No. 246.—The following translation of a letter, dated the 26th April 1877, addressed to Her Majesty's Consul General at Cairo by the Egyptian Minister for Foreign Affairs, relating to the establishment of a new light at the Port of Berberah and the dues that will be charged to vessels entering that port, is published for general information :—

"With the object of affording easy and safe access to the Port of Berberah, the Egyptian Government has caused a lighthouse to be constructed there which will be established and in working order from the 1st June 1877.

According to the description of the Controller General of Ports and Lighthouses, it will consist of a fixed dioptric white light of the fourth order, 76 feet above high water, and visible at a distance of 14 miles.

It is situated in latitude 10° 23′ 0″ North, and longitude 45° 7′ 0″ East of Greenwich.

The light is on the mainland, and by keeping it open to the Eastward of South (magnetic) the Spit of Ras Tamar will be avoided.

The construction, maintenance and service of this lighthouse, established in the interests of navigation and commerce, are a source of considerable expenditure to the Egyptian Government.

In accordance with the usual practice for diminishing charges in analogous cases by means of a contribution from those for whose benefit they have been incurred, it has been decided that every sailing ship (*Sambouk*) entering the Port of Berberah shall pay the low port due of 15 piastres 16 parás (equal to 4 francs) whatever may be its tonnage, and every steam-ship a port due of 1 piastre (about 25 centimes) per ton.

I have the honour to inform you of this decision, and to beg you to be good enough to communicate it to those of your Administration whom it may concern."

Minister of Foreign Affairs.

Foreign Office, May 17, 1877.

The Earl of Derby, Her Majesty's Principal Secretary of State for Foreign Affairs, has received the following despatches from Her Majesty's Consul-General at Odessa and Her Majesty's Consul at Taganrog, forwarding translations of regulations issued by the Russian authorities at the Ports in the Black Sea and Sea of Azof:—

Her Majesty's Consulate-General,
Odessa, May 7, 1877.

MY LORD,

I have the honour to transmit herewith a Declaration issued by the Commander-in-Chief of the Military District of Odessa, containing regulations for the departure of neutral vessels from Odessa at the present time, and specifying on what conditions they will be allowed to leave should the enemy's fleet appear before the port.

I have, &c.,

The Right Honourable the Earl of Derby,
Her Majesty's Principal Secretary
of State for Foreign Affairs.

DECLARATION.

The Commander of the Troops of the Military District of Odessa, Chief of the Coast Defences of the District, General Aide-de-Camp Séméka, has the honour of notifying that, in consequence of the laying of torpedoes, ships of neutral States requested to withdraw in view of a bombardment, cannot do so except on condition of being piloted by Russian officers through the passages left between the torpedoes; but as this operation carried out in the face of the enemy might point out to them the position of these passages and enable them to make use of them, thereby depriving the town of its most important line of defence, General Aide-de-Camp Séméka, in view of a state of affairs new in maritime warfare, and consequently not foreseen by International law, has the honour to request the enemy's ships of war to withdraw out of sight for the time necessary for the removal of neutral ships (namely, for hours), warning them that if they do not agree to this demand, neutral ships will not be allowed out, and the Imperial Russian Government declines all responsibility for the consequences.

Her Britannic Majesty's Consulate,
Taganrog, May 4, 1877.

MY LORD,

I have the honour to hand herewith a notice sent to me by His Excellency the Governor of Taganrog, who at the same time has given assurance that every assistance will be afforded to foreign vessels of friendly neutral powers on their passage at the respective ports, in order that trade may not be impeded.

I have, &c.,

Her Majesty's Principal Secretary of

Approved by the Commander of the Odessa Military Department, April 12, 1877.

NOTICE.

From the time of the declaration of war ($\frac{12}{24}$th April, 1877) the entrance of, and the departure of vessels from, the Port of Odessa, from Liman of the Dnieper, and from the Boug, the Straits of Kertch, and the Bay of Sebastopol, is only permitted subject to the following conditions, which are not provided for by Maritime International law, but which must necessarily arise now that harbours are protected by barring them with mines, the passage through which is kept absolutely secret:—

1. Every vessel on arriving must stop outside the line of mines. Russian officers with a crew will go and meet her; they will assume command of the said vessel and navigate her into the harbour, after having satisfied themselves that the ship's papers are in regular order.

2. The Captain of the said vessel shall engage in writing on behalf of himself and his crew and passengers that, while passing through the line of torpedoes, no person shall remain on the bridge, or watch through portholes or other openings the course followed by the ship.

3. The same rule shall be enforced when merchantmen quit the harbour; that is to say, a Russian officer and crew shall, in conformity with Articles I and II, take command of the said vessels.

4. If a man-of-war should make its appearance at a spot whence it would be possible to watch the entry and departure of vessels, the Russian authorities will insist upon its retiring to a certain distance, during a period of time sufficient to navigate a vessel in or out. Until this formality is complied with, no vessel will be allowed to enter or leave.

Proclamation de S. E. Le Serdar Ekrem concernant les mesures prises sur le Danube.

Le commandant des forces, usant du droit et de la faculté qui lui appartiennent, proclame ce qui suit:

La guerre ayant éclaté entre l'Empire Ottoman et la Russie, la partie du Danube qui est entourée du sol ottoman est considérée comme ligne de défense. Les règles suivies ailleurs à l'égard de la navigation et du commerce des bâtiments neutres ne sont pas applicables ici. En conséquence il est interdit à tout navire de circuler et de faire des opérations commerciales dans cette partie du Danube.

Les règles relatives à l'espionnage seront appliquées à partir du 21 Avril (v. s.) à l'égard des capitaines et des patrons de tous bateaux à vapeur ou autres, petits ou grands, qui enfreindraient cette défense ou qui n'auraient pas recours à l'autorité.

Les bâtiments comme leurs cargaisons seront saisis et confisqués.

Toutefois, le chargement de tout navire détenu jusqa'au 21 Avril sur les points visés du Danube, s'il ne consiste pas en contrebande de guerre n'est pas saisissable.

La présente décision est d'une application générale. Les autorités civiles et militaires tiendront la main à sa stricte exécution.

Sublime Porte.

Proclamation of His Excellency the Serdar Ekrem concerning the measures taken on the Danube.

The Commander of the Forces, making use of the right and power belonging to him, proclaims as follows:

War having broken out between the Ottoman Empire and Russia, the part of the Danube surrounded by Ottoman soil is considered a line of defence. The rules followed elsewhere with regard to the navigation and commerce of neutral ships shall not be applicable here. Consequently all vessels are prohibited from passing up and down and carrying on commercial operations in this part of the Danube.

The rules relating to spies shall be applied from the 21st of April (old style), in the case of captains and masters of all steam or other ships, large or small, who infringe this prohibition, or do not apply to the authority.

The ships as well as their cargoes shall be seized and confiscated.

Nevertheless, the cargo of ships detained up to the 21st of April on the points of the Danube referred to shall not be liable to seizure if it does not consist of contraband of war.

The present decision is to have a general application. The Civil and Military authorities will attend to its being strictly carried out.

MARINE DEPARTMENT.

Simla, the 29th June 1877.

APPOINTMENTS AND PROMOTIONS.

No. 14.—Mr. R. D. C. Brownlow is appointed a 4th grade officer in the Indian Government Marine.

The 6th July 1877.

ORGANIZATION.

No. 15.—The Right Honourable the Governor General in Council is pleased to direct that the whole of the marine establishments afloat and on shore now employed under the several governments and provinces of India shall be amalgamated into one Imperial Service, to be designated "Her Majesty's Indian Marine."

2. This service will be entirely under the Supreme Government of India, and such portion of it as may be required for service within the limits of minor governments and other local authorities shall from time to time be placed at the disposal of those authorities for the discharge of their current duties.

3. All officers and others belonging to Her Majesty's Indian Marine shall be brought upon an amalgamated list according to their several ranks, grades and classes, and shall, no matter where serving, be subject in future to the same regulations in regard to employment, pay, &c.; and all existing vessels, whether in Bengal, Bombay, or elsewhere, shall be placed on one list and classified and employed under the orders of the Government of India.

4. The officers of Her Majesty's Indian Marine will, so far as may be considered advisable, bear the same titles as officers of the Royal Navy and will have the same relative army rank.

5. The first appointments of officers to Her Majesty's Indian Marine will be made by the Secretary of State for India in Council, their subsequent promotion, and the appointment and promotion of warrant and other subordinate officers without commissions will be made by the Right Honourable the Governor General in Council.

6. All officers appointed to Her Majesty's Indian Marine will be considered on probation, subject to confirmation on passing certain professional and lingual tests, which, together with the qualifications to be required for the higher grades, and the periodical examinations to be passed prior to promotion, will be duly notified hereafter.

7. All Marine establishments, dockyards and vessels on the eastern and western sides of India will respectively be placed under two "Superintendents of Marine," one of whom will reside at Calcutta, and the other at Bombay. These officers will have the rank of captain in Her Majesty's Indian Marine, and will be immediately under the orders of, and responsible to, the Government of India for the discipline, interior economy and efficiency of the establishments, dockyards and vessels within their respective limits, and over which they will exercise a general control. They will also be the advisers of the local governments in all subjects connected with marine matters and the establishments in their charge, as well as the channel of communication between local governments and the vessels at the disposal of those governments.

8. The Superintendents of Marine will be assisted in the discharge of the duties of their office by such officers and establishments as may be considered necessary.

9. The present titles of Master-Attendant, Harbour-Master, &c., connected with duties appertaining to the Mercantile Marine and the Board of Trade, or other Local Marine Service, will be abolished, and in lieu such officers will be styled "Port Officers." These appointments will be hereafter clearly enumerated and classified, and, under regulations to be laid down, will be held for fixed periods by selected officers of the Indian Marine, who will, whilst holding such appointments, retain their rank and position in the general list of the service, and be otherwise eligible for promotion, advancement, transfer &c.

10. The *personnel* of the Marine Service in all classes and grades, wherever employed, will remain under the general control of the Government of India; and such portion as may be placed at the disposal of local governments and authorities will not be liable to transfer or removal without the previous sanction of the Government of India, except in cases of emergency which are to be immediately reported.

11. Officers and others now holding Marine appointments in India, whether under the orders of the supreme or local governments, &c., shall at once become subject to the provisions of the foregoing paragraph, but will in other respects retain their present designations, position, appoint-

ments and allowances until it may be otherwise ordered. Those officers now serving who may be selected for Her Majesty's Indian Marine will hereafter be gazetted to the grades and ranks for which the Right Honourable the Governor General in Council may consider them suitable, and in accordance with their several claims.

12. Pilot establishments, local lights and light vessels, conservancy of rivers and ports, shipping duties, &c., will not hereafter form part of the Indian Marine Service; such will be placed as far as practicable under local authorities or port or harbour commissioners, excepting in regard to the selection of officers for the superior appointments as provided for in the following paragraph.

13. Establishments for services of a permanently local nature, whether on shore or in vessels, on rivers or in harbours, will be recruited as regards the superior appointments from the Indian Marine Service under the conditions of paragraph 9, and all such appointments will be made by the supreme government on receipt of a report of the vacancy from the local government or authority.

14. The native and other subordinate establishments for such local services (within the limits of the amount of charge to be prescribed from time to time by the Government of India) will be appointed or promoted by the local governments under regulations to be laid down by the Government of India: such subordinate establishments will not as a rule be liable to transfer for service in other provinces.

15. For administrative purposes the Indian Marine will, as at present, be under the Military (Marine) Department of the Government of India, and an officer of nautical and local experience will be appointed an assistant secretary to the Government of India in the Military (Marine) Department.

16. An Act to provide for the maintenance of discipline in Her Majesty's Indian Marine will be laid before Parliament, and detailed instructions will hereafter be issued in regard to the organization of the Indian Marine and Dockyards, the uniform of officers and men, and the pay, pension and leave to which they will be entitled. Pending the issue of such instructions all existing orders not hereby altered will remain in full force.

No. 1918*G*.—The following extract from the *London Gazette*, dated the 5th of June 1877, is published for general information :—

Foreign Office, June 4, 1877.

The Earl of Derby, Her Majesty's Principal Secretary of State for Foreign Affairs, has received from Her Majesty's Ambassador at St. Petersburg the following Decree, which has been issued by the Russian Government for the guidance of the Russian authorities during the present war in matters relating to the Governments and subjects of Turkey and of the Neutral Powers, and defining the articles which are to be considered contraband of war :—

Saint-Petersbourg, 13 *Mai*.

Le Bulletin des Lois publie dans son No. 41 l'Oukase Impérial suivant au sénat dirigeant en date du 12 Mai :

En présence de l'état de guerre qui existe entre la Russie et la Turquie, S. M. l'Empereur ordonne à toutes les autorités et à tous les fonctionnaires militaires et civils que les présentes concernent de se conformer, pendant la guerre actuelle, aux dispositions ci-après, à l'égard de la puissance ennemie et de ses sujets, ainsi que des Etats neutres et de leurs sujects :

I. Les sujets de la Porte qui ré-ident dans l'Empire sont autorisés a continuer pendant la guerre leur séjour et l'exercice de professions paisibles en Russie, sous la protection des lois Russes.

II. A l'égard des navires de commerce Tures que la déclaration de guerre a trouvés dans des ports et havres Russes, confirmation est faite de la disposition en vertu de laquelle ils sont libres de sortir de ces ports et de prendre la mer durant le délai nécessaire pour leur permettre de charger des marchandises ne constituant pas des objets de contrebande de guerre.

III. Les sujets des Etats neutres peuvent continuer sans obstacles leurs relations commerciales avec les ports et villes Russes, en observant les lois de l'Empire et les principes du droit international.

IV. Les autorités militaires sont tenues de prendre toutes les mesures nécessaires pour assurer la liberté du commerce légitime des neutres, pour autant qu'elle est permise par les conditions des opérations de guerre.

V. Aux termes de la Déclaration de Paris du 4 (16) Avril, 1856, la course est considérée comme abolie et la délivrance de lettres de marque est interdite.

Conformément à la même déclaration, les règles suivantes doivent être observées à l'égard du commerce des neutres :

1°. Le pavillon neutre couvre la marchandise ennemie, à l'exception de la contrebande de guerre ;

2°. La marchandise neutre, à l'exception de la contrebande de guerre, n'est pas saisissable sous pavillon ennemi ;

3°. Les blocus, pour être obligatoires, doivent être effectifs, c'est-à-dire maintenus par une force suffisante pour interdire réellement l'accès du littoral de l'ennemi.

Ces dispositions de la Déclaration de Paris sont applicables à toutes les puissances, sans en excepter les Etats-Unis de l'Amérique du Nord et l'Espagne, qui jusqu'à présent n'ont pas adhéré à cette déclaration.

VI. Sont réputés contrebande de guerre les objets suivants :

Les armes portatives et d'artillerie, montées ou en pièces détachées ; les munitions d'armes à feu, telles que projectiles, fusées d'obus, balles amorces, cartouches, tubes de cartouches, poudre, salpêtre, soufre ; le matériel et les munitions de pièces explosibles, telles que mines, torpilles, dynamite, pyroniline et autres substances fulminantes ; le matériel de l'artillerie, du génie et du train, tels que affûts, caissons, caisses de cartouches, forges de campagne, cantines, pontons, etc. ; less objets d'équipement et d'habillement militaire, tels que gibernes, cartouchières, sacs, cuirasses, outils de sape, tambours, selles et harnais, pièces d'habillement militaire, tentes, etc., et en général tous les objets destinés aux troupes de terre ou de mer.

Ces objets, lorsqu'ils sont trouvés à bord de navires neutres et destinés, à un port ennemi, peuvent être saisis et confisqués, sauf la quantité qui est nécessaire au navire sur lequel est opérée la saisie.

VII. Sont assimilés à la contrebande de guerre les actes suivants, interdits aux neutres : le transport de troupes ennemies, celui de dépêches et de la correspondance de l'ennemi, la fourniture de navires de guerre à l'ennemi.

Les navires neutres pris en flagrant délit de semblable contrebande peuvent être, selon les circonstances, saisis et même confisqués.

VIII. Pendant la durée des opérations militaires sur le Danube et sur les rives de ce fleuve, le commandant supérieur de l'armée active Russe est tenu de prendre toutes les mesures en son pouvoir afin de laisser libres autant que possible la navigation et le commerce licite des neutres sur ce fleuve et de ne les soumettre qu'à des restrictions temporaires nécessitées par les exigences de la guerre ; ces restrictions doivent être levées aussi promptement que possible.

IX. L'autorité militaire prêtera en outre sa protection particulière aux constructions, aux travaux et au personnel de la commission Européenne du Danube, couverts par le pavillon neutre spécial de cette commission.

X. Conformément à la convention de Genève du 10 (22) Août 1864, relative aux militaires malades ou blessés, les commandants des armées belligérantes sont tenus de respecter les dispositions de cette convention qui stipulent l'inviolabilité des hôpitaux, ambulances et personnel médical de l'ennemi, à la condition de réciprocité de la part de l'ennemi.

Remarque.—Lorsque le gouvernement Turc aura, avec consentement préalable de la Russie, adopté, au lieu du pavillon de Genève avec la croix rouge, un signe distinctif particulier pour ses hôpitaux et ambulances, les commandants des armées belligérantes prendront toutes les mesures nécessaires pour assurer l'inviolabilité des établissements et des personnes placés sous la sauvegarde de ce signe distinctif, conformément à la convention de Genève, si les stipulations de cette dernière sont observées par les autorités Ottomanes.

XI. Conformément à la déclaration de Saint-Pétersbourg du 29 Novembre (11 Décembre), 1868, l'emploi de projectiles d'un poids inférieur à 400 grammes qui seraient ou explosibles ou chargés de matières fulminantes ou inflammables est absolument interdit.

XII. Afin d'atténuer les calamités de la guerre et de concilier autant qu'il est possible et sous réserve de réciprocité les exigences de la guerre avec celles de l'humanité, l'autorité militaire se conformera dans ses actes à l'esprit des principes posés par la conférence de Bruxelles en 1874, en tant qu'ils sont applicables à la Turquie et s'accordent avec le but spécial de la guerre actuelle.

St. Petersburg, May 13.

The Bulletin des Lois publishes in its 41st No. the following Imperial Ukase to the Directing Senate, dated May 12:—

In view of the state of war existing between Russia and Turkey, H. M. the Emperor commands all the authorities and all military and civil functionaries concerned to act during this war in accordance with the hereinafter mentioned dispositions, with regard to the hostile power and its subjects as well as neutral states and their subjects.

I. The subjects of the Porte who reside in the Empire are authorised to continue during the war their stay and the practice of peaceful professions in Russia under the protection of Russian laws.

II. With respect to Turkish merchantmen which at the time of the declaration of war happen to be in Russian ports and harbours, the regulation is confirmed in virtue of which they are free to leave these ports and to go to sea during the period necessary to enable them to load goods not comprising articles which are contraband of war.

III. The subjects of neutral states may continue uninterrupted commercial relations with Russian ports and towns, on condition that they observe the laws of the Empire and the principles of international law.

IV. The military authorities will take all the measures necessary to ensure the freedom of legitimate neutral commerce, as far as is permitted by the state of the war operations.

V. In the terms of the declaration of Paris of the 4th (16th) April 1856, privateering is considered as abolished, and the issuing of letters of marque is forbidden.

In conformity with the same declaration, the following rules should be observed with respect to neutral commerce:—

1. The neutral flag covers the enemy's goods with the exception of contraband of war.

2. Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

3. Blockades, in order to be binding, must be effective, that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

These dispositions of the Declaration of Paris are applicable to all the powers, including the United States of North America and Spain, who up to now have not adhered to this declaration.

VI. The following articles are considered as contraband of war:—

Small arms and artillery, mounted or in detached pieces; ammunition for fire-arms, such as projectiles, fuses for shells, balls, priming, cartridges, cartridge cases, powder, saltpetre, sulphur, explosive materials and ammunition, such as mines, torpedoes, dynamite, pyroniline, and other fulminating substances; artillery, engineering, and transport materials, such as gun-carriages, caissons, cartridge boxes, campaigning forges, canteens, pontoons, &c., articles of military equipment and attire, such as pouches, cartridge boxes, bags, cuirasses, sappers, tools, drums, saddles and harness, articles of military dress, tents, &c., and generally everything destined for military or naval forces.

These articles, when found on board neutral ships, and destined for an enemy's port, may be seized and confiscated, except the amount necessary forthe use of the ship on which the seizure is made.

VII. The following actions, forbidden to neutrals, will be treated in the same way as the carriage of contraband of war, the transport of enemy's troops, of despatches and correspondence, and the furnishing of ships of war to the enemy.

Neutral ships taken while committing such contraband acts may be, according to circumstances, seized and even confiscated.

VIII. During the military operations on the Danube and on the banks of the river, the Commander-in-Chief of the active Russian army is instructed to take all the measures he can to allow the navigation and legitimate commerce of neutrals on the river to be as far as possible free, and only to subject them to such temporary restrictions as the exigencies of war may render necessary, which restrictions are to be removed as quickly as possible.

IX. The military authorities will, moreover, specially protect the constructions, works, and staff of the European Danube Commission, covered by the special neutral flag of this Commission.

X. In accordance with the Convention of Geneva to the 10th (22nd) of August 1864, with respect to the sick or wounded soldiers, the commanders of the belligerent armies are to respect the dispositions of this Convention, which render the enemy's hospitals, ambulances, and medical staff inviolable, on the condition of the enemy's reciprocity.

Remark.—When the Turkish Government shall have, with the previous consent of Russia, adopted in place of the Geneva red-cross flag a special distinctive badge for its hospitals and ambulances, the commanders of the belligerent armies will take all the measures necessary to ensure the inviolability of establishments and persons placed under the protection of this distinctive badge, in conformity with the Geneva Convention, if the stipulations of the latter are observed by the Ottoman authorities.

XI. In accordance with the declaration of St. Petersburg of November 29 (11 December), 1868, the use of projectiles of a less weight than 400 grammes which are either explosive or charged with fulminating or inflammable matter is absolutely forbidden.

XII. With the view of lessening the calamities of war and of bringing as much as possible, and under the reservation of reciprocity, the demands of war into harmony with those of humanity, the military authorities will conform with the spirit of the principles laid down by the Conference of Brussels in 1874, as far as they are applicable to Turkey, and agree with the special object of the present war.

Foreign Office, June 4, 1877.

The Earl of Derby, Her Majesty's Principal Secretary of State for Foreign Affairs, has received from Her Majesty's Ambassador at Saint Petersburgh, the following Decree which has been issued by the Russian Government, on the subject of certain regulations to be enforced in localities where a state of siege is proclaimed:—

Un oukase impérial addressé au sénat dirigeant en date du 12 Mai porte les dispositions suivantes:

Notre oukase au sénat dirigeant en date du 28 Avril a fixé a titre de mesure provisoire un mode de responsabilité particulière pour les civils qui, dans les localités soumises à l'état de siége, se rendraient coupables de crimes d'une haute gravité diriges principalement contre la sécurité ou les interêts de l'Etat et de l'armée. Ayant jugé opportun de porter au nombre des crimes spécifiés au § 1er de l'oukase susmentionné ceux dirigés contre la sécurité de la flotte, Nous ordonnons de livrer à la justice militaire, pour être jugés selon les lois militaires en temps de guerre, les civils qui auraient commis les méfaits suivants dans les localités déclarées en état de siége: la destruction intentionnelle par le feu ou par tout autre moyen, de navires, docks, entrepôts, ou autres constructions navales, ainsi que la destruction intentionnelle ou l'altération des phares ou signaux de reconnaissance.

An Imperial Ukase addressed to the Directing Senate, dated the 12th of May, adds the following regulations:—

Our Ukase to the Directing Senate, dated the 28th of April, has settled, under the head of a provisional measure, a method of imposing special responsibility on civilians who, in places in a state of siege, might be guilty of crimes of great gravity principally directed against the security and the interests of the state and the army. Having thought it desirable to number amongst the crimes specified in section 1 of the above-mentioned Ukase those directed against the safety of the fleet, we order that civilians who shall have committed the following crimes, in the places declared to be in a state of siege, shall be handed over to military authorities, to be judged in accordance with martial law in time of war, namely:—the intentional destruction by fire, or any other means, of ships, docks, depôts, and other naval buildings, as well as the intentional destruction or alteration of lighthouses or signals.

AT THE COURT AT BALMORAL.

The 30th day of Sepetember 1873.

Present.

THE QUEEN'S MOST EXCELLENT MAJESTY IN COUNCIL.

WHEREAS by "The Merchant Shipping Act Amendment Act, 1862," it is enacted that whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant ships, for the time being in force under the principal Act, have been adopted by the Government of any foreign country, and are in force in that country, it shall be lawful for

And whereas it has been made to appear to Her Majesty that the rules concerning the measurement of tonnage of merchant ships now in force under "The Merchant Shipping Act, 1854," have been adopted by the Government of His Majesty the King of Italy, and such rules are now in force in that country, having come into operation on the first day of July one thousand eight hundred and seventy-three.

No. 2060 *G.*—The following extract from the *London Gazette*, dated Friday, the 15th June 1877, is published for general information:—

Foreign Office, June 13, 1877.

The Earl of Derby, Her Majesty's Principal Secretary of State for Foreign Affairs, has received from Her Majesty's Consul-General at Odessa, the following amended notice of the regulations for the entrance and departure from Russian ports in the Black Sea of neutral vessels, which was communicated to the Foreign Consuls by the Governor General of Odessa on the 6th June. The notice is the same as that published in the *London Gazette* of May 18th, with the addition of the last paragraph:—

Approved by the Commander of the Odessa Military District.

NOTICE.

From the time of the declaration of war ($\frac{12}{24}$th April 1877) the entrance of, and the departure of vessels from, the port of Odessa, from the Liman of the Dnieper, and from the Boug, the Straits of Kertch, and the Bay of Sebastopol is only permitted subject to the following conditions, which are not provided for by Maritime International Law, but which must necessarily arise now that harbours are protected by barring them with mines the passage through which is kept absolutely secret:

1. Every vessel on arriving must stop outside the line of mines. Russian officers with a crew will go and meet her; they will assume command of the said vessel, and navigate her into the harbour, after having satisfied themselves that the ship's papers are in regular order.

2. The Captain of the said vessel shall engage in writing, on behalf of himself and his crew and passengers, that, while passing through the line of torpedoes, no person shall remain on the deck, or watch through portholes or other openings the course followed by the ship.

3. The same rule shall be enforced when merchantmen quit the harbour; that is to say, a Russian officer and crew shall, in conformity with Articles 1 and 2, take command of the said vessels.

4. If a man-of-war should make its appearance at a spot whence it would be possible to watch the entry and departure of vessels, the Russian authorities will insist upon its retiring to a certain distance, during a period of time sufficient to navigate a vessel in or out. Until this formality is complied with no vessel will be allowed to enter or leave.

But at the same time Captains are informed that it may happen, that the enemy's war cruisers will refuse to pay attention to the above request, and commence hostilities at once. In that case vessels already in the port will be deprived of the possibility of leaving, and be inevitably exposed to all the consequences that may result from the enemy's fire.

Foreign Office, June 19, 1877.

* The period during which firewood is issued may be extended to four months; fires beginning and ceasing on the dates considered proper by the local Military authorities, but so as not to exceed the limit of four months. At Rawul Pindi, fuel, according to existing scale, may be allowed when necessary where fire-places exist or can be constructed in all rooms necessarily used *during the day*, whether styled dormitories or not. Fire-places are not required for rooms used only as dormitories.

† From 10th June to 10th September only of each year.

‡ To 15th March.

2. All chimneys in family quarters, guard-rooms and regimental staff and other sergeants' quarters are to be considered *small*, and restricted to the scale of fuel laid down for such fire-places. Fuel is to be allowed for *one chimney* for *each separate quarter*.

3. For the fire-place in the quarter-guard of the British Infantry lines at Mecan Meer, fuel is to be issued on the scale laid down in G. O. No. 135 of 1866 for a *large fire-place*.

4. Fuel should be issued *in kind* to bazar, barrack, commissariat and ordnance sergeants doing duty at hill stations and at such stations in the plains where fuel is issued to European troops, at the rate of twenty seers per diem in winter and ten seers in summer; unless where the commissariat cannot arrange for the supply, when compensation at the rate of Re. 1-14-7 per mensem would be claimable month by month, just as the issue in kind would be. Compensation to bazar, commissariat and ordnance sergeants will be paid by the Commissariat Department, and to barrack sergeants by the Public Works Department. Soldier students attached to the Thomason College at Roorkee are entitled to the supply of fuel by the Commissariat Department.

5. Station butchers when compelled to live away from their barracks are entitled to the same allowance of fuel for fire-places as departmental non-commissioned officers.

NOTES.—(*A.*) A non-commissioned officer acting as sub-conductor is entitled to fuel under the decision of Government, published in Commissary General's circular No. 126, dated 14th April 1863.

(*B.*) The wives of commissariat non-commissioned officers, absent from a hill station on command, are entitled to firewood as if their husbands were present.

6. Fuel is to be issued to all medical subordinates of all grades doing duty at hill stations, at the rate of twenty seers per diem in winter and ten seers in summer. The issue is not to be made to any medical subordinate serving in the plains

NOTE.—The issue of fuel to medical subordinates at Dagshai, Subáthu and Kasauli during the months of November and March should correspond with the supply made during those months to the European troops at those stations.

7. Fuel is to be indented for only when the lighting of fires is considered actually necessary by regimental and local authorities.

8. It is not considered essential that the maximum allowance of fuel should be issued without reference to local circumstances. Any unexpended portion of fuel of the previous supply must be included in the indent, and it should be certified thereon that the fuel required is absolutely necessary, and that it will be used *bonâ fide* for the purpose for which allowed by Government.

9. The wood for each fire-place is to be under the care of a non-commissioned officer or soldier.

10. The issue of fuel having been sanctioned by Government, on the opinion of experienced military and medical officers, for only certain stations of the army and during certain seasons, no departure from the rules prescribed for issue in such cases will be permitted without the special sanction of Government. The supply of fuel is not to be dependent on the existence of stoves or fire-places.

11. In the case of outbreaks of epidemic disease, or other extraordinary circumstances, no fixed limit can be either assigned or observed.

NOTES.—(*A.*) In cases of clear and unexpected necessity, the existing orders provide sufficiently for all possible requirements, and the officer commanding the station should, when time does not admit of a previous reference to the Commander-in-Chief or Government, issue the necessary orders on the representation of the principal medical officer.

(*B.*) If a medical officer at a station where the supply of fuel is not authorized considers the issue necessary as *an exceptional measure* in consequence of excessive cold, his opinion should be supported by the Deputy Surgeon-General.

12. The dimensions of firewood for use in barrack and hospital chimneys are to be determined by the officer commanding the corps by which required, subject to the approval, when the executive commissariat officer may consider such necessary, of the officer commanding the station.

13. Pieces of firewood exceeding eighteen inches in length are not to be received from the Commissariat Department, their use in Government buildings being strictly prohibited.

14. An allowance of Rs. 4 per mensem will be made to master tailors for the purpose of providing fuel for the tailor's shop.

15. The issue of fuel for fire-places constructed in the following buildings is admissible under the operation of G. O. No. 135 of 1866:—

Battery Office.	Institute.	Prison Room.
Hospital Nurse's Room.	Library.	Quarter Master's Stores.

16. The supply of firewood is not authorized for the canteens at convalescent depôts.

17. The issue of firewood is sanctioned for hospitals of Native corps at the following stations:—

No. 14 of 1877.—The following Notice to Mariners is published for general information:—

NOTICE TO MARINERS.

CEYLON, SOUTH COAST.

Buoy marking Gindurah rock.

The Master Attendant, Galle, has given notice that an iron buoy, painted *red*, has been laid in 11 fathoms about two cables to the southward of Gindurah rock, from which Edward's pillar is just open south of the lighthouse.

Gindurah rock, on which the sea does not always break, is highly dangerous, having only 9 feet water over its shoalest part; between it and the buoy the ground is foul.

Vessels making for Galle harbour from the westward and northward will, by keeping the lighthouse on an E. by N. bearing, pass nearly 2 miles south of Gindurah rock and clear of the Whale rocks; southward of this bearing the ground is clear.

Vessels requiring a Pilot should heave to with the lighthouse bearing from N. E. to N. N. E. distant about one mile, thus avoiding the Cadda rocks off the entrance to the Port.

The outer Cadda rock is marked by a *red* buoy. Should the buoy be out of its place, the danger which it marks will be avoided by keeping Eriminia Galle point well open of Oonawutty point: these points in line lead on to the Cadda rocks.

The present Admiralty chart of the Approaches to Galle harbour, No. 819, must be used with caution, as the points above-mentioned, delineated thereon, are three-quarters of a point out of bearing.

FINANCIAL DEPARTMENT.

NOTIFICATIONS.—ACCOUNTS.

No. 2144.

Simla, the 30th July 1877.

RESOLUTION.—The Governor General in Council deems it important that, in all accounts of expenditure on public works undertaken by the State for the relief of distress caused by famine, a clear distinction should be maintained between the cost of materials and skilled labour, and the outlay on unskilled labour.

2. It will often be impossible to avoid some expenditure on such works for materials (the purchase and carriage of which can seldom, if ever, contribute much to the relief of the distressed population, which is the first object of the works), or for skilled labour, the employment of which might not be required immediately for relief purposes; if it is so required, the wages paid should, as a rule, be at unskilled rates only.

3. But it is the paramount duty of all authorities responsible for the expenditure on such works to reduce to a minimum the expenditure which is thus accessory to the large outlay for direct relief which, at such times, strains the resources of the State. The accounts should be so constructed as to show plainly the proportion of the whole expenditure absorbed in such accessories.

4. His Excellency in Council is accordingly pleased to decide, that whenever any public work is undertaken for purpose of famine relief, the expenditure thereon shall be classified as follows:—

(1.)—For materials.
(2.)—For labour paid at the rates fixed by the Government for unskilled labour upon relief works.
(3.)—For labour paid, for whatever reason, at any higher rates divided into (*a*) skilled labour, (*b*) supervision of labourers, skilled and unskilled.

5. Explanation will be expected by the Supreme Government whenever the proportion of the whole expenditure which falls under headings (1) and (3) bears any substantial proportion to the whole expenditure on the work.

6. These instructions should, as far as possible, be applied retrospectively in the case of the works undertaken since the beginning of the existing famine in the Madras and Bombay Presidencies and in Mysore; and all future estimates of works to be thus undertaken should be classified in the manner thus prescribed.

ORDERED, that this Resolution be published in the *Gazette of India* and distributed for information and guidance as follows:—

1.—To the Revenue and Public Works Departments of the Government of India.

2.—To the several Local Governments and Administrations.

3.—To the Comptroller General and to the several Accountants General and Deputy Accountants General in independent charge.

From R. B. CHAPMAN, Esq., C.S.I, Secretary to the Government of India, Financial Department, to the Secretary to the Government of Bombay, No. 2309, dated Simla, the 2nd August 1877.

In pursuance of the policy announced by the Honorable Sir John Strachey in his Financial Statement, dated the 15th March, His Excellency the Viceroy in Council has resolved, after consultation with His Excellency the Governor of Bombay in Council to make the following arrangements for the extension of the financial and administrative powers and responsibilities of the Government of Bombay during the five years beginning on the 1st April 1877: the mutual obligations of the Government of India and the Government of Bombay in respect to the matters to which this dispatch refers, will, thereafter, be settled afresh.

2. *I. Land Revenue.*—Pending a decision upon the question, which is now under separate consideration, how far it may be expedient to omit many of these items from the Finance and Revenue Accounts altogether, (which question is not to be held as in any way prejudiced by the present proceedings,) the Governor General in Council has resolved to surrender to the Local Government the "*Inamdari Adjustments*" and "*Service Commutations*" recorded under this Head of Account, together with the corresponding charges recorded under 4, *Land Revenue*, and 24, *Allowances and Assignments*. The items are as follows:—

	1872-73.	1873-74.	1874-75.	1875-76.	Estimate. 1876-77.	Estimate. 1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Inamdari lands adjusted ...	51,89,000	51,15,000	51,83,000	52,22,000	51,99,000	52,24,000
Hereditary District and Village Officers', and other service lands and service commutations ...	13,47,000	13,04,000	13,22,000	13,53,000	13,65,000	14,00,000
Total ...	65,36,000	64,19,000	65,05,000	65,75,000	65,64,000	66,24,000

3. The increase of late years is counterbalanced by an increase under the corresponding Heads of Expenditure, and the Revenue from these sources may be fixed at Rs. 66,24,000, on condition that the whole of the corresponding charges be defrayed by the Local Government, in consideration of the assignments hereinafter settled under the Heads of 4, *Land Revenue*, and 24, *Allowances and Assignments*. The assignment of this Revenue must not be understood to confer upon the Government of Bombay any power, which it does not now possess, to alter the character of any of these tenures, and, especially, to make permanent any grant which is now temporary.

4. *IV. Excise.*—The Accounts and Estimates of this revenue are as follows:—

	1872-73.	1873-74.	1874-75.	1875-76.	Approximate actuals. 1876-77.	Estimates. 1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	37,64,000	36,33,000	37,81,000	39,75,000	40,23,000	39,50,000
Charges ...	28,000	37,000	71,000	61,000	68,000	80,000
Refunds ...	6,000	3,000	1,000	6,000	9,000	2,000
Net Revenue ...	37,30,000	35,93,000	37,09,000	39,08,000	39,46,000	38,68,000

5. The tendency of the Excise revenue, since 1873-74, has been to increase by at least Rs. 1,00,000 a year, and the Governor General in Council has settled for it with the Local Government on this basis, as follows, subject to the further adjustment to be presently described.

Net Revenue from Excise to be made good to the Imperial Treasury in

	Rs.		Rs.		Rs.
1877-78 ...	40,00,000	1879-80 ...	42,00,000	1881-82 ...	44,00,000
1878-79 ...	41,00,000	1880-81 ...	43,00,000		

There can hardly be a doubt that, but for the Famine, the net *Excise* Revenue in 1877-78 would have been (as indeed it may, perhaps, even now be) at least Rs. 40,00,000, and the Government of Bombay is now engaged upon special measures for the improvement of the Excise Revenue. The details for 1877-78 will be shown *pro formâ* as follows:—*Gross Revenue* Rs. 40,82,000, *Charges* Rs. 80,000, *Refunds* Rs. 2,000, *Net Revenue* Rs. 40,00,000.

6. The Accounts and Estimates of the Revenue from *Stamps* are as follows:—

	1872-73.	1873-74.	1874-75.	1875-76.	Approximate actuals. 1876-77.	Estimates. 1877-78
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	52,74,000	50,09,000	46,39,000	46,70,000	44,00,000	45,00,000
Charges ...	1,73,000	1,55,000	1,57,000	1,56,000	1,58,000	1,58,000
Refunds ...	69,000	69,000	55,000	53,000	56,000	56,000
Net Revenue ...	50,32,000	47,85,000	44,27,000	44,61,000	41,86,000	42,86,000

The unsatisfactory condition of this branch of the Revenue has been the subject of frequent correspondence with the Government of Bombay. It seems probable that, like other Revenues, the Revenue from *Stamps* is, just now, especially depressed in consequence of the Famine; and there are other reasons for expecting that a revival of this Revenue will, hereafter, reward more particular attention thereto. The Government of Bombay has accordingly consented to the following settlement of this Revenue, subject to adjustment as before:—

Net Stamp Revenue to be secured to the Imperial Treasury in—

	Rs.		Rs.		Rs.
1877-78 ...	43,00,000	1879-80 ...	45,00,000	1881-82 ...	46,00,000
1878-79 ...	43,50,000	1880-81 ...	45,50,000		

The details for 1877-78 may be assumed, *pro formâ*, as follows:—*Gross Revenue* Rs. 45,14,000, *Charges* Rs. 1,58,000, *Refunds* Rs. 56,000, *Net Revenue* Rs. 43,00,000.

7. The Accounts and Estimates of the imperial portion of the Revenue from *Law and Justice* are thus recorded:—

	1872-73.	1873-74.	1874-75.	1875-76.	Approximate actuals. 1876-77.	Estimates. 1877-78
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue ...	2,97,000	3,53,000	2,85,000	2,83,000	3,08,000	3,05,000
Refunds ...	30,000	44,000	33,000	30,000	31,000	31,000
Net Revenue ...	2,67,000	3,09,000	2,52,000	2,53,000	2,77,000	2,74,000

The Net Imperial Revenue from this source is fixed at Rs. 2,70,000, which may be entered as follows:—*Revenue* Rs. 3,00,000, *Refunds* Rs. 30,000.

8. Thus the aggregate Net Revenue to be assured to the Imperial Treasury from these sources is as follows:—

	In 1877-78.	In 1878-79.	In 1879-80.	In 1880-81.	In 1881-82.
	Rs.	Rs.	Rs.	Rs.	Rs.
Excise ...	40,00,000	41,00,000	42,00,000	43,00,000	44,00,000
Stamps ...	43,00,000	43,50,000	45,00,000	45,50,000	46,00,000
Law and Justice (present imperial portion) ...	2,70,000	2,70,000	2,70,000	2,70,000	2,70,000
Total ...	85,70,000	87,20,000	89,70,000	91,20,000	92,70,000

9. But, as in the arrangements with other Governments, so in that which has now been made with the Government of Bombay, the exigencies of the Imperial Treasury have compelled the Governor General in Council to reserve a part of the excess revenue which may, it is hoped, hereafter accrue under these Heads. The Governor of Bombay in Council has, accordingly, agreed to surrender to the Imperial Treasury half of any excess over the Net Revenue thus calculated which may be actually obtained; the Governor General in Council, on his part, undertaking to bear half of any possible deficit. For example, if, in 1878-79, the actual Net Revenue from these three sources should be Rs 89,00,000, the sum due to the Imperial Treasury will be Rs. 87,20,000 + $\frac{1,80,000}{2}$ = Rs. 88,10,000; if, on the other hand, it should be Rs. 86,00,000, the sum to be made good to the Imperial Treasury would be Rs. 87,20,000 − $\frac{1,20,000}{2}$ = Rs. 86,60,000 only.

10. *XV. Interest.*—In accordance with the principles upon which the Governments of Bengal and the North-Western Provinces have been made liable for the recovery by the Imperial Treasury of interest on the capital expended in the construction of canals and railways for purposes of local importance, the Government of Bombay will be presently invited to undertake the responsibility for the interest on the debt to the State of the Bombay Port Trust, including, hereafter, interest on the capital now being expended on the "Prince's Wet Dock": but this will be separately arranged.

11. The *Miscellaneous* Revenue is made over to the Local Government, excepting *Gain by Exchange, Premium on Bills, Premium on Money Orders, Lapsed Money Orders, Sale Proceeds of Durbar Presents,* and any item exceeding Rs. 10,000 which cannot properly be recorded under any sub-head now existing in the Public Accounts of the Bombay Presidency. 17. The Government of India will be glad, hereafter, to give to the Government of Bombay, in exchange for some portion of the net consolidated assignment fixed by this dispatch, some particular interest in the revenue derived from the consumption of salt within the Bombay Presidency; and I am to enquire whether His Excellency the Governor in Council can suggest the means of distinguishing this part of the Salt Revenue brought to account in Bombay, with certainty, and without risk of confusion or controversy, from the Revenue which, though recorded in the Accounts of the Bombay Presidency, is derived from consumption in other parts of India: if so, the actual net revenue thus obtained in each of the last five years should be reported, with explanations of the methods by which it has been ascertained.

18. 14, *Administration.*—This grant is made over to the management of the Government of Bombay, excepting the provision for *Civil Offices of Account and Audit, Currency Department, Money Order Office, Allowance to the Presidency Bank,* and *Stationery purchased in the Country.*

20. 16, *Law and Justice.*—The whole grant is made over to the Local Government with an assignment of Rs. 43,12,000 as fixed for 1877-78. The accounts and estimates are as follows:—

Past and estimated figures are as follows:—

		Rs.			Rs.

The Government of India has granted the sum of Rs. 2,29,000 to cover this service, being the average expenditure of these five years.

25. 24, *Allowances and Assignments.*—The whole of this grant also, excepting the portion for *Territorial and Political Pensions*, is made Provincial with a grant fixed at Rs. 64,81,000 as for the year 1877-78. The accounts and estimates are as follows:—

		Rs.			Rs.
1872-73	... ...	65,12,000	1875-76 ...	...	65,56,000
1873-74	... ...	63,88,000	1876-77 Estimates	...	65,29,000

26. 26, *Superannuation Allowances.*—The charges recorded under the Heads of *Superannuation* and *Retired Allowances, Compassionate Allowances* and *Gratuities* are made over to the Local Government, together with the Revenue under the Head of *Contributions for Pensions and Gratuities.* The figures have been, or are expected to be, as follows:—

	1872-73.	1873-74.	1874-75.	1875-76.	1876-77, Estimates.	1877-78, Estimates.

The assignment for this service is fixed at Rs. 7,20,000 (*viz.* Expenditure Rs. 8,00,000, and Estimated Revenue Rs. 80,000).

27. Appended to this paragraph is a Statement showing the Revenue and Expenditure for which, under the arrangements thus concluded, the Government of Bombay will be especially responsible. The aggregate *Revenue* shown in this Statement is Rs. 1,65,30,000 and the aggregate *Expenditure* Rs. 3,24,17,000. It is necessary, however, in the interests of the Imperial Treasury, to make some retrenchment from the aggregate of the Grants thus brought together: such a retrenchment has been made in fixing the Consolidated Grants to other Provincial Governments under settlements of the same character as that now made with the Government of Bombay, and is justified by the expectation upon which the policy of these settlements partly rests, *viz.*, that the Local Governments will be able to effect considerable economies in the management of the Services entrusted to them.

		Existing Allotment for Provincial Services ...	1,04,54,000
TOTAL ...	1,65,30,000	TOTAL ...	3,24,17,000

28. Of the items composing the Aggregate Grant of Rs. 3,24,17,000 included in this Statement, the Government of India has not, for the reasons stated against each, made any reductions from the following Grants :—

	Rs.	
Refunds	1,10,000	Because the Government of India has stipulated for a share of any increase in the net revenue connected with these Heads of Charge.
Excise	80,000	
Stamps	1,58,000	
Allowances to District and Village Officers ...	28,73,000	Because it is believed to be out of the power of the Local Government to effect any considerable reductions under these Heads.
Allowances and Assignments	64,81,000	
Superannuation Allowances	8,00,000	
Provincial Allotment ...	1,04,54,000	Because this Grant was, for the most part, fixed after retrenchments made in 1870.
Total ...	2,09,56,000	

29. If this sum of Rs. 2,09,56,000 is subtracted from the aggregate estimated expenditure (Rs. 3,24,17,000,) there remains Rs. 1,14,61,000, 5 per cent. upon which is Rs. 5,73,050: the retrenchment which the Government of India is obliged to make is fixed at Rs. 5,67,000. Thus the Consolidated Grant for the whole expenditure to be entrusted to the responsibility of the Government of Bombay is Rs. 3,18,50,000, towards which revenue, estimated in 1877-78 at Rs. 1,65,30,000, is assigned. Consequently, the amount to be made good to the Government of Bombay from the reserved imperial revenue will be as follows, subject only to the adjustment stipulated in paragraph 9 :—

	Rs.
In 1877-78	1,53,20,000
1878-79	1,51,70,000
1879-80	1,49,20,000
1880-81	1,47,70,000
1881-82	1,46,20,000

30. If, in any of these years, the balance upon an Account prepared in the same manner as the Statement in paragraph 27, is less than the amount thus determined, after modification by the adjustment stipulated in paragraph 9, the difference will be added to the balance at credit of the Government of Bombay in the Imperial Treasury: if it is more, it will be deducted from that balance which, by Rule VIII of the "*Rules and conditions which apply to the administration by the Local Governments of all Revenue and Services surrendered to provincial uses and management*," published with Financial Resolution No. 1709, dated 22nd March 1877, must never be exhausted. If the balance at credit of the Government of Bombay in the Imperial Treasury does not suffice to supply any deficit which may result upon the Accounts of the Government of Bombay for any year, the difference must be made good from the separate Provincial Resources of the Local Government.

31. Although the settlement described in this dispatch is intended and believed to be such that, in ordinary times, the Government of Bombay will have ample means for the administration of the several Services entrusted to it, yet it is possible that, during the current year, the effects of the famine may defeat this intention. The Government of Bombay was informed, by Resolution No. 1826, dated 28th of March, that, in such case, the Government of India will, as soon as this calamity is happily at an end, make such a contribution from the Imperial Treasury as will prevent the insolvency of the Local Government. The Governor General in Council has now been pleased to fix the contribution at such an amount as will leave the Government of Bombay with an unencumbered balance of six lakhs of Rupees at its disposal for general purposes on the 1st April 1878. Doubtless, the Government of Bombay will be scrupulously careful so to administer its provincial finances, meanwhile, as to reduce to a minimum the demand upon the Imperial Treasury for this purpose.

32. The structure of the Public Accounts will not be in any way affected by the adoption of the measures detailed in this despatch. The Government of Bombay is at liberty to keep such separate Accounts as it may think necessary to enable it to exercise the independent financial control now conceded to it over the delegated Revenues and Services; but the delegated Revenue and Expenditure will continue, as heretofore, to be recorded in the Public Accounts of the Empire, exactly as they occur, without any reference to the relative responsibilities and mutual engagements of the Imperial and the Provincial Governments. The settlement of accounts between the two Governments will be effected, upon the balance of the whole provincial account, by a single entry in the Imperial Public Accounts under "*Balance of the Local Government Increased* or *Decreased*" as the case may be.

33. The Governor General in Council has not, at present, the means of ascertaining the expenditure from the Home Treasury of the Government of India under the several transferred Heads of Service on account of the Bombay Presidency: but, as soon as His Excellency in Council can obtain this information, he will make proposals to the Government of Bombay for the incorporation of this expenditure also in the settlement now made with the Government of Bombay.

34. No attempt has been made, in this despatch, to settle the responsibility of the Government of Bombay for interest on the capital expended by the State in the Bombay Presidency upon Local and Provincial railways and works of irrigation, in the manner already carried out in Bengal and in the North-Western Provinces. The Accounts of 1875-76 show a total expenditure of Rs. 5,53,140 on the Hubli and Karwar Line: the arrangement to be made about the expenditure upon this Line as well as upon the Dhund and Manmar and Karwar and Dharwar Lines has yet to be determined. The capital expenditure on irrigation works in the Bombay Presidency to the end of 1875-76 appears, from accounts prepared in the Public Works Department, of which copy is appended with an explanatory memorandum, to have been, on the 31st March 1875, excluding contributions, Rs. 1,71,86,000; the capital expenditure, during the year, was, excluding Contributions, Rs. 14,16,000; the revenue from water-rates, and other direct returns in the same year was Rs. 1,05,000, and the working expenses Rs. 10,10,000. Thus, the net charge upon the Revenues for these works in 1875-76 was Rs. 17,10,230 as follows:—

	Rs.
Interest at 4½ per cent. on Rs. 1,71,86,000 for one year ...	7,73,370
Interest at 4½ per cent. on Rs. 14,16,000 for half-a-year ...	31,860
Excess working expenses	9,05,000
TOTAL ...	17,10,230

35. Against this charge must be set any land revenue which is due to or dependent on the works. Until the amount of this revenue is ascertained, and some system settled upon which this indirect revenue from the works can be fixed, without controversy, in future, it will be difficult to determine the proper responsibility of the Presidency of Bombay in respect to these works. The Governor General in Council will be glad to receive, from the Government of Bombay, early proposals for the surrender of these works to provincial use and management on the principle of a provincial guarantee such as has been already given by the Governments of Bengal and the North-Western Provinces. Meanwhile, His Excellency the Governor in Council will understand that if, hereafter, any new extraordinary works are undertaken in the Bombay Presidency whose scope and object is local or provincial, a guarantee from Provincial Revenues of the interest on their capital cost will be necessary.

36. The question as to the extent to which, or the means by which, Provincial responsibility for expenditure incurred for the relief of distress arising from Famine is to be enforced, remains for future consideration: but the Government of Bombay is aware that Her Majesty's Government has, more than once, impressed upon the Government of India the importance of devising some plan by which effect shall be given to the principle of Provincial responsibility for such expenditure.

ORDERED, that this letter* be published in the *Gazette of India*, and forwarded for information to the Home, Revenue, Military (Marine), and Public Works Departments; to the Comptroller General, and to the Accountant General, Bombay.

* With the Appendix.

APPENDIX.

THE following statement has been prepared in the Public Works Department of the Government of India, to shew the financial results of Irrigation Works in Bombay from 1871-72 to 1877-78.

This statement is necessarily defective in the following points :—

I.—The line "ordinary to the end of year" is subject to modification to some extent as the Bombay ordinary accounts have not yet been finally adjusted.

II.—The figures for land revenue due to the works are blank, because, in Bombay, there are no separate land revenue and water-rates; and hitherto no authoritative decision has been given as to what portion of revenue may be claimed as enhanced land revenue due to the effect of the Irrigation Works.

III.—The figures for simple interest to end of year cannot be supplied, the total capital outlay as before mentioned, being still uncertain.

IV.—The revenue accounts not having yet been finally made up, "working expenses to end of year" cannot be given.

RESOLUTION—By the Government of India, Public Works Department.

The Governor General in Council has received, with deep regret, intelligence of the death at sea near Aden, on the 27th ultimo, of Colonel Daniel George Robinson, R.E., Director General of Telegraphs in India.

By the untimely death of this officer the State has lost an able and zealous public servant. Colonel Robinson earned early distinction in the Punjab campaigns; and, after a lengthened period of valuable service in the Survey Department, he directed with marked success, during the last twelve years, the constantly expanding operations of the Telegraph Department, a department which he was mainly instrumental in reorganizing and raising to its present state of high efficiency.

POLICE.

The 8th August 1877.

No. 263.—The provisions of Act VIII of 1870 (for the prevention of the murder of female infants) having been made applicable to the clans and localities in the Farukhabad District, detailed in the subjoined list, by the Notification of the Government of the North-Western Provinces, No. 47 A, dated the 5th ultimo, the following rules made by that Government in exercise of the power conferred on it by Section 2 of the said Act and confirmed by the Governor General in Council, are hereby published for general information:—

Rules for the suppression of female infanticide.

I.—A nominal Register (A) of all proclaimed families shall be drawn up by the Police under the orders of the Magistrate of the district. In this register recognised heads of families or masters of separate households shall be entered as the heads of families, and every member of the family habitually resident in the village shall be entered by name. All persons under twelve shall be entered as children, except married female children living with their husbands, who shall, for the purposes of these Rules, be deemed to be adult females.

II.—All villages in which the proportion of female children to children on a proclaimed population of not less than 25 children is less than 25 per cent. shall be called "specially guilty" villages, and shall also be entered in a separate Register (B) which shall be called the "Private register of proclaimed families in specially guilty villages." This register shall not be open to inspection except by the officers of the district.

III.—The person who is registered as the head of a proclaimed family shall report immediately the occurrence of every birth and death and the illness of any female child in his family to the chaukidar of the village. He shall also produce all children in his family for the inspection of a Police officer visiting the village when required to produce them.

IV.—Every midwife knowing of, or having reason to believe in, the occurrence in a proclaimed family in the village in which she resides, of a birth or of the illness of a new-born child shall at once report the fact to the chaukidar of the village. And if the village is one entered in Register B, she shall also report the occurrence of a pregnancy.

V.—If in a given time after proclamation [to be determined for each village or locality by the Local Government] the proportion of female children in a village entered in Register B does not rise to more than 25 per cent., the Lieutenant-Governor may direct that every person registered as the head of a proclaimed family in that village shall be personally bound to report to the officer in charge of the Police station every pregnancy in his family at some period before the seventh month.

VI.—The chaukidar of the village shall immediately report to the officer in charge of the Police station the occurrence of a birth, whether male or female, in a proclaimed family; the death of a female infant under six months old; the illness of a female child; and the removal of a pregnant woman to another village. He shall also report, on the occasion of his periodical visit to the Police station, other deaths, removals and arrivals, and pregnancies reported to him if the village is entered in Register B.

VII.—The zemindars of the villages shall give assistance to the Police in drawing up Register A, and in obtaining information regarding all births, marriages, and deaths occurring, or about to occur, among proclaimed families.

VIII.—All expenses incurred in working the system sanctioned by Act VIII of 1870 shall be borne by the proclaimed clans and families, and shall be recoverable as arrears of land revenue; provided that, when the percentage of female children to children of any proclaimed class in any village exceeds forty, such class shall be exempted from any share in such expenses, unless in the opinion of the Magistrate there be other grounds of suspicion.

IX.—Where the crime is so prevalent, and the number of the proclaimed villages so great, that the ordinary establishment of the district cannot cope successfully with it, the Local Government may, at its discretion, appoint a force of special Police for the purpose of carrying out measures of prevention and detection. All expenses incurred for the payment of such Police, or under Rule VIII, may be met by a rate leviable under the orders of the Local Government from the heads of families entered in the nominal register of proclaimed persons. Such rate will ordinarily be imposed so as to fall more heavily on specially guilty than on guilty families; but the amount of the rate to be levied will be fixed in every case by the special orders of the Local Government.

X.—No proclaimed village or family shall be exempted from the operation of these Rules except by the order of the Local Government, or in virtue of authority to that effect vested by Government in any officer. A village or family so exempted will then be struck out of Register A, and the erasure initialled by the Magistrate of the District or by the District Superintendent of Police.

FINANCIAL DEPARTMENT.

NOTIFICATIONS.—ACCOUNTS.

Simla, the 10th August 1877.

No. 2459.—The following Financial despatch from Her Majesty's Secretary of State for India, to His Excellency the Right Hon'ble the Governor General of India in Council, No. 229, dated 5th July 1877, is published for general information :—

I have considered in Council your Financial letter dated the 17th May 1877, No. 134, in which you request that the privilege of making family remittances at present conceded to mechanics and others of a similar class engaged in England, may be extended to mechanics and artisans who have been engaged in India for the service of Government.

2. I sanction the extension of the privilege as requested by you, it being distinctly understood that all remittances should be *bonâ fide* for the support of families; that the rate of exchange at which they shall be adjusted is that annually fixed between this Office and the Lords Commissioners of Her Majesty's Treasury, and that no remittance shall exceed one-half the salary of the person remitting, and, in no case, be more than 12*l.* a month.

No. 2464.—The following correspondence is published for general information :—

From Secretary to the Bombay Chamber of Commerce, to Secretary to the Government of India, Financial Department,—dated Bombay, 2nd May 1877.

I am directed by the Bombay Chamber of Commerce respectfully to address you on the subject of the indefinite and uncertain character of the announcement made in the Financial Statement of the 15th March, with respect to the loan operations, and to the Secretary of State's bills on the Government of India which will be sold in London, during the year.

The estimates of these are, it is true, given in the Financial Statement, but their effect is completely nullified by the note on the face of the Statements Nos. IV, V and VI, which runs as follows :—"The estimates are the best that can now be made; but they are subject to modification as the year goes on; the Government must not be understood to pledge itself that the Secretary of State in Council will raise by bills the exact amount stated; or that the exact amount stated will be borrowed during the year; or that it will be borrowed in India or in England as the case may be." Again, it is stated in the Financial Statement under the head of "Loss by Exchange" that, either by bills or by borrowing, the Secretary of State must get £16,000,000 for the Home Treasury in 1877-78; and that it cannot be said with certainty how much he will raise by bills and how much by borrowing. It is also observed with reference to the raising of the loan in India or in England, that the Governor General in Council will not, so far as the decision rests with him, submit to any unreasonable terms; and if the conditions acceptable to the money market in India should appear too unfavourable, he will not hesitate to recommend to the Secretary of State to endeavour to obtain power to borrow in England as much more than 3¾ millions sterling as is found to be really wanted.

The Finance Minister justifies this policy on two grounds—(1) that the assent of Parliament must be had before any money could be borrowed in England on behalf of India, and (2) that even if this difficulty did not exist, it would be hardly possible, under present circumstances, to pledge the Secretary of State to sell any specified quantity of bills at specified times, for fluctuations in the price of silver might be so serious, and might occur so rapidly, that it might be in the highest degree inconvenient to carry out the pledges which had been given.

While acknowledging the natural anxiety of His Excellency the Governor General in Council to diminish expenditure wherever it might appear to be practicable, the Chamber desires with great deference to submit that the policy of not deciding upon and adhering to a fixed amount to be borrowed in India or in England, and a fixed amount of Council bills to be drawn weekly during the year, will be injurious to Government itself and to the country. The trade of the country is so mixed up with the financial arrangements of Government that it is in the highest degree desirable that Government in making these arrangements should adopt a frank, undeviating, policy, to be adhered to under all circumstances, for, if any saving of expenditure were possible under the system now pursued, it would be of little moment when compared with the injury done thereby to the banking and mercantile interests affected by its operations. The Chamber can only think of two cases in which it might be desirable in the interests of the State, or of the trade of the country, to deviate from a fixed line of action, and these are—first, a threatened combination on the part of the buyers of Council bills; and, second, a financial panic which it might be the very legitimate desire of Government to allay.

The uncertainty which prevails with respect to the amount of Council bills to be offered for sale in London, during the year, is the greater evil, for while Government can gain nothing by its uncertain policy, not only are the entire banking and trading interests of the country, but all those having any relations with Europe, affected by the manner in which these bills are issued. These bills amount to about one-fourth of the whole export trade of British India, and the sales of them made regularly throughout the year, in accordance with the announcement of Government, would not be liable to be affected by any combinations of persons. It is, moreover, of extreme importance to the numerous interests engaged in banking and commerce that the calculations upon which their transactions are based should not be subject to be at any time upset by a change, or suspension, of the amount to be offered for sale, which not only produces embarrassment, but has an immediate temporary effect on exchange. The violent fluctuations in the rate of exchange during the last year, and the crisis which took place in July, were aggravated by the frequent changes made in the Council drawings. During February and March no allotments were made at all: afterwards, when bankers and others had been driven to other modes of remitting to India, supplies of Council bills were freely placed on the market, and sold at the market price down to 1s. 6¼*d.* After the reaction began in July—in addition to the periodical drawings—Government offered to give large sums at a fixed rate on application at any time; and in this way, and also by offering bills for tender at unusual intervals without previous notice, they shewed such an anxiety to sell their bills that the reaction which had set in, and which would no doubt have been continuous, was checked, and a heavy fall in exchange brought about. It was only when Government reverted to regular periodical drawings that the natural tendency of exchange to advance was allowed free scope. The whole trade was mystified, and such of it as depended on the future of exchange paralysed by the unusual policy, and by the feeling of danger and uncertainty which it gave rise to. The price

of bar silver in London fell in July to 47*d.*, and the rate of exchange to 1*s.* 6½*d.*, but, after the panic had passed off, and when the regular and certain issues of Council bills came to be made, the price of silver and the rate of exchange gradually rose until, in the end of January last, they stood at 58*d.*, and at 1*s.* 10¼*d.*, respectively. A feeling of confidence was gaining ground, and it was beginning to be assumed that the Council bills would be drawn regularly and without restriction, when suddenly on 31st January, and again on 7th February, a limit was fixed, owing to which a great part of the bills was withheld—and this for no other apparent reason than that of giving an artificial support to the rate of exchange. This return to the policy of last year was viewed with doubt and alarm by all those interested, but it was still hoped that the Budget Statement, the issue of which was shortly expected, would contain some definite announcement as to the future, and thus set at rest the uneasiness which existed. Such hopes, however, were disappointed, and the Chamber thinks it its duty to call the serious attention of the Government to the feeling of doubt and perplexity, which now prevail, to the unhealthy element of excitement and speculation which have been introduced, and to the grave harm which is thereby being done to trade on which the interests of the country so much depend.

Exchange, it is needless to observe, depends in the long run upon silver, which is affected by the supply and demand, and any changes brought about by silver in itself are gradual and slow. But Council bills depend not on any natural laws, but are merely the result of the exercise of the arbitrary authority of Government. These bills have during the last seven years increased from five to fourteen millions; and it is obvious that every increase in the amount must bring about sooner or later a corresponding reduction in the imports or an increase in the exports of ordinary merchandise. By this means an adjustment is in due time effected, but it is unreasonable to suppose that the amount of the Council bills can be increased, and that exchange can at the same time, until the adjustment has taken place, be supported. Nor should the important fact ever for a moment be overlooked that an artificial support to exchange is no real benefit to the Government or to the country;—exchange is improved and kept up for the time, but the result of this is to give an unnatural stimulus to the import trade, and when the artificial support is withdrawn, the fall which follows is all the more certain and severe.

The Chamber observes that the Government of India considered it necessary that the requisite statutory powers should be obtained before any fixed and certain policy could be adopted with respect to the operations for the year in loans and bills. As Parliament is now sitting, and has been since February, and the adoption of this policy is of enormous importance to the country, the Chamber desires respectfully to express the hope that the borrowing powers will be applied for without any delay, and that, as soon as these are obtained, His Excellency the Governor General in Council will announce the amount of the loan which he intends raising in India and the amount in England, and with regard to Council bills that he will fix the amount to be drawn weekly during the year and will adhere to it rigidly without allowing it to be affected by any fluctuations in rates.

The Chamber would respectfully urge that it would tend in a very material degree to facilitate the interests of the trade of the country, and therefore be of benefit to the State could the loan policy be definitely announced in each Budget. The greatest uneasiness and uncertainty were created last year by the announcement of the Secretary of State on the 12th of April that a loan of four millions sterling would be raised in England only a few days after a totally different intention was announced in this country, and again this year the same feelings have been raised in an even greater degree by the uncertainty which overhangs the future—an uncertainty which the Chamber submits, and it does so most respectfully, might be done away with were consideration given to the matter beforehand and a decision arrived at, subject only to the confirmation of Parliament and the obtaining of such statutory powers as might be necessary.

From Secretary to the Government of India, Financial Department, to Secretary to the Bombay Chamber of Commerce,—No. 686, dated Simla, the 17th May 1877.

I am directed by His Excellency the Viceroy and Governor General in Council to acknowledge the receipt of your letter dated the 2nd May, in which you complain of the uncertainty of the announcements made in the Financial Statement concerning the loan and remittance operations of the current year, and criticise the proceedings of Her Majesty's Secretary of State for India in Council in the sale of his bills upon India.

2. In reply, I am to say that your representations will be forwarded for the consideration of the Most Hon'ble the Secretary of State.

From the Government of India, to the Secretary of State for India,—No. 136, dated Simla, the 17th May 1877.

We have the honor to forward, for the consideration of Her Majesty's Government, copy of a letter from the Secretary to the Bombay Chamber of Commerce, representing the inconvenience which must result to those engaged in commerce from the uncertainty of the announcements made in the Hon'ble Sir John Strachey's Financial Statement concerning our loan operations in 1877-78, and the arrangements for the supply of funds to our Home Treasury.

2. We add copy of the reply which we have caused to be addressed to the Chamber.

From the Secretary of State for India, to the Government of India,—No. 230 (Financial), dated India Office, London, 5th July 1877.

Para. 1. I have considered in Council your Financial letter, dated the 17th May 1877, No. 136, forwarding copy of a letter from the Secretary to the Bombay Chamber of Commerce, relative to the indefinite and uncertain character of the announcement made in the Financial Statement of the 15th March last, with respect to the loan operations, and to the Secretary of State's bills on the Government of India, which will be sold in London during the year.

2. The Chamber of Commerce represent the "extreme importance to the numerous interests engaged in banking and commerce that the calculations upon which their transactions are based should not be subject to be at any time upset by a change, or suspension, of the amount" of Council bills on India "to be offered for sale," and they therefore express a hope that an application will be made to Parliament, without delay, for the requisite borrowing powers, that as soon as these are obtained, the amount of the loan to be raised in England and India respectively, and the amount of Council bills to be drawn weekly during the year, will be announced, and that the amount so announced will be adhered to "rigidly," and not be allowed "to be affected by any fluctuations in rates."

3. At the commencement of each official year, the estimate of the financial requirements for that year is based on the information then in the possession of the Government, and we have had recent experience that any notification as to the intentions of the Government is liable to be regarded by the mercantile community as, to some extent, an engagement to which Government is expected to adhere.

4. It would therefore be most inexpedient to make any definite statement of the intentions of the Government, and in that respect the announcement in the recent Budget is fully as explicit as could, with propriety, be made. It must be apparent that circumstances may arise at any moment to modify the expectations entertained, and too much care cannot be taken to reserve to Government complete freedom of action on all points.

5. Whilst, therefore, I am at all times desirous of affording the mercantile community as much information respecting the amount of Council bills to be drawn during the year, and as regards other financial arrangements, as may be possible without detriment to the public interests, I cannot commit myself to any definite engagement in that respect, and you will be good enough to inform the Bombay Chamber of Commerce accordingly.

MINT AND CURRENCY.

The 10th August 1877.

PASSED BY THE GOVERNOR GENERAL OF INDIA IN COUNCIL.

(Received the assent of the Governor General on the 31st May 1877).

An Act to facilitate the admission of Military Lunatics into Asylums.

Whereas it is expedient to facilitate the admission of European Military Lunatics into Asylums, and to amend the law now in force with regard to the admission thereto of Native Military Lunatics; It is hereby enacted as follows:—

Preamble.

Short title.

1. This Act may be called the "Military Lunatics Act, 1877:"

Local extent.

It extends to the whole of British India, and so far as regards subjects of Her Majesty, to the dominions of Native Princes and States in India in alliance with Her Majesty;

Commencement.

And it shall come into force on the passing thereof.

Repeal of Act XXI of 1872.

2. Act XXI of 1872 (*to facilitate the admission of Native Military Lunatics into Asylums*) shall be repealed.

Procedure in respect of European officer or soldier declared lunatic.

3. Whenever any European officer, Warrant-officer, Non-commissioned officer, soldier or other person subject to the provisions of the Act for punishing Mutiny and Desertion and for the better payment of the Army and their quarters, for the time being in force, has been declared a lunatic in accordance with the provisions of the military regulations of the Presidency to which he belongs, and has been ordered to be forwarded to any one of the Presidency-towns, and it appears to one of the Surgeons General, either of the British Forces or of the Indian Medical Service, according to the Presidency and the service to which the said lunatic belongs, that it is inexpedient that he should be removed to England, or that he should be detained in military custody until he can be conveniently sent to England, such Surgeon General may, if he think fit, make an order under his hand for the reception of the said lunatic into the Lunatic Asylum at Bhowanipur, Madras or Bombay, or such other Lunatic Asylum as may be duly authorized for the purpose by the Governor General in Council;

and the officer in charge of such asylum shall receive the lunatic in the asylum, and detain him therein until he is discharged therefrom, in accordance with the local military regulations in force for the time being, or until the Surgeon General applies for his transfer to the military authorities in view to his removal to England.

Report in case of Native officer or soldier appearing to be insane.

4. Whenever any Native officer, Non-commissioned officer or soldier appears to be insane, the officer commanding the regiment or detachment to which he belongs shall report the case to the general officer commanding the division or district or force in which such regiment or detachment is serving.

Examination of Native by committee.

5. Such general officer shall thereupon cause the said Native to be examined by a committee composed of at least two medical officers, or (if this be impracticable) by a regimental committee comprising the officer in command of the wing or squadron to which the Native belongs, and the medical officer in charge of the corps or detachment of which such wing or squadron forms part.

Procedure of Native being found by committee to be insane.

6. If the said committee or regimental committee (as the case may be) are satisfied that the Native is insane, the officer commanding the division or district or force may, if he thinks fit, make an order under his hand for the reception of the said Native into a Lunatic Asylum, and shall then send him thither under military escort; and the officer in charge of such asylum shall receive the Native into the asylum and detain him therein until he is discharged therefrom in accordance with the local military regulations in force for the time being.

Procedure for discharge of European or Native military lunatic.

7. Whenever it appears to the officer in charge of a Lunatic Asylum that the discharge of a military lunatic, whether European or Native, is necessary either on account of his recovery, or for any other purpose, such person shall be brought before the visitors of the asylum, and on the visitors recording their opinion that the discharge should be made, the general officer commanding the division, district or force, or other officer authorized to order the admission of military lunatics into asylums, shall forthwith direct him to be discharged, and such discharge shall take place in accordance with the local military regulations in force for the time being.

Payment of expenses of lunatic.

8. The Paymaster of the military circle within which any such asylum is situate shall pay to the officer in charge of such asylum the expense of the lodging, maintenance, clothing and medicine of every lunatic, whether European or Native, received and detained under this Act.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £ 5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £ 1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand Rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward not exceeding ten thousand Rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £ 45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £ 15 per ton, laid down at any port of shipment in India and £ 30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the

operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars :—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

Destruction of Krishna Shoal Light-house.

Information has been received that the above screw-pile light-house has been entirely washed away.

NOTICE.—Steamers must now trust entirely to the deep sea lead when rounding the Baragua Flats; never shoaling under 10 fathoms there or in rounding the Krishna.

When bound for Rangoon, after bringing Alguada Reef light to bear north 5 miles off, an E. ¾ S. course for a distance of 55 miles should put the vessel into 10 fathoms (low-water) at 5 miles off the Flats.

Should a current set the vessel only ½ a point in shore of her course, she will get depths of 10 fathoms when only 35 miles from Alguada light. On the contrary, if strong ebbs from the Irrawady delta have swept her ½ a point off-shore, she will not be able to get bottom without stopping the engines.

When well past the Krishna, do not shoal under 6 fathoms till China-Bakeer light is visible.

40 & 41 VICT., CHAPTER 37.

An Act for extending the time for the Registration of Trade Marks, in so far as relates to Trade Marks used in Textile Industries.

[*6th August* 1877.]

Whereas by section one of the Trade Marks Registration Amendment Act, 1876, it is provided that from and after the first day of July one thousand eight hundred and seventy-seven a person shall not be entitled to institute any proceeding to prevent or to recover damages for the infringement of any trade mark as defined by the Trade Marks Registration Act, 1875 (referred to in such Amendment Act and in this Act as the principal Act), until and unless, with respect to any device, mark, name, combination of words, or other matter or thing in use as a trade mark before the passing of the principal Act, registration thereof as a trade mark under the principal Act shall have been refused, as is in the said Act thereafter mentioned :

39 & 40 Vict., c. 33.

38 & 39 Vict., c. 91.

And whereas by reason of the difficulties attending the registration of trade marks used in the textile industries it has been found impossible to complete the registration of such trade marks within the time specified by the said section, and it is therefore expedient to prolong such time as aforesaid :

Be it therefore enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows :

Extension of time for registration of trade marks used in textile industries.

1. In so far as relates to the registration of trade marks used in the textile industries, but not further or otherwise, section one of the Trade Marks Registration Amendment Act, 1876, shall be construed as if for the words "from and after the first day of July one thousand eight hundred and seventy-seven" there were substituted the words "from and after the first day of January one thousand eight hundred and seventy-eight, or such further time as Her Majesty may by Order in Council determine."

Definition of "trade marks used in the textile industries."

2. The expression in this Act "Trade marks used in the textile industries" means the trade marks relating to goods comprised in classes 23 to 35, both inclusive, of the First Schedule to the rules under the Trade Marks Registration Acts, 1875-76, dated September 1876.

3. This Act may be cited for all purposes as the "Trade Marks Registration Extension Act, 1877," and this Act and the Trade Marks Registration Amendment Act, 1876, and the Trade Marks Registration Act, 1875, may be cited together as the "Trade Marks Registration Acts, 1875-77."

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost

of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars :—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

In all cases care must be taken that those who are blind, lame, or otherwise helpless, are sufficiently provided with such additional assistance for the journey home as their condition or circumstances may render necessary.

RULE 140. The Protector of Emigrants, in the case of emigrants landed at Madras, shall, if such emigrants are under their contract entitled to a free return passage at the expense of the colony, then forward them to the Emigration Agent for the colony from which they have returned, to be kept by him in the depôt under his charge, board and lodging gratis, until the occurrence of the earliest suitable opportunity for their despatch to the presidency or province to which they belong.

RULE 141. The Emigration Agent for such colony shall then forward the emigrants as aforesaid to such presidency or province, as the case may be, paying their passage and making provision for their food, &c., under the supervision of the Protector of Emigrants, in the same manner as is done in the case of emigrants shipped to such colony.

No. 2747G.—The following extract from the *London Gazette*, dated Friday, August the 17th, 1877, is published for general information:—

Convention between the British and Egyptian Governments for the Suppression of the Slave Trade.

The Government of Her Majesty the Queen of the United Kingdom of Great Britain and Ireland, and the Government of His Highness the Khedive of Egypt, being mutually animated by a sincere desire to co-operate for the extinction of the Traffic in Slaves, and having resolved to conclude a Convention for the purpose of attaining this object, the Undersigned, duly authorized for this purpose, have agreed upon the following Articles:—

ARTICLE I.

The Government of His Highness the Khedive having already promulgated a law forbidding the trade in slaves (negroes or Abyssinians) within the countries under His Highness' authority, engages to prohibit absolutely from henceforward the importation of any slaves (negroes or Abyssinians) into any part of the territory of Egypt or her dependencies, or their transit through her territories, whether by land or sea; and to punish severely, in the manner provided by existing Egyptian law, or in such manner as may hereafter be determined, any person who may be found engaged, directly or indirectly, in the Traffic in slaves (negroes or Abyssinians). The Government of His Highness the Khedive further engages to prohibit absolutely any negroes or Abyssinians from leaving the territory of Egypt or her dependencies, unless it be proved indubitably that such negroes or Abyssinians are free or manumitted.

It shall be stated in the certificates of manumission or passports which shall be delivered to them by the Egyptian authorities before their departure that they may dispose of themselves without restriction or reserve.

ARTICLE II.

Any person who, either in Egypt or on the confines of Egypt and her dependencies towards the centre of Africa, may be found engaged in the Traffic in slaves (negroes or Abyssinians), either directly or indirectly, shall, together with his accomplices, be considered by the Government of the Khedive as guilty of "stealing with murder" ("vol avec meurtre"); if subject to Egyptian jurisdiction he shall be handed over for trial to a court-martial; if not he shall immediately be handed over for trial according to the laws of his country to the competent tribunals, with the depositions (*procès-verbaux*) drawn up by the Egyptian superior authority of the place where the traffic has been proved, and all other documents or evidence ("éléments de conviction") handed over by the said authority, and destined to serve as proofs at the trial of the traders, so far as those laws may admit of such proof.

All slaves (negroes or Abyssinians) found in the possession of a dealer in slaves shall be liberated and dealt with in conformity with the provisions of Article III and of Annex (A) to the present Convention.

Le Gouvernement de Sa Majesté la Reine du Royaume Uni de la Grande Bretagne et d'Irlande, et le Gouvernement de Son Altesse le Khédive d'Egypte, mutuellement animés du sincère désir de co-opérer à l'extinction du Trafic des Esclaves, et ayant résolu de conclure une Convention afin d'atteindre ce but, les Soussignés, dûment autorisés à cet effet sont convenus des Articles suivants:—

ARTICLE I.

Le Gouvernement de Son Altesse le Khédive ayant déjà édicté une loi à l'effet d'interdire dans les états soumis à son autorité la traite des esclaves nègres ou Abyssins, s'engage à prohiber dorénavant, d'une manière absolue, l'importation sur tout le territoire de l'Egypte et de ses dépendances, et le transit par voie de terre et par voie de mer à travers ce territoire des esclaves nègres ou Abyssins; et à punir sévèrement, d'après les lois Egyptiennes en vigueur ou selon qu'il sera fixé ci-après toute personne qui sera trouvée se livrant directement ou indirectement à la Traite des esclaves nègres ou Abyssins. Le Gouvernement de Son Altesse le Khédive s'engage, en outre, à porhiber, d'une manière absolue, la sortie hors du territoire Egyptien ou de ses dépendances de tous nègres ou Abyssins quelconques, à moins qu'ils ne soit établi d'une manière certaine que ces nègres ou Abyssins sont libres ou affranchis.

Il sera constaté, dans les lettres d'affranchissement ou les passeports qui leur seront délivrés par l'autorité Egyptienne, avant leur départ, qu'ils pourront disposer d'eux-mêmes sans restriction ou réserve.

ARTICLE II.

Tout individu qui, sur le sol Egyptien ou sur les confins de l'Egypte et de ses dépendances, vers le centre de l'Afrique, sera trouvé se livrant directement ou indirectement au Trafic des esclaves nègres ou Abyssins sera, ainsi que ses complices, considéré par le Gouvernement du Khédive comme coupable de vol avec meurtre; s'il relève de la juridiction Egyptienne il sera traduit devant un conseil-de-guerre; dans le cas contraire il sera immédiatement déféré, pour être jugé, d'après les lois de son pays aux tribunaux compétents, avec les procès-verbaux dressés par l'autorité supérieure Egyptienne du lieu où le trafic aura été constaté et tous autres documents ou éléments de conviction remis par la dite autorité, et devant servir comme preuves au jugement des trafiquants, en tant que ces lois le permettent.

Tous les esclaves nègres ou Abyssins trouvés en possession d'un trafiquant seront mis en liberté et traités conformément aux provisions de l' Article III ci-après, et de l' Annexe (A), qui fait partie de la présente Convention.

ARTICLE III.

Taking into consideration the impossibility of sending back to their homes slaves (negroes or Abyssinians) who may be captured from slave-dealers and liberated, without exposing them to the risk of perishing from fatigue or want, or of falling again into slavery, the Egyptian Government will continue to take and apply in their favour such measures as they have already adopted, and which are hereinafter enumerated in Annex (A) to the present Convention.

ARTICLE IV.

The Egyptian Gouvernment will exert all the influence it may possess among the tribes of Central Africa, with the view of preventing the wars which are carried on for the purpose of procuring and selling slaves.

It engages to pursue as murderers all persons who may be found engaged in the mutilation of or traffic in children; if such persons are amenable to Egyptian jurisdiction they will be brought before a court-martial; if not, they will be handed over to the competent tribunals to be dealt with according as the law of their country directs, together with the depositions (*procès-verbaux*) and other documents or evidence ("éléments de conviction") as laid down in Article II.

ARTICLE V.

The Egyptian Government engages to publish a special Ordinance, the text of which shall be annexed to the present Convention, prohibiting altogether all Traffic in slaves within Egyptian territories after a date to be specified in the Ordinance, and providing also for the punishment of persons guilty of violating the provisions of the Ordinance.

ARTICLE VI.

With the view to the more effectual suppression of the Traffic in slaves (negroes or Abyssinians) in the Red Sea, the Egyptian Government agrees that British cruizers may visit, search, and, if necessary, detain, in order to hand over to the nearest or most convenient Egyptian authority for trial, any Egyptian vessel which may be found engaged in the Traffic in slaves (negroes or Abyssinians), as well as any Egyptian vessel which may fairly be suspected of being intended for that Traffic, or which may have been engaged in it on the voyage during which she has been met with.

This right of visit and detention may be exercised in the Red Sea, in the Gulf of Aden, on the coast of Arabia, and on the East Coast of Africa, and in the maritime waters of Egypt and her dependencies.

All slaves (negroes or Abyssinians) captured by a British cruizer on board an Egyptian vessel shall be at the disposal of the British Government, who undertakes to adopt efficient measures for securing to them their freedom.

The vessel and her cargo, as well as the crew, shall be handed over for trial to the nearest or most convenient Egyptian authority.

Nevertheless, in all case where it may not be possible for the commander of the cruizer making the capture to forward the captured slaves to a British depôt, or where from any other circumstances it may appear desirable and in the interest of the captured slaves (negroes or Abyssinians)

ARTICLE III.

En égard à l'impossibilité de renvoyer chez eux les esclaves nègres ou Abyssins délivrés des mains des trafiquants et affranchis, sans les exposer à succomber de fatigue ou de misère, ou bien à retomber en esclavage, le Gouvernement Egyptien continuera à prendre envers eux et à leur appliquer les mêmes mesures qu'il a déjà prises, et qui sont énumérées dans l' Annexe (A) susmentionnée.

ARTICLE IV.

Le Gouvernement Egyptien usera de toute l'influence qu'il pourrait avoir parmi les tribus de l'Afrique Centrale, dans le but d'empêcher les guerres qu'elles se font, pour se procurer et pour vendre des esclaves.

Il s'engage à poursuivre comme assassins tous les individus qui seront trouvés se livrant soit à la mutilation, soit au trafic des enfants; si ces individus relèvent de la juridiction Egyptienne, ils seront traduits devant un conseil-de-guerre; dans le cas contraire, ils seront déférés aux tribunaux compétents, pour être jugés suivant les lois de leur pays, avec les procés-verbaux et autres documents ou éléments de conviction, comme il est dit à l'Article II.

ARTICLE V.

Le Gouvernement Egyptien s'engage à publier une Ordonnance spéciale, dont le texte sera annexé à la présente Convention, interdisant entièrement tout Trafic d'esclaves dans le territoire Egyptien, à partir d'une date spécifiée dans l'Ordonnance, et réglant la punition des personnes coupables de contravention aux dispositions de l'Ordonnance.

ARTICLE VI.

Dans le but de rendre plus efficace la répression de la Traite des esclaves négres ou Abyssins dans la Mer Rouge, le Gouvernement Egyptien consent à ce que les croiseurs Britanniques visitent, recherchent et, au besoin, détiennent, pour le remettre ensuite à l'autorité Egyptienne la plus rapprochée ou la plus convenable, afin qu'il soit jugé, tout bâtiment Egyptien qui sera trouvé se livrant á la Traite des esclaves nègres ou Abyssins, de même que tout bâtiment Egyptien qui sera justement soupçonné d'être destiné à ce trafic, ou qui s'y sera livré pendant le voyage dans lequel il aura été rencontré.

Ce droit de visite ou de détention pourra être exercé dans la Mer Rouge, le Golfe d'Aden, le long de la côte d'Arabie, et de la Côte Orientale d'Afrique, et dans les eaux maritimes de l'Egypte et de ses dépendances.

Tous les esclaves négres ou Abyssins capturés par un croiseur Britannique à bord d'un bâtiment Egyptien, resteront à la disposition du Gouvernement Britannique, qui s'engage à prendre des mesures efficaces dans le but d'assurer leur liberté.

Le bâtiment et la cargaison, ainsi que l'équipage, seront livrés, pour être jugés, à l'autorité Egyptienne la plus rapprochée ou la plus convenable.

Néanmoins, dans tous les cas où le commandant du croiseur qui aura effectué la capture se trouverait dans l'impossibilité de consigner à un dépôt Britannique les esclaves capturés, ou quand, sous d'autres circonstances, il paraîtrait être opportun et dans l'intérêt des esclaves nègres ou Abyssins

that they should be handed over to the Egyptian authorities, the Egyptian Government engages, on an application being made to them by the Commander of the British cruizer, or by an officer deputed by him for that purpose, to take over charge of the captured negroes, or Abyssinians, and to secure to them their freedom with all the other privileges stipulated for on behalf of negroes or Abyssinians captured by the Egyptian authorities.

The British Government, on its part, agrees that all vessels navigating under the British flag, in the Red Sea, in the Gulf of Aden, along the coast of Arabia, and the East Coast of Africa, or in the inland waters of Egypt and her dependencies, which may be found engaged in the traffic in slaves (negroes or Abyssinians), may be visited, seized, and detained by the Egyptian authorities; but it is agreed that the vessel and its cargo shall, together with its crew, be handed over to the nearest British authority for trial.

The captured slaves (negroes or Abyssinians) shall be released by the Egyptian Government, and shall remain at their disposal.

If the competent tribunal should decide that the seizure, detention, or prosecution was unfounded, the Government of the cruizer will be liable to pay to the Government of the prize a compensation appropriate to the circumstances of the case.

ARTICLE VII.

The present Convention shall come into operation from the date of the signature hereof for Egypt proper as far as Assouan, and within three months from the date of signature for the Egyptian possessions in Upper Africa and on the shores of the Red Sea.

In witness whereof the undersigned have signed the present Convention, and have affixed thereto their seals.

Done at Alexandria, this fourth day of August, one thousand eight hundred and seventy-seven.

Annexe A faisant partie de la Convention conclue entre le Gouvernement de la Grande Bretagne et le Gouvernement de l' Egypte, le 4 Août, 1877, pour la Suppression du Trafic des Esclaves.

La police était jusqu'à présent chargée de tout ce qui concernait les esclaves, leur affranchissement, l'éducation des enfants, &c.

Désormais ce service sera confié à Alexandrie et au Caire à un bureau spécial établi au Gouvernorat respectif, qui pourvoira à tout ce qui regardera les esclaves et leur affranchissement.

Dans les provinces le bureau sera placé sous la direction des Inspecteurs-Généraux.

Il y aura dans ce bureau un registre destiné à la consignation de tous les détails intéressant l'esclave affranchi.

En cas de plaintes présentées par des autorités Consulaires ou par des particuliers, le bureau procédera à l'information nécessaire.

Si l'information établit la légitimité des plaintes présentées, l'affaire sera délérée à l'autorité compétente, afin qu'il soit pourvu à l'application des dispositions relatives à l'affranchissement.

crpturés qu'ils soient remis aux autorités Egyptiennes, le Gouvernement Egyptien s'engage, sur la demande qui lui en sera faite par le Commandant du croiseur Britannique ou par un officier député per lui à cet effet, à se charger des négres ou Abyssins captures et à assurer leur liberté, avec tous les autres priviléges réservés aux nègres ou Abyssins capturés par les autorités Egyptiennes.

Le Gouvernement Britannique, de son côté, consent à ce que tout bâtiment naviguant sous pavillon Britannique dans la Mer Rouge, dans le Golfe d'Aden, et le long de la côte d'Arabie, et de la Côte Orientale d'Afrique, ou dans les eaux intérieurs de l'Egypte et de ses dépendances, qu' sera trouvé se livrant à la Traite des esclaves négres ou Abyssins, puisse être visité, saisi, et détenu par les autorités Egyptiennes; mais il est convenu que le bâtiment et sa cargaison, ainsi que l'équipage, seront livrés pour être jugés à l'autorité Anglaise la plus rapprochée.

Les esclaves nègres ou Abyssins capturés seront libérés par le Gouvernement Egyptien et resteront à sa disposition.

Si le tribunal compétent juge mal fondée la saisie, la detention, ou la poursuite, le Gouvernement du croiseur sera exposé à payer au Gouvernement du bâtiment adverse une compensation appropriée aux circonstances.

ARTICLE VII.

La présente Convention entrera en vigeur à partir du jour de la signature pour l'Egypte proprement dite jusqu'à Assouan et dans un délai de trois mois à dater de la signature pour les possessions Egyptiennes da la Haute Afrique et le littoral de la Mer Rouge.

En foi de quoi les Soussignés ont signé la présente Convention et y ont apposé leurs sceaux.

Fait à Alexandrie, le quatre Août, mil huit cent soixante dix-sept.

(L.S.) C. VIVIAN.

(L.S.) CHÉRIF.

Au surplus tout ce qui concernera l'éducation de ces enfants sera spécialement confié à la direction des Gouverneurs d'Alexandrie et du Caire, qui se concerteront avec le Ministère de l'Instruction Publique, en vue des meilleures dispositions à adopter.

Pour les enfants du sexe masculin qui se trouveront dans les provinces, les Inspecteurs-Généraux les placeront dans les écoles des provinces. Quant aux filles, elles seront envoyées au Caire.

Au Soudan les esclaves libérés seront également employés, suivant les circonstances et à leur choix, au service agricole, domestique, ou militaire.

Ainsi fait à Alexandrie le 4 Août, 1877, pour être appliqué à partir de la même date que la susdite Convention.

Le Ministre des Affaires Etrangères,

(Signé) CHÉRIF.

Nous, Ismail, Khédive d'Egypte, vu l'Article V de la Convention passé entre les Gouvernements de la Grande Bretagne et d'Egypte, le 4 Août,

Si les plaintes sont présentées par l'esclaves lui-même, le bureau, après constatation, lui dèliverera des lettres d'affranchissement détachées d'un livre à souche, spécialement affecté à cet usage.

Quiconque aura pris à un affranchi ses lettres d'affranchissement, ou bien l'aura privé ou aura contribué à le priver de sa liberté par des moyens subreptices ou violents, sera traite comme trafiquant d'esclaves.

Le Gouvernement pourvoira aux besoins des esclaves et des affranchis.

Les esclaves du sexe masculin seront employés, suivant les circonstances et à leur choix, au service domestique, agricole, ou militaire.

Les femmes auront une occupation domestique, soit dans des établissements, dépendant du Gouvernement, soit dans des maisons honnêtes.

Les enfants mâles continueront à être reçus dans les écoles ou ateliers du Gouvernement, et les filles dans les écoles destinées à leur sexe.

Art. 3. Le Trafic des Esclaves blancs ou blanches sera et demeurera prohibé sur toute l'étendue du territoire Egyptien et dépendances. Cette prohibition prendra effet dans sept ans à dater de la signature de la Convention susrappelée. Toute infraction à la dite prohibition sera punie conformément aux dispositions de l'Article 2 qui précède.

1877, pour la suppression de la Traite des Esclaves, avons ordonné et ordonnons ce qui suit :—

Article 1. La vente des esclaves nègres ou Abyssins, de famille à famille, sera et demeurera prohibée en Egypte d'une manière absolue, sur tout le territoire compris entre Alexandrie et Assouan. Cette prohibition aura effet dans sept ans, à partir de la signature de la dite Convention, dont la présente Ordonnance fera partie intégrante. La même prohibition s'étendra au Soudan et aux autres provinces Egyptiennes, mais seulement dans douze ans, à dater de la signature précitée.

Art. 2. Toute infraction à cette prohibition de la part d'un individu quelconque, dépendant de la juridiction Egyptienne, sera punie de la peine des travaux forcés à temps, dont la durée pourra varier d'un minimum de cinq mois à un maximum de cinq ans, suivant la décision du Tribunal compétent.

Art. 4. Notre Ministre de la Justice reste chargé de pourvoir en temps utile à l'exécution des présentes.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Bhömeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars :—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

5. In cases not provided for by section four of this Regulation, or by any other law for the time being in force, the Courts shall act according to justice, equity and good conscience.

CHAPTER II.

PRE-EMPTION.

Right of pre-emption.

6. The right of pre-emption is a right of the persons hereinafter mentioned or referred to, to acquire, in the cases hereinafter specified, immoveable property in preference to all other persons.

Presumption as to its existence.

7. Unless the existence of any custom or contract to the contrary is proved, such right shall, whether recorded in the settlement-record or not, be presumed—

(*a*) to exist in all village-communities, however constituted, and

(*b*) to extend to the village-site, to the houses built upon it, to all lands and shares of lands within the village-boundary, and to all transferable rights affecting such lands.

Its existence in towns to be proved.

8. The right of pre-emption shall not be presumed to exist in any town or any sub-division thereof, but may be shown to exist therein, or in any sub-division thereof, and to be exercisable therein by such persons and under such circumstances as the local custom prescribes.

Devolution of right when property to be sold or foreclosed is a proprietary tenure.

9. If the property to be sold or foreclosed is a proprietary tenure, or a share of such a tenure, the right to buy or redeem such property belongs, in the absence of a custom to the contrary,

1st, to co-sharers of such tenure, in order of their relationship to the vendor or mortgagor;

2ndly, to co-sharers of the whole mahál in the same order; and

3rdly, to any member of the village-community.

Where two or more persons are equally entitled to such right, the person to exercise the same shall be determined by lot.

Notice to pre-emptors.

10. When any person proposes to sell any property or when he forecloses a mortgage upon any property in respect of which any persons have a right of pre-emption, he shall give notice to the persons concerned of the price at which he is willing to sell such property, or of the amount due in respect of such mortgage, as the case may be.

Such notice shall be given through the Court or some one of the Courts (where there is more than one such Court) in which, under the law for the time being in force, a suit to recover possession of the property might be instituted, and shall be deemed sufficiently given if it be stuck up on the *chaupál* or other public place of the village or town in which the property is situate.

Loss of right of pre-emption.

11. Any person having a right of pre-emption in respect of any property proposed to be sold, shall lose such right, unless within three months from the date of such notice he or his agent pays or tenders the price aforesaid to the person so proposing to sell.

Right of pre-emptor on foreclosure.

12. When the right of pre-emption arises in respect of the foreclosure of a mortgage, any person entitled to such right may, at any time within three months after the giving of the notice required by section ten, pay or tender to the mortgagee or his successor in title the amount specified in such notice, and shall thereupon acquire a right to purchase the property.

On completion of the purchase the person exercising the right of pre-emption shall be bound to pay to the mortgagee or his successor in title the amount specified in such notice, together with interest on the principal sum secured by the mortgage, at the rate specified by the instrument of mortgage, for any time which has elapsed since the date of the notice, and any additional costs which may have been properly incurred by the mortgagee or his successor in title.

Suit to enforce right of pre-emption.

13. Any person entitled to a right of pre-emption may bring a suit to enforce such right on any of the following grounds (namely)—

(*a*) that no due notice was given as required by section ten of this Regulation;

(*b*) that tender was made under section eleven or section twelve of this Regulation and refused;

(*c*) in the case of a sale, that the price stated in the notice was not fixed in good faith;

(*d*) in the case of a mortgage, that the amount claimed by the mortgagee was not really due on the footing of the mortgage and was not claimed in good faith, and that it exceeds the fair market value of the property mortgaged.

If, in the case of a sale, the Court finds that the price was not fixed in good faith, the Court shall fix such price as appears to it to be the fair market-value of the property sold.

If, in the case of a mortgage, the Court finds that the amount claimed by the mortgagee was not really due on the footing of the mortgage, and that it was not claimed in good faith, and that it exceeds the fair market-value of the property mortgaged, the amount to be paid to the mortgagee shall not exceed what the Court finds to be such market-value.

Decree to fix time for payment.

14. If the Court find for the plaintiff, the decree shall specify a day on or before which the purchase-money or the amount to be paid to the mortgagee shall be paid.

Effect of non-payment of purchase-money.

15. If such purchase-money or amount is not paid into the Court before it rises on that day, the decree shall become void, and the plaintiff shall, so far only as relates to such sale or mortgage, lose his right of pre-emption over the property to which the decree relates.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Bhömeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars :—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

EXPENDITURE—MEDICAL.

The 31st October 1877.

No. 4177.—The following Resolution is published in the *Gazette of India* for general information :—

Read again—

Pay and Allowances Proceedings, July 1877, Nos. 10 to 31.

Read the following letters :—

From the Government of Bengal, to the Government of India in the Home Department, No. 731T., dated 21st June, asking permission to appoint an Uncovenanted Medical Officer to be Civil Surgeon of Burdwan, one of the civil stations reserved for the Covenanted Medical Service.

From the Government of India in the Home Department, to the Government of Bengal, No. 451, dated 14th August 1877, refusing to sanction this appointment.

RESOLUTION.—By Resolutions No. 2185, dated 14th August 1876, and No. 3816, dated 31st October 1876, the principle was affirmed that, except for special reasons, and with the previous sanction of the Government of India, no one but a Commissioned Medical Officer should be appointed to any office reserved for the Covenanted Medical Services.

2. In applying for permission to make the appointment which has now been disallowed, the Government of Bengal pointed out that these orders of 1876 appear to conflict with certain earlier orders favoring as economical, the extended employment of Uncovenanted Medical Officers.

3. The Governor General in Council considers that there is no real conflict between the orders thus contrasted; but, to prevent future misunderstanding about a principle of much importance, His Excellency in Council deems it necessary to recite and declare afresh the policy of the Government as regards the public service in the Medical Department.

4. The Commissioned Medical Officers in the Military Department are all Members of organised Covenanted Services. The Government of India has authorised the appointment of Members of these Services to certain specified Civil Medical Charges and Appointments. These specified appointments are added to the List of Military Appointments for which provision is authorised, and the strength of the Commissioned Medical Services is regulated and maintained accordingly. Every addition to the List of Civil Medical Charges for which Covenanted Officers are authorised, involves an addition to the strength of one of the Commissioned Medical Services; and every reduction of that List involves a reduction of the strength of one of these Services.

5. The pay and pension of a Commissioned or Covenanted Medical Officer in Civil employ being higher than the pay and pension of an Uncovenanted Medical Officer, every addition to the List of Civil Medical Charges for which Commissioned Medical Officers are authorised, causes additional expense, and every reduction of this List produces a saving. Hence the orders to which the Government of Bengal has referred, favoring the extended employment of Uncovenanted, in place of Covenanted Medical Officers. The principle of these orders is still emphatically recognised: every curtailment of the List of Civil Medical Charges for which Commissioned Officers must be provided will be welcomed as conducive to economy, and no addition to this List will be allowed without the strongest evidence of necessity.

6. But, when once a Civil Medical Charge is enrolled in the List and provision is made for it by the necessary addition to the strength of one of the Commissioned Medical Services, it is impossible, except for very special reasons, to allow the appointment thereto of any one but a Commissioned Medical Officer. The appointment of an Uncovenanted Officer to an office for which provision is made in the recruitment of one of the Commissioned Medical Services would be obviously unjust to the officers of this Service, and tend to produce organic inconveniences such as the Government is now finding

it so difficult, and so costly, to remedy in the Covenanted Civil Service. It is an indispensable condition of the formation of every body of officers organised under covenant or commission, to fill certain offices, that the monopoly of these offices be jealously and rigidly preserved to them. Any departure from this course involves (1) injustice to the officers, and, as a consequence, well-founded, and, therefore, mischievous discontent among them; (2) needless expense for the pay of officers provided for offices otherwise filled.

7. Hence the Resolutions of 1876 that, except under circumstances of special necessity and with the particular sanction of the Government of India, no one but a Covenanted Medical Officer may be appointed to any office in the List of Medical Charges for which Commissioned Officers are provided. The principle of these Resolutions makes it necessary to add that they must continue to operate in respect to an office removed from that List, so long as any officer who was admitted to the service before the office was so removed, remains practically eligible for the appointment.

8. It seems necessary even to go a step further. It being necessary, for the general purposes of the Administration, to maintain organised bodies of Commissioned Medical Officers, economy plainly requires that the utmost possible use be made of them, and that, so long as any of them is unemployed, no other Medical Officer be appointed to the public service. An Uncovenanted Medical Officer is less costly than a Commissioned Officer, only if his employment enables the Government to dispense with the employment of a Commissioned Officer. It is not, however, possible to regulate the recruitment of bodies like the Commissioned Medical Services so exactly that their number shall never be excessive. Moreover, the reserve of Commissioned Medical Officers maintained for military purposes is larger than is needed for actual military duties in times of peace.

9. An Uncovenanted Officer, therefore, should never be appointed to any Medical Charge, whether it be contained in the List of Charges for which Commissioned Officers are allowed or not, until it has been ascertained that no Commissioned Officer can be spared for the post. Although the pay of a Commissioned Officer be higher, it will be cheaper and better to employ such an officer if one can be spared, rather than to leave him to draw his military pay for doing duties for which his services are not absolutely required, and to pay an additional Uncovenanted Officer though on a lower scale. The Departmental Medical Authorities will decide, in each case, whether a Commissioned Officer can or cannot be spared. The Government of India does not wish to press for the employment of Commissioned Officers in any Civil Charges not included in the List of Charges for which Commissioned Officers are sanctioned and provided; but the Heads of the Medical Department should be guided in their proceedings by the principles herein recited.

10. Briefly the policy of the Government of India is as follows:—

(1.)—The Governor General in Council has no desire to increase the number of the Commissioned Medical Officers: on the contrary, so far as the exigencies of the public service will permit, His Excellency in Council would be glad, for economical reasons, to reduce the number of such officers.

(2.)—But His Excellency in Council must insist upon the Commissioned Medical Officers in the several Services at any time, being utilised to the utmost, and he expects the Heads of the Medical Department and the Local Governments to take all precautions not only that there be no avoidable encroachment by Uncovenanted Officers upon the appointments for which Commissioned Officers are sanctioned and provided, but that not a single Uncovenanted Medical Officer be appointed to any Civil Medical Charge, unless no Commissioned Medical Officer is available for the duty.

11. As to the office of Superintendent of a Central Jail to which the Government of Bengal refers, the Commissioned Medical Services are not now recruited with a view to the provision of Members of these Services for this office. There is, therefore, no conflict between the Resolution in the Home Department No. 819, dated 16th June 1869, and the principles affirmed in this Resolution, and no objection to the continued operation of that Resolution.

12. It appears that, when ascertaining the sanctioned strength of the Commissioned Medical Service, in order to determine the number of recruits

to be added to the service from time to time, the Military authorities reckon, among the sanctioned appointments, all those actually filled by Medical Officers at the time, whether specifically sanctioned or not. This practice should now cease; no office should be admitted to the list of offices for which Commissioned Medical Officers are to be provided, unless the appointment of a Commissioned Medical Officer thereto is compulsory within the meaning of this Resolution. Any Commissioned Medical Officer who can be spared, may be appointed to any office which he can legally fill; but provision should be made beforehand for the supply of only those offices for which Commissioned Medical Officers have been specifically allowed, and to which, without the previous sanction of the Governor General in Council, no one but a Commissioned Medical Officer may be appointed.

Insert the following as an exception under this section:—

MINT AND CURRENCY.

The 19th October 1877.

No. 3556.—The following Resolutions are published in the *Gazette of India* for general information:—

Read again—

Financial Notification No. 959, dated 31st May 1869, directing the receipt of copper coin in payment of Government dues, without limit of amount, and the free supply of such coin from the Government Treasuries and Sub-treasuries to all applicants for amounts of the value of not less than Five Rupees, at the rates prescribed by Sections 2 and 9 of Act XIII of 1862.

Financial Resolution, No. 3173, dated 20th November 1873, removing the limit of Five Rupees, fixed in the Notification of 31st May 1869, for the issue of copper coin from the Government Treasuries and Sub-treasuries.

Read also the undermentioned reports regarding the depreciation in the value of copper coin in the Madras Presidency and in Mysore:—

From Deputy Accountant General, Mysore, No. 2500, dated 7th August 1877.
From Accountant General, Madras, No. 5175, dated 10th August 1877.

RESOLUTION.—The Governor General in Council learns with regret that, notwithstanding the measures recited in the preamble, legal-tender copper coin has been circulating, this year, at a discount in Southern India. Whenever this occurs, injury is inflicted especially upon the poor who can least afford to bear it, and the Administration is discredited.

2. His Excellency in Council is, accordingly, now pleased to direct the free exchange of silver for legal-tender copper coin in parcels of the nominal value of not less than Two Rupees, at every Treasury, Sub-treasury, and Currency Office throughout British India and in Mysore and Berar, and also, in anticipation of the consent of the Directors, at the Presidency Banks and their Branches. Legal-tender copper coin received by the Banks under this Resolution will be subject to the operation of the Ninth Clause of the Agreements with the Banks; and the Comptroller General or Accountant General, as the case may be, will, under the Fifth Clause of those Agreements, pass bills for the cost of remitting elsewhere any surplus legal-tender copper coin which may accumulate in any Bank or Branch Bank.

3. Wherever large bodies of men are assembled on public works under construction for purposes of Famine Relief, or otherwise, the local authorities should make special arrangements to supply silver on the spot in exchange for the legal-tender copper coin which may be collected by the purveyors or foremen at such assemblages.

4. The object of these orders is to prevent legal-tender copper coin from circulating at a discount; it is believed that, if they are carefully obeyed, such a state of things can never occur.

5. If, nevertheless, legal-tender copper coin does, at any time, or anywhere, circulate at a discount, the circumstance should be immediately reported to the Local Government, and by the Local Government to the Government of India, with full explanation of the supposed causes of the phenomenon, and of the measures taken to remedy the evil.

6. Care must be taken not to receive, whether under these orders or otherwise, at any Treasury, Sub-treasury or Currency Office, any copper coin that is not a legal-tender under the Indian Coinage Act 1870.

PAY AND ALLOWANCES—TRAVELLING ALLOWANCES.

The 29th October 1877.

No. 3957.

Read—

Letter from Comptroller General, No. 2337, dated 27th July 1877.

RESOLUTION.—In continuation of Notification, No. 1680, dated 11th March 1874, and in supersession of Notification No. 2511, dated 6th August 1875, and all other orders on the subject, the Governor General in Council is pleased to sanction the following travelling allowances for ministerial and menial officers required to travel on duty by railway:—

For Officers whose service is superior under the Civil Pension Code.

If the officer's salary is not less than Rupees 50	Second-class fare.
Otherwise	Intermediate class fare, or, if there be no intermediate class accommodation in the train, third-class fare.

For Officers whose service is inferior under the Civil Pension Code.

All officers	Third-class fare.

2. If the journey involves the absence of the officer from his head-quarters or standing camp for a night, so as to make it necessary for him to carry with him servants and baggage, double the fare to which he would otherwise be entitled, may, at the discretion of his superior officer, be granted to him.

3. An officer entitled to second or intermediate class fare may, at his option, charge for the journey, in lieu thereof, at the daily rate admissible to him for ordinary journeys, but may not charge railway-fare for any day for which he receives daily travelling allowance.

4. An officer entitled only to third-class fare may draw his ordinary daily travelling allowance in addition thereto.

SEPARATE REVENUE—POST OFFICE.

The 2nd November 1877.

No. 4308.—1. On and after the 1st January 1878 registered letters and parcels may be insured for the actual value, as certified on them by the sender, for transmission by inland post.

2. The facility for insuring registered letters and parcels will be made available at almost all post offices; the only exceptions being a few verpacular offices. The Government will guarantee to the sender the safe transit of insured registered letters and parcels, and will give compensation to him, within the insured value, for any actual loss occurring in transit from any cause whatsoever, except in the cases described below.

The excepted cases are as follows:—

(1).—Misdelivery arising out of incorrectness or incompleteness of the address written by the sender.

(2).—Wrong declaration or fraud on the part of the sender or addressee.

(3).—When the receipt or acknowledgment has been signed by the addressee or his agent: it being understood that the addressee shall fully examine the outward appearance of the letter or parcel before signing the receipt or acknowledgment. By the term agent is meant not merely a person specially authorized by the addressee but any servant or other person connected with the addressee's household

or business establishment who is accustomed to sign the receipts for registered letters or parcels arriving to his address. Any person who wishes to restrict the delivery of insured articles arriving to his address may do so by communicating with the post office.

(4).—When the sender does not give intimation of loss within three months from the date of posting.

(5).—In cases of damage as distinguished from loss; it being understood that the sender is responsible for the proper packing of articles liable to damage so as to provide sufficient protection for them.

(6.)—When there is no visible damage to the envelope or other covering or seals: it being understood that the sender must so pack the letter or parcel that its contents cannot be touched without visible damage as aforesaid being caused.

3. The compensation will be payable one month after the date on which intimation of loss is given by the sender to the post office, except in cases in which the post master general or chief inspector of post offices may consider that the circumstances demand the withholding of payment pending enquiry.

4. An acknowledgment signed by the addressee will in ordinary course be transmitted to the sender: and in the event of the acknowledgment conveying the intimation of loss, or of the non-receipt of an acknowledgment within three months, he is expected to give intimation to the post office.

5. The sender shall on receiving compensation make over in writing to the Government the whole of his rights in the lost property, and shall give all information necessary to facilitate the search for it.

6. No letter or parcel may be insured for an amount greater or less than the actual value of its contents as certified thereon by the sender. Letters and parcels may be insured without limit as to value. The weight of an insured parcel may not exceed the usual limit of 2,000 tolas: and in respect of size also it will be subject to the ordinary conditions mentioned in the postal guide.

7. The charges for insurance will be as follows:—

When the value certified does not exceed Rs.	10	...	1 anna,
"	"	"	"	25	...	2 annas,
"	"	"	"	50	...	4 "
"	"	"	"	75	...	6 "
"	"	"	"	100	...	8 "

and 8 annas for every additional rupees 100 or fraction thereof.

8. The prepayment of postage, and in the case of letters of the registration fee, is compulsory and must be effected by postage stamps affixed to the article. The prepayment of the insurance fee is also compulsory and must be made in cash to be tendered with the article. Thus a letter weighing (say) three-fourths of a tola and insured for rupees 1,000 must be prepaid with stamps to the extent of 1 anna for postage and 4 annas for registration (the total prepayment by stamps thus being 5 annas), and in presenting it at the post office it must be accompanied by rupees 5 in cash for insurance. Similarly a parcel weighing (say) 110 tolas and insured for rupees 1,000 must be prepaid with stamps of the value of 1 rupee for postage and accompanied by rupees 5 in cash for insurance.

* *Specimen of declaration to accompany the letter or parcel.*

This letter (or parcel) addressed to
Major G. H. Grantly,

and currency notes—

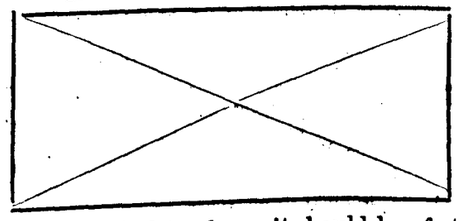
(Signature) HAMILTON & Co.,
8, Old Court House Street,
Calcutta.
Dated 19th March 1878.

9. A written declaration* stating the nature and value of the contents must accompany each registered letter or parcel tendered for insurance, and if currency notes form the contents or part of the contents thereof, the serial and general numbers as well as the value of each note must be written in the declaration. The signature and address of the sender must be added. This declaration will be recorded in the post office.

10. The declared value must also be certified by the sender in figures and words immediately above the address* on the envelope or cover of the letter or parcel: no correction or erasure is permissible in the writing or figures of the amount certified.

* *Specimen of writing the certified value on the envelope.*



Certified value two hundred and seventeen (217) rupees.
To Major G. H. Grantly,
15th Hussars,
Muttra.

11. Any person making a false certificate will be liable to the penalty under section 43 of the post office act of 1866, as well as to penalties for cheating under the penal code.

12. Registered letters and parcels intended for insurance must be presented at the window of the post office. The hours for their reception will be the ordinary registration hours, which with a few exceptions are from 7 to 8 A.M. and from noon to 5 P.M. They will not be received at all on Sundays, and they must be tendered at least one hour before the time fixed for the closing of the mail by which they are intended to be despatched: otherwise they will be detained till the next despatch is made.

13. Letters and parcels intended for insurance should be closed as follows:—

In the case of a *letter* if the cover be an envelope of the ordinary kind as represented on the margin, it should be of strong paper having seals on the flap point in the centre, and on each of the four corners, with distinct impressions of some device other than that of a current coin. If the cover of the letter be other than an ordinary envelope of the kind referred to above, it should be of strong paper or other substantial material, the seals being placed along each fold or seam not more than two inches apart. A *parcel* should be securely packed in cloth, wax-cloth or tin, and if it is packed in cloth or wax-cloth it should bear similar seals at intervals not exceeding three inches along each line of sewing.

14. Letters and parcels not fulfilling the required conditions will not be insured.

15. As a further precaution it is recommended that in closing an envelope containing only paper enclosures, the flaps should be closed with paste as well as with seals, and that a needle and thread should be passed through the envelope and its contents, the knot of the thread being placed under the central seal: a specimen of an envelope closed in this manner can be seen at the post office.

16. The addressee of an insured letter or parcel must sign both the receipt and acknowledgment presented therewith, unless the outward appearance of the cover give rise to suspicion of tampering. In such case he should return the letter or parcel unopened, arranging with the post master to take delivery at the post office, the letter or parcel being opened there in the presence of the post master and its contents entered in an inventory which will be prepared in duplicate and must be signed by the addressee. One copy of the signed inventory will be forwarded by the post office to the sender with the unsigned acknowledgment attached to it.

17. "Value payable parcels," *i. e.*, parcels the value of which is realized from the addressee and paid to the sender under the Postal Notice of 1st November 1877 may also be insured; insurance however renders the prepayment of postage and the insurance fee compulsory. When a "value payable" parcel is insured the sender will receive from the post office two receipts, *viz.*, a value payable receipt and an insurance receipt.

No. 481.—The following is republished for information and guidance with remark that in the case of a medical officer employed in the Public Works Department the sanction to his marching instead of journeying by dâk or railway should be given by the Superintending Engineer of the Circle, or other superior officer under whom he may be employed:—

Financial Department Notification No. 75 (Pay and Allowances) of 20th April 1877.

It has been brought to the notice of the Governor General in Council that great diversity exists in the rules regarding the travelling allowance of Civil Surgeons. In some cases these officers receive mileage only, in others they draw mileage for journeys and a daily allowance for halts, and under a third system they are permitted to receive, in addition to mileage, a daily allowance for the whole period of absence from headquarters, including the period for which mileage is drawn. It is sufficiently obvious that the travelling allowances of officers employed in similar capacities should be regulated, so far as local circumstances admit, on a uniform principle. His Excellency in Council is accordingly pleased to lay down the following rules for general adoption:—

I.—The rates of travelling allowance for Civil Surgeons are 8 annas a mile, subject to reduction under general rules for journeys by railway, and Rs. 5 a day, except in the Berars, for which a rate of Rs. 6-4-0 a day has been experimentally sanctioned for the current year.

II.—Subject to such restrictions, as the Local Government or Administration may see fit to impose, as to the duration and frequency of his journeys, a Civil Surgeon is entitled either to the daily allowance or to the mileage for the whole of each period of his absence from his headquarters on duty, unless the duty is one for which he receives no extra remuneration, in which case he is entitled to the daily allowance for halts and either to that allowance or to the mileage for journeys, provided that both allowances are not drawn for the same day, and that the allowance for journeys shall be payable only when the Civil Surgeon has the sanction of the district officer to his marching instead of going by dâk or railway.

The 2nd November 1877.

No. 482.—Deputy Commissary and Honorary Captain J. Mathews, Barrack Master 2nd class, Oudh, was granted leave on medical certificate in India with effect from 5th May to 27th September 1876, and his services replaced at the disposal of the Military Department from date of expiry of the leave.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Bhömeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

N. B.—The Regulations are liable to be altered in future years.

1. On June 25th, 1878, and following days, an Examination of Candidates will be held in London. At this Examination not fewer than Candidates will be selected, if so many shall be found duly qualified. Of these, will be selected for the Presidency of Bengal, [for the Upper Provinces, and for the Lower Provinces,] for that of Madras, and for that of Bombay.*—Notice will hereafter be given of the days and place of Examination.

* The number of appointments to be made, and the number in each Presidency, &c., will be announced hereafter. It will probably be about half the usual number.

2. Any person desirous of competing at this Examination must produce to the Civil Service Commissioners, before the 1st of May, 1878, evidence showing:—

(*a.*) That he is a natural-born subject of Her Majesty.

(*b.*) That his age on the 1st of January, 1878, will be above seventeen years and under nineteen years. [*N. B.—In the case of Natives of India this must be certified by the Government of India, or of the Presidency or Province in which the Candidate may have resided.*]

(*c.*) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India. *

(*d.*) That he is of good moral character.*

He must also pay such fee as the Secretary of State for India may prescribe.†

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate will, upon payment of the prescribed fee, be admitted to the Examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India; and if already selected, will be removed from the position of a Probationer.

6. The marks assigned to Candidates in each branch will be subject to such deduction as the Civil Service Commissioners may deem necessary, in order to secure that "a Candidate be allowed no credit at all for taking up a subject in which he is a mere smatterer."

8. The Examination will be conducted by means of printed questions and written answers, and by *vivâ voce* Examination, as may be deemed necessary. The last of these Examinations will be held at the close of the second year of probation, and will be called the "Final Examination," at which it will be decided whether a selected Candidate is qualified for the Civil Service of India.

10. Any Candidate who, at any of the periodical Examinations, shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of selected Candidates.

12. Applications from persons desirous to be admitted as Candidates are to be addressed to the "Secretary to the Civil Service Commissioners, London, S. W.," from whom the proper form for the purpose may be obtained.

FIBRES AND SILK.

The 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of Rheea, Ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile the demand for rheea continues and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council therefore considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Bhömeria nivea*.

4. A smaller reward not exceeding ten thousand rupees will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties and the fibre prepared from them must moreover always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces, in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*—

(1)—That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2)—That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens, through this Department.

NOTES.—1. The foregoing scale being a *maximum* one, the requirements of the troops may frequently be met by a smaller quantity, and with this object in view, the actual issue shall be notified from time to time in station orders; the intervals between the publication of each order is left to the discretion of the officer commanding the station, who will take advantage of every change in the weather in order that the consumption of fuel may be no more than is necessary for the comfort of the troops.

2. Fuel for married quarters, guard-rooms, regimental staff and other sergeants' quarters, battery office, hospital nurse, hospital office, institute, library, orderly-rooms, prison-room, and quartermasters' stores, will be issued on the scale laid down for small fire-places, and for only one in each separate set of quarters when but one family is occupying the place, irrespective of the number of fire-places which may exist.

3. The period for which fuel is sanctioned for hospital sergeants and nurses will be the same as if they were living in barracks.

4. When separate "day rooms" with fire-places exist in barracks, fuel will not be issued in addition to dormitories *exclusively* used as such.

5. Where no fire-places exist in hospital buildings at stations where fuel is authorized for hospitals, stoves or braziers with pipes leading to the open air will be supplied by the Public Works Department, and an issue of charcoal will be made in lieu of wood, provided that the cost of charcoal so supplied does not exceed that of the quantity of wood sanctioned.

6. In the case of an outbreak of epidemic disease, or other extraordinary circumstance, the scale of fuel to be supplied to any station in the Bengal presidency will be fixed by the officer commanding on the recommendation of the senior medical officer and with strict regard to the actual requirements of the case.

7. When fires are considered to be *absolutely necessary* at stations not enumerated in the foregoing table, the officer commanding the station may, when time will not admit of previous reference being made to the Commander-in-Chief or Government, issue the necessary orders for fuel to be supplied in such quantities and for such period only as he may deem necessary.

8. Fuel is sanctioned for all medical subordinates (except hospital assistants) doing duty at hill stations (classes A and B) *only* at the rate of 40lbs. per diem in winter and 20lbs. per diem in summer. The issue during the summer and winter months will correspond with the period of supply as made to the troops located in the same station.

9. Fuel is sanctioned to bazar, barrack, commissariat and ordnance sergeants and station butchers (when compelled to live away from the barracks) at those stations only where issued to the troops, at the rate of 40lbs. per diem in winter and 20lbs. per diem in summer. The issue during the summer and winter months will correspond with the period of supply as made to the troops located in the same station.

(*a.*) When the Commissariat Department is unable to arrange for the supply of fuel, compensation at the rate of Re. 1-4-7 per mensem is admissible. Compensation to bazar, commissariat and ordnance sergeants will be paid by the Commissariat Department, and to barrack sergeants by the Public Works Department.

(*b.*) A non-commissioned officer acting as a sub-conductor is entitled to fuel as for departmental staff sergeants.

(*c.*) When a commissariat sergeant is absent from a hill station on command, his wife is entitled to fuel at the same scale as if her husband were present.

10. Soldier students attached to the Thomason College at Roorkee, are entitled to fuel when issued to the troops on the class E scale for small fire-places.

11. The size of the pieces of firewood to be issued to barracks and hospitals will be determined by the officer commanding the corps, depôt or detachment subject to the approval—when the Executive Commissariat Officer considers it necessary—of the officer commanding the station. But in no instance must the pieces of firewood exceed eighteen inches in length.

12. The fuel in barracks will be under the charge of a non-commissioned officer, and in hospitals under that of the senior warrant medical officer.

13. An allowance of Rs. 4 per mensem is sanctioned to master-tailors in lieu of fuel for the purpose of warming the tailor's shop.

14. The native hospital of each of the mountain batteries of Royal Artillery stationed at Khyragully and Jutogh is allowed fuel for one fire-place between 16th March and 14th October inclusive, and for two fire-places between 15th October and 15th March inclusive, on the certificate of the officer in medical charge that fires are *absolutely necessary*.

15. When the only firewood available for issue is of inferior heating quality, or is saturated with wet, the officer commanding the station is empowered to sanction the issue of a small additional percentage on the scale, to compensate for the loss to the troops, but this will be done on his own responsibility.

16. The supply of firewood is not authorized for canteens at hill stations.

FIREWOOD FOR HOSPITALS OF NATIVE TROOPS.

The issue of firewood is sanctioned for hospitals of native troops at the following stations, the scale and restrictions prescribed for British troops at the same or neighbouring stations being held applicable:—

I.—The following stations of the Punjab Frontier Force:—Abbottabad*, Murdan, Kohat, Bunnoo, Dera Ghazi Khan, Rajunpore, Dera Ismail Khan.

REGULATIONS FOR THE OPEN COMPETITION OF JULY 1878.

N. B.—The Regulations are liable to be altered in future years.

1. On June 25th, 1878, and following days, an Examination of Candidates will be held in London. At this Examination not fewer than Candidates will be selected, if so many shall be found duly qualified. Of these, will be selected for the Presidency of Bengal, [for the Upper Provinces, and for the Lower Provinces] for that of Madras, and for that of Bombay.*—Notice will hereafter be given of the days and place of Examination.

2. Any person desirous of competing at this Examination must produce to the Civil Service Commissioners, before the 1st of May 1878, evidence showing :—

(*a.*) That he is a natural-born subject of Her Majesty.

(*b.*) That his age on the 1st of January 1878 will be above seventeen years and under nineteen years, [*N. B.—In the case of Natives of India this must be certified by the Government of India, or of the Presidency or Province in which the Candidate may have resided.*]

(*c.*) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India.†

(*d.*) That he is of good moral character.†

He must also pay such fee as the Secretary of State for India may prescribe.‡

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate will, upon payment of the prescribed fee, be admitted to the Examination. The Commissioners may, however, in their discretion, at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India; and if already selected, will be removed from the position of a Probationer.

4. The Examination will take place only in the following branches of knowledge :—

6. The marks assigned to Candidates in each branch will be subject to such deduction as the Civil Service Commissioners may deem necessary, in order to secure that "a Candidate be allowed no credit at all for taking up a subject in which he is a mere smatterer."

7. The Examination will be conducted by means of printed questions and written answers, and by *viva voce* Examination, as may be deemed necessary.

8. The marks obtained by each Candidate, in respect of each of the subjects in which he shall have been examined, will be added up, and the names of the Candidates who shall have obtained a greater aggregate number of marks than any of the remaining Candidates, will be set forth in order of merit, and such Candidates shall be deemed to be selected Candidates for the Civil Service of India, provided they appear to be in other respects duly qualified. Should any of the selected Candidates become disqualified, the Secretary of State for India will determine whether the vacancy thus created shall be filled up or not. In the former case, the Candidate next in order of merit, and in other respects duly qualified, shall be deemed to be a selected Candidate. A selected Candidate declining to accept the appointment which may be offered to him will be disqualified for any subsequent competition.

The Examination will be conducted by means of printed questions and written answers, and by *viva voce* Examination, as may be deemed necessary. The last of these Examinations will be held at the close of the second year of probation, and will be called the ".Final Examination," at which it will be decided whether a selected Candidate is qualified for the Civil Service of India.

10. Any Candidate who, at any of the periodical Examinations, shall appear to have wilfully neglected his studies, or to be physically incapacitated for pursuing the prescribed course of training, will be liable to have his name removed from the list of selected Candidates.

11. The selected Candidates who, at the Final Examination, shall be found to have a competent knowledge of the subjects specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of age, health, and character, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service.

‡‡ The standard of marking in Sanskrit and Arabic will be determined with reference to a high degree of proficiency, such as may be expected to be reached by a Native of good education.

* Full instructions as to the course of study to be pursued will be issued to the successful Candidates as soon as possible after the result of the open competition is declared.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.* :—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made; the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent: on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars :—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform

to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer [illegible] substantially unchanged.

3. His Excellency the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear

and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*:—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second-class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*:—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

NOTIFICATIONS.—JUDICIAL.

Fort William, the 7th December 1877.

No. 183J.—The following Notification regarding the "Extradition Ordinance (Ceylon), 1877," which appeared in the *London Gazette* of the 30th October 1877, is republished for general information :—

At the Court at *Balmoral*, the 23rd day of *October 1877*.

PRESENT,

The QUEEN'S Most Excellent Majesty.
His Royal Highness Prince Leopold.
Lord President.
Lord Chamberlain.

Whereas by section 18 of "The Extradition Act 1870," it is among other things enacted, That if by any law made after the passing of the said Act by the Legislature of any British Possession, provision is made for carrying into effect within such Possession the surrender of Fugitive Criminals who are in, or suspected of being in, such British Possession, Her Majesty may, by the Order in Council applying the said Act in the case of any Foreign State, or by any subsequent Order, either—

Suspend the operation within any such British Possession of the said Act, or of any part thereof, so far as it relates to such Foreign State, and so long as such law continues in force there and no longer;—

Or direct that such law or ordinance or any part thereof shall have effect in such British Possession, with or without modifications and alterations, as if it were part of the Act:

And whereas by an Ordinance enacted by the Legislature of Ceylon, the short title of which is, "The Extradition Ordinance (Ceylon), 1877," it is provided that "all powers vested in and acts authorized or required to be done by a Police Magistrate or any Justice of the Peace in relation to the surrender of Fugitive Criminals in the United Kingdom under 'The Extradition Acts, 1870 and 1873,' are thereby vested in and may in the Colony be exercised and done by any Police Magistrate in relation to the surrender of Fugitive Criminals under the said Acts."

And whereas it is further provided by the said Ordinance that the said Ordinance shall not come into operation until Her Majesty shall by Order in Council direct that the said Ordinance shall have effect within the Colony as if it were part of "The Extradition Act, 1870," but that the said Ordinance shall thereafter come into operation as soon as such Order in Council shall have been publicly made known in the Colony.

Now, therefore, Her Majesty, in pursuance of "The Extradition Act, 1870," and in exercise of the power in that behalf in the said Act contained, doth by this present Order, by and with the advice of Her Majesty's Privy Council, direct that the said Ordinance shall have effect in the Colony of Ceylon, without modification or alteration, as if it were part of "The Extradition Act, 1870."

And the Right Honourable the Earl of Carnarvon, one of Her Majesty's Principal Secretaries of State, is to give the necessary directions herein accordingly.

No. 184J.—The following extract from the *London Gazette*, dated Friday, October the 26th, 1877, is published for general information :—

At the Court at *Balmoral*, the 23rd day of *October*, 1877.

PRESENT,

The QUEEN'S Most Excellent Majesty in Council.

Whereas by an Act of Parliament passed in the 7th year of Her Majesty's reign intituled "An Act for the better Government of Her Majesty's subjects resorting to China" it is (amongst other things) enacted that it shall be lawful for Her Majesty, by any Order or Orders made with the advice of Her Majesty's Privy Council, to ordain, for the government of Her Majesty's subjects being within the dominions of the Emperor of China, or being within any ship or vessel at a distance of not more than 100 miles from the coast of China, any law or ordinance which to Her Majesty may seem meet, as fully and effectually as any such law or ordinance could be made by Her Majesty in Council for the government of Her Majesty's subjects being within the Island of Hong Kong.

And whereas Her Majesty was pleased by and with the advice of Her Privy Council, by Order in Council of the 9th day of March, 1865, to ordain (amongst other things) that all Her Majesty's jurisdiction exercisable in China or in Japan for the judicial hearing and determination of such matters as are by the 4th section of the said Order specified should be exercised according to the provisions of the said Order and not otherwise and that save as expressly provided by the said Order, all jurisdiction, power, and authority of the Supreme Court of Hong Kong exercisable in relation to British subjects resident in or resorting to China or Japan should absolutely cease.

And whereas by the Foreign Jurisdiction Amendment Act 1866 it was enacted that it should be lawful for Her Majesty in Council by Order in Council under the Foreign Jurisdiction Acts to confer upon any Court in Her Majesty's possessions out of the United Kingdom any jurisdiction which Her Majesty in Council might lawfully by any such Order confer on any Court in any country or place

out of Her Majesty's dominions within which Her Majesty has power or jurisdiction.

And whereas Her Majesty was pleased by and with the advice of Her Privy Council by another Order in Council of the 28th day of March 1868 to ordain (amongst other things) that in addition to the powers then vested in the Supreme Court of Hong Kong the said Supreme Court might have jurisdiction over and take cognizance of all crimes and offences committed by British subjects at any place on land being within six miles of any part of the Colony of Hong Kong, and not being on the mainland of China, and of and over all disputes and differences between British subjects being in any such place within such limit as aforesaid.

And whereas it has seemed to Her Majesty, by and with the advice of Her Privy Council, to be expedient to revoke the said last-mentioned Order in Council and to extend the jurisdiction of the Supreme Court of Hong Kong in respect to matters arising in the neighbourhood of the Colony of Hong Kong.

Now therefore, Her Majesty by virtue of the powers in this behalf by the said recited Act, or otherwise vested in Her, is pleased by and with the advice of Her Privy Council, to order and it is hereby ordered as follows :—

1. In addition to the powers now vested in the said Supreme Court of Hong Kong, the said Supreme Court may have jurisdiction over and take cognizance of all crimes and offences committed by British subjects at any place on land, being within ten miles of any part of the Colony of Hong Kong and of and over all disputes and differences between British subjects being in any such place within such limit as aforesaid, and the said Court shall and may deal with, try, hear and determine all such cases as fully and effectually as if such crimes or offences had been committed or such disputes or differences had arisen by or between British subjects within the said Colony of Hong Kong.

2. The said Order in Council of the 28th day of March 1868 is hereby revoked except for the purpose of completing any proceedings criminal or civil which may have been commenced thereunder before this Order is published in the said Colony of Hong Kong and any proceedings so commenced may be completed and any sentences and judgments given therein may be executed as fully and effectually as if this Order had not been made.

3. The jurisdiction hereby conferred upon the Supreme Court of Hong Kong shall be in addition to and concurrent with any power or jurisdiction now possessed by the Supreme Court for China or Japan or any Provincial Court under the said Order in Council of the 9th of March 1865 to deal with, try, hear and determine such cases as are herein mentioned and nothing in this Order contained shall affect the power of the said Supreme Court for China or Japan or of any Provincial Court under the said last-mentioned Order in Council to deal with, hear, try and determine the said cases.

And the Right Honourable the Earl of Carnarvon, one of Her Majesty's Principal Secretaries of State, is to give the necessary directions herein accordingly.

C. L. PEEL.

TENDERS FOR THE BERAR SURPLUS CASH BALANCES.

SEASON 1878.

NOTICE TO BANKERS, CAPITALISTS AND OTHERS.

Tenders are invited for the purchase of Bills drawn against the Surplus Cash Balances of the Berar Treasuries, for the calendar year 1878, on the conditions specified in the Rules noted below:—

1. Bills will be available for issue on the Treasuries of Akola and Amraoti in the months, and to the probable extent, noted in statement at foot.
2. Nothing, however, in this Notification shall pledge the Resident at Hyderabad to provide the exact sums estimated to be available in the months specified, and such tenders as are approved will be registered for final acceptance, to the extent to which money may be actually available. As a guide, however, to Bankers, Capitalists, and others, to tender for the probable surplus during the year above quoted, it is hereby intimated that the Surplus Cash Balances available annually for the preceding three years amounted to Rs. 1,41,00,000, or an average per annum of Rs. 47,00,000, and that the probable surplus for the ensuing season, it is estimated, will be about Rs. 30,00,000, as shown in statement below.
3. All tenders should be submitted in sealed envelopes, addressed as follows:—

WITHDRAWAL OF BERAR SURPLUS FOR SEASON 1878.

Tender for Bills on (*Akola or Amraoti as the case may be*) for the month of (*February or March, as the case may be*).

TO THE FIRST ASSISTANT RESIDENT,

HYDERABAD, DECCAN.

4. Tenders must on no account be written in the vernacular, and should specify the month or months for which the tenders are made. Separate tenders must be submitted for each month for Bills on Akola, and separate tenders must also be submitted for each month for Bills on Amraoti. Infringement of this rule will involve rejection of the tender. For the convenience of intending purchasers, printed forms of tenders will be kept in stock by the Extra Assistant Commissioner, Hyderabad, and will be issued to applicants.
5. The name and address of the person tendering should be clearly written at foot of the tender in English (in addition to the vernacular, if signature is in the vernacular).
6. Tenders may be for the whole, or any portion, in even thousands, of the amount advertised.
7. Tenders must specify the rate of exchange at which the tender is made, the par or assay value of 100 Government Rupees being equivalent to 116-14-6 in Halli Sicca Currency.
8. Each tender must be accompanied by a deposit of Rs. 5,000 in Halli Sicca coin, or Government Securities, as a guarantee of good faith; which deposit will be returned in the event of non-acceptance of tender, but the tender itself will not be returned.
9. Tenders will be opened at the Hyderabad Residency at noon, on Tuesday the 15th January 1878; and persons tendering are invited to be present, or to be represented by their Agents.
10. The Resident will not bind himself to accept the highest or any tender, nor will any reason be assigned for rejection of tenders.
11. Persons whose tenders may be finally accepted in whole or in part will be required, at the option of the Resident, to deposit 10 per cent. of the amount of their tenders on acceptance, and no portion of the deposit will be refunded till the *full* amount of Bills is received into the Treasury. This deposit will be forfeited in whole or in part, at the option of the Resident, in the event of noncompliance with the terms of the tender.
12. Persons whose tenders may be finally accepted will be required to pay the amount of their tenders into the Resident's Treasury between the 15th of the month to which the tenders refer and the 14th of the month following. No larger amount will be received on any one day into the Government Treasury than can be conveniently counted and examined by the establishment entertained for that purpose.
13. Persons whose tenders may be finally accepted will be required to pay the equivalent into the Resident's Treasury at Hyderabad in new Halli Sicca Rupees prior to the issue of Bills.
14. The Bills will be drawn at sight, in even thousands, and paid in Government Rupees at the Treasuries drawn upon. No Bill will be drawn for less than 5,000 Government Rupees, but Bills for sums in excess of this amount, in even thousands, will be issued to suit the convenience of purchasers.

N. B.—If, when the last instalment of Land Revenue has been paid up, the state of the collections should warrant such a course, a supplementary Notification will be issued, stating whether any and what further limited amount will be available for withdrawal.

The following Statement shows the amount of the Actual Surplus withdrawn from Berar annually for the three years 1875—1877, and that which is estimated to be available for withdrawal for the year 1878:—

Despatch No. 164, dated the 10th May 1877.

His Excellency the Governor General in Council is pleased to notify the following supplementary regulations which have received the approval of the Right Hon'ble the Secretary of State for India, providing for the case of military officers in civil employ referred to in paragraph IV of the subsidiary rules appended to G. G. O. No. 1316 of the 30th December 1875:—

I. Any officer now in civil employ, who is subject to the Military Furlough Regulations of 1854 or 1868, shall remain so subject.

II. Any military officer who may hereafter enter civil employ, who is not already subject to the Military Furlough and Leave Rules of 1875, shall remain subject to the rules applicable to him when he enters civil employ.

NOTE.—An officer referred to in rules I and II cannot elect the Military Furlough and Leave Rules of 1875, so long as he continues in civil employ.

III. Any officer who may enter civil employ, who is already subject to the Military Furlough and Leave Rules of 1875, shall be subject to the rules in the Civil Leave Code applicable to covenanted civil servants both as regards furlough and leave taken out of India and in India.

IV. If any officer who is employed in the civil administration has taken furlough in the Military Department under the said rules of 1875, this furlough shall be treated, in calculating the furlough or special leave admissible to him under the preceding rule, as if it had been furlough taken under the Civil Leave Code. Leave so taken under the 10th military rule shall be treated as if it had been privilege leave taken under the Civil Leave Code, and the claims of the officer under the Civil Leave Code adjusted accordingly.

V. If an officer who has been subject to the rules in the Civil Leave Code under the third of these rules is again employed in the Military Department, and so again becomes subject to the Military Furlough and Leave Rules of 1875, any furlough or special leave taken by him under the Civil Leave Code will be treated, in calculating the furlough admissible to him under the said military rules, as if it had been furlough taken under the said military rules. Privilege leave taken under the Civil Leave Code Rules will be treated as if it had been leave taken under the 10th military rule. Subsidiary or examination leave taken under the Civil Leave Code will not affect the claims of such an Officer under the Military Furlough and Leave Rules.

The 10th December 1877.

No. 418.—APPOINTMENT.—The Reverend A. Robinson to be Chaplain of Thayetmyo in British Burma.

The 12th December 1877.

No. 421.—THE following Rules for the care and use of Government Cemeteries other than those in the Presidency Town of the Diocese of Calcutta, for the levy and expenditure of fees on graves and monuments in Cemeteries and Churches throughout India, and for the levy of other ecclesiastical fees, are published for general information and guidance:—

I.

Rules for the care and use of Government Cemeteries throughout India except those in the Presidency Town of the Diocese of Calcutta.

CHARGE OF THE CEMETERY.

RULE I.—(1.)—The Resident Chaplain of a station has charge of the general cemetery and frames an estimate of the expenditure connected therewith in accordance with the directions contained in para. 1, Home Department* Resolution No. 6—370-382, dated 9th November 1876.

* Appendix A.

(2.)—The term "Resident Chaplain" includes a Clergyman of the Additional Clergy Society so far as concerns the stations to which he stands appointed or other Clergyman of Church of England placed in charge by the Bishop.

(3.)—During the temporary absence of the Chaplain, and at stations where there is no Resident Chaplain, the charge of the cemetery belongs to the Chief Magistrate on the spot, or the senior Military Officer if the cemetery is attached to a military cantonment.

(4.)—At out-stations where there is a Church Committee the charge of the cemetery will belong to the senior member of Committee, and where there is no such Committee, to any subordinate officer nominated by the Magistrate or Deputy Commissioner of the district.

RULE II.—Each cemetery is allowed a mali-chowkidar or chowkidars in accordance with the scale prescribed in para. 2, Home Department Resolution* No. 6—370-382, dated 9th November 1876. These chowkidars are paid by Government through the Resident Chaplain by whom they are appointed and dismissed. In stations where there is no Resident Chaplain, the chowkidars are paid, appointed and dismissed by the other officers named in Rule I.

* Appendix A.

RULE III.—Every reasonable effort should be made by the Resident Chaplain or other officer in charge under Rule I, not only to keep the cemetery in decent order, but to preserve its character as the resting-place of the remains of departed friends by providing for the necessary repairs, and by planting the ground with suitable trees.

NOTE.—To meet the expenditure under this Rule, see Rule I, and para. 1 of Home Department Resolution† No. 6—370-382, dated 9th November 1876.

† Appendix A.

RULE IV.—The chowkidar will keep the key of the cemetery under the direction of the officer in charge.

RULE V.—The officer who has charge of the cemetery under the operation of Rule I will perform all the duties assigned to the Chaplain by Rules VII, VIII, IX, X and XI, with the exception of the approval of the inscriptions in that part of the cemetery reserved for the Church of England. These are to be forwarded to the visiting Chaplain, or, if there be none, to the Archdeacon, and not cut till his sanction be obtained. Should however, an inscription be disapproved, it may be referred to the Government for decision.

INTERMENTS BY WHOM TO BE CONDUCTED.

RULE VI.—(1.)—The Chaplain buries Christians of all denominations whose friends desire his services as laid down in the orders of the Government of India in the Home Department§ No. 159, dated the 6th June 1877, using always the service of the Church of England, and the consecrated portion of the cemetery.

§ Appendix B.

(2.)—A portion of every cemetery will be set apart by the orders of Government for the use of Roman Catholic congregations, and another portion will be appropriated for the joint use of other Christians whose friends desire that they should be interred otherwise than according to the ritual of either the Church of England or of the Church of Rome, or who cannot legally be so interred.

(3.)—These unconsecrated portions thus set apart are not to be fenced or walled off from the rest of the cemetery, but simply divided off by a pathway, and they must be added to the existing cemetery or reserved from it. If the existing cemetery be large enough for the wants of the whole Christian community, such portions will be reserved, without reference to the fact that the whole enclosure has or has not been consecrated according to the rites of the Church of England. If the cemetery be only large enough for the wants of Christians desiring to be buried with the service of the Church of England, such portions will be added. The whole cemetery thus divided is to be surrounded by a wall, to have but one gate of entrance, and to be under the care of the officer specified in Rule I.

RULE VII.—(1.)—Ministers of all denominations have a right to conduct the service of burial over the body of any deceased member of their respective congregations who may be buried in any fitting portion of the ground set apart for the denomination to which the deceased belonged. At least six hours' previous notice of the burial should be given to the Chaplain in charge of the burial-ground or, in the absence of the Chaplain, to the officer who may be in actual charge. The period herein prescribed may, for special reasons, be shortened with the permission of the Chaplain or officer in charge of the cemetery. Such Chaplain or officer will, if he thinks the circumstances of the case demand it, bring the facts to the notice of the local Magisterial authorities in time to admit of an order stopping the burial being passed if necessary.

(2). A certificate of burial drawn up according to the required form must be sent to the Chaplain or to the Registrar of Births, Marriages and Deaths, to be entered in the register kept up by him.

RULE VIII.—No burial can take place in that part of a Government cemetery which has been set apart for the use of members of the Church of England, unless the service prescribed by that Church is read by the Chaplain if there be one, or, in his absence, by the layman who officiates at the funeral. But a person may be interred in the other portions of a Government cemetery with or without the use of any services of religion.

ARRANGEMENTS FOR BURYING.

RULE IX.—The arrangements for making the necessary preparations for digging graves, preparing coffins, and the like, should rest in military stations upon the senior military officer, and in civil stations upon the chief local Magistrate. These officers are authorized to direct any local Public Works officer to supply all that is necessary. The local Public Works officer would usually be the Executive Engineer of Military Works in military stations, and the Civil Executive Engineer in other stations. The expenditure incurred by the Executive Engineer will be held in his miscellaneous advance account until repaid by the officer authorizing the expenditure. But in cases of necessity or emergency, either officer may be called upon to do what is required.

RULE X.—The officer in charge of the cemetery shall keep a plan of the entire cemetery to be provided by the Public Works Department, with references written upon it, in a book, in which the names of parties interred are recorded; this plan and book being kept with the church registers.

ERECTION AND REPAIR OF MONUMENTS.

RULE XI.—Monuments may be erected by any interested person. The inscription before being cut, and the design, must be first approved of as laid down in Rule V, and the dimensions of the monument must accord with the orders in para. 3, Home Department Resolution* No. 6—370-82, dated 9th November 1876.

* Appendix A.

RULE XII.—(1.) The Chaplain should communicate with the friends of the deceased when a monument needs repairing, or, when such communication is not possible, advertize three times in the *Gazette of India* and the Gazette of the Province; and if it falls into a ruinous condition, and no party will undertake to restore it, the ruined monument must be made level with the ground during the next repairs, and any slab it contained must be placed over the grave in simple masonry, or be inserted in the wall.

(2). All work connected with monuments must, as far as possible, be carried on outside the cemetery, and any undertaker not removing the débris of his work immediately upon its completion is liable to a fine of Rs. 5.

Note.—This rule does not apply to monuments of historical or archæological interest. Lists of such tombs should be obtained by Local Governments and Administrations, and as many of them as may be properly preserved at the public expense should be looked after by the local Public Works Department.

INSPECTION.

RULE XIII.—The cemetery should be inspected once in a half-year by the Chaplain in company with the Executive Engineer, the plan and book kept under Rule X being also examined, and a report made to the Archdeacon, and recorded in the Ecclesiastical record-book of the station, and also in the Engineer's Office.

RULE XIV.—(1.) Commissioners of Divisions should inspect cemeteries, whether closed or in use, within their respective jurisdictions, in the course of their annual tours, and should bring to the notice of the local Government any instances of cemeteries which are negligently kept, or which the officers in charge may have allowed to fall into a state of bad repair or disorder. All cemeteries are equally subject to the visitation and supervision of the Bishop and Archdeacon.

(2.) Sanitary officers in cantonments are invited to inspect cemeteries within their respective cantonments, and to report to local Governments any matter calling for notice.

MISCELLANEOUS.

RULE XV.—It is desirable that officers commanding regiments or detachments should be instructed to cause a report to be made to the nearest civil officer of graves dug for soldiers on march, that measures may be taken for their effectual protection and preservation. These graves and all scattered Christian graves throughout the district are under the care of the local civil authorities.

RULE XVI.—The above rule do not apply to Presidency cemeteries which have rules of their own.

II.

Rules regarding the levy and expenditure of fees on masonry graves and monuments in Cemeteries and Churches throughout India.

WHAT FEES ARE PAYABLE, AND BY WHOM.

RULE I.—A fee of 8 annas for every square foot of ground occupied shall be charged for the construction of any masonry grave in a burial-ground.

NOTES.—(1.) This fee is independent of the actual charge for making a grave.

(2.) The fee leviable on a masonry grave regularly built up to the level of the ground is also leviable on a masonry grave which is not built up to the level of the ground, but which is only over and round the coffin.

(3.) The "ground occupied" is to be regulated according to the rule laid down in paragraph 3 of Home Department Resolution† No. 6—370-382, dated 9th November last.

† Appendix A.

(4.) The same fees which are levied on pucka graves should also be levied on cutcha graves which have pucka foundations.

RULE II.—A further fee of one rupee per square foot shall be levied on the erection of a monument in a burial-ground; provided, however, that for a simple headstone or flat slab not more than 3 feet 6 inches in height or length, and 2 feet in width, a uniform fee of Rs. 5 only shall be charged A fee of Rs. 75 shall be levied on a faculty for the erection of a monument in a church.

NOTES.—(1.) A tablet on the wall of a cemetery is to be regarded as a monument.

(2.) "Simple headstone." A cross no higher than a usual headstone and no longer than a usual flat stone, is included in this description.

(3.) When a monument erected over a masonry grave, the total of the two fees will be equivalent to one and a half rupee for each square foot of ground occupied.

(4.) The fee of Rs. 75 levied on a faculty, drawn in the case of non-Government churches by the present incumbents of the office of Register of the Diocese in Calcutta and Bombay, shall cease on a vacancy occurring in the appointment. The money is to be spent in charity as in the case of Government churches.

RULE III.—When a cenotaph is erected in a cemetery, a fee of Rs. 50 should be levied in addition to the fee charged for the ground occupied, and the space should be strictly limited to six feet square.

RULE IV.—Fees for masonry graves and monuments should be levied over the whole cemetery, including those portions which are used by Roman Catholics and Non-conformists.

NOTES.—(1.) The same rules in regard to fees apply to all graves, whether of Roman Catholics, of Non-conformists or members of the Established Church.

(2.) Where a parcel of ground used for burial by a Christian community of any particular denomination other than the Established Church of England forms no part of the general cemetery but is separate from it, or where, although not so separate, it is clearly distinguishable and was not originally acquired, and has not been kept up at the expense of the State, then, if the community by which the ground is used so desire, the Government will give up all claim to fees, on

the distinct understanding that it is divested of all responsibility for the maintenance of the cemetery in proper order. On the other hand, where such parcels of ground form part of a cemetery of the Established Church or the general Christian community, provided and maintained by the Government, no distinction can be made as to keeping up any one part of the cemetery, nor should any exemption from fees be permitted.

EXEMPTION FROM FEES IN GOVERNMENT CEMETERIES.

RULE V.—British soldiers and non-commissioned officers are exempted, with retrospective effect, from the payment of any fee for the construction of masonry graves, or for the erection of monuments in burial-grounds to the memory of their comrades, wives or children. No monument, however, either regimental or private, shall exceed the dimensions prescribed in paragraph 3, Home Department Resolution* No. 6—370-82, dated 9th November 1876.

* Appendix A.

NOTES.—(1.) This rule is applicable to the British soldiers and non-commissioned officers whether in military or civil employ.

(2.) Monuments erected under this rule subscribed for partly by non-commissioned officers and men, and partly by officers, are likewise exempted from the prescribed fee.

(3.) Warrant officers are not exempted from payment of ecclesiastical fees.

RULE VI.—The Chunar pensioners being more or less under military control come under the category of soldiers, and are therefore entitled to the same exemptions as soldiers. But this ruling does not apply to other pensioners who are not similarly under military control.

RULE VII.—The Chaplain may at his discretion reduce, or altogether remit in cases of extreme poverty, the fee leviable on the construction of masonry graves, but not for the erection of monuments.

NOTE.—The Bishop on special occasions may sanction a reduction or remission of fees for the erection of monuments.

FEES BY WHOM TO BE COLLECTED.

RULE VIII.—In those stations in which a mason has been appointed, who alone is allowed to work within the cemetery, he is required, in exchange for the monopoly, to collect the fees on monuments and masonry graves, and pay them to the Chaplain: and any person ordering the construction of a masonry grave or monument by a mason or undertaker other than the person appointed by the Chaplain must pay the fees in advance.

NOTE.—Fees on masonry graves and monuments constructed by the appointed mason or undertaker need not be paid in advance, but in case of failure of payment, their recovery must be entrusted by the Chaplain to the Magistrate or Deputy Commissioner as the case may be.

FEES TO WHOM TO BE PAID.

RULE IX.—The fees prescribed in Rules 1, 2 and 3 should be paid to the Chaplain or, in the absence of the Chaplain, to the officer in charge of the burial-ground and remitted at once to the Civil treasury, except fees for monuments in churches which should be paid over by the Chaplain to the charitable objects to which the Bishop assigns them when his faculty is issued.

CEMETERY RECEIPTS AND CHARGES.

RULE X.—All cemetery receipts and charges to be regulated as laid down in para. 4 of Home Department Resolution† No. 6—370-382, dated the 9th November 1876.

† Appendix A.

MISCELLANEOUS.

RULE XI.—(1.) A person may not purchase a portion of a Government cemetery as a burial-place for himself and his family, so as to have a right to fence it with a rail or fence, and thus make it the private property of himself and family. But when such rights already exist, they are not without reason to be interfered with, and special cases as they arise may require exceptional treatment. And in such cases the Archdeacon may exercise his discretion with the sanction of the local Government.

(2.)—All private rights must, however, cease if for sanitary or other public reasons the cemetery is closed against burials, or even that portion of it in which the private ground is situated, but in special cases the Archdeacon may exercise his discretion of giving permission to open a vault or masonry grave.

(3.)—No kutcha grave can be opened in any cemetery for the purpose of converting it into a masonry grave without application to the Archdeacon which must be accompanied by a certificate from the Principal Medical Officer that this may be done without risk to public health.

RULE XII.—(1.) When a piece of ground is granted by Government as a cemetery to a Railway Company for the interment of its own servants, which afterwards keeps it in repair and provides the necessary establishment, so that beyond the original grant of ground Government is at no expense, the collection and application of fees accruing is left to the decision of the Railway Company which maintains the cemetery in good order and repair.

(2).—The Commissioner or District or Judicial Officer, and in military stations the officer commanding should inspect such cemeteries and report to Government if they find them negligently kept.

III.

Other Ecclesiastical Fees.

RULE I.—No fees are charged for the performance of the rite of baptism or burial, or for the registration of the performance of these offices.

RULE II.—In addition to the fee for the Surrogate's license, a fee of Rs. 10 shall be charged on all marriages by license, except the marriages of officers and others in the Military or Naval Service of Her Majesty.

RULE III.—The fee for a Surrogate's license shall be Rs. 50 both at the Presidency towns and in the interior. No fee shall be charged on marriages by banns.

RULE IV.—When registers are searched and a copy of any entry given, a fee of rupee one shall be charged for the first year,‡ and four annas for every additional year over which the search may extend; as well as a fee of rupee one for the certificate. Soldiers, sailors and non-commissioned and petty officers are exempted from payment.

‡ The first year shall be taken to mean any one year indicated by the applicant.

NOTE.—The amount of fees payable for marriages performed, and for searching registers kept in accordance with the provisions of Act XV of 1872 (The Indian Christian Marriage Act) is fixed by each Local Government.

In both classes of stations joint-estimates* of expenditure should be framed annually by the undermentioned officers :—

(*a*) In the case of all expenditure connected with establishments, *e. g.*, pay of servants, alterations in their pay or number, &c., also all expenditure by Government connected with the provision of articles of church furniture supplied by the Civil Department. } By the Chief Magistrate of the District and by the Chaplain.

(*b*) In the case of all expenditure connected with repairs and additions to church fabric, to church compound or cemetery walls, to cemetery gates, walks, wells, chaukidars or other church servants' houses, provision of necessary appliances for graves or for the repair of tombs or for the planting of trees and shrubs in cemeteries and keeping the same in decent order; also all expenditure by Government connected with the provision of articles of church furniture supplied by the Public Works Department. } By the Executive Engineer and by the Chaplain.

The estimates of expenditure to be prepared by the Executive Engineer and the Chaplain should show distinctly the probable charge under each of the following heads :—

I.—New works connected with additions to existing churches and improvements to church compounds.
II.—New supplies of furniture for churches and sanctioned articles of church use.
III.—New works connected with additions to existing burial-grounds.
IV.—Repairs to churches and church furniture and maintenance of church compounds.
V.—Repairs to burial-grounds to be executed by Public Works Officers.
VI.—Repairs to burial-grounds, including planting and cleaning, to be entrusted to the Chaplain or Chief Civil or Military Officer of the Station or Cantonment under para. 4.

It would be convenient if distinct estimates were prepared for each of these classes of expenditure.

The provision of funds to meet the charges above enumerated will be made in the budget-estimate for the Public Works Department. The estimates for the same will be subject to the scrutiny of and be passed by the Superintending or Chief Engineer or Local Government or Administration, according to the rules in force in the Public Works Department.

In stations in which the churches and burial-grounds are under the Local Governments and Administrations in which the Provincial Service arrangements are in force, the charges debitable to the Public Works Department will be provided for in the Provincial Public Works budget-estimate. In other Provinces and in the Military Works Branch the charge will be provided for in the Imperial Public Works budget-estimate under Civil Buildings.

2. The following scale of establishments should be maintained at all cemeteries :—

(I) for a cemetery of which the area is five acres or less, one mali-chaukidar ;

(II) for a cemetery of which the area is more than five and less than 10 acres, one mali-chaukidar and one assistant coolie ;

(III) for a cemetery of which the area is more than 10 and less than 15 acres, one mali-chaukidar and two assistant coolies ;

(IV) for a cemetery of which the area is more than 15 acres, one mali-chaukidar and three assistant coolies.

It is left to the Local Governments and Administrations to determine the proper wages to be given to each servant. The cost of this establishment will be charged to Provincial Services in the case of those Local Governments and Administrations in which the Provincial Service arrangements are in force, and in the case of other Local Governments and Administrations and the Military Works Branch of the Public Works Department to Imperial Funds. In either case the charge will be included in the Civil budget-estimate.

3. The size of kutcha and pucka graves should be limited to 8′ × 4′, and the amount of ground to be enclosed should be restricted to 11′ × 7′, by external measurement in both cases. No monument over a pucka grave must exceed 8′ × 4′ at the base, except with the previous sanction of the Local Government concerned. A simple cross or head-stone on an adequate masonry foundation, not exceeding 3′ × 2′, is the only monument that should be allowed over a kutcha grave; no kutcha grave should be enclosed by a railing.

4. No portion of the receipts from cemeteries should be retained by any Government officer to be directly expended by himself; all such receipts should be paid into the Civil Treasury to the credit of the Public Works Department. In the case of receipts from cemeteries in charge of the Military Works Branch and under those Governments and Administrations in which the Provincial Service arrangements are not in force, the credit will be treated in the Public Works accounts as a receipt under Imperial Public Works Revenue. In the case of the other Governments and Administrations the credit will be raised to Provincial Service Public Works Revenue. But the amount passed upon the joint-estimate framed by the Executive Engineer and Chaplain to provide for planting a cemetery and preserving it in decent order should be entrusted to the Chaplain where there is one. Where there is no resident Chaplain, the amount should be placed at the disposal of the Chief Magistrate on the spot, or of the senior Military Officer if the cemetery is attached to military cantonment. The necessary funds for the purpose will be advanced by the Executive Engineer concerned to the Chaplain or Civil or Military Officer. Bills for the expenditure should be rendered by the officer to whom the advance has been made, either monthly or otherwise, to the Executive Engineer, who will charge for the amount thereof in the usual way in his accounts. Until the bills are received and charged off, the advance will be placed in the Miscellaneous Advance Account of the Executive Engineer. All planting of shrubs and trees by private persons in cemeteries should be under the control of the Chaplain if resident, otherwise under that of the Magistrate or senior Military Officer, as the case may be. When practicable a well should be sunk in or near every cemetery.

In connection with the preservation of cemeteries in decent order attention is invited to the rule cited on the margin. This rule, however, should not be applied to monuments of historical or archæological interests. Lists of such tombs should be obtained by Local Governments and Administrations, and as many of them as may be properly preserved at the public expense should be looked after by the local Public Works Department.

The Chaplain should communicate with the friends of the deceased when a monument needs repairing; and if it falls into a ruinous condition, and no party will undertake to restore it, the ruined monument must be made level with the ground during the next repairs, and any slab it contained must be placed over the grave in simple masonry or be inserted in the wall by the Government officer.—(*Rule VIII, Diocese of Calcutta Burial-ground Rules.*)

5. It should be understood that the Government cannot provide cemeteries at the public expense for Native Christian communities.

NOTE.—Where their number is small, the question is of little importance and is best arranged by mutual concessions or by special provisions made locally by the parties immediately concerned. And I am to suggest for His Lordship's (Bishop's) consideration, whether if the necessity of dealing at the present time with this matter of Native Christian interment be in his judgment unavoidably established, it should not be carefully examined in consultation with the several Local Governments, having regard to the diverse needs and circumstances of the population in each separate province.

6. It is not considered necessary to make any alteration in the existing rules regarding the mode of supply of church furniture.

7. Further orders will be passed on the 6th point referred to the Committee for report.

8. The arrangements for making the necessary preparations for digging graves, preparing coffins, and the like, should rest in military stations upon the senior Military Officers, and civil stations upon the chief Local Magistrate. These officers are authorized to direct any Local Public Works Officer to supply all that is necessary. The "Local Public Works Officer" would usually be the Executive Engineer of Military Works in military stations, and the Civil Executive Engineer in other stations. The expenditure incurred by the Executive Engineer will be held in his Miscellaneous Advance Account until repaid by the officer authorizing the expenditure. But in cases of necessity or emergency either officer may be called upon to do what is required.

NOTE.—The intention of this paragraph is to provide an ultimate authority in case of difficulty, and existing arrangements need not be disturbed.

RESOLUTION.

On a reconsideration of the subject, the Government of India think it necessary to modify the rules contained in the Resolution of 8th September 1875, so far as regards the burial of deceased Roman Catholics. The Government of India have now decided :

1*st*, that at stations where there is a Roman Catholic Priest drawing an allowance from Government, he shall be held bound to read the burial service over the body of every deceased Roman Catholic brought for burial, unless he be excused from doing so by the rubrics and canons of the Roman Catholic Church : and that when the Roman Catholic Priest refuses to read the burial service over the body of a deceased Roman Catholic soldier, the military authorities shall make proper arrangements for the decent interment of the corpse ;

* NOTE.—The estimates should be for the financial year and should be prepared in advance, as is prescribed for other budget-estimates.

2*ndly*, that where there is no Roman Catholic Priest paid by the State, the Protestant Chaplain shall, if requested by the friends of the deceased, or by the officer commanding, be bound to bury the deceased according to the rites and ritual of the Church of England, except in either of the three cases in which Protestant Chaplains in India are excused from burying a deceased Protestant, *viz.*, dying unbaptized even by lay baptism; excommunicated by the major excommunication; or declared to be *felo de se*; and that when a Protestant Chaplain refuses to officiate at the burial of a deceased Roman Catholic soldier on either of the three above-mentioned grounds, the military authorities shall, as in the case of refusal by a Roman Catholic Priest, make proper arrangements for the decent interment of the corpse;

3*rdly*, that whenever, with or without furnishing any explanation of his reasons, a Roman Catholic Priest paid by the State or a Protestant Chaplain refuses to perform the funeral rites of his Church over the body of a deceased Roman Catholic soldier, the circumstances of the case should be fully reported by the military authorities for the consideration and orders of the Government of India.

2. The Governor General in Council is accordingly pleased to direct the modification in the above sense of the provisions of paragraphs 15 to 19 inclusive of the Resolution, 8th September 1875.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £3 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*:—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

Note A.

The tares of liquids are mentioned, although these articles do not pay duty by weight, because it is by weight that a more correct estimate can be formed of the quantity of liquid contained in the different casks, for which purpose the following process ought to be adopted:—Let the cask be weighed, deduct the respective tare, the remainder (in kilogrammes) must be divided by the number of grammes which is equal to a litre of wine, brandy, or of any other liquid, as the case may be, and the quotient will give the number of litres contained in the cask. In order to know the proper weight of the litre, there must be a duly gauged measure, with the allowance for tare marked thereon.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems.

Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*:—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

COMMERCE AND TRADE.

Calcutta, the 21st December 1877.

No. 513.—The Governor-General in Council is pleased, in the exercise of the power conferred by Section 3 of Act XI of 1850, to make the following rules for calculating the measurement for tonnage of such native decked ships and vessels employed in coasting voyages or between India and Ceylon as may be registered under that section in British Burma:—

Hull.

Measure the length along the deck from the afterpart of the stem to the forepart of the stern post.

Secondly.—The breadth from the broadest part from skin to skin.

Thirdly.—The depth from under the tonnage deck down the pump well to skin.

Multiply these three dimensions together and divide the product by 130, and the quotient will be the tonnage of the hull of such vessel.

Poop or other closed-in space.

If the vessel have a poop or other closed-in space, measure the inside length, breadth and height of such part thereof as may be included within the bulk-heads, whether enclosed within the foremost bulkhead or not.

Multiply these three measurements together and divide the product by 92·4; the quotient will be the number of tons to be added to the tonnage of hull of such vessel.

NOTE—In measuring breadth, the skin is the inner side of the inner planking; and if a boat or vessel has no inner planking, a thin batten laid on or against the inner side of the timbers would represent the inner skin, and in measuring depth, the floor timber, or, in its absence, the upper part of the kelson shall represent the skin.

CIVIL PENSION CODE.

The 21st December 1877.

No. 2798.—The Governor General in Council directs the publication of the following Addenda and Corrigenda to the Codes of the Financial Department :—

The following despatch from Her Majesty's Secretary of State for India is published for general information :—

FINANCIAL. INDIA OFFICE;
No. 342. *London, 25th October 1877.*

To His Excellency the Right Hon'ble the Governor General of India in Council.

MY LORD,—I have considered in Council your Financial letter, dated the 13th August 1877, No. 241, recommending that Uncovenanted Officers may be allowed to retire on a superannuation pension at the age of 55 years without producing medical evidence of inefficiency.

2. You point out that, under existing rules, an Uncovenanted Officer who has attained the age of 55 years is only eligible for privilege leave, and for any special leave to which he may be entitled, and you consider it inequitable that an officer should be deprived of the privilege of furlough because he has attained to a certain age, and yet not allowed to retire without a certificate of inefficiency, which he may not be able to procure.

3. Your proposition is approved, on the understanding that a superannuation pension will only be granted to an officer who would be entitled to a pension of like amount if he had retired on medical certificate.

In accordance with the orders contained in this despatch, His Excellency in Council directs the

following additions to the Civil Pension Code and amendments thereof:—

Section 56 (page 29).

INSERT BEFORE "compelled," "entitled or" AND ADD RULE 5 ON PAGE 31.—An officer in a superior grade who has attained the age of fifty-five years may, at his option, retire from the service on a superannuation pension.

STRIKE OUT THE LAST SENTENCE OF PRESENT RULE 1, PAGE 30.

With the sanction of Her Majesty's Secretary of State for India in Council, the Governor General in Council directs that the following be substituted for Section 89 on page 49:—

Section 89.—A pension or gratuity is payable as follows:—

I.—If it is stated in Rupees—

(*a*)—at any Treasury of the Government of India in India; or

(*b*)—if the recipient is resident elsewhere than in Asia, at his option at the Home Treasury of the Government of India, at the rate of exchange fixed yearly for the adjustment of financial transactions between the Imperial and Indian Governments.

II.—If the amount is stated in Sterling—

(*a*)—at the Home Treasury of the Government of India; or

(*b*)—if the recipient is resident in Asia, at his option at any Treasury of the Government of India in India, at the rate of exchange fixed yearly for the adjustment of financial transactions between the Imperial and Indian Governments.

Omit the words from "at the rate of exchange" to the end in Rule 1 under Section 89, and for the words "Rule 1" in Rule 2 under the same section substitute the following:—

"The Rule for the payment at the Home Treasury of a pension at the rate of exchange fixed yearly for the adjustment of financial transactions between the Imperial and Indian Governments."

JAMES O'KINEALY,
Offg. Secy. to the Govt. of India.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

NOTIFICATIONS.—FIBRES AND SILK.

Simla, the 31st August 1877.

No. 45.—In 1871 the Government of India offered a prize of £5,000 to the inventor of the best machine or process for the preparation of the fibre of the *Böhmeria nivea* (popularly known under the names of rheea, ramie, and China grass), and the terms on which machines would be admitted to competition were widely notified in India, in Europe, and in America. Many persons declared their intention to compete, but ultimately only one machine was actually brought to the place of trial. The machine, having been carefully tested at Saháranpur in the autumn of 1872, was found imperfect in some important respects, and the inventor was adjudged not entitled to the full reward. He was, however, presented with £1,500 in consideration of the partial measure of success he had attained after great perseverance.

2. This machine has not since been adapted by the inventor to practical use, and no improved process of preparing the fibre of the rheea has been yet discovered by other persons. Meanwhile, the demand for rheea continues, and the conditions which induced the Government of India in 1871 to offer a prize remain substantially unchanged.

3. His Honour the President in Council, therefore, considers that it is desirable to renew the offer, and it is accordingly hereby notified that a reward of fifty thousand rupees will be paid to the inventor of the best machine or process which will separate the bark and fibre from the stem, and the fibre from the bark, of the *Böhmeria nivea*.

4. A smaller reward, not exceeding ten thousand rupees, will be given to the inventor of the next best machine or process, provided it is adjudged to possess merit and to be capable without difficulty of adaptation to practical use.

5. What is required is a machine or process capable of producing, by animal, water, or steam power, a ton of dressed fibre of a quality which shall average in value not less than £45 per ton in the English market, at a total cost, including all processes of preparation and all needful allowance for wear and tear, of not more than £15 per ton, laid down at any port of shipment in India, and £30 in England, after payment of all the charges usual in trade before goods reach the hands of the manufacturer. The processes of preparation are to be understood to include all the operations required subsequent to the cutting of the stems from the plants in the field, until the fibre is in a condition fit to be packed for conveyance to the market.

6. The machinery employed must be simple, strong, durable, and inexpensive, and should be suited for erection in the plantations where the rheea is grown. It must be adapted for treatment of the fresh stems, as cut from the plant. The treatment of dried stems offers certain difficulties, and the fibre prepared from them must, moreover, always be much more costly than the fibre produced from green stems. Except during the hot dry weather preceding the rains in Upper India (where rheea grows best), it is very difficult so to dry the stems that no fermentation or mildew shall occur. But during this season the stems are comparatively short and the crop poor and stunted, unless it is artificially irrigated, and such irrigation greatly increases the cost of cultivation. In the rainy season the plant is in fine condition, but at this season it is almost impossible to dry the stems in quantity without injuring the fibre, unless recourse is had to artificial means of desiccation, which greatly increase the cost of the material. It is therefore obvious that the attention of inventors should be given to the discovery of a process for the treatment of the green stems.

7. The trials will be held at Saháranpur in the North-Western Provinces in the months of August and September 1879. Machines entered for competition should be placed *in situ* and be ready for work not later than the 15th August, the competition commencing on the next day. The judges will be appointed by the Government, and they will watch the whole of the trials. But the machines shall be worked and adjusted by the competitors themselves, and no person shall touch a machine without the consent of the inventor.

8. The Government of India will provide proper shelter and accommodation at Saháranpur for all the competing machines as well as the motive power required. It will also pay for the transport from the sea-coast to Saháranpur of all machines up to the limit of one ton each, the freight on any excess weight to be defrayed by the owners. The present rate of freight by rail from Calcutta to Saháranpur is Rs. 3-10 per maund, or Rs. 98-11 per ton, and from Bombay to Saháranpur Rs. 4-1 per maund, or Rs. 110-9 per ton. A free second class ticket to Saháranpur will also be given to any person in charge of a machine.

9. The owner or owners of the successful machine or machines shall not be entitled to receive the reward offered except on the following conditions, *viz.*:—

(1) That a complete technical description of the machine, illustrated by plans drawn to scale, shall be prepared and published (Government paying the cost) for the information of the public.

(2) That after the expiry of three years from the date on which the award is made, the public shall have the right of manufacturing similar machines, on payment to the owner of a royalty of 10 per cent. on the cost of each machine so manufactured.

10. All persons desiring to compete under the terms and on the conditions specified above are requested to make known their intention not later than the 31st December 1878, giving the following particulars:—

1. Name in full and residence.
2. Profession or occupation.
3. Number of different kinds of machines entered for competition.
4. Brief description of each machine.

Intending competitors will at the same time declare themselves bound (under penalty of disqualification of the competing machines and forfeiture of all claim to the Government reward) to conform to all rules which may be prescribed by Government, or by the judges appointed by Government in connection with the conduct of the trials.

All notices of intention to compete and applications for information should be addressed to the Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, Calcutta.

11. A limited quantity of rheea will be grown in the Botanic Gardens, Calcutta, and persons desirous of testing their machines before entering them for public competition may obtain green stems in small quantities from the Superintendent of the gardens through this Department.

COMMERCE AND TRADE.

Calcutta, the 28th December 1877.

No. 23 of 1877.—The following Notice to Mariners is published for general information :—

NOTICE TO MARINERS.

BAY OF BENGAL—CHITTAGONG COAST.

Alteration in position of the Beacon Lights at the entrance to Chittagong or Kornafuli River.

The two Beacon Lights situated on the southern shore at the entrance to Kornafuli River have been removed 2,417 yards due south of their former position. The lights, 40 yards apart on a S. E. by E. ½ E. bearing, were exhibited from the new site on the 20th October 1877, the inner or eastern light from a tripod, the outer or western one from a mast, both Beacons being painted white.

The inner light is elevated about 5 feet higher than the outer one, and both are visible in clear weather from a distance of 7 miles through an arc of 160°, or when bearing from S. E. by S., through east and north, to N. by W.

During southerly winds, sailing vessels from the southward and westward (especially those at some distance in the offing) should avoid getting to the northward of the lights; but at night with the outer or western light bearing E. ¼ N., should run in and anchor in 5 fathoms at low water springs, about 2½ miles from the light, to await day-light.

The Beacons in line, and the Hill flagstaff bearing N. E., will place a vessel about half a mile southwestward of the bar buoys; from this position the bar and river buoys will be distinctly seen, and the services of a local pilot are always obtainable. Vessels should not attempt to cross the bar without a pilot, as the channel to Chittagong is long, narrow, and somewhat intricate.

Position of Beacons, latitude 22° 10′ 50″ N., longitude 91° 48′ 29″ E.

[*Bearings are Magnetic and from Seaward. Variation 3° Easterly in 1877.*]

Upon payment of the purchase money in manner aforesaid, the purchaser shall be entitled to possession of such parts of the property as are in hand and to the rents and profits of such parts as are let as from the day of such payment, and shall be entitled to a proper conveyance, wherein all proper parties shall join as the Registrar shall direct. Such conveyance shall be prepared by and registered at the expense of the purchaser, and shall be tendered and left by him at the office of the said Mr. for execution by the proper parties.

10. The purchaser shall not be liable to pay the outgoings previous to the day of payment of the purchase money, and the rents and outgoings shall be apportioned if necessary.

11. The production and inspection of all deeds, evidences and muniments of title which are not in the possession or power of the party having the conduct of the proceedings and the procuring and making of all certificates attested or other copies or extracts of or from any registers, deeds, wills, or other documents, and of all declarations or other evidences as to identity, whether required for the verification of the abstract or for any other purpose, shall be at the expense of the purchaser requiring the same.

12. If any error or mis-statement shall appear to have been made in the particulars or description of the property, such error or mis-statement [if capable of compensation] shall not annul the sale, nor entitle the purchaser to be discharged from his purchase, but a compensation shall be made to or by the purchaser as the case may be, and the amount of such compensation shall be settled by a Judge in Chambers.

13. If the purchaser shall not pay his purchase money at the time above specified, or at any other time which may be named in any order for that purpose, and in all other respects perform these conditions, an order may be made by a Judge in Chambers for the re-sale of the property and for payment by the purchaser of the amount of the deficiency, if any, in the price which may be obtained upon such re-sale and of all attorney and clients' costs and expenses occasioned by such default.

14. When a re-sale is directed, if for want of bidders the property cannot be re-sold, the purchaser at the former sale shall pay the whole amount of his purchase money into Court; but if the property be re-sold, and if the price obtained at the re-sale be less than the purchase money payable by the original purchaser, he shall pay the amount of the deficiency. The costs occasioned by the default of the original purchaser shall also be paid by him. An order containing these directions may also be obtained from a Judge in Chambers.

Note. Special conditions will be required when the title is bad or doubtful.

It is desirable that the attention of intending purchasers should be called to the reason for imposing special conditions when the title is bad or doubtful.
