of revenue. The Local Government will doubtless take steps to remedy this.

18. Referring to the remarks made in para. 23 of the Report on the effect of the large increase in the sugar-cane crop, it is observed that the area of food-grains is shown to be 752, 824 acres, while sugar is only 141,727 acres, so that the danger of the cultivation of grain being unduly superseded by that of sugar-cane appears remote.

19. The results of the experiments for the reclamation of oosur soil is that it does not pay for cultivation, but that trees can be grown in such soil at a moderate expense. The Government of India will be glad to receive a report of the results of any plantations.

20. The figures given below show that the Ganges Canal acreage duty for the year 1874-75 is even better than that of the much older Eastern Jumna Canal, though the earnings of the latter are larger than those of the former. This is to be expected, for the more valuable crops have had less time to supplant the poorer kinds.

	Acres irrigated per cubic foot per second.				Occupier's rate per cubic foot per second.			
	Of head discharge.		Of actual consumption.		Of head discharge.		Of actual consumption.	
	Ganges Canal.	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.
1874-75	193	183	239	197	446	571	551	614

21. Table II in para. 54 of the Report shows how the Navigation revenue has fallen off in consequence of the failure of the Jaoli and Salawa Locks, the tolls on rafts having fallen from Rs. 25,388 in 1871-72 to Rs. 4,910 in 1874-75; but, notwithstanding the drawbacks to navigation above mentioned, the ton-mileage has increased more than threefold in five years, *viz.*, from 4,242,700 to 14,261, 625. This apparently shows that the greater portion of

the traffic is from Meerut, or below the sites of the damaged locks, downwards, and points to a satisfactory future when the canal improvements are finished, but no useful conclusion can be drawn until these improvements have been completed.

22. This is the first year in which the Agra Canal has been in operation. The estimate of gross receipts in the Revenue Forecast for the first year was Rs. 6,000; the area irrigated has been 15,126 acres, and the gross revenue has been Rs. 29,970, or five times the estimate.

23. The working expenses of the Agra Canal having been Rs. 45,760, the canal has earned two-thirds of its working expenses, and this moreover with half irrigation rates. Had full rates been levied, there would have been a profit of Rs. 13,009. The Government of India concur with the Local Government in considering that the financial prospects of this canal appear to be very promising.

24. A considerable increase has been made during the year under review to the credit of the canals on account of enhancement of land revenue. This has been occasioned by the re-settlement of canal-watered districts.

25. It appears from this Report that owner's rate, amounting to Rs. 19,722, has been brought to account as irrigation, that is, as "direct" Public Works revenue. It should be stated whether this sum has been credited in the Civil accounts as Public Works revenue or included in the Land Revenue.

26. In para. 100 of the Report the final orders regarding the levy of owner's rate on rent-free lands are alluded to; but the correspondence selected and printed in the body of the Report stops short of this final order, and so renders the record in the Report incomplete.

27. There is no information in the Report as to the area of double-cropped lands; this information would be valuable in showing the proportion of the cultivated or gross area watered. It should be obtained and recorded in future Reports.

28. The satisfaction expressed by His Honor the Lieutenant-Governor with the steadily improving prospects of the canals in the North-Western Provinces is fully shared by the Government of India. To the efficiency of the canal administration these satisfactory results are mainly due. Each successive year shows improvement in all its branches.

29. In conclusion, it is necessary to notice that the account of capital outlay has still to be made complete by the inclusion therein of the charge for leave and pension allowances, and the charge for exchange on payments in England. The question of whether a similar charge should not also be made under Revenue has still to be settled. The calculations for interest may probably have to be revised. But on this point separate instructions will be issued.

30. It is also necessary to notice that the sum shown in the report as the share of land revenue due to the several works differs from the amount reported by the Examiner, and included in Statement No. 71 of the Finance Accounts of the Government of India. The difference is explained to be owing to the circumstance that, after the regular accounts had been prepared, more accurate information was obtained on the subject of the revenue due to the work. Separate orders will be issued regarding this difference.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Secretary of State and to the Financial and Revenue, Agriculture and Commerce Departments for information.

*Madras.	British Burmah.
Bombay.	Mysore and Coorg.
Bengal.	Hyderabad.
Punjab.	Central India.
Oudh.	Rajpootana.
Central Provinces.	Assam.

Ordered also, that copies of the Resolution be forwarded to the Government of the North-Western Provinces, and the several* other Local Governments and Administrations, in the Public Works Department, Irrigation Branch, for information.

Ordered further, that this Resolution, the Resolution of the Local Government, and extracts from the Chief Engineer's Report, be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

Resolution by His Honor the Lieutenant-Governor, North-Western Provinces, in the Public Works Department, Irrigation Branch,—dated Allahabad, 25th February 1876, No. 253A.

READ again—

Resolution No. 113A., dated 13th February 1875, on the Irrigation Operations of Fasl Kharif 1874-75, and Resolution No. 843A., dated 12th October 1875, on the Irrigation Operations for Fasl Rabi and year 1874-75.

READ—

Review by the Chief Engineer, with enclosures.

RESOLUTION.—*Capital Account.*—There is a book addition of Rs. 9,48,958 on account of capitalization of diminished land revenue. It is uncertain how far this debit is complete: the Board will be requested to report further on this point. Including the above debit, the total addition to the capital account in the year was Rs. 55,65,250, which raised the capital sunk upon works to Rs. 4,53,56,888 (£4,535,689), of which Rs. 3,83,63,173 (£3,836,317) was upon works in operation. The expenditure of the year upon works in operation was Rs. 24,82,609, and Rs. 30,82,641 upon works under construction. The capital expenditure upon works in operation has been increased by a large sum of 64½ lakhs, representing the capital sunk upon the Agra Canal, which began to irrigate this year.

2. *Gross Revenue.*—The gross revenue for the year from all sources was Rs. 38,14,479 (£381,448), of which Rs. 29,55,606 was assessed by canal officers, the balance being credited as enhanced land revenue.

3. *Working Expenses.*—The working expenses were Rs. 13,24,932 (£132,493), including Rs. 16,325 for remissions, being thus Rs. 74,774 more than last year's charges. The establishment charges were, however, only Rs. 262 more than those of last year, so that the increased cost was due partly to heavy repairs, but mainly to the expensive renewals which are now being charged against the revenue account. Reference to table E shows a reduction in establishment charges in everything except original works.

4. The net profits for the year were Rs. 24,89,547 (£248,955), or 6·49 on the capital sunk. Excluding the Agra Canal in order to make a fair comparison with the results of previous years, the net profits were Rs. 25,05,337, which was 7·84 on the capital outlay.

5. The income derived from enhancement of land revenue according to a revised statement of the Board of Revenue, which allows an uniform rate of Re. 1 per acre on all canal-irrigated land where the settlement has been revised, amounts to Rs. 8,58,873 (£85,887).

6. *Net profits on realizations.*—The Government of India, in its review* of last year's revenue report, has expressed a wish that the percentage of profits should be calculated from the actual collections instead of from assessments. The figures are therefore given below; but this Government would again repeat what has been urged before, that this being an agricultural report, treats of the irrigation for the year, and must also treat of the financial results of that year,—that is, it must deal with assessments in order that the financial results shown may be the outcome of the agricultural operations.

* No. 239-53I., dated 26th July 1874.

The realizations for the year credited in the accounts of the Controller were Rs. 27,17,374 (£271,737), and the net revenue was Rs. 14,08,767 (£140,877)—3·67 on capital sunk. Adding the indirect revenue, the net profits were Rs. 22,67,640, a percentage of 5·91 on capital. Excluding the Agra Canal from the account, the net profits were 7·21 per cent.

7. *Interest charges.*—The net profits for the year on works in operation were Rs. 7,55,037 (£75,504) more than the interest charges, as shown in the margin. Excluding the Agra Canal, the net profits after paying all charges on works in operation were Rs. 10,26,185 (£102,619). The accumulated interest charges exceeded the accumulated receipts by Rs. 88,09,733 (£880,978).

	Rs.
Direct realized ...	14,08,767
Indirect	8,58,873
Total, and ...	22,67,640
Interest charges ...	15,12,603
Profit	7,55,037

8. Since 1869-70, a sum of Rs. 24,81,004 has been paid into the treasury in excess of all charges for works in operation, being an average of nearly five lakhs yearly. The excess sum for 1874-75 was Rs. 13,98,355.

Representing the difference between Rs. 1,03,80,137, the accumulated charges in 1868-69, and Rs. 78,99,133 in 1874-75 (*vide* paragraph 11 of Chief Engineer's review).

9. *Statistics of Irrigation and Revenue.*—The area irrigated this year was greater than that of any previous year except 1868-69, and was 93,018 acres greater than that of last year. The increase was due to the rabi, the area of which was 106,033 acres more than that of last year. The year was one of favourable rainfall, which renders these results the more encouraging; the lateness of the winter rains doubtless increased the demand in the lower divisions. There is, again, a large increase in the valuable crops of sugar-cane and indigo which amply compensates the decrease in rice and cotton, and it is satisfactory to observe as a result of this that the kharif revenue is yearly increasing, although the area does not vary much. No doubt, when more water is available, and the distribution is improved, there will be a considerable increase in the lower divisions. The rabi area and revenue are yearly increasing.

I.—Comparative abstract of Areas Irrigated and Gross Revenue, with average rainfall in each year since 1868-69.

	Area irrigated.	Gross revenue.	Percentage of rainfall in irrigated districts.
	Acres.	Rs.	Acres.
1868-69	1,441,918	31,47,160	17·0
1869-70	1,089,673	25,69,792	29·1
1870-71	1,050,808	25,51,168	37·1
1871-72	852,494	21,75,733	38·0
1872-73	940,586	23,12,649	32·4
1873-74	1,049,334	26,61,470	33·9
1874-75	1,142,452	29,55,506	...

II.—Comparative statement of Irrigation Revenue in 1872-73, 1873-74, *and* 1874-75.

YEARS.	KHARIF (AUTUMN).		RABI (SPRING).	
	Area irrigated.	Gross revenue	Area irrigated.	Gross revenue.
	Acres.	Rs.	Acres.	Rs.
1872-73	353,621	11,01,288	586,965	12,11,361
1873-74	401,622	13,17,663	647,712	13,43,807
1874-75	389,707	13,94,473	752,745	15,61,133

III.—Comparative table of areas of the four most valuable crops, Sugar-cane, Rice, Indigo, and Cotton, irrigated during the past seven years.

Class.	Crops.	1868-69.	1869-70.	1870-71.	1871-72.	1872-73.	1873-74.	1874-75.
		Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.

IV.—Table showing Occupier's Rates and Gross Revenue per acre on each canal for the past three years.

CANALS.	Gross revenue per acre.			Occupier's rate per acre.		
	1872-73.	1873-74.	1874-75.	1872-73	1873-74.	1874-75.
Ganges	2·48	2·53	2·48	2·29	2·36	2·30
Eastern Jumna	2·36	3·27	2·37	2·66	2·98	3·11
Dún	2·55	3·89	3·34	1·83	1·93	1·74
Rohilkund	0·47	0·56	0·87	0·43	0·47	1·23
Bijnor	1·28	1·59	1·43	1·18	1·49	1·31
Bundelkund	1·32	2·17	0·53	1·56	1·88	0·93
Agra	...	...	1·93	...	...	1·35

The water-rates per acre are comparatively low on all the canals except the Eastern Jumna, where the rate is higher than it has been for the two past years. On the Ganges Canal the variation year by year is small; this is due to the larger increase in rabi crops as compared with kharif. The average rate on the Rohilkund Canals is comparatively low in spite of the increase of water-rate sanctioned this year. It is hoped that the question of increasing rates on the Dún Canals will be decided before another year has passed.

Year.	Gross revenue.	Revenue management.
	Rs.	Rs.
1870-71	19,10,868	4,60,933
1871-72	15,79,039	4,59,416
1872-73	17,08,032	4,66,027
1873-74	20,14,266	4,52,293
1874-75	22,16,650	4,68,127

Year.	Maintenance, excluding works of improvement charged to Revenue.
	Rs.
1870-71	4,16,316
1871-72	4,57,283
1872-73	4,83,562
1873-74	4,45,176
1874-75	4,59,220

10. *Ganges Canal.*—The growing prosperity of this canal is a matter of great satisfaction: the net revenue on the year's operations was 4·44 per cent. on the capital sunk, which more than pays the year's interest. Including indirect revenue, the profits were 6·07 per cent. The irrigation yearly increases in area and value of crops. The expense of revenue management has meanwhile increased very little, as shown in the margin; while that of maintenance of works has increased considerably since 1870-71, but is much less than in 1872-73.

11. *Eastern Jumna Canal.*—On the Eastern Jumna Canal neither the revenue varies much nor the cost of revenue management; that of maintenance has steadily increased from

Rs. 72,286 in 1870-71 to Rs. 92,026 in 1874-75. For the last two years there has been a yearly increase of about Rs. 3,000. It is understood that the repairs are of an exceptional nature; but, irrespective of this, there appears to be a permanent increase. At the same time, it may be remarked that the direct profits derived from this canal are nearly 20 per cent. on the capital expended.

12. *Navigation.*—The navigation report of the Ganges Canal is so far satisfactory that it shows a great increase in the traffic carried, in spite of the disadvantages under which this branch of the business at present labours by the closure of locks. The small increase in revenue due to the system of charging rates irrespective of the size of the boats is doubtless discouraging to the officers who manage the traffic, but at the same time the effect of these charges has been to encourage boats of larger size, and the question of variable charges will have to be considered.

13. *Bundelkund Lakes.*—The question of improving the condition of the Bundelkund Lakes has been urgently brought before Government, owing to the distress prevailing in that district. The district officers have been requested, through the Board of Revenue, to make suggestions as to the manner of taking up this question thoroughly. The revenue officers have long urged upon Government the necessity of improving and maintaining the lakes, irrespective of financial considerations; but this department, in disposing of imperial grants, is bound to show a probability of a clear balance sheet for the works it undertakes; and therefore, if it undertakes works at a probable loss on the actual returns, requires that such loss should be recouped from local resources. This has been clearly laid down in a resolution* in this Department, and the local authorities have been called upon to suggest ways and means. It is believed that a full discussion of the subject is all that is required to come to a satisfactory settlement.

* No. 853W., dated 6th July 1875.

14. *Enhancement of land revenue.*—The question of enhanced revenue due to irrigation works has received careful consideration from the Board of Revenue, and the result has been a very full and complete statement of parganas in which enhancement has taken place on account of canal works.

15. *Owner's rate.*—The question of owner's rate is still in an unsettled condition owing to the want of returns: time will doubtless be required to settled the matter satisfactorily, and the careful co-operation of the Board of Revenue is requested to the proper completion of the returns for each season.

16. *Delay in submitting report.*—This report was primarily delayed by the tardy submission of the 2nd circle report, which did not reach this office till 13th October. When received, the figured statements were found not to agree with those of the Controller, and frequent alterations were necessary before they could be brought to correspond. The attention of the Superintending Engineer is now called to Circular H. of 1872, which directs that the accounts submitted by Executive Engineers should be carefully compared with those of the Controller, to guard against delay when the report is sent in.

17. His Honor the Lieutenant-Governor again observes with satisfaction the increased revenues derived from the canals, as evinced by the figured statements and reports of this year. The failures upon individual works are compensated by the satisfactory results shown on the two principal canals, and, as defects are remedied, the losses incurred upon the smaller works will become less year by year. The Agra Canal, starting with every advantage of construction and aided by the experience in matters of irrigation derived from the long-established canals, will, it is hoped, before many years, fulfil the objects for which it was constructed.

CHAPTER I.

REVENUE REPORT OF CHIEF ENGINEER OF IRRIGATION, NORTH-WESTERN PROVINCES, FOR THE YEAR 1874-75.

SECTION I.

FINANCIAL RESULTS.

Book increases and transfers to capital accounts.

A sum of Rs. 9,48,958 has been added to the various capital accounts. The distribution of this sum over canals and districts is shown in the following statement:—

Abstract showing Capitalization of Abatement of Assessment on Land taken up for Irrigation Projects.

Canals.	Districts.									Total.
	Aligarh.	Bareilly.	Bijnor.	Bulandshahr.	Cawnpore.	Dehra Dún.	Jhansi.	Meerut.	Muzaffarnagar.	
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
...	...	...	...	...	...	6,533 6 7	...	...	...	6,533 6 7
...	1,92,345 13 9	...	...	58,177 12 4	2,03,817 8 10	...	...	3,72,259 10 0	4,164 0 0	8,10,764 12 11
...	...	...	...	...	...	...	...	32,739 6 0	10,503 5 0	43,273 11 0
...	...	...	...	2,297 0 0	...	...	...	...	...	2,297 0 0
...	...	...	...	21,685 14 0	...	...	...	...	...	21,685 14 0
...	...	...	17,034 10 3	...	...	...	...	...	...	17,034 10 3
...	...	39,673 7 0	...	...	...	...	...	...	...	39,673 7 0
...	...	...	...	...	...	...	7,695 0 0	...	...	7,695 0 0
Total ...	1,92,345 13 9	39,673 7 0	17,034 10 3	82,160 10 4	2,03,817 8 10	6,533 6 7	7,695 0 0	4,04,999 0 0	14,717 5 0	9,48,957 13 9

This statement is still incomplete, but it is all that the Board of Revenue has up to this time been able to furnish in addition to particulars of a sum of Rs. 1,09,000, which was added under this same head of account to the Agra Canal in the year 1872-73. This, with the sum shown in the statement as added this year, comprises the capitalized value of all the diminished land revenue, of which the Board of Revenue, North-Western Provinces, has up to the present time been able to furnish details, in reply to a call from Government for full statements. It will be seen that no return has as yet been furnished for the abatement in the districts marginally noted on account of land occupied by the Ganges Canal. Nevertheless, the statements furnished by the Board went as far back as the year 1842 for some canals, and should apparently have been exhaustive. Both for the Ganges and Eastern Jumna Canals it is most difficult to obtain any trustworthy information on this point, on account of the distance of the time at which the land was acquired, and the want of all record of the circumstances. There is reason to believe that in the districts stated no remission of land revenue has been made on account of the Ganges and Eastern Jumna Canals, and consequently there is none to be capitalized. Endeavours will be made to obtain a complete statement for the next report.

Capitalization of diminution of land revenue.

Saháranpur.
Muttra.
Agra.
Etah.
Mainpuri.
Farukhabad.
Etáwah.

2. There has been an adjustment of Rs. 66,362 between the Agra and Ganges Canals. This is on account of some old plant transferred in 1868-69 from the Ganges to the Agra Canal, and for which a large book transfer was then made from the capital account of one canal to the other. Subsequently it has been found that no allowance had been made for depreciation, on which account the sum of Rs. 66,362 is now set off; and that amount has been re-transferred to the account of the Ganges Canal from that of the Agra Canal.

Write-back to Agra Canal on account of plant.

3. There has been a transfer of Rs. 1,03,754 from the capital account of the Ganges Canal to the suspense head on account of some material procured for the original remodelling scheme in the Etáwah branch, which under the present orders of Government is no longer required. The material will probably be utilized on the Lower Ganges Canal, and its cost, at a fair valuation, debited to the capital account of that canal.

Transfer of cost of material to stock account.

4. Table A. shows the capital account of each canal at the beginning and close of the year under review:—

Capital account of each canal.

TABLE A.

Works.	Outlay on construction, including share of establishment charges.		
	To end of 1873-74.	During 1874-75.	To end of 1874-75.
	Rs.	Rs.	Rs.
Ganges Canal	2,64,46,253	12,30,959	2,76,77,212
Lower Ganges Canal	31,87,863	30,37,157	62,25,020
Dún Canals	5,79,073	17,534	5,96,607
Rohilkund Canals	11,90,970	1,72,481	13,63,451
Bijnor Canals			
Eastern Jumna Canal	20,77,417	1,17,277	21,94,694
Agra Canal	55,12,445	9,36,190	64,48,635
Agra Irrigation Works	2,21,970	...	2,21,970
Bundelkund Irrigation Works	74,406	8,168	82,574
Ditto Survey	2,30,490	44,964	2,75,454
Eastern Ganges Canal	2,70,741	520	2,71,261
Total ...	3,97,91,628	55,65,250	4,53,56,878

The total increase for this year has been Rs. 55,65,250, distributed thus:—

Works in operation	Rs.	24,82,609
„ under construction	„	30,82,641

and the outlay to the end of the year has been Rs. 4,53,56,878, similarly distributed as below:—

Works in operation	Rs.	3,83,63,173
„ under construction	„	67,71,735
„ abandoned	„	2,21,970

The outlay under works in operation has been increased by a sum of 64½ lakhs on account of the Agra Canal, which began to irrigate in rabi 1874-75, and the percentage of revenue to capital outlay for works bringing in revenue has been proportionately diminished.

Income and profit of canals.

5. The total income of the canals was Rs. 38,14,479, of which Rs. 29,55,606 was assessed by canal officers, and Rs. 8,58,875 by revenue officers.

The working expenses were Rs. 13,24,932, so that the net revenue was Rs. 24,89,547, and this represents a profit of 6·49 on the capital outlay of Rs. 3,83,63,173, as it stood at the close of the year.

To make a proper comparison with the results of previous years, however, the Agra Canal should be excluded from both capital and revenue accounts, and if this be done, the total profits on works in operation will be Rs. 25,05,337, which is 7·84 upon the capital of Rs. 3,19,14,538.

Gross revenue by sub-heads.

6. The following table shows the details of revenue assessed by canal officers under its various heads :—

Year.	Occupier's rate.	Owner's rate.	Navigation.	Water power.	Miscellaneous.	Plantation.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1871-72	19,67,596	...	58,929	59,378	21,720	68,110	21,75,733
1872-73	21,21,186	...	32,494	57,512	17,762	83,695	23,12,649
1873-74	24,41,369	...	33,067	69,093	29,606	88,335	26,61,470
1874-75	27,09,254	19,722	33,429	68,387	32,813	92,001	29,55,606

There is an increase under all but water power; a steady progress is observable under all the more important heads for the last four years; the decrease under water power is exceptional and due to lock accidents; a large increase may be shortly anticipated to this head. Water-rate forms 92 per cent. of the increase as well as of the whole revenue. The increase was distributed over canals as follows :—

	Rs.	Percentage of increase to last year's revenue.
Ganges Canal	2,02,384	10·04
Eastern Jumna Canal	72,155	13·13
Dún Canal	2,330	4·39
Bundelkund Canal	810	18·67

Of the total increase Rs. 19,722 was on account of owner's rate assessed this year for the first time. The returns of this rate are very incomplete, and those shown by Superintending Engineers and by Controller in his part XB. do not agree. The figures of Superintending Engineers have been adopted, but it is probable that some time must elapse before these accounts become more regular. A later return shows this item to have amounted to Rs. 19,142.

Details of income and expenditure on each canal.

7. Table B shows details of income and expenditure charged against revenue on each canal :—

TABLE B.

Works.	Gross revenue.	CHARGES.			Net profit or loss.
		EXPENDITURE.			
		Maintenance, &c.	Direction and executive establishment, including remission.	Total.	
	Rs.	Rs.	Rs.	Rs.	Rs.
Ganges Canal	22,16,650	4,46,058	5,41,574	9,87,632	12,29,018
Eastern Jumna Canal	6,21,374	89,762	1,13,503	2,03,265	4,18,109
Dún Canal	52,284	12,430	14,381	26,811	25,473
Bundelkund Canals	27,632	16,195	35,550	51,745	—24,113
Agra Canal	3,396	1,201	2,263	3,464	—68
Bundelkund Canals	29,970	36,372	9,388	45,760	—15,790
	4,800	3,046	3,209	6,255	— 1,955
Total ...	29,55,606	6,05,064	7,19,868	13,24,932	16,30,674

The working expenses amounted to Rs. 13,24,932 including remissions, which is Rs. 74,774 more than the expenses of last year; of the increase Rs. 45,760 was due to the Agra Canal, now for the first time included in revenue accounts. Some increase is also due to expensive works, such as the renewals of locks charged now to revenue, and a part to the larger areas of land brought under irrigation chiefly by the development of distributaries in the Etáwah Division.

Indirect revenue.

8. The amount of indirect revenue assessed by revenue officers and credited in Controller's capital and revenue accounts for the year is Rs. 5,91,499, which corresponds to the returns furnished by the Board of Revenue for last year. But subsequently to the preparation of Controller's accounts, a revised return has been received from the Board for all canal-irrigated districts; the result is a credit of Rs. 8,58,873 for all districts in which the settlement has been revised since the introduction of canal irrigation.

Profits from direct and indirect income.

9. Table C shows the profits from direct and indirect income for the last eight years, calculated, as usual, on the capital expended at the beginning of the year :—

TABLE C.

Year.	Capital at beginning of each year.	PROFIT FROM DIRECT INCOME.		PROFIT FROM DIRECT AND INDIRECT INCOME.	
		Amount.	Percentage on capital.	Amount.	Percentage on capital.
	Rs.	Rs.		Rs.	
1868-69	2,58,73,065	21,25,828	8·21	24,72,813	9·55
1869-70	2,63,90,002	13,69,035	5·18	17,17,179	6·51
1870-71	2,71,46,310	13,84,746	5·10	17,52,436	6·45
1871-72	2,73,41,777	9,47,337	3·47	13,62,152	4·99
1872-73	2,92,86,499	10,14,382	3·46	16,66,701	5·35
1873-74	**2,97,94,121**	**14,10,960**	**4·73**	**20,02,479**	**6·71**
1874-75	**3,58,80,564**	**16,30,674**	**4·54**	**24,89,547**	**6·93**
1874-75—excluding Agra Canal	**3,02,68,119**	**16,46,464**	**5·42**	**25,05,337**	**8·25**

Realizations.

10. The gross realizations of direct canal revenue for the year were Rs. 27,17,374, and the working expenses, not including remissions which in the Controller's accounts are deducted from the revenue, were Rs. 13,08,607. Thus, the net revenue was Rs. 14,08,767, or 3·67 per cent. on the capital expenditure; this return is increased to 5·91 by the addition of indirect revenue, which raises the net profits to Rs. 22,67,640. Excluding the Agra Canal from the accounts, the profits were 4·55 for direct only, and 7·21 including indirect.

Interest charges.

11. The charges for interest for the year on works in operation amounted to Rs. 15,12,603, so that the net profit* for the year exceeded all charges by Rs. 7,55,037.

	Rs.
* Direct Revenue	14,08,767
Indirect	8,58,873
Total Net Revenue	22,67,640
Interest	15,12,603
Profit	7,55,037

The accumulated interest charges are Rs. 2,75,58,674, and the accumulated revenue is Rs. 1,87,48,941, which is Rs. 88,09,733 less than the interest charges; this sum, roughly speaking, represents what the State has had to make up from other sources to pay the interest upon borrowed capital.

	Rs.
Direct	1,37,46,434
Indirect	50,02,507
Total ...	1,87,48,931

Financial condition of the canals.

12. It appears, however, from paragraph 11 that the net profits exceed the annual charges at the present time by 7½ lakhs, and excluding the Agra Canal, which as a new work can hardly be included when showing the results of works in operation, the net profit for the year would have been

Rs. 10,14,861. Thus, the current returns are paying off the old charges at the rate shown by the figures below, which exhibit the accumulated unpaid interest charges as they have stood year by year:—

	Rs.
1869-70	1,03,80,137
1870-71	1,00,92,635
1871-72	97,28,875
1872-73	96,81,554
1873-74	92,97,488
1874-75	78,99,133

Progress towards paying off deficit.

13. The large stride of Rs. 13,98,355 made towards paying off the deficits in the current year is partly due to increased direct revenue, partly to a back credit of Rs. 3,34,852 on account of enhanced land revenue which in preceding years has been under-estimated. The above figures prove that, owing to the development of irrigation on the Eastern Jumna and Ganges Canals in the last six years, the yearly interest upon works in operation has been paid, and a sum of Rs. 24,81,004 has been paid towards working off the previous deficit.

Further, it may be observed that, while interest for the year on capital sunk on works of all kinds amounts to Rs. 17,43,522, the net profits from works in operation are Rs. 22,67,640: so that the works in operation pay the interest on capital sunk upon new works as well as their own, and carry on a balance of Rs. 5,24,118 towards paying off the old deficit.

The above remarks explain the financial position of the canals of these provinces, and may be verified by reference to tables of the Appendix pp. xxxii and xxxiii.

Objections of Government of India to deducing results for assessed revenue.

14. The Government of India, in its review* of last year's report, objects to this Government drawing conclusions on the financial results of the canals from the tables of assessed revenue, especially as regards accumulated revenue.

* No. 239-53I., dated July 26th, 1875, and No. 356I., dated 30th September.

It has been pointed out in the reply† of this Government, and may be here repeated, that, as this report is essentially an administrative report of the agricultural results of two harvests, included in a financial year, the financial results exhibited must be the outcome of those two harvests and not of others. Thus, the Chief Engineer in his review and tables shows the assessment of kharif and rabi, 1874-75, while the Controller shows collections for the same period, which however are, roughly speaking, the results of the operations of rabi, 1873-74, and kharif, 1874.

† No. C.-618½A., dated 30th December 1875.

When, however, showing net results of a series of years, which is done by comparing the accumulated net revenue with the accumulated interest charges, it is better, as pointed out by the Government of India, to show the net realizations. This has been done this year, and consequently the second financial table, p. xxxiii of Appendix, has been modified by showing Controller's figures in the column for net direct revenue both for and to the end of the year: by this means the interest charges are compared with realizations instead of assessments both for and to the end of the year.

Financial condition of the several canals.

15. A reference to the tables of financial results shows to which canals the profits are due. Table on p. xxxii shows that two works, the Jhánsi lakes and the new Agra Canal, do not pay their working expenses; and that three, the Rohilkund, Jhánsi lakes, and Agra Canal, do not pay their interest charges. Two works only, the Eastern Jumna and Hamírpur lakes, pay all charges by direct revenue realized. The Ganges Canal nearly does so, and its assessed revenue exceeds all charges by Rs. 1,11,947, so that next year the net receipts should pay all charges.

The deficit on the Rohilkund Canals has been yearly increasing, but may be expected now to have nearly reached its climax. Every canal shows a deficit in accumulated interest charges, except the Eastern Jumna Canal, which shows a clear balance of Rs. 47,17,604, after paying all expenses: this is due to the long-established irrigation, which renders the revenue more or less independent of seasons and vicissitudes to which the later canals are liable.

The deficit on the Ganges Canal is yearly decreasing by the net profits being each year considerably in excess of the charges; the heavy accumulation of charges is due to the length of time for which an expensively constructed irrigation project must work before it can pay.

Table D showing detailed results for Ganges and Eastern Jumna Canals.

16. Table D shows the financial results on the two principal canals for the last four years by comparing the charges with the gross revenue, and measuring the gross revenue and working expenses, respectively, by the capacity of the canals.

TABLE D.—GANGES CANAL.

Year.	Gross revenue from all sources.	Revenue management.	Percentage on gross revenue.	Maintenance charge.	Percentage on gross revenue.	Total working expense.	Percentage on gross revenue. EASTERN JUMNA CANAL.

Year.	Gross revenue from all sources.	Revenue management.	Percentage on gross revenue.	Maintenance charge.	Percentage on gross revenue.	Total working expense.	Percentage on gross revenue.	Gross Revenue. Per cubic foot of discharge at head.	Gross Revenue. Per mile of canal.	Gross Revenue. Per mile of distributary.	Gross Revenue. Per acre irrigated.	Working Expenses. Per cubic foot of discharge at head.	Working Expenses. Per mile of canal.	Working Expenses. Per mile of distributary.	Working Expenses. Per acre irrigated.	Percentage of profits on capital.
	Rs.	Rs.		Rs.		Rs.		Rs.	Rs.	Rs.		Rs.	Rs.	Rs.		
1871-72 ...	5,27,824	1,12,238	21·26	86,770	16·44	1,99,008	37·70	538	4,060	871	2·738	203	1,531	328	1·032	16·66
1872-73 ...	5,27,996	1,08,489	20·54	1,11,803	21·18	2,20,292	41·72	502	4,061	844	2·867	209	1,694	352	1·196	15·01
1873-74 ...	5,49,219	1,11,612	20·32	98,232	17·88	2,09,844	38·20	583	4,225	879	3·268	222	1,614	335	1·24	16·45
1874-75 ...	6,21,374	1,01,945	16·40	1,01,320	16·30	2,03,265	32·70	618	4,779	1,013	3·375	202	1,564	331	1·104	19·05

The result is interesting as enabling us to measure the results of the Ganges by those of the Eastern Jumna Canal, which for all irrigation purposes may be taken as a standard, judged by its results. Thus, it is interesting to observe that while the revenue of the Eastern Jumna Canal is far ahead of the Ganges Canal when measured by the irrigating capacity, the working expenses of the two canals do not differ much, the comparison being in some instances in favor of the Ganges Canal. This shows that the latter is worked at as small a cost as possible, and that the profits can be increased by economizing the water-power and improving the distribution at least up to the level of the Eastern Jumna Canal; these results are further discussed in the sections devoted to each canal.

Comparison of the results of the Jumna Canals.

17. Table E, which exhibits the cost of establishment side by side with the other expenditure, shows a reduction in cost of establishment employed on creating revenue and on maintaining the canals:—

Table E. showing cost of establishments.

TABLE E.

	Share of Establishment.			Other expenditure.	Percentage of Establishment to other expenditure.	
	Executive, including cost of collection and remission of revenue.	Direction.	Total.		1873-74.	1874-75.

Eastern Ganges Canal	416	...	416	104		
Miscellaneous	4,713	2,435	7,148	10,868		
Total ...	44,594	4,116	48,710	14,790		
Total original survey and miscellaneous works	5,02,869	1,53,449	6,56,318	39,81,912	15·46	13·9
Grand Total ...	11,23,274	2,52,912	13,76,186	75,42,581	18·63	18·2

The actual cost of the establishment for revenue management is exhibited as lower this year than it was last in spite of the revenue being more than 2 lakhs in excess of last year.

18. Tables F. and G. were received on November 26th, being due as soon after October 1st as possible. Table F.I. shows an uncollected balance for Meerut Division equal to that of last year. The balances in the Agra Division are very heavy, the largest sums being in the Etáwah, Farukhabad, and Mainpuri districts. Out of the total balance of Rs. 35,811 for these districts, Rs. 25,311 are doubtful; it would be well that some explanation of this should be furnished when submitting the statement. In all the other divisions the balances are in process of liquidation. The large sum in the Agra Division brings up the uncollected balance for the province to the large sum of Rs. 50,000.

Tables F and G. showing uncollected balances of revenue.

The cost of collections, as shown in column 14, is satisfactory, except in the case of the Agra District, where the percentage is 7·2, considerably in excess of the sanctioned limit.

Table F. II. is satisfactory as far as collections are concerned.

Table G. shows that the outstanding balances of last year have been accounted for during the year under review—a balance of Rs. 9, out of a total of Rs. 17,419, only remaining unaccounted for.

TABLE F.I.

Comparative Statement of the Demands, Collections, and Balances of Canal Occupier's Rates for the Revenue year 1874-75.

		Rs.
A.	Over 10 feet and under 15 feet	15
B.	„ 6 „ „ 10 „	12
C.	„ 6 „ „ „	6

And for rafting Timber and Bamboos as follows :—

Class.	Description.		Rs. A. P.
1st ...	Logs, whether round or squared, exceeding 2½ feet in girth	Per mile per 100 cubic feet or raft	0 0 9
2nd ...	Logs, less than 2½ feet, including karís, ballís, sleepers, &c., &c.	Ditto	0 0 4
3rd ...	Bamboos	Ditto	0 0 2

There are two modifications to be noticed this year—firstly, the rates for the Agra Canal introduced for the first time. These, as already noticed in page 42 of the Chief Engineer's review for last year, have been fixed higher than on any other canal, after full consideration given to the matter by both revenue and canal officers. Half rates have been levied during this the first irrigating season. The above rates were sanctioned by the Government of India in No. 688I., dated 17th November 1874.

Modification of rates of Agra Canal.

The next modification is on the Rohilkund Canals. After a lengthened correspondence, dating from 1871, it was decided, as a tentative measure, to increase the rates upon certain of the streams belonging to the Rohilkund Canal system, the irrigation of which was maintained by expensive Government works, the new rates to be levied by the acre and the crop, and not as heretofore by the number of waterings. These rates were sanctioned for the current year only; subsequently, on a report as to their effects being submitted, they have been sanctioned for a further period of four years.

Modification of rates of Rohilkund Canals.

Government of India, No. 591., dated 30th January 1874.

* Half of these rates will be levied from all lands irrigated from any water-course which is not constructed at the cost of Government for the fasl in which the water-course is opened and for the next succeeding fasl.

Areas irrigated.

20. Table H. shows the areas irrigated on each canal since 1868-69 :—

TABLE H.

YEAR.	Ganges Canal.	Eastern Jumna Canal.	Agra Canals.	Dún Canals.	Rohilkund Canals.	Bijnor Canals.	BUNDELKUND CANALS.		TOTAL.
							Jhánsi Lake.	Hamírpur Lakes.	
1868-69 ...	1,078,399	274,101	...	14,223	70,803	3,052	118	1,222	1,441,918
1869-70 ...	780,406	251,067	...	10,429	45,433	1,376	122	840	1,089,673
1870-71 ...	766,613	212,715	...	12,419	56,233	1,882	154	792	1,050,808
1871-72 ...	606,555	192,750	...	11,039	39,331	1,635	180	1,004	852,494
1872-73 ...	685,170	184,154	...	14,002	52,244	3,406	441	1,169	940,586
1873-74 ...	795,314	168,048	...	13,043	67,486	3,449	574	1,420	1,049,334
1874-75 ...	891,430	184,085	15,126	15,615	31,726	2,310	767	1,393	1,142,452

The total area irrigated this year was 93,018 acres more than that of last year, and only inferior to the famine year of 1868-69, being 296,466 acres less. The increase was due entirely to rabi, the total increase in which amounted to 108,033; there was a slight decrease in kharif.

The increase is distributed as follows :—

Ganges Canal	96,116
Eastern Jumna Canal	16,037
Agra Canal	18,126
Dún Canals	2,572

There was a decrease on the Rohilkund Canals of 35,760 due to the want of permanent weirs, the temporary dams having been destroyed by heavy floods. Permanent weirs are being now constructed on a regular sanctioned scheme.

Kharif and Rabi areas.

21. The falling off in kharif area is due to the season, while the general increase is due to the failure of winter rains, which fell very late in the lower districts, and afforded a successful season for the tail divisions of the Ganges Canal; the demand being so great in the Etáwah division, which only gets water in alternate weeks, that had it not been for the advanced state of the distributaries and energy of Lieutenant Corbett, it could never have been met.

The increase in the upper divisions was not so great as it otherwise would have been, on account of the saturation of the soil.

Comparison of area for past years.

22. It may be observed that while the kharif area has been almost stationary for the last four years, the kharif revenue has increased by Rs. 3,50,000; and that while the rabi area in the same period has increased by 2,33,000 acres, the revenue has increased by Rs. 4,00,000. This shows that the more valuable crops of sugarcane, indigo, &c., are gradually ousting the less valuable kharif crops, which only take water in dry years, and raise the figures in such a year as 1868-69.

Effect of the expensive crops upon the resources of the canal.

23. It is worthwhile noticing to what extent these two principal crops tax the resources of the canals, as the question is of importance in dry years, when the safety of the grain crops is a matter of vital importance.

The circumstances of sugar and indigo irrigation are very different. The saturation of land for a sugar crop, and the planting, extends from 1st January to 15th of March—the period in which the supply of the snow-fed rivers is least, and when a further heavy strain is made on our resources by the need in ordinary years of a copious watering to mature the wheat crop. In addition, sugar requires water every ten days throughout the hot weather. Indigo, on the other hand, is not sown till sugar-planting operations are terminated, cereals are reaped, the rivers have begun to rise, and there is a lull in other agricultural operations.

The increase of sugarcane therefore doubtless imperils the safety of the grain crops in a year of famine; but at the same time it is the establishment of this crop which enriches the country and creates the financial success of the canal.

Increase in rabi area.

24. Although, as remarked above, the kharif area has been almost stationary for four years, the increase on the years preceding the famine year is very great: thus, the area for the Ganges Canal in 1866-67 was 181,658, while the area for this year is 889,707.

In the rabi, apparently, there is still scope for increased area, which will be followed by a proportionate increase of revenue. The increase in the rabi area of the Etáwah Division was remarked last year; that increase has been supplemented by a further increase of 36,529 in the present year, making a total of 79,497 acres in two years. This is the result of the unequalled energy and success with which Lieutenant Corbett has improved the establishment confided to his charge, and the Chief Engineer earnestly recommends him for special promotion on very special grounds.

Review of principal kharif crops.

25. The following tables show the proportion of kharif to rabi area and the areas of the principal crops :—

YEAR.	Kharif.	Rabi.	PERCENTAGE OF KHARIF TO RABI.	
			Percentage of kharif.	Percentage of rabi.
1869-70	501,625	588,048	46·03	53·97
1870-71	396,399	654,409	37·72	62·28
1871-72	333,120	519,374	39·08	60·92
1872-73	353,621	586,965	37·59	62·41
1873-74	401,622	647,712	38·27	61·73
1874-75	389,707	752,745	33·15	66·85

Table showing areas of the four principal crops irrigated for the last six years.

Class.	Crops.	1869-70	1870-71.	1871-72.	1872-73.	1873-74.	1874-75.
		Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1	Sugarcane	104,596	112,141	94,810	97,814	130,578	141,727
2	Rice	117,548	96,479	76,850	84,973	74,667	58,205
3	Indigo	130,248	118,897	119,617	130,985	144,094	156,271
4	Cotton	55,883	85,070	20,365	47,799	16,353	4,702

Rice is regaining its place on the Eastern Jumna Canal after the depression consequent on the rates being raised, as shown by the following figures :—

	Acres.	*Rate.*
1872-73	37,751	Rs. 3.
1873-74	21,480	„ 5.
1874-75	28,451	„ 5.

The Superintending Engineer considers that it will be a question whether it is not advisable to raise the rates still further on sanitary grounds. The Chief Engineer deprecates any such action until long experience shows the impossibility of growing rice without desolating a country in the North-Western Provinces, any more than in other parts of India.

Cotton, having no longer a market for Europe, is gradually giving place to more profitable crops. Sugarcane and indigo have increased during the last ten years from 50,159 and 35,168, to 92,604 and 153,579, respectively, on the Ganges Canal. Cotton and rice have gone down, on the other hand, on the same canal, from 40,431 and 41,754 in 1869, to 2,276 and 18,841 acres, respectively, in 1875.

Rabi crops.

26. Amongst the grain crops there is a satisfactory increase in the better class, such as :—

Wheat	(increase, 43,215)
Barley	(increase, 16,315)

The percentages of wheat to the whole rabi area on the Ganges and Eastern Jumna Canals are 54 and 87 respectively. The area of barley on the Ganges Canal is 33 per cent. of the total area; the following statement shows the proportion of these two principal crops watered by the three lower divisions of the Ganges Canal :—

Division.	PERCENTAGE TO AREA OF THESE CROPS IRRIGATED BY THE WHOLE CANAL.	
	Wheat.	Barley.
Aligarh	20	23
Etáwah	21	37
Cawnpore...	12	31

68 per cent. of the whole irrigated area of the canal was effected by the above three divisions.

Flow and lift irrigation.

27. The following table shows the proportion of flow to lift :—

Year.	Flow.	Lift.
1870-71	74·1	25·9
1871-72	76·0	24·0
1872-73	72·3	27·7
1873-74	71·2	28·8
1874-75	68·7	31·3

The area of lift is increasing. The increase of lift area is principally on the Ganges Canal, the following being the proportion for the last four years :—

	Flow.	*Lift.*
1871-72	73·34	26·66
1872-73	68·16	31·84
1873-74	68·31	31·69
1874-75	65·31	34·69

The Superintending Engineer considers this an unsatisfactory result after all the money spent upon making high-level distributaries, but he explains further on that the increase this year is due partly to the high demand in rabi and partly to the area of irrigation from natural streams fed by canals, which is all lift, and which forms 5 per cent. of the whole area of Aligarh.

The Superintending Engineer will be asked to make a detailed comparison between the areas of flow and lift respectively in the Someyra system of distributaries of the Aligarh Division, before and after the raising of surface in distributaries, and to exclude altogether from proportions of lift and flow in future years the areas of river irrigation which afford a sensible contribution to the income of the Ganges Canal. A charge of Re. 1 per acre is levied on irrigation from rivers which is effected at a time when the rivers would be dry but for the inflow of water from canal escapes.

The proportions of flow to lift in various divisions of the Ganges Canal are given below :—

	Flow.	*Lift.*
Meerut	81·75	18·25
Bulandshahr	85·74	14·26
Aligarh	60·43	39·57
Cawnpore	45·73	54·27
Etáwah	55·29	44·41

The increase in lift is doubtless partially due, as suggested by the Executive Engineer, Bulandshahr Division, to the abandonment of canal irrigation in highly saturated low-lying lands.

28. The experiments upon reclaiming úsar soil have been this year brought to a conclusion. The results show that úsar soil can be reclaimed by laying a layer of silt upon it; but this process is not remunerative, because the cost of reclaiming the land has been found to be equal to the cost of new good land.

Úsar experiments.

It has been found, however, that trees can be profitably grown by planting them in pits filled with good soil. This small outlay is only requisite once. When the trees get well rooted and take a hold of the ground, they want no more help, and the leaf-fall of the trees will in time create a mould on the úsar which intervenes between the pits.

The experiments, which have been very carefully carried out by Mr. MacArthur for the last four years, have been discontinued, and operations will now be confined to planting out úsar lands, as described above.

SECTION III.

First Circle of Superintendence.

Ganges Canal.

29. The classification and mileage of main canal and distributaries have been definitely fixed for the year under review by resolution No. 942 W. of 1875. The length of main canal and branches open for purposes of revenue and maintenance is 574 miles. In previous reports it has been variously taken at from 654 to 617 miles. Out of 618 miles, which will hereafter be classed as "main canal and branches," a length of 44 miles, on the Anúpshahr branch, which is at present unused and only dry bed, is now excluded. The length of distributaries open for the year was 3,346 : definite notice will hereafter be given as other lengths come into operation. Similar statements will be furnished for the other canals.

Mileage of canal and distributaries.

30. The capital account at the beginning of the year stood at Rs. 2,64,46,253, and it was increased during the year to Rs. 2,76,77,212. Out of the increased debit of Rs. 12,30,959 a sum of Rs. 8,10,765 was a book entry representing the capitalized revenue of an area of 21,465 acres in five districts through which the Ganges Canal runs. There was a gross expenditure of Rs. 4,60,968 upon works and tools and plant, and the share of establishment debited to them, the net expenditure being reduced to Rs. 4, 20,194 by decrease in stock balances and receipts on capital account as shown in Table I.

Capital account.

31. The expenditure on works is small as compared with that upon plant. This is accounted for by two causes, *firstly*, because there was a write-back of Rs. 1,03,754 in Etáwah Division from capital to stock, on account of materials collected at sites of bridges to carry out the old scheme of remodelling, which has now been discarded. This material has been brought on to stock in order that it may be utilised on the Lower Ganges Canal works. In spite of this large addition thus made to stock, it is satisfactory to observe that the general stock of the canal has

Expenditure on works.

been reduced : stock, tools and plant has been largely increased by a transfer of Rs. 66,362 from the capital account of the Agra Canal referred to in paragraph 2.

32. The net direct assessed revenue was Rs. 12,29,018, which gives a return of 4·44 on the capital sunk at the end of the year : last year the corresponding return was 4·08.

Net profit on capital.

The indirect income or enhancement of land revenue in districts assessed since the introduction of irrigation was Rs. 5,61,847, according to the revised statement furnished this year by the Board of Revenue. This raises the profits on capital to 6·47, against 5·52 of the preceding year, on capital sunk at the end of the year.

Table I.—*Ganges Canal.*

	Head Works.	Main Canal and Branches.	Distributaries.	Total.
	Rs.	Rs.	Rs.	Rs.
Actual outlay	5,459	1,20,707	1,33,950	2,60,116
Share of Tools and Plant	2,109	49,554	53,771	1,05,434
Total	7,568	1,70,261	1,87,721	3,65,550
Share of Executive Establishment				76,189
„ Direction				19,229
Total				95,418
Deduct decrease in stock and receipts on capital account				40,774
Add capitalization of abatement of land revenue				8,10,765
Total				12,30,959

33. Table J shows the particulars of direct income, expenditure, and profit for the last three years; the percentages according to past custom are calculated in this table on the capital expenditure at the beginning of the year instead of at the end.

Table J.

Particulars.	1872-73.	1873-74.	1874-75.
	Rs.	Rs.	Rs.
Direct income	17,03,032	20,14,266	22,16,650
Expenditure	9,95,387	9,35,258	9,87,632
Net return	7,07,645	10,79,008	12,29,018
On a capital of	2,57,67,303	2,60,51,782	2,64,46,253
Or	2·74 per cent.	4·14 per cent.	4·64 per cent.

34. From table J it will be seen that the working expenses charged against the gross revenue amount to Rs. 9,87,632, which is more than the same charges for last year by Rs. 52,000, but less than the charges of 1872-73. These charges are divided into two heads—maintenance of works and management of the revenue. The details of the expenditure under these two heads are given in tables K and L, and a reference to these will show in what items the increase occurred. Under revenue management there has been a large increase of Rs. 12,500 in share of executive establishment and expenditure by civil officers; this is due to increase in gross revenue, upon the collection of which a larger proportion of cost consequently falls. Table O shows that the percentage of executive establishment to gross revenue is actually smaller than that of last year; so the increase in working expenses is a result of the law of expansion, and by no means to be deprecated.

Working expenses.

35. The remissions for the year are shown as Rs. 14,399, being taken from Controller's accounts in Part XB. Superintending Engineer shows as remissions Rs. 2,189, which is lower than usual. The Chief Engineer takes the remissions actually brought to account and includes them in the working expenses.

Remissions.

36. Table L shows details of expenditure on maintenance and on works of improvement, which are renewals and which are charged against the revenue, instead of the cost being added to the capital account. There is an increase under repairs of Rs. 13,367, due principally to serious repairs to locks; there is also an increase on works of improvement of nearly Rs. 22,000, due to the rebuilding of locks; this will form a heavy item for some time to come against the revenue account. It is satisfactory to notice that there is no material increase in the establishment charges under maintenance. The material decrease in these charges since 1872-73 is due to a larger percentage of the general establishment being charged to original works

against capital. The decrease in direction charges under both revenue management and maintenance is due to reductions in cost of the directing establishment of the provinces carried out last year.

TABLE K.—*Revenue Management, Ganges Canal.*

1873-74	18,74,027	...	33,038	34,301	18,597	54,303	20,14,266
1874-75	20,56,186	12,007	33,416	31,057	23,373	60,011	22,16,050

Remarks on receipts under owner's rate.

38. The net increase is Rs. 2,02,384, and the revenue is higher than in any years since 1868-69. Of the increase, 99 per cent. is due to occupier's rate, which forms 93 per cent. of the whole revenue. The owner's rate, which is one-third of the occupier's rate, and is levied on land which has been irrigated during the current settlement, is shown by Superintending Engineer to be Rs. 12,007, but as this is the first year in which the rate has been levied, and as the district officers have not yet furnished returns, these figures are open to modification.* The matter will be discussed in section VI. on the enhancement of land revenue. There is a decrease under water-power, due to the mills being closed in several locks which are under repair.

* A later return shows Rs. 11,427 as assessed by Collectors.

Water-power.

Construction of flour mills.

39. The utilization of the great water-power of the canal has received much attention during the year. Mr. Bond, the Engineer of the Commissariat mills at Cawnpore, was deputed to examine and report upon the mills of both the principal canals with especial reference to the requirements for sugar-pressing, and to suggest improvements and additional requirements. Mr. Bond's report was received in January 1875, and has been reviewed in a *Resolution of this Government. The conclusions come to were, that flour mills of a simple type, to suit local requirements, should be constructed at all falls where water-power is available, and that improvements should be carried out in existing flour mills as they need repairs; that sugar mills should be constructed at Bhola, Chitaura, Dásna, and Saláwa. The last recommendation is made principally on account of the successful results attained by a small experimental mill at Bhola in Meerut Division, which, consisting of small horizontal rollers, worked by an overshot wheel of four-horse-power, crushes a maund of cane in five minutes—a work which occupies forty minutes in the native mills. As it is calculated that the sugarcane produced by irrigation last year when converted into marketable form was worth two and a quarter million sterling, there is evidently a large trade for the mills to attract and to develope, if Government provides the means of expressing the juice of the cane in a cheap and expeditious manner.

Character of the results of the season.

40. The steadiness of the kharíf area and the increase in value of the crops on this canal has been already noticed in the section upon agricultural statements. The remark of the Superintending Engineer, that there could not have been a shorter kharif than that of 1874, characterises briefly the promising character of the present kharif returns: the rabi area is considerably influenced by the seasons beyond a certain point, and is capable of indefinite expansion, as the resources of the canal are more elastic at that season of the year. Thus, for instance, the duty in Aligarh during kharif was only 80 acres per cubic foot, while in rabi it was 270. The share borne by each division has been already reviewed.

Plantations.

41. The report has not been forwarded in time to issue previous to this report.

Navigation.

42. The navigation returns are reviewed at the end of this section.

Duty and cost of distributaries.

43. Major Moncrieff gives some interesting results of duty and cost of distributaries, some of which are curious enough to transcribe in these pages.

Statistics of Distributaries.

Divisions.	Distributary.	Miles.	Proportion of cost to revenue.	Cost per mile.	Acres per mile.	Cost of irrigating 100 acres.
Northern	Right main	120	·127	27	214	13
	Kankhal	12	·624	33	52	62
Anúpshahr	Salárpur	13	·073	83	326	25
	Miranpur	16	·169	34	64	53
Meerut	Bhola, right	49	·046	35	291	12
	Ditto, left	32	·065	40	156	26
Bulandshahr	Left Dásna	73	·038	29	306	9
	Right sub-division ...	134	·242	51	96	53
Aligarh	Palra	62	·036	37	456	8
	Sitárpur	34	·073	50	352	14
	Koil	59	·330	108	162	68
Cawnpore	Shiurájpur	15	·04	44	651	7
	Sukhi	10	·18	49	166	29
Etáwah	Kandhesi	18	·062	60	431	14
	Muhammadabad ...	14	·120	59	213	28

The selection made in the above table, which shows the highest and lowest average per mile in each division, amply bears out his remark that the cost of irrigating 100 acres is inversely proportional to the number of acres irrigated per mile; or, in other words, that the cost of irrigation decreases in the same ratio that the number of acres per mile increases; which proves more conclusively than any previous returns, as the Superintending, Engineer explains, that concentrated irrigation is the most profitable.

Water distribution.

44. The theory and practice of water distribution has received further attention from Mr. J. S. Beresford, Executive Engineer, Anúpshahr Division, who has lately forwarded to Government a scientific essay upon the subject. In this he discusses the question of the quantity of water theoretically and practically spread over the fields, and the causes which tend to diminish the theoretical quantity discharged from the main canal, as well as from the distributary head. This essay will presently be printed with the conclusions which the Government has formed upon it; but its publication in the revenue report will be deferred until next year. It is the object of Mr. Beresford's essay to measure the waste which occurs in each link of the column of distribution; and, by representing each link as an algebraical symbol, to bring the process under a more scientific control than is exercised at present. Every attempt to reduce any of the waste factors of the system is a step towards economy of distribution. Mr. Beresford's present aim is to gain a knowledge of the village water-courses, whose imperfections constitute no doubt a principal factor in the chain of waste in his division. The desired information, as suggested by him, may easily be obtained by making the amins in the slack season

* No. 642W., dated 15th May 1875.

trace the water-courses out on the village maps. The early adoption of this practice is desired from all Executive Engineers.

Volume in the canal and duty.

45. Table VIII of Superintending Engineer's review gives the average quantity of water passing into the canal for kharif and rabi, and also the quantity expended, which is calculated by deducting that passed out by the escapes. The volumes are shewn in the margin. The supply passed in for kharif was less than that of the previous year—a season of high demand—yet the area irrigated this year was greater, and the duty consequently performed by the water much higher; standing for the two years at 54·2 and 61·7 acres per cubic foot of supply.

Average supply passing Roorkee.	
Kharif, 122 days	4,678 c. ft.
Rabi, 167 „	4,563 „
Whole year, 289 days	4,612 „
Consumption deducting water discharged at Escapes.	
Kharif	3,585
Rabi	3,832
Year	3,733

The duties on the Eastern Jumna Canal for the corresponding two seasons were 68·5 and 85·7 respectively.

A larger supply was passed in and utilised for rabi than last year; the quantity utilised, area, and duty for two years stand as shewn below:—

	Volume.	*Area.*	*Duty.*
1873-74 ...	... 3,608	507,472	140
1874-75 ...	... 3,832	602,815	157

In kharif, with a smaller volume available, a larger area was irrigated, and a higher duty attained in a season when water would not be required, save for crops irrigated independently of rainfall; while in rabi volume, area and duty increased proportionately with the demand.

Comparison of water duty on Ganges and Eastern Jumna Canals.

46. The following table compares the duties obtained on the Ganges and Eastern Jumna Canals for the last eleven years:—

	Acres irrigated per cubic foot per second.				Occupier's rate per cubic foot per second.			
	Of head discharge.		*Of actual consumption.*		*Of head discharge.*		*Of actual consumption.*	
	Ganges Canal	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.	Ganges Canal.	Eastern Jumna Canal.
1865-66	33	145	...	...	294	374	...	...
1866-67	138	224	154	224	307	498	343	498
1867-68	135	196	156	208	314	496	354	527
1868-69	218	285	232	291	477	623	487	625
1869-70	160	246	188	246	380	572	419	572
1870-71	177	223	198	227	411	572	443	582
1871-72	144	196	188	205	340	507	442	531
1872-73	143	175	162	184	328	468	378	492
1873-74	168	180	191	188	397	539	452	502
1874-75	193	183	239	197	440	571	551	614

This year the duty on volume at head, on the Ganges Canal, is better than in any previous year except 1868-69, and the duty on actual consumption is better than the duty of that year; this is principally due to the large rabi area. The duty on the Eastern Jumna Canal has been exceeded in many previous years; at the same time the duty is higher than it was last year and yet last year, it was reported that the supply attainable from the river was at times insufficient to meet the demand, while throughout this year the supply both in river and canal was at all times sufficient for the demand. This is not due to a high rabi duty, but solely to kharif—the season in which the strain last year occurred, and in which, apparently, there was no strain this year.

See Superintending Engineer's Report for 1873-74, page 3B. of Revenue Report, 1873-74.

The duty on the Ganges Canal has been considerably higher than on the Eastern Jumna Canal this year. This is due to the favourable rabi season of the Lower Doab, which affected the tail divisions of the Ganges Canal. At the same time, with a lower duty, a higher revenue is derived from the Eastern Jumna Canal. This result is borne out by Table D, which shews the gross revenue per acre to be 2·487 on the Ganges Canal, while it is 3·375 on the Eastern Jumna Canal. The cause of this is the greater proportion of first-class irrigation on the Eastern Jumna Canal, the percentages of these crops to the whole area being 38 per cent. on the latter canal, and only 12 on the Ganges Canal. This aspect of the question leads us to look for larger revenues for kharif irrigation on the Ganges Canal, as the more highly priced crops oust the less valuable grain crops; this process, it has been already remarked, has been going on for some years.

Table N.

Measuring duty and revenue by capacity.

47. The rapid increase shewn on the gross revenue of the Ganges Canal within a certain period by Table N, while the working expenses vary between fixed points for the same period, is a proof of its excellent administration, and gives promise of the best results in the future:—

TABLE N.—GANGES CANAL.

Year and Crop.	Length of canal.	Length of distributaries.	Number of villages irrigating.	Average supply passing Roorkee.	Area irrigated in acres. Total. Kharif and rabi.	Area irrigated in acres. Total. Whole year.	Area irrigated in acres. Per cubic foot of supply. Kharif and rabi.	Area irrigated in acres. Per cubic foot of supply. Whole year.	Area irrigated in acres. Per mile of Rajbaha. Percentage of establishment on maintenance and revenue management.

48. Table O., as already observed in paragraph 23, shows the diminution of cost of the most expensive branch of establishment.

TABLE O.—*Ganges Canal.*

Particulars.	1872-73.	1873-74.	1874-75.
Works (maintenance)	4·2	2·8	2·62
Revenue management	16·7	13·78	13·04

But for the large sums expended on the renewal of locks and other expensive works on the Ganges Canal and Eastern Jumna Canal, which are charged to revenue, the profits would have stood as below :—

	Ganges Canal.	Eastern Jumna Canal.
	Rs.	Rs.
Gross Revenue	22,16,650	6,21,374
Working expenses	9,27,347	1,93,971
Net Revenue	12,89,303	4,27,403
Percentage on capital	4·65	20·5

Balances of water-rate and miscellaneous collections.

49. The Superintending Engineer shows an uncollected balance of Rs. 13,068 for water-rate, and of Rs. 77,779 for miscellaneous revenue. A more trustworthy report on the first will be found in section I, which gives the results of the Board's statement. It is remarked that the balances of miscellaneous revenue are very heavy, but no explanation is afforded.

Irrigation contracts.

50. Irrigation contracts do not appear to be increasing. Captain Howard reports that, out of 12 contracts applied for, one only was accepted. In the majority of cases the applicants refused the terms proposed as too disadvantageous to them. The terms offered were the average payments of the last six years less 5 per cent. Captain Howard is of opinion that under the present conditions of water being cheap and plentiful, and there being no necessity for economy, the contract is a highly speculative transaction to both parties.

NAVIGATION REPORT.

Gross revenue.

51. The gross revenue for the year was Rs. 33,186-5-1 for the regular navigation, and there is a further item of Rs. 230-2-3 for navigation in the Northern Division for the use of the divisional boats which have to be maintained for the head works of the canal. These two items will be found in statement I. C., the comparative abstract of revenue.

The revenue of Rs. 33,186-5-1 is made up of the following items :—

	Rs.	A.	P.
Rate on Government boats	1,020	13	6
„ private „	19,680	11	9
„ rafts „	4,909	9	7
Sundries, including fines	166	12	10
Boating operations net profit	7,408	5	5
Total ...	33,186	5	1

Differences between Controller's and Traffic Manager's figures.

52. The Controller, in reporting upon these accounts, says that the last item is the only one in the year's assessments which is susceptible of audit. In the accounts of previous years this item has caused confusion and rendered the Traffic Manager's accounts irreconcilable with those of the Controller. The reason of this was that the Traffic Manager quoted the gross receipts on this item, while the Controller quoted only the net profits, as now; but in his review of the operations of this year he shows how this net result is obtained, and his figures agree with those of the Traffic Manager. The net result is thus obtained :—

Receipts.

	Rs.	A.	P.	Rs.	A.	P.
For the year	41,939	13	9			
Outstandings	4,528	9	3			
				46,468	7	0
Expenditure.						
Outstandings	1,630	8	9			
For the year	37,429	8	10			
				39,060	1	7
Net profit ...				7,408	5	5

Adding, then, the above gross receipts to the other items, we shall have gross revenue for the year Rs. 72,246-7-8. The Controller shows the following expenditure :—

	Rs.	A.	P.	Rs.	A.	P.
Navigation Establishment ...	9,714	10	6			
Refunds	4,643	8	0			
				14,358	2	6
And adding to this the gross expenditure on boating operations ...				39,060	1	7
we have a total expenditure of				53,418	4	1

and a net revenue of Rs. 18,828-2-7. This does not quite agree with the accounts of the Traffic Manager, forwarded by Superintending Engineer. These show total receipts Rs. 78,304-8-5, or Rs. 6,058-1-9 more than those of Controller, as elucidated above.

This last item consists of outstandings which Traffic Manager claims as part of the assessments for the year. As expenditure, the Traffic Manager shows Rs. 51,855-1-2 against Rs. 53,418-4-1 shown by Controller,—net difference being Rs. 1,563-2-11. This difference is caused by an item of Rs. 1,630-8-9 outstanding balances which the Traffic Manager has omitted, while, on the other hand, Traffic Manager shows his refunds too much by Rs. 67-5-10; the net difference less shown by Traffic Manager is therefore Rs. 1,563-2-11.

Thus, by including outstanding credit and excluding outstanding debit, the Traffic Manager shows his net profits as Rs. 26,449-7-3, against the Rs. 18,828-2-7 shown by Controller.

The Superintending Engineer adds to the expenditure the following items, which are outside the navigation operations, but are debited against them :—

	Rs.	A.	P.
Tools and plant, ...	3,667	13	5
Locks	23,284	0	0
Total ...	26,951	13	5

and deducting this from the above net profits we shall have—

	Rs.	A.	P.
Loss shown by Superintending Engineer	502	6	2
Ditto ditto Controller	8,123	10	10

Detail of navigation and boating operations.

53. The appended statement No. 1 shows these results in detail :—

Detail of results.

54. Statement II. enables us to compare the receipts and expenditure under the various heads for the last four years, after the accounts have been elucidated, as above described. Any increase in the boating operations is followed by a corresponding increase of charges, and the net revenue on those operations is therefore at a stand-still. On the recognised tollage of boats and rafts the

decrease is entirely due to raftage, which is interrupted, owing to the repairs of locks, Saláwa being closed and rafts forbidden at Jauli :—

TABLE II.

	1871-72.	1872-73.	1873-74.	1874-75.

Total ...	47,433	46,202	44,643	80,380

Tollage of private boats.

55. The increase on tollage of private boats is satisfactory. It is to this source and to the raftage, when the locks are in order, that the Navigation Department must look for its revenue. The boating operations, which are carried out by boats belonging to Government, are valuable in that they afford a cheap mode of conveyance for Government materials.

The Traffic Manager has urged upon Government the advisability of taking the public traffic more into its own hands by building both passenger and cargo boats. Sanction has been given for a few additional cargo boats, and proposals have been received from a native contractor to carry on boat traffic with steam power. He has been advised to see the results of working with the "Victoria," a steam launch lately put upon the Ganges Canal above Saláwa Lock.

Ton mileage of the year.

56. The number of tons carried during the year was 81,496. The table on page 25 of Superintending Engineer's review shows a steady increase in traffic since 1870-71, when the number of tons carried was 24,795 only. The increase in ton mileage has been from 4,242,700 to 14,261,625.

The increase in number of boats has been 100. Under present rules each boat is charged an uniform rate of Rs. 4-8, irrespective of size, and the above figures show that the increase in profits is quite incommensurate with increase of traffic, owing to this rule; because boats of much larger beam have superseded the smaller craft with no advantage to Government. Rates, according to width of beam, are being tried on the Agra Canal. The Superintending Engineer remarks that, at a rate of one pie per ton per mile, the revenue from private boats would have been Rs. 74,175, instead of only Rs. 13,111. The rate on the Orissa Canal is two pies per ton per mile.

The value of goods carried is stated to have been Rs. 49,62,468.

57. A table of rates of up and down freights is quoted, as was done in last year's report. The down rates were higher for the longer distances than last year, but lower for short distances. The up rates were considerably lower throughout :—

TABLE III.

Table showing Freight ruling on Ganges Canal between Cawnpore and places named during 1874-75 *per* 100 *maunds of cargo.*

	Distance from Cawnpore in miles.	Down.			Up.		
		Highest.	Lowest.	Average.	Highest.	Lowest.	Average.
		Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.	Rs. A.
Hardwár	350	23 4	20 12	22 0	16 0	15 0	15 8
Roorkee	331	21 12	20 0	20 14	15 0	14 0	14 8
Khatauli	288	20 8	19 4	19 14	11 0	10 0	10 8
Nánu	272	17 8	15 8	10 8	10 0	9 0	9 8
Barotha	181	10 8	10 0	10 4	8 0	7 0	7 8
Tatárpur	144	5 4	4 0	4 10	4 8	3 8	4 0

An improvement is requisite in the preparation of returns of rates of navigation paid by the public. All our traffic almost is down-stream, and the down-stream tonnage is that which it is important to secure to the Canal. Down-stream rates must be carefully shown for long and short distances respectively.

SECTION IV.

2ND CIRCLE OF SUPERINTENDENCE.

I.—Eastern Jumna Canal.

Capital expenditure.

58. The capital sunk at the beginning of the year was Rs. 20,77,417, which was increased to Rs. 21,94,694 during the year by a net expenditure of Rs. 1,17,277; of this sum Rs. 43,274 is on account of capitalization of diminished land revenue on 1,049 acres of land in the Muzaffarnagar and Meerut Districts, occupied by canal works.

TABLE I.—*Eastern Jumna Canal.*

Particulars.	Main Canal and Branches.	Rájbahas.	TOTAL.
	Rs.	Rs.	Rs.

Add increase to stock and deduct receipts on capital account			2,530
Net increase to capital			1,17,277

Profit on direct income.

59. The net direct income (Table J.) was Rs. 4,18,109, being a return of 19·05 per cent. on the capital sunk at the end of the year, which is an increase of nearly 3 per cent. on last year's return, and is nearly equal to the high profit of 1870-71. This is most satisfactory, considering the book addition to capital of Rs. 43,274 this year. The percentage on capital sunk at the beginning of the year is 20·12.

GRAND TOTAL, K. AND L.	2,20,292	2,09,844	2,03,265

The increase this year is due to distributaries, and part of the increase is no doubt temporary. The decrease under revenue management is very satisfactory, so also the general reduction in all establishment charges. Considering the large increase in gross revenue of Rs. 93,490 in the last three years, and the increase of Rs. 10,652 in cost of repairs, the general increase of only Rs. 4,257 in working expenses is satisfactory. The high cost of collecting the revenue was noticed last year in paragraph 54 of Chief Engineer's review. This year the cost was only 4·88 on the revenue, or under the sanctioned 5 per cent. The cost was distributed as follows:—

Establishment under Collectors	0·20
Lumberdars	2·82
Patwáries	1·86

New patwári system.

The discontinuance of the patwári system was recommended for the districts of the Eastern Jumna Canal, but Government has ruled that no change should take place, as the present process is generally approved for other divisions both by canal and district officers.

Increase in revenue.

61. The Table M. shows that the increase in revenue has been almost entirely due to the water-rates:—

TABLE M.

Years.	Occupier's rate.	Owner's rate.	Navigation.	Water-power.	Miscellaneous.	Plantations.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1871-72 ...	4,97,838	...	10	9,434	2,073	18,470	5,27,825
1872-73 ...	4,91,596	...	118	8,238	3,147	24,839	5,27,996
1873-74 ...	5,01,306	...	29	11,643	5,164	31,078	5,49,219
1874-75 ...	5,73,333	891	13	14,695	3,608	28,834	6,21,374

The total gross revenue of Rs. 6,20,484, excluding owner's rate, has been only exceeded by that of 1868-69, which was Rs. 6,25,450. The Executive Engineer says that the increase of Rs. 3,000 upon water-power was due to the brisk competition at the auctions for the mills; as, however, the contractors made hardly any profit, so high a price must not be expected another year. The fact of the demand shows that it is desirable to erect more mills; the capacities of the Eastern Jumna Canal, as well as of the Ganges Canal, in this respect, are receiving the attention of the Government, and it is proposed to erect mills at Migchappar to supply the wants of the populous and increasing city of Saháranpur; introducing at the same time in the other established mills the improvement recommended by Mr. Bond, as opportunity offers.

Erection of mills on Eastern Jumna Canal.

63. There is a decrease in plantation revenue, but the revenue of last year was unusually large, and the revenue of the year is much greater than that of years previous to 1873-74.

Plantations.

Occupier's rates.

The increase in occupier's rate is due to the increase in area of 16,037, which was in the following crops:—

Sugar-cane	Rs. 7,372
Rice	„ 6,971
Wheat	„ 2,245
Pulses	„ 3,267

The increase was in the kharif crops. The rabi irrigation was small. In four years, the Executive Engineer remarks that the sugar area has increased by one-half, and has probably reached its limit, but a large addition may be expected when sugar-crushing mills are introduced. The increase in rice area this year has been already noticed in paragraph 22.

64. The loss of revenue through enhancement of the rate last year was calculated as Rs. 5,853. This year the gain from the same cause, in spite of the decrease in area since 1872-73, was Rs. 28,942.

Result of enhanced rates.

65. Considering the lateness of the winter rains, a larger rabi area might have been expected, but the ground of the Doab is over-saturated; one effect of the drainage now being carried out will be to increase the rabi area; if this be so, Government will be amply repaid for its present expenditure on drainage.

Effect of late rains on rabi area.

Table N. Volume and duty of water.

	1872.	1873	1874.
April	708	998	979
May	1,180	937	1,274
June	1,200	1,222	1,032

66. The figures of Table N. show that there was much less strain of the resources of the canal than last year; hence, the labors of the staff in respect of irrigation were comparatively light, but were nevertheless well performed. The average volume for April, May and June for the last three years is shown in the margin.

Duty and income measured by capacity.

67. The principal points to notice in Table N. are the increase in kharif duty and in the water-rate per acre for kharif.

TABLE N.—*Eastern Jumna Canal.*

These points have been noticed in connection with similar details for the Ganges Canal in section III.

Duty on distributaries.

68. Superintending Engineer remarks on the changes in order of merit of rájbahas as regards water duty. The data for the discharges of distributaries are not yet complete, some further information being required concerning the Nála group.

TABLE O.—*Eastern Jumna Canal.*

Revenue management	13·2	11·84	11·86	9·22

Proportion of establishment to revenue management and maintenance.

69. Table O. shows material decrease in executive establishment, both under revenue management and maintenance.

Contracts.

70. The Executive Engineer reports that contractors profited principally on kharif owing to the larger area under sugarcane. The profits for kharif and rabi, respectively, were Rs. 1,473 and Rs. 121.

DÚN CANALS.

Favourable results.

71. The results of the year, as shown by the usual tables given below, for the Dún Canals are the most favourable that have hitherto been attained. The increase has been principally in water-rates, due to the increased rabi area. There was a slight decrease in the revenue derived from mills, which the Executive Engineer attributes to collusion amongst the mill contractors.

TABLE O.—*Dún Canals.*

Year.	Occupier's rate.	Owner's rate.	Water-power.	Miscellaneous.	Plantations.	TOTAL.
	Rs.		Rs.	Rs.	Rs.	Rs.
1871-72	22,693	...	19.338	1,247	576	43,854
1872-73	25,663	...	21,443	1,942	767	49,814

1874-75	27,337	...	22,635	1,600	712	52,284

Financial Statistics.

Year.	Gross revenue.	Working expenses.	Net direct profit.	Percentage on capital.	Net direct and indirect profits.	Percentage on capital.	REMARKS.
	Rs.	Rs.	Rs.		Rs.		
1871-72 ...	43,854	26,385	17,496	3·18	22,243	4·04	The amount of indirect revenue in each of the years previous to 1874-75 is Rs. 4,747, and for 1874-75 it is Rs. 15,951.
1872-73 ...	49,815	25,470	24,345	4·34	29,092	5·18	
1873-74 ...	49,954	27,509	22,445	3·91	27,192	4·73	
1874-75 ...	52,284	26,811	25,473	4·27	41,424	6·94	

Gross and net revenue.

72. The gross revenue was Rs. 52,284 and the working expenses Rs. 26,811, leaving a net revenue of Rs. 25,473, a return of 4·27 per cent. on the capital sunk. The new credit for increase to land revenue was Rs. 15,951 for the year, which amount is credited since the year 1863-64 in place of the credit of Rs. 4,747 of the old valuation. Hence a large credit has to be made for past years. The effect of the year's credit is to raise the percentage on capital from 4·27 to 6·94. Turning to table xxxii., it is observed that there is a surplus of Rs. 15,188, after paying all interest and other charges. By the large credit of Rs. 1,91,412 for indirect revenue of previous years, the interest debt which stood last year at Rs. 3,02,502, is reduced to Rs. 1,68,990.

Raising rates on Dún Canals.

73. The question of raising the rates of these canals has not been yet brought before Government; but the necessary information is now ready, and the question will shortly be brought up. Had the Eastern Jumna Canal rates been levied in 1874-75, the income would have been Rs. 66,069, instead of Rs. 52,284. On the Bijapur Canal, the only one in which full rates are charged, there has been an interest of Rs. 567.

Jákhan Canal.

74. The most unprofitable of these lines is the Jákhan Canal, but although, owing to the poverty of the soil, a poor class of people has settled on it, and it does not pay its expenses, yet the abandonment of it would cause a large tract to relapse into jungle from which the operation of the canal has reclaimed it. This measure cannot be thought of, and the revenue account of the Dún Canals, can bear this strain until matters improve.

Outstandings.

75. The Superintending Engineer reports that outstanding debt on account of mills amounting to Rs. 4,045, is in course of liquidation by legal process.

Bundelkund Lakes.

Capital expenditure, Jhánsi Lakes.

76. The lakes at present under the control of the Irrigation Department are ten in number, one in Jhánsi and nine in Hamírpur. The capital expenditure on the Jhánsi Lakes, up to the end of 1874-75, was Rs. 81,587, of which Rs. 8,168 was debited in the accounts of the year, principally on account of the capitalization of land revenue.

Revenue on the Jhánsi Lakes.

77. The direct revenue for water-rates on the Jhánsi Lakes was Rs. 1,386, and the enhanced land revenue Rs. 1,299; the working expenses were Rs. 3,751, of which Rs. 2,010 was upon repairs, which are heavy on account of the bad repair of the works. There was a net loss, therefore, upon the year's operations of Rs. 1,741. On the Hamírpur Lakes, on the other hands there was a net gain of Rs. 410, which reduces the net loss of the division to Rs. 1,331.

Hamírpur Lakes.

78. The following table shows the revenue, expenditure, and net direct revenue on the Jhánsi and Hamírpur Lakes for three years:—

	REVENUE.		WORKING EXPENSES.		NET PROFIT OR LOSS.	
	Jhánsi.	Hamírpur.	Jhánsi.	Hamírpur.	Jhánsi.	Hamírpur.
1872-73	827	1,761	2,802	2,665	—1,997	—904
1873-74	1,098	3,239	3,799	3,993	—2,701	—7,504
1874-75	1,386	2,914	3,751	2,504	—2,365	410

The gross revenue on the lakes has therefore increased in the three years from Rs. 2,588 to Rs. 4,300. The repairs, as said before, are large on the Jhánsi Lakes; on the Hamírpur they are reduced this year by Rs. 1,205. In 1872-73, charges for renewals of Rs. 918 and Rs. 160 for the Hamírpur and Jhánsi Lakes, respectively, are included in the working expenses. Since that time all renewals have been charged as repairs. The fluctuations in charge are entirely due to this item.

Areas irrigated.

79. The area irrigated on the Jhánsi Lakes, exclusive of land subject to *ab-páshi* rights, was 767 acres, which was greater than last year's area by 193 acres. The area of Hamírpur was 1,395, a slight decrease on that of last year.

Income.

80. The increase in income of Jhánsi was Rs. 288, and on Hamírpur there was a decrease of Rs. 592. This was rather due to an abnormal credit in the previous year for land rent and water for building purposes than to a falling-off this year in irrigation.

Prospects of the lakes.

81. The Executive Engineer reports favourably of the Pachwára and Magarwára Lakes in the Jhánsi District, and increase in the income of these two may be looked for. The land irrigated by the others possesses *ab-páshi* rights, so that no rates can be levied, but, according to the terms of resolution No. C.853W., dated 6th July 1875, the land revenue of the irrigated area should be credited to the department which maintains the lakes. The same officer reports of the Hamírpur Lakes that a few improvements in the distributary system is all that is necessary to complete these works. As the district officers have recommended that the maintenance of the lakes should be taken up by Government without regard to their remunerativeness, it is probable that some steps will be taken to place them in a proper state of repair. The indirect benefits afforded to the country by the lakes are considered ample compensation for any direct loss incurred on their working. Estimates for the necessary works should be promptly submitted.

Indirect revenue.

82. The indirect income credited to the Jhánsi Lakes for enhancement of land revenue is stated at Rs. 1,299 annually, instead of Rs. 2,550 as stated in previous years. This considerably increases the accumulated loss on the operations of the Jhánsi works.

Agra Canal.

Capital account.

83. The capital sunk upon this canal at the end of the year was Rs. 64,48,635, of which Rs. 9,36,190 was spent during the year. This leaves a balance of Rs. 25,44,211 to be spent in order to complete the estimated outlay. The accumulated interest charges amount to Rs. 8,81,181. The forecast of the development of irrigation estimates that the canal will pay its working expenses after five years, and its yearly interest in the eleventh year.

TABLE I.—*Agra Canal.*

Particulars.	Head works.	Main canal and branches.	Distributaries.	Total.
	Rs.	Rs.	Rs.	Rs.

Add suspense account and deduct receipts on capital account				29,969
Add capitalization of abatement of land revenue				2,297
			Increase to capital account, Total	9,36,190

84. The results of the first season's irrigation is not unpromising. The assessments show that the forecast of the canal officers has not been too sanguine.

Result of the first season.

85. The position of the works as regards irrigating capability for the year was as follows:—The Hassanpur was the only distributary which was in a position to work properly, as it was the only one provided with an escape, and the demand for *'paleo'* was consequently well met. The irrigation on the other lines was cramped by the fact of the only escape being a tank of insufficient size. In the 1st Division, 60 miles of rájbahas on the Hassanpur, Hatim, and Hodal distributaries were giving water. In the 2nd Division, 39 miles on the Sahar, Kosi, and Shergarh distributaries. Irrigation from Hatim and Hassanpur began on 15th October; from Hodal at the end of November.

Condition of the works.

86. In the 1st Division, the cultivators, who are said to be principally small land-owners, held off on account of their fears as to how the new settlement would be affected, until the sowing season was over; but on the failure of the winter rains a demand for the sown area rapidly ensued, which area would have been sown had the canal existed or not. The total area was 9,448, and the revenue realizable was Rs. 13,054 for water-rate. There was a miscellaneous revenue of Rs. 2,336. The owner's rate is stated as Rs. 4,335, which is just one-third of the occupier's rate of Gurgaon and Muttra. It is probable that this is a mere estimate.

Irrigation effected in 1st Division.

87. In the 2nd Division, irrigation on the Sahar distributary began in November. The Kosi and Shergarh were meanwhile pushed on and became ready in January 1875. The area irrigated was 5,678, and the revenue from water-rate Rs. 7,468. By next rabi it is anticipated that five more distributaries will be ready—the Aring, Farah, Fatehpur Síkri, Agra, and Irádatnagar.

Irrigation, 2nd Division.

88. The number of villages supplied with water was 156, as detailed below:—

Villages irrigating.

Delhi ...	... 3	Muttra	... 60
Gurgaon ...	... 67	Agra	... 46

Half rates were levied this *fasl*. Had full rates been levied, the revenue would have been Rs. 58,769. These results are very promising.

89. Tables J., K., and L., framed on a similar principle to those of the Ganges and Eastern Jumna Canals, are subjoined for the purpose of comparing progressive results in future years.

Total working expenses, K. and L. ...	45,760

Agra Irrigation Works.

90. No final conclusion has been yet arrived at concerning the debit of these works. The Government of India has not yet agreed to removing their cost from the capital accounts of Irrigation Works of these Provinces; the latest proposal was, that the amount should be debited to the account of the Agra Canal on the ground that the Fatehpur Síkri rájbaha will provide irrigation for part of the lands once irrigated by these old works, but this has been shown in the reply of this Government to be an erroneous conclusion.

Question of wiping off Agra Irrigation Works from Irrigation Accounts.

SECTION V.

THIRD CIRCLE OF SUPERINTENDENCE.

Rohilkund Canals.

91. The expenditure up to the end of the year on these canals was Rs. 12,93,485, of which Rs. 1,72,481 was spent during the year. The direct revenue was Rs. 27,632, and the indirect Rs. 50,070, making a total of Rs. 77,702, and the working expenses Rs. 51,745, leaving a net profit of Rs. 25,957 toward paying off the year's interest of Rs. 49,815. A considerable reduction has been made in the cost of establishment.

Capital and Revenue accounts.

It is owing to the large amount of land revenue dependent on them that Government has persisted in carrying out the permanent weirs on the Kitcha and Kailas rivers, which are necessary to develope the irrigation. These works will be completed before the next rainy season, and a considerable increase of rice irrigation may be looked for in 1875. The rabi increase will date from November 1876.

The following table compares the areas for three successive years:—

	1872-73.	1873-74.	1874-75.
Annual	5,188	8,492	5,439
Kharif	15,602	26,173	6,802
Rabi	31,459	32,821	19,985
Total ...	52,244	67,486	31,726

92. The decrease in water-rate was Rs. 7,338, and in gross revenue Rs. 10,561. It is satisfactorily explained by the Executive Engineer that this decrease was due to external causes; unusually heavy rains in June destroyed prematurely earthen bunds which in the previous year lasted till September, and in the rabi the necessity for renewing the Kitcha earthern dam and for making many silt clearances after the severe floods delayed the commencement of irrigation until Christmas, when the rains put a stop to all demand. The head of the Kailas river had been choked up by similar causes, and a small supply from one river only was available. The occurrence of these outward circumstances can only be averted by permanent head-works, which are now in course of construction on the Kitcha and Kailas, and will be completed in 1875-76. The Executive Engineer confidently anticipates no more losses.

Causes of decrease in revenue.

Bijnor Canals.

93. On these canals the same causes have been at work as on the Rohilkund Canals, the revenue having fallen from Rs. 5,500 in 1873-74, to Rs. 3,396 in 1874-75, not sufficient to pay the working expenses, which were unusually high this year, owing to a heavy charge for extraordinary repairs on Nihtor Canal. The decrease in water-rate was Rs. 1,314 on Nagina, and Rs. 805 on Nihtor Canal.

Cause of falling-off of revenue.

94. The Chief Engineer recommends that the resident Provincial Executive Engineer may be entrusted with the charge of these canals, being placed *quoad* their maintenance and improvement under the Irrigation Branch, reporting direct to the Superintending Engineer.

Proposal to give over charge of canal to resident Provincial Engineer.

The converse plan has been a great success in the Dún, where Captain Willcocks, Executive Engineer of the Canal Division, carries out as well the works of the Building and Roads Branch.

These canals are far away from the ken of the Irrigation Department, and necessary repairs and works are carried out (as it is understood) by the tahsildár under the orders of the Collector.

SECTION VI.

ENHANCEMENT OF LAND REVENUE DUE TO CANALS.

95. The orders of Government calling for a more satisfactory settlement of the above question upon some fixed and definite principle have resulted in a revised statement of this item of canal revenue, which was furnished after the close of the accounts for the financial year 1874-75. Hence the old amounts are still shown in the accounts of the Controller, but the Chief Engineer's tables are modified according to these new figures, which may be taken as finally correct.

Revised statement of Land Revenue due to canals.

Resolution, General Revenue Department, No. 2472A, dated 3rd November 1873. Proceedings, Irrigation Department, $\frac{A}{A}$, January 1873, Nos. 8-44; June, 1873, 12-17.

96. The principle upon which the credit to the canals should be made was agreed upon by a meeting at which the Members of the Board, attended by their Secretary, and the two Secretaries to Government in the General and Irrigation Department, respectively, were present. The principle adopted was that the enhancement of land revenue due to the operation of canals should be valued at Re. 1 per acre on the areas allowed in each district, the area upon which this rate was to be applied being calculated by deducting the area irrigated at former settlements by wells and other natural sources from the area shown as irrigated in the current revision. This difference it was agreed to take as the increase in irrigation due to canals.

Principle upon which the credit is made.

The result is shown in the two statements printed at pp. xxx. and xxxi. of the Appendix, which show the indirect revenue due to the canals from the earliest of the new settlements to the end of 1874-75.

97. The sum total to be credited since 1859-60 is Rs. 50,02,507, and the present yearly credit, which is liable to increase as the revision of settlement of new districts progresses, is Rs. 8,58,873. It may be here noted that after a settlement is once completed no further addition to the land revenue can be made until the next revision of settlement takes place; therefore, although irrigation be spread in a district formerly irrigated, or be introduced into one which had no canal irrigation during the currency of the last settlement, no additional land revenue, of which "enhanced revenue due to canals" forms an item, can be assessed; and so no further additions credited to the canal on this account until the efflux of the new settlement. Provision is, however, made for such cases as these in the Canal Act, which empowers Government to levy an extra rate called owner's rate upon certain lands, from the improvement of which Government would otherwise derive no advantage beyond the bare occupier's rate.

Total credit.

98. The settlement has finally closed now in the districts of Dehra Dún, Saháranpur, Muzaffarnagar, Meerut, Bulandshahr, Aligarh, Farukhabad, Mainpuri, Etah, Etáwah, Bijnor, Jhánsi and Bareilly. The question can therefore be no further opened with regard to these districts until there is a new settlement. The districts now under settlement, and in which therefore changes may occur, are—Muttra, Agra, Cawnpore, and Hamírpur. It will be observed from the statement at page xxx. that a credit of Rs. 24,464 has been made on account of Cawnpore during the year under review. The settlement not being completed in this district, some further additions may be yet made.

Comparing the canal statement for this year with that of last year, drawn up according to the opinions of the several Settlement Officers, it is observed that the present statement is far more favourable to the canals, as it allows an additional total credit for past years of more than 17½ lakhs, and additional yearly credit of 2½ lakhs.

Comparison of the present with previous statement.

99. The progress made this year in the settlement of the question of owner's rate may be briefly described. Under the late administration,* it was deemed advisable, on grounds of expediency, to exclude from liability to the rate estates into which irrigation had been introduced during the currency of the settlement, and had been since extended. The reason for excluding these was the great difficulty anticipated in defining the fields which the spread of irrigation had benefited, and the consequent difficulty of making the incidence of the rate just. Sir John Strachey, however, does not consider this difficulty insuperable, and lays down certain principles on which to conduct the investigation.

Owner's rate.

* Resolution, Revenue Department, No. 3534A., dated 8th November 1873, page 34, Chief Engineer's Review for 1872-73.

Another feature has been introduced into the question by the proposal to adopt the owner's rate as the uniform method in all new assessments for realising the share in the profits of the land which falls to Government. The effect of this proposal would be that all irrigated land would be assessed at dry rates, and an additional owner's rate will be imposed to be credited direct to canal accounts, instead of the plan followed now in lands undergoing revision of settlement, under which the land is assessed at an enhanced wet rate, which is credited direct to the revenue, the Canal Department being then credited with the excess of the wet over the dry rate, which excess it is proposed to calculate at a uniform rate of Re. 1 per acre for all sorts of crops. Under the present plan therefore some canal-irrigated land pays revenue as wet land and some as dry land *plus* the owner's rate.

Question of making the owner's rate universal in all future assessments.

100. The Government of India at one time sanctioned the levy of owner's rate only on lands assessed to Government revenue, thus exempting muáfi lands or those whose owners pay no revenue. This Government, however, addressed the Government of India on the subject, pointing out that such exemption is contrary to usage, as well as to principle, the authors of the orignal free grant having never anticipated including in their gift the benefits of irrigation, which have been only brought about by a large subsequent expenditure of capital by the State. In consequence of this representation, the rate was specially imposed on these lands also.

Exemption of muáfi and fee owner's rate.

101. It has not been yet settled whether the owner's rate is to be credited to Government in the civil accounts as land revenue or in the Public Works accounts as canal revenue. In Public Works Circular 58, it is said that separate orders will issue on this subject, meanwhile the term "enhanced land revenue" is changed for "land revenue due or dependent on the works."

Method of crediting owner's rate.

102. The owner's rate was levied for the first time in rabi 1874-75, but, owing to the many difficult questions that beset the subject, the returns are not satisfactory. The fact is, that the Collectors are not generally in a position as yet to declare what the assessments are. In this report the sums entered by Superintending Engineer have been allowed to stand; but generally they do not correspond with Controller's accounts shown in part XB., and in some cases, as in the 1st Division, Agra Canal, seem to have been calculated and entered as one-third of the occupier's rate. This matter will be adjusted according to final orders passed in next year's report.

Owner's rate for rabi, 1874-75.

SECTION VII.

ADMINISTRATION.

Progress on Works.

103. During the year revised estimates for the Agra and Rohikund Canals were submitted to the Government of India. The former have been forwarded to the Secretary of State for sanction, having received provisional sanction from the Government of India. The latter have been sanctioned against ordinary funds by the Government of India.

Agra and Rohikund Canals' revised estimates.

104. In spite of the progress upon the works of the Lower Ganges Canal being cramped by the want of revised estimates, the progress in the upper divisions was good, and the expenditure was up to the amount of the budget grant. A revised estimate of the whole project has been prepared, and is about to be submitted for the orders of the Government of India.

Progress on Lower Ganges Canal.

105. The project for remodelling the Ganges Canal has not up to the present time shown great results. Weirs and locks have been constructed at Machua, Sanauta, Wallipura and Dehra, and well advanced at the Jauli regulator. The repairs of falls, including work of special magnitude on Jauli falls, have been carried out, and this most important sub-head of the estimate has been very nearly completed. Many miles of elevated distributaries have been substituted for lines in digging, and the raising of bridges on the Cawnpore branch, except those below the grand trunk road bridge at Cawnpore, has been done.

Remodelling Ganges Canal.

106. It was within the period of 1873-74 that Sir John Strachey determined to carry out drainage projects in Saháranpur, Muzaffarnagar, Meerut, Bulandshahr, Aligarh, and Etáwah, in the first instance from provincial funds; great progress has been made in 1874-75.

Drainage Works.

107. For some years past it has been apparent both to the Government of India and the local Government that the procedure for appropriating land for Government works was cumbrous and unsatisfactory both to the land-owners and to the purchasers, and that, owing to the delays that took place between the taking up of the land and the payment of compensation, both parties were liable to injustice. The high rates charged during late years, against which, after being passed by the Collectors, there was no appeal, had caused considerable complaint, and the Government of India, in its circular orders of 1875, required the procedure to be amended. The matter had been long under the consideration of the local Government, which this year published rules. The acquisition of land will be doubtless much facilitated by the new rules, which necessitate a combined action on the part of district and canal officers on the spot before reference is made to Government.

Procedure for acquisition of land.

108. The rules under Act VIII of 1873 are now complete, but they do not fall into the review of 1874-75, owing to the frequent references which have to be made between the Supreme Government and the two local Governments most concerned, *viz.*, the Panjáb and the North-Western Provinces, and which have long delayed their issue.

Draft Rules under Act VIII.

109. During the year the offices of Superintending Engineers, 2nd and 4th Circles, as well as that of 3rd Circle, which had been administered since March 1874 by the Chief Engineer and Secretary direct, were brought up to head-quarters and amalgamated with the Secretariat, the Superintending Engineers being made *ex-officio* Deputy Secretaries. The advantage of this step is that it renders possible a more advantageous distribution of the work of the office establishment of direction, and brings Superintending Engineers into personal contact with Government.

Amalgamation of offices of Superintending Engineers, 2nd, 3rd and 4th Circles, with Secretariat.

The subject of measuring discharges has been receiving further attention this year. The collection of high-flood discharges on the Ganges and Jumna was taken in 1874, which, with other papers on the subject, will be shortly published. Additional rules and forms on the subject have been drawn up, which will tend to make the records of this subject at least more systematic than they have previously been.

The publication of the gauge atlas is delayed in order that the whole collection of papers on this subject may issue at one time.

110. After some correspondence with Government in the General Revenue Department, it was agreed that the statement of the value of crops grown by canal-water, which was asked for by the Government of India in its No. 26781 I., dated 12th May 1874 reviewing the revenue report of these provinces for 1872-73, should be furnished through the agency of the Director of Agriculture and Commerce; the necessary statements to be filled in by Collectors were forwarded to him, but not in time to show the return for last rabi; it is hoped that information on this point may be forthcoming another year.

Value of crops irrigated.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 17TH AUGUST 1876.

General Remarks.—In Madras slight rain is reported from all districts; the season is still said to be unfavourable in Kurnool: elsewhere prospects seem fair. In Mysore light showers have fallen, but more rain is much required, and prospects have not ceased to be doubtful. In Sind the river is high and prospects are fair. Elsewhere throughout the Bombay Presidency the rainfall has been very deficient, the fall during the week being everywhere under one inch except in Tanna and Kanara: more rain is urgently required in all districts. In the Central Provinces the fall has been insufficient for the rice crops in the districts about Nágpur, while in those lying near the Vindhyas it has been excessive. In Berar want of rain renders prospects unfavourable. In Central India rain is much required at Mhow and in Malwa. In Rajputana little has fallen, and more is wanted in Marwar, Jeypoor and Ulwur. In Bengal the fall has been plentiful and general, and prospects are good in all districts except Pooree. In Assam also the fall has been copious and prospects are favourable. Moderate rain has fallen throughout the North-Western Provinces, and somewhat less in Oudh: accounts are good. In the Punjab rain is reported only from Umballa, Lahore, Ráwulpindi and Peshawur; prospects are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Aug. 16th)	·99 at Masulipatam; about 1·5 elsewhere.	Less than 3 feet water over anicut; canals full; dry crops sown in all taluks, wet in delta only; standing crops require more rain in some taluks; prices generally stationary; cholera continues, seizures 449, deaths 155 in 8 taluks; cattle healthy; markets well supplied locally.
Kurnool („ „)	1·0 in Sirwell.	Season unfavourable; rain very slight in other taluks; sowing operations impeded owing to scarcity of rain in all taluks except Sirwell; pasture scanty, markets moderately supplied; prices rising in **Ramalkota, Markapur, Pattikonda and Koilkuntla, stationary elsewhere; fever prevalent**; cholera all over the district, except in **Markapur and Pattikonda taluks, seizures 75, deaths 24; ·7 foot of water over Sunkesala anicut in Tumbudra.**
Tanjore („ 17th)	·13 at Negapatam.	Rain elsewhere scanty and partial; rivers going down; moderate supply to some tanks; water over lower anicut, north branch 7 inches; lower anicut, south branch 6 inches; cultivation, paddy throughout the district, some dry crops in some places; standing crops doing well; harvest, paddy in some villages, yield moderate; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera decreasing, seizures 155, deaths 131; cattle generally healthy.
Madura („ „)	1·3 at Madura; 1·3 at Melur.	Rain slight elsewhere; state of weather, crops, and public health unaltered; prices nearly stationary; cholera decreasing.
Malabar („ „)	1·4	Cultivation of first crops and *modan* good; second crop thriving; prices rising; grain supply sufficient; cholera in Palghaut, Ponany, Kurumbranad, Ernad and Calicut, 416 deaths; cattle disease slight in Walluvanad; pasture good. *General Remarks.*—General prospects unchanged.
Bombay— (Aug. 17th)		
Sind—(Aug. 16th)		
Kurrachee ...	...	River at Kotri, gauge 17 feet 10 inches; a good deal of Belo and Ghorabári tapas under water; embanked road from Tatta to Kotri breached; rice seedlings in the delta damaged by crabs; insects doing some damage all over Kurrachee and the Hab.
Shikárpur ...	...	Crops well; river 7 inches higher than on the same date last year; inland, in the talukas of the Rohri division, there is less water than last year; in all other parts of the Collectorate the pressure of the floods is greater; fever still prevalent.
Hyderabad ...	...	River continues high; agricultural operations favourable; small-pox in city slightly decreasing, 8 fresh cases; fever prevalent in southern districts; cattle disease in Dero Mohbat and Kandiáro talukas; weather cool.
Upper Sind Frontier ...	...	Flood falling daily; weather sultry; fever prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	0·18	Total rainfall 9·27; crops suffering from drought; cholera increasing in city, 206 cases, 73 deaths.
Kaira ...	0·41	Total rainfall 5·44; rain much wanted for rice and other crops.
Surat ...	0·83	Total rainfall 26·15; 8 fatal cholera cases in Bárdoli taluka, 2 in Mándvi.
Broach ...	0·30	Total rainfall 16·56; more rain wanted; cholera more or less throughout Collectorate.
Khandesh and Násik.		
Khandesh ...	0·10 at Dhulia.	Total rainfall 9·38; fall of rain is very irregular throughout the Collectorate, it being only 2·76 at Bhusáwal; failure of *kharif* crops from 4 to 8 annas is anticipated, except in 2 talukas; field labourers are nearly starving for want of work, though the prices have but moderately risen; it is contemplated to start special works if no rain falls within the next few days; fever in Nasirabad; cattle disease in Pimpalner.
Násik ...	0·18	Total rainfall 11·72; in some parts early crops have nearly dried up, in others rain is wanted for sowing; slight cholera in 3 talukas.
Konkan.		
Tanna ...	1·52	Total rainfall 63·69; more rain wanted for agricultural purposes; cholera in a few villages of Panwel and Bhiwandi talukas, and in A'gáshi and Kalyán; small-pox continues in Wára and Bassein talukas; transplantation of crops completed in most talukas.
Deccan.		
Poona ...	...	No report received.
Ahmednagar ...	0·11	Total rainfall 5·65; crops withering for want of rain except in Sangamner and Akola; cholera in 7 talukas, 202 cases, 82 deaths.
Sholapur ...	0·19	Total rainfall 4·77; rain much wanted for *kharif* crops; cholera decreasing.
Satara ...	0·71	Total rainfall 27·52; more rain wanted; 88 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	0·23	Total rainfall 24·83; more rain much wanted; great scarcity of water in Athni; cholera decreasing.
Dharwar ...	0·12	Total rainfall 16·81; early crops fair in western, but withering in eastern talukas; rain most urgently needed in Nawalgund, Ron, Gadag, Karajgi and Ránibennur.
Kanara ...	1·50 at Karwar.	Total rainfall 82·0; 3 deaths from cholera above Ghâts.
Kaládgi ...	...	Cholera decreasing.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·02	Total rainfall 10·51; rain much wanted; health good.
Wadhwán ...	...	Crops withering; cholera in Jhalawad, 7 cases, 4 fatal.
Baroda ...	0·08	Total rainfall 20·47; crops and public health good.
		General Remarks.—Agricultural prospects in Sind fair; fever prevalent; rain urgently required throughout the rest of the Presidency.
Bengal— (Aug. 17th)		
Chittagong ...	5·86	General health good.
Noakholly ...	8·94	Health of the station and neighbourhood good.
Chittagong Hill Tracts...	6·73	
Hill Tipperah ...	8·7	
Backergunge ...	4·17	Fever still prevalent in Motheria, Golachipa and Gulshakhali, and cattle disease in Bowful and Gulshakhali; public health otherwise good.
Furreedpore ...	2·03	Public health good.
Dacca ...	2·69	
Tipperah ...	4·89	
Mymensingh ...	6·22	
24-Pergunnahs ...	8·62	Ordinary fever getting prevalent.
Jessore ...	1·21	
Nuddea ...	1·55	
Moorshedabad ...	2·03	General health fair.
Pubna ...	1·08	
Rajshahye ...	·76	
Bogra ...	2·30	Fever prevalent to some extent.
Malda ...	1·57	
Dinagepore ...	5·91	
Rungpore ...	4·68	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ...	2·62	General health good, except in Meckligunge where cholera has assumed an epidemic form in places.
Jalpáiguri ...	9·55	Cholera still prevalent in the south of the district.
Darjeeling ...	5·27	
Midnapore ...	2·82	
Howrah ...	1·49	
Hooghly ...	4·73	Public health fair.
Burdwan ...	2·66	
Bankoora ...	2·84	
Beerbhoom ...	3·59	
Sonthal Pergunnahs ...	5·62	
Bhágalpur ...	10·40	General health very good.
Monghyr ...	5·32	
Purneah ...	2·70	
Durbhunga ...	2·90	
Mozufferpore ...	6·50	
Sarun ...	4·07	Cholera still prevalent; number of deaths diminishing.
Chumparun ...	8·83	
Patna ...	6·18	Public health improving, but sporadic cases of cholera still reported from all parts.
Gya ...	1·84	A good deal of fever and sporadic cholera about.
Shahabad ...	·70	
Hazáribágh ...	7·56	Cholera abating.
Lohardugga ...	2·94	Cholera and small-pox still prevalent, the latter much decreased.
Manbhoom ...	4·22	
Singhbhoom ...	1·75	General health good.
Balasore ...	4·49	Much alarm has been caused by an epidemic of an hysteric or an epileptic nature known as *suru kurnari* which is said to have come from Madras.
Cuttack ...	1·09	Cholera much abated; public health improved.
Pooree ...	1·31	Cholera decreasing.
		General Remarks.—There has been general rain during the week, and the crops are favourably reported on from all the districts except Pooree. The harvesting of *aous*, or early rice, progresses, and the yield is said to be satisfactory on the whole. The transplantation of *amun*, or late rice, is being rapidly brought to a close, and the young plants where transplanted are doing well. In Behar the *bhadoi* crops are in a satisfactory condition, and the recent rainfall has been sufficient for the transplantation of the winter rice crops.
N. W. P.—		
Benares (Aug. 16th)	From ·7 to 1·3.	River fallen to 28 feet.
Allahabad („ 15th)	3·3	Prospects favourable.
Jhánsi („ 17th)	2·2	*Kharif* prospects improving; no more rain required.
Agra („ 16th)	From ·1 to 1·7.	No rain at Sadr station.
Meerut („ „)	...	Rain indifferent; prospects good.
Bareilly („ „)	1·0	Clear weather since last 3 days; strong westerly wind.
Almora („ 15th)	...	Rain general; prospects favourable.
Punjab— (Aug. 16th)		
Delhi ...	*Nil*	Crops promising; health good.
Hissár ...	*Nil*	Crops thriving; health good generally.
Umballa ...	1·0	Crops and health good.
Jullundur ...	*Nil*	Fever prevails; health good.
Lahore ...	1·2	Crops good; health fair.
Mooltan ...	*Nil*	Crops and health good.
Dera Ismail Khan ...	*Nil*	Ditto ditto.
Ráwalpindi ...	·4	Prospects good; cholera decreasing.
Pesháwar ...	·9	Ploughing and sowing progressing; health good.
		General Remarks.—Harvest prospects favourable; public health generally fair.
Oudh— (Aug. 16th)		
Lucknow ...	·2	Prospects and public health continue good.
Sitapur ...	·9	
Fyzabad ...	·2	
Central Provinces—		
Upper Godávari (Aug. 12th)	2·25	Weather cloudy; prospects of crops good; cholera continues; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Sambalpur ...	·37	Weather cloudy; transplanting of rice delayed for want of rain; cholera continues.
Bilaspur ...	·20	Prospects good; weeding commenced; fever continues; prices steady.
Raipur ...	1·80	Weather cloudy; prospects favourable; health good; prices fallen.
Bálághát ...	·70	Transplanting of rice retarded owing to insufficient rainfall; prices steady.
Chanda (Aug. 13th)	2·47	Rain wanted for transplanting rice; other crops good; cholera continues.
Chhindwara ...	1·45	Crops good; more rain wanted; cholera broken out at Amarwara; prices rising.
Bhandara („ 15th)	1·95	Weather cloudy; scanty rainfall injuring rice crops; *jowar* good; cholera, fever and small-pox continue; prices rising.
Nágpur („ 16th)	·73	Weather cloudy; rain wanted; few cholera cases; prices falling.
Wardha ...	2·80	Prospects good; few cases of cholera.
Nimár ...	·06	Cholera and small-pox continue.
Hoshangabad ...	4·0	Cholera decreasing; prices stationary.
Narsinghpur (Aug. 16th)	*Nil*	Rainfall deficient; cholera continues.
Jubbulpore ...	3·5	Prospects of *kharif* favourable; cholera and cattle disease continue.
Saugor ...	3·80	*Kharif* suffered from continuous rain; cholera continues.
Seoni ...	2·5	Cholera continues; prices moderate.
Damoh ...	5·85	Break required for weeding and ploughing *rabi* lands; 160 deaths from cholera; cattle disease prevalent.
Mandla (Aug. 16th)	·75	Weather cloudy; prospects favourable; weeding continues; cholera disappearing; cattle disease prevalent; prices steady.
		General Remarks.—Rice suffering in Nágpur country from deficient rain; excess of rain in Vindhyan districts; in most parts *kharif* still promises well.
British Burma—(Aug. 17th)		
Arrakan Division ...	...	No further report regarding outbreak of cholera in Kyoukphyoo; general health good; paddy sowing progressing favourably; cattle disease in one township.
Akyab ...	7·0 in week ending 14th August.	
Pegu Division.		
Rangoon ...	5·15	Health and crops good; slight cattle disease.
Bassein ...	·1	General health good; crops progressing favourably; no cattle disease; weather hot.
Henzada ...	1·75 in week ending 12th August.	Weather favourable.
Myanoung (Aug. 5th)	·7	Crop prospects good; slight cattle disease in Mengyee; slight cholera still at Okpho; otherwise public health good.
Tharawaddy („ „)	·9	
Prome ...	4·25	Two deaths from cholera in Prome and one in Mohathaman; cultivation progressing.
Thayetmyo ...	3·86	Total rainfall 22·88; general health good; 9 deaths from sporadic cholera; ploughing backward.
Thonkwa ...	Slight rain	Health and crops good; cattle disease greatly on the decline.
Tenasserim Division.		
Amherst ...	5·35	Public health good; crops progressing; cattle disease abating.
Shwegyeen ...	6·4	
Tounghoo ...	3·82	
Salween ...	...	No further report.
Assam—		
Gauháti (Aug. 17th)	2·94	Sky overcast with occasional showers morning and evening; *asu* reaped, outturn good; transplanting of *sali* is going on; prospect of tea and rice is favourable; cholera still at Barpeta, but on the decrease at Bojalee.
Sylhet („ „)	10·02	Prospects continue good.
Hyderabad Assigned Districts—(Aug. 17th)		
Amráoti ...	·17	Prospects becoming unfavourable for want of rain; cholera in Amráoti, Wún, Bassim, and Buldanah districts.
Mysore and Coorg—(Aug. 17th)		
Bangalore ...	·10 in cantonment	Slight rain has fallen in most districts, but more is much needed for the preservation of the standing crops; prospects of season are still therefore critical generally; cholera in several districts.
Coorg ...	1·80	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India—(Aug. 16th)		
Indore ...	·17	Rain much wanted at Mhow and in Mulwa; cholera flits about below the Vindhya and in Rewah.
Gwalior ...	·10	
Neemuch ...	·09	
Rutlam ...	Report not received.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

PROCEDUR TO BE FOLLOWED IN INVESTIGATING ACCIDENTS ON RAILWAYS, GUARANTEED AND STATE.

Circular No. 15 R., Simla, August 12, 1876.

Read again—

Public Works Department Circular No. 22 R of the 19th October 1875.

RESOLUTION.—In continuation of the procedure laid down in the above Circular for the investigation into serious accidents on Railways, the Government of India are pleased to direct that when a Consulting Engineer submits a report on any accident for the information of Government, a copy shall at the same time be sent by him to the Agent of the Guaranteed Railway Company, or to the Director of State Railways, as the case may be.

ORDER.—Ordered, that this Resolution be communicated to the Governments of Madras and Bombay, in the Public Works Department (Railway), for information and the issue of the necessary orders to the Consulting Engineers.

Ordered also, that it be communicated to the Consulting Engineers to the Government of India for Guaranteed Railways at Calcutta, Lahore, and Lucknow for information and guidance, and to the Director of State Railways for information and the issue of the necessary orders to the Managers of State Railways opened for public traffic.

Ordered also, that this Resolution be communicated to the Governments and Administrations noted on the margin in the Judicial Department for information, and that a copy be sent to the Home Department for information and publication in the Supplement to the *Gazette of India*.

	Total ...	9,813	...	10,232	...	20,045	...	Fatehgarh ...	10,475	·3	5·0	The dryness of the weather in the Northern Division has necessitated such frequent watering of the sugar that very little "munja" rice-irrigation has been possible. In the Cawnpore Division there was a great demand throughout the month, chiefly for sugar-cane and indigo. The water supply at head of division irregular, throwing back the crops already irrigated considerably, and preventing new irrigation being done.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 24TH AUGUST 1876.

General Remarks.—In the northern districts of Madras fair rain appears to have fallen: in the south the fall has been lighter, prospects are said to be unchanged. In Sind prospects are good. In the rest of the Bombay Presidency good rain appears to have fallen only in Guzerat: in Khandesh, Násik, the Deccan districts, and the Southern Mahratta Country more is urgently required. In Berar seasonable rain has fallen and prospects have improved. In the Central Provinces favourable rain has fallen in most districts: in Chanda and Bhandara more is wanted for the rice crops. In Bengal seasonable rain is reported from all districts, and reports are good, except from Pooree, where the crops are backward. Copious rain has fallen in Assam. In the North-Western Provinces and Oudh prospects are good. In the Punjab more or less rain has fallen everywhere except at Mooltan; more is wanted at Hissar, but reports are generally favourable. In Central India abundant rain has fallen and prospects are excellent. Rain is also reported from Rajputana, but none has fallen in Serohi, Harowtee or Jhallawar: in the first mentioned tract it is much wanted.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Aug. 23rd)	1·91 at Masulipatam; 2·40 at Bapetla.	Rain very slight in upland taluks; 2⅛ feet water over anicut; canal supply insufficient; crops good, but want rain; prices stationary; cholera continues, seizures 301, deaths 91 in 8 taluks; cattle healthy; markets well supplied locally.
Kurnool	(„ „)	6·0 in Kurnool in 2 days; over 1·0 in Nandikotkur and Nandial taluks.	Season unfavourable; rain very slight in other taluks; sowing operations impeded on account of scarcity of rain; dry crops on ground showing signs of decay; wet crops under canal good; pasture and water scanty; markets moderately supplied; prices generally rising; cholera in 5 taluks, seizures 46, deaths 17; fever prevalent.
Madura	(„ „)	*Nil* at Madura.	Rain slight in some parts of district; weather warm though cloudy at times; no change in other respects.
Malabar	(„ 24th)	5·75	Rain not quite sufficient for cultivation generally; standing crops good; grain supply sufficient but prices rising; cholera in all taluks except Walluvanad, Wynaad and Cochin, 218 deaths; cattle healthy; pasture good.
Tanjore	(„ „)	·22 at Negapatam.	Rain elsewhere generally good; rivers low; moderate supply to tanks; water over upper anicut, south branch, 7 inches; cultivation, paddy throughout the district, some dry crops in some places; standing crops doing well; harvest, paddy in some villages, yield poor; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 130, deaths 128; cattle disease in some parts, some loss. *General Remarks.*—General prospects unchanged.
Bombay— (Aug. 24th)			
Sind—(Aug. 23rd)			
Kurrachee	...	...	River at Kotri, gauge on 21st, 18 feet 2 inches; fall in Western Nára owing to breach in Shikárpur Collectorate; several survey numbers getting no water; *kharif* crops generally well; some cattle disease in 2 talukas.
Shikárpur	...	...	River has fallen 3 inches, but is 7 inches higher than on the same date last year; floods very heavy; no very large area flooded; *kharif* crops well; weather cloudy; fever in 6 talukas.
Hyderabad	...	...	River 18 feet 1 inch, higher by 11 inches than on the same date last year; 36 fresh cases of small-pox in Hyderabad city; no deaths; fever prevalent in districts; rice crops damaged by floods in Badin taluka.
Upper Sind Frontier	...	...	Flood has risen and continues high; damage to *kharif* crops considerable; weather sultry; high winds on night of 21st.
Guzerat.			
Ahmedabad	...	2·32	Total rainfall 11·29; more rain needed; cholera in city, 165 cases, 71 deaths.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kaira ...	1·47	Total rainfall 6·91; crops progressing favourably.
Surat ...	0·17	Total rainfall 26·32; 4 fatal cholera cases in Bárdoli taluka.
Broach ...	0·70	Total rainfall 17·36; cholera more or less throughout the Collectorate; 7 cases fatal.
Khandesh and Násik.		
Khandesh ...	0·26 at Dhulia.	Total rainfall 9·64; prospects of the season getting worse everywhere; cattle being sent off to hills for pasture; fever and cattle disease prevalent in some places.
Násik ...	0·45	Total rainfall 12·57; except in Igatpuri crops drying up for want of rain.
Konkan.		
Tanna ...	1·79	Total rainfall 65·48; more rain wanted for agricultural purposes; cholera in Kalyán, and slightly in Tanna and in 3 talukas; small-pox in 2 talukas; transplantation of crops completed in almost all talukas.
Deccan.		
Poona ...	0·15	Total rainfall 11·21.
Ahmednagar ...	...	Crops withering; cholera in 7 talukas, 201 cases, 88 deaths.
Sholapur ...	1·90	Total rainfall 6·67; more rain wanted generally; cholera in 5 talukas.
Satara ...	0·58	Total rainfall 28·13; 81 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	0·70	Total rainfall 25·63; general complaints of want of rain; crops withering.
Dharwar ...	0·47	Total rainfall 17·28; little or no rain in eastern talukas; prospects not improved; want of rain most sadly felt; unless it falls soon in eastern talukas something must be done to give employment to poor classes.
Kanara ...	3·0 at Karwar.	Total rainfall 88·0; more rain wanted; cholera prevalent, 6 deaths.
Kaládgi ...	0·10	Total rainfall 7·33; more rain wanted for crops already sown; season for further *kharif* sowing over; cholera decreasing, 30 deaths.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·70	Total rainfall 11·21; crops suffering for want of rain.
Wadhwán ...	0·50	Total rainfall 8·14; crops thriving; cholera in Jhalawad, 15 cases, 4 fatal; measles in some villages of Dhrangadra.
Baroda ...	1·30	Total rainfall 21·77; crops well. *General Remarks.*—Rain urgently wanted in Khandesh, the Deccan and in the eastern parts of the Southern Mahratta Country; cholera still generally prevalent.
Bengal— (Aug. 24th)		
Chittagong ...	·60	
Noakholly ...	5·31	Health of the station good.
Chittagong Hill Tracts...	3·64	
Hill Tipperah ...	2·09	
Backergunge ...	6·51	
Furreedpore ...	5·99	
Dacca ...	Return not received.	
Tipperah ...	2·21	
Mymensingh ...	3·08	
24-Pergunnahs ...	·6·42	Ordinary fever prevailing.
Jessore ...	4·80	
Nuddea ...	5·36	
Moorshedabad ...	3·48	General health good.
Pubna ...	2·1	
Rajshahye ...	9·72	
Bogra ...	3·41	
Malda ...	·70	
Dinagepore ...	·17	A few cases of small-pox.
Rungpore ...	·40	
Cooch Behar ...	11·66	Cholera very bad in Mekhaliganj.
Jalpáiguri ...	1·05	
Darjeeling ...	5·73	
Midnapore ...	5·60	
Howrah ...	8·70	
Hooghly ...	1·20	Public health fair.
Burdwan ...	1·66	Public health good.
Bankoora ...	5·05	
Beerbhoom ...	1·06	
Sonthal Pergunnahs ...	2·29	General health good.
Bhágalpur ...	1·08	General health very good.
Monghyr ...	·84	
Purneah ...	1·37	
Durbhunga ...	1·25	
Mozufferpore ...	Return not received.	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Sarun ...	3·74	Cholera decreasing.
Chumparun ...	1·38	
Patna ...	·29	Cholera still reported from all parts of the district, but cases are not so numerous.
Gya ...	4·0	
Shahabad ...	1·02	
Hazáribágh ...	2·77	Cholera abating.
Lohardugga ...	3·06	Cholera still prevalent.
Manbhoom ...	10·13	A good deal of fever about and some isolated cases of cholera reported.
Singhbhoom ...	4·64	Public health good.
Balasore ...	3·37	Cholera almost disappeared.
Cuttack ...	2·77	Public health fairly good.
Pooree ...	·51	Cholera abating. *General Remarks.*—There has been seasonable rain in almost all the districts, and the crops are generally doing well except in Pooree where they are rather backward. The cutting of *aous* progresses rapidly; the transplantation of *amun* is generally completed. In Behar the *bhadoi* crops are said to be favourable. Jute is being cut and indigo manufactured, but the yield of the latter is not good. Sugarcane, mulberry, cotton and other crops of minor importance look promising.
N. W. P.—		
Benares (Aug. 23rd)	1·0 to 2·2	River low for the season.
Allahabad („ 22nd)	1·2	Prospects good.
Jhánsi („ 23rd)	1·4	
Agra („ „)	·3 to 2·8	
Meerut („ „)	...	Prospects unchanged.
Bareilly („ „)	2·6	Agricultural prospects fair, but rice sowings are late.
Almora („ 22nd)	...	Very favourable weather for the crops.
Punjab— (Aug. 23rd)		
Delhi ...	·6	Crops satisfactory; health good.
Hissár ...	Showers	More rain wanted for crops; fever on the increase, cattle disease prevalent.
Umballa ...	1·0	Crops and health good.
Jullundur ...	*Nil*	Crops promising; fever prevailing.
Lahore ...	Showers	Crops good; health fair.
Mooltan ...	*Nil*	Health and crops good.
Dera Ismail Khan ...	2·1	Ditto ditto.
Rawalpindi ...	1·0	Cholera prevalent in district and city; no cases at Murree for several days; harvest prospects good.
Pesháwar ...	·6	Ploughing and sowing progressing; health good. *General Remarks.*—Harvest prospects favourable; public health on the whole fair.
Oudh— (Aug. 23rd)		
Lucknow ...	·2	Prospects favourable; preparations for *rabi* in progress; public health generally good.
Sitapur ...	·6	
Fyzabad ...	·4	
Central Provinces—		
Upper Godávari (Aug. 19th)	·29	Weather cloudy; *kharif* crops good; *rabi* ploughing continues; cholera decreasing; prices steady.
Sambalpur ...	5·42	Prospects good; cholera continues.
Bilaspur ...	2·33	Prospects favourable; fever prevalent; prices steady.
Raipur ...	4·21	Prospects favourable; health good; prices easy.
Bálághát ...	4·0	Transplanting of rice continues; prospects more hopeful; fever prevalent; prices stationary.
Chanda (Aug. 20th)	·36	Transplanting of rice retarded for want of rain; other crops good; cholera abating; prices risen.
Chhindwara ...	2·43	Prospects favourable; cholera confined in one village; prices easy.
Bhandara (Aug. 22nd)	1·36	Cloudy; more rain wanted for rice crops; jawar good; fever, small-pox, bowel complaint and cholera prevalent; prices rising.
Betúl („ 21st)	·96	More rain wanted, prospects favourable, cholera continues; prices stationary.
Nágpur („ 23rd)	2·35	Weather cloudy; prospects fair; few cases of cholera; prices steady.
Wardha ...	·95	Crops good; cholera continues.
Khandwa ...	3·13	Prospects good; cholera continues.
Hoshangabad ...	4·89	Prospects good; prices falling.
Narsinghpur (Aug. 23rd)	...	Rainfall deficient; cholera continues; prices unchanged.
Jubbulpore ...	5·15	Prospects favourable; cholera continues.
Seoni ...	3·5	Cholera continues; prices stationary.
Damoh ...	2·50	Break required for *rabi* ploughing; cholera continues; cattle disease prevalent; prices stationary.
Mandla ...	1·30	*Kharif* crops promising; small-pox and cattle disease prevalent; prices stationary.
Saugor (Aug. 24th)	3·96	Rice and *kadoo* good; *jawar* and cotton suffering from excessive rain; cholera continues. *General Remarks.*—From most districts reports are favourable; prospects of rice in Balaghat, Bhandara and Chanda clouded; other crops promise well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma— (Aug. 24th)		
Arrakan Division ...	11·0 in Akyab.	General health good; cholera ceased at Kyoukphyoo, continues in a sporadic form both in Kyoukphyoo and Akyab districts; crops promise well; rainfall seasonable.
Pegu Division.		
Rangoon ...	4·92	Slight damage from insects in Pegu; few cases of fever in Hline; elsewhere public health good; crops, prospects very good.
Bassein ...	4·55	Slight cattle disease; general health good; crops progressing favourably.
Henzada ...	2·95 in week ending 19th August.	Weather favourable.
Myanoung ...	1·60 in week ending 12th August.	Crops progressing favourably; slight cattle disease in Okpho; one death from cholera in Tahpoon; otherwise public health good.
Prome ...	3·37	Five deaths from cholera, 7 during last fortnight at Poungday; cultivation progressing.
Thayetmyo ...	5·95	General health good; total rainfall 24·83; ploughing still backward.
Thonkwa ...	...	No report received.
Tenasserim Division.		
Amherst ...	10·43	Public health good except at Mergui where fever and small-pox prevail; crops progressing; cattle disease in Amherst abating.
Tounghoo ...	2·26	
Mergui ...	5·20 during fortnight ending the 12th August.	
Hyderabad Assigned Districts—		
Amráoti (Aug. 24th)	1·66	Rain most opportune; prospects becoming favourable; during fortnight there were 280 cases of cholera, and 131 deaths.
Assam—		
Gauhâti (Aug. 24th)	6·03	Weather very variable, clear and hot or overcast and sultry; heavy rains in mornings; transplanting of *sâli* going on; prospects of tea favourable; public health good.
Sylhet („ „)	8·64	Prospects continue good.
Mysore and Coorg— (Aug. 24th)		
Bangalore ...	1·85 in cantonment.	Agricultural prospects have improved, the rainfall though slight being general except in the Kadur and Chitaldroog districts, where the standing crops are in danger.
Coorg ...	9·90	
Central India— (Aug. 23rd)		
Indore ...	7·45	Rain has changed the face of Malwa; health and other prospects favourable; cholera lingers in Baghelkhand; otherwise all well.
Gwalior ...	4·35	
Neemuch ...	2·81	
Rutlam ...	5·69	
Sutna ...	3·04	
Rajputana—		
Abu (Aug. 24th)	3·86	Total rainfall 28·93; steady showers commenced from 22nd; cloudy; more rain probable.
Serohi („ 20th)	*Nil*	Total rainfall 6·0; tanks getting low; crops withering rapidly, and will perish unless rain falls; rain required.
Jhallawar („ 18th)	...	Health good; weather fine.
Harowtee („ 19th)	*Nil*	Health good; crops favourable.
Ajmere („ 24th)	4·1	Good rain here and elsewhere too.
Jeypore ...	2·50	Agricultural prospects much improved; more rain expected; health good.
Ulwur („ 23rd)	0·03	Crops injured by drought; rain required.
Nepal— (Aug. 16th)	2·5	State of agricultural prospects fair.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 31ST AUGUST 1876.

GENERAL REMARKS.—Rain has fallen in fair quantity throughout the Madras Presidency, and prospects have improved. In Mysore slight rain has fallen, and though it is still very deficient there is some improvement in the condition of the crops. There has been general rain in Sind, and the river is high; some damage to the *kharif* crops from floods is reported in Shikarpur. In Guzerat abundant rain has fallen, and in Khandesh and Násik good falls have much improved the prospects of the autumn crops; in the Deccan districts and the South Mahratta Country the fall has been scanty, and more rain is much required, especially in the latter tract. In the Central Provinces and Berar the rain has been general and abundant, and prospects are very good. Good rain has also fallen throughout Central India, and reports are favourable. Rain is reported, with much improvement in prospects, from most parts of Rajputana: Ulwar is the only State where a deficiency of rain is complained of. In Bengal the fall has been generally moderate, being lightest in Behar and the Bhágalpur division: reports are however favourable. In Assam there is a break in the rain, and prospects are good. Throughout the North-Western Provinces and Oudh but little rain has fallen during the week: in most places more is required, though in Benares the break appears to be beneficial. In the Punjab only showers are reported, except at Jullundur and Peshawar—prospects are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Aug. 30th)	5·90 at Masulipatam; about 3·0 at Gudivada, Repalli and Guntur.	Rain comparatively slight elsewhere; 3 feet 8 inches water over anicut; canal supply insufficient in upland taluks; wet crops sown in some villages; standing dry crops still require rain; prices risen in Bandar, Bezwada, Vinukonda and Narsarowpett; stationary elsewhere; cholera, seizures 292, deaths 107; cattle generally healthy; markets well supplied locally.
Kurnool („ „)	1·8 at Kurnool in one day; over 1·0 in Nandikotkur taluk.	Season not favourable; little rain elsewhere; water and pasture scanty; markets moderately supplied; prices high; cholera abating, seizures 47, deaths 19; no tanks have received supplies; water over Sunkesala anicut 1 foot.
Tanjore („ 31st)	·88 at Negapatam.	Rain elsewhere generally good; high freshes in rivers; good supply to tanks; water over upper anicut, south branch, 3 inches; lower anicut, north branch, 7 inches; lower anicut, south branch, 9½ inches; cultivation, paddy throughout the district, also dry crops in several places; standing crops doing well; harvest, paddy in some villages, yield poor; pasture generally insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 128, deaths 100; cattle healthy.
Madura („ 30th)	·9 at Madura; 2·0 at Tirumangalum; 2·9 at Melur.	Some rain has fallen in parts of the district, more wanted; weather generally cloudy and cool; no change otherwise.
Malabar („ 31st)	1·92	Standing crops good; grain supply sufficient; prices slightly decreasing; cholera in all taluks, except Chirakal, Cochin and Wynaad, 189 deaths; small-pox, fever and cattle disease slight; pasture good. *General Remarks.*—General prospects improved slightly.
Bombay— (Aug. 31st)		
Sind—(Aug. 30th)		
Kurrachee ...	2·01 at Kurrachee, 1·24 at Tatta.	River at Kotri on 28th, 18 feet 6 inches; rain general; two serious breaches in Gangans Band; rats doing mischief in Shahbandar and Tatta; some cattle disease in Mirpur Batoro, Shahbandar and Játi.
Shikárpur ...	...	Heavy rain all over the district from 25th; river 15 feet 7 inches, being 3 feet 7 inches higher than on the same date last year; great damage to *kharif* cultivation occasioned thereby in 6 talukas.
Hyderabad ...	1·81 at Hyderabad.	River on 29th, 1 foot 7 inches higher than on the same date last year; rain in all talukas except Tando Bágo; fever in some talukas; small-pox in Hyderabad increasing, 39 fresh cases; Nára floods have reached Alibabar Tappa of taluka Shahdádpur.
Upper Sind Frontier ...	1·11	Floods as before; cultivation on Desert Canal very promising.
Guzerat.		
Ahmedabad ...	5·21	Total rainfall 16·80; fall of rain general, very favourable; crops progressing well; cholera subsiding in city, 70 cases, 40 deaths.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kaira ...	6·59	Fall of rain abundant throughout the Collectorate; crops thriving; prospects of the season good.
Surat ...	10·98	Total rainfall 37·30; 8 fatal cholera cases in Bárdoli, 4 in Balsar.
Broach ...	11·72	Total rainfall 27·98; heavy fall of rain throughout Collectorate.
Khandesh and Násik.		
Khandesh ...	2·37 at Dhulia.	Total rainfall 12·01; fall of rain well-timed and general, though varying; prospects of *kharif* including cotton improving; more rain wanted; fever, ague and cattle disease prevailing in a few places.
Násik ...	3·29	Total rainfall 15·46; crops and health good.
Konkan.		
Tanna ...	9·24	Total rainfall 74·70; more rain wanted throughout the Collectorate; cholera continues at Kalyán and in Salsette and Panwel talukas; small-pox continues in Wára and Bassein talukas; transplantation of crops completed in almost all talukas.
Deccan.		
Poona ...	1·51	Total rainfall 12·72; young *kharif* suffering in some places for want of more rain; slight cattle disease and cholera in two talukas.
Ahmednagar ...	1·17	Total rainfall 6·82; more rain wanted; crops in some talukas slightly benefited by rain; cholera in 7 talukas, 56 cases, 27 deaths.
Sholapur ...	1·09	Total rainfall 7·76; prospects improved in consequence; 2 deaths from cholera at Sholapur.
Satara ...	0·77	Total rainfall 28·87; more rain wanted; 54 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	0·50	Total rainfall 26·13; prospects of *kharif* crops indifferent.
Dharwar ...	0·29	Total rainfall 17·57; crops moderate in western talukas, but rain is urgently required; the little rain has kept alive the few early crops in eastern talukas; general prospects remain the same as last week; poorer classes suffering from want of employment; the Executive Engineer has been requested to carry out local and provincial works for which grants are sanctioned.
Kanara ...	1·50 at Karwar.	One death from cholera.
Kaládgi ...	.....	Want of rain generally felt; *kharif* prospects bad.
Kattywar and Gaekwar's Territory.		
Rájkot ...	6·94	Total rainfall 18·18; health good.
Wadhwán ...	1·95	Total rainfall 10·09; crops good; cholera in Jhalawad, 2 fatal cases; measles abating in Dhrangadra villages.
Baroda ...	11·52	Total rainfall 33·29; crops and public health good.
		General Remarks.—Rainfall general and abundant in Sind, Guzerat, Násik and Khandesh, by which the prospects are much improved; more, however, is still wanted in the Deccan and the Southern Mahratta Country.
Bengal—		
Chittagong ...	1·82	
Noakholly ...	2·64	General health good.
Chittagong Hill Tracts...	1·48	
Hill Tipperah ...	2·74	
Backergunge ...	2·69	
Furreedpore ...	·98	Public health good.
Dacca ...	·57 (1·22 in previous week.)	
Tipperah ...	1·94	
Mymensingh ...	·91	
24-Pergunnahs ...	1·97	Ordinary fever prevails more or less in the district.
Jessore ...	1·0	
Nuddea ...	·82	
Moorshedabad ...	·80	
Pubna ...	·95	Public health better than usual at this season.
Rajshahye ...	·59	
Bogra ...	·92	Fever increasing.
Maldah* ...	1·15	
Dinagepore ...	·27	
Rungpore ...	·12	
Cooch Behar ...	4·89	Cholera abating in Mekhaliganj and almost disappeared elsewhere.
Jalpáiguri ...	·29	
Darjeeling ...	·54	
Midnapore ...	1·56	

* In the Supplement to the Gazette of India of the 26th August 1876, page 816, opposite Maldah in the rainfall column for "·70" read 2·70.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Howrah ...	4·22	
Hooghly ...	·58	
Burdwan ...	·20	
Bankoora ...	·52	
Beerbhoom ...	1·96	Much fever in the north-east of the district.
Sonthal Pergunnahs ...	2·37	
Bhágalpur ...	·35	General health very good.
Monghyr ...	Return not received.	
Purneah ...	·42	Cholera still prevalent in different parts of the district, especially near the Koosee.
Durbhunga ...	·01	
Mozufferpore ...	Return not received.	
Sarun ...	1·30	Cholera decreasing.
Chumparun ...	*Nil*	
Patna ...	Return not received.	Cholera still reported from all parts of the district, but the cases are less numerous.
Gya ...	·90	Fever still prevalent; cholera much diminished.
Shahabad ...	·10	
Hazáribágh ...	1·80	Cholera abating.
Lohardugga ...	5·60	Cholera and small-pox still continue, but are on the decrease.
Manbhoom ...	1·78	
Singhbhoom ...	7·82	Public health good.
Balasore ...	4·48	Public health now normal.
Cuttack ...	3·52	Public health good.
Pooree ...	1·58	Cholera disappeared.
		General Remarks.—There has been general rain during the week, and the crops are promising elsewhere, except in Pooree, Shahabad, and part of Bhágalpur. *Amun* is generally doing well and the cutting of the *aous* is almost completed. In Behar the winter rice crop has been nearly all transplanted and its prospects have much improved. The *bhadoi* crop is fair and is being cut. Sugarcane, Indian-corn and other crops have suffered somewhat from excessive rain.
N. W. P.—		
Benares (Aug. 30th)	·5	Regular break in rains now.
Allahabad („ 29th)	·7	Prospects good, but more rain required.
Jhánsi („ 31st)	1·2	Owing to unusual amount of rain *kharif* prospects bad in black soil, good elsewhere; *til* sowings continue; lands under preparation for *rabi*.
Agra („ 30th)	From 1·0 to 1·2.	Rain much needed.
Meerut („ „)	...	Rain much wanted.
Bareilly („ „)	·7	
Almora („ 28th)	...	Weather clearing with only occasional showers; prospects good.
Punjab— (Aug. 30th)		
Delhi (Aug. 30th)	·4	Crops and health good.
Hissár („ „)	*Nil*	Crops suffering for want of rain; fever and cattle disease prevalent; otherwise health good.
Umballa („ „)	·3	Crops and health good.
Jullundur („ „)	2·1	Much fever about; crops promising.
Lahore („ „)	·7	Crops good; health fair.
Mooltan („ „)	·9	Ditto.
Dera Ismail Khan („ „)	·1	Health and harvest prospects good.
Ráwalpindi („ „)	·4	Harvest prospects good; cholera decreasing.
Pesháwar („ „)	1·4	Ploughings and sowings progressing; health good.
		General Remarks.—Harvest prospects good; health of province fair for the season of the year.
Oudh— (Aug. 30th)		
Lucknow (Aug. 30th)	1·0	More rain much wanted; public health generally good.
Sitapur („ „)	·6	
Fyzabad („ „)	*Nil*	
Central Provinces—		
Upper Godávari (Aug. 24th)	·86	*Kharif* good; *rabi* ploughing continues; cholera decreasing; prices rising.
Sambalpur ...	1·9	Prospects good; cholera continues.
Bilaspur ...	1·45	Prospects favourable; rainfall insufficient in places; fever continues; prices steady.
Raipur ...	1·88	Prospects favourable; health good; prices easy.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*			
Bálághát	(Aug. 26th)	3·50	Rain opportune; transplanting of rice continues; fever prevalent; prices steady.
Chanda	(„ 27th)	5·49	Transplanting of rice continues; other *kharif* crops good; cholera continues.
Betúl	(„ 28th)	3·53	Rain opportune; prospects favourable; cholera continues; prices unchanged.
Bhandara	(„ 29th)	6·70	Rice crops benefited much by recent rain; *jara* good; fever, small-pox and cholera continue; prices stationary.
Nágpur	(„ 30th)	5·34	Prospects good; cholera disappearing; prices steady.
Wardha	...	4·82	Prospects favourable; cholera continues.
Nimar	...	7·47	*Kharif* promising; cholera and small-pox continue.
Hoshangabad	...	4·77	Prospects good; prices stationary.
Narsinghpur	...	7·0	Crops promising; cholera diminishing; prices unchanged.
Jubbulpore	...	3·82	Weeding progressing; prospects good; cholera and cattle disease continue.
Saugor	(Aug. 30th)	2·46	Break wanted; cholera continues.
Seoni	...	5·85	*Kharif* progressing; cholera continues; prices stationary.
Damoh	...	5·0	Crops doing well; cholera continues; prices stationary.
Mandla	...	3·0	Prospects favourable; cholera and cattle disease continue; prices stationary.
			General Remarks.—Prospects are better in rice districts; timely rain has fallen everywhere, and crops promise well.
Hyderabad Assigned Districts—(Aug. 31st)			
Amraotí	...	5·0	Prospects good; cholera in mild form in parts of province, of 321 attacked, 137 deaths.
Assam—			
Gauháti	(Aug. 31st)	1·7	Clear hot weather; slight shower on 26th; transplanting of *sali* progressing; prospects of tea favourable; public health good.
Sylhet	(„ „)	1·72	No change.
Mysore and Coorg—(Aug. 31st)			
Bangalore	...	·32 in cantonment.	Agricultural prospects improved generally, but rain still very deficient in several districts; prices continue very high; public health good, though cholera still present.
Coorg	...	6·60	
Central India—(Aug. 30th)			
Indore	(Aug. 30th)	3·70	In Malwa and Bhopal rain has been ample, 25·02 to date; at Indore 37·08; Bhopal 19th, crops and prospects good; cholera has not quite left Rewah and Myhere; rain has been good there also.
Gwalior	(„ „)	·85	
Neemuch	(„ „)	2·74	
Rutlam	(„ „)	7·63	
Sutna	(„ „)	·23	
Rajputana—			
Abu	(Aug. 31st)	2·94	Total rainfall 31·87; weather close and cloudy; more rain probable.
Serohi	(„ 27th)	2·0	Total rainfall 8·0; prospects much improved; tanks filling; wells full; health good.
Marwar	(„ 26th)	5·28	Total rainfall 10·94; crops much improved; tanks and wells almost full; fever and dysentery prevalent.
Meywar	(„ 25th)	1·3	Total rainfall 14·4; tanks and wells well supplied; health good; crops, prospects very good; sunshine required.
Jhallawar	...	3·75	Health good; *jowar* promises well.
Harowti	(Aug. 26th)	...	
Deoli	...	7·8	Health good; crops favourable.
Tonk	...	0·9	
Kota	...	6·6	
Ajmere	(Aug. 31st)	0·9	Good reports; health good.
Jeypore	...	4·3	Prospects fair; health good.
Ulwur	(Aug. 30th)	0·96	Rain much wanted.
Nepal Residency—(Aug. 22nd)			
Nepal	...	5·34	Agricultural prospects fair.

[a] In the sub-division prices range as follow:—Wheat 31-14 seers, rice best sort 15 seers, rice common 22-8 seers, and gram 31 14 seers.
[a2] In the interior prices range as follow:—Wheat 12-8 to 32 seers, rice best sort 14 to 15 seers, rice common 17 to 30 seers, lesser millets 40 seers, and gram 11 to 30 seers.
[b2] In the sub-division the prices are as follow:—Wheat 26 seers, rice best sort 12 seers, rice common 27-8 seers, and gram 26 seers.
[c2] In the interior the prices range as follow:—Wheat 8 to 10 seers, barley 12 seers, rice best sort 4 to 16 seers, rice common 8 to 20 seers, lesser millets 14 seers, maize 13 to 20 seers, and gram 8-4 to 16 seers.
[j] In the interior the prices range as follow:—Wheat 10 to 13-3 seers, rice best sort 8 to 20 seers, rice common 13-3 to 20 seers, and gram 11 to 16 seers.
[k] In the interior the prices range as follow:—Wheat 22 seers, barley 45 seers, rice best sort 17 seers, rice common 18 to 25 seers, and gram 22 seers.
[l] In the interior the prices range as follow:—Wheat 25 seers, barley 40 seers, rice best sort 13 to 18 seers, rice common 18 to 28 seers, and gram 16 seers.
[m] In the interior the prices range as follow:—Rice best sort 18 to 21-9 seers, rice common 20 to 22-12 seers, paddy 35 to 40 seers, and gram 16 seers.
[n] In the interior the prices range as follow:—Wheat 13 to 18 seers, rice best sort 12 to 18 seers, rice common 21 to 24 seers, and gram 9-8 to 13 seers.
[o] In the interior the prices range as follow:—Rice best sort 12 to 15 seers, rice common 15 to 16 seers.
[p] In the interior the prices range as follow:—Wheat 20 to 27 seers, barley 27-8 to 33 seers, rice best sort 12-8 seers, and rice common 17-4 to 22 seers, lesser millets 33 seers, maize 24 seers, and gram 25 to 26-4 seers.
[q] In the interior the prices range as follow:—Wheat 20 to 21 seers, barley 37 to 38 seers, rice best sort 10 to 13 seers, rice common 19 to 22 seers, bulrush millet 24 seers, gram 21 seers, maize 21 seers, and gram 24 to 33 seers.
[r] In the interior the prices range as follow:—Wheat 15 to 20 seers, barley 24 to 32-8 seers, rice best sort 13 to 16 seers, rice common 14-8 to 17-8 seers, lesser millets 28 to 30 seers, maize 33 to 34 seers, and gram 18-10 to 29 seers.
[s] In the interior prices range as follow:—Wheat 17 to 23 seers, barley 21 to 35 seers, rice best sort 11 to 17-8 seers, rice common 15 to 18 seers, lesser millets 24 to 30 seers, maize 35 to 31 seers, and gram 20 to 29 seers.
[t] In the interior the prices range as follow:—Wheat 20 to 26 seers, barley 28 to 35 seers, rice best sort 13 to 19 seers, rice common 16 to 24 seers, lesser millets 28 to 30 seers, maize 30 to 32 seers, and gram 25 to 34 seers.
[u] In the interior the prices range as follow:—Wheat 16 to 22 seers, barley 22-8 to 34 seers, rice best sort 15 to 18 seers, rice common 16 to 20 seers, lesser millets 24 to 31 seers, and gram 20 to 24 seers.
[v] In the interior the prices range as follow:—Wheat 21 to 23 seers, rice best sort 14 to 15 seers, rice common 15 to 16 seers, and gram 23 to 25 seers.
[w] In the interior the prices range as follow:—Wheat 18 to 21 seers, rice best sort 19 to 24 seers, rice common 21 to 28 seers, bulrush millet 40 seers, lesser millets 31 to 40 seers.
[x] In the subdivision the prices range as follow:—Rice best sort 23-10 seers, rice common 28-14 seers, and gram 21 seers.
[y] In the interior the prices range as follow:—Wheat 18 to 19 seers, barley 28 seers, rice best sort 12 seers, rice common 21 to 21-8 seers, lesser millets 30 to 40 seers.
[z] In the interior prices range as follow:—Wheat 15 to 20 seers, rice best sort 10 to 23 seers, rice common 19 to 30 seers, and gram 18-10 to 29 seers.

Prices Current of Food-grains through

India for the 1st half of August 1876 —continued.

A. O. HUME
Secretary to the Govt.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF FASL KHARIF IN THE PUNJAB UP TO 30th JUNE 1876.

Canal Division.	Water distributed during June 1876: Depth in Canal at Regulating Gauge: Full supply.	Depth in Canal at Regulating Gauge: Actual throughout.	Gross Consumption, c. ft. per second: Estimated full supply.	Gross Consumption, c. ft. per second: Actual average throughout.	Navigation return, Canal: Principal Items of Traffic: Up.	Navigation return, Canal: Principal Items of Traffic: Down.	Land irrigated (approximate): Zillah.	Land irrigated (approximate): Acres.	Rainfall: Average.	Rainfall: During month.	Chief crops (approximate): Name.	Chief crops (approximate): Area in acres.	Remarks.
Bári Doáb Canal. 1st Division	4·90	4·01	3073·60	440·10	...	...	Gurdáspur	5,851	3·17	0·1	Cotton	16,158	There is a decrease of 14,126 acres, of which the chief portion consists of cotton. In the 1st Division the decrease is attributed to the substitution of masonry for wooden outlets, but the closure of the canal for a month, so late as 25th March, must have a bad effect on the kharif sowings, 244·90 c. ft. escaping and allowed to run down 3rd Division, Bári Doáb Canal.
2nd Divn. Main Branch, Lower	4·60	3·28		932·73	...	...	Amritsar	19,969	2·22	0·2	Rice	4,695

Western Jamna Canals. Karnál Division	4·33	4·31	2546	825·94	...	249,326 kurries, bullies, logs, &c., 4,952 maunds of firewood, 800 sq. ft. planking.	Ambála	983	7·45	0·54	Cotton	57,515	The entry of water consumed in the Kárnál Division is excessive, and includes all passing out from escapes and otherwise lost. The proper figures were not supplied by the Executive Engineer, as he has ascertained that some of the discharges were based upon unreliable data. Orders have been issued to prepare correct calculations.

G. A. SEARLE, *Colonel, S. C.,*
Asst. Secretary to the Government of Bengal,
Public Works Department, Irrigation Branch.

The 24th August 1876.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

TELEGRAPH.

TRAFFIC RETURN OF THE TELEGRAPH DEPARTMENT FOR 1875-76.

Nos. 274—5 T, dated Simla, the 28th August 1876.

Read again—

Traffic Return of the Telegraph Department for the year 1875-76, also Public Works Department No. 255 T of 4th August 1876, to the Director General of Telegraphs.

Read—

Letter No. 140 of 9th August 1876, from the Officiating Director General of Telegraphs.

REMARKS.—This return shows an increase of 15·38 per cent. in the number of Inland State Messages, as compared with the number transmitted in the previous year, and of no less than 43·67 as regards foreign State messages.

2. These increases are satisfactorily explained in the foot-note to the traffic return.

3. The extended use of the telegraph by the various Departments of Government is an indication of its increasing value for administrative purposes, and within reasonable limits such extended use is unobjectionable.

ORDER.—Ordered that copies of the return, with copies of this Resolution, be forwarded to Her Majesty's Secretary of State for information; and to the Home Department for publication in the Supplement to the *Gazette of India;* and a copy of this Resolution to the Director General of Telegraphs.

C. H. DICKENS, *Colonel, R.A.,*
Secretary to the Government of India.

No. 92, dated Simla, the 6th July 1876.

From—A. J. L. CAPPEL, ESQ., Offg. Director General of Telegraphs in India,
To—The Secretary to the Government of India, PUBLIC WORKS DEPARTMENT.

I have the honor to submit Return of the number and value of State and Private Messages transmitted from each Division of this Department during the year 1875-76, showing the Collections on, and the Number of, Inland and Foreign Messages separately. The Abstract in the margin exhibits in one view the percentage of increase and decrease in the number of paid Messages and Indian share of Collections under each head, as compared with those of the last year.

		Net	69,978	1,12,469 8				Net	...	...	...			Net	8·35	5·86			Net	...	...			

The Return also shows the number and value of free Public News Messages transmitted, and the value of the free copies of Reuter's "Government and Press" Messages supplied to various officials.

Abstracts of Foreign Traffic under heads of *Sent, Received* and *Transit,* and of the number of Messages sent and received by the *Indo-European, Turkish* and *Red Sea* routes, respectively, are also appended.

NOTE.—The principal causes of increase under "State" messages have been shown in the monthly reports. They may be summarized as follows:—

1. Tour of H. R. H. the Prince of Wales.
2. Delhi Camp of Exercise.
3. Political affairs at Mandalay and Baroda.
4. Cholera reports.

Return of the Number and Value of Inland and Foreign Messages sent, and of Foreign Messages "Received" and "Transit" during the year 1875-76, showing also the Increase and Decrease under each head on the figures for the previous Year 1874-75.

NUMBER OF PAID MESSAGES AND INDIAN SHARE OF COLLECTIONS IN 1875-76.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7TH SEPTEMBER 1876.

General Remarks.—In Madras prospects are good except in Kurnool and Madura. In Sind the river is very high and some damage from floods is reported. Heavy rain has fallen in Guzerat and floods have occurred at Broach; in Khandesh and Násik the fall has been scanty, but prospects are not unfavourable; in the Deccan districts and South Mahratta Country, however, more rain is very urgently required, and prospects are not good. Abundant rain has fallen in Berar, the Central Provinces and Central India: in Malwa fair weather is required: elsewhere prospects are promising. In Rajputana there has been good rain generally, and prospects are good, except in Ulwar. In Bengal there has been general rain, very heavy in some of the eastern and central districts, but lighter in Behar; prospects are good, but some rain is wanted for the rice in Behar and Orissa. Throughout the North-Western Provinces and Oudh there has been little rain, and the break is doing harm in some districts. Very little rain has fallen in the Punjab, except at Umballa: prospects appear to be good, except at Hissár. In Assam the crops promise well. Much rain has fallen in Burma and reports are favourable. In Mysore some rain has fallen in parts of the province, but the prospects of the season are still bad in most districts.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Sept. 6th)	2·75 at Masulipatam; about 2·0 at Repalli, Bezwada and Gudivada.	Less rain elsewhere; 5¾ feet water over anicut; dry crops doing fairly; *sajja* in ear; prices slightly risen in Narsarowpett, Bander and Bezwada, stationary elsewhere; cholera, seizures 201, deaths 59; cattle generally healthy; markets well supplied locally.
Kurnool	(„ „)	·8 in Kurnool in one day; over 3·0 in Sirwell.	Rain very slight in other taluks; season unfavourable; sowing operations impeded on account of scarcity of rain; dry crops sown showing signs of decay in all taluks except Sirwell and Patticonda; water and pasture scanty; prices rising in all taluks except Sirwell; markets moderately supplied; cholera in 4 taluks, seizures 24, deaths 14; fever prevalent; water over Sunkesala anicut 1·4 feet.
Tanjore	(„ 7th)	·3 at Negapatam.	Rain elsewhere moderate; high freshes in rivers; good supply to tanks; water over upper anicut, north branch, 11 inches; lower anicut, north branch, 3 inches; lower anicut, south branch, 3 inches; cultivation, wet and dry crops throughout the district; standing crops doing well; harvest, paddy in some places, yield poor; pasture generally sufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 45, deaths 34; cattle generally healthy.
Madura	(„ 6th)	...	Rainfall slight; sowing operations dull for want of rain; wells drying up almost everywhere; prices show tendency to rise; pasture scarce; cholera abating.
Malabar	(„ 7th)	4·02	Rain sufficient for cultivation; first crop promising; grain supply sufficient; prices slightly decreasing; cholera in Koteyam, Kurumbranad, Calicut, Ernad, Ponany and Palghaut, 95 deaths; small-pox and fever slight; cattle generally healthy; pasture good.
			General Remarks.—General prospects poor in Madura and Kurnool, elsewhere favourable.
Bombay—	**(Sept. 7th)**		
Sind—(Sept. 6th)			
Kurrachee	...	0·03 at Kurrachee last week; 4·54 at Sehwan; 1·0 at Mirpur Batoro.	River at Kotri on 4th, 18 feet 2 inches, last year 15·05 feet.
Shikárpur	...	...	River 15 feet 5 inches, 3 feet 3 inches higher than on the same date last year; extensive destruction of private property and of cultivation; fever prevalent; weather sultry.
Hyderabad	...	...	River 3 feet higher than on the same date last year; rain in all talukas; *kharif* crops in talukas Hyderabad and Kandiáro slightly damaged; canals breached in talukas Badin, Tando Bágo and Tando Alahyar; one small village wholly destroyed by floods in taluka Hála, no lives lost and but little property; fever prevalent in lower districts; small-pox still in Hyderabad, 22 fresh cases.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Upper Sind Frontier ...	0·60 on 30th	More rain expected; flood subsiding; weather sultry.
Guzerat.		
Ahmedabad ...	3·43	Total rainfall 20·23; a break desirable; cholera much decreased.
Kaira ...	3·39	Fall of rain abundant; rice transplantation nearly completed; all crops thriving.
Surat ...	11·74	Total rainfall 49·04; heavy flood in the Tapti.
Broach* ...	3·27	Total rainfall 31·25; crops good; Nerbudda river has risen considerably and has carried away half the Railway bridge.
Khandesh and Násik.		
Khandesh ...	0·19 at Dhulia.	Total rainfall 12·20; more rain much wanted; state of crops and public health as before.
Násik ...	0·79	Total rainfall 16·25; crops fair; cholera in Sinnar taluka.
Konkan.		
Tanna ...	4·39	Total rainfall 79·11; cholera at Kalyán; small-pox slightly in Wára and Bassein talukas; agricultural prospects good; transplantation of crops completed.
Deccan.		
Poona ...	1·01	Total rainfall 13·73; *kharif* crops suffering very much for want of rain in Indápur and Bhimthari talukas; cattle disease in 2 and cholera in 5 talukas.
Ahmednagar ...	0·03	Total rainfall 6·85; more rain urgently wanted; crops withering in many places; sowing of *rabi* retarded; prospects getting worse; cholera in 7 talukas, 159 cases, 56 deaths.
Sholapur ...	0·25	Total rainfall 8·0; rain badly wanted throughout the district; 80 deaths from cholera at Bársi; it continues slightly in 4 other talukas.
Satara ...	1·69	Total rainfall 30·56; crops thriving except in Khánápur, Khatan and Mán talukas, where rain is much wanted; 63 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	1·46	Total rainfall 27 59; more rain urgently required, especially in Athni, where there is great scarcity of water.
Dharwar ...	0·61	Total rainfall 18·18; in western talukas early crops still middling; in eastern talukas want of rain very severely felt; sowing of cotton retarded, and early crops that had been planted have withered; poorer classes in Nawalgund, Nadgund, Mundargi and Karajgi in want of employment; road work commenced in Mundargi peta, where no rain has fallen; cholera still in 2 talukas.
Kanara ...	2·25 at Karwar.	Total rainfall 88 75; crops fair.
Kaládgi ...	...	*Kharif* crops dried up and withering for want of rain; more rain urgently required; fodder scarce; slight cholera in 2 talukas.
Kattywar and Gaekwar's Territory.		
Rájkot ...	2·33	Total rainfall 20·48; weather cloudy; late rains very favourable to crops; public health good.
Wadhwán ...	2·71	Total rainfall 12·80; crops good.
Baroda ...	11·07	Total rainfall 44·36; cotton crops slightly injured in some places from excessive rain; other crops well.
		General Remarks.—Rain in Sind and Guzerat abundant, and prospects good, though some damage has been done in Sind by floods while the Railway bridge over the Nerbudda at Broach has been carried away by the floods; rain urgently required throughout the Southern Mahratta Country and the eastern parts of the Deccan, where prospects are bad.
Bengal— (Sept. 6th)		
Chittagong ...	5·72	
Noakholly ...	·77	General health good.
Chittagong Hill Tracts...	4·97	
Hill Tipperah ...	·79	
Backergunge ...	·70	Fever in Motbaria and Golachipa.
Furreedpore ...	2·29	General health good; a little fever and dysentery.
Dacca ...	14·90	More than 7·5 inches of rain fell on Monday.
Tipperah ...	6·45	
Mymensingh ...	1·02	
24-Pergunnahs ...	5·30	General health good.
Jessore ...	1·32	
Nuddea ...	1·27	
Moorshedabad ...	1·03	Fever prevalent towards the eastern part of the district; public health otherwise good.
Pubna ...	2·8	
Rajshahye ...	2·56

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

MANUFACTURE LOCALLY OF HYDRAULIC CEMENT.

Nos. 455—63 I, dated 13th June 1872.

From—The Government of India, PUBLIC WORKS DEPT.,
To—The Local Governments and Administrations in the Public Works Department, Irrigation Branch, except Madras, Bombay and Bengal.

In continuation of this office letter No. 355-363 I of the 31st July last, I am directed to inform you that the services of a Special Engineer, Mr. Dejoux, who has been connected with the preparation of artificial stone on Monsieur Coignet's method, and possesses special experience in the manufacture of cements, have been temporarily engaged in Bengal, where he has been provided with the necessary apparatus, &c., for carrying on a series of experiments in the analysis of various kinds of natural cement, hydraulic and other limestones, as well as clays, and to request that specimens of clays and limestones, which it is desired to have analysed, &c., may be sent to that gentleman through the Chief Engineer of Irrigation in Bengal for that purpose, in quantities of not less than one cubic foot of each kind. Mr. Dejoux might also, if desired, be consulted through the Bengal Government on all other matters pertaining to the manufacture of cements.

Nos. 375—83 I, dated Simla, 28th August 1876.

From—Colonel J. Crofton, R. E., Depy. Secy. to the Govt. of India, PUBLIC WORKS DEPT., Irrigation Branch,
To—The Governments of the North-Western Provinces and the Punjab, in the Public Works Department, Irrigation Branch; The Chief Commissioners of Oudh, Central Provinces, British Burmah, Mysore and Coorg; The Resident at Hyderabad; The Agents of the Governor General for Central India and Rajpootana.

I am directed to invite the attention of the to Public Works Department Circular Nos 455-63 I of the 13th June 1872, regarding the analysis of clays and limestones, and to request that specimens of such limestones and clays as have not already been transmitted to Mr. Dejoux, may now be sent to that officer for analysis.

2. The question whether a really good cement cannot be manufactured locally is one of great and pressing importance, and I am accordingly to request that no time may be lost in complying with the circular before quoted.

No. 384 I.

Copy, with copy of the letter referred to, forwarded to the Government of Bengal for information, in reply to its No. 815 I of the 27th ultimo, with intimation that the Governments of Madras and Bombay have been similarly addressed.

No. $\frac{383}{384}$ I, dated 28th August 1876.

From—The Secretary to the Government of India, PUBLIC WORKS DEPT.,
To—The Secretaries of the Governments of Madras and Bombay, Public Works Department, Irrigation Branches.

In forwarding herewith copy of a circular No. 455-63 I of the 13th June 1872, relating to the analysis of clays and limestones, with copy of a later circular* on the same subject, I am directed to request that, with the permission of His Excellency the Governor General in Council, the instructions therein contained may, so far as convenient, be acted on also in the $\frac{\text{Madras}}{\text{Bombay}}$ Presidency.

* No. 375-83 I, dated 28th August 1876.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

PROPOSED CONFERENCE AT CALCUTTA BETWEEN RAILWAY AND GOVERNMENT OFFICERS.

Nos. 2232—45 R, dated Simla, 1st September 1876.

Read—

1.—Public Works Department Resolution Nos. 1233—8 R, dated 15th May 1875.
To Secretary of State, No. 65 R, dated 15th May 1875.
2.—Despatch to Secretary of State No. 84 R, dated 19th May 1874.
" to " " " 124 R, " 11th July 1876.
3.—To Government of Madras and Consulting Engineers, Calcutta, Lahore and Lucknow, Nos. 302—5 G—R, dated 24th February 1873.
From Government of Bombay, No. 421, dated 24th March 1874.
To Director of State Railways, No. 1749 R, dated 11th July 1876.

4.—From Military Department, No. 252 $\left(\frac{\text{Transport}}{\text{Railway}}\right)$, dated 5th April 1876, submitting report of Military Railway Transport Committee assembled at Delhi in February 1876.
5.—Public Works Department Resolution Nos. 1286—91—G R, dated 12th August 1872.
6.— " " Nos. 1195—9 R, dated 15th May 1876, to Governments of Madras and Bombay and the Consulting Engineers at Calcutta, Lahore and Lucknow.
7.—Public Works Department Circular, No. 17 R, dated 23rd September 1875.
8.—From Director of State Railways No. 1850 E, dated 6th August 1874.
To " " No. 869 E—R, dated 20th November 1874.
Public Works Department Circular, Nos. 101—16 E—R, dated 5th February 1874.
9.—Despatch from Secretary of State, No. 5 R, dated 6th January 1876.
From Government of Madras, No. 789, dated 28th March 1876.

OBSERVATIONS.—The papers read are on the following subjects, with the exception of No. 10, *viz.*—

(1) Standard dimensions.
(2) Continuous brake-power on trains.
(3) Communication between passenger and train staff, and between guard and driver.
(4) Adaptation of rolling-stock to military purposes and duties of Railway servants in time of war.
(5) Establishment of a clearing-house.
(6) Simplification of fares and goods tariff and the assimilation of systems of working as far as possible on all Railways.
(7) Means to promote the comfort and convenience of Railway travellers.
(8) Wages and allowances to Railway employés.
(9) Pensions, "Bonuses" or Provident Fund for Railway employés if any to be established, and which to be preferred.
(10) Training and industrial schools for children of Railway employés with a view to their useful employment in India, including the establishment of hill sanataria for the employés and their wives and families.

RESOLUTION.—There are so many and important points remaining to be settled in connection with all of the foregoing subjects, that it is deemed advisable to invite representatives from all the Guaranteed and State Railways in India and Burmah, and from the Consulting Engineers' Department of the three Presidencies, to a conference to be held in Calcutta, probably some time in January next, for the purpose of discussing these questions, and with a view to aid the Government of India in coming to a right conclusion in regard to them.

2. A detailed list of the enquiries on each of the subjects abovementioned will be circulated for information hereafter, when the date of the assembly of the proposed conference can be more definitely fixed than it can be at present. In the meantime the opinions of all officers, both of the upper and subordinate and of the mechanical classes, interested in any of the above subjects are freely invited, and may be submitted direct to the Secretary to the Government of India, in the Public Works Department.

3. The Secretary of State has been requested to acquaint the several Boards of Directors with the wishes of the Government of India in this matter, and to seek the co-operation of the Directors of the several Railway Companies by the issue by them of suitable instructions to their Agents in India.

4. Delegates from the Chambers of Commerce, Calcutta, Madras and Bombay, and from the leading merchants, European and Native, of the principal towns are invited to attend the proposed conference, and to submit papers to be read at it.

Madras.	Director of State Railways.
Bombay.	Consulting Engineer, Calcutta.
Central Provinces.	" " Lahore.
British Burmah.	" " Lucknow.
Hyderabad.	

ORDER.—Ordered, that a copy of the above be sent to the Governments, Administrations and Officers noted on the margin for information.

Ordered also, that a copy be forwarded to the Financial, Foreign, Military, and Revenue, Agriculture, and Commerce Departments of the Government of India for information.

Ordered also, that a copy be forwarded to the Home Department for information and for publication in the Supplement to the *Gazette of India*.

H. DRUMMOND, *Colonel, R. E.,*
Deputy Secretary, Govt. of India.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on Imports and Exports are not distinguished.

2. The figures for British Burma for 1876-77 include the collections at *Tavoy* and *Mergui* for the months April to July only.

A. O. HUME,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 7th September 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*

His Excellency the Commander-in-Chief, K. C. B.

Major-General the Hon'ble Sir H. W. Norman, K. C. B.

The Hon'ble Arthur Hobhouse, Q. C.

The Hon'ble E. C. Bayley, C. S. I.

The Hon'ble Sir W. Muir, K. C. S. I.

The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.

Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.

The Hon'ble T. C. Hope.

The Hon'ble F. R. Cockerell.

CIVIL PROCEDURE BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the presentation of the further Report of the Select Committee on the Bill to consolidate and amend the Laws relating to the Procedure of the Courts of Civil Judicature.

Leave was granted.

INDIAN RAILWAY BILL.

Colonel the Hon'ble SIR ANDREW CLARKE moved for leave to introduce a Bill to consolidate and amend the law relating to Railways in India. He said that the necessity for the Bill had arisen out of a failure to protect lines under construction, and it was now intended to extend to lines under construction the same protection as was in force on lines open for traffic. It was also proposed to take this opportunity of consolidating four of the five Acts which contained the law relating to Railways in India. The remaining Act would be superseded by a Bill which was already before the Council in reference to the Presidency Police Magistrates. The proposed measure was not one with regard to which any difficulty or embarrassment was likely to occur; but in order to guard against possible misconstruction, out of doors, he thought it right to say that the Bill was unlike the Bill of 1867, which gave rise to opposition on behalf of certain interests in connection with the Guaranteed Lines. The present Bill in no way interfered with those interests or attempted to define the terms of the contract under which they were created.

The only other new feature in the Bill related to one or two points which had been overlooked in former Acts; and further security was now sought on behalf of the public, indeed also for the Railways. It was also found that doubts existed as to whether those who were employed about Railway stations in the performance of certain duties, connected with the Railway carrying trade employed under contract, could come under the name of servants of the Company or not. It was found, especially at the larger stations, that by their not being included in the provisions of the Act, they could not be punished for extortion, or for refusing to do certain duties as Railway servants; and opportunity would now be taken to remove those doubts.

With His Excellency the President's permission, a very important movement had been initiated in the Conference regarding Railways which was

to assemble in Calcutta next cold season; and it was possible that, upon that occasion, some further measures, the results of the rapid growth and development of Railways, might be suggested. He would, therefore, only ask that the Bill should now be republished to the Council, with a view to its publication, and that no final steps should be taken with reference to it until we had had the opinion of that body on it, who would no doubt also afford much assistance in considering whether there were any other points relating to this subject on which it would be desirable to legislate.

The Motion was put and agreed to.

BOMBAY MUNICIPAL DEBENTURES BILL.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill to amend the law relating to the transfer of Bombay Municipal Debentures.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble MR. HOPE also presented the Report of the Select Committee on the Bill to relieve from incumbrances the estates of Jagirdars and Zamindars in Sindh.

LAND IMPROVEMENT BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill to amend the Land Improvement Act, 1871, and moved that it be referred to a Select Committee with instructions to report in six weeks.

This was a Bill which he got leave to introduce a considerable time ago; but its introduction had been delayed from various causes. The object of it was a single one, namely, to make clear what was the nature of the security that the Government took for the advances that it made to landowners. The Council were aware that the whole object of the Land Improvement Act was to enable the Government to make advances for the improvement of land, and to recover those advances, from the borrower, or his security, in the way in which land-revenue was recovered. He was glad to say that no disputes had arisen hitherto between the borrower and the lender, although there had been a considerable amount of advances made under the Act, especially in the provinces of Bengal. But, on coming to apply the terms of the Act to the recovery of advances, it had been found that there was a little difficulty in making them fit the facts, and some high officials—Local Governments, Secretariats, and Government lawyers—had differed as to the exact meaning of the Act. It was, therefore, desirable that we should make that matter quite clear before any disputes arose between ourselves and those persons to whom we had lent money. Fortunately, there could be little or no doubt as to the principles on which the recovery of such advances ought to be based, and on which every body considered that they had in fact been made.

The difficulties of the Land Improvement Act were as follows: By section 14 the Collector who arranged for the advances was to grant a certificate which, amongst other things, was to specify the position, extent and boundaries of the land to be improved, and the nature and amount of the security furnished, if any, other than the land to be improved. Then the next section—section 15—provided that the amount so specified should be recoverable from the borrower, or his security, as if they were arrears of land-revenue due by the borrower, or his security; and the section proceeded thus:

"If any such sum cannot be so recovered, it shall be recoverable as if it were an arrear of revenue due on *the land specified in the said certificate*.

"Provided that when the person to whom the advance was made is a landlord or a tenant having a right to transfer his interest in the land without the consent of the landlord, the interest of *no person, other than such landlord or tenant, in the said land*, shall be sold under this section."

Now, on those sections arose three or four questions. The first question was, whether the improved land was so subjected to the charge, that the charge should take effect prior to all other interests in the land, in the same way as

arrears of land-revenue would take effect? So that, for instance, if there was a prior mortgage, the advance should be recovered in preference to the right of the mortgagee to recover his debt. That was the first, and most important, question, and he thought that it was also, fortunately perhaps, the least doubtful.

The second question was, whether land given by way of collateral security stood in the same position as the land to be improved? The Council would see that, in respect to this point, the language used was, "land specified in the said certificate." Both kinds of land were to be specified in the certificate, and therefore, under the strict literal construction of the Act, it would seem that both kinds of land were placed in the same position.

The third question was, whether you could avail yourself of all your remedies against the principal, without using the remedies against the surety? Again, on the strict literal construction of the Act, it would seem that we were forced to sue the surety before all the remedies against the principal were exhausted, which was not at all a just proceeding, and was probably one that nobody would desire.

The fourth question was, what was the meaning of the proviso to the fifteenth section of the Act which he had read at length? The language no doubt was obscure, and he had been told by those who understood this subject that the obscurity lay in the word 'interest,' which, to the mind of a plain unsophisticated lawyer, bore one meaning, and to the mind of those learned in land-revenue tenures, such as the gentlemen in the Department over which his hon'ble friend Sir Alexander Arbuthnot presided, bore another. He however believed the real meaning was, that if the borrower was a landlord, you should not sell the tenant's interest, and that if the borrower was a tenant, you should not sell the landlord's interest.

Fortunately, as he had said, it was very clear what the principles were which should regulate the recovery of those advances; and, in the first place, he thought there could be no doubt in any body's mind that the improved land ought to be subject to the charge in precisely the same way as it was subject to the imposition of land-revenue. That was the general principle—he believed it, indeed, to be the universal principle—on which advances for improvement were made, whether in England, the United States, or India. The advance was for the improvement of the common possession into however many interests the whole ownership might be divided; and, of course, nobody would make the advance unless he was to have the first fruits of the improvement effected by means of the advance.

It seemed equally clear that land given by way of collateral security ought not to be placed in the same position. The surety who gave the land as security derived no advantage from the advance made by way of improvement. It was not his land that was improved, and all persons—mortgagees or others—who had a subsidiary interest in the land, might be materially injured, if the Government were to come in ahead of them and claim to be repaid out of land upon which they had never spent a farthing. Therefore, it ought to be provided that, with respect to land given by way of collateral security, the Government should come in just in the same way as any other lender of money.

He did not think that there was more doubt on the third question, but that we should be at liberty to treat the surety and the principal according to the ordinary rule. Certainly sureties would be exceedingly astonished if they were told that the land of their principal was available in the ultimate resort for the repayment of the money spent upon its improvement, but that the Act was so framed, that we were absolutely compelled to make the surety repay that money before we could proceed to sell the land.

The proposed Bill accordingly dealt with these points, and section 2 provided that advances should be recoverable in all, or any, of the following ways:—

(*a*) from the borrower as if they were arrears of land-revenue due from him;

to assemble in Calcutta next cold season; and it was possible that, upon that occasion, some further measures, the results of the rapid growth and development of Railways, might be suggested. He would, therefore, only ask that the Bill should now be introduced to the Council, with a view to its publication, and that no final steps should be taken with reference to it until we had had the opinion of that body on it, who would no doubt also afford much assistance in considering whether there were any other points relating to this subject on which it would be desirable to legislate.

The Motion was put and agreed to.

BOMBAY MUNICIPAL DEBENTURES BILL.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill to amend the law relating to the transfer of Bombay Municipal Debentures.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble MR. HOPE also presented the Report of the Select Committee on the Bill to relieve from incumbrances the estates of Jágírdárs and Zamíndárs in Sindh.

LAND IMPROVEMENT BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill to amend the Land Improvement Act, 1871, and moved that it be referred to a Select Committee with instructions to report in six weeks.

This was a Bill which he got leave to introduce a considerable time ago; but its introduction had been delayed from various causes. The object of it was a single one, namely, to make clear what was the nature of the security that the Government took for the advances that it made to landowners. The Council were aware that the whole object of the Land Improvement Act was to enable the Government to make advances for the improvement of land, and to recover those advances, from the borrower, or his security, in the way in which land-revenue was recovered. He was glad to say that no disputes had arisen hitherto between the borrower and the lender, although there had been a considerable amount of advances made under the Act, especially in the provinces of Bengal. But, on coming to apply the terms of the Act to the recovery of advances, it had been found that there was a little difficulty in making them fit the facts, and some high officials—Local Governments, Secretariats, and Government lawyers—had differed as to the exact meaning of the Act. It was, therefore, desirable that we should make that matter quite clear before any disputes arose between ourselves and those persons to whom we had lent money. Fortunately, there could be little or no doubt as to the principles on which the recovery of such advances ought to be based, and on which every body considered that they had in fact been made.

The difficulties of the Land Improvement Act were as follows: By section 14 the Collector who arranged for the advances was to grant a certificate which, amongst other things, was to specify the position, extent and boundaries of the land to be improved, and the nature and amount of the security furnished, if any, other than the land to be improved. Then the next section—section 15—provided that the amount so specified should be recoverable from the borrower, or his security, as if they were arrears of land-revenue due by the borrower, or his security; and the section proceeded thus:

"If any such sum cannot be so recovered, it shall be recoverable as if it was an arrear of revenue due on *the land specified in the said certificate*:

"Provided that when the person to whom the advance was made is a landlord or a tenant having a right to transfer his interest in the land without the consent of the landlord, the interest of *no person, other than such landlord or tenant, in the said land*, shall be sold under this section."

Now, on those sections arose three or four questions. The first question was, whether the improved land was so subjected to the charge, that the charge should take effect prior to all other interests in the land, in the same way as

arrears of land-revenue would take effect? So that, for instance, if there was a prior mortgage, the advance should be recovered in preference to the right of the mortgagee to recover his debt. That was the first, and most important, question, and he thought that it was also, fortunately perhaps, the least doubtful.

The second question was, whether land given by way of collateral security stood in the same position as the land to be improved? The Council would see that, in respect to this point, the language used was, "land specified in the said certificate." Both kinds of land were to be specified in the certificate, and therefore, under the strict literal construction of the Act, it would seem that both kinds of land were placed in the same position.

The third question was, whether you could avail yourself of all your remedies against the principal, without using the remedies against the surety? Again, on the strict literal construction of the Act, it would seem that we were forced to sue the surety before all the remedies against the principal were exhausted, which was not at all a just proceeding, and was probably one that nobody would desire.

The fourth question was, what was the meaning of the proviso to the fifteenth section of the Act which he had read at length? The language no doubt was obscure, and he had been told by those who understood this subject that the obscurity lay in the word 'interest,' which, to the mind of a plain unsophisticated lawyer, bore one meaning, and to the mind of those learned in land-revenue tenures, such as the gentlemen in the Department over which his hon'ble friend Sir Alexander Arbuthnot presided, bore another. He however believed the real meaning was, that if the borrower was a landlord, you should not sell the tenant's interest, and that if the borrower was a tenant, you should not sell the landlord's interest.

Fortunately, as he had said, it was very clear what the principles were which should regulate the recovery of those advances; and, in the first place, he thought there could be no doubt in any body's mind that the improved land ought to be subject to the charge in precisely the same way as it was subject to the imposition of land-revenue. That was the general principle—he believed it, indeed, to be the universal principle—on which advances for improvement were made, whether in England, the United States, or India. The advance was for the improvement of the common possession into however many interests the whole ownership might be divided; and, of course, nobody would make the advance unless he was to have the first fruits of the improvement effected by means of the advance.

It seemed equally clear that land given by way of collateral security ought not to be placed in the same position. The surety who gave the land as security derived no advantage from the advance made by way of improvement. It was not his land that was improved, and all persons—mortgagees or others—who had a subsidiary interest in the land, might be materially injured, if the Government were to come in ahead of them and claim to be repaid out of land upon which they had never spent a farthing. Therefore, it ought to be provided that, with respect to land given by way of collateral security, the Government should come in just in the same way as any other lender of money.

He did not think that there was more doubt on the third question, but that we should be at liberty to treat the surety and the principal according to the ordinary rule. Certainly sureties would be exceedingly astonished if they were told that the land of their principal was available in the ultimate resort for the repayment of the money spent upon its improvement, but that the Act was so framed, that we were absolutely compelled to make the surety repay that money before we could proceed to sell the land.

The proposed Bill accordingly dealt with these points, and section 2 provided that advances should be recoverable in all, or any, of the following ways:—

(*a*) from the borrower as if they were arrears of land-revenue due from him:

(*b*) from the surety (if any) as if they were arrears of land-revenue due from him:

(*c*) out of the land to be improved as if they were arrears of land-revenue due on account of such land:

(*d*) out of the property comprised in the collateral security (if any) according to the terms of such security.

That seemed to him to do justice to all parties, and the remedies which were concurrent would, no doubt, be put in force, according to the justice and expediency of each case.

Then there was added to section 2 a proviso expressing what was intended to be expressed in the Act of 1871; and the opportunity was taken of adding a third clause which expressed a principle certainly of justice, possibly of law, namely, that, if the surety was compelled to repay, he should have the same remedies against his principal as the Government would have when the advance was due. He conceived that to be a just provision, and he thought every body would be satisfied to have it expressed in the Act, because, though there was a general principle of law to the same effect, there might be doubt whether it would apply to the very peculiar position in which the Government stood as owners of land-revenue.

He had only to add that although this was a Bill which affected, and must affect, existing contracts, yet we might feel quite assured that all loans that had been made had been advanced by the Government, and had been received by the borrower, upon the understanding that the remedies were such as were expressed in this Bill, and that, so far as they had been recovered, which has been done to a considerable extent, they had been recovered on those same principles.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE moved that the Bill be published in the *Gazette of India* in English, and in the Gazettes of the Local Governments by which advances have been made under the Land Improvement Act, in English and in such other languages as the Local Governments direct.

The Motion was put and agreed to.

OUDH LAND-REVENUE BILL.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Sir Alexander Arbuthnot and the Hon'ble the Mahárájá of Balrámpur be added to the Select Committee on the Bill to consolidate and define the law relating to the settlement and collection of Land-revenue in Oudh.

The Motion was put and agreed to.

CIVIL PROCEDURE BILL.

The Hon'ble MR. HOBHOUSE also moved that the Hon'ble Mr. Hope be added to the Select Committee on the Bill to consolidate and amend the laws relating to the Procedure of the Courts of Civil Judicature.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to amend the Land Improvement Act, 1871—The Hon'ble Sir Alexander Arbuthnot, the Hon'ble Messrs. Hope and Cockerell, and the Mover.

The Council adjourned to Thursday the 14th September 1876.

SIMLA;
the 12th September 1876.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 14TH SEPTEMBER 1876.

GENERAL REMARKS.—In Madras slight rain is reported from all districts except Kurnool: prospects are unchanged. In Mysore the fall during the week has been trifling, and the continued failure of the rain has proved disastrous to growing crops. In Sind there has been heavy rain in Kurrachee, and the river is high and prospects good. In Bombay prospects are fair in Guzerat and the Konkan, but in Khandesh, Násik, the Deccan districts (except Satara), and the Southern Mahratta Country very little rain has fallen, and the condition of the crops is precarious. In the Central Provinces there has been general and in some districts excessive rain: prospects are good. No rain has fallen in Berar, but reports are favourable. Prospects are good in Central India. In the southern and central parts of Rajputana very heavy rain has fallen, and some also in the northern tracts: reports are good. In Bengal there has been rain in all districts, and prospects are generally favourable. More rain is wanted for the rice in Upper Assam. In the North-Western Provinces the fall has been scanty, and more is generally wanted. In Oudh also the rain has been light, but prospects have improved. In the Punjab want of rain is reported from Delhi, Hissár and Ráwalpindi: elsewhere everything promises well. There has been abundant rain in British Burma, and prospects are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Sept. 13th)	1·91 at Masulipatam; ·85 at Gudivada; ·80 at Repalli.	Rain very slight elsewhere; 4 feet water over anicut; standing crops want rain; prices risen in Bandar, Vinukonda and Narsarowpett, stationary elsewhere; cholera abating, 111 seizures, 48 deaths; cattle generally healthy; markets well supplied locally.
Kurnool („ „)	*Nil*	No change in the state of the season; prices continue high; markets moderately supplied; cultivation not progressing; water and pasture scanty; cholera in 3 taluks, seizures 51, deaths 18; 1·5 feet of water over Sunkesala anicut.
Tanjore („ 14th)	·06 at Negapatam.	Rain elsewhere partial and generally scanty; rivers tolerably high; supply to tanks good; water over lower anicut, north branch 10½ inches; lower anicut, south branch 1 foot ½ inch; cultivation, wet and dry crops throughout the district; standing crops doing well; no harvest; pasture generally sufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 120, deaths 95; small-pox in some places; cattle healthy.
Madura („ 13th)	...	Slight rain in all taluks except Pulney; cattle disease prevailing in Madura taluk; no change in other respects.
Malabar („ 14th)	·25	Rain not quite sufficient for cultivation; first crop promising; grain supply sufficient; prices slightly falling; cholera in Chirakal, Koteyam, Kurumbranad, Calicut and Ernad, 90 deaths; cattle generally healthy; pasture good.
		General Remarks.—General prospects unchanged.
Bombay— (Sept. 14th)		
Sind—(Sept. 13th)		
Kurrachee ...	2·08 at Kotri; 2·04 at Sehwan; 0·25 at Mirpur Batoro.	River at Kotri on 11th, 17 feet 10 inches, being 4 feet 3 inches higher than on the same date last year; Gáj in flood on 29th and 30th ultimo, causing great damage in Dádú and Sehwan talukas; locusts passed over tapas Nuhoran and Ghóro in the delta on 1st, direction west to north-west, no injury; small-pox in Kurrachee; rats in Sháhbandar taluka doing injury; some damage in Ghorabári by overflow from river, and in other talukas by floods and breaches in canals.
Shikárpur ...	...	River 13 feet 11 inches, being 3 feet 7 inches higher than on the same date last year; crops ripened; weather sultry; nights damp; fever in 3 talukas.
Hyderabad ...	...	River higher by 4 feet 2 inches than on the same date last year; crops flooded in talukas Badin, Dero Mohbat and Khandiáro, and damaged by worms in Naushahro; small-pox still in Hyderabad, 31 fresh cases; several cases with symptoms like those of cholera in city on 12th.
Upper Sind Frontier ...	...	Prices of *rabi* staple high; flood subsiding slowly; weather fair; heavy dew occasionally.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Guzerat.		
Ahmedabad ...	0·76	Total rainfall 20·99; crops well.
Kaira ...	0·11	*Kharif* crops good.
Surat ...	...	No rain.
Broach ...	...	Slight cholera in A'mod; fever in Jambusar; cotton and other crops in certain villages of Hánsot and Ankleswar destroyed by floods.
Khandesh and Násik.		
Khandesh ...	0·09 at Dhulia.	Total rainfall 12·29; *kharif* crops in eastern districts very bad, in others prospering but wanting more rain; state of public health as before.
Násik ...	0·62	Total rainfall 16·87; crops drying up for want of rain; public health good.
Konkan.		
Tanna ...	1·0	Total rainfall 80·11; cholera continues slightly in the town of Kalyán; agricultural prospects good.
Deccan.		
Poona ...	...	*Kharif* crops suffering for want of more rain which is anxiously looked for in all the talukas; cattle disease exists slightly in 1, and cholera in 3 talukas.
Ahmednagar ...	1·26	Total rainfall 8·11; fall of rain not general; crops withering; prospects not improved yet; cholera in 7 talukas, 142 cases, 107 deaths.
Sholapur ...	0·10	Total rainfall 8·11; *kharif* almost lost; sowing of *rabi* retarded for want of rain; cholera subsiding.
Satara ...	0·10	Total rainfall 30·66; 52 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	0·12	Total rainfall 27·71; great scarcity of water and fodder in Athni, Gokák and part of Chikóri talukas; *kharif* crops withering.
Dharwar ...	0·04	Total rainfall 18·22; crops in western talukas not so promising as last week; in eastern talukas early crops have mostly perished; in southern talukas the crops are withering; sowing of cotton and late crops generally retarded for want of rain; the poorer classes in eastern talukas are suffering from being unable to obtain employment; cholera decreasing.
Kanara ...	1·75 at Karwar.	Total rainfall 90·50.
Kaládgi (Sept. 11th)	...	No change in weather and crops; cholera decreasing, only 11 deaths; rain expected shortly.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather fair.
Wadhwán ...	0·32	Total rainfall 13·12; crops good.
Baroda ...	0·98	Total rainfall 45·34; state of crops unchanged.
		General Remarks.—Prospects fair in Sind, Guzerat and the Konkan; very bad in the eastern parts of the Deccan and the Southern Mahratta Country.
Bengal— (Sept. 14th)		
Chittagong ...	2·31	
Noakholly ...	15·68	General health good.
Chittagong Hill Tracts...	5·46	
Hill Tipperah ...	3·49	
Backergunge ...	6·07	Fever prevalent at Motbaria and Golachipa.
Furreedpore ...	7·02	General health good.
Dacca ...	1·29	
Tipperah ...	4·12	
Mymensingh ...	3·40	
24-Perguunahs ...	1·26	Ordinary fever prevails more or less in the districts.
Jessore ...	3·47	
Nuddea ...	1·27	
Moorshedabad ...	2·77	Public health satisfactory; a little fever prevails.
Pubna ...	7·57	
Rajshahye ...	·47	Fever very prevalent.
Bogra ...	1·64	
Maldah ...	5·37	
Dinagepore ...	2·08	
Rungpore ...	·22	
Cooch Behar ...	2·51	General health good.
Jalpáiguri ...	2·74	Cholera quite disappeared.
Darjeeling ...	1·42	
Midnapore ...	2·26	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Howrah ...	4·44	
Hooghly ...	·94	
Burdwan ...	2·70	
Bankoora ...	3·26	
Beerbhoom ...	3·58	
Sonthal Pergunnahs ...	1·78	Cholera and fever in Deoghur; cholera in Godda.
Bhágalpur ...	·14	General health very good.
Monghyr ...	·27	
Purneah ...	·46	
Durbhunga ...	1·55	
Mozufferpore ...	1·0	
Sarun ...	·95	Cholera decreasing.
Chumparun ...	1·04	
Patna ...	·77	Health of the district improving; the number of cholera cases diminishing daily.
Gya ...	1·39	
Shahabad ...	·42	
Hazáribágh ...	2·02	General health improving.
Lohardugga ...	1·53	Cholera and small-pox much abated.
Manbhoom ...	1·16	
Singhbhoom ...	2·53	General health good.
Balasore ...	4·49	Public health good.
Cuttack ...	1·54	Ditto.
Pooree ...	1·31	
		General Remarks.—Rain has fallen in all the districts during the week. The *aous dhan* is nearly all cut and the young *amun* is looking well; the *bhadoi* is being harvested with a good outturn; more rain is wanted for the winter rice in the Behar districts. In Pooree sufficient rain has fallen and the prospects have improved, except in the Khoorda sub-division.
N. W. P.—		
Benares (Sept. 13th)	1·5	More rain urgently required; weather unsettled; river risen to 35 feet.
Allahabad („ 12th)	·5	No rain in Doab parganas; without more rain rice crops will be ruined, save where irrigation is possible.
Agra („ 13th)	From ·1 to ·4 in four parganas.	
Meerut („ „)	...	Rain on Sunday has done good, more wanted.
Bareilly („ „)	·7	More rain wanted.
Almora („ 11th)	...	Heavy showers occasionally over limited areas, small quantity more still required; all crops everywhere very good.
Jhánsi („ 14th)	2·0	
Punjab—		
(Sept. 13th)		
Delhi ...	*Nil*	Crops suffering; health good.
Hissár ...	·6	More rain wanted; health generally good, but fever and dysentery rather prevalent; cattle disease declining.
Umballa ...	·4	Crops and health good.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR 1875.

Circular No. 17 R., dated Simla, 24th August 1876.

Read—

Return of the number and nature of accidents and injuries to life and limb, which have occurred on all Railways open for traffic in India during the year 1875.

Observations.—The following table shows the total number of accidents connected with he working of the trains on the several Indian Railways during the last six years:—

Years.	East Indian.	Eastern Bengal.	Oudh and Rohilkhand.	Punjab and Delhi.	Sind.	Calcutta and South-Eastern State.	Nalhati State.	Rajputana State.	Holkar State.	Madras.	South Indian.	Great Indian Peninsula.	Bombay, Baroda and Central India.	Punjab Northern State.	Tirhut State.	Total.
1870 ...	147	8	14	97	28	4	9	...	...	74	3	313	75	...	...	772
1871 ...	151	2	4	87	51	1	...	...	...	68	2	146	36	...	...	548
1872 ...	691	8	26	114	49	5	2	...	...	60	4	150	44	...	...	1,153
1873 ...	216	3	36	76	41	2	1	14	...	64	19	111	38	...	...	621
1874 ...	267	2	55	57	44	37	6	43	2	92	24	106	32	...	...	767
1875 ...	157	9	123	34	55	17	6	94	81	94	21	125	42	9	1	868

From this comparison it appears that the largest number of accidents to trains, &c., on all Railways during the period referred to, excepting those in 1872, occurred during the last year.

As already explained in Circulars Nos. 16 R. of 10th June 1874 and 8 R. of 5th June 1875, the large increase in 1872 was due to the inclusion of every accident of a minor character in the returns of the East Indian Railway at that time.

The increases during 1875 occurred chiefly on the Oudh and Rohilkhand, Rajputana State and Holkar State Railways, and were due in some measure to the opening of new lengths of line, and the consequent increase of train mileage.

On the Oudh and Rohilkhand Railway the mean mileage open was 542 miles in 1875 against 524 miles in 1874, and the number of accidents increased from 55 to 123. On the Rajputana State Railway the open mileage in 1875 was 344¼ miles against 173 miles in 1874. The train mileage increased from 219,971 to 517,475. The accidents on this line increased from 43 to 94.

The Holkar State Railway commenced working in 1874, and there were only two accidents during that year on a length of 36 miles. But in 1875 the number rose to 81 with an increased length of 20 miles; 45 out of the 81 accidents on this Railway were caused by engines or vehicles getting off the line. In a few cases only was any damage sustained by stock or road. There were 15 cases of fire.

It seems almost certain that the accidents were not reported in 1874 so faithfully as in 1875. In the latter year every petty accident appears (see Table I) to have been reported, as was done in 1872 on the East Indian Railway (see Circular just quoted), and derailments on temporary roads and on triangles used in substitution of turntables have also been reported as accidents.

It will be observed in the table given below that on the East Indian Railway, with its large traffic, only one case, and that a serious one, of getting off the line is reported in 1875.

The conclusion seems unavoidable that cases in which vehicles or engines left the rails and no injury resulted, were not reported on that line and probably on others.

The total casualties to passengers, Railway servants, and others from all causes were—

Years.	Killed.	Injured.	Total.
1871	177	204	381
1872	211	224	435
1873	166	272	438
1874	221	278	499
1875	208	267	475

The following table shows the number and the nature of the accidents to trains, &c., which occurred on each Railway during 1875:—

Train miles per mile open.	Mean mileage open.	Names of Railways.	Classification of Accidents.					Total.
			Collisions.	Getting off the line.	Fire.	Running over cattle.	Other causes.	
3,958	1,503¾	East Indian	4	1	8	131	13	157

	6,337¼	Total ...	57	150	105	405	151	868

Collisions.

The total number of collisions on all Railways were 57 compared with 68 in 1874; 2 were caused by defects in rolling-stock or road and works; 14 are attributed to the Locomotive Department; 3 to guards; 13 to the Traffic Department; 1 to defect in working signals; 12 to carelessness of pointsmen; 12 to workmen employed on the line; 1 was caused by a truck placed on the main road by some malicious persons, and 3 were either unavoidable or not accounted for.

The total casualties were 11 injured, compared with 6 killed and 56 injured in the previous year.

East Indian Railway.—Four during 1875 against 36 in previous year; 3 occurred to goods trains, and 1 to the engine of a coal train; 1 was caused by the negligence of a pointsman, 2 by the carelessness of the Locomotive and Traffic Departments, and 1 by a heavy storm which set in motion a local passenger train causing it to run out of the siding into the main road while a goods train was entering the station.

These accidents resulted in some cases in considerable damage to the rolling-stock. The casualties were 2 Railway servants injured.

Oudh and Rohilkhand Railway.—Seventeen accidents occurred against 5 in the previous year; 10 are attributed to the faults of pointsmen and drivers; 4 to workmen employed on the line; 2 to the Traffic Department, and 1 to the carelessness of a guard. In 6 cases lorries were run over. There was 1 Railway servant injured.

Sind, Punjab and Delhi Railway—Punjab Section.—Seven cases. One attributed to defect in rolling-stock; 3, in which trollies were run over, to carelessness of workmen; 1 to the fault of an engine-driver, and 2 to carelessness in shunting. No one was injured.

Rajputana State Railway.—Of 4 cases 2 were caused by the fault of the Locomotive Department, and 2 by the Traffic Department; the damages were slight. In one instance the Station Master was punished.

Holkar State Railway.—There was only 1 case of collision, and that was between an engine and its own train. No casualties.

Madras Railway.—Six collisions occurred against 1 in the previous year; 3 were caused by men employed in running trollies, &c.; 1 by a truck placed on the line by some malicious persons, and 2 were from causes unknown. There were no casualties.

South Indian Railway.—One accident occurred in which 4 trucks were damaged and several axle-boxes broken, due to defect in way and works. No one was injured.

Great Indian Peninsula Railway.—Of 12 collisions, 1 occurred between a passenger and a goods train at Kasara, causing slight injury to 2 passengers. Another took place between a down-goods and an up-goods train at Shahapur, in which the engines of both trains were damaged, 4 wagons smashed and 2 firemen and a guard injured. In one case a material lorry was run over through the fault of an Inspector. A collision between an engine and some

Ghât brakes took place at Lonauli through the fault of the signalman at that place. At Chinch Bunder there was a collision between a Great Indian Peninsula Railway Company's goods train and a goods train of the Bombay, Baroda and Central India Railway. The engine of the former went off the line, and the front brake-van was smashed. The driver of the Great Indian Peninsula Railway Company's train was to blame.

Bombay, Baroda and Central India Railway.—There were 5 accidents; 2 are attributed to the fault of the Locomotive Department; 2 to the Traffic Department, and 1 to the Permanent-way Department. The casualties were 3 Railway servants injured.

Getting off the Line.

The total number of these accidents amounted to 150, being 47 more than in the previous year. Eight were either unavoidable or not accounted for; 14 were due to defects in rolling-stock; 56 to defects in road and works; 5 to the malicious acts of persons not under the control of the Railway Management, and the rest to the carelessness of the Locomotive Department, the station staff and servants employed on the line.

East Indian Railway.—Only 1 case of engine and vehicles leaving the rails occurred; but the accident was of a serious nature, resulting in the death of 11 persons and in injury to 15 others. It is supposed to have been caused by the engine running over the cow-catcher which had worked loose and dropped on the rails. The train was a down-mail from Jabalpur, and was going at high speed, when about 3 miles from Katni the engine left the rails and the carriages overrode each other and became a complete wreck, except 4 in the rear.

The line for a distance of 50 or 60 yards was completely broken up.

Oudh and Rohilkhand Railway.—Thirty-two cases occurred; 2 from causes unknown; 1 from defect in rolling-stock; 5 from defects in road and works; 8 are attributed to the faults of the Locomotive Department; 1 to a guard, 4 to the Traffic Department; 11 to the negligence of pointsmen, and 1 to the malicious acts of persons unconnected with the service. The rolling-stock and permanent-way were in some cases more or less damaged. The casualties were 3 Railway servants killed and 2 injured.

Sind, Punjab and Delhi Railway—Punjab Section.—Seven cases; 5 were caused by the negligence of pointsmen, and 1 by defect in rolling-stock; the cause of 1 is unknown. The damages were slight, and no one was injured.

Rajputana State Railway.—Twenty accidents occurred; 2 from causes unavoidable or unknown; 3 from defects in rolling-stock; 7 from defects in road and works; 4 were due to the faults of the Locomotive Department; 1 to the Traffic Department, and 1 to a pointsman In one case a wagon derailed and was dragged for a distance of 6 miles when it again got on the line at a crossing. In another case the engine of a goods train with 11 wagons ran off the road at Jillana Bridge. The train was not stopped at the signal as directed, and ran on to the bridge where a rail was out. Several wagons were broken up, and the driver was severely injured. There were no other casualties.

Holkar State Railway.—There were 45 cases against 1 only in the previous year. Of this number no less than 37 were caused by defects in road and works. Of the remaining accidents, 4 are attributed to the faults of the Locomotive Department; 1 to Traffic; 2 to pointsmen, and 1 to workmen employed on the line. The cause of 1 is unknown. But although the number of accidents was large, no casualties occurred.

In a few cases only was any damage sustained by either road or stock.

Many of these cases occurred with engines of class C which, it has been found here and elsewhere, cannot be got round 100 metre curves without risk of derailment.

Punjab Northern State Railway.—There was only 1 accident, the cause of which is unknown.

Tirhoot State Railway.—One accident occurred in which a special train got off the rails at Darbhangha from the negligence of the driver. No damage was done.

Madras Railway.—Seven cases occurred, of which 2 are attributed to defects in rolling stock and in road and works, and the rest to the faults of the Railway servants. There were no casualties.

Great Indian Peninsula Railway.—There were 31 accidents, 7 of which were due to faults of the station staff; 12 to defects in rolling-stock and in road and works; 2 to carelessness of the Locomotive Department; 1 to the fault of a guard; 6 to pointsmen; 2 to the malicious acts of persons not under the control of the Company, and 1 to causes unknown. One passenger was injured.

Bombay, Baroda and Central India Railway.—Of 3 cases, 1 resulted from carelessness on the part of the station staff; 1 from the negligence of a pointsman, and 1 from defect in rolling stock. There were no casualties.

Fire.

The total number of accidents under this head increased from 92 in 1874 to 105 in 1875. On the East Indian Railway there was a decrease of 12; a decrease of 4 on the Oudh and Rohilkhand Railway, and of 13 on the Punjab Railway. The number on the Holkar State Railway was 15; on the Rajputana 2; on the South Indian 1, and on the Bombay, Baroda and Central India 1, against *nil* on all these lines in the previous year. On the Madras Railway there was an increase of 15, and on the Great Indian Peninsula an increase of 6. The only Railways which were free from such accidents were the Eastern Bengal, Calcutta and South-Eastern State, and the Tirhut State Railways.

Over 89 per cent. of the total number of these accidents have been classified under the head of "Defects in rolling-stock," by which must be understood, it is presumed, defective means of arresting the exit of sparks from the engines. A really effective spark-arrester with wood-fuel is still a desideratum. Two cases were due to spontaneous combustion; 7 are unaccounted for, and 2 are attributed to the faults of the Locomotive and Traffic Departments.

The following table shows the distribution of the accidents and how they were caused:—

Names of Railways.	Number of cases.	Caused by		Spontaneous combustion.	Unavoidable or causes not known.	Remarks.
		Sparks from engines.	Carelessness of Railway servants.			
East Indian	8	8	...	...	...	Engines not fitted with spark-arresters.
Oudh and Rohilkhand ...	8	7	...	...	1	Some of the engines on these lines were fitted with lengthened ash-pans and all with spark-arresters.
Sind, Punjab and Delhi, Punjab Section	6	6	...	...	...	
Sind, Punjab and Delhi, Sind Section	10	10	...	...	...	
Nalhati State	1	1	...	...	...	Not stated whether spark-arresters were in use.
Rajputana State	2	1	1	...	...	Spark-arresters were in use.
Holkar State	15	15	...	...	...	Wood-fuel. It does not appear whether spark-arresters were in use.
Punjab Northern State ...	2	2	...	...	...	Wood-fuel: spark-arresters were used.
Madras	34	31	1	...	2	Wood-fuel was used in 30 cases, and coal in 4; spark-arresters were fitted to engines using wood.
South Indian	1	1	...	...	...	Wood-fuel was used. Spark-arrester was defective.
Great Indian Peninsula ...	17	12	...	1	4	Engines fitted with spark-arresters.
Bombay, Baroda and Central India	1	...	...	1	...	
Eastern Bengal	...	...	...	...	...	
Calcutta and South-Eastern State	...	...	...	...	...	
Tirhut State	...	...	...	...	...	

Running over Cattle.

These accidents numbered 405 against 407 in 1874. Of the total number, 44 were due to unavoidable or unknown causes; 346 to defective state of the fences, and 11 to faults of gatemen and police.

East Indian Railway.—Out of 131 cases, 63 occurred to passenger trains. With the exception of a few instances, it is not stated whether cow-catchers were used. In one case an elephant which had broken loose and strayed on to the line was run over by a goods train, but fortunately no damage was done either to stock or way. In some places the animals got on to the line in consequence of the fencing being too low, but it is proposed to put a 2-wire fence as soon as wire is received. In 44 cases the fence is reported to have been in good order.

Oudh and Rohilkhand Railway.—There were 51 cases. In all the instances, the engines were fitted with cow-catchers, but in 8 only the animals were thrown off the line.

Sind, Punjab and Delhi Railway—Punjab Section.—Five accidents only against 4 in the previous year. Cow-catchers are not in use on this line.

Sind, Punjab and Delhi Railway—Sind Section.—In 18, out of 22 cases the animals were thrown off the line. In four instances, slight damages were done to the engines.

Calcutta and South-Eastern State Railway.—There were 17 cases. Cow-catchers are not in use on this line, and the line is fenced only partially.

Nalhati State Railway.—Four accidents. There is no fencing, and cow-catchers are not in use.

Rajputana State Railway.—Out of 31, the animals were thrown off the line in six instances. In one case, the engine was disabled, and in two others, some of the vehicles left the metals, and were more or less damaged. No casualties.

Holkar State Railway.—There occurred 9 cases, in one of which, two wagons and a brake-van were derailed, and in 2 others, the animals were thrown off the line. Cow-catchers are in use.

Punjab Northern State Railway.—In 2 out of 6 cases, the cow-catchers were effective in removing the animals from the line.

Madras Railway.—The cow-catchers are not in use on the Railways in the Madras Presidency, but on the Madras Railway 118 engines are being provided with them. It is singular that on this line out of 41 accidents from running over cattle, 22 occurred to mail trains only, besides 4 to mixed and 1 to a slow passenger. In one instance, two vehicles left the rails, and were slightly damaged. Slight damage was also done to the permanent-way, but no injury to human life.

Great Indian Peninsula Railway.—Of 36 cases, 31 were due to the defective state of the fencing; 2 to faults of gatemen; 2 to faults of cartmen not under the control of the Company, and 1 to a crossing being unprotected. The latter took place on the Nizam's Railway.

Bombay, Baroda and Central India Railway.—Twenty-six accidents were caused by defective fence; 5 by the negligence of gatemen, and 1 by the fault of the Traffic staff.

Other Causes.

The accidents under this head numbered 151, of which 53 occurred to passenger and mixed trains. The casualties were 1 killed and 4 injured.

Of the total number of cases, 59 were due to defective rolling-stock; 25 to faults of the Traffic staff; 16 to neglect of gate-keepers; 25 to acts of malicious persons, and the remainder to other causes.

East Indian Railway.—In 9 out of 13 cases, the trains ran over chairs, stones, &c., placed on the rails by malicious persons, but no serious damage was done to either stock or way. In 3 of these cases the offenders were found out and punished.

In one instance the axle of a ballast wagon gave way, derailing the wagon; and in another a first class carriage, while being shunted at Ghaziabad, came in contact with a pillar of the station covered-way and was damaged.

Oudh and Rohilkhand Railway.—All the miscellaneous accidents, with the exception of one, were caused by the carelessness of the Company's servants. In four instances level-crossing gates were run through, and in 9 cases, the locked points.

Sind, Punjab and Delhi Railway—Punjab Section.—Of 9 accidents 3 were due to defective rolling-stock; 4 to faults of the staff, and 2 to attempts of malicious persons to upset trains.

Sind, Punjab and Delhi Railway—Sind Section.—Nineteen accidents out of a total of 23 were caused by the bursting of tubes and crown-plates of engines; 3 to other defects in the engines, and 1 to the carelessness of a gateman. The latter was attended with a casualty of 1 killed. The boiler-plates which burst on this line are under test.

Rajputana State Railway.—The couplings and safety chains failed in 13 instances, and in 9 cases the trains passed over obstructions placed on the line by mischievous persons. Four accidents were caused by faults of gatemen, and 7 by carelessness of the Traffic staff. The system of coupling is undoubtedly defective and has recently been reported on specially.

Holkar State Railway.—In 5 cases the couplings parted and in 1 the axle of a wagon shifted. Five other accidents occurred from miscellaneous causes, but there were no serious results.

Madras Railway.—On 3 occasions, gates were run through, and in another a mixed train ran over gates left on the line by workmen.

South Indian Railway.—Once a mixed train ran over an iron chair which had been fastened to a rail by some evil-disposed persons; on another occasion a special train passed through a level-crossing gate owing to the fault of the station staff. The remaining 4 accidents resulted from defects in rolling-stock.

Great Indian Peninsula Railway.—Two attempts were made to upset the trains. In one of these cases the life-guard of the engine of a mail train was broken. Gates were run through in 4 instances, in one of which a gateman was injured. Once a pointsman fell asleep and a goods train ran through the locked points. In several cases the axles failed, sometimes derailing vehicles and causing damage to stock and way.

On the Nizam's State Railway trains ran on two occasions over bolts and stones placed on the line by malicious persons. Once a passenger train ran over a bullock cart at a level crossing, which was unprotected, smashing both the bullock and cart and injuring the cartman.

The number of landslips on the Great Indian Peninsula Railway increased from 12 in 1873 and 3 in 1874 to 14 in 1875. Of these, 7 occurred on the Bhore Ghât and 3 on the Thull Ghât. On one occasion 1,000 cubic yards of earth and stones fell down on the Bhore Ghât incline blocking both lines, and on another about 40 tons of rock slipped from the bottom of the retaining wall at mileage 76 on the same Ghât. In one instance a cooly while removing the slip was slightly hurt. Two brake-vans of a mail train were damaged on the Bhore Ghât by the falling of three stones weighing from 10 to 15 lbs. On the Thull Ghât an Inspector's lorry ran into a heap of stones which had fallen, thereby injuring 5 men.

During the rains the Great Indian Peninsula line was flooded in several places. On one occasion there occurred serious breaks on the North-East line at intervals over nearly 20 miles between Kareli and Chhindwara, several small bridges being damaged, and telegraph posts, ballast, &c., completely washed away. The embankments were also destroyed in other places, and in one instance, the arch of an abutment fell down, and in another a culvert was carried away. It is satisfactory to notice that no accident occurred to trains from these circumstances.

Bombay, Baroda and Central India Railway.—One accident only. It consisted of 5 vehicle of a local passenger train having been slightly damaged by a bale of cotton projecting from aspassing wagon.

Accidents and Injuries to Passengers.

The following table exhibits the numbers of passengers killed and injured, as compared with those of four previous years :—

	Killed.	Injured.	Total.
1871	9	29	38
1872	9	58	67
1873	13	83	96
1874	13	70	83
1875	18	51	69

The numbers of passengers killed and injured from causes beyond their own control were 9 and 23, respectively, making a total of 32, of which 25 were due to accidents to trains and 7 to other causes. It was in one accident only that 9 persons were killed and 13 injured. This accident which occurred on the Jabalpur line of the East Indian Railway has already been noticed in a previous paragraph.

The accidents happening to passengers from their own misconduct or want of caution, were 9 killed and 28 injured, of which 6 were killed and 13 injured on the East Indian Railway alone. Almost the whole of these accidents consisted of passengers falling in getting in or out of carriages and jumping out of trains in motion. In one instance on the East Indian Railway a native life-prisoner jumped out of a mail train and died from the injuries received. It is said that the carriage in which he was travelling was not provided with prison fittings.

The numbers of persons killed and injured per million of passengers carried were—

	From causes beyond their own control.	From misconduct or want of caution.
During 1871	0·47	1·53
„ 1872	1·9	1·4
„ 1873	2·54	1·74
„ 1874	1·79	1·59
„ 1875	1·2	1·39

Accidents to Railway Servants.

The following figures show the accidents to Railway servants throughout India :—

From causes beyond their own control.

	Killed.	Injured.
(1.) Employed on trains in motion	6	21
(2.) Ditto in stations or on line	2	4
	8	25

From incaution or misconduct

(1.) Employed on trains in motion	18	46
(2.) Ditto in stations or on line ...	75	129
	93	175
Total	101	200

The distribution of the casualties to servants from causes beyond their own control is —

	Killed	Injured
East Indian Railway	3	3
Eastern Bengal Railway		1
Oudh and Rohilkhand Railway	1	1
Madras Railway		2
Great Indian Peninsula Railway	1	12
Bombay, Baroda and Central India Railway		3
	8	25

Of the 93 servants killed and 175 injured from their own misconduct or want of caution, 12 were killed and 34 injured in attempting to get upon or off, or falling from, engines and carriages in motion; 51 killed and 25 injured while incautiously standing or walking upon the line; 5 killed and 12 injured while coupling or uncoupling carriages and wagons; and 9 killed and 22 injured while engaged in shunting trains.

The inclusion, in the returns of some of the Railways, of accidents to servants employed in workshops and on works involving no risk from the working of trains, has helped in some measure to increase the number of casualties under this head. The classes of servants to be included in the accident returns are shown in Public Works Department Resolutions Nos. 7R, dated 2nd March 1874, and 17R, dated 12th June 1874.

The following table exhibits the casualties to Railway servants, train-mileages, &c., for five consecutive years :—

Year.	Killed and injured. From causes beyond control.	Killed and injured. From misconduct or incaution.	Killed and injured. Total.	Train mileage.	Reported number of servants employed.
1871	24	222	246	13,844,840	74,650
1872	47	214	261	14,525,990	80,258
1873	30	206	236	15,145,205	82,201
1874	54	233	287	17,982,403	63,138
1875	33	268	301	17,616,199	67,429

Taken in connection with the train-mileage run, the number of casualties during 1875 amounted to 17·09 per million train-miles, against 15·96 per million train-miles in 1874. But compared with the number of servants employed it was about the same in both years.

The miscellaneous casualties were as follows :—

	Killed.	Injured.
At level-crossings	7	2
Trespassers, including suicide	72	8
Miscellaneous	10	6
Total in 1875 ...	89	16
„ in 1874 ...	102	27
„ in 1873 ...	79	27

Deaths in Trains and Stations.

A detailed list of deaths of passengers and intending passengers in carriages and stations from causes unconnected with the working of Railways is appended at the end of the returns.

The total number of casualties of this sort was 212 against 133 in 1874 and 185 in 1873. Of these, 124 occurred on the East Indian Railway; 5 on the Eastern Bengal; 33 on the Oudh and Rohilkhand; 13 on the Sind, Punjab and Delhi Railway; 5 on the Rajputana; 8 on the Madras; 1 on the South Indian; 22 on the Great Indian Peninsula; and 1 on the Bombay, Baroda and Central India Railway.

These casualties appear to have been due in most cases to passengers undertaking journeys when in bad health.

Taking into consideration accidents to trains, &c., of all kinds and the extent of open mileage and train mileage of the different Railways, the following result is deduced :—

Railway.	No. of train-miles run for each accident to trains, &c.	Average No. of trains passing over each mile. No.	Order 1 being greatest.
Holkar (State)	1,672	2,419	6
Calcutta and South-Eastern (State)	2,336	1,419	11
Sind Section, Sind, Punjab and Delhi	4,997	2,504	3
Nalhati (State)	5,082	1,119	12
Punjab Northern (State)	5,220	1,068	13
Rajputana (State)	5,505	1,503	10
Oudh and Rohilkhand...	8,174	1,855	8
South Indian	15,909	1,531	9
Madras	22,522	2,471	5
Tirhut (State)	24,916	958	14
Bombay, Baroda and Central India	26,777	2,499	4
Punjab and Delhi Section, Sind, Punjab and Delhi ...	32,754	2,011	7
East Indian	37,900	3,958	1
Eastern Bengal	57,664	3,279	2
Great Indian Peninsula	Data wanting	Data wanting	

RESOLUTION.—It is probable that the State lines, as also the Sind, Oudh and Rohilkhand, and perhaps others, report accidents which some lines omit.

The derailments (largely due to sharp curves within station yards), fires on the Holkar line (due to the use of wood-fuel), running over cattle (on practically unfenced lines), and the defective couplings of the metre gauge account for by far the greater number of accidents recorded on these Railways.

The almost total immunity of passengers and servants from injury on the metre gauge lines, notwithstanding the number of accidents, is suggestive of less risk in working a metre gauge Railway at low speed than in working the ordinary gauge lines at high speed.

1 passenger only was injured from causes beyond his own control, and

2 passengers were injured from causes within their own control.

Not one Railway servant was injured from causes beyond his own control, and only 9 were killed or injured from causes within their own control, but 5 of these 9 cases occurred to persons falling out of ballast trains and otherwise in connection with such trains.

The very numerous, though trivial, accidents on the State Railways is, no doubt, receiving the attention of the Director of State Railways.

The particular attention of the Consulting Engineer of Guaranteed Railways at Lucknow should be directed to the very high percentage of accidents of all kinds upon the Oudh and Rohilkhand Railway, and he should, in conjunction with the authorities of the line, thoroughly investigate the matter with a view to prevention of such accidents in future. And the attention of the Consulting Engineer to the Government of India, Calcutta, should be directed to the frequency of cases of running over cattle on the East Indian Railway, which appears to denote defective maintenance of fences. The attention also of the Consulting Engineer at Lahore should be directed to the accident return on the Sind, Punjab and Delhi Railway, which has been unduly swelled by the occurrence of accidents on the Sind Section of the line, notably by the bursting of locomotive tubes and cases of running over cattle.

The Government of Bombay should be requested to submit separate statements of accidents on State Railways worked by the Great Indian Peninsula Railway.

In Table II, "Train mileage of all descriptions" should, in future, be substituted for "Train mileage (goods and passengers)," and after "Passenger mileage" should be added the following headings :—

Per mile open.

Number of passengers carried.
Train mileage of all descriptions.
Passenger mileage.

His Excellency the Governor General in Council desires that the earnest attention of all Railway Companies and Government Officers be paid to the detailed observations concerning accidents during the year under review, and that all possible measures be applied to reduce their number in future.

No efforts should be spared by those in authority to render the working staff of the different Railways efficient and trustworthy.

ORDER.—Ordered, that these proceedings be communicated to the Governments and Officers noted in the margin* for information and guidance, together with copies of the returns compiled.

Ordered also, that these papers be forwarded to the Department, Governments, Administrations and Officers marginally noted† for information, and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that the papers be published in the Supplement to the *Gazette of India*, Table I excepted.

H. DRUMMOND, *Colonel, R. E.*,
Deputy Secretary.

* Governments of Madras and Bombay.
Resident at Hyderabad.
Director of State Railways.
Consulting Engineers, Calcutta, Lahore, and Lucknow.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

MEASURES FOR THE PREVENTION AND ALLEVIATION OF EPIDEMIC OR CONTAGIOUS DISEASES AMONG PASSENGERS IN RAILWAY TRAINS.

Nos. 2246—52 R., dated Simla, 2nd September 1876.

Read again—

Public Works Department Resolution Nos. 176—81 G. R. of the 2nd February 1872.

Read also—

Letter from the North-Western Provinces Government, Sanitation Department, No. 79 A., dated the 6th June 1876, and annexures.

OBSERVATION.—When any epidemic disease and especially cholera may be prevalent, it is desirable, as far as possible, to prevent its occurrence amongst passengers by Railway trains, and to alleviate the sufferings of those who may unfortunately be attacked.

RESOLUTION.—In continuation of the rules in Government of India Resolution Nos. 176—81 G. R. of 2nd February 1872, His Excellency the Governor General in Council is pleased to direct that instructions shall be issued to all Railway authorities throughout India to take special measures against overcrowding in trains during such time.

2. Train-guards should be supplied with some simple remedies for use in the event of cholera attacking any person in a train; and when fairs are being held, and when great congregations of passengers take place at Railway stations, special booking arrangements should be made, by which intending travellers may obtain tickets and be conducted into trains with as little crowding as possible. With this view temporary enclosures should be formed at the Railway stations most frequented, and the issue of tickets should, so far as possible, be regulated so as to admit within the enclosure only the proper number of the passengers for access to the platform from which the trains start, and then in some conspicuous manner it should be indicated to those endeavouring to obtain tickets that they cannot proceed by the train then starting, but must wait for the next or subsequent trains, their time of departure being stated to them.

3. In anticipation of large fairs or pilgrimages occurring at a season of the year when epidemic disease is to be feared, temporary hospitals should be established at those places on the Railway where great crowds of people are expected to arrive or depart. The Agents and Managers of Railways should communicate with the local civil authorities on this subject beforehand, in order that the necessary measures may be taken at the charge of such local funds as may be available.

ORDER.—Ordered, that a copy of this Resolution be communicated to the Governments of Madras and Bombay for information, and to the Consulting Engineers to the Government of India for Guaranteed Railways at Calcutta, Lahore, and Lucknow for information and guidance and for communication to the Agents of the several Railway Companies.

Also to the Director of State Railways for information and guidance and for communication to the Managers of the State Railways opened for public traffic.

Also, that a copy be communicated to the Home Department for information, with the request that the necessary communication may be made to Local Governments and Administrations in the Civil Department and for publication in *Gazette of India*.

H. DRUMMOND, *Colonel, R. E.*,
Deputy Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21ST SEPTEMBER 1876.

GENERAL REMARKS.—Slight rain has fallen in all the districts of Madras except Madura, but too little to be of much benefit: prospects are unchanged. In Mysore there has been no rain, and total loss of the standing crops is apprehended if it holds off for another week; prices are high and relief works have already been started. From Bombay it is reported that prospects are very good in Sind, Guzerat and the Konkan; but in Khandesh, Násik, the Deccan districts and the Southern Mahratta Country the rain has been trifling in amount, and the condition of the crops is very critical: scarcity is apprehended. In the Central Provinces there has been general rain and prospects are good. Reports are good from Berar. In Central India the fall has been excessive, and dry weather is required in Malwa and Bhopal. The rain continues in most parts of Rajputana, and prospects are favourable. In Bengal the rain has been moderate; most has fallen in the extreme eastern districts, Orissa, Chota Nagpore, and Behar: the *aous* rice has been cut with a good outturn and the *amun* is promising; more rain is said to be needed for the late rice in Behar, but the rainfall reports shew that a considerable quantity has fallen in Patna, Mozufferpore, Gya, and Sarun. In the North-Western Provinces more rain is much required in Benares; elsewhere the fall appears to have been abundant and to have restored the prospects of the crops. In Oudh extremely heavy rain is reported from Sitapur: more is wanted in Fyzabad and Gonda. Rain has fallen throughout the Punjab, except in Mooltan, Dera Ismail Khan and Peshâwar: harvest prospects are excellent. In Assam more rain is required.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Sept. 20th)	·75 at Masulipatam.	Rain very slight elsewhere; 2½ feet water over anicut; standing crops want rain; *sajja*, *gingelly* being harvested; outturn moderate; prices slightly risen in 4 taluks; cholera, 93 seizures, 26 deaths; cattle generally healthy; pasture insufficient; markets well supplied locally.
Kurnool („ „)	...	No change in the state of the season; slight rain in 3 taluks, but of little benefit; dry crops sown withering; paddy crop under irrigation canal good; no tanks have received any supplies; markets moderately supplied; prices high; cholera in Cumbum and Markapur taluks, seizures 14, deaths 6; water over Sunkesala anicut ·5 feet on 19th.
Madura („ „)	*Nil*	Weather hot; standing dry crops withering; little progress made in wet cultivation; much distress prevails on account of increasing scarcity of water; cattle disease continues in Madura taluk; a few cases of cholera in some villages.
Malabar („ 21st)	·15	Rain not quite sufficient for cultivation; harvesting first crop begun; grain supply sufficient; prices slightly falling; cholera in all taluks, except Cochin, 171 deaths; cattle generally healthy; pasture good.
Tanjore („ „)	*Nil* at Negapatam.	Rain elsewhere very partial and scanty; rivers low; supply to tanks poor; water over anicuts none; cultivation, wet and dry crops throughout the district; standing crops generally good; harvest, wet crops in some places, yield moderate; pasture generally sufficient; markets well supplied; prices slightly rising; public health, cholera continues, seizures 63, deaths 48; small-pox in some parts; cattle healthy.
		General Remarks.—General prospects unchanged.
Bombay— (Sept. 21st)		
Sind—(Sept. 20th)		
Kurrachee ...	...	River at Kotri on 18th, 15 feet 9 inches, 13 feet 2 inches on the same date last year; total rainfall from 1st January, at Sehwan 14·89, Kurrachee 7·80, Tatta 6·93, Kotri 6·61, Keti 9·36; Upper Sind floods entered Dádú and Sehwan talukas on 8th, extent of damage not yet ascertainable; harvesting of *kharif* crops commenced in Játi and Sákro talukas; preparations for *rabi* progressing; 200 cattle in Sákro taluka died from rinderpest.
Shikárpur ...	...	River 10 feet 10 inches, being 1 foot 11 inches lower than on the same date last year; *kharif* crops healthy; *rabi* preparations being made; locusts appeared in 3 talukas, but no damage as yet reported; weather sultry; nights damp; fever and cough prevalent; public health moderate.
Hyderabad ...	...	River falling fast, but still 1 foot 5 inches higher than last year; canals breached in talukas Naushahro, Kandiáro, Tando Bágo and Badin; crops damaged by floods in Kandiáro; locusts seen in Moro and Hyderabad; fever general, cattle disease in 3 talukas; 56 fresh cases of small-pox in Hyderabad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Upper Sind Frontier ...	...	*Rabi* sowings commenced; standing *kharif* crops good; flood decreasing; weather sultry; fever prevalent.
Guzerat.		
Ahmedabad ...	1·14	Total rainfall 22·13; crops excellent; prospects good.
Kaira ...	0·77	Crops good; prospects excellent.
Surat ...	0·39	Total rainfall 49·43; 5 cholera cases in Bárdoli, 2 fatal.
Broach ...	1·14	Total rainfall 32·39; cotton in Ankleswar taluka injured to the extent of one-half by rain; other crops in the district good.
Khandesh and Násik.		
Khandesh ...	0·14 at Dhulia.	Total rainfall 12·73; state of crops and public health as before.
Násik ...	0·11	Total rainfall 16·38; more rain wanted; crops withering; public health good.
Konkan.		
Tanna ...	7·39	Total rainfall 87·50; cholera exists slightly in 3 talukas; agricultural prospects good.
Deccan.		
Poona ...	0·06	Total rainfall 13·79; *kharif* crops very much suffering for want of more rain in all talukas; slight cattle disease and cholera continue.
Ahmednagar ...	0·15	Total rainfall 8·26; *kharif* crops withering; sowing of *rabi* retarded; want of rain greatly felt; cholera in 9 talukas, 162 cases, 63 deaths.
Sholapur ...	0·04	Total rainfall 8·15; cholera lingering in Bársi Karmála and Sángola; rain anxiously looked for; distress in all talukas.
Satara ...	0·02	Total rainfall 30·68; *kharif* crops withering; 34 deaths from cholera; scarcity of pasture for cattle in Khánápur taluka.
Southern Mahratta Country.		
Belgaum ...	0·09	Total rainfall 27·80; crops sown in northern and eastern talukas in very bad condition; water and fodder scarce; rain anxiously desired for sowing of *rabi* crops; prices of grain still reasonable.
Dharwar ...	...	Rice crops in western talukas suffering from prolonged want of rain; crops worse in eastern talukas; sowings of cotton and late crops retarded; poor people suffering much from want of employment; in some places grain pits forcibly broken open; about 800 villagers employed in Mundargi peta; orders given to carry on those local fund works for which there are funds.
Kanara ...	0·50	Total rainfall 91 inches; rain wanted above Ghát.
Kaládgi (Sept. 18th)	...	Very slight rain; *rabi* sowing slightly commenced in Bijápur taluka; cholera has almost disappeared.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·06	Total rainfall 20·54; weather hot; crops and public health good.
Wadhwán ...	...	Cotton in Limri and Wanod damaged by heavy rain; cholera in Jhalawad, 1 case fatal.
Baroda ...	0·89	Total rainfall 46·23; crops healthy.
		General Remarks.—Prospects in Sind, Guzerat and the Konkan good; in the Deccan and the Southern Mahratta Country great scarcity is apprehended from continued absence of rain.
Bengal— (Sept. 21st)		
Chittagong ...	·28	
Noakholly ...	1·93	General health good.
Chittagong Hill Tracts...	4·12	
Hill Tipperah ...	3·43

Burdwan ...	·99	
Bankoora ...	1·42	
Beerbhoom ...	·59	
Sonthal Pergunnahs ...	·29	
Bhágalpur ...	·63	General health very good.
Monghyr ...	·23	
Purneah ...	1·55	
Durbhunga ...	·45	General health good.
Mozufferpore ...	2·50	
Sarun ...	1·09	Cholera decreasing.
Chumparun ...	·24	
Patna ...	2·93	Health of the district good; very few cases of cholera and small-pox now being reported.
Gya ...	1·40	
Shahabad ...	·46	
Hazáribágh ...	2·03	Cholera now ceased.
Lohardugga ...	1·13	Cholera decreasing; small-pox nearly disappeared.
Manbhoom ...	2·79	
Singhbhoom ...	1·91	Fever prevalent in the station; general health in other parts of the district good.
Balasore ...	1·38	Public health good.
Cuttack ...	5·05	Ditto.
Pooree ...	2·23	
		General Remarks.—There has been rain in almost all the districts during the week. *Aous* is nearly all cut with good outturn and *amun* generally looks promising; the *bhadoi* harvest promises fair results; rain however is much wanted for the late rice in the Behar districts and in Cooch Behar. The prospects in Pooree, particularly in the Khoordah sub-division have improved with the recent rainfall. Lands are being ploughed for the *rabi* or cold weather crops.
N. W. P.—		
Benares (Sept. 20th)	·1	More rain urgently required.
Allahabad („ 15th)	1·2	Almost all the rain fell in the extreme north-west of the district, falling now.
Agra („ 20th)	From 2·7 to 8·8.	Crops revived, and prospects again favourable.
Meerut („ 20th)	...	Rainfall and prospects good.
Bareilly („ „)	4·1	Weather cloudy.
Almora („ 18th)	...	Rain general throughout district; some parts getting much more than others; crops prospects very good.
Punjab—		
(Sept. 20th)		
Delhi ...	4·5	Prospects and health good.
Hissár ...	2·1	Crops revived and prospects improved, but more rain is wanted; health good generally.
Umballa ...	1·6	Crops and health good.
Jullundur ...	1·2	Crops abundant; fever still prevalent.
Lahore ...	·9	Crops good; health improving.
Mooltan ...	*Nil*	Crops good; fever prevalent.
Dera Ismail Khan ...	*Nil*	Health and harvest good.
Rawalpindi ...	·5	Agricultural prospects fair; cholera dying out.
Peshawar ...	*Nil*	Crops below average; slight cholera in city.
		General Remarks.—Rain fully general in province except in western districts; harvest prospects bright; health fair and improving.
Oudh—		
(Sept. 20th)		
Lucknow ...	1·4	Heavy rain throughout the Sitapur division; more required in Fyzabad and Gonda; prospects fair; public health generally good.
Sitapur ...	17·6	
Fyzabad ...	1·1	
Central Provinces—		
Upper Godávari (Sept. 16th)	·27	*Rabi* sowings commenced; prospects of *kharif* good; no epidemic; prices steady.
Bilaspur ...	2·28	Prospects good; fever prevalent; prices risen.
Raipur ...	6·30	Prospects favourable; health good; prices falling.
Bálághát ...	1·10	Prospects favourable; fever prevalent; prices stationary.
Chanda (Sept. 17th)	2·50	Transplanting continues; *rabi* ploughings commenced; cholera decreasing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Chhindwára ...	1·75	Weather cool; prospects favourable; cholera confined to one village; prices steady.
Betúl (Sept. 18th)	1·66	Prospects favourable; cholera continues; prices risen.
Bhandara („ 19th)	2·61	Rice crops improving; other *kharif* good; fever, cholera and small-pox continue; prices stationary.
Nágpur („ 20th)	1·97	Prospects favourable; health good; prices steady.
Wardha ...	1·59	Prospects favourable; cholera declining.
Nimár ...	·16	Prospects good; cholera continues.
Hoshangabad ...	2·80	Prospects good; prices easy.
Narsinghpur ...	...	Prospects favourable; cholera and fever prevalent; prices steady.
Jubbulpore ...	2·24	*Kharif* good; cholera and cattle disease continue.
Saugor (Sept. 20th)	3·82	Continued rain injuring crops; cholera decreasing.
Seoni ...	3·10	Cholera decreasing; prices stationary.
Damoh ...	5·90	Break required; cholera continues; prices stationary.
Mandla ...	1·45	*Kharif* favourable; health good; prices stationary.
		General Remarks.—Prospects on the whole continue good.
British Burma—	...	Report not received.
Assam—		
Gauháti (Sept. 21st)	1·09	Days clear and hot, cool and often overcast in mornings and evenings; slight showers on the 17th and 20th; more rain wanted for crops; prospects of tea favourable; public health good.
Sylhet („ „)	1·47	Prospects continue the same.
Mysore and Coorg—		
Bangalore (Sept. 21st) ...	*Nil.*	Want of rain throughout Mysore; total loss of standing crops apprehended if rain holds off for another week; distress already severe in nearly every district; relief works in operation; food prices rising rapidly to famine rates; public health generally good.
Coorg ...	·86	
Hyderabad Assigned Districts—		
Amraoti (Sept. 21st)	·50	Prospects good; ground under preparation for *rabi*.
Central India—		
Indore (Sept. 20th)	2·14	Total rainfall 39·52.
Gwalior ...	6·21	Ditto 26·74.
Neemuch ...	4·0	Ditto 42·0.
Rutlam ...	5·79	Ditto 51·27.
Sutna ...	2·11	Ditto 34·57.
Bhopal (Sept. 7th to 14th)	2·10	Ditto 56·09.
		General Remarks.—Rain has been excessive in Malwa and Bhopal; dry weather wanted; general health good except in Rewah where cholera lingers.
Rajputana—		
Abu (Sept. 21st)	·63	Total rainfall 47·36; weather clear with sunshine.
Sirohee („ 17th)	*Nil*	Same as last week.
Marwar („ 16th)	*Nil*	Tanks overflowing; health good; crops damaged by excessive rains, but prospects on the whole satisfactory.
Bickaneer („ 13th)	1·14	Total rainfall 5·98; health fair; prospects satisfactory; plenty rainfall in districts.
Meywar („ 15th)	·20	Total rainfall 23·24; health good; prospects very good; weather cool and pleasant.
Harowtee („ 16th)	*Nil*	Health good; Indian-corn greatly damaged.
Deolis ...	4·20	
Tonk ...	·10	
Ajmere (Sept. 21st)	2·0	Tanks full; prospects good.
Jeypoor ...	2·04	Average rain-crop anticipated; prospects of cold weather crop very good; health good.
Bhurtpoor ...	8·92	Prospects good; cholera prevalent.
Ulwar (Sept. 20th)	5·09	Prospects greatly improved.
Nepal (Sept. 13th)—	·87	Agricultural prospects fair.

T. C. HOPE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 14th September 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

SINDH INCUMBERED ESTATES BILL.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill to relieve from incumbrances the estates of Jágírdárs and Zamíndárs in Sindh be taken into consideration.

He said that the Report of the Select Committee which he had the honour to present on the occasion of the last meeting of the Council, would speak for itself; but there were three or four matters upon which, perhaps, it was desirable for him to say a few words. In section 15 of the Bill the Committee had provided that when the Manager had determined the amount of the several debts, he should, if they could not be paid at once, rank them according to the order in which they should be paid, and fix the interest, if any, to be paid upon them, respectively, from the date of the final decision to the date of the payment and discharge. They had made that provision because there might possibly be some cases in which it might be proved to be necessary; at the same time, he trusted that the Bombay system which was adopted in other parts of the Presidency, of advancing the funds necessary for the liquidation of the debts, and afterwards recovering those funds from the proceeds of the estate, would be followed in Sindh. That system was better for the estate, because creditors would accept less in a lump sum down than if they were to be paid by a long series of instalments. It was also fairer to the creditors, as when their interest was, in many cases, cut down, they ought not, in addition, to be kept waiting for their money. And, finally, there could be no harm, and no risk to the Government from this system, as long as the liquidation-scheme had been carefully and properly considered.

Another point he would mention was that the Committee had struck out the old section 17, which gave power to reduce the amount of interest in all cases where it was found to be too high; but they had done this merely because the subject was rather a large one, and they thought that it would be better provided for in Rules than by the somewhat bald terms of the section as it stood. They had, therefore, inserted in section 30 of the Bill, as amended, a clause taken from section 19 of the Chutia Nágpur Act. This change was made merely for the reason which he had alleged, and not with the slightest intention of preventing the cutting down of the interest, as might, perhaps, be supposed by some persons, on account of the omission of the section.

Another point he would refer to was that in the new section 23 there was not the proviso which would be found in the old section 26, forbidding the sale of property under management except with the consent of the owner. No doubt there were cases in which the only way to effect a liquidation of the estate was by selling some portion of the property, and it was necessary in such cases that the Manager should have the power of effecting such sale, and should not be hampered by the prejudice and opposition of the owners of land themselves; but at the same time, he himself felt a great aversion to any such sales of land, and he only hoped that the Sindh officers would follow the example of those who had worked the previous Acts in Ahmedabad and Broach, and who had been able to bring about, without sales, the very favourable results which he had laid before the Council in April last, on the occasion of the discussion of the Chutia Nágpur Bill.

The fourth point which he would mention was that the Committee had made a separate chapter for appeals and revisions; the Bill now expressly gave an appeal against all the more important orders which the Act contained, and further provided a general power in the Commissioner to call for the proceedings in any case and to pass orders upon them. He trusted that those provisions would be a sufficient guarantee to the public that the creditors would be fully and fairly and completely heard in all cases in which their interests were involved.

He would also notice one or two points which he had observed in some very intelligent criticisms to which the Bill had been subjected in certain quarters. One of those was to the effect that he had not mentioned, in his previous speech, that any measures had been taken to reform the Revenue administration to which he had in some measure attributed the misfortunes in which the Jágírdárs and Zamíndárs found themselves involved. He had not done so, because in Bombay, as he trusted in every part of India, to know of an evil was to Revenue officers synonymous with taking every possible measure to redress it. In this particular case, no sooner were the settlements found not to be working well than they were carefully revised, and he believed that no further difficulty had been found with regard to them up to the present time. Again, he was asked how it was possible to manage petty estates of Zamíndárs paying only Rs. 300 per annum, many of which were under cultivation by the owners themselves. With regard to that, in Bombay, the practice had been for the officers charged with the management to avail themselves very largely of the owners themselves. It was generally found that those men, when once relieved from the pressure of debts, and the terror of arrest and imprisonment which had hitherto followed them, were most willing to give every assistance in their power in the management of their own lands. The arrangement was an exceedingly economical one, as regarded the management, and an exceedingly beneficial one to the men themselves; for of course it was better to keep them employed in the management of their own lands with the view of ultimately clearing themselves, than to turn them on one side to lead an idle life. He had no doubt that this system which was adopted in Bombay would also be largely followed in Sindh, and with a view to facilitate that object a proviso had been put into section 8 of the Bill expressly to state—

"that nothing contained in this clause shall be deemed to preclude the Manager from letting, and the debtor from taking, the whole or any part of such property on such terms consistent with this Act, as may be agreed upon between the parties."

In conclusion, he had only to express his belief that this Bill, which embodied the working experience of some fourteen years in different parts of India, and also the legislative experience acquired by the framing of the four Acts already passed, would prove well suited to the purpose in view; and he would also add his hope that the Jágírdárs and Zamíndárs brought under the Bill, would, by efficient management, be speedily restored to unencumbered estates, and that they would live long to enjoy them under the very salutary restrictions against getting themselves involved again, which the Bill provided in section 27.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

BOMBAY MUNICIPAL DEBENTURES BILL.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill to amend the law relating to the transfer of Bombay Municipal Debentures be taken into consideration. He said that he had explained on a previous occasion that the objects of this Bill were very simple, namely, to validate the transfers of debentures which had been made by simple endorsement instead of by deed duly stamped, to exempt from penalties such persons as had thus contravened the law, and to admit of transfers being made by simple endorsement in future.

The Committee had not made any alteration in the Bill so far, but had added a clause at the suggestion of the Municipal Commissioner of Bombay, and with the concurrence of the Bombay Government, enabling debentures to be consolidated, and also to be subdivided again, if necessary, and to be renewed when worn out. Thus a man who happened to hold fifty thousand rupees worth of debentures, all in separate notes of a thousand each, could get one debenture for the whole fifty, and so would not be obliged to endorse separately; and, again, if at some future time he wished to sell, he had only to take his note to the Municipal office, and get it divided into as many portions as he required. All those provisions existed at present with regard to Government Promissory Notes, and would, on the one hand, save a good deal of trouble, and on the other, improve, it was believed, the value of the security.

The Motion was put and agreed to.

The Hon'ble MR. HOPE then moved that the Bill as amended be passed.

The Motion was put and agreed to.

CIVIL PROCEDURE BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the presentation of the further Report of the Select Committee on the Bill to consolidate and amend the Laws relating to the Procedure of the Courts of Civil Judicature.

Leave was granted.

MADRAS HARBOUR RATES BILL.

The Hon'ble SIR ALEXANDER ARBUTHNOT moved for leave to introduce a Bill to enhance the rate of dues leviable on vessels entering the Port of Madras. He said that he wished to introduce this Bill in connection with the works which were now in progress at Madras for the construction of a harbour for that Port. The Council were aware of the great and pressing want of a harbour on the Coromandel Coast and of the great loss of life and property which had too frequently occurred owing to that want. After very considerable delay, many reports, and numerous suggestions, Her Majesty's Government had adopted a design framed by Mr. Parkes, the eminent Civil Engineer, who constructed the harbour at Karáchi, and, last year, the works, according to that design, were commenced, and were now in progress at an estimated cost of £628,000. It was to supply the interest on this capital sum, and to provide for the working expenses, that it became necessary to increase the port-dues levied, under the existing law, on the shipping of Madras, and it was with that view that he asked for leave to introduce the Bill. Should the permission, which he sought, be granted, he would take occasion, when introducing the Bill, and explaining its provisions, to enter more fully into the details of the entire subject.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION BILL.

The Hon'ble MR. HOBHOUSE introduced the Bill to regulate the emigration of Native labourers from the Presidency of Fort St. George to the Straits Settlements, and moved that it be referred to a Select Committee with instruc-

tions to report in three months. He said—"The subject of emigration is one on which I have had occasion to address this Council so often that I feel almost ashamed to speak of it again. Nevertheless it is a subject which has many ramifications, in regard to which the different circumstances of different localities require different laws, and which therefore comes before this Council in different aspects. We have one law for emigration from India to British, French, Dutch and Danish Settlements in the West Indies, in South America, and in the African seas. We have another law for emigration from Peninsular India to British Burma: another for emigration from Bengal to Assam, and again another for emigration from Madras to Ceylon. It happens therefore that those who are not constantly obliged to attend to these things find it difficult to keep in mind what are the peculiar features of each case to suit which our law should be moulded.

"Now the case of the Straits Settlements has some peculiar features of its own. The most important of them is that the practice of emigration thither from Madras is an old one, one which has sprung up spontaneously among the people, and extends back eighty years or more. This fact yields two results. First, there is a substantial Tamil Society in the country, and the Tamil emigrant finds himself not wholly a stranger in his new home. Secondly, since the practice of advancing money to assist emigration has grown up, a system of labour-contracts has grown up with it, which differs from the system generally prevailing under the General Emigration Act. Another feature is the distance between Madras and the Straits Settlements. That distance is short compared with the distance from Demerara or even from Mauritius; and the arrangements and precautions which are suitable to the longer passage are an useless encumbrance and expense when applied to the shorter one.

"In respect of the passage, the emigration to the Straits Settlements resembles that to British Burma, but it has these material differences; that in British Burma the emigrant's contract is made with the Government, whereas in the Straits Settlements it is made with a private employer; and the emigrant to the Straits Settlements leaves our dominions, whereas in British Burma he is still under our laws and authority. Moreover the kind of labour required for British Burma is different and leads to a different kind of contract.

"In respect of the kind of labour required, the emigration to the Straits Settlements resembles that to Assam, where also it is the practice for the emigrant to contract with a private employer; but there is a different kind of passage, and also the important difference that the emigrant passes beyond the reach of our laws.

"In fact it will be found on comparison that of the various branches of the emigration which takes place from India there is not any which does not differ in material respects from the emigration to the Straits Settlements.

"Well, such being the state of things, it was discovered some five years ago that, owing to circumstances not observed at the time,—circumstances which I have recounted before and need not recount again,—the whole of the assisted emigration to the Straits Settlements was contrary to law, and that its promoters were subject to penalties. The Council may remember that consequent upon that discovery, in the year 1872 we passed a short Act to relieve the emigration from the ban under which it was placed, and to leave the matter to be dealt with after negotiation between the Colonial Government and ourselves. Legislation was found to be required on both sides, and there has been a considerable amount of discussion respecting the terms in which the laws should be framed.

"When I moved last year for leave to introduce this Bill, I stated that the Government of the Straits Settlements had framed an Ordinance satisfactory to the Government of India. There were however some alterations to be made in it regarding the right of emigrants to the price of a return-journey and regarding some other things, and a fresh Ordinance was passed in the month of February last. It is with reference to that Ordinance, whose operation is suspended for

the present, that we have now to frame our law. I need not detain the Council by going into the several matters on which there have been differences of opinion. Several proposals have been made on our side in the interest of the emigrant, which it is our especial duty to protect. Some of those proposals have been embodied in the Ordinance, and some have not. It is sufficient to say now that matters have been put on such a footing by the Straits Settlements Legislature that there is no reason why we on our side should any longer delay to place the emigration on a permanent legal basis.

"In the first place the Ordinance provides that a Protector of Immigrants shall be appointed on the nomination of the Madras Government. Now that seems to me to be an alteration of great importance. What we want more than anything else is accurate and trustworthy information about the condition of our emigrants. In some instances we are able to get it, but in many we are not, or are not able to get it with regularity. If this proposal of the Straits Settlements enables us to get such information and reports as we from time to time desire, and I conceive it will enable us to do so, it is well worth our while to postpone the settlement of many details, even important details, until the working of the new machinery has placed us in a better position to understand the matter.

"In the second place the Ordinance has been so framed as to subject to penalties in the Straits Settlements any person who promotes emigration thither contrary to our laws. It has, therefore, in effect left it to us to say upon what terms emigration from hence shall be legal in the Straits Settlements.

"Now I said that it is worth while to postpone discussion on many details until our knowledge is more thorough. But there are certain palpable benefits which it is found possible and not difficult to secure for emigrants who go to other countries, and which we think ought to be secured for those who go to the Straits Settlements.

"One of these benefits is that the emigrant's maximum term of compulsory labour should be fixed by law. The Ordinance fixes no such term. In the countries to which the General Emigration Act applies, the term is generally five years. But the emigration to those places is much more expensive than that to the Straits Settlements; and we have reason to think that the contract wages given to emigrants in the Straits Settlements are, as compared with the market-price of their labour there, substantially lower than elsewhere, so as to leave a larger margin of profit to the employer. We are informed that the usual term which has hitherto been contracted for in the Straits Settlements is no more than two years. We may assume therefore that two years of contract labour have under existing conditions been found sufficiently remunerative to employers. The machinery of the new laws both here and in the Straits Settlements will impose some additional expense on the employers, and it may be right to fix for a maximum some term exceeding the present customary term. But it would not be right, when we are sending people to work under a stringent penal law, to omit all security that the term of their compulsory labour shall be a moderate one, or to fix a term much beyond that which suffices fairly to remunerate their employers. The Madras Government have advised that the maximum term shall be three years, and we have adopted that advice in our Bill.

"Another benefit to the emigrant is that a minimum wage shall be fixed. This has been put at 12 cents a day for an able-bodied male adult, being the amount which we understand to be now customary in the two-year contracts.

"I need hardly say that the figures inserted in our Bill, whether as regards the maximum term of labour or the minimum of wage, will be altered in Committee, if on further information alteration appears to be desirable.

"Another point of importance is to take care that contracts made by emigrants shall be labour-contracts, a kind of contract on which it is possible to engraft equitable terms and adequate protection for them. A mere contract to pay money provides for nothing of that kind. If a Tamil peasant goes to Penang

upon a simple contract to pay so many dollars to some person who has advanced, or who alleges that he has advanced, them on account of his emigration, he will have no money when he gets there, he will be helpless, he will be at the mercy of his creditor, and he may be pressed into a much more onerous labour-contract than is fair to him, or than he would have entered into at his own home. We are told that there is danger of this, and the Ordinance provides no security against it. No doubt the institution of a Protector of Immigrants will, if properly worked, do much to prevent hardships and oppression of all kinds. But there seems no reason why labour-contracts containing fair terms should not be made in every case in which a man is induced to leave his home at the instance and for the benefit of some other man who provides the expenses.

"To meet the objects I have stated, we propose to declare that contracts for the mere repayment of money advanced to procure emigration, and also contracts omitting the important particulars of a maximum term of labour and a minimum wage, shall be illegal according to our law. That declaration will, as I have explained, make them illegal according to Straits Settlements law.

"Now those are the special peculiarities of the Bill I am introducing. I need hardly explain the general machinery of emigration contained in it, which is of the usual kind, and is now very familiar to the Council. There is a system of recruiting, a written contract, an examination by Magistrate and Doctor, a registration, an embarkation under the auspices of the Protector of Emigrants. The only difference in these respects between this Bill and our General Emigration Law is that some observances and safeguards thought necessary for the general law have been omitted here. In this matter also we have been advised by the Government of Madras.

"I have only to add that as the special circumstances affecting emigration to the Straits Settlements apply only to emigration from Madras, it is proposed to repeal the Act we passed in 1872. The effect of that operation is that the Straits Settlements will, so far as regards the rest of India, be on the same footing with other places to which the General Emigration Act has not yet been extended by order of the Governor General in Council."

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill be published in the *Gazette of India* in English, and in the *Fort St. George Gazette* in English and in such other languages as the Local Government might think fit.

The Motion was put and agreed to.

INDIAN RAILWAY BILL.

Colonel the Hon'ble SIR ANDREW CLARKE introduced the Bill to consolidate and amend the law relating to Railways in India, and moved that it be referred to a Select Committee with instructions to report in five months. He said that the primary object of this Bill was to make it clear that certain sections of the Railway Act applied to lines under construction or not opened for public conveyance of passengers and goods. These sections dealt respectively with the following matters:—reports of accidents: power to make rules for working the line: carriage or delivery of dangerous goods: drunkenness or breach of duty on the part of Railway officers: acts endangering the safety of passengers: passengers entering carriages in motion or riding on the steps: unauthorized riding on engines or tenders or in luggage-vans: obstructing Railway officers: injuring carriages: trespass: cattle-trespass within railway fences: offences connected with gates.

Besides this, the Bill would consolidate and arrange in a compact and convenient form four out of the five Acts through which the Railway law of India was now scattered. The fifth (Act LII of 1860) would be dealt with by the Presidency Magistrates Bill, now before the Council.

It was thought unfair that Companies should be liable for loss or injury to luggage unless where it had actually been made over to the charge of a Railway officer. Section 5 of the Bill contained a provision to that effect.

The present Railway Act (XVIII of 1854) contained a section (10) copied from the English Carriers Act, which specified certain valuable articles for losing or injuring which Companies would not be liable except in case of special engagement. To this list the present Bill proposed to add certain other articles, such as cloths of which gold or silver formed part, opium, ivory, ebony, sandal-wood and musical instruments. This addition was suggested by the Schedule to Act No. III of 1865.

It had been found that coolies employed in loading and unloading goods at certain Railway stations were in the habit of receiving, and indeed exacting, bribes; and as they could not, strictly speaking, be deemed Railway servants within the meaning of Act XXXI of 1867, the law as it stood was powerless to put a stop to these practices. The Bill accordingly in section 23 provided that not merely Railway officers, but every other person employed by or on behalf of a Railway Company to do any act upon a Railway should be deemed a "public servant" within the meaning of sections 161 to 165 of the Penal Code.

The only other change which the Bill proposed to make was to raise to some extent the fines for giving a false account of goods carried, or to be carried, on a Railway.

The Motion was put and agreed to.

Colonel the Hon'ble SIR ANDREW CLARKE also moved that the Bill be published in the *Gazette of India* in English, and in the Local Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

The following Select Committees were named:—

On the Bill to regulate the emigration of Native labourers from the Presidency of Fort St. George to the Straits Settlements:—The Hon'ble Sir A. J. Arbuthnot, Colonel the Hon'ble Sir Andrew Clarke, and the Hon'ble Messrs. Hope and Cockerell, and the Mover.

On the Bill to consolidate and amend the law relating to Railways in India:—The Hon'ble Mr. Hobhouse, the Hon'ble Sir W. Muir, and the Hon'ble Messrs. Bullen Smith and Cockerell, and the Mover.

The Council adjourned to Thursday, the 21st September 1876.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

COAL AND IRON INDUSTRY IN INDIA.

Nos. 2447—65 R. dated Simla, 19th September, 1876.

Read again—

Despatch to Secretary of State No. 62, Railway, dated the 3rd April 1876.
" to " " " 66 " " 12th "

Read also—

No. 37, dated 29th June, 1876.

From—The Secretary of State for India.
To—The Government of India.

I have received and read with much interest the Railway letters from your Government Nos. 62 and 66 of 3rd and 12th April last, and their enclosures, relative to coal mining at Warora in the Chanda district of the Central Provinces, and to the experimental working of iron in the same neighbourhood, and at Raneegunge in Bengal and at Dechouree in Kumaon.

2. In regard to the second branch of the subject, circumstances are stated to have a good deal changed latterly. At Raneegunge, iron, coal, and limestone for flux having been found in abundance, the experiment of iron manufacture is described as being in active operation in the hands of private capitalists, while at Dechouree the Local Government, in the expectation of obtaining permission to use the works and plant of the Kumaon Iron Company for three years without payment, is proposing, with the sanction of your Government, to make from provincial funds an experiment in the production of pig iron, to be worked up in the workshops of Roorkee and Narora. There thus remains only the Chanda district, as to which it is observed that, as a preliminary expenditure would be necessary of at least a quarter of a million sterling on a railway to the best iron mines, *viz.*, those at Lohara, it is unlikely that any individual or Joint Stock Company could be found prepared to establish iron-works there on an extensive scale. Moreover, the experiments hitherto made there with local materials have not been altogether satisfactory, notwithstanding the excellent quality of the iron ore, as, owing to the large proportion of impurities (30 per cent) in the coal, difficulties arise in managing the blast furnace.' It has consequently been resolved that operations in the Chanda District shall for the present be restricted to the working of the Warora colliery, and that in the meantime samples of all the local materials required shall be sent to this country to be experimented upon under proper technical superintendence, with a view to its being thereby ascertained whether one of the direct methods of iron reduction on which experiments are still going on in this country may not be applicable to them.

3. The course of procedure thus indicated in respect to each of the three localities appears to me a very wise one. Your Government prudently refrains from anywhere committing itself for the present to a specific line of action, or from attempting to determine, without further knowledge, where to draw the line between private enterprise and State management, both of which may not improbably be found, on trial, to possess their respective recommendations, and to deserve to exist side by side. With reference to the expediency of Government's retaining some considerable portions of its coal and iron-fields in its own hands, Mr. Morris, the Chief Commissioner in the Central Provinces, makes some pertinent remarks. Alluding more particularly to Warora, he argues that all the coal that can be raised there can be consumed on Railways, State or Guaranteed. That for neither coal nor iron is there any demand worth mentioning beyond that of the Railways and of the Public Works Department, and that consequently "the question is whether Government shall supply itself with coal and iron from its own mines, or shall abandon these properties to Companies, and then purchase from these what is required." Obviously the answer to this depends upon whether State management is likely to produce as cheaply as private enterprise must do in order to obtain its indispensable profit; but the Government will itself be chiefly to blame if it do not enforce upon its agents engaged in the same department of industry, economy and efficiency quite as great as those exhibited by the servants of the East Indian Railway Company. * * *

* * * * * *

4. In regard to private enterprise likewise, Mr. Morris speaks equally to the purpose, justly insisting on the importance of conceding to Companies not "indefinite roving rights" but only "mining rights over small tracts of country," so that competition may be brought into play, and any tendency to monopoly prevented. To this I may add that a broad distinction should, in my opinion, be drawn between large Joint Stock Companies with their headquarters in England, and single individuals or small associations resident on the spot and personally superintending the capital they have themselves invested. It is these latter chiefly whom it seems to me desirable to encourage by the concession of mining privileges. In all cases it is most essential that the terms of any concession shall be such as to make the retention of rights to mine coal or iron strictly dependent on the works being efficiently carried on, so that properties shall not be created of a merely speculative character, and shall not be held in a manner adverse to the interests of Government or the public.

ORDER.—Ordered, that this despatch be communicated to the Governments, Administrations and Officers marginally noted, and to the Revenue, Agriculture and Commerce Department for information.

Madras.	Mysore and Coorg.	
Bombay.	Assam.	
Bengal.	Hyderabad.	
North-Western Provinces.	Central India.	
Punjab.	Rajpootana.	
Oudh.	Consulting Engineers, Calcutta, Lahore and Lucknow.	
Central Provinces.	Director of State Railways.	
British Burmah.		

Ordered also, that copies of this despatch and of those to which it is a reply be forwarded to the Home Department for publication in the Supplement to the *Gazette of India* for general information.

H. DRUMMOND, *Col., R.E.*,
Deputy Secretary.

No. 62 R., dated Fort William, 3rd April, 1876.

From—The Government of India,
To—The Secretary of State for India.

In your Lordship's despatch No. 31 P—W, dated the 27th May 1875, relative to the manufacture of iron in India, satisfaction was expressed at the facilities which were being afforded by our Government for the conduct of experiments having for their object to ascertain the commercial value of the various mineral deposits in the Chanda District of the Central Provinces. A hope was expressed at the same time that every encouragement would be given to private capitalists who might desire to work the mines, and it was added that the importance of stimulating this particular kind of industry should ensure our earnest attention, and would even justify us in incurring some slight financial risk.

2. The Chief Commissioner, Central Provinces, who has always taken a warm interest in the development of the mineral resources of the Provinces under his administration, has written an interesting Minute on the Warrora Colliery Works, and the Chanda Coal and Iron Mines, a copy of which, with its annexures, we have the honor to forward herewith, together with a copy of the orders which we have issued thereon.

3. Mr. Morris in the last para. of his Minute advises that the Government should not act with too much haste in the Central Provinces. This caution, we think, is proper for reasons which we shall presently explain.

4. The circumstances in regard to the manufacture of iron in India have changed since the question of working the iron mines in the Chanda District was first mooted. In the Resolution which we forwarded to Her Majesty's Government, with our despatch No. 45, Railway, dated the 10th August 1874, three places were prominently mentioned as possible sites for the manufacture of iron—Lohara in the Central Provinces, Raneegunge in Bengal, and Dechouree in Kumaon in the North-Western Provinces.

5. At Dechouree the local Government is about to make from provincial funds an experiment in the production of pig-iron to be worked up in the workshops at Roorkee and Narora; and at Raneegunge in Bengal on the East Indian Railway, iron, coal and limestone for flux having been found in abundance, the experiment of iron manufacture is in active operation in the hands of private capitalists under favorable circumstances.

6. We have no doubt of the excellence of the iron ore in the Central Provinces; but as the Chief Commissioner in para. 11 of his Minute points out that a preliminary expenditure of at least one-fourth of a million sterling would have to be incurred on a railway to the best iron mines, *viz.*, at Lohara, we do not think it likely that any private individual or company would be willing, at present at any rate, to lay out that sum in addition to the ordinary heavy expenditure required to establish iron works on a large scale.

7. We are therefore of opinion that for the present we should confine ourselves to the working out of the coal experiment at Warrora, and to the proposal of the Chief Commissioner, mentioned in para. 10 of his Minute, *viz.*, that a series of experiments should be carried out in England with the raw materials, coal, iron and limestone, as preliminary to any further action which may be deemed desirable hereafter.

No. 66 R., dated Fort William, 12th April, 1876.

From—The Government of India,
To—The Secretary of State for India.

With our despatch No. 145, Public Works, dated 9th December 1872, we forwarded papers on the subject of the Kumaon Iron Works and the deputation of Mr. Bauerman to

examine and report on them; and with our despatch No. 130, Railway, dated 1st July 1873, we forwarded Mr. Bauerman's preliminary report which did not speak favorably of Kumaon as a site for iron manufacture.

2. The opinion of the Government of the North-Western Provinces, however, was at variance with that expressed by Mr. Bauerman, and since our last communication to Her Majesty's Government on this subject, a proposal has been submitted by the Lieutenant-Governor to manufacture iron in Kumaon in connexion with the Government Workshops at Roorkee, as an experiment, by direct Government agency.

3. His Excellency the Viceroy discussed this proposal personally with Sir John Strachey during His Excellency's recent tour in Kumaon. The Secretary to the Government of the North-Western Provinces, in a letter dated 30th October 1875, a copy of which will be found with the enclosures to this despatch, states definitely the terms on which it is considered probable that the Kumaon Iron Works Company will agree to the experiments being made. These terms it will be observed do not necessitate the purchase of the Company's works by Government, but permit the use of the plant, &c., without payment of rent.

4. Sir John Strachey, although sanguine of success, does not deny that the experiment may fail, but even if this should be the result, and the whole of the sum of Rs. 50,000, which it is proposed to devote to the purpose be lost, he still thinks that the expenditure will have been wisely undertaken, and that the money could not be better employed than in finally setting at rest the question of utilizing in India the iron manufacture of Kumaon, being one of extreme interest and importance. The working expenses are calculated to amount to Rs. 20,000 per annum which sum it is hoped will be recouped by the sale of pig iron.

5. We have approved of the course suggested by the Government of the North-Western Provinces, on the understanding that before commencing operations, a clear legal agreement is come to with the Kumaon Iron Works Company upon such terms as the Lieutenant-Governor considers to be fair and equitable, and which we have left to His Honor to decide without further reference.

6. We have suggested to the Government of the North-Western Provinces that the experiment in its first stage should be limited to the preparation of small pig iron, leaving the manufacture and castings to be carried on at Roorkee or Narora, means of puddling and rolling being left to be arranged hereafter when the success of the first part of the undertaking has been fully established.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 28TH SEPTEMBER 1876.

GENERAL REMARKS.—Moderate rain is reported from all the districts of Madras except Tanjore, where it has been very slight; prospects are however said to be unchanged. In Mysore some showers have fallen, but no material improvement is expected unless the rain continues, and prospects are still bad. In the Bombay Presidency reports are good from Sind, Guzerat and the Konkan. In Khandesh and Násik, the Deccan and the Southern Mahratta Country the rainfall has been trifling; the standing crops have withered, and cultivation for the *rabi* has been suspended; great scarcity and distress are apprehended. In Berar there has been no rain, but prospects are good. In the Central Provinces moderate rain has fallen in most districts, and reports are favourable. In Central India little rain has fallen, and the break has been beneficial. In Rajputana prospects are good. In Bengal more or less rain has fallen everywhere, and it has been heaviest in Behar; prospects are generally excellent. In Assam both the tea and the general crops promise well. In the North-Western Provinces good rain has fallen and prospects are good. Moderate rain is reported from Oudh, where prospects have improved. In the Punjab there has been little rain, but reports are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Sept. 27th)	2·28 at Masulipatam; 2·0 at Guntur; 3·0 at Gudivada and Bezwada; about ·5 elsewhere.	Two feet 7 inches water over anicut; canal supply insufficient; standing crops want more rain, especially in Vinukonda, Palnad and Narsarowpett; *sajja* and *gingelly* being harvested; outturn generally poor; prices risen in 4 taluks, stationary elsewhere; cholera, seizures 208, deaths 78; cattle healthy; pasture failing; markets well supplied locally.
Kurnool („ „)	1·0 in Nandial.	Season not much changed; rain slight and partial in other taluks; advantage taken of this slight fall to sow dry crops and cotton in some villages; wet crops under canal good; scarcity of water and pasture; grain rather difficult to procure, the *sowkars* withdrawing it from markets in hopes of prices rising higher; prices high; cholera in Markapur taluk, abating elsewhere; no tanks have received supplies.
Madura („ „)	2·2 at Madura; about 1·0 at Melur.	Some showers have fallen, but neither sufficient nor general; no change in the condition of crops and public health; scarcity of water.
Tanjore („ 28th)	*Nil* at Negapatam and elsewhere.	Little rain in Tanjore taluk; rivers low; no fresh supply to tanks; water over anicuts none; cultivation, wet and dry crops throughout the district; standing crops not doing well in several parts for want of rain; harvest, wet and a few dry crops in some parts, yield moderate; pasture insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 50, deaths 32; fever and small-pox in some localities; cattle disease in some parts, some loss.
Malabar („ „)	·10	Rain not quite sufficient for cultivation; harvesting of first crop begun; grain supply sufficient; prices slightly falling; cholera in all taluks, except Walluvanad, Wynaad and Cochin, 63 deaths; cattle generally healthy; pasture good. *General Remarks.*—General prospects unchanged.
Bombay— (Sept. 28th)		
Sind—(Sept. 27th)		
Kurrachee ...	...	River at Kotri on 25th, 14 feet, being 13 inches lower than on the same date last year; fever prevalent; damage by rats in Tatta, Sákro and Ghorabári talukas; locusts passed over Kotri on 19th, but did not alight.
Shikárpur ...	...	*Kharif* crop being harvested; river 9 feet 8 inches, being 1 foot 9 inches lower than last year; fever prevalent all over the district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Hyderabad ...	...	River falling fast; locusts have slightly damaged crops in talukas Moro, Sakrand and Tando Alahyar; rats have appeared in Guni taluka; fever general; cattle disease in taluka Badin; small-pox increasing, 67 fresh cases and 6 deaths in Hyderabad.
Upper Sind Frontier ...	...	Weather close; flood drying up; *rabi* operations progressing.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	0·12	Crops good.
Surat ...	0·28	Total rainfall 49·71
Broach ...	...	Fever in Amod.
Khandesh and Násik.		
Khandesh ...	...	Crops withering for want of rain; prospects gloomy.
Násik ...	0·41	Total rainfall 16·79; crops drying up for want of rain; public health good.
Konkan.		
Tanna ...	0·80	Total rainfall 88·30; cholera exists slightly in 3 talukas; agricultural prospects good.
Deccan.		
Poona ...	0·23	Total rainfall 14·02; more rain anxiously looked for in all talukas; accounts from Indápur and Bhimthari very discouraging; slight cattle disease and cholera continue in 2 talukas.
Ahmednagar ...	0·38	Total rainfall 8·64; crops withering; prospects very gloomy; rain urgently wanted; cholera in 7 talukas, 162 cases, 53 deaths.
Sholapur ...	0·05	Total rainfall 8·20; distress continues; poorer classes applying in numbers for work, and many migrating to other districts; slight cholera in 2 talukas; rain badly wanted for *rabi*.
Satara ...	...	*Kharif* crops withering; sowing of *rabi* delayed for want of rain; scarcity of pasture for cattle in Khánápur taluka; 22 deaths from cholera; prices rising.
Southern Mahratta Country.		
Belgaum ...	0·19	Total rainfall 27·99; state of *kharif* crops worse; no *rabi* sown; scarcity of water and fodder continues; prices of grain rising.
Dharwar ...	0·20	Total rainfall 18·42; condition of crops in both eastern and western talukas worse; people in eastern talukas moving in gangs to the west and Kanara in search of work; sanctioned public works put in progress; severe outbreak of cholera at Sirguppi and in several other villages.
Kanara ...	0·80 at Karwar.	Total rainfall 91·80; rain wanted above Ghâts.
Kaládgi ...	0·06	Total rainfall 7·39; rain urgently required for *rabi* sowing; great distress anticipated if rain holds off much longer.
Kattywar and Gaekwar's Territory.		
Rájkot ...	0·14	Total rainfall 20·62; weather hot; public health good.
Wadhwán ...	0·79	Total rainfall 13·61; crops good.
Baroda ...	0·16	Total rainfall 46·39; no change in the state of the crops.
		General Remarks.—Fever prevalent in Sind generally, and small-pox in Hyderabad; crops prospects in Sind and Guzerat favourable; great scarcity and distress anticipated throughout the Deccan and the Southern Mahratta Country.
Bengal— (Sept. 28th)		
Chittagong ...	·92	
Noakholly ...	3·98	General health good.
Chittagong Hill Tracts...	2·54	
Hill Tipperah ...	4·23	
Backergunge ...	2·54	Fever in Motbaria and Golachipa.
Furreedpore ...	·31	A few cases of cholera reported from Madareepore.
Dacca ...	·3	
Tipperah ...	1·02 (Previous week 1·01).	
Mymensingh ...	3·02	
24-Pergunnahs ...	Return not received.	
Jessore ...	·86	
Nuddea ...	1·27	
Moorshedabad ...	·25	Public health fair; fever common but not deadly; one or two cases of cholera at the Sadr station.
Pubna ...	·3	
Rajshahye ...	3·68	
Bogra ...	1·27	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Maldah ...	·15	
Dinagepore ...	5·65	
Rungpore ...	3·51	
Cooch Behar ...	2·53	
Jalpáiguri ...	6·53	General health good.
Darjeeling ...	4·75	
Midnapore ...	1·77	
Howrah ...	1·42	
Hooghly ...	Return not received.	
Burdwan ...	2·6	
Bankoora ...	2·38	
Beerbhoom ...	·53	
Sonthal Pergunnahs ...	·06	
Bhágalpur ...	5·71	General health very good.
Monghyr ...	2·79	
Purneah ...	4·84	
Durbhunga ...	4·58	
Mozufferpore ...	14·26	
Sarun ...	4·18	Cholera prevalent in Gopálganj, but decreasing in Sewan and Sadr sub-division.
Chumparun ...	7·24	
Patna ...	Return not received.	Health of the district generally good.
Gya ...	1·02	
Shahabad ...	1·59	
Hazáribágh ...	·13	General health good.
Lohardugga ...	·77	Cholera seems to be disappearing.
Manbhoom ...	1·54	
Singhbhoom ...	·26	Public health good.
Balasore ...	2·99	Public health generally good.
Cuttack ...	·74	Public health good.
Pooree ...	2·11	
		General Remarks.—There has been rain in all the districts during the week. The early crops are nearly all cut with good results, and the late rice is doing well except in parts of Behar where it still requires more rain. In Pooree and Cooch Behar the crops have improved, but the Khoordah sub-division is for the most part still backward.
N. W. P.—		
Benares (Sept. 25th)	From 19th to 25th rain 2·4 at Sadr station; 6·2 at Chandauli; 4·5 at Gungapur.	Sugarcane promises well; rice suffered no damage; more rain wanted.
Allahabad („ 26th)	1·4	Rice crop very poor.
Agra („ 27th)	From ·2 to 4·9.	Prospects favourable.
Meerut („ 27th)	...	Prospects good.
Bareilly („ „)	*Nil*	
Almora („ 25th)	...	Good deal of rain during the week; rain of no use to crops being cut, good for other crops; weather fine.
Punjab— (Sept. 27th)		
Delhi ...	·9	Crops satisfactory; health good.
Hissár ...	·6	Crops improved; *rabi* operations commenced; health generally good, but fever still prevails.
Umballa ...	*Nil*	Health and crops good.
Jullundur ...	*Nil*	Crops abundant; fever still prevalent.
Lahore ...	·4	Crops good; health fair.
Mooltan ...	*Nil*	Fever prevalent; crops good.
Dera Ismail Khan ...	·4	Health generally good; a little cholera in Dera and Tánk.
Rawalpindi ...	·3	More rain wanted; cholera ceased in cantonment and city.
Peshawar ...	·1	Crops below average; a few cases of cholera; fever prevalent.
		General Remarks.—Agricultural prospects on the whole good; cholera abating, but usual autumnal fever prevalent, though health of the Province good for the season of the year.
Oudh— (Sept. 27th)		
Lucknow ...	·4	Prospects improved; public health generally good.
Sitapur ...	1·8	
Fyzabad ...	1·1	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (Sept. 23rd)	2·60	*Kharif* good; *rabi* sowings continue; health good; prices steady.
Sambalpur ...	3·34	Prospects good; cholera continues.
Biláspur ...	1·94	Except cotton, other *kharif* crops good; fever prevalent; prices rising.
Raipur ...	2·29	Prospects favourable; health good; prices falling.
Bálághát ...	3·80	Prospects favourable; fever continues; prices stationary.
Chanda (Sept. 24th)	1·80	Transplanting of rice continues; cholera abating; prices steady.
Chhindwára ...	...	Prospects favourable; health good; prices stationary.
Betúl (Sept. 25th)	·18	*Kharif* favourable; *rabi* sowings commenced; cholera continues; prices unchanged.
Bhandara („ 26th)	...	Rice favourable, *jowar* excellent; cholera, fever, and small-pox continue; prices easy.
Nágpur („ 27th)	...	Prospects of *kharif* favourable; health good; prices steady.
Wardha ...		Prospects of *kharif* favourable; cholera almost ceased.
Nimár ...		Prospects favourable; cholera and small-pox continue.
Hoshangabad ...	1·35	Prospects good; prices unchanged.
Narsinghpur ...	...	Prospects good; no cholera cases since the 19th.
Jubbulpore ...	2·77	Prospects of *kharif* good; cholera and cattle disease continue.
Seoni ...		Prospects good; 10 cases of cholera; fever prevalent.
Saugor (Sept. 28th)	2·22	Break beneficial; cholera abating.
Damoh ...	1·20	Prospects promising; cholera continues; prices stationary.
Mandla ...	·60	Prospects favourable; health good; prices stationary.
		General Remarks.—Prospects continue good.
British Burma—		
Arrakan Division.		
Akyab (Sept. 25th)	8·0	Public health good with the exception of a few cases of cholera in a sporadic form; paddy crops progressing favourably and promise well.
Pegu Division.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Thursday, the 21st September 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
His Excellency the Commander-in-Chief, K. C. B.
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.

CIVIL PROCEDURE BILL.

The Hon'ble MR. HOBHOUSE presented the further Report of the Select Committee on the Bill to consolidate and amend the laws relating to the Procedure of the Courts of Civil Judicature. He said:—"There is no motion on the list of business, and it is not strictly necessary to make one. But this is a bulky matter, as anybody can see who will cast his eye on the Bill that I have before me. It is full of details, which are as the stars of heaven for multitude, and by no means so brilliant or interesting. Most of those details concern the technical mechanism by which a suit is conducted from its beginning to its end; and those are matters upon which criticism and advice cannot be very usefully offered by anybody who has not undergone the labour of studying the Code as a whole, and with some professional knowledge to start with. Embedded in those details, and underlying them, are various principles of considerable importance—some of them of very great importance—and those are just the points upon which we may receive useful criticism and advice from persons who are unable or unwilling to undergo the labour of studying the Code as a whole. Now in such cases we generally find it a useful thing, on the presentation of a Report, to call attention to the points of principle on which we propose alterations, although there may be no discussion on hand, and although we are asking the Council to take no step beyond suspending their judgment until after the publication of the Report of the Committee and of the new draft. Therefore I propose to call the attention of the Council to the main points in which the law will be altered, if the Council think fit to pass this Code into law in the shape in which the Committee have now prepared the draft. Some others of my hon'ble friends have also some information to impart on points which, owing to their greater experience, they can explain more accurately and clearly than I can; and in order to put myself and them in more strict order, I will, with His Excellency the President's permission, make a formal motion when I have finished what I have to say, to the effect that the Report be published as recommended by the Committee.

"I have before had occasion to observe that, constituted as our Legislature is, our proceedings in Committee often had more of the essentials of a public discussion than our proceedings at this table, and I never knew that to be the case more certainly than now.

"The Bill which we prepared last year was published in the month of March 1875.

"We asked the Local Governments to be good enough, each of them, to submit it to a few skilled officers. They have discharged that task with great judgment, and the result is that, besides the opinions given by the Local Governments themselves, we have a body of comment and criticism, I may say, upon almost every sentence of our Bill, proceeding from about fifty gentlemen well competent from their position and antecedents to give advice, and many of whom have brought great zeal, industry and acuteness to their work. That work is rather bulky. It consists of the two volumes which I hold in my hand, and which contain about 450 folio pages of close print. It has been carefully and methodically perused and digested by our Secretary, and by my hon'ble friend Mr. Cockerell, who have winnowed the chaff from the wheat; and it has been examined, I am sorry to say in a more fragmentary way, and mostly with reference to the more important parts of the Code, but still to a considerable extent, by myself. And I have no hesitation in saying that it contains as valuable a public discussion and criticism of our work as it is possible for a Legislature like ours to obtain on a subject of this kind—a subject of great magnitude, great intricacy, abounding with details, and requiring professional and practical knowledge at every turn.

"We have upon the face of our Report expressed our obligations to the gentlemen who have been good enough to favour us with papers, and we have endeavoured to indicate what seemed to us the most able and useful papers among the number. But there are many others that are able and useful, and I am not quite sure that we have been wise in making distinctions.

"I have only to add on this point that, as I anticipated when moving for the Committee, the number of small alterations consequent on the criticisms is something enormous. I cannot tell the Council how large it is, and indeed nobody can tell, excepting a person who will take the Bill of last year, which is labelled 'Bill No. III,' and the new draft, which is labelled 'Bill No. IV,' into his hands, and will compare them sentence by sentence. But the gentlemen who have been good enough to bestow pains on this matter will find that, in whatever shape the Code is passed, their work has passed very largely into the frame-work of the law.

"Now I proceed to mention what are the principal alterations that the Committee are proposing; and the Council will find that most of them—in fact nearly all of great importance—are connected with that critical part of the Code which regulates the execution of decrees; the execution of a decree being the *ultima ratio* by which the law enforces the rights of the creditor against the debtor. Now, it is very generally thought that our existing Code is too rigid and mechanical in its operation, and that it bears too hardly and incisively upon the debtor. By our Bill No. III we proposed certain relaxations of the Code in that respect, which I explained to the Council last year. The result of the comments we have received has been to induce us to go further in the same direction, and to propose some further relaxations and some further facilities for the debtor to discharge his obligations to the creditor, without being what is commonly called 'sold up.'

"The principal point to which I drew attention last year, a point mentioned both in our Report and in my speech to the Council, related to the sales of land in execution of decrees for money. This is indeed in my judgment by far the most important point of all the matters of debateable policy involved in the Code. Every Member of this Council must be familiar with the discussions which arise from time to time about the rapid transfer of land from the poor cultivator to the rich, or comparatively rich, lender of money. The discussion

crops up in all directions. A few weeks ago I had occasion to mention the subject in connection with the law of pre-emption in Oudh. Mr. Hope mentioned it the other day in connection with the Jágírdárs of Sindh. Within the last few years, it has twice been the subject of a general and formal enquiry by the Government of India. There is hardly any part of India in which the problem does not more or less exercise the mind of the Local Government and of its principal officers. Some of them think that India abounds with usurers, who lend their money chiefly with a view of getting the land of the debtor, each being a sort of Indian version of the

'Fœnerator Alphius
Jam jam futurus rusticus.'

"Others tell us of village Shylocks, each intent upon securing his pound of flesh, and with apparently no village Portias to counteract their machinations by quibbling away what is written down in the bond. No doubt there has been some exaggeration in those matters, but, all exaggeration apart, the problem is a serious one and requires some careful consideration.

"Now the rapid transfer of land, which creates such uneasiness, is a process which we may see to have gone on in all countries where wealth is increasing and the commercial spirit is advancing. And though it is always accompanied by some painful incidents, the process is a healthy and beneficial one enough, if it is spread over a length of time, if it advances only with advancing civilization, and is not accelerated by adventitious circumstances.

"The peculiarity of our case in India is this, that, with the British rule, we introduced two most powerful factors of civilization tending to promote the transfer of land to the moneyed classes. One of those factors is an equal and moderate assessment of revenue, which has given to the land a margin of value that it did not possess before, and has made it a covetable possession for the purpose of investing money. The other factor is a vigorous system of law-Courts, which gives to the creditor swift and certain means of enforcing his contracts, and of taking his debtor's land if he cannot pay. There is no doubt that those means have been very much increased since the Civil Procedure Code came into force, and it is a strong testimony to the efficacy of the Code as a whole, though in this particular instance it may have produced some disagreeable effects.

"The Code itself contains no check whatever upon the unreserved and unqualified sale of the land of the debtor who cannot pay. There is indeed one section—section 248 of the Code—which provides that, in certain circumstances, the execution of a decree may be handed over to the Collector. Whether it was intended to give the Collector any discretionary power in such cases may be doubted, but at all events if it was intended, the intention is not clearly expressed, and the Courts have held that the Collector is only a ministerial officer for carrying into effect the decrees of the Court. The result is that sales have gone on in a rigid mechanical way, without even the check of an upset price, or of a power of adjourning the sale when the whole thing is an evident failure, and with the common result that the property is bought in by the judgment-creditor himself at a great undervalue.

"There are some parts of our dominions—the Panjáb, Oudh, and the Central Provinces—in which the Code has been introduced with a material modification upon this point, the modification being in the shape of a provision that, before a debtor's land can be sold, the consent of some high and responsible authority shall be required; so that there is a discretionary power given to the Administration to prevent such sales. And we are told that in those Provinces there has been a substantial retardation, and, in the opinion of I think I may say all officers, a beneficial retardation, of the process of transferring land from one hand to another. But elsewhere, where the Code has been introduced in its simplicity, the transfer of land has been going on at an accelerated pace, with the effect of creating a large dispossessed and discontented class.

"The effects of this system upon debtors have been very much intensified by certain arrangements which lower the price to be obtained at execution sales. I explained to the Council before that there are two rules which have a very prejudicial effect in that respect. One is the rule that nothing can be put up for sale excepting that vague thing, the 'right, title and interest' of the debtor in the land. Whether that right, title and interest be much, or little, or nothing at all, it is the only thing which can by law be sold. The other is the rule that the judgment-creditor, who is practically the vendor, shall keep the purchase-money in his pocket, although it may turn out that the right, title and interest which he has sold are nothing whatever, although he may have put up for sale the land of an entire stranger, and although the purchaser may have got nothing by his purchase except a lawsuit.

"I believe also that another blemish in these sales is that the property, however large, is always put up in a single lot.

"In our Report of last year we mentioned the effect of those rules, and the remedies which we proposed for bettering the condition of the debtor. Our remedies were, to allow a specific description of the interest to be sold, and to require at least some attempt at a more specific description than the law now allows; to alter the rule as to the recovery of money when nothing whatever has been sold; to prevent the creditor from bidding at a sale except with the permission of the Court; and to provide that the Executive may make rules imposing conditions on sales. We contemplated that the rules made by the Executive would be of such a nature as this—to require the consent of some high and responsible authority, as is done in the Panjáb and in the other Provinces I have mentioned, to provide for an upset price, for sales in lots when desirable, for adjournment of sales, and such other safeguards as might be thought necessary to prevent the land from being sold for a mere song.

"Regarding the action of the Collector we said this:—

"'It has been held that the Collector is a mere ministerial officer under the corresponding section of the present Code, and that he has no discretion as to postponing sales, fixing an upset price, or any other matter affecting the substance of the sale. And it is suggested that the Collector ought to have discretion in such matters, or even some larger power to make arrangements for payment of the debt by some means short of an absolute sale of the land. The point is one on which we should be glad of opinions from those who have been led to study it. It will be remembered that, in section 272, we propose to give power to the Executive to make special rules on the subject of sales of land.'

"Respecting the incidents of sales and the risks incurred by purchasers we said:—

"'We shall be glad to know of those who are familiar with the subject whether the fact really is that property is apt to be sold at an undervalue in execution-sales, and if so, to what cause they impute it, what they think of the alterations now proposed, and whether any remedy has occurred to them by which more security can be given to purchasers with the view of obtaining better prices for land.'

"Those are the points on which we specifically asked for advice. Upon the latter point we find a large concurrence in our views, and I need only say here that we have gone somewhat further in requiring specific description of the property to be sold. We hope that the proposed alterations will lead to more care in putting up properties to sale than is now exercised by judgment-creditors. Any one who wishes to examine them more at large will find them in section 288 of Bill No. IV.

"Upon the more important question of controlling the execution of a decree for sale we have received a great deal of advice, and the result is that we propose to make some more specific alterations of the law than the mere investiture of the Executive with power to impose conditions on the sale of land. I will just read to the Council some of the views which we have received upon this subject. The Lieutenant-Governor of Bengal, who has sent us three minutes, all of value, says upon this point:—

"'I am advised by many well-informed authorities that the immoveable property sold in execution of decrees often goes for prices much below the ordinary selling value, not only

by reason of the uncertainty for which I have just proposed a remedy, but also by reason of the summary and obligatory character of the sale. Indeed it is notorious that the misfortune of a man whose property has thus to be sold, is much aggravated by the unduly low sum which it fetches. The unpopularity which must thus, as I believe unnecessarily, attach to the sale of such property in execution of decree, is manifest. I say unnecessarily, because if a good department of execution of decrees were to be established, it could take charge of such property, attaching it before sale; managing it for a time; thus practically ascertaining its value; fixing an upset price; and in the event of such price not being offered, retaining the land under management for the benefit of the judgment-creditor and judgment-debtor alike. The cost of such management would be recoverable from the property. If the property consisted of land paying revenue to Government, it might best be managed by the Collector of the district, under precept from the Civil Court.'

"Now it will be seen that what the Lieutenant-Governor recommends is the establishment of a department for the execution of decrees, and he has insisted upon that plan further in another minute in which he goes into the matter with a good deal of detail. It may be an excellent plan, and I do not say a single word against it, but it is rather outside the scope of our present operations. It is an administrative operation, and would require the consent of the Government of India after going through the ordeal of various executive departments, the head of one of which I see looking very hard at me across the table. At the same time it will be seen that we adopt in substance the proposal of Sir Richard Temple, only that, instead of a new department, we propose to use the existing machinery of the Collector.

"Mr. Bell, the Legal Remembrancer to the Government of Bengal, a gentleman of great experience, writes as follows on the subject of execution sales:—

"'With regard to the difficulties which decree holders experience in executing their decrees, I have nothing to add to the very full discussion which the subject has undergone in His Honour the Lieutenant-Governor's Minute of the 29th September. But there is another aspect of the question which should also be considered: I mean the grossly inadequate price at which the debtor's property is sold at these execution sales. More noble and ancient families have been ruined by these Civil Court sales than by any other cause. A case came before me the other day in which property, for which the judgment-creditor had himself previously offered Rs. 50,000, was purchased by the same judgment-creditor at an execution sale for Rs. 8,800. I venture to say that hundreds and hundreds of similar cases happen every year in Bengal. The present Bill (section 288) attempts faintly to deal with the evil by providing that the judgment-creditor shall not bid for the property sold without the express sanction of the Court. But that is clearly a most inadequate remedy. In many cases, unless the judgment-creditor was permitted to bid, there would be no bidders at all. What is required is that there shall be some security that the property is sold at a fair price. There is only one way in which this can be done, and that is by allowing the judgment-debtor, in case the Court holding the sale considers the price offered inadequate, to have the estate valued by the Court, and made over at such valuation to the judgment-creditor in satisfaction of the debt. I am sure that no measure short of this will be able to remove this great blot on our judicial administration. The present system of selling landed property at these judicial sales is only another form of robbery sanctioned by law.'

"Now the Council will observe that Mr. Bell speaks in very strong terms of the inadequacy of the prices obtained at these execution sales. But having read every word that is said upon this subject in the volumes of correspondence before me, and every word said in the two inquiries which I mentioned as having been made by the Government of India, and having had the opportunity of speaking about it to many gentlemen in high judicial positions, I have only found one officer who expresses an opinion that adequate prices are obtained at execution sales. No doubt such may be the case in some portion of India, but that it is not the case over India generally is quite clear; and strong as Mr. Bell's language is, it is borne out by a cloud of other witnesses.

"We do not indeed provide in terms that the estate shall be forced upon the judgment-creditor at a valuation made by the Court, but it will be seen that we propose to give the Collector a very large discretion which may lead to such an arrangement, if found to be beneficial under the circumstances.

"The only other opinion I will quote upon this subject is that of the Government of Bombay. Last year that Government consulted the High Court

of the Province as to the expediency of transferring execution sales to the hands of the Collector in a particular district. Addressing the High Court on the subject of section 248 of the Code, which I mentioned a little while ago, they spoke as follows:—

"'It cannot be concealed that much dissatisfaction is felt in many parts of the country at the system at present in vogue for the sale of revenue-paying land, either owing to the unfitness of the Court's officers to conduct sales, to the dislike of the people, other than professional money-lenders, to bid for land at such sales, or to other causes which it is needless to mention. It is generally believed that practically the working of the present system ends in lands being sold by the Court's officers for very much below their value, and to their being very frequently bought in by the judgment-creditor for comparatively small sums.

"'His Excellency in Council is disposed to think that some measure of the dissatisfaction might be removed if such sales were entrusted to the Collector and conducted by his department. He accordingly proposes to introduce this practice under the authority vested in Government by the section quoted above. He does not at present intend to make it universal, but to introduce it as an experimental measure in one district. He has accordingly issued instructions to the Collector of Kaira, who has offered to undertake the duty, that in future his department should conduct all such sales within his district.'

"To that the High Court replied, expressing some doubts as to the legality of the proceeding, and pointing out that, at all events, the provisions of the Code were totally inadequate for the purposes contemplated by the Government. It will be seen that our proposal is to give to the Executive the very powers which the Bombay Government desired to exercise in a particular instance.

"Now for our proposals, the principal of which will be found in sections 320, 321, 323 and 326 of Bill No. IV.

"It will save trouble to quote sections 320 and 321 in full. They run as follows:

"'320. The Local Government may, with the sanction of the Governor General in Council, declare by notification in the official Gazette that in any local area the execution of decrees in cases in which a Court has ordered any interest in immoveable property to be sold, shall be transferred to the Collector; and rescind or modify any such declaration. The Local Government may also from time to time prescribe rules for the transmission of the decree from the Court to the Collector, and for regulating the procedure of the Collector and his subordinates in executing the same.

"'321. Whenever the execution of a decree has been so transferred, if the Collector has reason to believe that the judgment-debts of the judgment-debtor can be discharged without a sale of the whole of such interest, the Collector may (notwithstanding any order under section 303, but subject to such rules as may from time to time be made in this behalf by the Chief Controlling Revenue Authority) raise the amount necessary to discharge such debts with interest thereon according to the decree, or, if the decree makes no provision as to interest, then with interest (if any) as he thinks fit not exceeding the rate of six per cent. per annum,

'(*a*) by selling part of the judgment-debtor's interest in such property or in any other immoveable property:

'(*b*) by mortgaging the whole or any part of such interest:

'(*c*) by letting on farm, or managing by himself or another, the whole or any part of such interest for any term not exceeding twenty years from the date of the order of sale, or

'(*d*) partly by one of such modes and partly by another or others of them.

'For the purpose of managing under this section the whole or any part of such interest, the Collector may exercise all the powers of its owner.'

"The Council will see that by performing one or another of the operations authorised by section 321, or by combining any two or more of them, the Collector will have an almost absolute discretion as to the mode of raising money out of the property for a term of twenty years; and if it really is the case that the debtor is a solvent man, provided only that the best is made of his property, there will be an opportunity of making the best of it, and he will eventually pay his debt and get his land back. If on the other hand the term of twenty years will not suffice for such a process, the poor man must yield to fate and be sold up at last, and that we have provided in section 323.

All we can do consistently with the principle that a man who has property shall pay his debts is to give him the chance of recovery, and to prevent the destruction of his property through ignorance, accident, hurry or extreme pressure.

"In furtherance of the same object, we have made some minor provisions applying to the Courts as well as to the Collectors. By section 291 we have provided for the power of adjourning execution sales. In section 292 we have provided that no officer having any duty to perform in connection with sales shall acquire any interest in the property sold; and by section 303 we have provided that sales of immoveable property shall only be ordered by a Court of the rank of a District Court.

"Section 326 requires a little more explanation. In that section we propose to alter the terms of Bill No. III, which gave to the Executive power to impose conditions upon the sale of land. Now of course a general power of imposing conditions, or a power of discretionary consent, may be so handled as to operate by way of complete prohibition in particular cases. But there are cases, especially in the more unsettled and backward parts of the country, in which it is better to give the Executive power to prohibit in direct terms the sale of particular interests in land, instead of doing it by some cumbrous and circuitous process.

"I will illustrate my meaning by reference to what is now going on in the Central Provinces. In that part of the country, the interests of jágírdárs and those of occupying tenants, are in a state of very considerable obscurity. Their nature, and particularly the transferable quality of the property, will not be ascertained even approximately until the settlement of the country has been entirely completed, probably not for many years to come. At the same time, although the interests are of an obscure legal character, the men are in possession, and are actually cultivating the land and living out of it.

"Here then is a possession of great value to its possessor, which is yet of so speculative a character, and the power to transfer which is so uncertain, that the sale of it rises very little above the level of a gambling transaction, for nobody will purchase it except the man who has got a decree to satisfy against it, and he will only purchase it at a price trifling as compared with its value to the possessor. Yet it is under these circumstances that the Civil Courts, in carrying out the letter of the law, put up for sale under the general expression of the debtor's 'right, title and interest', land in which the debtor has no interest except the vague one that I have just described. The Executive on their part have interposed difficulties by refusing consent to the sales. Now it does not place the Government in a very seemly position, if its officers in their judicial capacity put up something that professes to be of value for sale, and the same officers, or similar ones in their executive capacity, prohibit the sale because there is nothing of a marketable nature belonging to the debtor. It is still worse, when the property has been actually knocked down to a purchaser who pays his money for it, and then the Government officers have to contend that the interest was not transferable, that the purchaser had got nothing, and that he must lose both his purchase-money and what he fancied he had bought. It is impossible that people should believe that good faith has been kept with them under such circumstances. In cases of that kind, it is surely much better to give the Executive direct power of prohibiting the sale of particular classes of interests in some way which will be directly binding upon Courts of justice. That is the reason why we propose to empower the Executive to make rules prohibiting the sale of classes of interests in these terms:

"'326. The Local Government may from time to time, with the sanction of the Governor General in Council, make special rules for any local area imposing conditions in respect of sale of any class of interests in land in execution of decrees for money, or prohibiting such sales—

'(*a*) where such interests are so uncertain or undetermined as in the opinion of the Local Government to make it impossible to fix their value:

'(*b*) where for reasons of State the Local Government thinks that such class of interests should not be compulsorily transferable.'

* * * * * * * *

"These provisions relating to execution sales constitute the principal alteration that we propose in the Code, and our object has been to alleviate the harshness and rigidity of the law, to diminish the number of forced sales, and to get for the owner of the land something like an adequate value for it, at the same time keeping clearly in mind the important principle—one of the most important objects of all civilized society—that a man should perform his contracts and pay his debts to the best of his ability.

"Another matter to which we called special attention in our Report last year is one which is considered to be of great importance by many Judicial and Executive authorities, and that is the practice of treating decrees as permanent investments of money. I mentioned to the Council before the remedies by which we proposed to abate that practice, which is considered to have a very injurious effect. I have only now to say that our proposals have met with almost universal approval, and that we have in the present draft somewhat strengthened the provisions which were made before. What we have further done in that respect is as follows.

"In section 209 we have adopted the plan already adopted by the High Court of Calcutta and the Chief Court of the Panjáb, namely, to provide that decrees shall not carry more than 6 per cent. interest. That plan has been in operation in those two parts of the country for some two or three years, and is believed to work satisfactorily.

"In section 232 we have provided that before a decree which has been transferred from hand to hand can be executed, notices shall be given to the transferor and the judgment-debtor, that the Court may hear if they have anything to say against that decree being carried into execution; and in section 235 it is provided that applications for the execution of decrees shall be verified, and that such applications shall give the history of all previous applications for the same purpose.

"Another subject of importance connected with the execution of decrees is that of insolvency. I explained to the Council before how we proposed to enlarge the present very rudimentary law upon the subject by providing a law somewhat less rudimentary, but still falling short of a complete and full insolvency law for the mufassal, which we are informed that the judicial machinery of the mufassal is not strong enough to work. What we proposed in that respect has been received with very general acquiescence, although we have received some contradictory opinions on the subject. One gentleman tells us that we ought to enact a complete and full insolvency law for the mufassal; another that the sections we have inserted into the Bill are such as the mufassal Courts are not now strong enough to work; another says that the provisions are too cumbersome; and another that they are too meagre. On the whole, we have thought it best to leave this part of the Bill substantially unaltered.

"There are two other subjects still connected with the execution of decrees, each of considerable importance. One of those subjects relates to the things that may be taken in execution of a decree; and the other, to the priority of one decree-holder over another.

"In the Code there is contained no express exemption of the things that may be taken in execution. It is true that in those seldom-used sections which do duty for an insolvency law, it is provided that the insolvent may retain his wearing apparel and necessary implements of trade. But in section 205 of the Code, which relates to execution sales, it is said that the property of the judgment-debtor, without any exception whatever, may be attached and sold. That extreme generality has been somewhat restricted by judicial decisions, and in our Bill No. III we followed those decisions, and made it part of the express written law that the

exemptions in question should be allowed; and we also added that the salary of a Government servant should be exempted from attachment. Whether the salary of a Government servant can be legally attached at the present moment appears to be a matter of some doubt; the prevailing opinion is that it can be, and it is not infrequent in practice to have the salary attached by the creditor while still in the hands of Government. Our proposal to exempt it has met with a various reception—*laudatur ab his, culpatur ab illis.* We have adhered to the principle that public policy requires a Government servant to receive that amount of salary which is thought fit for his office. When he has got it, it is his; he must spend it as his affairs require; and we have no more concern with the amount that he pays to his creditors, at least as long as he keeps himself free from scandals and in a position to perform his duties, than we have with the amount he may spend upon his wife, his servants, his charities, or his amusements. Our business is to see that the judgment-creditor shall not intercept the money that is coming to the Government servant, and cut off those supplies which are necessary to enable him to perform his duties. We have therefore maintained that principle, and have extended it to Railway servants who, in this country at least, stand very much in the position of Government servants.

"If the Council will look at section 266 of Bill No. IV, they will find a list of the articles that we propose to exempt from attachment. Under head (*b*) we exempt tools of artisans, implements of husbandry, and cattle kept *bonâ fide* for agricultural purposes. Those articles were exempted in accordance with a great number of opinions received from mufassal officers, representing the hardship and impolicy of bringing people to total ruin by attaching such property; and we have added head (*j*), which exempts the wages of labourers and domestic servants. The principle is that it is against public policy to make a man compulsorily idle either by taking away from him those tools which are necessary to enable him to earn his living, or by anticipating the wages of his daily labour, and so destroying all motive for self-exertion.

"The next topic is the priority of decrees *inter se*. That is at present regulated by section 270 of the Code, which provides that the person who first attaches property shall be the first to be paid out of it, even as against another creditor who has obtained a prior decree. Now there is no principle of justice whatever in that rule. Possibly the Code is framed upon the analogy of attachments of another kind, in which, when it happens that there are more suitors than one, it is allowable that a prior attachment should prevail. If so, the analogy hardly applies to objects that are inanimate and capable of division. In fact all rules on this subject must be more or less arbitrary and artificial, and we have got to find out the rule that is most convenient.

"Now the present rule leads to some unseemly scrambles for priority, so that it may become a matter of accident or of favour whether *A* or *B* or any other letter of the alphabet should be the lucky person to get paid in full to the detriment of other creditors. The Judge of Kaira speaks on this point as follows:

"'The provision that the holder of the decree on whose application the property sold was first attached, shall be entitled to be first paid out of the assets realized by the sale, does not appear to be quite an equitable one, and also gives rise to several questions which cannot be satisfactorily settled. It often happens that a certain decree-holder presents his application first for the attachment of a certain property, and another decree-holder presents an application for the attachment of the same property some days subsequently; but owing to some unavoidable accident the ministerial officers of the Court carry out the attachment under the second application first, and then attach the same property a day or two subsequently under the first application. In such a case, it is quite unjust that the person who presented his application subsequently should have precedence over the first applicant in the matter of the appropriation of the assets. Again, when several decree-holders have presented applications for the attachment of the same property on the same day, and attachments have been made thereunder simultaneously, it is most difficult to determine how the assets should be divided.'

"From Sindh we hear somewhat the same story. The Judicial Commissioner tells us—

"'If several applications are presented simultaneously, the applicants might be satisfied rateably. In the Small Cause Court at Karáchi there is sometimes a rush of, say, twenty decree-holders, each anxious to be the first to attach. All applications put in at the opening of the Court might be held to be simultaneous.'

"That which goes on at the extreme western point of our dominions is not due to the longitude, for we find just the same state of things in British Burma, the extreme eastern point of our dominions. Mr. DeWet, our Government Advocate there, says:—

"'Provision should, I think, here be made for a case that is very common anyhow in Rangoon, where several persons attach property of the same judgment-debtor on the same day, and where the several warrants are handed to the officer of the Court at the same time. Which of these is to be deemed the first attaching creditor? The practice here has usually been to divide the proceeds of sale between them all rateably, but for this there seems to be no authority.'

"Now the Council will see that the recommendations which these gentlemen make are that when attachments are simultaneous there shall be a rateable division. We think that the principle of rateable division may be carried a little further; in fact as far as is convenient. We see no reason why there should not be a rateable division among all the judgment-creditors up to the point when it becomes inconvenient to delay dealing with the assets. Therefore it is provided, in section 295, that the attached property shall be divided rateably among all persons who apply for execution of money decrees against the same judgment-debtor prior to the realization of the assets.

"Another matter also connected with the execution of decrees is the imprisonment of debtors.

"There are many gentlemen, with whom I believe that my hon'ble friend Mr. Hope sympathises, who would have us abolish the remedy of imprisonment altogether. We do not see our way to that, but we propose to shorten the terms of imprisonment materially. At present the terms are limited by section 278 of the Code, which provides that the maximum term of imprisonment for any amount of debt shall be two years; if the debt is R. 500, six months; and if R. 50, three months. We propose to shorten those terms by providing that the maximum term should be six months, and if the debt does not exceed R. 50, the term of imprisonment shall not exceed six weeks.

"There are some matters in our Report which I will pass over with the briefest possible indication. We propose to reserve for the District Courts certain processes involving much discretion and responsibility. We also propose to give to the District Judges and to the High Court a certain control over the Small Cause Courts. These are points on which I have no personal knowledge, and which I have not found discussed in these papers. My friend Mr. Cockerell, who has experience of them, will be able to tell the Council more clearly than I can what is the precise practical effect of our proposals. But with regard to Small Cause Courts I may say that, ever since I have been in India, I have heard from various quarters that some power of supervision over their decrees is needed.
