"In Chapter XVI of our Bill No. IV we have provided for the use of affidavits, an instrument at present unknown in the mufassal. It is however a very useful mode of taking evidence in all uncontested cases, and in applications which are of an urgent and provisional character. Nor do I believe that when sifted by cross-examination, as it is always liable to be here, affidavit evidence is more likely to mislead than oral evidence. In point of fact, one who cross-examines on affidavits has a considerable advantage in that his enemy has written a book, and a book which he has had time to study before he comes to cross-examine. Doubtless the use of a new instrument will require some care and circumspection, and it will also probably require some

directions from the High Court to the subordinate Courts, for which we have provided; but with that precaution I see no reason why the alteration should not be productive of considerable advantage.

"While on the subject of evidence, I will call attention to an alteration made by section 184. We provide there that the Local Government may, in cases in which an appeal is allowed, permit the evidence of witnesses in any Court or class of Courts to be taken down by the Judge in his own hand in English. That is an innovation which in cases actually appealed would be attended with great advantage,—if it could be done consistently with the interests of justice in other respects,—because the Appellate Judge would then have the evidence in the same form before him as the Judge in the Court below. I need hardly dilate on the advantage of introducing the English language wherever we can consistently with more important public interests, and I have no doubt that the Local Governments will take very good care that the course of justice is not obstructed by any order upon this subject. The Secretary (Mr. Stokes) reminds me that not only will the mind of the Appellate Judge be left freer to work when he is provided with the same materials as the Judge below, but that a great deal of expense will be saved in translations for the Appellate Courts if the original proceedings are taken in English.

"In section 433 we have attempted to deal with the rather delicate subject of a foreign potentate suing in our Courts. In that term I mean to include the Native Chiefs of India who are our feudataries. With regard to them the question is apt to arise much more frequently than with regard to those potentates who are foreign to all intents and purposes. The matter is one of some difficulty, and the difficulty has been recently illustrated by the case of the Rájá of Nahan, who keeps a shop in Ambála and was sued there by his own agent. We have had the advantage of seeing the principles applicable to this case discussed in a very clear and instructive judgment by the Chief Court of Lahore, who disallowed the suit. What we think is that if a foreign Chief become a suitor or a trader or a landholder in our territories, he may fairly be subjected to the incidents of the position he has chosen to assume. But in order to protect the dignity of such personages, and to avoid complications which are sometimes very awkward, we have thought it better to provide that in such cases suits shall not be instituted, nor decrees executed, without the consent of the Government. Those provisions we have embodied in section 433 of Bill No. IV.

"The last point I think it necessary to trouble the Council with—and they will be very glad to hear that it is the last—is the subject of appeals, not the vexed subject of second appeals upon which we have had so much discussion, because the proposals of the Bengal Government to alter the structure of the Appellate Courts have not yet been determined upon. But the law with respect to appeals where the Appellate Court consists of a plurality of Judges is not in a satisfactory state. According to section 332 of the Code, which applied to the Sadr Court, when an Appellate Court of two Judges differs upon a question of fact, and one of the Judges agrees with the Court below, the judgment of the Court below is to stand. When they differ on a point of law, the point is to be re-argued before another Judge or other Judges, and is to be decided according to the opinion of the majority of the whole of the Judges who have heard the point argued. By the charters of the High Courts, if a Division Court of two or more Judges is equally divided in opinion, the opinion of the senior Judge is to prevail. Now, in that clause of the charter, original business and appellate business were lumped together, and though the rule is a very good rule in respect to original business, it is not satisfactory as applied to appellate business. The result of it is that the plaintiff may have a great preponderance of judicial opinion in his favour, and yet a decree be given for the defendant. It may happen that a man has obtained a decree in the Court below, or in two Courts below, and that half the Appellate Court is in favour of his retaining that decree, but because a single Judge, being the other half of the Appellate Court, thinks otherwise, then the decree goes for the defendant. We had to consider this question very carefully last year in

connection with the Burma Courts Act, because the principal Court of appeal in Burma consists of no more than two Judges, and the principle we applied there was that which prevails in England, and which seems to me to be the most reasonable of all principles; that if there is no majority of the Appellate Court which can agree to alter, and how to alter, the decree of the Court below, that decree shall remain unaltered. I must confess that in our Bill No. III we left that matter in a rather unsatisfactory position, for we copied too faithfully both the Code and the charters, and the result was that we had introduced two conflicting principles. However we found out our error, and we have now adopted the principle which will be found embodied in section 575 of Bill No. IV.

"I will now conclude with the *pro formâ* motion that the further Report of the Select Committee, together with the Bill as settled by them, be published in the *Gazette of India* in English, and in the local Gazettes in English and such other languages as the Local Governments think fit".

The Hon'ble MR. COCKERELL said that in the remarks which he had to make upon some of the provisions of the amended Bill, he would endeavour as much as possible to avoid going over any portion of the ground which had been already traversed by his hon'ble and learned friend (Mr. Hobhouse) in his vigorous and lucid exposition of the leading features of that measure.

He desired to draw attention to certain important alterations of detail which had not been noticed, or at least dwelt upon, in the speech of the learned Member who had charge of the Bill, and which, his (MR. COCKERELL'S) personal experience led him to think, were calculated to improve very materially the existing provisions of the law on this subject.

The Report of a Select Committee upon any Bill ordinarily contained little more than a concise statement of the several amendments proposed, and in a report upon a measure of this magnitude any explanation of the grounds upon which the suggested alterations were based must necessarily be exceedingly meagre. The main object therefore of the present discussion of the subject of a report which was not intended to be received as a final settlement of the matter of which it treated, was to supplement its deficiencies in the way of explanation of the considerations upon which the proposed alterations of the law rested, and to draw to them as much public attention and criticism as was possible, whilst there remained time to utilize such criticism ere the measure was finally matured and passed into law.

He thought that it would be convenient to notice the alterations to which he had referred in the order in which they stood in the Bill as amended.

One of the most important perhaps of these was in regard to the status of the Courts of Small Causes. By section 2 these Courts were declared to be subordinate to the District Courts, and the precise effect of this declaration would be seen by a reference to sections 25 and 622 by which power was given to the High Court and the District Court, (1) to transfer any case from one subordinate Court to another, and (2) to call up from a subordinate Court any case in which no appeal would lie and to set aside any order or decision passed therein contrary to law.

Under the existing law the Courts of Small Causes were wholly independent of the District Courts, and controlled by the High Courts to only a very limited extent. The Act from which they derived their constitution empowered the High Courts to frame and issue rules for regulating their practice and certain other subordinate matters connected with their working, and it enjoined upon them obedience to the call of the Local Government and the High Court for periodical returns and statements of business performed by them, but beyond this it may be said to have practically placed them under no control. The High Courts could under section 13 of their Letters Patent call up from Courts of Small Causes, as Courts subject to their general superintendence, any case and try such case under their extraordinary original jurisdiction—an obviously inconvenient remedy—but they could do nothing under

the power, which they had under their Charter, of transferring cases from one Court to another subject to their *appellate* jurisdiction, for that power could not be applied in the case of Small Cause Courts from whose decisions there was no appeal.

It had always seemed to him (MR. COCKERELL) that this position of the Mufassal Small Cause Courts was of a singularly anomalous character. They were placed side by side in almost every district with the Principal Civil Court to which all other Courts of every grade were subordinate, and yet this Court of general control had no power of interfering with them in any way.

The Judges who presided over these Small Cause Courts were for the most part selected from the higher grades of Subordinate Judges who had always been subject to the control of the District Judge, and the class of business performed by the Small Cause Courts was distinctly less important than that discharged by other Courts subordinate to the District Court.

What then he would ask was the reason for according this exceptional status to Judges of Small Cause Courts?

That it led to much abuse, he could not doubt; he had been frequently told of the inconvenience caused to suitors, and the irregularities in the practice of these Courts which arose out of this state of things and for which, it was complained, there was no local means of redress; and indeed he did not see what other result could be expected.

The Small Cause Courts had now been in existence for about fifteen years, and he believed that they had survived much of the unpopularity which undoubtedly at one time attached to them; but this practical independence of the chief local Civil Court had always been, and was still, regarded as a blot upon the system, and he was confident that its removal would be considered as not the least of the improvements projected by the amended Bill.

He would have been at a loss to conjecture why this want of local controlling power had been allowed in the original enactment for the establishment of these Courts but for the provision which it contained for the creation of principal Courts of Small Causes. For although these principal Courts were invested with no special power of control over the other Courts, yet it had been intended that Barristers should be appointed Judges thereof, and, in fact, at the time of the first establishment of these Courts, Barristers were in some cases so appointed.

Now although the present age was developing a levelling up tendency, and there was consequently no saying what the audacity of a future legislature might lead it to attempt, yet in 1860, when these Courts were first created, no person would have had the temerity to propose that a Court presided over by a Barrister should in any way be placed in subordination to one of which the Judge was a member of the Civil Service! The Barrister element had, however, disappeared from the Small Cause Court Benches, and the class of Judges by which it had been replaced would have no reasonable ground for considering their personal dignity injured by being made subject to the control of the District Judge.

The alteration of the law contemplated by section 28 of the Bill was, he apprehended, one that would be deemed of especial importance to the interests of a large section of the community in the province to which he had the honour to belong. The Council were aware that in that quarter, especially in some of the Central and Eastern Districts, serious complications had from time to time arisen in regard to the relations between the landlord and tenant classes. Those complications had their origin in the special legislation of 1859 for the adjustment of the rent of land in the Bengal Presidency. Prior to the enactment of Act X of that year the landlords exercised large coercive powers which in effect compelled the tenants to pay in some form or another almost any amount that the landlord found it in his interest to demand—one practical result of the enactment of Act X of 1859 was the withdrawal of this power.

Now he (MR. COCKERELL) did not mean to say that this power should not have been disturbed, for it was a very arbitrary and unjust power which virtually placed the tenant class at the mercy of the landlord, but the law should certainly have compensated the landlord by affording him an effective remedy for the enforcement of his just rights, and this no doubt the framers of Act X had essayed to do by the provisions for enhancement of rent under certain conditions. Those provisions, however, had confessedly failed to effect their object, now that the tenant class had learned their exact legal status and the power which they could exercise by combination in resisting the landlord's attempts by process of law to exact an enhancement of rent. As the law stood, the landlord could only sue his tenants severally, and by virtue of their combination the pecuniary means of each one for resisting the claim to the last and carrying the case up to the highest Court of appeal were not wanting. Where this kind of combination existed even the wealthiest landlords shrunk before the ordeal of waging single-handed such an uneven contest with their tenantry in large estates in which the claim to receive enhanced rents might apply to more than a thousand persons. Sooner than embark in such costly litigation the landlords would endeavour by other means to gain their end, and these attempts led to a state of bitter feeling between the classes which threatened serious breaches of the peace, and possibly open riots at any moment.

To meet this state of things a special Act was passed by the Bengal Council, and had quite recently, he believed, received the assent of His Excellency the President. By that Act, amongst other things, power was given to the landlord to proceed against the tenants of a whole estate for the enhancement of their rent in a single suit.

The Council would observe that a corresponding power was given by the Amended Bill (section 28) which provided for the joining of all persons "as defendants against whom the right to any relief is alleged to exist, whether jointly, severally, or in the alternative in respect of the same cause of action."

This provision would have a substantial advantage over that of the special Act referred to, inasmuch as, whilst the latter could be carried into operation only after the fulfilment of certain material conditions involving loss of time and expense, the former could be acted upon by every landlord who claimed to enhance the rents of his tenants collectively to the same extent and upon grounds common to all of them.

In section 58 of the Bill would be found an entirely new provision by which a plaintiff was required to present copies, on plain paper, of his plaint equivalent in number to the persons sued by him collectively for the purpose of being served upon the defendants together with the summons; and to meet cases in which by reason of the extraordinary length of the plaint itself, or the large number of the copies required, this obligation might be thought to press too hardly upon the plaintiff, power was given to the Court to allow the presentation of concise statements of the substance of the plaint to be served with the summons as an alternative measure.

Owing to the want of some kind of notice to the defendant as to the nature of the claim against him, great delay was often occasioned in the first hearing of the suit. It sometimes happened that the defendant knew all about the suit which was being brought against him, and the mere service of summons was sufficient to enable him to enter upon his defence, but in many cases the defendant either had, or affected to have, no such knowledge, and his first step on receiving the summons was to apply to the Court for a copy of the plaint and ask for an adjournment of the hearing to enable him to prepare his defence. Now by the provision just referred to, much delay would in such cases be avoided; moreover it seemed a more equitable course to throw the burden of the first cost of the supply of the copy of the plaint upon the plaintiff, who had to establish his right to involve the defendant in the contemplated litigation, rather than upon the defendant, who, until some sort of *prima facie* case was made out against him, must be regarded as in the right and entitled to the protection of the law.

Under the English law a somewhat similar practice prevailed, the nature and purport of the claim and a summary of the circumstances under which it was made being endorsed on the summons itself; that procedure was well suited to Courts where the summons was prepared by the legal agents of the parties to the suits, but would not apply to the Mufassal Courts in this country in which all forms of process were drawn up by the ministerial officers of the Courts.

There might be some difficulty in the working of this new provision, if the alternative of concise statements had to be largely resorted to, by reason of the responsibility thrown upon the officers of the Courts in regard to the correspondence of the statements with the subject-matter of the plaints, but it was to be expected that in the large majority of cases the power of substituting statements for copies of the plaint would not have to be exercised.

Sections 79 to 81 of the Bill were designed to effect a material alteration of the law in respect of service of the summons; and when it was considered that a very large proportion of the suits instituted in various parts of this Empire were decided *ex parte* by reason of default of appearance on the part of the defendant, the importance of this part of the Court's procedure could hardly be exaggerated.

He would first explain the mode of procedure at present adopted as contained in sections 54 and 55 of Act VIII of 1859, and the rulings of the High Courts upon this subject:

"In all cases where the summons is served on the defendant personally or any agent or other person on his behalf, the serving officer shall require the signature of the person on whom the service may be made, to an acknowledgment of service, to be endorsed on the original summons, or on a copy thereof under the seal of the Court. If such person refuse to sign the acknowledgment, the service of the summons shall nevertheless be held sufficient if it be otherwise proved to the satisfaction of the Court.

"When the defendant cannot be found, and there is no agent empowered to accept the service, nor any other person on whom the service can be made, the serving officer shall fix the copy of the summons on the outer door of the house in which the defendant is dwelling."

* * * *

Now in regard to this last provision it would be observed that the law contained no declaration as to the effect of this fixing of the summons upon the outer door of the assumed residence of the person summoned.

Most of the High Courts had supplied this omission by ruling that the affixing process above mentioned constituted valid service. Here then were two recognized modes of personal service: (1) the actual written acknowledgment of the person served, or other proof of his having been served in the absence of such written acknowledgment, and (2) the posting of the process on the dwelling of the person summoned when the latter or any other person capable of acting on his behalf in such matter could not be found by the server.

In the previously published draft of the Bill to amend the law relating to Civil Procedure, these provisions of the law as supplemented by the rulings of the High Courts were retained, and it was further provided that the mere endorsement on the summons by the serving officer that it had been served in accordance with either of these rules should be taken as *proof of due service*. Against this mode of treating this very important subject strong protests were made by a Judge of the Madras Presidency, and the writer of an article in one of the leading Bombay Journals. Looking to the severe penalty attaching to default of appearance on the part of a defendant when the due service of the summons upon him had been proved, and the consequent necessity of obtaining, as far as may be practicable, positive assurance that the defendant had really obtained timely notice of the action against him, the obvious injustice of reckoning as due service the spontaneous adoption by the process-server of a mode of procedure which was only allowed to constitute service, when specially ordered by the Court in the contingency of the latter being satisfied that the defendant was keeping out of the way to avoid service, was strongly insisted on.

The Madras Judge (Mr. Nelson) writing upon the existing Civil Procedure Code said in reference to this subject:

"Of all the enactments in the Code contained, perhaps it is the early part of this section (55) that is most frequently abused. Nothing in the world is easier than to fix a copy of a summons on the outer door of a man's house during his temporary absence from home, and process-servers are never over-diligent to find a man who does not happen to be sitting on the threshold of his house when they call. Again nothing can be more difficult for an ordinary native to prove them that the process-server did not on a certain day fix a copy under this section, when a bribed process-server states that he did fix one, and dishonest suitors of course take advantage of every opportunity that offers when detection of their fraud is impossible or very difficult."

And the Bombay Journal wound up a well-mainfained exposition of the unsoundness of the existing law with the following remarks:—

"Our contention is that personal service should not be dispensed with except under a special order of the Court. And we trust most sincerely that the Select Committee will pause before they finally give legislative force to a practice which is inconsistent with the other provisions of the Code, which damages the interest of defendants, which encourages negligence on the part of process-servers, and which opens a wide door to fraud."

The Committee had very carefully weighed these objections and had come to the conclusion that the principle of non-dispensation with personal service was the correct one; they further considered that the only satisfactory proof of personal service consisted in the production of the written acknowledgment of the person summoned, or some capable person acting on his behalf. It had therefore been provided in the Bill as now amended that where the process-server was unable from any cause to produce this written acknowledgment, he must make a return of non-service, and the Court should then, after examining him on oath touching the circumstances of such non-service, make such order in regard to substituted service as it might think fit.

The power heretofore vested in the Courts of ordering a general attachment of property had been omitted from the Bill as now amended. That power was conferred by Act XXIII of 1861 (section 13) in respect of moveable property found within the jurisdiction of the Court making the order of attachment in execution of money decrees where the amount did not exceed one thousand rupees, and by Act VIII of 1859 (section 214) in respect of moveable property, wherever it might be found, in execution of all other decrees In England also the Courts were by law invested with a similar power. Nevertheless it was thought that this power should not be maintained, as being unsuited to the circumstances of this country. The existence of such a power afforded facilities for all kinds of oppression. An unscrupulous decree-holder armed with a warrant for the general attachment of his debtor's property, used it as a sort of roving commission to plunder his enemies by pouncing upon their property on the plea that, although in their possession, it actually belonged to his judgment-debtor.

In anticipation of possible or probable abuse of this authority, the existing law provided (Act VIII of 1859, section 218) that the Court might, previously to granting a warrant for the general attachment of property, require security from the decree-holder to such amount as should be deemed adequate in the way of compensation for any possible injury resulting to any person other than the judgment-debtor through the execution of the warrant. Now as it was obviously an impracticable task to forecast the amount of possible injury to individuals from an improper exercise of a general power of attachment of property, it followed that the above provision must prove a dead letter and could afford no adequate protection to the public against the misuse of this large legal power.

Moreover the holder of a warrant of general attachment would always be able to bring a cloud of witnesses to establish the equity of his proceedings under it, and it would in most cases be a difficult matter for the Court to come to the conclusion that the warrant had been deliberately misused and maliciously executed for the purpose of causing injury or annoyance to other persons

than the judgment-debtor, and consequently the risk of an action for damages being successfully prosecuted was regarded as so remote that it had no practical deterring effect.

On the other hand, the provisions of the Bill for enabling the judgment-creditor to bring his debtor or any other person into Court as a witness for the purpose of making discovery of all property really belonging to such debtor, and liable to attachment in satisfaction of the decree, were so ample, that it was difficult to see what real hardship could accrue to any decree-holder or plaintiff in a suit from the withdrawal of the power referred to.

He (MR. COCKERELL) had now come to the discussion of what were perhaps the most important of the alterations of the law contemplated by the Bill upon which he had to offer explanations. He referred to those provisions which reserved exclusively to Courts not inferior to the district Court powers which were by the existing law vested in all Civil Courts; and in treating of this subject he would first notice the details of this policy and then comment briefly on its general principle.

By section 223, any Court subordinate to a district Court desirous of having its decree executed by some other Court was precluded from sending the decree direct to such Court, but must submit the case to the district Court to which it was subordinate, and full power was given to the district Court to dispose of the question, as to how the decree so sent up to it was to be executed, in such manner as it might think fit. Under the existing law, a subordinate Court might send its decree to be executed by another subordinate Court within the same district, and consequently subject to the same district Court; but if the decree had to be executed beyond the limits of the district in which the Court passing such decree was situate, the latter Court was required to send it to the principal Court of the district in which it was desired to have the decree executed. It might be said, therefore, that the expediency of decrees not being executed outside the jurisdiction of the Court passing them, without the matter being in some measure at least brought within the control or cognizance of the superior Court, was already recognized.

By section 304 of the Bill, Courts subordinate to the district Court were debarred from ordering sales of immoveable property in the execution of decrees. The very important question of the sale of land in the execution of decrees, and the extent to which it should be restricted had already been discussed at much length by his hon'ble and learned friend (Mr. Hobhouse), and he (MR. COCKERELL) would only say here that in his opinion the great facility afforded to the sale of land for the realisation of the amount of a money decree by the present Code of Civil Procedure was one of the greatest blots on our administration. Any measure that would mitigate and reduce the proportions of this evil was expedient, and the curtailment of the agencies by which such sales could be effected must be regarded as an effective step towards their discouragement.

By section 386, the power of issuing a commission for the taking of evidence of certain officials and persons residing beyond the jurisdiction of the Court issuing such commission had been restricted to district Courts and Courts of Small Causes. Such commission would probably in most cases be addressed to other Courts or officers of a superior status to that of the subordinate Court which required the commission to be executed.

By section 505, the power of appointing a receiver for the management of any property forming the subject of a suit was withdrawn from Courts inferior to the district Court. The determination of the question as to whether any property should be taken from the person in possession of it at the time of the suit, as also the selection of proper persons for the responsible office of a receiver, were matters requiring much judgment. It was doubtful, moreover, whether the lower Courts had a sufficient field open to them for the selection of such persons.

Section 650 contained special provisions, to which he believed there was no equivalent in the present law, in regard both to the mode of attaching property beyond the jurisdiction of the Court desiring to make such attachment, and the Courts by which such attachments might be ordered. Under the Code of Criminal Procedure, if a Magistrate wanted to attach any property for the realization of a fine or otherwise, situate beyond the local limits of his jurisdiction, he must get his warrant backed by the Magistrate within whose jurisdiction the property was situate; and it was now proposed to adopt a similar rule in Civil Procedure; the Court desiring to attach any property situate within the jurisdiction of another Court would have to send its requisition to such Court to procure the attachment; and this being so, the reasons which had led to the withholding from a subordinate Court the power of putting in motion a superior Court for the execution of a decree passed by such subordinate Court would apply with equal force to the case of the attachment of property out of the local jurisdiction of the subordinate Court.

It was to be observed that in all these cases the proper exercise of the power which had been confined to Courts not inferior to district Courts, required in a greater or less degree experience, and that discretion and sound judgment which are the outcome of experience. It would be seen that in the structure of the Criminal Procedure Code, the principle of the inexpediency of entrusting large discretionary powers to persons wanting in experience had been carefully maintained. For instance, the power to put the police in motion in connection with any criminal case had been very sparingly conferred on the lower grades of Magistrates, and generally it might be said that all quasi-extra judicial functions requiring tact and discretion for their proper performance had been assigned to the several classes of Magistrates in exact proportion to their standing and experience in the exercise of Magisterial duties.

If this distinction was held to constitute a wholesome rule, as it avowedly did, in the determination of the jurisdiction of the Criminal Courts, why should it be wholly disregarded in Civil Procedure? Under the present law, the veriest tiro in the administration of civil justice was invested with as large discretionary powers as the principal Civil Courts. He (MR. COCKERELL) considered that the changes in this system which would be introduced by the Bill, if passed into law, in its present shape were of a most salutary character and urgently called for. He would add that he regarded as most satisfactory the re-affirmation in this very important measure of the correctness and soundness of this principle on which he had been commenting, and which seemed in danger of being so completely ignored in some quarters; and he thought the enunciation of this principle especially opportune at a time when, as he understood, it had been seriously proposed to appoint to posts of great responsibility requiring the exercise of much tact, discretion and energy, men whose antecedents had in no way tested their fitness and capacity for the proper discharge of the very arduous duties attaching to such posts.

In regard to the explanation which he had made as to the policy of the amended Bill in withholding certain discretionary powers from Courts subordinate to the district Court, he desired not to be understood to hold that none of the powers to which he had referred in detail could be safely or wisely entrusted to any of the subordinate Courts. He was far from entertaining that opinion; many of these subordinate Courts were doubtless thoroughly qualified to exercise most of these powers. Indeed, in their case, the only exception that he would be inclined to make would be in regard to sales of land, which matter he would reserve to district Courts exclusively in order to limit the exercise of the power of sale to as few hands as possible. But it must be remembered that this Bill was to apply to the whole Empire, and it would be very difficult, if not impossible, under the varying conditions of the several provinces in regard to the constitution of Civil Courts, to draw the line otherwise than at the district Court, so as to exclude all the Courts that it would be

desirable to debar from the exercise of these powers. No other line of demarcation, he believed, would meet the circumstances of all provinces, and so it resulted that some competent Courts must be excluded in order to avoid the risk of conferring the powers in question upon the incompetent.

It might perhaps be objected that during the currency of the present Code of Civil Procedure, the tone and character of the lower Courts had vastly improved, and that there was consequently an apparent inconsistency in withdrawing from these Courts this extra judicial jurisdiction which had uniformly been exercised by their predecessors. Doubtless, the knowledge of law, and indeed general intellectual attainments of the Judges of the inferior Courts of the present day, were very superior to those of the Judges who had gone before them, and this superiority was probably universal; but the judicious exercise of the discretionary powers which had been referred to could not be regulated by any rigid prescription of law, and depended rather on the possession of other qualifications, such as the good judgment, tact and discretion which resulted from a thorough acquaintance with the habits, thoughts and feelings of the masses of the people, and a cordial sympathy with their customs and usages.

Now his own personal observation had led him (MR. COCKERELL) to think, and his remarks on this subject must be understood to apply to the province (Bengal) in which his experience had been obtained, (for he had little personal knowledge of the effects of the present system of education upon the people of the other provinces of the Empire), that the circumstances in which the youth of the present time attained this improved legal knowledge and superior mental and intellectual culture were such as to unfamiliarize them with the character, customs and feelings of the majority of their uneducated or imperfectly educated countrymen, and to place them out of harmony with their most cherished usages and prejudices. In these respects he thought that the Munsifs of the present time, most of them young men who previous to their appointment had but recently been emancipated from the school and college course of education conducted on the European system, did, though otherwise more competent, compare disadvantageously with the class of men who had preceded them in those offices. Indeed he (MR. COCKERELL) would go further and say that many of the class from which the present race of Junior Native Judges was taken had scarcely a greater degree of personal acquaintance and familiarity with the habits and customs of the people generally, and even less interest in, and sympathy with, their thoughts and feelings, than the European officer who had spent some years amongst them.

It was proposed (section 335) to allow the arrest of a judgment-debtor without restriction as to the day or time at which such arrest might be effected. He could hardly say how far the existing law might be said to be altered by this provision, for the law of India contained no rule on the subject, and it was doubtful whether the law of England as contained in a Statute of Charles II, entitled the "Lord's Day Act," which allowed no service of civil process on Sundays, and the English practice which, he believed, admitted of no such service taking place between sun-set and sun-rise, applied to this country. There had clearly hitherto been some uncertainty on the subject which it was desirable to remove, and in regard to the question of principle, the Committee had come to the conclusion that so long as the law sanctioned arrest and imprisonment for debt, there should be no restriction having the force of law in regard to the time at which a judgment-debtor should be liable to arrest. Many persons were opposed to the policy of recourse to arrest and imprisonment for debt in any case. He (MR. COCKERELL) entertained himself strong objections to such arrest and imprisonment in the case of women, and he was not prepared to say that he would not concur as to the propriety of their abolition in regard to all persons, but this was a very large question and not directly raised in the Bill under discussion. Whilst the law permitted this form of procedure, it seemed to him only reasonable that such permission should be absolute and without any qualification.

The last, but not the least important, of the proposed alterations of the law to which he had to draw attention now was that in regard to suits against the Goverument, or any public officer respecting acts done by him in his official capacity. At present, in Bengal and elsewhere, these suits might be instituted in any Court, at the option of the person suing. The Bill (section 416) provided for the restriction of such institutions to district Courts. There was nothing new in the principle of such a rule; it had been in force in the Bombay Presidency from the date of the earliest Regulations, and re-affirmed in the comparatively recent enactment of the Bombay Civil Courts Act (XIV of 1869). In Bengal, up to the enactment of the present Code of Civil Procedure in 1859, only a limited number of Government officers were liable to be sued at all in a Civil Court in respect of any public act. The Bengal Regulation III of 1793, in its preamble, set forth the considerations on which independent Civil Courts were established, and the limitations under which the Government was willing to allow its interests and the acts of its officers to be submitted to their arbitration:

"To ensure to the people of this country the uninterrupted enjoyment of the inestcemable blessings of good laws duly administered, the Government has determined to lodge its judicial authority in Courts of justice; and has resolved that the authority of the laws and Regulations as lodged in the Courts shall extend not only to all suits between Native individuals, but that the officers of Government employed in the collection of the revenue, the provision of the Company's investment, and all other Financial and Commercial concerns of the public, shall be amenable to the Courts for acts done in their official capacity in opposition to the Regulations."

By section 10 of this Regulation the public officers who could under the foregoing declaration be sued in the Civil Courts were specified. They were the Collectors of Revenue and Customs, Commercial Residents, Salt Agents, Mint and Assay Masters, and their respective Assistants. By subsequent Regulations, Opium Agents were similarly made amenable to the Civil Courts. As Regulation III of 1793 applied only to district Courts, it might be questioned whether the Government or the public officers above referred to could have been legally sued in any other Courts.

All this went to show that the restriction contemplated by the amended Bill was wholly in accordance with the spirit of the law up to a comparatively recent period. Of the ill-effects of the present system, under which the Government and its officers could be sued in any Court in Bengal,—where from various causes the Government and its Officers were probably much more frequently sued than in any other province,—he (MR. COCKERELL) could give no better evidence than reading to the Council extracts of a valuable paper on the subject of this Bill contributed by the Legal Remembrancer of Bengal (Mr. Bell), who stated as follows:—

"The most unseemly conflicts often arise between the local Executive and the local Judicial Officers. It frequently happens that a Munsif and a Deputy Magistrate are located at a sub-division. They are quite independent of each other, and there is a natural rivalry between them as to which of them shall be accounted the greatest. The Deputy Magistrate perhaps passes an order under the Criminal Procedure Code, directing the removal of a hut as an obstruction. The owner at once files a suit in the Munsiff's Court to have it declared that the ground upon which the hut stands is his private property, and prays the Munsif to issue an injunction to stop the Deputy Magistrate from carrying his order into execution. I could refer to a number of cases in which these unseemly conflicts between the local Munsif and the local Deputy Magistrate have occurred. In one case a Munsif went so far as to issue a warrant of arrest against an Assistant Magistrate for not obeying an injunction which the Civil Court had illegally issued.

"I will give another illustration of a case which came before me last month. An Assistant Magistrate in charge of a sub-division had sentenced a zamindár to pay a fine, or, in lieu of paying, to suffer a certain period of imprisonment. The order was passed while the Assistant Magistrate was in camp, and as the zamindár was not provided with the money to pay the fine, he was necessarily forwarded in custody to the lock-up. As soon, or almost as soon, as he reached the lock-up, his friends brought the money, paid the fine, and obtained his release. The zamindár thereupon sued the Assistant Magistrate for damages, on the allegation that the

Magistrate had acted maliciously in passing the sentence when he was in camp, and there was a further averment that the Magistrate had not accepted the fine when tendered.

"The first part of the plaint clearly disclosed no cause of action, for it did not allege that the Magistrate had acted without reasonable and probable cause; and the second part of the plaint merely involved a simple question of fact whether the money had been tendered or not. The Munsif, however, tried the case as if he had been an appellate Court over the Assistant Magistrate. He censured the Assistant Magistrate for trying the case in camp, for delaying to examine the witnesses, and for a number of other matters into which a Civil Court has clearly no jurisdiction to enquire, and he concluded an illogical judgment by dismissing the case, but casting the Assistant Magistrate in costs, because, in the judgment of the Munsif, the proceedings of his Court had been irregular. I have seen a great many similar cases, and I must record my deliberate conviction that it is most inexpedient to allow local Munsifs to try suits against local Executive Officers. Such suits should be instituted before the Judge, and it should be left to his discretion either to try the case himself or transfer it to one of his subordinates."

He (MR. COCKERELL) concurred entirely in this view of the question, and from his own experience as Legal Remembrancer could confirm all that had been advanced by Mr. Bell against the present system. The cases cited by that gentleman were suits against the Officers of Government in respect of public acts, but he remembered suits, in which the Government had been plaintiff, dismissed by Munsifs who proceeded to deliver themselves, in their recorded judgments upon the cases in question, of gratuitous diatribes against the policy pursued by Government on large and important questions, in regard to which from want of knowledge of the circumstances they were not in a position to form any opinion. It was on every consideration inexpedient to allow such opportunities for the arraignment of the conduct and action of the Chief Executive Officer of the district, as the local representative of the interests of the State, by the Judges of the lowest grade of Civil Courts.

It was proposed to accompany this restriction as to institutions of this kind by a power of transfer to selected subordinate Courts. This also had been recommended by the Legal Remembrancer and was certainly necessary in Bengal where the District Judge might and frequently would not have the time to try himself all suits instituted against the Government or its Officers.

A very necessary provision (section 424) had also been inserted to compel previous notice of such suits. This was very much wanted, the number of such suits would probably be materially reduced by this obligation, as it often happened that matters which were taken into Court and made the subject of a suit could have been easily adjusted by some amicable arrangement, if the parties having a ground of action had taken the slightest pains to make known their claim in the proper quarter and obtain a private settlement of the subject of dispute. There was in Bengal at least, he feared, a too great readiness on the part of persons who considered themselves aggrieved by some action of the Executive authorities to rush into the Civil Court and submit their grievance to its arbitrament, without making the slightest endeavour to obtain the redress to which they considered themselves entitled in any other way. He (MR. COCKERELL) remembered a case in which whilst he was in correspondence with the subordinate Executive authority on the merits of a particular claim, the claimant went into the Civil Court, and the next thing that he heard in regard to the claim was that a suit had been instituted for its enforcement against the local officer referred to.

There were precedents also for the proposed rule in regard to this matter in the general Police Act of 1861, and the various Municipal Acts which had been passed since that date, in all of which the issue of notice prior to the institution of a suit against a public officer for acts done in his official capacity was made a condition essential to the validity of such suit.

He had no further remarks to make on the provisions of the Bill at the present time, and would only add that in his opinion it constituted even, as at present arranged—and further improvement ere it became law might be anticipated—a very decided amelioration of the existing Code of Civil Procedure.

The Hon'ble MR. HOPE said that as his name appeared upon the Report of the Select Committee on this Bill, presented to-day, he thought it was only just, both to his co-signataries and himself, that he should draw the attention of the Council to the fact that he had only very recently been made a Member of the Committee. From that, it followed that his colleagues on the Committee had had to bear the burden and heat of the day in this very elaborate, troublesome, and difficult matter; and, on the other hand, that perhaps his responsibility in having signed the Report might be considered to be of a somewhat more limited nature than it otherwise would have been. His position in this matter would appear to be one to a certain extent *ab extra*, not indeed that of the jealous stepmother; but rather he would say of the friendly critic, than of the confident and yet modest author.

He would now observe that the Act of 1859 which it was proposed to repeal and replace by another was the first of those great codes passed for India with which we were all familiar. The laws which it superseded were framed in the earliest years of British rule in this country; they were passed in the face of the practical difficulties of governing large and ill-understood nations, of whom it might fairly be said that we knew their law little, their customs less, and their tendencies not at all. In consequence of this the laws passed at that period with regard to civil judicature almost all of them bore the character, if he might so speak, of a compromise between legal theories upon the one side and the necessities of the situation upon the other. They contained many of the technicalities, and not a few of the absurdities, of English law. English law, he need scarcely say, enunciated in the most clear and unmistakeable terms the majority of the great principles of eternal truth and justice which had been recognized in all ages and countries throughout the world, and it had been copied in those respects by the codes of almost all civilized nations. But, on the other hand, it must not be forgotten that just at the very time when it was being declared by one of our great Chief Justices to be the perfection of human wisdom, it was permitting women with children at the breast to be put to death for thefts of a few shillings, while Counsel endeavoured to mystify each other, as they had long mystified the outer world, by a combined jargon of monkish Latin and Norman French. On the other hand, those laws contained a number of simple and somewhat rude provisions, which were alien to the text, and, in many cases, to the spirit, of British law, but at the same time were dictated by sound policy, humanity and common sense.

Such laws as he had endeavoured in these few words to describe, Act VIII of 1859 came in to supersede. No doubt, it would be unjust to say of the distinguished men who took a part in preparing and bringing into law that Act, what had been said of the Bourbon dynasty at the time of the Restoration, that though their experience had been what it was, they had learnt nothing, and forgotten nothing. At the same time it was, perhaps, at any rate not too much to say that it would appear, to some of us at least who can now look back, that they did not sufficiently realize two of the great facts—he might say characteristic features—of the society by which they were surrounded. One of these features was that it was, in India, an entire anachronism to treat all Her Majesty's subjects equally in the eye of the law. It might, no doubt, be very right, proper and necessary to do so in Middlesex, or parts of England less civilized than that; but it was different here. To class in the same category, and furnish with the same weapons, and put under the same disabilities, the astute Brahman and the cunning and greedy Baniyá, together with the wild tribes of our remote territories, such as the Bhíls, and others, such as even the simple kunbi, who were so different in every respect—to put them all together, and regard them as being equal in the eye of the law, was only to commit them to a most unequal and unjust contest. Another feature which they would appear not to have realized was, that the educated oriental intellect had peculiar tendencies to technicality and subtlety. In bye-gone days we saw those tendencies very clearly in the wondrous intricacies of the

Sanskrit grammar, and also in the elaborate account system of the Mahrátha Government so well described by Grant Duff; and if we came down to our own day we found the same talent produced, on the one side, a few Native Judges and Pleaders, of whom it might be said that they would be a credit to any country; and on the other, a class of money-lenders and low agents, who hung on to the inferior Courts, together with certain of the lower officials of such Courts, who for astuteness, greed, hardness and corruption were probably unequalled anywhere. Now, through non-realization of these characteristic features, Act VIII of 1859, instead of weeding out from the previous law all the elaborate technicalities which were then known to be so injurious, and all the absurdities which were fast becoming discredited in Europe itself; instead of doing this and on the other hand, embodying all the practical safeguards it contained and enlarging them with others which sixty years of experience had proved to be necessary, came forward and took the opposite course. It struck out such humane provisions as, for instance, the exemption, in the case of the judgment-debtor, of implements of trade and agriculture and the clothing of his wife and children from attachment and sale; and the result of the whole including, other legal changes then made, was that the unfortunate lower classes were chastised with scorpions, whereas before they had only been chastised with whips.

The consequence was that under the stimulus thus given there was a rapid continuation of the revolution which the defects of the earlier law had begun. From almost all parts of India the same cry arose regarding the indebtedness of the agricultural classes, the transfer of land, by sale or mortgage, to the money-lending portion of the community, and the hardship which resulted from property coming into the hands of those who were not likely to be good landlords, and who simply took it and held it for the purpose of making it a means of battening on the wretched cultivators who became their tenants. Now, on this subject he had got beside him one very large and ponderous volume which consisted of evidence taken by the Commission on the Dekkhan Riots in the Bombay Presidency; and another equally large volume containing a series of reports and papers collected from all other parts of India, which went to prove the existence of the same conditions there. There was not the slightest lack of evidence that almost everywhere the ryots stigmatised the Civil Courts as the cause of their misfortunes, and as the curse of their country. He feared that he might be supposed to have used exaggerated language in the remarks which he had felt it his duty to make. He could support what he had said by abundant proofs, but as time was short he would merely mention to the Council that Sir George Wingate, who was very well known as one of the most able of our administrators for some years in the past generation, after writing very much in the same strain as what he had now been saying, used of the ryot the following words:—

"He toils that another may rest, and sows that another may reap. Hope deserts and despair possesses him. The virtues of a freeman are supplanted by the vices of a slave."

The whole tenor of his remarks was that the moneyed class, even then, had got the ryots completely at their mercy, and left them barely enough to keep the life in their bodies, the proceeds of their lands being almost entirely carried off. But there was, perhaps, a better and more recent authority than Sir G. Wingate. Lord Elphinstone, who, after holding the Government of Madras, succeeded to the Government of Bombay in the troublous times of the mutiny, and of whom it was well-known that for calmness, impartiality of judgment, and a capacity for seeing clearly all things around him, he had perhaps no equal excepting Lord Canning himself, remarked as follows on this subject:—

"His Lordship in Council entertains no doubt of the fact that the labouring classes of the native community suffer enormous injustice from the want of protection by law from the extortionate practices of money-lenders. He believes that our Civil Courts have become hateful to the masses of our Indian subjects from being made the instruments of the almost incredible rapacity of usurious capitalists. Nothing can be more calculated to give rise to widespread discontent and disaffection to the British Government than the practical working of the present law."

But, in addition to those two authorities to which he had referred, there was a very large number of others. He might mention that he had seen almost exactly the same sentiments expressed in two Native newspapers in Bombay within the last fortnight. In our Acts which had been passed for the protection of Taluqdárs, Jágírdárs, Zamíndárs and Thákurs, there had been a practical recognition of the principle of what he had been saying. No doubt all those classes of the nobility and superior gentry had been relieved for sufficient reasons, but at the same time he could not help remarking that they were extremely fortunate, and owed their good fortune to their position, and not to any urgency of their case superior to that of the great mass of the people around them who, so far as they were concerned, rendered the passing of such Acts altogether superfluous. If there was, as had been urged in the passing of these Acts, a necessity for having the upper classes loyal, well-affected and contented with our rule, surely there was an equal necessity for having the great mass of the people in the same frame of mind. It was not a light thing to have the population of whole tracts rising in agrarian outrage as they had done in Western India, and if we left this fact unheeded, we need not be surprised if at some future time we found that it was but the muttering of the thunder which preceded the storm. The upshot of all, therefore, that he had said was that it seemed to him that we must look at the report now presented chiefly from the point of view of how far it provided an effectual remedy for the gigantic evils to which we could not shut our eyes, and how far it retraced all such steps of past legislation as experience had proved to be false. He would wish therefore the assent which his signature to the Report implied to be taken as qualified in this sense. In the remarks he had made, however, he would beg not to be for a moment understood as casting any imputation upon the members of the Judicial Department, European or Native, who administered the law. His quarrel was at present entirely with the law itself; and equally he did not mean to imply that his colleagues, who possibly in these matters might not be inclined to go so far as he was going, were blind to all he had brought forward. The question, however, appeared to him to be of such importance that he felt he ought not to hesitate in expressing his opinions upon it in somewhat strong terms.

In the Bill itself which accompanied the Report presented to-day, he noticed, with pleasure, a certain number of provisions, in which it appeared to him a vast improvement had been effected. One of those was the supervision of the Small Cause Courts, the details of which had been alluded to by his hon'ble colleague. Another provision was that by which trials were required to be, as far as possible, condensed, instead of being perpetually adjourned for a week, a fortnight, or a month at a time for practically insufficient reasons. A third was that which permitted the successor to a Judge to act upon the evidence taken by his predecessor, which would do away with an evil which in some instances had gone to the extent that after a case had been brought up to a state of decision, everything had to be begun again, simply because the Judge had been removed to another station or from some other similar cause. Again there was the abolition of general attachments, and likewise the exemption from attachment and sale of certain necessary property of judgment-debtors,—their implements of trade and husbandry, their clothing, the houses in which they lived, and so forth,—which his hon'ble friend, Mr. Hobhouse, had fully commented upon. Further there was the definition of the interest to be sold as far as it was possible to define it, a point of the utmost importance, and one which he trusted might even yet be made more clear before the Bill became law. Again there was the rateable division of the assets amongst the judgment-creditors, and in conclusion there was the reduction of the periods of attachment and of imprisonment in cases of specific performance and injunction.

Those were all points upon which, as he had said, a considerable improvement had been effected. There were some others, however, upon which, he confessed, he felt considerable doubts, but he wished to be considered as reserving his final opinion upon them for three reasons which he would explain. One of

course was that he had only very recently joined the Committee, and that he had not, therefore, had the advantage of hearing the whole of the arguments which had induced his colleagues to draw the Bill in these instances in the form in which it now stood. Another was that there was a large body of fresh evidence of which the two volumes to which he had just now directed the attention of the Council were only about one-third, which had been mostly collected by the Commission appointed by the Bombay Government to consider those agrarian riots in Western India to which he had already alluded, and his colleagues, or the Council, had had no opportunity of studying it. Indeed he must himself confess that he had only been able to get through it in a rather superficial manner. The third reason was that this Report of the Puná Commission, although it had been for some months before the Bombay Government, had not yet been formally considered and disposed of by them, nor, in consequence, had it come before the Supreme Government. Now, it would be very important to know the opinions of those two high authorities before the Committee themselves came to a final decision upon the subject-matter of the Report. It might, perhaps however, facilitate future discussion both in Committee and in Council, if he were to mention, in as short terms as he could, bearing in mind the length to which the discussion had been already prolonged, a few of the principal points which appeared to him to require consideration, and he would do so in the light of some of the evidence which this Report had brought forward, premising that the Commission who had submitted it was a Commission in the highest degree worthy of the confidence both of the Government and the public, inasmuch as it was composed of two most distinguished officers of the North-West in succession, one of our most rising Bombay Civilian Judges, a talented Revenue Officer, and one of the oldest and most experienced Native administrators of Western India. Also, as regarded the appendices, he might say that the great mass of evidence which they contained was not merely the evidence of Revenue Officers who, as we were all aware, were supposed to be very excitable persons, but also of Judicial Officers, both European and Native.

One of the points he would propose to notice very rapidly was the question of the service of a summons. His hon'ble friend Mr. Cockerell had already gone at some length into the question, and he would at present merely say that the Committee had rightly determined to secure evidence first of all that service of summonses was not withheld, and also that non-service was not falsely reported, for fraudulent ends. It was, however, still a question whether the assistance of the village officers of Government should not in some manner be brought in so as to secure that the process-server should not simply return saying that he could not find the man, but should bring with him some report of a proper and reliable person saying that the man was absent, and where he had gone, in order to bring him back or otherwise ensure the proper serving of the summons.

Another point upon which his hon'ble friend Mr. Cockerell had also made some remarks was that of *ex parte* suits. Those suits were of particular importance in the Bombay Presidency, inasmuch as they stood at about 66 per cent. of the entire number adjudicated upon. The Committee ascribed this large proportion to the ignorance of the debtors, to their inability to meet the money-lender in Court without the expensive aid of pleaders, and also to the small amount of the debts, as to which it was a remarkable fact that out of 422,000 cases, no less than 295,000 were about less than Rs. 20. It would be a matter here for consideration whether the creditor should not be required in all *ex parte* proceedings to prove the existence of the debt which he claimed, and also to go into Court with clean hands, that was to say, that he should be obliged to shew that he had kept regular and proper accounts, and had been giving receipts for any payments that he had received from the debtor, and that he should shew this by reference to his general accounts, and not simply by producing

a falsified sheet relating only to the particular debtor himself. It might of course be said that the Courts were insufficient for such enquiries. But, on the other hand, it was pointed out in one of the papers accompanying the Report that taking for instance the Bombay Presidency, there was a surplus of no less than ten lákhs of rupees of stamp-duties received in the subordinate Courts, that in the Courts of the whole Presidency there was a surplus of two lákhs and a half, and further that this surplus of two lákhs and a half would be about four lákhs and a half, were it not for the enormous expense of the Original Side of the Bombay High Court. The expense of the Original Side of the Bombay High Court, this paper said, was about three times as much as that of the Original Side of the Calcutta High Court, notwithstanding that the business transacted was only one-third larger, and this extra payment thrown upon the ryots in the Mufassal amounted to about one rupee and four annas for every case decided throughout the country. Those facts no doubt, if they were such as they had been described, would appear to be worthy of great consideration, and might perhaps pave the way to having a more careful enquiry into *ex parte* suits than, under present arrangements, would be possible.

Another point he would refer to was that relating to the introduction of English into any Court by the order of the Local Government. He must confess that he himself did not quite understand why this alteration should be made, and it appeared to him to be one extremely to be deprecated. The public, he considered, suffered abundantly, as it was, from the delay, cost, and blunders of translation, both oral and written, of evidence in High Courts under the present system, without having the same evil extended to the Mufassal. As to the impression which his hon'ble friend, the Mover, entertained, that this system would be attended by a saving of expense, he ventured to think that the result would be exactly the reverse, because, whereas at present only those papers were translated which were necessary for appeals, under the proposed arrangement the translation would affect all the exhibits and documents of that kind in every case, whether it was appealed or not; and, further, there would be a fresh evil introduced: the stream of truth would be in danger of being poisoned at the fountain-head. When a document was put in to the lower Courts, at once it would go into the hands of some ill-paid subordinate for translation into English, and a very large door would thus be opened for every kind of fraud in the translation itself, which the superior officers would have no means of checking whatever. With regard, again, to taking the evidence of the witnesses themselves, it was true that the Code here provided that whenever the evidence of a witness was taken down in a language which he did not himself understand, it should be interpreted to him in his own language; but he (MR. HOPE), from a considerable amount of experience in this matter, had no confidence whatever in such *viva voce* interpretations, and he did not see how a man could be made liable for perjury for a statement made unless the statement had been read out to him from writing in his own language.

Another point was the introduction of the new English provision with regard to the discovery of documents. It appeared to him that this measure was extremely likely in this country, where we had to deal with so many peculiar tendencies, to lead to a paper war between astute pleaders; and the result might be, that one party or another might be involved in the serious penalties which the Act now provided.

Another important matter was the introduction of the system of affidavits, which his hon'ble friend, the Mover, had stated were an entirely new instrument in the Mufassal. He should say, however, that they appeared to him very much like an old friend with a new face. When he came to India he found that a practice, though then dying out, was still existing in many parts of the country. The practice was this, that when cases were to be heard the presiding officer called four or five of his clerks, and said to one—"You sit in that corner and take the evidence of that witness,"

and to another he gave similar orders, and so on with the rest; and in this way four or five different men's evidence was taken simultaneously. Half a dozen cases were thus conducted simultaneously, and when all the depositions had been taken they were read out hastily, and a decision was passed without the Officer having seen the demeanour of the witnesses, or the witnesses knowing what they were recorded as having said. It was well known that in England the system of affidavits lead to a great deal of "swearing up to the mark" and of learning the affidavit by heart so as to stand cross-examination, and in this country there were infinitely greater facilities for its abuse. If admitted at all, it should be so for pure matters of form only.

A further point was that of payments out of Court, which was proved to be one of the most fruitful sources of oppression in the Mufassal. If time were not pressing, he could quote remarks by more than one Judge in the Mufassal in which it was said that people were sometimes brought up before them who had paid the amount of a decree three or four times over; that owing to the creditor having been so fraudulent as to induce the debtor to make payments out of Court, the creditor was enabled to snap his fingers in his face and to get execution of the decree over and over again. He was aware that there had been a certain amendment made in the Bill on this subject, but whether that met all the objections which the Commission brought forward, or whether the abolition of the provision as to requiring payments in Court was advisable, were still questions for consideration.

With regard to sales of land, he had nothing to add to the very full exposition of the subject made by his hon'ble friend, the Mover. On the whole, he should say that the provisions of the Bill pretty well came up to the recommendations in the Report of the Dekkhan Riots' Commission in that particular. At the same time the Report itself did not seem to be very definite on this particular point, and its appendices contained a variety of conflicting opinions on the subject by a large number of very high officials, both in Judicial as well as in Revenue employ.

Another point, which he was obliged to notice, was the question of imprisonment for debt. The draft of the Bill, now submitted, certainly made a very important amendment in the law, in that when a man was brought up and arrested for debt, the Court was to be bound at once to explain to him that he might have the benefit of the Insolvency Law; and further, if he declared that he wished to take the benefit and gave security for his appearance, he was not to be detained or sent to jail at all. This, no doubt, would remedy the evil, well known to exist now, of ryots being totally unacquainted with the existence of an Insolvency Law. He was also aware that the period of imprisonment for debt had been reduced by the present Bill; but the Commission recommended the entire abolition of such imprisonment upon two broad grounds. In the first place, they urged that it had, in point of fact, with certain exceptions which it was scarcely necessary to particularize, been abolished by almost all civilized nations in the world, and they quoted no less an authority than that of Mr. John Stuart Mill, who said that—

"the ancient laws of most countries were all severity to the debtor. They invested the creditor with a power of coercion more or less tyrannical, which he might use against his insolvent debtor, either to extort the surrender of hidden property or to obtain satisfaction of a vindicative character which might console him for the non-payment of the debt. This arbitrary power has extended, in some countries, to making the insolvent debtor serve the creditor as his slave; in which plan there were, at least, some grains of common sense, since it might possibly be regarded as a scheme for making him work out the debt by his labour. In England the coercion assumed the milder form of ordinary imprisonment. The one and the other were the barbarous expedients of a rude age, repugnant to justice as well as to humanity."

The second argument which the Commission used was with reference to the gross abuses to which this power of imprisonment led throughout the country. It appeared that the terror of being put into a prison, even for debt, was so extraordinary and so unreasonable among the

native population, that they were willing to make any sacrifices, even in some recorded instances to the extent of surrendering their wives and daughters to the creditor for immoral purposes, rather than be sent to jail; and further, that it led to absolute slavery, and also to the execution of fresh bonds upon any terms whatever. They were aware that in some parts of India those powers of imprisonment were said not to be abused; but the Commission also urged that the evidence was, at best, doubtful, and that they must judge the case, not merely by the number sent to jail, but also by the number who did not go to jail, and so obtain the amount of pressure which took place under the application of this provision.

In connection with this matter was the question of insolvency. The present Bill had extended the benefit of insolvency to all judgment-debts scheduled by the creditors, and it had, likewise, increased the limit of the amount for which a man could get an absolute discharge from one to two hundred rupees; but the Commission urged that nothing less would be sufficient, or was reasonable, than a complete discharge. They dilated at great length on the ruinous effects on the industry of the country of depriving the ryot of all stimulus to improving his land or extending his cultivation; they referred to labour bonds, execution, and so on; and they said that, while the creditor had under our Code here more protection than in almost any other civilized Code in the world, the debtor had not only less, but absolutely none at all. They strongly urged that when the debtor got his discharge, he should get it altogether; provided, of course, he was not fraudulent, and that his discharge should not be, as at present, accompanied by a power to seize all his future property for a long period of years.

He had now spoken at a length which he feared must have been somewhat tedious to the Council; but the great importance of the subject of procedure to the entire population of British India must be his excuse. In a very few words it might be said that the classes who were suffering were being ruined, not on account of their own improvidence or of the money they borrowed, but on account of the money which they were falsely said to have borrowed, and which our system enabled their creditors to recover. He had also borne in mind the mass of evidence that was yet to be considered, and the extreme difficulty of getting a Code of this magnitude when once passed, revised again more than once in the course of a generation.

Finally, it was, perhaps, unnecessary for him to explain that he had not spoken as he had with any intention of retarding the passing of the Bill before the departure of his hon'ble friend, the Mover, from India, or from any suspicion that what he had said would have such an effect. All the evidence was now collected and at hand, and he saw no reason why it should not be exhaustively considered with little loss of time. He, undoubtedly, should regard it as a public calamity if the Bill were not got through the Council before it was deprived of the assistance of one who had guided it from a very early stage with all the acuteness of his intellect, and all the weight of his authority, and if it consequently failed to be the fitting conclusion to an Indian career, which had left so many important landmarks upon our Statute-book and upon our Administration.

The Hon'ble SIR ALEXANDER ARBUTHNOT said that he would not detain the Council many minutes. He wished however to say a few words, first with reference to the observations which fell from his hon'ble friend Mr. Hope regarding section 184 of the Bill, which would enable the Local Government to permit the evidence of witnesses to be taken down by the Judge in English. That was a point of considerable importance, and he had no doubt from what had fallen from his hon'ble friend that the provisions of the section would elicit some criticism. He would here only observe that the provisions in question appeared to him to be exactly similar to the law which now obtained on the subject of Criminal Procedure, and from what he was able to learn from the working of that provision under the Criminal Law in the Presidency to which he formerly belonged, he had every reason to think that the provision was a

salutary one. But the point upon which he most especially wished to say a few words to the Council had reference to the remarks which had fallen from his hon'ble friend Mr. Cockerell regarding the want of familiarity, and the want of sympathy, with the great mass of the people who resorted to our Courts, which, in his opinion, characterized the present class of Judges who presided over the inferior Courts, and which he attributed to the particular description of education they received and the training they underwent in qualifying for their judicial functions.

The Hon'ble Member's remarks on the subject were in some measure qualified by the special reference which he had made to the Province of Bengal, but from their general tenor it appeared to him (SIR ALEXANDER ARBUTHNOT) that the Hon'ble Member conceived them to be practically of general application. For his own part he had little or no personal knowledge of Bengal, but he confessed he should be surprised to learn that the views which appeared to be entertained by his hon'ble friend were generally concurred in by the great majority of the officials of Bengal. Speaking for the south of India, he was able to affirm—and he could confidently affirm—that the educated natives who now presided in the inferior Courts were not only far better qualified in respect to education and training for the duties which they had to discharge, and had not only attained to a higher standard of official honour and integrity than that which characterized their predecessors, but that in respect of knowledge of, and sympathy with, the habits and feelings of the great mass of their countrymen among whom their lives were passed, they were in no way inferior to those who had gone before them. He thought it due to the many acquaintances and to some valued friends whom he possessed among the native official hierarchy in that part of India in which the greater portion of his official life had been passed, an official life which he might remark commenced exactly that day thirty-four years ago, to offer this brief reply to the observations which had fallen from the Hon'ble Member.

The Hon'ble SIR WILLIAM MUIR said that, without detaining the Council at any length, he wished to express the gratification he had felt at listening to the remarks of his hon'ble and learned friend who had brought up the Report of the Select Committee, especially in respect of the provisions for the sale of landed property in execution of decrees of Court. The subject had engaged attention as far back as he could remember, and particularly during the last five and twenty years. It was forced upon public attention most painfully during the events of 1857-58, when the ousted proprietary bodies throughout the country formed one of the most dangerous elements of society. Sale had everywhere ruined numerous hereditary proprietors and village communities, and everywhere had changed them from a contented and faithful yeomanry into a repining and disloyal body of cultivators ever brooding over their grievances and predisposed on the first opportunity to break out into lawless acts. When deprived of their proprietary title, they were still, as a rule, left in the cultivating occupancy of the soil,—powerless for good, but most active and vigorous for evil—a rankling sore in the side of Government.

Under the existing law, it was true, provision had been made for such sales to be conducted by the Collector, and it was at first supposed that that functionary was invested with some discretionary power to avert the sale where possible. The Courts however had ruled otherwise; every endeavour had been made to work these provisions, but the law was so drawn that they were found to be nearly inoperative. Many projects had of late years been discussed with the view of checking the rapid transfer of landed property into hands which were found so unfitted for its management, but they had all fallen through. The powers which it was now proposed to confer upon the Executive would tend greatly to remedy this evil. They would enable the District Officers to interpose effectively, and by lease or farm or mortgage, or even by direct management, to make the best possible arrangement for saving the property and rescuing the proprietor from ruin if it were possible to do so.

The limitation of the power of directing sale to the District Courts would also be beneficial as shewing the importance attached by the Legislature to the measure, and thus tending to check the indiscriminate transfer of land.. It was far from his view, however, to justify this limitation on any grounds disparaging to the lower Courts, or implying distrust of their qualifications. He must dissent from the sweeping condemnation of our Civil Courts by his hon'ble friend Mr. Hope; the Courts would no doubt always be unpopular with certain classes; but he was persuaded that, as now worked, they were not unpopular with the community at large. No doubt our system had been heretofore too rigid and inelastic, and in this matter of the sale of land they had created a great and crying evil. The transfer of land was a result which sooner or later must follow upon the advance of civilization and the introduction of settled laws; but it was a result, as remarked by his hon'ble and learned friend, the rapid and mechanical enforcement of which by our Courts was every way to be deprecated as fraught with much evil. It must come gradually and slowly as society was prepared for it. SIR WILLIAM MUIR also entirely concurred with what had fallen from his friend Sir A. Arbuthnot in reference to the Hon'ble Mr. Cockerell's remarks on the junior ranks of the Judicial Service. He was quite sure that there was no deterioration in them. While much improved as a rule in their mental training and legal knowledge, he did not consider them to be at all inferior to their predecessors in sympathy with the people and knowledge of their habits, as well as in upright and honourable feeling. The case might be different in Bengal; he spoke of course only of the Provinces with which he was personally acquainted. The senior Judicial officers in the North-Western Provinces contained among their ranks men of the highest reputation in the land, such as his friends Muhammad Sayyid Ahmad Khán (now he was sorry to say retiring from the service), Rai Bakhtáwar Singh, and many others who would be an honour to any service; and he felt assured that the juniors would not in any respect, either social, intellectual or professional, be inferior to them.

It was not then for any such reason he was glad that it had been resolved to limit the authority for directing sale to the district Courts; but because the limitation to these higher tribunals would necessarily secure the closer and more uniform attention to the procedure which it was the object of the Legislature to enforce. It might be objected that all such limitations to the ready and immediate sale of a debtor's property were prejudicial to the interests of the judgment-creditor. No doubt there was force in that objection. But in view of the great political object of securing a contented and useful proprietary, and the grave evils of the opposite, he felt that the balance of gain to the nation was vastly on the side of the course proposed. It was therefore a matter of the highest satisfaction to him to see an object which he (SIR WILLIAM MUIR) had long had at heart so promisingly near completion before his retirement from the country. He earnestly hoped that these provisions would before long become law in substantially the same shape as that in which they were now before the Council.

There was but one other subject which he (SIR WILLIAM MUIR) would notice, and that was the imprisonment of debtors. He did not go quite the length which his hon'ble friend Mr. Hope did. But he thought it worthy of consideration whether the law might not be greatly relaxed in the case of female debtors. The subject he understood had received the careful consideration of the Select Committee, who had not seen their way to exempting females from liability to arrest and imprisonment. In British Burma, for example, it was known that women very generally carried on trade on their own account, and could not therefore be well exempted from the penalties to which men were liable. It was otherwise, however, in most parts of the Empire; and considering the position of the female sex in India, it seemed to him that it might be possible to meet the object in view by empowering Local Administrations to make the exemption wherever it was thought advisable. He must admit that in all his inspections of jails in Upper India, he had never met with a civil

female prisoner incarcerated for debt; still the difficulty might occur, and it might be wise therefore to bring the law even in theory into accord with the feelings and customs of the great body of the people.

The Hon'ble MR. BAYLEY said he would only detain the Council for a very brief space, as what he had had to say had been generally anticipated by the Hon'ble Members who had already spoken. He could only add his testimony to that of his hon'ble friend (Sir William Muir) who was immediately seated on his right hand, and whose experience in India was even longer than his own, that the present Bill was a very great step towards the improvement of the Civil Procedure Code. He perhaps went further than other Hon'ble Members present in his opinion as regarded the condition of the Civil Courts before Act VIII of 1859 was passed. He believed that the Courts then were—and deservedly—extremely unpopular, and that the *morale* and *personnel* of the Subordinate Judges and their staffs were really about as bad as they could be, with some very few exceptions, while the procedure was so complex that it gave opportunities for delay, confusion, corruption and fraud which it was almost impossible in the present day to realize. In the latter respect Act VIII of 1859 effected a very great improvement, and he believed that the point on which it was weakest and in which the present Bill was especially an improvement upon it was with regard to the execution of decrees.

The two sections on this subject to which his hon'ble friend Mr. Hobhouse had alluded were without question originally intended to give a power of interference to the Executive which the provisions now introduced gave with a larger scope and in fuller detail. They were introduced, he believed, at the instance of the then Secretary of State, the present Lord Derby, with especial reference to the results of the mutiny and to the truths which that event brought to light, and he could testify from his own experience that the earlier working of the Act was very much that which was now more distinctly formulated and introduced into the present draft. It was found as a matter of fact however that the wording of the sections as then drawn did not warrant the interpretation first put upon them, and it had been gradually contracted by judicial decision until the sections had almost become null and void. The Bill, however, as it was now drawn would restore what he believed was the intention of the framers of Act VIII of 1859, and also give all the further improvements which experience had suggested. He would instance only one section which had not been noticed by his hon'ble friends who had spoken before him, which seemed a very small and imperfect section in itself, but was nevertheless one which might be found to cover a very great surface. It consisted in this—that it gave power to the Collector, even in those districts in which the Collector was not entrusted with sales of immoveable property, to intervene and to represent to the Court which was about to sell any landed property that he considered that public inconvenience would arise from the sale. He believed it was notorious that in the celebrated case of Koer Singh of Behar the Collector had actually taken steps to relieve him from the weight of his embarrassments, and it was only because by reason of the want of a due provision in the law, and the cumbersome proceedings consequently involved, that the Collector's efforts had failed. Had this section been then law he believed it was not too much to say that Koer Singh would never have gone to rebellion, that the flame of the mutiny of 1857 would never have extended into the Provinces of Bengal, and what *that* involved and how much might then have been saved he need hardly bring to the recollection of those who were in the country at the time.

He wished now to refer very briefly to some of the criticisms made by his hon'ble friend Mr. Hope. Those criticisms did not exactly tell a flattering tale, but he had no doubt that they would prove to be very useful. On one point they brought out a fact of which officially of course the Council had no cognizance, that was the fact that a mass of evidence had been collected by the Puná Riots Commission. He (MR. BAYLEY) believed that this evidence

was of great value, and it had not been before the Council or the Select Committee, nor was it even, he understood, before the Government of India at the present moment; but he had no hesitation in saying that it would be of great assistance in the further discussions upon this Bill, and he hoped that the Executive might be able to take such measures as would hasten the submission of that Report, and even without the opinion of the Government of Bombay, the facts by themselves, he was sure, would be most important. He did not proceed to an examination of the criticisms which his hon'ble friend Mr. Hope had made. He was not prepared to say that even with all the evidence before him he should be prepared to go the length he (Mr. Hope) would; but on some points, for instance with regard to the service of summonses, he believed it was very likely that the facts Mr. Hope had placed before the Council would be very useful in producing modifications of the procedure in that respect. He need hardly say that those who were acquainted with the history of Civil Procedure in India would be aware that all who had attempted to improve that procedure had found it to be the chief difficulty with which they had to deal, and that it was one of the main points brought to notice by the Commission appointed to enquire into the subject of the excessive transfer of landed property and the great frauds which arose in the district Courts of Cawnpore many years ago. The procedure was changed then, and had been changed again and again, and no doubt it was one of the most difficult points that we had to deal with still.

He thought that it was almost impossible that we could have too many facts or recommendations on this point, and he would therefore be very glad to see the evidence regarding it, to which Mr. Hope had alluded. He did not wish to make any further remarks; he was quite prepared to maintain that the Bill as it now stood was a great improvement on all previous legislation in India on the subject of Civil Procedure, and he for one was willing to lend his aid in the direction of further improvement before it was passed into law.

The Hon'ble MR. HOPE said that, with the permission of His Lordship, he wished to observe that his remarks about the use of English in Court had sole reference to the possible employment of English Barristers in the Mufassal. They had no reference whatever to the Native Judges, who in the Bombay Presidency were all that his hon'ble friend Sir Alexander Arbuthnot had described them to be in his own. He might further, perhaps, make clear, if he had not already done so, that on all the points upon which he had mentioned what the evidence and opinions of the Bombay Commission were, he reserved his own judgment pending the final consideration of the Report. At the commencement he had expressed a disinclination to father everything in the Report of the Committee, and he was equally reluctant to do so as regarded that of the Commission.

The Hon'ble MR. COCKERELL desired, with the permission of His Excellency the President, to say a few words by way of explanation to the Council in reference to what had fallen from certain Hon'ble Members opposite (Sir W. Muir and Sir A. Arbuthnot). He (MR. COCKERELL) was represented as having stated that in his opinion the inferior Civil Courts of the present time were unpopular, or at least less popular than those which had preceded them. Now he certainly had made no such direct statement, and he did not think that his remarks on this question could be reasonably construed as implying that such was the case. What he had said—and he must remind the Council that he had expressly confined the application of his remarks to the Province of Bengal in which alone had he the necessary practical experience to enable him to form a correct opinion on such a question—amounted to this; that the judicious exercise of large discretionary powers could not be secured or limited by any positive rule of law, but depended rather upon the possession of a familiar acquaintance with the habits and customs of the people at large and a thorough interest in, and sympathy with, their social usages, feelings and prejudices, than a scientific knowledge

of the law or general intellectual capacity; that the circumstances in which the high class education and superior intellectual acquirements of the young men of the present day were obtained—he referred to their separation from their homes and dwelling in large towns within the precincts of the higher class educational institutions, their aspiration for proficiency in the English language and literature so zealously pursued, that they not only habitually wrote and spoke, but might be said almost to think in English, and their general anglicized tone, and disregard of the restrictions imposed upon them by the caste regulations and religious tenets of their forefathers—had a decided tendency to estrange them from the mass of their countrymen; and that the highly educated young man of the modern school, in Bengal, was in effect almost as much a foreigner to the orthodox members of his race as the European himself.

The Motion was put and agreed to.

STAGE CARRIAGES BILL.

The Hon'ble MR. BAYLEY presented the Report of the Select Committee on the Bill to amend the Stage Carriages Act.

The Council adjourned to Wednesday the 4th October 1876.

SIMLA;
The 21st September 1876.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 5TH OCTOBER 1876.

GENERAL REMARKS.—In Madras good rain is reported from Madura: elsewhere it has been light, and prospects are said to be unchanged. In Mysore showers have fallen throughout the province with good effect, but much more rain is required to materially improve the condition of the crops. In Bombay there has been no rain in Sind, Guzerat or the Konkan, but prospects are there good. Very little has fallen in Khandesh and the Deccan districts, and the *kharif* crops are withering and the sowing of the *rabi* being retarded. In the Southern Mahratta Country the fall has been somewhat more copious, but partial: where none has fallen prospects continue to be bad. In Berar no rain has fallen and some is wanted for the *rabi* sowings. In the Central Provinces slight falls are reported from only four districts: prospects are good. No rain has fallen in Central India where the crops promise well. In Rajputana rain is reported from Abu, Marwar and Meywar: prospects are excellent. In Bengal there has been general rain, and the prospects of the rice crop are everywhere good. Reports from Assam are favourable. Rain has fallen in the North-Western Provinces only in Benares, Allahabad and Kumaon: the crops are in good condition. In Oudh rain fell at Lucknow and Fyzabad; prospects are favourable. No rain is reported from the Punjab, except showers at Lahore and Peshawar: the crops promise well.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Oct. 4th)	·05 at Masulipatam; 1·30 at Palnad; about ·5 at Gudivada, Narsarowpett and Tinour.	No rain elsewhere; 2·95 feet water over anicut; canal supply insufficient and wet crop consequently suffering; standing crops everywhere suffering much from want of rain; *sajja*, maize and gingelly, where harvested, outturn below average; prices rising; cholera abated; seizures 35, deaths 16; fever and small-pox exist in upland taluks, cattle generally healthy; pasture failing; markets well supplied, except in Vinukonda and Repalli.
Kurnool	(„ „)	About 1·0 in Nandial, slight in Koilkuntla.	Season not changed; no rain elsewhere; dry crops withering; wet crops under canal good; no tanks have received supplies; pasture rare; dry fodder little; grain rather difficult to procure; prices continue high; cholera in Markapur, but abating.
Madura	(„ „)	4·6 at Madura; about 2·0 at each of the other taluks.	Wet and dry cultivation proceeding to some extent; prices stationary.
Malabar	(„ 5th)	·07	Harvesting of first crop in progress; grain supply sufficient; prices low; cholera in Ponany, Kóteyam and Calicut taluks, 291 deaths; cattle generally healthy; pasture good.
Tanjore	(„ „)	·07 at Negapatam.	Rain elsewhere partial and scanty; rivers rising; no fresh supply to tanks; water over upper anicut, north branch 2 inches; upper anicut, south branch 5 inches; lower anicut, north branch ½ inch; lower anicut, south branch ½ inch; cultivation, wet and dry crops throughout the district; standing crops not doing well in several places for want of rain; harvest, wet and few dry crops in some taluks; yield moderate; pasture generally insufficient; markets well supplied. *General Remarks.*—General prospects unchanged.
Bombay—	(Oct. 5th)		
Sind—	(„ 4th)		
Kurrachee	...	...	River at Kotri on 2nd, 13 feet against 13 feet 15 inches on the same date last year; locusts are doing a little damage in Kotri, Sehwan, Mánjhand and Kohistan; fever general, as also cattle disease in the Delta, many deaths.
Shikárpur	...	...	Crops the same as before, except in Lárkána taluka, where *jowari* is damaged by insects; locusts in Rohri taluka and eastward of Ubauro; water 4 feet 8 inches lower than last year; nights damp; fever still very prevalent.
Hyderabad	...	...	River still falling; breaches in Badin taluka; locusts in 7 talukas but damage done in only 4 towards the north; Nára floods have reached Tando Bágo taluka; fever general; 58 fresh cases of small-pox in city, 3 deaths; weather cool; cattle disease in 2 talukas.
Upper Sind Frontier	...	...	Late *kharif* crops on desert canal suffering from drought; *rabi* crops being sown; fever and diarrhœa prevailing.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*			
Guzerat.			
Ahmedabad	...	...	No change.
Kaira	...	...	Crops, weather and public health good.
Surat	...	...	Nine cholera cases in Balsar taluka, 8 fatal.
Broach	...	...	Fever in A'mod and Jambusar; *rabi* sowings progressing; crops thriving.
Khandesh and Násik.			
Khandesh	...	...	State of crops as before; cholera at Bhusáwal, 12 cases fatal.
Násik	...	0·05	Total rainfall 16·84; crops withering; rain wanted; public health good.
Konkan.			
Tanna	...	...	Cholera exists slightly in 2 talukas; rice crops suffering for want of rain in some talukas.
Deccan.			
Poona	...	0·34	Total rainfall 14·38; *kharif* crop dying for want of more rain in all talukas; sowing of *rabi* also retarded; cholera has nearly disappeared; public health good.
Ahmednagar	...	...	No change for the better; cholera in 5 talukas, 124 cases, 59 deaths.
Sholapur	...	0·35	Total rainfall 8·55; a good fall of rain is most urgently required; cattle dying for want of fodder; prices risen considerably.
Satara	...	0·11	Total rainfall 30·79; weather warm and cloudy; crops withering; 31 deaths from cholera.
Southern Mahratta Country.			
Belgaum	...	1·28	Total rainfall 29·27; rain partial in 4 talukas, but none in Athni where scarcity continues; little improvement in prospects of crops throughout the district.
Dharwar	...	2·19	Total rainfall 20·61; fall of rain heavy in some places but was very partial; it has on the whole done great good, especially in Ránibennur and Dharwar; cotton sowing progressing in places where rain has fallen; poorer classes still suffering from want of employment; cholera increasing.
Kanara	...	...	Rice harvest has begun on the coast; prospects fair; rain wanted inland.
Kaládgi*	(Oct. 2nd)	2·47	Total rainfall 9·86; fall of rain general but scanty, except in Bágalkot and Hungund talukas; more wanted throughout the Collectorate for *rabi* sowing; slight cholera in Bágewádi taluka.
Kattiawar and Gaekwar's Territory.			
Rájkot	...	...	Crops improving; weather and public health as before.
Wadhwán	...	...	Weather warm; crops good.
Baroda	...	...	Crops well.
			General Remarks.—State of crops in Sind and Guzerat favourable; fever prevalent in Sind, and small-pox in Hyderabad; a few cases of cholera in Khandesh, Ahmednagar, Satara, Dharwar, Tanna and Surat; the slight fall of rain in the Deccan and the Southern Mahratta Country is quite insufficient to avert probable great and general scarcity in those parts; more rain urgently required.
Bengal—	(Oct. 5th)		
Chittagong	...	·47	
Noakholly	...	8·73	General health good.
Chittagong Hill Tracts	...	·95	
Hill Tipperah	...	1·30	
Backergunge	...	1·30	Fever in thanas Backergunge, Molbaria, Golachipa and Golakhali; cattle disease in Golachipa.
Furreedpore	...	1·66	A few cases of cholera reported from Madaripore.
Dacca	...	1·25	
Tipperah	...	·56	
Mymensingh	...	2·66	
24-Pergunnahs	...	·71 (Previous week ·74).	Fever still continues in Barripore.
Jessore	...	1·02	
Nuddea	...	·76	
Moorshedabad	...	3·69	Cholera has not spread; fever is uniform.
Pubna	...	1·38	
Rajshahye	...	·50	
Bogra	...	2·88	
Maldah	...	3·03	
Dinagepore	...	5·93	
Rungpore	...	5·55	

* In the Supplement to the *Gazette of India* of the 30th September 1876, page 1014, opposite Kaládgi, for "total rainfall 79·22," read "7·22."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ..	8·17	General health good.
Jalpáiguri ...	2·37	
Darjeeling ...	·98	
Midnapore ..	·34	
Howrah ...	·64	
Hooghly ...	Present and previous weeks 3·17	
Burdwan ...	·21	
Bankoora ...	5·89	
Beerbhoom ...	3·16	
Sonthal Pergunnahs ...	2·4	
Bhágalpur ...	Return not received.	General health very good.
Monghyr ...	4·05	
Purneah ...	4·01	
Durbhunga ...	2·66	
Mozufferpore ...	Return not received.	
Sarun ...	·55	Cholera still reported; it is decreasing in Gopálganj; only one death occurred from this cause between 16th and 22nd September.
Chumparun ...	2·97	
Patna ...	Return not received.	Health of the district generally good.
Gya ...	4·0	Fever prevails at Jehanabad.
Shahabad ...	1·28	
Hazáribágh ...	2·04	
Lohardugga ...	1·49	Cholera disappearing.
Manbhoom ...	1·40	
Singhbhoom ...	·76	Public health good.
Balasore ...	2·16	General health satisfactory.
Cuttack ...	1·64	Public health good.
Pooree ...	2·46	
		General Remarks.—There has been seasonable rain in almost every part of Bengal. The early crops are being fast harvested and the late rice is doing well. Favourable rain has fallen in Behar and the prospects of the rice crop are everywhere good. Lands are being ploughed for the cold weather crops and sowings have already commenced in places.
N. W. P.—		
Benares (Oct. 4th)	1·0	Westerly winds.
Allahabad („ „)	1·2	All the rain fell on 29th and 30th; distributed over all districts save Western Doab; rice prospects better.
Agra („ „)	*Nil*	Ploughing for *rabi* has commenced.
Meerut („ „)	...	Prospects good.
Bareilly („ „)	*Nil*	Prospects good.
Almora („ 2nd)	...	Some heavy showers fallen during week; weather cleared since Friday.
Jhansi („ 5th)	...	Weather fine.
Punjab— (Oct. 4th)		
Delhi ...	*Nil*	Crops satisfactory; health generally good.
Hissár ...	*Nil*	*Kharif* prospects improved; a half-crop expected; *rabi* sowings commenced; endemic fever rife.
Umballa ...	*Nil*	Crops good; fever prevalent.
Jullundur ...	*Nil*	Crops abundant; fever prevalent.
Lahore ...	A shower.	Crops good; fever prevalent.
Mooltan ...	*Nil*	Crops good; fever prevalent.
Dera Ismail Khan ...	*Nil*	Harvest good; a few cases of cholera.
Rawálpindi ...	0·7	*Kharif* crops flourishing; *rabi* sowings commenced; cholera disappeared.
Pesháwar ...	Showers.	Crops below average; slight fever and cholera prevalent.
		General Remarks.—Harvest prospects good; public health decidedly bad owing to prevalence of autumnal fevers.
Oudh—		
Lucknow (Oct. 4th)	·7	Prospects good; public health generally good.
Fyzabad ...	3·7	
Sitapur ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (Sept. 30th)	...	Weather clear; *rabi* sowings completed; *kharif* not so good as anticipated; health good; prices steady.
Sambalpur („ „)	2·16	Prospects very good; cholera disappearing.
Biláspur ...	·99	Rice crop good; other crops injured by rain; fever and cold prevalent; prices steady.
Raipur ...	·55	*Rabi* ploughing continues; prospects of *kharif* favourable; health good; prices easy.
Bálághát ...	...	*Rabi* ploughing continues; prospects favourable; fever prevalent; prices falling.
Chanda (Oct. 1st)	...	Prospects good; cholera abating.
Chhindwára ...	·55 in previous week.	Prospects favourable; health good; prices stationary.
Betúl (Oct. 2nd)	...	Prospects of *kharif* good; *rabi* sowings commenced; cholera decreasing; cow-pox continues; prices stationary.
Bhandara („ 3rd)	...	Prospects favourable; cholera and small-pox abating; fever continues; prices stationary.
Nágpur („ 4th)	...	Prospects good; no epidemic; prices stationary.
Wardha ...	...	Prospects good; *rabi* sowings commenced; cholera decreasing.
Nimár ...	...	Prospects good; cholera and small-pox continue.
Hoshangabad ...	...	Prospects good; prices stationary.
Narsinghpur ...	...	Prospects favourable; prices stationary.
Jubbulpore ...	...	Heavy dews; prospects good; slight cholera and cattle disease prevalent.
Saugor ...	...	Prospects favourable; cholera decreasing.
Seoni ...	...	Rice crops ripening; *rabi* sowings commenced; cholera disappeared.
Mandla ...	·30	Prospects good; *rabi* ploughing continues; no epidemic; prices stationary.
Damoh ...	...	More rain for rice required; other *kharif* crops good; few cases of cholera.
		General Remarks.—Prospects continue good.
British Burma— (Oct. 5th)		
Arrakan Division ...	...	Public health normal; agricultural prospects good; slight cattle disease in one township of the Akyab district; cholera in a sporadic form in Akyab and Sandoway districts.
Pegu Division.		
Rangoon ...	...	No report received.
Thonkwa ...	...	Health and crops good; rainfall steady.
Bassein ...	3·0	No cattle disease; health generally good; crops progressing favourably.
Henzada (Sept. 30th)	1·0	Weather favourable.
Myanoung („ 23rd)	2·10	Crops prospects good; slight cattle disease in Monio and Tsayaung townships; 3 deaths from cholera reported from Tsayaumy; otherwise public health good.
Tharrawaddy ...	Report not received.	
Prome ...	...	Health report satisfactory; crops promising.
Thayetmyo ...	1·24	Health good; crops progressing.
Tenasserim Division.		
Amherst ...	3·37	Public health good; agricultural prospects favourable except in Karen Toungyas in Tounghoo district where rats are again appearing; crops slightly damaged in lower portion of Houngtharan valley in Amherst district by excess of rain; cattle disease increasing in Thatone sub-division.
Tounghoo ...	1·3	
Shwegyeen ...	2·6	
Mergui ...	1·95 in fortnight ending 23rd September.	
Tavoy ...	12·8	
Assam—		
Gauháti (Oct. 5th)	1·01	Mornings and evenings becoming cool, often misty in early morning; sun still hot during the day; state of crops and tea the same as before.
Sylhet („ „)	2·70	Nothing special to report.
Mysore and Coorg— (Oct. 5th)		
Bangalore ...	·31 cents in cantonment.	Showers of rain have fallen throughout Mysore with good effects, but material improvement must depend on a further and ample rainfall; prices of food-grains shew a tendency to rise; prospects still bad; general health good.
Coorg ...	·47	
Hyderabad Assigned Districts—		
Amráoti (Oct. 5th)	*Nil* ...	*Kharif* crops good; rain required for *rabi* sowing.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central India— (Oct. 4th)			
Indore ...			
Gwalior ...			
Neemuch ...		*Nil* ...	Health and prospects sound.
Rutlam ...			
Sutna ...			
Rajputana—			
Abu	(Oct. 5th)	·8	Total rainfall 47·80; weather clear and pleasant.
Sirohee	(„ 1st)	*Nil*	Health and prospects good; weather seasonable.
Marwar	(Sept. 30th)	1·32	Total rainfall 22·75; all tanks still overflowing; fever and colds prevalent; prospects promising; weather dry and clear since 24th, date of last heavy fall.
Bickaneer	(„ 27th)	·27 on 23rd	Prospects satisfactory.
Meywar	(„ 29th)	·40	Total rainfall 24·88; health and prospects good; bright clear sky, heavy dew at night.
Jhallawar	...	*Nil*	Some fever; weather bright.
Harowtee	(Sept. 30th)	*Nil*	Health and prospects good.
Ajmere	(Oct. 5th)	*Nil*	All prospects good.
Joypoor	...	*Nil*	Agricultural prospects favourable; weather seasonable; health good.
Ulwur	(Oct. 4th)	*Nil*	Outturn will probably be 25 per cent. below average.
Nepal	**(Sept. 27th)—**	4·2	Agricultural prospects fair.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

ALLAHABAD, [illegible] September 1876.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

Measures for the reduction of the surplus number of Civilians in the North-Western Provinces.

No. 81 (Public), dated India Office, London, 13th July 1876.

From—Her Majesty's Secretary of State for India,

To—His Excellency the Right Hon'ble the Governor-General of India in Council.

PARA. 1. The despatch of Your Excellency's predecessor in Council in the Financial Department dated 25th February, No. 70 of 1876, relative to the measures which it is proposed to adopt for the reduction of the surplus number of civilians in the North-Western Provinces, has been considered by me in Council.

2. I think the circumstances which led to this discussion fully justified the appointment, by Your Excellency's predecessor in Council, of a Special Committee of Enquiry, and I am of opinion that the report of the Committee contains many valuable suggestions. I do not propose to consider in detail the causes of the retardation of promotion in the North-West Provinces;—I accept, as a fact, that it is so serious as to threaten the efficiency of the administration.

3. I must however, as a preliminary remark, emphatically state that rules such as those of Lord Dalhousie, framed for administrative purposes, and notifications such as those of the Civil Service Commissioners, indicating existing rates of salaries in various branches of the service, must not be held to pledge Government to maintain particular offices or forms of administrative agency, or be regarded as guarantees for any particular rates of salary or prospects of promotion. This must be clearly understood. But, on the other hand, I am prepared to deal considerately with a retardation of promotion so general and so prolonged as seriously to affect a large section of the service.

4. I accept the conclusion of Your Excellency's predecessor in Council, that the circumstances of the present abnormal stagnation of promotion require and justify an unusual and exceptional remedy, but I cannot, after much consideration, approve of the particular measures proposed.

5. It seems to me that it would be very objectionable to grant large pensions to young men who have done little service, and who will return to England to live as annuitants for long terms of years. Such a remedy would be of the costliest kind, and the bestowal of pensions upon persons who have not earned them by any adequate service to the State would constitute an injurious precedent.

6. It is then to be considered whether there are not other measures, either proposed by the Special Committee or suggested in the original memorial of the civil servants, which are not open to the same serious objection.

7. First, one of the causes of the block in promotion in the North-West Provinces Service appears to be that many of the highest posts in the Non-Regulation Provinces, to which members of the Civil Service would otherwise have been appointed, are occupied by military and uncovenanted officers, who, on account of a difference in the scale of pensions, do not retire so early as covenanted civilians. I would sanction the grant to a limited number of military officers in civil employ of a bonus of such sum as you might think fit to offer, but not exceeding, in any case, one year's pay, or the sum of Rs. [illegible]0, with permission to retire on the terms of the Government General Order of the 1st January 1876. These retirements would be in excess of the 90 allowed to the army at large. The offer should include officers not within two years of colonel's allowances. Similarly, I am prepared to sanction the grant of bonus to uncovenanted officers in addition to their pension, as proposed by the Special Committee, with a like reservation as to those who are soon to be superannuated. With the half of the vacancies thus created, Your Excellency will

Continuation sheets of the Supplement publid at Calcutta on this date.

have no difficulty in providing employment for the civilians of the North-West Provinces suitable to their standing in the service, and especially for those belonging to the overstocked years of 1861, 1862 and 1863. But in making arrangements for this purpose, you will not in any degree lose sight of the just claims of the officers who are already in the Commissions of the Non-Regulation Provinces.

8. Secondly, with respect to covenanted civilians, I am willing to allow during the current year any servant of 20 years' service, that is, of the year 1856 and previous years, who has not completed the full term of residence, to retire on a pension bearing to 1,000*l.* per annum the proportion which his term of actual residence bears to 21 years, the full term required for full pension. I see no objection to such a relaxation of the pension rules, provided the principle of granting pensions proportioned to the work done be observed. The proposed option of capitalizing such portion of a pension as may be in excess of 500*l.* per annum might also be permitted. Beyond this, any relaxation of the pension rules in favour of covenanted civilians will not be desirable.

9. Thirdly, I do not approve any scheme of a permanent arrangement involving a guarantee that a certain salary shall always be received by civilians of a certain standing. In many cases slowness of promotion at one period of a civilian's service is compensated by rapidity of promotion at another period. I cannot therefore take cognizance of individual cases of hardship. But I am of opinion that the very peculiar circumstances of the present block in promotion, depending upon a series of events which are not likely to recur, justify the application of a temporary remedy. This may be done by granting personal allowances at the rates proposed by the Special Committee in the 39th paragraph of its report. I will sanction those rates for a period of five years, beginning from the 1st of May last, under the conditions stated in the 40th and 41st paragraphs of the Report of the Committee.

10. I desire that inquiry may be made as to whether the state of the junior ranks in the Bombay Civil Service, and also of those in the service of Lower Bengal, is such as to call for any measures similar to those which I have now sanctioned for the North-West Provinces. It seems especially worthy of consideration whether the proposed pensions to those covenanted civilians who have resided less than the full term of years might not be made applicable, and this would have the special advantage in Bengal that it might be possible to transfer to some of the vacancies thus created civilians from the service of the North-West Provinces.

11. Fourthly, it seems to be generally admitted that administrative efficiency would be secured by increasing the number of district charges in the North-West Provinces. The present would be a favourable time for the introduction of such alterations as are deemed necessary. It may also be said that salaries in the North-West are not well balanced, there being too many very highly paid and too few moderately good appointments. I desire then that Your Excellency in Council will consider whether it would not be expedient to introduce, either wholly or partially, a system of grades of senior and junior Judges and Collectors, such as have been created in the Lower Provinces, the opportunity being taken to form such additional Collectorates as may be really required, and to make a corresponding increase in the number of Joint-Magistrates. I shall be prepared to sanction any scheme having these objects in view, which may commend itself to Your Excellency in Council, provided that no increase in the aggregate expenditure will be ultimately involved by the final re-distribution. By allowing the new offices to be created, in anticipation of the savings to be made available as other offices fall vacant, some relief will be afforded to the service, while the administration will derive benefit.

12. All these measures may, it appears to me, be adopted, but it will also be necessary for Your Excellency in Council to take every suitable opportunity of drafting men from the overstocked years into the Political Department, and into available vacancies in other Departments.

13. The Special Committee have pointed out that unless preventive measures are speedily taken, the same stagnation of promotion which has occurred in the North-West Provinces will shortly be felt by the civilians

employed in some of the so-called Non-Regulation Provinces. I think the time has now come to lay down a new rule as regards some of those provinces, and, unless Your Excellency in Council is distinctly of a contrary opinion, I desire that the appointments to the Commissions of Oudh and the Central Provinces, and to the administration of the Non-Regulation Provinces attached to the Governments of Bengal and the North-West Provinces, be regulated henceforth in accordance with the principle applied by the 24th and 25th of Victoria, cap. 54, to the Regulation Provinces. With respect to the other Non-Regulation Provinces, namely, the Punjab, Assam, British Burma and Sind, some admixture of military officers seems still to be advantageous. The proportion of military appointed, however, should in no case exceed one to every three civilians, and for the present, till the proper proportion is attained, you should not appoint to these Commissions any military officers unless some special grounds exist in any case for a departure from this rule. Should there appear reason for the appointment of an uncovenanted servant to the administration of any Non-Regulation Provinces, my sanction to the nomination must previously be obtained. These instructions are not intended to interfere with persons who are now in office, and, of course, will not affect the operation of the 6th section of 33 Victoria, cap. 3, empowering the employment of Natives of India of approved merit and ability in the Civil Service of India. I have also to notice an expedient which has occasionally been resorted to in Regulation Provinces, of creating, for the purpose of promoting uncovenanted servants, offices outside the Schedules of the Act of 1861, but invested with substantially the same functions as the appointments included in the schedules. I request that arrangements of this kind may not be repeated.

14. In conclusion, I feel it necessary to state distinctly that these orders involve no kind of pledge, and that they confer upon no person any title to claim in the future as a personal right, in the event of their being modified, any benefit which would have accrued to him from their operation; but they simply indicate the present policy of the Government.

ARTHUR HOWELL,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 12TH OCTOBER 1876.

GENERAL REMARKS.—In Madras rain is reported from all districts; but in Kistna it has been very partial, and in Kurnool and Tanjore only slight showers have fallen. In Madura and Malabar prospects are fair, but elsewhere there is no improvement. A little rain has fallen in Mysore, but the situation is said to be still critical. No rain has fallen in Bombay during the week; prospects are good in Sind and Guzerat, but in the Deccan, the Southern Mahratta Country and Khandesh and Násik they are very bad, and apprehensions of scarcity are increasing. In the Central Provinces only trifling showers are reported from two districts: in some parts want of rain is being seriously felt. No rain has fallen in Berar, where it is required for all crops except cotton. In Central India rain is reported only from Sutna, but here and in Rajputana prospects are good. Rain has fallen throughout Bengal, abundantly in many places, and prospects are excellent. In the North-Western Provinces falls are reported from Benares and Allahabad: prospects are favourable. In Oudh some rain has fallen, and the crops promise well. No rain is reported from the Punjab; harvest prospects are good. Reports are favourable from Assam and Burma.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Oct. 11th)	*Nil* at Masulipatam; 2·0 in Bapatla; ·30 in Venukonda; ·20 in Guntur; ·10 in Repalli; *nil* elsewhere.	Two and a half feet water over anicut; canal and tank supplies insufficient; crops suffering seriously from want of rain; *sajja*, maize, *korra*, indigo and gingelly being harvested, outturn about half; prices slightly rising everywhere; cholera, seizures 84, deaths 19; fever and small-pox here and there; cattle generally healthy; fodder very scarce; markets generally well supplied.
Kurnool	(„ „)	...	No rain except a slight and partial fall in Markapur and Nandial; season severe; dry crops already sown withering; wet crops under canal good; prices rising; gram difficult to procure; water and pasture rare; dry fodder not procurable; cholera in two taluks, seizures 17, deaths 3; water over Sunkesala anicut *nil*.
Tanjore	(„ 12th)	*Nil* at Negapatam.	Rain elsewhere very scanty and partial; rivers low; no fresh supply to tanks; water over anicuts none; cultivation, wet and some dry crops throughout the district; standing crops not doing well in several places for want of rain; harvest, wet and few dry crops in several taluks; yield fair; pasture generally insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 32, deaths 27; fever and small-pox in some parts; cattle disease in some localities.
Madura	(„ 11th)	1·4 in Madura; about 3·0 in Melur.	Slight freshes in the rivers; tanks and wells have received some supply of water; sowing of wet and dry crops progressing in many parts, and paddy transplantation in some; state of public health and of cattle unaltered; pasture moderate.
Malabar	(„ 12th)	·25	Harvesting first crop in progress; preparation for transplanting second crop begun; grain supply sufficient; prices low; cholera in Koteyam, Kurumbranad and Ponany taluks, 14 deaths; fever slight in Walluvanad; cattle healthy; pasture good. *General Remarks.*—General prospects fair in Malabar and Madura; in others no improvement.
Bombay—	(Oct. 12th)		
Sind—	(„ 11th)		
Kurrachee	...	...	River at Kotri on 8th, 11 feet 7 inches, last year on the same date 1 foot lower; rain in Kotri taluka on 27th September; locusts in Dádú taluka, no damage; measles in Sháhbandar taluka, 2 cases; cattle disease in Kurrachee and districts; fever rife; rats doing damage in one tappa of Mirpur Batoro, also in Sháhbandar taluka.
Shikárpur	...	...	Fever throughout the district; river 3 feet 1 inch lower than last year; locusts have appeared in Saidpur taluka, but no damage reported.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*			
Hyderabad	...	...	River gradually falling; crops damaged by rats in Guni taluka, and by floods in Tando Bágo and Kandiaro; locusts in taluka Sakrand, but no damage reported; fever general; 50 fresh small-pox cases.
Upper Sind Frontier	...	...	No change; fever prevailing.
Guzerat.			
Ahmedabad	...	...	*Kharif* harvesting commenced.
Kaira	...	...	*Bajra* reaped in some places.
Surat	...	...	Two cholera cases in Bulsar, none fatal.
Broach	...	...	Public health good; *jowari* in certain villages of Ankleswar injured by worms.
Khandesh and Násik.			
Khandesh	...	...	*Kharif* crops prematurely dried up for want of moisture except in western districts bordering the Dangs; sowing of *rabi* has commenced in a few places; general condition of central and eastern districts very bad; cholera in Bhusáwal taluka, 24 cases, 3 fatal.
Násik	...	...	*Kharif* crops mostly dried up; *rabi* sowing hindered for want of rain; public health good.
Konkan.			
Tanna	...	...	Cholera to a slight extent in Bassein taluka; rice crops suffering for want of rain in some talukas.
Deccan.			
Poona	...	...	Rain very anxiously looked for; very discouraging accounts regarding *kharif* crop, which is dying for want of it; public health good.
Ahmednagar	...	...	Price of grain rising; relief measures progressing; cholera in 5 talukas, 51 cases, 24 deaths.
Sholapur	...	...	Distress in the whole zila; slight cholera in Sholapur taluka.
Satara	...	...	Rain urgently wanted; scarcity of pasture severely felt; prices of grain risen high; distress among poor people; 8 deaths from cholera.
Southern Mahratta Country.			
Belgaum	...	...	Very discouraging accounts from all talukas; people leaving the northern talukas in search of food and work; prices of grain still rising.
Dharwar	...	...	Prospects worse in all talukas; great demand for employment; poorer classes suffering much; price of grain rising, and grain dealers refusing to sell, pleading fear of grain riots.
Kanara	...	...	Rice harvest continues on coast; rain wanted above Ghát.
Kaládgi	(Oct. 10th)	...	*Kharif* almost lost; *rabi* sowing retarded for want of sufficient rain; prices of grain rising; slight cholera in Indi.
Kattywar and Gaekwar's Territory.			
Rájkot	...	...	Weather hot; crops and health good.
Wadhwán	...	...	Weather indifferent; in some places reaping of first crops commenced; cotton good.
Baroda	...	...	No change. *General Remarks.*—Crops in Sind and Guzerat favourable; fever generally prevalent throughout Sind, and small-pox in Hyderabad; cholera generally decreasing; the scarcity in the Deccan and the Southern Mahratta Country is increasing, especially in Ahmednagar, Sholapur, Dharwar and Belgaum.
Bengal—	(Oct. 12th)		
Chittagong	...	·82	
Noakholly	...	·9	General health good.
Chittagong Hill Tracts	...	Return not received.	
Hill Tipperah	...	·57	
Backergunge	...	1·52	Fever prevails in many places; cattle disease has disappeared.
Furreedpore	...	2·47	A few cases of cholera reported from Madarepore.
Dacca	...	1·15	
Tipperah	...	1·08	
Mymensingh	...	·86	
24-Pergunnahs	...	4·70	Ordinary fever prevails more or less in different parts of the district.
Jessore	...	1·54	
Nuddea	...	·76	
Moorshedabad	...	*Nil*	
Pubna	...	2·88	
Rajshahye	...	1·40	Fever very prevalent everywhere; a few cases of cholera in Nattore.
Bogra	...	·26	
Maldah	...	·92	
Dinagepore	...	6·3	Much fever prevails.
Rungpore	...	5·73	
Cooch Behar	...	2·18	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Jalpáiguri	...	3·83	
Darjeeling	...	3·95	
Midnapore	...	6·99	
Howrah	...	·47	
Hooghly	...	2·32	
Burdwan	...	3·01	
Bankoora	...	·96	
Beerbhoom	...	·05	
Sonthal Pergunnahs	...	1·19	
Bhágalpur	...	5·90 (Previous week 2·77.)	General health very good.
Monghyr	...	3·7	
Purneah	...	2·65	
Durbhunga	...	2·28	
Mozufferpore	...	4·67	
Sarun	...	1·40	Cholera has disappeared.
Chumparun	...	6·83	
Patna	...	Return not received.	Health of the district good.
Gya	...	1·71	Fever has abated in Jehanabad.
Shahabad	...	3·23	Public health good.
Hazáribágh	...	1·14	
Lohardugga.	...	·68	Cholera has now almost disappeared.
Manbhoom	...	1·29	
Singhbhoom	...	·13	The district is reported healthy.
Balasore	...	9·86	Health of the district good.
Cuttack	...	4·41	Public health good.
Pooree	...	2·76	
			General Remarks.—More or less rain has fallen in almost all the districts during the week. The early crops have been gathered with good outturn, and the general prospects of the late rice continue satisfactory. Sugarcane, mulberry and other minor crops are doing well. Preparations for the cold weather crops are being actively made.
N. W. P.—			
Benares	(Oct. 11th)	1·0 in 24 hours.	Weather still cloudy; crops fair.
Allahabad	(„ „)	Average rainfall 3·0.	*Kharif* crops and *rabi* seeds slightly injured.
Jhansi	(„ 12th)	...	No change.
Agra	(„ 11th)	*Nil*	Crop reports favourable.
Meerut	(„ „)	...	Prospects favourable.
Bareilly	(„ „)	...	No change.
Almora	(„ 10th)	...	Weather fine and clear.
Punjab—	(Oct. 11th)		
Delhi	...	*Nil*	Harvest prospects good; fever prevalent.
Hissár	...	*Nil*	*Kharif*, a half crop nearly ripe for sickle; *rabi* sowings in progress; health fair; fever in a mild form prevalent.
Umballa	...	*Nil*	Crops good; fever prevalent.
Jullundur	...	*Nil*	Crops excellent; great mortality from fever; additional medical aid supplied.
Lahore	...	*Nil*	Crops good; fever prevalent.
Mooltan	...	*Nil*	*Rabi* sowings in progress; fever prevails.
Dera Ismail Khan	...	*Nil*	Health and harvest good.
Rawálpindi	...	*Nil*	Harvest prospects good; fever prevails.
Peshawár	...	...	No report.
			General Remarks.—No rain during the week; harvest prospects generally good; health of province decidedly bad.
Oudh—			
Lucknow	(Oct. 11th)	·2	Prospects continue favourable; public health good.
Fyzabad	...	2·8	
Gonda	...	*Nil*	
Central Provinces—			
Upper Godávari	(Oct. 7th)	...	Weather clear and cool; *rabi* sowings continue; *kharif* fair; health good; prices steady.
Nagpur	...	·02	Prospects of *kharif* excellent; cholera disappearing; fever prevalent.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*			
Bilaspur	...	...	Weather clear; prospects favourable; fever prevalent; prices steady.
Raipur	...	...	Weather clear; prospects of *kharif* favourable; *rabi* sowings continue; health good; prices easy.
Bálághát	...	...	Rain wanted for rice transplanted late; *rabi* ploughing continues fever prevalent; prices fallen.
Chanda	(Oct. 8th)	...	*Kharif* crops doing well; prices fallen.
Chhindwára	...	...	*Kharif* crops good; *sawa katki* cut; *rabi* sowings continue; health good; prices steady.
Betúl	(Oct. 9th)	...	Weather clear; prospects favourable; *rabi* sowings commenced; cholera disappeared; prices stationary.
Bhandara	(„ 10th)	...	Rice crops continue favourable; slight rain would be beneficial; other crops good; *rabi* sowings in hand; cholera and small-pox abating; fever continues; prices steady.
Nágpur	(„ 11th)	...	*Jowar* and cotton suffering for want of rain; other crops good; no epidemic; prices rising.
Wardha	...	...	*Jowar* and cotton on poor soil withering; rain much needed.
Nimár	...	...	*Rabi* sowings commenced; cholera and small-pox continue; prices rising.
Hoshangabad	...	...	Prospects of *kharif* good; prices easy.
Narsinghpur	...	...	Prospects good; prices risen considerably in consequence of large export of wheat and gram to Bombay.
Jubbulpore	...	...	Heavy dews; prospects of *kharif* good; *rabi* sowings commenced; cholera, fever and cattle disease continue; exportation of gram to Bombay brisk.
Saugor	...	...	Nights and mornings cool; prospects of *kharif* favourable; *rabi* ploughings continue; cholera disappeared.
Seoni	...	...	Rice and *kodo* being reaped; *rabi* sowings continue; fever prevalent; prices stationary.
Mandla	...	·05	*Kharif* good; *rabi* sowings continue; health good; prices stationary.
Damoh	...	...	Rain wanted for rice crops; cattle disease prevalent.
			General Remarks.—Rain is now needed and anxiously looked for.
British Burma—			
Arrakan Division	...	...	No report; line interrupted.
Pegu Division.			
Rangoon	...	0·78	General condition and prospects of crops favourable; cattle disease continues in some places, but not spreading; public health good.
Thonkwa	...	...	Reports not received; communication interrupted.
Bassein	...	...	
Henzada	...	...	
Prome	...	...	
Thayetmyo	...	...	
Tenasserim Division.			
Amherst	...	·29	Public health and agricultural prospects good; no reports of death of cattle received from Amherst District.
Shwegyeen	...	*Nil*	
Tounghoo	...	·30	
Assam—			
Gauháti	(Oct. 12th)	3·04	Weather unsettled; sky overcast and rainy on the last four days of the week; prospects of tea and crops favourable; public health good.
Sylhet	(„ „)	2·61	No change to report.
Mysore and Coorg—	(Oct. 12th)		
Bangalore	...	·07	The situation is somewhat improved by the slight rain that has fallen, but is still critical; prices very high; general health good.
Coorg	...	*Nil*	
Hyderabad Assigned Districts—			
Amráoti	(Oct. 12th)	...	Cotton doing well; rain much required for other crops.
Central India—	(Oct. 11th)		
Indore	...	*Nil*	Cholera in Rewah; health and prospects elsewhere good.
Gwalior	...	No report.	
Neemuch	...	*Nil*	
Ratlam	...	*Nil*	
Sutna	...	1·06	

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—			
Abu	(Oct. 12th)	*Nil*	Weather quite clear; cold winds.
Sirohee	(„ 8th)	...	Same as last week.
Marwar	(„ 7th)	...	Existing crops good on the whole; spring sowings have commenced; weather clear and sunny; fever and colds prevalent.
Bickaneer	(„ 4th)	...	Crops good; fever prevalent in town.
Meywar	(„ 6th)	*Nil*	Same as last week.
Jhallawar	...	...	Some fever.
Harowtee	(„ 7th)	...	Same as last week.
Ajmere	(„ 12th)	...	Prospects, present and future, good; locusts reported, several flights travelling north-east.
Ulwur	(„ 11th)	...	Prospects fair.
Bhurtpore	(„ 12th)	...	Weather seasonable; cholera nearly died out.
Jeypore	(„ 12th)	*Nil*	Agricultural prospects favourable; weather seasonable; health good.
Nepal	(Oct. 4th)—	3·50	Agricultural prospects fair.

T. C. HOPE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Wednesday, the 4th October 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*

His Excellency the Commander-in-Chief, K. C. B.

Major-General the Hon'ble Sir H. W. Norman, K. C. B.

The Hon'ble Arthur Hobhouse, Q. C.

The Hon'ble E. C. Bayley, C. S. I.

The Hon'ble Sir W. Muir, K. C. S. I.

The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.

Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.

The Hon'ble John Inglis, C. S. I.

The Hon'ble T. C. Hope.

The Hon'ble F. R. Cockerell.

The Hon'ble the Mahárájá Sir Dig Bijay Singh Bahádur, K.C.S.I., of Balrámpur.

NEW MEMBER.

The Hon'ble the Mahárájá SIR DIG BIJAY SINGH BAHADUR took his seat as an Additional Member.

OUDH LAWS BILL.

The Hon'ble MR. HOBHOUSE said that he had now to present the final Report of the Select Committee on the Bill to declare what laws are in force in Oudh. He also proposed, when he had presented the Report, to move that it be taken into consideration; and indeed there were two Reports before the Council, one of which was presented in July last, and which went no further than the presentation. It would therefore be both those Reports that he should ask the Council to take into consideration. He had no right to make such a motion with respect to the last Report, if any Member of the Council desired to have the Report for a longer time in his hands; but in fact the alterations made in it were very slight, and he did not therefore think that any inconvenience would arise from the circumstance that it had only recently been put in the hands of Members of Council. There was also on the list of business a notice of motion in his name that the Bill as amended be passed, but he did not propose to make any such motion as that on the present occasion. He thought it more desirable to leave that to the next meeting of the Council, when he trusted that the more bulky measure in the hands of his hon'ble friend Mr. Inglis would also be allowed to pass, as it was desirable that the two measures, which had been kept in parallel courses, should be passed on the same day.

Before moving that the Report be taken into consideration, it would be convenient that he should recapitulate very briefly that which he had before stated to the Council at greater length, namely, the circumstances which had brought about that state of the law which justified and required a measure of this kind; and it was the more desirable to do so because he had found that the scope and objects of this Bill had been in some quarters misunderstood, and

because there were gentlemen whose opinions were entitled to great weight who thought that Bills of this kind were not very artistical productions. But after what had already passed in the Council with respect to the Panjáb Laws, the Oudh Laws, and the Central Provinces Laws, he thought he might condense what he had to say now into a very few sentences.

Upon the annexation of Oudh the Government of India acted in their usual way by introducing laws into the new Provinces by the sole action of the Executive power. What they did was to enjoin the adaptation of Panjáb law, not absolutely, but under certain modifications not specified or specified in no more definite way than by reference to the peculiar necessities and customs of Oudh.

This operation was effected by a letter written from the Government of India in the Foreign Department to the Chief Commissioner of Oudh on the 4th of February 1856.

When he introduced this Bill he quoted from that letter at very considerable length, and he might now read only a short extract from it. Speaking of the Panjáb Civil Code the Government said:—

"But it will not escape your observation that in the preparation of the rules under notice, much attention has been given to the *Lex loci*, and that specially in matters relating to inheritance, marriage, divorce and adultery, adoption, wills, legacies and partitions, as well as in all commercial transactions, a due regard to local usage has been enjoined. It cannot of course be supposed that the *Lex loci* or local custom in Provinces differing so widely as the Panjáb and Oudh is in all, or even in many, respects identical; and it follows that those provisions of the rules which rest on the *Lex loci* in the Panjáb, cannot with any propriety, or without risk of injurious failure, be extended to the Province of Oudh.

"While, then, the Governor General in Council directs your attention to his collection of principles of law as calculated to afford material assistance in the absence of any better or more appropriate treatise, he refrains from requiring the strict observance of them until it can be ascertained how far they are applicable to the peculiarities of the Province and the customs of its people."

Well then there was a mode suggested for ascertaining those peculiarities and customs, but either enquiry was never begun, or if begun, it was broken off in consequence of the troubles which soon afterwards ensued. In point of fact there had been no such enquiry, and the law of Oudh had rested from that time to this upon the basis of the Foreign Office letter.

Of course it would be observed that these incomplete operations caused great uncertainty in the law of Oudh. The Panjáb law itself was only an adaptation of Bengal law to the wants of the Panjáb. In the first instance the adaptation was as vague and indefinite as the adaptation of the Panjáb law to Oudh, and it was gradually defined more and more by orders of Government and by judicial decisions. The Oudh law, therefore, had all the uncertainty which attached to the Panjáb law, *plus* the uncertainty which was created by the necessity of adapting Panjáb law to the peculiar customs of Oudh. It was, in fact, the spirit of the Bengal Regulations; and it was doubly distilled, first in its progress from Bengal to the Panjáb, and secondly in its progress from the Panjáb to Oudh; and it was doubly rectified, first by Panjáb custom, and secondly by Oudh custom.

Now the difficulties raised by that state of things had been rather increased than diminished by the action of the Legislature, or rather he should say, by the interpretation which had been put upon the action of the Legislature. Doubts came to be felt about the power of the Executive Government to enact law by its own sole authority, and those doubts found expression in an Act of Parliament—our Councils Act of 1861. That Act recited the doubts that had been felt, and in order to allay them provided that no law should be invalid by reason that the formalities required by the previous Councils Acts were not observed. That enactment had been construed in such a way that it was held to have stereotyped and solidified into law numerous expressions of the Executive Government made in a very casual way—in fact, every kind of expression whenever and however made to which a legislative character could be attributed.

That was the state of things upon which this Bill was brought to bear. There was a mass of Regulations, all applicable so far as the spirit of them went to the Province of Oudh, but of each of which no man could say how far it was to be applicable, and how far it was not. And there was a mass of Executive orders, of which no man could say beforehand which of them bore a legislative character, and which of them would be held not to bear a legislative character; and there were a number of judicial decisions which had done very good service in defining that uncertain region of the law, but which were liable to be overturned or modified by fresh judicial decisions.

Those were the difficulties that the Oudh Administration had to contend with, and, as regarded the quality of the difficulties, he thought it was impossible to exaggerate it; the quantity had been gradually reduced from time to time by legislation, and was now very largely reduced. Such measures for instance as the Penal Code and the Civil Procedure Code had occupied large tracts of legal territory, and to that extent had displaced the vague law which rested upon the Foreign Office letter of 1856, and substituted for it the more definite expressions of their own. If indeed that were not so, if that area of uncertain matter had not been very largely narrowed by the enactments mentioned, the time would not be ripe for such a measure as this. But it was because the area of uncertain matter had been so very much narrowed that we were now able to deal with the subject and declare the whole basis of the law. There was still indeed a considerable margin of that uncertain matter the nature of which he had described, and it was a marvel to him that so small an amount of practical embarrassment had been felt in consequence of it. Those only knew the full extent of the difficulty who had to administer the affairs of Oudh, and he thought it was a matter reflecting the highest credit upon the Local Administration there, Executive and Judicial, that they had kept those difficulties to so great an extent to themselves, and that other people, on the whole, knew so little about them.

He had explained to the Council, when he presented the first Report of the Committee in last July, what the principles of this Bill were; that its main object was to get rid of that mass of floating and uncertain matter which consisted partly of the Bengal Regulations which had been made applicable to Oudh in bulk, and partly of those Executive orders which had no definite character affixed to them, and of which it might be argued one way or another that they were either purely Executive or had a legislative character.

The way in which it was done was to take some of the Regulations and some of the orders and embody them in the Bill, and then by a general sweeping clause to repeal all those which were not embodied in the Bill. Now it was curious that among the landholders of Oudh there should have been a great misapprehension as to the scope and objects of this Bill. He found that in a memorial presented by them to the Chief Commissioner of Oudh, they expressed alarm at the great quantity of new law that was being extended to Oudh; in fact, they referred to a speech of his (MR. HOBHOUSE'S) which was made when the Bill was introduced in 1873, in which he said that he had ascertained that there were no less than 247 Regulations and Acts applying to Oudh; principally Regulations the spirit of which had been extended to Oudh in bulk by the Foreign Office letter. He then explained, and on a reperusal of the Report he found that his language was as clear as he could make it, the mode in which the Bill proposed to deal with the matter, and which he had just mentioned to the Council. Well upon that, the British Indian Association of Oudh expressed themselves as follows:—

"In regard to the extension to Oudh of the laws in general in force within British India as stated in section 3 of the Bill, and of which the number stated by the Hon'ble Mr. Hobhouse is 247, not only the taluqdárs but every other class of the native community in Oudh having any sort of right, connexion or interest in the soil, have been filled with dismay towards the safety of their rights and pledges, and feel apprehensive that they have been suddenly crushed under the burden of 247 laws, to pass through which would be a difficult task, should they attempt to refer to any law for the protection of their rights.

"It is not improper also to observe that it would be a hardship to the people of Oudh to be subjected to the laws which were in force in other Provinces at the time when the Province of

Oudh was not under the administration of the British Government, and in regard to which the people of Oudh have had no opportunity by the kindness of Government to offer their views and remarks prior to their enactment.

"It would be right to admit that the people of other Provinces, to suit whose rights the laws were framed, and from time to time modified according to the expediency of the occasion, either on the motion of Government, or on the representation of the public, have had ample opportunity to be thoroughly acquainted with the provisions of every law, their modifications and alterations, and to refresh their memories by their practice and experience; and that if all these various laws, which the honourable Members of the Legislative Council, after a laborious search of some years, have been able to collate with considerable difficulty, were enforced on the people of Oudh so far as they might be applicable to them, it would occupy them at least some years to understand and commit them to memory, and so long as they are not acquainted with their provisions and consequences, the people would be justified in feeling alarmed on being subjected to them."

No doubt it would take a long time to sit down and commit to memory the 247 Acts and Regulations, none of which under this Bill were newly applied to Oudh, but which antecedently to this Bill had been applied to Oudh ever since its annexation; and he for one should be very sorry if he were told that he must do it within the term of his natural life. But there stood the fact that the Regulations in question were actually applied to Oudh at this moment, and had been working there ever since 1856, and the various Acts had been working there from the time of their enactment, and that there was besides a mass of orders of which any one might be brought forward at any moment, and it was in the breast of a District Judge or Judicial Commissioner to say whether it was law in Oudh or not. And there stood the other fact that we had selected a few of those Regulations—just eleven in number—and that we had selected a few Executive orders, that we had introduced into them such modifications as had been found by experience or by actual decisions to be suitable in Oudh, that we declared those to be law in Oudh, and that all the other mass of Regulations and orders which might now be brought forward and sprung upon the Oudh people as law, we repealed. It was as curious an inversion of meaning as he had ever come across. A Bill which was intended to relieve the Oudh people from a cloud of law which was hanging over them, had been thought to be a Bill which suddenly saddled them with 247 Acts and Regulations not now applying to Oudh. Now he hoped and believed that the matter had been fully explained to them, and that the dismay which those gentlemen had felt—and very naturally felt according to their interpretation of the Bill—had been entirely dissipated, and that they would be satisfied that this measure would clear away a great incubus of possible law from them, instead of saddling them with a body of new law.

He had lately seen another criticism written by a gentleman, whose name he did not know, but who professed at all events to have paid great attention to those matters, and who told us that Bill No. II, which was presented to the Council last July, was the merest skeleton of Bill No. I, because some chapters had been knocked out from Bill No. I. Now he (Mr. Hobhouse) had explained to the Council what was eliminated from Bill No. I, and why. It was quite true that from Part III of Bill No. I there were some omissions. Some chapters, as for instance that relating to the Court of Wards, were omitted as a mere matter of arrangement, because they had been transferred to the Revenue Bill. Others, such as that relating to Minority, were omitted, because since the introduction of Bill No. I, we had passed a general law on the subject. Others, such as those regarding Insolvency and Treasure Trove, were omitted, because since the introduction of Bill No. I, laws had been introduced into this Council on the subject, and were now pending before it. And another, namely that dealing with Cantonments, had been omitted merely because it was found inexpedient to alter the terms of the existing Regulation which applied to Oudh until the Military authorities had had more time to consider, with reference to the other Cantonments of the country, how they would desire them to be altered. Therefore, to say that the alteration in that part of the Bill, though the omissions made it shorter, reduced it to a skeleton of itself, was to evince an entire misapprehension of the scope and purpose of the measure. He had always told the Council, and he said again, that the pith and marrow of the Bill rested in the first two

Parts and in the schedules appropriate to those Parts. If he were to strike out every other section in the Bill, making appropriate alterations in the schedules, the Bill would still remain, in substance and effect, nearly the same as it was when it was introduced. In fact there had not been a great deal of discussion on this Bill; and so far as itself was concerned, the Council might have passed it a few months after its introduction. The reason why it was delayed so long before the Council was that it was coupled with another measure—the Revenue Bill; on that Bill discussions had arisen that had occupied a considerable time; it was desirable that the whole mass of Oudh laws should be declared to be law at one and the same time; and therefore this Bill had been awaiting the issue of discussions on the Revenue Bill.

With respect to the character of Bills of this kind, he rather agreed with those critics who said that they were not very artistical productions. But his answer was that they were exceedingly useful. We had to deal with a very complicated and difficult state of things, and what we wanted first was to clear the ground. When we had cleared the ground, we might get a good basis for some scientific legislation in the future. He considered the Panjáb Laws Act a very bold and original measure. It was designed by his predecessor, Mr. Fitzjames Stephen, in order to meet a very exceptional state of circumstances, and he (Mr. Hobhouse) had only been too happy to copy the model of that Act in dealing with the similar case of Oudh.

He would now just mention to the Council one or two of the principal alterations effected by the Committee since the month of July last. There were none that he could call very important, and the Council would probably be of that opinion when they heard those which he would mention as the most important. He would only refer to three.

In section 20 of Bill No. III, which corresponded with section 21 of Bill No. II, it was provided that it should be the Chief Commissioner, instead of the Judicial Commissioner, who was to have a voice in consenting to the sale of ancestral property in land. That was a subject on which he had to speak to the Council at some length in connection with the Civil Procedure Code the other day, and he then explained to them that in Oudh there was a discretionary power given to the Executive authorities to put a veto upon the sale of land. Now the Judicial Commissioner occupied a slightly ambiguous position. He had considerable executive power over the Courts, but was mainly a judicial officer. He (Mr. Hobhouse) did not consider that the discretion in question ought to be a judicial discretion. It was to be used by the Executive on considerations applicable to the political and social condition of the country, and it was therefore thought better, in concurrence with the advice of all the authorities in Oudh who had expressed an opinion on the subject, to commit it to an officer who was wholly disconnected with judicial duties.

In section 26, Bill No. III, it was provided that Revenue Agents in Oudh might practise in rent suits. That was a matter which was brought before the Council in the early part of this year with respect to the Revenue Agents of Bengal; and on the advice of the Lieutenant-Governor, the Council passed a short Act for the purpose of enabling Revenue Agents there to practise in rent suits. The same reasons applied in Oudh, the only difference being that in Bengal the law had been so changed as to prevent Revenue Agents from practising, and in point of fact they were not in a position to practise when the Act was passed; but in Oudh they were practising, only it was doubtful whether by strict law they were enabled to do so. The Judicial Commissioner was of opinion that it was for the benefit of clients that the Revenue Agents should practise in those rent suits, and the Committee proposed to make that point quite clear by authorizing those Agents to appear, plead and act in such suits.

In section 28 of Bill No. III was a provision which would be of more importance if it was not the intention to make it a part of the general law. It was to the effect that the Judicial Commissioner might, within a certain limited time, call up any decree or order made by any Court subordinate to him, and revise, alter or reverse that decree or order. That was the mode in which

the same subject was treated in the draft of the Civil Procedure Code which was now pending before the Council. And the reason was this, that where that power did not exist there might be conflicting laws in two different districts—adjoining districts perhaps—of the same Province, which could not be touched by any judicial process because there happened to be no appeal to the higher Court. Suppose for instance that a case occurred in which the District Judge or Commissioner had the final decision in his own hands, and that in Oudh two different Commissioners decided the same case two different ways. The Judicial Commissioner had no power whatever to set the matter right. Now the High Courts, wherever their jurisdiction extended, had powers for that purpose conferred upon them by their Charter, and it seemed very desirable that in all Provinces which had an independent judicial administration of their own, the same power should exist. Of course the mischief was one to which we were exposed in different Provinces of India where there was no common appellate superior excepting the Privy Council, and where the Legislature occasionally had to step in to make the law clear; but that was no reason why the same mischief should exist between different districts in the same Province which had a common appellate superior at hand ready to take notice of such things. Therefore it was proposed to give that power to the Judicial Commissioner of Oudh. The section was one which would become quite unnecessary if the Council passed the Civil Procedure Code in the shape now proposed; but the Committee were told that the mischief which he had been describing was in actual operation at this moment, and therefore it was desirable to lose no time in giving the Judicial Commissioner the power which they thought that every superior Appellate Court ought to have.

He did not know that there was any other matter which he need mention to the Council in connection with the Bill; but as this was perhaps the last time that he would have any observations to make on this subject, he wished to say that the measure had been prepared from time to time with the assistance of the authorities in Oudh, who had bestowed the greatest pains and attention upon it. The late Chief Commissioner, Sir George Couper, the present Chief Commissioner, Mr. Inglis, and the Judicial Commissioner, Mr. Currie, had all laboured very hard on it; and indeed he might say that without their assistance it would have been quite impossible to have brought the Bill to the stage at which it had now arrived. He would now move that the Reports of the Committee be taken into consideration.

The Motion was put and agreed to.

STAGE CARRIAGES BILL.

The Hon'ble MR BAYLEY moved that the Report of the Select Committee on the Bill to amend the Stage Carriages Act be taken into consideration. He had little to add to what he had said on a former occasion. The Select Committee had only slightly modified the drafting of the Bill. The original Act had worked well. The present Bill merely extended the operation of the law both in regard to the area and to the classes of animals to which it applied, and he therefore saw no objection to passing the Bill at the present meeting of the Council.

The Motion was put and agreed to.

The Hon'ble MR. BAYLEY then moved that the Bill as amended be passed.

The Motion was put and agreed to.

The Council adjourned to Monday, the 9th October 1876.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations under the provisions of the Act of Parliament 24 & 25 Vic., Cap. 67.

The Council met at Government House on Monday, the 9th October 1876.

PRESENT:

His Excellency the Viceroy and Governor General of India, G. M. S. I., *presiding.*
Major-General the Hon'ble Sir H. W. Norman, K. C. B.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir W. Muir, K. C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
Colonel the Hon'ble Sir Andrew Clarke, R. E., K. C. M. G., C. B.
The Hon'ble John Inglis, C. S. I.
The Hon'ble T. C. Hope.
The Hon'ble F. R. Cockerell.
The Hon'ble the Mahárájá Sir Dig-Bijay Singh, Bahádur, K. C. S. I., of Balrámpur.

OUDH LAWS BILL.

The Hon'ble MR. HOBHOUSE moved that the Bill to declare what laws are in force in Oudh, as amended, be passed. He said that all that he had to remark on this subject he had said upon the last occasion when the Report was taken into consideration. Nothing had since occurred to make him think that any further observations were necessary, and he would therefore not trouble the Council with any further remarks unless any were called for by the course of the discussion. Seeing however how closely this Bill and the Oudh Land-Revenue Bill were connected together, he would ask His Excellency the President to suspend putting his motion until his hon'ble friend Mr. Inglis had had an opportunity of moving those motions that stood in his name, so that the two Bills might be before the Council at the same moment.

OUDH LAND-REVENUE BILL.

The Hon'ble MR. INGLIS presented the final Report of the Select Committee on the Bill to consolidate and define the law relating to Land-Revenue in Oudh, and moved that it be taken into consideration. He said: "A report by the Select Committee on this Bill was presented to the Council a short time ago by the Hon'ble Sir Henry Davies, who then explained fully all the changes that had been made in it since its introduction in 1872: it is consequently unnecessary for me to take up the time of the Council by going over the same ground again. I propose therefore to notice to-day those changes only which have been made in the Bill since the presentation of the Report in July last. A good many alterations have been made in it since then; some to render clear the meaning of certain sections, or to remove doubts that have been felt as to the construction to be put on others; and some to improve the arrangement of the Bill generally. Besides these there are only three changes made by the Committee which require particular notice.

"The first is the alteration made in the arrangement of sections 52 to 55, and the insertion of section 54. There is reason to believe that all the grants that have been made in lieu of rights previously possessed by the grantees have not been confirmed as required by section 52. In order to meet these cases

the Committee have inserted section 54, which provides that if a Court, to which an application has been made under section 53, finds that the grant, which the grantor seeks to resume, has been made in consideration of the loss or surrender of a right previously vested in the grantee, but that it has not been confirmed or sanctioned as mentioned in section 52, the Court shall refer the case to the Chief Commissioner, who shall make such order in it as he thinks fit.

"The next section to which I have to ask the attention of the Council is section 158. To this section the Committee have added a clause, which provides, first, that if the Deputy Commissioner finds it necessary to annul the sub-settlement of any mahál in order to recover an arrear of rent due on it, he shall refer the case for the orders of the Chief Commissioner, and secondly, that on the expiration of the period for which any subsettlement may have been annulled, a new subsettlement shall be made under section 40 of the Bill. I am not certain that this last clause was necessary, but as doubts were entertained on the subject, and as the taluqdárs were apprehensive as to what the effect of the annulment of a subsettlement might be the Committee considered it as well to provide distinctly that, on the expiration of the term for which any subsettlement had been annulled, a new subsettlement shall be made under section 40, that is in accordance with the provisions of Act XXVI of 1866, the Oudh Subsettlement Act.

"The Committee have also inserted a clause in section 220 empowering the Chief Commissioner to determine the amount which may be retained by the Deputy Commissioner to defray the expenses of the recovery of arrears of rent under this section 158; and also empowering him to determine the extent to which an arrear of rent may be so recovered. It is not intended that applications for the recovery of an arrear of rent due for more than the year in which the application is made shall ordinarily be entertained under this section, but cases may occur when it may be found advisable to extend the period somewhat; such cases will be provided for by the rules issued under section 220.

"And this brings me to the only really important alteration that has been made in the Bill since the presentation of the Report in July last, namely, to chapter XII of the Bill now before the Council. The Council will remember that Sir Henry Davies said, when he presented the Report two months ago, that section 208 of the Bill then before the Council had been retained in it as originally drawn, but that some of its clauses were still under consideration. The clauses to which he referred were those which gave power to the Chief Commissioner to frame rules relating to the appointment, punishment and remuneration of the patwárís of all mahál, whether they were included in taluqás or not. The taluqdárs have from the first protested against these clauses, and have presented several memorials against them. They urge, among other objections, that the power of appointing their own patwárís was conferred on them in 1858, and that if this power is now transferred to the Chief Commissioner, they will be deprived of a privilege which they value highly, and which they have exercised ever since the annexation of Oudh. Their objections are very clearly and temperately stated in the last memorial submitted by them, which was forwarded to the Government of India by the Chief Commissioner in April last. This memorial is among the printed papers which have been circulated to the Members of the Council.

"The question has been very carefully considered lately, and it has been decided that it will be better to strike out of section 220—the section which gives the Chief Commissioner power to frame rules about various matters—all the clauses relating to patwárís, and to provide for their appointment, punishment and remuneration in the Bill itself. This has accordingly been done by sections 203 to 215, which now form chapter XII of the Bill before the Council. Section 203 gives the Chief Commissioner power to require the appointment of a patwárí for any village or local area. Section 204 imposes on all landholders the responsibility of nominating duly qualified persons to fill the office of patwárí, and section 205 empowers the Chief Commissioner to make rules for regulating the qualifications, enrolment and duties of patwárís. The next seven

sections Nos. 206 to 212 contain provisions relating to the appointment, punishment, supervision and remuneration of patwárís generally.

"Then comes section 213, which declares that the provisions of sections 206—212 shall not by force of the Act only apply to taluqás, but that they may be made applicable if the Chief Commissioner finds it necessary to do so; then section 214 gives the Deputy Commissioner power to order the patwárís' papers required by the rules made under the Act to be prepared for any one year at the expense of any taluqdár who may fail to have them submitted at the prescribed time; and lastly section 215 provides that, on the request of any taluqdár, or if any taluqdár persistently and repeatedly fails to nominate persons to fill the office of patwárí, or to ensure the punctual and accurate performance by his nominees of the duties prescribed for them under this chapter, the Chief Commissioner may direct that all or any of the provisions contained in sections 206 to 212 shall be applied to the taluqá of the taluqdár making such request or default, or to any local area therein, for such termas he thinks fit: provided that, in the case of the taluqdár making such request, the term shall not exceed his life, and that, in the case of the taluqdár making such default, the term shall not exceed his life or fifteen years, whichever period first expires.

"Thus the privilege which the taluqdárs now possess of appointing their own patwárís is continued to them, but power is given to the Chief Commissioner to step in and take the necessary measures to ensure the appointment of efficient men, and the submission of correct returns and statements for their estates, whenever this may be rendered necessary by the neglect or contumacy of any taluqdár.

"I think that these sections do all that is wanted; and I feel certain that the taluqdárs will show that they deserve the confidence that has been placed in them; that they will appoint efficient men to be the patwárís of their estates; and that they will take the necessary measures to ensure that the returns and statements required from them are correctly prepared and punctually submitted.

Suggestions have lately been made that we should at once introduce into Oudh all the statements and returns that are now required from the patwárís of the North-Western Provinces. I have no hesitation in saying that we cannot do this at present; they enjoy in the North-Western Provinces in the matter of patwárís and the returns required from them many advantages we have not in Oudh. In the North-Western Provinces the patwárís have been carefully and thoroughly trained and instructed in their duties by the Settlement officers under whom they have been employed during the progress of the revision of the assessments of the land-revenue now going on there,—the statements which the patwárís are there required to keep up have been in the first instance correctly prepared under the supervision of the Settlement officers, and the duty of the patwárís is, for the most part, merely to keep these returns up to date, by making in them the necessary corrections from time to time. In Oudh the case is altogether different: there the settlements have been completed some years ago—the patwárís are utterly ignorant and uninstructed: and most of the papers kept up in the North-Western Provinces will, if called for from Oudh, have to be prepared *de novo*. For these reasons I am certain that we must be contented, for the present at all events, with demanding from our patwárís the statements and accounts prescribed by the circulars issued by the Chief Commissioner in 1869 and 1872. These are amply sufficient for all practical purposes; if we try to get more we shall only harass and worry the people without the slightest chance of attaining our object; hereafter, when we have got these papers correctly prepared, when our patwárís have been thoroughly instructed in their duties, we may perhaps, if it is then thought necessary, take a step further in imitation of the North-Western Provinces.

"I do not think that any other alterations have been made by the Select Committee since July last which need be noticed. The Bill has now been before the Council for about four years; during that time it has been most thoroughly and carefully discussed by all parties interested in it; by the officers of Government as well as by the taluqdárs and other landholders of Oudh. The differences which

existed as to some of its provisions, and which have been the cause of the delay in passing it, have been adjusted, and it is now the wish of every one connected with Oudh that it may become law as soon as possible. I hope therefore that the Council will consent to the motion I shall presently make, and by passing this Bill to-day give to Oudh the benefit of a short, clearly expressed, well arranged revenue law, in place of the confusion which now exists on that subject. The revenue law in force in Oudh at present is the revenue law of the North-Western Provinces, as it stood in 1858, subject to such alterations as may have been made in it by orders subsequently passed by the Government of India, and the circulars issued from time to time by various Chief Commissioners. The revenue law thus partially extended to Oudh is contained in more than 50 old Regulations and Acts. The earlier of these Regulations were passed in 1793, originally for Bengal, and were afterwards extended at different times, either wholly or in part, with many modifications, to the ceded and conquered provinces. The difficulty of tracing the law backwards and forwards through all these old Regulations is in itself very great; but this difficulty has been materially enhanced in Oudh by the effect of the orders of Government and the circulars of the Chief Commissioners; and also by the fact that the taluqdárí settlement granted to Oudh by Lord Canning has introduced into that Province many tenures unknown in Bengal when the earlier Regulations were passed. The result is that it is almost, in fact I may say quite, impossible to ascertain with any degree of certainty what the law actually is on many important questions connected with the revenue administration of the Province. In the place of all these old Regulations and Acts, all these orders and circulars, all this uncertainty, I hope we shall now have a short, clearly expressed Act, in which all doubtful points, so far as they have been brought to the notice of the Select Committee, are cleared up and settled, and the boon to the people and the officers of the Government will be very great. Of course I do not mean to say that the Bill which I have now the honour to present to the Council is altogether perfect, or that it may not be found necessary, after it has been in operation a few years, to propose some alterations or amendments in it; for it is no easy task to consolidate into one short Act the provisions of so many old Regulations and Acts, overridden as they are on so many points by an unlimited number of orders and circulars; especially when they relate to so large a subject as the law applicable to the assessment and collection of the land revenue, the preparation and maintenance of a correct record of rights in land, the partition of estates, and other matters coming within the scope of this Bill; but the Select Committee have taken very great trouble with it, and have done their best. They have moreover received much assistance from Mr. Currie, the Judicial Commissioner of Oudh, and from the Revenue Officers of that Province, who have all been constantly consulted while the Bill has been in progress, and whose opinions have received the most careful attention and consideration. The Select Committee have also to acknowledge the assistance they have received from the taluqdárs of Oudh, who have from the first taken a very active and intelligent interest in the Bill. Thus, as I just now said, the provisions of this Bill have been most thoroughly and carefully discussed during the last four years by all parties interested in it, and I can, without hesitation, commend it to the approval of the Council.

In conclusion, my Lord, I wish to take advantage of this opportunity to express, as Officiating Chief Commissioner of Oudh, my sense of the fairness and liberality that have been shown by the taluqdárs as a body in the discussion and settlement of the many important questions affecting their rights and interests that have been raised while this Bill has been before the Select Committee. I refer especially to my friend the Mahárájá of Balrámpur who is now a Member of this Council; to Rájá Amír Hussain Khán, the Vice-President of the Taluqdárs' Association; and also to the other taluqdárs who have come up to Simla to be present at the final discussion on it. I have now, my Lord, to move that the final Report of the Select Committee on the Bill be taken into consideration."

The Hon'ble THE MAHARAJA OF BALRAMPUR, speaking in Hindústání, said that the Oudh Land-Revenue Bill and the Oudh Laws Bill had been under consideration for the last four years. During this interval all those taluqdárs and others whom the provisions of these Bills concerned were given the opportunity to express their opinions. Consequently every section of these Bills was properly discussed and thoroughly considered, and the several points were properly determined by the Select Committee. In his opinion the legislation of these Bills was in reality an important one, for by their introduction many doubts had been removed. It was therefore his desire that the Bills might be passed by the Council.

The Motion was put and agreed to.

The Hon'ble MR. INGLIS also moved that the Bill as amended be passed.

His Excellency THE PRESIDENT said:—

"Before I put the question which has been moved by the Hon'ble Mr. Inglis, I wish to say a very few words in general reference to the subject of this Bill. It is not in my power to add any thing, nor is it necessary that I should attempt to add any thing, in the way of explanation, to the much that has been already written and spoken, and more especially to what we have heard to-day from the Hon'ble Member who moved that the Bill do now pass, respecting the details of this important measure, the circumstances which have rendered it necessary, or the numerous objects it is intended to effect. But the probable result of the motion, with which I shall conclude these remarks, is one upon which I desire to offer the sincere congratulations and grateful acknowledgments of the Government of India—in the first place, to those able and experienced administrators, Sir George Couper and Mr. Inglis, as also to the Judicial Commissioner in Oudh, Mr. Currie, who, by their valuable advice and energetic assistance, have enabled the Committee to bring this Bill to what we hope and believe to be a satisfactory completion; and, in the next place, I wish to offer similar, and no less cordial, acknowledgments to the Mahárájá of Balrámpur, and to those influential Native Noblemen and Gentlemen of Oudh, whose intelligent co-operation and unprejudiced criticism have so greatly aided the Government of India in its endeavour to reconcile the reasonable interests of the taluqdárs with that degree of security which the State, in its supreme capacity, as the impartial guardian of all classes and interests, is bound to provide, not only for the collection of its own revenue, but also for the rights of subordinate holders, and the adequate protection of the actual cultivator of the soil.

"It is with special satisfaction that I notice that our deliberations to-day have taken place in the presence of some of those gentlemen, who so worthily represent the intelligence and loyalty of the taluqdárs of Oudh; because I am thereby afforded the opportunity of publicly vindicating, in their hearing, the character of this Government from a very serious accusation—and, I must say, I think a very odious accusation—which has been publicly preferred against it by a writer of considerable eminence and authority. In a recent work by him upon the Primitive Forms of Property, M. Emile de Laveleye, the distinguished Belgian Publicist, has recorded and criticised the course of Indian legislation in reference to land-tenures in Oudh.

"Now, no doubt that subject is a very complicated and difficult one; but, I fear, it cannot be said that M. de Laveleye has treated it with his usual care and candour; indeed, his statements on this subject appear to me to have been made under a total misconception, not only of the principles, but also of the plainest facts, of our Indian land legislation. Those statements, however, have so special a reference to the questions with which this Bill is concerned, that, before I refer to them more particularly in detail, it may, perhaps, be convenient to revert for a moment to the origin and object of the measure now before us.

"The primary object of this Bill is, as we have heard from my hon'ble friend Mr. Inglis, to clarify the laws relating to land-revenue in Oudh, which have been obscured and confused by section 25 of the Indian Councils Act. That section declares to be law a great number of merely executive orders and regulations which were never intended to be law at all. Mr. Hobhouse gave

us the other day the number of enactments which have been more or less applied in Oudh, subject to indefinite qualifications, by the executive order of February 1856; and, if I rightly recollect, it was no less than two hundred and forty-seven. I gathered from his lucid analysis of the state of the law in Oudh, that it consisted, firstly, of the spirit of the Bengal Regulations modified by custom, secondly, of a few Acts of Council having special application to Oudh, and thirdly, of this mass of executive orders to which I have referred; and of which, I believe, it was said by a very eminent former Member of this Council (Sir Henry Maine), that he could rarely read one of them without being in doubt whether it was intended to convey a sarcasm, or to lay down a rule.

"Well, the present system of land-revenue in Oudh which this Bill, when passed, will materially modify and, we trust, greatly improve, was based on the Panjáb system, as that system existed in what I suppose I may call the pre-scientific era; that is to say, before it had been codified by Mr. Fitzjames Stephen and Mr. Egerton; and the Bill now before us was, I believe, when first introduced, drawn upon the lines of the Panjáb Act XXXIII of 1871.

"Since then it has, I need not say, been copiously recast in general accordance with the principles of the North-Western Provinces Act XIX of 1873. Now, it is quite unnecessary for me to follow this Bill through all its previous stages, to the final and definite form in which we hope to pass it to-day.

"The history of the Bill has been very ably sketched by Hon'ble Members, who not only on this, but on former occasions, have spoken on the subject of it; and, in listening to the exceedingly interesting account they have given us of the progress of this measure, I have often been reminded of a very curious and very extraordinary statement—(a statement almost as extraordinary as those of M. de Laveleye)—by an old Greek writer, who seriously affirms it to be a fact in natural history, that the eagle habitually lays three eggs, sits upon two, and hatches only one. Now, however untrustworthy that statement may be in regard to the natural history of eagles, I think it is, at least, more or less applicable to the natural history of the legislative incubations and productions of a Government which, like this of India, has to legislate with careful reference to the most complex, the most curious, and the most delicate, diversities and varieties of difference in the fundamental social facts of the numerous dissimilar communities whose rights and interests are committed to its charge. In fact, the Indian legislature, in reference to subjects like the present, is obliged to deal with its Bills much in the same way as the eagle has been said to deal with her eggs; that is to say, the Bills finally brought into legal existence represent only the carefully selected residuum of numerous projects and principles which, in the meantime, have been sedulously tested and silently eliminated in Committee.

"I believe that the great difficulties with which the Committee have had to deal in framing the present Bill, have arisen out of the exceeding complexity of the relations of the population of Oudh, on the one hand to the soil, on the other hand to the State. That population is composed, broadly speaking, of three dissimilar, yet closely inter-related, classes. In the first place, there are the taluqdárs; then, there are the rest of the proprietors and the village communities; and lastly, there are the under-proprietors and other subordinate holders. The taluqdárs are directly responsible to Government for the payment of the land-revenue assessed on their estates; as are also the other proprietors and village communities; while the under-proprietors and subordinate holders pay the revenue assessed on their lands to a taluqdár, or some other superior proprietor, in addition to the share of the profits to which he is entitled. The Government of India therefore, in legislating on the subject of land-revenue in Oudh, has had to consider most carefully, not only the relative rights of the taluqdárs, superior proprietors, under-proprietors, and subordinate holders, but also the grounds on which those rights repose in ancient usage and custom, as well as the conditions whereby they should be regulated and defined in accordance with modern requirements. In fact, the task which the Government has had to undertake has been to reconcile, as far as possible, the vested rights and interests of the taluqdárs with the interests of the subordinate holders,

the interests of the cultivator, the interests of the State, and the interests of the soil itself. Now, I should certainly have thought that a legislature, thus practically engaged in the conscientious endeavour to work out to a just solution one of the most perplexing—though, at the same time, one of the most interesting—problems in legislation, might have fairly and reasonably reckoned on receiving from a publicist so eminent as M. de Laveleye, should he deign to notice their labours—well, if not a sympathetic interest in the difficulty of those labours, at least a perfectly impartial recognition of their results. But I will now ask Hon'ble Members to allow me to read to them a few passages from the work by M. de Laveleye, to which I have referred; and if those passages are not already in the recollection of Hon'ble Members, I am sure they will hear them with considerable surprise.

"'In Oudh,' says M. de Laveleye, 'the British Government has considered the taluqdárs as the sole proprietors of the soil, *without any reserve whatever on behalf of the interests of the subordinate holders.*'

"And having thus concisely stated the assumed fact, he proceeds to enlarge upon it thus:

"During that period of anarchy which preceded the annexation of Oudh, the taluqdárs (who were merely the ancient heads of clans, feudal seigneurs, and collectors of imposts, *just like the zamíndárs*) usurped the position of independent proprietors; and, after the suppression of the last insurrection, the British Government *purchased their support* by recognizing them in that capacity.'

"M. de Laveleye then adds, that although the Government instituted an enquiry into the question whether the ryots possessed any rights at all in connection with the soil they cultivated, yet they (the *ryots*) were *terrified* into answering that enquiry with a negative. And then, after having drawn this double indictment against the British Government for bribery and intimidation (bribery in our dealings with the taluqdárs—intimidation in our dealings with the ryots), M. de Laveleye continues:

"'In Oudh the State' (that is, of course, the British Government) '*has stipulated no guarantee whatever for the ryot.* This is a fault, and something more. It is a crime—the crime of high treason against humanity.'

"Well, now, what can one say of assertions like this, unless it be what Horace Walpole, I believe, said of a certain lady of his acquaintance. 'She has,' he said, 'as good a set of teeth as any woman can possibly have, who has only three teeth, and each of them black.'

"Is it too much to say of such a passage as this, that it is as full, candid, and accurate, as any passage can be which contains only three statements, and each of them false? M. de Laveleye is, I believe, a member of the Cobden Club; and, if so, he is certainly one of the most distinguished members of it; and I have no doubt whatever that to his numerous continental readers this circumstance will have been an all-sufficient guarantee for the accuracy of his statements upon the subject of Indian legislation. But, what are the facts? Now, I speak here in the presence of experienced Indian legislators. There is not a single Hon'ble Member sitting at this table who will not be able to correct me immediately if I am unwarranted in asserting, that in the whole history of our land legislation for Oudh, there has been no period at which the legislature of this Empire has ignored the existence of proprietary rights in the soil of that province, other than those of the taluqdárs; that at no period has it disregarded the interests of the subordinate holders of those rights; that at no period has it omitted to take elaborate precautions for the protection of the tenant and the ryot from any abuse of powers which, though recognized by our generosity, have always been restrained by our justice.

"I appeal to the records of our land legislation for Oudh, which I now hold in my hand.

"Act XXVI of 1866 is entirely and exclusively devoted to the affirmation and definition of the claims of subordinate proprietors in Oudh. Now, this Act was passed within ten years after the annexation of the Province of Oudh;

but its very preamble attests the pre-existence of rules and regulations issued by the Government of India for—what are the words?—'*the better determination of claims by persons possessed of subordinate rights of property*' in Oudh.

"Again, I turn to Act XIX of 1868, and I find that Act to be one elaborate code of law for the maintenance of subordinate proprietary rights, and for the protection of tenants in Oudh. Section 5 of this Act defines the rights of occupancy, which include those of the ryot. Sections 22 to 26 secure to the tenants of Oudh the right of compensation for improvements. Chapter IV limits the maximum rates of rent; Chapter V strictly circumscribes the power of ejectment; and the same consistent tendency of our land legislation for Oudh is continued in this direction and carried on by the Bill which we hope to pass to-day. Section 25 of that Bill subjects to important exemptions the right to resume rent-free grants; and, again, section 135 reserves to the State comprehensive powers for the rescue and preservation of the interests of tenants whose land is sold for arrears of revenue.

"Now, I make no apology to Hon'ble Members for having inflicted upon their patience this reference to facts with which they are all thoroughly familiar; because I am sure they will feel that, on an occasion like the present, and as the Executive Head of the Government of India, I need make to the members of its legislature no excuse for endeavouring to refute the unfounded aspersions cast upon their policy by so distinguished a critic of it as M. de Laveleye. And if, indeed, some echo of my words should reach beyond this room, I trust it may tend to confirm the taluqdárs of Oudh in that considerate recognition which, I am bound to say, they have given to the many and great difficulties involved in the task undertaken by this Government, and also to the impartial and conscientious spirit in which the Government has endeavoured to perform that task, in legislating upon a subject which materially concerns the interests of other classes in Oudh besides their own.

"I have now only to put the question before me; and the question is that the Bill, as amended, be passed."

The Motion was put and agreed to.

OUDH LAWS BILL.

The Hon'ble Mr. Hobhouse's motion that the Bill to declare what laws are in force in Oudh, as amended, be passed, was then put and agreed to.

The Council adjourned *sine die*.

SIMLA;
The 9th October 1876.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 19TH OCTOBER 1876.

GENERAL REMARKS.—In Madras rain is reported from Malabar and Tanjore, a shower in Kistna, and a little rain in Madura: except in Malabar prospects are worse than last week. In Mysore there has been no rain during the week, and the condition of the crops is critical; distress is being already felt. In Bombay reports are good from Sind and Guzerat; the only rainfall has been a few showers in Dharwar and Belgaum; there is no improvement in prospects in the Deccan or the Southern Mahratta Country, and in Khandesh and Násik the crops are also in a bad condition; distress is general in the Deccan and some other districts. In the Central Provinces rain has fallen with good effect at Sambalpur, Nágpur, Seoni, Saugor and Wardha: elsewhere it is in some places required for the rice, but prospects are generally fair. In Berar the crops are in good condition, but rain is required for the *rabi* sowings; grain is being exported to the Deccan districts of Bombay. In Central India rain has fallen only at Sutna; prospects are good. Falls are reported from several parts of the Northern States of Rajputana, and prospects are favourable. In Bengal there has been general and in many places abundant rain: the promise of the winter rice crop is excellent. Good rain has fallen in Assam, and reports are favourable. In the North-Western Provinces there have been showers in all districts except Jhánsi, and hail in some: prospects are good. In Oudh good rain has fallen and the crops promise well. In the Punjab there has been a general moderate rainfall, and prospects are favourable. Reports from Burma are good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Oct. 18th)	No rain, except ·10 in Guntur.	Three and a half feet water over anicut; canal and tank supplies insufficient; crops suffering seriously from want of rain; *sajja*, maize, gingelly, *korra* and *cholum* harvested, outturn about ½; prices risen everywhere; cholera, seizures 68, deaths 17 in Vinukonda, Bapetla and Narsarowpett taluks; fever and small-pox subsiding; cattle generally healthy; fodder very scarce; water scarce in 5 taluks; markets not well supplied in some taluks.
Kurnool („ „)	*Nil*	Season unchanged; crops under canal good; withered stalks of dry crops already sown being gathered and sold for fodder; grain difficult to procure; prices rising; water and pasture scanty; dry fodder exhausted; cholera slight in Cumbum and Ramalkota, 5 seizures, 2 deaths; water over Sunkesala anicut *nil*.
Madura („ „)	...	Rainfall insufficient; agricultural operations stopped for want of rain, and seed plants' prices slightly risen in some taluks; cholera reported from Melur and Madura taluks.
Malabar* („ 19th)	1·15	Harvesting first crop and transplanting second crop in progress; rainfall insufficient; grain supply sufficient; prices low and steady; cholera in Cherakal, Koteyam, Kurumbranad and Walluvanad taluks, 8 deaths; fever slight in Walluvanad; cattle healthy; pasture good.
Tanjore („ „)	·59 at Negapatam.	Rain elsewhere very scanty and partial; rivers very low; no fresh supply to tanks; water over anicuts none; progress of cultivation in some places retarded for want of sufficient rain and freshes; standing crops not doing well in several places for want of rain; harvest, wet and few dry crops in several taluks, yield fair; pasture generally insufficient; markets well supplied; prices almost stationary; public health, cholera continues, seizures 51, deaths 49; fever and small-pox in some parts; cattle disease in some localities.
		General Remarks.—General prospects getting worse except in Malabar.
Bombay— (Oct. 19th)		
Sind—(„ 18th)		
Kurrachee ...	...	River at Kotri on 15th, 10 feet 1 inch; *kharif* harvesting; *rabi* sowings progressing; rats doing some mischief in talukas Sákro and Mirpur Batoro; fever prevalent; cattle disease in the districts.
Shikárpur ...	...	*Rabi* crops fair; cattle disease prevailing; river 2 feet 8 inches lower than last year; fever continues.
Hyderabad ..	...	River low; Nára floods have damaged some villages in Tando Bágo, no lives lost; 45 fresh cases of small-pox in Hyderabad, 1 death.
Upper Sind Frontier ...	...	Weather cold; *kharif* harvesting and *rabi* sowing progressing; fever and cough prevalent.
Guzerat.		
Ahmedabad ...	...	*Kharif* harvesting going on.
Kaira ...	...	Crops excellent; reaping commenced.
Surat ...	...	Rice being harvested.

* In the Supplement to the *Gazette of India* of the 7th October 1876, page 1013, opposite Malabar, for "291 deaths" read "29 deaths."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Khandesh and Násik.		
Khandesh ...	...	Crops in the same bad state as before; prices rising rapidly; scarcity of grass felt in the eastern and central talukas; water-supply decreasing generally; cholera continues in Bhusáwal taluka, 12 cases, 7 deaths.
Násik ...	...	*Rabi* sowing generally retarded for want of rain; health good.
Konkan.		
Tanna ...	...	Cholera to a slight extent in Bassein taluka; rice crops suffering for want of rain in some talukas.
Deccan.		
Poona ...	...	No rain either at head-quarters or in the talukas; total rainfall 14·38; prospects of *kharif* crops continuing as last reported; sowing of *rabi* retarded for want of rain; great distress prevails in the district; public health good.
Ahmednagar ...	...	No rain; total raintall 8·64; no change for the better in the state of the crops; cholera in 2 talukas, 10 deaths.
Sholapur ...	...	Distress increasing; prices rising; cholera continues in Sholapur; no rain.
Satara ...	...	Want of rain severely felt throughout the district; distress general; 49 deaths from cholera in Mán taluka.
Southern Mahratta Country.		
Belgaum ...	...	No rain at Belgaum, but slight showers on the 16th in the neighbourhood; accounts from all talukas very gloomy; *kharif* crops have entirely failed in Gokák, Athni and in part of Chikóri, and little hope of their surviving in other parts; great mortality of cattle in northern talukas; prices of grain continue to rise.
Dharwar ...	0·10	Total rainfall 20·71; crops worse than last week; distress increasing; price of grain rising.
Kanara ...	...	Rice harvest progressing on the coast; rain wanted above Ghât.
Kaládgi (Oct. 16th)	...	No rain and consequently no change for the better in agricultural prospects; orders for relief works issued; slight cholera in 4 talukas.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Crops progressing; weather hot; health good.
Wadhwán ...	...	Weather indifferent; crops the same as before; fever in Dhrángadrá, Rajáná and Wadhwán talukas.
Baroda ...	...	Crops and public health good; cold weather has set in.
		General Remarks.—No improvement in the prospects of the Deccan or the Southern Mahratta Country, where famine relief works have been started; distress general and scarcity widespread in those parts. In Sind and Guzerat there is no change from last week, prospects continuing fair.
Bengal— (Oct. 19th)		
Chittagong ...	·52	
Noakholly ...	3·03	General health continues good.
Chittagong Hill Tracts...	2·4	
Hill Tipperah ...	1·21	
Backergunge ...	1·72	Fever present in thanas Backergunge, Ganrándi, Mirsagang and Gólachipa; cholera reported from the police stations of Burrisal and Jhalokati; the cattle are healthy everywhere.
Furreedpore ...	·41	Cholera at Madareepore and adjacent villages, also in thana Sadarpur; country unhealthy from water receding.
Dacca ...	·19	
Tipperah ...	·92	
Mymensingh ...	6·69	
24-Pergunnahs ...	·38	General health good.
Jessore ...	2·22	
Nuddea ...	5·85	Fever of a somewhat severe type has broken out in parts of Meherpore and Bongong.
Moorshedabad ...	1·05	General health good.
Pubna ...	2·9	
Rajshahye ...	1·97	A good many cases of cholera in the Nattore thana jurisdiction, and a few cases in Bárágaon.
Bogra ...	1·54	
Maldah ...	2·67	
Dinagepore ...	·09	Much fever prevails.
Rungpore ...	·08	
Cooch Behar ...	4·03	
Jalpáiguri ...	·65	
Darjeeling ...	1·74	
Midnapore ...	·50	
Howrah ...	3·67	
Hooghly ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Burdwan ...	·5	Fever very prevalent.
Bankoora ...	7·73	
Beerbhoom ...	3·20	
Sonthal Pergunnahs ...	2·43	General health good.
Bhágalpur ...	·66	General health excellent.
Monghyr ...	·24	
Purneah ...	·2	
Durbhunga ...	1·15	
Mozufferpore ...	·70	
Sarun ...	7·80	
Chumparun ...	1·34	
Patna ...	1·43	Health of the district continues good.
Gya ...	5·85	
Shahabad ...	·92	
Hazáribágh ...	5·68	
Lohardugga ...	6·23	General health fair.
Manbhoom ...	Return not received.	
Singhbhoom ...	4·66	The district is reported healthy.
Balasore ...	·11	Public health good.
Cuttack ...	*Nil*	Public health fairly good.
Pooree ...	5·57	Health of the district good.
		General Remarks.—The rainfall has been general during the week, and the prospects of the winter rice crops are excellent; in parts of Midnapore and Balasore the rice has sustained some damage from the rising of the rivers. The harvesting of the early crops has been completed. The sowings of the cold weather crops are being fast pushed on.
N. W. P.—		
Benares (Oct. 18th)	...	Heavy shower of rain last night.
Allahabad („ „)	·6	*Kharif* crops, except rice, injured.
Jhansi („ 19th)	...	Weather fine; *rabi* cultivation commenced.
Agra („ 18th)	From ·4 to 1·4 in five parganas.	Severe hail-storm reported in town of Panáhat.
Meerut („ „)	...	Rain and slight hail on 13th, 14th and 16th; prospects good.
Bareilly („ „)	1·8	
Almora („ 16th)	...	Heavy storms from east and west throughout week; some damage probably occurred to late rice, wherever hail fell.
Punjab— (Oct. 18th)		
Delhi ...	2·0	Fever prevalent.
Hissár ...	1·5	*Kharif* being cut; *rabi* hopeful; fever abating.
Umballa ...	0·7	Crops good; fever prevalent.
Jullundur ...	1·6	Crops abundant; mortality from fever very great.
Lahore ...	1·0	Crops good; health unfavourable.
Mooltan ...	...	Few drops of rain; *kharif* being removed; fever abating.
Dera Ismail Khan ...	1·2	Harvest good; cholera still prevalent.
Rawálpindi ...	0·3	Agricultural prospects good; seasonal fever prevails.
Peshawár ...	0·2	Crops below average; slight fever and cholera prevalent.
		General Remarks.—Rainfall pretty general throughout the province; agricultural prospects on the whole good; state of public health continues unsatisfactory.
Oudh— (Oct. 18th)		
Lucknow ...	·7	Prospects favourable; public health good.
Sitapur ...	1·6	
Fyzabad ...	·8	
Central Provinces—		
Upper Godávari (Oct. 14th)	...	Weather cool; *kharif* crops bad for want of rain; *rabi* sowings completed; health good; prices steady.
Sambalpur ...	4·96	Prospects very good; cholera disappeared.
Bilaspur ...	...	Weather cloudy; prospects favourable; rain required for late rice crops; fever prevalent; prices steady.
Raipur ...	...	Weather clear; prospects of *kharif* favourable; *rabi* sowings continue; health good; prices easy.
Bálághát ...	...	Weather clear; heavy dews at night; inferior rice being cut; *rabi* sowings progressing; fever prevalent; prices steady.
Chanda (Oct. 15th)	...	Weather close; transplanting of rice not fully completed for want of rain; *rabi* sowings commenced; early rice being cut; health good; prices stationary.
Chhindwára ...	...	Weather clear and pleasant; prospects of *kharif* good; *rabi* sowings continue; health good; prices unchanged.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*contd.*		
Betúl (Oct. 16th)	...	Weather close and cloudy; prospects favourable; *rabi* sowings progressing; prices stationary.
Bhandara („ 17th)	...	Weather clear and pleasant; rice crops continue favourable; fever continues; small pox abating; prices easy.
Nágpur („ 18th)	·20	Weather cloudy; prospects good; *rabi* sowings continue; prices rising.
Wardha ...	·03	*Rabi* sowings continue.
Nimár ...	...	Days hot and nights chilly; cholera and small-pox continue.
Hoshangabad ...	...	Prospects fair; prices unchanged.
Narsinghpur ...	...	Prospects good; fever prevalent; prices rising owing to exports to Bombay.
Saugor ...	·26	Rain beneficial to *rabi* sowings; *kharif* prospects good; prices stationary.
Seoni ...	1·30	*Kharif* reaping continues; health good.
Mandla ...	...	Weather clear; prospects of *kharif* favourable; *rabi* sowings progressing; fever and cattle disease prevalent; prices stationary.
		General Remarks.—Slight rain proved beneficial.
British Burma.—(Oct. 19th)		
Arrakan Division.		
Akyab	2·0	Cholera in a sporadic form continues in portions of Akyab and Kyoukphyoo districts; otherwise public health good; paddy crops continue to promise well everywhere; cattle disease continues in two townships of Akyab district.
Pegu Division.		
Rangoon ...	1·81	Crops reported to be flourishing; public health good; cattle disease on the decrease.
Thonkwa ...	...	Health and crops good; rainfall slight.
Bassein ...	3·50	Slight cattle disease; health generally good; crops progressing favourably.
Henzada (Oct. 14th)...	2·56	Crops prospect good; public health excellent.
Myanoung („ 7th)...	·10	
Tharrawaddy ...	Report not received.	
Prome ...	2·19	Three cases of cholera in Pagoung township, otherwise healthy; crops promising.
Thayetmyo ...	3·51	Health good; crops progressing.
Tenasserim Division.		
Amherst ...	·77	Public health good; crops in Tounghoo partially destroyed by sun and drought; scarcity in parts of Amherst district owing to over-sale of last year's stock of grain; cattle disease continues in Moulmein and Thatone, but not excessive.
Tounghoo ...	·33	
Shwegyeen ..	1·0	
Tavoy ...	3·7 for fortnight ending 7th instant.	
Mergui ...	7·02	
Assam—		
Ganháti (Oct. 19th)	·17	Mornings foggy and cool; prospects of *sali* and tea favourable; public health good.
Barpeta ...	3·36	
Sylhet („ „)	3·67	
		Prospects everywhere favourable.
Mysore and Coorg—(Oct. 19th)		
Bangalore ...	*Nil*	Failure of expected rain most disastrous to such crops as had survived drought; distress among people and cattle already acutely felt; prices rising everywhere; markets only moderately supplied; the condition of the country is most critical; general health good.
Coorg ...	1·52	
Hyderabad Assigned Districts—		
Amráoti ...	...	Crops fair; rain required for *rabi* sowing; grain is being largely exported to Poona and elsewhere westward.
Central India—(Oct. 19th)		
Indore („ 18th)	*Nil*	
Gwalior ...	„	
Neemuch ...	„	
Ratlam ...	„	
Sutna ...	·42	*General Remarks.*—Health and prospects favourable throughout Central India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Oct. 19th)	...	Weather quite clear; cold has set in.
Sirohee („ 15th)	...	Prospects and health good; weather seasonable.
Marwar („ 14th)	...	Weather seasonable; prospects good; fever prevalent.
Bickaneer („ 11th)	0·32 on 4th.	Flight of locusts passed over Bickaneer on evening of the 9th; fever prevalent.
Meywar („ 13th)	...	Health and prospects good.
Jhallawar ...	...	Fever continues; *kharif* crops below average.
Harowtee (Oct. 14th)	...	Health good; prospects favourable.
Deoli ...	0·40	
Kota ...	*Nil*	
Tonk ...	*Nil*	
Ajmere (Oct. 19th)	0·80	Locusts reported; no damage.
Jeypore ...	2·4	Crops ripening satisfactorily; weather seasonable; health good.
Bhurtpore ...	...	Weather seasonable; prospects fair; health improved.
Ulwur (Oct. 18th)	1·09	Rain favourable for *rabi*.
Nepal (Oct 11th)	2·30	Fair weather wanted to ripen the crops in the hills.

T. C. HOPE,
Offg. Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS OF THE NORTH-WESTERN PROVINCES FOR FASL RABI AND THE YEAR 1875-76.

No. 1110-1115A. of 1876, dated Naini Tal, the 18th of August 1876.

RESOLUTION—By His Honor the Officiating Lieutenant-Governor, North-Western Provinces, on irrigation operations of the North-Western Provinces for fasl rabi and the year 1875-76.

READ the following papers :—

Resolution by His Honor the Lieutenant-Governor on irrigation operations for fasl kharif, 1875, Nos. 725-30A. of 1876.

Statements A8, B8, C8, for rabi, 1875-76.

Ditto ditto, for year 1875-76.

OBSERVATIONS.—The following table shows the areas irrigated during kharif and rabi for the last eight years :—

	Area.		
	Kharif.	Rabi.	Total.
1868-69	487,485	957,413	1,444,898
1869-70	501,625	588,048	1,089,673
1870-71	396,399	654,409	1,050,808
1871-72	333,117	519,372	852,489
1872-73	358,619	586,958	940,577
1873-74	401,576	647,736	1,049,312
1874-75	389,706	752,572	1,142,278
1875-76	429,784	758,403	1,188,187

2. The kharif area has been already reviewed in Resolution Nos. 725-30A., dated 9th May.

3. Attention was there drawn to the serious decrease in the area of sugarcane and the consequent loss of revenue. Subsequent investigation has shown that this was due to the fall in price of sugar (gur), which took place after the crop of 1874 was harvested. The figures below show the average prices in seers per rupee in the canal-irrigated districts during 1874-75 :—

Districts.	Average price in 1874 in seers per rupee.	Price in 1875.	
		Highest.	Lowest.
	S. Ch.	S. Ch.	S. Ch.
Saháranpur	11 14	17 4	12 15
Muzaffarnagar	14 6	22 0	16 8
Meerut	11 9	14 0	13 0
Bulandshahr	13 8	18 0	14 0
Bareilly	12 1	15 0	13 12
Mainpuri	12 0	13 0	11 0
Etáwah	11 5	13 0	11 8
Cawnpore	14 0	13 0	11 0

4. The decrease in the lower districts where the price remained almost stationary was proportionately much larger than in the upper districts; but the whole area of canal-irrigated sugarcane in the terminal divisions of the Ganges Canal is barely one-fifth of that irrigated from the whole canal, and the explanation of the marked decrease in area, in spite of stationary prices, is to be found in the fact of its not having become an established staple, of its being easily replaced by indigo, and of local conditions of weather and of the previous crop having affected the area sown.

5. The results of the kharif irrigation were in other respects considered good, satisfactory increase having taken place in the areas of rice, indigo, cotton, and fourth-class crops. The table comparing the areas of the principal kharif crops for several years is here repeated from the kharif resolution :—

Year.	Sugarcane.	Rice.	Indigo.	Cotton.	Fourth-class crops.
1868-69	97,555	111,019	76,687	52,992	141,256
1869-70	104,596	117,548	130,248	55,883	83,979
1870-71	112,141	98,479	118,897	35,070	28,087
1871-72	94,816	76,850	119,617	20,365	9,228
1872-73	102,043	83,607	130,982	14,793	12,504
1873-74	130,284	73,875	149,073	16,354	28,035
1874-75	141,662	58,343	156,396	4,923	21,532
1875-76	109,431	80,304	165,734	21,735	46,184

6. The rabi area of 1875-76 was 5,831 acres more than that of last year. The following table compares the areas on the principal canals :—

Canal.	Area.		Difference.	
	1874-75.	1875-76.	More.	Less.
Ganges Canal	602,637	571,842	...	30,815
Eastern Jumna Canal	101,272	108,552	7,280	...
Dún Canals	10,020	6,156	...	3,864
Rohilkhand Canals	20,282	46,739	26,457	...
Agra Canal, 1st division	9,453	7,466	...	1,987
Ditto, 2nd ditto	5,677	14,113	8,436	...

The decrease on the Ganges Canal, Dún, and Agra Canals, is distributed as follows :—

	Ganges Canal.	Dún Canals.	Agra Canal, 1st division.
Wheat	1,927	3,616	...
Barley	20,210	...	...
Pulses	9,463	...	846
Miscellaneous	3,532	...	3,106

The increments on the Eastern Jumna, Rokilkhand, and 2nd Division, Agra Canals, were as below :—

	Eastern Jumna Canal.	Rohilkhand Canal.	2nd Division, Agra Canal.
Wheat	9,114	14,190	5,145
Barley	...	5,516	1,710
Other grains	...	4,947	3,825

7. The following table compares the areas of the principal rabi crops for five years :—

Year.	Wheat.	Barley.	Other grains.	Pulses.	Opium, &c.
1871-72	365,950	99,650	19,988	28,264	5,449
1872-73	363,529	160,023	13,560	38,422	7,994
1873-74	402,755	185,581	8,219	28,008	8,440
1874-75	445,970	204,896	26,139	48,629	10,184
1875-76	471,498	191,812	31,973	35,719	12,986

The decrease in barley and pulses on the Ganges Canal has, it will be observed, affected the total irrigated area of those crops.

8. Turning to the statement showing areas by districts, it is found that the decrease in barley has been principally in the following districts and proportions :—

District.	Last year's area.	Decrease.	Percentage of decrease to area of last year.
Meerut	9,196	520	6
Bulaudshahr	11,888	2,144	18
Aligarh	23,995	1,752	7
Agra	7,889	3,491	44
Mainpuri	30,875	5,019	16
Etáwah	39,130	6,631	17
Cawnpore	55,539	144	0·2

9. The aggregate decrease in pulses in the districts marginally noted, which are irrigated by the Ganges Canal, has been 14,917 acres, which is 55 per cent. of the whole area irrigated last year.

Aligarh. Mainpuri.
Muttra. Furukhabad.
Agra. Etáwah.
Cawnpore.

10. The explanation of the decrease in these two crops appears to be chiefly in the season. In 1874-75 there was no rain from September to the end of January. In 1875-76 there was heavy rain at the end of September which had not fully ceased in October.

There was also rain in December and a general fall in March. The result was that (owing to the rain at the end of September having rendered the crops independent of the canal) no preliminary watering was needed, and there was no demand whatever until the beginning of December. Just as it began to be felt, it was again satisfied by an opportune fall of rain over the whole Duab, east of Bulandshahr.

11. Towards the end of the season the low price of grain made cultivators hesitate about taking canal water. This low price of grain appears to have been the consequence of a bumper millet crop during the previous kharif. With barley selling at 40 or 50 seers for the rupee, men whose crops have got on very well until the end of January without canal water are not likely to give it at all. The watering would cost them at least Rs. 2-4-0 an acre, and would then probably increase the yield per acre by 1½ or 2 maunds, worth only Rs. 2 at the outside.

The decrease of 3,616 acres in wheat on the Dún Canals may be attributed partly to the fact that the crop of the previous year was a bumper, and partly to the favourable rainfall of the present season. Owing to the late rains there was no preliminary watering, the whole of the cold weather was cloudy, and what rain there was fell opportunely.

12. The irrigation of the Agra Canal has increased by 6,449 acres in spite of an increase in the water-rates, which is very satisfactory.

13. The increase of 27,039 acres in Rohilkhand Canals, which is 85 per cent. of last year's area, is satisfactory, although it does not bring the area up to that of 1873-74. The increase may be attributed chiefly to the completion of the channels of the Kichha and Kailas Canals, on which large areas were irrigated for the first time, so that the increase ought to be fairly permanent. Here, too, there was a falling off of sugarcane, but a large increase in wheat.

14. The statements for the whole year show that, notwithstanding the serious decrease in sugar during the kharif, and in the cheaper grains during the rabi, there has been a net increase in the irrigation of nearly 50,000 acres.

Order.—Ordered, that copies of this Resolution be submitted to the Government of India for information.

Also to the Governments of Bengal and Panjáb, to the Government, North-Western Provinces, in the General and Public Works Departments, Provincial Branch, and to the Board of Revenue, and that it be published in the *Government Gazette*.

By order, &c.,
H. A. BROWNLOW, Lieut-Col., R.E.,
Offg. Secy. to Govt., N.-W. P., P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 26TH OCTOBER 1876.

GENERAL REMARKS.—From Madras reports have been received only for the Kistna and Tanjore districts: no rain has fallen in the former, and the crops are suffering and prices high; from the latter a little partial rain is reported. In Mysore there has been no rain, and the standing crops have been in most places entirely lost: distress is being felt throughout the province, but markets are fairly supplied. In Bombay reports continue good from Sind and Guzerat: no rain has fallen in Khandesh or Násik, and there has been no improvement in prospects; in the Deccan districts there have been a few light and partial showers, but the distress is increasing; in the Southern Mahratta Country heavier showers have fallen in Belgaum, Kaládgi, and Dharwar, and though very partial give hopes of saving some of the crops and enabling the *rabi* to be sown. In Berar rain is very much required: none has fallen. Slight showers have fallen in many districts of the Central Provinces, and prospects are good. In Central India there has been no rain, but the crops promise well. In Rajputana light showers have fallen in Kota and Tonk; reports are favourable. In Bengal there has been general but slight rain throughout the province: the prospects of the late rice crop are very good, and the *rabi* is being actively sown. In the North-Western Provinces rain has fallen in Agra, with hail, and showers in Allahabad and Meerut; prospects are favourable. In Oudh a little rain is reported from Lucknow. In the Punjab rain fell only at Hissár and Rawálpindi: prospects are excellent. No rain fell in Assam. In British Burma little rain fell during the week: it is required at Tonghoo, but prospects are generally favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Oct. 25th)	*Nil*	Canal and tank supplies insufficient; crops suffering seriously; small quantity of *cholum*, *korra* and maize harvested, outturn between ¼ and ⅓; prices high; cholera, seizures 50, deaths 17 in 3 taluks; fever and small-pox here and there; little cattle disease; but fodder and water very scarce; market not well supplied.
Tanjore („ 26th)	·01 at Negapatam.	Rain elsewhere very scanty and partial; rivers very low; no fresh supply to tanks; water over anicuts none; progress of cultivation in some places retarded for want of sufficient rain and freshes; standing crops not doing well in several places for want of rain; harvest, wet and few dry crops in several talukas; yield fair; pasture insufficient; market well supplied; prices rising; public health, cholera continues, seizures 24, deaths 21; fever and small-pox in some parts; cattle healthy.
		(Telegrams from other districts not received.)
Bombay— (Oct. 26th)		
Sind—(„ 25th)		
Kurrachee ...	...	River at Kotri on 23rd, 8 feet 10 inches, against 9 feet 3 inches on the same date last year; cotton pickings commenced in places; small-pox in Tatta and Kurrachee towns; fever generally prevalent; cattle disease in districts, many deaths.
Shikárpur ...	...	*Rabi* ploughing commenced.
Hyderabad ...	...	River lower; floods have not yet subsided in Tando Bágo taluka; small-pox increasing in Hyderabad, 80 fresh cases, 3 deaths.
Upper Sind Frontier ...	...	Drizzling rain night and morning; heavy clouds in the north-west; now fair; much land under water in Jacobabad taluka; *rabi* sowings general; fever prevails.
Guzerat.		
Ahmedabad ...	...	*Kharif* harvest going on; *rabi* cultivation commenced.
Kaira ...	...	No change in the state of the crops.
Surat ...	...	Early crops being harvested.
Broach ...	...	*Kharif* reaping progressing; fever throughout the Collectorate except Broach; *rabi* cultivation commenced.
Khandesh and Násik.		
Khandesh ...	...	No change for the better in any respect; cholera disappearing in Bhusáwal taluka.
Násik ...	...	*Kharif* crops mostly dried up; *rabi* very little sown; rain probable; public health good.
Konkan.		
Tanna ...	...	Cholera in 4 villages of Bassein taluka, 20 cases, 7 fatal; reaping of early rice crop commenced, outturn estimated below the average; prices of grain rising in Tanna.

Continuation sheets of the Supplement published at Calcutta on this date.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Deccan.		
Poona ...	0·52 in the city.	Total rainfall 14·90; no rain in the talukas; distress increasing; public health good.
Ahmednagar ...	0·09	Total rainfall 8·73; no improvement in the state of the crops; cholera has almost disappeared.
Sholapur ...	0·26	Total rainfall 8·81; distressing accounts from all talukas.
Satara ...	...	Distress increasing; slight rain in a few villages of Satara and Koregaon talukas; people in Khanápur taluka emigrating in search of food and employment; 13 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	1·19	Total rainfall 30·46; rain has fallen partially in eastern talukas, where part of *kharif* crops will be saved and *rabi* sown; slight fall in price of grain.
Dharwar ...	0·67	Total rainfall 21·38; rainfall very partial in a few villages, in a few places heavy and beneficial; late crops being sown where rain fell; grain dealers refuse to sell; prices rising; distress very great.
Kanara ...	...	Harvest in progress; from want of rain crops on high lands and above Ghâts will be very short.
Kaládgi (Oct. 23rd)	1·03	Total rainfall 10·89; more rain urgently wanted for *rabi* sowing; cholera in 2 talukas; cattle dying from want of fodder; distress amongst poorer classes; relief works progressing.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Crops thriving; fever prevalent; weather hot.
Wadhwán ...	...	No change in the state of the weather, crops and health.
Baroda ...	...	Reaping operations commenced in some parts; crops healthy.
		General Remarks. No improvement in the Deccan and the Southern Mahratta Country districts, though the showers in Belgaum, Dharwar and Kaládgi give partial hopes of saving some of the *rabi* crops. No change in Guzerat or Sind. Small-pox increasing in Hyderabad.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

Imperial Assemblage at Delhi—Railway Traffic Arrangements.

Resolution by the Government of India, Public Works Department,—Nos. 2902—19 R., dated Simla, the 24th October 1876.

Read—

Telegrams to all Governments, Administrations, and Consulting Engineers, dated the 26th September 1876.

Communication from Foreign Department, No. 2274 P., dated the 4th October 1876.

Letter from Agent, East Indian Railway Company, to Consulting Engineer to the Government of India for Guaranteed Railways at Calcutta, No. 861 G., dated the 14th October 1876.

RESOLUTION.—In order to provide satisfactorily for the exceptional passenger traffic on the Railways that is to be anticipated in connection with the forthcoming Imperial Assemblage at Delhi, the Government of India is satisfied that the cordial co-operation of the various Railway authorities is absolutely essential and will be zealously accorded.

2. Besides the additions to the ordinary trains that will be necessary for the greatly increased numbers who will travel, special trains will be required for the conveyance of His Excellency the Viceroy, the Governors of Madras and Bombay, the Lieutenant-Governors, the Commander-in-Chief, the Members of Council and high officials and many Chiefs and Nobles from all parts of India. To meet this traffic the several Railways will have some difficulty in providing rolling stock; therefore to guard against possible inconvenience, careful consideration and judicious arrangements will be required, and every endeavour must be made to economise to the utmost the limited accommodation available.

3. The Foreign Department has already taken steps to enable the Department Public Works to forecast the requirements of the several Chiefs and Nobles who purpose travelling by rail to the Assemblage; and, with a view to facilitating communications between the Railway authorities and the various Governments and Administrations, Captain Wallace, R. E., Deputy Consulting Engineer, has been appointed to act as Under Secretary in the Department Public Works for this special duty (*vide* Notification No. 429, dated 20th October 1876), and all matters of doubt should be referred to that officer.

4. Captain Wallace will obtain from the Local Governments, Administrations and Agencies a detailed list of the Chiefs and Nobles who purpose travelling by rail with their suites; and, in communication with the several Railway authorities, and the Executive Committee at Delhi, he should render all the assistance he can in drawing up such a programme as will meet as far as possible the requirements of the Chiefs and Nobles.

5. In order to avoid disappointment the earliest intimation, with full particulars of the accommodation desired, should be given, as it may be necessary to limit the numbers who can actually accompany the Chiefs and Nobles, and to arrange to send the remainder of their suites beforehand. Also it may be necessary for some of the Chiefs to proceed to Delhi a short time before the opening of the Assembly, in order that the Railway carriages may be made available for others. The Government of India is confident that any trifling inconvenience on this account will be cheerfully submitted to as unavoidable.

6. Punctuality being of primary importance in making the most of a limited quantity of rolling stock, the authorities concerned should bear in

mind and impress upon the Chiefs and Nobles who intend to travel, that arrangements as to the hours of departure and arrival, halts, &c., once fixed and approved cannot be altered.

ORDER.—Ordered, that this Resolution be forwarded to the Foreign Department for communication to Political Officers and to the Local Governments, Administrations and Officers marginally noted, for information and guidance.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

UTILISATION OF NATIVE PRODUCTS, MANUFACTURES AND MATERIALS IN THE CONSTRUCTION AND MAINTENANCE OF LINES OF RAILWAY IN INDIA.

Circular No. 20 R., dated Simla, the 12th October 1876.

OBSERVATIONS.—It may be calculated approximately that on an average 40 per cent. of the entire cost of constructing and fully stocking the State Railways in India consists of expenditure in the purchase of permanent-way, engines and rolling-stock, iron bridge materials, and stores of various kinds procured from England, and not at present procurable in India. In a contemplated expenditure of 20 millions on railways there would thus have to pass out of the country no less a sum than 8 millions.

RESOLUTION.—In this view all Officers of the Public Works Department, and specially of the Railway Branch, are directed to turn their most serious attention to this matter, and to limit their indents for European manufactures to such articles as cannot be procured in India.

The Governor General in Council expects that much benefit will be derived from the exercise of intelligence and discrimination of Officers in the Department in using native products, manufactures and materials in the construction and maintenance of lines of railway.

The manufacture of iron-work suitable for railway construction in India will, it may be hoped, become in a few years an established industry. Rails may soon be available, but iron-work for the construction of large bridges may not be procurable in India for some years. Therefore bridges with iron superstructure should only be designed when the use of masonry, whether of brick or stone, is shown to be either impracticable or to exceed in cost very considerably the use of iron, and in like manner the designs of all structures should be decided upon with regard to the possible provision in India of the materials for their construction.

ORDER.—Ordered, that the above be sent for information to all Governments and Administrations and Officers as per margin, and to the Home Department for publication in the Supplement to the *Gazette of India.*

Continuation sheets of the Supplement published at Calcutta on this date.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2ND NOVEMBER 1876.

GENERAL REMARKS.—In Madras rain has fallen only in Tanjore and Malabar, in the latter district very little; reports from all other districts continue to be very unfavourable. In Bombay prospects are good in Sind and Guzerat; no rain has fallen in Khandesh, Násik, Poona, Ahmednagar or Sholapur, and distress is increasing; a slight shower only is reported from Satara, where prospects are still gloomy; in the Southern Mahratta Country there has been a little rain in Dharwar and Kaládgi, and above the ghâts in Kanara, but it has done little good; scarcity of water and fodder is severely felt in Sholapur, Satara and Kaládgi. In Mysore and Coorg no rain has fallen, and in Coorg the rice crop is now threatened; here also there is great want of water and fodder. In Berar the *kharif* is generally in good condition, but rain is wanted for the *rabi*. No rain has fallen in the Central Provinces or Central India, but prospects are good. In Bengal the rains have ceased, and only a few showers are reported from scattered districts: the winter rice promises very well. Some showers have fallen in Assam, where prospects are good. No rain is reported from the North-Western Provinces or Oudh; the crops are in good condition. In the Punjab rain has fallen only in small quantity at Lahore, Ráwalpindi and Peshawar.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Oct. 30th)	...	Rain, canal and tank supplies, quite insufficient; crops withering; small quantity of millet, *cholum*, *korra* and maize harvested in a few taluks, outturn about ¼; want of rain prevents cultivation of later dry crops; markets not well supplied; prices high and rising; cholera, seizures 39, deaths 10 in Bapetla taluk; fever and small-pox slight; dysentery and epizootic aphtha here and there; fodder and water scarce in many taluks.
Kurnool („ 31st)	...	Cold weather commenced, but no rain; crop, wet and dry, under canal good; light harvest of *jonna* in some villages of Pattikonda, elsewhere withered, and stalks being pulled out for fodder; grain not easily procurable; prices rising; water and pasture rare, cattle being driven to Nallamallays for pasture; no water over Sunkesala anicut.
Tanjore („ „)	1·09 at Negapatam.	Rain elsewhere scanty though almost general; rivers very low; small supply to few tanks; water over anicuts none; progress of cultivation in places retarded for want of sufficient rain and freshes; standing crops not doing well in places for want of rain; harvest, wet and dry crops; yield fair; markets well supplied; prices rising; cholera abating, seizures 11, deaths 11; fever and small-pox in some parts; cattle healthy; pasture insufficient.
Madura („ 30th)	*Nil*	Agricultural prospects worse; rain urgently needed; prices risen.
Malabar („ 31st)	·1	Rain insufficient and unfavourable for transplanting second crops; markets well supplied but prices daily rising owing to exportation to other districts; cholera in Ponany and Kurumbranad taluks, 7 deaths; cattle healthy; pasture indifferent.
Cuddapah (Nov. 1st)	*Nil*	Crops in dry land withered, under irrigation canal good, under wells moderate; prices rising, per rupee, *cholum* 5¾, *raggi* 6, rice 4¼, horse gram 6, *sazzalu* 6¼ seers; imported grain considerable. *General Remarks.*—General prospects same as last week.
Bombay— (Nov. 2nd)		
Sind—(„ 1st)		
Kurrachee ...	...	River at Kotri on 30th, 7 feet 11 inches, against 8 feet 2 inches on the same date last year; fever everywhere; river eroding Deas Manju, Mehsa and Bhion, Schwan division; rats doing mischief in Tapa Jungs, Jullbani; Sir floods abating; much land fit for *rabi* in Dádú taluka; small-pox in Guja and Kurrachee.
Shikárpur ...	...	*Kharif* harvesting and cotton picking commenced; slight rain on 24th and 27th; river 2 inches lower than last year; fever and cough very prevalent.
Hyderabad ...	...	River very low; *kharif* harvesting and *rabi* sowing progressing; weather very warm and much fever about; small-pox not decreasing, 76 fresh cases, 5 deaths; cattle disease in Shadádpur taluka.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*			
Guzerat.			
Ahmedabad	...	...	No change.
Kaira	...	...	*Kharif* harvest abundant; prices rising owing to large export; cotton thriving; *rabi* sowing commenced.
Surat	...	...	Early crops being harvested.
Broach	...	...	*Kharif* harvested; *rabi* cultivation finished; *jowar* in Jambusar infested by worms, and in Ankleswar injured by excessive heat; fever in Ankleswar, Jambusar and A'mod.
Khandesh and Násik.			
Khandesh	...	...	Weather as before; cholera stopped.
Násik	...	...	No rain; the very little *rabi* sown is now withering; public health good.
Konkan.			
Tanna	...	...	Cholera in 2 villages of Bassein taluka, 8 cases, 6 fatal; reaping of early rice crops in progress.
Deccan.			
Poona	...	..	No rain both at Huzur and Talukas; distress increasing; cholera in city.
Ahmednagar	...	...	No rain; prospects very gloomy; cholera in 3 talukas, 29 cases, 17 deaths.
Sholapur	...	...	No rain; cattle suffering from scarcity of water and fodder; slight cholera in 3 talukas; distress increasing; poorer classes emigrating in large numbers.
Satara	...	0·02	Total rainfall 30·81; prospects still gloomy; scarcity of fodder increasing; 30 deaths from cholera.
Southern Mahratta Country.			
Belgaum	...	...	No rain; agricultural prospects very unfavourable; grain scarce in Belgaum and other markets, and prices still rising.
Dharwar	...	...	Rain as before; slight rain fell in Nawalgund, Hángal and Kod talukas; in the latter taluka rain has slightly revived crops where it fell; no rain elsewhere and prospects very bad; great scarcity of drinking water and fodder; slight cholera in 4 talukas.
Kanara	...	...	Slight rain above Ghâts, where rice crops are very poor except in low lands.
Kaládgi	(Oct. 31st)	0·04	Total rainfall 11·53; no change for the better except slight benefit to the little *rabi* already sown; slight cholera in 3 talukas; cattle dying from want of fodder.
Kattywar and Gaekwar's Territory.			
Rájkot	...	...	Fever prevalent; weather hot; health good.
Wadhwán	...	...	Weather, crops and health same as before.
Baroda	...	...	Reaping operations continue; fever slightly prevalent.
			General Remarks.—Small-pox prevalent in Hyderabad and Kurrachee; fever general throughout Sind; crops there and in Guzerat good; the prospects in the Deccan and the Southern Mahratta Country are very gloomy. Scarcity of water and fodder severely felt in Sholapur, Satara and Kaládgi. Poorer people emigrating from Sholapur in search of work. The slight rain in Kaládgi has done but little good.
Bengal—	**(Nov. 2nd)**		
Chittagong	...	Return not received. (Previous week *nil.*)	
Noakholly	...	*Nil*	General health good.
Chittagong Hill Tracts	...	*Nil.*	
Hill Tipperah	...	*Nil.*	
Backergunge	...	*Nil*	The cattle are free from disease, but a good deal of sickness prevails among the people; cholera present in thanas Burrisal, Mehdiganj, Gaurándi, Golachipa and Mirzaganj and fever in thanas Nulchitty, Backergunge and Motharia.
Furreedpore	...	*Nil*	Cholera prevalent near Shibchur and Hobganj outposts.
Dacca	...	1·68	Fever prevalent but not of virulent type; some cholera reported from Munshiganj; heavy gale all Tuesday night.
Tipperah	...	Return not received.	
Mymensingh	...	*Nil.*	
24-Pergunnahs	..	·40	Fever still prevalent at Barripore and Busseerhat.
Jessore	...	*Nil.*	
Nuddea	..	*Nil*	Fever rather less severe and not epidemic.
Moorshedabad	...	*Nil*	Public health on the whole satisfactory.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*			
Pubna	...	*Nil*	Cholera has made its appearance in Furreedpore, Hándiál and Bára outposts; some sporadic cases of fever in the town also reported.
Rajshahye	...	*Nil.*	Cholera in a mild form continues at Nattore, and some cases are reported from Bauleah, Singra, Baráigaon and Puthia.
Bogra	...	*Nil.*	
Maldah	...	*Nil.*	
Dinagepore	...	0·1	Much fever.
Rungpore	...	Return not received.	
Cooch Behar	...	*Nil.*	
Jalpáiguri	...	*Nil.*	
Darjeeling	...	*Nil.*	
Midnapore	...	Return not received. (Previous week 2·23).	
Howrah	...	*Nil.*	
Hooghly	...	Return not received.	Fever on the increase.
Burdwan	...	·17	Fever very prevalent.
Bankoora	...	*Nil.*	
Beerbhoom	...	*Nil.*	
Sonthal Pergunnahs	...	*Nil.*	
Bhágalpur	...	*Nil.*	General health very good.
Monghyr	...	Return not received.	
Purneah	...	*Nil.* (Previous week *nil.*)	
Durbhunga	...	*Nil.*	
Mozufferpore	...	Return not received.	Public health good.
Sarun	...	*Nil*	General health good.
Chumparun	...	Return not received.	
Patna	...	*Nil*	Health of the district good.
Gya	...	*Nil.*	
Shahabad	...	*Nil.*	Public health good.
Hazáribágh	...	*Nil.*	
Lohardugga	...	*Nil.*	General health fair.
Manbhoom	...	*Nil.*	
Singhbhoom	...	*Nil.*	The district is reported unhealthy from fever.
Balasore	...	·24	Public health good.
Cuttack	...	·48	Public health good.
Pooree	...	*Nil.*	
			General Remarks.—There was no rain during the week except in certain districts where only a few scanty showers fell. The late rice is generally excellent and promises good results; the *rabi* crops are in some places above the ground and in others are now being sown. Sugarcane, *sesamum* and other minor crops are favourably reported on.
N. W. P.—			
Benares	(Nov. 1st)	...	*Kharif* fair; easterly wind.
Allahabad	(Oct. 31st)	...	*Rabi* sowings progressing; *kharif* crops being harvested.
Agra	(Nov. 1st)	*Nil*	*Rabi* progressing; *kharif* harvesting
Meerut	(„ „)	...	Prospects favourable.
Bareilly	(„ „)	*Nil.*	
Almora	(Oct. 29th)	...	Weather still unsettled, but little rain has fallen.
Punjab—	**(Nov. 1st)**		
Delhi	...	*Nil*	Fever abating.
Hissar	...	*Nil*	*Kharif* being reaped; *rabi* sowings in progress; fever still prevalent.
Umballa	...	*Nil*	Crops good; fever still prevalent.
Jullundur	...	*Nil*	Crops abundant; mortality from fever great.
Lahore	...	·1	Crops good; health improving.
Mooltan	...	*Nil*	Health bad.
Dera Ismail Khan	...	*Nil*	Health and harvest good.
Ráwalpindi	...	·2	Agricultural prospects good; health fair.
Pesháwar	...	·9	Reaping in progress; slight fever and cholera prevalent.
			General Remarks.—Harvest prospects favourable; public health still very bad.
Oudh—	**(Nov. 1st)**		
Lucknow	...	*Nil*	Prospects favourable; public health good.
Sitapur	...	*Nil*	
Fyzabad	...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (Oct. 28th)	...	Cool; *kharif* being reaped; rain required for *rabi*; health good; prices rising.
Sambalpur ...	...	Cool, pleasant; early rice reaped not equal to expectation; health good.
Biláspur ...	...	Prospects favourable; cotton doing well; fever prevalent; prices steady.
Raipur ...	...	Prospects, *kharif* favourable; *rabi* sowings continue; prices rising owing to exports to Bombay.
Bálághát ...	...	Early rice being cut; *rabi* sowings continue; fever prevalent; prices steady.
Chanda (Oct. 29th)	...	Early rice being reaped; other *kharif* crops doing well; *rabi* sowings continue; prices rising.
Chhindwára ...	...	Clear, cool; prospects good; no epidemic; prices stationary.
Betúl (Oct. 30th)	...	Prospects favourable; *rabi* sowings almost completed; cholera prevalent; prices stationary.
Nágpur (Nov. 1st)	...	Prospects, *kharif* good; *rabi* sowings continue; cholera broken out at Sannair; prices rising.
Wardha ...	...	Cotton picking commenced; *rabi* sowings progressing.
Nimár ...	...	*Rabi* sowings completed; cholera and small-pox abating; prices rising.
Hoshangabad ...	...	Prospects fair; prices rising.
Narsinghpur ...	...	Prospects good; prices rising owing to large exports towards Bombay.
Jubbulpore ...	...	*Kharif* being harvested; *rabi* sowings continue; cattle disease prevalent.
Saugor (Nov. 1st)	...	Early rice being reaped; *rabi* sowings continue; health good; prices rising.
Seoni ...	...	*Rabi* sowings almost completed; cholera continues; prices risen.
Damoh ...	...	Lesser *kharif* crops reaped, outturn good; *rabi* sowings continue; fever and cholera prevalent.
Mandla ...	...	Reaping lesser *kharif* crop completed; outturn good; *rabi* sowings progressing; cattle disease prevalent.
British Burma—	...	No report received.
Assam—		
Gauháti (Nov. 2nd)	·3	Weather cloudy and stormy on 31st October and 1st November; fine till then; prospects of tea and rice good; public health good.
Sylhet („ „)	1·24	Gale yesterday; prospects unchanged.
Mysore and Coorg— (Nov. 2nd)	...	No rain has fallen in Mysore or Coorg; prospects most serious; the prolonged drought having destroyed the crops that had hitherto survived; and rice cultivation in Coorg now endangered; scarcity of grain and water causing severe distress; famine relief committees organized; general health fair.
Hyderabad Assigned Districts—		
Amráoti ...	...	*Kharif* in some places rather favourable, in others fair; rain urgently required for *rabi*; grain exportation continues.
Central India— (Nov. 1st)		
Indore ...	*Nil*	Health and prospects good throughout Central India.
Gwalior ...	*Nil*	
Neemuch ...	*Nil*	
Rutlam ...	*Nil*	
Sutna ...	*Nil*	
Rajputana—	...	No report received.
Nepal (Oct. 25th)	*Nil*	Prospects fair.

Letter addressed to the Surveyor General about Lieut.-Colonel Macdonald.

From the Hon'ble T. C. HOPE, Officiating Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, to the Surveyor General of India,—No. 809, dated Simla, the 16th October 1876.

I AM directed to acknowledge the receipt of your letter of the 6th ultimo, No. 377, submitting copy of a letter, under date the 31st August last, from Lieutenant-Colonel John Macdonald, Deputy Superintendent of Revenue Survey, in which that officer replies to the questions put in Mr. Secretary Hume's letter of the 22nd August, calling upon him to state, for the information of the Governor General in Council, whether he had or had not had any connexion with certain articles, criticizing the administration of the Survey Department, which had appeared in the *Friend of India* and other newspapers.

2. In conveying to you the remarks and orders of the Governor General in Council on this painful case, I am directed to premise them by a brief review of the facts.

3. In March last, a notice appeared in the *Pioneer* newspaper of the "Manual of Surveying in India," of which you and Colonel Smyth were the authors, and of which a new edition had then recently been published. This notice was followed on the 22nd April by a letter in the same newspaper, signed J. M., the initials of Lieutenant-Colonel Macdonald, containing a very condemnatory critique of the manual, which was said to be "utterly useless as regards the professional work of the present day." It was added that the work "ought to be revised and corrected by a competent professional officer in order to render" it "worthy of the Government with whose sanction it has appeared," and that "with much valuable matter it also contains much which we flatter when we call it only useless and rejected rubbish."

4. On the 17th and 24th June, two articles appeared in the *Friend of India*. The first, which was a review of the progress of the Survey Department, though it concludes with a passage which was evidently intended to convey a sneer at the professional qualifications of the Head of the Department, would not have called for special notice from the Government of India, had it not been immediately followed by the virulent attacks on the Surveyor General which are embodied in the article of the 24th June. In the latter article the Head of the Survey Department is accused of "abominable carelessness," of a "cynical indifference to truthful work," of "cowardly sin and robbery of the dead," and of "dishonesty of purpose," for which it is intimated that "castigation will be inflicted at regular intervals as it is on habitual criminals until the cause is removed." More might be quoted of an equally offensive nature, and the article concludes with another covert sneer at the Head of the Department.

5. As the article in question contained matter which could only have been communicated by some person who had access to, or knowledge of, the records of the Surveyor General's Office or the Revenue Survey Office, you rightly directed that every officer and assistant in each of these offices should be called upon to declare whether he was the author, or had had any cognizance of the articles referred to. The question was answered in the negative by every one of the persons to whom it was addressed, except Lieutenant-Colonel Macdonald, who replied that "the Editor of the *Friend of India* is alone in a position to answer enquiries regarding the authorship of the article referred to." The result of this enquiry having been reported to the Government of India, a further call made on Lieutenant-Colonel Macdonald by order of the Governor General in Council, has elicited from him the admission that he was the author of the letter to the *Pioneer* newspaper and of the two articles in the *Friend of India* above adverted to. Lieutenant-Colonel Macdonald urges in his defence that the articles in question were a "literary critique" upon a work "publicly sold," and that he "consulted no official record in writing them." He says that if the Government of India holds that he has made an unjustifiable attack

on Colonel Thuillier, or has otherwise made ill-judged reflections on Colonel Thuillier's book, "which he treated as public property," he can only express his unqualified regret. At the same time, he states that his sole anxiety was, and still is, that his "knowledge of the practical working of the Department should be brought plainly into view;" and referring to an alleged discrepancy in the surveys of two districts to which he had alluded in the article of the 24th June, he requests that "in the interests of the Department" quite as much as in his "own support," he may be required by Government "to make distinct and categorical statement on the subject-matter in the article" he has alluded to; or, in other words, instead of confining himself to an expression of regret, he prays the Government to allow him to come forward as the official accuser of the Head of his own Department in regard to certain alleged inaccuracies in the work of the Department, the nature of which is most obscurely specified, and which he has already made the text of a violent attack upon his official superior in the public Press.

6. The Governor General in Council views Lieutenant-Colonel Macdonald's conduct in this matter with grave displeasure. In making use of the Press as a secret engine to criticize a work published by his official superior on a subject immediately connected with his official duties, and to attack in the language of virulent abuse the acts of that superior, besides disparaging his general fitness for the administration of the Department, Lieutenant-Colonel Macdonald has violated every principle of official duty and loyalty, and has transgressed the express orders of the Government regarding the connection of public officers with the Press. His offence is aggravated by the course which he took when called upon to state whether he had had any connection with the articles referred to, in attempting to conceal the truth until it was forced from him by a question which it was impossible for him to leave unanswered, and is in no way mitigated, but on the contrary is enhanced, by his offer to substantiate accusations, which, if made at all, ought to have been made before, instead of after, his appeal to the public. His assertion that he has only written a fair literary critique on a published work, is, to say nothing of the language of that critique, not reconcileable with the fact that he kept the authorship of it secret as long as he could do so. The Governor General in Council cannot pass over, without very severe notice, conduct on the part of a public officer so disloyal, so inconsistent with official decorum, and so utterly subversive of departmental discipline. It is indeed questionable whether Lieutenant-Colonel Macdonald's offence can be adequately dealt with by any punishment short of removal from the Department; but in consideration of his long and on the whole useful service, His Excellency in Council has resolved on this occasion to inflict a penalty which, while it will mark the emphatic condemnation by the Government of Lieutenant-Colonel Macdonald's acts, will not entail on that officer the very serious consequences which would probably be involved in his removal from the Department. The decision of the Government of India is that Lieutenant-Colonel Macdonald shall be suspended from departmental duty on the receipt of these orders for a period of three months, on the expiration of which he will be placed in the 2nd grade of Deputy Superintendents of Revenue Survey immediately below Lieutenant-Colonel Oakes, on a salary of Rs. 1,327-14 per mensem. During the period of his suspension from duty, Lieutenant-Colonel Macdonald will draw the pay of his rank as an officer of the Staff Corps. It is further the desire of the Governor General in Council that Lieutenant-Colonel Macdonald shall not be again employed at headquarters without the special sanction of Government.

7. I am to request that you will cause Lieutenant-Colonel Macdonald to qe furnished with a copy of this letter.

T. C. HOPE.

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

Execution of minor contracts and deeds on behalf of the Secretary of State in the territories under the administration of the Government of Bengal.

Extract from the Proceedings of the Government of India in the Home Department,—No. 1750 (Judicial),—under date Simla, the 2nd November 1876.

READ the undermentioned papers on the subject of the execution of minor contracts and deeds on behalf of the Secretary of State for India in Council under 22nd and 23rd of Vic., Cap. 41:

Home Department No. 10—1034, dated the 26th June 1876, to the Government of Bengal.

Letter from Government of Bengal, No. 2495T, dated 18th September 1876.

RESOLUTION.

IN exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Chapter fifty-nine, Section two, the Hon'ble the President in Council is pleased to declare that the undermentioned classes of the deeds, contracts and other instruments referred to in the twenty-second and twenty-third of Victoria, Chapter forty-one, Section two, may be executed as follows in the territories under the administration of the Government of Bengal:—

Contracts for the supply of articles, and for repairing, cutting, &c., roads and canals.	By Collectors of Districts, and by Executive, Superintending and Consulting Engineers, subject to the pecuniary limits and conditions prescribed by the Public Works Code.
Contracts for the supply of articles to the Post Office.	By the Post Master General of Bengal.
Contracts for the supply of stationery, &c., to the Superintendent of Stationery.	By the Superintendent of Stationery, Calcutta.
Contracts for the supply of articles, &c., to the Marine Department, and for Docks.	By the Master Attendant, Calcutta.
Contracts for the supply of clothing, &c., for the Police.	By the Commissioner of Police, Calcutta, and the Inspector General of Police, Bengal.
Contracts for the supply of articles, &c., for the use of Jails, or regarding the sale of articles manufactured in Jails.	By the Inspector General of Jails, Bengal.

ORDER.—Ordered, that this Resolution be communicated to the Government of Bengal for information, and be published in the Supplement to the *Gazette of India*.

ARTHUR HOWELL,
Offg. Secy. to the Govt. of India.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

INFORMATION FOR INTENDING EMIGRANTS TO TASMANIA.

No. 765, dated the 10th June 1876.

From—GEORGE GILMORE, Esq., Colonial Secretary, Tasmania,
To—The Secy. to the Govt. of India, MILITARY DEPT.

I have the honor to acknowledge the receipt of your letter of the 19th April (as per margin), relative to an application from Mr. G. McArthur for certain information respecting free grants of land to immigrants arriving in Tasmania, and under what conditions the Government would assist in his emigration from India and his settlement in this Colony.

Establishments. Departmental. No. 920.

Having referred your letter to the Board of Immigration, I have the honor, at the request of the President, to transmit herewith, for Mr. McArthur's information, a copy of the Acts of Parliament relating to the granting of Crown Land to immigrants paying their own passages to, and becoming permanent settlers in the Colony. Also a copy of a paper issued by the Board containing much useful information for intending emigrants.

31 Victoria, No. 26.
38 Victoria, No. 16.

From these documents Mr. McArthur will obtain full information in reply to his enquiries.

The Board of Immigration do not assist in the emigration of persons from India, but upon their arrival they become entitled under the law to a "Land Certificate."

In answer to the second question, namely, "in what relation I would (with my family) stand with non-Government settlers by obtaining Government land grant," I can only say that Mr. McArthur would hold the same position as any other settler in the selection of his land for purchase under his "Land Certificate."

ANNO TRICESIMO-PRIMO.

VICTORIÆ REGINÆ.

No. 26.

An Act to amend "The Immigration Act, 1855,"—11*th October* 1867.

Be it enacted by His Excellency the Governor of *Tasmania*, by and with the advice and consent of the Legislative Council and House of Assembly, in Parliament assembled, as follows:—

1. The Act of Council of the 19th *Victoria*, No. 18, may be cited as "The Immigration Act, 1855," and this Act may be cited as "The Immigration Act, 1867."

Short title.

Appointment of Agents for emigration.

2. It shall be lawful for the Board of Immigration to appoint Agents for the purposes of this Act.

Agents' duty in respect of the selection and conveyance of emigrants.

3. Such Agents shall make all necessary arrangements and provision for the selection of emigrants, and shall furnish information and issue all notices, and do all things relating to emigration to *Tasmania* that the Board of Immigration may from time to time direct in pursuance of this Act.

Agents to issue land order warrants.

4. Every such Agent shall issue to each emigrant whom he approves as suitable, and who has not previously resided in the Colony, and who proceeds direct from *Europe* to *Tasmania*, and who pays the full cost of the passage of himself or any other person being a member of his own family, and approved as aforesaid, a land order warrant, which shall specify the names and ages, as well of the person to whom it is issued, as also of the emigrant or respective emigrants on account of the payment of whose passage money the same is issued.

Value of land order warrants.

5. Such land order warrant shall entitle the holder thereof to receive, immediately on his arrival in the Colony, one land order in respect of each person named therein as the emigrant or emigrants whose passage money has been paid in full by the person to whom such order was issued as aforesaid; and all such land orders shall be of the respective nominal values of eighteen pounds for each emigrant of the age of fifteen years or upwards, and nine pounds for each emigrant child between the ages of twelve months and fifteen years, according to the ages respectively specified in such land order warrants as aforesaid.

Land orders available as payment for land.

6. Every such land order shall be available to its full nominal value, and be received in payment by the Commissioner of Crown Lands for or on account of the purchase money for any waste lands sold at any Government sale, or selected for purchase under *The Waste Lands Act*, 1863.

Issue of certificates to persons not receiving land orders.

7. Any person arriving in the Colony, with the intention of settling therein, from *Europe* or *India*, whose passage money to the Colony is paid by himself as a cabin or intermediate passenger, and who has not previously received or accepted a land order as hereinbefore provided, shall, at any time within twelve months after his arrival in the Colony, be entitled to demand from the Board of Immigration, and shall thereupon receive a certificate authorising such person to select thirty acres of land; and in case such person arrives under the circumstances aforesaid with a family, then such person shall be entitled to a further certificate authorising him to select twenty acres within twelve months after the arrival of his wife (if any), and also a further certificate authorising him to select ten acres in respect of each child within twelve months after the arrival of such child in *Tasmania*, such selections to be made within twelve months after the date of such certificates; and every such certificate shall be received in payment by the Commissioner of Crown Lands for the purchase money of any waste lands selected by virtue of such certificate for purchase under the nineteenth section of *The Waste Lands Act*, 1863.

To be available as payment for land.

Five years' residence before grant.

8. No person who pays the purchase money for any waste lands of the Crown by virtue of any such land order, or who selects land under any such certificate as aforesaid, shall be entitled to claim a grant from the Crown of the land so paid for or selected until he has resided for five years in *Tasmania*. Provided that, in case he should die before he has resided for five years in *Tasmania*, his heir-at-law or devisee, as the case may be, shall be forthwith entitled to a grant of the said land: And provided further, that in case any such person ceases to reside in *Tasmania* before the expiration of five years after his arrival, the land so purchased by virtue of any such land order or selected under any such certificate shall revert to the Crown and become Waste Land.

Acts to be read together.

9. This Act and "The Immigration Act, 1855," shall be read and construed together as one and the same Act.

ANNO TRICESIMO-OCTAVO.

VICTORIÆ REGINÆ.

No. 16.

An Act to amend "The Immigration Act, 1867,"—dated 18th September 1874.

Whereas it has become desirable and necessary to amend "The Immigration Act, 1867," in certain particulars:

Preamble.
31 Vict., No. 26.

Be it therefore enacted by His Excellency the Governor of *Tasmania*, by and with the advice and consent of the Legislative Council and House of Assembly, in Parliament assembled, as follows:—

Application of section 7 of 31 Vict., No. 26, extended.

1. All the provisions contained in the 7th section of "The Immigration Act, 1867," shall be applicable to any person arriving in *Tasmania* from any country or place other than *Europe* or *India*, as well as from *Europe* or *India*, for the purpose of settling in *Tasmania*.

Nothing herein contained shall be held to entitle any person who has for the period of one year or upwards resided in any *Australian* colony or *New Zealand* to receive a certificate as in the said Act is mentioned.

Applicant for land order or certificate to prove that he was not a free or assisted immigrant to another colony.

2. It shall be lawful for the Board of Immigration, if the Board sees fit, to require any person applying for a land order or certificate to prove to the satisfaction of the Board, or some person appointed by the Board, that such person was not within the period of one year before application made a free or assisted immigrant to any *Australian* colony or *New Zealand*.

No person entitled to grant until after five years' residence.

3. No person who pays the purchase-money of any waste lands of the Crown by means of any land order or certificate mentioned in the said Act shall be entitled to claim a grant from the Crown of the land so paid for, unless he has resided for five years in *Tasmania*; and every such term of five years shall be reckoned from the date of the land order or certificate; and proof of such residence shall lie upon the person claiming a grant for such land.

Every such person shall be deemed to have resided for five years in *Tasmania*—

If, being unmarried, he has resided continuously in *Tasmania* for five years, or has not been absent from *Tasmania* for any period or periods exceeding three months in any one year during the said period of five years:

If, being married, he and his wife and children have resided continuously in *Tasmania* for the said period:

If his wife and children, or his wife only, or his children only, or one or more of them, have resided continuously in *Tasmania* during his absence, for the said period.

In case any such person dies before he has resided for five years in *Tasmania* as hereinbefore provided, his heir-at-law or devisee, as the case may be, shall, at the expiration of five years from the date of the land order or certificate issued to such person as aforesaid, be entitled to a grant of the said land if, in the opinion of the Commissioner of Crown Lands, permanent improvements have been made upon the said land to the value of not less than one pound for each and every acre of the said land.

In case any such person ceases to reside in *Tasmania* before the expiration of the said period, save as hereinbefore provided, the land so purchased or selected shall revert to the Crown and become waste land.

This provision shall be applicable to the case of any person who has purchased or selected land under the said Act before the commencement of this Act.

Repeal of Section 8 of 31 Vict., No. 26.

4. Section eight of the said Act is hereby repealed; and any right or liability which has arisen or accrued thereunder before the commencement of this Act shall be deemed to have arisen or accrued, and shall be dealt with under the last preceding section of this Act.

Regulations.

5. It shall be lawful for the Board of Immigration, with the approval of the Governor in Council, from time to time to make, alter, amend, and rescind such Regulations as the Board sees fit, for the purpose of carrying into effect the objects and intentions of the said Act and this Act, so far as the same is not provided for by the said Act or this Act; and all such Regulations shall be published in the *Gazette*, and laid before both Houses of Parliament, as soon as may be after the making thereof; and such Regulations, when published in the *Gazette*, shall have the force of law unless and until Parliament disallows the same; and all acts, matters, and things done under the said Regulations before they are disallowed shall be good and valid notwithstanding any such disallowance.

Acts to be read together.

6. This Act and the said Act shall, save as altered or amended by this Act, be read and construed as one Act.

Short title.

7. This Act may be cited as "The Immigration Act, 1874."

INFORMATION FOR INTENDING EMIGRANTS.

Tasmania is an island at the southern extremity of the Australian Continent between 40° and 44° South Latitude, and 144° and 149° East Longitude. It is divided from the Colony of Victoria by Bass's Straits, 120 miles wide. The surface is diversified by ranges of hills and valleys, with occasionally large plains; and it is probably the most healthy of all the British Colonies, for it is never too hot in summer nor too cold in winter for out-door occupations to be carried on.

The rainfall, on an average, is a little more than 22 inches; but there are not more than 40 days on which out-door work cannot be done.

Telegraphic communication has been established between Hobart Town and Launceston, and connecting all the principal towns and villages in the island.

There is also an electric cable between Tasmania and Victoria—from whence land-lines extend to New South Wales, Queensland, and South Australia; and a line from Adelaide (in South Australia) extending across to Port Darwin connects the colony with England.

Regular postal communication exists throughout the colony, the postage on town letters being 1*d.*; on country letters, 2*d.*; to the other colonies, 3*d.*; and to Great Britain, 6*d.*

There is no postage whatever on newspapers either in the colony or to any of the Australian Colonies or Great Britain.

There is a four-weekly mail service with Great Britain, *viâ* Galle, and mails for the Australasian Colonies are despatched by every steamer leaving Hobart Town and Launceston.

The post-office money-order system is in force.

A powerful passenger steamer plies twice a-month between Sydney, the capital city of New South Wales, and Hobart Town; and one twice a-month between Melbourne, the capital city of Victoria, and Hobart Town; and two eight times a-month between Launceston and Melbourne.

The island contains 15½ million acres of land, and the islands connected with it contain 1¼ million acres; 3,905,485 acres have been sold or granted to settlers by the Crown; leaving the Crown land property at about 12,000,000 acres, of which one and a half million acres are leased by settlers for sheep-runs or other purposes.

There is a railway in course of construction to connect the two ports of Hobart Town and Launceston, and railway communication has for some time been established between Launceston and Deloraine. This line passes for 45 miles through some of the best agricultural lands of the colony.

The lowest upset price of Crown land fit for agriculture is fixed by Act of Parliament at £1 an acre, and the lowest upset price of pastoral lands at a sum equal to 12 years' rental, but not less than 5*s.* an acre.

Any person may select for purchase, by private contract with the Government, one lot of agricultural land not exceeding 320 acres, at £1 an acre, on the following terms, as exemplified to the extent of 100 acres:—

	£	*s.*	*d.*
100 acres at 20*s.*	100	0	0
Add ⅓rd for credit	33	6	8
	£133	6	8

	£	*s.*	*d.*
Cash at time of purchase	3	6	8
„ First year	5	0	0
„ Second year	5	0	0
„ Third, and following years, up to 14 years ...	10	0	0 a-year.

And so in proportion for any greater or smaller area than 100 acres.

Credit is allowed on all purchases above £15.

When 500 acres shall have been sold in not less than 10 lots adjoining or close to each other, the Governor-in-Council is empowered to raise a sum not exceeding half of such purchase-money for the purpose of constructing a road or roads in the vicinity of the lots.

After paying the expenses of the Lands and Works Department, one-fourth of the Land Revenue and Licence Fees are set apart for the construction of roads and bridges by the various Road Trustees.

By the Acts of Parliament, 31 Vict., No. 26, and 38 Vict., No. 16, the Board of Immigration in Tasmania are empowered to appoint agents in England for the purpose of selecting emigrants, and arranging for their conveyance to Tasmania. These agents have also power to issue warrants for land on the following terms:—

The agents shall issue to each approved emigrant who has not previously resided in the colony, and who pays the full cost of his family's passage out, a warrant, which will entitle the holder to receive from the Immigration Agent in Tasmania a land order to the value of £18 for each member of the family above 15 years of age, and £9 for each member above 12 months and under 15 years old;—and these land orders will be received by the Government as payment for any Crown lands that the emigrant may buy after his arrival.

The Acts also empower the Immigration Board to permit any person who has paid his own and family's passage-money as cabin or intermediate passengers to demand, within a year after his arrival in the Colony, a land certificate entitling him to select 30 acres of land for himself, 20 for his wife, if he has one, and 10 for each child.

And for these lands a grant will issue after five years' residence; but the order will not be forfeited by the death of the emigrant, or his absence, if his family remain in the Colony.

Licences are granted to cut timber on Crown lands.

Licences to dig in search of gold are also issued.

Mineral leases are issued for working lodes and deposits of coal, iron, tin, &c. Of the latter metals considerable shipments of pig iron and ingots of tin have been made to Victoria and the United Kingdom.

The prospects of successfully working the iron and tin mines, and also the extensive coalfields known to exist in various parts of the Colony, are very encouraging.

Licences for pastoral lands are issued at rates having regard to the class of the land and the number of sheep and cattle which can be fed thereon, the rent being calculated on the carrying capacity of the land, at the rate of from 4*d.* to 8*d.* per annum for each sheep, or 2*s.* to 4*s.* a-head for cattle.

The Board of Immigration issue bounty tickets to persons residing in the Colony desirous of introducing their relations or friends. The prices of the tickets being, for a "family ticket," to introduce a man and his wife, and all their children under 12 years of age, £15; for a single man, £10; and for a single female, £5.

Each single person over 12 years of age at the time of embarkation must have a separate ticket.

Vessels are constantly leaving London and Liverpool for Melbourne, the agents for which accept these tickets and provide a free passage for the holders, the balance of the passage money being paid by the Board, and the emigrants are landed at Hobart Town or Launceston free of expense to themselves.

Two daily and several other newspapers are published in Hobart Town, and four in Launceston.

The population of Tasmania is 104,217, of whom 55,117 are males, and 49,059 females. The death-rate of 1874 was 16 per 1,000 of the population. The black aboriginal population is reduced to one, a woman about 70 years of age. The number of houses at the date of the last census in February, 1870, was 20,364.

By the same census it appears that three hundred and sixteen churches and chapels have been erected in various parts of the colony, and the religious wants of the population are provided for by a large body of earnest ministers of all denominations.

"Few islands in the world can compare with Tasmania for salubrity. The temperature is so genial, and the air so pure, that the diseases which in England add so much to the general death-rate have here a minimum of intensity.

"No part of the world is perhaps more favourable to infant life than Tasmania. About nine out of every ten children survive the first year of life, and the mortality from that age up to about fourteen years old decreases at a wonderful rate. The deaths in 1,000 children between 3 and 14 years old only average about five per thousand annually."—*Dr. E. S. Hall, F. of Statist. and Epid. Socty.*

In addition to four principal grammar schools there are numerous private establishments, as well as 150 government schools under the Board of Education, having over 11,000 scholars on the rolls. Several scholarships are maintained by the colony, the best being two annual Tasmanian scholarships of the value of £200 per annum each, provided by the Government, and tenable at a British University for four years.

There are in addition thirty-two exhibitions from the public schools under the Board of Education to either of the four superior schools above mentioned, and tenable for four years.

The system of education in Tasmania is such that the son of the poorest person, if the boy possesses talent, may progress step by step, aided by the exhibitions and scholarships provided by the Government, till he obtains the means of securing an University education in the mother country.

Working Men's Clubs, Odd Fellows and Good Templars' Societies, Temperance Societies, Bible Societies, Freemasons' Lodges, Agricultural and Pastoral Associations, Gardeners' Societies, City Mission, Hospitals for the Sick and for the Insane, Benevolent Societies, an Asylum for Orphans, Asylums for the Destitute, Boys' Home, Female Industrial School Reformatory, &c., &c., have been established and are in active operation.

Practical Hints to Emigrants.

Tasmania is a colony wherein the small capitalist can find ready and remunerative return for his investments, and the steady farm labourer and the industrious domestic servant can get comfortable places with good wages.

To these three classes the information herein contained is alone intended to apply.

First, then, the Small Capitalist is reckoned to be a man having three or four hundred pounds in hand, after paying his family's passage-money to Tasmania, and who wishes to become a farmer on his own account. The most secure and expeditious way of bringing out money is by an order on one of the banks here, which can be readily obtained at the head offices in London. The person should first of all call upon the Agents for Tasmania in London, who will give him information as to how he should act. These Agents are The Emigrant and Colonists' Aid Corporation (Limited), 25, Queen Anne's Gate, Westminster.

On landing in Tasmania, and taking lodgings according to his means, the emigrant should at once call on the Immigration Agent at Hobart Town, who will give him advice, and refer him to the Surveyor-General for information as to the land regulations,—the extent and locality of available land,—the prices and regulations of sale,—and the name and residence of the surveyor of the district in which the emigrant may decide to settle. If this should be in Northern Tasmania, he can apply to the Launceston Immigration Agent, or to the Deputy-Commissioner of Crown Lands, who has in his possession all charts, &c., of the Northern Counties. He is advised to place a certain sum in one of the Savings Banks as a stand-by, for which he will receive 4 per cent. interest.

Emigrants are advised not to cumber themselves before sailing with large agricultural implements. These can be obtained in the colony better adapted to the rough lands on which they are to be used. Seeds of all sorts are cheaper than in England, and more likely to be pure and genuine than those sent out to the colony, which are almost always damaged or adulterated.

From forty to fifty shillings will suffice to clear from underwood and grass an acre of good selected land, and to ring or bark the big trees; reserving to a future day the task of cutting them down or burning.

The average crop from rich newly cultivated land is 25 bushels of wheat, 25 of barley, 26 of oats, potatoes 3 to 10 tons. These, however, have been very largely exceeded in good seasons and good situations, *viz.*, 50 bushels wheat, 60 barley, 100 bushels oats, 15 tons potatoes, 37 tons carrots, 70 tons of mangolds. Individual specimens of mangolds 126 lb. weight, turnips 90 lb., carrots 18 lb., potatoes 5 lb., and pumpkins of 120 lb., have been exhibited in Hobart Town. If the farmer is a worker, his crop ought to be ready for market soon after his second instalment is due. A sufficient cottage can be erected in the bush for about £50;

and while his wife managed the household cookery and the children, the father and the boys could use their bill-hooks according to size, and then burn off at night the rubbish collected by day. Of course all have to *work*. The richest settlers in Tasmania, who have made their thousands, have not been *idlers*. Many a rich settler knows how to drive and hold a plough, and has done it for years; many a rich settler's wife knows how to cook a dinner for the farming men, and has done it for years; and such knowledge, once acquired, is always ready for occasion.

Upon the head of tillage, it is a man's own fault, if, in an average of seasons, he be not abundantly repaid for whatever he does in cultivating the earth. For all sorts of grain that are usual in Great Britain—such as wheat, barley, oats, rye, and for various kinds of pulse—both the soil and climate are wonderfully well adapted; and, where proper tillage has been attended to, the returns have always proved satisfactory. Where the land has been properly worked and rotation of crops attended to—the ground cleared of stumps and other obstructions—the growing crop preserved by a fence; where, in fact, industry and care have been manifested, the returns may be safely set down as equal to those derived per acre from the fair average land of the Mother Country. Not, however, in quantity only, but in quality, is the grain of Tasmania all that a farmer need desire. Few samples of wheat yield less than from sixty-two to sixty-four pounds per bushel—the average standard of sixty pounds, at which it is purchased by the public, being invariably found in favour of the grower; and when it comes to the meal tub it is found to be rather above the best wheat of English growth in the comparative quantity of bread produced from the same quantity of flour.

Certain soils in this colony are peculiarly favorable to the culture of the potatoe, and this esculent occupies a considerable amount of attention at the hands of some agriculturists.

Mangel wurzel and turnips are cultivated in nearly every part of the colony, and are found to answer extremely well.

The climate of Tasmania is peculiarly adapted for fruit growing, and there is a very large export trade in green fruits, apples especially, amounting in the twelve months ending 30th April 1875, to 145,948 bushels. Among the fruits grown in the innumerable orchards and gardens, the produce of which forms the main support of many industrious families, may be mentioned apples, pears, plums, peaches, apricots, strawberries, raspberries, walnuts, gooseberries, currants, cherries, &c., &c.

The small fruits are extensively converted into jams and jellies of which last season's export exceeded 1,200 tons from Hobart Town.

All kinds of vegetables are grown with success, and find a ready sale in the towns.

The next class to which advice is tendered is that of the AGRICULTURAL or FARM LABOURER.

A steady man can obtain from 10*s.* to 15*s.* a week wages, with quarters or a cottage, firing, water, and the following weekly rations of food, which vary on different farms, but are fully as follows:—10 to 12 lbs. of meat, 14 lbs. of flour, 2 lbs. of sugar, ¼ lb. tea, and he is generally allowed a bit of good ground for his vegetable garden. He has only to show an interest in his master's service, and be sober and honest, and his labours will be duly appreciated. He has visiting clergymen, if not close to a church; he has public schools in every district, open to his children at about 6*d.* per week; and medical men practising throughout the colony—these latter, however, do not flourish in the healthy interior. His hours of labour are not more than 60 a week at the furthest; and during shearing time or harvest there is always remunerative employment for his children down to 9 or 10 years of age, especially in the hop-growing districts and during the hop-picking season. There is also a good demand for boys of 12 to 14, who have gained a slight knowledge of farming and milking.

The third and last class is the HOUSEHOLD SERVANT, whose labours are the same here as in England, but whose wages and advantages are much greater. A respectable female servant can get from £20 to £30 a year according to her abilities, and good cooks and laundresses are much wanted; wages are usually paid monthly; the alternate Sunday afternoon out is commonly allowed, with occasional holidays; and, if well behaved and proper in her conduct, she enjoys almost a certainty of getting a respectable man for a husband.

A good sober man servant in a household receives high wages, if he is inclined to make himself generally useful.

But one thing is necessary to all emigrants on their arrival in Tasmania, and that is, to avoid loitering about the public houses with their attractions. The colonial ale is excellent in its quality and reasonable in price.

The emigrant who has a due regard to the interests of his family will avail himself of that great colonial Life Assurance Company, the Australian Mutual Provident Society, which has upwards of 20,000 members in the Colonies, and an income of £360,000 a year, with £1,500,000 invested in Government and other securities; or in the branch of the Liverpool, London, and Globe Company, both of which have large numbers of insurers in Tasmania. The Directors and Agents of these Companies and other Provident Societies are well known; and, for a few shillings a month, a father of a family can make provision to protect his wife and children from want when he shall be no longer able to do so.

The classes of the population more specially required in Tasmania at present are:—

1. Men with capital to invest.
2. Agricultural labourers, or persons accustomed to field labour or dairy farming, and miners.
3. Domestic servants, either male or female.

There are plenty of clerks, book-keepers, dressmakers, and needle-women, shopmen and shop-women.

Life and property are as secure as in Great Britain.

All our native trees and shrubs are evergreen, and the smaller shrubs are mostly aromatic and bear beautiful and variously-coloured flowers. "The English-looking cottages, snug farm-houses, large mansions surrounded by cultivated fields, the neat villages, and prominently placed churches, make the scenery very English, and altogether point to Tasmania as the Britain of the South."—*Sir Paul de Strzelecki, K.C.M.G.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

[ACCOUNT.]

General.

ENCOURAGEMENT TO BE AFFORDED TO THE USE, WHEN POSSIBLE, OF ARTICLES PRODUCED IN INDIA IN PREFERENCE TO THOSE OBTAINED FROM ENGLAND.

Circular No. 70 of 1876, dated Simla, the 26th October 1876.

Read again :—

Public Works Department Resolution Nos. 619—38 A-G, dated 20th July 1876.

Read also the following :—

Letter from Secretary to Government, North-Western Provinces, No. 335, dated 6th September 1876.
Letter from Secretary to Chief Commissioner, British Burmah, No. 3856, dated 7th September 1876.
Letter from Secretary to Government, Punjab, No. 4300, dated 23rd September 1876.
Letter from Secretary to Government, Punjab, No. 4240 A, dated 14th September 1876.

RESOLUTION.—In Public Works Department Resolution Nos. 619—38 A-G, dated 20th July 1876, a report was called for on the supplies which are now procured from England, but which can he obtained by manufacture in India. Some of the answers which have been received would appear to indicate a misapprehension of the real scope and object of the enquiries made, and His Honor the President in Council therefore considers it necessary to state that what is wanted is a full report on the subject from the several Governments and Administrations, and not merely copies of isolated reports from Executive Engineers.

2. The scope of the report should not be confined to a bald enumeration of what is obtained at present from England by indent on the Secretary of State, and what should be so obtained for the future, but should deal with the whole question of stores of Europe manufacture used in connection with public works. It should suggest and discuss whatever may seem possible on the way of substituting for them articles of local manufacture, and what steps should be taken by Government to encourage such manufacture.

3. Thus in the case of Tools and Plant, indents are sometimes received for transmission to the Secretary of State for such stores as spades, pickaxes, and shovels. His Honor the President in Council has no doubt that on enquiry it will be found that it is possible to obtain articles of local manufacture which will be sufficient for the purpose in view. What is wanted are suggestions to provide for this being done.

4. Then the demand of the Public Works Department for articles of small stores, such as bolts, screws, and nails, must necessarily be large. As a rule, the articles used are of Europe manufacture. The question of whether some practical measures should not be taken for using articles of local manufacture in preference is one that might well be considered at length.

5. Similarly in respect to iron girders, castings, and iron-work of all kinds, it is possibly the case that iron-work for the construction of bridges may not be procurable in sufficient quantities in India. But the Government of India sees no reason why this circumstance should deter enquiries being made whether by timely arrangements it will not be possible to obtain some of those articles by manufacture at the several Government workshops.

6. It is not the desire of the Government of India that articles of local manufacture should be used when they are greatly inferior to articles of English manufacture, or more costly, or not sufficiently good for practical purposes, when consequently their use would militate against the efficiency and economy of the work of the department. What is wanted is, that with due regard to economy and good workmanship, every encouragement should be afforded to the use of articles of local manufacture, and the object in view is to ascertain how such encouragement may best be afforded.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Punjab, in the Public Works Department, General and Irrigation Branches.
The Chief Commissioners of Oudh, Central Provinces, British Burmah, Mysore and Coorg, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.
The Superintendent of Port Blair, and Chief Commissioner, Andaman and Nicobar Islands.
The Director General of Telegraphs.
The Inspector General of Military Works.
The Director of State Railways.
The Director-in-Chief, Indo-European Telegraph.
The Director, Persian Telegraph.
The Deputy Director, Persian Gulf Telegraph.

ORDER.—Ordered, that this Resolution be forwarded to all Local Governments and Administrations and officers noted in the margin for information and guidance.

W. A. CROMMELIN, *Major-Genl., R.E.,*
Offg. Secretary to the Govt. of India.

G. H. D. WALKER,
Asst. Secy. to Govt., N. W. P., P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th NOVEMBER 1876.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Nov. 7th)	*Nil* in the District, but 0·2 at Masulipatam.	Two feet five inches water over anicut; canal and tank supplies insufficient; standing crops suffering very seriously from want of rain; very little of the later dry crops sown; markets generally badly supplied; prices high and still rising; cholera subsided; fever and small-pox here and there; dysentery and epizoötic aphtha slight; fodder and water very scarce in many taluks.
Kurnool („)	*Nil*	Season continues unfavourable; crops under canal, wet and dry, good, elsewhere withered, except in Pattikonda, where a light harvest of *jonna* has been obtained in some villages; prices rising; grain difficult to procure; water and pasture scanty; cattle being driven to Nallamallay Forests for grazing; fever ordinary; cholera in some villages of Ramalkota not severe; no water over Sunkesala anicut.
Cuddapah (Nov. 7th)	...	Rain crops same as former week; prices, sers per rupee, *cholum* 5½, *raggi* 5½, rice 4½, horse gram 6; imported grain considerable.
Bellary („ 6th)	*Nil*	Number of persons on relief works increasing; in and near Bellary 43,500, in taluks 51,600; food distributed to 7,000; cholum 7 sers per rupee at Bellary.
Tanjore („ 7th)	·02 at Negapatam, elsewhere none.	Rivers freshes have fallen; no supply to tanks; water over anicuts none; progress of cultivation much impeded for want of rain and freshes; standing crops withering for want of water; harvest, wet and dry crops yield not very good; pasture insufficient; markets fair supply; prices increasing rapidly; public health—cholera continues, seizures 24, deaths 24; fever and small-pox in some parts; cattle disease in some locality.
Madura („ 6th)	about 1·0 at Melur and Periakolam. *Nil* elsewhere.	Paddy seedling intended for transplantation and standing dry crop near perishing; prices continue rising.
Malabar (Nov. 7th)	*Nil*	Unfavourable for transplanting second crop; grain supply sufficient, but prices rising, owing to exportation to other districts; cholera in Kurumbranad Taluk; 5 deaths; cattle healthy; pasture indifferent. *General Remarks.*—General prospects gloomy every where and in many parts disastrous.
Bombay— (Nov. 9th)		
Sind („ 8th)		
Kurrachee ...	...	River at Kotree on 1st, 7 feet 8 inches against 8 feet on same date last year; slight rain in Dadu Taluka on 28th; one case of small-pox in Malir fatal; fever prevalent.
Shikarpur ...	...	Rabi sowings commenced; slight rain in Larkhana Taluka; some injury to rice crops by hail; fever prevalent.
Hyderabad ...	...	Rice slightly damaged in Guni Taluka; locusts in Taluka Badin; no damage done; *kharif* reapings nearly completed; *rabi* sowings progressive; fever continues also; cattle disease in Shadadpur Taluka; small-pox increasing in Hyderabad; 144 fresh cases; no deaths.
Upper Sind Frontier ...	...	Weather close; *kharif* crops being reaped; *rabi* sowings continue; fever prevailing.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	...	Outturn good; prices still rising.
Broach ...	...	Fever throughout Collectorate; several fatal cases in Broach.
Surat ...	...	No change, except fever in Pardi and other places.
Khandesh and Nasik.		
Khandesh ...	...	People in distress; *rabi* crops drying up, except in a few places; at Dhulia *bajri* 11½ sers (Bengal weight); wheat and *tur dal* 12 sers each; no rain.
Nasik ...	...	No rain; *rabi* crops withering; health good.
Konkan.		
Tanna ...	...	Reaping of early rice crops progressing; sowing of *rabi* commenced; prices of grain still rising in town of Tanna.
Deccan.		
Poona ...	...	No rain; distress great; crops drying up; *bajri* 9 (Indian) sers 3 tolas; *jowari* 9 sers 13 tolas; large importations of grain; market steady.
Ahmednagar ...	...	No rain; people in Shrigonda, Jamkhed, Karjat, and Kopargaon talukas leaving their villages; prospects bad; *bajri* 10½, *jowari* 11 sers of 80 tolas per rupee at Nagar; cholera in two talukas, cases 52, deaths 17.
Sholapur ...	...	Condition of the people almost as bad as possible; no crops; grain 5 sers; no rain.
Satara ...	...	No rain; weather cloudy; withered crops used as fodder for cattle; considerable distress in the Tasgaon taluka; 13 deaths from cholera.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Southern Marhatta Country.		
Belgaum ...	*Nil*	*Kharif* crops mostly withered except on banks of rivers; little *rabi* sown; *jowari* staple food 6 sers; rice 5½; wheat 6 sers of 80 tolas; all grain scarce in market; general distress increasing daily.
Dharwar ...	*Nil*	Prospects continue very bad; distress increasing owing to scarcity of food grain, water, and fodder; slight cholera in Navalgund and one village of Kod taluka.
Kanara ...	...	Rice harvest on coast nearly completed.
Kaladgi (Nov. 6th)	...	No rain; *rabi* season nearly over; slight *rabi* sown near banks of rivers withering; much scarcity of provisions and fodder; distress increasing; cholera abating; cattle dying.
Kattywar and Gaekwar's Territory.		
Rajkot ...	...	*Rabi* crops thriving; weather hot; health good.
Wadhwan ...	...	*Kharif* crops being harvested; weather and health good.
Baroda ...	...	Reaping operations continue; cotton crops healthy; prices of grain risen much. *General Remarks.*—Small-pox increasing in Hyderabad; crops as before in Sind and Guzerat, where fever is prevalent; distress in Deccan and Southern Mahratta Country increasing; no rain; season for sowing *rabi* nearly past without crop being sown; where it is sown it is withering; great scarcity of water and fodder in some of the Collectorates.
Bengal— (Nov. 9th)		
Chittagong ...	Present week *nil.* Previous week 2·60	At about midnight on Tuesday, the 31st ultimo, the district was visited by a cyclone followed by a tidal wave of great height. The extent of the damage done is not yet accurately known, but will be reported in due course. The rice, where transplanted after August, will recover, and with fine weather it is to be hoped there will be in most places a crop sufficient for local wants. In the littoral mouzahs the fields have been covered by salt water, and though it is now rapidly running off, considerable loss must be experienced. Many hundreds of plantain trees and numerous fruit trees have been blown down. It is too early in the season for cold weather crops to have suffered to any extent, but in the absence of reports it is impossible to say how sugarcane and tea may have come off.
Noakholly ...	5·58	The weather was seasonable up to the afternoon of the 31st October but was cloudy and threatening at the close. In the evening it rained, and by 11 P.M. the wind, which had been already blowing a gale, culminated in a cyclone which raged until 3-30 A.M., and was followed soon after by a general inundation from the south-west. The wind was variable. It blew first from the east, then from the north, then north-east and due east, after which there was a lull for about half an hour, then it again began to blow hard from the west at 4 A.M., accompanied with a general inundation some eight or ten miles inland, which appeared at the sudder station shortly before dawn. Subsequently the wind changed its direction from west to north-west, and continued high till 11 A.M., when it gradually fell. The *amun* crops on the river-face—country south and south-west of the station—have been overwhelmed by this incursion of the river and the sea. The water is draining off quickly, and the extent of the damage cannot now be estimated. The destruction of houses, trees, cattle, and boats has been very great, and many lives have been lost.
Chittagong Hill Tracts...	*Nil*	Weather cloudy on the 29th, 30th, and 31st October. The morning are cool and pleasant; cotton is being gathered in small quantities Land is being ploughed for the sowing of mustard and other winter crops.
Hil Tpperah ...	2·18	Not much rain fell during the week. There was a hurricane on the night of the 31st October and the morning of the 1st instant, and some damage was done to the paddy crop.
Backergunge ...	3·41	Between 11 P.M. of the 31st ultimo and 4½ A.M. of the 1st instant, a violent hurricane passed over the district, the wind blowing from the north, north-east, east, and south-east, and back again to the and some say to the north-west; there has been a great destruction of huts and of fruit and timber trees. About 90 per cent. of the huts in the area affected were blown down. Only one death has been yet reported from Potuakhali, but loss of life upon the rivers is apprehended. The rice crop has of course been damaged, but it is hoped that the damage is slight. The people have been put to distress, which, it is hoped, will be only temporary; circumstantial reports from the interior have not yet been received; a report has come in that a storm-wave came up the Titulia and Dukhin Shabazpore rivers, and did very great mischief.
Furreedpore ...	1·09	The rainfall at Goalundo is ·69 and at Madaripore 1·91; the rainfall at Goalundo the week before last was ·61, instead of 3·83, as erroneously reported. There was a cyclone from about 10 P.M. of the 31st October to about 5 P.M. of the 1st instant. It blew very hard between 12 and 3 o'clock at night. The normal point of the barometer here is 30·15, and it fell to 29·46 at the time. The wind did but a little damage. A constable was killed in Madaripore. The cyclone was felt like a stiff gale at Goalundo on the night of the 31st, and the steamers had to shift anchorage.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Dacca ...	*Nil*	Weather fine since the storm on Tuesday night. The damage done to the crops by the storm will be fully compensated by the good done by the rain.
Mymensingh ...	·26	Weather stormy on the 31st ultimo and 1st instant; since then fine. The state and prospects of the crops are favourable on all sides. The winter crops are being sown, and some have already sprouted.
Tipperah ...	Present week *Nil.* Previous week 3·73	Weather still warm in the day time. The crops were promising very well till the storm of the 31st ultimo and 1st instant. This storm has certainly done some damage, but how much is not yet stated.
24-Pergunnahs ...	*Nil*	Weather cloudy and stormy on Monday, Tuesday, and Wednesday clear and fine during the latter half of the week. The late gale has somewhat damaged the crops in places. Fever still prevails at Satkhira, Buseerhat, and Barripore.
Jessore ...	1·12	Weather cloudy, with rain on the 31st October, followed that night by storm; since clear and dry. In Khoolna and Bagirhat, where the storm of the 31st October was much more violent than in the rest of the district, the *amun* crops are reported to have sustained some loss.
Nuddea ...	·14	There was a little rain, with high wind, in the early part of the week. Since then the weather has become settled again. The prospects of the rice continue very good, and the weather has been so far very favourable for the cold-weather crops.
Moorshedabad ...	·11	Weather cloudy at the beginning of the week. It is getting cold. The present prospects of the crops are as good as can be desired.
Pubna ...	·51	Weather stormy on the 31st October. The cold weather has now fairly set in. ·7 of rain fell in Serajgunge. The prospects of the crops are generally very good, in spite of partial damage to the *amun* on the higher lands owing to the early fall of the rivers. There is much fever about, as usual at this season. A few sporadic cases of cholera reported from Bera and Handial.
Rajshahye ...	·20	There has been very slight rain during the week in all the stations except Tanore, Godagaree, and Bagmara. The standing crops promise well. The sowing of cereals is nearly finished, and that of mustard and rye is going on. Fever is very prevalent, and a few cases of cholera are reported from Beauleah, Poothea, Belmaria, Singrah, Burrigaon, and Nattore.
Bogra ...	Not appreciable by the rain guage.	The first two days of the week were cloudy, but with very little rain. Only few drops fell, which were not appreciable by the rain gauge. Wind from the east and north-east prevailing. All the winter crops are in a very prosperous condition, the *amun* being remarkably forward.
Maldah ...	*Nil*	Weather fair. The mornings and evenings are getting cooler. State and prospects of the crops are excellent.
Dinagepore ...	*Nil*	Weather getting cold. North wind prevailing. The prospects of rice and sugarcane continue most favourable. Fever continues.
Rungpore ...	Previous week *nil.* Present week *nil.*	Weather cool and breezy. The *rabi* sowings have commenced. Tobacco and mustard have been sown for the third time with every prospect of success. The prospects of *amun* are good, except in the north-east of the district.
Cooch Behar ...	*Nil*	The weather is rapidly becoming cool. The last two days of the week were windy, with light clouds. The prospects of the *dhan* crop are everywhere very good. Tobacco and mustard have suffered much from the late rains. Public health is good.
Julpigoree ...	*Nil*	Weather seasonable. All the crops are in a highly satisfactory condition. General health is good.
Darjeeling ...	*Nil*	The cold weather has decidedly set in. All the crops throughout the district are progressing favourably.
Midnapore ...	*Nil*	Some rain fell on the 30th and 31st October, over an inch in the south of the district, and the sky was threatening; the high wind, however, did very little harm, and the crop, which is now being reaped, may be considered a bumper one. The prospects of the cold weather crops are very good. The season is very feverish.
Howrah ...	·34	Weather cloudy, and there was a tolerably hard gale on the 31st October at night. The gale is believed to have done some slight injury to the crops.
Hooghly ...	*Nil*	Weather cloudy on the 30th October; drizzling rain on the 31st, with a gale blowing from the north-east; bright and cool since the 1st instant. About one anna of the *amun* crop has been damaged by the gale of the 31st; in other respects the prospects of this crop remain good; the reaping of *aous* is almost over. Fever is on the increase.
Burdwan ...	*Nil*	The rainfall at Culna has been ·27, and at Cutwa ·65. *Beali* and *kartik sali* are being cut. Fever is prevalent.
Bankoora ...	·44	Slight showers fell on the 30th and 31st October; the rest of the week was dry and cool. The prospects of the rice crop continue as favourable as possible.
Beerbhoom ...	*Nil*	Weather dry at head-quarters; there was, however, some rain in the interior. State and prospects of the crops continue excellent; the reaping of the early November crops (here called *aous*) has commenced.
Sonthal Pergunnahs ...	*Nil*	Weather dry; not very cold. All crops are excellent.
Bhagulpore ...	*Nil*	All the crops are reported to be very good, and the prospects very satisfactory. The general health is also very good.
Monghyr ...	*Nil*	Weather fair. The prospects of the crops continue good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Purneah ...	*Nil*	The cold weather has fairly set in. The crops are every thing that can be desired. Health of the district is good.
Durbhanga ...	*Nil*	Weather clear and cool; the harvest prospects seem to be quite satisfactory.
Mozufferpore ...	Return not received.	Weather cool and pleasant; the prospects of the crops continue most favourable; the winter crop will be ready for harvesting ere long; the *rabi* sowings are progressing; public health is good.
Sarun ...	*Nil*	Weather clear, bright, and seasonable; west wind blowing; the prospect of the *aghani* rice is generally favourable; sowings of the *rabi* crops are going on; the early sowings have germinated well; fields are being prepared for indigo; prices are favourable.
Chumparun ...	*Nil*	The cold weather has now fairly set in; the prospects of the crops are excellent.
Patna ...	*Nil*	Weather seasonable; the prospects of rice are very favourable; health of the district is good.
Gya ...	*Nil*	Weather cool and bright; the prospects of the rice are excellent, and a full harvest is expected in most parts of the district. The cultivation of the *rabi* crops are going on steadily.
Shahabad ...	Return not received.	The sun is still powerful, but the nights are setting in cold; the state of the crops continues favourable; the *rabi* has been sown, and in some places is germinating.
Hazáreebagh ...	*Nil*	Weather seasonable; prospects of the crops continue most favourable.
Lohardugga ...	*Nil*	Weather seasonable; prospects of all crops on the ground continues most favourable.
Manbhoom ...	*Nil*	Weather seasonable; the prospects of the crops are very promising; the November *dhan* (*kartika* crop) is being reaped; the *rabi* prospects are also very good.
Singbhoom ...	·14	Weather seasonable; the prospects of the crops continue very favourable; fever is still very prevalent.
Balasore ...	*Nil*	The weather in the earlier part of the week was cloudy and unsettled, with slight rain and a high wind on the 30th ultimo; it has since become fine and settled again; the crops are very promising, and the general health is good.
Cuttack ...	*Nil*	Weather cloudy and unsettled in the early part of the week; clear and cold in the latter part. A cyclone visited False Point on Tuesday morning, and its effects were felt slightly as far inland as Kendrapara. It has not done any damage to the crops, but has done some mischief to the huts and trees. The late rice is progressing favourably, and the winter crops are coming on well. Public health is good.
Pooree ...	·57	**Weather fair; cloudy and stormy on the 30th and 31st October. The rainfall on the 30th was general, and did much good to the crops, which otherwise must have suffered to some extent. There was rain in Khoordah, and the state of the crops is reported to be improving. There have been a few cases of cholera.**
		General Remarks.—There has been rain in most of the Bengal districts and in Orissa. In Behar the week was without rain. There was a storm on the night of the 31st October in Bengal and Orissa. In the eastern districts, more so in Backergunge, Noakhally, Chittagong, and parts of Furreedpore, there was a cyclone, and the rice crop must have sustained some damage. The late rice promises generally to be a very good crop. The sowing of the cold weather crops is nearly finished, and their prospects are at present satisfactory.
N. W. Provinces—		
Benares (Nov. 6)	...	*Rabi* being sown; *kharif* nearly cut.
Allahabad („ 8)	...	No change; much grain exported towards Bombay.
Agra („ 8)	...	No rain; prospects good.
Bareilly („ 8)	...	No rain.
Almora („ 6)	...	Fine and seasonable.
Punjab— (Nov. 9th)		
Delhi ...	*Nil*	Health good.
Hissar ...	*Nil*	*Kharif* being harvested; *rabi* sowing in progress; Fever prevalent.
Umballa ...	*Nil*	Crops and health good.
Jullundur ...	*Nil*	Crops good; fever still prevalent.
Lahore ...	*Nil*	Crops good; health improving.
Mooltan ...	*Nil*	*Rabi* being sown; health bad.
Dera Ismail Khan ...	*Nil*	Harvest good; some cases of cholera.
Rawalpindi ...	0·30	Prospects good; health fair.
Peshawar ...	...	Return not received.
		General Remarks.—Agriculture prospects good; public health still bad, but improving.
Oudh— (Nov. 8)		
Lucknow ...	*Nil*	Prospects continue favourable; health good.
Sitapur ...		
Fyzabad ...		
Central Provinces—		
Upper Godávari (Nov. 4th)	...	Cool; *kharif* crops being reaped; rain required for *rabi*; health good; prices rising.
Sambalpur ...	...	Cool; prospects good; fever prevalent.
Bilaspur ...	...	Prospects favourable; fever continues; prices rising.
Raipur ...	...	Prospects favourable; *rabi* sowings continue; prices rising owing to exports to Nagpur and Bombay.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—continued.		
Bálághát ...	...	Clear; early rice cutting; *rabi* sowings continue; fever prevalent; prices rising.
Chanda (Nov. 5th)	...	*Kharif* good; early rice cutting; *rabi* sowings continue; prices; rising.
Chindwara ...	...	Inferior *kharif* crops cutting; *rabi* good; cholera at Bichwa; prices risen.
Betul (Nov. 6th)	...	Prospects favourable; cholera and cow-pox continue; prices risen.
Bhandara („ 7th)	...	Early rice harvesting; *rabi* good; cholera and fever continue; prices risen.
Nagpur („ 8th)	...	Prospects of *kharif* and *rabi* good; cholera broken out at Ramtek and Nagpur; prices risen.
Wardha ...	...	*Rabi* sowings completed; cotton picking continues; cholera lingering; prices risen.
Nimar ...	...	Prospects of *kharif* and *rabi* good; cholera ceased; small-pox continues.
Hoshangabad ...	...	Prospects favourable; prices risen owing to exports to Bombay.
Narsinghpur ...	...	Prospects good; prices slightly fallen owing to temporary cessation of exports towards Bombay.
Jubbulpore ...	...	*Kharif* crops harvesting; *rabi* sowings continue; fever and cattle disease prevalent; prices rising owing to exports towards Bombay.
Saugor ...	...	Early rice and *kodo* reaped; *rabi* sowings approaching completion; health good; prices rising.
Seoni ...	...	*Rabi* doing well; cholera continues; prices rising.
Damoh ...	...	*Kharif* crops cutting; *rabi* sowings continue; cattle disease prevalent; prices rising.
Mandla ...	...	*Kharif* cutting; *rabi* sowings continue; cattle disease prevalent prices stationary.
		General Remarks.—Crops good; prospects favourable; prices everywhere rising owing to large exports westwards.
British Burma— (Nov. 8th)		
Arrakan Division ...	...	Eleven deaths from sporadic cholera in Myabong and Cheduba townships, Kyoukphyoo district, otherwise public health good; cattle disease continues in parts of Akyab district; paddy crops continue to promise well.
Pegu Division.		
Rangoon ...	...	Crops still favourably reported on; public health good; a few cases of cholera at Syriam.
Thonkwa ...	...	Health and crops good.
Bassein ...	...	No cattle disease; health generally good; crops promising favourably.
Henzada ...	...	Crops prospects good; slight cattle disease; in Monio town two fatal cases of cholera reported from Kanoung and Kyanghin; otherwise public health good.
Prome ...	...	Health generally good; two deaths from cholera at Padkung; crops require more rain.
Thayetmyo ...	...	Health good; more rain required.
Tenasserim Division ...	...	Public health good; agricultural prospects favourable; early cessation of rain becoming to be felt in portions of Amherst and Tonghoo districts; rats again destroying townyas in Tonghoo district; copious rainfall since 28th October in Rangoon and elsewhere.
Assam—		
Gauhati (Nov. 9th)	*Nil*	Mornings foggy; days cool and clear; prospects of rice and tea same as before; public health good.
Sylhet ...	*Nil*	Prospects excellent.
Mysore and Coorg— (Nov. 9th)		
Bangalore ...	*Nil*	The loss of crops has been general, and serious distress is felt by the people, who are migrating in large numbers to the Western Ghât Talúks in search of fodder for their cattle; relief works largely extended, and large imports of grain to Bangalore continue; but prices are still rising; public health generally good.
Coorg ...	*Nil*	
Hyderabad Assigned Districts—		
Amráoti ...	...	*Jowari* crops still unfavourable in some places, in others fair; rain urgently required for *rabi*; grain exportation continues.
Central India— (Nov. 8th)		
Indore ...	...	Health and prospects good throughout Central India.
Gwalior ...	...	
Neemuch ...	...	
Rutlam ...	...	
Sutna ...	...	
Rajputana—		
Deoli (Nov. 4th)	*Nil*	Fever and bowel complaints prevalent in Kota; heat during day, cold at nights; crops favourable.
Ajmere ...	...	Weather cooler; health fair; outturn of *kharif* poor.
Jeypore ...	...	Agricultural prospects continue favourable; health good.
Bhurtpore ...	...	No change; weather seasonable.
Ulwur ...	...	Prospects fair; locusts have done slight damage in two tehsils.

T. C. HOPE,
Offg. Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th NOVEMBER 1876.

GENERAL REMARKS.—In Madras there has been abundant rain in Tanjore and two inches in Madura: slight and partial falls are reported from Kistna, Kurnool, Cuddapah and Bellary, but there is no change in prospects in those districts. In Mysore half an inch of rain is reported from Bangalore: prospects have not improved. In Bombay prospects continue good in Sind and Guzerat; in Dharwar, Násik, Poona, Ahmednagar and Satara a little rain fell, but not enough to do much good; the distress continues unabated. In the Central Provinces there has been no rain, but except in the Godávari and Nimár districts no apprehensions are expressed at its absence. In Central India rain fell only at Rutlam, and in Rajputana a little at Ajmere and Tonk; prospects are good. In Berar rain is much required for the *rabi*. No rain fell in Bengal during the week, except in the Chittagong Hill Tracts and Hill Tipperah: prospects are excellent every where except in the tracts devastated by the recent cyclone and storm-wave. No rain is reported from Assam, the North-Western Provinces or Oudh, where prospects are good. In the Punjab showers fell only in Ráwalpindi.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Nov. 13th)	*Nil* at Masulipatam; ·39 at Bapatla; ·35 at Palnad; ·40 at Vinukonda; ·10 at Narsarowpett; ·05 at Sattanapalli.	No rain elsewhere; 2 feet, 3 inches water over anicut; canal supplies insufficient; very little of later dry crops sown; even where rain has fallen, more is wanted for the standing crops; markets generally ill supplied; prices have a further tendency upwards; fever and small-pox slight; dysentery and epizoötic aphtha in some taluks; fodder very scarce, and water also in many taluks.
Kurnool („ 14th)	About ·5 in Kurnool on the 9th.	Slight and partial fall of rain in Ramalkota and Sirwell taluks none elsewhere; crops under canal, wet and dry, good; *korra*, *arika*, and *jonna* being harvested in some canal villages; in others, crops withered and stalks pulled out for fodder; prices high; cholera light in Ramalkota and Markapur; water and pasture scanty; cattle sent to the Nallamallays for grazing; no water over Sunkesala anicut.
Cuddapah („ 14th)	...	Showers of rain in some parts; crops same as last week; rice 5 seers per rupee, *raggi* 6¼, *sajjulu* 6, *cholum* 5¾, horse-gram 6.
Bellary („ 13th)	·8 at Ghooty	Partial fall of rain; crops withering in some places, being harvested in others; outturn poor; prices rising; 53,000 persons on relief works in Bellary; getting them rapidly out of town; cholera in Adoni, Ghooty, Tadpatry, Anatapore, and Bellary taluks; health of district generally pretty good; increase of medical staff advisable; cattle suffering from want of pasture; crime on the increase.
Tanjore („ 14th)	10·30 at Negapatam.	Rain elsewhere moderate; rivers and freshes have fallen; very small supply to few tanks; water over anicuts none; cultivation, wet crops in a few taluks, standing crops little better than before; harvest, wet and dry crops; yield not very good; markets well supplied, prices beginning to fall; cholera abated, one seizure, one death; small-pox in some parts; pasture insufficient; cattle disease in some localities.
Madura („ 13th)	2·0 in Ramnad.	Rain slight in Dindigul and Periacolam; wet cultivation proceeding only in Periacolam, but tanks want water there; also dry crops withered in most parts; prices still rising.
Malabar („ 14th)	*Nil*	No rain, most unfavourable for all cultivation, but especially second crops; grain supply sufficient, but prices still rising owing to exportation to other districts; cholera in Kurumbranad and Ponany taluks, 19 deaths; cattle healthy; pasture sufficient.
		General Prospects.—Seasonable rain in Tanjore, in which district prices are falling and cholera abating; elsewhere no change.
Bombay—		
Sind. (Nov. 16th)		
Kurrachee ...	Rain general on 8th and 9th.	River at Kotri on 13th, 6 feet 7 inches; severe thunder-storm at Malir; much cattle disease in districts; fever prevalent; small-pox in Guja; locusts appeared in Shahbandar; no damage.
Shikárpur ...	Rain on 8th, 9th, and 10th.	*Rabi* crops healthy; disease among cattle; rain damaged *kharif* grain; fever and cold prevalent.
Hyderabad ...	...	Small-pox in Hyderabad; 119 fresh cases; 7 deaths.
Upper Sind Frontier ...	Drizzling rain on 9th.	Weather close; nights cold; *kharif* crops being reaped; *rabi* sowings continue; fever general.
Guzerat.		
Ahmedabad ...	...	*Rabi* crops doing well.
Kaira ...	...	*Rabi* sowing continues; cotton thriving; prices still high.
Surat ...	...	Certain crops suffered from want of last shower; fever continues; prices of grain rising everywhere.
Broach ...	...	Fever decreasing; crops good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Khandesh and Násik.		
Khandesh ...	*Nil*	Distress increasing; *rabi* crops prematurely drying up.
Násik ...	·30 to ·40 in Násik, Sinnar, Chandor, Niphar, and Dindori.	People in good health, but despondent; fodder scarce in Báglán; *rabi* little sown, and that withering.
Konkan.		
Tanna ...	...	Reaping of *kharif* crops progressing; sowing of *rabi* commenced; public health good.
Deccan.		
Poona ...	Slight rain in 4 Talukas	Distress great.
Ahmednagar ...	·26	People of affected villages leaving their homes in search of livelihood; fall of rain benefited *rabi* crops slightly in some places.
Sholapur ...	·07 at Malsiras, none elsewhere.	Condition of people and crops as before.
Satara ...	·35	Total 31·16 people in distress; crops withering; partial fall in Khatan and Patan Talukas; 2 deaths from cholera.
Southern Marhatta Country.		
Belgaum ...	*Nil*	Distress increasing; no change in condition of crops.
Dharwar ...	·67	Total 22·05. Partial rain in Dharwar Taluka; doing good in some northern villages; crops as before; rice and early *jowari* being harvested in Dharwar, Kalghatgi, Bankápur, Hángal, Kod, Karajgi, and Ránibennur; harvesting giving some employment; fodder and water exceedingly scarce; great distress in Ron.
Kanara ...	...	General rise in price of grain.
Kaladgi ...	*Nil*	Public health generally good; surviving *kharif* being reaped, outturn scarcely anything; no improvement in *rabi*; water supplies failing.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Weather, crops, and health same as before.
Wadhwán ...	...	Weather, health, and cotton good; reaping of first crops completed.
Baroda ...	...	Prices of grain slightly fallen; cotton crops healthy.
		General Remarks.—Fever very prevalent in Sind, and small-pox increasing at Hyderabad; crops in Sind and Guzerat doing well; slight shower of rain in Násik, Ahmednagar, Poona, Satara, and Dharwar, but of no real use; distress prevalent and wide-spread in Deccan and Southern Mahratta Country.
Bengal—		
Chittagong ...	*Nil*	Weather—the days are fine and hot; the evenings and nights are cold. It is too early yet to attempt to form a trustworthy estimate of the damage done by the late cyclone. In Kumeria and Seetacoond the villages along the coast have been swept away, the cattle have been drowned, and the crops totally destroyed; further south the things are a little better. In Anwara the crop should be from two to four annas, and in Banskhali and Juldi from four to six annas. It cannot be more than eight annas anywhere in the Sudder sub-division—rather less in many places. The damage is less in the south of Satkanea, the centre of the cyclone having probably passed to the north-west, whence the weekly report has not yet been received. Cholera of a bad type has broken out at Seetacoond, and in Bakulea and Chandgaon nearer the town.
Noakholly ...	*Nil*	Weather fair with bright sunshine, and warm for this season; much of the late rice in the inundated tract on the coast and in the islands has been destroyed by the salt-flood; the crops in the north of the station have not been much damaged; cholera in epidemic form has broken out in the islands and in the inundated tract throughout.
Chittagong Hill Tracts...	2	A cyclone passed over the station in the morning of the 1st instant. It commenced at about 1 A. M., and ceased at about 8 A. M. The weather was cloudy, and slight showers fell on that day and the day preceding; the fall is registered two inches in twenty-four hours. The cyclone has caused much damage to the cotton plants and pods in every *joom*. The rainfall, however, did some good to the paddy sown by the plough cultivators on the low lands. The cyclone has also damaged the houses, but no loss of life within the district is reported as yet.
Hill Tipperah ...	1·92	Occasional showers fell during the week; between a quarter and a half of the paddy has been blasted and destroyed by the storm of the 31st ultimo, the crop being in ear at the time. There has been, however, no loss of life, and little injury to other properties.
Backergunge ...	*Nil*	The state of the district is not so satisfactory as it has been. The cyclone and storm-wave of the 31st ultimo and 1st instant have had a most injurious and in many cases disastrous effect. The whole of Dakhin Shabazpore, Golachipa, and Bowful, and portions of Mendigunge and Mirzagunge (a tract populated by about 60,000

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		inhabitants), were most calamitously struck by a storm-wave, or rather succession of waves, which has inflicted a loss of human life, and such an amount of misery and disaster that, in order to save the remainder, the Collector has been forced to set on foot relief operations. The crops have been greatly injured. The extent of the disaster cannot yet be ascertained. A great deal of sickness prevails. The Deputy Collector of Patuakhali reports that on the night of the 31st ultimo there was a furious cyclone attended by a storm-wave which swept over all the islands and the eastern and southern portions of the Bowful and Golachipa thanas. The wave did not penetrate much beyond five or six miles inland. The loss of human life in Mirzagunge and Gulsakhali is not considerable, but huts and trees have been blown down, and the loss of cattle is frightful. Wherever the storm-wave passed, not a third of the population is believed to be surviving, and the islands have barely one-fourth. The stench from the putrifying bodies is insufferable, and a bad and general outbreak of cholera is hourly expected. The *aghani* crops have been injured to the extent of twelve annas, but the injury done to the *panshidhan* is not more than four annas. Relief in food, clothing, and medicine has been despatched to all the distressed parts.
Furreedpore ...	*Nil*	Weather fair and seasonable; state and prospects of the crops are good; cholera has broken out in several parts of the district.
Dacca ...	*Nil*	Weather seasonable; state and prospects of the crops are good; a good deal of cholera prevails in all parts of the district.
Mymensingh ...	*Nil*	Weather fine and seasonable; the late rice crop is a very fine one on all sides; the cold-weather crops are being sown.
Tipperah ...	*Nil*	Weather cool in the morning and evening; it is still warm in the day time. The damage to *amun* is probably about three annas, but the outturn will still be fully an average one.
24-Pergunnahs ...	*Nil*	Weather seasonable; the damage done to the crops by the storm of the 31st October was slight; prospects of the *amun*, or late rice, on the whole continue favourable; fever still continues at Barripore, Bussirhat, and Satkhira.
Jessore ...	*Nil*	Weather seasonable; in the Khoolnah sub-division the loss to the crops caused by the late cyclone has not yet been fully ascertained; in the Bagirhat sub-division, which suffered more, it is stated that the high land rice has been injured to the extent of four annas, but that the low land rice, of which much the greater portion of the crop consists, has not sustained much damage. The state and prospects of the crops in the rest of the district continue to be favourable. In Morrelgunge and Malahat great numbers of houses have been levelled to the ground, and many heads of cattle are stated to have died, but no loss to human life has been sustained.
Nuddea ...	*Nil*	Weather clear and seasonable; the late rice promises very well, and the cold weather crops are flourishing.
Moorshedabad ...	*Nil*	Weather seasonable; prospects of the crops continue to be good; prices of rice have slightly risen; cholera has broken out in the Sudder sub-division.
Pubna ...	*Nil*	Weather cold and fine; the harvest of the early *amun* has commenced, and the winter crops promise well; fever is prevalent, and there are sporadic cases of cholera in Faridpore, Bera, and Handial.
Rajshahye ...	*Nil*	Weather cool and clear; the prospect of the standing *amun* crop is good; the sowing of cereals is nearly finished, and that of mustard and rye is going on; there have been a good many cases of fever in Beauleah, and a few cases of cholera in Nattore, Pooteah, and Bhundaikhara.
Bogra ...	*Nil*	Weather cloudy towards the end of the week; all the winter crops are in a very prosperous condition, the *amun* being remarkably forward.
Maldah ...	*Nil*	Weather fair, gleams of cloud and foggy mornings for the last two or three days; state and prospects of the crops are excellent.
Dinagepore ...	*Nil*	Weather cooler daily; the prospects of all the crops are very good.
Rungpore ...	*Nil*	Weather seasonable; the *rabi* sowings are in progress; tobacco and mustard oil seed have been sown for the third time with every prospect of success; the prospects of *amun* are good, except in the north-east of the district.
Cooch Behar ...	*Nil*	Weather fair; no rain, and somewhat warmer than past week. There is little to add to the former report; the prospects are generally good. The tobacco seedlings are being planted; fever is prevalent as usual at this season of the year.
Jalpáiguri ...	*Nil*	Weather two cloudy days; otherwise fine and cool; the prospects of all the crops are all that can be desired.
Darjeeling ...	*Nil*	Weather fair and bright; getting very cold; the prospect of the crops throughout the district is very good.
Midnapore ...	*Nil*	Weather fair and fine, but warmer than before. All cold weather crops, except sugarcane, are promising well. Prices are rising, and husked rice is being exported in large quantities. The prospect of higher prices, combined with a splendid crop, promises a most favourable season to the cultivators.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Howrah ...	*Nil*	Weather unusually warm for the time of the year. The injury done by the late high wind is really very slight; the *amun* crop is above the average.
Hooghly ...	*Nil*	Weather seasonable; the *rabi* sowings are still going on; the *aous* crop has been gathered with very good outturn; the early *amun (kalay, kartic, &c.)* is being reaped, and the *amun* proper is in ear; brinjals, radish, and *kachu* have turned out well and are being gathered. The fever is very bad at Connagore and in certain villages of the Boidyabatty thana.
Burdwan ...	*Nil*	Prospects of the crops are very good; fever is prevalent.
Bankoora ...	*Nil*	Weather dry and cool; state and prospects of the crops are good; the *nuan*, or the intermediate rice crop, is being reaped.
Beerbhoom ...	*Nil*	Weather clear and cool; state and prospects of the crops continue excellent.
Sonthal Pergunnahs ...	*Nil*	Weather dry and not very cold; all the crops are well above the average, and are estimated to be fourteen annas.
Bhágalpore ...	*Nil*	All the crops continue satisfactory; the general health is very good.
Monghyr ...	*Nil*	Weather seasonable; the prospects of the crops continue good. The Collector, who has been in the principal rice tract of the district found the crop to be all that can be desired.
Purneah ...	*Nil*	Weather seasonable and cold; the winter rice is very good; in Arareah the *rabi* sowings have begun.
Durbhanga ...	*Nil*	Weather clear and cool; the prospects of the winter rice are satisfactory, and the sowings of the *rabi* crops are in progress.
Mozufferpore ...	Return not received.	Weather seasonable and cold; the prospects of the *aghani* crops are excellent throughout the district; the *rabi* sowings are progressing; prices of food-grains are favourable; health of the district is good.
Sarun ...	*Nil*	Weather cool, bright, and clear; the sky was overcast on the 9th instant, and a few drops of rain fell in the night. ·09 is registered at Sewan; the wind is blowing from the west, and the cold weather has set in; the prospects of the *aghani* rice are generally favourable; the *rabi* crops are still being sown, and the early sowings are coming on well. General health is good.
Chumparun ...	*Nil*	Weather very favourable; the prospects of the crops are excellent.
Patna ...	*Nil*	Weather seasonable; prospects of the crops are good, also the health of the district.
Gya ...	*Nil*	Weather cool; clear sky; the prospects of both the *rabi* and *kharif* crops are favourable.
Shahabad ...	Previous week *Nil*	Weather somewhat cloudy and warm; the *rabi* sowing is generally completed, and the *aghani* crops are being reaped; public health is good.
Hazaribágh ...	*Nil*	Weather seasonable, cool and very pleasant; every thing is progressing favourably.
Lohardugga ...	*Nil*	Weather the last few days was rather close, as if rain was [illegible] all the crops are excellent, and a full outturn is expected.
Manbhoom ...	*Nil*	Weather warm, but seasonable; the paddy crop on the high [illegible] is being reaped, and a good outturn is expected; the [illegible] are promising.
Singbhoom ...	*Nil*	Weather seasonable, but the last two days were cloudy; prospects of the crops continue very favourable; fever is said to be very bad in the district.
Balasore ...	*Nil*	Weather seasonable and fair; the early rice is being harvested with a good outturn, and the prospects of the late rice continue excellent; public health is normal.
Cuttack ...	*Nil*	Weather cold and clear; the crops are progressing very well public health is good; a little cattle disease is reported from the north of the district.
Pooree ...	*Nil*	In the Pooree Sub-division the *laghu* crop has begun to ripen and the *sarud* crop is flowering; but in the higher lands, where the rainfall last week was not sufficient, the people are irrigating the *laghu*; there are no complaints in the tracts adjoining the Chilka. The Sub-divisional officer reports that water is wanted in the fields of certain villages in Khoordah.
		General Remarks.—There has been no rain during the week, except in the Chittagong Hill Tracts, Hill Tipperah, and parts of Sarun, where only a few scanty showers fell; much of the rice crop in Backergunge, Chittagong, and Noakholly has been destroyed by the late cyclone; elsewhere the damage is slight; the early *amun* is being reaped, and the prospects of the *amun* proper, or winter rice, are generally very good; the sowing of the *rabi* crops is being rapidly brought to a close.
N. W. Provinces—		
Benares (Nov. 15)	...	*Kharif* good; *rabi* sown.
Allahabad („ 14)	...	No change.
Agra („ 15)	*Nil*	Ditto.
Meerut („ 15)	*Nil*	Prospects good.
Bareilly („ 15)	*Nil*	
Almora („ 13)	...	Weather cloudy, but dry.
Jhansi („ 16)	...	No change.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab— (Nov. 16th)		
Delhi ...	*Nil*	Harvest prospects and health good.
Hissar ...	*Nil*	Harvest prospects good; fever still prevalent.
Umballa ...	*Nil*	Crops and health good.
Jullundur ...	*Nil*	Crops good; health improving.
Lahore ...	*Nil*	Ditto ditto.
Mooltan ...	*Nil*	*Rabi* sowings in progress; fever abating.
Dera Ismail Khan ...	*Nil*	Crops and health good.
Rawalpindi ...	Slight shower	Agricultural prospects good; fever prevalent.
Peshawar ...	*Nil*	Reaping in progress; slight fever and cholera prevalent.
		General Remarks.—Harvest prospects good; health of province improving, but still far from good.
Oudh— (Nov. 16th)		
Lucknow (Nov. 15th)	*Nil*	Prospects favourable; public health good.
Sitapur („ 15th)	*Nil*	
Fyzabad („ 15th)	*Nil*	
Central Provinces—		
Upper Godávari (Nov. 11th)	...	*Kharif* crops dying for want of rain; *rabi* good, but rain required; health good; prices rising.
Sambalpur ...	...	Weather cloudy; prospects very good; fever prevalent.
Bilaspur ...	...	*Kharif* good, except cotton; *rabi* sowings progressing; fever prevalent; prices rising.
Raipur ...	...	Prospects favourable; *rabi* sowings progressing; prices risen.
Bálághát ...	...	*Rabi* sowings continue; cholera in places; prices rising.
Chanda (Nov. 12th)	...	Early rice being cut; prospects of *kharif* and *rabi* good; prices rising.
Chindwára ...	...	Crops good; no epidemic; prices stationary.
Betul (Nov. 13th)	...	Prospects favourable; rain required for *rabi*; cholera continues; prices risen.
Bhandára („ 14th)	...	Prospects of crops favourable; cholera and fever continue; prices slightly fallen.
Nágpur („ 15th)	...	Prospects fair; cholera continues; prices falling.
Wardha ...	...	Cotton-picking continues; prospects and rates good; cholera continues.
Nimár ...	...	*Jowar* excellent; *tur* destroyed by worms; *rabi* not promising; small-pox continues; prices falling.
Hoshangabad ...	...	Prospects fair; prices slightly fallen.
Narsinghpur ...	...	Weather hot; prospects favourable.
Jubbulpore ...	...	*Kharif* being harvested; *rabi* sowings continue; cattle disease prevalent in Murwára tahsil.
Saugor ...	...	*Kharif* prospects good; *rabi* sowings completed; health good; prices slightly risen.
[illegible] ...	...	*Rabi* sowings nearly completed; cholera continues; prices rising.
[illegible] ...	...	*Kharif* harvesting continues, threshing commenced; *rabi* sowings progressing; fever prevalent; prices rising.
Damoh ...	...	*Rabi* sowings completed; cattle disease continues.
		General Remarks.—On the whole, prospects are favourable, except in the small Upper Godavari district, and as regards *rabi* in Nimár, not an important crop.
British Burma— (Nov. 15th)		
Arrakan Division ...	...	Reports of paddy crops still continue favourable from each district, with the exception of three hill circles of the Kyouk-phyoo district, in which the *toungya* cultivation has been largely destroyed by rats, and food is scarce; public health good; cholera still occurs here and there in a sporadic form.
Pegu Division.		
Rangoon ...	...	Crops reported to be in good condition, and public health generally good; cattle disease still reported, but not in a bad form.
Bassein ...	...	Slight cattle disease; health good; harvest prospects good.
Henzada ...	...	Public health good; crop prospects good; slight cattle disease in Tahpoon township.
Prome ...	...	Two cases of cholera at Padoung, 1 at Prome; otherwise healthy crops fair.
Thayetmyo ...	...	Health good; crops require more rain.
Thonkwa ...	...	Crops favourably reported on; health good.
Tenasserim Division ...	...	Public health good; crops progressing favourably, suffering for want of rain at Tounghoo; cattle disease ceased in Amherst district.
Assam— (Nov. 16th)		
Gauhati ...	*Nil*	Mornings foggy, days clear and cool; state of crops and tea the same as before; public health good.
Sylhet ...	*Nil*	Prospects unchanged.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg— (Nov. 16th)		
Bangalore ...	·45	Prices, which fell for a few days in anticipation of rain, are rising again; markets moderately supplied, chiefly by importation; prospects bad; great mortality among cattle from want of fodder; general health good.
Coorg ...	Nil	
Hyderabad Assigned Districts—		
Amráoti (Nov. 16th)	...	*Kharif* unpromising in some taluks, in others fair; rain urgently required for *rabi*; grain exportation continues; cholera in Akola and Bassim districts.
Central India— (Nov. 15th)		
Indore ...	...	Health and prospects good.
Gwalior ...	...	
Neemuch ...	...	
Rutlam ...	·29	
Sutna ...	...	
Rajputana—		
Deoli (Nov. 11th)	·2	No returns received from Kota and Shahpura; prospects and general health good.
	None in Tonk	
Ajmere („ 16th)	·3	Health good.
Jeypore („ 16th)	...	Agricultural prospects continue favourable; health good; weather seasonable.
Bhurtpore („ 16th)	...	No change; weather seasonable; health improved.
Ulwur („ 15th)	...	*Rabi* promising as yet.
Jhallawur („ 10th)	...	Health average; prospects good; weather bright.
Nepal (Nov. 8th)	*Nil*	Agricultural prospects good in the hills.

T. C. HOPE,
Offg. Secretary to the Government of India.

ADVERTISEMENT.

To Police Officers and others.

The undersigned begs to invite the assistance of the Police in recovering a horse which escaped from the Umballa Cantonment Station on the 6th instant. The horse is a Cape gelding; age 7 off; height 15 hands; colour dark brown, black points; marks flea-bitten and a hole through centre of left ear. A suitable reward will be given. Apply to

UMBALLA,
The 14th November 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

CYCLONE AND STORM-WAVE IN BACKERGUNGE AND NOACOLLY, 31st OCTOBER 1876.

From H. J. S. COTTON, Esq., Junior Secretary to the Government of Bengal (Financial Department), to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce,—No. 3705, *(Industry and Science)* dated 22nd November 1876.

IN reply to your letter No. 5170, dated 15th November 1876, calling for a full and early report on the late cyclone, I am directed to submit, for the information of the Government of India, a copy of a Minute recorded by the Lieutenant-Governor on the cyclone and storm-wave in the districts of Backergunge and Noacolly.

2. Sir Richard Temple's account furnishes the latest information available up to the 12th of this month. Reports on the progress of events are still being received from the local officers, and as soon as these have all been received, they will be collated and a final report submitted. A special report by the Meteorological Reporter to the Government of Bengal is also under preparation, and will be submitted to the Government of India as soon as it is ready.

Minute by the Lieutenant-Governor of Bengal, dated 21st November 1876.

HAVING recently returned from the cyclone-stricken districts, I proceed to record a brief narrative of my expedition, and a sketch of the case as it appeared to me and my party on the spot a week after the occurrence.

I was proceeding to Noacolly on an ordinary tour, having received reports only of a cyclone having occurred at Chittagong and Noacolly. Approaching Noacolly I heard of the disaster which had happened in the highly cultivated and thickly inhabited islands at the mouth of the Megna, known as the groups of Sundeep, Hattea, and Dukhin Shahbazpore, and on both the coasts of that great river; so I cut short my visit to Noacolly, after inspecting some of the ruined villages in that quarter, and hastened to the points where it seemed probable that the worst stress of the storm must have been.

Thus, besides the coast near Noacolly and the interior as far as that station, I visited the islands of Hattea and Dukhin Shahbazpore in the Megna, near its mouth, and the western coast of the great river within the district of Backergunge. In each of these localities I visited a number of villages, and had the precise mortality in each house ascertained in my own presence on the spot, so as to prevent any possibility of deception. From the authentic data thus obtained I am able to check the local estimates, and to measure the mischief as it actually was. With me there was Mr. Reynolds (Secretary to Government) and Mr. Beverley, whose statistical ability is so well known; also Dr. Weir (temporarily on my staff), and some of the local officers.

Enclosed is an estimate of the probable number of lives lost (all, or nearly all, by drowning), prepared by Mr. Beverley and myself from our own data, compared with local reports, oral and written, and based on the returns of the last census. It will be seen that we apprehend that in an area of some 3,000 square miles out of 1,062,000 persons suddenly thrown into more or less of danger, 215,000 must have perished. This of course is only an estimate; the exact number cannot be known yet a while, perhaps never will be known. We found in some villages 30 per cent. of the inhabitants lost, in others 50 per cent., in some even 70 per cent. The total seems very high; I earnestly hope that it may be found to exceed the truth, and that the facts may not prove to be quite so dreadful. Still such is the estimate at present. At the least there must have been a most shocking loss of human life. And even the urgency of our duty towards the surviving cannot drive from our minds the sorrow for so great a multitude of dead.

There was a severe cyclone in the Bay of Bengal on the night of the 31st October. But it was not the wind which proved so destructive, though that

was bad enough; it was the storm-wave, sweeping along to a height from 10 to 20 feet, according to different localities; in some places, where it met with any resistance, it mounted even higher than that. I will endeavour to have meteorological inquiry made as to how and from what direction this inundation came. The Noacolly people think it came from the sea right up the great river (Megna) with salt water; that then the cyclone turned round and rolled the fresh water from the river downwards; that with this refluence there was a piling up, as it were, of fresh and salt water, venting itself by a rush all over the surrounding tracts. I am not sure that this is the true explanation. It is understood that the eastern coast of the Megna and the Sundeep Island, adjacent thereto, caught the inundation from the south-west. But the almost unvarying direction of the rent deflected and up-rooted trees in the islands of Hattea and Dukhin Shahbazpore and the western coast of the Megna convinced us that there the storm broke from the north and north-east.

In the evening the weather was a little windy and hazy, and had been somewhat hot; but the people, a million or thereabouts of souls, retired to rest apprehending nothing. But before eleven o'clock the wind suddenly freshened, and about midnight there arose a cry of "the water is on us," and a great wave burst over the country several feet high; it was followed by another wave, and again by a third, all three rushing rapidly southwards, the air and wind being chilly cold. The people were thus caught up before they had time even to climb on to their roofs, and were lifted to the surface of the water, together with the beams and thatches of their cottages. But the homesteads are surrounded by trees—palms, bamboos, and a large thorny species called Madâr. The people were then borne by the water on to the tops and branches of these trees. Those who were thus stopped were saved, those who were not must have been swept away and were lost. Doubtless there must have been variation in detail in this struggle for life with death. But there is an extraordinary sameness in the general manner in which people were saved or lost. In most cases they would show us the particular tree on which they stuck, and generally the survivors pointed to the severe scratches they received from the prickly branches of the Madâr trees; in reality these thorns and prickles held them tight, as if with natural grappling-hooks, and prevented them from being borne away.

The mode of habitation is in this wise. Each hamlet consists of four to six houses (to each house a family); these are built (thatch and matting) on a slightly raised platform, composed of earth thrown up from the surrounding ditch; they are surrounded by a wall of trees, high and dense. It was this formation, unvarying in kind, though varying in degree, that prevented the loss of life from being universal. Indeed, the trees, in their long stretching arms, held up the poor drowning souls. In those hamlets where the trees grew thickly, many lives were saved; in those hamlets where there happened to be gaps or breaks in the environment of trees, most of the inhabitants were carried off.

The bodies of the lost were carried to considerable distances, where they could not be identified. Most homesteads have dead strangers lying about, washed in from distant villages. The corpses began to putrify before the water cleared off the grounds, so they are left unburied in numbers all over the country (in a Mahomedan population there is no cremation). They are indeed masses of corruption which no one can bear to approach, and they present a sickening spectacle. Mixed with human bodies are the bodies of cattle, all heaped up together. The smell in many places was distressing to us as we walked through the fields from village to village. Weather-tossed seamen in the Bay of Bengal saw many corpses floated out from land with the waves. Corpses from the Sundeep Island were flung on to the seashore at Chittagong; and living persons were borne thither across an arm of the sea, clinging to the roofs or beams of their own houses, as if upon rafts.

As an authenticated instance (as described to me by the witness) of the suddenness of the onset of the storm-wave, I may mention that Mr. Higgins, an Inspecting Post-master, was in his travelling barge that night, moored in the creek near Noacolly about 10 miles inland from the Megna; he had gone to bed that night at eleven o'clock, without any fear or anxiety whatever; the

boatmen were ashore, but his four native servants were on board with him; shortly before midnight he was awakened by a cry of "the waters are up;" jumping up he looked out and saw a high wave, with its crest and curling top gleaming in the starlight, it seemed like a flash; in an instant his boat seemed rising up on high; he fastened on a life-belt; in a few moments another wave came rolling on, and the barge capsized; he paddled about in the water all the rest of that night with the help of the life-belt; the native servants clung to spars—three were saved one was lost; the water felt warm to the body, but the air was bitterly cold to the head or hands above the surface; of some natives lodged on the branches of a tree, one was seen to relax his hold from cold and numbness and sink into the flood.

If this happened at Noacolly, what must have been the emergency in the islands still more exposed to the fury of the storm.

The force of the inundation appears to have lasted in most places from about midnight to 2 A.M., that is for two hours; by daybreak there was much subsidence of flood, and by noon next day the survivors had come down from the trees and regained *terra firma*. But they must have been foodless and shelterless for the rest of that day and all the next day. After that, however, they began to re-assemble, not indeed at the ruins of their homesteads, which had been carried away entirely, but at the sites and foundations. They took out their stores of grain buried in pits, dried those which were wet—the sun having come out in the cleared sky—and cooked such as were undamaged. At every homestead which I visited I found the people engaged in drying their grain. They also made frameworks with broken branches, over which they threw sheets and cloths such as they had about them at the moment, and so made little tent-like habitations. Plantain trees abounded, but the fruit was mostly destroyed. The cocoanuts, however, very frequently stood through the storm, and must have afforded some sustenance. There must have been much trouble about water at first. But either the drinking tanks speedily recovered from the brackishness left by the salt wave, or else the storm-wave must have mainly consisted of fresh water; for the drinking tanks were not brackish when we tasted them a few days afterwards. It was a great relief to find that such was the case. Some tanks and some swamps indeed are full of human corpses and dead cattle and all manner of fœtid matters, and cannot be approached; the streamlets which carry off the accumulated water were flowing black and thick with putrid substances.

No estimate can be made of the number of cattle drowned. They are chiefly bullocks and cows, some few are buffaloes; but the buffaloes are mostly saved, being excellent swimmers. The loss of cows is bad for the people, and the loss of oxen is still worse for agriculture. Fortunately there is no immediate demand for ploughing in the fields, so the loss will not make itself severely felt for some months.

In some places, and for the first two or three days, the people seem to have been often in want of food; they could not get at their stores. In some places they suffered severe hunger, assailing with entreaties for food the Revd. Mr. George Kerry, who was one of the first to appear among them. But this difficulty must have gradually subsided, for when I saw them there was no clamour for food particularly, though there was naturally loud lamentation for their sorrows generally, nor were there any signs of hunger; on the contrary, the noticeable circumstance was the trouble the people were taking to dry their grain. The demeanour of those who really bore the brunt of the storm was marked by that enduring fortitude under suffering which distinguishes the native character.

Nor was there at the time of my visit any sign of epidemic sickness anywhere save around Noacolly. How long this immunity will be vouchsafed to the poor survivors may be a question anxiously asked. We have since learned that cholera has broken out on the Chittagong coast and on the east side of the Megna.

For the first day or two after the catastrophe there were some attempts at plundering and some lawlessness broke out; but all this was promptly

suppressed. Gang robbery used to prevail formerly in these tracts, and the robber spirit still survives among the instincts of the people; the fear was that, unless authority could be quickly vindicated, many persons would be tempted to take advantage of the sudden disruption of all social bonds to superadd crime to the many evils already inflicted on the land by a physical visitation. I trust, however, that the difficulty will be found to have been encountered and subdued.

Most of the local native officials were drowned, Deputy Magistrates, Police Inspectors, Native Civil Judges, Notaries, and others. Of those who escaped, some stood by their posts and did their duty well. Some few deserted and fled for their own safety, forgetting their charges; these, however, belonged chiefly to the lowest grade of the police and will be duly punished. Among the police, some behaved so well as to merit reward. There were few resident landlords and few land agents on the spot. The villagers mostly consisted of cultivators with various kinds and degrees of tenures and of sub-proprietors—a substantial yeomanry in fact—and they were the richest peasantry in all Bengal.

When the storm burst there was an abundant rice crop ripening for the harvest—the well known deltaic rice crop which is much beyond the needs of local consumption, and affords quantities (measured by thousands of tons annually) for exportation to distant districts. A part is lost, that in which the plant had not advanced beyond the stage of flowering, and a part is safe still, that in which the grain had formed or begun to form. If even one-third is saved, that would suffice for the population now on the land.

The boats, great and small, which constitute the only carriage in these tracts, and which fill the place of carts, were all lost on the night of the storm, jammed and smashed up together, or wrecked, or disabled, or carried inland and left high and dry. The Noacolly authorities were thus bereft of all resources for moving across the floods. In the case of the Hatiea Island this was very hard; by reason of the loss of all boats there were no means of crossing the Megna to reach the island, and for three days at least it was succourless. The people on the mainland knew its danger, but could not cross over to it. The Backergunge authorities were more fortunate; their boats escaped destruction, and they were able to move with all the promptitude that could be desired. The Chittagong authorities had most of their boats temporarily disabled, but, despite their own pressing needs, they managed to send succour to the devastated islands of Sundeep.

Most of the trees, fruit-bearers or others, will recover; except the Areca or betelnut palms. These exist in great numbers, of which very many are broken, snapped off as it were, and much of the betel crop just being gathered was destroyed, though some part was saved. The country here is well wooded, but at present it has lost all verdure and sylvan appearance; it seems to be stricken by a withering winter, and wears a drab color, with bare branches or dead leaves, or trunks contorted as if torn by some superhuman destructive agency. Many trees torn up by the roots were carried away with the flood into the great river, and there remained as sunken trees, known to sailors as "snags," so dangerous to navigation. They virtually barricaded the passage out to sea by the western branch of the Megna, so that we were barred from approaching by water the seaface of the devastated tracts. The "snags," extending over an expanse of water, looked as if they had been set up by an enemy.

The wealth lost was almost entirely agricultural—crops or cattle. To this, however, there is one noteable exception, namely Dowlutkhan, a rich trading town, clean destroyed, with loss of miscellaneous property and valuable records. It had 8,000 inhabitants, one-fourth of whom perished, perhaps more. Approaching the place, we steamed for two miles through a creek, the banks of which all the way were strewn with human bodies, floated up and down by the tide.

I give this outline of the case judging by what I saw of it, and by what I heard from those who were in it. The local authorities did instantly all they possibly could, and some of them managed to do a great deal The immediate obstacle was of course the difficulty of communication. Still, day after day, sometimes hour after hour, officials, non-officials, messengers, guards,

supply boats, arrived at some point or other of the wide and scattered scenes of disaster. Since the first few hours of inevitable destruction, not a life, so far as I could learn, had been lost from any preventable cause, nor had any one been in extreme danger. Those who perished in that fatal instant of time passed suddenly beyond aid; but those who escaped then are still sustained, or are sustaining themselves sufficiently well. The disaster, big though it be, has yet happened in the midst of plenty and of rural wealth. All around the fated and wasted area there are excellent crops and abundant stores. Those who have lost their agricultural wealth have still some left, and doubtless possess considerable credit. Soon, therefore, will boats come pouring in by the numerous channels from districts teeming with water-carriage; soon will fresh cattle be swum or ferried across the rivers from the overstocked districts of Eastern Bengal; soon will the grain bazars be re-opened, and the rustic marts be filled with the surplus produce of neighbouring tracts.

The local authorities have indeed opened "relief centres," dotted all over the distressed tracts, and they afford relief in some cases; but this is done very sparingly: and though any case or cases of real danger or sickness will be watched for, so that no life can be lost (as we hope), save from incurable sickness, still we trust that very little relief will be really needed. The relief centres are as much for guard as for relief; are established for the purpose of restoring order, of preventing confusion, of keeping rustic society together, of making every responsible person stick to his work, and of ensuring that public confidence without which trade of all sorts cannot quickly be restored. All this is being done with the utmost energy that the local officers can command, and all the staff, both European and Native, that can reasonably be required, has been or is being despatched to the spot. Our object is to let the poor people see that the authorities are thinking, caring, feeling for them in their misery. This knowledge will brace their nerves, raise their spirits, and induce them to return promptly to all their accustomed industries.

There will be some extra police for a month or two, but that will not be much; also some relief expenses. There probably will be hereafter some advances to cultivators for purchasing plough-cattle (to replace the cattle drowned), but these advances will be recoverable, and will be made only on security. Altogether the expenses will probably not be beyond the means of local or provincial funds, and I hope to be spared the necessity of asking the Government of India for any financial aid.

We are prepared, so far as medical aid goes, for the contingency of epidemic sickness. Two parties of native doctors have been already despatched, and more will be kept in readiness.

I hope also that there will be no appreciable loss of revenue. The land revenue forms a small part of the profits of the land in these heretofore flourishing tracts, and is paid by very well-to-do persons. We got in all our land revenue during the infinitely worse case of the famine of 1874 in every district of Bengal and Behar, and I fully intend to enforce the same rule now if possible. Nor is there any considerable loss to be feared under the other heads of revenue.

But although I hope for the best regarding the surviving population, I still remember that things might take a turn for the worse, and that there may be distress of which information has not yet reached us. In that case the numerous temporary stations which have been established, and the many responsible persons who are moving about, have instructions to act with all necessary effectiveness. Sickness and pestilence are the things uppermost in our fears.

The following is the *resumé* of the instructions which I gave on the spot to the local authorities:—

1*st*.—Throughout the devastated tracts to establish posts of observation at points sufficiently numerous to ensure the condition of the people in every village being thoroughly watched, so that, if there are any cases, or even a single case, of dangerous distress, they or it may be surely discovered.

2*nd*.—To afford relief in any cases where it is necessary to save life; but in all cases short of this extremity, to be very cautious in affording direct assistance of this sort.

3*rd*.—To stop those attempts at plundering or lawlessness which are to be apprehended after a physical catastrophe, such as that which has occurred.

4*th*.—To preserve social order; to urge the people to re-build their cottages quickly; to induce shop-keepers to re-open their shops; to re-establish local bazars and markets; to assure all persons, especially those who bring supplies of livestock from without by river, that their boats and property are safe against any sort of attack or interference.

5*th*.—To encourage and induce all landed proprietors of any grade, superior or inferior, and their agents, to stay in or return to their respective properties, to help their tenants and dependants.

6*th*.—To see that the regular police set a good example, and that the village watchmen stand by their posts.

7*th*.—To ascertain whether any cash advances will probably be necessary to enable cultivators to purchase cattle for agriculture.

8*th*.—To investigate numerically the casualties which actually occurred on the fatal night of the 31st October.

9*th*.—To be prepared to establish medical stations and dispensaries in event of epidemic sickness breaking out.

10*th*.—To incur such expenditure as may be absolutely necessary under the above instructions, but with this reservation, to be very economical in spending money.

11*th*.—To arrange for the taking of a new census, on some date during December next, of the people remaining in the local divisions (thanas) which have suffered from the storm-wave.

12*th*.—To discourage or refuse any applications for remission of land revenue.

13*th*.—To act promptly in any emergency which may arise, not provided for in these instructions.

The Commissioner of Dacca, Mr. F. B. Peacock, proceeded immediately by steamer with assistance to Backergunge and supervised the local arrangements. The Acting Commissioner of Chittagong, Mr. A. Smith, despatched with excellent promptitude assistance to the Sundeep islands, under Mr. Badcock, which we trust arrived in time to prevent disaster. He and a non-official, landholder, Mr. Macalpin, joined my party at Hattea Island. The Magistrate of Backergunge, Mr. E. Barton, was as prompt as possible in sending every sort of help to the scene of distress; his conduct in that trying moment has received my high commendation. The District Superintendent of Police, Mr. H. N. Harris, proceeded at once to Dowlutkhan, the spot of all others where his presence was most needed, and was personally very active and resourceful. The Reverend Mr. G. Kerry (of the Baptist Mission) volunteered to visit some of the tracts where hunger was most feared, and distributed supplies from Government among those who were most in need; he was among the first to appear on the scene of destruction. Mr. R. Porch, the Magistrate of Noacolly, speedily organised relief establishments along the coast line of his district. Mr. R. Harvey, manager of the Paikpara estate, proceeded to the islands to assist the distressed tenantry. The Nawab Abdool Ghunnee, of Dacca, sent his steamer and some large boats, which will be very useful for the conveyance of men and of supplies. Most of the zemindars were non-resident; but on hearing of the disaster, they hurried off agents or went in person to their estates. I am sure that they will be found doing their duty as landlords.

It may be asked, in conclusion, whether any protective means against such calamities in future can be devised—any embankments or the like? This question will be duly considered; but at present I know not how to devise such safeguard, nor have I seen any one who can suggest anything. The area to be protected would be too great to be encompassed with protective works. If embankments became breached in such a storm, they would

afterwards do more harm than good, for they would prevent or retard the running off and the subsidence of the waters. Perhaps the people might build perches for themselves on platforms, on stilts, and the like; but the trees which invariably surround the homesteads serve this purpose admirably, and it is to them that the survivors mainly owe their escape.

There is always this consideration, too, that these disasters, though not unfrequent somewhere or other in a less severe form, do not visit the same locality in such intensity, save at long intervals of time. Without specifying the exact date when the last event of such gravity befell the delta of the Megna—one case of this kind happened in 1822—most people say that there has been nothing like the recent cataclysm since the middle of the last century.

RICHARD TEMPLE.

Estimate of the number of persons drowned in the Cyclone of 31*st October* 1876.

In the Backergunge District.

	Population.	Probable number drowned.
Dukhin Shahbazpore Island	221,000	70,000
Bowful thannah	118,000	15,000
Golachipa ditto	98,000	20,000
	437,000	105,000

In the Noacolly District.

Sundeep Island	87,000	40,000
Hattia ditto	54,000	30,000
Sudharam thannah	96,000	5,000
Boumnee ditto	33,000	5,000
Ameergaon ditto	133,000	10,000
	408,000	90,000

In the Chittagong District.

Meerkaserai thannah	120,000	10,000
Koomeriah ditto	26,000	5,000
Chittagong ditto	76,000	5,000
	222,000	20,000
Total ...	1,062,000	215,000

AREA.

In the Backergunge District.

Dukhin Shahbazpore Island	818 square miles.
Bowful thannah	194 ditto.
Golachipa ditto	801 ditto.
Total ...	1,813 square miles.

In the Noacolly District.

Sundeep Island	Exact area cannot be given; may be roughly stated at about 900 square miles.
Hattia ditto	
Sudharam thannah	
Boumnee ditto	
Ameergaon ditto	

In the Chittagong District.

Meerkaserai thannah	Exact area cannot be stated; may be roughly stated at about 380 square miles.
Koomeriah ditto	
Chittagong ditto	

From the Honourable T. C. Hope, Officiating Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, to the Secretary to the Government of Bengal.—No. 173 (Meteorology), dated Calcutta, the 24th November 1876.

I am directed to acknowledge the receipt of Mr. Cotton's letter of the 22nd instant, No. 3705, forwarding copy of a minute recorded by the Lieutenant-Governor on the cyclone and storm-wave which have recently devastated portions of the districts of Backergunge and Noacolly. The President in Council has read with painful interest the account of this terrible calamity, which is contained in Sir Richard Temple's minute, a calamity which, as regards the number of human lives lost, to say nothing of the destruction of cattle and other animals, is scarcely paralleled in the annals of history. The Lieutenant-Governor estimates that in an area of some 3,000 square miles, out of a population of about a million, some 215,000 persons have perished. The loss of property, and especially of cattle, a very serious matter in an agricultural district, has been of course considerable. The local authorities appear to have done everything that was in their power to afford relief to the survivors in the devastated tract. The Lieutenant-Governor makes special mention of the Commissioner of Dacca, Mr. F. B. Peacock; of the Acting Commissioner of Chittagong, Mr. A. Smith; of the Magistrate of Backergunge, Mr. E. Barton; of the Magistrate of Noacolly, Mr. E. Porch; and of the District Superintendent of Police, Mr. H. N. Harris. The exertions of the Reverend G. Kerry, of the Baptist Mission, and of Mr. R. Harvey, Manager of the Paikpara Estate, are also specially mentioned, as well as those of Nawab Abdool Ghunnee of Dacca, who sent his steamer and some large boats to the scene of the disaster. The President in Council requests that the thanks of the Government of India may be conveyed to all these gentlemen for their services.

2. To His Honour the Lieutenant-Governor, who, with his characteristic energy, visited the locality within a week after the occurrence of the cyclone, the Government of India and the public are much indebted for his clear and interesting narrative of the results of his inspection, and for his judicious directions to the local authorities. Sir Richard Temple's presence on the spot so immediately after the catastrophe must have been invaluable as an encouragement to the officials, and as an assurance of the sympathy of the Government with the survivors of the population in the sufferings to which they have been exposed. The Government of India will be glad to receive any further reports and more detailed information that may reach the Government of Bengal.

3. The Government of Bengal have been already informed that Her Majesty the Queen, immediately on hearing what had occurred, was graciously pleased to signify by telegraph her deep concern at the terrible calamity which has thus overwhelmed a large body of Her Majesty's subjects. A similar expression of concern and sympathy has been received from His Excellency the Viceroy.

4. A copy of Mr. Cotton's letter and its enclosure, and of this reply, will be published in the *Gazette of India* for the information of the public.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd NOVEMBER 1876.

General Remarks.—In Madras rain is reported from Kistna, and some scanty showers from Malabar: in the latter district it has been very insufficient: general prospects are unchanged. In Bombay the condition of the crops is fair in Sind and Guzerat: in the drought-stricken districts there is no change, but the supply of grain is improving. In the Central Provinces prospects are fair, though rain is required for the *rabi* in several districts. In Berar rain is much wanted for the *rabi*. Reports from Rajputana and Central India are favourable. In Bengal no rain fell during the week except a few insignificant showers in Hooghly, Midnapore, and Darjeeling: the prospects of the crops are excellent, except in the districts ravaged by the cyclone and in parts of Midnapore and Rungpore. Rain is reported from Sylhet: prospects in Assam are good. No rain fell in the North-Western Provinces, Oudh or the Punjab: reports from all three are favourable. In Mysore 1 inch ·15 of rain fell in the Kolar district, none elsewhere: prospects are unchanged. In Burmah there has been general light rain, and reports are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Nov. 20th)	*Nil* at Masulipatam; ·15 at Sattanapally; ·35 at Nandigama; 1·20 at Palnad; 2·0 at Vinukonda.	No rain elsewhere; 1 foot 10 inches water over anicut; canal supplies insufficient; later dry crops sown in but a few places; markets not well supplied; prices fallen in Vinukonda after rainfall, elsewhere continue high; health fair; cattle suffering; fodder very scarce; water scarce in places.
Kurnool („ 21st)	*Nil*	Season severe; wet and dry crops under canal good; harvest to some extent elsewhere withered; grain difficult to procure; pasture rare; cattle sent to Nallamallays for grazing; prices high; cholera slight in some villages of 4 taluks; no water over Sunkesala anicut.
Cuddapah („ 21st)	*Nil*	Crops same as former week; prices, per rupee, rice 4¼ seers; *raggi* 6¼; *sajjalu* 6¼; *cholum* 5¼; horse-gram 6.
Bellary („ 20th)	*Nil*	One hundred and forty-seven thousand persons on relief works, of whom 53,000 round Bellary; 8,500 persons fed; cholera in 5 taluks; prices slightly less; *cholum* 8¼ seers per rupee.
Tanjore („ 21st)	*Nil*	River freshes have almost ceased; supply to tanks none; water over anicuts none; cultivation very little; standing crops—wet, little better owing to last week's rain; dry, beginning to fade; harvest very scanty; markets badly supplied; prices rising; cholera lingers in a few villages, 8 seizures, 7 deaths; fever and small-pox slight in some parts; cattle healthy; pasture insufficient in dry taluks.
Madura („ 20th)	*Nil*	Wet cultivation entirely stopped; some dry crops being harvested here and there; outturn below ½; distress owing to the rise in prices; market prices to-day are, rice, 2nd sort, 4⅓; *raggi* 9⅓; *cholum* 8⅓; *cumbum* 10¼ seers per rupee.
Malabar („ 20th)	·22	Insufficient rain, very unfavourable for second crop, *gingelly* and garden cultivation; paddy crops withered in most places; supply of grain in markets insufficient; prices rising owing to above cause and limited imports; cholera in Kurumbranad, 4 deaths; fever and small-pox in many parts of the district; health of cattle indifferent; rinderpest in South Wynaad; pasture withering.
		General Remarks.—General prospects unchanged.
Bombay—(Nov. 23rd)		
Sind. (Nov. 22nd)		
Kurrachee ...	...	Locusts appeared in Makan Moranjur; no damage; much cattle disease in districts; *rabi* crops fair.
Shikárpur ...	...	No change.
Hyderabad ...	...	Locusts appeared in Khairpur Tapa, taluka Tando Bágo, no damage; disease amongst goats in taluka Mirpur; 58 fresh cases of small-pox, 1 death; weather warm and unseasonable; fever still prevalent.
Upper Sind Frontier ...	...	No change.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira (Nov. 21st)	...	*Rabi* crops progressing favourably; prices little lower.
Surat ...	...	No change; sugarcane collection commenced.
Broach ...	...	*Jowar* and wheat in certain villages of Wágra injured by worms; fever continues; several deaths in Broach.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Khandesh and Násik.		
Khandesh ...	...	No rain; condition of people and state of *rabi* crops getting worse.
Násik ...	...	No rain and no change in prospects, but prices are falling.
Konkan.		
Tanna ...	...	Reaping of *kharif* rice crops nearly completed; sowing of *rabi* progressing.
Deccan.		
Poona (Nov. 21st)	...	No rain; distress great; large grain importations.
Ahmednagar ...	...	No rain; *rabi* crops withering where sown; people of affected villages still leaving their homes in search of livelihood; cholera in 3 talukas, 37 cases, 14 deaths.
Sholapur („ 21st)	...	People and crops as before; no rain; grain supply fair every where, except Málsiras and Sángola; slight cholera in Sholapur taluka.
Satara („ 21st)	0·39 in Mán taluka.	No rain at Satara; condition of people and crops much the same as before; 5 deaths from cholera.
Southern Marhatta Country.		
Belgaum ...	...	Condition of the people unchanged; rice and *jowari* crops being reaped; grain more plentiful in all markets.
Dharwar ...	...	No rain; distress continues generally; cholera bad in one village; crops as before; considerable imports of grain, but prices unaffected.
Kanara ...	...	Rice harvested above Ghát.
Kaladgi (Nov. 20th)	...	Distress continues; public health generally good; no rain; *rabi* withering; grain supply insufficient.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	*Kharif* crops being harvested, *rabi* thriving.
Wadhwán ...	...	Weather indifferent; health and crops good.
Baroda ...	...	Harvesting of *kharif* crops over; cotton crops continue healthy; prices of grain have nearly reached normal rates.
		General Remarks.—The general condition of affairs is unchanged, except that the supply of grain in the drought-stricken districts of the Deccan and the Southern Mahratta country is improving, though there is scarcely any hope of *rabi* crops; prospects of crops in Sind and Guzerat fair; small-pox continues in Hyderabad district.
Bengal—		
Chittagong ...	*Nil*	Weather fine after some dull, heavy weather, which appeared to promise well; the only real sufferers by the cyclone are the people along the sea-face from the Mátamahaní northwards; those further inland will get from four to eight annas crop, and those in the south and east from eight to ten annas; the price of rice in the mofussil ranges from 12 to 15 seers per rupee, and in the town from 10 to 13 seers, but the holders of salt still manage to keep it at as much as three annas a seer in the smaller hâts; in Kootubdea it is thought there should be even now a six annas outturn.
Noakholly ...	*Nil*	Weather—the early mornings were foggy and cold, but the middays and after-noons were warmer than usual at this season; much of the late rice in the inundated tracts has been destroyed by the salt-water; the destruction of peasantry, cattle, and homesteads has temporarily marred the agricultural prosperity of South Noakholly; it is difficult to gather in the ripe crops that are left; cholera is raging in the district and station throughout the inundated tracts.
Chittagong Hill Tracts...	*Nil*	Weather cold and foggy during the first part of the week, and cloudy during the latter part; mustard is being sown, and cotton is being gathered in places where the plants are not totally destroyed by the cyclone of the 31st ultimo.
Hill Tipperah ...	*Nil*	Weather dry and cool; state and prospects of the crops are fair.
Backergunge ...	*Nil*	Weather fine and cool; the crops in the north of the district are good; in the south they have been damaged by the storm-wave; and in the lowest parts the water lodging has rotted them; the *aghani* will in many places give only from two to four annas outturn, and the prospects of the later *amun* cannot yet be ascertained; prices are not yet excessively high, and the markets are well supplied; fever, as usual at this season, is prevalent; it is feared that the dead bodies of men and cattle which overspread many parts of Dowlatkhan, Bowful, and Patocahkally, may bring on pestilence; several cases of cholera have been already reported.
Furreedpore ...	*Nil*	Weather fine and cool; foggy in the morning and clear in the day; along the shores of the Megna, which the storm-wave of the 1st November flooded, the rice crop has been lost to the extent of about six annas; a great number of cattle and only 6 men on land have died, and many houses and trees have been damaged in places; many boats were sunk, and some lives were thus lost; 27 boats were sunk as high up as Goalundo.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Dacca ...	*Nil*, but rain was falling at the time of report, *i. e.*, morning of 23rd instant.	Weather seasonable; state and prospects of the crops continue favourable; cholera is still prevalent.
Mymensingh ...	*Nil*	Weather fine and seasonable; the mornings were slightly foggy; the harvest of *amun*, or late rice, has commenced, and the yield is expected to be remarkably good.
Tipperah ...	*Nil*	Weather fine and seasonable; the winter rice crop is in pretty good condition, and will be an average fair one all round in spite of the damage done by the late cyclone, which may be put down at about four annas.
24-Pergunnahs ...	*Nil*	Weather seasonable; prospects of the late rice continue to be favourable; it is being harvested at some places; fever is prevailing in the Barripore, Busseerhat, and Satkhira sub-divisions, and cases of cholera have been reported from Alipore, Satkhira, and Busseerhat.
Jessore ...	*Nil*	Weather seasonable; the high land rice in Khoolna is reported to have been injured to the extent of three annas, and in Bagirhat to the extent of four annas, by the late cyclone; the state and prospects of the crops in other parts of the district continue to be favourable; cholera was prevalent in some parts of the district, and there were a few cases in Jessore town.
Nuddea ...	*Nil*	Weather fine and seasonable; the state and prospects of the crops are favourable; cholera is reported to have broken out in several parts of the district.
Moorshedabad ...	*Nil*	Weather seasonable; prospects of the crops continue to be good; the price of rice is rising generally in the district; there has been a good deal of cholera in the Burwa and Nowáda thanas and in Jungypore.
Pubna ...	*Nil*	Weather clear and fine; the harvest of the early *amun* is progressing with a good outturn; cholera is spreading, and medical aid has been sent to Shahzadpore; no report from Serajgunj.
Rajshahye ...	*Nil*	The prospects of the *dhan* crops continue satisfactory; the early rice is being reaped; the *rabi* crops are still being sown; sugarcane, *arhur*, and *kalai* are looking well; cholera still continues to be reported from Nattore, Bauleah, Puthia, Bándái Khára, Tanore, and Baráigaon.
Bogra ...	*Nil*	Weather seasonable; the crops are in excellent condition, and a bumper season is expected; a few cases of cholera reported.
Maldah ...	*Nil*	Weather cool and bright; state and prospects of the crops are excellent.
Dinagepore ...	*Nil*	Weather cold and seasonable; the prospects of the crops continue very good; a little of the rice crop has already been reaped; fever is still bad.
Rungpore ...	*Nil*	Weather seasonable; the *rabi* sowings are going on, and the prospects of *amun* are good, except in the north-east of the district.
Cooch Behar ...	*Nil*	Weather fair and cold; nothing has happened to injure the prospects of the late rice *(hymunti dhan)*, which promises a very good outturn; tobacco plants are being transplanted in many places, and the sowing of mustard oilseed is still going on; there are some cases of fever here and there owing to the change of season, but the general health on the whole is good.
Jalpáiguri ...	*Nil*	Weather fine; all the crops are getting on exceedingly well.
Darjeeling ...	·04	Weather alternate mist and sunshine, getting colder daily; the prospects of the crops continue favourable, both in the hills and plains of the district.
Midnapore ...	·07	Weather fair and fine, but not so cold as in the last week; the prospects of the crops are good, except in Ghatal and parts of Tumlook.
Howrah ...	*Nil*	Weather seasonable; state and prospects of the crops continue to be excellent.
Hooghly ...	·07	Weather bright and cool; the *rabi* sowings are still going on, and the prospects of *amun* continue favourable; a good deal of fever, though not of virulent type, is reported along the line of rail in the Serampore sub-division.
Burdwan ...	*Nil*	Prospects of the *amun* paddy are very good; the price of rice is rising owing to the demand for export; fever is prevalent.
Bankoora ...	*Nil*	Weather fine and cool; the *amun* crop is being cut, and the winter rice is excellent; prices are rising in consequence of exportation.
Beerbhoom ...	*Nil*	Weather seasonable; state and prospects of the crops continue excellent; the reaping of the November rice crop is in progress.
Sonthal Pergunnahs ...	*Nil*	Weather clear and dry, with heavy dew, and getting colder; the high land rice is being cut everywhere, and is very good; the low land rice is a grand crop; the *rabi* crops are all looking as well as possible; some cattle disease is prevalent in Deoghur.
Bhágalpur ...	*Nil*	The prospects of the crops are excellent; the *rabi* is coming on nicely; general health is very good.
Monghyr ...	*Nil*	Weather fine and clear; the nights are chilly; the crops promise exceedingly well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Purneah ...	Return not received.	Weather fair; the prospects of the crops are very good; the winter rice is being cut in some places, and the *rabi* sowings have generally commenced.
Durbhanga ...	*Nil*	Weather clear and cool; the state and prospects of the crops throughout the district are satisfactory.
Mozufferpore ...	*Nil*	Weather becoming gradually cool; the prospects of the crops are good; the winter crop is almost ready for harvesting, and the *rabi* sowing is still going on; health of the district is good.
Sarun ...	*Nil*	Weather bright and clear, but rather warm for the time of the year; the wind is blowing from the west; the *aghani* rice is fast ripening, and the harvest will shortly commence; the *rabi* crops are coming on well, and the prospects are generally very favourable; fields are still being prepared for indigo; general health is good.
Chumparun ...	*Nil*	Weather seasonable; prospects of the crops continue excellent.
Patna ...	*Nil*	Weather seasonable; the *dhan* crop is being reaped; health of the district is good.
Gya ...	*Nil*	Weather cool, and the sky was clear; the maximum reading of the thermometer in the shade was 85·6; the *kharif* appears to be very favourable, and the *rabi* looks highly promising; public health is good.
Shahabad ...	*Nil*	Weather cool; the *aghani* crops are being gathered; the *rabi* crops are sown, and the prospects at present are generally good.
Hazáribágh ...	*Nil*	Weather seasonable; the prospects of the crops continue very favourable.
Lohardugga ...	*Nil*	The winter has set in, and the weather is pleasant; the crops all over the district are excellent; small-pox is still reported from the Palamow sub-division.
Manbhoom ...	*Nil*	Weather seasonable; the paddy crop on the higher lands is being harvested with a very good outturn; the *rabi* crops are promising.
Singbhoom ...	*Nil*	Weather seasonable; the prospects of the crops continue very favourable; fever is reported to be on the decrease.
Balasore ...	*Nil*	Weather fair; the early rice continues to be gathered with a very good outturn, and the prospects of the late rice are excellent; the price of rice is rapidly rising; public health is good.
Cuttack ...	*Nil*	Weather cold and clear; the crops are progressing well; further reports show that some damage was done to the crops on the sea-coast by the storm-wave of the 31st October, over a limited area and to a very slight degree; public health is good.
Pooree ...	*Nil*	Weather fair; some of the *laghu* crop is ready for the sickle; the *sarad* crop is flowering, and in some places has begun to ripen; the people are irrigating the lands where sufficient water does not exist; there are no complaints in the Chilka tracts; *laghu* is being reaped in Khoordah; a few sporadic cases of cholera reported.
		General Remarks.—There has been no rain in Bengal during the week, except in Hooghly, Midnapore, and Darjeeling, where a few scanty showers fell; the November rice continues to be gathered with a very good outturn, and the prospects of the winter rice are excellent, except in parts of Midnapore and Rungpore and in the cyclone-stricken tracts in the districts of Backergunge, Chittagong, and Noakholly; the *rabi* crops are nearly all sown, and their prospects are at present satisfactory.
N. W. Provinces—		
Benares and Allahabad. (Nov. 22)	...	No change.
Agra („ 22)	*Nil*	*Rabi* progressing well.
Meerut („ 22)	*Nil*	*Kharif* crop harvested.
Bareilly („ 22)	...	No change.
Almora („ 20)	...	Weather fine; sowing operations concluded in most parts of the district.
Jhansi („ 20)	...	*Rabi* sown; *kharif* good.
Punjab— (Nov. 23rd)		
Delhi ...	*Nil*	Health and harvest prospects good.
Hissar ...	*Nil*	Fever still lingers; harvest prospects good.
Umballa ...	*Nil*	Health and crops good.
Jullundur ...	*Nil*	Health improving; crops good.
Lahore ...	*Nil*	Health fair; crops good.
Mooltan ...	*Nil*	Health better; harvest prospects good.
Dera Ismail Khan ...	*Nil*	Health and harvest prospects good.
Rawalpindi ...	*Nil*	Health fair; harvest prospects good.
Peshawar ...	*Nil*	No report received.
		General Remarks.—Fever still hangs about in places, and health of province can only be pronounced fair; harvest prospects good.
Oudh— (Nov. 22nd)		
Lucknow ...	*Nil*	Prospects continue favourable; public health good.
Fyzabad ...	*Nil*	
Sultanpur ...	*Nil*	
Central Provinces—		
Upper Godávari (Nov. 18th)	...	Weather cool; *kharif* mostly dried up; rain required for *rabi*; health good; prices steady.
Nimár ...	...	Weather warm; reaping of *kharif* crops progressing; outturn good; fever prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provs.—contd.		
Bilaspur ...	...	Weather cloudy and close; rain wanted for *rabi*; early rice being cut; fever continues; prices risen.
Raipur ...	...	Weather clear and cold; prospects favourable; early rice being cut; yield above average; *rabi* sowings completed; health good; prices rising.
Bálághát ...	...	Weather clear; rice cutting; *rabi* sowings continue; cholera ceased; prices stationary.
Chanda (Nov. 19th)	...	Weather cool; rice cutting continues; few cases of cholera; prices rising.
Chhindwára ...	...	Weather cool and pleasant; prospects favourable; cholera prevalent prices falling.
Betul (Nov. 20th)	...	Prospects favourable; rain required for *rabi*; cholera decreasing; prices falling.
Bhandára („ 21st)	...	Weather cool and pleasant; rice crops fair; *rabi* favourable; fever and cholera continue; prices fallen.
Nágpur („ 22nd)	...	Prospects fair; slight cholera; prices falling.
Wardha ...	...	Cotton picking continues; prospects of *rabi* good; slight cholera.
Nimár ...	...	*Tur* slightly injured in some villages; small-pox continues; prices falling.
Hoshangabad ...	...	Prospects fair; health good; prices unchanged.
Narsinghpur ...	...	Weather warm; rain required for *rabi*; prospects fair.
Jubbulpore ...	...	Weather clear and cool; outturn of *kharif* good; *rabi* sowings completed.
Saugor ...	...	Outturn of *kharif* average; *tili* excellent; prices fallen.
Seoni ...	...	*Rabi* thriving; cholera continues; prices stationary.
Mandla ...	...	*Rabi* sowings completed; cattle disease continues; prices rising.
Damoh ...	...	*Rabi* sowings completed; cattle disease continues; prices stationary.
		General Remarks.—On the whole the prospects of the province continue fair.
British Burma— (Nov. 22nd)		
Arrakan Division ...	...	Crops continue to promise well; public health good.
Pegu Division.		
Rangoon ...	1·68	Crop prospects good; reaping commenced in some parts of Syriam township; health generally good; cattle disease still slight.
Thonkwa ...	...	Health and crops good.
Bassein ...	1·50	Slight cattle disease; health generally good; harvest prospects good.
Henzada ...	1·41	Weather favourable; slight failure of crops in Kyanghin, elsewhere good; one fatal case of cholera reported in Kyanghin, otherwise public health good.
Prome ...	·84	One case of cholera, otherwise healthy; crops fair.
Thayetmyo ...	2·42	General health good; some crops destroyed through want of rain.
Tenasserim Division ...	...	Public health good; agricultural prospects favourable; slight rainfall in Tounghoo and Amherst.
Assam—		
Gauhati (Nov. 23rd) ...	*Nil*	Heavy fogs in the mornings; days clear and cool; prospects of crops favourable; *sali dhan* being reaped in some places; public health good.
Sylhet „ ...	...	Now raining; prospects same as before.
Mysore and Coorg— (Nov. 23rd)	1·15 in Kolar District.	No rainfall elsewhere; prices of food-grains continue high; no improvement in prospects of season, which continue bad; considerable importation of grain by rail; markets moderately supplied; public health generally good.
Hyderabad Assigned Districts—		
Amráoti (Nov. 23rd)	...	*Kharif* harvesting commenced; expected outturn below usual average; *rabi* fair in some places, in others unpromising for want of rain; cholera in mild form in parts of the province.
Central India— (Nov. 22nd)		
Indore ...	*Nil*	Prospects and health continue good.
Gwalior ...	*Nil*	
Neemuch ...	*Nil*	
Rutlam ...	*Nil*	
Sutna ...	*Nil*	
Rajputana—		
Ajmere (Nov. 23rd)	*Nil*	Health good; *rabi* sowings commenced.
Jeypore („ 23rd)	...	Agricultural prospects continue favourable; health good.
Ulwur („ 22nd)	...	Prospects favourable; weather cool and pleasant.
Bhurtpore („ 23rd)	...	Prospects of *rabi* crops fair.
Jhallawar („ 24th)	...	No change during week ending the 17th instant.
Nepal (Nov. 15th)	*Nil*	Harvest in the hills nearly complete.

GOVERNMENT OF INDIA.

FOREIGN DEPARTMENT.

NAWAB NAZIM'S DEBTS ACT, 1873.

The proceedings of the Commission appointed under the above Act having been brought to a conclusion, the Governor General in Council has directed the publication of the general results of those proceedings and of the trials and decisions of the principal claims.

No. 113, dated Calcutta, 15th March 1876.

From—Commissioners appointed under the Nawab Nazim's Debts Act, 1873.
To—The Offg. Secy. to the Government of India, FOREIGN DEPARTMENT.

We have the honor to report that we have completed the duties entrusted to us under the provisions of the Nawab Nazim's Debts Act. We submit—

I.—A book containing five lists of claims, *viz.*—

A. Arrears of salary preferred by servants on the establishment.
B. Arrears of salary preferred by discharged servants.
C. Arrears of salary preferred by the sipahis of the Nawab Nazim's guard.
D. Arrears of pension and small miscellaneous claims.
E. Money due on loans, for goods sold, &c.; and the amount awarded on each claim, with an index to the whole.

II.—A book containing the grounds on which the Commissioners made their award in each claim entered in list E.

III.— A book containing the particulars of each landed estate and other immovable property, and of each jewel in the possession of the Nawab Nazim, and the principles on which the declaration of the Commissioners was made, as well as the application of the principles to each portion of the property.

2. We have prepared a copy of each of these books, and we propose, with the sanction of Government, to deposit them in the Office of the Agent to the Governor-General at Moorshedabad. They will probably be required for reference and possibly for production in legal proceedings. The cost of making these copies has been defrayed by the Nizamut.

3. We have disposed of 1,249 claims preferred by persons in India, aggregating Rs, 52,14,981-9-8, of which 249 have been disallowed. In respect of the remaining 1,000 claims, we certified that Rs. 14,23,795-14-6¼ was fairly and justly due by the Nawab Nazim. Also on the report of Messrs. Farrer, Ouvry & Co., Solicitors in London, we certified that £6,592-19-6 was due to nine persons in England.

4. One claim, preferred by the widow of Mr. W. D. Fox, for £10,676-5-6, the balance alleged to be due on an account current between him and the Nawab Nazim, and Rs. 4,260 on account of her husband's personal allowance, remains for disposal. The papers were sent for enquiry to Messrs. Farrer, Ouvry & Co., but their report has not been received; and with

reference to the orders of Government in letter No. 553P., of the 25th ultimo, we make no further delay in the submission of this report.

5. We have declared that 164 landed estates and 12 buildings in addition to those within the precincts of the kila (or palace) are held by the Government of India for the purpose of upholding the dignity of the Nawab Nazim for the time being. And we have made a similar declaration in respect of 79 jewelled ornaments and 473 loose jewels.

6. We append an account showing the sums expended by us for the purposes of the Commission, amounting to Rs. 5,336-2, exclusive of the allowances drawn by the Commissioners.

7. We desire to record our thanks to Colonel E. Thompson, the Agent to the Governor-General, for the cordial assistance which he has given us throughout these proceedings. Without taking any direct part in the enquiries, he has afforded us material aid in every way which lay within his power, and we are much indebted to him for his courteous attention to us and to the business of the Commission when we visited Moorshedabad.

We desire also to acknowledge the assistance which we received from Baboo Bangshidhar Rai, the Naib Dewan of the Nizamut. We should have found it difficult to elicit the requisite information in respect of the claims preferred, if he had not taken considerable trouble in searching for and producing the various records, and in superintending the work of the Nizamut Amla in the arrangement and translation of the accounts of the several departments. When others held back in ignorance and doubt, he perceived the benefits which the Nizamut would derive from the work of the Commission, and strenuously exerted himself to further our proceedings and to do us good service in many ways.

A.

LIST OF SERVANTS ON THE ESTABLISHMENT.

[This list was furnished by the officers of the Nizamut, and the awards were made on examination of the Treasurer's and Sarishtadar's accounts for the previous five years.]

No.	Department.	Name.	Amount claimed.	Award.	Remarks.

25	Sohagi, Dai ...	Do. ...	175 0 0	...	Employed in one of the deoris.

In this list are entered all the petitions presented to the Commissioners, which are not inserted in the regular list of claims, List E. They are chiefly petty claims to arrears of salary or pension, and many of them have been disposed of in the foregoing lists. Accounts and lists of pensions were furnished by the Nizamut officers, under the names of pensions, Langarkhana, Parwarash, Pansaid, &c., for past years; but all such charities have been neglected since the Nawab Nazim left Moorshedabad. We have awarded small gratuities to those who were in the receipt of pensions. Many of these persons were doubtless proper objects of charity, but others were quite able to work for their living, and obtained grants of pensions on account of the services of their ancestors.

SELECTION FROM AWARDS MADE BY THE COMMISSIONERS.

Claim No. 5.—*Harakchand Golicha, Rs.* 8,973.

The claimant is a banker carrying on business at Azimgunj under the style of Okhoiram Karram Chand Harakchand, and at Calcutta under the style of Okhoiram Harakchand. He has on four occasions lent money, Rs. 5,000 each time, to Mirza Wala Kadir, the second son of the Nawab Nazim, on account of his father, the first transaction being dated the 6th August 1871; and on the running account of these loans he now claims Rs. 8,973. This amount includes interest at the rate of 36 per cent. down to the 20th March 1874; and the account includes also other sources of profit, for the loans were made not in cash, but by hundis, payable after 31 days, and yet he took a month's interest in advance, and also in some cases hundian.

We think that it is sufficient to allow him 12 per cent. interest on each loan from the date on which the hundi became payable, deducting the several sums paid on account, with a corresponding rate of interest. In the annexed table the interest is calculated to the 15th October 1874:

Date of hundi.	Payable after how many days.	Date on which the hundi was payable.	Amount of loan.	Interest at 12 per cent. to October 15th, 1874.	Period for which interest is calculated.
			Rs. A. P.	Rs. A. P.	Y. M. D.

AMEER ALI.

The 2nd October 1874.

Claim No. 49.—*Sakhicharan Kuar, Rs.* 5,653.

This is a claim for the balance on three loans of Rs. 2,850-10-9 and Rs. 200 and Rs. 835, respectively, including interest at 36 per cent. and 25 per cent. on the aggregate of principal and interest in lieu of farther interest, and additional interest on the balance of the account. The first loan above mentioned was not the first loan between the parties, and the alleged principal in fact includes a considerable balance of previous loans. There is no ground for awarding

a higher rate of interest than 12 per cent., and we disallow all other additions to the account; but we must take the account from the commencement in order to ascertain the equitable balance of interest, because it seems that it was never cleared. The items noted below are taken from the Nizamut Treasury accounts, with which the claimant's statement coincides so far as it goes:—

Date.	Sums advanced by claimant to the Nizamut.	Interest to 31st January 1875.		
	Rs. A. P.	Y. M. D.	Rs. A. P.	
1868, April 18th ...	1,000 0 0	6 9 13	814 5 4

We award to the claimant Rs. 2,493-1-5.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 16th January 1875.

Claim No. 133.—*Jibunkumari Bibi, widow of Mehirchand Naolakha, Rs.* 32,530-5.

This claim is for money due on three loans at 36 and 48 per cent. per annum, and for the costs of a suit filed by the claimant on the 28th October 1873, for the recovery of the amount due to her. We do not find any ground for the award of a higher rate of interest than the ordinary rate of 12 per cent., and we disallow the cost of the suit, because it was notorious at Moorshedabad at the time of the institution of it that the Act to provide for the Nawab Nazim's debts was about to be passed.

The claimant's account is given below, with interest calculated on each item to the 31st January 1875.

Date.	Cash advanced by claimant.	Rs. A. P.	Interest at 12 per cent. to January 31st, 1875. Y. M. D.	Rs. A. P.
1870, January 22nd ...	Rs. 10,000, less 408 interest deducted	9,592 0 0	5 0 9	5,783 15 7
„ March 15th ...	.....	4,000 0 0	4 10 18	2,344 0 0
„ „ 24th ...	„ 6,000, less 5,650 renewal and interest.	350 0 0	4 10 7	203 13 1
„ November 1st ...	„ 13,236, less 13,198 paid principal and interest.	38 0 0	4 3 0	19 6 1
1871, May 30th ...	„ 14,500, less 13,256 payment of previous loan.	1,264 0 0	3 8 1	553 9 4
„ September 4th ...	„ 3,100, less 100 paid interest ...	3,000 0 0	3 4 27	1,227 0 0

Amount awarded, Rs. 7,326-13-4.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 22nd January 1875.

Claim No. 164.— { *Govindchand Dogar, Karramchand Dogar, Sitabchand Dogar, Shukarchand Dogar, Harakchand Dogar* } *Sons and heirs of Indrochand Dogar (Guhi Baboo), Rs.* 1,13,867, *and interest thereon.*

Indrochand Dogar carried on business as a banker at Moorshedabad under the style of Nehalchand Indrochand, and at Calcutta under the style of Naiuri Indrochand.

The petition of claim alleges that Indrochand lent to the Nawab Nazim Rs. 15,500 on the 16th October 1871, and Rs. 50,614-5 on the 11th May 1872, on the condition of the repayment of the money on the 3rd June 1872; that on default of payment he filed two suits in 1873 for the recovery of the money; that the Nizamut confessed judgment, promising to pay the whole amount decreed by fixed instalments; and that on the 18th August 1873 decrees

issued in his favor for Rs. 26,989-10 in one suit and for Rs. 76,216-15 in the other, giving a total amount of Rs. 1,03,206-9. The decrees were for—

	Rs. A. P.	Rs. A. P.
Principal	15,500 0 0	
	50,614 5 0	
		66,114 5 0
Interest		33,231 4 0
Costs of suit		3,861 0 0
Total ...		1,03,206 9 0

Of this amount only Rs. 2,000 has been paid.

Indrochand Dogar died on the 1st September 1873, and on the 6th November following the claimants obtained a certificate under the provisions of Act XXVII of 1860, entitling them to recover the debts due to the estate.

Now, on examining the accounts we find that the alleged loans were not the simple cash transactions which the claimants represent. The statement of the petition of claim, "that the said several amounts for which the above decrees were obtained were truly and actually paid and advanced by the said Indrochand to the Nawab Nazim," is false. The sums for which Indrochand sued and recovered decrees represent the heights to which he climbed by a long ladder of compound interest.

On the 16th October 1871 a receipt or promissory note was given to Indrochand, signed by the second son of the Nawab Nazim and H. C. Fox, for Rs. 15,500 on account of money lent by hundis; and it seems that seven hundis, dated 10th October, were given for Rs. 15,000 only, of which three, aggregating Rs. 7,000, were payable 61 days after date, and four, aggregating Rs. 8,000, were payable 31 days after date. The extra Rs. 500 was deemed to be the interest for one month paid in advance. In a second petition it is stated by the claimants that the Nawab Nazim paid Rs. 5,000 on the 23rd November 1871, that is to say, before all the hundis were payable, and yet after the lapse of one and a half year only from the date of the hundis Indrochand sued to recover the whole amount of the principal, plus Rs. 10,050 as interest. Now, this instance affords an example of the manner in which the second son of the Nawab Nazim, Wala Kadr, involved the Nizamut in enormous debts without obtaining an equivalent. The receipt for the Rs. 15,500 does not mention any rate of interest; but if the rate was, as the claimant says, 3 per cent. per mensem, the amount of interest due at the time of the institution of the suit, even if the Rs. 5,500 paid be taken as interest only, was only Rs. 2,100; and yet he filed a confession of judgment admitting a debt of Rs. 25,550.

The demand made in the other suit was more extravagant. On the 11th May 1872 the second son of the Nawab and H. C. Fox gave two receipts to Indrochand, one for Rs. 25,000 and the other for Rs. 25,614-5. From the wording of these receipts one would imagine that these sums had been advanced in cash, but in point of fact the transaction was on paper only, and no money passed. The adjustment is described thus—

	Rs. A. P.
In liquidation of loan of 8th July 1871	42,011 3 0
Interest from 3rd August 1871, to 3rd June 1872	12,603 2 0
Total ...	54,614 5 0

This takes us back to the so-called loan of 8th July 1871, which was not a loan but a similar re-settlement of the account on paper; it is described to be—

	Rs. A. P.
In liquidation of loan of 18th December 1870	34,720 0 0
Interest from 3rd January to 3rd August 1871	7,291 3 0
Total ...	42,011 3 0

So also the "loan of the 18th December 1870" turns out to be a similar re-settlement of the account on paper, as follows:—

	Rs. A. P.
In liquidation of two hundis of 24th August 1870	31,000 0 0
Interest to 3rd January 1871	3,720 0 0
Total ...	34,720 0 0

The hundis of the 24th August 1870 were not, as might be supposed, cheques drawn by Indrochand in favor of the Nizamut, but only promissory notes renewed, thus—

	Rs. A. P.
In liquidation of hundis of 11th October, 28th November and 13th December 1869	25,000 0 0
Interest from 3rd January to 3rd September 1870	6,000 0 0
Total ...	31,000 0 0

The three promissory notes thus referred to were given on the following accounts:—

	Rs.	A.	P.
October 11th, 1869—Instalment due on bond of August 17th for September and October	6,000	0	0
Interest on Rs. 13,000 from October to December 1869	1,170	0	0
Cash advanced	5,830	0	0
Total ...	13,000	0	0
November 28th—Cash advanced	5,460	0	0
December 13th—Instalments due on bond of August 17th for November and December	6,000	0	0
Interest on Rs. 12,000 of November 28th and December 13th, from November 1869 to January 3rd, 1870	540	0	0
Total ...	6,540	0	0

Now the bond of August 17th, 1869, was for Rs. 30,000, of which sum Rs. 7,476-6-3 was on account of interest due on previous loans. So that in fact the amount for which the suit was laid in 1873 was composed of—

	Rs.	A.	P.	Rs.	A.	P.
Actual cash advanced	5,830	0	0			
And	5,460	0	0			
				11,290	0	0
Four unpaid instalments on a bond, one-fourth of which was interest				12,000	0	0
Compound interest				27,324	5	0
Total ...				50,614	5	0

In order to ascertain the amount which is justly and fairly due to the claimants, we must ascertain in the first place what were the actual cash payments made on both sides of the account. Such a statement was ultimately filed by the claimants, and the following account has been prepared on a comparison of their statement with the Nizamut accounts, and after a careful enquiry regarding each item which was disputed.

The claimants "protest against the Commissioners re-opening accounts of loans which have been settled and paid off." But these transactions have been running on from the middle of 1868 to the end of 1871, and it is impossible to separate them. The whole account must be taken as one, and the enormous interest which these claimants induced the Nizamut, under the administration of the second son of the Nawab, and Mr. H. C. Fox (who so shamelessly betrayed his trust), to pay to these creditors must be disallowed. We are of opinion that the common rate of interest, *viz.*, 12 per cent. per annum, is sufficient for transactions of this nature. A higher rate of interest is indeed paid in cases which involve a considerable risk, but in the case of the Nawab Nazim there was no risk; and, if the affairs of the Nizamut had been under the superintendence of men of common sense and common honesty, any money required might have been obtained at a very much lower rate of interest. The claimants say that "the ordinary rate of interest on money lent on promissory notes and similar securities is from two to three per cent. per mensem;" but that is not true in respect of borrowers whose position and means of repayment are so well assured as they are in the case of the Nawab Nazim.

The claimants include in their present demand the costs incurred by them in the two suits instituted by them in 1873, and ordinarily we should hold that they were entitled to recover any reasonable sum expended in enforcing payment. But it appears to us that the demands made by the claimants in those suits were fraudulent, for considering the respective parties the extortion became a fraud. We disallow the costs on that ground.

In the following account interest is allowed at 12 per cent. per annum on every rupee advanced from the date of the advance to the date of payment.

	Rs.	A.	P.
On the one side of the account, to the credit of the claimants, we have the total amount of cash advanced	1,88,845	1	9
And on the other the total amount of cash repaid	1,71,694	14	9
Balance in favor of claimants	17,150	3	0
Total amount of interest credited to the claimants	1,09,276	10	9
And debited to them	92,308	2	11
Balance in favor of claimants	16,968	7	10
The amount due to the claimants is therefore balance of principal ...	17,150	3	0
Balance of interest	16,968	7	10
TOTAL ...	34,118	10	10

The interest was calculated to the 31st January, but the certificate of our award has been delayed, and therefore we allow in addition two months' interest on the balance of principal, amounting to Rs. 564-8-1=Rs. 34,683-2-11.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 8th March 1875.

Claim No. 141.—*Budh Sing Dudharia and Bissen Chand Dudharia, Rs.* 2,53,324-9-6.

The claimants carry on business as bankers at Azimgunj and Calcutta under the style of Mulchand and Harakchand. They have from time to time during several years advanced money to the Nawab Nazim, and they say that it was found on the 13th December 1870 that he owed them Rs. 1,08,823-8, and that on the 17th idem he executed a bond in their favor for that amount, promising to pay interest at 2 per cent. per mensem, and engaging to pay Rs. 20,000 on the 3rd January 1871, and monthly instalments of Rs. 3,000, and with the further condition that the interest should be raised to 3 per cent. per mensem in case of failure in the payment of the instalments. Certain landed properties were pledged as security for the payment of this debt. Between the date of the bond and the 6th May 1872 the Nizamut paid them Rs. 65,000, of which Rs. 27,243-14-3 was on account of interest, and they claim Rs. 71,066-6-3 with interest at 3 per cent. per mensem from the 1st May 1872.

The claimants also allege that another bond was executed in their favor on the 8th February 1873 for Rs. 1,20,000, of which Rs. 40,000 has been paid (Rs. 22,117-12 on account of principal, and Rs. 17,882-4 on account of interest up to 14th October 1873), and they claim as due thereon Rs 97,882-4 with interest at 3 per cent. per mensem from the latter date.

In 1873 on the 29th October they filed a suit to recover the amount due to them on the first bond, which suit was withdrawn on the passing of Act XVII, and they claim repayment of the costs incurred, *viz.*, Rs. 1,450.

The total amount claimed on these three accounts is Rs. 2,53,324-9-6.

The claimants produced with their petition of claim the two bonds to which they refer, and as the recital of the first showed that it was an acknowledgment of sums previously due on account of loans and other transactions, it became necessary to examine the details of the whole account between the parties, and the claimants were required to furnish us with a full statement of all transactions, distinguishing the cash payments from the renewals and adjustments of account which were made on paper only. This statement was carefully compared with the accounts kept in the Nizamut with the assistance of the claimants' agent and their solicitor, Mr. Orr. In the first instance many discrepancies were found, but most of them disappeared on enquiry. Where there was any reasonable doubt, the point has been waived in favor of the claimants, and every portion of the claim which appeared justly due has been admitted.

It is unnecessary to note the various matters discussed, but some items in the account merit a few remarks.

The account commences in July 1869. There were previous loans in 1867 and 1868, but according to the Nizamut accounts they were fully paid up in 1868, and therefore they have not been brought into the account. In the first instance the claimants, alleging that some balance of interest was still due on a former loan, waived his claim to it, and consented to the proposal that the accounts of previous years should not be examined, but subsequently they desired to renew the demand on the ground that it formed an item in the consideration of the bond of the 17th December 1870. This application which has been made at the last moment we have been obliged to reject. The entry in the bond is "Rs. 902-8-9, being the balance of principal due on the bond relating to the deoriat of the Sirkar's Nizamut, and Rs. 127 being interest thereon up to the 13th December of the said year" (1870). Now, the claimants alleged before the Commission that the Rs. 902-8-9 was the balance of interest, not of principal; but however this may be, we cannot admit any balance without taking the whole account of the deoriat bond in question, and ascertaining whether any sum is really due on it. This is not desired, and we have not the account before us, and we think that the claimants are not entitled now to re-open the whole matter for the introduction of a small item which they waived in the first instance.

The Nizamut accounts have entries in March and April 1872 of Rs. 38,600 borrowed and repaid, while the claimants allege that they know nothing of the loan or of the repayment. No explanation of this discrepancy has been given, but we have struck the corresponding items out of both sides of the account.

The chief item of the consideration for the bond of 17th December 1870 is the amount due under a decree of the 28th May of the same year. The suit was brought to recover Rs. 50,447-3-9 as the amount due, including interest on a bond for Rs. 60,000, dated the 17th August 1869, of which Rs. 16,000 only had been paid. A decree was given, apparently *ex parte*, for the whole amount claimed, and was signed on the 1st June of that year. The entry in the recital of the bond is—

	Rs.	A.	P.
Amount decreed	50,447	3	9
Interest for the time during which the suit was pending	634	7	6
Costs of suit	1,628	10	9
Interest on the foregoing items from date of decree to date of bond ...	3,573	1	6
Costs of execution of decree	85	8	0
Total ...	56,368	15	6

The original debt of Rs. 60,000 and the costs of suit and of execution of decree have been admitted, and interest has been allowed on all these items at the usual rate of 12 per cent. per annum. According to the Nizamut accounts Rs. 5,000 was paid to the claimants on the 1st June 1871, but there is no such entry in the claimants' accounts, and they say that the money was never paid. They argue also that it is exceedingly improbable that this money was paid on the very day on which the decree was signed. Now, it is admitted that Rs. 5,000 was paid on the 5th July, and it appears to us not at all improbable that the Nizamut sought to stop immediate execution of the decree for the whole amount by the prompt payment on the 1st June of Rs. 5,000. There is no doubt that the Rs. 5,000 was taken out of the Nizamut Treasury, but no receipt for it from the claimant can be found, and as it was taken by Mr. H. C. Fox, we do not feel assured that it found its way into the claimants' hands. Under these circumstances we have omitted it.

We have also omitted from the account of repayments a sum of Rs. 5,900 which was paid to the claimants on the 1st June 1871. It appears that certain articles of gold plate were pledged to the claimants for a loan of Rs. 59,000 at 10 per cent., and that the above-mentioned sum was interest paid in advance or after one year. The articles were redeemed in 1873 by Dhanpat Sing through the house of Ghamandiram Hukamchand, and were subsequently sold; they belonged to the three wives of the Nawab Nazim, and were sold, it is said, by his orders to raise money for his own purposes in England. But as far as the present claimants are concerned, the transaction was distinct and complete, and may be kept out of the general account.

On the 16th May 1871 the sum of Rs. 1,670 was taken by H. C. Fox for payment to Jaichand (the agent of the claimants) "on account of a loan for Rs. 10,000 of the 16th April 1871." The claimants say that they never received this money. Now the loan of Rs. 10,000 is entered in their account on the date mentioned as against the Nizamut, but we have no proof that the Rs. 1,670 was ever paid to them. This sum, therefore, we have also omitted from the account.

The claimants allege that Rs. 4,274-3 was paid to the Nizamut on the date of the execution of the bond of 17th December 1870. But there is no entry in the Nizamut account of the receipt on that day of any money. In the recital of the bond it is entered as "the amount of another order," which is incompatible with the allegation of money then paid, and obviously refers to a former transaction. It is also alleged that a promissory note was then given in the name of Indrochand, the son of Budh Singh, but the note is not forthcoming, nor is there any other evidence of the loan, and we are forced to the conclusion that it was then stated balance due at the time of the execution of the bond on some former loan which has been entered in its proper place. We have therefore excluded it from the account.

We find in the Nizamut accounts, which have been kept with much accuracy, various items of money paid at the time of negotiating the several loans as "hundian" and "brokerage." The claimants have not given credit to the Nizamut for these sums, and they allege that they were presents made to their servants and were not paid to themselves. But this is wholly unsupported by the entries in the accounts or other evidence. When the loan was granted, hundian was deducted, it seems, at the rate of one per cent. and brokerage at the rate of half per cent., and it appears to us that the allegation of presents is put forward now, because the claimants are unable to justify those charges. If the money had been given as free presents to the servants, we should not debit it against the claimants, but in the absence of proof that it was so, we must hold that the amount of the loan was less than the nominal amount by the sum so disbursed at the same time, and we have accordingly made such deductions throughout.

The claimants ask to be repaid the costs incurred in the institution of a suit against the Nawab Nazim for the amount due to them on the 29th October 1873. Now at that time they were well aware of the provisions of Act XVII of 1873, which was about to be passed, but they imagined that they would escape from the operation of the law, if the suit were filed before it were passed.

They risked the costs in the hope of ultimate profit, and must take the consequences. The proceeding was wholly abortive and useless, and the costs cannot fairly or justly be demanded from the Nawab Nazim.

Finally, we may observe that the accounts of these claimants are not disfigured by frequent nominal adjustments and consequent extortionate demands.

The following statements contain all the items which in our opinion have been established on either side of the account:—

Balance of interest	...				39,777	13 3
Amount due to claimant	...				1,13,187	14 5

The interest on the balance of principal is Rs. 734-1-7 for one month. In the above statement the interest has been calculated to the 15th February only, and therefore we allow additional interest for two and a half months, Rs. 1,835-4=1,15,023-2-5 to the 30th April 1875.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 6th April 1875.

Claim No. 92.—*Jaganath Sah, Rs.* 53,560-1-9.

This claim is based on three loans made by the claimant in the name of his gomashta, Premnarain Sah; first, Rs. 10,000 lent to the Khas Deori on the 1st Februa[illegible] second, Rs. 15,000 lent to the Mahalat Department on the 5th June 1871; and third, [illegible],000 lent to the Behala Department on the 21st June 1871. In 1872 he filed a suit to recover the money due on the first loan, and an *ex-parte* decree was passed in his favor, on which he says the balance due is Rs. 14,432-5-3. Deducting Rs. 3,538 paid on account of the second loan, and Rs. 2,250 paid on account of the third loan, he claims balances which he calculates to be Rs. 20,952 and Rs. 18,175-12-6.

But in fact his loans to the Nizamut commenced in April 1868, and the loans of June 1871, as he calls them, were in fact adjustments of previous accounts. It is therefore necessary to take the whole account. There is some confusion in the accounts, because some of the loans were made in his own name, and some in the name of his gomashta, and this is further complicated by the fact that Shuchand Chunder, the Treasurer of the Nizamut, whose case is the next for disposal, also lent money to the Nizamut in the name of this gomashta, Premnarain Sah. But we have separated the items on the evidence of entries in the Nizamut accounts.

The claimant executed his decree in Moorshedabad, and recovered a considerable amount, and then transferred the decree for execution to Rajshahye. We have ascertained from the Judges the amount realized. In the latter district a net sum of Rs. 517-14-9 was in deposit, which the Judge says was paid out to the decree-holder on the 25th September 1874; the claimant however says that the Court refused to pay the money with reference to Act XVII, but this can be adjusted hereafter.

THE STATE OF THE WHOLE ACCOUNT IS SHOWN IN THE FOLLOWING STATEMENTS BROUGHT DOWN TO THE 15TH FEBRUARY 1875.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 17th April 1875.

Claims Nos. 74 *and* 137.—*Shuchand Chunder, Rs.* 39,619-12.

The claimant is the khazanchi of the Nizamut Behala Establishment. He first claimed on a bond for Rs. 40,000, dated July 2nd, 1873, which recites that the amount due for principal and interest was Rs. 32,000, and that 25 per cent. was added in lieu of further monthly interest. The balance due on that bond he alleged to be Rs. 33,852, that is to say, the balance due on Rs. 32,000, *plus* interest at 12 per cent. Subsequently he claimed Rs. 5,767-12 as the amount due on a note of hand for Rs. 5,104-4, dated August 16th, 1873, with interest at 12 per cent. When he was desired to furnish a detailed account of his claim

he said that the Nizamut had borrowed the following sums through him, and that he had paid off the debts with the interest which had accrued, *viz.*—

Name of the person who lent the money to the Nizamut.	Date of the original debt.	Alleged amount of the original debt.	Interest which accrued from December 1872 to May 1873 at 36 per cent.	Total amount paid by the claimant.
		Rs. A. P.	Rs. A. P.	Rs. A. P.

				40,000 0 0

There is a mistake in the claimant's figures of a few annas.

Now, an examination of the accounts shows that the first three items were not sums of money advanced to the Nizamut, but only sums stated on adjustment of the account. And it further appears that instead of being separate loans advanced by several persons, the money was advanced by the claimant himself in their name. One of them is his wife, and the others are related to him. And these are not the only names in which he advanced money. When he was required to furnish the detail of the account under each name, he filed 12 separate accounts in the names noted in the margin. Of these persons Gorachand Sah was the gomashta of Harinarain Sah, and money was lent to the Nizamut by Harinarain in his name. These sums have been treated by us as items in the account of Harinarain, and the amount for which we certified has been paid to him; they cannot therefore be brought into this account. Premnarain Sah is the gomashta of Jagannath Sah, see the preceding claim, but we have separated the money of this claimant from the money of Jagannath so far as we could on the evidence before us. It was the duty of Shuchand to keep the accounts of the Nizamut, and we must hold him bound by the entries in the accounts. We have chiefly relied on his accounts in examining the claims of other persons, and have found them very correct. It does not appear why he entered his own loans in the names of other persons, but it is evident that he did so, because the payments on account of these loans are entered in his own name. He says that the money was borrowed from these persons by himself, and that he lent it to the Nizamut; but in that case we have no concern with those other persons, and must treat him as the sole creditor. If the money was lent to the Nizamut by the other persons, his name should not have appeared, and would not have appeared as is shown in the accounts of the various other claimants which have been before us. At all events he is responsible for the accounts, and as he has mixed up the various accounts by entering in his own name in lump sums the amounts paid in liquidation of loans credited to other persons, we must treat the whole as one account. But in the following statement we note the name to the credit or debit of whose account the payment was entered. We omit from consideration 11 loans made in 1869 which were paid off with interest in the course of the year.

Shuchand (himself).
Sowdamini Dasi.
Baloram Chunder.
Chunder Mohun Dhur.
Umeschunder Dutt.
Modosudun Chunder.
Gorachand Sah.
Jaichand Baid.
Premnarain Sah.
Raimohun Sah.
Eshanchunder Chunder.
Kalachand Dutt.

This claimant is entitled to less consideration than others, because he has been for many years a confidential servant of the Nizamut, and his duty was to protect and economize the Nizamut Funds. But instead of this we find him, sometimes on the same date, sometimes with the interval of a few days between the entries, lending money in the name of one person and receiving payment at an exorbitant rate in the name of another with the sole object of exacting compound interest. Looking to the reckless proceedings of the sons and other agents of the Nawab Nazim of which he was the witness, he should have resisted all unnecessary loans; but he pursued the opposite course. He is entitled to the fair and customary rate of interest, 12 per cent., and that we allow throughout the account.

Interest on advances	37,773 9 2	
Interest on repayments	33,339 9 6	
Balance of interest		4,433 15 8
Amount due 30th April 1875		9,132 8 8

This is the amount which the claimant ought in fairness and justice to receive on the general account. There is an additional sum of Rs. 10,104-2, which the claimant advanced, he says, in cash on the 2nd July 1873, the date on which the bond was executed. Now, this sum was never brought into the Nizamut accounts; and, as the claimant himself kept the accounts, it is obvious that he knew that the money was not taken for the purposes of the Nizamut. He was informed long ago that the Commission could not take notice of debts incurred by any of the sons of the Nawab Nazim or other person unless the money was borrowed for the purposes of His Highness or of the Nizamut. The Commission is not empowered to pay the debts of the sons. The claimant says that the money was delivered by himself in cash to the two eldest sons, Nawab Ali Kadr and Nawab Wala Kadr. When the Commission was about to take up this claim in January last, the former wrote to us to say that he had heard that it was our intention to disallow this item, that "the expenditure was one of a strictly private nature," and that it would be unjust to the claimant to strike it out of the claim. He was informed that this statement was insufficient, and that we required to have the means of judging whether the debt could fairly be charged against the Nawab Nazim. Now, he says that the money was borrowed for remittance to his father, but this must be a mistake, for all sums paid on account of remittances were entered in the general account, and on the previous day Rs. 15,000 had been paid on that account as the usual monthly charge. It may be that the claimant advanced the money to the two sons, but in the absence of all reliable evidence to show that it was used for Nizamut purposes, and in face of the fact that Shuchand himself deliberately omitted all mention of it in the Nizamut accounts, we must necessarily disallow it.

Amount awarded Rs. 9,132-8-8.

C. A. BARWELL.
AMEER ALI.

The 21st April 1875.

Claim No. 74.—Shuchand Chunder.

When we disposed of this claim in April last, we disallowed an item of Rs. 10,104-2 said to have been advanced by the claimant to the two eldest sons of the Nawab Nazim on the 2nd July 1873, because it was not shown to us that the money was borrowed by them on the account of the Nawab Nazim. Subsequently Nawab Ali Kadr and Nawab Wala Kadr have both assured us that the money was taken for and applied to Nizamut purposes, and have allowed us to understand that it could not be entered in the accounts because the object was disgraceful. Now, it has been admitted and proved all along that the claimant did advance the money, and we think that he ought not to be made to suffer this loss by reason of the shameful nature of the transaction. He was in some measure to blame in the matter, because he did not enter the money in the Nizamut accounts, and we do not allow any interest, but we award the sum actually advanced, *viz.*, Rs. 10,104-2.

F. BEAUFORT.
A. H. PATERSON.
AMEER ALI.

The 30th September 1875.

Claim No. 162.—*Rai Lachmipat Singh Bahadoor, Rs.* 7,87,428-12-5.

This claim is for the balance due on an account which commenced in June 1861. During nine years the claimant advanced money from time to time, and money was paid to him on account, and on the 16th March 1865, 1st November 1866, 1st January 1868, 26th June 1869, and 1st October 1869, the account was nominally adjusted, and a bond was executed for the balance shown in such adjustment. In 1871 the claimant sued the Nizamut for the amount due on the last bond, and also on various Promissory Notes, and on the 15th March 1872 he recovered decrees, which he put in execution. Act XVII of 1873 stopped his execution proceedings. His original petition of claim contained the following statement of the amount due to him, *viz.*:—

	Rs.	A.	P.
On the general account	4,84,273	15	7
In satisfaction of decrees recovered on Promissory Notes ...	34,177	12	0
On bonds dated August 24th, 1871	16,771	2	2
TOTAL ...	5,35,222	13	9

But when he was required to put in a statement of the whole account from the commencement, he filed accounts showing the following amounts as due to him, *viz.*:—

	Rs.	A.	P.
On the general account	7,05,116	15	7
In satisfaction of decrees	65,540	10	8
On account of loans to Mahalat Department	16,771	2	0
TOTAL ...	7,87,428	12	5

After the lapse of so many years we cannot expect to find complete evidence of each item in this account, especially as the vouchers were of course returned to the Nizamut on the execution of the bond; but comparing the account books of the claimant with the Nizamut accounts, and examining also the documents found in the Nizamut sarishta, we consider that the items shown in the following account are admissible on either side; and we have calculated the interest on each item to the 31st March 1875.

Some remarks are requisite on a few items. We have wholly omitted one item claimed, amounting to Rupees 32,350-14. In the Statement of the Toshakhana account it is mentioned that a bond was given to Gopalchand Satya on the 8th October 1866 for Rupees 93,030-9, that the bond was sold in execution of a decree against Gopalchand Satya, and was purchased by Kissenchand Golicha eight annas share, Lachmipat Sing four annas, and Dhanpat Sing four annas, and that the purchasers filed a suit against the Nawab Nazim for the instalments then due on the bond and recovered a decree. The three decree-holders took out execution, each separately, but Kissenchand Golicha apparently alone recovered any money.

Lachmipat Sing now claims on this account—

	Rs. A. P.
One-fourth of the total amount of the bond	23,257 10 8
Interest from the date of the bond to 25th June 1869	7,558 11 8
Costs of the suits	1,534 7 8
Total ...	32,350 14 0

and this total was one of the items of the bond of the 25th June 1869, on which he claims further interest.

Dhanpat Sing claims on the same account—

	Rs. A. P.
One-fourth of the cost of purchasing the bond	15,775 0 0
Costs subsequently incurred	2,521 11 3
Total ...	18,296 11 3

The latter is the more modest demand as regards the amount, but the former is in one respect the most reasonable, for the only just claim which they can advance is for the sum due on the bond; but it seems that in point of fact nothing is due on the bond. The details of the account, show that only a portion of the amount was due to Gopalchand Satya, and that the bond was given in his favor alone, because he undertook to pay the debts due to all other persons. He did not fulfil this promise because the Nawab Nazim failed to pay the promised instalments, but as in fact he did not pay the sums due to other persons, he was entitled to recover from the Nawab Nazim only the amount due to himself, and the purchasers of the bond are not entitled to recover a larger amount.

The several amounts due were—

	Rs. A. P.	Rs. A. P.
To Pathokumari Debi	15,998 12 0	
„ Udhabchunder Sah	15,974 11 9	
„ Other creditors	12,360 15 0	
„ Gopalchand Satya	48,696 2 3	
		93,030 9 0

Now we find that Kissenchand Golicha recovered in execution of the decree—

	Rs. A. P.
1869, June 27th	14,600 0 0
„ July 4th	16,520 0 0
„ August 17th	18,000 0 0
1872, May 7th	19,845 0 6
Total ...	68,965 0 6

so that the Nawab Nazim has paid more than the amount due including interest. We do not know whether Kissenchand appropriated the whole of this sum, but it would certainly be unfair to require the Nawab Nazim to pay a second time any portion of the amount. The sum due to Pathokumari Debi was paid long ago by the Nizamut, and we have provided, as shown in the preceding pages, for the payment of the sums due to Udhabchunder Sah and the other creditors. On these grounds we have disallowed the items in the claims of both Lachmipat Sing and Dhunpat Sing.

Lachmipat Sing also claims Rupees 41,470, with interest from the 1st January 1868, on account of a decree which Hulashchand Bothra recovered against the Nawab Nazim on the 31st May 1864, and which he purchased from Hulashchand, he says, for Rupees 29,835. But this statement can hardly be true, because the amount decreed was only Rupees 25,000. However, we need not consider what he paid. We have admitted the full amount decreed, with interest at 12 per cent. from the date of the institution of the suit, and we have allowed the costs specified in the decree and interest thereon. In the various suits instituted by this claimant the decrees allow interest at 6 per cent. only, but we have in all cases given credit for interest at the general rate of 12 per cent.

The claim of the Sheriff of Calcutta for Rupees 11,526-11-7, which we disposed of last year, arose in proceedings taken in the High Court by this claimant in execution of his decrees recovered at Moorshedabad. We disallowed the Sheriff's claim for poundage on the amount of the decree, but we reserved for subsequent consideration the question whether the present claimant would be entitled to repayment of any costs incurred by him on that account, and whether the Sheriff was entitled to any and what amount as fees in the case. It appears that the claimant has not paid anything to the Sheriff, and therefore he cannot claim anything, but on consideration of all the circumstances, the work actually done by the Sheriff

and the fees to which he is doubtless entitled, we think that the Sheriff ought to receive Rupees 1,000, and we enter that sum to the credit of the claimant's account, but the certificate will issue separately to the Deputy Sheriff, who will pay the amount due to the gentlemen in whose shrievalty the proceedings took place.

The claimant is the lessee of an estate under the Nizamut at an annual rental of Rupees 900, and we have debited him with the amount payable up to the end of the Bengali year 1281, which has just expired.

The result is that the amount due to the claimant on the account calculated to the 31st March 1875 was—

	Rs.	A.	P.
Balance of principal	71,398	9	1
Balance of interest	1,29,758	7	4
Total ...	2,01,157	0	5

Additional interest due on the balance of principal from the 31st March to 31st May will be Rupees 1,427-15-7, and the sum awarded is therefore Rupees 2,02,585.

F. BEAUFORT.
C. A. BARWELL.
AMEER ALI.

The 12th May 1875.

Claim No. 165.—*Rai Dhanpat Sing Bahadoor, Rs.* 15,10,329-13-6.

The account on which this claim is made commences in March 1865. It extends over a period of eight years, involves a very large number of items and very large sums of money, and is complicated by the frequent nominal adjustment of the account and the fresh bonds executed thereon. It appeared at first sight that many items were unsupported by any evidence, and that we should be bound to disallow them, but ultimately we have excepted very few items, having satisfied ourselves that the sums claimed in most instances were justly due. The claimant desired that we should be satisfied with the evidence afforded by entries in his account books, alleging that all vouchers were returned to the Nizamut on the execution of a bond covering the items to which the vouchers referred. But many of the entries were insufficient to show a claim against the Nawab Nazim, because although it was carefully stated that the expenditure was on account of the Nizamut, yet the connection of the Nizamut with the object of the expenditure was not shown; and in several instances we were asked to infer that the money was advanced to the Nizamut on the ground that it was paid to a man who had been a servant or a retainer of the Nizamut. Also, it was obvious that if we accepted an item of advance because it was entered in the claimant's account book, we should be equally bound to accept an item of payment entered in the Nizamut account book of which the claimant had no corresponding entry. Both accounts appear equally entitled to credit, but the discrepancies were many and not reconcilable. In other cases the accounts of the claimants agreed so closely with the accounts kept in the Nizamut, that the adjustment involved comparatively little doubt, but in this case it was different, and we were forced to be satisfied by comparing the totals of a certain period in the two accounts rather by considering the evidence adduced in support of the details. If the Nizamut account admits the receipt of a certain sum within a certain period, it may be assumed that that sum was received, and we need not waste our time in pursuing a further enquiry regarding the person to whom the money was paid or the purpose to which it was appropriated.

A bond given for the aggregate amount of various advances should set them forth in detail, but in these bonds there are no details. The claimant did indeed after some time file what professed to be a detailed account of each bond, but it was found on enquiry that the details were imaginary, and were not entered in any account book or available memoranda. The account was therefore useless.

This claimant's account is also somewhat complicated by the circumstance that in March 1873 he accepted the office in the Nizamut of Madar-ul-maham, or principal manager, and that disbursements made from the Nizamut Treasury were made under his orders. Some of the items of that period have been disallowed, because they are absolutely unsupported by any evidence, or because it was found that the money had been paid from the Nizamut Treasury. One item at least is a fraudulent charge, and we entertain considerable doubts in regard to other charges.

The following Statement shows the items admitted on both sides of the account, with interest calculated on each item to the 31st March 1875. The total amount claimed is—

	Rs.	A.	P.	Rs.	A.	P.
Amount advanced	13,57,364	10	1			
Amount repaid	7,57,090	7	10			
				6,00,274	2	3
Hundian				10,007	14	0
Interest				9,00,047	15	3
				15,10,329	13	6

Amount to be awarded	[illegible]	

We have omitted from this account all items antecedent to the 1st November 1866. It would have been unjust to the claimant to require proof of those items of a past period which had been embodied in subsequent bonds, and he was content to take as the first item the sums noted in an adjustment of the account, dated November 1st, as the amount then due.

We have disallowed Rs. 18,296-11-3 claimed on account of Gopal Chand Satya's bond.

We have also disallowed the claim for Rs. 15,294-2, alleged to have been advanced when the bond of the 7th May 1872 was executed, because the details of the bond given in the Nizamut account, and in the claimant's explanation of it also, show that no cash passed on that date, and that the amount stated was a computation of a balance due on advances previously entered.

But we have admitted various items, of which there is no proof, in the earlier years of the account, because, as we have previously observed, the aggregate amount of advances admitted by the Nizamut accounts covered the sums claimed; as, for instance, a sum of Rs. 10,767 said to have been paid on the 16th September 1869 to one Nanakchand Sundar Dass, a goldsmith of Benares. We sent for the goldsmith's account books, and found that he had sold to the second and third sons of the Nawab Nazim and three Begums on the day mentioned jewelry, the aggregate price of which was Rs. 34,317, and that he claimed a former balance of Rs. 3,450, making the total Rs. 37,767. Then it is said that Rs. 27,000 was paid to him out of the Nizamut funds, and that Dhanput Sing was desired to pay the balance, Rs. 10,767. All this money should have been paid by the purchasers from their own funds, but the greater portion at least, if not the whole of it, was debited against the Nawab Nazim, and the balance must be paid.

We have disallowed three items of Rs. 5,000, Rs. 2,000, and Rs. 10,000, said to have been advanced to the eldest and second sons of the Nawab Nazim on the 11th and 25th July and 31st August 1873, because there is no evidence of the payment of the money, which was certainly not brought into the Nizamut account, though it was at that time under the charge of the claimant, and because the two sons deny all knowledge of the alleged advances.

Similarly we have declined to recognize two hundis for Rs. 2,000 and Rs. 3,900 given by the claimant to Mr. Lindsay on the 31st July 1873 as a liability of the Nawab Nazim. The money was not used for Nizamut purposes, so far as the accounts show, and the hundis themselves seem to show that they were given to Mr. Lindsay on his private account.

We have struck out another item of Rs. 6,000 charged on the 31st August 1873. It was entered in the claimant's first statement of the account as having been paid to Mr. H. C. Fox; but in the second statement it is mentioned that Rs. 1,000 was the price of gold. There is, however, no proof of the payment, and we find no reason to believe that it was paid to Fox, as is now suggested, on account of his salary.

When the bond of the 31st August 1873 was executed, a portion of the consideration money, Rs. 30,000, was left in the claimant's hands to meet subsequent expenses, and the eldest son of the Nawab Nazim took from the claimant a receipt for that sum. The claimant inserts this sum in his claim, because he may be made liable on the receipt; but the receipt cannot be found, and as the money was never used, the item has been struck out of the account.

In September 1873, when Lachmipat Sing attached the Calcutta property of the Nizamut, and had advertised it for sale through the Sheriff, this claimant was sent to Calcutta for the purpose of endeavouring to persuade Lachmipat to stay the sale, and with that intention paid him Rs. 5,000 on account of his decree. We have debited the Rs. 5,000 against Lachmipat Sing, and have allowed that sum to this claimant as well as his travelling charges.

At the time when the claimant was madar-ul-maham in the service of the Nizamut, he endeavoured to acquire a perpetual lease of all the landed properties belonging to the Nizamut, and alleges that he paid Rs. 10,000 to Bara Sahib, the eldest son, to induce him to grant the lease. The lease was drawn up and executed on the 31st August 1873, but on account of some subsequent disagreement it was never completed by registration; and, though the claimant got partial possession for a short time, yet he was soon ousted. The claimant says now that as he has lost the lease he is entitled to recover the Rs. 10,000 and all other expenses connected with it. Bara Sahib denies that he received the Rs. 10,000 or any portion of it, and it is certain that the money, if it was paid to any one, was not paid on account of the Nawab Nazim, and was not received into his treasury. We decline to recognize the transaction on that account, and because in any view it was an attempt of the claimant to secure a large advantage for himself, and the money was not expended in the service of the Nizamut.

The claimant was not faithful to the trust which he accepted as manager of the affairs of the Nizamut. He was employed to settle many of the small debts, and compromised them for smaller sums, but desires to charge the Nizamut with the full amounts claimed. For instance, Messrs. Hamilton and Co. had a bill against the Nawab Nazim for Rs. 3,500; and the claimant obtained from them a receipt in full on a cash payment of Rs. 1,500, but he claims the full amount of Rs. 3,500. There are other charges of a similar nature; and in some instances we have found that sums charged were paid out of the Nizamut funds. On the 31st August 1873 the claimant sold to the Nizamut certain houses, known as the houses of Raja Prosononarian and Mr. Fox, for Rs. 50,000, and three mahals, *viz.*, Sirkissenpoor, Chandpoor, and Ogra, for Rs. 20,000; all these were the property of the Nizamut and were sold in execution of decrees, and it is said that the claimant was employed by the Nizamut to purchase them; the price which he actually paid was Rs. 42,000 and Rs. 15,996, and therefore took a profit of Rs. 12,000 on the transaction. We have, however, allowed to

him the full amount claimed, because he did in fact advance his own money, and had therefore perhaps a right to charge his own price.

The claimant holds Sirkissenpoor in putnee from the Nizamut at an annual rental of Rs. 979. He has paid the rent for 1278, and we have debited him with the six monthly kists for 1279 and 1280.

Amount awarded Rs. 6,36,804-13-3.

AMEER ALI.

The 17th May 1875.

Claim No. 9.—*Mrs. Rebecca Fox, widow of William David Fox, Rs.* 99,000.

The amount stated is claimed as the balance due on a bond for one lakh of rupees, which was executed in her favor on the 26th February 1873 by Nawab Wala Kadr as agent for his father the Nawab Nazim. The consideration for the bond was the balance due on a similar bond executed in her favor by Nawab Wala Kadr on the 17th September 1871 for Rs. 77,000. The consideration for the earlier bond was the balance said to be due on loans which she had made to the Nizamut in the name of Gopichand Satya; but an examination of the previous account, the items of which have been selected from Gopichand's general account with the concurrence of the Attorneys of both parties, shows that Rs. 77,000 was not the balance justly due to Mrs. Fox, and we have therefore calculated the whole amount due from the commencement of the account. Mr. J. A. C. Lindsay is the Attorney for Mrs. Fox. The following is the statement of the account in the Treasurer's books, and it is supported by the memorandum given to Gopichand by Mrs. Fox:—

When the bond was executed on the 19th September 1871, a perwanna was given for the payment of the balance, Rs. 709-14, which remained after writing off Rs. 77,000, the amount of the bond; but the order was never cashed. Also Gopichand Satya undertook to pay the interest between June and September, amounting to Rs. 5,830-10, and that sum was entered in his bond, but he did not in fact pay any portion of it.

Taking the foregoing items of actual advances and actual payments, the account will stand thus :—

A. H. PATERSON.
AMEER ALI.

The 30th September 1875.

Claim No. 123.—*Mr. H. C. Fox, Rs.* 1,71,903-8.

Mr. Fox is not in this country. He was in the service of the Nawab Nazim for some years before His Highness proceeded to England with his brother the late Mr. W. D. Fox, and was left at Moorshedabad with the second son, Nawab Wala Kadr, to assist him in the management of Nizamut affairs. He assumed the title of Private Secretary to the Nawab Nazim, but he seems to have encouraged the Majhla Sahib in a course of wasteful extravagance resulting in the load of debt which led to the enactment of Act XVII of 1873. He left India as soon as he ascertained the provisions of the Bill before the Council, and this claim is filed on his behalf by a respectable Vakeel of the Moorshedabad Court, Baboo Baikantnath Sen.

The claim includes the following items :—

				Rs. A. P.	Rs. A. P.
1.	On account of money lent by him to the Nizamut ...		...	70,239 7 5	
2.	Ditto	ditto	to the Nizamut by his wife (Alice Fox) ...	16,400 0 0	
					86,639 7 5
3.	Ditto	ditto	expended by him for the Nizamut ...	...	36,869 0 4
4.	Ditto	ditto	paid by him to Sukhalchand Dogar ...	...	11,750 0 0
5.	Ditto	ditto	advanced by him for the purposes of the godown	...	13,000 0 0
			Total ...		1,48,258 7 9
			Add 25 per cent. in lieu of further interest ...		37,065 0 3

The claim for interest at the rate stated may be struck off at once; but the claimant will be credited with interest at the rate of 12 per cent. per annum on all money lent to the Nizamut.

In regard to the 5th item, *viz.*, money advanced for the purposes of the godown, we need only refer to the remarks which we have made in considering the claim of Gopichand Satya. The claim is wholly false; but if indeed Fox supplied the money to the godown, he must recover the amount from Shankar Lal Bajpai, with whom the whole of the godown account has been settled.

In regard to the 4th item, a receipt has been produced which Sukhalchand Dogar on the 2nd July 1873 gave to the Behla Department of the Nizamut for two orders, one on H. C. Fox for the payment of Rs. 11,750, and the other on Shankar Lal Bajpai for the payment of Rs. 3,495-8-3, the aggregate Rs. 15,245-8-3 being the full amount due by the Nizamut to Sukhalchand. The claimant alleges that he paid the amount of the order addressed to himself. Now, these payments are not entered in the Nizamut accounts, and Sukhalchand was required to produce his own account books, in order to explain the transaction. He produced a ledger containing the following entry :—

	Rs. A. P.		Rs. A. P.
1873, July 15th. Cash paid by Fox ...	5,000 0 0	Balance brought forward ...	1,190 9 3
„ „ 20th. „ „ ...	70 1 6	1873, July 1st. Payable by Fox under order of the Nizamut	11,750 0 0
„ „ 22nd. „ „ ...	6,750 0 0	1873, July 20th. Balance due on another account	384 0 0
Of the above sum I relinquished Rs. 1,000.		Payable by Shankar Lal Bajpai by order of Nizamut endorsed by him to Fox	3,495 8 3
1873, September 12th. By cheque on Budh Sing and Bishen Chand ...	2,000 0 0	1873, Aug. 1st. Gold ornament, Rs. 625	
		„ „ 2 diamond rings, „ 1,445	
			2,070 0 0
Total ...	13,820 1 6	Total ...	18,890 1 6
		Deduct credits ...	13,820 1 6
		Balance due by Fox ...	5,070 0 0

Now, this account affords us no explanation of the transaction, but it seems to show that he took upon himself to pay both orders, although he alleges in his claim that he has paid only the one drawn on himself. Moreover, this account, even if it was written at the time, appears to us to be of doubtful value; and, considering the position of the claimant at the time in the Nizamut, and the manner in which other accounts were prepared by him, we think that we ought not to give him credit for the alleged outlay unless it be shown that the money was due by the Nizamut to Sukhalchand; but this person could not or would not produce the account. In the receipt that he gave it is stated that the money was due "on account of cash payments, interest, and masaldari," and there was an account current between him and the Nizamut for money lent and goods sold; but that account would not show money due to him for goods sold but not paid for, and it does not in fact show that any money was due to him. The masaldari may have referred to goods supplied to the godown, but this Sukhalchand denies. If any portion was due on account of the godown, Fox must recover the money from Shankar Lal Bajpai. If it was due on account of other goods sold, Sukhalchand must be able to produce a detailed statement of the account, but he declines to furnish us with any such statement. There remains his loan account, but it shows a very small balance on the 30th June 1873, the

of the adjustment of the account on which the orders for payment were issued. The wing are the items :—

This account shows that, even if the interest was calculated at 3 per cent. per mensem, the amount due to Sukhalchand at the time when, according to the receipt produced, the Nizamut admitted that the amount due to him was Rs. 15,245-8-3, the balance due on the loan account was only Rs. 3,954. We are of opinion therefore that the claimant has failed to establish this item in his account, and that the pretended order of payment is untrue. Moreover, it is not conceivable that Fox would undertake to pay this large sum on account of the Nizamut, unless he held funds of the Nizamut in his hands; and certainly no reason is shown for his acceptance of the liability, if his prospect of repayment was confined to an instalment bond. It is said that Fox lent money to the Nizamut in the name of Sukhalchand, and possibly therefore he may be entitled to the balance due on the loan account as shown above, and we may give him credit for that amount; but as the total principal repaid is in excess of the total principal advanced, the balance of the account brought down to the present time would be only Rs. 857-14-1. The claimant has, however, received so much more than was due to him on other accounts that we need not consider further whether any sum is due to him on this item.

The 3rd item in the account of the claimant is a sum of Rs. 36,869-0-4, the aggregate amount which, he says, he "had from time to time on various different occasions paid for His Highness, and submitted bills with receipts and vouchers for the same, which were examined, approved, and passed by the son and authorized agent of His Highness." Now, as Nawab Wala Kadr was in the habit of passing every account placed before him by the claimant without examination or consideration, his signature cannot be accepted as a guarantee for the correctness of any account. And a perusal of the bills produced shows that the claimant himself had not examined them. Letters of demand from shop-keepers are entered as bills paid, and in one case three letters of demand of the amount due on one account are entered as three several payments. Other bills are entered as paid, in regard to which there is full evidence that no payment was made; and in regard to many, there is no voucher at

all. But the whole demand is absurd. The claimant from time to time drew enormous sums from the Nizamut, and was entrusted to raise money by the sale of very valuable property, and of all these transactions no account is tendered. It is ridiculous to ask for payment of a few items without giving a general account which would show the balance due. The statement of his account in the Nizamut books shows that large sums were constantly advanced to him to meet expenditure, for the disposal of which he has not attempted to account; and besides all these sums he realized large amounts from Dhanpat Sing and others on behalf of the Nizamut, and he carried off considerable properties for sale, the proceeds of which should have been paid into the Nizamut treasury. Among other items in the account is a sum of Rs. 13,402-12, which is said to be the aggregate of amounts advanced by him from time to time to Nawab Wala Kadr, but Nawab Wala Kadr declares that he never at any time received a rupee from the claimant which did not come from the Nizamut treasury. It is needless to examine any further this item of the claim. We examined it with the claimant's vakeel, who admitted that he was not in a position to prove the whole account, and that this portion of the claim must necessarily be wholly disallowed.

We come now to the loan account, the 1st and 2nd items of the claim. We have carefully, with the assistance of the claimant's vakeel, gone through the whole account, and compared the account rendered by the claimant with the account kept in the Nizamut books, and have selected from the latter every item connected with the advances made to the claimant for various purposes "the hawalat account," omitting every doubtful item, retaining only those which belong to the loan account, and in this respect we have given the claimant the benefit of the doubt in each case.

He claims a sum of Rs. 13,847-8 as advanced by him on the 6th April 1870. In the Nizamut accounts this sum is entered as advanced by Dhanpat Sing through Mr. Fox; but a marginal note in the sarishtadar's account mentions that the entry was a mistake, and that the money was really advanced by the claimant. We have therefore credited it to him. We have omitted an item of Rs. 5,000 paid to him on the 30th November 1871, because in one of the accounts it is entered as hawalat. There are other items which have been similarly treated in his favor, which we need not particularize.

The loan account of the claimant's wife, Mrs. Alice Fox, commences by a credit of Rs. 22,000 on the 24th June 1871. She had previously lent money to the Nizamut in the name of Premnarian Sah, the gomashta of Jaganath Sah, and on the date mentioned no cash was actually advanced, but there was an adjustment of previous loans, *viz.*, Rs. 776-9-9 of the 8th February 1869, Rs. 10,000 of 22nd January 1870 (which was really an adjustment of two loans of 6th June and 9th October 1869), Rs. 5,000 of the 4th July 1870 (when the actual cash advanced was only Rs. 3,981), and Rs. 4,223-6-3 interest; but all these sums were entered in the account of Jaganath Sah, and he was debited with the whole of the Rs. 22,000 on the 24th July 1871, because these transactions with Mrs. Fox had not then come to light. Under the circumstances, we have allowed the full credit of Rs. 22,000 to stand in her name; and we have amalgamated the accounts of the claimant and his wife.

The full amount is given below :—

Surplus paid to the claimant					6,938 9 4

The result is that, on the most favorable consideration of the accounts, the claimant has received more than was due to him, and the whole claim is therefore disallowed.

Disallowed.

F. BEAUFORT.
A. H. PATERSON.
AMEER ALI.

The 30th September 1875.

Dated Calcutta, 20th April 1876.

From—F. Beaufort, Esq., President of the Nizamut Commission,

To—T. H. Thornton, Esq., D.C.L., Offg. Secy. to the Govt. of India, Foreign Department.

Referring to your office letter No. 940P., of the 15th instant, I have the honor to forward the award made by the Commission on the claim preferred by the executors of the late Mr. W. D. Fox, and the usual certificate.

2. In one case, in which the amount claimed was £13,133-18-6, we have awarded £7,199-4-11. We have rejected the other claim for arrears of pension amounting to Rs. 4,260.

3. These figures must be added to those which we inserted in our letter of the 15th ultimo. The total is—

Number of claims disposed of		1,251
„ „ rejected		250
Total amount claimed	Rs.	52,19,241 9 8
	£	19,726 18 0
Total amount awarded	Rs.	14,23,795 14 6
	£	13,792 4 5

4. This completes the work of the Commission.

Claims Nos. 6 and 7.—Executors of the late W. D. Fox.

Claim No. 6.—£13,133-18-6.

Claim No. 7.—*Rs.* 4,260-0-0.

These claims were preferred by Mr. J. A. C. Lindsay, the brother of Mrs. Fox, and one of the executors of Mrs. D. Fox, for the widow, who is also the other executor.

Two other claims preferred by Mrs. Fox on her own account have been disposed of. The present claims are for money due to W. D. Fox at the time of his death.

William David Fox was in the service of the Nawab Nazim for some years before His Highness went to England, and he accompanied him there and remained in his service till he died on the 18th October 1873. He was styled Private Secretary, and managed the affairs of the Nawab Nazim. Mr. Valentine Holt was his Assistant, and has apparently succeeded him in the office of Secretary.

The first of these claims is on an account current between Fox and the Nawab Nazim. The account sheet filed before us by Mr. Lindsay showed a balance in favor of Fox of £10,676-5-6; but subsequently he put in a supplementary statement in correction of that account by which he increased the claim to £13,133-18-6. This amount includes arrears of salary. Claim No. 7 is for arrears of pension. We shall deal with the claims in three portions, *viz.*:—

	£ s. d.
1. Balance claimed to be due on the general account	5,533 18 6
2. Balance claimed to be due as arrears of salary	7,600 0 0
3. Balance claimed to be due as arrears of pension	Rs. 4,260 0 0

Messrs. Farrer, Ouvry and Co. were employed, with the sanction of the Government of India and the Secretary of State, to investigate the claim. They have made a careful and complete enquiry, and they ascribe the very great delay which has occurred to the inactivity of Mr. Mayor Cooke, the claimant's Solicitor. Their report is dated March 1st, 1876, and has only now reached us. We have also received a second letter of the 17th March. We proceed to dispose of the claim on the evidence which they have examined.

The Nawab Nazim and Mr. Fox both banked with Coutts and Co. Their accounts were quite separate, and the money which stood to the credit of Fox was, it is alleged, his private property. It is alleged that Fox from time to time advanced money on account of the Nawab Nazim by cheques drawn on Coutts and Co., and from time to time received money from the Nawab Nazim by cheques drawn on the same bank; and the account now before us is composed of the sums which passed from one to the other by means of these cheques. It is a peculiar feature of the account that cash payments are not mentioned.

It seems that there was a petty cash book, in which were entered sums kept in hand for small expenses, but the detail of the expenditure is not given; and no claim is made for the repayment of cash advanced, with the exception of two items, one of which is very small, and the other is a transfer of credit apparently at the bank and is not therefore really a cash payment. There is no general account of money received and expended either by Fox or by the Nawab Nazim, and the current account between the two parties was never adjusted. It seems that in 1873 Fox was pressed by Holt to draw up a statement of the account by which an adjustment might be effected; and we have copy of some memoranda of accounts roughly made out by Fox. But there was no settled account, and therefore after the death of Fox the only method of ascertaining the state of the account was by a comparison of the cheques.

Under these circumstances, Mr. Holt was employed to make out the account, as the person who knew more of the transactions than any one else. The account now before us is the one drawn up by Mr. Holt; it was filed by Mr. Lindsay with the several cheques and memoranda respecting them written by himself; and it is supplemented by an account compiled by Mr. Lindsay containing two items omitted from the credit side, and 18 items entered on the debit side, which, in his opinion, should not be charged against Fox's estate.

Messrs. Farrer, Ouvry & Co. have examined the cheques, and such evidence as they could obtain in respect of each transaction is appended to the report and is embodied by them under each item. It remains for us to examine all these items and the evidence; but in order to permit of a more comprehensive view of the transactions entered in the accounts, and to avoid repetitions, we have arranged the items under different headings, as shown in the subjoined statements.

It may be observed here that the counterfoils of the cheques usually mentioned shortly the object to which the money was to be applied. The greatest reliance must be placed on these memoranda where there is no better evidence. A mere effort of memory after so long a time cannot be accepted in contradiction of a memorandum made at the moment for private convenience.

At the foot of the account the Nawab Nazim has been induced to sign a certificate, admitting that the amount claimed is justly due; but we are of opinion that an admission of that nature ought not to be allowed to influence our judgment, unless His Highness be examined and proves that he examined and understood the several items of the account. It was not his habit to examine any accounts, and he would give such a certificate in order to avoid importunity. Moreover, if this admission is worth anything, it must have the effect of demolishing the supplementary objections of Mr. Lindsay.

SUMS ADVANCED BY W. D. FOX ON ACCOUNT OF THE NAWAB NAZIM.

PART 1.—Hotel charges.

Number of item in claimant's account.	DATE.	Amount. £. s. d.	Amount. £. s. d.	Cheque drawn in favor of whom.	REMARKS.
2	1869, April 24th ...	253 17 1	.....	Mr. George Bolton, Secretary of the Alexandra Hotel.	These sums were paid in satisfaction of hotel bills for the periods, 6th to 17th April 1869, 18th December 1869 to 17th April 1870, and 18th September to 17th October 1871; the last being part payment of a bill for £821-19. There is no doubt that all these payments were on account of the Nawab Nazim.
21	1870, January 28th...	618 5 0	.....		
27	„ March 22nd ...	678 17 0	.....		
34	„ April 5th ...	592 17 10	.....		
43	„ May 4th ...	726 5 0	.....		
96	1872, February 22nd	700 0 0	.....		
			3,570 1 11		
109	1873, February 21st...	.....	270 0 0	Ditto ditto	Mr. Bolton says that this was the balance of the account then due by the Nawab Nazim. An entry on the debit side shows that this sum was repaid to Fox by the Nawab's cheque of 4th April.
6	1869, April 28th ...	.....	28 8 9	Mr. Simpson or bearer ...	Charges incurred by the Nawab Nazim while staying at an hotel at Southsea.
63	1870, September 29th	.....	50 0 0	Manager of Hen and Chickens Hotel, Birmingham.	Railway and hotel expenses incurred by the Nawab Nazim.
64	„ October 6th ...	.....	25 0 0	Self	Dated Manchester, and said to be for travelling expenses.
66	„ „ 25th ...	.....	25 0 0	Manager of Star Hotel, Worcester.	Said to be hotel charges at Worcester, where the Nawab Nazim stayed, it seems, for some days. But the hotel bill amounted to £439-9-1, and the Nawab Nazim gave a cheque for that sum on the 8th November. He also gave two other cheques, one for £25 on the 25th October, and one for £70 on the 8th November, and the payment of the same amount by both Fox and the Nawab on the same date might give rise to a doubt; but in the counterfoil of Fox's cheque is entered "contingent expenses H. H.'s account," and there is no sufficient reason for disputing the charge.
68	„ November 8th	43 2 0	.....	Manager of the Granville Hotel, Ramsgate.	The Nawab Nazim stayed at this hotel, and it seems that both sums were paid to the hotel.
69	„ „ „	20 0 0	.....		
			63 2 0		
3	1869, April 24th ...	.....	50 0 0	Mir Wazir Ali Kazim ...	It is said that this person who has intermediately died, supplied the kitchen of the Nawab Nazim. The cheque was paid over the counter, and there is no further evidence regarding money.
			4,081 12 8		

PART 2.—Bills of tradesmen.

No. of item.	DATE.	Amount. £ s. d.	Cheque drawn in favor of whom.	REMARKS.
8	1869, May 1st	43 0 0	Wilhelm Schmidt ...	Tailor—clothes supplied to the sons of the Nawab Nazim chiefly.
19	1870, January 25th ...	250 0 0	James Macnee and Co. ...	Coach-builders.
24	„ March 16th ...	10 0 0	Mr. Jamrach	Cost of four small birds and cages.
26	„ „ 25th ...	3,073 16 0	Messrs. Hunt and Roskell ...	Payment in full of all demands on the account from May to the end of 1869.
29	„ „ 24th ...	1,000 0 0	Emanuel Emanuel ...	Part payment on account, and other sums are entered in the Nawab's bank book as paid by himself.
31	„ „ 26th ...	133 16 9	Messrs. Easom and Co. ...	Cost of two pictures, and packing picture of Her Majesty, which was sent to Moorshedabad, and is now in the Palace.
39	„ April 26th ...	32 8 0	Edmund Brown ...	Tailor—clothes for servants.
47	„ May 5th ...	12 0 7	Charles Westerton ...	Stationery and newspapers.
81	1871, October 5th ...	200 0 0	William Davis	Livery stables, part payment on account.
9	1872, February 23rd ...	301 11 6	Ditto	Ditto ditto.
1	„ „ „ ...	170 0 0	Stable rent and taxes on bearer.	Mr. E. Haviland Burke gave a receipt for the amount, £160, as rent of the stables for one year, and £10 as taxes. A separate memorandum signed by the Nawab Nazim says that this charge is correct. The absence of any name in the cheque, the name and position of the party who received the money, and the fact that on the same day the stable-keeper Davis was paid for the cost of the Nawab's horses standing at livery, provoked a suspicion when we first saw this account; but subsequent enquiries have shown no reason to doubt that the charge was correct and that the money was paid for the Nawab Nazim. Davis had been Mr. Burke's coachman, and he probably presented the bill and received the money for his late master.
			NOTE.—This item was omitted in the original account filed, and Mr. Lindsay inserted it in his supplementary account.	
60	1870, July 11th ...	95 0 0	J. Neale	The price of a pianoforte. Neale is an upholsterer.
88	1871, December 6th ...	5 0 0	Thos. C. Fenwick ...	The price of a book called "Ancient Persia."
89	„ „ 21st ...	135 3 0	W. and F. Thorn ...	Coach-builders.
	Total ...	5,461 15 10	.....	We find no reason to doubt that all these payments were made *bond fide* for the Nawab Nazim.

SUMS ADVANCED BY W. D. FOX ON ACCOUNT OF THE NAWAB NAZIM—*continued.*

PART 3.—Miscellaneous.

No. of item.	DATE.	Amount. £ s. d.	Amount. £ s. d.	Cheque drawn in favor of whom.	REMARKS.
1	1869, April 24th ...	.....	33 15 1	Messrs. Grindlay and Co. ...	Sundry charges on account of the Nawab Nazim.
10	„ May 7th ...	.....	5 19 10	Ditto ditto ...	Cost of clearing packages for the Nawab Nazim.
11	„ July 22nd ...	.....	42 6 6	J. A. C. Lindsay ...	The nature of this transaction is not sufficiently explained, but the item is cancelled by a corresponding entry on the other side of the account.
13	1870, January 6th ...	140 0 0	.....	P. and O. Company ...	Charges connected with the despatch to India of two horses and some servants, including carriage to Southampton and insurance.
14	„ „ „ ...	144 15 0	.....	Ditto	
15	„ „ 7th ...	75 5 0	.....	Ditto	
			360 0 0	.....	
16	„ „ „ ...	.....	100 0 0	J. Simpson	
17	„ „ „ ...	.....	100 0 0	J. A. C. Lindsay ...	
37	„ April 21st ...	50 0 0	.....	J. Neale	Cost of furniture and part payment of the rent of a house No. 4, St. Michael's Grove, Brompton, in which a [illegible] under the protection of the Nawab Nazim temporarily resided. The balance of the house rent was paid by the Nawab's cheque of the 24th item.
77	1871, „ 25th ...	100 0 0	.....	Ditto	
			150 0 0	.....	
35	1870, April 5th ...	.....	350 0 0	J. A. C. Lindsay ...	Lindsay thinks that this money was drawn for and paid to the Nawab Nazim and Nawab Ali Kadr. In the counterfoil of the cheque is entered "H. H.'s other account."
58	„ July 5th ...	.....	25 0 0	P. Burrowes	Burrowes cannot be traced, and the nature of the expenditure is not explained, but in the counterfoil is entered "H. H.'s account."
59	„ „ 6th ...	.....	600 0 0	J. A. C. Lindsay ...	In the counterfoil the entry is "salary of servants, &c., H. H.'s account;" and an extract from the salary book shows that the Nawab Nazim's servants were paid on that date.
74	1871, January 12th...	.....	300 0 0	G. S. Brandon ...	Amount given to Messrs. Brandon, Solicitors, to be paid to the plaintiff in the action of Kingscote *vs.* the Nawab Nazim. We have no information of this suit.
80	„ October 4th ...	.....	200 0 0	V. Holt	The Nawab Nazim certifies that this money was drawn for and paid to him.
90	„ December 21st	.....	50 0 0	Ditto	Transaction not explained, but item cancelled by corresponding entry on debit side.
92	1872, January 15th...	4 4 0	.....	Ditto	These sums were drawn to meet petty expenses, and the expenditure was noted in the petty cash book which Messrs. Farrer, Ouvry & Co. have inspected. The three last items are cancelled by corresponding entries on the debit side.
98	„ March 2nd ...	30 0 0	.....	Ditto	
102	„ June 26th ...	30 0 0	.....	Ditto	
104	„ July 20th ...	25 0 0	.....	Ditto	
107	„ December 6th...	20 0 0	.....	Ditto	
110	1873, March 6th ...	30 0 0	.....	Ditto	
			189 4 0		
105	1872, Sept. 4th ...	.....	400 0 0	W. A. Mundell ...	Mr. Adam Mundell says that he received this money by order and on account of the Nawab Nazim. There is a corresponding entry on the debit side of the account; and it appears from the explanations given that cheques were interchanged, but the object of the transaction is not disclosed.
106	„ Dec. 5th ...	.....	3 0 0	R. E. Barnett ...	"Forfeit in the Worcestershire Stakes."
111	1873, March 21st ...	.....	20 0 0	R. Braunfeld ...	This was in repayment of an advance made to the Nawab Nazim a few days previously.
112	„ April 2nd ...	.....	300 0 0	Cash	Cash paid to the credit of the Nawab Nazim at Coutts' when the balance in hand was very small.
	Total ...	.....	3,179 5 5	.....	It appears to us, so far as we are able to judge from the papers before us, that all the items in this part were advanced by W. D. Fox *bond fide* for the purposes of the Nawab Nazim.

PART 4.—Small sums taken for current expenses.

4	1869, April 26th ...	25 0 0	.....	George Bolton ...	Mr. Bolton was the manager of the Alexandra Hotel, but these sums were not paid on account of hotel expenses. They are explained to be cheques sent down to the bar of the hotel to be cashed in order to meet current expenses. Mr. Bolton, who gives this explanation from his own knowledge, has no remembrance of the cheques, with one exception; they were not entered in the books of the hotel; some were cashed, and some were endorsed by him and sent out to a neighbouring shop to be cashed. The exception is the cheque for £99-17-6, which was a repayment of money expended by him on account of the Nawab Nazim at the Alhambra. On the counterfoils of the cheques the entry is "H. H.'s account." No further evidence can be had, and it seems to us that we may accept them all as charged against the Nawab Nazim.
5	„ „ 28th ...	25 0 0	.....	Ditto	
7	„ „ 30th ...	25 0 0	.....	Ditto	
9	„ May 7th ...	25 0 0	.....	Ditto

SUMS ADVANCED BY W. D. FOX ON ACCOUNT OF THE NAWAB NAZIM—*continued.*

PART 4.—Small sums taken for current expenses—*continued.*

No. of item.	DATE.	Amount. £ s. d.	Amount. £ s. d.	Cheque drawn in favour of whom.	REMARKS.
33	1870, April 5th ...	750 0 0	.....	Joseph Pyke... ...	Mr. Pyke lent small sums occasionally to the Nawab Nazim and also to Fox. These cheques were given in repayment of money lent to the Nawab. Messrs. Farrer, Ouvry & Co. examined Mr. Pyke's books, and found these items to be correct.
46	„ May 8th ...	200 0 0	.....	Ditto	
85	1871, Nov. 8th ...	200 0 0	.....	Ditto	
			1,150 0 0		
50	1870, May 12th ...	.....	24 18 4	J. A. C. Lindsay ...	Lindsay endorsed the cheque to Pyke, who drew the money. In the first instance Lindsay said that it was a payment on account; afterwards he thought that it was the expense incurred in obtaining the release of the Nawab Nazim from prison. The counterfoil notes it "Account C. C. G." which is supposed to be the *Civil Service Gazette*. It is not improbable that Mr. Pyke's aid was invoked when the Nawab was arrested, and that the money was so spent. We accept the item as money expended on account of the Nawab Nazim.
	Total ...	.....	2,129 15 10		

PART 5.—Newspapers and Literary Services.

No. of item.	DATE.	Amount. £ s. d.	Amount. £ s. d.	Cheque drawn in favour of whom.	REMARKS.
23	1870, February 2nd...	250 0 0	.....	Alfred Maddick ...	Mr. Maddick acknowledges the receipt of this money "on account of the *Court Circular*" "for papers, &c., in connection with the Nawab Nazim." Other sums were paid by the Nawab Nazim on account of the *Court Circular*; on the 9th July 1870 £150; a bill for £500 was accepted on the 31st August following; altogether in the course of the seven months at least £1,950 was given by the Nawab, and what is noted above is the only explanation. Messrs. Farrer, Ouvry & Co. examined the books.
36	„ April 7th ...	300 0 0	.....	Self	
65	„ August 18th ...	750 0 0	.....	A bill accepted ...	
			1,300 0 0		
25	„ March 25th ...	.....	25 0 0	John Neale	Neale is an upholsterer, and his name appears in other parts of the account. It is explained in respect of this item that "he acted as a medium with the Proprietors of the *Graphic* for the purpose of obtaining the insertion in that paper of an article upon the Nawab Nazim."
30	„ March 25th ...	7 16 0	.....	George O. Hobson ...	Mr. Bain admits that he received £350 from the Nawab Nazim in 1870-71. Messrs. Farrer, Ouvry & Co. examined the accounts and were satisfied; but on what account this money was paid is not explained.
57	„ July 2nd ...	25 0 0	.....	Self	
61	„ September 9th	100 0 0	.....	Self	
73	„ December 8th...	50 0 0	.....	David Bain	
75	1871, January 21st ...	25 0 0	.....	D. Bain	
			207 16 0		
83	„ November 1st...	20 0 0	.....	George Beridge and Co. ...	David Bain acknowledges the receipt of this money from Fox on the part of the Nawab Nazim, "in his capacity of publisher of Mr. Tayler's pamphlet on Indian Reform," and says that he paid it over to the Printers, Beridge & Co. The Nawab Nazim undertook the payment of the cost of printing the book. Another payment of £10 on the 10th May 1871 is mentioned, but it is not entered in the Nawab Nazim's bank book or in this account, and was probably paid in cash.
87	„ December 6th..	15 0 0	.....	Ditto ...	
95	1872, February 13th	4 2 6	.....	Ditto ...	
			39 2 6		
32	1870, March 28th ...	.....	12 10 0	E. McDermott ...	J. H. Stacy, for the proprietors of the *London Scotsman*, says that he received this money "for 1,000 copies of the Anglo-Scottish newspaper."
49	„ May 12th ...	...	40 0 0	Self ...	Mr. Lindsay says that this sum was a donation to Mr. T. G. Bowles, Proprietor of *Vanity Fair*, in acknowledgment of the publication of a likeness of the Nawab Nazim.
54	„ June 30th ...	.....	100 0 0	Self	This sum was another donation to the proprietors of *Vanity Fair* and payment for back numbers.
51	„ „ 21st ...	.....	20 0 0	J. Mackie	Mr. Mackie was the editor of a newspaper called the *Northern Ensign*, and this payment was made to him, it is said, for literary services.
52	„ „ 24th ...	.....	10 0 0	John Lowe	Mr. Lowe was the manager of the *Cheltenham Chronicle*, and this money was paid to him for the insertion of an article.

SUMS RECEIVED BY W. D. FOX FROM OR ON ACCOUNT OF THE NAWAB NAZIM.

No. of item in account.		DATE.	Amount. £ s. d.	REMARKS.
1	21	1869, May 6th ...	100 0 0	Lindsay says that there is no proof that Fox received this money; but the cheque was filled up by Fox himself, and there is no note in the counterfoil to show that the money was to be appropriated to the purposes of the Nawab Nazim. The remarks made by Lindsay and Cooke are only conjectural; and in the absence of anything showing that the money was otherwise expended, the reasonable conclusion is that it was a payment made by the Nawab Nazim to Fox on the account current.
2	50	„ June 3rd ...	142 19 5	It has been shown that this sum has been erroneously entered against the claimant. It was a remittance made by Mrs. Fox in India to her husband in England; the money was not the property of the Nawab Nazim, and the item must be struck out of the account.
3	22	„ November 1st...	200 0 0	This cheque was drawn in favor of Lindsay, who says that it was a present from the Nawab to Fox on his birthday, that it was sent to him when he went to Suez to meet his wife and some native servants proceeding to England, and that the money was expended on the travelling charges of the party. The Nawab Nazim denies that he gave the money as a present, and the counterfoil of the cheque says—"Travelling expenses, Mr. Fox to Suez." Mr. Holt observes also that it is the practice to advance the travelling expenses in India, and the courier's bill, which is produced, notes the receipt of 28 Napoleons from the Indians. Messrs. Farrer, Ouvry and Co. are of opinion that the item must remain as a charge against Mr. Fox's estate. But it seems to us that a doubt is involved, of which it is right that the claimant should have the benefit. We are forced in respect of most of the items on both sides of the account to rely on the entry in the counterfoil, and in this instance the entry does not bear the meaning that the money was an advance to Fox on his private account. We might indeed fairly ask for an account of the expenditure of the £200, but accounts of that nature are not forthcoming, and under the circumstances we can scarcely insist on it. On a consideration of the whole of the evidence before us, we agree therefore to strike this item out of the account.
4	23	1870, January 28th...	200 0 0	Admitted.
5	8	„ March 18th ...	1,000 0 0	Ditto.
6	9	„ „ 22nd ...	2,880 0 0	Ditto.
7	10	„ „ 24th ...	1,110 0 0	Ditto.
8	11	„ April 1st ...	2,428 7 9	Ditto.
9	12	„ May 3rd ...	1,453 2 6	Ditto.
10	24	„ June 23rd ...	500 0 0	Mr. Lindsay objects to this item, because the cheque being made payable to W. D. Fox or bearer it was not endorsed by Fox, and the money was not transferred to his account at Coutts'. He suggests that the money was the personal allowances drawn monthly by the Nawab Nazim and his eldest son, but this is mere conjecture; he refers also to a certain memorandum book which Nawab Ali Kadr is supposed to have kept. But we think that we must rely in this instance as in others on the evidence of the counterfoil, which has merely the name of Fox, and does not justify a presumption that the money was received by him for the purposes of the Nawab, or still less that he did not receive the money. We observe further that in the rough notes of his account made by Fox, the aggregate of the sums received by him in 1870 is £11,771-10-3, whereas the aggregate amount debited against him in this account, including this £500, is only £11,321-10-3. On these grounds we retain the item as a charge against Fox's estate.
11	17	„ July 2nd ...	1,000 0 0	Admitted.
13	25	„ October 22nd...	750 0 0	Ditto.
14	47	1871, February 20th	25 0 0	The counterfoil says "W. D. Fox, Mr. Bain's account," and therefore Lindsay objects to the item; but it is obviously the repayment by the Nawab Nazim of the £25 paid by Fox to Bain on account of the Nawab on the 21st January.

SUMS RECEIVED BY W. D. FOX FROM OR ON ACCOUNT OF THE NAWAB NAZIM —*continued.*

No. of item in account.		DATE.	Amount. £ s. d.	REMARKS.
15	48	1871, June 28th ...	100 0 0	The counterfoil says "cash paid on account Mr. J. Neale on 5th May;" and Lindsay makes a similar objection; but, as Messrs. Farrer, Ouvry & Co. observe, the cheque was doubtless given by the Nawab Nazim in repayment of the like sum paid by Mr. Fox's cheque, dated 25th April 1871.
16	49	.....	20 0 0	The value of a watch. This item is practically admitted.
17	26	„ August 10th ...	100 0 0	Mr. Lindsay objects to this item, because he cannot find that it was credited in Fox's private account; but the counterfoil says—"W. D. Fox's private account," and Fox has entered the receipt in his rough notes.
18	27	„ September 21st	250 0 0	Admitted.
19	28	„ „ 26th	15 0 0	Ditto.
20	16	„ October 3rd ...	1,000 0 0	Ditto.
21	18	„ November 7th	750 0 0	Ditto.
22	29	„ „ 10th	100 0 0	Ditto.
23	14	„ December 21st	50 0 0	Transaction not explained. Cheques interchanged. Entries on the two sides of the account.
24	30	1872, February 20th	1,300 0 0	Admitted.
25	31	„ April 18th ...	200 0 0	Ditto.
26	32	„ June 1st ...	51 7 4	Lindsay hesitatingly objects, but the counterfoil says clearly—"W. D. Fox's private account" and it is entered in Fox's rough notes.
27	15	„ „ 17th ...	210 0 0	Admitted.
28	33	„ „ 18th ...	50 0 0	Ditto.
29	1	„ July 27th ...	25 0 0	Ditto.
30	34	„ August 7th ...	100 0 0	The cheque was for £710 of which £100, according to the memorandum of the counterfoil, was for Fox; and Fox has entered this sum in his rough notes of the account.
31	2	„ „ 21st ...	50 0 0	Admitted.
32	35	„ September 4th	400 0 0	Ditto.
33	3	„ „ 12th	10 0 0	Ditto.
34	36	„ „ 13th	250 0 0	Ditto.
35	37	„ October 14th...	150 0 0	Ditto.
36	38	„ „ 25th...	25 0 0	Objection is made to both these items, because they were not transferred to Fox's credit at Coutts'; but in the counterfoils the first is noted as "private account," and the other "for private use," and both were entered in Fox's rough memoranda of accounts.
37	39	„ December 20th	50 0 0	Admitted.
38	18	„ „ 24th	50 0 0	Ditto.
39	4	„ „ 30th	20 0 0	Ditto.
40	40	1873, January 9th ...	200 0 0	Ditto.
41	19	„ „ 20th...	10 0 0	Ditto.
42	41	„ „ 29th...	12 3 7	The cheque was in favor of V. Holt, and, according to the counterfoil, "on account of W. D. Fox." Practically admitted.
43	42	„ February 14th	500 0 0	Admitted.
44	5	„ March 12th ...	15 12 10	Ditto.
45	6	„ „ 26th ...	14 7 2	Ditto.
46	43	„ April 4th ...	270 0 0	Ditto.
47	20	„ „ 17th ...	50 0 0	Ditto.
48	44	„ May 18th ...	50 0 0	Ditto.
49	45	.....	25 0 0	Ditto.
50	46	„ September 24th	50 0 0	Cheque in favor of W. D. Fox, and endorsed by him. The objection is ridiculous.
51	7	„ October 21st ...	78 11 2	Admitted.
		TOTAL ...	18,391 11 9	

	£ s. d.	£ s. d.
The total amount of the items in the preceding account against the estate of W. D. Fox is		18,391 11 9
But the two items which we have agreed to strike out of the account must be deducted, *viz.*— ... ... Nos. 2-50	142 19 5	
„ 3-22	200 0 0	
		342 19 5
And the total is therefore		18,048 12 4

But in the above account are entered those items only which have been inserted in the claimant's statement of the account. Now, in examining the Nawab Nazim's bank book, many entries were found of sums paid to Fox, of which no mention is made in that statement, and therefore Messrs. Farrer, Ouvry & Co. properly required an explanation of such additional items. The result of this enquiry is shown in the statement which is entered in the following page; and it will be seen that two items, Nos. 13 and 20, £30 and £120, are properly chargeable against the estate of W. D. Fox. Adding these two sums to the total above-mentioned, it appears that the total sum to be charged against the estate is £18,198-12-4.

	£ s. d.	
Now the total amount to the debit of the Nawab Nazim, as shewn in the synopsis of the account is	21,637 17 3	
Deduct ...	18,198 12 4	
And the balance ...	3,439 4 11	is the sum due to the estate of Fox on the general account.

When we first examined this account it appeared to us somewhat doubtful whether Mr. Fox was in a position to advance money to the Nawab Nazim to such an extent as is alleged; he was in humble circumstances when His Highness took him into his service, and his salary was insufficient to account for the accumulation of any large amount. But certain papers produced show that Mrs. Fox had some £3,000 in public securities, and the system adopted by the Nawab and Mr. Fox often placed large sums to the credit of the latter.

From 1869 to 1873 the Nawab Nazim was receiving remittances from India at an average rate of £26,000 per annum, and it may appear strange that he should pay various sums by cheques on Fox's separate account at Coutts'; but in fact it happened sometimes in default of remittances that the balance standing at the credit of the Nawab was very low, and that he was obliged to borrow money from Fox. It appears also that in some cases the cheque was drawn by Fox in order to save the Nawab the trouble of drawing a cheque for himself. And it may be presumed that in respect of many of the items in part 5 of the foregoing account, the Nawab was ashamed of the entries which would appear in his bank book.

The claimant in the original application asked for interest, but we think that none should be allowed. Setting aside the fact that a considerable portion of the money which stood to Fox's credit in the bank was really the property of the Nawab Nazim, it is obvious that Fox ought to have adjusted the account at least at the end of each year, and that the delay which has occurred in the disposal of this claim is due to the absence of any account of the transactions between himself and the Nawab, the duty of keeping which, in virtue of his well-paid office, lay on him, and to the dilatoriness of the claimant's Attorney in bringing forward the evidence, which should have been prepared beforehand.

CHEQUES DRAWN IN FAVOUR OF W. D. FOX BY THE NAWAB NAZIM WHICH HAVE NOT BEEN ENTERED IN THE STATEMENT OF ACCOUNT SUBMITTED BY CLAIMANT.

No. of item.	Date.	Amount. £ s. d.	Remarks.
1	1869, July 24th ...	500 0 0	These sums are admitted to have been presents made by the Nawab Nazim to W. D. Fox, and are properly omitted.
2	„ September 17th	800 0 0	
3	1870, May 7th „	500 0 0	This sum was paid to Dr. W. Russell of the *Naval and Military Gazette*. It is admitted that the payment was made on account of the Nawab Nazim, but he declines to disclose the object with which the money was paid.
4	„ August 17th ...	1,000 0 0	The counterfoil of the cheque says "H. H.'s account," and there is no ground for disputing the correctness of the entry.
5	„ September 8th	2,000 0 0	The entry in the counterfoil is "H. B. account," and Mr. Holt says that the money was lent by the Nawab Nazim to Mr. Haviland Burke when he was on a visit to Mr. Burke at Bournemouth. The loan has never been recovered.
6	„ „ 21st	150 0 0	The entry in the counterfoil is "contingent expenses," and a note endorsed on it says that £130 was given to Mr. Burke for rail and other expenses, and that £20 was kept by W. D Fox.
7	„ November 15th	103 19 4	Sum paid to the *Civil Service Gazette*. Receipt produced signed John Bithrey.
8	„ „ 29th	100 0 0	Ditto ditto ditto.
9	„ December 21st	150 0 0	The entry in the counterfoil is "H. account." There is no evidence, but the entry in the counterfoil must be taken as sufficient ground for excluding this item from Fox's account.
10	1871, February 4th...	238 10 8	Sum paid to the *Civil Service Gazette*. Counterfoil says "C. S. G. account." Receipt of John Bithrey produced.
11	„ „ 10th..	100 0 0	The entry in the counterfoil is "Papers account A." It seems that £100 was paid on that day to Mr. Bain of the *Asiatic News*, and Mr. Holt says that the cheque was given on that account.
12	„ „ 25th..	100 0 0	The entry in the counterfoil is "Private account C. Shaw." Mr. Holt believes that it was a payment to Charles Shaw of the Middle Temple. There is no evidence, but the item cannot be charged against Fox.
13	„ March 31st ...	30 0 0	The cheque is in favour of Joseph Pyke, and the entry in the counterfoil is "on account W. D. F." Now, Fox borrowed money on his own account from Pyke, and it is clear that this payment was made for Fox. The sum must be charged against his estate.
14	„ July 20th ...	300 0 0	The entry in the counterfoil is "H. H.'s account B. 200, p. 100." This is explained to mean £200 to Burke and £100 to Price "for literary services." It is not a charge against Fox's estate.
15	„ September 6th	40 0 0	The entry in the counterfoil is "servants' wages, &c." This also is not a charge against the estate.
16	1872, May 3rd ...	25 0 0	The entry in the counterfoil is "expenses, &c." Mr. Holt filled up the cheque, and knows that the money was drawn for the purposes of the Nawab Nazim.
17	„ June 17th ...	300 0 0	The cheque is endorsed "Paid Mr. Walker for Mr. O'Beirne." O'Beirne says that £200 was for himself and £100 for Major Evans Bell, for the Nawab Nazim.
18	„ July 11th ...	250 0 0	The entry in the counterfoil is "for J. L. O'Beirne." O'Beirne says that he paid for the Nawab Nazim £200 to George Moore and £50 to Mr. Sharkey.
19	1873, April 17th ...	200 0 0	The entry in the counterfoil is "G. Moore, Esq., on account of J. S. Price," and the cheque is endorsed by Fox and O'Beirne. It is said that there was an interchange of cheques.
20	„ August 18th ...	120 0 0	The cheque is in favour of J. Pyke, and the entry in the counterfoil is "W. D. Fox's private account." This item is like No. 13 *supra*, and it is admitted that the amount should be charged against the claimant.

The second claim advanced is for £7,600 on account of arrears of salary.

It is alleged by the claimant that the salary of W. D. Fox was £200 a month; and at that rate the monthly salary is regularly entered in the statement of the account from December 1869 to October 1873, three years and 11 months, giving a total of £9,400, from which one payment is deducted, *viz.*, £1,800 on the 31st August 1870. The balance is £7,600.

There is, however, no evidence to shew that his salary was raised to £200 a month. In India he drew a monthly salary of Rs. 1,000. When the Nawab Nazim was proceeding to England, he promised to double the salary of all the native servants who accompanied him, because they left their families in India and would necessarily incur greater expenses. In respect of natives of India the additional allowance was equitable; but the reason for the increase did not apply to Fox, who would live more cheaply in England than in India. The salary which he drew was not small, and £1,200 a year is a handsome allowance for such duties as he had to perform. On these grounds it is presumable that the Nawab Nazim did not intend that the indulgence which he shewed to his native servants should extend to Fox. But

whatever may be the presumption, there is no evidence to prove as a matter of fact that the salary was raised.

Nor is the rate of salary proved by any payment. In the statement of the claimant's account no salary is charged for the months previous to December 1869. If his salary for the nine preceding months during which they were in England was paid to him, the payment should appear in the account; but neither in that nor in the bank book of the Nawab Nazim is there any mention of such payment. In August 1870 Fox received a cheque on account of salary of £1,800, and the counterfoil of the cheque says that this payment was on account of the salary of nine months. Now, this is a memorandum written probably by Fox himself, which in no respect binds the Nawab Nazim, because it is highly probable that he never saw it; and in the absence of any evidence of a payment of salary in 1869, we are of opinion that the payment of £1,800 was in fact the payment of 18 months' salary.

On these grounds we allow the claim on account of salary at £100 a month only.

According to the statement of the claim, the salary was paid to the end of August 1870. From that period to the 18th October 1873, the date on which Mr. Fox died, is three years one month and 18 days, and the amount due at £100 a month is £3,760, which sum we award.

The last claim is for arrears of pension. It is alleged that the Nawab Nazim was so much pleased with the services of Mr. Fox in the conduct of a law suit [*viz.*, the Gopinathpoor Suit No. 56 of 1866, in which the final judgment of the Privy Council was given on the 7th May 1875], that he conferred on him an annuity of Rs. 100 a month. It is also alleged that this annuity was paid to the end of March 1870; and that the arrears due from that time to the 18th October 1873, the date on which Mr. Fox died, that is to say, for three years six months and 18 days, is Rs. 4,260.

A certificate is appended to the claim signed by Nawab Ali Kadr on the 3rd March 1874, admitting that the amount claimed is due. But such a certificate is of no value. At that time Nawab Ali Kadr and his brother, Nawab Wala Kadr, were so much under the influence of Mr. Lindsay that they would have signed any document placed before them for that purpose by him. In many cases advancing the most preposterous claims we had similar certificates before us, which were wholly rejected as without any foundation, and the Nawabs admitted that they signed the papers without any knowledge of the accounts.

No Sunnud or other evidence of the grant of this annuity has been produced; and we cannot presume without evidence that the Nawab Nazim intended to confer on Fox an annuity of Rs. 100 a month for the term of his life. Moreover, the statement of the claim shows that the only payment on account of this annuity since the Nawab Nazim went to England was a sum of Rs. 2,000 paid on the 1st October 1873, that is to say, 17 days before Mr. Fox's death. But there is no entry of this alleged payment in the Nawab Nazim's bank book, and in Mr. Fox's rough statement of the accounts between himself and the Nawab Nazim there is no mention of this payment, although the arrears of [illegible] into account.

We discredit the alleged grant of an annuity, and we disbelieve the alleged payment on account.

On these grounds we reject the claim for arrears of the annuity.

We award to the claimant—

Balance due on the general account ...	...	...	£ 3,339 7 11
Arrears of salary ...	...	...	3,760 0 0
		Total ...	7,100 7 11

F. BEAUFORT.
A. H. PATTESON.
AMEER ALI.

The 20th April 1876.

A separate claim made by Mrs. Fox against the Nawab Nazim was mentioned in Mr. Lindsay's application, but it was not formally preferred, because Mrs. Fox had commenced proceedings against His Highness in England. On the 9th February 1869, the Nawab signed an agreement promising to give to Mrs. Fox 12 per cent. on any sum which he might recover from the Government on the adjustment of his minority accounts, the consideration being the labor incurred by W. D. Fox in preparing the accounts. The amount ultimately paid to the Nawab by the India House on the 26th August 1873 was £32,898-14-8. After the death of her husband, Mrs. Fox took proceedings to enforce payment of the amount due to her under the agreement and a decree was recovered in the execution of which the Nawab Nazim was arrested. A subsequent arrangement was made for the satisfaction of the judgment by instalments. It appears now from the report made to the Secretary of State by Messrs. Farrer, Ouvry and Co., dated the 11th February 1876, that they have settled the claim by a payment of £3,399-3-8, in addition to £1,431-14 previously paid by the Nawab Nazim, for which purpose the money was advanced by the Secretary of State.

F. BEAUFORT.

No. 1007P., dated Fort William, 22nd April 1876.

From—T. H. THORNTON, Esq., D.C.L., Offg. Secy. to the Govt. of India, Foreign Department,

To—F. L. BEAUFORT, Esq., President of the Nizamut Commission.

I have received and laid before the Right Hon'ble the Governor-General in Council your letter No. 111, dated 7th March 1876, with enclosures submitting copies of the declaration made under Section 12 of the Nawab Nazim's Debts Act, 1873, respecting the jewels and immoveable property of the Nizamut, and also your letters No. 113, dated 15th March, and No. , dated 20th April, reporting completion of the duties entrusted to the Commission, and submitting the records and statements connected therewith, together with certain recommendations and suggestions.

2. In reply, I am directed to intimate that, reserving the recommendations and suggestions for further consideration, His Excellency in Council accepts the above reports and their accompaniments as a full discharge of the duties imposed upon the Commission, sanctions the expenditure of Rs. 5,336-2, noted in paragraph 6 of the letter of the 15th March, and authorizes your making over to the Governor-General's Agent at Moorshedabad the copies of the books described in paragraph 2 of the same letter. His Excellency in Council is further pleased to declare the Commission to be dissolved from the 24th day of April 1876.

3. The work of the Commission thus brought to a close has been onerous and important. In all, 1,251 cases have been disposed of, and in 1,001 of these cases awards have been made with the following results :—

Total amount claimed.

(1)	In India	... Rs.	52,19,241 9 8
(2)	In England	... £	19,726 18 0

Total amount awarded to claimants.

(1)	In India...	... Rs.	14,23,745 14 6
(2)	In England	... £	13,742 4 3

A register has also been drawn up containing particulars of each landed estate and other immoveable property, and of each jewel in the possession of the Nawab Nazim, and the principles on which they have been severally declared to be the property of the Nizamut.

4. These results have been attained not by summary compromises or arbitrary curtailment of claims, but by patient enquiry and laborious, detailed, and accurate examination of records and accounts; every person who sold goods to the Nawab Nazim has been paid full price; all who lent him money have received back principal with interest, and, up to the present time, all claimants, save one or two, have accepted the terms awarded them without demur, and, so far as it appears, without dissatisfaction.

5. For the work thus satisfactorily accomplished great credit is due to the Commission, and His Excellency in Council has, accordingly, much pleasure in conveying to Mr. F. L. Beaufort, the President, and to Nawab Ameer Ali Khan Bahadoor, and Lieutenant-Colonel A. H. Paterson, the Members, the thanks of the Government of India for the good service they have rendered.

6. In the case of Mr. Beaufort it is further to be observed that, partly owing to the methods pursued in disposing of the claims, and partly owing to the illness of General Barwell, and the change which took place in the composition of the Commission, much labor has devolved upon the President which was not anticipated when the Commission was appointed; he has moreover taken upon himself the additional duty of framing detailed inventories of the property of the Nizamut, a work never before effected, and calculated to be of the greatest value to the Nizamut hereafter; lastly, without in any way disparaging the assistance of his colleagues, it may doubtless be imputed mainly to the ability, firmness, and discretion displayed by Mr. Beaufort, and to the great amount of labour bestowed by him in the investigation of accounts, the collection and digestion of information, and the treatment of the various questions arising in the course of business, that the debts have been reduced to so comparatively reasonable an amount, and that the affairs of the Nizamut have been placed upon so clear and satisfactory a footing for the future. In consideration of these special services, His Excellency in Council has great pleasure in granting to Mr. F. Beaufort from the Nizamut Fund a honorarium of Rs. 10,000, in addition to the allowance of Rs. 500 per mensem enjoyed by him in common with the other members of the Commission.

7. In conclusion, His Excellency in Council notices with satisfaction the assistance rendered to the Commission by Colonel E. Thompson, the Agent to the Governor-General at Moorshedabad, and Baboo Bungsheedhur Rai, the Naib Dewan of the Nizamut.

From the Government of India, to Her Majesty's Secretary of State for India,—(No. 137, dated Simla, 10th July 1876).

WITH reference to the correspondence ending with Your Lordship's despatch No. 52, dated 18th May 1876, we have now the honour to forward, for the information of Her Majesty's Government, a final report upon the condition of the Nawab Nazim's liabilities.

2. The circumstances under which the Moorshedabad family became involved in debt, and the measures taken by this Government from time to time to relieve them from embarrassment, have been already fully reported to

Your Lordship. We confine ourselves, therefore, on the present occasion, to a brief review of the occurrences which have now resulted in the satisfactory settlement of all claims upon the Nawab Nazim's estate.

3. Your Lordship is aware that the British Government is under an obligation to set aside during the life of the present Nawab Nazim a sum of sixteen lakhs of rupees a year for Nizamut purposes. Of this sum about seven lakhs of rupees a year was, until the year 1873, paid to the use of the Nawab Nazim himself, and managed by him without interference on the part of the British Government. Of the remaining nine lakhs a large proportion was spent upon the maintenance of various members of the family and other objects connected with the dignity of the Nizamut. The balance accumulated in the hands of the British Government, and formed what has been generally mentioned in the correspondence as the "Deposit Fund."

4. Your Lordship is aware of the reckless profusion with which the Nawab Nazim has conducted his affairs. In 1871 His Highness' debts in India alone had reached such a point that the interest payable upon them absorbed about forty per cent. of his personal stipend. The amount of his debts contracted in England, where he was then living, had not been ascertained, but he was reported to be living far beyond his means. His Highness had from the first been well aware that the Deposit Fund was not available for the discharge of his private debts, for this had been expressly ruled by the Court of Directors. The only fund, therefore, which could be drawn upon was the personal stipend of seven lakhs. With regard to this allowance, however, it was expressly stated by this Government in 1862, when the affairs of the Nizamut were reviewed, that they would assume the management in the event of the Nawab Nazim falling into debt. Accordingly, when nine years later the serious nature of His Highness' liabilities came to light, this Government addressed Your Lordship's predecessor and proposed to take over the control of the stipend with the view of clearing His Highness from the embarrassment into which he was sinking deeper every day.

5. Before we had become possessed of the views of Her Majesty's Government with regard to this proposal, the case had been complicated by the [illegible] of the Nawab Nazim himself and the importance of his creditors. The Government had ruled in 1862 that the Nawab Nazim should not alienate lands, buildings, plate, or other hereditary property of the Nizamut. Notwithstanding this ruling, the Nawab [illegible] end of the year 1871—advertised for sale on his father's account certain lands which were said to be State property. He proposed also to dispose of his father's jewels, some of which were believed to belong to the State. The Nawab Nazim's creditors in the meantime attached in execution of decree certain buildings, the cost of which had been defrayed from the Deposit Fund, and it became clear that if the attachment were to be sustained, the Fund itself would be the next object of attack. The accumulations in the hands of Government amounted to about seventy lakhs of rupees, and would therefore have been amply sufficient to clear off the Nawab Nazim's debts. But the diversion of the Deposit Fund to such a purpose would have been most unfortunate. It would have encouraged His Highness in extravagance and virtually shifted the burden of his debts on to imperial revenues, the interest on the fund being the principal source from which after his death the Nizamut family will be maintained.

6. It seemed, therefore, to the Government of India that decided measures were necessary, and that the only way of meeting the difficulty was by special legislation. In our despatch No. 142, dated 4th August 1873, we set forth the condition of affairs and proposed to Your Lordship's predecessor the introduction of a Bill providing for the settlement of the Nawab Nazim's debts, and incapacitating him from contracting similar liabilities for the future. In the following November the Bill received the assent of the Governor-General.

7. The main features of the new Act XVII of 1873 are well known, but for convenience sake it may be well to enumerate them briefly here. The Governor-General in Council was empowered to nominate a Commission for the purpose of enquiring into the several claims brought against the property of

the Nawab Nazim, and deciding upon their justice. His Highness was incapacitated from entering into any contract which might give rise to pecuniary obligation on his part, and no suit was to be commenced or prosecuted against his person or property without the consent of the Governor-General in Council. The duties of the Commissioners were thus laid down in Sections 9, 10 and 12 of the Act—

"The Commissioners shall by agreement with the claimant, or in default of such agreement, after due and full enquiry, determine the amount which on consideration of all the circumstances they may consider each claimant ought in fairness and justice to receive. And in coming to such a determination they shall not be bound by any previous agreement or legal proceeding."

* * * * * * *

"The Commissioners shall certify in each case the amount so determined, and upon the Governor-General in Council within six months from the date of the certificate paying or tendering to any claimant the amount so certified, all claims of such claimant against the Nawab Nazim or his property shall be satisfied and extinguished."

* * * * * * *

"The Commissioners shall ascertain what jewels and immoveable property are held by the Government of India for the purpose of upholding the dignity of the Nawab Nazim for the time being, and shall certify the particulars of such jewels and property, and their finding thereon shall be binding and conclusive on all persons whatsoever."

8. Accordingly, in January 1874, the Governor-General in Council, in the exercise of the powers conferred upon him by this Act, appointed a Commission of three members. The Hon'ble F. L. Beaufort, of the Bengal Civil Service, was nominated President, and Major-General Barwell (replaced subsequently by Lieutenant-Colonel Patterson) and Nawab Ameer Ali, C.S.I., Members. This Commission has now completed its labours and has been dissolved.

9. The awards made by the Commissioners from time to time under Sections 9 and 10 of the Act have already been reported for the information of Her Majesty's Government. We have now the honour to forward copies of the papers noted in the accompanying Abstract of Contents, including the final report of the Commissioners, the declaration made by them under Section 12 of the Act, and the orders we have passed thereon.

10. It will be observed that the Commissioners have disposed of 1,251 claims against the estate of the Nawab Nazim. Of this number 250 have been disallowed. In the remaining 1,001 cases awards have been made with the following results: In India the claims amounted to a total of Rs. 52,19,241-9-8. The Commissioners awarded Rs. 14,23,795-14-6½. In England the claims amounted to £19,726-18. Of this sum the Commissioners considered that £13,702-4-3 was fairly and justly due.

11. With regard to these awards we would observe—

(*a.*) That the persons whose claims against the Nawab Nazim were examined by the Commissioners have accepted the sums awarded them without demur and apparently without dissatisfaction. Only one set of claimants have applied for the consent of the Governor-General in Council under Section 11 of the Act, and this has been refused, the reasons given by the Commissioners for the rejection of the claim being, in the opinion of the Governor-General in Council, conclusive.

(*b.*) That every person who had sold goods to the Nawab Nazim has received their full price, and every one who had lent His Highness money has been returned his principal with interest at 12 per cent.

(*c.*) That these results have been effected not by summary compromises or arbitrary curtailment of claims, but by laborious, detailed and accurate examinations of the several accounts.

(*d.*) That powers necessarily of a very absolute character have thus been exercised, and the whole business closed to the satisfaction even of those creditors whose claims have been very largely cut down.

12. With regard to the jewels and immoveable property, the Commissioners have given, in their declaration and the schedules appended thereto, full particulars regarding each landed estate, and other immoveable property, and each jewel. They have also enunciated the principles by which they were guided in their decision. The conclusion at which they have arrived may thus be summed up: The Government of India holds, for the purpose of maintaining the dignity of the Nawab Nazim for the time being, 164 estates and 12 buildings, besides those within the precincts of the Kila or Palace. The Government of India holds for the same purpose 79 pieces of jewelry and 473 loose stones; 17 estates are declared to be the private property of the Nawab Nazim, and he is also credited with the ownership of 133 articles of jewelry. There are in the Palace and Toshakhana certain other articles of value believed to be State property, but the Commissioners have made no enquiry regarding these, as they were not required to do so under the terms of the Act, and we are of opinion that such enquiry would be inexpedient. We have also approved of their action in not attempting to trace and adjudicate upon immoveable property which had passed *bonâ fide* into other hands.

13. We have accepted the reports submitted by the Commissioners as a full discharge of the duties imposed upon them, reserving their recommendations for further consideration. Those duties having in our opinion been satisfactorily accomplished, we have conveyed to Mr. F. L. Beaufort, the President, and to Lieutenant-Colonel A. H. Patterson and Nawab Ameer Ali, Khan Bahadoor, Members, the thanks of the Governor-General in Council. We have also expressed our satisfaction at the assistance rendered to the Commissioners by Colonel E. Thompson, the Governor-General's Agent at Moorshedabad, and by Baboo Bungshidhur Rai, Naib Dewan under the Governor-General's Agent. Further, in consideration of the special services rendered by Mr. Beaufort, to whose indefatigable care and sound judgment the success of the Commission must mainly be ascribed, and who has personally performed the labour, not necessarily imposed upon him, but of very great benefit to the Nizamut property, of making detailed lists of that property, which had never before been done, we have sanctioned the grant to him from the Nizamut Fund of an honorarium of Rs. 10,000 in addition to the allowance of Rs. 500 per mensem which he received in common with the other Members of the Commission. The title of Nawab has also been conferred on the Native Member.

14. The Commission has been dissolved with effect from the 24th April 1876.

15. It remains now to notice the orders we have passed in consequence of the suggestions of the Commissioners and the actual condition of the Nawab Nazim's affairs.

16. In submitting their declaration respecting the jewels and immoveable property, the Commissioners made the following suggestions:—

(*a.*) That a careful survey and full record of all the Nizamut lands be made as soon as possible.

(*b.*) That small scattered buildings, the costs of managing which are disproportionate to the profits, be sold.

(*c.*) That to avoid future complications and the possible sale of any of the lands for default of payment of rent, the Governor-General's Agent at Moorshedabad be directed to pay periodically all the rents due on account of State property, the amount being deducted from the Nawab Nazim's stipend. This measure will involve no loss to His Highness, who is bound to pay the rents out of the profits which the property yields.

(*d.*) That the State jewels be valued and separately described by a professional jeweller, and kept in a proper cabinet specially made for them, so that each jewel may have its own place, and the absence of any one may be immediately detected.

17. With regard to the first of these suggestions (*a*), we have desired the Governor-General's Agent at Moorshedabad to submit definite proposals on the subject with the least possible delay, the cost of the survey and record being borne by the Nizamut Fund. We have informed him that the second suggestion (*b*) of the Commissioners will be considered by us hereafter when the survey and record of the lands shall have been completed. With regard to (*c*),

the Agent has been requested to make the payments referred to, reporting their amount to us. With regard to the fourth suggestion (*d*), he has been desired to carry out the proposal of the Commissioners. And he has been informed that we do not think it desirable to interfere as to the disposal of the valuable articles of State property, other than jewels, which may be in the Palace and Toshakhana.

18. With regard to the actual condition of the Nawab Nazim's affairs, we have to modify to some extent the statement made in our despatch No. 47, dated 25th February last. We informed Your Lordship in that despatch that we had sanctioned certain changes in the distribution of the Nawab Nazim's personal stipend, and we asserted, on the strength of certain calculations made by the Governor-General's Agent at Moorshedabad, that under the new arrangements His Highness' existing liabilities would be cleared off by the end of the year 1877. In acknowledging the receipt of our letter Your Lordship pointed out—

(*a.*) That in the calculations on which our assertion was based, Colonel Thompson had taken no notice of certain claims which had arisen in England before the passing of the Nawab Nazim's Debts Act, payments on account of which had been made to the amount of £8,786-8-8.

(*b.*) That the monthly payment of £500 made to the Nawab Nazim from the India Office Treasury involved under existing circumstances a charge on the Nizamut Funds considerably in excess of the Rs. 5,000 per mensem estimated by Colonel Thompson.

19. The second of these objections has been already disposed of, and the measures adopted to meet the difficulty were reported for the information of Her Majesty's Government in our letter No. 74, dated 31st March last. We need not therefore make any further reference to this point.

20. The first objection, however, is a valid one, and necessitates a modification of the statement made by us. A sum of £8,786-8-8, or, at the current rate of exchange, about Rs. 1,05,437, must be added to the total of the Nawab Nazim's liabilities as estimated by Colonel Thompson. This addition would raise the total to Rs. 16,95,777.

21. This correction, moreover, is not the only one which it is necessary to make. More exact information now enables us to estimate correctly the value of the items roughly computed by Colonel Thompson, and we would request Your Lordship to substitute the following statement of His Highness' liabilities for that given at paragraph 9 of Colonel Thompson's letter No. 93, dated 10th December 1875, upon which we based the assertion made in our despatch No. 47, dated 25th February:—

	Rs.	A.	P.	
Awards made by the Nawab Nazim Commission on claims in India	14,23,795	4	6½	
Awards on claims in England, including claim by executors of Mr. W. D. Fox, £13,792-4-5 ...	1,65,507	0	0	(nearly)
In round numbers	15,89,303	0	0	
Add sum paid on claims arisen in England before the passing of the Nawab Nazim's Debts Act, £8,786-8-8	1,05,437	0	0	(nearly)
Total awards to be met ...	16,94,740	0	0	

22. Your Lordship will observe that the total of liabilities to be met according to this calculation by the end of 1877 exceeds, by rather more than a lakh of rupees, the total given by Colonel Thompson. To this total must now be added the sum of £481-9-0, or about Rs. 5,778, on account of the payment made on the claim of Mr. Luxmore Wilson, of which we were informed in Your Lordship's despatch No. 52, dated 18th May 1876. The total of assets available by the end of 1877 is on the other hand accurately calculated by Colonel Thompson. The probable total of liabilities may therefore be roughly stated at seventeen lakhs of rupees, and the probable assets available by the end of 1877 at something under sixteen lakhs. There will therefore be a deficiency

of more than a lakh of rupees. This sum would be made up under existing arrangements in a little over three months by the allotments to the Debts Fund from the personal stipend.

23. In modification of the statement made in our despatch No. 47, dated 25th February last, we would therefore express our opinion that under existing arrangements the pecuniary liabilities of the Nawab Nazim ought to be completely cleared off by the end of May 1878.

24. In conclusion, we propose, unless Your Lordship should intimate objections to such a course, to print and publish for general information the report of the Commissioners with a list of claims disposed of by them.

From Her Majesty's Secretary of State for India, to the Government of India,—No. 101 (Political), dated 21st September 1876.

I have received and considered in Council Political letter of your Excellency's Government, No. 137, dated the 10th July last, forwarding the report of the Commission appointed under the Nawab Nazim's Debts Act of 1873, and reviewing generally the condition of His Highness' liabilities.

2. The circumstances which led to the passing of the Act of 1873 were clearly set forth in the letters from the Government of India addressed to my predecessor, which are noted in the margin. There can be no doubt but that, at that time, the Nawab's affairs were in such a condition as to render absolutely necessary the authoritative intervention of Government, in order not only to effect some settlement of his outstanding liabilities, but to incapacitate him, as far as possible, from incurring similar debts in future, and to prevent the alienation of Nizamut property in which His Highness had only a life interest. These were the objects which the Government of India had in view in passing the Act of 1873, and at the same time assuming the management of the personal allowance of the Nawab.

No. 62, dated 4th April 1871.
" 202, dated 26th September 1872.
" 16, dated 24th January 1873.
" 107, dated 30th June 1873.
" 142, dated 4th August 1873.

3. In adopting these stringent measures, the Government of India merely exercised a power which had been reserved to it. The agreement under which in 1884 the Nawab Nazim was entrusted with the uncontrolled expenditure of seven lakhs of rupees a year, for the purposes of the Nizamut establishment, was made upon the distinct understanding that all the expenses of the establishment should be defrayed from this allotment, and that in the event of debts being contracted, the British Government would be at liberty to adopt whatever measures might be deemed expedient and proper, while in 1862 it was plainly intimated to the present Nazim, that although Government had no desire to interfere in his management of his private affairs, their non-interference would be conditional on his keeping out of debt.

4. The right of Government to interfere, and the necessity for interference, being thus alike beyond question, it only remains to consider how far the measures actually adopted have been successful. Upon this point the letter of your Excellency's Government under reply, with its enclosures, leaves no room for doubt. Claims against the Nawab which aggregated over 50 lakhs of rupees will, in less than two years from the present time, have been settled for one-third of their nominal amount. At the same time numerous difficult and delicate questions in connection with the Nizamut property have been decided in a manner consistent with the interests of the Moorshedabad family generally, and with the private rights of its present head. These results will, it may be hoped, be hereafter regarded by the Nawab himself with the same satisfaction as is felt by Government, and reconcile His Highness to the restrictions on his personal expenditure which it has been necessary to impose.

5. I fully approve of the orders which you have passed upon the report of the Commission, and of the manner in which you have recognized the services of its members. I see no objection to the publication, as you propose, of the report with a list of the claims disposed of by the Commissioners.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 22nd November 1876.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K. C. B., Senior Member of the Council of the Governor General of India, *presiding*.
His Honour the Lieutenant Governor of Bengal, K. C. S. I.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
The Hon'ble R. A. Dalyell.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.
The Hon'ble F. R. Cockerell.

SPECIFIC RELIEF BILL.

The Hon'ble MR. HOBHOUSE presented the report of the Select Committee on the Bill to define and amend the law relating to certain kinds of Specific Relief.

He said it was a Bill that did not deal with any very large principles, neither had the Committee made very numerous alterations in it, and perhaps no alteration would be generally considered as of great importance. At the same time it was a much more important Bill in the eyes of lawyers than in those of laymen; and as the publication of the Bill and the remarks made on its introduction had elicited some extremely valuable professional criticism, it would probably be expedient that he should now briefly state how the Committee had dealt with some of the main points in it.

He had explained to the Council, when he introduced the Bill, that the measure was intended to occupy a middle ground between the Contract Act on the one hand, and the Civil Procedure Code on the other, touching both but not encroaching upon either. The Contract Act laid down rules for regulating the validity and nature of contracts; the Civil Procedure Code laid down rules which informed people how they were to get the remedies they were entitled to. The intention of this measure was to indicate the nature of the remedies, whether they should be by way of specific relief or by way of compensatory relief. Then it was pointed out to the Committee that they had not closely adhered to the language of the Contract Act, and inasmuch as the two Acts were intended to work into one another, that the use of different language was likely to lead to difficulty; and also that in two places the Bill encroached somewhat on the provisions of the Contract Act.

The first of these objections was met by altering the language of the Bill, and the Committee had adopted throughout, for the same subjects, similar language to that of the Contract Act, and they had provided, in section 3 of the new draft which he now laid before the Council, and which was labelled Bill No. II, that "all words occurring in this Act which are defined in the Indian Contract Act, 1872, shall be deemed to have the meanings respectively assigned to them by that Act." Therefore, he hoped there would be no conflict, when this Bill passed into law, between the two Acts, except as regarded two points in which the Committee had intentionally displaced provisions of the Contract Act.

One of these points was a matter of considerable legal importance. It related to the question whether there should be a general right to specific performance of contracts by which disputes were referred to arbitration. Some of the gentlemen who had been kind enough to favour the Committee with comments had stated that they saw no reason why there should not be

specific performance of such contracts. There were, however, objections of considerable practical force. The two most ordinary forms of agreements to refer disputes to arbitration were, first, one which provided that the arbitrators should be appointed by the parties themselves, and, secondly, one which specified a particular individual as arbitrator. But how was the Court to make any effective decree if, in the first case, the parties would not name an arbitrator, or if, in either case, the arbitrator died or became incapable or refused to act? In order to make the decree effective, you must go a great deal further, and give the Courts powers which no Court of law now possessed. You must give them power to appoint arbitrators themselves, or themselves to sit as arbitrators. But that was not the specific performance of an agreement; it was making an entirely new agreement, which the parties had not entered into and never thought of entering into.

Now there were provisions in the Civil Procedure Code for the purpose of carrying into effect all those agreements for reference to arbitration which really could be performed *in specie*. Those were cases in which the parties had named arbitrators who were able and willing to act, or cases in which the parties agreed to refer to any person who should be named by the Court. For the due performance of these contracts there was quite sufficient provision in the Civil Procedure Code. But if he (MR. HOBHOUSE) agreed to refer a claim to an arbitrator, say Mr. *A. B.*, it was because he had confidence in the skill, integrity, or force of character of Mr. *A. B.*; or if he agreed to refer to an arbitrator to be named by himself, it might be, and usually was, the case that he had somebody in his eye in whom he had confidence. Now, not to go into more refined considerations, but to take the simplest cases that could happen; suppose that an arbitrator named or in contemplation for some reason could not act, or died, or refused to act. It would be an exceedingly strong thing to say that his (MR. HOBHOUSE'S) agreement was to be converted into a totally new agreement, and that his affairs should be referred to another person in whom he had no confidence at all. Broad considerations of that kind had led the Court of Chancery to lay down a general rule that an agreement to refer to arbitration was not susceptible of specific performance.

When the Bill was drawn, it had escaped his notice that there was a provision in one of the sections of the Contract Act in which the Act went rather beyond its proper scope, and designated the species of remedy which was to be adopted for contracts of this class. In section 28 of the Contract Act, an exception was introduced to the general rule, which makes void such agreements as restrict the action of the ordinary tribunals. The exception was—

> "This section shall not render illegal a contract, by which two or more persons agree that any dispute which may arise between them in respect of any subject or class of subjects shall be referred to arbitration, and that only the amount awarded in such arbitration shall be recoverable in respect of the dispute so referred."

And then, within that exception there was a further provision which said that, when such a contract was made, a suit might be brought for specific performance:—

> "And if a suit other than for such specific performance, or for the recovery of the amount so awarded, is brought by one party to such contract against any other such party, in respect of any subject which they have so agreed to refer, the existence of such contract shall be a bar to the suit."

Now that provision admitted of two constructions. According to one construction, in the case of every agreement which was referred to arbitration, specific performance was the sole remedy either party could have; according to the other construction, it was the sole remedy in cases only of a certain class of such agreements.

The matter had been brought prominently to the notice of the Committee, owing to a recent decision of the High Court at Calcutta, in which the matter was very much discussed, first before Mr. Justice Phear, and afterwards before a Bench of Appeal. The High Court adopted the narrower of these two constructions, and they also affirmed the rule which MR. HOBHOUSE had mentioned as being the rule of the English Court of Chancery; and they expressed the

extreme difficulty they felt in understanding whether, and how far, the Indian Contract Act intended to displace that rule. The matter had to be made clear one way or the other, and the Committee had thought the proper principle was that which was affirmed by the High Court, and which was the English principle, namely, that there should be no decree for the specific performance of an agreement to refer to arbitration. In those agreements which the Court could carry into effect, the parties had plenty of remedy under the Civil Procedure Code. In other cases, there would be no failure of justice. The original ground of dispute remained; the Courts were open; let them implead one another.

The Committee therefore proposed to repeal that one sentence of the Contract Act which dealt with this subject. In section 21 of their Bill No. II, they had provided that, except so far as the Code of Civil Procedure provided, no contract of this kind should be specifically enforced. And then they borrowed from the Contract Act a part of the repealed sentence, and declared that—

"if any person who has entered into such a contract and has refused to perform it, sues in respect of any subject which he has contracted to refer, the existence of such contract shall bar the suit."

That was a kind of moral pressure to prevent people who had entered into contracts to refer to arbitration from breaking them wilfully and capriciously. But it left the other and innocent party entirely free to seek the remedy from which he had been apparently shut out by the provisions of the Contract Act.

The other point upon which they had come into conflict with the Contract Act was with respect to a contract to do some act which, in the meantime between the completion of the contract and its performance, had become impossible. The rule laid down in section 56 of the Contract Act was this:—

"A contract to do an act which, after the contract is made, becomes impossible, or, by reason of some event which the promisor could not prevent, unlawful, becomes void when the act becomes impossible or unlawful."

The greater part of that rule was obviously quite right. But if it meant that the whole of the contract should become void as against both parties, because some portion of the contract became impossible of performance—if it meant that, and he was not sure that it did—it effected an alteration of the law, and one which was not desirable. There must be some point of time at which the rights of parties in the process of exchanging one property against another became fixed, and in which each party took all risks affecting the property which he had to receive. Well, no time seemed so definite or proper as the time at which the contract was formally concluded. That was the English rule. When a contract was formally concluded each party was considered as the owner of the property he had to receive. They therefore restored that rule—he said restored, if it was intended to be displaced by the Contract Act, as to which he was not quite sure,—and they had provided that, notwithstanding anything which was contained in the Contract Act, the mere circumstance that some portion of the contract which was to be performed had become unperformable should not render the contract wholly impossible of performance. So that if he contracted to buy a piece of land, and that contract was concluded, but there was some delay in its performance, and during such delay the land was swept away into the sea by a flood, he must still perform his part of the contract, because the rights were fixed the moment the contract was concluded.

The next point he would mention was, that the Committee had struck out of the Bill a portion of that which was section 4 of the Bill as introduced. That was a provision that the rules of English law should not be applicable to the kinds of relief here provided for. Now when he introduced the Bill, he had explained at some length to the Council how very much the English law had been influenced by the circumstance of the double jurisdiction of law and equity as it existed there, and again by the provisions of the Statute of Frauds, in which respects Indian law materially differed from English law. The Committee had thought that, as there was so much difference between the two laws, it might be prudent to exclude the Courts from the consideration of English law. But they had been advised by two or three gentlemen whose opinions were entitled to great weight, that by doing so they would only embarrass the Judges. They said, it was quite certain that the English decisions

must be and would be referred to for the purpose of illustrating some of the principles which were necessarily stated in very general terms in an Act like this; and if it was only for the purpose of finding out what was the law of justice, equity and good conscience, or such other general principle as the Court thought should govern the case, it was quite certain that the Judges would have recourse to English decisions to guide them. Therefore it would be better, it was said, not to affect to do that which could not practically be done, but to be silent about the operation of English law. The Committee had felt the force of this argument and had struck the provision in question out of the Bill.

Another thing they had struck out was that matter which formed sub-section (*a*) of section 12 of the Bill as introduced. It was there provided that there might be specific performance of any contract in which it was specially agreed that either party might require it to be specifically performed. He mentioned at the time that this was, so far as his experience went, a perfectly novel provision, and that it had been borrowed from the New York Civil Code, and he also intimated that he thought it a rather speculative provision. They had now been advised by professional gentlemen of experience that it was not likely to work well. It was said that this particular stipulation would constantly be put into very inequitable bargains, and that though the Bill did not propose to compel the Court in such cases to give a decree for specific performance, such a decree being in all cases discretionary, yet that the existence of a provision of this kind would practically be treated by a great number of Judges as compulsory upon them. On the whole, the Committee thought it more prudent to strike out the provision.

The only other matter to which he would call the attention of the Council was that which was contained in section 42 of the Bill No. II, corresponding with section 40 of the Bill as introduced. It related to the subject of declaratory decrees. In the Bill as introduced, it was provided that there should be no declaratory decree in cases where the right of the plaintiff was a present existing right. In so doing, they had followed the English decisions without very much examining the grounds upon which they rested. They had received from the Standing Counsel a paper of very great value of which they had freely availed themselves in altering the Bill. Upon this point, he challenged them to show reason why they should so frame the law, and MR. HOBHOUSE confessed that he could not answer the challenge. He would read to the Council what Mr. Pitt Kennedy said:—

"It is generally of grave importance for every man to know precisely his pecuniary position, and serious difficulties might often be avoided if this could be accomplished. I confess myself unable to discover why, when others advance a claim to property which one believes to be his, whether in possession or not, he should not have the power of settling the point at the earliest period instead of being obliged to wait till his evidence may be lost, and to keep his arrangements for his family uncertain. The old rule was based, so far as I can discover, on the (possibly not unnatural) dislike of Judges to be troubled with the decision of a point of difficulty if they could in any way avoid it. One singular illustration of the length to which this was carried is to be found in *Bull* v. *Pritchard*, in which the same will was construed as respects the personalty by Lord Giffard in 1826 (1 Russ. 213), and as regards free-holds by Sir J. Wigram twenty years afterwards, 5 Hare 567, with a precisely similar result."

Then Mr. Pitt Kennedy referred to one of the illustrations in the Bill, which supposed *A* to be in possession of land and *B* to be threatening him with litigation, and which proceeded on the theory that *A* would have no right to declaratory relief. And he continued thus:

"Illustration (*e*) does clearly illustrate the section, but why should *A* not have the power to quiet his title? The claim is a serious invasion of his rights, and would no doubt lower the selling value of his property; why should he not have the power of putting *B* to the alternative of renouncing or proving his claim, at the cost of *B*, if *B* had advanced it rashly or maliciously? Doubtless, this section does follow the decisions on the English Act and the Procedure Code, but this Bill is to amend as well as to define; and so far as I can discover, such powers would be no novelties in law; the Scotch action of declarator is, I believe, precisely pointed at such cases. In my own experience, I have known of great difficulties being imposed on a family by the existence of a supposed defect of title in a portion of the family property, which much complicated the testamentary arrangements of the father, and which could easily have been set at rest if effective powers analogous to the Scotch declarator had existed, though the doubt was quite insoluble for the time under English procedure."

MR. HOBHOUSE could not answer Mr. Pitt Kennedy's argument, and he could add something to it from his own experience. When he was practising at the Chancery Bar, it not unfrequently happened that people desired o

have some question settled for the purpose of family arrangements, and that there was extreme difficulty, sometimes insuperable, sometimes superable only by the exercise of great professional craft, in finding out how to get up an actual conflict of present rights, so as to compel the Court to decide the question at issue.

The Committee had therefore made an alteration in the Bill, bringing it more in accord with Scotch law than with English. In order to avoid multiplicity of actions and to prevent a man getting a declaration of right in one suit and immediately afterwards a remedy in another, they had provided that, if he was able to seek more substantial relief beyond a declaration, he should do so; but that the mere circumstance of his right being a present right should not prevent him from obtaining relief by way of declaration.

There were other alterations, all of which were mentioned in the Report of the Committee. They thought it right that the Bill should be re-published, so that any one might see for himself precisely how the Bill had been amended.

PRESIDENCY MAGISTRATES' BILL.

The Hon'ble MR. HOPE asked leave to postpone the presentation of the final Report of the Select Committee on the Bill to regulate the procedure and increase the jurisdiction of the Courts of Magistrates in the Presidency Towns.

Leave was granted.

OPIUM BILL.

The Hon'ble MR. HOPE presented the final Report of the Select Committee on the Bill to amend the law relating to Opium.

TREASURE-TROVE BILL.

The Hon'ble MR. BAYLEY moved for leave to introduce a Bill to amend the law relating to treasure-trove. He did not propose to detain the Council with any very full statement of the law which this Bill was designed to amend. He would, for the present, confine his remarks merely to explaining the necessity for some amendment of the law, and this he would do by stating, briefly, that in the first place the law as it now stood was in many parts of India very uncertain, and, secondly, that even where it was certain, it was quite ineffectual at least for any useful purpose. There were in existence two old Regulations, (V of 1817 and XI of 1832) one affecting the Bengal Presidency, and the other affecting the Madras Presidency. With regard to the Non-Regulation Provinces on the Bengal side, it was probable, though by no means certain, that the Bengal Regulation applied to them. In the course of discussion upon certain recent projects to define the substantive law in some of the Non-Regulation Provinces, this point was indicated as one which required determination in some way or other, and accordingly provision was made by legislating in the affirmative as respects several of those provinces. But, in the meantime, a correspondence was sent up by the Government of Bombay, which showed that there was no distinct enactment affecting that Presidency, and that it was extremely doubtful what law on the subject was there in force. Under these circumstances, he thought the Council would admit that, on the ground of the uncertainty of the law, there was at least a necessity for some legislative action in regard to the Presidency of Bombay, and possibly still as to one or two of the Non-Regulation districts of Bengal. But he would propose to go somewhat further, and to point out that the law, even where it was certain, was nevertheless ineffectual.

The object of the law, as it now stood in Madras and Bengal, was to define the rights in treasure-trove, and to protect what were supposed to be the rights of the State. He might say, roughly, that the purport of the law in this respect was to assert the general right of the State, but to waive that right upon certain conditions in favour of the finder, where the property did not exceed the value of a lákh of rupees. As a matter of fact, he believed—he might perhaps say he was certain—that during his official experience in India, which now extended to above a third of a century, no single case had occurred of treasure-trove exceeding one lákh of rupees in value having ever been found—certainly no well-authenticated and ascertained case. And therefore the law had never brought one single rupee's worth of revenue to the Government Treasury.

But there nevertheless remained a kind of fear widely diffused that Government might claim any treasure-trove. Moreover claims were often made by another class of claimants whose not unreasonable rights the present law wholly ignored, but which the Bill would define and protect. The natural result of all this was that, dreading any adverse interference, the finder, as a rule, endeavoured to conceal the fact that he had found anything, and so, in many cases, articles of extreme value, both in an artistic and historic point of view, had been lost or defaced.

He thought, therefore, he might say that the law as it now stood was both ineffectual and mischievous. From what he had said, it might be gathered that it was his opinion that this defect in the law proceeded from an inherent error in the policy on which it was founded. When he said that this was his opinion, he meant that it was the opinion which was now accepted by the Government of India, and had also been accepted by the Secretary of State, to whom, for certain reasons, it was necessary to refer this project of law before introducing it into the Council.

If leave was given to introduce a Bill, he proposed, in doing so, fully to explain its details, and in connection with them to enter more fully into the policy which it was proposed to substitute for that which governed the existing law.

The Motion was put and agreed to.

SEA CUSTOMS BILL.

The Hon'ble MR. HOPE introduced the Bill to consolidate and amend the laws relating to the administration of the Department of Sea Customs in India, and moved that it be referred to a Select Committee with instructions to report in three months. The present Act (VI of 1863) which regulated these matters had now been for thirteen years in operation, and it had already been found necessary to amend it by more than one special enactment. Numerous other modifications had at various times been suggested, and although some of them had been of a rather pressing nature, it had not been found practicable to legislate specially on their account. Further, the immense revolution which had taken place in the conditions of modern trade, more especially arising from the opening of the Suez Canal, had so entirely altered the circumstances of the large ports, such as Bombay, Madras and Calcutta, as to render necessary radical changes in the Customs system which had hitherto prevailed, not only in India, but generally in all civilized countries where such changes had not taken place. The necessity for a new law was felt as long ago as 1870, and Sir Richard Temple, the present Lieutenant Governor of Bengal, in August 1870, obtained leave to introduce a Bill for the purpose. Certain difficulties connected with the English law arose, which it was not necessary for him at present to explain, and the Bill was for the time not proceeded with. It had now been found practicable to follow out the idea with which that leave was originally granted. But it had been thought better, instead of acting on the leave then given, to obtain fresh leave by means of publication, under the Rules, with the permission of the President, and to bring in an entirely new Bill.

This Bill which he had the honour to introduce was in the first place a consolidation of the whole existing law, and it was a careful consolidation so far as there had yet been time and opportunity to make it so. There were however a considerable number of modifications which he was sensible the Bill was capable of; some modifications of drafting, such as a consolidation of all the penal clauses into one section, and of all the clauses relating to confiscation into another, which there had not been time to elaborate, and there were also others of greater moment.

The Bill however did contain a few changes, which, being of some importance, he might perhaps refer to briefly. One of these was that, where a dispute arose regarding the proper rate of duty upon any goods, the goods might be taken away by the owner, under proper security, instead of being detained whilst the dispute was being settled. Another was designed to meet the difficulty which was felt every time a change was made in the tariff, owing to goods, which had been in some cases shipped, and in other cases contracted for, at certain rates inclusive of duty, being chargeable on arrival in India with other rates of duty. Every time that the Tariff Act had been changed, the Government had received applications, which, in some cases, it had been able to comply with, and in other cases it had by law been unable to do so. It was therefore now provided that, where a contract was entered into for the supply of goods at a fixed price including duty, and the duty had been altered, the contract-price should be increased or diminished, as the case might be, by the amount by which the duty

had been so raised or lowered. And further that, where the duty was raised during transit by sea to India, the duty payable on arrival should be the reduced duty which the shipper at the time of shipping the goods believed he would have to pay.

The next change was in order to facilitate the rapid discharge of canal-steamers. It was to allow of the entry in the manifest of the name of the ship's agent as consignee of any cargo, so that the whole cargo might be turned out within forty-eight hours of the arrival of the steamer, or whatever time the discharge might occupy, before the real consignees had had time to apply for delivery, for which the vessel was now, strictly speaking, obliged to wait.

Another change in the same direction, for facility of discharge, was the provision to permit bulk to be broken prior to the receipt of the original manifest and entry of the vessel at the Custom-house. Very often the papers of a ship were not fully completed when the ship sailed, and did not arrive until after she had reached her destination. As the law now stood, in such a case the ship might be subjected to detention and inconvenience pending the arrival of the papers.

Another alteration with the view of facilitating trade, was the permission to grant port-clearance before delivery of the manifest. It was frequently found impossible to complete the manifest of a large vessel as soon as the vessel was ready to sail, and so long as security was given that the papers would be delivered within three days of the departure of the vessel, there appeared to be no objection to the grant of the port-clearance.

Again, it was proposed to legalize the practice existing at some Custom-houses, which was exceedingly convenient to traders, of allowing merchants to deposit Government paper, against which might be debited, in a current account, the different items of duty payable by them, instead of obliging them to make separate payments in cash for every individual package they might require to clear, which was a course equally inconvenient to the public and to the Customs Department itself.

One other improvement of sufficient importance to notice here was that, when goods were adjudged to be confiscated, the owner might, at the discretion of the confiscating officer, be allowed the option of paying a fine and taking away the goods; because, in many cases, as long as the owner was subjected to a sufficient penalty, there was no reason for depriving him of the articles themselves.

He hoped the Bill as now introduced was, so far as it went, a considerable improvement upon the existing law. He confidently anticipated that it would receive very large further amendments both in principle and in wording, with the assistance; not only of the Select Committee, but also of the Committee which, at the desire of the Lieutenant Governor, had been convened in Calcutta, and of Committees which it had been suggested to the Governments of Madras and Bombay to convene also. He, for his own part, should be only too happy to consider favourably every suggestion for the purpose of facilitating trade and adapting the law to the present circumstances of the country which was consistent with the safety of the revenue and the necessity for due registration and keeping of trade-statistics.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE moved that the Hon'ble Mr. Dalyell be added to the Select Committees on the following Bills:—

To define and amend the law relating to certain kinds of Specific Relief:

For the better control of dramatic performances:

To amend the Indian Registration Act, 1871.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to consolidate and amend the laws relating to the administration of the Department of Sea Customs in India——The Hon'ble Messrs. Hobhouse, Dalyell, Cowie and Bullen Smith and the Mover.

The Council adjourned to Wednesday the 29th November 1876.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 22nd November 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th NOVEMBER 1876.

GENERAL REMARKS.—In Madras partial rain is reported from Madura, but it has been insufficient to benefit the standing crops; a little has also fallen at Tanjore; elsewhere there has been none, and prospects are unchanged. No rain has fallen in Mysore, and relief works are being largely extended. In Bombay reports are favourable from Sind and Guzerat; elsewhere no rain has fallen, and the condition of things is unchanged. In the Central Provinces rain is in some districts required for the *rabi*, but prospects are on the whole fair. In Berar rain is in many places much needed for the *rabi*. Reports from Central India and Rajputana are favourable. In Bengal there have been some slight showers in the central and eastern districts; the condition of the crops is excellent. A little rain has fallen in Assam, and also throughout Burmah; reports are good. No rain fell during the week in the North-Western Provinces or Oudh, where prospects are satisfactory. In the Punjab rain is reported from the northern and western districts; the crops promise well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Nov. 28th)	*Nil*	One foot, 3 inches water over anicut: canal supplies insufficient; no improvement in crops; small quantity of dry paddy harvested in a few taluks, outturn about ¼th; prices high and rising; health fair; cattle suffering; fodder very scarce; water scarce in places; poorer classes have difficulty in getting food in many places, and there is little work for coolies.
Kurnool („ 28th)	*Nil*	Crops under canal, wet and dry, good; harvest in some villages under canal; elsewhere crops withered and taken up; water and pasture rare; dry fodder in villages almost exhausted; cattle sent to Nallamallays for grazing; cholera in Ramalkota and Markapur taluks, attacks in former 199, deaths 100; grain not easily procurable in outlying parts of the district; prices steady as compared with last week; number of coolies on relief works over 1,26,000; no water over Sunkesala anicut.
Cuddapah („ 28th)	...	Rain crops same as former week; prices, rice 4¼ seers per rupee; *raggi* 6½, *sajjalu* 6½, *cholum* 5½, horse-gram 6.
Bellary („ 27th)	*Nil*	Cholera in 7 taluks, decreasing gradually amongst coolies round Bellary; prices pretty stationary; *cholum* 7 seers per rupee; 1,48,000 persons on relief works, of whom 54,000 near Bellary; 9,500 persons are fed.
Tanjore („ 28th)	·10 at Negapatam.	No rain elsewhere; no freshes in rivers; supply to tanks none; water over anicuts none; cultivation very little; standing crops withering; harvest very scanty; yield bad; markets not well supplied; prices tending to rise; cholera lingers in a few villages, seizures 14, deaths 9; fever and small-pox slight in some parts; cattle healthy; pasture insufficient.
Madura („ 27th)	1·8 at Tirumungalum, nearly 1·0 at Dindigul and Melur; ·2 at Madura.	Rain partial and not sufficient to benefit existing crops; prices nearly stationary in some parts; poor people subsist on roots.
Malabar („ 28th)	*Nil*	Insufficient rainfall, very unfavourable for second crop which, in most places, is withering; markets well supplied; imports by sea, rice 28,246 bags, *raggi* 214, gram 86; exports by sea and rail, rice 13,932, *raggi* 532, gram 28; prices have generally fallen, highest 4¼ Macleod seers in Wynaad, lowest 7½ in Cherakal; average 6½ seers per rupee; cholera in Kurumbranad, 7 deaths; small-pox and fever generally prevalent; cattle disease in Ernad, Walluvanad, Palghaut and Wynaad; pasture sufficient.
Bombay—(Nov. 30th)		*General Remarks.*—General prospects unchanged.
Sind. (Nov. 29th)		
Kurrachee („ 20th)	...	Slight rain at Pir Patho on 24th; freshet from Gáj on 12th; small-pox in Mánjhand and Kurrachee, and fever of a bad type in the former; many deaths.
Shikárpur ...	...	No report received.
Hyderabad ...	0·55 in Hála	Cattle disease in Guni; 1 case of small-pox in Moro taluka; in Hyderabad City 91 fresh cases from 20th to 25th, 16 old cases proved fatal; north winds have commenced blowing, but not steadily.
Upper Sind Frontier ...	0·39	Weather cold and damp; *rabi* crops progressing favourably; fever prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Guzerat.		
Ahmedabad ...	...	No change.
Kaira (Nov. 28th)	...	No change; prices falling gradually.
Surat ...	...	Want of latter rains has been felt in many talukas.
Broach ...	...	Fever in all talukas except Wágra; crops good.
Khandesh and Násik.		
Khandesh ...	...	People in distress; *rabi* crops mostly dried up; no rain; fever prevailing in Chopra and Taloda.
Násik ...	...	No rain and no change.
Konkan.		
Tanna ...	...	Reaping of *kharif* crops almost completed; sowing of *rabi* nearly finished; public health good.
Deccan.		
Poona (Nov. 28th)		No change in prospects; no rain.
Ahmednagar ...	...	No change for the better in condition of people and crops; cholera in 2 talukas, 11 cases, 5 deaths.
Sholapur	...	No crops; no rain; condition of people as before.
Satara (Nov. 28th)	...	No change in the condition of the people and crops; *kharif* crop harvested in some places; 22 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	...	Condition of crops and people as before; reaping of *kharif* crops in progress.
Dharwar ...	...	Condition of people and crops unchanged; cholera bad in one village of Kalghatgi, and in one of Ron.
Kanara ...	...	Harvest above Ghâts in progress; crops generally below average; many persons in distress migrating to Kanara.
Kaládgi (Nov. 27th)	...	No change in condition of people and crops; no rain.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Wheat and gram thriving; cotton in some parts slightly injured by insects.
Wadhwán ...	...	Weather cold and health good; cattle disease in Jhinjhuwára taluka; wheat injured by insects in Simri taluka.
Baroda ...	...	No change in state of crops.
		General remarks.—Crops in Sind and Guzerat continue fair; small-pox severe in Hyderabad; no improvement in the Deccan or the Southern Mahratta Country.
Bengal—		
Chittagong ...	3·02	Weather fine, latterly cloudy with rain from the night of the 22nd instant; the prospects of the rice crop continue bad from the effects of the late cyclone; cholera of a virulent type has broken out in Chittagong town, Seetacoond, Kumeria, Patia, and Banskhali, and isolated cases of small-pox reported from town and Anwara outpost.
Noakholly ...	*Nil*	Weather, nights and mornings cold, but afternoons hot and oppressive; much of the late rice in the inundated tracts has been destroyed by salt water; cholera of a very severe type is raging in the station and in the inundated tracts.
Chittagong Hill Tracts...	*Nil*	Weather cold and foggy in the morning, and hot at noon throughout the week; mustard is being sown, and cotton is being gathered in places where the plants are not totally destroyed by the late cyclone.
Hill Tipperah ...	*Nil*	Weather seasonable; the damage done by the late cyclone to the rice crop in the plains seems to have been about three annas; the cotton crop in the hills has been also injured; notwithstanding all this damage, the prospects of the crops generally are fair.
Backergunge ...	*Nil*	Weather seasonable; the Commissioner and Collector have visited all the places affected by the late storm wave, and estimate the crops in the afflicted thanas as follows: in Golachipa the early *agrahan* paddy will be thirteen annas, as also the *pous* crop; in Dowlut Khan the early *agrahan* will be ten or twelve annas, but the *pous* (which is the larger crop) will probably not be more than six annas, though it may develope to eight annas; in Barmuddin both the crops may be marked at about ten annas; in Bowful the *pous* is by far the larger crop, and will be twelve annas, while the *agrahan* will be five annas only; in Backergunge the yield all round will be about twelve annas; in Mendigunge the *agrahan* crop will be ten annas and the *pous* crop twelve annas; in all the other thanas of the district the crops are reported to have been damaged by the cyclone; all apprehensions, therefore, about want of food are at an end; the people now fear the ravages of the grub *chenna*, which is often most destructive to the ripening crops, of which the appearance has not hitherto been any where reported. In the distressed tracts the people have lost nearly 90 per cent. of all their plough cattle, in addition to the loss of their moveable property. The general health of the district is very indifferent; fever to a large extent exists all over it, and cholera is reported to be present in thanas Burrisal, Backergunge, Jholakati, Mendigunge, Gournadi, Perozepore, Sharoopkatti, and Dowlut Khan.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Furreedpore ...	1·56 ·61 at Goalundo.	Weather wet since 22nd instant, with strong north-east wind in gusts, and low barometer; the prospects of the crops are good, save the damage done by the late cyclone; endemic cholera is reported from some places.
Dacca ...	1·24	There has been light constant rain for 3 days, and cloudy weather, most unusual for this season; state of the crops is still good, but the rain will do some damage.
Mymensingh ...	·04	Weather seasonable; cloudy on the 23rd and 24th instant, with changeable wind; state and prospects of the crops are favourable.
Tipperah ...	2·91	Weather sultry during first half of the week; wet and stormy during the last two days; the winter rice crop promises to be a fair average one.
24-Pergunnahs ...	·22	Weather seasonable at the beginning of the week, but cloudy from 22nd to 24th instant, and a little rain fell throughout the district; prospects of the *amun* rice are good; the public health is generally good.
Jessore ...	0·80	Weather clear and seasonable up to the night of the 22nd instant; since then there have been very slight and almost continual showers of rain; the state and prospects of the crops are good and favourable; during the past week cholera was prevalent in parts of the district, and there was a virulent description of malarious fever in the Godkhally thana; there were still some cholera cases in Jessore town.
Nuddea ...	0·14	Weather gloomy and cool, with drizzling rain; prospects of the crops are generally good; cholera is reported to be on the increase in the Meherpore and Chooadangah sub-divisions.
Moorshedabad ...	*Nil*	Weather cloudy since the night of the 23rd instant; wind and drizzling rain on the 25th at day break; prospects of the crops continue to be favourable; the cutting of *amun* has begun; prices are steady; fever and cholera are both very prevalent in Berhampore.
Pubna ...	0·17	Weather cold and cloudy with small showers of rain; the harvesting of *amun dhan* is going on, and the prospects of sugarcane and turmeric are good; cholera continues in a sporadic form.
Rajshahye ...	...	Weather cloudy; a few drops of rain fell in Bauleah on the 23rd instant, and in Bilmaria on the 22nd; there is nothing further to report beyond what was reported last week; the prospects of the *dhan* crops continue to be satisfactory, and the *rabi* crops are still being sown; surgarcane, *urhur*, *kalai*, and *til* are thriving; cholera still continues to be reported from Bauleah, Nattore, Bandaikhara, Burrigong, Bagmara, and Charghat, and fever also from Bauleah, Nattore, and Bagmara.
Bogra ...	0·07	Weather cloudy and drizzly towards the end of the week, easterly wind blowing; *dhan* is ripening rapidly, and is being harvested in places; sugarcane is being cut; sporadic cases of cholera reported here and there.
Maldah ...	*Nil*	Weather fair, with occasional clouds and traces of rain on the 25th; rain threatening; the prospects of the crops are good all round the district, *amun* and *kymunt* are being reaped in places with large outturn.
Dinagepore ...	*Nil*	Weather bright and cold; north-east wind blowing; the prospects of the crops this year is better than in the two previous years; there is much fever arising from the chills.
Rungpore ...	*Nil*	Weather cool; the cutting of rice has commenced, and a good outturn is expected.
Cooch Behar ...	*Nil*	Weather becoming colder, but the mornings are not yet foggy; the late rice or *kymunti dhan* is being cut; the cultivation of mustard oil-seed and other cold weather crops is still going on, and their prospects are not bad now; the tobacco plants yet remain to be transplanted; the health of the people is generally good.
Jalpáiguri ...	*Nil*	Weather fine; state and prospects of the crops are good in every way; cattle disease is slightly prevalent in Baxa and Fallacotta.
Darjeeling ...	*Nil*	Weather fair throughout the week; all the crops are progressing very favourably in all parts of the district.
Midnapore ...	*Nil*	Weather cloudy and cool, wind blew from the north-west; the rainfall was very light; rice is being cut with a good outturn.
Howrah ...	·17	Weather cloudy, cold, and raw; slight rain fell; prospects of the crops continue excellent.
Hooghly ...	·12 received.	Weather cloudy since the night of the 22nd instant, with drizzling rain at intervals; the *rabi* sowings are still going on, and *musuri*, *matar*, and *kalai* have germinated in places; the early *amun* is being harvested; the late *amun* is ripening, and its prospects continue good; the general health is normal; a little fever prevails in the Serampore sub-division.
Burdwan ...	*Nil*	The *amun* paddy is ripening, its harvest will soon begin; fever is prevalent.
Bankoora ...	*Nil*	Weather clear and cool during the first four days of the week, and cloudy during the last three days; state and prospects of the crops continue good.
Beerbhoom ...	*Nil*	Weather seasonable, cloudy during the latter part of the week; state and prospects of the crops continue excellent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Sonthal Pergunnahs ...	*Nil*	Weather last two days cloudy; distant hills clear, as before rain; nights warmer; the state and prospects of the crops on all sides are reported to be as good as possible; cattle disease is stopping in Deoghur.
Bhágalpur ...	*Nil*	All the crops are promising; general health is very good.
Monghyr ...	Return not received.	Weather fine, clear, and cool; the *rabi* and *urhur* crops promise well.
Purneah ...	*Nil*	Weather fair; the *rabi* sowings are progressing favourably, and the outturn of the winter rice is expected to be sixteen annas; fever is said to be increasing in Bussuntpore and Ramgunge.
Durbhanga ...	*Nil*	Weather fair and cool; *dhan* is being harvested, and the sowing of the *rabi* crops is nearly completed.
Mozufferpore ...	*Nil*	Weather seasonable and cold; the prospects of the crops continue good; the *rabi* sowings are still in progress; the prices of food grains are gradually falling off, owing to the favourable prospects of the crops; public health is good.
Sarun ...	*Nil*	Weather bright and clear, but rather warm for the time of the year. The wind is blowing from the west; the harvest of *aghani* has commenced; the *rabi* crops are coming on well, and the prospects are generally very favourable; general health is good.
Chumparun ...	*Nil*	Weather seasonable; prospects of the crops are most favourable.
Patna ...	*Nil*	Weather seasonable; the rice crops are being reaped with a good outturn, and the prospects of the *rabi* crops are favourable; health of the district is good.
Gya ...	*Nil*	Weather cool, with clear sky; the maximum reading of the thermometer in the shade reached as high as 82·6; the harvest of *kharif* has commenced, and the outturn promises to be good; the *rabi* sowing is still going on, and promises to be favourable.
Shahabad ...	*Nil*	Weather cool; the paddy crop is being gathered, and the *rabi* seeds have germinated; health of the district is good.
Hazáribágh ...	*Nil*	Weather seasonable; the state and prospects of the crops are very favourable.
Lohardugga ...	*Nil*	Weather cloudy, and not so cold as in the last week; the crops are all that can be desired.
Manbhoom ...	*Nil*	The weather during the last two days was little cloudy, but no rain fell; the paddy on the high lands is being cut throughout the district, and the prospects of the crops on the ground are very good.
Singbhoom ...	*Nil*	Weather seasonable; prospects of the crops are favourable; there is much less fever in the district.
Balasore ...	·05	Weather clear and cool; the harvesting work continues satisfactorily.
Cuttack ...	*Nil*	Weather cold and clear in the early part of the week, and cloudy and close in the latter part; there will probably be rain soon; the crops are progressing well; public health is good.
Pooree ...	*Nil*	Weather fair; the *laghu* crop is being reaped; in some places the *sarad* crop is ready for the sickle, and in others it has begun to ripen; the water in the fields in parts of pergunnah Ráhán, Kotrahang, and Serai being insufficient, the ryots are having recourse to irrigation; no complaint is made either from the Khoordah sub-division, or from the tracts bordering the Chilka; very large quantities of rice are being bought up in this district for export, and consequently those who have no rice for sale are much dissatisfied.
		General Remarks.—There were a few insignificant showers of rain in some of the districts of Bengal and in Balasore; in Behar and Chota Nagpore the week was without rain; the early *amun* is being fast harvested with satisfactory results; the late *amun* is ripening, and its prospects are good, except where it has been damaged by the late cyclone; the *rabi* sowings still continue and promise to be favourable.
N. W. Provinces—		
Benares (Nov. 27)	...	Prospects continue favourable.
Allahabad („ 28)	...	No change.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7th DECEMBER 1876.

GENERAL REMARKS.—In Madras slight and partial rain is reported from Malabar, Madura and Tanjore; elsewhere none has fallen, and prospects are unchanged. No rain has fallen in Bombay; prospects continue good in Sind and Guzerat; elsewhere there is no improvement. In Mysore a trifling shower is reported from Bangalore; the condition of the province remains as before. In Berar rain is much wanted in some parts for the *rabi*. Rain is also required for the *rabi* in many districts of the Central Provinces, but prospects are on the whole good. Reports are favourable from Central India and Rajputana. Some rain fell in the eastern and central districts of Bengal during the week; the winter rice is being harvested and promises an excellent outturn. No rain is reported from Assam, the North-Western Provinces, Oudh, or the Punjab; prospects are good in all these provinces.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Dec. 5th)	*Nil*	Eleven inches water over anicut; water insufficient to irrigate all growing wet crops; prices still rising; fever here and there; cholera reported; cattle suffering from disease in some taluks; fodder very scarce; water scarce in places; poorer classes have difficulty in getting food in many places; 2,000 persons employed on local fund works in Vinukonda and Narsarowpett, 1,000 on river embankment.
Kurnool "	*Nil*	Crops under canal good; paddy being harvested in some canal villages, elsewhere same as before; markets ill supplied; prices slightly fallen in Pattikonda, rising in Nundial, stationary elsewhere; water and pasture scanty; outbreak of cholera reported from all taluks, 1,358 seizures, 641 deaths; coolies over relief works from latest returns available, 159,500.
Cuddapah "	...	Rain crops same as former week; prices, rice 4¼ seers per rupee, *raggi* 6¼, *sajjalu* 6¼, *cholum* 5½, horse gram 6; 47,734 persons on relief works; none fed without exacting labour.
Bellary (Dec. 4th)	*Nil*	Cholera in 6 taluks only; 188,000 persons on relief works; 11,800 persons fed, of these 6,000 are children in one taluk; explanation called for; prices stationary.
Tanjore (" 5th)	·67 at Negapatam.	Rain elsewhere partial; no freshes in rivers; supply to tanks a little; water over anicut none; dry cultivation very little; standing crops withering; some parts good; harvest very little; yield scanty; pasture insufficient; markets not well supplied; prices very high; cholera still lingers in some parts, 6 seizures, 6 deaths; fever and small-pox in some localities; cattle healthy; number of people on relief works none; number fed without exacting labour, none; number fed from rajahs' chuttrums and as famine relief, 10,000.
Madura (" 5th)	·5 at Periacolam; 1·3 at Melur; 1·0 at Dindigul; ·85 at Madura.	Rain not sufficiently general nor continuous to affect agricultural prospects; some dry crops harvested; outturn extremely poor; number of persons on relief works, 1,955 at Pulney, 285 at Dindigul; 550 fed gratis daily.
Malabar (" 5th)	1·0 and less in south and east; *nil* in north and centre.	Rain insufficient for second crop, much injured; markets well supplied; imports by sea and land, rice 25,870 bags, *raggi* 1,261; exports, rice 9,136, *raggi* 190; prices have again slightly fallen, highest 7¼ Indian seers in Wynaad, lowest 12½ in Cochin; average 10⅛ per rupee; cholera in Koteyom and Kurumbranad, 11 deaths; health otherwise satisfactory; cattle disease in 4 taluks; pasture sufficient; no relief works undertaken. *General Remarks.*—General prospects unchanged; area of relief works enlarged.
Bombay— (Dec. 7th)		
Sind. (Dec. 6th)		
Kurrachee ...	...	Rain general on 24th ultimo, will benefit *rabi* crops; hail at Dádú; fever everywhere; small-pox continues in Kurrachee and Malir; cotton picking commenced in places.
Shikárpur ...	...	No change.
Hyderabad ...	...	Locusts in taluka Sakrand; cattle disease in taluka Badin and Tando Alahyar; small-pox in taluka Hyderabad, 6 cases in the city; from 25th November to 2nd December 85 fresh cases, 21 deaths; fever still prevalent.
Upper Sind Frontier ...	...	Weather cold; oil-seed crop very promising; other *rabi* crops fair; fever prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Guzerat.		
Ahmedabad ...	...	*Rabi* crops well, except in Dhandhuka, where wheat has been injured slightly by insects.
Kaira (Dec. 5th)	...	Winter crops and cotton thriving.
Surat ...	...	No change; fever prevails in Párdi taluka.
Broach ...	...	No change.
Khandesh and Násik.		
Khandesh ...	...	No rain; condition of people and state of *rabi* crops the same as before.
Násik ...	...	No change.
Konkan.		
Tanna ...	...	Reaping of *kharif* and sowing of *rabi* crops completed; 2 deaths from small-pox in Bhiwandi taluka.
Deccan.		
Poona (Dec. 5th)	...	No rain.
Ahmednagar ...	...	Condition of people and crops as before; no rain; cholera in 2 talukas, 26 cases, 19 deaths.
Sholapur	...	Condition of people as before; no rain; no crops; slight cholera in Sholapur and Bársi.
Satara (Dec. 5th)	...	Condition of people and of crops unchanged; 7 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	...	Condition of people and crops unchanged.
Dharwar ...	...	Condition of people unchanged; *kharif*, where there is any, being reaped; no rain; cholera less.
Kanara ...	...	Men and cattle emigrating for fodder and water to Kanara in large numbers.
Kaládgi (Dec. 4th)	...	Distress continues; slight cholera in Indi taluka.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Harvesting completed; crops good; cotton partially damaged by insects in some parts.
Wadhwán ...	...	Cattle disease continues in Jhinjhuwára taluka; weather, health, and crops good.
Baroda ...	...	Cotton crops continue healthy. *General Remarks.*—Small-pox and fever prevalent in Sind; crops there and in Guzerat good; no improvement in the Deccan or the Southern Mahratta country.
Bengal—		
Chittagong ...	*Nil*	Weather clear and cloudy in the beginning of the week, latterly seasonable; the prospects of the crops are gloomy in the parts affected by the cyclone; cholera continues to rage with virulence, specially in the affected tracts.
Noakholly ...	3·45	Weather stormy during the first three days of the week; since 27th November there has been a fall in the temperature, the early mornings and nights being cold; much of the late rice in the inundated tracts has been destroyed by the salt water inundation; it is difficult to gather in the ripe crops that are in the islands, on account of the apathy and despondency of the residents, and the fear of cholera keeping away the labourers, of whom many are dead, who ordinarily used to flock thither for the harvest; cholera is still prevalent in the station and in the inundated tracts.
Chittagong Hill Tracts...	2·75	Weather cloudy, with slight rain on the 24th, 25th, and 26th November; the last two days of the week were fine; mustard is being sown; cotton is being gathered in places where the plants are not totally destroyed by the late cyclone, and some injury has been done to it by the rain during the week.
Hill Tipperah ...	1·89	Weather rather warm for this season of the year; state and prospects of the crops are fair.
Backergunge ...	2·32	The weather has now ceased to have the cycloney appearance which was so marked till the end of the last week; the strong gale on the night of the 23rd November caused much anxiety lest a storm-wave should sweep over Dukhin Shabazpore and other parts of the district; luckily, however, there was no [illegible] of the storm-wave, but the violent wind has still further injured the crops, which were so seriously damaged by the cyclone and storm-wave on the night of the 31st October and the morning of the 1st November; the insect *chenna*, so destructive to the rice crop, is reported to have appeared in thana Motbaria; there has been, and is, a great *residuum* of distress and sickness in consequence of the late calamity; cholera and fever are present in thanas Backergunge, Jhalokati, Gournadi, Gulshakhali, Mirzagunge, Perozepore, and Dowlutkhan.
Furreedpore ...	...	Weather clear and cool, with northerly wind; the rainfall at Goalundo is ·14, and at Madareepore, on the 23rd, 24th, and 25th November, 2·18; state and prospects of the crops are good, except the damage from the late cyclone and from the rains in the last week; cholera and fever are prevalent at Madareepore.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Dacca ...	*Nil*	Weather seasonable; state and prospects of the crops are very favourable; cholera decreasing.
Mymensingh ...	0·33	Weather—rain on the 24th, 25th, and 26th November throughout the district, since then seasonable; the rice crop is unusually excellent, and the cold weather crops remain uninjured by the early rain; cholera is prevalent.
Tipperah ...	*Nil*	Weather wet in the beginning of the week, but latterly fine; the late rain has done some slight damage to the crops, otherwise their prospects are fair.
24-Pergunnahs ...	*Nil*	Weather cold; the *amun*, or late rice, is being harvested; cholera prevails more or less throughout the district.
Jessore ...	·12	Weather clear and cold, with north wind; state and prospects of the crops continue good and favourable; the recent rain has been on the whole beneficial to the *rabi* crops; cholera is still prevalent in many parts of the district and in the town of Jessore.
Nuddea ...	*Nil*	Weather cool, clear, and bright; prospects of the crops are very good throughout the district; cholera is still prevalent in the Chooadangah and Meherpore sub-divisions.
Moorshedabad ...	*Nil*	Weather clear and cold; the harvesting of the *amun* paddy continues, and a good out-turn is expected; other crops are doing well; the prices have slightly risen; cholera is still prevalent in Doonigram outpost, and in thanas Gorabazar, Soojagunge, and Manoollabazar.
Pubna ...	0·11	Weather cold, clear, and fine; state and prospects of the crops are good; cholera prevails throughout the district.
Rajshahye ...	Slight ...	There was slight rain on the 24th and 25th November throughout the district; the prospects of *dhan* are satisfactory; the Sub-Inspector of Buriganj reports that, on account of the damp and over-cast weather, the *kalai* crop has been slightly injured by the insects; mustard has also been slightly damaged in the Buriganj and Godagaree stations; cholera still continues to be reported from Bauleah, Nattore, Bagmara, Puthia, Bándáikhára, and Buriganj and cases of small-pox also are reported from Buriganj.
Bogra ...	0·89	Weather—the commencement of the week was wet and cloudy, with occasional wind, the latter part was cool, dry, and bright; the rice harvest has already commenced, and the outturn will far exceed that of any previous season in a long series of years; the mustard crop looks very promising; *kalai* and sugarcane seem to be doing well.
Maldah ...	*Nil*	Weather fair and cool, but extremely dewy nights; the prospects of the crops are good all round the district; *amun* and *hymunti* are being reaped in places with large outturn.
Dinagepore ...	...	Weather cool; ·05 of rain is registered at Roygunge; slight rain is also reported from Hemtabad in the west, Putnitola in the south, and Raneegunge in the east of the district.
Rungpore ...	*Nil*	Weather cool; the cutting of rice is proceeding; a bumper crop is expected in the north of the district, and the prospects are favourable everywhere.
Cooch Behar ...	*Nil*	Weather fine; not very cold as yet, but the mornings are foggy; the *áhan* crop is the best for some years; it is now being cut in places; tobacco has not done so well, but to the north-west of the State the Deputy Commissioner reports to have seen many fine crops; mustard seeds are forward in some places; fever is prevalent as usual at this time of the year.
Jalpáiguri ...	*Nil*	Weather fine; the harvest operations are going on most favourably.
Darjeeling ...	·55	Weather misty and bleak; the *hymunti*, or winter crop, is being gathered, and a full outturn is expected; the *til* and *kalai* crops have turned out well; the ground is being prepared for wheat and barley.
Midnapore ...	*Nil*	Weather cool and seasonable; state and prospects of the crops are good; rice is being cut.
Howrah ...	*Nil*	Weather bright and cold; the prospects of the crops continue to be excellent.
Hooghly ...	*Nil*	Weather unusually chill; damp and misty till 26th November; since then bright and cold; the *rabi* sowings are still going on in places; potatoes, peas, *mussari*, barley, wheat, and mustard have germinated; the *amun* rice is being reaped with prospect of very good outturn; the crop of Bombay potatoes is being gathered; there have been a few cases of cholera in the Municipality of Hooghly.
Burdwan ...	*Nil*	There was no rain in the district except in Cutwa, where ·05 fell; the reaping of the *amun* paddy has begun; the *rabi* crops are doing well.
Bankoora ...	*Nil*	Weather clear and cold; state and prospects of the crops continue favourable; the rice crop is being rapidly harvested.
Beerbhoom ...	*Nil*	Weather seasonable; nearly all the *aous* rice is cut, and the sowing of the cold weather crops is progressing.
Sonthal Pergunnahs ...	*Nil*	Weather getting very cold; everything is excellent; cattle disease is ceasing in Deoghur; cholera reported from Rajmehal.
Bhágalpur ...	*Nil*	All the crops are excellent; the highland *aghani* is being reaped, and the yield is above the average; general health is very good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Monghyr ...	*Nil* (previous week *nil*).	Weather fair; the Collector has been over the principal rice tracts of the district, and found the crops everywhere good.
Purneah ...	*Nil*	Weather very cold and clear; ·25 of rain fell at Kissengunge; the winter rice crop fully comes up to expectations; mustard is promising well, and sowings of the cold weather crops are in progress fever is very prevalent, and cholera has made its appearance in the Sudder and Amourkusba Police Stations.
Durbhanga ...	*Nil*	Weather clear and cold; the state and prospects of the crops are satisfactory.
Mozufferpore ...	Return not received.	Weather seasonable and good; prospects of the crops on all sides of the district are very good; the harvesting of *dhan* has commenced.
Sarun ...	*Nil*	Weather bright, clear, and cold; wind blowing from the west; the harvest of the *aghani* crop is going on, and the rabi crops are progressing very favourably in all parts of the district; general health is good.
Chumparun ...	*Nil*	Weather seasonable; the prospects of the crops are excellent.
Patna ...	*Nil*	Weather seasonable and cold; prospects of the *rabi* crops are favourable; health of the district is good.
Gya ...	*Nil*	Weather cool and fair; the maximum reading of the thermometer in the shade was 80·2; the *kharif* harvest is going on satisfactorily, and the prospects of the *rabi* crops continue favourable.
Shahabad ...	*Nil*	Weather seasonable; the *dhan* crop is being harvested, and the *rabi* crops are promising.
Hazáribágh ...	*Nil*	Weather seasonable; state and prospects of the crops continue very favourable.
Lohardugga ...	Traces of rain on the 26th November.	Weather cold again; the crops are reported to be splendid in all parts of the district.
Manbhoom ...	*Nil*	Weather seasonable; the harvesting of *dhan* is actually going on, and the prospects of the *rabi* crops are favourable.
Singbhoom ...	Return not received.	Weather seasonable; prospects of the crops are favourable; there is much less fever in the district.
Balasore ...	*Nil*	Weather fair and very cool; the harvesting of early rice continues satisfactorily, and the prospects of the late rice are excellent.
Cuttack ...	*Nil*	Weather cold and clear; the crops are progressing admirably, and promise a full harvest; public health is good.
Pooree ...	*Nil*	Whether fair; it was a little stormy on the 23rd November; the *laghu* crop is being reaped, the *sarud* crop has begun to ripen throughout the district, and is being harvested in some places; the prospects of the other crops are good; cholera is brought into the district by the pilgrims from the north-west, and some cases were reported from the mofussil. *General Remarks.*—Rain has fallen in most parts of Bengal, particularly in the eastern districts. In Backergunge there was another strong gale on the night of the 23rd November, causing injury to the crops, which were already damaged by the cyclone and storm-wave of the 31st October. The *amun*, or late rice, is being reaped, and its prospects are excellent, except where it has been affected by the cyclone. Nearly all the early rice in Orissa is cut, and the late rice has begun to ripen. The *rabi* crops are generally doing well.
N. W. Provinces—		
Benares (Dec. 6th)	...	Prospects continue favourable.
Allahabad „ 6th)	...	No change.
Agra „ 6th)	...	Nothing new to report.
Meerut, Bareilly „ 6th)	...	No change.
Almora „ 4th)	...	Weather fine; crop prospects good.
Jhansi „ 7th)	...	*Kharif* cut, except *jowar*; picking of cotton commenced; *rabi* prospects good; no other change.
Punjab— (Dec. 6th)		
Delhi ...	*Nil*	Health good.
Hissár ...	*Nil*	Fever and small-pox prevailing.
Umballa ...	*Nil*	Health good.
Jullundur ...	*Nil*	Health improving.
Lahore ...	*Nil*	Health fair.
Mooltan ...	*Nil*	Ditto.
Dera Ismail Khan ...	*Nil*	Health good.
Rawalpindi ...	*Nil*	Ditto.
Peshawar ...	*Nil*	Slight fever prevails.
		General Remarks.—Harvest prospects everywhere reported good; general health of province improving.
Oudh— (Dec. 6th)		
Lucknow ...	*Nil*	Prospects continue favourable; public health good.
Sitapur ...	*Nil*	
Fyzabad ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Upper Godávari (Dec. 2nd)	...	Weather clear and cool; *rabi* good, but rain wanted; health good; prices steady.
Sambalpur ...	...	Weather cool; rain would be advantageous for *rabi*; health good.
Biláspur ...	...	Weather cloudy; rice gathering; slight rain would be good for *rabi*; fever prevalent; prices steady.
Raipur ...	...	Rice harvest nearly completed; yield above average; prospects of *rabi* favourable; health good; prices stationary.
Bálághát (Dec. 2nd)	...	*Kharif* crops cutting; *rabi* good; fever prevalent; prices stationary.
Chánda („ 3rd)	...	Rice gathered; other crops doing well; few cases of cholera; prices rising.
Chhindwára ...	...	Prospects favourable; cholera continues; prices steady.
Betúl (Dec. 4th)	...	Prospects favourable; rain required for *rabi*; cholera abating; prices unchanged.
Bhandára („ 5th)	...	Rice gathering and winnowing; *jowar* excellent; *rabi* favourable; cholera and fever continue; prices easy.
Nágpur („ 6th)	...	*Jowar* cutting; cotton picking continues; health good; prices falling.
Wardha ...	...	Prospects of *rabi* good; cotton picking continues; cholera prevalent.
Hoshangabad ...	...	Prospects fair; prices unchanged.
Narsinghpur (Dec. 6th)	...	*Kharif* gathered; rain wanted for *rabi*; prices falling.
Jubbulpore ...	...	Weather clear and cool; *rabi* sowings completed; fever prevalent.
Saugor ...	...	*Rabi* thriving; health good; prices stationary.
Seoni ...	...	*Rabi* thriving; cholera continues; prices stationary.
Mandla ...	...	Prospects favourable.
Nimár ...	...	Weather cool; prospects of *rabi* good; smallpox continues; prices stationary.
		General Remarks.—Prospects continue fair, but rain wanted.
British Burma— (Dec. 7th)		
Arrakan Division ...	...	Public health good; early paddy crops being reaped.
Akyab ...	·40	
Pegu Division.		
Rangoon ...	...	Crops in good condition and approaching reaping, quite recovered by the late rains; slight cattle disease still in Myoungbin; public health good.
Thonkwa ...	...	Health and crops good.
Bassein ...	1·0	No cattle disease; health generally good; harvest prospects good.
Henzada ...	·70 in Myanoung for week ending 25th Nov.	Reaping steadily progressing; slight cattle disease in Mengye and Monio townships; public health excellent.
Prome ...	...	Two cases of cholera in Shwedoung, otherwise healthy; late sowings in Mahathaman and Poungday poor, remainder generally good.
Thayetmyo ...	...	Health good; reaping commenced.
Tenasserim Division.		
Amherst ...	·02	Public health and agricultural prospects good.
Assam—		
Gauháti (Dec. 7th)	*Nil*	Heavy fog in the mornings; days clear and cool; *sali dhán* is being reaped; tea season closed; prospects of all crops favourable; public health good.
Sylhet („ 7th)	*Nil*	Crops good; reaping going on; weather cool and fine.
Mysore and Coorg— (Dec. 7th)		
Bangalore ...	·09 in cantonment	Condition of province unimproved since last report; public health generally good.
Coorg ...	*Nil*	
Hyderabad Assigned Districts—(Dec. 7th)	...	*Kharif* harvesting continues; *rabi* in portions of province gloomy, in others fair; cholera decreasing.
Central India— (Dec. 6th)		
Indore ...	...	Health and prospects favourable throughout Central India.
Gwalior ...	...	
Neemuch ...	...	
Ratlam ...	...	
Sutna ...	...	
Rajputana—		
Ajmere (Dec. 7th)	*Nil*	All prospects good.
Jeypore („ 7th)	...	Agricultural prospects continue favourable; health good.
Ulwur („ 6th)	...	Prospects favourable.
Deoli („ 2nd)	*Nil*	Health and prospects good.
Jhallawar („ 2nd)	...	No change.
Nepal (Nov. 29th)	*Nil*	The outturn of the hill crops is about ¼th below the average.

T. C. HOPE,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 29th November 1876.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K.C.B., Senior Member of the Council of the Governor General of India, *presiding*.
The Hon'ble Arthur Hobhouse, Q.C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
The Hon'ble R. A. Dalyell.
The Hon'ble T. C. Hope.
The Hon'ble D. Cowie.
The Hon'ble Rájá Narendra Krishna Bahádur.
The Hon'ble F. R. Cockerell.

OPIUM BILL.

The Hon'ble MR. HOPE moved that the Reports of the Select Committee on the Bill to amend the law relating to Opium be taken into consideration. He said that he very much regretted that his hon'ble friend, Sir William Muir, should have been unable to carry through the Council this Bill, to which he attached considerable importance, and in which he took great interest, and that it should have devolved on him (MR. HOPE) at what was almost later than the eleventh hour. He was, however, in a position to state that Sir William Muir approved of the Bill as it now stood in every respect, and had left on record, for MR. HOPE's use if necessary, his special approval of one or two provisions in it which had been more or less the subject of dispute, and especially of those in reference to warehouses, to which MR. HOPE would refer presently.

The report of the Select Committee only mentioned three or four amendments which had been made in the Bill since the previous Report of the Committee had been laid before the Council, and those were not of a very important character. In explanation of the amendment which was noticed in the second paragraph of the Report, that the definition of "Magistrate" had been extended so as to allow Magistrates of the second class, when specially empowered by the Local Government, to try cases under the Act, he would say that that had not been done with the view of indicating an opinion that Magistrates of the second class, generally, ought to decide opium cases, but merely to meet special cases, such as that of some large districts in British Burma, which contained about 15,000 square miles, and which had Magistrates of the first class scattered over them at very long distances, so that the restrictions which were considered generally suitable in other parts of India would, in the places referred to, have an oppressive effect, and would involve people being sometimes taken enormous distances in petty cases. One of the other amendments which had been made was in favour of the merchants, for the Committee had given power to redeem confiscated opium on the payment of a suitable fine, instead of providing that the owner should be deprived of his goods in every case. On the other hand, the Committee had secured the confiscation of the opium where the person charged with smuggling it might not happen to be convicted.

There were, however, certain objections made from without, which, as Sir William Muir was not here, MR. HOPE would refer to in rather more detail. They related to the seventh section of the Bill, on the subject of warehousing. The effect of that section was to give power to the Local Government, with the sanction of the Governor General in Council, to authorize the establishment of warehouses for the warehousing of opium, either before or

after payment of duty. The question, he might say, in one sense, was an executive one, which, in the first instance, had been decided by the Government of India; but as their decision would not preclude the Legislative Council, as such, from doing their duty by going into it, and from expressing their opinion if it happened to be unfavourable, the subject was still one for consideration on the present occasion. These objections arose from Messrs. Sassoon & Co., of Bombay, who were owners of large Docks, from the Bombay Chamber of Commerce, and from certain merchants interested in the opium-trade. He ventured to think that his Bombay friends, in raising these objections, were suffering under several misconceptions.

In the first place, they were under a misconception which, perhaps, all Bombay people were liable to fall into, and that was, they were liable to forget that Bombay was not the whole of India. A measure of this kind, which was intended to secure the opium-revenue throughout India, must necessarily contain provisions which were suited to the different circumstances of that revenue in all the different provinces. And, when it was borne in mind that in some cases opium which was grown in foreign States—as, for instance, Rájputána—had to pass through the Central Provinces, which were British territory, then through the Bírárs, which were under the Resident at Haidarábád, after that, across the Nizám's dominions, and finally through a long stretch of the Madras Presidency, before reaching the coast and being shipped to China; or, again, that opium which was grown under a free license-system in the Panjáb, had to traverse Sindh before being exported at Karáchi; or that opium grown under the monopoly-system in Bengal might be smuggled through foreign territories into other parts of British India, where a different system prevailed,—when, MR. HOPE said, they bore in mind all these different peculiarities, it would be seen that it must be necessary to insert in a Bill of this description provisions which, although they might be required in one part of India, there need be no present intention of applying to another. In that view, the operation of this section had been made purely permissive.

There was also another misconception, which had already officially been corrected by the Government of India, but had not been swept away from the minds of the Bombay objectors, that the revenue which it was desired to protect was merely a China revenue; whereas, in reality, it was mainly a revenue from home-consumption. It would not be desirable, or proper, that he should enter in this place into an explanation of all the various methods in which the revenue from internal consumption might be injured under the present system, or that he should lay before the Council all the different and most ingenious frauds which were at present practised. He ventured to say that the objectors were, some of them, quite as well versed in those methods as himself, or rather, that they were probably much better acquainted with them. But he would mention one fact as a proof that a necessity did exist for some remedial measures; that in the island of Bombay itself, the sum which was paid by licensees for the privilege of selling opium, which they were bound to obtain from the Government stores, together with their expenses, very largely exceeded the entire value of the opium which they took out of the Government stores to sell; so that they would obviously be in a state of bankruptcy, if it were not for the peculiar shifts they had for carrying on the trade, and making a handsome profit. Further, this revenue from home-consumption was not by any means small, as was alleged, but was a large item even now, and might be much larger, if better means were taken to protect it.

Another of the objections taken was that these warehouses would be obstructive to trade. It was said that it would be impossible to carry on business if the opium was kept in a warehouse which was opened at 10 o'clock in the morning and closed at 5; and that, "as things go now, the merchants work in their own godowns from 6 A. M. to 10 P. M., including Sundays, before the China Mail starts, as the purchases are then compressed into the three or four days preceding the departure of the Mail." He need hardly say that the Select Committee had not provided in the Bill that the officer of any Government warehouse, who ventured to keep open his warehouse after 5 o'clock P. M. and opened it before 10 o'clock A. M.

should be subject to six months' imprisonment and a fine of one thousand rupees. It was obvious that the Government and the Custom-house authorities would make whatever regulations might be necessary for the proper and convenient working of warehouses. It was also said that it would be impossible in Government warehouses to secure the secrecy which it was necessary to observe in the sorting, mixing, dealing in, and re-packing of the different kinds of opium. For himself, he could not understand how any secrecy as to what was legitimate was likely to be interfered with in the Government warehouses. It might be possible that there might be some operations which it was more advantageous to the merchant, than to the Government revenue, to carry on with secrecy; but with regard to such, he could not express any sympathy with the difficulties that might be felt. Otherwise, it was hard to see how the warehousing of opium could be, in any measure, an obstruction to the legitimate manipulation of the article, any more than in the case of spirits and wine in the London docks, where it was well known that every kind of admixture of wines, and selling and tasting went on every day without any injury or complaint.

Besides this, there was what he might term a personal and local aspect of these objections. It was stated that "Messrs. Sassoon, being the largest exporters of opium, are naturally anxious to prevent such a Bill as this from passing, as the concession to export opium from their dock, which has been recently granted them after a long struggle with the Government, will be at once cancelled if the Opium Act should be permitted to apply to Bombay." And, again, "the fact is that the opium must, under the new arrangement, be deposited in the warehouses of the Port Trust, and rent charged for the storing of it; in other words, a new source of income to the Port Trust will be created." Now here MR. HOPE ventured to think that his friends in Bombay had got hold of a mare's nest. It ought not to be necessary to assure them that there was really no snake lurking in the grassy pastures of the Government of India; and they had undoubtedly, to quote a phrase which, from its associations, ought to have a soothing effect upon their protestant feelings, "got the *wrong* sow by the ear." The Government of India, which had recently, in fairness to Messrs. Sassoon & Co., required the abandonment of Port Trust revenue which amounted to some Rs. 40,000 a year and was likely to increase, really did not deserve to be viewed with such suspicion. Besides, it might occur to many, and to Messrs. Sassoon especially, firstly, that there was nothing in the Act to prevent more than one warehouse being established at any place, and, secondly, that, if only one warehouse was to be established, it was in the highest degree probable that it would be located where the largest amount of opium was shipped, which in Bombay was, according to Messrs. Sassoon, their own dock.

Again, objections were made on the general ground that the Government should not interfere with any article when the duty had once been paid upon it, and that "every ounce of the opium warehoused in Bombay has already paid duty in Malwa, and so it is difficult to see how the revenue can possibly suffer." In another place, it was said that the Chamber of Commerce is justified in protesting against "the principle the Act would establish, that the Government have a right to interfere with the disposal of merchandise after the duty on it has been paid. The novelty of the principle sought to be established is too injurious to trade to be permitted to pass without every effort being used to upset it altogether; but when it is put forward in support of such a concern as the Bombay Port Trust, it is scarcely possible to discuss the subject with ordinary calmness." Now, with reference to that it might be said, in the first place, that the Government was perfectly justified in taking whatever measures might be necessary for the protection of its revenue; and the question of what particular stage of the transit of the article the duty might happen to be levied at, was quite irrelevant to the main question. But besides that, he would point out that the duty which was levied upon opium was a duty expressly levied upon opium intended for China, and not for consumption in the country. Therefore, if the duty was levied upon the express understanding that the opium was going to China, and at a rate based on that understanding, the Government was perfectly justified in taking measures to see that the opium *did* go to China, instead of being diverted to home-consumption in parts of

India where, as in Bombay, it would naturally need, and be subject to, a different course of restriction. He thought he might very well dismiss this matter by reading the answer which had been given by the Government to the memorialists on this occasion. It had been said by the Government of India in the Financial Department, in reply to the Chamber of Commerce—

"I am directed to state that the Hon'ble the President in Council regrets that he is unable to modify the decision conveyed in my letter No. 3052, dated 26th September last, and to say that the establishment of Government warehouses for opium is intended principally for the protection of the revenue from the home-consumption of opium. I am also to request that you will remind the Chamber again that the proposed legislation is only permissive, and is not designed to apply to Bombay in particular. It will not be applied to Bombay as long as other measures are found sufficient. Warehouses may be established in any part of India in which they may appear necessary, but only with the sanction of the Government of India.

"With regard to the alternative proposals of the Chamber, I am desired to say that the Hon'ble the President in Council is unable to approve the suggestion that the provisions relating to Government warehouses shall be applicable only to opium on which duty has not been paid, and that all warehouses now and previously used, and proved to be suitable for the opium trade, shall be entitled to be licensed.

"Nor can it be stated in the Act that the 'fees for warehousing' shall not exceed the cost of warehousing the drug at present; but I am to explain that it is not intended that the Government should derive a profit from the rent of the opium warehouses.

"As regards the two remaining proposals, I am to say that every facility will be afforded for the conduct of business in the Government warehouses, which is afforded in other bonded warehouses, or which the peculiarities of the trade may be shown to require."

That reply, MR. HOPE ventured to think, was as complete as it was possible to supply, and ought to be satisfactory to those who felt reasonable doubts about the measure.

With regard to the Bill in general, he need not trouble the Council with any more remarks, except that he himself personally had some doubt as to whether the provisions of section 15, with regard to the arrest of persons who were suspected of offences, would prove sufficient, and that he should have preferred a rather more stringent provision, similar to that in the Bombay Salt Act and the Inland Customs Act also. However, he hoped that the present section, which the Committee thought would be sufficient for the purpose, might be found on trial to verify the view which they had taken.

The Hon'ble MR. DALYELL said that he must express his regret that, owing to his absence from the Council for the last eighteen months, he had been unable to take any part in the discussions on this Bill. He felt this the more as he found, on reference to the papers which had been printed in connection with the Bill, that one of the main objects of the measure, as it had been originally introduced, was to remedy the absence of all repressive legislation with regard to opium in the Madras Presidency—a state of affairs which had been said to lead to practices equally injurious both to the public revenue, and to public morality and health. He was aware that, for many years past, all the best authorities on revenue matters in the Presidency had been of opinion that the consumption of drugs in Madras was so very insignificant that any legislation on the subject was altogether unnecessary, if not mischievous, as being likely to lead to oppression; but of late it had been found that the consumption of intoxicating drugs had increased, and that the extension of trade, and the increased facilities for transport afforded by the construction of railways, had led to a considerable quantity of opium passing into Madras from Northern India, either for local consumption, or for the purpose of being exported without the payment of duty. It was also within his own knowledge that within the past few years there had been several cases of attempts to defraud the opium-revenue detected by the Customs Authorities at Madras, and also that a very much larger number of cases had escaped their vigilance, owing to their being compelled to proceed under the ordinary Customs law, instead of being able to put into force the powers of the Opium laws which were in force in other parts of India. Indeed, he believed it had been stated that, if the quantity of opium which yearly passed into the Madras Presidency were diverted to the China trade, it would pay a duty of upwards of six and a half lákhs of rupees. He could very well believe that a very considerable portion of this quantity was being surreptitiously exported by sea, and thus did

actually entail a direct loss to the imperial revenue from opium. Under these circumstances it was quite clear that legislation of some sort was necessary; and the Madras Government was so sensible of this necessity, that some time back they had brought into the local Council a Bill for the purpose of controlling the possession and exportation of opium. But no doubt it was always desirable that fiscal legislation should, as far as possible, be of an imperial character; and therefore the Bill now before this Council would probably be preferable to a local enactment, provided that it met local needs.

So far as he had been able to judge of the probable results of the different provisions of the Bill now under consideration, he was disposed to think that it was likely to meet the requirements of the case as to most matters; but he must confess that there was one section in regard to which he had some considerable doubts. He alluded to the tenth section of the Bill; and it would perhaps be as well that he should explain to the Council how his attention had been drawn to the provisions of that section. When he had received the final copy of the Bill, as approved by the Select Committee, a few days ago, it had come to his recollection that Mr. Hunter-Blair, the Collector of Customs at Madras, the only official who had had an opportunity of becoming practically acquainted with the difficulties connected with the detection and suppression of opium frauds in the present state of the law, had recently returned from leave; and MR. DALYELL had thought it advisable to enquire from him by telegraph whether the Bill met the wants of his Department. In reply, he had informed MR. DALYELL, that in his opinion the penalties prescribed by section 10 of the Bill would altogether fail to prevent opium smuggling on the Madras coast, as, in consequence of the high rate of duty charged on the drug, opium smugglers made such large profits that they would be able to laugh at a fine of Rs. 1,000, and as it would always be difficult to induce the Magistrates to punish the principals with imprisonment, though they might be inclined to imprison the persons who were actually engaged in illicit exportation.

The Council would see that the penalties prescribed were, first, imprisonment for a term not exceeding one year, or a fine which might extend to Rs. 1,000, or both. Well, with reference to Mr. Hunter-Blair's opinion, that these penalties might prove inadequate for the purposes of the Bill, MR. DALYELL noticed that it was proposed, under the Bill, to replace all the penal clauses of the existing Bombay law, of the law in Lower Bengal, of the North-Western Provinces, and of the Panjáb by the penal sections of this Bill. If the Council would turn to the schedule attached to the Bill, they would see that it was proposed that the provisions of Acts XI of 1849 and XXI of 1856, so far as they related to opium, were to be repealed. These two enactments referred, one to the town of Calcutta, and the other to the up-country districts of Lower Bengal; and the penalties prescribed in both of them for the illicit possession of opium were proportioned to the quantity of opium in possession, and were therefore considerably more stringent than the pecuniary penalty provided in the present Bill. It was also provided that the sections in the recently enacted Excise Law of 1871, which referred to opium, should be repealed, and the penalties prescribed in that Act were precisely similar to those of the Bengal Acts. Further, as the Bill provided a special punishment for the exportation of opium in contravention of the rules prescribed, the general Customs law, under which any person convicted of smuggling was liable to a penalty equal to three times the value of the opium smuggled, would no longer apply; so that, while the smuggler of any other commodity, if the goods were worth, say, Rs. 2,000, would be liable to be mulcted in the sum of Rs. 6,000, the smuggler of opium of that value would only be liable to a fine of Rs. 1,000, as the pecuniary penalty of his fraud on the revenue. It was true that the Bill as it had originally stood, and as approved by the Financial Department, contained no provision of the kind he desired to see in the present Bill; and it might therefore be fairly concluded that the Financial Department was satisfied that the stringency of the Customs law, so far as opium was concerned, might be somewhat relaxed. He had, moreover, been informed by his hon'ble friend Mr. Hope, that the matter had been fully considered by the Select Committee, and that they were of opinion that the pro-

vision giving the Magistrate the option of awarding imprisonment as an alternative punishment, or in addition to the fine, counterbalanced the reduction of the pecuniary penalty; yet MR. DALYELL confessed that he had some doubts as to whether it would be found possible to induce Magistrates to award imprisonment for offences against a fiscal law, especially when they had the option of imposing so large a fine as Rs. 1,000 for each offence.

He must not allow it to be supposed that he wished to throw any difficulty in the way of the passing of the Bill. He had been informed that there were urgent reasons why no avoidable delay should take place in the passing of it into law; and if the Council was not prepared, at this stage of the Bill, to alter the provisions relating to pecuniary penalties—that was to say, to give the Magistrates power to impose a fine with reference to the quantity of opium smuggled; and he believed it was quite within the power of the Council to adopt that course when the report of the Select Committee was under consideration—he should not press any objection to the passing of the Bill, especially as any enactment of the kind would be a considerable improvement on the present state of matters in the Madras Presidency. Moreover, as the Customs Act was under revision, the opportunity might be taken of re-enacting the penal clauses with regard to the exportation of opium, if penalties provided in the present Bill were found, on trial, not to have the desired effect.

He trusted that the remarks which he had felt called upon to make would not induce the Council to believe that he was in favour of making the fiscal laws of the Empire more stringent than was absolutely necessary for duly collecting, and properly protecting, the State revenue. He held no such view; but he had felt that, as an official who for a very long series of years had been connected with the revenue administration of the country, he should fail in his duty if he did not let the Council know that, in his humble judgment, there would be some risk in reducing even the pecuniary penalty for the offence of smuggling opium below the same penalty for smuggling any other article of merchandise, especially when it was remembered that, owing to the very high duty placed upon the drug, and to its very portable character, it offered special inducements to the smuggler, and afforded him peculiar facilities for carrying on his operations.

The Hon'ble MR. HOBHOUSE wished to make one or two remarks respecting the penalties which were imposed by the Bill before the Council. He laboured under a little disadvantage because so many extraneous noises found their way into that room—human voices, rumblings of wheels, and some mysterious squeaking, which, he hoped, proceeded from an inanimate object—that he had lost some of his Hon'ble friends' remarks. He thought however that he had heard enough to enable him to say something to the point.

With regard to section 10, which was observed upon by his hon'ble friend Mr. Dalyell, he wished to say that it had been in the form in which it now stood ever since the Bill was introduced into the Council by Sir William Muir, and it was settled by him deliberately in that form. The adverse opinion which had been received now had arrived very late. After so many months of publication and discussion, it would be inconvenient, to say the least of it, if at the last moment an opinion was sent up, and the Council was expected to give the same attention to it, as if it were sent in to the Select Committee months before. In point of fact however the matter was brought before the Select Committee, and the decision of the Committee was to abide by the plan devised by Sir William Muir, and principally upon the grounds stated by his friend, Mr. Dalyell.

Now he (MR. HOBHOUSE) confessed that there was a great deal of force in what his hon'ble friend said, and his contention was illustrated by a case which had recently happened in Madras. The case was of this kind. A merchant residing in Ceylon had a warehouse and an agency in Madras. He was convicted of smuggling opium, that is to say, the Customs officer thought it was proved against him; and for the purpose of testing the law, we must assume that it was proved against him. His offence was that he used his agency in Madras as a base upon which to carry on smuggling operations from India into Ceylon. The nature of the operations was supposed to be this. A ship sailed

from Madras, and some distance out at sea boats came off to it with opium in them. The opium was taken on board, and was carried on to Ceylon. Now there were some general powers given by the Customs Act to Customs officers to inflict fines upon all persons contravening the law; and the Madras officer considered that, under these general powers, he could inflict a fine upon this gentleman in Ceylon, and he did inflict a fine, and proceeded to realize the fine against the property which was in Madras. However, the Madras Court thought that the Madras officer had no jurisdiction to inflict the fine, and they even thought that it was so absurd to suppose that he had such a jurisdiction, that he could not have made the order in good faith, and they awarded large damages against him for malicious and wrongful proceedings against the property of the gentleman in Ceylon.

It seemed to MR. HOBHOUSE that this ought to be remedied; that it was a monstrous thing that a person residing in a neighbouring country should use our country as his base of smuggling operations; and that we should not be able to attach his property for the recovery of a fine imposed on him. If there was no law for fining a man guilty of such an offence, and for attaching his property within our jurisdiction, there ought to be such a law; and as the penalty of imprisonment would have no terrors to a man residing in Ceylon, it might be necessary in such cases to inflict a large penalty, and to make the penalty recoverable against goods of his in this country.

Now it so happened that the Council were revising the Customs Act. It was the Customs Act under which the Madras case and the legal difficulty arose. The Customs Act had a wider range than the opium law, and we should have to consider that question in connection with the Customs Act. It seemed to him the wiser plan to let the present Bill pass into law, and to reconsider the whole question when the Customs Act was in the hands of the Committee, and when it came again before the Council. More advice might be taken upon the subject. At present nobody seemed to have been dissatisfied with the alteration of the law proposed by Sir William Muir until now; but no doubt a different turn was given to the question by what had happened. It would however be easy, if it was found desirable, to inflict a larger penalty under the Customs Act than what was provided in this Bill, and it would be easy to say in the Customs Act that that provision should apply to opium.

With regard to section 15, Mr. Hope said that he was dissatisfied that power was not given to the Police to arrest persons suspected of committing offences against the law. The broad issue before the Committee was this. Should they give power to the Police to arrest any person they had reason to believe guilty of any offence against this particular law or any other opium law, or should they confine their power of arrest to those cases in which there was a *primâ facie* case against a man because of his being in possession of opium? The Committee thought it was too large a power to give the Police, to say that they might arrest any man at any time wherever he might be found, and whatever he might be doing, because they suspected him to be guilty of an offence against the opium law at any other time and any other place. It was, in other words, to give almost unrestrained powers of arrest to the Police. The Committee thought it wiser and more prudent to confine the discretionary power of the Police to detention for the sole purpose of search, and if they found their man in possession of opium, they might then arrest him.

There was only one other point he wished to mention, and that related to the abetment of offences. The Bill said nothing about abetment, and it had been the subject of some observations; in fact, one Magistrate had written to say that, in his part of the country, smuggling really proceeded from substantial and responsible persons, but that those who acted directly in the smuggling were men of straw, whom it was hardly worth while to punish, and who certainly could not pay a fine; and he asked why we did not make abetment an offence. The reason was that it was already a punishable offence under the general law. It was quite true that under the Penal Code of 1860 abetment was not punishable when the principal offence was committed under a special or local law; but that was amended many years ago—in 1870, if he recollected rightly—and now abetment was an offence, although the principal offence might be

committed under a special or local law. If therefore any Magistrate felt a difficulty about punishing those who instigated or abetted smuggling, he would find his difficulty removed by referring to Act XXVII of 1870.

The Hon'ble MR. HOPE had only a very few words to trouble the Council with, in reply to the observations which had been made upon the Bill. He had heard with great satisfaction the remarks of his hon'ble friend Mr. Dalyell, who belonged to the Madras Presidency, admitting that the amount of smuggling which took place there was very large, because the period was not at all remote when the Madras Government itself expressed a totally different opinion, and it had for a long series of years stated that there was no necessity whatever for any legislation on the subject.

With reference to the point regarding penalties, to which exception had been taken, he might explain that, under the old law, in Bombay or in other parts of India, there was no imprisonment for the offence of smuggling opium; but, on the other hand, there was a fixed fine, which the Magistrate had not power to modify. In Bombay, if the offender was convicted, the Magistrate was obliged to fine to the extent of twice the amount of the duty, *plus* twice the value of the opium; and the law elsewhere was analogous. Representations were received from various parts of India—from Burma, Bombay and elsewhere—that this provision was totally insufficient, and that it was absolutely necessary that the Magistrates should possess the power of imprisonment, in order that they might inflict punishment upon the higher persons who usually kept in the background as abettors, although, in reality, they were principals, and were the merchants who benefited by the trade. The Bill which was brought forward by Sir William Muir combined both methods, and here MR. HOPE must point out a slight inaccuracy into which both his hon'ble friends had unwittingly fallen. The Bill as introduced *did* contain, in section 6, in addition to the fine of Rs. 1,000 and imprisonment for six months, a clause to this effect: "Provided that, if the opium in respect of which such offence is committed exceeds the weight of twenty sers, the fine may be increased at a rate not exceeding fifty rupees the ser for all the opium so found in excess." So that, had that clause remained in the Bill (and it was a clause which the Council received from the Financial Department), the objection of the Hon'ble Mr. Dalyell would no doubt not have been made. But this clause had been fully considered in Committee at one of the earliest meetings which took place, and after full discussion it had been struck out of the Bill for the very reason which the Hon'ble Member brought forward as a good one for keeping it in. The argument which was then used was this, that if it was difficult to induce the Magistrates to punish principals with imprisonment (and this the Hon'ble Member said it was), it would be more difficult to induce them to punish principals with imprisonment if there was the alternative of a very high fine, and it would be next to impossible to get them so to punish if that high fine were compulsory. That that clause was struck out, he himself had at the time regretted. But he had since considered the matter, and he had come over to the views of his colleagues who advocated the striking out, because there seemed to him to be very great force in the argument he had stated.

As to the contrast which had been drawn between the Customs law and the Opium law, it was true that there was a heavier pecuniary penalty under the Customs law, than there would be under the new Opium law; but, on the other hand, there was no imprisonment under the former, but there was under the latter. If we were to believe all that the local officers reported on the subject, people were likely to care more for imprisonment than they at present cared for the infliction of a heavy fine; so that, in point of fact, it would appear that, so far from the punishment, as a whole, which could be awarded, being reduced, it had been very materially enhanced. All that we could do was to trust to the Magistrates to do their duty. If the Government found that the Magistrates generally would not punish the principals in these cases, the only course open to them was the simple one, which they were obliged to pursue in ordinary cases, namely, that of, in the first place, cautioning the Magistrates, and then, if necessary, removing them from their appointments, and he knew one instance in which an official so high as a District Judge had

been removed from his appointment for not having adequately dealt with a particular case. As to the powers of the Police, he need not say more than that the matter would be tested by experience. But he was not able to see why, if the powers he recommended were not too large in the case of the smuggling of salt and sugar, they should be considered too large in cases under this Bill. Opium was much more easily smuggled than the one or the other, and likewise was of very much more value.

The Motion was put and agreed to.

The Hon'ble MR. HOPE then moved that the Bill as amended be passed.

The Hon'ble SIR ALEXANDER ARBUTHNOT wished, before the question was put, to say one or two words by way of supplement to the observations which had been made by his hon'ble friend Mr. Hope with reference to the tenth section of the Bill. It seemed to him that there was one point which had not been adverted to, but which ought to be borne in mind; that in all these matters the legislature was bound to assume that the Magistrates—especially the Magistrates who were likely to sit on the Bench in the Presidency Towns, the places where such offences were most liable to be committed—were men who, the Council were bound to assume, would exercise a reasonable discretion, and that, in regard to cases where a large quantity of opium had been smuggled or attempted to be smuggled, and where the fine that might be imposed under this section would obviously be insufficient as a punishment to the most guilty party, they were bound to assume that, where the legislature had given the option of adjudging a description of punishment which would be perfectly adequate, and which would be felt to be a very severe penalty, the Magistrate would exercise a reasonable discretion and would impose a sufficient and not an insufficient penalty.

The Motion was put and agreed to.

BURMA FOREST BILL.

The Hon'ble MR. HOPE also moved for leave to introduce a Bill to consolidate and amend the law relating to the management and preservation of Government forests in the province of British Burma. In doing so, he wished to explain very briefly the necessity for making this motion. He might premise that the province of Burma was, as compared with other parts of India, in a peculiar position, and that the whole of the specifically unalienated forest-land was the property of Government, subject only to certain rights of user, or privileges, exercised in some parts by individuals or village-communities. This right had been proclaimed at the time of the annexation of the various territories which now formed the Province of British Burma, and had never been gainsaid. The history of the previous legislation in regard to the forest-lands was this: In 1865, when the general Government Forest Act was passed, certain rules were made under it for Burma, which did not apply to the whole of the forests there, and it was eventually found that in part they were not covered by the Act itself. It therefore became necessary to pass an Act in 1869 to validate them. Subsequently, Act XIII of 1873 was passed to amend the law relating to timber floated and imported from foreign territory into British Burma, and that Act repealed Act VII of 1869, and partly also Act XXX of 1854. Later on, in 1874, the duty on foreign timber was made *ad valorem*, and finally, in 1875, further rules were made, under the Act of 1865, for the forests which had not been included in the old rules.

However, the whole had been at best but a piecemeal process, and legislation was still required upon five principal points, besides a number of small ones. First, it was necessary to clear up doubts regarding the reservation of trees other than teak. The system of recovering a part of the price of Government timber in the form of a duty also had to be provided for. But perhaps the most important subject for which legal provisions were found necessary, was the enquiry into, and decision of, claims of persons to the various rights of servitude and user in the Government forests. It was likewise essential to bar the acquisition by prescription of new rights in reserved forests; otherwise, a man who had, unknown to the authorities, been doing a particular thing for a number of

years, would become vested with a right which might be injurious to the revenue. Finally, the penalties provided by the present law were found to be totally insufficient.

The Motion was put and agreed to.

DRAMATIC PERFORMANCES BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill for the better control of dramatic performances.

INDIAN REGISTRATION ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE asked leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the Indian Registration Act, 1871.

Leave was granted.

TREASURE-TROVE BILL.

The Hon'ble MR. BAYLEY introduced the Bill to amend the law relating to Treasure-trove, and moved that it be referred to a Select Committee with instructions to report in two months. When he obtained leave to introduce the Bill he said that it would possibly be necessary for him to detain the Council on the present occasion for some time to explain the nature of the existing law, the policy which regulated it, and the reasons for which it was proposed to substitute another, and he hoped a better, policy. He would therefore take the opportunity of giving an explanation on these points. He was afraid, however, he must go back somewhat to first principles, and to enable him to do so briefly, he should ask leave to read a few extracts from a well-known book, the Commentaries of the learned American Jurist Kent, which would enable him to place the matter in a clear light before the Council.

All systems of law recognized the means of acquiring personal property by what was called "occupancy," that was to say, by simply taking possession. Kent said that—

"though priority of occupancy was the foundation of the right of property in the primitive ages, and though some of the ancient institutions contemplated the right of occupancy as standing on broad ground, yet in the progress of society this original right was made to yield to the stronger claims of order and tranquillity. Title by occupancy is become almost extinct under civilized Governments, and it is permitted to exist only in those few special cases in which it may be consistent with the public welfare."

It was the case still, no doubt, that if a person, on ground to which nobody had a claim, found any article for the first time which had never before been the property of any other human being, he was at liberty to convert it to his own use, and as there could not in such a case be any rights adverse to his, the property vested in him. But as a matter of fact, there were very few places and very few instances where other rights had not been, during the progress of civilization, created and defined by special provisions of law. Although, therefore, it might be said that, if a man found an article to which nobody else had or ever had had any claim, it was his and he might do with it what he liked, yet such instances were extremely rare. What was far more usual was, that a person found something which had become in some way or other the subject of property previously; that was to say, that some one else had in some way acquired some sort of right to it.

Now the subject of this Bill, which was technically called "Treasure-trove," belonged to the latter class. One of the old Regulations, to which MR. BAYLEY alluded last time as still in force in certain parts of India, described it as "hidden treasure, consisting of gold or silver coin, or bullion, or of precious stones or other valuable property, which may be found buried in the earth, or otherwise concealed within any part of the territory subject to this presidency," &c. That was to say, it was valuable property in which some one else had, at some time or other, acquired already some sort of right. All systems of municipal law did, it might be said, at least in theory, provide for the perpetual devolution in some way or other of rights of property once acquired, and the rights of the owner in such property were in almost every conceivable case fenced round with penalties. Any person, therefore, who either dishonestly

or ignorantly neglected, as not unfrequently happened, the distinction between the two kinds of finding—between the finding, that is, of articles which never had been, and of those which already had been, the subject of property—was apt to find himself in very awkward contact with the provisions of the criminal law.

Of course, under these circumstances the first object of any law on the subject of treasure-trove must be to provide for tracing out the history of previous rights, and such a provision would accordingly be found in the present Bill. But there was considerable difference in the circumstances of various cases; for, although in theory such rights of property might be supposed always to exist, even if temporarily in abeyance, in the articles which formed treasure-trove, yet in a very large number of cases it was practically impossible, either to discover who the previous owner of the property had been, or on whom in the course of years the right of property which primarily existed in such articles had devolved.

Of course, these rights might sometimes be proved, and very extraordinary instances had occurred of such rights being capable of substantiation after very long periods of time. MR. BAYLEY could recollect a case himself in which a gentleman, who was then a midshipman in the Navy, lost certain particular property in the wreck of the *Royal George*, and who was able to recognize and to recover it fifty years later; and there were no doubt instances in which the persons originally owning property, or their representatives, had been able to establish distinctly their right to it, though it had passed out of their actual possession for a much longer time than fifty years. But, on the other hand, there were other cases in which it was practically impossible to trace the original owner or his representatives. Three cases came the other day to his (MR. BAYLEY'S) knowledge in which it was morally certain that the property (in one instance of considerable value) had passed from the rightful owner's possession at least eighteen hundred years ago. Under such circumstances it was of course useless to attempt to trace original rights of property. The Bill therefore, while prescribing a procedure for discovering, where possible, the original owners of treasure-trove, or their representatives, proposed to confine it to property of which there was not good presumptive evidence, either in the nature of the property itself or otherwise, that it had been concealed or lost for more than a hundred years. The term of a hundred years was no doubt a purely arbitrary limit, and might be considered in Committee; but he imagined that, as a matter of fact, there were very few cases of property in which it would be possible in India to make any successful investigation, or to gain any trustworthy information as to the original owners or their existing representatives, where it had been lost or concealed for more than a hundred years. Of course, if any persons could substantiate their right to property, the law would restore it to them. But it might be said that any such rights with regard to treasure-trove could only in occasional instances be established, and practically the cases for which the proposed law had mainly to provide were those in which all trace of the original owners was lost, or in which it was impossible to trace their representatives, and the task which the Council had before them was to regulate the devolution of the right of property in such cases.

He would now again, with the permission of the Council, refer to *Kent's Commentaries*, and would read a passage in which the author described the policy which had ruled various systems of law on the subject of treasure-trove.

Mr. Kent said—

"The common law, originally, according to Lord Coke, left treasure-trove to the person who deposited it, or, upon his omission to claim it, to the finder. The idea of deriving any revenue from such a source has become wholly delusive and idle. Such treasures, according to Grotius, naturally belong to the finder; but the laws and jurisprudence of the Middle Ages ordained otherwise. The Hebrews gave it to the owner of the ground wherein it was found; and it is now the custom in Germany, France, Spain, Denmark and England, to give lost treasure to the Prince or his grantee; and such a rule, says Grotius, may now pass for the law of Nations. The rule of the Emperor Hadrian, as adopted by Justinian, was more equitable, for it gave the property of treasure-trove to the finder if it was found on his own lands; but if it was fortuitously found in the ground of another, the half of the treasure went to the proprietor of the soil, and the other half to the finder; the French and Louisianan Codes have adopted the same rule."

MR. BAYLEY said, at the last meeting of the Council, that the principle which the existing Indian law, so far as there was any law, had adopted, was practically that of the Middle Ages. It might be said to assume the right of the State, but to waive it on certain conditions and within certain limits in favour of the finder. He thought that, on broad principles of equity, that principle might very fairly be defended. Where no prior claim could be proved, it was at least a fair contention that property of any value so found should pass to the public treasury, and be used for the purposes of the general community. The real objection to adopting this principle was, that in practice it could not be enforced, and as in the case of all other laws which could not be enforced, it became not only useless, but mischievous and demoralizing. He did not mean to assert that the real reason of the provisions of the Indian law, or of the English law from which it was mutated, showed that it actually was founded on this principle. He believed, as a matter of history, that it was founded rather on feudal ideas which it was unnecessary here to discuss. The principle which the present Bill proposed to adopt was that, practically, of the old Roman law of the Emperor Hadrian, and of the French and Louisianan Codes, and to a certain extent also, as he should presently explain, of the law as it now stood (for it had been not very long since altered) in Denmark. The Bill proposed to give the property in treasure-trove to the finder, provided only that he would follow the very simple procedure which the law would require, for securing a hearing of the possible claims of other persons. The only deduction in his rights which would take place under this law would be that in favour of the owner of the ground on which the property might be found. It was perhaps not quite so easy to defend the natural equity of this provision, because treasure-trove could hardly be called any part of the soil in or on which it was found. But at the same time there was no doubt that, if a man knew that there was a likelihood of finding treasure on his land, he had the power of preventing any body else from coming on the land and from searching for the treasure; and, what was still more important, as a matter of fact, where such rights or *quasi* rights were wholly ignored, they were always, nevertheless, very usually put forward, and attempts made to enforce them more or less irregularly in some way or another by the owner of the soil.

It was expedient, as a matter of convenience, therefore, to give to the owner of the soil in which treasure was found some concession; and the Bill provided for giving one-fourth of the treasure found to the owner of the soil, and the remainder to the finder.

The Bill further proposed to adopt one other provision which, as indicated before, was taken from the modern law of Denmark. This was to give the Government a claim, on the payment of a specified percentage in excess of the intrinsic value, to the possession of such articles as it should consider worthy of preservation in the interests of the public, as being of historic or artistic interest. This provision was inserted some years ago in the law of Denmark, and the practical result had been to make the Government collection of national antiquities in that country the finest now existing. In India such a provision would be of the very greatest value. There was much hidden treasure in India, and as he (MR. BAYLEY) could say from personal knowledge, much was being perpetually brought to light in various parts of the country, and a very large proportion of it was of importance, as illustrating either the history, the social habits, the religious beliefs, or the artistic skill, of the races who inhabited the country in past times. In truth, most of the only trustworthy information which we possessed of the history of India antecedent to the Muhammadan invasion was furnished by articles, especially by coins, discovered as "treasure-trove."

It was therefore an object to prevent articles of this kind from being lost or destroyed, and the provision the Bill proposed to make was, he believed, sufficiently liberal to secure to the Government an opportunity of purchasing such articles as they might consider of real public interest. Indeed, the present Lieutenant Governor of the Panjáb, Sir Henry Davies, had recently acted on this principle in a very important case, with the consent of the finder, and had preserved from destruction articles of extreme historic interest.

He had nothing more to say as to the principle of the Bill. He admitted that the Bill in its present shape was little more than tentative, and by the courtesy of the Consuls for Denmark and the Netherlands, he hoped shortly to receive copies of the laws which prevailed in their respective countries, and from these and from other sources of information, he hoped to lay before the Select Committee materials from which he trusted they would be able to make the Bill in its final shape worthy of the Indian Statute-book, which already deserved so high a place in the systems of modern legislation.

The Motion was put and agreed to.

INDIAN SEA CUSTOMS BILL.

The Hon'ble MR. HOPE moved that the Hon'ble Mr. Cockerell be added to the Select Committee on the Bill to consolidate and amend the laws relating to the administration of the Department of Sea Customs in India.

In making this motion, he would remark that at the time he proposed the Committee on this Bill, he perhaps had more in his mind the number of members in Committee, and the technical nature of the duty, than the Presidential aspect of the question; and he then thought that, with his hon'ble friend Mr. Dalyell, who was a colleague of his on the Tariff Committee last year, to represent Government, and the two members of the Calcutta mercantile community, and with, of course, the hon'ble Mr. Hobhouse, a Committee of five would be constituted in which questions would be thoroughly considered, and decided, if necessary, by a casting vote. But His Honour the Lieutenant Governor, immediately after the appointment of the Committee, had reminded him that, considering the very large interests of the Government of Bengal in the customs and trade of the country, it would be desirable to appoint also the member of Council who might be said to represent that province. He need hardly say that His Honour's suggestion met with his entire concurrence, and he had therefore much pleasure in making the motion.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to amend the law relating to Treasure-trove—The Hon'ble Messrs. Hobhouse, Dalyell and Hope, the Hon'ble Rájá Narendra Krishna, and the Hon'ble Mr. Cockerell and the Mover.

The Council adjourned to Wednesday, the 6th December 1876.

CALCUTTA,
The 29th November 1876.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments refunds and drawbacks on Imports and Exports are not distinguished.
2. The figures for British Burma for 1876-77 include the collections at *Tavoy* and *Mergui* for the months April to October only.

T. C. HOPE,
Offg. Secretary to the Govt. of India.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 16th December 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 14th DECEMBER 1876.

GENERAL REMARKS.—In Madras no rain has fallen except at Negapatam in Tanjore and in parts of Tinnevelly; there is no change in the condition of the people. In Bombay prospects continue good in Sind and Guzerat; no rain has fallen elsewhere and there is no change. No rain is reported from Mysore or Coorg. In the Central Provinces and Berar rain is in some parts much wanted for the *rabi*, but prospects are on the whole good. Reports from Central India and Rajputana are favourable. No rain has fallen in Bengal or Assam; prospects are excellent, and the outturn of the winter rice very large. In the North-Western Provinces and Oudh there has been no rain; it is reported to be wanted in Bareilly. In the Punjab rain has fallen at Pesháwar and Ráwalpindi; the crops promise well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Dec. 11th)	*Nil*	Four inches water over anicut; late dry crops want rain; prices continue very high; fever and small-pox in some taluks; cholera in Vinukonda and Narsarowpett taluks, seizures 37, deaths 20; cattle disease in taluks; fodder and water getting more and more scarce; markets not well supplied; 1,490 persons working on roads at Vinukonda and Narsarowpett, and 1,026 on river embankments; 44 fed *gratis* in Vinukonda.
Kurnool („ 12th)	*Nil*	Crops under canal being harvested; cholera prevalent, seizures 1,983, deaths 999; cattle disease reported from 2 taluks; number on relief works from latest reports 1,52,000 nearly, exclusive of Cumbum and Markapur, from which accounts not received.
Cuddapah („ 12th)	*Nil*	People on relief works 59,261; gratuitously fed 523; cholera in 7 taluks with 89 deaths; cattle disease in 1 taluk.
Bellary („ 12th)	*Nil*	Cholera in 9 taluks, 6 free; public health otherwise good; cattle healthy, but fodder very scarce; 2,31,000 persons on relief works; 5,900 gratuitously fed.
Nellore („ 12th)	*Nil*	Number on district relief works 32,000; number receiving gratuitous relief 70; sporadic cholera all about the district and particularly in Nellore and Atmakur taluks; cattle suffering from insufficiency of fodder, and in several taluks from cattle diseases also.
Chingleput („ 12th)	...	Number on relief works 6,870.
Salem („ 12th)	*Nil*	Number on relief works 7,500; number gratuitously fed none; cholera in parts; cattle healthy.
Coimbatore („ 12th)	*Nil*	Number on relief works 3,864; 60 gratuitously fed; cholera in eastern taluks, and also in village near Coimbatore, deaths 121; cattle fair; no cultivation; existing crops withered.
Tanjore („ 12th)	2·03 at Negapatam; drizzle elsewhere.	Rivers dry; no supply to tanks; water over anicuts none; cultivation to a very small extent in some taluks; standing crops not thriving; harvest near the sea coast, a little of *kar* paddy; yield very scanty; pasture, green fodder failing, straw insufficient; markets not well supplied; cholera lingers in some parts, seizures 49, deaths 41; fever and small-pox in some localities; cattle healthy; relief works not yet started; extra number fed from ex-Rajah's Chuttrum fund as famine relief, 2,228.
Madura („ 12th)	*Nil*	Average daily number on relief works, 3,827; number fed *gratis* daily, 1,056; cholera appeared in some villages of Pulni, Dindigul, Melur, and Tirumungalum; cattle disease broken out in some parts; pasture and drinking water scarce.
Tinnevelly („ 12th)	...	Moderate rain in the river valley; freshes in Tambrapurni expected; crops under the river are promising; prices all high; cholera increasing; pasture in dry taluks failing.
Malabar („ 12th)	...	No rain anywhere in district; second crops much injured in consequence; markets sufficiently supplied; cholera in Koteyom and Kurumbranad, 15 deaths; health otherwise satisfactory; cattle disease in 3 taluks; pasture sufficient.
		General Remarks.—No change in general prospects.
Bombay— (Dec. 14th)		
Sind. (Dec. 13th)		
Kurrachee ...	...	No change.
Shikárpur ...	...	*Rabi* crops healthy; rain on 9th; cattle disease in 5 talukas; fever abating.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Sind—continued.		
Hyderabad ...	...	*Rabi* sowing completed; fever continues; cattle disease in talukas Tando, Alahyar, and Shahdádpur; small-pox in talukas Hála and Moro; 87 fresh cases in Hyderabad city from 3rd to 9th, 10 deaths; slight rain in taluka Moro.
Upper Sind Frontier ...	...	Weather cold; *rabi* sowings progressing; young crops well; fever and cough prevalent.
Guzerat.		
Ahmedabad ...	...	*Rabi* crops well.
Kaira ...	...	Prospects of *rabi* crops good.
Surat ...	...	No change.
Broach ...	...	Fever continues; cattle disease in Hánsot.
Khandesh and Násik.		
Khandesh ...	...	No improvement in state of people and crops; no rain.
Násik ...	...	No change in condition of the people or crops.
Konkan.		
Tanna ...	...	*Rabi* crops not in good condition; cholera in a village in Karjat taluka; fever throughout; cattle disease and small-pox in 3 villages in Wára taluka.
Deccan.		
Poona ...	...	No rain; no change in prospects.
Ahmednagar ...	...	No improvement in condition of people and crops; no rain.
Sholapur	...	Condition of people as before; no rain; no crops.
Satara ...	...	No improvement in condition of people and crops; 2 deaths from cholera.
Southern Mahratta Country.		
Belgaum ...	...	No change for the worse in condition of people or crops; cholera has appeared in 4 talukas.
Dharwar ...	...	Condition and prospects unchanged; early crops nearly reaped; no rain.
Kanara ...	...	Emigration of men and cattle to Kanara continues.
Kaládgi (Dec. 11th)	...	Distress continues; public health generally good.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	Wheat and gram thriving; public health good.
Wadhwán ...	...	Weather and crops good.
Baroda ...	...	No change.
		General Remarks.—Crops good in Sind and Guzerat; small-pox still prevalent in Hyderabad; no improvement in the Deccan and the Southern Mahratta Country.
Bengal—		
Chittagong ...	*Nil*	Weather bright and clear; the paddy crop is being harvested at some places, but the outturn cannot be expected to be good; there was cholera all over the district, and its ravages were frightful; it is now decidedly abating in all places, except Seetacoond.
Noakholly ...	*Nil*	Weather, nights and early mornings cold and foggy; the harvest in the north of the district will be very fair; in the inundated tracts and in the island there is more than a sufficiency; the people in the inundated tracts have begun to put up their houses and to cut the paddy; the rain of November 23rd and 24th benefited the crops and the public health generally; cholera is still prevalent in the inundated tracts, and some cases of small-pox also are reported to have occurred at Lackhipore.
Chittagong Hill Tracts...	*Nil*	Weather cool and pleasant; foggy in the mornings; cotton is being gathered everywhere; mustard is being sown in some places; in others the early sown plants are thriving and have flowered.
Hill Tipperah ...	*Nil*	Weather seasonable; state and prospects of the crops continue fair.
Backergunge ...	*Nil*	Weather fine and cool; the cutting of the *agrahan* crop is now general; the *pous* crop has, it is feared, been more severely damaged in the plains in the interior of the district than was anticipated last week; there is much sickness over most part of the district; cholera and fever are prevalent in thanas Burrisal, Backergunge, Jhallokatty, Mendigunge, Gournadi, Gulshakhali, Mirzagunge, Perozepore, Sharupkati, and Motbaria; the health of the inhabitants of thanas Nulchitty, Bowful, and Boramuddin is reported to be good; there is no disease among the cattle anywhere in the district.
Furreedpore ...	*Nil*	Weather fine and cold, with a few clouds on the 8th and 9th instant; state and prospects of the crops are good; cholera and fever are both bad in thanas Bhooshna, Palong, Madareepore, Muksoodpore, and Sadarpur.
Dacca ...	...	Weather seasonable; state and prospects of the crops are very favourable.
Mymensingh ...	*Nil*	Weather fine and cold; an excellent harvest of the late rice is expected, and the cold-weather crops are promising.
Tipperah ...	*Nil*	Weather fine; there will be an average crop.
24-Pergunnahs ...	*Nil*	Weather seasonable; the harvest of *amun*, or late rice, progresses; cholera continues to be reported from all parts of the district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Jessore ...	*Nil*	Weather clear and seasonable, with wind from the north and north-north-east; the state and prospects of the crops continue good and favourable; cholera and fever are still prevalent in the town and district of Jessore.
Nuddea ...	*Nil*	Weather seasonable; prospects of the crops throughout the district continue very good; cholera still continues in Meherpore, but is abating in Kooshtea.
Moorshedabad ...	*Nil*	Weather seasonable; the harvesting of *amun* continues with a good outturn; other crops are doing well; prices of food-grains are steady; cholera has almost disappeared.
Pubna ...	*Nil*	Weather seasonable; the *amun* harvest is progressing with a good outturn, and the cold weather crops are looking remarkably well; cholera has somewhat abated in the district, but is very prevalent in and around Pubna town.
Rajshahye ...	*Nil*	Weather clear and fine; there was no rain during the week; the prospects of the rice crop are satisfactory, and a good outturn is expected; the harvest has commenced; the *rabi* crops throughout the district are doing well; cholera is still prevalent to some extent in the jurisdictions of Nattore, Bauleah, Charghat, Waleah, Bagmara, Tanore, and Bándáikhára stations.
Bogra ...	*Nil*	Weather cool and dry; there was a slight wind from the north-east; the *amun* harvest is progressing rapidly; the mustard crop looks very promising; *kalai* and sugarcane seem to be doing well.
Maldah ...	*Nil*	Weather fair and cool; occasional clouds on the 7th and 8th instant; the prospects of the crops are good all round the district; the harvest of rice is progressing.
Dinagepore ...	*Nil*	Weather cold, and the mornings are foggy; the rice crop is an extraordinarily good one; several cases of cholera reported.
Rungpore ...	*Nil*	Weather cool and seasonable; the cutting of rice is general.
Cooch Behar ...	*Nil*	Weather fair; getting colder; nothing to add to the last report; the prospects of the crops are everywhere good; fever is very prevalent.
Jalpáiguri ...	*Nil*	Weather fine; the rice crop is being reaped, and promises a good outturn.
Darjeeling ...	Return not received.	Weather misty and very cold; all the crops are progressing very favourably.
Midnapore ...	*Nil*	Weather seasonable, dry and cool; state and prospects of the crops are good; the people are busy in reaping the rice; the price of rice is rising.
Howrah ...	*Nil*	Weather cold and fair; state and prospects of the crops continue excellent.
Hooghly ...	*Nil*	Weather bright and cold; the prospects of all the crops on the ground continue very favourable; cholera in a sporadic form prevails in a few places.
Burdwan ...	*Nil*	The reaping of the *amun* paddy has commenced; the prospects of the *rabi* crops are favourable; cholera has re-appeared in the Culna sub-division.
Bankoora ...	*Nil*	Weather clear and cold; the rice crop is being harvested, and the cold-weather crops are looking well.
Beerbhoom ...	*Nil*	Weather seasonable; the prospects of the crops continue excellent; the reaping of the *amun* rice is in progress.
Sonthal Pergunnahs ...	*Nil*	Weather very cold; no change; everything is as good as possible; cattle disease has disappeared in Deoghur.
Bhágalpur ...	*Nil*	The prospects of all the crops are good; general health is very good.
Monghyr ...	*Nil*	Weather fair; the prospects of the crops continue good.
Purneah ...	*Nil*	Weather cold and seasonable; the late rice is being reaped; the *rabi* crops are being cultivated; and their prospects are at present good.
Durbhanga ...	*Nil*	Weather fair and cool; *dhan* is being harvested, and the prospects of the *rabi* crops are good.
Mozufferpóre ...	Return not received.	Weather seasonable, though perhaps not quite so cold as usual at this time; state and prospects of the crops are satisfactory; the harvest of the rice crop is being carried on; a little rain is required for the *rabi* crops; health of the district is good.
Sarun ...	*Nil*	Weather clear and cold; wind blowing from the west; state and prospects of the crops continue favourable; the *aghani* rice is being harvested; general health is good.
Chumparun ...	*Nil*	Weather seasonable, nice and cool; prospects of the crops are excellent; the *aghani* rice crop has commenced to be cut.
Patna ...	*Nil*	Weather seasonable; the rice crop is being fast reaped, and the prospects of the *rabi* crops are favourable; health of the district is good.
Gya ...	*Nil*	Weather cool and fair; the maximum reading of the thermometer in the shade reached as high as 76·0; the harvesting of *kharif* is still going on, and *rabi* continues good and promising.
Shahabad ...	*Nil*	Weather cool; the paddy crop is still being reaped, and the *rabi* crops look healthy.
Hazáribágh ...	*Nil*	Weather seasonable; state and prospects of the crops are satisfactory; the paddy crop has been nearly all reaped, with good outturn.
Lohardugga ...	*Nil*	Weather cold; prospects of the crops continue good all over the district; the greater part of the rice has been already harvested; other crops promise well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Manbhoom ...	*Nil*	Weather seasonable; the harvesting of *dhan* is going on, and the prospects of the *rabi* crops are favourable.
Singbhoom ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable; rice is being harvested.
Balasore ...	*Nil*	Weather fair and cool; the harvesting of early rice continues satisfactorily.
Cuttack ...	*Nil*	Weather clear and cold; the harvesting of the late rice has commenced, and the cold weather crops are coming on well.
Pooree ...	*Nil*	Weather fair; the *sarad* crop is now ready for the sickle, and is already being harvested in many places; the dearness of rice, owing to exportation, is complained of; the traders are preparing for large shipments from False Point; the state of the other crops is good; few sporadic cases of cholera were reported. *General Remarks.*—There was no rain in Bengal during the week. The harvesting of *amun*, or late rice, is now general, and promises a good outturn, save where it has been damaged by the cyclone. The cold weather crops promise favourably.
N. W. Provinces—		
Benares (Dec. 13th)	...	No change.
Allahabad („ 12th)	...	
Meerut („ 13th)	...	Prospects good.
Bareilly („ 13th)	...	Rain required.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 6th December 1876.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K. C. B., Senior Member of the Council of the Governor General of India, *presiding*.
His Honour the Lieutenant-Governor of Bengal, K. C. S. I.
The Hon'ble Arthur Hobhouse, Q. C.
The Hon'ble E. C. Bayley, C. S. I.
The Hon'ble Sir A. J. Arbuthnot, K. C. S. I.
The Hon'ble R. A. Dalyell.
The Hon'ble T. C. Hope.
The Hon'ble Rájá Narendra Krishna Bahádur.
The Hon'ble F. R. Cockerell.

DRAMATIC PERFORMANCES BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill for the better control of dramatic performances be taken into consideration. He said, in submitting this report to the Council, he did not conceive it to be necessary to restate the general considerations which induced the Governor General to publish an Ordinance on the subject in the early part of this year, and which induced the Council to accept the present measure and to send it into Committee. It was true that from certain quarters, principally Native gentlemen, whose opinions he always listened to with the greatest respect, they had received some expressions of opinion adverse to any legislation at all on the subject. It was also true, at least in his judgment, that the Council should not refuse to reconsider the principle of any measure

merely because that principle was affirmed when the Bill was referred to a Select Committee, for the reason that upon many subjects they did not enjoy the advantage of thorough public discussion until after the Bill had been introduced and published. If therefore any new considerations were brought forward, shewing that a Bill which in the first instance appeared to be desirable was not desirable, it seemed to him that the Council ought to give full weight to them, and not rely upon what was a very convenient rule amongst themselves, namely, that the principle of a Bill was affirmed when they sent it into Committee.

Now they had received representations from certain inhabitants of Lucknow, and again from the well-known British Indian Association. The former document was a brief one. It gave no reasons for the objections which its framers entertained to the principle of the Bill, but it contained some observations upon particular parts of the Bill which were well worthy of attention. The paper which was sent in by the British Indian Association argued at length against the whole principle of the Bill, and he thought it a very temperate, clear, and able statement of their side of the case. At the same time he did not find in that paper any general considerations which were not fully present to the minds of the Council when this Bill was sent into Committee.

The Association relied very strongly upon the sufficiency of the Penal Code to punish any representations which were defamatory or scandalous or seditious or obscene. But they did not address themselves to that argument which was the ground-work of the Bill, namely, that there were many cases in which prevention was worth all the punishment in the world. That was particularly true in times of excitement, and in cases where the play was of a seditious character. If the performance took place a few times, the mischief was done, and it was a poor satisfaction to punish the offenders afterwards. It was also particularly true when the object of the play was defamation. He should like to ask any one of these gentlemen which of the two alternatives he would prefer; whether he would prefer to be held up in the most vivid way to the scorn and hatred of the public and then to have his assailant punished, or whether he would prefer to have the whole exhibition prevented? In which case would he think that the law had most effectually protected him? which course would leave him the happier and more contented man? MR. HOBHOUSE thought he knew what answer would be given by any body who had not a foregone theory to maintain.

In the remaining case of obscenity it would seem that even for the purpose of punishment the Penal Code had been found to be insufficient. The section of the Code which bore upon their subject, that was, the subject of words sung or spoken, was section 294, and it ran thus:—

"Whoever sings, recites or utters, in or near any public place, any obscene song, ballad, or words to the annoyance of others, shall be punished....."

and so forth.

Upon that the Advocate General of Madras had written as follows:—

"The Bill is, I think, needed. We had a year or two ago here an extremely obscene play being acted, which was greatly affected by students, &c., the managers of which the Government dared not prosecute, because there was no evidence that the obscenity was 'to the annoyance of others,' so as to bring the performance within section 294 of the Indian Penal Code."

The other arguments put forward by the Association were of a very general character. They dwelt much upon the value of liberty, and upon the danger of stifling a rising national literature. But all law was, to the extent to which it operated, a restraint on liberty. The question to be argued in each case was, whether it was desirable in the interests of the public to restrain individual freedom to do particular acts. The Government said that in this case it was desirable; that the punitive law failed in effect; that preventive powers were necessary; and they gave instances to prove that. Those gentlemen who said it was not desirable to pass such a law as this, should make out that it was not desirable to suppress such a play as the *Nil Darpan;* that it was not desirable to suppress such a play as the *Cháka Darpan;* that it would not be desirable to suppress a play whose object was to gratify feelings of resentment

against a private gentleman, because he did what was a perfectly lawful, innocent and honourable thing to do, but was opposed to the sentiments of his caste.

MR. HOBHOUSE therefore thought he might let the general merits of this Bill stand upon the arguments which he adduced when he moved for leave to introduce it. All the Members of Council had in their hands the arguments which had been adduced against it, and they had also a valuable Minute by his hon'ble friend the Lieutenant Governor, from which he should have taken the liberty of quoting one or two sentences, only that the Lieutenant Governor was there himself, and was able to say more effectually than MR.. HOBHOUSE could what his sentiments were.

He might also add upon this point, that all the Local Governments had approved of the general principle of this Bill, excepting those who told the Council that in their Provinces that class of performances which had called for the action of the Council did not exist.

But though he could not accede to the general line of argument which their friends had put forward against the principle of the measure, the papers he had referred to contained some valuable criticisms upon portions of the Bill, and accordingly the Committee had made some modifications in the Bill as introduced. He would explain to the Council what they were.

The first, and in his opinion the most important, observation which had been made related to the places in which performances might be carried on. It was pointed out that as the Bill was framed there was nothing to restrict it to public performances, and that there might be interference with a purely private entertainment given by a gentleman to his own friends. They of course never intended such interference, but the Committee thought the criticism was a just one, and that there was a blot in the Bill. Therefore, in section 3 it was provided that the plays which might be prohibited were those which were to be performed in a public place. By a public place they did not mean merely such places as were public from their position—such as the maidan here—but they had expressly provided that a building in which money was taken at the door to witness a performance was a public place within the meaning of the Act.

Another thing pointed out to them was that there were certain religious ceremonies which might not commend themselves to the ideas of propriety entertained in Western Europe. Well, he believed that there were such religious ceremonies, exceedingly ancient, which had prevailed more or less among all nations at different times, and which still prevailed in parts of India. They did not intend to interfere with them, and accordingly they had said at the end of the Bill, that nothing in this Act should apply to any *jātras* or performances of a like kind at religious festivals. He was sorry that he was very ignorant on this subject, but he was told that "jātra" was a name given in Bengal, and in some parts of Northern India, to performances of the kind he had alluded to; that the name did not prevail in other parts of India, but that there were similar performances which the Committee had tried to indicate by the words they had used. Whether they had used the right words or not, it was for the Council now to determine on considering the Report. The matter had been very carefully discussed between those members of the Committee who had that knowledge of the subject which MR. HOBHOUSE had not, namely, by his hon'ble friends Mr. Cockerell, Mr. Dalyell and Rájá Narendra Krishna, and these were the words which had been ultimately decided on.

The third thing pointed out to the Committee was that in section 3 as originally framed, one of the sub-sections, that which was headed (*d*), was dangerously vague. It ran thus:—after saying that the Local Government might prohibit performances of certain specific characters, it went on to say that it might prohibit those which were "otherwise prejudicial to the interests of the public." Now the case was put to the Committee thus: if a play is scandalous or defamatory, or seditious, or likely to deprave or corrupt, the Bill effectually strikes at it: but if it is none of these things, in what respect can it be prejudicial to the interests of the public? The Committee found on consideration that that was an exceedingly difficult question to answer.

He supposed it was not the wish of any member of this Council to give to the officers who would work this Act a general power of prohibiting any play they might dislike, but rather to make those officers reflect and consider whether they could assign specific objections to a play. They therefore struck out these general words, and provided that the play must fall within one or other of the predicaments specified in the prior sections.

There was another sub-section of section 3 which was retained in the Bill—sub-section (c)—the words of which were—"likely to deprave and corrupt persons present at the performance." This had been objected to, not by Native gentlemen alone, but by at least one European officer, as also being too vague. It was said that they did not specify by what standard of morals or manners the likelihood of depravation or corruption was to be judged. Well, that was an important consideration. No doubt the standard of morals and manners varied, and it would not do to apply a too rigid standard to persons accustomed to a lax one. But if they were to retain the power of striking at the thing—and he thought hardly anybody desired that we ought not to strike at the thing—if they were to retain the power of prohibiting that which was likely to deprave and corrupt, he thought it impossible to use words which were better suited to the purpose. The Committee had tried a good many times, but could not find any words which were so apt. The fact was, that these words did not set up any absolute or ideal standard of decency or purity. They said that, in order to be prohibited, a play should be such as was "likely to deprave or corrupt persons present at the performance," and that necessitated the consideration, who the persons were, and whether they were likely to be depraved or corrupted. Of course it might be said, and was said, that we were foreigners, accustomed to a different standard, and however much we might try to judge people by their own standard, we were likely to err. It might be so; but those were considerations which were applicable to a great many other things we did, and this particular liability to error was one of those incidents which are absolutely inseparable from our presence here as rulers and administrators of this country. After all it seemed to MR. HOBHOUSE by no means an unmixed disadvantage, if in matters such as these—matters of taste, decency and purity—there was now and again a higher standard applied to those who were accustomed only to a lower one.

The Committee had therefore thought it was desirable to retain the words of sub-section (c), and the Council would remember how very much more definite and specific they were than the similar law which prevailed in England. He had informed them on a previous occasion, that in England a single officer was empowered to prohibit the acting of any play, even though it had been already put upon the stage, whenever he should be of opinion that it was fitting for the preservation of good manners, decorum, or the preservation of the public peace. The expressions "good manners" and "decorum" certainly were infinitely vaguer than any expression which was to be found in this Bill.

But even on this point the Committee had taken some precautions. Of course the great security, both for the efficient working of a Bill like this, and for its working without oppressiveness, was to commit it to efficient and responsible hands. As the Bill was framed, the prohibitive order, which lay at the bottom of the whole Bill, and was the pivot upon which the machinery turned, might be made either by the Local Government or such officer as the Local Government might generally or specially empower. That took in a wide range of officials. The Committee thought it desirable, in view of the arguments presented to them, to confine the making of the prohibitive order to an official of greater experience and responsibility than any officer who might be empowered to make it. Therefore, as sections 2 and 3 now stood, by their combined force the prohibitive order must be made in the Presidency towns, and in Rangoon which was a town of the same nature as the Presidency towns, by the Local Government itself; and elsewhere it must be made only by such District Magistrates as the Local Government might expressly empower to make it. For instance, taking Bengal, within Calcutta it was the Lieutenant Governor himself who must make the prohibitive order, and in the mufassal it was such a District Magistrate as the Lieutenant Governor might think worthy of being entrusted with such powers.

Another matter upon which a good deal was urged would be found in the fifth section of the Bill, sub-section (c). It related to spectators who were present at a prohibited performance. As the Bill originally stood, spectators were put upon the same footing with the performers and the proprietor of the place. The Committee were told that this might bear very hardly upon spectators, who might be ignorant of the prohibition and be present quite innocently at the prohibited performance, and then find themselves guilty of a crime. A great many of their correspondents had urged them to strike spectators wholly out of the Bill. On the other hand, it was said that spectators might come in wilful defiance of an order of Government, and might be the most dangerous part of that objectionable thing which the Government desired to put down. The Committee thought therefore that it was not desirable to leave spectators wholly out of the purview of the Bill, but that it was desirable to put them on a different footing from performers and proprietors. Accordingly they had provided that spectators might be punished if guilty of wilful disobedience to an order of prohibition. A case of open defiance would be well known to the Government, and it would be easy to make the order known, and then the spectators would be in much the same position as those who were members of a mob after the reading of the Riot Act in England. There was no reasen why such persons should not be punished for disobedience to the law.

The Council would see that the Committee had taken great precautions to prevent the working of this Act in an unduly restrictive or oppressive manner, and that they had endeavoured to make it more definite, more narrow, and more specific than it was when it was introduced. He thought there was only one point on which the scope of the Act was at all enlarged, and that was the subject of section 7. It merely gave the Local Government power to make such enquiries as might suffice to inform it of the nature of a play before deciding whether or no to prohibit it. And he did not suppose that the worst enemy of the Bill would wish to deprive the Government of such a power as that: it was in fact one of the safeguards for a judicious working of the Act.

He thought there was no other point in the Bill to mention now. But he might state that the Council had received certain requests for delay, not at the eleventh but at the twelfth hour. One came to his hands at 4 o'clock yesterday afternoon; it came from a gentleman, a member of the Bar, whom it would always be a pleasure to him to see under any circumstances, whether on business or otherwise. He said that he was Counsel for the proprietors of the National Theatre, and that they desired time to consider the Bill, and if necessary to be heard through himself upon the subject. Another memorial reached MR. HOBHOUSE's hands a little later, and that came from a Committee appointed by some Native inhabitants of Calcutta in public meeting assembled. It prayed that the measure be withdrawn, or if that were impossible, that the measure be restricted in its operation to the Presidency towns, with such modifications as were indicated in the memorial; or that the memorialists might be "heard by delegate at the bar of this hon'ble Council or in Select Committee, as might appear fit and proper". There was again another memorial which was dated 6th December, and was put into his hands about half an hour ago. That was from the Committee of the Indian Association, who said that they only recently learned that it was the intention of the Legislature to pass this Bill to-day, and that they desired some delay in order that the matter might be further considered.

It was no doubt very desirable that any body of gentlemen entertaining opinions on public matters should be allowed to express those opinions, and every encouragement was given to them to do so. But it was also very desirable that the public business should be done, and there must be an end to all things; there was a time when discussion must end and action must be taken. Now this Bill had been published for fully eight months; it had attracted a great deal of attention; Committees had been appointed for the purpose of criticizing it, and it had been extensively criticized. This very Committee of the inhabitants of Calcutta, whose memorial he had referred to, said that they were formed on the 4th of April last for the purpose of watching the Bill, and on the 5th of December, late in the day, they had sent in a memorial against it.

Now it seemed to MR. HOBHOUSE that unless some important novelty had been introduced into the Bill since its publication, or unless there was something very new and striking brought to the notice of the Council by the memorialists, the Council ought not to delay their action. He had read the memorial presented by this Committee of the inhabitants of Calcutta, and he could not find in it anything of the slightest importance which had not been already said, and better said, by the British Indian Association. There was no new suggestion of detail, and there was nothing in the general arguments but what the Select Committee had already had before them. It seemed to him therefore, that if they were to delay their proceedings, and disturb the course of business and create that confusion which always occurred when things were brought to the birth and not born, that the Council would encourage those persons who were opposed to Bills to delay action until the last moment, and then to send in petitions and memorials praying for more delay, possibly in the hope that something in the chapter of accidents might occur to prevent the passing of the measure altogether. Therefore, though he thought it his duty to mention to the Council what had reached his hands, yet if they would take his advice, they would not delay their action. The matter however was entirely in the hands of Hon'ble Members to do what they pleased.

The Hon'ble RÁJÁ NARENDRA KRISHNA said that, with reference to what he had remarked on a former occasion when this Bill was under discussion in Council, he would observe that it was a wise measure which aimed at checking the growth of a dangerous evil in the shape of public performances of obscene dramas—a powerful agency in the speedy demoralization of the national character. This Bill, as it was originally framed, had certain objectionable features which had now been removed, and as it now stood, he believed it would successfully strike at the root of the evil, and guard against the remedy in any shape proving injurious. Doubts which might have arisen as to the construction of the words "public place" had now been set at rest by a clear definition of the term; the apprehension which might have been entertained as to the vesting of the power of punishing a breach of the new law had to a very great extent been removed by providing that, in the Mufassal, only a district Magistrate would have the jurisdiction to try the offences made punishable under the proposed enactment, inasmuch as the word "Magistrate" was defined to mean the chief Magisterial officer of the district—an officer who, before he reached that high position, must have acquired a good deal of experience and a knowledge of the people, so as to be a very qualified person to exercise jurisdiction under the Act without causing any dissatisfaction to the parties concerned. A provision had been very properly made that ignorant and other spectators, instead of being taken by surprise, should be served with a notice to quit the place where an obscene play was being performed before they would be liable to any penalty. Lastly, to remove all possible objections to the measure, he would suggest that a competent Native official should be associated with the District Magistrate for the trial of such cases, as these dramas were composed in the vernacular language, and that *jātras* should be allowed to be performed on all occasions, both private and religious.

The Hon'ble MR. COCKERELL said that he wished to say a few words on the subject of this Bill, and chiefly in reference to what had fallen from his Hon'ble friend Rájá Narendra Krishna. In the first place, he was very glad that that gentleman, who might be fairly represented as the exponent of the feelings and opinions in a question of this kind, of a very large section of the best-informed Natives of Bengal, was so far in favour of the Bill that he thought legislation in this direction desirable, and that the measure, as it then stood, was for the most part well calculated to attain the objects which it had in view.

But there were one or two points on which his Hon'ble friend had commented, and expressed the apprehensions which MR. COCKERELL believed from all that he had heard were shared by other Native gentlemen in regard to certain provisions of the Bill, to which he would direct his remarks:—

First.—The Hon'ble Member had dwelt with some satisfaction on the fact that the Bill provided for the trial of breaches of the law by District Magistrates only. Now MR. COCKERELL, for his own part, would say that

although this was a precaution in the right direction, it was scarcely necessary, and that other Magistrates might have been vested with this power; for the person who tried a case of this kind was not called upon to decide, or even pronounce, any opinion upon the question as to whether a particular performance was admissible or not. All that the Magistrate trying these cases had to do was to ascertain that the performance, for taking part in, or being present at which, somebody was brought to trial, was actually prohibited; that the prohibition had been duly promulgated as required by law; and with regard to those who were charged as spectators of the performance, that they were fully aware of its prohibition and yet elected to witness it. Now these were simple questions of fact, and in no way touched the primary and more important question as to whether the performance came within the category of those at which the Bill aimed, and which *ought properly* to be prohibited.

The decision of that question was the function of the Local Government, or the officer to whom the Government might delegate its authority in the matter.

His Hon'ble friend had further suggested that a Native official should be associated with the Magistrate for the trial of these cases. Now MR. COCKERELL thought that this suggestion, as he had just explained, proceeded from a misapprehension of what the Magistrate would have to do in trying those cases,—the question which would really have to be adjudicated in these trials, and which was exceedingly simple. The only important point to be determined under this Bill was, whether the performance which was about to take place, or which there was reason to suppose was about to take place, was a proper or improper performance, and one which should be allowed or prohibited, and the authority with whom rested the decision in such case was the Local Government, or some officer in whom the Government reposed full confidence. Therefore, if a Native was to be associated with the person who had to determine this question, he must be associated, in some manner, either with the Local Government, or the officer to whom the Local Government might delegate its functions. MR. COCKERELL had no doubt that the Local Government would, in this matter, as it undoubtedly did in many others, consult well-informed Native gentlemen, whose judgment and opinion on such a question was likely to be of public benefit, if the character and nature of the performance were such as to suggest doubt as to whether it should be prohibited or not. He knew that, in the ordinary administrative affairs, Native gentlemen were frequently consulted upon certain questions in which they were conversant with the feelings of their countrymen, and their advice or opinions were likely to be advantageous to the public interests.

But for obvious reasons no directions to the Administration on such a matter could properly find place in an Act; the discretion of the Local Government could not be so hampered and limited with any practical advantage. In this, as in other matters, it must be left absolutely unfettered, and there was no reason for anticipating that it would not be wisely exercised.

Then, his Hon'ble friend was not satisfied with the license granted by the Bill in respect of "jātras;" he would wish it extended to all performances or ceremonies of that nature, whether connected with religious observances or not. Now, the word "jātra" applied, in its original signification, to pilgrims. The original meaning of the term was a pilgrimage, and "*jātris*" was the ordinary vernacular designation of pilgrims. But the term *jātra* had come to be applied to performances of the kind to which his Hon'ble friend had alluded, and which were of common occurrence, and identified by that name, he believed, all over the territories included in the Bengal Presidency; but, apparently, the term had no such signification in either Madras or Bombay. The Hon'ble Member claimed for these performances immunity from the restrictions of the law, not only when they were connected with some religious festivals, but also when they took place on what he termed private occasions. MR. COCKERELL supposed his Hon'ble friend meant by this "upon all occasions" other than religious festivals, because the Bill merely dealt with performances in public places, and in no way interfered with what was of a really private character. Assuming that he wished to apply the exemption to

public performances wholly unconnected with religious ceremonies, then MR. COCKERELL would say that it was not desirable that any such exemption should be made. The reason for exempting *jātras* was the desire not to legislate so as to interfere in any manner with the religious ceremonies or observances of the people, and with that object, and that only, it was proposed to enact the exemption as it stood in section 12 of the Bill.

To extend the exemption as now proposed would be to subvert the principle of the Bill, which was designed to restrain public performances within the bounds of propriety; for if the religious element be eliminated, there was no ground whatever for placing the *jātra* on a different footing, in regard to the controlling powers to be conferred by the proposed enactment, from that of any other public performance.

For his own part, he (MR. COCKERELL) would say that he thought that legislation in the direction of the Bill was urgently called for, and that the repressive powers to be conferred on the Executive were of a very moderate character, surrounded by efficient safeguards and such as could not reasonably be objected to.

His HONOUR THE LIEUTENANT GOVERNOR said that although he was very unwilling to trouble the Council, he thought he ought not to give quite a silent vote on this occasion, as it was a measure which so immediately concerned the interests of Bengal. He must express the satisfaction with which he heard the moral support given to this measure by his Hon'ble friend and colleague, Rájá Narendra Krishna. He was sure that the dictum of a Native gentleman who was so eminent in rank and so highly esteemed and respected in the country would carry great weight with the entire Native community.

As to the precise verbal objection just raised, HIS HONOUR was anxious to explain for the satisfaction of his Hon'ble friend, that the objection he raised was really met by the terms of the Bill. His Hon'ble friend desired that the words "and on other occasions" should be added to the end of section 12. By that, HIS HONOUR understood him to mean, on all private occasions. But as the Hon'ble mover of the Bill knew so well, these private occasions were expressly saved by the definition given in the explanation to section 3. It was there explained that the Act only applied to public performances in a public place or in a place where money was taken at the door. By that, therefore, performances on all private occasions were saved; and the desire of his Hon'ble friend was entirely met and his objection was really obviated.

Then, passing from this particular point, HIS HONOUR deemed it his duty to give whatever weight might attach to the authority of the Local Government in favour of this measure. And though he was very sorry to see that so many Native gentlemen, whose opinions he so much regarded and respected, seemed to be opposed to this measure, he deemed it to be his duty to state publicly and fearlessly, that this measure was absolutely necessary; that if it was not passed, mischief would arise of a moral as well as of a social character —mischief which would be detrimental to the prestige and character of British rule in the metropolis of India. It was all very well to say, as HIS HONOUR was sorry to see so many highly respectable Native Associations had said, that the Bill was not necessary because the existing law was quite sufficient. Now that objection was answered by the facts of the case. It was nothing short of the truth when he said that cases had occurred in this city, last Spring especially, and on former occasions generally, which fell within all the categories prescribed in section 3 of the Bill, that was to say, there were cases of a scandalous and defamatory character; they were calculated to excite feelings of disaffection to the Government; they were likely to deprave and corrupt persons present at the performance. He might really go farther and say that they were injurious and derogatory to individuals and calculated to stir up angry feelings between several important classes within these Provinces. These performances were reprobated not only by Europeans, but equally by Natives also. He believed there was not a single right-minded and educated Native throughout Bengal who did not utterly condemn what had occurred.

Then, as to the law being sufficient for protection, all he could say was, that they did try to put the law into force, and that at first people obeyed, but the offenders very soon took legal advice, and passively defied the authorities. And it was certain that, had not His Excellency the late Viceroy seen fit to pass an immediate Ordinance, these performances would have gone on. There was no legal power whatever to prevent them; and if they had gone on, then one evil would have stimulated another. They obtained a certain sort of success, a certain sort of spurious notoriety accrued to them, and this would have encouraged others; and just as fire went on feeding itself; just as a snowball gathered force as it rolled down a precipice — *vires acquirit eundo* — so this evil would have gone on increasing until really at last serious mischief would have been done.

So much then for the absolute necessity. But he should like the Council to consider two further points, namely, the private tendency and the public tendency of these performances. Now, as regards private defamation, this sort of holding up people to public scorn, either as a class or as individuals, was a very difficult thing to bring to a successful prosecution before the Courts, especially when a whole class was concerned. Who was to come forward and indicate that the defamation affected himself? Who was to volunteer to say that such an ugly cap fitted himself? And as a proof of the extreme difficulty of conducting such prosecutions, he might state that, of the several cases which had occurred within the last few years, only one had been successfully prosecuted.

Then as regards public tendency, the manner in which all the most revered institutions under which we lived had been brought into contempt by public exhibitions, might not amount to treason, and not even to sedition, yet nevertheless, everything which politically ought to be treated as sacred in the eyes, not only of Europeans, but more especially of Natives, might be brought day after day, month after month, into greater and greater contempt. And though political danger was not to be feared—indeed, ideas of danger should not lightly be evoked—yet it was undesirable that this sort of thing ought to be permitted, and he was quite certain that no Government on earth would permit it. And as for stopping such things, by means of political prosecutions, every body knew that this was a double-edged weapon, fraught with divers objections, which ought not lightly to be resorted to. So that, both upon private and public grounds, there was the strongest argument, which argument had been used by the Hon'ble Mover, that prevention was better than cure. And in saying this he was most anxious to avoid any misunderstanding as to there being any idea whatever of disaffection or disloyalty spreading in Calcutta or in Bengal. HIS HONOUR affirmed that the people of Bengal were most loyal and well-affected. He also affirmed that these occurrences were reprobated as much by the vast majority of the Natives as the Government could possibly desire. Nevertheless, it was possible that, if these objectionable performances were to be repeated for any lengthened period of time, gradually the youth of the country, the educated, quick-witted and aspiring young men of the rising generation, would become—he would not say corrupted or disaffected, but—not so well-affected as we might desire them to be. In fact, the prevention of these performances might be said to be the means of saving them from themselves—from those evil influences to which they might otherwise be subject.

These then being the broad grounds for introducing a measure of this kind, he felt bound to add that every reasonable concession had been made by his Hon'ble friend the mover on the side of the objectors. Religious festivals had been expressly excluded, and now all private performances had been excluded also. He was well aware that this concession of excluding private performances might possibly be open to abuse. But he earnestly hoped that the forbearance of the legislature would not be abused, and that it would never be necessary for the Local Government to ask this Council for further powers in that respect. And as a proof that the people were really a law-abiding and a law-respecting people, he might remark that, from the date that the Ordinance was issued by order of the late Viceroy, not a single case of this objectionable character had occurred, and the evil had wholly ceased. The people knew that this Ordinance was on record, and they never attempted to disobey it. And he was sanguine that if

this measure should be passed to-day, he should always be spared the pain of ever having to put it in force. In short, the best proof of the success of the measure would be the fact of the people so loyally obeying the rules that penalties had never to be inflicted.

And, in conclusion, HIS HONOUR need say but little as to the dramatic literature which it was said this measure would discourage. The dramatic literature of Bengal was in a very rising and promising condition. It greatly exercised the thoughts and imaginative faculties of the people, and we might hope that this measure, so far from checking the intellectual amusements of the age, would keep the national drama pure and sound, and would help it to flourish. So that on every ground upon which he had touched he affirmed that this measure could not possibly do harm, while, on the other hand, if rightly handled, it would be of use in preventing possible mischief.

The Motion was put and agreed to.

The Hon'ble RÁJÁ NARENDRA KRISHNA moved that, to section 12, the words "and on all other occasions" be added after the words "religious festivals."

The Motion was put and negatived.

The Hon'ble MR. HOBHOUSE then moved that the Bill as amended be passed. He had only some observations to make in respect to what had fallen from his hon'ble friend Rájá Narendra Krishna. As to the association of a Native official with the Magistrate, he entirely agreed with the remarks of Mr. Cockerell, that that was a matter which would be within the discretion of the Local Governments, and he had no doubt that they would exercise a wise discretion, but we could not provide for it in the Bill. With regard to the amendment which was just lost, it seemed to him that the Bill would work satisfactorily. If a *jātra* was religious, it would fall under section 12 and be saved; if it was really private, it would fall under section 3 and be saved. If there was an essentially public performance, say in the middle of a street, but called private because it was got up by a private individual, such a pretence of privacy would be an evasion of the law. The performance ought to fall within the scope of the law, and he did not think any body would wish to save it if it was of an objectionable nature.

With regard to the passing of the Bill now, he observed that none of his honourable friends had said anything about the memorials which they had received. He therefore concluded that they were all of opinion that in a case like this, where there had been such a long publication of the Bill, where everybody had known what they were about to do, where the Committee had made no alterations in the Bill, excepting alterations narrowing its original scope and limiting it, in that case persons were bound to come in good time, if they desired the Council to delay their action; and that if they did come at the latest moment, they ought to show the strongest grounds, that there were some new facts or some new considerations which had previously escaped notice, and of which it behoved the Council to take notice in order to save themselves from error.

The Hon'ble THE PRESIDENT said that it was quite clear from his hon'ble friend Mr. Hobhouse's full explanation that every possible consideration had been given to the various representations received against the Bill or against parts of it, and he thought that the Bill had been improved by the attention which had been paid to those representations. As to the necessity of a Bill of this kind, he (THE PRESIDENT) individually had no doubt whatever, and it appeared to him that the precautions with which the Bill was hedged in amply provided that no oppressive or useless action would be taken under it if it became law. He did not think that the passing of the Bill, which had now been many months before the public, should be any longer delayed.

The Motion was put and agreed to.

LAND IMPROVEMENT BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill to amend the Land Improvement Act, 1871.

REGISTRATION ACT AMENDMENT BILL.

The Hon'ble MR. HOBHOUSE presented the Report of the Select Committee on the Bill to amend the Indian Registration Act, 1871. He said that, although the Bill had been very much enlarged, that was only due to the circumstance that the Committee found the amendments so numerous, that it was more convenient to re-enact the existing Act with the amendments woven into its body, than to leave them in a separate document. That was the only reason why the Bill appeared to have been so much changed.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY presented the final Report of the Select Committee on the Bill to provide for the management of the Public Museum at Calcutta. He said the progress of this Bill had been deferred for certain technical reasons, there having been considerable delay in transferring the collections of the Asiatic Society to the new building, and it had been found that, according to the existing law, the trustees of the Museum could not sign the lists accepting the custody of the collections until the collections themselves were so actually transferred. That difficulty had now been removed, and the lists were in the course of signature. But the delay had enabled the Select Committee to re-consider a few points in the Bill, and they had therefore submitted a further report, suggesting one or two alterations, which he ventured to think were improvements. The chief of these consisted in the reduction of the number of *ex officio* trustees. It was found that several of the offices which now constituted their holders *ex officio* trustees of the Museum were not necessarily of such a character as ordinarily to be held by gentlemen who took an interest in scientific matters. And moreover almost all the incumbents of these offices were gentlemen so burdened with other duties as to make their position as trustees purely nominal. It had been therefore determined to omit from the Bill the names of the Chief Justice, of the Vice-Chancellor of the Calcutta University, and of the Bishop of Calcutta. The Select Committee proposed to supply their places by enabling the trustees to elect gentlemen who would be willing, and able, actively to assist in carrying out the business of the Museum.

The other substantial alteration in the Bill consisted of a reduction in the number of trustees necessary to constitute a quorum. There had been considerable alterations of drafting induced by these changes; but in other respects the Bill had not been altered. He proposed at the next meeting to move that the Bill be passed.

BRITISH BURMA FOREST BILL.

The Hon'ble MR. HOPE introduced the Bill to consolidate and amend the law relating to the management and preservation of Government forests in the province of British Burma, and moved that it be referred to a Select Committee with instructions to report in three months.

The Motion was put and agreed to.

GENERAL FOREST BILL.

The Hon'ble MR. HOPE asked leave to postpone the motion for leave to introduce a Bill to consolidate and amend the law relating to the management and preservation of Government forests, to the transit of forest-produce and to the duty leviable on timber.

Leave was granted.

KAIRA THÁKURS INCUMBRANCES BILL.

The Hon'ble MR. HOPE asked leave to postpone the motion for leave to introduce a Bill to relieve from Incumbrances the estates of Thákurs in Kaira.

Leave was granted

BHAUNAGAR THAKURS BILL.

The Hon'ble MR. HOBHOUSE moved for leave to introduce a Bill to give better effect to certain agreements with the Thákur of Bhaunagar. He said,—

"I must apologize to the Council for the short notice on which this Bill is exhibited to them. I know it is inconvenient, but I trust they will be of opinion that there is sufficient excuse for it. It is true that the scope of the Bill is very limited, whether as regards time or space or subject-matter. Upon what subjects it will operate is matter of pure conjecture, and, if the Bill succeeds, always will be matter of pure conjecture, for it is intended to operate by way of prevention only. But it happens to be a proper part of the political action of the Government of India; and its frame depended on the form which that political action was to take. We have only just received from England a final decision on the subject. At the same time we have learned from the other side of India that speedy action is necessary if we would avoid embarrassment. The broad object of the Bill is to prevent litigation and vexation which may otherwise be caused by the circumstance that the tract of country, which my Hon'ble Colleagues may see described in the schedule, and which we call the scheduled villages, has for ten years and upwards been treated as a Native State, as a country which, so far as regards British law, is a foreign country, whereas in point of law it remained British territory and should have been so treated.

"The Council I hope will not misunderstand me. I am not asking you to lift your little fingers for the purpose of turning British territory into foreign. We have no power to do any such thing. Our territorial powers are strictly confined to British India. If we took any step to make an acre of British India not British India, our action would be null and void. That may be done only by the Imperial Parliament or by the Crown. But we have the power of passing such laws within British India as may enable political arrangements to work more smoothly. And it is an operation of that kind which I am asking the Council to perform.

"It is now my business to explain to you what is the nature and origin of the mistake which gives us uneasiness. For though, when all is told, it will be seen that the Bill is a very plain and simple one, indeed a very small one, it is necessary for you to understand the position of affairs which makes it so. The story is rather a disastrous one, and it would be, if fully told, a very long one, with many episodes and abounding in detail, but I will try to state what is material for the present purpose within a moderate compass. I may say—

Longa est injuria, longæ Ambages, sed summa sequar fastigia rerum.

"I hope the Council will not think I am forfeiting my pledge to be brief, if at the outset I carry them back more than seventy years in our history, for there, so far as we are concerned, lies the origin of the present difficulty. Previous to the war which ended in the treaty of Bassein, the territory of Káthiáwár was occupied by a number of Native potentates, towards whom the Peshwá and the Gaekwár, or they and the Mogul together, stood in the relation of Paramount Power. On the conclusion of the treaty of Bassein in 1802, certain portions of the country, amongst which were the scheduled villages, were ceded in sovereignty to the British Government, and, in the year 1815, they were formally added to the Presidency of Bombay and became subject to the Bombay Regulations. As regards the other portions, they have remained Native territory, but by successive steps the Crown has attained the position of Paramount Power over them. Now every Member of Council knows that in the course of building up this empire we have acquired territories and powers in infinitely various ways; that we stand in infinitely various relations to Native Rulers, and that their connection with us has infinitely various degrees of approachment, shading off from almost entire political incorporation to almost entire independence of everything except the ultimate political power necessary for preserving the peace and unity of the country.

"The Káthiáwár States are not among those who enjoy a very large amount of independence on the Paramount Power. They are very numerous—I think 188 in number—mostly very small, and they used to be, until recent times, amongst the most turbulent and lawless people in India. Consequently, we have found it necessary, as rulers responsible for the public peace, to press upon these States some of the institutions essential to orderly government. By various arrangements, the last very important one of which was effected in the year 1863, we have established a Political Agency, have introduced codes of laws, have graded the jurisdiction of the chieftains, and have provided for the administration of justice, partly by the hands of the chieftains themselves, and partly by the officers of our Agency. So much indeed have we done there, that to some it has seemed that Káthiáwár has become part and parcel of British India. But that is not so. All that has been done has been done by, through, and in combination with, the chieftains. Laws made for British India have never operated in Káthiáwár, and though the Paramount Power has been exercised in several departments of government, a certain substantial amount of sovereignty has been left to the chieftains.

"One of the principal Káthiáwár potentates is he who is called the Thákur of Bhaunagar, a State with which we have had relations for upwards of 100 years. He is also, and has been for a great many years, the proprietor of the scheduled villages. Well, the scheduled villages are intermingled with the Thákur's Káthiáwár villages, and great inconvenience and irritation were found to result from the circumstance, that in one village the Thákur, besides being proprietor, was an independent chieftain, making and administering law subject only to the arrangements made by the Agency, while the next village, of which he was also proprietor, was subject to all the minutiæ of law affecting a Bombay Regulation district. The inhabitants of two contiguous villages had the same origin, the same faith, habits, manners and traditions, they looked up to the same immediate superior, while the systems of law by which their affairs were regulated were essentially different. Continual disturbances and complaints arose from this cause, and led to a careful enquiry into the whole matter which was instituted in the year 1859. It was in the result determined that so much of the Thákur's property as had been ceded in sovereignty to the British Government in 1802 should be ceded over to him, subject only to the arrangements made for the Káthiáwár Political Agency.

"Now this is the particular operation with regard to which it has been recently discovered that a mistake was made. It turns out that the instruments which were framed for carrying the intention into effect did not actually carry it into effect. But I have stated to the Council what the real intention was. And of that I speak without doubt or hesitation, not only because the officers who took part in the transaction are clear about it; not only because all parties have ever since its completion treated the scheduled villages as being part of a Native State and no part of British India, but also because there were incidents in the course of the negotiations which set the intention in the clearest and strongest light that is possible.

"The principal one of these incidents I will mention. It did not appear in the course of the litigation I am about to speak of; probably it would not have been admitted in evidence if it had appeared; but we are a political and not a judicial body, and as a piece of moral evidence, I think it will carry conviction to every man's mind.

"The negotiation with the Thákur was embodied in a written agreement, dated 22nd December 1860, the terms of which I shall presently have to state more particularly. Then it was proposed to embody it further in an Act of Council, and a question arose by which Council the Act should be passed,—by the Bombay Council or that of the Governor General. That question got into the hands of a very able predecessor of mine, Mr. Ritchie, who was then the legal adviser of the Government, and whose work I never see except to admire. When the papers came to him he at once put his finger on the critical point. He pointed out that, if Káthiáwár was no part of British India, we were turning the scheduled villages into foreign territory, a thing which should be done by the Executive and not by the Legislature. I will read to the Council what Mr. Ritchie said:—

"'If the province of Káthiáwár be deemed a foreign province, not forming part of Her Majesty's dominions in India, the transfer of Bhaunagar and the ten villages from the jurisdiction of Ahmadábád to that of Káthiáwár cannot be effected by the proposed Bill, or by any Act of either legislature.

"'For the transfer of a portion of British territory in India to a Foreign State is of course not a fit subject for legislation at all. Moreover, it would fall within the prohibition in the Indian Councils' Act against any legislation affecting the allegiance of the inhabitants to Her Majesty, or the sovereignty or dominion of the Crown over that part of Her Majesty's dominions. And supposing the agreement with the Thákur to have been properly ratified in Eng-

land, the transfer to a Foreign State will already have been effected by that agreement, considered as a treaty; and the towns and villages transferred by it would no longer be in British India, or within the jurisdiction, for purposes of legislation, of the Governor General in Council or the Governor of Bombay in Council.'

"It is clear that, if only Káthiáwár was foreign territory, Mr. Ritchie felt no doubt that the Executive might do what was wanted; but he warned the Legislature against having anything to do with it.

"Well, that opinion raised the question whether or no Káthiáwár was foreign territory, and that question was referred back to Bombay. It was found to involve a great deal of research, it elicited different opinions from different minds, and it was finally referred to the Secretary of State in Council, who formally decided that Káthiáwár was not part of British India.

"The decision of the Secretary of State was given in the month of August 1864, and the negotiations with the Thákur were resumed. They were carried into effect by a notification in the Gazette dated 29th January 1866, and no Act of the legislature was ever passed on the subject. The Council therefore will see, that the reason why neither they nor the Bombay Council were asked to pass any law was because, after the issue had been raised and a formal decision given, after great discussion and deliberation, it was intended to make the scheduled villages foreign territory, and therefore British Indian legislation was wholly out of place.

"Now I must proceed to state the circumstances which have led to the discovery that the scheduled villages have in point of law remained British territory. Any one who will look at the schedule of the Bill will see the name of Gángli among the villages. Some time before the notification of 1866, when the villages were clearly British territory, an ordinary suit was brought before the Munsif of Gogo to recover a piece of land situated in Gángli. The claim was defended, apparently with great vigour, and the battle raged with various fortune. The Munsif gave the plaintiff a decree. The Judge of Ahmadábád reversed the decree. The plaintiff appealed to the High Court, who reversed the decree of the Judge and remanded the case for retrial. All that happened before the notification of 1866, and the suit was pending on the remand when the notification was issued. The defendant then took a new point, and objected that the Judge had lost his jurisdiction by the circumstance that the village of Gángli had ceased to be British territory. The Judge overruled the objection, on what ground I do not know, nor is it material, and he set the Munsif's overturned decree on its legs again. Then it was the defendant's turn to appeal to the High Court, and appeal he did, and the question was argued whether the Judge of Ahmadábád had jurisdiction or not. The High Court thought that, if the territory had actually been ceded, the cession would destroy the jurisdiction; but they held that it had not been ceded, because the Crown had no authority to cede any territory at all. This decision was given in the year 1870.

"Now, up to that time the Government of India had been no parties to the suit, but of course they heard of the decision, and it rather disturbed them. The Council will have noticed how entirely it was at variance with the opinion of Mr. Ritchie. It was also at variance with the opinion of the highest legal authorities, the English Crown lawyers, by whom they had been advised, on another case it is true, but on principles equally applicable to the Bhaunagar case. It negatived the existence of a power upon the validity of which the nationality of many territories depends.

"Finding it therefore decided in a private suit that this essential power did not exist, the Government of India contrived, by leave of the Court and by arrangement with the parties, to intervene in the suit. The case was re-argued upon some new materials before the High Court, who adhered to their opinion. It then went to the Privy Council, who deliverd judgment on the 28th March last.

"It will be observed that, up to the point to which I have brought my narrative, it had not occurred to any one to doubt that a *de facto* cession had been made. It was the cardinal fact with which the opinion of Mr. Ritchie, the decision of the Secretary of State, and that of the High Court of Bombay, were all concerned. The only motive of the Government of India for intervening in the suit and appealing was to have the legality of the supposed cession decided. Never was there a more conspicuous illustration of the saying that a blot is not a blot till it is hit.

"It turned out that there was another point in the case, and one which, in the opinion of the Privy Council, rendered it impossible to pass a formal decision upon the great constitutional question. On examining the written Convention of 1860 made with the Thákur of Bhaunagar, their Lordships found that it was not a cession at all. I will read what they say:—

"'The town and port of Bhaunagar were part of the territory to which the 7th Article (that directly bearing upon the present question) relates. That Article is in these words: 'Upon the above conditions Her Majesty's Government agree as follows: Government concede, as a favour, and not as a right, the transfer of Bhaunagar itself, with Wadwá, Síhor, and ten subordinate villages, from the district of Gogo, subject to the Regulations, to the Káthiáwár Political Agency.'

"'This is not the language of cession. It is *primâ facie* nothing more than an engagement for the transfer of the places mentioned (including Gángli), which were then, beyond question, British territory, from a Regulation Province to an extraordinary jurisdiction. The other Articles are consistent with this view.'

"But if the document of 1860 was not a cession, there was clearly nothing else to constitute one. The notification of 1866 simply brought into active operation the document of 1860. I will read it to the Council:

"'It is hereby notified that, in accordance with a convention made between His Excellency the Governor of Bombay and His Highness the Thákur of Bhaunagar, the undermentioned villages belonging to the Thákur of Bhaunagar and situated in the Parganas of Dhanduka, Ranpur and Gogo, Zila Ahmadábád, are from and after the 1st February 1866, Sambat 1922, Maha Vud 2nd, removed from the jurisdiction of the Revenue, Civil and Criminal Courts of the Bombay Presidency, and transferred to the supervision of the Political Agency in Káthiáwár, on the same conditions as to jurisdiction as the villages of the taluqá of the Thákur of Bhaunagar heretofore in that province.'

"Of course if there had been no cession, the villages remained British territory, and the appeal had to be dismissed.

"Perhaps I had better explain here, with reference to the ten villages spoken of in the agreement of 1860 and again in Mr. Ritchie's opinion, that in order to preserve the necessary brevity and clearness, I am obliged to omit some whole stages of these transactions. The negotiations lasted many years, and it was not at first, but later on, that it was resolved to cede the whole of the scheduled villages. Such incidents however are immaterial to the purpose now in hand. Whatever territory was transferred was transferred on the terms of the two cardinal documents, the agreement of 1860, and the notification of 1866, and on these therefore I have concentrated the attention of the Council.

"I am sorry, speaking as a lawyer, to say that failure is not unfrequently the fate of lawsuits instituted in order to get a particular point decided. It is often found that some preliminary objection to its decision exists. But in this instance it is very fortunate that their Lordships have not left us in the dark as to their opinion on the really important point. In their judgment they say this:

"'The Judges of the High Court held that it was beyond the power of the British Crown, without the concurrence of the Imperial Parliament, to make any cession of territory within the jurisdiction of any of the British Courts in India, in time of peace, to a Foreign Power; and on that ground they made the order of the 24th March, 1873, now under appeal, confirming their former order of the 2nd December, 1870. The question, whether the law thus laid down by the High Court of Bombay is correct, was fully and ably argued at this Bar in July last; and their Lordships would have been prepared to express the opinion which they might have formed upon it, if in the result of the case it had become necessary to do so. But having arrived at the conclusion that the present appeal ought to fail without reference to that question, they think it sufficient to state that they entertain such grave doubts (to say no more) of the soundness of the general and abstract doctrine laid down by the High Court of Bombay, as to be unable to advise Her Majesty to rest her decision on that ground.'

"I may add that I have seen a careful report of those full and able arguments to which their Lordships refer, on both sides of the question, and of the interpellations of the Judges, which, even if we had not the collective opinion which I have quoted from the judgment, would leave no doubt on any

one's mind how satisfied they were of the legality of such a cession as that which the Government of India intended to make.

"I suppose that every one will agree that, being able to complete our engagements with the Thákur, we are bound to do so. For all the reasons which originally dictated those engagements exist in full force, with the additional reason that our honour and good faith would be called in question if we did not complete them. Perhaps it is superfluous to say that the Thákur himself is urging us to do so.

"We learned the new position of affairs when we received a copy of the judgment of the Privy Council some time in the month of May last. We have lost no time in communicating with the Bombay and Home Governments, and the result is a notification which is dated the 5th December, and has been issued in the *Gazette* of this morning. Its recitals first tell briefly the story which I have been telling at greater length. It then proceeds :

"'10. And whereas the Secretary of State for India has, on behalf of Her Majesty the Queen of Great Britain and Ireland and Empress of India, given his sanction to the cession intended to be effected by these presents :

"11. The Governor General in Council, with the sanction aforesaid, doth hereby cede and grant to the said Thákur of Bhaunagar, his heirs and successors, the said Scheduled villages, to hold the same unto the said Thákur, his heirs and successors, on the terms and subject to the rules on and subject to which he holds the said Káthiáwár villages.'

"There is then a proviso for resumption of the territory in case of misgovernment. That, we hope, will be construed as a complete cession to the Thákur, and as bringing the legal status of the villages into accord with their actual administration.

"So far for the future. But then, what is to be done for the interval during which these villages have been governed illegally, though in perfect good faith? It is clear that persons who have been subjected to criminal or civil process may bring actions for trespass or assault; that those against whom decrees have been passed may deny the validity of those decrees and litigate the questions decided by them all over again. There has in fact been no legal basis for many of the most important functions of Government for ten years and upwards.

"It is true that there would be much practical difficulty in the way of such litigation by reason of the territory having ceased to be British. I do not suppose that the Káthiáwár Courts would permit land to be brought into litigation afresh merely because there was a technical flaw in the title of the Courts who had adjudicated on it; nor, if they were disposed to do so, could we help or hinder the matter, because that land has passed beyond our jurisdiction. Probably any one who sued in British India on the personal grounds I have suggested would not recover any substantial damages, if he recovered any at all. I do not wish in any way to exaggerate the importance of this Bill. Probably it will prevent little else but some purely frivolous and vexatious litigation for damages, and the retrial of some personal claims. But that is worth preventing, and the Bill is certainly the proper complement to the notification. The notification leaves only a small and uncertain portion of the ground uncovered, and the Bill covers that small and uncertain portion. It says in effect that, so far as any cause of action may exist in British India by reason of the common misapprehension under which all parties have laboured, that cause of action shall be destroyed.

"As regards the particular suit which has raised the difficulty, we are informed that the party who got the original decree in the Munsif's Court,—I am almost ashamed to say how many years ago—is pressing for execution, and that information has made it desirable to be speedy in completing the cession in proper form. I apprehend however that this Bill has no effect whatever on the suit. The suit relates to land now made part of a Native State, and the cession removes that land from the jurisdiction of our Courts. That was the view taken by the High Court of Bombay, and the Privy Council express agreement with them in a passage which I will read. They say—

"'With respect to the competency of the Courts of the Bombay Presidency to proceed with the suit between these parties, if Gángli had, by any valid cession, ceased to be British territory, their Lordships agree with the High Court that the foundation of the jurisdiction of those Courts over the subject-matter of this suit, and the parties thereto, was territorial, and that it could no longer be exercised (whatever might be the stage or condition of the litigation at the time) after such a valid cession had been made.'

"Though therefore the language of this Bill is calculated to stop the suit if we had jurisdiction over the land, the suit is stopped antecedently, and the Bill cannot affect it.

"It depends upon the action of the Council and of the President whether I introduce this Bill to-day; but anyhow it will probably save repetition if I now call attention to its frame. It consists principally of recitals to explain the position which I have been explaining in greater detail. The first section is formal. I will only notice that, on the face of the Bill and elsewhere, we have called special attention to the fact that its operation is confined to British India, and does not embrace the scheduled villages after the cession.

"The second section frees the villages from the Regulations during the interval of the mistake, as they were intended to be freed; and it lays down a foundation for the third section, which carries into effect the main purpose of the measure, the prevention of litigation. The fourth section is merely for the purpose of taking care that no personal jurisdiction which our Courts may have beyond the limits of British India—such as that over European British subjects—shall be lost. It is hardly necessary, and is inserted only for caution's sake.

"There is perhaps a possibility, but it is such a bare possibility, so remote, so conjectural, so improbable, that I hardly like to trouble the Council with it at all, under which the Bill might have a larger operation than I have mentioned. Still we have had some surprises in this matter, and may have others. Suppose it should turn out that what we have done is still only calculated to put the villages under the Káthiáwár Agency and not to alter their nationality. In that case our law would operate in the villages, and section two would have the effect of what we used to call a deregulationizing Act, removing territory from the Regulations, in order that it might fall under a special system of government. But I will not further discuss anything so speculative. In my view the Bill is merely a Bill of peace, and affects only what is past.

"I hope I have now made it clear that this Bill, though it involves a long story, is extremely simple in its nature: that it has only a very limited operation; that so far as it operates at all it must be beneficial; that it is intended to give such validity as this legislature can to acts done by a number of persons in good faith, in the course of their apparent duty, and under the influence of a general mistake; that it does not require any lengthened consideration by this Council; and that it is desirable to pass it as it were *uno flatu* with the notification, and to make, as far as we can, a single and complete end of our long protracted arrangements with the Thákur of Bhaunagar.

"With regard to further proceedings beyond leave to introduce the Bill, I am entirely in the hands of the Council and the President. I cannot say that the Bill is urgent. The notification was urgent; but we have not received notice of any actual litigation which, on our theory of the notification, this law could affect. At the same time we were long ago told by the Bombay Government that such litigation might occur, and were asked to pass an Act of indemnity. The matter has been delayed till the cession could be determined on, and it will be best, as far as possible, to make a single transaction of it. At the same time, if there is a single Member of Council who desires more time to consider the matter, or who thinks it ought to go into Committee, I shall not press my wish to pass the Bill to-day."

The Hon'ble MR. HOPE said he laboured under some disadvantage in addressing the Council, as it was not until this time yesterday that he had received intimation that there was any present intention of proceeding with the Bill; and it was not until the previous evening that he had received some of the papers relating to this Bill, and they were not sufficiently complete to enable him to comment on the measure in the way he had wished to do. On the other hand, he ought not to allow the Bill to pass, giving only a silent vote, as he was the officer to whom had been entrusted the duty of carrying on the negotiations between the Thákur of Bhaunagar and the Bombay Government

on the basis of very complete reports by Mr. Peile, which had resulted in the agreement of 1860. He would not attempt the task, which would be equally superfluous and impertinent, of following the Hon'ble Mover on the technical points upon which he had expressed his opinion, or in the history of the case, which he had explained so completely. At the same time, in view of the possibility at which the Hon'ble Mover had glanced, that the notification which had been issued yesterday might, at some future time, lead to further proceedings, it might be of some use hereafter, if not at present, if he alluded to some remarks in the judgment of the Privy Council, which had not been specially noticed by the Hon'ble Mover, and which might be briefly described as being possibly likely to produce an impression that the agreement of 1860 did not mean a cession of territory, and that there was in fact no foreign territory to cede to on that or any other occasion. The parts of the judgment to which he alluded would be found at pages 8 and 11. In the former, the remarks in regard to the 7th Article of the agreement ran thus :—

"This is not the language of cession; it is *primâ facie* nothing more than an engagement for the transfer of the places mentioned (including Gángli), which were then beyond question British territory, from a Regulation Province to an extraordinary jurisdiction."

And later on at page 11 :—

"What was attempted was, in their Lordships' judgment, neither more nor less than a re-arrangement of jurisdictions within British territory, by the exclusion of a certain district from the Regulations and Codes in force in the Bombay Presidency, and from the jurisdiction of all the High Courts, with a view to the establishment therein of a Native jurisdiction under British supervision and control."

With reference to these remarks, MR. HOPE was in a position to say, in the first place, that what was intended and attempted was not to make any such re-arrangement; what was intended was a complete and effectual cession of territory to a Foreign Power. He would first of all satisfy the Council what it was that was intended at the time, and then endeavour to show that the view then taken of the status of Káthiáwár was the only correct view. It so happened that he was able now to produce before the Council the Guzaráthi agreement, in original, which had been drawn up between himself and the officer who was vested with full powers by the Thákur of Bhaunagar to settle with him on the subject. That agreement did not follow the order of the Articles in the agreement which had been afterwards drawn up, but it showed most clearly what it was the intention of the latter document to do. It stated the several claims of the Thákur of Bhaunagar under main headings, and the first of these was "independent sovereignty," or autonomy, the words used being "swatantra hukumat," in respect of the villages in question. So that it was perfectly clearly understood, both by the Thákur of Bhaunagar and MR. HOPE, that the question was, whether the Thákur was to be allowed to hold them as an independent Ruler, and not as the subject of any Foreign Power. And with regard to the transfer of the villages, all of which were now included in the schedule of the Bill, it was here said that the ones then ceded were to be placed or "thrown under Káthiáwár." In another passage, further on, the words used were that they should be "considered to be in Káthiáwár." That document, as MR. HOPE said, was the original one, showing the terms of settlement. It was shortly followed by a formal one on December 22nd, 1860, between Mr. J. B. Peile, who was on special duty in connection with the case, and had submitted a very full and able report on it to Government, and the Thákur. In this document, the language employed was that "Government concede as a favour, and not as a right, the transfer of Bhaunagar itself, with Wadwá, Síhor, and ten subordinate villages, to Káthiáwár." The next step was an arrangement which bore the same date as that which he had just read, but which was really executed a short time afterwards by Sir George Clerk; then Governor of Bombay, on the occasion of a visit made by him to Bhaunagar. In this, the phraseology was slightly altered, to secure, as it was supposed, greater clearness. The words were—"the transfer of Bhaunagar.....from the district of Gogo, subject to the Regulations, to the Káthiáwár Political Agency." The Bombay Government at that time contemplated the passing of an Act to bar the jurisdiction of the Courts. Owing to discussion on this and some other points, the arrangement was not entirely carried out. In a Convention executed on April 25th, 1866, by

Sir Bartle Frere and the Thákur, the words were substantially the same, or, if anything, rather more forcible, namely, "from the jurisdiction of the laws and Acts of Government to the Káthiáwár Political Agency, on the same terms as the villages now under the Thákur's jurisdiction in Káthiáwár." And the notification of 1866, which the Hon'ble Mover had read, used the same words.

There could therefore be no question, as a matter of personal evidence, so far as evidence could settle it, that what was intended and understood by all the parties was a transfer of British territory to a Native State. He found however in the course of the judgment, that a certain phrase was quoted out of a letter written in 1865 by the Acting Secretary to the Government of Bombay, and it would appear that some remarks in the course of the judgment were based on the meaning of the phrase in that letter rather than on the actual documents and agreements which had passed between the parties. The words used were—"transfer * * * to the supervision, laws and regulations of the Káthiáwár Political Agency," thereby implying, as it were, that there were "laws and regulations" in the Káthiáwár Political Agency as well as in the district under which these villages were first placed. But he would contend that such a document as that could have no value in the face of the actual agreement of the parties, and their well-known and specified intentions. It might be that the agreement actually drawn up did not express the intention in a form exactly calculated to meet the subsequent controversy, which it was then impossible to foresee would arise. But it was the form best suited at the time to express clearly to any one who was acquainted with the status of Káthiáwár what was the real intention of the arrangement.

MR. HOPE would now proceed to show that the view then taken of the status of Káthiáwár was the correct view. He would endeavour as far as possible not to go over the same ground as had been covered by the Hon'ble Mover. Mr. Hobhouse had already told the Council that, in the 17th and 18th centuries, the state of all this part of Guzarát was a very lawless one. MR. HOPE would say that Káthiáwár was almost independent; that the Muhammadan Power had never even in its best days succeeded in completely subjugating that portion of Guzarát; and that at that time whatever power it had was rapidly falling to pieces. The only thing it could do was to send an army occasionally into the province and levy black-mail so far as it could succeed in extracting it by fire and sword.

In the commencement of the 18th century, the new Mahrátha Power sprang up in Guzarát and entered into a series of contests with the Mahammadans, so that the whole province was at the mercy of one or the other Power. Among the Mahrátha leaders was Damají Gaikwár, who was the founder of the present Baroda dynasty, and he having held his own against the Muhammadans, used to make incursions into all parts of Guzarát, including Káthiáwár and Ahmadábád. In the course of time he fell out with the Peshwa, and having got the worst of it, was obliged in 1751 to sign a treaty, by which he relinquished a portion of the districts in his possession and of the tribute he used to levy by sending a force into Káthiáwár.

Matters went on in pretty much the same way until the commencement of the present century, the result of the whole of the operations being that the Peshwa and the Gaikwár succeeded in establishing to a considerable extent their power in certain taluqas on the east and near the coast of Guzarát, but did not succeed in establishing anything more than the practice of raising tribute elsewhere. The portions of the Bhaunagar territory which were now included in the Bill, were some of these portions over which the Peshwa had succeeded in getting such a large share of power. They were nearest to the coast and most accessible from the capital of Ahmadábád, and in the course of time he had established a pretty firm footing in them, but even in them his rights were much less than in adjacent villages not belonging to any Chief.

Similarly, the Gaikwár got well established in certain parganas in Káthiáwár termed Amreli and Okhamandal, which he holds in full sovereignty to the present day. But as regards the rest of Káthiáwár, neither the Peshwa nor the Gaikwár ever had any definite power other than that of levying tribute or black-mail. This was sufficiently evident to any one who had studied the history

from 1735 downwards, with the details of which MR. HOPE would not trouble the Council.

The next step in the matter was, that after the treaty of Bassein in 1802, by which the Peshwa's own possession of Gogo and Bhaunagar was transferred to us, we exercised our jurisdiction in them as we thought fit, and we found that we had also certain rights or interests in the tribute of Káthiáwár. Governor Duncan addressed a letter in 1804 to General Sir Arthur Wellesley, which set forth very clearly what the intention of the Government of that day was. He proposed that a force should be sent to Káthiáwár, and observed: —

"The extent of our interests in taking part in a Mulukgíri expedition through Káthiáwár may be viewed as comprehending the following objects:"

The first object Mr. Hope need not read, he explained, because it was one of general policy unconnected with Káthiáwár. The letter went on thus:—

"*Second.*—We shall see that the Mulukgíri funds are not misapplied.

"*Third.*—We shall secure payment of our own *Warrats* or assignments on these Mulukgíri collections.

"*Fourth.*—We may, if you please, obtain some possessions in Káthiáwár—such, for instance, as Porbandar. * * * *

"*Fifth.*—We shall be able to improve the Mulukgíri system so as to answer better the objects of humanity and the interests of the Gaikwár and Peshwa's Government."

This clearly showed that, at that time, we had not any "possessions" of our own in Káthiáwár. In consequence of that, a force did go into Káthiáwár, and the eventual result was that agreements were entered into by the Chiefs. As regards the character of those agreements, MR. HOPE would quote a letter from the Bombay Government in 1831:

"On our first interference in 1807-08, Lieutenant-Colonel Walker promulgated, by an address to the Chiefs, the object we had in view, and proclaimed that this was confined to the settlement of the regular payment of their tribute; that no encroachment on their landed rights or their independence was contemplated, and that the state of possession and power as it then existed was to be guaranteed; and at the same time both the British and Gaikwár Governments concurred in the policy of abstaining from a spirit of aggrandizement, and from every encroachment on the rights and possessions of the Chiefs. On the faith of these assurances, the Chiefs entered into the measures suggested to them," &c.

He would also call a better witness than the letter of the Bombay Government, and that was Colonel Walker himself, who, in a report made in 1808, shortly after he had effected this settlement, with reference to a subsidiary arrangement by which the Gaikwár revenue due from this very State of Bhaunagar was transferred to the Hon'ble Company. What he said was:

"The general superintendency which the Company have acquired over the Rájá as a tributary, and the control of a valuable and extensive line of sea-coast, afford both the right and the means of regulating the conduct of the Rájá in every affair that bears relation to foreigners, or is inconsistent with our policy. This does not, however, convey any right on our part to interfere in the internal concerns of the Bhaunagar territory. In this respect the Chieftain of Bhaunagar still retains every right he previously possessed, undiminished by the transfer of his tribute to the Company. These rights consist in the exercise of every species of authority within his own territories, either of a revenue, fiscal or judicial nature, and are limited only by his general obedience to the superior Government as a tributary."

Nothing could be clearer than these terms, and MR. HOPE would invite the special attention of the Council to them. Subsequently, in a memorandum for the future management of the affairs of Káthiáwár and the Mahikánta, which the Gaikwár passed to the Bombay Government in 1820, it was provided that, "with a view to the tranquillity of the country and to the peaceable realization of His Highness the Gaikwár's tribute," the Gaikwár should send no troops into either of those tracts without the consent of the British Government, and make no demands on any one there except through them. Now the Privy Council in the judgment gave a sketch of what the tributary relations of these Chiefs of Káthiáwár were, which he had not verified, but believed was generally correct. It was said that "the entire number of Káthiáwár States under separate Chiefs (large and small) is 188: of whom, 96 pay tribute to, or in right of, the British Government only; 70 to, or in right of, the Gaikwár only; and 9 (of whom the Thákur of Bhaunagar is one) to, or in right of, both Governments."

Now he would ask any person who contended that Káthiáwár was British territory, on what date and by what arrangement it became so? As regards a great portion of it, the right which we possessed was simply the right to collect the Gaikwár's tribute for him. As regards another portion, we collected both the Gaikwár's tribute and our own. MR. HOPE found no treaty, or agreement, or arrangement, by which the Gaikwár transferred to us the sovereignty (if it belonged to him) of the States which paid tribute to himself; no agreement by which it was ever intended that the States which paid tribute both to us and the Gaikwár should become more British than Gaikwár territory, or the joint-territory of both. In point of fact, he thought a careful scrutiny of the leading documents of those days could not lead to any conclusion other than that the whole territory was as completely foreign territory as that of the Nizám or of the Gaikwár of Baroda. The Government had been described as being throughout India the Paramount Power, and its position with regard to Káthiáwár was the same as that which it held towards the Nizám of Haidarábád, or the Gaikwár of Baroda, with this addition, that it possessed a certain right, which might be termed a rent-charge, in some of the States. But the fact of possessing such a rent-charge did not constitute those States British territory. Or, to take a further illustration, the British Government, by enforcing and collecting all the different tributes due to other Powers, no more became the owner of the whole territory than the German Government became the owner of France, or France became German territory, from the fact that the former imposed a large contribution upon the latter, or would have become so, even if the contribution imposed had been in the form of an annual tribute to be paid for ever.

In addition to these statements, which MR. HOPE had taken from treaties and documents, he could add his personal testimony as to what had been the universally accepted opinion of the Political officers of the earlier period of British interposition. It so happened that it had been his official duty previous to 1860, and for five years before he took up this matter, to spend several months in every year in Káthiáwár and the rest of the Native States in the Bombay Presidency; and in the course of his duties, he naturally became personally acquainted with the views, the position, and the condition of almost every State in Guzarát. He was also on terms of intimacy with the older class of Political officers—Colonel Laing, who had been some thirty years in Káthiáwár, Colonels Keily, Whitelock, Barr, Short, Black and others, every one of whom had now passed out of the country—and he could safely say, that if the theory had then been propounded that Káthiáwár was British territory, they would one and all have at once repudiated it. Moreover, the view that it was not so had been repeatedly taken by the Court of Directors, as early as 1824, and again in 1858, and was more lately affirmed by the Secretary of State himself.

It might be thought that the history of the gradual establishment of Courts in the interior militated against his argument. They had a tolerably correct sketch of that history given in the judgment of the Privy Council; but MR. HOPE would point out that it was a fundamental error to suppose that though, in virtue of being the Paramount Power, we might certainly interfere, we had done more in establishing these jurisdictions than gradually to interpose, with the outward concurrence, at least, of the Chiefs themselves, and after full consultation with them, for the public good. No doubt the Government found it necessary to interfere in the affairs of Baroda; and it might be necessary to interfere for the public safety with any State however independent. But it was impossible to argue from that that such State was British territory, or had anything British about it. To have established these Courts on any other basis than that on which we had done so, would have been a most unwarrantable usurpation, and would have justified far more serious objection than in any case was actually offered to it.

He feared he had wearied the Council with these explanations. He could not however let pass the opportunity of placing these facts on record, and he ventured to hope that, if ever hereafter this judgment should be made the basis of, or afford a suggestion for, fresh proceedings, whether in the case of

Bhaunagar or any other State in Political Guzarát, they might prove to be not wholly valueless.

The Hon'ble MR. HOBHOUSE said he was not quite certain whether his Hon'ble friend Mr. Hope considered that the judgment of the Privy Council involved the opinion that Káthiáwár was British territory. MR. HOBHOUSE considered that the Privy Council had pronounced no such opinion; on the contrary, they had carefully guarded against it. That question was not before them, nor had they the materials for a decision upon it. Their view was, as he understood it, that the Káthiáwár Political Agency consisted of a bundle of distinct States knit together by the bond of one administration set up by the British Government, and that it was quite consistent with the form of that administration that some of those States should be British territory and others not. Therefore, they held that the document of 1860, which only professed to transfer, not to the Thákur of Bhaunagar as the present notification did, but only to the Political Agency of Káthiáwár, was perfectly consistent with an intention that the villages should remain British territory, whatever might be the character of the Káthiáwár States themselves.

The Hon'ble MR. HOPE said that, with the permission of the President, he would merely explain, with reference to what had fallen from the Hon'ble Mover, that he was aware that the Privy Council had abstained from deciding that Káthiáwár was British territory. The judgment was somewhat obscure, and its meaning had sometimes to be arrived at by inference. No doubt the explanation suggested by Mr. Hobhouse was the correct one. At the same time, as the judgment contained passages which, if they did not indicate a tendency on the part of their Lordships to think that Káthiáwár was British territory, might be made use of by others to support a fresh argument to that effect, he had thought it best, in view of the possibility of the question being raised at some future date, to which the Hon'ble Mover had alluded, to take this opportunity of placing on record both the view of the status of Káthiáwár held in 1860, and the grounds for believing that view to be correct.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE then applied to the President to suspend the Rules for the Conduct of Business.

The PRESIDENT declared the Rules suspended.

The Hon'ble MR. HOBHOUSE then introduced the Bill and moved that it be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill be passed.

The Motion was put and agreed to.

The following Select Committee was named:—

On the Bill to consolidate and amend the law relating to the management and preservation of Government forests in the province of British Burma—The Hon'ble Mr. Hobhouse, the Hon'ble Sir A. J. Arbuthnot and the Hon'ble Mr. Cockerell and the Mover.

The Council adjourned to Wednesday, the 13th December 1876.

CALCUTTA;

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 13th December 1876.

PRESENT:

Major-General the Hon'ble Sir H. W. Norman, K.C.B., Senior Member of the Council of the Governor General of India, *presiding*.
His Honour the Lieutenant Governor of Bengal, K.C.S.I.
The Hon'ble Arthur Hobhouse, Q.C.
The Hon'ble E. C. Bayley, C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
The Hon'ble R. A. Dalyell.
The Hon'ble T. C. Hope.
The Hon'ble J. R. Bullen Smith, C.S.I.
The Hon'ble F. R. Cockerell.

LAND IMPROVEMENT BILL.

The Hon'ble MR. HOBHOUSE moved that the Report of the Select Committee on the Bill to amend the Land Improvement Act, 1871, be taken into consideration. He had next to no remark to make about this Report. He had explained fully to the Council what the object of it was, namely, to put the relations of lenders and borrowers on a clear footing, and on the footing which was intended when the Act of 1871 was framed. That had been done, and in that part of the Bill, which was the only important part, the Committee had made no alteration. They had made two small alterations in two other sections of the Bill, both of which were mentioned in the Report, and he need not trouble the Council with any details with regard to them.

The Motion was put and agreed to.

The Hon'ble MR. HOBHOUSE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

INDIAN MUSEUM BILL.

The Hon'ble MR. BAYLEY moved that the Reports of the Select Committee on the Bill to provide for the management of the Public Museum at Calcutta be taken into consideration. He had already explained the objects of the Bill, which were, in the first place, to give effect to the arrangement whereby the Government was relieved from the necessity of providing accommodation for the Asiatic Society in the new Museum building according to a mutually satisfactory arrangement between the Government and the Society; the second object being to define the legal position of the Government; and the third, to improve the constitution of the body of trustees itself and to facilitate their work. The Bill as amended provided, he hoped, satisfactorily for these objects.

The Hon'ble MR. HOBHOUSE begged to express his satisfaction, he being one of the trustees of this institution, at the alterations made by the Bill in the constitution of that body. For some years of his life it was a principal part of his duty to watch the operation of bodies of trustees, and to find the best modes of constituting them. And the conclusion he came to about *ex officio* trustees was that the best of all trustees was an *ex officio* trustee whose office connected him with the institution of which he was a trustee; but that an *ex officio* trustee whose office had no connection with the institution

of which he was trustee, was the worst of all trustees. He did not then think that he should live to exemplify part of his own theory. But it so happened that the Governor General in Council thought fit to appoint him Vice-Chancellor of the University of Calcutta. Then he found that he was summoned to a meeting of trustees of the Museum. At first he thought they had done him the honour of electing him a trustee without his consent, and he asked to be relieved from the office. But he was informed that by accepting the office of Vice-Chancellor of the University he had become a trustee of the Museum. He ventured to say that a more inefficient and in every respect a worse trustee of the Museum could not be found. He knew nothing of the business, and from want of leisure could not learn about it by study. He was only a useless encumbrance on any discussion that might arise, and his signature to papers he did not understand was a sham. The consequence was that he was obliged to excuse himself from attending the meetings of the trustees, and he had in fact taken no part except a passive one in business of the trust except such business as was connected with the preparation of this Bill.

The Bill proceeded on the ground that it was not desirable to have a number of *ex officio* trustees who were unconnected with the business of the Museum. If the trustees appointed under the Act wanted some official, such as the Vice-Chancellor of the University or any other, it would be easy for them to elect him. The Bill conferred on them the useful power of cooptation into their body to the extent of three members. Consequently if hereafter the trustees desired the presence of some person whose appointment was not provided for by the Charter of the institution, but who appeared to them to be a useful addition to their body, the Bill provided for the appointment of such person. That was the new constitution under the Bill; and MR. HOBHOUSE had no doubt that it would be found much more effectual, because, owing to the constitution of the present body of trustees, it was often difficult to get a quorum at meetings of the trustees.

The Hon'ble MR. BAYLEY had only to say that, as far as the Hon'ble and learned Member had taken a share in the deliberations of the trustees of the Museum, the assistance which he had rendered had been very great, and MR. BAYLEY was able to say that the amendments in the Bill were due to the Hon'ble Member's advice: it was only to be regretted that his other avocations had prevented his taking a larger share in the other business of the Museum.

He wished to explain another point. The Bill recited that the trustees had signed the lists of collections of the Asiatic Society which was required by law. It had been found impossible to get the signatures of all the trustees, as one of the present *ex officio* trustees, the Bishop of Calcutta, was not in India, and another member was at present away from Calcutta. But the lists had been signed by a majority of the trustees, far larger than was necessary to constitute a quorum.

The Motion was put and agreed to.

The Hon'ble MR. BAYLEY also moved that the Bill as amended be passed.

The Motion was put and agreed to.

The Council adjourned *sine die*.

W. BROADFOOT, *Captain, R. E.,*
Asst. Secy. to Govt., Punjab, P. W. D., Irrign. Branch.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21st DECEMBER 1876.

GENERAL REMARKS.—No rain is reported from any part of India during the week except Tinnevelly and Darjeeling. In Madras the area of relief works has been enlarged and prospects are more gloomy. In Bombay and Mysore the situation is unchanged. In the Central Provinces prospects are fair, though the *rabi* is in some districts in need of rain. In Bengal the winter rice harvest is progressing, with an excellent outturn. Reports are good from Assam, Burmah, the North-Western Provinces, Oudh, the Punjab, Rajputana and Central India.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Dec. 18th)	*Nil*	One inch water over anicut; later dry crops failing; prices continue very high; harvest of wet crops commenced; fever and small-pox continue; cholera, seizures 113, deaths 49 in Narsarowpet and Vinukondah taluks; cattle disease in some taluks; fodder and water getting scarcer; markets not well supplied; about 4,000 working on roads and river embankment, 270 fed *gratis* daily by townspeople; number of persons on relief works 2,000; on local fund roads 2,000; Commamur extension commenced.
Kurnool	(„ 19th)	*Nil*	Crops under canal good, portion being harvested; pasture rare; prices slightly falling in Ramalkota, Pattikonda, and Nundial, rising in Cumbum, stationary elsewhere; cholera throughout district, seizures 2,618, deaths 1,501; number on relief works 168,000, exclusive of Cumbum division, from which accounts not received.
Cuddapah	(„ 19th)	*Nil*	People on relief works 80,079, gratuitously fed 633; cholera in 6 taluks, with 203 deaths; 1,000 cattle died from want of fodder and from disease in Royachoty taluk.
Bellary	(„ 19th)	*Nil*	Cholera in 9 taluks; public health otherwise good; no cattle disease, but fodder scarce; 238,000 persons on relief works, 15,300 fed, of whom 2,400 by private charity.
Nellore	(„ 19th)	*Nil*	Number on district relief works 32,000, number gratuitously fed 440; number on east coast canal reported for one section of 1st Division 1,250; cattle suffering for want of fodder, and in several taluks from disease; relief also given in municipal poor-house by means of a fund from private subscription.
Chingleput	(„ 19th)	...	Number on relief works 32,086, gratuitously fed 457; cholera, fever, and small-pox in parts; pasture insufficient, and water scarce in parts.
North Arcot	(„ 19th)	*Nil*	Number on relief works 15,822, gratuitously fed none; cholera and fever in some parts; health of cattle generally good; pasture insufficient.
Salem	(„ 19th)	*Nil*	Number on relief works 14,033, number gratuitously fed none; cholera in all taluks, except Tripatore; cattle dying in parts from *comari*.
Coimbatore	(„ 19th)	...	Number on relief works 11,278; no rain; cholera increasing; deaths 349 in 6 taluks; cattle in parts of northern taluks said to be dying from scarcity of fodder and water; no cultivation; want of water general.
Tanjore	(„ 19th)	*Nil*	Rivers dry; no supply to tanks; water over anicuts none; *punjah* cultivation very small extent; crops not doing well; no harvest; pasture failing; markets badly supplied; prices very high; cholera increasing, seizures 159, deaths 103; fever and small-pox in some parts; cattle healthy; number fed from ex-Rajah's Chuttrum Fund as famine relief, 8,300.
Madura	(„ 18th)	*Nil*	Number on last day of week on relief works 4,708, number fed *gratis* 2,028; cholera in some villages of Pulni taluk; cattle not thriving, owing to scarcity of fodder and drinking water.
Tinnevelly	(„ 19th)	...	Moderate rain in the river valley; freshes in Tambrapurni on 12th and 13th; crops under it in good condition; prices rising; pasture scanty; cholera *increasing*; number on relief works 8,371, gratuitously fed *nil*; cattle in good condition.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—continued.		
Malabar (Dec. 19th)	*Nil*	Second crop withering; markets well supplied; prices slightly risen in taluks adjacent to Railway; in other taluks stationary or slightly fallen; cholera in Kottayom and Palghaut, 3 deaths; small-pox and fever in some parts; cattle disease in 4 taluks; pasture sufficient.
		General Remarks.—General prospects more gloomy; area of relief works enlarged, also numbers working and fed.
Bombay— (Dec. 21st)		
Sind. (Dec. 20th)		
Kurrachee ...	...	Small-pox in Kurrachee and Tátta towns and talukas, also in one tuppa of Shahbandar taluka and in Kohistan; much cattle disease in districts, 427 head died in Ghorabári, *rabi* crops well.
Shikárpur ...	...	*Rabi* crops well; weather colder; fever decreasing.
Hyderabad ...	...	Small-pox in talukas Tando, Alahyar, Moro, and Hála in Hyderabad city, cases 89, deaths 21; in all 1,398 cases to date.
Upper Sind Frontier ...	...	Weather cold; no change in crops; fever and cold prevail.
Guzerat.		
Ahmedabad ...	...	No change.
Kaira ...	...	No change; weather cold and pleasant.
Surat ...	...	No change.
Broach ...	...	Crops good; fever continues.
Khándesh and Násik.		
Khandesh ...	...	People in distress; *rabi* crops failed; fever prevailing in several talukas.
Násik ...	...	Fever and small-pox increasing; *rabi* crops inferior.
Konkan.		
Tanna ...	...	*Rabi* crops not in good condition; cholera in a village in Karjat taluk; fever throughout collectorate; small-pox in 3 villages in Wara taluk; and slight cattle disease in Kalyan taluka.
Deccan.		
Poona ...	...	Public health good.
Ahmednagar ...	...	Cholera in one taluka, cases 15, deaths 4; people of affected villages still migrating with cattle.
Sholapur ...	...	Condition of people unchanged.
Satara ...	...	Condition of the people and crop same as before; one death from cholera in Khatao.
Southern Mahratta Country.		
Belgaum ...	...	Cholera in Chibori, Gokak, and Athni talukas; deaths 117.
Dharwar ...	...	Sporadic cholera exists.
Kanara ...	...	Condition of people good; crops fair; partial failure in eastern villages; 17 deaths from cholera above ghâts.
Kaládgi (Dec. 18th)	...	*Rabi* prospects bad; cattle dying from want of fodder.
Kattywar and Gaekwar's Territory.		
Rájkot ...	...	No change.
Wadhwán ...	...	Weather cold; health and crops good.
Baroda ...	...	Cotton crops in good condition.
		General Remarks.—Small-pox very prevalent in Kurrachee and Hyderabad. Crops as before in Sind and Guzerat; no improvement in Deccan or Southern Mahratta Country.
Bengal—		
Chittagong ...	*Nil*	Weather cool and seasonable; the harvesting of paddy continues; cholera still prevails at Anwara, Banskhali, Patikchari, Patea-Raojan, Kumeria, Chittagong town, Seetacoond, and Jaldi; small-pox reported from the town.
Noakholly ...	*Nil*	Weather seasonable; the harvest in the north of the district will be very fair; the paddy left in the islands is being reaped; cholera is still very bad in the inundated tracts, but appears to be abating throughout the district.
Chittagong Hill Tracts...	*Nil*	Weather very cold, foggy in the morning; cotton is already gathered; mustard is sown, and in some places the early-sown plants have flowered.
Hill Tipperah ...	*Nil*	Weather seasonable; state and prospects of the crops are good.
Backergunge ...	*Nil*	Weather seasonable; the cutting of the *agrahan* crop is now general; the *pous* crop has, it is feared, been more severely damaged in the plains in the interior of the district than was anticipated before; cholera is still very prevalent.
Furreedpore ...	*Nil*	Weather fine and cold; state and prospects of the crops are good; much of the rice crop has been reaped; mustard, radishes, tobacco, &c., are doing well; much cholera and fever prevail in the district; the former prevails in the low-lying thanas, and the latter in the comparatively higher land thanas.
Dacca ...	*Nil*	Weather seasonable; state and prospects of the crops are favourable.
Mymensingh ...	*Nil*	Weather fine and cold; new rice is being brought to market in large quantities; cold-weather crops are promising.
Tipperah ...	*Nil*	Weather cold; state and prospects of the crops are good; the *áman dhan* is being cut in several places.

INDEX TO
The Gazette of India.
EXTRAORDINARY,
JULY TO DECEMBER 1876.

August 18th, 1876.—Proclamation publishing an Act passed by Imperial Parliament of Great Britain and Ireland, together with a Royal Proclamation notifying assumption by Her Majesty of the title of "Empress of India." Also notifies the intention of His Excellency the Viceroy and Governor General of India to hold an Imperial Assemblage at Delhi.

September 22nd, 1876.—Observation on the causes of the depression of silver relatively to gold, and its effects upon the financial, commercial and social interests of the Indian Empire.

September 26th, 1876.—Notifies that His Excellency the Viceroy will leave Simla upon his autumn tour.

October 17th, 1876.—His Excellency the Governor General will visit certain parts of India unaccompanied by his Council. Major General the Hon'ble Sir H. W. Norman, K.C.B., to be President of Council during such visit, and Governor General and President to exercise certain powers.

December 6th, 1876.—Certain scheduled villages in Káthiáwar ceded to the Thákur of Bhaunagar, his heirs and successors.

December 15th, 1876.—Notifies expected arrival at Calcutta of His Grace the Duke of Buckingham and Chandos, K.G., Governor of Madras, and arrangements for his reception.

December 26th, 1876.—Notifies public entry of His Excellency the Viceroy and Governor General into Delhi and arrangements and procession connected therewith.

December 27th, 1876.—Notifies that a deputation from His Excellency the Viceroy and Governor General proceeded to enquire after the health of certain Chiefs (list of names attached).

December 30th, 1876.—Notifies visits received and returned by His Excellency the Viceroy and Governor General, [illegible] the conferring of banners and medals.

Government Central Press.—No. 151 S, of S.—26-1-77.—1,235.
