5. Taking the *collections* of the year, the *gross "direct"* revenue was Rs.17,15,036, and with the addition of the *"indirect"* it was Rs.26,30,527; deducting the working expenses as in the preceding paragraph, the *"net"* revenue was Rs.2,50,844 from *"direct"* returns alone, and including the *"indirect"* Rs.11,66,335, or 1·16 and 5·39 per cent. on the capital at the beginning of the year.

6. The working expenses are Rs.40,379 in excess of those of the previous year. The principal works on which the abnormal expenditure was incurred are mentioned in paras. 6 and 50 of the Chief Engineer's Review. They may be briefly summarized as regulating the River Jumna near the head, and raising the banks of the Western Jumna Canal, and extensive silt-clearance, and strengthening of masonry works on the Bári Doáb Canal. In both cases the execution of the works could no longer have been postponed with safety.

7. The charge for interest for the year on the capital invested in canals under construction and in operation is Rs.14,56,752.

The net revenue of the year, direct and indirect, from canals in operation exceeds the interest charges on their capital by Rs.1,71,835. The excess of the net revenue over interest charges on these canals up to the end of the year was Rs.2,06,43,835. Deducting Rs.20,48,964, the interest on the capital spent on canals under construction, the net income is still Rs.1,85,94,871 greater than the total charge for interest.

8. The area irrigated during the year was 1,324,480 acres, against 1,114,082 in the previous year. The increase in irrigated area was principally due to the failure of the monsoon. The increase on the Western Jumna Canal was 141,492 acres, and on the Bári Doáb Canal 64,283 acres. As explained in para. 53 of the Chief Engineer's Review, the Bári Doáb Canal might have watered a much larger area if the rapids on the upper part of the canal had been strong enough to pass a larger supply of water. The irrigation on the Inundation Canals was nearly stationary—a result which, considering the unusually small rise in the rivers, must be considered satisfactory.

9. The following table shows the area irrigated and the rain-fall for eight years :—

AREA IRRIGATED.	1870-71.	1871-72.	1872-73.	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.	Average of preceding seven years.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Permanent Canals .	741,917	731,455	580,616	543,893	662,660	524,194	569,194	774,969	621,990
Inundation Canals .	464,299	431,749	573,522	445,930	545,413	574,235	544,888	549,511	511,434
TOTAL .	1,206,216	1,163,204	1,154,138	989,823	1,208,073	1,098,429	1,114,082	1,324,480	1,133,424
RAIN-FALL.									
Permanent Canals.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
Western Jumna Canal .	27·62	30·94	34·57	32·36	28·14	32·84	26·00	17·00	30·35
Bári Doáb Canal . .	23·15	20·35	26·80	26·66	18·43	46·29	37·86	23·88	28·51
Inundation Canals.									
Delhi and Gurgáon Irrigation Works.	16·56	16·38	25·90	39·02	24·92	36·52	23·34	15·02	26·09
Upper Sutlej Inundation Canals.	7·30	5·09	13·99	8·01	8·57	19·18	10·17	12·47	10·33
L. S. and C. Inundation Canals.	4·43	2·34	6·10	4·93	4·26	3·04	7·60	14·92	4·67
Indus Inundation Canals	3·95	1·97	7·40	6·20	6·20	4·52	7·22	5·60	5·35

From this it will be seen that the area irrigated by the permanent canals was considerably greater, not only than the area of the previous year, but also than the average area irrigated during the preceding seven years. On the Inundation Canals, although the area irrigated was but slightly larger than that of 1876-77, it was considerably in excess of the average for seven years. The rain-fall was, as a general rule, below the average; it, moreover, fell unseasonably.

WESTERN JUMNA CANAL.

10. The area irrigated by this canal during the year under review exceeds that of the previous year by 141,492 acres, and is the largest on record. The increase is due to the failure of the autumnal rains. There is an increase of 7,533 acres under sugar-cane, but a decrease in the area under rice and cotton; the decrease is due to considerable areas of these crops having withered under the scorching west winds which blew night and day throughout June, July and August.

11. The area under wheat has only been exceeded by that of the year 1868-69, which was also a year of drought; the measurements were 206,361 and 209,981 acres for these years, respectively. The increased acreage under wheat alone, at the moderate estimate of 10 maunds per acre, must have yielded 630,000 maunds of food more than was produced in the previous year. It is satisfactory to know that the area under irrigation can be so greatly expanded when necessary.

12. The assessments for the year shew a net profit of 16·98 per cent. from the direct and 24·63 per cent. from the total income, as against 13·44 and 22·36 per cent., respectively, in the previous year. It is satisfactory to find that the profits from this canal have increased, notwithstanding an unusually heavy expenditure on repairs.

13. The balances unrealized at the end of the year amounted to Rs.16,372, which is greater than that reported last year; the increase is stated to be due to the exceptional season.

DELHI AND GURGÁON WORKS.

14. These bunds were so severely damaged by the floods which occurred in 1875, that the question was raised whether, considering the small revenue which the Canal Department derived from them, further expenditure from the funds at the disposal of the Irrigation Branch was justifiable. After careful consideration of the opinions of officers of both Civil and Irrigation Departments, it was concluded that the cost of the present repairs and subsequent maintenance of these works should for the future be borne by the people who profit by them; and it was further decided that the services of the officers of the Western Jumna Canal should continue to be available for professional advice, and also, when necessary, for supervision of the more important works on payment of the usual percentage on the cost of such works.

15. These proposals received the sanction of the Supreme Government, who also directed that the capital accounts of these works should not be retained in the general account of Irrigation in the Punjab after their transfer to the Civil Department has been completed.

16. In accordance with the above arrangement, the bunds in the Delhi and Rohtak Districts were finally made over to the Civil Department in November 1877, and those in the Gurgáon District on the 1st May 1878, so that these works have now passed entirely from the control of the Canal Department, and will not again find a place in the Revenue Report of the Irrigation Branch.

BÁRI DOÁB CANAL.

17. The area irrigated is 64,283 acres in excess of that measured in the previous year; the excess is due, as in the case of the Western Jumna Canal, to deficiency of rain during the kharíf. The decrease in the area under sugarcane, rice and cotton was caused by the unfavourable nature of the season. There is an increase of 39,793 acres in the area under wheat.

18. The assessments of the year shew a net profit of 1·13 per cent. from the direct and 2·49 per cent. from the total income, as against 0·31 and 1·37 per cent., respectively, in the previous year. These results, though not satisfactory, are a considerable improvement on the returns of the past year.

19. The expenditure, though less than that of the previous year, exceeds that of any other year. The causes of this expenditure are enumerated in paragraph 50 of Chief Engineer's Review.

20. From the inability of the works on the main line of this canal to carry a sufficient supply for the requirements of the existing irrigation, it was evident that no extension of irrigation would be possible from the newly completed Kasúr and Subráon branches until the defects in the construction of the rapids had been rectified. Even what water could be delivered at the heads of the Lahore branch and main branch lower was, owing to the contracted state of the channels, with difficulty forced down the branches; and where the bed was only slightly below the surface of the country, well-grounded fears were felt for the safety of the banks.

21. It is satisfactory to be able to state that the experience of the present year has shown that the work done during the year under review has so far attained its object that a larger supply has with safety been passed down and distributed.

22. The unrealized balances of demands on account of water and water advantage rates are larger than in the previous year; this is probably due to the exceptional season.

UPPER SUTLEJ.

23. There is a profit from all sources of 7·34 per cent. on the capital of these canals. The calculation by which this result is obtained is shewn in detail in paragraphs 74 and 75 of the Chief Engineer's Review.

24. There is an increase of 6,942 acres over the area irrigated in the previous year. It is mentioned in the 78th paragraph of Chief Engineer's Review that the favorable returns from these canals during the present year are due more to decrease of expenditure and establishment charges than to any considerable increase in the income.

LOWER SUTLEJ AND CHENAB CANALS.

25. The operations of the year shew a profit from all sources of 140·25 per cent. on the capital invested in the canals, as against 157·65 per cent. in the previous year. The area irrigated was 284,680 acres; this area is only 965 acres less than that of last year, which was the largest on record. There is again a marked increase in the cultivation of indigo, and, as mentioned in paragraph 94 of the Chief Engineer's Review, it is reasonable to expect a still further increase in the future.

26. The cost of irrigation, which had been yearly decreasing, appears now to be stationary at Rs.1·36 per acre. The cost of maintenance has slightly increased, being Rs. 0·78 per acre, as against Rs.0·71 in the previour year.

INDUS SERIES.

27. There is an increase of 5,030 acres in the area irrigated by these canals as compared with the previous year.

28. The income from all sources shews a loss of 12·07 per cent., as against 5·05 per cent in the previous year. This unfavorable return is due to an increase of expenditure, which is explained in paras. 109 and 110 of the Chief Engineer's Review, and to the insufficiency of the contribution of Rs.45,000 which is recovered yearly from the irrigators, and was estimated to cover half the cost of clearing the canals; the five years for which this sum was fixed have now elapsed, and the more correct division of the expenditure is under consideration.

29. It is explained in para. 107 of the Chief Engineer's Review that these canals have not as yet been credited with that part of the land revenue due to canal irrigation which is remitted to Jágírdárs. It is expected that the increase in credit to the canals from this source will amount to between Rs.20,000 and Rs.30,000 per annum.

30. The adjustment of the incidence of charges for the maintenance of the river embankments is still receiving attention.

SHAHPUR CANALS.

31. The returns from these canals are again favorable, the profit being Rs.6,402, or 28·06 per cent. on a capital of Rs.22,813. The area irrigated was 5,588 acres, or 3,535 less than in the previous year. The principal decrease was in the rabi crop, which only measured 978 acres, as against 2,452 in 1876-77. The falling off is attributed to the unusually low supply in the River Jhelum throughout the summer months.

32. In paragraph 124 the Chief Engineer draws attention to the remarks of the Deputy Commissioner of Shahpur, who mentions that, in a season of drought, these canals, in addition to their income from the irrigation of cereals and other crops, ensure a supply of grass for the cattle; the value of this seasonable supply of fodder can scarcely be calculated in money.

GENERAL.

33. The plethora of establishment in the Irrigation Department, which was prominently mentioned last year, is again brought to notice. The charges under this head are largely in excess of the requirements of the Department, and until some relief is given, the value of the canals in this Province as reproductive works cannot be correctly gauged.

34. This Report is submitted one month later than the specified date; efforts will be made to expedite the submission of next year's Report.

CHIEF ENGINEER'S REVIEW OF REVENUE REPORT FOR 1877-78.

WESTERN JUMNA CANAL CIRCLE.

WESTERN JUMNA CANAL.

1. The debit to capital, exclusive of interest, was increased by Rs.8,75,408; the expenditure on works was as follows:—

	Rs.	
EXTRAORDINARY.		
Jumna Dam	30,155	
New Main Line	5,22,307	
New Delhi Branch	2,04,718	
Hánsi Branch	39,248	
New Hánsi Branch	8,896	
No. IX Distributary	9,806	
„ XII „	18,990	
Jind Distributaries	166	
		8,34,286
ORDINARY.		
Indri Cut Works—Loss in stock	8,399	
Demolition of Old Mills	— 163	
Pandoe Nallah Diversion	— 10	
		8,226
TOTAL		8,42,512

The remainder consists of charges for Establishment, Tools and Plant, Balance of Suspense Accounts, and Capitalized Abatement of Land Revenue:—

	Extraordinary.	Ordinary.	TOTAL.
	Rs.	Rs.	Rs.
II.—Establishment	1,42,744	2,058	1,44,802
III.—Tools and Plant	20,008	1	20,007
IV.—Suspense Accounts	— 1,32,566	— 181	— 1,32,747
V.—Capital Receipts	— 604	...	— 604
VI.—Capitalized Abatement of Land Revenue	1,438	...	1,438
TOTAL	31,020	1,876	32,896

2. REVENUE ACCOUNT CURRENT.

EXPENDITURE.			RECEIPTS.	
	Rs.	Rs.		Rs.
Extensions and Improvements		3,983	Water-rates from irrigation	11,91,862
Maintenance and Repairs	1,39,657		Miscellaneous	56,116
Plantations	3,362			
		1,43,019

Ditto, Executive	2,12,713			
		2,63,853		
Tools and Plant		6,263		
		4,18,725		
Balance profit of 16·98 per cent. on capital of Rs. 48,83,865		8,29,253		
TOTAL		12,47,978	TOTAL	12,47,978
			Land revenue due or dependent on the works	3,73,757

3. The net profits of the year amount, as shewn above, to Rs.8,29,253, which is 16·98 per cent. on the capital debit at the beginning of the year, which was Rs.48,83,805. If the land revenue due or dependent on the works is included, the net income becomes Rs.12,03,010, which on the same capital is a percentage of 24·63. In the previous year the corresponding percentages were 13·44 and 22·36 on a capital debit of Rs.43,27,634.

4. The result for the past four years, based on the earnings, is as follows:—

		1874-75.	1875-76.	1876-77.	1877-78.
		Rs.	Rs.	Rs.	Rs.
INCOME	Water-rates	9,47,929	7,64,809	9,16,244	11,91,862
	Miscellaneous	69,027	56,567	54,902	56,116
	TOTAL	10,16,956	8,21,376	9,71,146	12,47,978
EXPENDITURE	Works, &c.	1,03,806	1,28,120	1,34,478	1,54,872
	Establishment, Direction	47,046	47,105	61,470	51,140
	Ditto, Executive	1,87,885	1,99,933	1,93,425	2,12,713
	TOTAL	3,38,737	3,75,158	3,89,373	4,18,725
PERCENTAGE ON CAPITAL FROM NET	Direct income	20·29	11·71	13·44	16·98
	Do. plus indirect	31·44	22·24	22·36	24·63

5. The increase of Rs.2,75,618 in the water-rates over the previous year is due entirely to the failure of the monsoon and to the abnormal supply passed down the canal.

6. The increase of Rs.20,394 in works is due to various causes, which are detailed by the Superintending Engineer, the principal ones being—the heavy works required near the head of the canal for the regulation of the Jumna; the raising of the banks of both the Karnál and Hánsi Divisions to enable them to carry the extra water forced down the canal; and works and clearances on the rájbahás rendered necessary by the same causes.

7. The reduction of Rs.10,330 in the charges for Direction is stated by the Superintending Engineer to be due to a larger amount of work having been done from Extraordinary funds, which are debited with a percentage on this account, the balance chargeable to Revenue being thus decreased.

8. The Superintending Engineer points out that the charges for Establishment, Executive, are largely affected by collection fees, which increase with the area irrigated.

9. The area irrigated for the past five years is as follows:—

YEARS.	Kharif.	Rabi.	TOTAL.
	Acres.	Acres.	Acres.
1873-74	171,630	140,117	311,747
1874-75	160,118	222,729	382,847
1875-76	188,189	121,406	309,595
1876-77	175,729	190,753	366,482
1877-78	215,135	292,839	507,974

10. It will be seen that there has been a very large increase in the area irrigated. The Superintending Engineer records that the kharif crop was a very good one, and has only twice been surpassed, *viz.*, by that of 1869-70, which was 234,464 acres, and that of 1870-71, which was 218,535.

11. The rabi crop of 292,839 acres is the largest ever recorded, the nearest approach to it being that of 1868-69, which was 288,208 acres, or 4,631 acres less than the one now under review.

12. The total area irrigated is also the largest on record.

13. The increase thus obtained was due to the failure of the rains. The Superintending Engineer remarks that the people from the *báráni* villages crowded down to the canal with their flocks and their herds, and cultivated every patch of ground for which they could in any way obtain irrigation.

14. The area of double-cropped land for five years was as follows:—

	Acres.
1873-74	30,935
1874-75	51,896
1875-76	28,309
1876-77	39,298
1877-78	85,202

The large increase in the area of double-cropped lands is entirely due to the scarcity and dearness of food, which induced the cultivators to secure as much food-grain as could possibly be raised.

15. The following were the acres irrigated of the four principal crops for the last five years:—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	42,068	33,439	26,555	34,602	42,135
Rice	43,818	50,029	51,827	46,074	34,733
Cotton	54,806	58,236	69,577	76,616	65,989
Wheat	86,355	151,067	80,040	143,072	206,361
TOTAL	227,047	292,771	227,999	300,364	349,218
Other crops	84,700	90,076	81,596	66,118	158,756
GRAND TOTAL	311,747	382,847	309,595	366,482	507,974

16. There is an increase in sugarcane over the preceding year; but the Superintending Engineer points out that the amount is about the same as in 1873-74, and a little less than in 1869-70.

17. It is also explained, with regard to the rice and cotton, which are both less in area than last year, that, owing to the scorching west winds which blew night and day throughout June, July and August, much was lost and not assessed.

18. The wheat crop was very large, and nearly equalled that of 1868-69, which is the largest on record; it was 63,289 acres larger than the area under the same crop in the previous year.

19. The area of indigo sown for the past six years is as follows :—

	Acres.
1872-73	6,489
1873-74	12,165
1874-75	2,871
1875-76	11,513
1876-77	1,086
1877-78	3,041

20. The whole of the increase in area of this crop was measured in the Skinner Estates.

21. The percentages of flow and lift irrigation and double-cropped land were for five years :—

	Kharif.		Rabi.		Total.		Double-cropped land.
	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	
1873-74	94·24	5·76	79·00	21·00	87·39	12·61	9·92
1874-75	96·04	3·96	91·49	8·51	93·38	6·62	13·55
1875-76	96·08	3·92	90·57	9·43	93·91	6·09	10·31
1876-77	96·31	3·69	90·32	9·68	93·19	6·81	10·72
1877-78	94·00	6·00	87·42	12·58	90·20	9·80	16·77

22. The increase in the percentage of lift irrigation is due to the dryness of the season, the cultivators raising the water on to high lands which they would not in ordinary seasons have taken the trouble to irrigate.

23. The proportion of kharif and rabi irrigation has been as follows :—

	Kharif.	Rabi.
1873-74	55·05	44·95
1874-75	41·83	58·17
1875-76	60·78	39·22
1876-77	47·95	52·05
1877-78	42·34	57·66

24. The average water-rate per acre irrigated for five years is as follows :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Kharif, per acre	3·07	3·01	2·75	2·94	2·66
Rabi, „	2·03	2·08	2·03	2·09	2·12

25. The decrease of the rate per acre in the kharif is due to a large area being under the lower-priced crops, principally for food for the cattle. In the rabi there is a slight increase, which, however, calls for no special remark.

26. The value of the cubic foot per second of total water-supply was as follows :—

	Kharif.	Rabi.
	Rs.	Rs.
1873-74	254	121
1874-75	226	187
1875-76	203	124
1876-77	231	202
1877-78	218	317

27. The duty obtained in acres from the total supply during past five years is detailed below :—

	Kharif. Acres.	Rabi. Acres.
1873-74	83	60
1874-75	74	89
1875-76	73	61
1876-77	78	97
1877-78	81	149

28. The duty in the kharif, though greater than that of the three preceding years, was not remarkably high. The Superintending Engineer explains that not only did the hot winds necessitate more frequent waterings than in ordinary seasons, but that more water than usual was given to village ponds for watering cattle and for domestic purposes.

29. In the rabi the increase in the duty is very large, and is ascribed to several causes, which together contributed to the result shewn. The failure of all but the irrigated kharif crops and the high price of food-grain induced the cultivators to sow a more than usually large area, and they were thus compelled to economise the water. The new rájbahás also undoubtedly enabled the officers to check wasteful expenditure; and, lastly, in December and January the canal irrigation was greatly aided by timely and abundant falls of rain, which

assisted at the very time when, without this aid, the season of greatest pressure would have been felt.

30. In para. 70 *et seq.* of his Report, the Superintending Engineer advocates the withdrawal of canal irrigation from tracts where the springs have risen to within a few feet of the surface of the ground, and suggests that it would be advisable to utilize this rise of the springs by means of wells for irrigation purposes. This idea might be tried on some of the worst of tracts now under canal irrigation when the new settlement comes into force; a trial of the scheme as an experiment would not then interfere with rights in the water which exist under the present settlement.

31. The maintenance charges for the past five years per acre irrigated are as follows :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Maintenance, whole canal	1·20	0·88	1·21	1·06	0·82
Repairs, distributaries	0·06	0·03	0·07	0·04	0·04

32. As remarked in last year's Report, the decrease in the maintenance charges of the whole canal is in one sense not satisfactory, being due, to a certain extent, to the impossibility of making thorough silt clearances.

33. The state of water collections was as follows :—

	Balance from previous year.	Rabi, 1876-77.	Kharif, 1877-78.	Total.
	Rs.	Rs.	Rs.	Rs.
Demands	6,677	3,87,771	5,57,914	9,52,362
Realizations	6,677	3,87,771	5,41,542	9,35,990
Balance unrealized	...	...	16,372	16,372

34. The balance unrealized is greater than that of last year, which was Rs. 6,699. The increase is probably due to the exceptional season.

35. The Superintending Engineer, in the 106th and 107th paragraphs of his Report, has brought to special notice the successful exertions of the officers of the Revenue Divisions of his Circle. The results of the year were obtained by forcing an unprecedentedly large supply down the canal, and by unremittting exertions in its distribution.

DELHI AND GURGAON IRRIGATION WORKS.

36. There was no expenditure on Capital Account during the year; the total amount was as before, excluding interest, Rs.1,83,410, including interest, Rs.4,26,510.

Land revenue due or dependent on the works	2,00,102

43. The land revenue due or dependent on the works assessed by the canal officers for both crops amounted to Rs.2,00,083, to which Rs.19 was added for the kharif crop

of 1877-78 by the civil officers on account of resumed *jágír* lands which are liable to water-advantage rate, and to *chahi* lands which have given up well-irrigation and used canal water, making a total of Rs.2,00,102 for both crops.

44. The details of the assessments and remissions are as follow:—

Area.		Rs.	A.	P.		Rs.	Rs.
137	acres @	1	8	0	per acre	206	
2,473	„ „	1	4	0	„	3,091

232,627							2,00,083
	Additions made by civil officers, as explained above						19
							2,00,102
	Deduct—Remissions to Jágírdárs					8,137	
	Do. on account of *chahi* lands					5,188	
	Do. do. other causes					342	
							13,667
	Net Balance					...	1,86,435

The remissions and additions shown above are only for the kharif crop, the charges for the rabi not being leviable till the ensuing year. The average rate per acre is Rs.0·86.

45. The following statement shows the assessments, remissions and collections of the land revenue due or dependent on the works to end of the year. The figures for 1877-78 are liable to be altered, owing to the additions by civil officers and remissions for the rabi crop, as stated above, not being known till the following year. For the same reasons the figures for 1876-77 do not agree with those shown in the Revenue Report for the previous year, the additions and remissions for the rabi crop having now been added.

Years.	Land Revenue due or dependent on the works.			Remissions.				Balance realizable.

								1,38,317

46. The Revenue Account shows a profit of Re.1·13 per cent. from direct income; including the land revenue due or dependent on the works it is raised to Rs.2·49—a result which, though not satisfactory, shows a considerable improvement on the previous year, when the corresponding figures stood as Re.0·31 and 1·87 respectively. The increase of Rs.1,03,155 in the water-rates from irrigation is due to a great extent to the great demand for water caused by the failure of the rains; that this increase was not greater is owing mainly to two causes, *viz.*, 1st, that the dangerous condition of some of the rapids, as well as the fact that the canal was badly choked with silt, did not permit of an abnormal supply being sent down; 2nd, that during the kharif the crops were grown by the aid of canal water alone, whereas in ordinary years the canal-supply is largely supplemented by the rainfall. Steps have been taken to enable the canal to carry a larger supply. During the closure in January and February good progress was made in strengthening and repairing the rapids, and very extensive silt-clearance was also carried out. The decrease of Rs.12,053 in the miscellaneous income is mainly due to canal wood not having been required by the Head Works to the same extent as in the previous year, when there were very large sales on this account; also to falling-off of mill rents, which was due to the prolonged closure of the canal.

47. The following statement shows the cost of maintenance, the income assessed, and the area irrigated for five years :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
INCOME—	Rs.	Rs.	Rs.	Rs.	Rs.
Water-rates from irrigation	6,13,000	6,91,457	5,53,336	5,25,296	6,28,451
Miscellaneous	52,270	69,118	70,161	73,235	61,182
TOTAL	6,65,270	7,60,575	6,23,497	5,98,531	6,89,633
EXPENDITURE—					
Works, &c.	1,46,738	1,29,053	2,30,103	2,97,476	2,65,925
Establishment, Direction, &c.	46,718	48,183	65,348	73,995	58,420
Ditto Executive	1,52,630	1,60,222	1,85,488	1,82,181	1,99,642
TOTAL	3,46,086	3,37,458	4,80,939	5,53,652	5,23,987
Percentage on Capital from Net { Direct Income	2·37	3·08	1·01	0·31	1·13
{ Direct + Indirect	3·77	4·76	2·28	1·37	2·49
AREAS IRRIGATED	232,146	279,813	214,599	202,712	266,995

48. From this it will be seen that both the area irrigated and the income were, with the exception of 1874-75, larger than that of any other year shown in the statement.

49. On the other hand, the expenditure, though smaller than that of the previous year, exceeds that of any other above shown.

50. As explained by the Superintending Engineer, the special repairs to the rapids and falls on the Main Line and Main Branch Upper, and the silt-clearance of the Main Branch Lower and Lahore Branch, were carried out at a very considerable expenditure.

51. The decrease in Establishment charges, which would have accrued from the amalgamation of the 1st and 3rd Divisions, was more than counterbalanced by the cost of Establishment which was temporarily transferred to supervise the work undertaken during the annual closure.

52. The areas irrigated for the past five years in acres are—

YEARS.	Kharif.	Rabi.	TOTAL.
	Acres.	Acres.	Acres.
1873-74	100,913	131,233	232,146
1874-75	87,214	192,599	279,813
1875-76	92,335	122,264	214,599
1876-77	75,748	126,964	202,712
1877-78	85,664	181,331	266,995

53. Compared with last year, there is an increase of 9,916 acres in the kharif. As previously stated, this increase should have been very much greater. The reasons of the very limited area irrigated during this crop are, that it started badly, there being at the end of May a very serious deficiency as compared with other years. This was due to the unusual lateness of the season and the abundant rabi harvest preceding; in fact the cultivators are stated not to have been able to gather in the rabi and prepare the ground for the kharif by the usual dates. Subsequently, when the rains failed, there was a rush for water, and the area irrigated increased rapidly; but unfortunately, owing to the state of the canal, it was found impossible to send down an abnormal supply which could have been utilized to the last drop.

54. There was a large increase in the rabi irrigation, stated by the Superintending Engineer to be mainly due to the extension of irrigation on the new Turkwind and Thamman rájbahás.

55. The area of double-cropped lands for five years was as follows :—

	Acres.
1873-74	24,672
1874-75	30,818
1875-76	25,260
1876-77	26,288
1877-78	28,062

56. There is again an increase to be recorded in the area of double-cropped land, which is not a matter for congratulation.

57. The following were the areas irrigated of the four principal crops for the last five years :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	10,305	8,900	8,729	7,498	6,339
Rice	32,882	27,638	24,511	27,468	24,245
Cotton	27,868	17,612	33,215	19,676	10,545
Wheat	94,731	145,593	91,218	96,486	136,279
TOTAL	165,786	199,743	157,673	151,128	177,408
Other Crops	66,360	80,070	56,926	51,584	89,587
GRAND TOTAL	232,146	279,813	214,599	202,712	266,995

58. The reduction in the area of rice is stated to be due to the unfavorable nature of the season, and that in cotton is said to be accounted for by the cultivators finding it more profitable to grow *jowár* and *charri*. The increase in the area of wheat is satisfactory.

59. The percentage of flow and lift irrigation and double-cropped land were for five years—

	KHARIF.		RABI.		TOTAL.		Double-cropped land.
	Flow.	Lift.	Flow.	Lift.	Flow.	Lift.	
1873-74	92·94	7·06	87·70	12·30	89·98	10·02	10·63
1874-75	92·93	7·07	85·27	14·73	87·66	12·34	11·01
1875-76	93·80	6·20	86·84	13·16	89·83	10·17	11·77
1876-77	94·17	5·83	84·82	15·18	88·21	11·79	12·96
1877-78	91·90	8·10	85·78	14·22	87·75	12·25	10·51

60. The proportion of kharif and rabbi irrigation has been as follows :—

	Kharif. Acres.	Rabbi. Acres.
1873-74	43·5	56·5
1874-75	31·2	68·8
1875-76	43·0	57·0
1876-77	37·3	62·7
1877-78	32·1	67·9

61. The average water-rates for five years are as follows :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Kharif, per acre	3·25	3·17	3·13	3·36	2·86
Rabi, „	2·17	2·15	2·16	2·14	2·12

62. The decrease in the kharif is due to the comparatively small acreage under the better paying crops; both sugarcane and rice were less cultivated than in preceding years.

63. The value of the cubic foot per second of water entering the canal and of supply utilized was as follows :—

	1873-74.		1874-75.		1875-76.		1876-77.		1877-78.	
	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Total entering at head	131·05	178·49	124·25	202·20	153·69	173·48	145·62	201·75	134·46	339·22
Utilized	150·1	201·1	132·1	212·1	179·7	189·9	169·7	314·1	157·9	394·3

64. This statement shows a very good return for the rabi, and, as might be expected from the extreme dryness of the season, an unfavorable return for the kharif crop.

65. The duty obtained in acres from the water during the past five years is detailed below :—

	1873-74.		1874-75.		1875-76.		1876-77.		1877-78.	
	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.
Total entering at head	40·24	82·43	39·13	23·95	49·14	80·17	43·33	94·61	46·99	160·47
Utilized	46·40	92·87	41·59	98·57	57·46	87·77	50·50	147·29	55·20	186·56

66. The maintenance charges for the past five years per acre irrigated are as follows :—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Total charges	1·45	1·21	2·24	2·73	1·96
Rájbahá repairs	0·16	0·16	0·16	0·17	0·16

67. As explained in a previous para. (50), the maintenance charges were swelled by heavy expenditure on strengthening the rapids on the upper part of the canal, and in clearing silt deposits in the branches. The experience of the kharif crop had shown that these repairs could not with safety be delayed any longer.

68. The state of water collections was as follows:—

	Balance in 1876-77.	Rabi, 1876-77.	Kharif, 1877-78.	TOTAL.
	Rs.	Rs.	Rs.	Rs.
Demands	606	2,69,661	2,44,598	5,14,865
Realizations	165	2,69,401	2,38,289	5,07,855
BALANCE AT CLOSE OF YEAR	441	260	6,309	7,010

69. There is a considerable increase in the unrealized balances which amounted at the close of the year to Rs.7,010 as against Rs.2,826 in 1876-77.

70. The state of the collections of the land revenue or owners' rate due to or dependent on the works is shown below:—

	Balance of assessment from Kharif 1865-66 to Rabi 1867-68.	Balance of assessments from Kharif 1868-69 to Kharif 1876-77.	Rabi, 1876-77.	Kharif, 1877-78.	TOTAL.
	Rs.	Rs.	Rs.	Rs.	Rs.
Total demands	2,230	1,561	86,311	67,224	1,57,326
Deduct remissions	...	29	18,315	13,667	32,011
Net demands	2,230	1,532	67,996	53,557	1,25,315
Realizations	...	1,483	67,986	50,407	1,19,876
BALANCE UNREALIZED	2,230	49	10	3,150	5,439

71. Here also the unrealized balance, Rs.5,439, exceeds that at the end of the previous year, when it was Rs.3,792.

UPPER SUTLEJ INUNDATION CANALS.

72. The capital debit of these canals, exclusive of interest, was increased by Rs.454; of this, the expenditure on works was as follows:—

	Rs.	Rs.
Constructing Atári Rájbaha	1,042	
Ditto Chunián ditto	908	
		1,950
The remainder consists of charges—		
Establishment		487
Fluctuations in Suspense Accounts		— 1,983
TOTAL		454

73. The capital debit at the close of the year amounted to Rs.5,68,127, exclusive of interest, and including interest to Rs.9,82,273.

REVENUE ACCOUNT CURRENT.

EXPENDITURE.		Rs.	RECEIPTS.	Rs.

			Land revenue due or dependent on the works	8,525
			Fluctuating land revenue, Montgomery District	85,894
			GRAND TOTAL	1,07,212

74. The Revenue Account Current is drawn out in the same form as that for all the other canals, in order to admit of easy comparison in the various entries; but, as it stands, it is somewhat misleading, as these canals have almost no direct revenue, the charge for water being included in the land revenue. The actual state of the account is—expenditure, Rs.65,507; income, Rs.1,07,212; balance, Rs.41,705,—being a profit on the capital of Rs.5,67,673 of 7·34 per cent.

75. For the past four years the income and expenditure were as follows:—

	1874-75.	1875-76.	1876-77.	1877-78.
INCOME—	Rs.	Rs.	Rs.	Rs.
Water-rates	5,038	12,346	8,040	8,559

76. The areas irrigated for the last four years are as follows:—

	Kharif.	Rabi.	TOTAL.
	Acres.	Acres.	Acres.
1874-75	49,749	34,371	84,120
1875-76	48,719	90,218	138,937
1876-77	28,029	46,214	74,243
1877-78	44,624	36,561	81,185

77. The increase in area over last year is not large enough to call for any special remarks. The causes are stated by the Superintending Engineer in his 79th para. to be a short rainfall in August and September; the re-opening of water-courses which had been closed in the previous year; and the opening of rájbahás from the Katora Canal.

78. From this and the statement immediately preceding it will be seen that the favorable returns of this canal for the present year are due to decrease of expenditure both on works and establishment charges rather than to any considerable increase of income.

79. The following table gives the detail of the area and assessments of the fluctuating land revenue:—

	KHARIF.		RABI.		TOTAL.	
	Area.	Amount.	Area.	Amount.	Area.	Amount.
	Acres.	Rs.	Acres.	Rs.	Acres.	Rs.
Class I	122	199	...	...	122	199
,, II	7,068	20,827	...	...	7,068	20,827
,, III	16,112	29,055	...	...	16,112	29,055
,, IV	14,942	14,955	25,823	20,712	30,765	35,66
Fixed	...	60	...	86	...	146
	38,244	65,096	25,823	20,798	64,067	85,894

80. The average duty of the water for the past four years is as follows:—

	1874-75.	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.	Acres.
Kharif	46·4	40·13	27·9	38·6
Rabi	124·6	152·14	124·2	113·5

81. The proportions of overflow to lift for the past four years were as follows:—

	1874-75.	1875-76.	1876-77.	1877-78.
Overflow	84·8	91·8	90·7	83·7
Lift	5·2	8·2	9·3	16·3

82. The measurements and compilation of the assessments appear to have been made by the patwáris with fairly satisfactory results; but the Superintending Engineer again brings prominently to notice that, in the absence of more establishment for checking their work, the system can hardly be expected to improve or even to remain efficient.

83. The chief point to which the Superintending Engineer directs attention is, that the cultivators having abandoned the idea that the rates would be lowered, have now shown a general disposition to take steadily to irrigation.

DERAJAT CIRCLE.

LOWER SUTLEJ AND CHENAB INUNDATION CANALS.

84. The capital was increased during the year by Rs.440 on account of Suspense Balances the total capital to end of year, exclusive of interest, was Rs.1,08,082, and including interest was Rs.1,89,094.

REVENUE ACCOUNT.

EXPENDITURE.		Rs.	RECEIPTS.	Rs.
I. A. Extensions and Improvements		12,568	I. Water-rates from irrigation	680
I. B. Maintenance & Repairs	11,134		Miscellaneous	6,568
Plantations	1,041		Expenditure from Fine Fund	13,734
		12,175		20,982
II. Establishment, Direction	4,902		Value of statute labor	89,535
Do. Executive	49,771			1,10,517
		54,673	Balance loss at 54·90 per cent. on capital of Rs.1,07,642	59,099
III. Tools and Plant		665		
		80,081		
Value of statute labor		89,535		
TOTAL		1,69,616	TOTAL	1,69,616
			Land revenue due or dependent on the works	2,10,069

85. The result therefore of the operations of the year is a loss of Rs.59,099, or 54·90 per cent. on the capital, if the land revenue due or dependent on the works is excluded; taking this into consideration, we have a profit of Rs.1,50,970 or 140·25 per cent. on the capital.

86. The figures for the past three years are shown in the following table:—

		1875-76.	1876-77.	1877-78.
		Rs.	Rs.	Rs.
INCOME	Water-rates from irrigation	679	684	680
	Miscellaneous	4,844	7,873	6,568
	Expenditure from Fine Fund	26,337	13,003	13,734
	TOTAL	31,860	21,560	20,982
EXPENDITURE	Works, &c.	34,960	22,317	25,408
	Establishment, Direction	2,234	2,593	4,902
	Ditto, Executive	36,965	41,195	49,771
	TOTAL	74,159	66,105	80,081
PERCENTAGE ON CAPITAL FROM NET	Direct income	— 39·32	— 41·28	— 54·90
	Do. plus indirect	+ 158·98	+ 157·65	+ 140·25

87. The abstract of expenditure from Fine Fund has been as follows:—

Extensions and Improvements	Rs.	9,758
Maintenance and Repairs	„	3,976
TOTAL	Rs.	13,734

88. The number of statute laborers called out were in excess of last year—

	1875-76.		1876-77.		1877-78.	
	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.
Present	410,882	80·71	363,839	78·53	375,522	78·94
Remitted	30,978	6·09	27,957	6·04	27,921	5·87
Absent	67,192	13·20	71,498	15·43	72,253	15·19
TOTAL CALLED OUT	509,052	...	463,294	...	475,696	...
	Rs.		Rs.		Rs.	
Fines levied, Zarnagha	33,604	...	35,755	...	36,127	...

89. The value of statute labor employed, calculated as hitherto at 6 annas per man, is Rs.1,40,821. The Superintending Engineer states that the average obtaining in the district is probably near 6·6 annas. The amount entered in the Provincial accounts, Rs.89,535, is based on the value of labor at the time the settlement was made.

90. The following statement shows the area irrigated for the last five Years:—

YEARS.	KHARIF.		RABI.		TOTAL.
	Area.	Percentage.	Area.	Percentage.	Area.
1873-74	108,528	55·07	88,536	44·93	197,064
1874-75	163,605	59·77	110,083	40·23	273,688
1875-76	134,280	48·32	143,603	51·68	277,883
1876-77	154,998	54·26	130,647	45·74	285,645
1877-78	165,639	58·18	119,041	41·82	284,680

91. The decrease in area compared with that of the previous year is 965 acres.

92. That this result is satisfactory will be at once conceded when it is considered that the state of the rivers during a critical period was unfavorable, and that the area irrigated in 1876-77 was exceptionally large.

93. The area of the principal crops for the last five years is as follows:—

CROPS.	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.	Acres.	Acres.
Indigo	27,641	51,399	33,189	54,862	69,322
Cotton	21,682	30,480	25,127	24,178	28,280
Rice	6,347	9,563	7,732	8,100	9,197
Sugarcane	3,123	3,497	2,923	3,176	3,473
Millet (Jowár)	34,249	50,337	41,698	40,316	39,307
Wheat	63,388	60,261	64,406	60,422	51,686
Turnips	15,032	19,331	25,324	20,046	23,894

94. Experience has shown that indigo is a crop peculiarly liable to sudden fluctuation in extent. It is, as Mr. Garbett observes, a remunerative crop, and the increase shown in the above table cannot but have been specially advantageous during the year under review, in which high prices were the rule. It remains to be seen whether the opening of the Indus Valley State Railway will favorably affect the cultivation of the more valuable crops; it is reasonable to expect that it will do so.

95. It is observed that in the Superintending Engineer's report no explanation is given of the decrease of 8,736 acres of wheat as compared with the area cultivated in 1876-77. Though the difference is not very large, still some reasons for it should have been stated.

96. The proportion of overflow to lift for the last five years was as follows:—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
Overflow	77·7	82·9	80·6	82·9	79·6
Lift	22·3	17·1	19·4	17·1	20·4

97. The increase in areas watered by lift is due to the very low state of the rivers during the whole year.

98. The percentage of double-cropped lands was—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
Area	8,308	12,864	8,867	10,518	14,997
Percentage	4·22	4·70	3·19	3·68	5·27

99. The increase is probably to be accounted for by the prevailing scarcity and dearness of food-supply which stimulated the cultivators to get as much out of their land as possible.

100. The cost of irrigation to the cultivators has been—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Value of labor supplied	1,69,410	1,98,391	1,54,081	1,36,439	1,40,821
Fine Fund	28,315	42,566	33,604	35,755	36,127
Land revenue due or dependent on the works	2,13,299	2,13,299	2,13,299	2,14,665	2,10,069
Direct water-rate assessment	679	679	679	684	680
TOTAL	4,11,703	4,54,935	4,01,663	3,87,543	3,87,697
Area in acres	197,064	273,688	277,883	285,645	284,680
COST PER ACRE	2·09	1·66	1·45	1·36	1·36

101. The result may be considered satisfactory.

102. The total cost of maintenance, which shows approximately what would have been the cost to Government if statute labor was not in existence, has been—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.	Rs.
Works from Imperial Funds	11,572	9,761	8,623	9,314	11,674
Ditto Fine Fund	23,708	12,956	26,337	13,003	13,734
Establishment	39,178	44,017	39,199	43,788	54,673
Value of statute labor	1,69,410	1,98,391	1,54,081	1,36,439	1,40,821
TOTAL	2,43,868	2,65,125	2,28,240	2,02,544	2,20,902
COST PER ACRE	1·24	0·97	0·82	0·71	0·78

103. These figures call for no special remarks.

104. Before closing the review on the working of these canals, it will be well to notice the extraordinary rainfall entered in the returns as having been registered in the month of September 1877 at Shujábád. The gauge is placed on top of the Tahsil building, and is registered by the Tahsildar. According to his report, on the 7th September 1877, there was a rainfall of 26 inches in the 24 hours. The correctness of the return was, at the instance of the Financial Commissioner, investigated by the Deputy Commissioner of Mooltan, whose report was published at page 729 of the Supplement to *Punjab Gazette*, dated 1st October 1877. The Deputy Commissioner, after visiting Shujábád and seeing the state of the city and surrounding country, had no reason to doubt the correctness of the Tahsildar's report: 700 houses had fallen in the town, and after the lapse of a month there were still large tracts of country of miles in length under water.

INDUS INUNDATION CANALS.

105. From the capital of Rs.6,10,647 at the end of last year, Rs.35,095 has been transferred to the Capital Account of Abdul Rahím Khán's Canal, which does not belong to the Indus series, and Rs.1,923 was added on account of fluctuations in suspense balances during the year; the capital therefore at the end of the year was Rs.5,77,475 excluding, and Rs.8,99,581 including, interest.

Revenue Account.

Expenditure		Rs.	Receipts.	Rs.
I A. Extensions & Improvements		30,301	Clearance rate	45,000
I B. Maintenance & Repairs	1,17,890		Miscellaneous	1,139
Plantations	5,001			46,139
		1,22,891		
II. Establishment, Direction	51,287			
Ditto, Executive	47,188			
		98,475	Balance loss at 36 per cent. on capital of Rs.5,75,552	2,07,226
III. Tools and Plants		1,698		
Total		2,53,365	Total	2,53,365
			Land revenue due or dependent on the works	1,37,755

106. The result therefore of the operations of the year is a loss of Rs.2,07,226, or 36 per cent. on the capital excluding, and Rs.69,471, or 12·07 per cent., including, the land revenue due or dependent on the works.

107. These canals have not as yet been credited with the part of the land revenue due to canal irrigation which is remitted to Jagírdárs. The exact amount has not yet been satisfactorily arrived at; the investigation is still in hand, and the additional credit to the canals is expected to amount to between Rs.20,000 and 30,000 per annum, which will considerably decrease the loss which has hitherto been shown as accruing every year from the working of the canals, added to the heavy charges for the maintenance of the river protection works of this division.

108. The result of the past four years is as follows :—

		1874-75.	1875-76.	1876-77.	1877-78.
		Rs.	Rs.	Rs.	Rs.
Income	Clearance rate	45,000	45,000	45,000	45,000
	Miscellaneous	1,493	1,143	1,135	1,139
	Total	46,493	46,143	46,135	46,139
Expenditure	Works, &c.	1,28,291	1,24,894	1,34,196	1,54,890
	Establishment, Direction	24,813	31,495	30,910	51,287
	Ditto, Executive	38,632	33,624	48,857	47,188
	Total	1,91,736	1,90,013	2,13,963	2,53,365
Percentage on Capital from	Direct income	— 33·19	— 30·70	— 29·18	— 36·00
	„ plus indirect	— 1·35	— 1·12	— 5·05	— 12·07

109. The increase over the expenditure of the previous year of Rs.20,694 on works, &c., is mainly due to the construction of a new regulator to the head of the Shoria Canal, and to the excavation of a new straight channel in connection with it, and to expenditure on the recently-purchased Massúwah Canal.

110. The increase of Rs. 20,377 on Establishment—Direction, is due to the abolition of the Special Survey Circle of Superintendence.

111. The slight decrease in Establishment—Executive, appears to call for no remarks.

112. The percentage of overflow to lift for the last five years was—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
Overflow	92·24	91·81	90·70	92·22	90·06
Lift	7·76	8·19	9·30	7·78	9·94

113. The slight increase in the area watered by lift is due to most of the canals having a smaller supply in them than in the previous year.

114. The area irrigated for the last five years was—

	Kharif.		Rabi.		Total.	Rainfall.
	Area.	Percentage.	Area.	Percentage.		
1873-74	115,590	70·91	47,430	29·09	163,020	8·10
1874-75	121,804	70·89	50,018	29·11	171,822	9·90
1875-76	103,324	71·28	41,636	28·72	144,960	9·20
1876-77	124,166	74·54	42,408	25·46	166,574	13·20
1877-78	125,230	72·98	46,374	27·02	171,604	6·10

115. The actual area irrigated was 175,960, but 4,356 acres had to be deducted for various causes.

116. The area of principal crops for last five years was—

	1873-74.	1874-75.	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.	Acres.	Acres.
Rice	8,351	9,839	9,383	7,913	11,245
Indigo	19,019	14,953	9,956	24,868	28,711
Cotton	27,846	29,934	28,182	29,491	35,158
Wheat	42,638	45,270	39,768	41,004	37,479
Millets	48,348	54,229	38,830	48,452	34,203

117. There is a satisfactory increase in the principal kharif crops; the area under indigo appears to be steadily increasing. Wheat and millets were below the average.

SHAHPUR CANALS.

118. The capital was increased during the year by Rs.14,763, due to the extension of the Station Canal which was sanctioned during the year: the total to end of the year was Rs.37,576 exclusive of interest, and including interest Rs.45,249.

Revenue Account.

Expenditure.	Rs.	Receipts.	Rs.
Maintenance and Repairs, &c.	5,041	Water-rates from irrigation	12,403
Establishment—Direction	960		
	6,001		
Balance profit at 28·06 per cent. on capital of Rs.22,813	6,402		
Total	12,403	Total	12,403

119. The result of the last four years was as follows :—

		1874-75.	1875-76.	1876-77.	1877-78.
		Rs.	Rs.	Rs.	Rs.
Income—Water-rates from irrigation		8,112	6,314	15,101	12,403
Expenditure	Works, &c.	3,396	4,448	5,000	5,041
	Establishment—Direction	294	766	778	960
		3,690	5,214	5,778	6,001
Percentage of profit on direct income		20·84	5·18	43·93	28·06

120. The percentage of profit for 1876-77 does not agree with the figures shown in the Report for that year, owing to Examiner having shown the assessment at Rs.17,418 instead of Rs.15,101.

121. The area irrigated for the past four years was—

	Kharif.		Rabi.		Total.
	Area.	Percentage.	Area.	Pe	
1874-75	5,146	80·98	1,209	19·02	6,355
1875-76	2,733	67·63	1,308	32·37	4,041
1876-77	6,671	73·12	2,452	26·88	9,123
1877-78	4,610	82·50	978	17·50	5,588

122. The falling-off in area irrigated is ascribed by the local officer to the River Jhelum having been unusually low during the whole of the summer months.

123. The principal corps irrigated for three years were—

	1875-76.	1876-77.	1877-78.
	Acres.	Acres.	Acres.
Cotton	1,642	4,059	3,667
Jowar	621	1,466	659
Wheat	759	1,739	916
Gram	516	670	59

124. It will be seen from this table that the distribution of crops on the area irrigated was much the same as in the previous year. The Deputy Commissioner mentions that these canals also ensure a supply of grass for the cattle, which must have been very valuable in a season of drought.

125. The average water-rate and maintenance per acre for four years was—

	1874-75.	1875-76.	1876-77.	1877-78.
	Rs.	Rs.	Rs.	Rs.
Water-rate per acre	1·28	1·56	1·66	2·22
Maintenance	0·58	1·29	0·63	1·07

126. Here also the water-rate per acre for 1876-77 will not agree with that shown in the Report for that year for the reason given in para. 120. The water-rate per acre is higher in this than in any preceding year.

GENERAL.

127. The capital debits to each series of canals, exclusive of interest, according to the Examiner's returns, stand thus:—

Series of Canals.	Capital, 1st April 1877.	Addition during the year 1877-78.	Capital on 1st April 1878.	Add Contributions.	Grand Total Capital, 1st April 1878.
Canals yielding Income.	Rs.	Rs.	Rs.	Rs.	Rs.
Western Jumna Canal	48,83,805	8,75,408	57,59,213	...	57,59,213

Total	989,823	1,208,073	1,097,429	1,114,082	1,324,480

REMARKS ON ESTABLISHMENT.

131. During the year under review, Major R. Home, R.E., officiated as Chief Engineer and Joint-Secretary, with Captain W. Broadfoot, R.E., as Assistant Secretary.

132. The following officers, deputed to Madras and Bombay on Famine duty, were employed in those Presidencies up to the dates specified:—

Mr. H. Daniell, Assistant Engineer, 1st grade, to 13th December 1877.
„ D. McMordie, ditto ditto, to 14th January 1878.
„ C. A. Greenwood, ditto ditto, to 13th December 1877.
„ H. P. Leupolt, ditto 2nd grade, during the year.
„ A. G. Reid, ditto ditto, to 14th December 1877.
„ S. Rebsch, ditto ditto, was permanently transferred to the Bombay Presidency from 25th January 1878.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Thursday, the 4th September, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.

HACKNEY-CARRIAGE BILL.

The Hon'ble MR. THORNTON moved that the Report of the Select Committee on the Bill for the regulation and control of Hackney-carriages in certain Municipalities and Cantonments be taken into consideration. He said that the Bill, as an effort of legislation, was of the humblest character; but, judging from the remarks and criticisms received from the several Local Governments affected by its provisions, it would appear that it had, at any rate, one merit—the merit of being wanted.

It further appeared from the replies received from the same authorities that the provisions of the Bill, as introduced, were considered generally suitable. One critic, indeed, had expressed the opinion that too much power had been left in the hands of local authorities, and that it would have been better if many of the rules which it was left to those authorities to frame had been specifically enacted by the legislature. This point had, however, been duly considered by the framers of the Bill; but it was felt that the territories to which the measure was to extend were so vast, and their circumstances so widely different, that such a course, however desirable from some points of view, would be impracticable. The course adopted—which had met with general approval—had been to make the Bill an enabling one, to indicate clearly and specifically what the local regulations might, and ought to, provide for, and to leave the details to be filled in by the municipal and local authorities concerned, subject to the confirmation of a central authority—the Local Government—and to the control of the Government of India. Hereafter, when more practical experience had been gained, it might be desirable that each of the Provinces affected should have one set of regulations in force throughout its limits; but that was a matter of local interest which might be safely left in the hands of Local Administrations.

So much for the general design of the Bill. In regard to its details, several valuable suggestions had been received, which had been embodied in the Bill

as now amended; and some further amendments and additions had been made by the Select Committee after consideration of the provisions of similar enactments in force in India and in England. He would not trouble the Council by detailing the amendments thus introduced. It would suffice to say that they would all, it was believed, commend themselves at once to the approval of the Council and the public.

He would observe, in conclusion, that the framers of the Bill had had four somewhat conflicting interests to deal with and, if possible, reconcile—the interests of the passenger, the interests of the proprietor, the interests of the driver, and the interests of the horses. They had endeavoured to the best of their ability to deal fairly with all these interests, and he hoped, if the measure was permitted to become law, the result would be ultimately beneficial to all parties and no inconsiderable addition to the comforts of existence in the towns and cantonments of the interior of India.

The Motion was put and agreed to.

The Hon'ble MR. THORNTON then moved that the Bill as amended be passed.

The Motion was put and agreed to.

INDIAN MERCHANT SHIPPING BILL.

The Hon'ble MR. STOKES introduced the Bill relating to Merchant Shipping, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Thompson, Thornton and Hope and the Mover. He said that he had already explained that this miscellaneous but useful measure was intended to effect in the British Indian law of Merchant Shipping eight amendments, of which the introduction of Plimsoll's Act (39 & 40 Vic., c. 80), as to unsafe and unseaworthy ships, was by far the most important.

The minor amendments were so fully described and explained in the Statement of Objects and Reasons that he would not take up the time of the Council by commenting upon them. But a brief exposition of the principal provisions of chapter II, which corresponded with Plimsoll's Act, would, he thought, be not altogether useless.

Section 4 of the Bill and the Act declared that whoever should send a ship to sea in such an unseaworthy state that the life of any person was likely to be thereby endangered should be punished with imprisonment or fine, unless he proved *either* that he used all reasonable means to insure her being sent to sea in a seaworthy state, *or* that her going to sea in an unseaworthy state was under the circumstances reasonable and justifiable. MR. STOKES found from a useful commentary on the Act, which had been published by its draftsman, Mr. Ilbert, that this provision had been objected to in England on the ground that it threw the burden of proof on the defendant; but it was perfectly right. The prosecution must show in the first place that the ship was sent to sea in an unseaworthy state. This raised a presumption (here under section 114 of the Evidence Act) of guilt on the part of the defendant; and the burden was thrown upon him to discharge himself by proving either that he used all reasonable means to make the ship seaworthy, or that the sending to sea was justifiable. These facts the defendant alone could prove, and the burden of proving them was rightly thrown on him. Similarly, in the case of stolen goods. If it were proved that a man was in possession of stolen goods soon after the theft, the Court might presume that he was either the thief or had received them knowing them to be stolen. He must then discharge himself, if he could, by proving that he came by them honestly.

As to the provision enabling the defendant to plead that the sending the ship to sea in an unseaworthy state was justifiable, that was intended to meet the case of a ship which had been badly damaged at sea and had taken refuge in a port where it was impossible to repair her satisfactorily. She would probably be patched up and sent to the nearest place where she could be conveniently repaired; and, assuming that no risk was recklessly incurred, it would be unreasonable, under such circumstances, to hold her owner or master guilty of a criminal offence merely because she was not perfectly seaworthy when she left her port of refuge.

It was unnecessary in India to justify the provision enabling the defendant to give evidence in his own behalf. It was obviously in favour of an innocent defendant; and Mr. Ilbert said that, in the few cases which had arisen at home under the Acts of 1871 and 1875, it had always been made use of by the incriminated shipowner.

We then came to section 5. The Common Law rule was that a master was not liable to pay compensation to a servant for the consequences of a risk incident to the contract of service, and that an accident caused by the negligence of a fellow-servant was such a risk. Now the object of section 5 was to modify this rule so as to render the shipowner liable to seamen, not only for his personal neglect, but also for that of certain of his agents, who were technically, but were not to ordinary understandings, "fellow-servants" of the seamen. The section also prohibited the shipowner from contracting himself out of the obligation thus imposed—an obligation which, by the way, was continuous, being not merely to make the ship seaworthy, but to keep her so during the voyage to which the contract related.

The Bill enabled the Government to detain a ship provisionally; and section 27 provided rules as to liability of Government for the costs of the detention and survey where the ship was provisionally detained and it appeared that there was not reasonable and probable cause for such detention. Section 28 also provided a rule as to the liability of the shipowner for costs where the ship was finally detained, or where it appeared that she was unsafe at the time of provisional detention. But there was no provision for the case which would sometimes occur, namely, where there was reasonable and probable cause for the detention but the ship was, at the time of detaining her, as a matter of fact, not unsafe. In such case each party would, in England, bear his own costs, and it was presumed that the same result would follow in this country.

Section 32 declared how grain-cargo should be stowed so as to be secured from shifting, and imposed a penalty of Rs. 3,000 for improper stowage of such cargo. The penalty was heavy, but it would probably be seldom incurred; for a more effectual sanction for this section would be found in the fact that a shipment contrary to its provisions would endanger the validity of any policies of insurance effected on the voyage. Thus in *Cunard* v. *Hyde*, 2 E. & E. 1, the Court of Queen's Bench decided that where a deck-cargo was put on board with the privity of the owner, whereby the object of an Act of Parliament was defeated, and whereby the vessel sailed upon an illegal voyage, a plea stating these facts would be a good defence to an action on the policy; and this decision was cited with approval by Blackburn J., in *Dudgeon* v. *Pembroke*, L. R. 9 Q. B. 585.

The Statement of Objects and Reasons said that, in adapting to India an English Act of this nature, it seemed advisable to make the Indian Act as nearly as possible identical with the English one, and that in drafting this chapter the provisions of 39 & 40 Vic., c. 80, had, therefore, been followed as closely as possible. There would, he thought, be no dispute as to the general propriety of this course. But in the present case the Legislative Department had gone a little too far, and, like Chinese tailors, copied the patches on the garment given to us as a pattern. Thus the proviso to section 5 might be construed as implying that there were circumstances in which the shipowner was not bound to use all reasonable means to ensure the seaworthiness of his ship. It was objectionable also on other grounds, for (as Mr. Ilbert remarked) if, for the sake of convenience or economy, a ship was sent to sea in an unseaworthy state and loss of life was caused by her unseaworthiness, it was not clear why compensation should not be paid to the families of the deceased persons. Criminal liability was quite another matter. This proviso was inserted in committee by the House of Commons, and should, MR. STOKES thought, be omitted. Again, section 38 imposed a penalty on any owner or master of a ship who allowed her "to be so loaded as to submerge *in salt water* the centre

of the disc." This clause was also inserted in committee; and the effect was, if construed literally, to subject a shipowner to a penalty whenever his ship did not stand exactly upright in perfectly smooth water. A single sea-wave submerging the disc on either side would render him liable to a fine of Rs. 1,000. Of course, these defects and any others that might be pointed out by the mercantile community would be removed by the Select Committee to which MR. STOKES trusted the Bill would now be referred.

The Hon'ble SIR EDWIN JOHNSON enquired whether the exemption of ships, under clause 3, extended to ships temporarily taken up by Government for military purposes.

The Hon'ble MR. STOKES said that, if such ships were in the service of Government, they would be exempted. It might, however, be well to insert some words in committee, such as "permanently or temporarily in the service of Government," to make that point quite clear. The point was not of much practical importance; for, as the Secretary had just suggested to him, ships taken up in this way were always carefully surveyed by Government officers, and after such survey it was highly improbable that they would be detained under the Act.

The Hon'ble SIR EDWIN JOHNSON remarked that he thought there might be a possibility of vexatious detention in such a case.

The Hon'ble MR. STOKES did not think it likely that any vexatious detention could occur, as the persons authorized to detain ships would always be officers of Government or judges of the Courts of Survey.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit. He begged leave to take the opportunity of mentioning that the propriety of exempting Lloyds' Surveyors from the operation of sections 65 and 66 would be duly considered by the Select Committee, and that that Committee would not commence its sittings until the Council had re-assembled in Calcutta, by which time he trusted that they would be strengthened by the addition of a mercantile member.

The Motion was put and agreed to.

RANGOON PORT COMMISSIONERS BILL.

The Hon'ble MR. THOMPSON presented the Report of the Select Committee on the Bill to appoint Commissioners for the Port of Rangoon.

SALT TRANSPORT BY SEA BILL.

The Hon'ble MR. HOPE asked for leave to postpone the presentation of the final Report of the Select Committee on the Bill to restrict the transport of Salt by Sea.

Leave was granted.

The Council adjourned to Thursday, the 11th September, 1879.

SIMLA;
The 4th September, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 2nd SEPTEMBER 1879.

GENERAL REMARKS.—In Madras moderate rain fell during the week; prospects are fair and promising. In Bombay showers have been general; locusts are still about and damaging crops in parts of Sind; rats are doing mischief here and there in the Deccan and Southern Mahratta Country; prospects on the whole are excellent. Rain has fallen in all the Districts in Bengal, but the want of more rain is still felt in the Burdwan Division, the 24-Pergunnahs and Balasore; much damage to crops has been done by floods. The rainfall in the North-Western Provinces was general during the early part of the week, but since then the break that was desired has occurred, and has proved beneficial to the crops; prospects are favourable. In the Punjab good rain, though less than during the previous week, has again fallen and prospects continue to improve. In the Central Provinces continuous rain is injuring the cotton, and in a less degree other *kharif* crops; no great damage has been done yet, a break would do much good; general prospects are satisfactory. The rain in Burma has been general and heavy; crops are thriving, but cultivation has, in places, been injured by floods; the outlook, as heretofore, is encouraging. In the other Provinces and States prospects continue very favourable, but in Coorg and parts of Berar and Hyderabad crops are beginning to suffer from continuous rain.

Prospects are good on the whole throughout the Empire. In parts excessive rain has damaged crops and a break in the wet weather would be of great benefit.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Aug. 30th)	·85 (average of 7 stations).	*Ragi* 18·98; early dry and wet crops thriving.
Kurnool („ „)	·98 (average of 6 stations).	*Ragi* 22·46; crops flourishing; prices falling in Kurnool, stationary elsewhere; pasture and water abundant.
Ganjam („ „)	1·51 (average of 11 stations).	*Ragi* 19·05 seers per rupee.
Kistna („ „)	1·91 (average of 11 stations).	*Ragi* 19·97; 85 inches water over anicut; standing crops doing well; *sazza* and maize ripening, and harvest commenced in parts of Guntur and Repalli taluks.
Chingleput (Madras) (Aug. 30th).	3·52 (average of 12 stations).	*Ragi* 17·58; crops good; ploughing and sowing going on; harvest outturn ¼ to ½; pasturage abundant.
Coimbatore („ „)	·76 (average of 11 stations).	*Ragi* 21·47; standing crops generally good except in few villages, withering from want of rain in 4 taluks; harvest of some dry crops in 4 taluks.
Tanjore („ „)	1·93 (average of 13 stations).	*Ragi* 16·86; crops good; harvest of *cholum, cumboo, ragi* and oil-seeds, outturn ½ to ¾.
Madura („ „)	·90 (average of 10 stations).	*Ragi* 17·05.
Malabar („ „)	3·26 (average of 14 stations).	*Ragi* 16·75; prices stationary; pasture good; rain sufficient; harvesting of first crop commenced in 6 taluks.
Travancore ...	...	No report received.
		General Remarks.—General prospects generally fair and hopeful.
Bombay (Sept. 3rd)—		
Kurrachee ...	·22 at Manora, ·13 at Kotri, ·03 at Johi, ·10 at Thano Bula Khan, ·20 at Sujawal, ·03 at Shahbandar, ·10 at Jati, ·03 at Kurrachee.	River on 31st 19 feet 6½ inches,—last year 19 feet 5 inches; *kharif* crops coming into ear; some damage in Jati through excess of water; cattle-disease in Dadu and Jati; locusts doing mischief in 2 talukas; cholera is prevalent.
Hyderabad ...	Pretty general, varying from ·22 to 2·10 in Mirpur.	Locusts about and damaging crops in 4 talukas; river on 2nd 19 feet 7 inches or half an inch higher than maximum of last year.
Ahmedabad ...	2·69	Total rainfall 26·90; break needed; crops excellent.
Baroda ...	2·12	Total rainfall 42·73; crops and health good; sunshine much wanted.
Surat ...	3·35	Total rainfall 31·55; crops healthy; cholera in Surat and Bulsar.
Násik ...	Light showers	Total rainfall 29·0; crops good; prices slightly lower.
Colaba (Bombay) ...	2·03	Total rainfall 55·79, being 3·59 below average; weather somewhat fine for season; temperature normal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Poona (Aug. 31st)	Maximum 1·85 at Mawal, minimum ·06 at Sirur.	
Ahmednagar ...	*Nil* at Sangamner; in other talukas from ·06 to ·90.	Owing to break in weather state of crops improving where damage was apprehended from excessive rain; injury by rats in 4 talukas; *rabi* sowing commenced in 2 talukas; slight cholera in 2 talukas.
Sholápur ...	.....	Report not received.
Dharwar ...	Average ·57	
Kanara ...	Maximum 10·12 at Karwar, minimum 1·03 at Supa.	Total rainfall 112·51 at Karwar; early rice crops coming into ear on coast.
Rajkot ...	3·24	Total rainfall 25·34; crops good; insects damaging young crops in Johelwad; fever and diarrhœa continue; cholera in Bhaunagar and Nawanagar.
		General Remarks.—Showers general throughout the Presidency; some damage to crops from locusts in Sind, from insects in Kattywar and rats in parts of the Deccan and Southern Mahratta Country, but prospects excellent on the whole.
Bengal (Sept. 4th)—		
Chittagong ...	6·36	Harvesting of *aus* going on with favourable outturn; *amun* being transplanted; a few cases of cholera reported.
Dacca ...	3·31	*Aus* crop six annas; *amun* promising; rice second quality 12 seers; public health good; southern third of district inundated and crops destroyed: about two thousand persons gratuitously relieved by private charity and similar number by Government and employed on relief-works.
24-Pergunnahs (Calcutta)	·97 at Alipore	Transplantation nearly completed; more rain wanted; prices continue high; general prospects good; public health fair; fever in Barripore and Busseerhat.
Moorshedabad ...	·85	Rice plants not submerged doing well; *aus* in east damaged considerably and in many places utterly destroyed by floods; a good *amun* harvest expected in greater portion of district; little hope for hemp and sugarcane; public health generally good.
Rajshahye ...	1·60	Ganges still very high though fallen slightly; crops in parts of Thanas Chárghát and Puthia seriously damaged by floods; *aus* and *amun* in low lands destroyed but elsewhere promise well and transplanted rice in Burhind a splendid crop; cutting of *aus* commenced; public health remarkably good.
Burdwan ...	3·87	More rain much wanted throughout district especially in Sadr, Ranegunge, Bhuboosh, and parts of Jehanabad sub-divisions; general health good; rice little cheaper, 11 to 12 seers a rupee.
Rungpore ...	·56	Prospects of crops favourable; ordinary rice about Rs. 3 and annas 10 per maund; public health good.
Bhágalpur ...	1·34	*Bhadoi* lost entirely; rice prospects good; common rice 15 seers per rupee; general health good; cholera bad in south.
Purneah ...	3·62	*Aghani* and *rabi* prospects good; outturn of *bhadoi* splendid where not damaged by inundations; progress of farming operations considerable; weather very favourable; tendency of market downwards; rice 13 to 17 seers a rupee; health good for this season of year; rivers high; Ganges and Koosi in great flood but falling; latter has done much damage.
Patna ...	·06	Rice prospects good; *bhadoi* much destroyed by floods but waters receding.
Durbhanga ...	2·07	*Bhadoi* crop average where unflooded; *dhar* transplantation advanced; rice 9 to 12 seers a rupee; general health good; some sickness among cattle much starved by floods.
Hazáribágh ...	·88	Rice crops everywhere good; transplantation going on; *makai* in some parts suffered from excessive rain.
Cuttack ...	3·79	Crops on low lands partially damaged by recent floods; prospects fair; *biali* ripening; transplantation and second ploughing of *saradi* going on; common rice 13 seers a rupee; health generally good; irrigation progressing fairly.
		General Remarks.—More or less rain in all districts; transplantation being rapidly completed but more rain still much wanted in Burdwan Division and in 24-Pergunnahs and Balasore; *aus* being reaped but much of it destroyed by floods in Nuddea, Moorshedabad, Rajshahye, Patna, Dacca and Furreedpore; inundation in Behar subsided considerably but much *bhadoi* destroyed; in Pooree considerable damage done by inundation; *amun* too destroyed in some places but its general prospects favourable; moreover excellent cold weather crops may be looked for on the inundated lands.
N.-W. P. and Oudh—		
Benares (Sept. 2nd)	1·5	A break of fine dry weather since 30th; prospects good; health fair.
Allahabad („ „)	·6 (average)	Total rainfall since 1st June 24·8; every sign of a protracted break; wheat 14¼ seers; cheaper *kharif* grains coming into market; health excellent.
Gorakhpur („ 3rd)	2·5	Total rainfall 49·8; weather seasonable; prospects good; health fair.
Jhansi („ 4th)	2·5	Weather clear; crops generally flourishing but some damage done here and there by excess of rain; present break therefore beneficial; prices falling; some cholera; a good deal of fever about.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—*continued.*		
Agra (Sept. 2nd)	3·0 (average)	*Kharif* prospects continue favourable; fever and ague continue bad.
Bareilly („ 3rd)	1·8 (average)	Break has done good, but too late to save early *kharif*; rice very promising; health good.
Meerut („ „)	2·7	Thunder-storms; weather cleared somewhat; fever bad; a few cases of cholera; some cattle-disease in Hauper; cheapest wheat and gram 17 and barley 23 seers; much country under water.
Kumaun („ 1st)	.....	Favourable weather; crop prospects much improved.
Lucknow („ 3rd)	2·0	Three days' break; weather fine; prospects excellent; barley 22 seers.
Partabgarh („ 1st)	Sadr ... 2·0 Khunda ... 1·2 Patti ... 2·2	*Bajra, jowar, arhar, moth, moong* and *tillie* are ripening; *kakun* is being reaped; health good.
Sitapur („ 3rd)	3·4	Break of four days; prospects and health good.
Fyzabad („ „)	·9	Prospects continue good.
		General Remarks.—Rain during early part of week, since then a break which has been very beneficial; prospects favourable; early *kharif* in Bareilly has suffered from excessive rain; harvest operations beginning; health good, except in Agra, Meerut, and Jhansi where there is much fever; a few cases of cholera in Meerut and Jhansi and some cattle-disease in Meerut.
Punjab (Sept. 2nd)—		
Delhi ...	·6	Agricultural prospects favourable; prices falling; fever prevalent.
Hissar ...	1·1	Rain has been general all over the district; cattle recovering condition; *bajra* from 17 seers has run to 23 seers per rupee; fever increasing.
Umballa ...	·9	Crops and health good.
Jullundur ...	2·4	Crop prospects and health good; prices falling.
Lahore ...	·3	Health generally good but cholera about.
Ferozepore ...	·7	Agricultural prospects improving.
Siálkot ...	1·7	
Ráwalpindi ...	3·0	Fever prevailing.
Pesháwar ...	·2	Harvest prospects fair; prices steady.
Mooltan ...	*Nil*	Crops and health good; slight fluctuations in prices.
Dera Ismail Khan ...	·3	Agricultural prospects improved; health good.
		General Remarks.—Reports generally favourable and prices falling.
Central Provinces—		
Nágpur (Sept. 3rd)	2·26	*Jowar* suffering from excessive rain; cotton not affected as yet, but break is much needed.
Jubbulpore ...	1·51	All crops including cotton flourishing; weeding progressing; small-pox continues; fever prevalent; prices slightly fallen.
Saugor ...	·45	Break beneficial to cotton and millets; crops flourishing; weeding completed; small-pox continues; fever prevalent; prices slightly fallen.
Seoni ...	1·75	Continuous rain injuring cotton and *jowar* and preventing the reaping of earlier crops.
Hoshangabad ...	4·0	Cotton and other crops good; prices falling.
Raipur (Aug. 30th)	2·21	Prospects of *kharif* good; cotton slightly injured by heavy rains; cholera and small-pox continue; prices stationary.
Sambalpur („ 29th)	1·95	Weather favourable for all crops, except cotton, which has been injured in places by excessive rain; cholera and small-pox continue.
		General Remarks.—Continuous rain injuring cotton, *jowar* and lesser millets, no great damage as yet; break much needed throughout the province; prospects on the whole favourable.
British Burmah—(Sept. 3rd)—		
Akyab ...	4·47	Total rainfall 182·72; public health good; slight cholera in one township; agricultural prospects good.
Rangoon ...	4·17	Total rainfall 71·29; public health normal; agricultural prospects favourable; rainfall most propitious.
Bassein ...	3·36	Total rainfall 64·84; public health good; slight cattle-disease; weather favourable for cultivation; ploughing and transplanting still going on.
Prome ...	·44	Total rainfall 27·80; public health fair; crops damaged by floods.
Amherst (Moulmein) ...	6·82	Total rainfall 121·94; public health good; slight cattle-disease; crop prospects good.
Toungoo ...	4·11	Total rainfall 52·46; public health good.
		General Remarks.—Crops throughout province progressing satisfactorily, but floods have damaged them in parts, and a good deal of cultivation will be destroyed; public health generally good; agricultural prospects favourable.
Assam (Sept. 3rd)—		
Gauháti ...	1·63	Weather hot and sultry; prospects of crops good; transplanting of *sáli* progressing.
Sylhet ...	1·36	Prospects good; prices stationary.
Cachar ...	...	No report received.
Dibrugarh ...	...	No report received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg— (Sept. 3rd)—		
Bangalore ...	1·04	Crops beginning to suffer from incessant rain in Coorg; elsewhere agricultural prospects continue favourable; public health generally good.
Mysore ...	1·11	
Mercara ...	16·01	
Berar & Hyderabad— (Sept. 3rd)—		
Amráoti ...	2·60	*Kharif* and cotton crops in good condition, but owing to incessant rain are being locally damaged in some places.
Akola ...	...	Report not received.
Hyderabad ...	4·14; 1·13 in Raichur; ·24 in Gulbargah; ·44 in Lingsugur.	Total rainfall at Hyderabad up to 30th August 25·94, and at Aurangabad 30·0; agricultural operations progressing; crops fair except in few places where excessive rain prevents *rabi* sowing and has damaged *jowar* and *bajra*; cholera in Elgundar; slight fever in Gulbargah and Aurangabad districts; public health elsewhere good.
Central India States (Sept. 3rd)—		
Indore ...	1·49	Crops most promising; wells filling; opium promises well; wheat 9 seers and gram 10 seers 3 chittaks.
Morar (Gwalior) ...	2·3	
Sutna ...	·41	Prospects good; *jowar* 17 seers.
Rutlam ...	6·13	Weather cloudy; health and prospects good.
Neemuch ...	2·95	Full crops anticipated.
Goona ...	1·39	Crops flourishing; health good; wheat 15 seers.
Bhopal ...	1·50 in Sehore	Cloudy; prospects of crops good.
Ágar ...	2·28	Health good.
Nowgong ...	1·76	
Mánpur ...	7·35	Cloudy; fever prevalent; prices stationary.
Rajputana—		
Abu (Sept. 3rd)	10·30	Total rainfall 64·75; close; cloudy.
Serohi (Aug. 31st)	2·15	Tanks full; wells good; health fair; prospects good; cloudy; seasonable.
Marwar ...	.....	No report received.
Meywar (Aug. 29th)	3·16	Tanks, wells, health and prospects good.
Harowtee („ 30th)	6·29 in Deoli; 3·32 in Kotah; 4·10 in Tonk.	Health good; prospects less favourable; sunshine and break much needed.
Jhallawar ...	.....	No report received.
Ajmere (Sept. 3rd)	3·70	Fine weather; more rain would cause damage; fever prevalent.
Jeypore ...	8·13	Prospects good; fever still prevalent.
Bhurtpur (Sept. 2nd)	3·08	Fever still prevalent; cloudy; easterly wind.
Ulwur („ 3rd)	4·04 (average)	Break necessary to prevent further damage to crops; fever very prevalent.
Nepal (Aug. 26th)—		
Katmandú ...	1·56	Total rainfall 45·75; cholera still prevalent; agricultural prospects satisfactory.

C. BERNARD,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

DISPOSAL OF ROYAL ENGINEER OFFICERS.

Extract from the Proceedings of the Government of India, Public Works Department,— Nos. 1605-27 E.—G., dated Simla, the 3rd September 1879.

Read again—

Resolution in the Department of Finance and Commerce, No. 2079, dated 31st July 1879.

RESOLUTION.—In paragraph 3 of this Resolution it was announced that the Government of India was not in a position to state the measures that would be taken to reduce the departmental staff of officers of Royal Engineers.

2. Her Majesty's Government has decided that officers of the Royal Engineers for whom there is no available employment in the Public Works Department, must either take special leave and await an opening for re-employment, or revert to military duty.

3. Local Governments and Administrations are, therefore, directed to forward to the Government of India in the Public Works Department, the names of all Royal Engineer officers for whom they have no further employment, intimating at the same time the wishes of the officers in regard to leave or reversion to military duty.

4. The conditions of the special leave of absence are as follows:—

(1) This leave will in the first instance extend to two years.

(2) Officers who are granted this special leave, in case of their leaving India, must go and return at their own expense, unless called upon to return before the expiry of the period of leave, when their return passage will be provided.

(3) The allowances of an officer on special leave will be those he would receive if he went on furlough, when furlough was due to him

(4) The special leave may be taken in continuation of any other leave except privilege leave, which must be commuted into special leave.

(5) The special leave on the pay specified in clause 3 will count as service in every respect except that, in the case of the Imperial Establishment where furlough has not been earned, the seven years' Indian service shall be subsequently made up, if required.

(6) If furlough is taken within three years of return from special leave, the average emoluments of an officer will be calculated as if he had been on duty in India on his last appointment for the portion of the special leave included in the three years.

(7) The special leave will begin from the date on which an officer is relieved of his duty, and will terminate on the date of his rejoining.

(8) No temporary promotions will be made in succession to officers accepting these terms.

The Government of Bengal, in the Public Works Department, General, Irrigation, and Railway Branches.
The Government of the North-Western Provinces and Oudh, in the Public Works Department, Buildings and Roads and Irrigation Branches.
The Government of the Punjab, in the Public Works Department, General and Irrigation Branches.
The Chief Commissioners, Central Provinces, British Burmah, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.
The Superintendent of Port Blair, and Chief Commissioner, Andaman and Nicobar Islands.
The Accountant General, Public Works Department.
The Inspector General of Military Works.
The Director of State Railways, Western System.
The Director of State Railway Stores.
The Consulting Engineers to the Government of India for Guaranteed Railways, Calcutta, Lahore, and Lucknow.

ORDER.—Ordered, that this Resolution be published in the *Gazette of India* and forwarded to the Local Governments, Administrations, and Officers noted in the margin, also the Foreign Department for early communication to the Chief Commissioner of Mysore, and the Military Department for information.

ALEX. FRASER, *Major-Genl., R.E.,*
Secy. to the Govt. of India.

SUPPLEMENT TO
The Gazette of India.

No 37.} CALCUTTA, SATURDAY, SEPTEMBER 13, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 9th SEPTEMBER 1879.

GENERAL REMARKS.—In Madras there has been general and moderate rain; harvesting of some crops has commenced; prospects are favourable. In Bombay also general rain has fallen; there has been a break in the weather in the latter part of the week; locusts and rats are still doing injury to crops in parts of Sind and the Deccan respectively; prospects remain excellent. Rain fell in all the districts in Bengal; prospects have improved in Burdwan and Balasore, but more rain is still required in these places; much injury has been done to crops in inundated tracts, especially in the Dacca district, where there is some distress. In the North-Western Provinces and Oudh heavy rain has done some damage in Sitapur, Bareilly, Agra and Jhansi, and a break would prove beneficial; autumn crop prospects are good everywhere, and the harvest has begun in some districts. In the Punjab good rain fell in most districts; prospects continue favourable. General, and in parts heavy, rain has fallen in the Central Provinces; a break in the weather occurred towards the close of the week, which, if it lasts, will benefit cotton and other *kharif* crops; prospects are satisfactory. In British Burmah heavy rain fell during the week and floods have occurred in Bassein and Tharrawaddy; crops are doing very well. In Assam too there was heavy rain, especially in Sylhet, where some injury has been done to rice on low lands. In the other Provinces and States prospects remain good; but crops in Coorg are still suffering from excessive rain.

Prospects continue favourable throughout the Empire; harvest operations have commenced in some Provinces.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Sept. 6th)	·25 (average of 2 stations).	*Ragi* 19·88; early dry and wet crops thriving; sowing of cotton and horse-gram commenced.
Kurnool („ „)	1·23 (average of 8 stations).	*Ragi* 21·72; standing crops flourishing; cotton, white *cholum* and later *korra* being sown; early *korra* harvest begun in Sirvail taluk; prices fluctuating with falling tendency; pasture and water ample.
Ganjam („ „)	2·38 (average of 14 stations).	*Ragi* 19·24 seers per rupee.
Kistna („ „)	1·55 (average of 10 stations).	*Ragi* 20·82; 89 inches of water over anicut; standing crops generally doing well; *sazza* in ear; in parts of Bander, Repalli, and Guntur taluks *sazza* and maize harvested, outturn ¼ to ¾.
Chingleput (Madras) („ „)	·70 (average of 11 stations).	*Ragi* 17·96; crops good; ploughing and sowing going on; harvest outturn ½ to ¾; pasturage abundant.
Coimbatore ...	1·50 (average of 16 stations).	*Ragi* 21·22; standing crops generally good, withering on account of deficient rainfall in 4 taluks; harvest of some dry crops, outturn ½ to ¾.
Tanjore (Sept. 6th)	1·67 (average of 13 stations).	*Ragi* 17·36; crops good; harvest of *cholum*, *cumboo* and oil-seeds, outturn ½ to full.
Madura ...	1·86 (average of 9 stations).	*Ragi* 17·73.
Malabar (Sept. 6th)	3·57 (average of 14 stations).	*Ragi* 19·38; pasture good; harvesting of first crop commenced in 8 taluks.
Travancore ...	...	No report received.
		General Remarks.—General prospects favourable.
Bombay (Sept. 10th)—		
Kurrachee ...	Mirpur Batoro ·50, Keti ·51, Sehwan ·05.	River at Kotri on 7th 19 feet 5½ inches,—last year 19 feet 1½ inch; some damage from floods in Jerruck and Shâhbandar divisions, and from locusts in Kotri taluka; river encroaching on town of Keti.
Hyderabad ...	·70 in Mohbat Dero Jatoi.	River fallen one foot; locusts doing damage in 4 talukas; weaver birds damaging crops in Mirpur.
Ahmedabad ...	4·73	Total rainfall 31·63; crops excellent; fever prevailing.
Baroda ...	6·62	Total rainfall 49·35; break since the 7th; prospects good.
Surat ...	1·73	Total rainfall 33·28; good break since the 7th; crops healthy; cholera at Surat, Jalálpor and Bulsar, a few deaths.
Násik ...	Slight occasional showers.	Bright weather; crops good everywhere; prices stationary.
Colaba (Bombay) ...	·20	Total rainfall 56·07, being 5·74 below average; weather fine; temperature and wind normal.
Poona (Sept. 7th) ...	Under ·67	Rain wanted at Sirur and Bhimthari; *shalu* sowing commenced in Indápur and Haveli.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	·95 at Newasa, ·86 Sheogaon; very little or no rain in other talukas.	*Kharif* crops good; *rabi* sowing commenced in four talukas; injury from rats in 4, and cholera (with a few deaths) in 3 talukas.
Sholapore ...	...	Report not received.
Dharwar ...	...	Report not received.
Kanara ...	·96 at Karwar; maximum 11·10 at Honore.	Total rainfall 113·47; rice crop coming into ear on coast.
Rajkot ...	·72	Total rainfall 26·06; crops very good; health generally good. *General Remarks.*—Prospects of crops generally excellent; cholera ceased in Kurrachee, but continues in Surat and Ahmednagar.
Bengal (Sept. 10th)—		
Chittagong ...	...	Report not received.
Dacca ...	3·45	Floods still at a high level; *amun* prospects favourable except in a portion in south, where loss nearly complete; numbers gratuitously relieved increasing; more alms-houses being opened; few cholera cases in town.
24-Pergunnahs (Calcutta)	1·68	Prospects very fair; transplantation not yet complete; public health generally good.
Moorshedabad ...	3·44	*Aus* in low lands in north and east of district almost destroyed; *amun* plants thriving in parts; average price of common rice 11 seers per rupee; principal marts stocked with sufficient food-grains; health generally good; assistance being given by zamindars and other persons to those who come for relief.
Rajshahye ...	3·88; moderate rain all over district.	*Aus* being cut, yield about twelve annas generally, though in inundated parts not more than 2 to 4 annas; jute an 8-anna crop; *amun* promises very well except in inundated tracts; river falling and floods subsiding; rice 10 to 12 seers a rupee; public health good; a good deal of distress, but landholders generally have postponed collection of present demands where necessary.
Burdwan ...	1·38; rain general ...	Prospects of crops improved but not not yet good except in Culna and Cutwa sub-divisions and thana Jehanabad; public health generally good.
Rungpore ...	14·33; continuous rain during week.	Prospects of crops very favourable; common rice 11 seers per rupee; public health good.
Bhágalpur ...	1·91	Sunshine badly wanted; paddy on low lands swamped; Ganges again rising; newly sown *kalai* in danger; coarse rice 12 seers per rupee; cholera in south still bad.
Purneah ...	18·15	*Bhadoi* splendid in high lands, that in riparian tracts destroyed; *aghani* in south of district destroyed, elsewhere excellent; constant rain prevents progress of farming operations; rice 15 seers a rupee; health good; Purneah rivers all in high flood.
Patna ...	Copious fall of rain	Rice and *rabi* prospects excellent.
Durbhanga ...	3·26	Paddy promises well; *bhadoi* where unflooded will yield average outturn; rice 9 to 12 seers per rupee.
Hazáribágh ...	·73	Prospects of rice excellent, *bhadoi* fair; rice 16 to 18 seers a rupee; general health good.
Cuttack ...	·93	Prospects of crops fair except in 4 chaklas of Injajpore and 4 small pergunnahs in Kendrapara; *bialí* being cut, 8 annas yield expected; common rice 13 seers; prices rising; health fair; a sort of insect, produced probably by floods, injuring crops in some places. *General Remarks.*—Rain in all districts; prospects improved in Burdwan division and Balasore, but more rain still required in these places; *bhadoi* in many places destroyed by inundation; some *amun* also destroyed in places, but the crop on the whole promises fairly; good *rabi* crop expected on inundated tracts.
N.-W. P. and Oudh—		
Benares (Sept. 9th)	1·9 (average)	Total rainfall since 1st June 32·0; continued rain; prospects good; health fair; prices stationary.
Allahabad („ „)	2·8 (average)	Since 1st June 27·6; high westerly winds for two days with heavy rain; break wanted; wheat 14·$\frac{9}{6}$ seers; health good; some cattle-disease.
Gorakhpur („ 8th)	1·2	Total rainfall 51·0; weather seasonable; early rice being cut; prospects good.
Jhansi („ 11th)	3·6	Crops generally good; prices stationary; cholera prevailing; good deal of fever about; some damage done in places owing to excessive rain.
Agra („ 9th)	3·8 (average)	*Kharif* prospects good, but in five parganas *bajra* is injured from heavy rain; fever and ague still bad.
Bareilly („ 10th)	Several heavy falls of rain since Saturday.	Break continuous during early part of week; crop prospects, except of rice, indifferent; health good.
Meerut („ „)	3·1	Weather clearing; wind westerly; fever and ague still bad, and cattle-disease continues; cheapest wheat 17½, barley 25, gram and *bajra* 18, *jowar* 22 seers.
Kumaun („ 8th)	...	Seasonable weather; millets and rice being cut in places.
Lucknow („ 10th)	4·5	Barley 22 seers.
Partabgarh („ 8th)	Sadr ... ·55 Khunda ... 3·4 Patti ... ·8	Rain moderate, except in Khunda, where preparation of fields for *rabi* sowings have been retarded from the rain; *kharif* prospects good everywhere and health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—*continued.*		
Sitapur (Sept. 10th)	2·5	Continuous rain causing damage; prices steady; health good.
Fyzabad („ „)	4·9	Public health good. *General Remarks.*—Rain in every district; some damage caused in Sitapur, Bareilly, Agra, and Jhansi from excessive rain; harvest being cut in places; a break wanted; health generally good except in Meerut and Agra, where there is fever and ague, and Jhansi, where there is cholera and fever; some cattle-disease in Meerut and Allahabad.
Punjab (Sept. 9th)—		
Delhi ...	2·6	Agricultural prospects still favourable; prices steady.
Hissar ...	·5	*Kharif* progressing favourably; *rabi* sowings commenced; prices falling; *bajra* 24 seers; fever about.
Umballa ...	*Nil*	Agricultural prospects and health good.
Jullundur ...	1·3	Crops very promising; health good; prices falling.
Lahore ...	2·2	Prices falling; cholera almost disappeared.
Ferozepore ...	2·0	Agricultural prospects good.
Siálkot ...	·1	
Ráwalpindi ...	Slight rain	Agricultural prospects good; a few cases of cholera still.
Peshawar ...	*Nil*	Harvest prospects fairly good.
Mooltan ...	*Nil*	Crops fair; health good; prices steady.
Dera Ismail Khan ...	*Nil*	Health good; agricultural prospects fair. *General Remarks.*—Reports throughout the Province continue favourable.
Central Provinces—		
Nágpur (Sept. 10th)	·2	*Jowar* and cotton improving by present break; prospects favourable; health good.
Jubbulpore ...	4·35	Break required for cotton; other crops excellent; few cases of small-pox; prices stationary.
Saugor ...	·83	Prolonged break required for cotton and millets, other *kharif* crops flourishing; slight small-pox; prices declining.
Seoni ...	1·72	Lesser millets being reaped; few cases of cholera.
Hoshangabad ...	4·84	Cotton doing well; *jowar* suffering from excessive moisture; prices rising.
Raipur (Sept. 6th)	3·19	Cotton slightly injured, all other *kharif* crops doing well; cholera and small-pox continue; prices slightly fallen.
Sambalpur („ 5th)	2·19	Prospects very good; small-pox and cholera continue. *General Remarks.*—There has been a break towards end of week which if continued will benefit cotton and millets; all other crops doing well; prospects generally good.
British Burma—(Sept. 10th)—		
Akyab ...	5·06	Total rainfall 187·78; public health and agricultural prospects good.
Rangoon ...	4·94	Total rainfall 76·23; public health fair; crops generally flourishing; slight flooding in some places, but water subsiding; slight cattle-disease.
Bassein ...	2·75	Total rainfall 67·59; public health good; slight cattle-disease; floods excessive near west Ngawoon embankment; agricultural operations progressing elsewhere, though somewhat restricted for want of plough cattle.
Prome ...	3·45	Total rainfall 31·25; slight cholera and small-pox in town, otherwise public health good.
Amherst (Moulmein) ...	6·56	Total rainfall 128·50; public health good; slight cattle-disease; crop prospects good.
Toungoo ...	6·46	Total rainfall 58·92; public health good; no cattle-disease. *General Remarks.*—Slight cholera and small-pox in Kyoukphyoo district, otherwise public health satisfactory; very slight cattle-disease; heavy floods in Bassein and Tharrawaddy districts; crops doing very well.
Assam—		
Gauháti (Sept. 10th)	4·56	Weather seasonable; prospects of crops favourable; transplanting of *sali* in rapid progress.
Sylhet ...	15·57	Excessive rain and rise of river has done some injury to low-lying rice.
Cachar (Sept. 9th)	Showers	Cloudy; prospects of rice crops continue very good; common rice about 10 seers a rupee; public health fair.
Dibrugarh („ 10th)	6·27; continuous rain for last two days.	Prospects of crops generally good; weather unfavourable for tea; small-pox reports from one village; fevers also prevalent; cattle-disease continues north bank of Brahmaputra.
Berar & Hyderabad—(Sept. 8th)—		
Amráoti ...	·75	There has been a partial break in the weather; prospects good.
Akola ...	1·35	Crops progressing favourably.
Hyderabad ...	4·46; Aurungabad 1·5; Gulburgah 1·68; *nil* at Raichor and Lingsugar	Total rainfall at Hyderabad 30·4; agricultural prospects bright and public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg (Sept. 10th)—		
Bangalore ...	1·46	Crops suffering in parts from excessive rain; heavy rain causing damage in Coorg; elsewhere prospects of season favourable; public health generally good.
Mysore ...	1·75	
Mercara ...	4·52	
Central India States (Sept. 10th)—		
Indore ...	2·73	Crops and prospects excellent; wheat 9 seers, gram 9 seers 9 chittaks.
Morar (Gwalior) ...	4·49	
Sutna ...	1·66	Health and prospects good; *jowar* 18 seers.
Rutlam ...	·99	Weather clear; health and prospects good.
Neemuch ...	2·79	Season and crops excellent.
Goona ...	5·29	Crops flourishing; health good; wheat 15 seers.
Bhopal ...	2·35 in Sehore	Prospects of crops good.
Ágar ...	3·35	Health good.
Nowgong ...	2·39	
Mánpur ...	3·80	Reaping of *mukha* crops commenced; *jowari* crops generally good.
Rajputana—		
Abu (Sept. 10th)	2·02	Cloudy and windy.
Serohi („ 7th)	1·1	Tanks and wells good; health fair and improving; crops very good; cool, occasionally cloudy and muggy.
Marwar (Aug. 30th)	1·02	Health good; rainfall sufficient for crops; prospects favourable; prices falling.
Meywar (Sept. 5th)	5·2	Tanks, wells, and prospects good; fever prevalent; break required.
Harowtee („ 6th)	1·09 in Deoli; 4·79 in Kotah; 1·31 in Tonk.	Fever prevalent; prospects fair, except Indian-corn; weather improved.
Jhallawar („ 4th)	1·18	Health good; prices moderate; cloudy; much rain around; break necessary.
Ajmere („ 10th)	1·78	Break most opportune; prospects good; maize injured in low-lying spots; health fair.
Jeypore ...	2·12	Timely sunshine since Monday; prospects good; fever prevalent.
Bhurtpur (Sept. 9th)	2·5	Some places excessive rain has injured crops; ague unabated.
Ulwur („ 10th)	1·09 (average)	Prospects good; fever very prevalent.
Nepal (Sept. 2nd)—		
Katmandú ...	2·016	Total rainfall 47·762; cholera abating; agricultural prospects satisfactory.

SUPPLEMENT TO

The Gazette of India.

No. 38. CALCUTTA, SATURDAY, SEPTEMBER 20, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

ASSIMILATION OF THE CURRENCY OF RÉUNION TO THAT OF FRANCE.

No. 1678, dated Fort William, the 18th September 1879.

ORDER—*By the Government of India, Department of Finance and Commerce.*

Read—

A Despatch from the Right Hon'ble the Secretary of State for India, No. 280, dated the 31st July 1879, and enclosures, relative to the assimilation of the currency of Réunion to that of France—

No. 280, dated India Office, London, the 31st July 1879.

From—The Right Hon'ble the Secretary of State for India,
To—The Government of India.

I forward herewith, for your information, a copy of a letter from the Foreign Office, and of the Decree of the President of the French Republic, and of the Government Arrêté, therein referred to, relative to the assimilation of the currency of Réunion to that of France.

Dated Foreign Office, the 30th June 1879.

From—JULIAN PAUNCEFOTE, Esq.,
To—The Under Secretary of State for India.

I am directed by Her Majesty's Secretary of State for Foreign Affairs to transmit to you, to be laid before the Secretary of State for India in Council, a copy, which has been received from the Acting British Consul at Réunion, of a Decree of the President of the French Republic, and of a Government Arrêté relative to the assimilation of the currency of the Colony to that of the mother country.

Sur le rapport de l'Ordonnateur et du Directeur de l'intérieur, De l'avis du Conseil privé,
Avons Arrêté et arrêtons,

Article 1er.—Les espèces démonétisées en vertu du décret du 2 Avril 1879 sus-visé, continueront d'être reçues en paiement dans les caisses publiques jusqu'au 31 Mai 1879 inclusivement.

Elles seront également reçues à titre d'échange dans les dites caisses contre de la monnaie nationale et des billets de la Banque Coloniale, pendant un délai qui commencera à courir à partir du 12 Mai 1879 et prendra fin le 31 du même mois.

Article 2.—Ne seront admises à l'échange pour leur valeur nominale que les monnaies qui avaient cours légal au moment de la promulgation du décret précité.

Toutefois, seront échangées et aux mêmes conditions les roupies frappées postérieurement à celles tarifées par l'arrêté du 12 Decembre 1848 et qu'on a toujours admises sans distinctions dans les caisses publiques.

Article 3.—Cet échange sera opéré tous les jours du 12 au 31 Mai 1879 inclusivement de 8 à 10 heures du matin et de midi à 4 heures du soir, dans les diverses caisses publiques ci-après désignées, savoir :

A Saint-Denis, chez le Trésorier payeur, le percepteur des contributions et les receveurs de l'enrégistrement des actes civils et judicaires ;

A Saint-Paul, chez le trésorier particulier et le percepteur des contributions ;

A Saint-Pierre et à Saint-Benoit, chez les percepteurs des contributions et les receveurs de l'enrégistrement ;

A Sainte-Marie, Sainte-Rose et Saint-Philippe, chez les receveurs des postes ;

A Salazie et à la Plaine des Palmistes, chez les receveurs municipaux ;

Et dans les autres Communes de l'Ile, chez les percepteurs des contributions.

Article 4.—A partir de la publication du présent arrêté, toutes les monnaies étrangères qui viendraient à être importées dans la Colonie, seront déposées dans les entrepôts des Douanes d'où elles ne pourront être retirées qu'à partir du 1er Juin 1879, si, jusque là, elles n'ont été ré-exportées par leurs propriétaires.

Article 5.—L'Ordonnateur et le Directeur de l'intérieur sont chargés, chacun en ce qui le concerne, de l'exécution du présent arrêté qui sera publié, inséré au Bulletin Officiel de la Colonie et déposé au Secretariat du Gouvernment.

CUINIER.

St. Denis, le 5 Mai 1879.

Par le Gouverneur,
L'Ordonnateur,
GILBERT PIERRE.

Le Directeur de l'Intérieur,
ED. MANÈS.

DÉCRET.

Le Président de la République.

Vu le sénatus consulte du 3 Mai 1854 qui règle la constitution des colonies de la Martinique, de la Guadeloupe et de la Réunion, et notamment les articles 6 §§ 10 et 8 ;

Sur le rapport du Ministre de la Marine et des Colonies et du Ministre des Finances ;

Le Conseil d'Etat entendu.

DÉCRÈTE :

Article 1er.—Seront promulgués à la Réunion les lois, décrets et ordonnances, relatifs au régime monétaire de la Métropole, et qui n'ont pas encore été mis en vigueur dans la dite Colonie.

Article 2.—Sont abrogées toutes dispositions contraires au présent décret, ainsi qu'aux lois, décrets et ordonnances sur le régime monétaire métropolitain, promulguées antérieurement ou à promulguer en conformité de l'art. 1er ci-dessus et notamment les ordonnances, décrets et arrêtés, portant fixation d'une valeur légale pour les monnaies étrangères.

Un arrêté du Gouverneur déterminera les conditions et les délais dans lesquels s'opérera le retrait des espèces démonétisées.

Article 3.—Le Ministre de la Marine et des Colonies et le Ministre des Finances sont chargés, chacun en ce qui le concerne, de l'exécution du présent décret, qui sera inséré au Bulletin des lois.

Fait à Paris, le 2 Avril 1879.

(Signé) JULES GRÉVY.

Par le Président de la Republique,
Le Ministre de la Marine et des Colonies,
(Signé) JAURÉGUIBERRY.

Le Ministre des Finances,
(Signé) LÉON SAY.

ORDERED, that these papers be published in the Supplement to the *Gazette of India*.

J. WESTLAND,
for *Secy. to the Govt. of India.*

DEPT. OF FINANCE AND COMMERCE,
STATISTICAL BRANCH,
The [illegible] September 1879.

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th SEPTEMBER 1879.

GENERAL REMARKS.—In Madras rain fell in all districts; the harvest is progressing with a fair outturn; ploughing and sowing operations are proceeding for the *rabi* crops. In Bombay there was slight rain; more is required in the Deccan for *rabi* sowings; locusts are still doing injury in parts of Sind, and rats in the Deccan; the *kharif* crops are excellent; the harvest has begun in Sind. The rainfall in Bengal was general and heavy in the north and Behar, in the Purneah District almost 8 inches fell during the week; prospects continue to improve in Burdwan; floods are abating in Dacca, but distress still continues there; the *bhadoi* crop has been much injured by inundations, but the prospects of the *amun* are promising. In the North-Western Provinces and Oudh slight rain fell in some districts in the early part of the week, but a break has occurred since, and there is every appearance of the rains having come to a close; prospects are excellent. In the Punjab also the rainfall was slight in a few of the districts; prospects are favourable throughout the province. A clear week has done good in the Central Provinces to the cotton and *jowar* crops which were injured by previous continuous rain; prospects are good. In Burma there was general, and in parts heavy, rain; much damage is reported to have been done by floods in the Tharrawaddy District; crops are promising. In Assam and the other Provinces and States prospects continue good; and in Coorg where the crops were suffering owing to heavy rain, there has been an improvement.

The rain has been much less than in the previous week, and the rainy season in many places seems to be closing. Prospects are on the whole good throughout the Empire. In parts, the harvest has begun.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Bellary	(Sept. 13th)	2·02	*Ragi* 19·94; early dry and wet crops thriving; cultivation of first crop paddy still proceeding in some places; sowing of cotton and horse-gram commenced.
Kurnool	(„ 14th)	·98 (average of 6 stations).	*Ragi* 23·20; prices stationary; pasture and water abundant; crops reported fading in Markapur owing to insufficient rain, elsewhere thriving; cotton and later *korra* being sown.
Ganjam	(„ 13th)	1·04 (average of 13 stations).	*Ragi* 19·97.
Kistna	(„ „)	·86 (average of 7 stations).	*Ragi* 22·23; 48 inches water over anicut; *jonna*, tobacco, cotton and castor being sown; standing crops doing well; *gidda jonna* and *korra* in ear; *sazza* and maize being harvested in some localities.
Chinglepit (Madras)	(„ „)	1·37 (average of 12 stations).	*Ragi* 19·16; crops good; ploughing and sowing going on; harvest outturn ¼ to ¾; pasturage abundant.
Coimbatore	(„ „)	1·72 (average of 14 stations).	*Ragi* 22·60; standing crops generally good; deficient rain in 3 taluks; harvest of some dry crops in 4 taluks, outturn ¼ to ¾.
Tanjore	(Sept. 16th)	3·78 (average of 13 stations).	*Ragi* 17·49; crops good; harvest of *kar, cholum, ragi, cumboo* and oil-seeds, outturn half to full.
Madura	(„ 13th)	1·32 (average of 12 stations).	Ragi 17·82.
Malabar	(„ „)	2·89 (average of 14 stations).	*Ragi* 18·75; pasture good; harvesting of first crop commenced in 9 taluks.
Travancore	...	...	No report received. *General Remarks.*—General prospects favourable.
Bombay (Sept. 17th)—			
Kurrachee	...	...	River at Kotri on 13th,—15¾ feet, last year 18 feet 11 inches; some damage to *kharif* anticipated in Sehwan from sudden fall in river; salt-water encroaching in Shahbandar; fever and cattle-disease prevalent.
Hyderabad	...	...	Crops everywhere good; reaping commenced in Guni; locusts in six talukas; fever prevalent; river greatly fallen; want of water complained of in Kandiaro, Naushahro, Moro and Guni.
Ahmedabad	...	·14	Total rainfall 31·77; crops excellent; fever prevailing; slight cholera in city.
Baroda	...	·40	Total rainfall 49·75; fever prevalent in city; cholera broken out in one town in interior; crops good; prices stationary.
Surat	...	·54	Total rainfall 33·82; break continued; crops good; cholera in Jalálpor.
Násik	...	...	Crops good; favourable weather continues; slight cholera; prices somewhat risen.
Colaba (Bombay)	...	·60	Total rainfall 56·67, being 7·60 below average; weather fine; temperature normal.
Poona (Sept. 14th)	...	Maximum in Mawal 1·88; minimum in Indapur ·021.	Rain wanted throughout district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	Slight rain in some talukas.	More rain wanted; *kharif* crops good; *rabi* sowing delayed for want of rain in 4 talukas; injury from rats in parts of 4 talukas; cholera in 4 talukas.
Sholapore ...	...	Crops generally good, excepting in Sángola, where damaged by previous excessive rain; break continuing, but rain now desirable; rats doing damage in places; condition of poor slightly improving.
Dharwar ...	·62 (average)	Crops good; cotton sowing progressing; damage by rats decreasing.
Kanara ...	Maximum 2·70 at Karwar, minimum ·90 at Sirsi.	Total rainfall 116·17; rice harvest commenced in Karwar taluka; cattle-disease in Honáwar and Mundgod; fever prevalent.
Rajkot ...	·24	Total rainfall 26·30; crops very good; fever prevalent; cholera in Nawánagar. *General Remarks.*—*Kharif* crops generally excellent; but rain required in Deccan for *rabi* sowings; cholera exists slightly in several districts of Guzerat and Deccan.
Bengal (Sept. 17th)—		
Chittagong ...	1·27	Weather close and oppressive; *aus* harvest nearly complete, outturn good; transplantation still continues; crops doing well.
Dacca ...	3·14	Floods slightly falling; fifteen public alms-houses opened, five private ones; distress continues; *amun* promising, except where totally lost in south; public health good; rice second quality twelve seers a rupee.
24-Pergunnahs (Calcutta)	2 37	*Aus* being reaped, a full average crop; *amun* prospects fair; average price of common rice ten seers per rupee; fever in places; public health fair.
Moorshedabad ...	4·51	Small quantity of *aus* saved from flood being reaped; continued rain and cloudy weather likely to injure *amun* plants and *kalai* lately sown; average price of common rice eleven seers; fever in places; public health generally good; most zemindars assisting their ryots with money and grain; river falling daily.
Rajshahye ...	9·05	Heavy rain throughout district; *aus* being cut generally; one-fourth of this crop destroyed, but in Puttia and north of Charghat loss from eight to fourteen annas; jute nearly all cut, about half of this crop damaged; about one-fourth of *amun* destroyed, remainder promises a full yield; *ganja* cultivation progressing; common rice 10 to 13 seers; fever as usual at this time of the year; public health good; no present necessity for relief works; river falling slowly.
Burdwan ...	1·93	Prospects of crops improved by seasonable rain; general health good.
Rungpore ...	5·15	Weather showery; crops very satisfactory; public health good.
Bhágalpur ...	4·47	Ganges still in high flood; *kalai* destroyed; cholera ceasing; common rice 13 seers.
Purneah ...	37·96	Reports hitherto very favorable; nearly 36 inches of rain on the 13th instant; effects not reported, but as water has run off very freely it is hoped little or no damage done; farming operations delayed by heavy rain; price of rice 12 to 14 seers, wheat 13 to 15; a tendency to higher prices; health good; rivers in great flood.
Patna ...	3·39	Rice prospects excellent; heavy local rain; Ganges again falling.
Durbhanga ...	6·70	Comla in flood for third time; paddy promises well; other crops average; price of rice stationary; public health good.
Hazáribágh ...	2·37	All crops promising; prices stationary, with tendency to fall; general health good.
Cuttack ...	1·02	Transplantation and weeding of *sarudh* going on, but prospects not favorable in parts of 8 chucklas owing to injuries done by insects; *biali* yield will also be affected; rice 14 seers; a few cholera cases. *General Remarks.*—Rain general, heavy in Northern Bengal and Behar; prospects in the Burdwan division have somewhat improved, but rain rather too late for transplantation in some places; in Midnapore and Balasore rain is still wanted; *bhadoi* has been greatly injured, but the crop where not flooded is yielding fairly; *amun* prospects are generally promising, except where it has been destroyed by inundation; insects are doing some injury to young *amun* in Cuttack, Pooree, and Sarun.
N.-W. P. and Oudh— (Sept. 17th).		
Benares (Sept. 16th)	3·0	A fine hot break since Saturday; prospects good.
Allahabad („ „)	1·6 (average)	Total rainfall since 1st June 29·2; every appearance of close of rains; wheat 14½ seers for the rupee; some fever; health good.
Gorakhpur („ 17th)	12·3	Total rainfall 63·7; fall of 11 inches on Wednesday, cause of heavy floods in south-west; seasonable break followed; prospects good; health fair.
Jhansi („ „)	*Nil*	Weather clear; crops generally flourishing; prices of minor grains falling; cholera abating; fever still prevalent.
Agra („ 16th)	·1	Crops ripening; prospects good; clear weather; fever and ague still bad.
Bareilly („ 17th)	...	Rains seem to be over; sky cloudless; fresh wind from west; health good.
Meerut („ „)	*Nil*	Weather clear; wind westerly; crop prospects splendid; fever and ague still bad; cattle-disease abating; sporadic cholera at Hauper and Sirdhana; wheat 17, *bajra* 19, and *jowar* 22 seers.
Kumaun („ 16th)	...	Weather clear; millets and rice being cut in places.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—*continued.*		
Lucknow (Sept. 17th)	·5	Barley 22 seers; weather fine; prospects good.
Partabgarh („ 15th)	2·8	The heavy rain in earlier part of week has been succeeded by a break of four days, or damage would have ensued; *sawan*, *makra* and *kakun* have mostly been reaped and the *kooari* paddy is beginning to be cut; slight cattle-disease.
Sitapur („ 17th)	...	Favourable break; prospects and health good.
Fyzabad („ „)	·7	Prospects continue good. *General Remarks.*—Rain in some districts in early part of week, since then a seasonable break; prospects excellent; health generally good, except in Agra, Meerut, and Jhansi, where fever is still prevalent; cattle-disease reported from Partabgarh; cholera abating and prices falling in Jhansi.
Punjab (Sept. 16th)—		
Delhi ...	*Nil*	Prospects favourable; fever prevalent.
Hissar ...	1·0	Crops progressing favourably; *rabi* operations going on rapidly; prices still falling; fever prevalent.
Umballa ...	*Nil*	Agricultural prospects and health good.
Jullundur ...	*Nil*	Crops very promising and prices falling; health good.
Lahore ...	*Nil*	Prices steady; health generally good, but few cases of cholera.
Ferozepore ...	·1	Agricultural prospects good.
Siálkot ...	·2	
Ráwalpindi ...	2·5	Agricultural prospects good; fever very prevalent.
Peshâwar ...	*Nil*	Harvest prospects fair, but prices have risen.
Mooltan ...	*Nil*	Crops fair; prices steady.
Dera Ismail Khan ...	*Nil*	Prospects fair; health good. *General Remarks.*—Agricultural prospects throughout the Province favourable.
Central Provinces—		
Nágpur (Sept. 17th)	.....	*Jowar* and cotton greatly improved by break; prospects good.
Jubbulpore ...	·05	Crops excellent; prospects of cotton brightening; small-pox continues; prices falling.
Saugor ...	.....	Clear, with bright sunshine; cotton thriving; other crops progressing; small-pox continues; prices stationary.
Seoni ...	.....	Cool; break continues; cotton improved; other crops good; few cases of cholera.
Hoshangabad ...	·37	Cotton and other crops good; prices stationary.
Raipur (Sept. 13th)	·58	All crops doing well; cholera and small-pox continue; prices stationary.
Sambalpur („ 12th)	·55	Break beneficial; all crops good; cholera and small-pox continue; prices steady. *General Remarks.*—A clear week with bright sunshine and occasional clouds; cotton and *jowar* where injured by continuous rain in previous weeks improving; prospects of all crops generally good.
British Burma— (Sept. 17th)—		
Akyab ...	6·42	Total rainfall 194·21; public health good; slight cattle-disease; agricultural prospects favourable.
Rangoon ...	2·62	Total rainfall 78·85; public health good; slight fever prevalent; cattle-disease very slight; a little damage done to crops by floods in three sub-divisions.
Bassein ...	4·18	Total rainfall 71·77; public health good; slight cattle-disease; lands west of Ngawoon and four circles on the east still under water; ploughing and transplanting continue in other parts.
Prome ...	1·15	Total rainfall 32·40; slight cholera and small-pox in Prome town, otherwise public health good; crop prospects generally excellent.
Amherst (Moulmein) ...	9·93	Total rainfall 138·43; public health good; cattle-disease very slight; crops good.
Toungoo ...	1·8	Total rainfall 60·31; public health good. *General Remarks.*—Crops generally healthy and very promising; floods in Tharrawaddy have caused much damage; river rising at Thyetmyo; sowing not yet finished in Thonkwa owing to floods; public health good; mild cholera and small-pox in parts; very slight cattle-disease.
Assam—		
Gauháti (Sept. 17th)	7·86	Weather seasonable; apprehensions entertained of damage to *sali* paddy on lands on account of the rising of the river again.
Sylhet („ „)	1·89	Prospects good.
Cachar („ 16th)	...	Season warm with rain at night; prospects of rice crops continue very good; common rice at 10 seers a rupee; public health fair.
Dibrugarh („ 17th)	2·03	Weather warm with occasional showers; general prospects of crops good; transplanting *sali* nearly finished; fevers continue; cattle-disease abated; no further report of small-pox.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Mysore and Coorg (Sept. 17th)–		
Bangalore ...	3·34	Crops generally in good condition; prospects improving in Coorg; public health generally good.
Mysore ...	1·93	
Mercara ...	4·39	
Berar & Hyderabad— (Sept. 17th)—		
Amráoti ...	...	Break continues; *jowari* has improved and cotton is now doing very well.
Akola ...	...	Crops generally excellent.
Hyderabad (Sept. 18th)	·28	Crops generally promising; *jowar* and pulse slightly affected by excessive rainfall in some districts; rats causing damage to crops in Naldrug and Shorapur but being destroyed; public health good.
Central India States (Sept. 17th)—		
Indore ...	2·75	Prospects continue excellent; last rain has insured water-supply for opium culture; food-prices still high; wheat 9 seers, gram 9 seers 9 chittaks.
Morar (Gwalior) ...	*Nil*	
Sutna ...	·02	Prospects good; *jowar* 17 seers.
Rutlam ...	·97	Health and prospects good.
Neemuch ...	·6	Crops are being gathered; prices falling.
Goona ...	*Nil*	Crops good; health fair; wheat 15 seers.
Bhopal ...	*Nil* at Schore	Prospects of crops good.
Ágar ...	2·05	Health good.
Nowgong ...	·96	
Mánpur ...	·55	Weather clear, with good sunshine; reaping of *mukka* crops continues.
Rajputana—		
Abu (Sept. 17th)	·84	Total rainfall 67·61; occasional clouds; break.
Serohi („ 14th)	...	Tanks and wells good; health fair, improving; crops good; rain wanted; season agreeable.
Marwar („ 6th)	·64	Health good; cloudy with showers; locusts in several districts; no damage; prospects favourable.
Meywar („ 12th)	·2	Tanks and wells good; fever still prevalent; good outturn expected.
Harowtee („ 13th)	·36 in Tonk and ·05 in Shahpura.	Prospects favourable; health fair.
Jhallawar („ 11th)	1·67	Cloudy; health good.
Ajmere („ 17th)	.....	Prospects excellent; fever prevalent.
Jeypore ...	.....	Favourable sunshine; prospects good; fever still prevalent.
Bhurtpur ...	.....	No report received.
Ulwur („ 16th)	2·85 (average)	Fine weather; prospects good.
Nepal—		
Katmandú (Sept. 9th)	1·006	Fair; cholera has again broken out.

C. BERNARD,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Thursday, the 11th September, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*

His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.

His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.

The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.

Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.

The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.

General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.

The Hon'ble Whitley Stokes, C.S.I., C.I.E.

The Hon'ble Rivers Thompson, C.S.I.

The Hon'ble T. H. Thornton, D.C.L., C.S.I.

The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.

The Hon'ble T. C. Hope, C.S.I.

The Hon'ble B. W. Colvin.

RANGOON PORT COMMISSIONERS BILL.

The Hon'ble MR. RIVERS THOMPSON moved that the Report of the Select Committee on the Bill to appoint Commissioners for the Port of Rangoon be taken into consideration. He said that the Bill, which was originally drafted by the Chief Commissioner of British Burma, had been subjected to careful revision by the Select Committee. The points in which amendments had been introduced referred chiefly to the exclusion of sections which formed part of the original draft, regarding which it had been found, on examination, that provision already existed in other Acts, and their repetition, therefore, in the present Bill was not necessary. These related to provisions connected with the Indian Ports Act of 1875 and to the section which conferred powers of borrowing money, which was provided for by the Local Authorities Loan Act passed in Council the other day. The amendments which the Select Committee thought desirable with reference to the exclusion of these sections had been fully accepted by the Chief Commissioner, as also other amendments, referring partly to the schedule of the Bill, which reserved from the jurisdiction of the Commissioners of the Port all lands which it was desirable to reserve connected with the defence of the Port, land required by the Railway and a small portion now in the possession of the Municipality. The rest of the land was made over to the jurisdiction of the Commissioners, with the balance now in the hands of the Strand Bank Committee, which would be applied for the purpose of carrying out the Port-trust. He believed that, if the Bill was passed, it would be one of great benefit to the Port of Rangoon.

The Motion was put and agreed to.

The Hon'ble MR. THOMPSON also moved that the Bill as amended be passed.

The Motion was put and agreed to.

TRANSPORT OF SALT BILL.

The Hon'ble MR. HOPE presented the final Report of the Select Committee on the Bill to restrict the transport of Salt by Sea.

RELIGIOUS CONGREGATIONS BILL.

The Hon'ble MR. STOKES presented a preliminary Report of the Selecs Committee on the Bill to provide for the holding of property by certain Religioue Congregations. He said that the Committee had extended the operation of tht Bill to property of every description held by religious bodies, and had added a section providing for a reference to the High Court in the event of doubt arising as to whether any person was a member of a religious body, or as to the validity of any appointment made under the Act. They had also added sections providing for the dissolution of the religious bodies to which the Bill applied, and for the disposal of their property when they were dissolved. Those changes were considered to be so important that the Committee had recommended that the Bill as amended be published.

The Council adjourned to Thursday, the 25th September, 1879.

SIMLA;
The 11th September, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

In the Bulandshahr division, the additional area shown this month should have been shown last month: there has been no irrigation during the month.

The reason why some of the divisions show an excess instead of expenditure of water is that a large volume of drainage water enters the canal during July, owing to the heavy rains while the consumption was practically nil, except in one or two divisions and in them only for a few days of the month. The canal was kept running chiefly on account of navigation.

Lower Ganges Canal.—The canal was closed from the 11th July. The increase shown in Bhongaon division is due to a slight correction of last month's statement.

Eastern Jumna Canal.—

Water entering canal		1,201
Leaving ditto		137
Net consumption		1,064

Executive Engineer reports—Full demand in Saháranpur and Muzaffarnagar, slack in Meerut district.

Estimated full supply.	Gross Consumption, cubic feet per second. Actual average throughout.	Navigation Return Canal. Principal items of Traffic. Up.	Down.	Land Irrigated (approximate). Zila.	Acres.	Rainfall. Average.	During month.	Chief Crops (approximate). Name.	Area in acres.	REMARKS.
Bari Doab Canal. 1st Division	4·90	4·27	3073·60	1099·13	...	...	Gurdáspur ...	16,649	9·19	3·00	Cotton ...	20,532	2583·07 cubic feet per second entered at the head of the Bári Doáb Canal; of this 2552·65 cubic feet per second were utilized. There is an increase of 7,507 acres in comparison with the corresponding period of last year. This increase is partially due to want of rain and also to extended irrigation in the Pathanti Villages and to the new Kasur and Sobraon Branches. The demand for water was very great towards the end of the month.

RAILWAY.

COMPARISON OF THE RAJPOOTANA METRE-GAUGE RAILWAY WITH THE GREAT INDIAN PENINSULA, AND BOMBAY, BARODA AND CENTRAL INDIA STANDARD-GAUGE RAILWAYS.

No. 3967 R, dated Simla, the 20th September 1879.

The following is published for general information.

By Order,

ALEX. FRASER, *Major-General, R.E.*,
Secretary to the Government of India.

Note by MR. A. M. RENDEL, Consulting Engineer for State Railways, to the Secretary of State for India, on a "Comparison of the Rajpootana Metre-Gauge Railway with the Great Indian Peninsula and Bombay, Baroda, and Central India Standard-Gauge Railways," by MR. E. B. CARROLL, Locomotive Superintendent, Bombay, Baroda, and Central India Railway Company.

Mr. Carroll, the Locomotive Superintendent of the Bombay, Baroda, and Central India Railway, has issued, under date February 1879, a paper entitled "Comparison of the Rajpootana Metre-Gauge Railway with the Great Indian Peninsula and Bombay, Baroda, and Central India Standard-Gauge Railways," in which conclusions are arrived at very much to the disadvantage of the metre-gauge.

Being in a measure responsible for the adoption of the metre-gauge in India, I have perused this paper with some interest; and as it forms the foundation of a "memorial of the inhabitants of Bombay in public meeting assembled" to the Secretary of State, protesting against the line between Ahmedabad and Ajmere being made on that gauge, I propose to offer some remarks in reply.

For the purpose he had in view it was of course necessary for Mr. Carroll to state the conditions of a fair comparison. He commences, therefore, by saying that the Rajpootana having in 1877 been open throughout its entire length since 1875, "the result of the railway's working, that is, the cost of running its trains, of its maintenance, &c., ought now to be about as good as they are ever likely to be, and to form a perfectly fair basis of comparison with other railways"; and he then proceeds to lay the results obtained in working the Rajpootana in 1877 alongside those of the Great Indian Peninsula and the Bombay and Baroda *in the same year*.

If Mr. Carroll had looked back at the cost of working his own line and the Great Indian Peninsula in years bygone, he would have found that they were perhaps at their worst, so far as working cost is concerned, at that period of their existence at which he states a line should be at about its best.

Even so late as 1871, a year which showed a great improvement over previous years, he would have found the working cost of the Bombay and Baroda 6·39*s.* per train mile, against 4·84*s.* in 1877; of the Great Indian Peninsula 5·58*s.*, against 3·39*s.* in 1877. The East Indian, I may add, was 3·62*s.* in 1871, against 2·59*s.* in 1877.

As an expert he should know that, as a great portion of the working expenses of a railway is independent of the quantity of traffic it carries, the cost of transport upon it is highest when its traffic is least, that is, as a rule in its earliest years; and that its expenses per unit of traffic diminish as its traffic, or in other words as its age, increases. He should know, therefore, that he cannot draw a fair comparison between any two lines in the same year, unless that year satisfies the paramount condition, that the quantity of traffic on the lines compared was during that year approximately the same; and that, therefore, it is wholly unreasonable to compare the Rajpootana with the Great Indian Peninsula or Bombay and Baroda during a period when the goods traffic of the Great Indian Peninsula was six times, and that of the Bombay and Baroda three times, as great as, and when their passenger traffic was from 30 to 40 per cent. greater than that of, the Rajpootana.

A still graver error on Mr. Carroll's part is his selection of the *gross* ton mileage, that is, the freight and dead weight moved together, as his basis of comparison of working cost, instead of the *net* ton mileage, that is to say, the freight moved only. He does not even call attention to the fact that he is using the gross ton mileage, for he calls it simply ton mileage, and it is probable that his readers generally have hitherto supposed him to mean what is usually meant by ton mileage, namely, the net or freight.

Mr. Carroll must be perfectly well aware that economy of railway management is not to be judged by the cost of the effort made, that is to say, the number and weight of trains run, but by the cost of the effect produced, that is to say, the freight carried; and that a large diminution may be effected in the cost per *gross* ton moved by simply increasing the dead weight, though, of course, the cost per *net* ton, or ton of freight, would be much increased thereby. He must be aware that loud complaints have been made against the enormous proportion of dead to live weight moved upon railways in India; that it is, in fact, the crying evil of railways generally, much worse, indeed, in England than in India, and that to award the palm of merit to the line which shows the lowest cost per *gross* ton mile is very possibly to give it to the line which least deserves it.

Mr. Carroll's basis in this respect is so utterly fallacious that I shall not attempt to follow him through figures resting upon it. But I may point out that in Table 1 (Working Expenses and Profits) profits and the proportion which receipts bear to expenditure depend in a measure on the rates charged. This is not of much importance in the year Mr. Carroll has taken, but it is of very great importance in the years which I shall select for comparison.

Mr. Carroll's Tables 2 and 3 (Maintenance of Way and Locomotive), where based on the mile of railway maintained, and train mile, are not unfavourable even in 1877 to the Rajpootana; where based on what he calls ton mileage, meaning thereby gross ton mileage, they are vitiated by the fallacy of the basis on which they are founded.

His Table 4 (Carriage and Wagon) is favourable to the Rajpootana so far as the Great Indian Peninsula is concerned; unfavourable so far as the Bombay and Baroda is concerned. Mr. Carroll gets over this by declaring the Great Indian Peninsula charge abnormally high. I might with equal reason declare the Bombay and Baroda abnormally low. But the carriage and wagon department is comparatively a small one, and the probability is that this department of the Rajpootana was going through an experimental stage, which temporarily increased its cost. Moreover, the Government charges to Revenue many things which the Companies charge, I do not say improperly, to Capital.

As to Table 5 (Working Expenses, Total), the enormous variations between the two broad-gauge lines in the details, point to differences of circumstances which vitiate the whole.

As to Table 6 (Weight of Trains), the unit of traffic is not stated, and the Bombay and Baroda line goods load is put at 183·50 tons.

This must be an error. No Indian railway has yet reached this average load. The true load was, I believe, 123·5 tons. The error is repeated in Table 8.

Labour, however, is ill bestowed on figures based on thoroughly false assumptions, and I shall therefore now proceed to show that, taking fair bases of comparison, the metre-gauge on the Rajpootana line has already satisfied all that its promoters claimed for it, and that, though with more experience and larger traffic, better results may be looked for as years go on, it shows in 1878 a far greater measure of success than either the Great Indian Peninsula or the Bombay and Baroda at a much later period of their existence, and with a consequently much larger traffic.

I have first to establish a fair basis of comparison in respect to time. Mr. Carroll cannot object to my taking the Rajpootana at as late a period as possible, that is to say, for the year 1878. The returns for that year have just been received, and show, as might be expected, a great improvement over 1877, the traffic being much larger, and the working expenses being almost exactly the same as in 1877.

In the next place, I claim a right, to which he cannot object, to compare the Rajpootana with the Great Indian Peninsula and Bombay, Baroda, and Central India at periods when the traffic upon these lines was about the same as on the Rajpootana in 1878. To arrive, however, at such periods I must go back beyond the date from which I have the necessary materials for comparison. I am content, therefore, to accept for both the broad-gauge lines a year too favourable to them, namely, 1874. The traffic on both of them in that year, though much lower than in 1877, was still far ahead of the Rajpootana. I can afford, however, to concede to Mr. Carroll this advantage, for, at nearly every point, the Rajpootana in 1878 shows a clear superiority to both of them in 1874.

Lastly, I shall, of course, use the net ton mile as my standard of efficiency and economy.

The tables relating to 1874, prepared by me, and published by Mr. Danvers in his Report to the Secretary of State of the following year, have not only not been impugned, but their form has been adopted and continued in following years by the Great Indian Peninsula and other Companies. I am therefore justified in using them here as correct, and shall proceed to do so, adding to them other data derived from them, to which I desire to call attention. I should state that, in regard to the sums which I have put down as the capital expenditure on the three lines, the cost of the broad-gauge lines is taken from Mr. Danvers' Report for 1874, and that of the narrow gauge from its last year's accounts, that I omit from the narrow-gauge Capital the cost of land, because land is not included in the broad-gauge Capital, and that I have converted rupees into sterling at 1*s.* 10*d.*, that being the rate of conversion in the broad-gauge accounts.

I make, then, the following comparison :—

CAPITAL.

Cost and Profit.	Great Indian Peninsula, in 1874.	Bombay, Baroda, and Central India, in 1874.	Rajpootana, in 1878.
Average length open in year	Miles. 1266	Miles. 424	Miles. 416½
(1.) Capital cost to end of year named	£ 23,084,484	£ 7,833,223	£ 2,660,000 (for 428½ miles).
(2.) Cost per mile of line	£ 18,240	£ 18,480	£ 6,215
(3.) Net revenue required to pay 5 per cent. interest per mile.	£ 912	£ 924	£ 311
(4.) Actual net revenue per mile earned in years taken.	£ 622	£ 590	£ 250
(5.) Actual percentage on capital which was given thereby.	Per cent. 3·4	Per cent. 3·14	Per cent. 4
(6.) Net revenue per mile which would have been earned on the traffic carried, if all three lines had charged Great Indian Peninsula average rates.	£ 622	£ 700	£ 536
(7.) Percentage of profit on capital which would have been given thereby.	Per cent. 3·4	Per cent. 3·75	Per cent. 8·6

(6) and (7) assume, of course, that the quantity of traffic and the profit upon it would not have been affected by the increase of rates on the Bombay and Baroda and the Rajpootana.

Note.—Some expenditure has yet to be incurred on the Rajpootana for fencing, &c., but, on the other hand, its cost was greatly enhanced by the permanent-way materials, rolling-stock, and plant generally having been purchased in England when such materials were at the highest prices ever known. This alone added at least 500*l.* a mile to the cost of the Rajpootana.

REVENUE.

A.

Passenger Traffic.	Great Indian Peninsula, in 1874.	Bombay, Baroda, and Central India, in 1874.	Rajpootana, in 1878.
(8.) Receipts from passenger traffic	£ 438,544	£ 203,382	£ 75,457
(9.) Passenger train miles run	No. 1,467,561	No. 482,605	No. 400,544
(10.) Average passenger train mile receipts	*s. d.* 5 11¾	*s. d.* 8 5	*s. d.* 3 9¼ (Note the average fares charged.)
(11.) Number of passengers carried one mile	No. 254,228,546	No. 137,490,000	No. 79,024,000
(12.) Average sums received for carrying a passenger one mile.	*d.* ·414	*d.* ·355	*d.* ·227
(13.) Average number of passengers in a train at one time.	No. 173	No. 285	No. 197
(14.) Average number of passenger trains per diem each way, supposing each train to traverse the whole line open.	No. 1·59	No. 1·56	No. 1·32
(15.) Average number of passengers passing over each mile of line daily (both ways).	No. 550	No. 888	No. 520
(16.) Number of passenger vehicles run one mile in year.	No. 20,071,392	No. 4,234,639	No. 7,610,336
(17.) Average number of passenger vehicles in a passenger train.	No. 13·7	No. 8·8	No. 19
(18.) Average number of passengers in each vehicle; average capacity of carriages.	No. 12·66 say 50?	No. 32·5 say 70?	No. 10·4 say 30?
(19.) Total working expenses for both goods and passengers, deducting special and miscellaneous receipts from them.	£ 1,020,398	£ 257,767	£ 160,790
(20.) Average working expenditure per mile of open line.	£ 806	£ 608	£ 386

REVENUE —*continued.*

Passenger Traffic.	Great Indian Peninsula, in 1874.	Bombay, Baroda, and Central India, in 1874.	Rajpootana, in 1878.
(21.) Average cost of running a train one mile, passenger and goods miles assumed to cost the same.	*s. d.* 5 2½	*s. d.* 5 3	*s. d.* 3 2¾
(22.) Average cost of carrying a passenger vehicle with its load one mile.	*d.* 4·55	*d.* 7·16	*d.* 2·07
(23.) Average cost per gross ton mile moved, taking broad-gauge carriages to weigh 8 tons, narrow, 4 tons, and passengers 12 to ton (approximate).	*d.* ·5	*d.* ·65	*d.* ·4
(24.) Average cost of carrying a passenger one mile	*d.* ·36	*d.* ·221	*d.* ·197
(25.) Average weight of passenger trains (approximate).	Tons. 123	Tons. 94	Tons. 90
(26.) Proportion of line weight of passenger trains to total load (approximate).	12/100	25/100	16·5/100

Note.—That the cost of carrying passenger traffic, gross and net, is lowest on the Rajpootana, and that the proportion of net to gross passenger load, though best on the Bombay, Baroda, and Central India, is far worse on the Great Indian Peninsula than on the Rajpootana. The superiority of the Bombay, Baroda, and Central India in this respect is probably owing to the double-storied carriages in use on that line.

B.

Goods Traffic.	Great Indian Peninsula, in 1874.	Bombay, Baroda, and Central India, in 1874.	Rajpootana, in 1878.
Average length open in year	Miles. 1,266	Miles. 424	Miles. 416½
(1.) Receipts from goods traffic	£ 1,369,033	£ 304,288	£ 188,959
(2.) Goods train miles run	No. 2,457,093	No. 499,501	No. 595,086
(3.) Average goods train mile receipts	*s. d.* 11 1¾	*s. d.* 12 2	*s. d.* 6 4⅛ (Note the average rates charged.)
(4.) Tons of goods carried one mile	Tons. 201,576,000	Tons. 46,025,543	Tons. 36,500,973
(5.) Average sum received for carrying one ton one time.	*d.* 1·63	*d.* 1·586	*d.* 1·24
(6.) Average number of tons in a goods train at one time.	Tons. 82	Tons. 92	Tons. 61·3
(7.) Average number of goods trains per diem each way, supposing each train to run over the whole line open.	No. 2·66	No. 1·61	No. 1·95
(8.) Average number of tons of goods passing over each mile of line daily (both ways).	Tons. 437	Tons. 297	Tons. 240
(9.) Number of goods vehicles run one mile in the year.	No. 58,244,333	No. 15,363,633	No. 13,538,206
(10.) Average number of goods vehicles in a goods train.	23·7	30·75	22·75
(11.) Average number of tons in each goods vehicle.	Tons. 3·46	Tons. 3	Tons. 2·67
Average capacity of wagons	say 7 tons	say 8 tons	say 5 tons.
For working expenses, total, and per mile *see* Passenger Nos. 19 and 20.			
(12.) Average cost of carrying a goods vehicle with its load one mile.	*d.* 2·64	*d.* 2·05	*d.* 1·68
(13.) Approximate average cost of carrying one ton gross, that is, wagon and load together, one mile. (In this I take average weight of broad-gauge wagon stock at 5¾ tons, of narrow-gauge at 3 tons).	*d.* ·29	*d.* ·23	*d.* ·3
(14.) Average cost of carrying one ton of goods freight one mile.	*d.* ·762	*d.* ·685	*d.* ·63
(15.) Average weight of goods train, approximate	Tons. 218	Tons. 271	Tons. 129
(16.) Approximate proportion of live load to total weight of train in goods trains.	38/100	34/100	45/100

Note.—That while the cost per *gross* ton mile is highest on the Rajpootana, the cost per *net* ton mile is lowest on that line, which shows the fallacy of a *gross* ton mile basis; and the proportion of net to gross load is much the best on the Rajpootana.

To these tables let me add that, in regard to gradients, omitting the Ghauts on the Great Indian Peninsula, which affect but a small portion of it, that line is not materially worse than the Rajpootana, there being, I believe, on the Rajpootana upwards of 70 miles out of 420 on an incline of 1 in 150 or less, while the Bombay and Baroda is practically a level line; that the water on the Rajpootana is exceptionally bad, and has a most injurious effect on the development of locomotive power and the durability of locomotive boilers, and that fuel, as Mr. Carroll admits, is dearer on the Rajpootana than on either of the broad-gauge lines.

I confess I was not prepared to find the Rajpootana compare so favourably with lines three times its age, like the Great Indian Peninsula and the Bombay and Baroda, for it must be remembered that nearly every portion of the structure and rolling-stock of the narrow-gauge lines involves a departure from established patterns and experience, and that some mistakes and consequent waste were therefore inevitable, and have to be corrected at the cost of Revenue.

But whatever be its present shortcomings, it exhibits a railway equal, for all the purposes it is intended to serve, to either of the Bombay lines, yet built at little more than one-third their cost per mile; working at lower cost, in spite of a much smaller traffic, and more unfavourable mechanical conditions; and paying a higher dividend than either, although its rates are so low, that had its traffic been carried at the charges levied by the Great Indian Peninsula, its profits, assuming its traffic not to have been diminished thereby, would have been double what they were.

That there is room for improvement may be conceded. But there is no reason to suppose that we shall not see in the Rajpootana during the next four years the same advance in all points that we have seen in other Indian lines during the last four years. The train loads, though they were actually in 1878 in excess of the Great Indian Peninsula in 1874 in passengers, are still less than I think they ought to be both in goods and passengers; the amount of work done by the Rajpootana wagon stock in 1878 was little more than one-third that done in the same year by the East Indian, amounting to only 6,000 ton miles per annum per ton of capacity, against about 16,000 ton miles on the East Indian; and the average weight of the Rajpootana trains shows that the loads put behind its locomotives are less than they could easily carry. The inference is that the large indents lately sent in for more stock are in the main unnecessary, unless the increase which has taken place during the present year be, what I do not believe it is, more than can be met by good management accompanied by fair co-operation, on the part of those who provide the traffic.

On the general question of the capacity of the metre-gauge for traffic, results so far show without doubt, whether we look at the Rajpootana or the South Indian, that its practical capacity is not likely to be approached by the traffic brought upon it.

The Rajpootana traffic in 1878 amounted to 526 passengers and 247 tons of goods passing over each mile each day on the average; and this traffic was carried in little more than three trains. Even assuming that the work per train was as much as could be expected, we know from the experience of the Tirhoot line during the Bengal famine, and from that also of the broad-gauge lines, that at least twelve trains a day may be run each way on a single line. This would allow of a traffic of *at least* 1,500 passengers and 1,200 tons of goods per mile per diem, a traffic which no line in India, except the East Indian Railway, has yet carried, unless in time of famine.

It is inconceivable that the local traffic of the Rajpootana should approach these figures. The only prospect of its obtaining any large fraction of such a traffic must come from North-West Provinces traffic passing over it to Bombay. That this will happen to some extent is, no doubt, probable; but looking to the competing routes to Kurrachee, to Calcutta, and to Bombay by Holkar's line and Jubbulpore, the time must be distant, indeed, when the carrying powers of *the road* will be seriously tested.

30th May 1879. A. M. RENDEL.

P.S.—Since the foregoing was written, the accounts of the Great Indian Peninsula and Bombay, Baroda and Central India Railway Companies for 1878 have been completed and issued, and I have had an opportunity of comparing them with those of the Rajpootana for the same year. The working expenses per train mile on the Great Indian Peninsula for 1878 are 3*s.* 9*d.*; on the Bombay and Baroda 4*s.* 9*d.*; on the Rajpootana 3*s.* 2¾*d.* The working expenses per passenger mile are the same on the Bombay and Baroda and the Rajpootana, *viz.*, ·197*d.*, but greater on the Great Indian Peninsula than on either, namely, ·209*d.* The working expenses per ton mile are greatest on the Rajpootana, ·63*d.* against ·51*d.* on the Great Indian Peninsula, and ·15*d.* on the Bombay and Baroda. But then the traffic on the Rajpootana was much smaller than on either of the broad-gauge lines, for the daily tonnage passing over each mile of the Great Indian Peninsula was 902 tons, over the Bombay and Baroda 502 tons,

over the Rajpootana only 240 tons, and the daily number of passengers passing over each mile on the three lines was 768, 923, and 520 respectively.

By working expenses in the above figures, I mean the cost of maintaining the lines and conducting the traffic upon them only. To arrive at the actual cost of transport upon them, we should add to the working expenses, fair interest on the cost of constructing them. The superior economy of the narrow gauge would then be very apparent.

But the fact is, that gauge has nothing to do with the cost of transport, so long as the power of the machine is proportioned to the work to be done, a narrow gauge being probably best suited to a small traffic, and a broad gauge to a large traffic.

Assuming equally good and permanent materials to be supplied in each case, working expenses depend chiefly on the quantity of the traffic carried, on its management, and on physical conditions in regard to levels, coal, water, &c.

If we take, for instance, the East Indian, the Madras, and the Oudh and Rohilkund broad-gauge lines, and the South Indian and Rajpootana narrow-gauge lines, in the year 1878, we find the following:—

	Broad Gauge.			Narrow Gauge.	
	East Indian.	Madras.	Oudh and Rohilkund.	South Indian.	Rajpootana.
Length of line open	Miles. 1,504	Miles. 858	Miles. 544	Miles. 611	Miles. 416½
Average number of passengers in trains at one time.	No. 229	No. 205	No. 316	No. 290	No. 197
Average number of passengers passing over each mile daily.	1,140	536	796	830	520
Cost of carrying a passenger one mile	*d.* ·15	*d.* ·234	*d.* ·1059	*d.* ·1327	*d.* ·197
Number of tons of goods in trains at one time	Tons. 130·8	Tons. 53·7	Tons. 92	Tons. 50	Tons. 61·3
Number of tons of goods passing over each mile daily.	1,280	229·5	400	120	240
Cost of carrying one ton one mile	*d.* ·26	*d.* ·895	*d.* ·366	*d.* ·77	*d.* ·63
Cost of running a train (passenger or goods) one mile.	*s. d.* 2 10½	*s. d.* 4 0½	*s. d.* 2 9½	*s. d.* 3 2½	*s. d.* 3 2½

These figures, it must be remembered, assume a passenger and a goods train mile to cost the same. An error in this assumption, however serious, would not affect the general result, and the difference between the two is, at any rate, small.

The average loads per train on the South Indian are also, to a certain extent, assumed, in default of the requisite materials to determine them accurately. If the goods train loads are assumed too high, those of the passenger trains are too low, and *vice versâ*. And I should notice that the Oudh and Rohilkund cost per train mile is somewhat abnormally low, owing to the large receipts of that Company in 1879 from wagons hired to, or running on, other lines, which receipts go, in my method of stating the costs, in reduction of working expenses.

Now, in these figures, if we compare the Rajpootana narrow gauge with the Madras broad gauge, two lines having almost exactly the same quantity of traffic, and somewhat similar physical conditions, we find the narrow gauge beating the broad in goods train loads, and nearly equal to it in passengers, and carrying its traffic at far smaller cost per passenger mile, per ton mile, and per train mile. The South Indian narrow-gauge line shows equally well beside the Madras, but both the narrow-gauge lines show ill beside the broad-gauge Oudh and Rohilkund and the East Indian. If this were due to gauge they would look equally ill beside the Madras. The cause is clearly something independent of gauge, quantity of traffic being evidently very important.

With more traffic and experience I have no doubt that the Rajpootana will show, as nearly all other Indian lines have done, a constant improvement, and also that its working cost is independent of gauge, unless indeed its traffic reaches to something like that of the East Indian. When that time comes the financial position of the line will be such that we may view a change, if change be thought desirable, with equanimity. I am only afraid that that time will never come.

24th July 1879. A. M. RENDEL.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd SEPTEMBER 1879.

GENERAL REMARKS.—Less rain fell in Madras than during the previous week; in some places crops have been harvested with a fair outturn; prospects are favourable. There was slight rain in parts of the Bombay Presidency; more rain is wanted in the Deccan and Southern Mahratta Country both for the *kharif* crops and for *rabi* sowings; the state of the poor is not good at Sholapore; rats and locusts are still doing injury in places. Rain has fallen in all Bengal districts except three, but was much less in most places than in the preceding week; distress continues in the Dacca district, and more alms-houses have been opened there; prospects in Burdwan and Balasore have improved; owing to inundations the yield of the autumn harvest is somewhat short; the prospects of the winter rice are promising, except in Nuddea and Moorshedabad, where much injury has been done by inundations. In most districts of the North-Western Provinces and Oudh rain fell; it has done some damage to crops in Allahabad and Partabgarh; prospects are good, except in Jhansi, where rain is required, and prices are rising. In the Punjab there was no rain, except in Ferozepore, where the fall was very slight; prospects continue favourable. Slight rain has fallen in parts of the Central Provinces; the break has improved cotton, *jowar*, and millets, but rain is now needed for the crops on high lands and for rice; prospects remain good. In Burma the rain was general and in places heavy; some damage has been done in parts of the Province by the recent heavy rains and by inundations; the crops are in fair condition. In the other Provinces and States the rain has been less than in the previous week; prospects continue good.

There has been a further falling-off in the rain compared with the previous week. Harvest operations are on the whole progressing satisfactorily. General prospects are, so far, good throughout the Empire.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Sept. 20th)	·84 (average of 7 stations).	*Ragi* 19·87; early dry and wet crops thriving; sowing of cotton and horse-gram commenced.
Kurnool („ „)	·83 (average of 6 stations).	*Ragi* 25·20; crops withering in Cumbum and Markapur, elsewhere flourishing; cotton and white *cholum* being sown; *korra* and *cumboo* harvested in some parts, outturn ¾ and full; prices fluctuating; pasture and water ample.
Ganjam („ „)	1·56 (average of 14 stations).	*Ragi* 21·37.
Kistna („ „)	·94 (average of 7 stations).	*Ragi* 22·84; 38 inches water over anicut; standing crops generally good; more rain required in some places; *giddajonna* and *korra* in ear; *sazza* and *gingelly* harvested, outturn ¼ to ¾.
Chingleput (Madras) („ „)	1·0 in one station ...	*Ragi* 19·63; crops good; ploughing and sowing going on; harvest outturn ½ to ¾; pasturage abundant.
Coimbatore ...	·23 (average of 7 stations).	*Ragi* 23·04; standing crops generally good but failing in 3 taluks as rain deficient; harvest of some dry crops in 6 taluks, outturn ¼ to ¾.
Tanjore (Sept. 20th)	·58 (average of 6 stations).	*Ragi* 17·24; crops good; harvest of *kar*, *kadappu*, *kuruvai*, *cumboo*, *raggi*, *cholum* and oil-seeds, outturn ¾ to full.
Madura („ „)	·3 in Vattanam ...	*Ragi* 17·92.
Malabar („ „)	·23 (average of 14 stations).	*Ragi* 20·59; prices slightly fallen in Palghaut, stationary elsewhere; pasture good; harvesting of first crop commenced in 8 taluks.
Travancore ...	...	No report received.
		General Remarks.—General prospects fair.
Bombay (Sept. 34th)—		
Kurrachee ...	...	River on 21st, 15 feet 2 inches, against 18 feet on same date last year; *kharif* crops in ear.
Hyderabad ...	...	River falling; want of water complained of in Naushahro division and taluka Guni of Tando division; locusts about still; fever general.
Ahmedabad ...	...	Crops excellent; fever prevailing; slight cholera yet in city.
Baroda ...	...	Cholera continues near Navsari; fever in Baroda; prospects very good.
Surat ...	...	*Bajri* reaping commenced in Olpád, &c.; other crops generally healthy; more rain wanted in Bulsár and Jaláipor; cholera in Jaláipor and Chikhli.
Násik ...	...	Rain needed in five taluqs; prices slightly higher; rats injuring crops in Násik and Sinnar; crops good.
Colaba (Bombay) ...	2·78	Total rainfall 59·45, being 7·20 below average; temperature normal; winds exhibit an oscillation on the side of an advanced season.
Poona (Sept. 21st) ...	Maximum at Haveli 2·20, minimum at Indapur ·04.	Rain wanted throughout district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	·7; at Akola 1·34; from ·4 to ·50 in rest, except in 3 talukas.	Damage to *bajri* crops apprehended from want of rain, except in Akola; sowing of *rabi* delayed; injury by rats in parts of 4 talukas; slight cholera.
Sholapore ...	...	Rain urgently required; *kharif* withering and *rabi* sowing stopped from want thereof; damage from rats diminishing; condition of poor not good.
Dharwar ...	·37	More rain wanted; crops good.
Kanara ...	·05 at Karwar; 1·70 at Siddapur.	Total rainfall 116·21; rice harvest around Karwar; slight cattle-disease on coast and interior; fever prevalent.
Rajkot ...	·08	Total rainfall 26·38; *kharif* crops nearly ready for harvest in Southern Division; ground prepared for *rabi;* fever and cholera continue in some places.
		General Remarks.—*Kharif* crops in Sind and Gujárat good; rain much wanted in Deccan and Southern Maratha Country both for *kharif* and preparing ground for *rabi* sowings.
Bengal— (Sept. 24th)		
Chittagong ...	3·09	Weather favourable for crops; yield of *aus* harvest about fourteen annas; *amun* prospects also very good.
Dacca ...	3·53	Floods steady; twenty public, and five private, alms-houses opened and earthwork where practicable; distress continues throughout flooded localities; *amun* promising in greater part of district; public health good; rice, second quality, twelve seers.
24-Pergunnahs (Calcutta)	Alipore ·85	*Amun* fair; *aus* being harvested; average outturn expected, except in Satkhira where it is poor; some damage to crops in Satkhira, Baraset, and Busseerhat by inundation; common rice, ten seers; public health generally good.
Moorshedabad ...	1·90	Crops not good, in many parts much injured by inundation; river again rose during week, but since 19th water subsiding; fever in north and east; cattle deaths in submerged villages of Lalbagh; locusts have appeared in Nawada; most zemindars assisting ryots with money and grain; common rice at 11¼ seers.
Rajshahye ...	1·95	Moderate rain during first part of week, heavy in north; *aus* harvest much facilitated by fine weather during latter part of week; in two thanas twelve to fourteen annas of *aus* destroyed, in others three to four; about one-fourth of *amun* damaged, remainder doing very well; mulberry somewhat damaged in two thanas, but damage only temporary; jute crops about eight annas; *ganja* doing well, young plants somewhat suffered from recent heavy rain; Ganges and Attrai again rising; floods now stationary; common rice ten and half to twelve seers; usual fever; health good.
Burdwan ...	1·13	Crop prospects fair in Cutwa and Culna, indifferent in other parts; public health good.
Rungpore ...	·43	Weather hot; prospects of crops favourable; public health good.
Bhágalpur ...	*Nil*	*Bhadoi* and *murwa* in north much damaged; rice prospects good; Ganges falling rapidly; cholera decreasing; weather hot and steamy.
Purneah ...	3·43	Floods caused much damage; *bhadoi* outturn about ten annas; considerable progress in *aghani* cultivation; rice fourteen seers, with a tendency to rise; health good, but fever appearing; water subsided.
Patna ...	·23	Weather seasonable; prospects good.
Durbhanga ...	·70	Paddy promises well; prices stationary; public health good.
Hazáribágh ...	2·35	*Bhadoi* crops harvested with fair outturn; paddy prospects excellent; rice seventeen to twenty seers; health good.
Cuttack ...	3·56; at Kendrapara 9·0.	Grubs killed by heavy rains; prospects everywhere improved; reaping of *biali* and transplanting and weeding of *saradh* going on; rice fourteen seers; rise of rivers in Jajpur, but no damage.
		General Remarks.—Rain this week much less in most districts, and none in Bogra, Bhágalpur, and Chumparun; prospects in Burdwan Division improving, but not generally good; rain in Balasore also improved condition of crops; in Backergunge more rain required; autumn harvest yielding a short outturn owing to inundation; *amun* on the whole promising, except in Nuddea and Moorshedabad, where much injury done by floods.
N.-W. P. and Oudh—		
Benares (Sept. 23rd)	6·5 in Benares, and 2·4 in Chandauli.	Rains appear ending; prospects and health good.
Allahabad („ „)	3·9 (average)	
Gorakhpur („ „)	·2	Rainfall since 1st June 33·2; harm being done to ripening rice and to *bajra*; also delay in *rabi* ploughings; wheat 14¼ seers, coarse rice 36$\frac{3}{16}$ seers; health good save fevers; cattle miserable in places.
Jhansi („ 25th)	*Nil*	Total rainfall 63·5; seasonable break continues; harvesting operations progressing.
Agra („ 23rd)	...	In *rakhar* soil rain is wanted; prices of wheat and gram are rising; fever still prevalent.
Bareilly („ 24th)	...	Weather clear; *kharif* crops ripening; prospects good; fever and ague still bad in city and pargana.
		No change since last week; rice being cut.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh— *continued.*		
Meerut (Sept. 24th)	*Nil*	Weather clear; wind westerly; crops good; preparations for *rabi* sowing in progress; fever and ague continue; cattle-disease abating; sporadic cholera at Sirdhana; cheapest wheat 16, barley 21, gram 16½, *jowar* 20, and *bajra* 19 seers.
Kumaun („ 22nd)	...	Seasonable weather; rice and millets being cut.
Lucknow („ 24th)	1·2 in tahsil Mohanlalganj.	Barley 22½ seers, wheat 14½ seers; prospects good.
Partabgarh („ 22nd)	2·6 at Sadr, ·5 at Kunda, and 1·1 at Putti; heavy rain at Sadr all last night since the fall in this report was gauged.	Crop reports up to yesterday continue favourable; some damage caused from last night's heavy rain; health good; some 50 cases of cattle-disease in thana Raneegunge and a few in thanas Jitwara and Sangramgarh.
Sitapur („ 24th)	2·0	Prospects favourable.
Fyzabad („ „)	·4	Harvesting of *kharif* crops has commenced.
		General Remarks.—Some damage caused in Partabgarh and Allahabad by excessive rain; prospects good, except in Jhansi, where rain is wanted and prices are rising; fever and ague prevalent in Meerut, Agra, and Jhansi; slight cholera in Meerut, and cattle-disease in Allahabad, Meerut, and Partabgarh.
Punjab (Sept. 23rd)—		
Delhi ...	*Nil*	Agricultural prospects good; slight fluctuations in prices of food-grains.
Hissar ...	*Nil*	Weather seasonable; both canal and *barani* crops going on favourably; *rabi* operations progressing; prices stationary; fever prevalent.
Umballa ...	*Nil*	State of crops and public health good.
Jullundur ...	*Nil*	Crops excellent; health good.
Lahore ...	*Nil*	Crop prospects fair; prices steady.
Ferozepore ...	·1	Agricultural prospects good.
Siálkot ...	*Nil*	Prospects fair.
Ráwalpindi ...	*Nil*	Agricultural prospects good; fever very prevalent.
Peshawar ...	*Nil*	Harvest prospects fair, but prices of food-grains have again risen.
Mooltan ...	*Nil*	Crop prospects fair; prices steady.
Dera Ismail Khan ...	*Nil*	Agricultural prospects fair; health good.
		General Remarks.—Agricultural prospects still continue favorable, but prices generally higher, owing to exceptional demands at the present time.
Central Provinces—		
Nágpur (Sept. 24th)	...	Continued break improved *jowar* and cotton crops; prospects good.
Jubbulpore ...	·31 at Murwara, *nil* elsewhere.	More rain required for crops on high land; cotton promising; early rice and lesser millets being reaped; fever prevalent; small-pox continues.
Saugor ...	...	Break continues; rain wanted for crops on high lands; *rabi* ploughing commenced; prospects good; few cases of small-pox; prices stationary.
Seoni ...	...	Break causing anxiety for rice crops; land being prepared for *rabi* sowing; cholera continues.
Hoshangabad (Sept. 24th)	...	Rain required for rice and cotton; *jowar* doing well; health good.
Raipur („ 20th)	2·17	Prospects favorable; cholera ceased; small-pox decreasing; prices stationary.
Sambalpur („ 19th)	2·53	Sugar-cane and rice sown late attacked by insects; prospects good; cholera and small-pox continue.
		General Remarks —Long break has improved cotton, *jowar*, and millets; rain is now required for crops on high lands and for rice; prospects continue goood; prices stationary.
British Burma— (Sept. 24th)		
Akyab ...	5·73	Total rainfall 199·94; crop prospects good; public health generally good, but several reports of deaths from sporadic cholera in different parts of the district.
Rangoon ...	6·36	Total rainfall 85·21; crops in fair condition, except in Hline, where portion destroyed by floods; public health good; fever and small-pox in 2 townships; slight cattle-disease.
Bassein ...	25·9	Total rainfall 74·36; health good; slight cattle-disease in several townships; excess of rain threatens restrictions and damage to cultivation; most of low cultivated lands, including those east of bund, under water.
Prome ...	2·56	Total rainfall 34·96; a few cases of cholera reported; crop prospects good.
Amherst (Moulmein) ...	6·16	Total rainfall 144·59; crops good; cattle healthy; public health good.
Toungoo ...	1·85	Total rainfall 62·16; public health good.
		General Remarks.—General health good; some scattered cases of cholera and small-pox; slight cattle-disease; crops in fair condition; some injury feared from recent heavy rain and floods.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauháti (Sept. 24th)	·01	Weather seasonable; some damage done to *sali* paddy on low lands by the late rise of the river; floods subsiding since.
Sylhet („ „)	·04	Prospects good.
Cachar („ 23rd)	.....	Weather extremely hot up to 22nd; prospects of rice crops good; common rice at ten seers a rupee; public health fair.
Dibrugarh („ 24th)	·2	Weather hot and dry; crops doing well, also tea; public health good; no more small-pox reported.
Mysore and Coorg—		
Bangalore (Sept. 24th)...	·08; slight rain in districts.	Crops generally in promising condition; prospects continue favourable; public health good.
Mysore ...	·09	
Mercara ...	1·22	
Berar & Hyderabad— (Sept. 24th)		
Amráoti ..	.....	Crops flourishing; ploughing for *rabi* crops commenced.
Akola ...	.....	Weather bright; prospects of all crops very good.
Hyderabad ...	Slight rain	Total rainfall 30·88; damage by rats in some western districts; public health satisfactory; agricultural prospects generally good.
Central India States (Sept. 24th)—		
Indore ...	*Nil*	
Morar (Gwalior) ...	*Nil*	Crops excellent; health good; wheat 9 seers, gram 9 seers 14 chittaks.
Sutna ...	·27	
Rutlam ...	*Nil*	Weather fine; *jowar* 18 seers.
Neemuch ...	*Nil*	Weather clear; health and prospects good.
Goona ...	*Nil*	
Bhopal ...	*Nil* at Schore	Crops excellent; health fair; wheat 15 seers.
Ágar ...	·13	Prospects of crops good; rain needed for *rabi*.
Nowgong ...	*Nil*	Fever prevalent.
Mánpur ...	2·1	Reaping of *mukka* crops completed; *jowari* crops doing well; cattle-disease prevalent; prices somewhat fallen.
Rajputana—		
Abu (Sept. 24th)	·46	
Serohi („ 21st)	.....	Occasional clouds; sunshine.
Marwar („ 20th)	.....	Tanks, wells, and health good; prospects fair; more rain wanted.
Meywar („ 19th)	·03	Health good; prospects very promising; weather hot; prices easy.
Harowtee („ 20th)	.....	Tanks and wells good; fever very much less prevalent; prospects very good.
Jhallawar ...	.....	Health fair; prospects favourable.
Ajmere (Sept. 24th)	.....	No report received.
Jeypore ...	.....	Prospects good; slight fever.
Bhurtpur ...	4·0	Crops ripening promisingly; fever still prevalent.
Ulwur (Sept. 23rd)	.....	Weather clear.
		Prospects good; *bajra* being cut; fever still very prevalent.
Nepal— (Sept. 16th)		
Katmandú ...	1·646	Agricultural prospects fair.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th SEPTEMBER 1879.

GENERAL REMARKS.—Rain fell throughout the Madras Presidency, but was everywhere slight, except at Ganjam, where there was a fall of over 3 inches; the want of rain is felt in a few places; harvest operations proceed with satisfactory results. In Bombay also there was little rain during the week, and more is required in the South Deccan and the Southern Mahratta Country; prospects are excellent in Guzerat, the Konkan and the Northern Deccan. In Bengal general rain has fallen; prospects in the Burdwan Division and Balasore, though improved, are not good owing to previous drought; some distress continues in the Dacca District; the yield of the autumn harvest has been short in some places and average in others, but a good winter crop is expected. Rain fell in all the districts of the North-Western Provinces and Oudh, except Meerut; it has damaged the ripening crops in Partabgarh; prospects are good. In the Punjab there was a little rain in three districts and none in the others; prospects are favourable. In the Central Provinces the desired rain has fallen, and has proved beneficial; prospects are very satisfactory. In Burma abundant rain fell; prospects, which have improved somewhat in inundated tracts, are generally good. In the other Provinces and States prospects continue satisfactory, but the want of rain is felt in parts of Hyderabad, Mysore and Coorg.

General prospects are, on the whole, good throughout the Empire.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Sept. 27th)	·32	*Ragi* 19·26; early dry and wet crops thriving; sowing of cotton, horse-gram, and *korra* still proceeding.
Kurnool („ „)	·95 (average of 8 stations).	*Ragi* 24·78; standing crops promising; white *cholum* and cotton being sown; *korra* and *cumboo* harvested in 6 taluks, outturn ¾ to full; prices stationary, with tendency to fall; pasture and water abundant.
Ganjam („ „)	3·40 (average of 15 stations).	*Ragi* 22·46.
Kistna („ „)	1·72 (average of 8 stations).	*Ragi* 23·24; 35 inches water over anicut; standing dry crops require more rain; *korra* outturn full, *sazza*, maize, and *gingelly* ½ to ¾.
Chingleput (Madras) („ „)	·40 (average of 6 stations).	*Ragi* 19·88; crops good where water available, failing in other places; sowing and transplanting going on to small extent; harvest outturn ¼ to ¾; pasturage sufficient; want of rain much felt.
Coimbatore („ „)	·11 (average of one station).	*Ragi* 23·02; standing crops generally good; deficient water in 5 taluks; crops not thriving in Erode; harvest of some dry crops in 4 taluks, outturn ¼ to full.
Tanjore („ „)	·50 (average of 4 stations).	*Ragi* 17·63; crops good; harvest of *kar*, *kuruvai*, *ragi*, *cumboo*, and *cholum*, outturn ⅜ to full.
Madura („ „)	·17 (average of 4 stations).	*Ragi* 17·92.
Malabar („ „)	·35 (average of 13 stations).	*Ragi* 21·12; pasture good; harvesting of first crop nearly over in 8 taluks.
Travancore ...	.....	No report received.
		General Remarks.—General prospects fair.
Bombay (Oct. 1st)—		
Kurrachee ...	...	River at Kotri on 28th ultimo 11½ feet, last year on same date 16 feet 1 inch; want of water much felt in Dadu Sehwan; blight in Tatta taluka.
Hyderabad ...	...	No report received.
Ahmedabad ...	...	Early *bajri* ripe for harvest; other crops excellent; slight cholera in city; fever prevailing.
Baroda ...	1·20	Total rainfall 50·96; fever in Baroda and cholera near Navsari still continues; prices stationary; late rain excellent for present and future crops.
Surat ...	1·71	Total rainfall 35·53; *bajri* reaping progressing; other crops generally good; more rain wanted in Jalalpur; slight cholera in Jalalpur.
Násik ...	Excellent rain in all talukas; fall 1·0 to 3·0.	*Kharif* prospects very good.
Colaba (Bombay) ...	1·55	Total rainfall 61·0, being 7·02 below average; average abnormal temperature 1° cool; abnormal wind northerly till 27th, afterwards southerly.
Poona (Sept. 28th)	Maximum at Maval ·62; minimum at Indápur ·01.	More rain wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	Rain from ·04 to ·75 all over the district, except at Parner and Karjat.	More rain wanted; prospects slightly improved in 5 talukas; *bajri* crops affected in parts of 4 talukas; sowing of *rabi* resumed in 4 talukas; injury by rats in parts of 3 talukas.
Sholapore ...	...	*Kharif* withering and *rabi* sowing stopped from want of rain; but the fall last night, if general, will be most beneficial; condition of poor not good.
Dharwar ...	·37	Want of rain general; early crops withering.
Kanara ...	Maximum rain at Honawar ·51; minimum at Kumta ·02.	Rice harvest on coast; cattle-disease in Honawar; fever generally prevalent.
Rajkot ...	·04	Total rainfall 26·44; crops very good; land prepared for wheat and grain; cholera in Bhaunagar Mahuva; fever general. *General Remarks.*—Want of water felt in Sind; prospects excellent in Guzerat, Konkan, and North Deccan; rain required in South Deccan and Southern Maharatta Country.
Bengal—**(Oct. 1st)**—		
Chittagong ...	1·22	Weather close and hot; crop prospects favourable; transplantation over.
Dacca ...	1·50	Floods steadily falling; *amun* progressing, except where totally lost in south; relief in these localities continues; twenty public *annachattras* opened besides six private ones; 700 persons employed on earthwork at task rates; public health good; common rice twelve seers.
24-Pergunnahs (Calcutta)	·96	Prospects good; *aus* being harvested, an average yield expected; common rice 10½ seers; fever in some places; public health generally good; damage done to crops by overflow of rivers in some places.
Moorshedabad ...	3·18	Standing crops not good in many parts; much injury done by inundation; mild fever reported from almost all thanas; cattle deaths in submerged villages of Lalbagh sub-division; cattle suffering from small-pox in two thanas; want of fodder also reported from some places; grass-hoppers causing some damage to crops in thana Nawada; most zemindars assisting ryots with money and grain; common rice 11½ seers.
Rajshahye ...	2·32	Strong easterly winds and more or less heavy showers in middle of week; *aus* harvest nearly completed, outturn fair, except where destroyed by floods; jute and *till* being cut, former only an eight-anna crop; *amun* thriving; mulberry somewhat damaged, but reviving; some *ganja* plants much damaged, remainder doing well; river fallen considerably; floods receding slowly; common rice 11 to 12 seers; *aus* rice 13 seers; public health good.
Burdwan ...	3·25	Crop prospects improved; general health good.
Rungpore ...	1·50	Prospects of crops very favourable; public health good.
Bhágalpur ...	1·70	Excessive rain in north; *bhadoi* harvested, outturn short; rice prospects excellent; common rice 12 seers 10 chittaks; cholera abating; Ganges flood subsiding.
Purneah ...	1·97	*Bhadoi* an average yield; *aghani* lost in all low lands in south, but loss not considerable; transplantation completed; *rabi* promises well; a very large area under *rabi* cultivation; rice 14 seers; health good; rivers rapidly subsiding.
Patna ...	·21	Weather seasonable; prospects good.
Durbhanga ...	·54	*Dhan* promises well; prices stationary; public health good.
Hazáribágh ...	2·64	Weather fair and seasonable; crop prospects excellent; rice 18 to 20 seers; general health good.
Cuttack ...	3·32	Rivers rose again, and *beali* in Jajpore suffered slightly; prospects fair, except in four pergunnahs; *saradh* thriving; ploughing for *rabi* going on; rice 13 seers; fever in Kendrapara. *General Remarks.*—Rain general but much less in several districts; prospects in Burdwan division and Balasore improved, but not good owing to previous drought; prospects also improved in Backergunge; *amun* on the whole promising, except where submerged; *bhadoi* still being harvested, outturn in most places indifferent; *rabi* cultivation commenced, a large *rabi* crop expected, particularly on inundated tracts; insects doing great damage to *amun* in Darjeeling Terai; floods now steadily falling.
N.-W. P. and Oudh—		
Benares (Sept. 30th)	2·3	Rice ready for harvesting; prices falling.
Allahabad („ „)	1·8	Total rainfall since 1st June 35·0; every sign of open weather; wheat 14 9/16, coarse rice 39 13/16 seers; health good, except some fever.
Gorakhpur (Oct. 2nd)	4·3	Total rainfall 67·8; weather seasonable; prospects good.
Jhansi („ 1st)	4·0	Prospects excellent; prices stationary; no cases of cholera since 23rd; fever prevalent.
Agra (Sept. 30th)	·4	Prospects good; crops ripening; sickness continues.
Bareilly (Oct. 1st)	4·0	Ploughing for *rabi* going on; fever prevalent.
Meerut („ „)	...	Wind easterly; cloudy till yesterday; crops excellent; *rabi* culture progressing; fever and ague still bad; cattle-disease at Hauper and Mowana; cheapest wheat 15¼, barley 20½, gram 16¼, *bajra* 18, *jowar* 19½ seers.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. P. and Oudh—*continued.*		
Kumaun (Sept. 30th)	.....	Fine weather up to 27th, when heavy rain fell; clouds still about; crops being cut.
Lucknow (Oct. 1st)	·7	Prospects good; *jowar* 24, *jao* 21½ seers.
Partabgarh ...	3·9; at Kunda 6·4; at Patti 4·2.	Too much rain damaging the more advanced *bajra* and paddy; some fever about, otherwise health good; slight cattle-disease.
Sitapur (Oct. 1st)	·1	Sky overcast; prospects good.
Fyzabad („ „)	1·6	*General Remarks.*—Rain has fallen during the week in every district except Meerut; prospects everywhere good; the advanced crops have suffered in Partabgarh from too much rain; health good, with the exception of fever, which is prevalent in Allahabad, Jhansi, Agra, Meerut, Partabgarh, and Bareilly; no cases of cholera reported; some cattle-disease in Meerut and Partabgarh.
Punjab (Sept. 30th)—		
Delhi ...	*Nil*	Agricultural prospects good; slight fluctuations in price of food-grains; fever prevalent.
Hissar ...	*Nil*	*Kharif* harvest, which has commenced in Rohtak, good; *rabi* sowings progressing; slight variations in prices; fever prevalent.
Umballa ...	·5	Agricultural prospects and health good.
Jullundur ...	*Nil*	Crops excellent; prices steady; health generally good.
Lahore ...	*Nil*	
Ferozepore ...	*Nil*	Agricultural prospects good.
Siálkot ...	*Nil*	
Ráwalpindi ...	Slight rain	Harvesting commenced; fever prevails.
Pesháwar ...	·2	Harvest prospects good; prices of food-grains rising.
Mooltan ...	*Nil*	
Dera Ismail Khan ...	*Nil*	Health and prospects fair. *General Remarks.*—Reports generally favourable, but prices in frontier districts rising owing to demands for supplies for troops.
Central Provinces—		
Nágpur (Oct. 1st)	3·2	Rain opportune; prospects of all crops good.
Jubbulpore ...	3·51	Rain opportune; all crops promising except cotton in Jubbulpore tahsil, where it has been slightly damaged; small-pox continues; prices easier.
Saugor ...	2·40	Rain general and beneficial to *kharif* crops; prospects good; cotton thriving; fever prevalent; small-pox continues; prices stationary.
Seoni ...	2·5	Prospects much improved; cotton thriving; few cases of cholera.
Hoshangabad ...	7·8	All crops doing well, especially cotton; fever prevalent.
Raipur (Sept. 27th)	6·09	Prospects of *kharif* crops good, except cotton, which has been partially damaged by recent heavy rains; cholera has ceased; few cases of small-pox; prices slightly risen.
Sambalpur („ 26th)	2·82	Some rice destroyed by insects, but more than average outturn expected; prospects of cotton indifferent, of other crops good; small-pox continues; prices steady. *General Remarks.*—Rain general and favourable to crops; cotton slightly damaged in the districts of the Chhatti-garh division, and in the Jubbulpore district; prospects continue good.
British Burma— **(Oct. 1st)**		
Akyab ...	6·95	Total rainfall 206·89; public health and agricultural prospects good.
Rangoon ...	4·44	Total rainfall 89·65; slight small-pox in Rangoon town; agricultural prospects fair; public health normal; floods abated and re-sowing commenced; slight cattle-disease in 2 townships.
Bassein ...	5·56	Total rainfall 79·92; public health good; planting still going on; agricultural prospects in inundated parts somewhat improved; slight cattle-disease.
Prome ...	2·56	Total rainfall 37·52; slight cholera in Prome town, otherwise public health good; crop prospects good.
Amherst (Moulmein) ...	6·83	Total rainfall 151·42; public health good; crop prospects good; slight cattle-disease.
Toungoo ..	5·77	Total rainfall 67·93; public health good. *General Remarks.*—Public health good; a little cholera and small-pox; slight cattle-disease continues; agricultural prospects generally good.
Assam (Oct. 1st)—		
Gauháti ...	2·0	Mornings foggy and cool; days hot; transplanting of *sali* nearly finished; prospects of crops favourable.
Sylhet ...	·11	Prospects good.
Cachar ..	·65	Weather warmer; rice crops doing well; common rice 10 seers a rupee; public health fair.
Dibrugarh ...	1·22	Weather seasonable; crops doing well, including tea; altogether forty deaths from small-pox reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Berar & Hyderabad— (Oct. 1st)		
Amráoti ...	3·71	Crops in good condition.
Akola ...	...	Crops; flourishing; preparation for *rabi* well on.
Hyderabad ...	*Nil*	Total rainfall 30·88; reports from districts not so promising, as crops are withering in places and rain generally wanted; public health good.
Mysore and Coorg— (Oct. 1st)		
Bangalore ...	·25	Want of rain felt in parts; prospects however continue favourable; health good; prices generally stationary.
Mercara ...	·42	
Mysore ...	...	No report received.
Central India States (Oct. 1st)—		
Indore ...	8·91	Some slight damage to *jowar*, but great benefit generally; health and prospects good; wheat 8 seers 14 chittaks, and gram 8 seers 9 chittaks, per rupee.
Morar (Gwalior) ...	1·24	
Sutna ...	·12	Prospects good; *jowar* 20 seers.
Rutlam ...	4·16	Weather clear; health and prospects good.
Neemuch ...	1·1	Weather cloudy and hot.
Goona ...	1·14	Health good; crops flourishing; wheat 15 seers.
Bhopal ...	2·55 in Sehore	Weather cloudy; prospects of crops good.
Ágar ...	·74	Fever existing in a mild form; prospects favourable.
Nowgong ...	1·75	
Mánpur ...	6·5	Weather still cloudy and drizzling; some injury to *jowar* crops caused.
Rajputana—		
Abu (Oct. 1st)	·15	Clear.
Serohi ...	.....	No report received.
Marwar (Sept. 27th)	.....	Weather clear; hot; fever prevalent; prospects excellent.
Meywar („ 26th)	.....	Tanks, wells, and health good; harvest progressing.
Harowtee („ 27th)	·21 in Deoli; ·81 in Kotah; ·65 in Tonk.	Health fair; prospects favourable.
Jhallawar („ 25th)	.....	Cloudy; weather clear; *kharif* reaping commenced; some fever prevalent.
Ajmere (Oct. 1st)	Showers reported from two places; *nil* elsewhere.	Crops good; fever prevalent.
Jeypore ...	·31	Prospects continue favourable; prices easier; fever still prevalent.
Bhurtpore (Sept. 30th)	1·72	Fever not lessened; cloudy.
Ulwur ...	·33 (average) week ending 27th September; more recently heavier rain.	Rain damaging to standing crops; fever still prevalent.
Nepal— (Sept. 23rd)		
Katmandú ...	·705	Agricultural prospects fair.

R. B. CHAPMAN,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 30th September, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.

TRANSPORT OF SALT BY SEA BILL.

The Hon'ble MR. HOPE moved that the Reports of the Select Committee on the Bill to restrict the transport of Salt by Sea be taken into consideration. He said that the Bill, although it was an old friend, and although it could scarcely be said to come before us again with a new face, still as two-and-a-half years had elapsed since last we had the pleasure of seeing it, he thought it would be as well to call to mind the circumstances under which we had parted, and the fortunes which had occurred to it in the interval.

The Bill was last before the Council on the 28th of February, 1877, when he had the honour to present the report of the Select Committee. The Bill as it then stood prohibited the carriage of salt by sea by vessels of less than 300 tons burden unless covered by a permit, rawána or pass. It gave powers of stoppage, search and arrest, and prescribed penalties for the infraction of the rules laid down. It was intended to take effect on the western coast of British India at once, and on the coast of the Bay of Bengal and elsewhere whenever applied by the Governor General in Council. The Hon'ble Mr. Dalyell objected to the Bill at the time of the presentation of the report, on the ground that it would cause serious annoyance to the small craft by which salt-traffic on the coast and over-sea was carried on, and, moreover, that there was no satisfactory evidence of any large amount of smuggling. As regarded Madras, he thought that the large class who carried salt in small vessels would be unnecessarily interfered with; and as regarded Bombay, he considered that the contemplated levy of duty before shipment and negotiations with Portugal would do away with smuggling connected with foreign salt, the extent of which, moreover, seemed to him very much exaggerated. As there was then no motion before the Council, no vote took place on Mr. Dalyell's remarks, and the Bill was republished, as recommended by the Select Committee. But, as in the meantime the negotiations with the Portuguese Government commenced, and as also the general question of the salt-duties came under consideration by the Executive Government, it was thought best that the Bill, having been carried thus far, should not be proceeded with for a

time, until it was seen what effect would be produced on it by the settlement of these pending issues. The first solution of the difficulty came with regard to the east coast. In December 1877 the salt-duty in Madras and Bombay was raised, and the Bill which he had had the honour to introduce into this Council (and which was passed as Act XVIII of 1877) made obligatory the prepayment of duty on all salt previous to removal from the works, and, consequently, on all salt removed by sea from any port in Madras to any other port, whether in Madras or elsewhere. It thus cut off all smuggling at the source; and, as the Madras Government now assured us that the Act was fully carried out, all present necessity for legislation regarding the east coast had been removed. The next solution of the difficulty came much more tardily, in the shape of the treaty with Portugal, which will take effect on the 6th proximo. This treaty conferred on the British Government the exclusive privilege of regulating and undertaking the manufacture and sale of salt in Portuguese India, so that such smuggling as would otherwise be likely to arise from manufacturing the salt in Goa would cease. On the other hand, owing to the nature of our arrangements with Travancore and Cochin, the prepayment of duty on salt shipped from Bombay for these States could not be carried out at present as had been expected. Moreover, it would be seen, from Paper No. 6 before the Council, that other places, which for obvious reasons he abstained from mentioning, possessed considerable facilities for the manufacture of salt and the smuggling of it ashore in British India. Under these circumstances, the Bombay Government considered that it was indispensable that the Bill should be applied to the western coast.

As to the Bill itself, the executive sections, Nos. 3 and 7, retained the form in which they were carefully settled by the Committee in Calcutta, of which the Hon'ble Mr. Bullen Smith, one of the mercantile community, was a member.

The application of the Bill would, however, as he had explained, be confined to the western coast of British India north of Cochin, and a section had been added empowering the Governor General in Council to exempt the carriage of salt within any local limits, or in any class of vessels, from the operation of the Act. This had been inserted chiefly with a view to the possibility of exempting the Madras districts of Malabar and South Kanára in the event of satisfactory arrangements being concluded hereafter with Travancore and Cochin. The only other alteration he need mention had been made in accordance with the opinion of the Law Member. "A marine league" from the coast was fixed in section 1 of the Bill as the distance seaward to which the Bill would extend.

The Hon'ble MR. STOKES said that he would make a few remarks in support of the opinion to which the Hon'ble Mover had referred, namely, that the Bill might properly be made to extend to a marine league from the coast of British India. It was clear that, for certain purposes, the jurisdiction of Colonial legislatures extended to some distance seaward from the shore. In an opinion given in 1855 by Sir J. Harding, Sir A. E. Cockburn and Sir R. Bethell, the then law officers of the Crown, and printed at page 24 of Mr. Forsyth's *Cases and Opinions on Constitutional Law*, they said, with reference to British Guiana: "We conceive that the Colonial legislature cannot legally exercise its jurisdiction beyond its territorial limits—three miles from the shore." This was equivalent to saying that within these limits—within what was called territorial water—it might exercise its jurisdiction. Again, in an opinion given by the Queen's Advocate in 1854 on the question within what distance of the coasts of the Falkland Islands foreigners might be legally prevented from whale and seal fishing, he said: "Her Majesty's Government will be legally justified in preventing foreigners from whale and seal fishing within three marine miles (or a marine league) from the coasts, such being the distance to which, according to the modern interpretation and usage of nations, a cannon-shot is supposed to reach." It must be admitted that the authority of the former of these opinions, if taken in its full generality, had been greatly diminished by the decisions of some of the Judges in the celebrated *Franconia* case (*The Queen* v. *Keyn*, 2 Exch. Div. 63),

and that the old doctrine of the three-mile zone forming part of the territory of a littoral state as though it were so much land could hardly now be followed. It must, he thought, be now held by English lawyers that, by the principles of international law, a maritime State had legislative power over the sea beyond low-water mark and within a reasonable distance from its coasts, but that such power was only for certain limited purposes, and did not extend to a general sovereignty over all passing vessels. But Judges such as Sir R. Phillimore and Chief Justice Cockburn, and jurists such as Merlin and Manning, agreed in regarding the prevention of smuggling—in other words, the protection of customs-revenue—as one of those purposes. The others were probably—in the absence of judicial decision it was impossible to speak positively—the regulation of fisheries, the exaction of harbour and lighthouse dues and the protection of the territory from violation in time of war between other States.

The question then was what might be deemed to be a reasonable distance from the coast of British India within which we could exercise this special right of jurisdiction or dominion. Now, France, he believed, subjected all vessels to her customs laws to a distance of five leagues from shore. But Parliament in a recent Act, 39 & 40 Vic., c. 36, for the consolidation of Acts relating to the Customs, had enacted (section 179) that, if a foreign ship were found within one league of the coast of the United Kingdom conveying spirits or tobacco otherwise than in packages of a certain size and kind, the articles in question as well as the ship herself should be liable to forfeiture; and any foreigner found on board any ship so liable to forfeiture within one league of the coast and having on board any spirits or tobacco in such packages was to forfeit a sum not exceeding £100. It would seem, therefore, that Parliament thought one league a reasonable distance from the shores of Great Britain and Ireland within which to take measures for the protection of its customs-revenue against foreign vessels and foreigners; and in the case of this Bill, the object of which was to protect the British Indian salt-revenue, we could not do better than follow the English precedent. That this Council could legally do so was, MR. STOKES thought, reasonably clear. For, even though it should be contended that under the words of the Indian Councils Act of 1861 our legislative authority extended only to the Indian territories then under Her Majesty's dominion, and that the bed of the sea to the extent of three miles from the beach could not now be held to be part of those territories, a statute was always construed as impliedly giving powers absolutely essential to the privilege granted; and jurisdiction to legislate, as the Bill proposed to do, for the protection of the revenue of those territories was a necessary incident to the general power of legislation expressly conferred upon us for the benefit of British India.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill as amended be passed.

The Motion was put and agreed to.

VACCINATION BILL.

The Hon'ble SAYYAD AHMAD KHÁN moved for leave to introduce a Bill for the prohibition of the practice of inoculation and to make the vaccination of children in certain Municipalities and Cantonments compulsory. At the request of the Hon'ble Member, Mr. Fitzpatrick read to the Council his remarks on the Bill, which were as follows:—

"My Lord,—In asking leave to introduce a Bill into the Council making vaccination compulsory, I am supported by a sincere conviction that I am suggesting a law consistent with the policy of humanity and toleration which has been the guiding principle of the British Empire in India. The British rule in India has exerted itself in the direction of securing human life from the disorders of rapine and the calamities of famine: sanitary measures have been adopted on a large scale to secure the cleanliness of towns and to check the growth of epidemics: vaccination has been undertaken by the State, and much success has, no doubt, been achieved. But the sad events which come to light every year

show that there is much room for improvement, and that vaccination has not yet been sufficiently employed as a protection against the ravages of small-pox. The statistics for the year 1877 show that during the previous five years the number of deaths caused by small-pox in the Panjáb, the North-Western Provinces, Oudh, the Central Provinces and British Burma has been no less than 459,489, thus giving an enormous average of 91,865 deaths every year. And this calculation does not include the deaths caused by the malady in the Native States of the Panjáb.

"My Lord, there was a time when the people of this country had prejudices, to which superstition and ignorance had given birth, against the practice of vaccination. But the time has now arrived when such notions no longer find place in the minds of the gentry of India. Education and experience have opened the eyes of the people; and I have no hesitation in saying that it is extremely rare to find men among the gentry of the land who look upon vaccination in any other light than as a safe and salutary practice. This is proved by the fact that vaccination has already become common, and has met with no resistance in those provinces in India (like Kumáon) where the power of the executive authorities has been duly exerted in favour of vaccination, and where the proportion of deaths caused by small-pox is much less than in other parts of India. I therefore think that, considering the circumstances of the country and the acknowledged efficacy of vaccination, there exist sufficient reasons to justify the State in making that sanitary measure compulsory by law.

"My Lord, I am one of those who look upon all compulsory legislative measures as justifiable only in cases of extreme necessity. Personal liberty of the subject is one of the greatest and dearest privileges which have been conferred upon this country by the British rule; and, in common with millions of my countrymen, I hold them sacred. But the exigencies of the case which I have the honour to bring to the Council's notice demand the introduction of compulsory measures of legislation for the security of human life. Small-pox is a disease not confined to individuals or localities. It attacks persons of all classes, usually at a period of life when its victim is still in his cradle and his intellect still in its infancy. Its ravages extend chiefly to innocent children too young to take care of their lives, too young to have adopted any preventive remedies which science has provided. Nor are the effects of the disease confined to those whom it first attacks. The infection carries it from neighbour to neighbour, and those who suffer from the calamity may be said to be instrumental in inflicting it upon others. My Lord, if this view is supported by the undeniable results of science, the question no longer remains one of only personal liberty. Even if it be granted that a man has a right, if he chooses, to die of small-pox, no respect for personal liberty would justify the harm which he does to his neighbours by conveying infection. Compulsory vaccination is thus a measure for the protection of the lives of innocent children from the results of the folly of their parents and for the security of grown-up persons from the sanitary evils which arise from the ignorance or apathy of their neighbours. This argument, apparent to every intelligent mind, justifies the introduction of a law making vaccination compulsory in India. My Lord, I have carefully considered the difficulties which exist in putting such a law into practice; and I am aware that there are some parts of India which have not yet reached the stage when the enforcement of such measures would be advisable. The proposed Bill will, therefore, not be generally compulsory. It is not meant to be applicable to those parts of India which possess local legislatures, and its operation will be confined to such municipalities and military cantonments in British India as the Local Governments in their discretion deem fit to place under the proposed law. The extension of the proposed law to British military cantonments situate in Native States will be left to the power of the Governor General in Council. The object therefore of the proposed Bill is to provide a law to enable the Local Governments of those provinces which do not possess their own legislatures to make vaccination compulsory in such places as they consider fit for the promulgation of such a law.

"My Lord, so far as my experience extends, I have no hesitation in saying that compulsory vaccination would meet with the approval of the gentry of India. Indeed, one of my Hindú friends—a gentleman of good birth and good influence at Benares, the source of Hindú law and religion—impressed upon me the advisability of such a measure, and asked me to do what lay in my humble power to induce your Excellency's Government to adopt measures making vaccination compulsory by law. I have also received, of late, another communication from a respectable Muhammadan gentleman of one of the districts of the Panjáb; the substance of its paragraph relating to the subject of vaccination I beg leave to bring to the Council's notice.

"He says that he has come to know from certain newspapers that I intend to move in the Legislative Council for the enactment of a law making the vaccination of children compulsory in the North-Western Provinces; and he asks me whether I do not recognize the necessity for such a legislation for the Panjáb also, and whether thousands of innocent children do not succumb to the fatal effects of small-pox every year. He suggests the advisability of extending the proposed legislation to the Panjáb also, and asserts that, though the municipal and district committees in the Panjáb have exerted themselves to the utmost for giving deserved popularity to the practice of vaccination and have even succeeded to a great degree, yet the public are not likely to care much for its benefits unless compelled by law. To expect that people will gradually come to the knowledge of benefits derivable from vaccination and will of their own accord resort to it without necessitating the application of any legal pressure is, he says, a hard-hearted cruelty; and that it reminds one of the old proverb, 'By the time the antidote is fetched from Irak (Mesopotamia), the snake-bitten is no more.'

"I feel sure that the causes which have hitherto prevented vaccination from becoming a universal practice in this country consist chiefly in the apathy and want of foresight of the people, and the absence of a system providing facilities for procuring vaccination. I can confidently say that no reasons of a more serious nature exist in this country against compulsory vaccination, and those to which I have referred are insignificant, and can without difficulty be removed by legislation.

"My Lord, I would not have ventured to suggest an Act such as the one I ask the Council's leave to introduce if I did not feel sure that, whilst its objects are humane, they will also be properly understood by the people of India. In the figurative language of the East, small-pox is called the inevitable bridge which every child has to cross before entering into life; and recovery from the disease is considered second birth. The most anxious moments of the Native parent's care are bestowed on the child suffering from the malady, and the most earnest prayers are offered for the safety of the child. Other diseases are looked upon as accidental; but small-pox is regarded, as indeed it is, almost universal. It touches the keenest of human susceptibilities; for there are thousands in this country who, though spared by it from death, still have traces of its violence in the deep marks on the face or the loss of an eye. A law having for its object the security of the future generations of India from a calamity so universal and severe would, if properly put into operation, far from being unpopular, be welcomed by the people of this country."

His Honour THE LIEUTENANT-GOVERNOR said that the Bill which it was proposed to introduce and which was referred to in the list of business was not before the Council. He was therefore unable to offer any opinion as to how far the provisions of it would be suitable, or otherwise, for the Panjáb. But, inasmuch as the Hon'ble Member had referred to the Panjáb as a place where vaccination ought, in his opinion, to be made compulsory, and had adduced the opinions of influential inhabitants of the province in support of applying the provisions of the Bill to the Panjáb, he wished to say that the Government of the Panjáb had always kept in view the desirability of introducing vaccination as largely as possible in the province, and had fully recognized its benefits; and it was entirely on that account, and from his desire that the benefits of vaccination should be extended and should not be checked, that he

demurred to making such a provision as he understood the Act to contemplate, namely, that vaccination should be made compulsory. He believed that a measure of this kind, however carefully guarded, would have an effect directly the reverse of what it was intended to produce. Gradually, year by year, the prejudices of the people regarding vaccination had been lessened. Every care was taken in carrying out vaccination to enlist their sympathies and their intelligence in carrying on the operation, and for this reason, no doubt, the practice was meeting with less opposition than it met with at first. He felt certain, however, that to make it compulsory would at once raise a large amount of opposition, and it was solely on account of this opinion that he was averse to compulsory vaccination being introduced into the Panjáb. The province was one which had been comparatively recently annexed to British India; and, although we had made considerable progress in civilizing the people and advancing their condition, yet he thought it would be a mistake, while vaccination was making the progress which it now did, to render it compulsory in any part of the province.

The Hon'ble MR. COLVIN said that, with reference to the speech of His Honour the Lieutenant-Governor, the Hon'ble SAYYAD AHMAD begged that the motion standing in his name, which had just been put to the Council, might be altered as follows :—"The Hon'ble SAYYAD AHMAD KHÁN to move for leave to introduce a Bill for enabling Local Governments to prohibit the practice of inoculation and to make the vaccination of children in certain Municipalities and Cantonments compulsory."

The Hon'ble SIR ALEXANDER ARBUTHNOT said that he intended to make one remark with reference to the Bill, but he had proposed to defer making it until the Bill was actually introduced, having observed from the notice paper that the Hon'ble Member was about to introduce the Bill at the present meeting. He had seen a copy of the Bill which was sent to the Executive Department of the Government the business of which was under his immediate charge, and while it was passing through that Department a suggestion had been made by the Sanitary Commissioner with the Government of India, which suggestion, like every suggestion on sanitary matters emanating from Dr. Cuningham, appeared to him to be deserving of the careful consideration of the Council. Before he proceeded to notice that suggestion, he would say a few words with reference to the observations made by the Hon'ble Member who had moved for leave to introduce the Bill and by his hon'ble colleague the Lieutenant-Governor of the Panjáb. He gathered from the remarks of the Hon'ble Member in charge of the Bill that he considered that, throughout the greater part of India, vaccination might at once be made generally compulsory; but he observed that in the Bill which the Hon'ble Member had framed, he had for the present confined its application to municipalities and cantonments, in fact, to the large towns in the several provinces to which it was proposed to apply it. He thought that in making this limitation the Hon'ble Member had acted wisely. We had just heard from His Honour the Lieutenant-Governor that, in his opinion, any sort of compulsion would be out of place in the province of which he was the Governor. Speaking of the Presidency with which he had been connected during the greater part of his Indian life, he thought he might say that the opinions of the intelligent members of the Native community throughout the Madras Presidency were entirely in accordance with the opinions which had been expressed by their hon'ble colleague Sayyad Ahmad. Not very long before he left Madras—some seven years ago—the question of making vaccination compulsory in municipalities was strongly pressed upon his attention by one of the ablest Native officials in the Madras Presidency, indeed, he might say one of the ablest officials in India. That gentleman assured him that the importance of the measure was widely and increasingly recognized, and that, while he was not prepared to advocate the extension of such a measure at that moment in the villages throughout the country, he thought that in large towns it would be perfectly safe and wise to introduce it.

The suggestion which Dr. Cuningham had made was in the direction of further limiting the application of the Bill, in fact, of making its application still more tentative. He advised that, before the Bill was put in force in any

municipality, an application requiring it to be put in force should emanate from the Municipal Body, in which, as the Council were aware, there was invariably a considerable proportion of Native members.

It appeared to him that this was a wise and safe suggestion for dealing, as the proposed Bill did, with prejudices which, certainly up to a recent date, were very deeply rooted, which were of long standing and which had only of late begun to give way to the force of enlightened opinion; and he thought it was very desirable that, as far as possible, we should carry the people with us, and that, at all events, we should carry with us the opinions of their more enlightened representatives.

He hoped, therefore, that, if the Bill was introduced and referred to a Select Committee, this question of limiting the operation of the Bill, for a time at all events, in the manner suggested by the Sanitary Commissioner, would receive the careful consideration of the Committee.

The Hon'ble MR. COLVIN said that he wished to make a few remarks with reference to the observations which had fallen from his hon'ble friend the Lieutenant-Governor of the Panjáb. Like His Honour he had not yet seen the Bill which it was now proposed to introduce; but he understood from the notice relating to it in the list of business which was upon the table that the measure was only intended to apply to certain municipalities and cantonments. He had gathered also from the remarks which had been made by his hon'ble friend the promoter of the Bill that it was only meant to be applicable to those parts of India which possess no local legislatures, and that its operation would only be extended to any town or cantonment where the Local Government, or in the case of cantonments situated in Native States, where the Government of India, was satisfied that it could properly be so extended.

MR. COLVIN understood, therefore, that the Bill was only a permissive Bill. It would not apply at all to those provinces which had legislatures of their own. In the rest of India it would only take effect where the Local Government in its discretion thought fit to introduce it. And in no case could it have any operation beyond certain limited areas. If it had been proposed to make vaccination generally compulsory throughout any province of British India, he for one would have regarded the measure as one of the most doubtful expediency, and he had no doubt that this opinion would have been entertained by many others. Looking at the Bill, however, as a purely permissive measure, of which no Local Government need make any use unless it pleased, he saw no objection to it, and he thought that possibly this consideration might also remove the objections of his hon'ble friend the Lieutenant-Governor.

The Hon'ble SAYYAD AHMAD KHÁN stated that, if leave was given to introduce the Bill, the suggestion made by Dr. Cuningham would be one which would properly be considered in the Select Committee to which he would propose to refer the Bill.

The Motion as amended by the Hon'ble Mover was then put and agreed to.

The Hon'ble SAYYAD AHMAD KHÁN then introduced the Bill.

The Council adjourned to Tuesday, the 14th October, 1879.

SIMLA;
The 30th September, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

NOTE.—The meeting, which was originally fixed for Thursday, the 25th September, 1879, was adjourned to Tuesday, the 30th September, 1879.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7th OCTOBER 1879.

GENERAL REMARKS.—Good rain fell in Madras, but more is still wanted in places; harvesting proceeds with a fair outturn. In Bombay the rain that has fallen in the Deccan and the Southern Mahratta Country has improved prospects there; want of water is felt in Sind. In Bengal there was less rain than in the previous week; the early autumn harvest has nearly been completed, and the outturn is up to the average where the crops have not been damaged by floods; *rabi* sowings have commenced in places. Slight rain fell in most parts of the North-Western Provinces and Oudh; at Sitapur the fall was heavy and caused much damage; fever is prevalent throughout the Provinces; prospects continue good. In the Punjab there was slight rain at Sialkot and Dera Ismail Khan, and none in the other districts; prospects are good. In the Central Provinces the rain has been general, and some injury to cotton on low lands is reported; a break is required; operations for *rabi* sowings are well forward; prospects of *kharif* crops are satisfactory. In Burma the crops are generally flourishing; slight cattle-disease is reported from most parts of the province. In Assam and in Native States prospects remain good; but in parts of Berar the crops have been affected by heavy rain, while more rain is required in some districts of Mysore and Coorg.

General prospects throughout the Empire continue, on the whole, good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Oct. 4th)	1·11 (average of 8 stations).	*Ragi* 21·34; early dry crops thriving; sowing of cotton, horse-gram and *korra* still proceeding.
Kurnool („ „)	2·21 (average of 2 stations).	*Ragi* 23·20; rain generally wanted; cotton and white *cholum* being sown; *sazza* and *korra* harvests, outturn ½, ¾ and full; prices stationary; water and pasture ample.
Ganjam („ „)	1·87 (average of 9 stations).	*Ragi* 23·26.
Kistna („ „)	1·38 (average of 9 stations).	*Ragi* 25·08; 30 inches water over anicut; standing crops generally good; *sazza*, maize, and *korra* harvested, outturn about ¾; *giddajonna* harvest commenced.
Chingleput (Madras) („ „)	3·83 (average of 12 stations).	*Ragi* 20·79; rain very beneficial; crops good; sowing and transplanting going on well; harvest outturn ½ to ¾; pasturage sufficient.
Coimbatore („ „)	·75 (average of 11 stations).	*Ragi* 23·35; standing crops generally fair, withering on account of deficient water in some places; harvest of *cholum* and *ragi* in 4 taluks, outturn ½ to ¾.
Tanjore („ „)	1·14 (average of 13 stations).	*Ragi* 20·13; crops generally good; harvest of *korra*, *kuruvai*, *kadappu*, *ragi*, *cholum*, and *cumboo*, outturn ½ to full.
Madura („ „)	1·40 (average of 6 stations).	*Ragi* 17·7.
Malabar („ „)	·48 (average of 9 stations).	*Ragi* 19·71; pasture good; harvesting of first crop nearly over in 8 taluks.
Travancore ...	...	No report received.
Bombay (Oct. 8th)—		*General Remarks.*—General prospects fair.
Kurrachee ...	.....	River on 5th—9¾ feet against 13 feet 1 inch on same date last year; *kharif* harvest in operation in places; want of water much felt in two talukas.
Hyderabad ...	.....	*Kharif* reaping continues; fever general; several canals dry; crops affected in five talukas.
Ahmedabad ...	.....	*Bajri* harvest commenced; other crops excellent; fever very prevalent.
Baroda ...	·16	Total rainfall 51·12; fever in Baroda and cholera near Navsari still continues; *bajri* harvest commenced.
Surat ...	1·02	Total rainfall 36·55; rain wanted in Jalalpur, Chikhli, Balsar; crops generally good; slight cholera in Jalalpur.
Násik ...	Heavy rain	Storms and heavy rain day after day; prices slightly higher.
Colaba (Bombay) ...	·40	Total rainfall 61·40, being 7·83 below average; average abnormal temperature 1°; abnormal wind northerly, till 3rd afternoon southerly, and strong thunder and lightning; air damp.
Poona (Oct. 5th)	Maximum at Bhimthadi 1·37, minimum at Purandhar ·30.	Rain general though slight, but more wanted.
Ahmednagar ...	5·07	Rainfall general and very beneficial to late *kharif* and *rabi* crops; reaping of *bajri* commenced in three talukas; injury by rats in parts of three talukas.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Sholapore ...	Good rain throughout district.	*Kharif* crops reviving, and *rabi* being sown; condition of poor slightly improving.
Dharwar ...	2·0 (average)	Rain general.
Kanara ...	Rain (Karwar) 2·70	Total rainfall 118·91; harvesting continues on coast; cattle-disease in Honawar.
Rajkot ...	.....	Crops good; health generally good, but fever and slight cholera continues in some places.
		General Remarks.—Want of water felt in parts of Sind; prospects excellent in Guzerat; good rain general in the Deccan and Southern Mahratta Country, has improved matters there.
Bengal—(Oct. 8th)—		
Chittagong ...	·56	Weather hot; mornings and evenings becoming cooler; crop prospects favourable; public health good.
Dacca ...	·26	Floods still falling steadily; *amun* very favourable, except where entirely lost; *annachattras* still thickly attended, relief earth-work still going on at Nawabgunge; few sporadic cholera attacks; common rice telegraphed at 7½ seers, probably a mistake.
24-Pergunnahs (Calcutta)	·59	Prospects good; *aus* being harvested, an average yield expected; common rice 9 seers 6 chittacks to 10 seers; fever in some places; public health on the whole good; damage done to crops by overflow of rivers in some places.
Moorshedabad ...	1·20	Standing crops not good in inundated parts; grasshoppers still doing injury to crops in thana Nawada; common rice averages 11½ seers; mild fever in almost all thanas; cholera broken out in a village in Khamra outpost; cattle-disease still in thanas Raghunath, Burwa, and Dowlatabad; want of fodder yet felt in north and east.
Rajshahye ...	1·81	In north slight rain on one day only, elsewhere two or three heavy showers; *aus* harvest nearly over, yield good where crops not damaged by floods; *amun* promises a very good crop; *kalai* and *khesari* being sown; *ganja* being transplanted and doing well; rivers falling rapidly, and floods gradually receding; public health good; common rice 11½ to 12 seers, new *aus* rice 12¾ to 13 seers.
Burdwan ...	1·3	Crop prospects slightly better; general health good.
Rungpore ...	·09	Weather exceedingly warm: prospects of crops very favourable; public health good.
Bhágalpur ...	*Nil*	*Bhadoi* outturn small; rice prospects good; common rice 15 seers; general health good.
Purneah ...	·97	Weather sultry, bright and good for growing crops; occasional showers keep fields still under water; *aghani* planted out, *kalai* being sown, and *rabi* lands ploughed; rice still 14 seers; health good for the time of year; rivers falling rapidly.
Patna ...	·09	Prospects of crops good.
Durbhanga ...	1·53	Clouds hanging about; *dhan* promises well; land being prepared for *rabi*; prices falling; public health good.
Hazáribágh ...	1·0	Weather seasonable and favourable to all crops; prospects of crops excellent; food-grains cheaper than last week; prices 19 to 20 seers; general health good.
Cuttack ...	2·64	*Beali* being reaped, average outturn 7 annas; early *saradh* in ear; late *saradh* being weeded; *rabi* sowings progressing, prospects fair; sporadic fever and small-pox.
		General Remarks.—Rains appear to be nearly over, but enough has fallen in most places; prospects, if anything, improved; autumn harvest nearly completed, yield average where the crops not damaged by floods; *amun* on the whole promising, but in Nuddea *amun* greatly destroyed by inundation; in Darjeeling Terai, young plants much injured by insects, and in Burdwan division and Balasore prospects, though improved, are not good in most parts, owing to previous drought; *rabi* cultivation rapidly progressing, in some places sowing has commenced.
N.-W. P. and Oudh—		
Benares (Oct. 7th)	·6 in Benares; *nil* elsewhere.	More rain is not now wanted; two-thirds of the *koari* rice cut; fever prevalent; cheapest wheat 13 seers, cheapest rice 19 seers.
Allahabad („ „)	·1 (average)	Rainfall since 1st June 35·1; wind at last going round to west, but clouds about; half the inhabitants down with fever, but not of fatal type; wheat 14 7/16 seers, coarse rice 19½ seers.
Gorakhpur („ 8th)	·1	Total rainfall 67·9; weather cloudy; agricultural prospects good; fever prevalent.
Jhansi („ „)	Slight shower on 6th instant.	Prospects good; prices stationary; fever still prevalent; sowing for *rabi* commenced.
Agra („ 7th)	·6 (average)	Crops ripening; *bajra* getting reaped; fever and ague still continues.
Bareilly („ 8th)	2·3 (average)	Fever very prevalent throughout district.
Meerut („ „)	Slight rain on 6th	Wind east; crops promise well; *rabi* sowings progressing; fever and ague very bad; cheapest wheat 14½, barley 20, gram 15¾ seers.
Kumaun ...	...	No report received.
Lucknow (Oct. 8th)	2·5	*Dhan* 30 seers, and *jao* 19 seers.
Partabgarh („ 6th)	·2 at Sadr, Kunda, and Patti.	Crops benefited by absence of rain this week, and harvesting operations continue; great deal of fever reported; cattle-disease cases increasing in Thanas Gangipur and Raneegunge; less elsewhere.
Sitapur („ 8th)	9·3 (average)	Rain caused much damage.
Fyzabad („ „)	·7	Ague prevails in district; crop prospects good.
		General Remarks.—Rain during the week, but nowhere heavy except at Sitapur, where it has caused much damage; fever prevalent throughout the province; cattle-disease continues in Partabgarh; *rabi* sowings commenced in Meerut and Jhansi.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab (Oct. 7th)—		
Delhi ...	*Nil*	Agricultural prospects good; prices of food-grains have risen slightly.
Hissar ...	*Nil*	Weather seasonable; *rabi* sowings progressing; prospects good; prices fluctuating; fever rife.
Umballa ...	*Nil*	Crops and health good.
Jullundur ...	*Nil*	Health good; crops thriving; prices steady.
Lahore ...	*Nil*	State of crops good; rain would be beneficial; slight fever prevails.
Ferozepore ...	*Nil*	Prospects good; prices firm.
Siálkot ...	Slight rain in district	Prospects good.
Ráwalpindi ...	*Nil*	*Kharif* crops good; fever about.
Pesháwar ...	*Nil*	Harvest prospects fairly good; still an upward tendency in prices of food-grains.
Mooltan ...	*Nil*	*Kharif* crops fair.
Dera Ismail Khan ...	·1	Crops and health good.
		General Remarks.—Agricultural prospects good; autumn fever prevails; general rise in prices due to present demands for supplies and carriage.
Central Provinces—		
Nágpur (Oct. 8th)	2·46	Break required; *kharif* and *rabi* sowings well forward; health good.
Jubbulpore ...	3·78	Rain beneficial to *kharif* and to land for *rabi*; cotton slightly damaged; reaping of earlier rice continues; few cases of small-pox; prices stationary.
Saugor (Oct. 8th)	3·71	More rain not required; *rabi* operations suspended; cotton, *jowar*, and millets slightly damaged; small-pox continues; fever prevalent.
Seoni ...	2·32	Rain excessive; break required; prospects good; few cases of cholera; prices risen.
Hoshangabad ...	2·23	Break required for cotton and *jowar*; fever prevalent.
Raipur (Oct. 4th)	1·44	Prospects of *kharif* crops good; cotton on low lands injured a little by heavy rain of previous week; cholera and small-pox decreasing; prices slightly fallen.
Sambalpur („ 3rd)	·18	Prospects of *kharif* crops good; cholera and small-pox decreasing; prices steady.
		General Remarks.—Rain general; break required; slight damage to the cotton on low lands reported from several districts; prospects of other *kharif* crops continue good; preparations for *rabi* sowings well forward.
British Burma— (Oct. 9th)		
Akyab ...	1·15	Total rainfall 208·04; public health and agricultural prospects good; slight cattle-disease.
Rangoon ...	·99	Total rainfall 90·64; slight small-pox in Rangoon town; general health normal; crop prospects fair; slight cattle-disease.
Bassein ...	2·24	Total rainfall 82·16; public health good; slight cattle-disease; cultivation progressing; attempts made to replant in some lands lately inundated.
Prome ...	1·95	Total rainfall 39·47; public health fair; crops flourishing; some damage by overflow of Naweng and Myitmakha rivers.
Amherst (Moulmein) ...	1·74	Total rainfall 153·16; public health and prospects of crops good; slight cattle-disease in Thatone sub-division.
Toungoo ...	2·98	Total rainfall 70·91; public health good.
		General Remarks.—Public health good; slight cattle-disease; crops generally flourishing; some damage from inundation in low lands.
Assam (Oct. 8th)—		
Gauháti ...	·37	Mornings foggy; weather seasonable; transplanting of *sali* finished; prospects of crops favorable.
Sylhet ...	3·67	Prospects good.
Cachar ...	·86	Weather warm; rice crops doing well; common rice about 11 seers a rupee; public health fair.
Dibrugarh ...	1·08	Weather variable; getting cooler; prospects continue good; no fresh cases of small-pox or cattle-disease reported.
Berar & Hyderabad— (Oct. 8th)		
Amráoti ...	2·35	Crops doing well though partly affected by recent heavy rains.
Akola ..	3·44	Crops as above.
Hyderabad ...	.....	Total rainfall 31·88; heavy storms in places; generally prospects improved and decidedly favourable; public health good, except fever and ague in parts.
Mysore and Coorg— (Oct. 8th)		
Bangalore ...	·87; good falls in two districts, slight in others.	Crops suffering from want of rain in parts; prospects, however, continue favourable; health good; prices generally stationary.
Mysore ...	*Nil*	
Mercara ...	·67	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States (Oct. 8th)—		
Indore ...	3·33	Late rain has done some damage to standing crops, but generally favourable for *rabi*; fever prevalent; food-prices high; wheat 8 to 9 seers, and gram 8 to 9 seers.
Morar (Gwalior) ...	·34	
Sutna ...	·57	*Jowar* 17 seers.
Rutlam ...	2·72	Weather clear.
Neemuch ...	·39	
Goona ...	·67	Crops flourishing; health fair; wheat 14½ seers.
Bhopal ...	·75 in Sehore	Weather cloudy; prospects of crops and health good; price of food-grains high; wheat 7 seers 4 chittaks, *jowar* 10 seers, and gram 8 seers 11 chittaks per rupee.
Ágar ...	2·01	Prospects favourable; fever existing in a mild form.
Nowgong ...	·36	
Mánpur ...	1·85	
Rajputana—		
Abu (Oct. 8th)	·93	Clear; close.
Serohi ...	.....	No report received.
Marwar („ 3rd)	.....	Tanks and wells good; crops excellent; cloudy; hot; fever prevalent; harvesting commenced; locusts in some districts.
Meywar ...	·18	Tanks, wells, health, and crops good.
Harowtee („ 4th)	·11 in Deoli; ·56 in Kotah; ·03 in Shahpura.	Health fair; prospects good.
Jhallawar („ 2nd)	1·28	Some fever prevalent.
Ajmere („ 8th)	·1	Prospects good; prices stationary; fever still prevalent.
Jeypore ...	·81	Prospects good; harvesting commenced in some localities; fever still prevalent.
Bhurtpore („ 7th)	.....	Cloudy; fever and ague unabated.
Ulwur ...	Slight rain here and there.	Rain injuring *jowar* and cotton; fever still prevalent.
Nepal— (Sept. 30th)		
Katmandu ...	1·550	Total rainfall 52·669; agricultural prospects fair; the rains appear to be ceasing.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21st OCTOBER 1879.

GENERAL REMARKS.—In Madras the north-east monsoon has not yet broken; slight rain fell in most of the districts, more is generally wanted; prospects continue fair. No rain is reported from Bombay, save from the Kánara District; rain required in the Deccan for *rabi* sowings; fever is prevalent; crops in most places are excellent. In Bengal there was rain in the early part of the week, but the weather has been clear since, and the wet season appears to have ended; in Chumparun the autumn harvest has been damaged by floods, injury has also been done to the newly-sown *rabi* in some districts by the late heavy rainy, but there is yet ample time for fresh sowings; prospects are favourable. In the North-Western Provinces and Oudh rain fell only in the Gorakhpur and Kumaun Districts, in the latter the fall was slight; the harvesting of the *kharif* is in progress, and *rabi* operations have commenced; fever is still bad. In the Punjab there was slight rain in the Lahore and Mooltan districts but none elsewhere; fever continues; prospects are satisfactory. In the Central Provinces the weather has been fair; and except at Sambalpur no rain fell in the districts from which reports have been furnished; the *kharif* crops are being reaped and *rabi* sowings are in progress; prospects are good. Heavy rain has again fallen in Burma during the week, but it now appears to be ceasing; the crops where they have not been damaged by floods are flourishing. In Assam and the other Provinces and States prospects are good, but in Mysore and Coorg the want of rain is much felt.

Prospects remain good on the whole; but the north-east monsoon in anxiously looked for in the south-east coast and in Mysore; autumn fever is now generally prevalent. In Northern India the rains have ceased, and *rabi* sowings are in full progress.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Oct. 18th)	*Nil*	*Ragi* 20·49; harvest of early dry crops and sowing of later white *cholum* commenced; standing dry and wet crops thriving; rain needed.
Kurnool („ „)	*Nil*	*Ragi* 23·74; rain wanted; *sazza* harvested, outturn ¾; white *cholum* and cotton being sown; pasture and water ample.
Ganjam („ „)	·78 (average of 14 stations).	*Ragi* 28·79.
Kistna („ „)	·25 at Bapatla	*Ragi* 25·56; 36 inches water over anicut; rain wanted for standing crops and for ploughing for later dry crops; *giddajonna* harvest progressing, outturn ¾ to full.
Chingleput (Madras) („ „)	·49 (average of 8 stations).	*Ragi* 20·68; crops good; ploughing, sowing, and transplanting going on actively; harvest outturn ½ to ¾; pasturage sufficient.
Coimbatore („ „)	·59 (average of 10 stations).	*Ragi* 22·75; standing crops withering in six taluks; harvest of paddy and *ragi* in four taluks, outturn of paddy ½ to ¾, *ragi* ½ to full.
Tanjore („ „)	·28 (average of 6 stations).	*Ragi* 26·01; crops generally good; rain wanted; harvest of paddy, *cholum*, *cumboo*, and *ragi*, outturn ½ to full.
Madura („ „)	·71 (average of 6 stations).	*Ragi* 16·80.
Malabar („ „)	·29 (average of 10 stations).	*Ragi* 20·21; rain insufficient; harvesting nearly over.
Travancore ...	.....	No report received.
		General Remarks.—General prospects fair.
Bombay (Oct. 22nd)—		
Kurrachee ...	.....	River on 19th—7 feet 8 inches, last year on same date 10 feet 2 inches; harvesting progressing; locusts about in Manjhand and Kohistan; blight (*rati*) in two talukas.
Hyderabad ...	.....	Rice in three talukas damaged by insects; fever becoming general; small-pox in taluka Naushahro; locusts in four talukas; no damage; weather unsettled.
Ahmedabad ...	.....	*Bajri* harvest continue; other crops excellent; fever very prevalent yet.
Baroda ...	.....	Cold weather set in; fever very prevalent in Baroda; cholera continues near Navsari; harvesting of *bajri* and rice continue; crops excellent.
Surat ...	.....	Crops healthy; *bajri* and rice nearly harvested; *rabi* sowing progressing; cholera in three talukas.
Násik ...	.....	Prices slightly lower; prospects unchanged; fever prevalent.
Colaba (Bombay) ...	.....	Temperature and wind normal; weather fine.
Poona (Oct. 19th)	.....	*Bajri* crops harvested; *jowari* crops flourishing; wheat and gram being sown.
Ahmednagar ...	.....	Reaping of *bajri* and sowing of *rabi* progressing; rain wanted in parts of Sheogaon for *rabi* sowing; injury by rats in parts of Párner.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Sholapore ...	.....	No reports received.
Dharwar ...	.....	No reports received.
Kánara ...	At Karwar 1·15 Maximum at Honavar 4·0; minimum at Yellapur ·13.	Total rainfall 127·75; cattle-disease and fever prevail.
Rajkot ...	.....	Weather hot; *kharif* harvest progressing; ague and diarrhœa diminishing; cholera in Dhráfa and Jasdan; *rabi* being sown. *General Remarks.*—Crops generally excellent; fever prevalent; some rain wanted in parts of the Deccan for *rabi* sowing.
Bengal—(Oct. 22nd)—		
Chittagong ...	1·29	Weather fair; mornings cooler; prospects of crops favourable; public health good.
Dacca ...	·46	Slight rise followed by fall in floods; crops promising; relief measures continue; common rice 14 seers; public health good.
24-Pergunnahs (Calcutta)	.....	Report not received.
Moorshedabad ...	5·61	Prospects of *haimanti* paddy good; *kalai* on river banks partly damaged by late rise of Bhagiruthi; lands being prepared for winter crops in thana Nowada; locusts damaging standing crops; mild fever reported from almost all thanas; cattle-disease still in thanas Dowlatabad and Hariharpara and in parts of Jungypore sub-division; zemindars and mahajans assisting ryots as before; common rice averages 11½ seers.
Rajshahye ...	9·51	Very heavy rain in commencement, but clear weather in latter part of week; prospects of winter rice good; *kalai* somewhat damaged by heavy rain and floods; common rice 9¾ seers.
Burdwan ...	·09	Prospects of crops improved by late rain; health fair.
Rungpore ...	1·97	State and prospects of crops favourable; public health good.
Bhágalpur ...	.....	Report not received.
Purneah ...	·49	*Bhadoi* less than expected; *aghani* prospects good; *rabi* cultivation progressing favourably; *kalai* sown; rice 13 to 15 seers; health of people good; cattle very bad; foot-and-mouth disease prevalent; rivers and inundations subsided, but lands still very wet.
Patna ...	1·35	Prospects excellent.
Durbhanga ...	·60	*Dhan* on high land excellent; no more rain required; prices falling; some fever and cattle-disease; in some places *rabi* a little injured.
Hazáribágh ...	*Nil*	Cold weather now fairly set in; a bumper crop expected; prices cheaper than last week with downward tendency; rice 24 to 27 seers; district health good.
Cuttack ...	·28	*Beali* being harvested; *rabi* sowing going on; *saradh* promising well; *health good.* *General Remarks.*—Rain now apparently ceased, and weather becoming cold; more rain however still wanted in Hooghly and Midnapore; prospects of winter rice on the whole very good; some injury done to newly-sown *rabi* in places by late heavy rain, but there is ample time yet for re-sowing; *rabi* cultivation and sowings progressing rapidly; large tracts of country in Chumparun and Mozufferpore flooded, in former autumn harvest much damaged; early rice still being reaped in Orissa and Balasore, outturn moderate; prices falling in many districts; public health generally good, but fever has appeared in places.
N.-W. P. and Oudh—		
Benares (Oct. 21st)	*Nil*	Harvest prospects good; *rabi* being sown; fever prevalent.
Allahabad („ „)	*Nil*	Weather clear; fever still prevalent; wheat 13 6/16 seers, coarse rice 18 9/16 seers, unhusked *dhan* 40½ seers.
Gorakhpur („ 19th)	2·3	Total rainfall 77·6; weather warm, clear; rains over; agricultural prospects good; fever prevalent.
Jhansi („ 22nd)	.....	Weather clear; prospects for *kharif* good; minor grains being cut; *rabi* sowing in progress.
Agra („ 21st)	.....	Crops ripening; *bajra, mukka,* and *kungnee* is being reaped; *rabi* sowings progressing.
Bareilly („ 22nd)	.....	Weather clear; wind from west; *rabi* operations going on; late rice ready; fever continues; some cases of cholera.
Meerut („ „)	.....	Occasional clouds; wind variable; fever and ague still bad; Indian-corn and rice harvested; cheapest wheat 14½, gram 15 seers.
Kumaun („ 21st)	Slight rain	Prospects good.
Lucknow („ 22nd)	.....	Weather fine; fever still prevalent.
Partabgarh („ 20th)	.....	Rains apparently over; the earlier *kharif* crops are being reaped, and the later are maturing; preparation for *rabi* going on; fever continues everywhere, but less since the wind has veered round to the west; cattle-disease decreasing.
Sitapur („ 22nd)	.....	Fine weather; fever prevalent.
Fyzabad („ „)	*Nil*	Ague prevails in district. *General Remarks.*—Twenty-three tenths rain at Gorakhpur, slight rain in Kumaun, none elsewhere; fever and ague prevalent in most districts; some cases of cholera in Bareilly; cattle-disease in Partabgarh decreasing; *kharif* being harvested in Jhansi, Agra, Meerut, and Partabgarh; *rabi* sowing commenced in Benares, Jhansi, Agra, and Bareilly.

DESTRUCTION OF WILD ANIMALS AND VENOMOUS SNAKES IN BRITISH INDIA.

Extract from the Proceedings of the Government of India, in the Home, Revenue and Agricultural Department (Public),—No. 51—1947-67, dated Simla, the 23rd October 1879.

READ—

Resolution of the Home Department, Nos. 57-2220-2230, dated the 12th December 1878, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India in 1877.

Read also the following letters from the Local Governments and Administrations submitting returns for the year 1878:—

From Government of Madras, No. 1586, dated 31st July 1879.
From Government of Bombay, No. 895, dated 9th April 1879.
From Government of Bengal, No. 3368, dated 13th August 1879.
From Government of North-Western Provinces and Oudh, No. 1218, dated 17th May 1879.
From Government of North-Western Provinces and Oudh, No. 1532, dated 13th June 1879.
From Government of the Punjab, No. 1875, dated 8th May 1879.
From Chief Commissioner of the Central Provinces, No. 2004-110, dated 3rd May 1879.
From Chief Commissioner of British Burma, No. 1406-332, dated 17th May 1879.
From Chief Commissioner of Mysore, No. 77-2, dated 2nd April 1879.
From Chief Commissioner of Assam, No. 597, dated 9th April 1879.
From Resident at Hyderabad, No. 29, dated 7th June 1879.
From Chief Commissioner of Ajmere and Mhairwarra, No. 98, dated 31st January 1879.

RESOLUTION.

The general results of the operations during the year 1878 are shown in the appended amalgamated statement. The figures show that—

The number of persons killed by wild animals was in	1877	2,918
	1878	3,444
Ditto ditto venomous snakes was in	1877	16,777
	1878	16,812

The number of cattle killed by wild animals and venomous snakes was in	1877	53,197		
	1878	48,701		
The number of wild animals destroyed was in	1877	22,851		
	1878	22,487		
Ditto venomous snakes destroyed was in	1877	127,295		
	1878	117,958		
		Rs.	A.	P.
The amount of rewards paid for the destruction of wild animals and venomous snakes was in	1877	1,03,017	5	6
	1878	99,189	12	2

The general results, therefore, are that the number of persons killed, whether by wild animals or by snakes, has increased, while the number of cattle so killed, the number of wild animals and snakes destroyed, and the amount of rewards given, show a decrease.

2. The increase in the number of persons killed by wild animals is to a great extent due to the deaths from wolves in the North-Western Provinces and Oudh, which have increased from 380 in 1877 to 624 in 1878. The Governor General in Council observes that His Honor the Lieutenant-Governor and Chief Commissioner has noticed this matter in the resolution recorded by him, and has invited the attention of district officers to the subject with a view of more effective measures being taken for the destruction of these animals. The decrease in the number of cattle killed by wild animals and snakes is satisfactory.

3. With reference to deaths from snake-bites, it is observed that the number of persons thus killed has increased from 15,946 in 1876 to 16,812 in 1878, while the number of cattle has decreased from 2,945 in 1877 to 1,825 in the year under review. The returns showing the number of cattle killed are doubtless, as observed by the Chief Commissioner of the Central Provinces, less trustworthy than those of "persons." But the figures seem to confirm the view expressed in paragraph 4 of the Home Department Resolution on the returns for the year 1877, and His Excellency in Council trusts that the reports of the current year will show the extent to which the suggestion that municipal bodies should offer rewards for the destruction of snakes in towns and large villages has been acted upon and with what results. This matter is one of importance, and should not be lost sight of.

4. The suggestion made by the Government of Bombay that the words "and panthers" should be inserted under the heading "leopards" is approved, and should be adopted in future returns.

ORDER.—Ordered, that this Resolution, with the appended table, be forwarded to Local Governments and Administrations for information, and be published in the Supplement to the *Gazette of India*.

*Statement shewing **the results** of the measures adopted in British India with the view of **exterminating wild animals and venomous snakes** during the year 1878.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 17th October, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Mumtáz-ud-Daulah Nawáb Sir Muhammad Faiz Ali Khán Bahádur, K.C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.

DEKKHAN AGRICULTURISTS RELIEF BILL.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill for the relief of Indebted Agriculturists in certain parts of the Dekkhan.

FACTORIES BILL.

The Hon'ble MR. COLVIN moved for leave to introduce a Bill to regulate labour in factories. He said that he thought it would not be necessary, at the present stage of the Bill, to detain the Council long. He merely wished to-day to state very briefly the circumstances which had shown that legislation on the subject was desirable, and to explain the scope of the measure which was in contemplation.

Attention had first been drawn to the question of factory labour in India by certain remarks which were made a few years ago in a report on the administration of the Cotton Department in Bombay. It was said in that report that the poorer classes derived great benefit from the mills, but that the advantage carried with it a corresponding and serious disadvantage. The hours of labour, it was observed, were not limited by any Government regulation; the working day was undoubtedly long; the nature of the work was fatiguing; whilst women and children were largely employed—and generally, without any periodically recurring day for rest like Sunday. It was pointed out that the physical wear and tear of the employed must therefore be considerable; and that it was useless to expect that greater consideration would be shown to the female and juvenile hands by the mill-owner, husband or parent in this country than had been exhibited by and towards the same classes at home. Those remarks had attracted attention, and had led to a correspondence the result of

which had been the appointment of a Commission by the Bombay Government with instructions to investigate and report upon the subject. It appeared from the report made to the Government of Bombay by that Committee that the witnesses whom it examined were divided as to the necessity of legislation; but, on the whole, they might be considered to have given their evidence in favour of a simple and plain enactment dealing fairly with the subject and not entering into too much detail. The members of the Commission themselves were not unanimous in their recommendations; but the official members and medical officers advised the enactment of a simple law regulating the hours of employment of children and requiring that machinery should be properly fenced. They were further of opinion that the Act should be passed by the Government of India, and should be applied to the whole of British India.

Upon receipt of the report of this Commission further inquiry had been made from all Local Governments in order to ascertain whether the precautions which had been recommended for Bombay were necessary elsewhere. The result of the inquiry so made was generally creditable to the humanity and public spirit of the mill-owners and managers. The evidence went to show that the factory people were, as a body, in many respects quite as well, if not better, off than most persons of the same position in life who were not employed in factories. It was clear, however, that as regarded the employment of children and the protection of machinery there was room for abuses; that these in some places already existed, and that there was good reason to apprehend their increase with increased competition. It was shown also that Bombay was not the only province in which legislation was required, and that the evils described were making their appearance under other Governments. A good case, therefore, was shown to exist for the enactment of a regulating measure. The most convenient form for such a measure seemed to be that of a single uniform law, not extending to the whole of India, but applicable to any part of it, when needed. No good object would be gained by extending it at once to the whole of the country. Many provinces had no factories at all within the meaning of the Act, and nothing but trouble would be caused by encumbering their Statute-books with an unnecessary Act. The ends in view could be sufficiently attained if the Bill were framed as a permissive measure, which could be put in force by Local Governments when occasion arose; and this, accordingly, was the form that would be given to the Bill which he desired to introduce.

As regarded the scope of the Bill, its provisions would be limited strictly to those points for which legislation had been shown to be necessary. It was most important that nothing should be done which could check the development of manufacturing industries in India. From every point of view it was desirable that this field for capital and labour should be developed and extended to the utmost, and especially because it helped to relieve the pressure of the agricultural population upon the land. The great body of the people in India had now no employment but that of agriculture; and the result was that in many parts it was becoming daily more difficult for all of them to obtain a livelihood from the soil. The obvious dangers of this overcrowding had been brought into special notice during the famines that had lately afflicted such large parts of India. The Bill, therefore, which he wished to introduce would be carefully framed, so as to offer no obstacle to the free growth of manufacturing industries. It contemplated no interference with the due freedom of employers and employed. They would be left at liberty to make any arrangements which they might think most conducive to their own interests. It would provide only for the two objects of affording security to life and limb from accident, and of protecting children and young persons who had not attained to an age at which they would be considered free agents from being overtasked. It was not proposed to introduce into the Bill any of the other points for which legislation had been found necessary at home. The differences between England and India, of climate, character, and habits of life of the people were so great that much which was needed there would not only be inapplicable but perhaps actually injurious here. The two points, however, which he had specified plainly formed part of the duty of protection which was

imposed upon every Government, and he did not think that any reasonable objection could be offered to legislation for such a purpose.

The Bill would contain nothing further except certain provisions enabling Local Governments to arrange for the inspection of factories and to compel the owners or managers of factories to report accidents when they occurred. Without these powers, the two principal objects of the Bill which he was advocating could not be attained.

He had now explained the necessity of legislation and the scope of the proposed Bill. He would not detain the Council longer by referring to matters of detail. These could be better dealt with at a later stage, if permission to introduce the Bill should be given on the present occasion.

The Hon'ble MR. HOPE said that the subject on which it was proposed to legislate was an extremely important one. It was one in which he took a great interest, and which, owing to the presence of factories not merely in Bombay but in districts of which he had had charge for a considerable number of years, he had had no small opportunities of studying. The policy of interfering with the manufacturing industries in India was one which appeared open to considerable question. At the same time he could not but reserve any actual formation of opinion upon the contemplated measure until he had had an opportunity of seeing it. He would only now say that he trusted that full information would be placed at the disposal of Members of Council as to the grounds upon which it had been considered desirable to legislate.

The Motion was put and agreed to.

LEGAL PRACTITIONERS BILL.

The Hon'ble MR. STOKES presented the final Report of the Select Committee on the Bill to amend the Pleaders, Mukhtárs and Revenue Agents Act, 1865.

The Council adjourned to Friday, the 24th October, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

SIMLA;
The 17th October, 1879.

NOTE.—The meeting which was originally fixed for Tuesday, the 14th October, 1879, was postponed to Friday, the 17th October, 1879.

Printed and published for the GOVT. OF INDIA, *in the* GOVT. CENTRAL BRANCH PRESS, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 44.] CALCUTTA, SATURDAY, NOVEMBER 1, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

The net increase is 83,242 acres.
Decrease on perennial canals 48,806 acres.
* The kharif area given in the comparative statement for 1877-78 was 139,696 acres, but this corrected area, as given in the Revenue Report, is 125,230 acres. The increase (12,216 acres) here shown is the difference between the latter figures and the kharif area for 1878-79.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 28th OCTOBER 1879.

GENERAL REMARKS.—In Madras there has been general rain, more is wanted in places; the north-east monsoon appears to have set in mildly; prospects are, on the whole, fair. In Bombay rain has fallen in Kurrachee and the Southern Mahratta Country, it is wanted in the Deccan; fever is very prevalent in Guzerat; crops are generally good. In Bengal rain fell in some districts in the beginning of the week, more is required in the Burdwan division and the 24-Pergunnahs; the autumn harvest is over and *rabi* sowings are progressing satisfactorily; the distress in Dacca is diminishing and relief-houses are being gradually closed. In the North-Western Provinces and Oudh there was no rain; *rabi* sowings continue; fever is still extraordinarily prevalent. In the Punjab also no rain fell during the week; fever is still bad; agricultural prospects are favourable. In the Central Provinces the weather was clear and cool; the *rabi* is being sown; prospects of the *kharif* are good. From Burma no report has been received. In Assam there has been slight rain; prospects are satisfactory. Good rain has fallen in Mysore and Coorg and improved prospects there, but more is needed. In Berar, Hyderabad and the Central India and Rajputana States there has been no rain; prospects remain good. Heavy rain fell in Nepal, and dry weather is now wanted.

Prospects remain satisfactory; the north-east monsoon appears to have set in on the south-east coast; *rabi* sowings are being vigorously pushed on in Northern India.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Oct. 25th)	·98 (average of 9 stations).	*Ragi* 20·78; harvest of early dry crop and sowing of later white *cholum* commenced; standing dry and wet crops thriving.
Kurnool („ „)	1·03 (average of 9 stations).	*Ragi* 24·81; more rain wanted in three talukas; yellow *cholum*, *korra*, and *areka* being harvested in some parts; white *cholum* being sown; pasture and water ample.
Ganjam („ „)	·19 (average of 3 stations).	*Ragi* 27·33.
Kistna („ „)	·80 (average of 8 stations).	*Ragi* 25·56; 31 inches water over ancient; *varige*, oil-seeds, horse-gram, &c., being sown in some places; standing crops suffering from want of rain.
Chingleput (Madras) („ „)	3·35 (average of 11 stations).	*Ragi* 20·71; crops good; ploughing, sowing, and transplanting going on actively; harvest outturn ¼ to ¾; pasturage abundant.
Coimbatore („ „)	1·66 (average of 16 stations).	*Ragi* 22·97; standing crops withering in six talukas; harvest of paddy and *ragi* in five talukas, outturn, paddy ½ to ¾, *ragi* ½ to full.
Tanjore („ „)	5·36 (average of 13 stations).	*Ragi* 25·96; crops good; harvest of paddy, *ragi*, *cholum*, and *cumboo*, outturn ¼ to full.
Madura („ „)	1·32 (average of 10 stations).	*Ragi* 17·87.
Malabar („ „)	3·72 (average of 14 stations).	*Ragi* 20·0; second crop cultivation progressing.
Travancore ...	.....	No report received.
		General Remarks.—General prospects generally fair.
Bombay (Oct. 29th)—		
Kurrachee ...	·71 at Jerruck on the 18th instant.	River at Kotree on 26th—6½ feet, last year on same date 9½ feet; fever prevalent; some cattle-disease in Sehwan, Shâhbanda, and Mirpur Batoro.
Hyderabad ...	.....	*Kharif* reapings nearly finished; *rabi* sowings continue; locusts about, no damage; small-pox in taluka Naushahro; fever general; weather seasonable.
Ahmedabad ...	.....	*Bajri* harvest continues; other crops excellent; fever still very prevalent.
Baroda ...	.....	Fever continues, very prevalent in city, 172 deaths; harvesting continues.
Surat ...	.....	Crops good; *bajri* and rice nearly harvested; *rabi* sowing progressing; cholera and fever in 5 talukas.
Násik ...	.....	Weather bright; nights cold; *bajri* harvest progressing; *rabi* sowing well advanced.
Colaba (Bombay) ...	.....	Air abnormally dry; wind normal; weather fine.
Poona (Oct. 26th)	.....	Prices of *bajri* and *jowari* in the district falling.
Ahmednagar ...	.....	Reaping of *bajri* and sowing of *rabi* approaching completion; rain wanted in Shrigonda, Karjat, and Sheogaon; injury by rats in parts of Párner.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Sholapore ...	.....	Rain desirable; *kharif* being harvested and *rabi* sown.
Dharwar ...	1·25 (average) ...	More rain needed.
Kánara ...	Rain at Karwar 2·149	Total rainfall 129·899; rice crop in ear above Ghat; cattle-disease and fever prevail.
Rajkot ...	.....	Days hot; mornings cool; *kharif* harvest and *rabi* sowing progressing; slight fever.
		General Remarks.—Fever very prevalent in Guzerat; rain wanted in some of the Deccan districts; prospects on the whole good.
Bengal—(Oct. 29th)		
Chittagong ...	1·49	Prospects of crops good; slight damage done by storm on night of 26th; weather now clear; public health good.
Dacca ...	*Nil*	Floods steadily subsiding and *kalai* being sown; *haimanti dhan* being cut; public health good; relief-houses being gradually closed; common rice, new, 16 seers.
24-Pergunnahs (Calcutta)	·35	Prospects of *aman* good, an average outturn expected; *aus* harvested; land being prepared for cold weather crops; common rice 9 to 11½ seers; fever in some places; inundation subsided and rivers nearly come down to their normal state.
Moorshedabad ...	*Nil*	Prospects of paddy and *kalai* good; lands being prepared for winter crops, and in some places sowings commenced; mild fever reported from almost all thanas; cattle-disease still in parts of Jungypore subdivision; want of fodder still reported from thana Gowas; zemindars and mahajans assisting ryots as before, and labourers now getting work in fields and on roads; common rice averages 12 seers.
Rajshahye ...	*Nil*	Weather clear and fine; slight rain at Nattore; prospects of winter rice good; ploughing for *rabi* commenced; common rice 11½ to 12 seers.
Burdwan ...	*Nil*	Crop prospects pretty good, except in Bood-Bood; general health fair.
Rungpore ...	·13	Prospects of crops favourable; public health good.
Bhágalpur ...	*Nil*	Rice prospects excellent; *rabi* sowings progressing; common rice 14 seers; public health improving.
Purneah ...	1·45	Prospects of *aghani* and *rabi* good; possibly in tracts *kalai* will give a short outturn; *rabi* ploughing rapidly drawing to completion; health of people not bad; cattle still suffer from foot-and-mouth disease; inundations subsided; rivers continue full.
Patna ...	*Nil*	Weather fine; prospects excellent.
Durbhanga ...	*Nil*	*Dhan* promises well; prices falling; fever and cattle-disease in Madhoolani.
Hazáribágh ...	*Nil*	Weather growing colder every day; prospects of crops excellent; prices stationary; health good.
Cuttack ...	*Nil*	*Beali* gathered; *laghu* and *saradh* in ear; *rabi* progressing favourably; public health good.
		General Remarks.—Rain in many places in beginning of week, but appears ceasing and cold weather setting in; prospects of rice generally good, but more rain wanted in parts of Burdwan division and 24-Pergunnahs; ploughing and sowing for *rabi* crops progressing satisfactorily; autumn harvest now generally over; in Chumparun autumn crops much damaged by late heavy rain and floods; in Chittagong a storm on 26th caused slight damage; distress in Dacca diminishing, floods subsiding, and rivers rapidly falling; public health generally good, but fever prevalent in places.
N.-W. P. and Oudh—		
Benares (Oct. 28th)	.....	Prospects good; *rabi* sowings in progress; fever prevalent.
Allahabad („ „)	*Nil*	Clear, dry weather; westerly wind; fever abating; wheat 13 $\frac{5}{16}$, coarse *chanwal* 19, unhusked *dhan* 39½ seers.
Gorakhpur („ 29th)	*Nil*	*Rabi* sowings in progress; agricultural prospects good; fever continues.
Jhansi („ „)	*Nil*	Sowing for *rabi* in progress; fever still prevalent; prices stationary.
Agra („ 28th)	.....	*Bajra, makka, kangnee,* and *jowar* is being reaped; *rabi* sowings progressing; health improving; weather seasonable.
Bareilly („ 29th)	.....	Weather clear; fever abating.
Meerut („ „)	.....	Weather clear; wind west; much colder; fever and ague still bad; wheat, gram and barley sown; cheapest wheat 14¼, barley 20¼, and gram 15½ seers.
Kumaun („ 27th)	.....	Fine weather; *kharif* harvest being cut; general health good.
Lucknow („ 29th)	.....	Weather seasonable; fever still prevalent; barley 19, and small millett 19, seers.
Partabgarh („ 27th)	*Nil*	Weather fine and clear; agricultural operations progressing; fever cases less this week; wind westerly; cattle-disease decreasing.
Sitapur („ 29th)	.....	Weather fine; fever still prevalent.
Fyzabad („ „)	*Nil*	Ague prevails in district.
		General Remarks.—No rain during the week; prospects favourable and weather seasonable; fever and ague still prevalent; *kharif* harvest being cut and *rabi* sowings progressing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—(Oct. 28th)—		
Delhi ...	*Nil*	Prices steady; fever prevalent.
Hissar ...	*Nil*	*Kharif* being harvested; *rabi* sowings in progress; prices steady; weather seasonable; fever still prevalent.
Umballa ...	*Nil*	*Kharif* being harvested; *rabi* sowings commenced; health fair.
Jullundur ...	*Nil*	Prospects good; prices steady; fever prevalent.
Lahore ...	*Nil*	Crops good; health good; fever about.
Ferozepore ...	*Nil*	Prospects fair; prices steady.
Siálkot ...	*Nil*	
Ráwalpindi ...	*Nil*	Fever prevalent.
Peshawar ...	.....	No report received.
Mooltan ...	*Nil*	*Kharif* crops being cut; sowings in progress; prices steady; health good.
Dera Ismail Khan ...	*Nil*	Harvest good; sowings in progress; prices stationary.
		General Remarks.—Agricultural prospects continue favourable; general health good.
Central Provinces—		
Nágpur (Oct. 29th)	.....	Clear, cool; prospects of *kharif* crops favourable; *rabi* sowings well forward; health good.
Jubbulpore ...	.....	Clear, cool; cotton doing well; *kharif* harvesting; *rabi* sowings going on; small-pox decreasing; fever prevalent; prices of wheat and gram rising, of rice stationary.
Saugor ...	.....	Clear, cool; cotton in blossom; *kharif* crops reaping; *rabi* sowings continue; fever and small-pox decreasing; prices of *jowar* falling, of other staples rising.
Seoni ...	.....	Clear, cool; prospects of *kharif* favourable; *rabi* sowings continue; few cases of cholera.
Hoshangabad ...	.....	Cool; cotton and *jowar* doing well; *rabi* sowings commenced; fever prevalent.
Raipur (Oct. 25th)	.....	Clear; prospects of *kharif* crops, except cotton, favourable; cattle-disease in two tehsils; prices stationary.
Sambalpur („ 24th)	.....	Clear; rice harvest progressing; small-pox continues; fever prevalent.
		General Remarks.—Clear and cool; early rice and other *kharif* crops being harvested; *rabi* sowings continue; prospects generally good; prices stationary.
British Burma ..	.....	No report received.
Assam—		
Gauháti (Oct. 29th)	·66	Weather seasonable; prospects of crops favourable.
Sylhet („ „)	·04	Price of rice falling; prospects good.
Cachar („ „)	*Nil*	Weather rather warm for the season; prospects of crops not changed; common rice 13$\frac{5}{16}$ seers per rupee; public health fair.
Dibrugarh („ 27th)	*Nil*	Prospects of crops favourable; small-pox disappeared.
Berar & Hyderabad—(Oct. 29th)		
Amráoti ...	.....	*Kharif* crops ripening; *rabi* sowings continued.
Akola ...	.....	Harvest prospects good.
Hyderabad ...	*Nil*	*Kharif* crops being harvested; other crops promising; fever and cattle-disease prevalent in some places.
Mysore and Coorg—(Oct. 29th)		
Bangalore ...	·73	The fall having been almost general, crops have somewhat revived; more rain is however needed; prices stationary; health good.
Mercara ...	2·79	
Mysore ...	.....	No report received.
Central India States (Oct. 28th)—		
Indore ...	*Nil*	All promising; weather favorable for ploughing and sowing; wheat 8 seers 6 chitaks, gram 10 seers.
Morar (Gwalior) ...	*Nil*	
Sutna ...	*Nil*	Prospects favorable; *jowar* 17 seers.
Rutlam ...	*Nil*	Weather clear; fever prevailing; agricultural operations commenced.
Neemuch ...	*Nil*	*Rabi* sowing progressing.
Goona ...	*Nil*	Fever prevalent; wheat 14 seers; *kharif* crop very good.
Bhopal ...	*Nil*	Weather clear; prospects of crops good; high prices continue.
Ágar ...	*Nil*	Prospects good; fever existing.
Nowgong ...	*Nil*	
Mánpur ...	*Nil*	Ploughing of *rabi* continues; weather clear; fever very prevalent; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Oct. 29th)	.....	Clear; cool; fever very prevalent.
Serohi ...	.....	No report received.
Marwar („ 24th)	.....	Tanks and wells almost full; fever still prevalent; crops being gathered; outturn good; weather almost clear.
Meywar ...	.....	Tanks, wells, and health good; ploughing and sowing for *rabi* crops.
Harowtee („ 25th)	.....	Fever prevalent; prospects good.
Jhailawar („ 23rd)	.....	Fever prevalent; *kharif* reaping continues.
Ajmere („ 29th)	.....	Prospects favourable; sowing for *rabi* commenced; health improving.
Jeypore ...	.....	Harvesting progressing favourably; fever still prevalent; weather seasonable.
Bhurtpore („ 28th)	.....	Wind north-westerly; clear; fever unabated.
Ulwur ...	.....	*Rabi* operations progressing; fever still prevalent.
Nepal—(Oct. 21st)—		
Katmandú ...	4·02	Sunshine needed for the rice.

DEPARTMENT OF FINANCE AND COMMERCE.

CHINESE TEA-TRADE WITH TIBET.

REPORT BY HER MAJESTY'S CONSUL AT CHUNG-CHING ON THE CHINESE TEA-TRADE WITH TIBET.

Though very widely cultivated in Ssŭ-ch'uan, tea does not form the subject of any considerable export. With certain exceptions, it merely supplies the local consumption, and with respect to the probability of its ever being exported to foreign countries, it is enough to say that it is generally insipid to European taste, and in many cases actually nauseous. In the hilly country which bounds Ssŭ-ch'uan on the east, a variety is grown which possesses a good reputation among the natives, but the quantity is small. The Eastern provinces already furnish more tea than the foreign market demands, and there seems reason to doubt whether even that demand will be maintained in the face of the superior and acknowledged excellence of Indian teas.

There is, however, one point of great and increasing interest in this connexion, *viz.*, the export of Ssŭ-ch'uan tea into Tibetan countries. A good deal has been written, without much circumstantial foundation, on this subject, in support of a project for supplying Tibet with Assam teas. The matter resolves itself into the consideration of route, quality, quantity and price—subjects on which I have collected some fairly precise information.

The area on which tea for the Tibetan market is grown, and of which the city of Yachou may be considered the centre, as it is also the head-quarters of the manufacture, includes six or eight districts, of which the chief are Hung-ya, Ming-shan, Ch'iung-chou, Lo-shan and Yung-ching, covering roughly about 25,00 square miles. The trees are grown on the hill-sides or in the hedgerows of the fields, and, though abundant, are not conspicuous; indeed it requires a search to discover them, round Yung-ching at any rate, among the thick brush which covers everything but the cultivated fields. They are scrubby and straggling plants, very different in appearance from the carefully tended bushes of Eastern China, and are allowed to attain a much greater height, reaching to 9 or 10 feet, perhaps, on the average. The coarser leaves are about 2½ inches long. I could not discover that any care is devoted to them; but they seem to

require very little, as far as the mere health of the plant is concerned, and not the excellence of the leaves. The native belief, that they are liable to injury from the attacks of certain boring insects, is probably erroneous. Insects rarely attack any species of tree unless it is already diseased.

Mr. T. T. Cooper's experience of the Yung-ching tea-plants is much the same as my own. "Unlike that which produces the tea exported to Europe," he writes, "it is a tall tree, often fifteen feet high, with a large and coarse leaf. Little care is bestowed on the cultivation. It is often planted along the borders of fields and homesteads, each farmer gathering his small crop of tea, and finding a ready sale for it in Yachou to merchants who pay the Government enormous sums for the monopoly." This account contrasts strongly with the same traveller's description of the tea plantations *below* Yachou, where, he says, the best brick-tea for Tibet is grown. "The whole country formed a series of large gardens, without a single fence to divide the different plantations, and kept in the most scrupulous order, the trees, which stood about four feet high, being neatly trimmed, and planted in rows four feet apart. The numerous homesteads which were visible were surrounded with belts of large tea trees, growing to a height of twelve to fifteen feet." I passed through the same country, but was not so strongly impressed with the extent of the cultivation; but in any case, the Tibetan tea-trade draws a very small contribution from trim plantations, but is supplied from shrubs which are left pretty much to themselves, and for all the traveller can see might be wild plants.

They yield tea available for the market in the fourth year of growth, and for many subsequent years. The harvest is ready in the end of June, and there are three pickings; the best is the young upper leaves from trees of all ages, the second consists of the leaves of young plants, and the third includes everything else that can be spared, being mostly twigs and sticks, with a scant proportion of coarse foliage. The Chinese are epicures enough to retain all the first quality for themselves, and most of the second, asserting that the Tibetans,—whom, by the way, they regard as savages,—would not appreciate them. The tea of Tibetan consumption consists, therefore, almost entirely of the merest refuse. I saw great quantities of this being brought in from the country on the backs of coolies in bundles eight feet long by nearly a yard broad, and supposed it to be fuel; it looks like brushwood, and is in fact merely branches broken off the trees and dried in the sun, without any pretence at picking. It sells in Yung-ching for 2,000 cash a picul at the outside, and its quality may be judged from a comparison of this price with that of the common tea drunk by the poorer classes in the neighbourhood, which is about 20,000 cash a picul. It is therefore no exaggeration to say that the tea of the Tibetan market is ten times worse than the worst tea in China.

Having purchased this tea brushwood, the manufacturers proceed to make it up for the ignorant Tibetan, as they themselves call him. The leaves and twigs, already sun-dried, are steamed in a cloth suspended over a boiler. The mould stands close by, four stout boards set up on end and secured with bitts, the interior having a section of about 9 inches by $3\frac{1}{2}$. Inside it is placed a neatly woven mat basket, somewhat smaller in section than the mould; the steamed and softened leaves with the finer twigs are dropped into the cavity by small quantities at a time, and a little rice-water being added to agglutinate the mass, it is consolidated, layer after layer, by forcible blows from a wooden rammer shod with a heavy iron shoe. The coarser sticks are dried and ground to powder, and interspersed *ad libitum* among the conglomerate of leaves and twigs. The basket being flexible, and a little smaller than the mould, keeps the cake from taking the angular shape which it would otherwise assume; the corners being rounded off, it is less liable to injury from the hard knocks it will have to encounter on the road to Tibet. The mould is taken to pieces, the cake, with its mat envelope, is brought back to the fire over which its composition was originally steamed, and when it is thoroughly dried, the ends of the envelope are closed up, and the long narrow package, called a "pao," is ready for transport to Ta-chien-lu. This was the process of manufacture as I saw it conducted in Yung-ching. The cake thus formed is fairly dense when it issues from the mould; but the drying and the

casualties of the road considerably loosen its consistency; and as the tea is weighed in its steamed condition, the theoretical weight is much reduced when it is dried. The quantity of wet tea in the Yung-ching packages is fourteen catties, which diminish to about eleven. The Yachou cakes are longer, and weigh, or purport to weigh, eighteen catties in the saturated state. On arrival at Ta-chien-lu the cakes are cut into portions which then receive the name of "bricks" (chuan) and are repacked. "Brick," however, is hardly an appropriate term. They are rather clods of not very closely-matted foliage some nine or ten inches by seven, and three inches thick, containing a good deal more stick than leaf.

The best kind of tea, Mr. Cooper was informed, "is spread in the sun till slightly withered, and then rolled with the hand until moist with the exudation of the sap. In this state it is rolled into balls about the size of a large tea-cup, and laid up until it ferments. It is then ready for the wooden brick moulds." I heard nothing of this, but there is no reason for doubting the credibility of Mr. Cooper's informant. Such a preparation must, however, be rare and exceptional.

The packages are conveyed to Ta-chien-lu by tea-porters or on mule-bac A porter carries twice as much as a mule, but a mule travels a good deal more than twice as fast as a porter. The man's burden is arranged on a light wooden framework disposed along the whole of his back, and rising in a curve over his shoulders and high above his head, the structure being supported by a couple of slings, generally made of coir, through which his arms are passed. The great weights that can be carried in this manner are certainly astonishing. V. Richthofen writes, "there is probably no road in the world where such heavy loads are carried by man across high mountains. Six or seven 'pao' is considered a small load; ten or eleven is the average; and, incredible as it may appear, I have seen frequently as much as thirteen carried by one man. I was assured that some men carry 18 'pao,' or 324 catties." I have several times seen 18 "pao" carried by a single porter, and on one occasion I overtook a rather slenderly built carrier freighted with 22 of the large Yachou packages. Although a pao weighs, in reality, considerably less than 18 catties, this man must have had, at the lowest computation, more than four hundred English pounds on his back. I noticed that the greatest burdens were carried, not by the most muscular men, but by those of the straightest conformation; and that these porters, in spite of their excessive loads, suffer less from varicose swellings than ordinary chair-coolies. Laden thus, they take a rest after every few hundred yards' progress, and as it would be impossible for the carrier to raise his burden if it were deposited on the ground, he carries a kind of short crutch with which he supports it, without releasing himself from the slings. Travelling six or seven miles a day, and resting in the inns at night, these porters toil with their prodigious loads over two mountain passes, 7,000 feet above their starting place, along a rudely paved road, where every step of the way must be picked, making the 120 miles from Yachou to Ta-chien-lu in 20 days or less, and receiving from 250 to 300 cash a day according to the number of packages they carry. The manner in which the loads are disposed is well depicted in an illustration to Mr. Cooper's work, but the packages are larger, and the burden much more top-heavy than he has represented them.

Inquiries into the quantity of the export are involved in much difficulty on account of the variation in the weights of the different packages. The best approximation *to the total production* is made by taking as a basis the number of permits (yin) issued annually in Yachou and Yung-ching. Three hundred cash is the duty paid for each permit; in Yachou a permit has to be taken out for every five packages; in Yung-ching for every six. The annual Yachou issue of these passes is about 80,000, and that of Yung-ching 60,000, giving 400,000 and 360,000, respectively, as the total number of packages. The Yung-ching packages contain nominally between 14 and 15 catties of tea, and those of Yachou between 17 and 18 catties; but they have been gradually scamped until a brick of 60 nominal ounces now only weighs 44 ounces or less. Applying this correction, we obtain a total export of nine million catties, or twelve million English pounds. But this is merely a rough estimate, since the number of

permits could only be ascertained within 15,000 or 20,000 of the truth, and they possibly do not represent the Tibetan trade alone; a good deal of the Yachou tea, in all probability, finds its way northwards to the districts round Mu-p'ing by other routes.

I obtained more precise figures in Ta-chien-lu. By a series of inquiries among the traders I learned that the annual duty-paying export lies between 500,000 and 600,000 packages of four bricks each; the mean of these gives 2,200,000 bricks.

The duty-paying unit in Ta-chien-lu is the "load," of six packages, nominally weighing 96 catties. I ascertained indirectly from the customs that duties were collected in 1877 upon 108,000 loads, otherwise 2,592,000 bricks, agreeing perfectly well with the traders' estimate. This result may be accepted with full confidence.

Precision must not be expected in the reduction of bricks to pounds. Leaving out of question the superior and exceptional teas, which form an infinitesimal fraction of the whole export, there remain only two qualities, or rather prices, although there are several kinds. A brick of either of these weighs, theoretically, 60 Chinese ounces; but, actually, the better quality only balances from 55 to 60 ounces, and the other from 42 to 45. The obstacle to exactness lies in the impossibility of knowing what proportion the export of large bricks bears to that of the smaller. I was assured that it is "as 2 to 8," but have no means of checking the statement. Accepting it, however, for want of a better, this will give as the total Tibetan export from Ta-chien-lu to Batang almost exactly ten million English pounds, which, at the prices given below, are worth in Ta-chien-lu Rs. 18,14,400, or say £160,000.

An addition, of no great importance, should perhaps be made for the tea which escapes the payment of duty. The smuggled total cannot be great, since there is but one route to Ta-chien-lu closed in as it approaches the town by steep mountains covered with perpetual snow. But there is an item, too considerable to be altogether neglected, which enters Tibet as part of the baggage of officials, and which escapes all duties except those on the permit. Other goods, such as silk, also cross the frontier in this way; but it is mostly by means of tea that the Chinese resident officials feather their nests. Of these administrators and their gains, the Tibetans say, "they come to our country without trowsers, and go away with a thousand baggage-yaks."

At Ta-chien-lu the tea passes into Tibetan hands, and being wrapped, like all Tibetan goods, in skins, is conveyed on pack-saddles to Batang. The saddle is a much lighter contrivance than the cumbrous framework employed by the Chinese, and is probably equal in efficiency to any that has been invented. Two light boards, not more than 14 inches long, thickly padded with cloth and felt, are connected by two wooden bows. The girth is drawn close to the fore-legs, and a breasting which lies very low down on the animal's breast, is made fast, not to the saddle, but to the girth. A breeching, lying still lower than the breasting, is also connected with the girth; but in addition to this the saddle-boards are secured to a crupper consisting, in the cases I saw, of a straight stick a foot long, although the Tibetans employ for riding ordinary cruppers covered with soft leather. From the bows, which stand high on the animal's back, loops of hide depend, and the packages are inserted into these, or unshipped, almost in an instant. The saddle and all its appurtenances, weighed by myself, balanced sixteen English pounds, which do not of course include the numerous layers of sheep-skin saddle-cloth. The boards are nearer together, and consequently lie much higher on the dorsal ridge than in the European arrangement. They will fit any animal, being equally adaptable by a judicious disposition of saddle-cloths to the prominent chine of a donkey or the rotund hump of a yak. One advantage claimed for the system of suspending the packages in loops is that, if the burden strikes a projecting rock or other obstacle in a dangerous pass, it becomes detached, and falls down the precipice without overbalancing the animal. A horse, mule, or yak carries by this means a load not exceeding 160 lbs.; a "dzo" is capable of supporting 240 lbs. The dzo is a

hybrid between a cow and a yak, and is a much larger beast than his sire. The yak's forehead is round; that of the dzo is flat; his horns are larger and his tail longer and less hairy. He costs three times as much as a yak. The male dzo is the ploughing animal of Tibet. The female yields a greater quantity of milk than any other bovine, and the butter, which keeps good for a whole year, is the best for making tea—a fact which will palliate this digression.

The manufacturer is of course not necessarily, nor I believe often, the exporter. The comparison of expenditure and profit runs thus, taking four bricks of common tea as the unit:—

	Cash.
Eleven catties of leaves, &c.	200
Dues on permit	50
Dues at Lu-ting Bridge and Ta-chien-lu	36
Freight from Yung-ching to Ta-chien-lu	320
Preparation and packing (say)	100
	706
Sale at Ta-chien-lu	1,240
	534

A brick of the common tea, which forms about four-fifths of the whole trade, weighs from 42 to 45 Chinese ounces, or say 60 English, and sells in Ta-chien-lu for tls. 0·2, and in Batang for tls. 0·32 or one rupee. The better quality weighs 76 English ounces, costing one rupee in Ta-chien-lu and tls. 0·45 in Batang. In other words, the price in annas per English pound is—

	Ta-chien-lu (annas).	Batang (annas).
Better quality	$3\frac{4}{10}$	$4\frac{7}{10}$
Common do.	$2\frac{7}{10}$	$4\frac{3}{10}$

I was told that Lhassa prices are about double those of Batang. From Ta-chien-lu to Batang there are 18 stages, and from Batang to Lhassa 46. Any deviation from this main route increases the price enormously; at Yerkalo, for instance, which is only seven stages or so from Batang, but not on the high road, tea is as dear as in Lhassa.

Mr. Cooper was widely misled on these points. He evidently deduced his prices per pound from the cost of a "pao," having understood by that term one of the ordinary packages of 18 theoretical catties. But the "pao," by which permits are issued, and tea is sold and quoted, is five large packages. Mr. Cooper's results* are consequently five times too great. Prices were much the same in his time as at present.

It is probable that most of the tea which leaves Ta-chien-lu is paid for in rupees, as the export of Tibetan woollens cannot do much more than balance the supply of cotton cloth and silk. The rapid influx of these coins during the last fifteen years is remarkable; before that period they were rare, but have now become the currency of Tibet, and are counted, instead of being valued by weight. Great quantities are melted down by the Chinese in Ta-chien-lu, the Tibetans being unable to reduce them. Mr. Cooper alludes to the practice of melting them in Lhassa, but we know from Abbé Huc that the smiths of that city are Nipalese or other foreigners. On my asking a Tibetan why it was necessary to melt them down at all, he replied that if they did not do so, they would have no use for such an immense quantity. It is clear that there must be a trade of no small proportions between Tibet and India. For exchange with Chinese silver in Ta-chien-lu, the rupees are weighed against the silver and two rupees are added for every ten Chinese ounces. Russian roubles are beginning to put in an appearance, but only three of them were found in a payment of 1,800 rupees.

A coin is called in Tibetan "Tchran-ka." Rupees are called "Pei-ling Tchran-ka," *i. e.*, English coins; the derivation of "Pei-ling" is unknown. Another name is "Pei-ling ngo-mu," *i. e.*, English woman-face. Georgian and

* This refers to page 410 of Mr. Cooper's "Pioneer of Commerce;" but what he there writes conflicts with his previous remarks on page 173.

Victorian rupees are distinguished as "P'o-tu" and "Mo-tu," meaning male-head and female-head. Those which bear a crowned presentment of Her Majesty are named "Lama tob-du" or vagabond Lama, the crown having been mistaken for the head-gear of a religious mendicant. The same coin is known to the Chinese as "Lama-t'ou," Lama's head, doubtless a corruption of the Tibetan.

Before the introduction of rupees, tea-bricks were used as currency, and even now in Batang a brick of ordinary tea is not merely worth a rupee, but in a certain sense *is* a rupee, being accepted, without minute regard to weight, just like the silver coin, as legal tender. Since the influx of rupees this tea-coinage has been very seriously debased, having now lost 25 per cent. of its original weight. The system of a double monetary standard is approaching its end, at any rate in Tibet. For in May last the Lamas of the Batang monastery having hoarded a great treasure of bricks, found it impossible to exchange them at par, and had to put up with a loss of 38 per cent.

To the Tibetan tea is more than a luxury; it is an absolute necessary. Deprived of the costly, but indispensable, astringent, he suffers from headache, grows nervous, restless, out of condition, and altogether unhappy. In outlying districts, mothers are careful to keep the seductive beverage from their children for fear lest they should grow up unable, on occasion, to go without it. And yet, to European taste, the infusion, as prepared by Tibetans, is the remotest possible imitation of tea.

The Tibetan tea-pot is a wooden-churn, much like a butter-churn, into which the boiling infusion is poured through a strainer; a little salt is added, and some twenty strokes applied with a dasher pierced with five holes. A lump of butter is then thrown in, and the compound is again churned with from 100 to 150 strokes, administered with much precision and regularity. The tea is then ready for drinking. It will be remarked that, with the substitution of salt for sugar, the Tibetan preparation is of much the same composition as the tea drunk in England; but the presence of the salt is not perceptible, and with the best intention in the world I could detect no flavour of tea. It is impossible accurately to describe the taste of the infusion; but to force a comparison, it is something like weak English tea with rich milk, but without any sugar or *tea*. And yet nobody would mistake it for milk and water, still less for butter and water; for the tea principle affects the flavour, while itself becoming modified into some un-tea-like astringent.

It is evident that astringency is the property desired, seeing that the many thousand Tibetans who cannot afford tea use oakbark in its stead.

The tea-cup of the Tibetan is a wooden bowl, not seldom an object of high price and elaborate workmanship cased in precious metals and encrusted with jewels. In this he allows the tea to stand for a minute or two, and when the butter floats freely on the surface, he blows it off into another bowl. The national farinaceous food is "Tsampa," flour of grilled corn. The consumer takes up a portion of this between the tips of his fingers and thumb, and opening them with a jerk flicks it over the butter; then moulding it into consistency, he eats the immature pie-crust without further formality, washing it down with the tea. This is the characteristic nutriment of Tibetans. Two English pounds of butter and ten ounces of tea are a liberal, but not lavish, allowance for twenty drinkers for one day.

As far as Batang is concerned, there is little prospect in all this of an outlet for Indian tea; but it is difficult to conceive how the idea of trading between Assam and that place could ever have been conceived. It possibly arose from an impression that Batang is a Chinese city, whereas it is a small Tibetan town of 200 houses, eighteen days distant from the true Chinese border by a track which, practically closed in winter, crosses four passes at various elevations between 14,000 and 17,000 feet, according to the careful and corrected observations of Captain Gill. Moreover, when the Chinese border is reached at Ta-chien-lu, the nearest city of any importance, namely, Yachou, is still seven or eight days distant, and has water communication with the sea. Setting aside, for a moment, the Tibetan roads, the only practicable way from Assam to Batang is across the Patkoi hills to Burma, thence into Yunnan by the Sawaddy track,

and so northwards by Weisee, a distance of 750 miles,—a two-months' journey at least in such a country, whereby on arrival at Batang the freight alone, calculated at Tibetan rates, would be half as much again as the market price of Chinese tea.

The most direct road would of course be through Tibetan territory; but if Tibet be open, what purpose can be served by going to Batang? That town is a junction of high roads to Ssŭ-ch'uan, Yunnan, and Lhassa, and is consequently a point of great political importance to the Chinese Government. But its sole commercial significance worth the name, although there is a good deal of peddlery, is derived from the passage through it of Yerkalo salt and Yachou tea on their way westwards. Now Assam is admirably placed for taking this tea-trade in flank, and might even supply Western Tibet, without seriously affecting the Yachou export, since the whole quantity of the latter would only suffice for the consumption of a million Tibetans. The difficulty of crossing the Himalayas may be adduced as the most obvious impediment; but if any track whatever exists—as we know it does—it cannot be more formidable than the icy passes encountered by Abbé Huc on his journey from Lhassa to Ta-chien-lu by the Chinese tea-route.

The prices above quoted of about half a rupee per lb. in Lhassa do not, perhaps, at first sight appear to hold out a very encouraging promise of a direct tea-trade from Assam to Tibet; but, as already remarked, the price rises in a ratio altogether out of proportion to the distance of the market from the tea-route, and very quickly reaches a figure which puts the article beyond the purchasing power of the country people. This state of things arises not from the difficulties and dangers of the bye-roads so much as from the policy of the Lamas, who, being the traders and money-lenders of the country, and the only capitalists, have many motives for confining the traffic in a channel which they can most easily direct to their own advantage. They make greater and steadier profits by restricting the trade to one main line, along which they can monopolise it, than they could by opening new markets in districts at a distance from their lamaserais, where it would be liable to stray from their command. This they can the more easily effect, because the supply of tea is far inferior to the demand, and because it is not subject to much fluctuation. Mr. Cooper writes very strongly on these points, and frequently recurs to them—"The whole business in life of the Tibetans seems to be to procure a sufficiency of tea; and it is no cheap luxury; for the Lamas, keeping in their hands the retail, as the Chinese do the wholesale, trade, by this means reduce the people to absolute dependence on them, exacting in return for the precious article labour and produce. Grain, yaks, sheep, horses, and even children, are given to the rapacious priesthood in payment for tea." This statement may appear to be tainted with exaggeration, but it accords pretty exactly with the account I have received, among others, from an apostate Lama. Under such circumstances, it will be admitted that the free circulation of tea-bricks is not likely to be encouraged. The practice of hoarding tea in the lamaserais is, by itself, sufficiently convincing. It may be taken as certain that the vast majority of Tibetans are unable to procure tea, or at any rate enough of it; that they are eager to purchase it; and that they would pay for it prices of which half a rupee may be regarded as the minimum; moreover, that the districts where it would sell most easily and advantageously are those which are furthest removed from the Chinese tea-route, or, in other words, those which are nearest to Assam. It is superfluous to remark that the merest sweepings of the Assam godowns would make better tea than the Tibetans have ever drunk.

In a few years time, when Tibet has been opened, we shall begin to ask one another how it came about that the most powerful and progressive of Asiatic empires should have suffered the long frontier of its most flourishing provinces to be completely closed for so many years to the passage of any individual of the governing race, and that not by a formidable rival but by one feeble Tibetan State, for there are many Tibetan States besides Lhassa-dé. It is generally assumed that the obstacles to inter-communication are of a physical nature; but if so, there would be no trade, whereas evidences of a very extensive

exchange abound, even so far east as Ta-chien-lu, in the use of rupees and of many articles of Indo-European origin. To mention some of the more trivial—but on account of their very triviality, the more convincing—instances, the common dinner plates of the Tibetans, when they use any, are of tin, stamped in the centre with an effigy of some European celebrity. In those which I examined I recognised the third Napolean, the Prince and Princess of Wales, and Mr. Gladstone, all supposed by the natives to represent Buddhas of more or less sanctity. Round the rim of the plate, in all cases, were stamped the letters of the English alphabet, from A to Z. The most desirable buttons, again, are four-anna pieces, and so strong is the demand, that three of these are worth a rupee. British army buttons are as common as blackberries. Even corkscrews are offered for sale in Ta-chien-lu, although no one can explain their use. The presence of such miscellaneous and cheap articles testifies to the facility of trade, while the great quantity of rupees proves its extent. But although commercial intercourse crosses the whole breadth of Tibetan countries, diplomatic relations have not yet penetrated to the nearest of them, Lhassa-dé. Yet the distance from Calcutta to Lhassa, in a direct line, is less than from Paris to Berlin. Until such relations are established and maintained, there can be no hope whatever of a Tibetan market for Assam teas. Exploring missions, no matter how well organised or amply furnished, can effect nothing in the interest of the trade, so long as the adverse influence of the Resident Chinese Legates and of the Lamas is unchecked. No matter how short the route, or convenient the road, the hostility of these two parties would be roused to the utmost against any project for a tea-trade. Even if the goods were admitted, which is in the last degree improbable, they would be burdened with such a weight of Tibetan dues and Chinese Likin, that the British frontier would be almost the limit of profitable sale. But if the opposition were kept within fair and reasonable bounds by the exchange of a convention and the introduction of diplomatic machinery to give it effective action, the Tibetans, with their fondness for tea and their dislike of Chinamen, would be the first to welcome the best wares to the best market by the shortest road.

In the mountainous region west of Kiating I discovered two kinds of tea of so unexpected a nature that I scarcely venture to mention them. In the monasteries on Mount O-mi, or as it is locally named, for brevity's sake, Mount O, I was regaled by the monks with an infusion of tea which is naturally sweet, tasting like coarse congou with a plentiful addition of brown sugar. It is only grown on the slopes of the mountain, and by the monks; two days' journey further west no one had even heard of its existence. I did not see the plant growing, and it is just possible that it is not tea at all; the prepared leaf, however, has all the appearance of tea, and no one on whom I have tried the experiment has taken it for anything else, or remarked upon its peculiarity, beyond inquiring why I put so much sugar in it. I am forwarding a specimen to Shanghai, without giving any hint of its singularity, for professional examination, in order that a tea-inspector's report may be appended to these notes.

The other variety, preposterous as the statement may appear, has a natural flavour of milk, or perhaps more exactly of butter. What is more interesting than this oddity is the fact that it is wild tea, growing in its native elevated habitat without any aid from human cultivation. An unimpeachable instance of a wild tea-plant has never yet been adduced in China. It has been supposed to occur in Formosa, but the specimens I found in the north of that island had evidently strayed from cultivation. The practice of drinking an infusion made from the wild plant has, I believe, never been met with anywhere. The wild tea in question is found in the uninhabited wilderness west of Kiating and south of Yachou, at heights of 6,000 feet and upwards, and was described to me as a leafy shrub fifteen feet high, with a stem some four inches thick. The wild mulberry is found in the same locality. Every part of the plant, except the root, is used for making the infusion. The wood is chopped up and put into a kettle of water with the dried leaves and twigs, and being boiled yields a strongly coloured but weak tea, possessing a buttery flavour which gives it a certain resemblance to the Tibetan preparation. It cannot be obtained

in Yachou. The only place where I found it in use is the Huang-mu-ch'ang plateau, a terrace perched among the stupendous gorges of the T'ung river. I only brought away a small quantity, which unluckily was drunk by mistake; but I hope next summer to make a general botanical expedition to the district, when it will be easy to procure a plentiful specimen.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RULES FOR ENQUIRING INTO, AND REPORTING ON, SERIOUS ACCIDENTS ON STATE RAILWAYS.

Nos. 28-42 R. T., dated Simla, 7th October 1879.

RESOLUTION.

Read again—

Public Works Department Resolution Nos. 1633-50R., dated 22nd April 1879, forwarding rules on the above subject prescribed by the Governor General in Council.

Read also—

Letter from Home, Revenue and Agricultural Department, No. 310, dated 30th September 1879, forwarding revised rules prescribed by the Governor General in Council.

OBSERVATIONS.—The revision of the rules forwarded with the Resolution now read again has been rendered necessary by the operation of Railway Act IV of 1879.

ORDER.—Ordered, that this Resolution and the revised rules be forwarded to the Governments of Bombay, Bengal, and the North-Western Provinces and Oudh; the Chief Commissioners, Central Provinces and British Burma; the Resident at Hyderabad and the Director General of Railways for information and guidance; to the Governments of Madras and the Punjab, the Chief Commissioner of Assam, the Agents to the Governor General for Central India and Rajputana, and the Consulting Engineer for Guaranteed Railways, Lucknow, for information; also to the Foreign Department for communication to the Chief Commissioner of Mysore.

Ordered also, that this Resolution be forwarded to the Home, Revenue and Agricultural Department for information, and that it and the rules be published in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Major-Genl., R.E.,*
Offg. Depy. Secy. to the Govt. of India.

RULES FOR ENQUIRING INTO, AND REPORTING ON, SERIOUS ACCIDENTS ON STATE RAILWAYS.

GENERAL.

The following Rules are prescribed by the Governor General in Council for enquiring into, and reporting on, serious accidents on State Railways, whether open for public traffic or under construction:—

Serious accidents are accidents attended with loss of human life, or serious injury to person or property; or accidents of a description usually attended with such loss or injury.

2. In the case of any State Railway passing through Native States, the Government of India will, from time to time, direct what official shall, for the purposes of these Rules, be regarded as the Magistrate of the District in respect of the portions of the Railway situate in each such State.

3. Throughout these Rules, the words "District Superintendent of Police" of the District in which the occurrence takes place shall be substituted for the words "Railway Police Superintendent" in respect of State Railways whereon a Railway Police Superintendentship has not been established. The word "Manager" shall include "Engineer-in-Chief" or other officer in charge of any State Railway.

The officer authorized by Government to investigate and report on accidents is called the "Government Inspector."

SECTION I.

Duties of Managers and Railway Officers.

4. On the occurrence of any serious railway accident, it shall be the duty of the nearest Station Master, or, where there is no Station Master, the officer in charge of the section of the Railway on which the accident occurs, to give immediate notice thereof in writing, or by telegraph when possible—

(*a*) to the nearest Magistrate in the district in which the accident occurred;

(*b*) to the Railway Police Superintendent;

(*c*) to the Officer in charge of the police station in the jurisdiction of which the accident occurred.

5. It shall be the duty of the Manager to give notice of the accident—

(*a*) without delay to the Government Inspector, who has been authorized by Government to investigate and report on such accidents;

(*b*) to the Secretary to the Local Government in the Judicial Department within twelve hours after the occurrence, in order that the Local Government may, if necessary, watch over the investigation.

6. The Manager shall, in cases of serious personal injury, afford medical aid to the sufferers, and pay all their expenses while in hospital.

7. The Manager shall cause departmental enquiry to be held promptly for the thorough investigation of the causes of every serious accident, and shall require the Superintendent of Railway Police to be present at the enquiry, if possible: in his unavoidable absence, an officer of police should be present. Also, he shall communicate the result of the enquiries to the Magistrate mentioned in Rule 4, and, if on open line, to the Government Inspector, with a statement of the persons, if any, whom the Railway authorities intend to prosecute, unless the matter should form the subject of a magisterial enquiry under Rule 8.

8. It shall be the duty of the Manager to bring to justice all Railway subordinates guilty of crime or of breaches of the Indian Railway Act, or of the General Rules and Regulations, calculated to cause serious accident; and to require the Superintendent of Railway Police to make a report of all cases in which there appears to be ground for suspecting Railway subordinates of such misconduct. Also, he shall require the Superintendent of Railway Police to prosecute all persons whom it may be decided should be prosecuted.

9. The Manager shall facilitate the movements of the Medical Officers, the Police, the Magistrate, the Government Inspector and others concerned, in reaching promptly the scene of the accident. And he shall assist these authorities in conducting enquiries, and depute some responsible and intelligent officer to aid them in obtaining evidence, and securing the attendance of the Railway subordinates.

10. In cases in which it is the duty of the Railway Officers to arrest any offender under Sections 48 and 49 of Act IV of 1879 or otherwise, the Manager shall see that he is at once arrested, or, when such offender is himself a Railway Officer whose removal would cause danger or grave inconvenience, that precautions are taken to prevent his escape, pending the arrival of a substitute.

11. He shall arrange for the attendance at the Court or place of enquiry of any officer or servant of the Railway, upon the requisition of the Magistrate or other Civil Officer.

12. He shall maintain at each Railway Station, or, in the case of lines under construction, in each divisional office, a list of Magistrates or other Officers (such list to be furnished by the Magistrate having jurisdiction over the place where the station is situate), to whom reports of accidents should be made; and he shall furnish Magistrates with a list of Railway Officers to whom any summons may be sent for service on subordinate Railway servants.

13. In the case of judicial enquiries, he shall report the result to his immediate superior, and forward copy of the decision of the Court.

14. He shall report monthly to his immediate superior all railway accidents of a serious nature, and report what steps have been, or are being, taken in order to prevent recurrence of similar accidents.

15. He shall issue such detailed instructions as will give effect to the foregoing Rules, and furnish his immediate superior with copy of all such detailed instructions as issued.

SECTION II.

Duties of the Railway and District Police.

16. An investigation may be made by the Railway Police in the case of any Railway accident.

17. Where there is no Railway Police, the duties imposed by these Rules on Railway Police must be discharged by the District Police, in addition to their duties as such.

18. In the case of serious accidents, the Railway Police Superintendent, if any, or the District Superintendent of Police, shall proceed without delay to the scene of the accident. If either officer be himself unable so to proceed, he shall depute a subordinate, who, in the case of the District Police, shall be an Assistant Superintendent of Police where there is one or where there is no such officer an Inspector. The officer unable to proceed shall also at once inform his departmental superior and the Magistrate of the District.

19. Such accident shall forthwith be investigated by the Railway Police or the District Police, as the case may be. If the investigation be made by the Railway Police, immediate information shall be given to the District Police, either direct or through the Magistrate of the District. The result of the police investigation, prescribed by this Rule, shall be reported to the Manager of the Railway and to the Magistrate of the District.

20. When the investigation is made by the Railway Police, and officers of the District Police arrive on the scene of the accident, the latter shall afford all necessary assistance, and shall, if occasion arise, carry the investigation beyond the limits of the Railway premises. But the Railway Police Superintendent, if present, is primarily entrusted with the duty of investigation within such limits. Subject to any provisions elsewhere contained in these Rules, the further prosecution of the case on the conclusion of the preliminary local police investigation shall rest with the Railway Police.

SECTION III.

Duties of Civil Officers.

21. It shall be in the discretion of the Magistrate of the District, on receiving information of the occurrence of a serious railway accident within the meaning of Rule 1, either—

(*a*) himself to proceed to the scene of such accident and make any enquiry;

(*b*) to depute a subordinate Magistrate to make enquiry; or

(*c*) to direct investigation to be made by the District Police.

22. In all serious cases, it will be the duty of the Superintendent of Railway Police, if any, to proceed without delay to the scene of the accident to conduct this enquiry. If unable to go, he will at once report the fact to the Magistrate.

23. The Magistrate or other officer shall summon any servant of the Railway, and all other persons whose presence he may think necessary, and, after taking the evidence and completing this enquiry, shall, if he consider there are sufficient grounds for judicial investigation, take the requisite steps to bring to trial any person he may consider criminally liable for the accident.

24. The Manager or the Magistrate of the District, or the District Superintendent of Police, may require the Civil Surgeon of the District or any District Medical Officer to proceed to the scene of any railway accident attended with personal injury, for the purpose of rendering medical aid and of making, before the investigating authorities, any professional statements that may be required; and it shall be the duty of such Civil Surgeon or Medical Officer to proceed accordingly.

25. In cases where technical points are involved, the Magistrate or other officer should be careful to call for and take the opinion of professional persons.

26. The result of this preliminary local enquiry will be communicated by the Magistrate to the Manager of the Railway.

27. Should the Magistrate have delayed judicial action until receipt of the Railway departmental report, he will then decide whether to discharge the persons accused or to proceed with the case.

28. If the Manager of the Railway do not prosecute the persons considered liable by the Civil Officer, the Magistrate will arrange for their prosecution.

29. If, in the course of the judicial enquiry, the Magistrate wishes for the assistance of the Government Inspector or Manager of the Railway, or for the attendance of any officer of the Railway, to explain or give evidence upon any matter relating to railway supervision, management, or working, he will issue a requisition to such officers to attend the Court.

30. On the conclusion of the judicial enquiry, the Magistrate will, if necessary, report the result for the information of the Local Government; and he will send a copy of his decision to the Manager of the Railway.

31. Magistrates through whose jurisdiction a State Railway passes, shall maintain a list of Railway Officers (such list to be furnished by the Manager), to whom summons may be sent for service on subordinate Railway servants, and shall furnish the Manager with a list of Magistrates or other officers to whom reports of accidents should be made.

SECTION IV.

Government Inspector's Duties.

32. On receiving notice of a serious accident, the Government Inspector shall proceed himself, or by deputy, to the scene of the accident, shall note the facts, watch the proceedings, and make such enquiries and investigations as he may think fit, calling upon the Manager or Officer in charge of the line for any assistance needed, and shall form his own conclusions.

33. He shall send his report, with any notes he may desire to record, to the Government concerned, forwarding copy to the Manager of the Railway or to the Magistrate having jurisdiction in British or in Native Territory, as the case may be.

34. He shall assist the Magistrate so far as he can in person or by deputy in the judicial enquiry whenever called upon to do so.

35. In important cases, where a remedy or change of system appears necessary, he shall inform the Government of India what steps have been, or are proposed to be, taken by the Railway to prevent a recurrence of similar accidents and whether in his opinion further action in the matter is desirable.

R. B. CHAPMAN,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

PRIZE FOR ESSAY ON FEVERS.

Surgeon-General C. A. Gordon, M.D., C.B., Honorary Physician to Her Majesty, with the approval of Government, offers a prize of Rs. 500 to the writer of the best Essay on Fevers as affecting British soldiers in India. Particulars with regard to conditions, arbitrators, date, and manner of submitting Essays are given below, namely :—

2. The Essays must include a comparative history of that class of diseases as given by the older writers and by the more modern; their causes, including such as are predisposing and those that are direct or exciting; their relative prevalence and mortality according to age and residence in India; their modifications by diathesis, locality, climate, and season; their pathology; their treatment, illustrating this important point, as far as possible, by records of "Cases" either from case-books or published works dating previous to 1857, and of those of a date subsequent to that period; the object being to indicate as clearly as may be practicable the results of the several methods adopted, and thus obtain a guide with regard to the future.

3. The assigned causes of *fevers* being investigated and categorically detailed, measures will be indicated by which their prevalence among British troops and their present very serious rate of mortality may for the future be diminished.

4. With reference to what some writers may in their Essays designate *enteric* or *typhoid fever*, they will give a distinct definition of the precise significance attached by them to these terms, whether applied in a sense independent of each other or synonymously; also in the event of either term being used to indicate a specific and otherwise independent disease rather than a *condition of*, or *complication* occurring in, the course of endemic fevers, whether continued or periodic in type, a distinct and precise record must be given of the circumstances upon which the distinction thus indicated is based.

5. The prize now offered will be open to all Officers of the Army Medical Department and of the Indian Medical Service of the three Presidencies, whether upon retired or full pay, provided that they have on 31st August 1879 severally done medical duty with British Troops in India during five full years and upwards.

6. The award of the prize now offered shall rest with three arbitrators, who must themselves have done duty for at least five years with British Troops in India, and have been at least ten additional in this country, making in all not less than fifteen full years in India. Government has been solicited to request the Director-General of the Army Medical Department, the Right Honorable the Secretary of State for India, and the Army Sanitary Commission each to appoint one of the three arbitrators, the latter unconnected with the Commission itself; these three to have power, should they so desire, to add two to their number so as to make it five in all; and at least one of the arbitrators to have himself served in India as above during not less than ten years prior to 1857.

7. Essays by Officers of the Army Medical Department should be transmitted through the usual channel to the Director-General of that Department; those by Officers of the Indian Medical Service through their channel of communication to the India Office.

8. With a view to afford ample time for the preparation of Essays, the 31st of December 1881 will be the latest date on which those Essays will be received in the India Office or that of the Director-General, and the decision of the arbitrators as to the award of the prize for the best of those Essays will be published in England and India, if possible, not later than 31st of July 1882.

9. In the event of no Essay being laid before the arbitrators, or of their considering it desirable for other reasons to withhold the reward for the present, they are hereby authorised to re-model the conditions of award in such manner as to them may appear fit, bearing in mind the general object in view in offering the prize as above detailed.

The 4th September 1879.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th NOVEMBER 1879.

GENERAL REMARKS.—Good rain has again fallen in Madras; general prospects are fair. In Bombay the Deccan has been benefitted by the needed rain; there was rain also in the Southern Mahratta Country and in Sind, but in the latter place it was very slight; fever is still very prevalent in Guzerat; *rabi* sowings continue. In Bengal slight rain fell in a few districts, more is still wanted in places; crops are promising and prices falling; there was a cyclone in Cox Bazar Sub-division of the Chittagong District, but particulars of the damage done are not yet known. In the North-Western Provinces and Oudh the weather has been fine and seasonable; fever continues but is abating; *rabi* sowings are progressing. There was no rain in the Punjab during the week; fever is still bad in the province; prospects are generally encouraging. In the Central Provinces also no rain fell; the weather has been clear and seasonable; *rabi* sowings are nearly completed; *kharif* prospects continue good. In Burma the rain was general; there is slight cattle-disease in parts of the province; crops are progressing satisfactorily; but high wind and heavy rain during the latter end of the week are believed to have caused some injury. No rain fell in Assam; more rain would improve prospects in Cachar, where they are already favourable. In Berar and Hyderabad crops are doing well. In Mysore and Coorg heavy rain has fallen and crops are thriving, except in the Chitaldroog district, where the rainfall was deficient. In the Central India and Rajputana States there was no rain; fever is more or less prevalent; prospects are good. In Nepal slight rain fell, and agricultural prospects are reported to be fair.

General prospects continue satisfactory. The cold weather has thoroughly set in; and in Bengal and the North-Western Provinces and Oudh the public health has improved.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Nov. 1st)	·32 (average of 8 stations).	*Ragi* 20·64; harvest of early dry crops and sowing of white *cholum*, wheat, Bengal gram, and horse-gram in progress; standing crops in good condition.
Kurnool („ „)	1·34 (average of 6 stations).	*Ragi* 24·60; rain wanted in 2 taluks; yellow *cholum* and *korra* being harvested; white *cholum*, Bengal gram, and wheat being sown; pasture and water abundant.
Ganjam („ „)	·31 (average of 4 stations).	*Ragi* 27·18.
Kistna („ „)	2·51 (average of 11 stations).	*Ragi* 25·56; rain beneficial for standing crops and sowing of later dry crops; 33 inches water over anicut.
Chingleput (Madras) („ „)	3·08 (average of 11 stations).	*Ragi* 21·70; crops good; ploughing, sowing, and transplanting going on actively; harvest outturn ½ to ¾; pasturage abundant.
Coimbatore („ „)	1·63 (average of 16 stations).	*Ragi* 23·13; standing crops still withering in one taluk; harvest of paddy in 2 taluks, *ragi* and *cumboo* in 4; outturn paddy ½ to full, others ⅛ to full.
Tanjore („ „)	1·11 (average of 13 stations).	*Ragi* 24·82; crops good; harvest of paddy, *cholum*, *cumboo*, and *ragi*, outturn ½ to full.
Madura („ „)	2·34 (average of 12 stations).	*Ragi* 17·73.
Malabar („ „)	4·18 (average of 14 stations).	*Ragi* 18·62; rain sufficient; second crop progressing.
Travancore („ „)	2·21	Ploughing, manuring, and transplanting going on. *General Remarks.*—General prospects fair; north-east monsoon reported to have burst in Godavari and Kistna.
Bombay (Nov. 5th)—		
Kurrachee ...	·07 at Bula Khan ...	River 5 feet 7 inches on 3rd, last year on same date 8 feet 6 inches; *rabi* sowings continue.
Hyderabad ...	.....	Excepting rice, *kharif* reapings completed; *rabi* sowings continue; fever general; weather unsettled.
Ahmedabad ...	.....	*Kharif* harvest continues; lands being prepared for *rabi*; fever stil prevalent.
Baroda ...	.....	One hundred and forty deaths from fever in city, twenty deaths from cholera near Navsari.
Surat ...	.....	Crops good; *bajri* and rice nearly harvested; *rabi* sowing progressing; locusts damaged crops in Jalálpor and Pardi; slight fever and cholera.
Násik ...	.....	Weather clear; *kharif* harvest good; *rabi* sowing mostly completed; prices slightly lower.
Colaba (Bombay) ...	.....	Wind northerly and air dry till 1st, afterwards southerly and air less dry; lightning on the 2nd; weather fine.
Poona (Nov. 2nd)	General rain; maximum at Haveli 1·71, minimum at Junnar ·02	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	Rain in six talukas; maximum at Shrigonda 1·80, minimum at Sheogaon ·05.	Rain beneficial; reaping of *bajri* and sowing of *rabi* crops completed in 6 talukas, approaching completion in rest; slight injury by rats in parts of two talukas.
Sholapore ...	Moderate rain, varying from 1·59 to ·06.	Prospects of *rabi* harvest improved.
Dharwar ...	.....	
Kánara ...	1·92 at Karwar ...	Total rainfall 131·91; harvest on coast continues; fever, measles, and cattle-disease prevail.
Rajkot ...	.....	Winter setting in; *kharif* harvest continues; *rabi* sowing completed; fever prevalent. *General Remarks.*—Fever still prevalent in Guzerat; *rabi* sowings progressing; general fall of rain in Deccan districts.
Bengal—(Nov. 5th)		
Chittagong ...	*Nil*	Cyclone in Cox Bazaar sub-division on 26th October, some damages to crops and buildings, extent yet unascertained, some loss of life reported, damage mostly confined to sub-division and Satkania; elsewhere prospects good and weather seasonable.
Dacca ...	*Nil*	Floods subsided; sowing of cold-weather crops commenced; *amun* prospects good; relief operations being closed; new rice 18 seers, old rice 16 seers; public health good.
24-Pergunnahs (Calcutta)	*Nil*	*Amun* prospects promising; an average outturn expected; jute fair; *aus* harvested; land being ploughed for *rabi* cultivation; common rice 10 to 12 seers; fever in some places; flood nearly subsided; inundation done some damage to crops at Satkhira; at Diamond Harbour cuts being made in embankments to let in fresh water for cultivation purposes, and rivers rose a little with spring tide.
Moorshedabad ...	*Nil*	Prospects of paddy and *kalai* good; sowings of winter crops commenced; fever in mitigated form still reported; want of fodder in Bhauia Barwa; zamindars and mahajans assisting their ryots where necessary and labourers now getting work in fields and on roads.
Rajshahye ...	*Nil*	Nights cold; northerly winds in day time; condition of crops in ground good; lands being ploughed everywhere for *rabi* sowings; a few isolated cases of cholera; common rice 12 to 14½ seers in interior.
Burdwan ...	*Nil*	Rice pretty good; sugarcane not good; general health fair.
Rungpore ...	*Nil*	Weather cool; prospects of crops favourable; public health good.
Bhágalpur ...	*Nil*	Weather cool; rice prospects good; *rabi* being sown; common rice 15 seers; public health generally good.
Purneah ...	*Nil*	*Aghani* excellent and well in ear and very heavy; *rabi* sowing completed; plenty of moisture in soil; heavy dews make irrigation unnecessary; rice 14 to 15 seers; health of people good; cattle afflicted with foot-and-mouth disease.
Patna ...	*Nil*	Prospects excellent; prices falling.
Durbhanga ...	*Nil*	*Dhan* good; *rabi* sowing continues; tobacco promises well; prices stationary; some fever and cattle-disease in interior.
Hazáribágh ...	*Nil*	Weather cold and seasonable; prospects of crops excellent; food-grains cheaper than last year; general health good.
Cuttack ...	·12	*Laghu* and early *sarad* ripening; *rabi* progressing favourably; public health good. *General Remarks.*—Slight rain in places; in Burdwan, Presidency, Dacca, Chittagong, and Orissa divisions cold weather now fairly set in, but a little more rain wanted in places; rice and other crops on ground generally promising; *amun* coming in ear, and *sali* ripening; cold weather sowings progressing; early sowings germinated; prices comparatively much fallen in several districts; in Dacca relief operations being closed; public health generally fair, but fever prevalent in places; cyclone in Cox Bazaar on 26th October, damage yet unascertained.
N.-W. P. and Oudh—		
Benares (Nov. 4th)	.....	Prospects good; *rabi* sowings in progress; fever still prevalent.
Allahabad („ „)	*Nil*	Bright seasonable weather; fever abating; wheat 13 5/16 seers, coarse *chaonal* 9⅛ seers, unhusked *dhan* 10⅝ seers.
Gorakhpur („ 5th)	*Nil*	Weather clear and seasonable; *rabi* germinating favourably; fever continues.
Jhansi („ 6th)	.....	Minor *kharif* grains being cut; sowing for *rabi* continues; fever abating.
Agra („ 4th)	.....	*Kharif* harvest being cut, *rabi* sowings progressing; fever abating; weather seasonable.
Bareilly („ 5th)	.....	Weather clear; sickness abating; rice cut; *rabi* being sown.
Meerut ...	.....	No report received.
Kumaun („ 3rd)	.....	Weather fine; *kharif* harvest being cut; some fever in the district.
Lucknow („ 5th)	*Nil*	Barley 20¼ seers, *mendwa* 25 seers.
Partabgarh („ 3rd)	*Nil*	Weather fine; agricultural operations progressing; fever abating; wind westerly; cattle-disease is decreasing.
Sitapur („ 5th)	.....	Weather seasonable; fever still prevalent.
Fyzabad ...	.....	No report received. *General Remarks.*—Weather fine and seasonable; *rabi* sowings progressing; fever abating.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—(Nov. 5th)—		
Delhi ...	.....	Prices steady; fever prevalent.
Hissar ...	.....	*Kharif* still being gathered; crops doing fairly; sowings in progress; prices stationary; fever prevalent.
Umballa ...	.....	Grain crops promising; health fair.
Jullundur ...	.....	Agricultural prospects good; prices steady; fever prevalent.
Lahore ...	.....	Health and prospects good.
Ferozepore ...	.....	Agricultural prospects fair; prices have fallen.
Siálkot ...	.....	Prospects fair.
Ráwalpindi ...	.....	Agricultural prospects good; fever prevails.
Pesháwar ...	.....	Harvest prospects good.
Mooltan ...	.....	*Kharif* crops are being cut; sowings in progress; prices steady.
Dera Ismail Khan ...	.....	*Rabi* sowings in progress; prices stationary; health good. *General Remarks.*—No rain this week; prospects generally good.
Central Provinces—		
Nágpur (Nov. 5th)	.....	Clear; prospects of *kharif* continue good; cotton picking commenced; *rabi* sowings nearly completed.
Jubbulpore ...	.....	Cold; cotton promising; *kharif* harvesting; *rabi* sowings continue; small-pox slight; fever prevalent; prices of grain rising and of rice falling.
Saugor (Nov. 5th)	.....	Cool, pleasant; *kharif* reaping; cotton doing well; *rabi* sowing continues; fever decreasing.
Seoni ...	.....	Clear; *kharif* crops harvesting; *rabi* sowings nearly completed.
Hoshangabad ...	.....	Cotton and *jowar* doing well; *rabi* sowings continue; fever prevalent; prices unchanged.
Raipur (Nov. 1st)	.....	Rice cutting and *rabi* sowings continue; prospects good; cattle-disease in Simga and Dhamtari tahsils; prices risen considerably.
Sambalpur (Oct. 31st)	...	Cloudy, close; rice harvest continues; sowing of pulses completed; few cases of small-pox; prices steady. *General Remarks.*—Clear and seasonable; rice harvest continues; *rabi* sowings nearly completed in some districts and in others are well forward; prospects of *kharif* continue good; prices stationary.
British Burma—(Nov. 5th)		
Akyab ...	4·82	Total rainfall 224·06; five doubtful cholera deaths in district, otherwise public health good; agricultural prospects very good.
Rangoon ...	2·47	Total rainfall 109·38; a little small-pox in Rangoon town; slight fever in Hlaing township, otherwise public health good; slight cattle-disease in Pomeglin township; crops progressing, but damage expected in Pegu sub-division from recent gale.
Basseiu ...	2·82	Total rainfall 89·82; public health good; cattle-disease continues; weather favourable for crops; slight injury by insects and rats in two circles.
Prome ...	·7	Total rainfall 44·83; public health fair.
Amherst (Moulmein) ...	·92	Total rainfall 161·47; public health and crop prospects good.
Toungoo ...	·22	Total rainfall 75·98; public health and agricultural prospects good. *General Remarks.*—Public health good; slight cattle-disease continues; crops doing well, but high wind and heavy rain at end of week are believed to have done injury.
Assam—(Nov. 5th)—		
Gauháti ...	*Nil*	Weather cool; mornings foggy; prospects of *sali* crops good.
Sylhet ...	*Nil*	Prospects good.
Cachar ...	*Nil*	Weather getting perceptibly cool; rain would materially improve prospects, which are already favourable; price of rice 13 5/16 seers per rupee; health good.
Dibrugarh ...	*Nil*	General prospects of crops good; small-pox disappeared; fever prevalent in many villages.
Berar & Hyderabad—(Nov. 5th)		
Amráoti ...	.....	*Rabi* sowings continue; *kharif* crops being reaped.
Akola ...	.....	Crops doing well.
Hyderabad ...	.....	No report received.
Mysore and Coorg—(Nov. 5th)		
Bangalore ...	6·51	Crops thriving, except in Chitaldroog district, where rainfall was deficient; prices stationary; health generally good.
Mysore ...	3·89¼	
Mercara ...	1·62	
Central India States (Nov. 5th)—		
Indore ...	*Nil*	Prospects excellent, but very high prices continue; wheat 8 seers 11 chittaks and gram 9 seers 3 chittaks per rupee.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States— *continued.*		
Morar (Gwalior) ...	*Nil*	
Sutna ...	*Nil*	Prospects good; *jowar* 18 seers.
Rutlam ...	*Nil*	Weather clear; health improving.
Neemuch ...	*Nil*	Weather cool.
Goona ...	.....	No report received.
Bhopal ...	*Nil* at Schore	Weather clear; *rabi* sowing progressing; prospects of *kharif* very good; high prices continue.
Agar ...	*Nil*	Prospects favourable; fever existing.
Nowgong ...	*Nil*	
Manpur ...	*Nil*	Sowing of *rabi* crops commenced; fever prevalent.
Rajputana—		
Abu (Nov. 5th)	.....	Fever still prevalent; cold.
Serohi („ 2nd)	.....	Wells pretty full; water brackish; tanks nearly dry; fever prevalent; colder than usual.
Marwar (Oct. 31st)	.....	Tanks and wells almost full; fever prevalent; crops gathering; clear; winds easterly; nights cool; prices stationary.
Meywar ...	.....	Tanks and wells good; fever prevalent; *rabi* sowing.
Harowtee (Nov. 1st)	.....	Fever prevalent; prospects good.
Jhalawar (Oct. 30th)	.....	Much colder; mild fever prevalent; prospects good.
Ajmere (Nov. 5th)	.....	Prospects favourable; health improving.
Jeypore ...	.....	Harvests secured, average outturn; *rabi* sowing commenced; fever abating.
Bhurtpore ...	.....	*Kharif* being harvested; sickness decreasing.
Ulwur ...	.....	*Rabi* sowings commenced; fever very prevalent.
Nepal—(Oct. 28th)—		
Katmandú ...	·225	Agricultural prospects fair.

Remarks.

(a).—This includes a sum of Rs. 3,60,076-10-6 which was contributed by Revenue for the re-rebuilding of Nurbudda Bridge.

(b).—This was appropriated for the re-building of the Nurbudda Bridge, see previous remark.

(c).—These figures are to end of 1877, later figures not reported.

A. J. FILGATE, *Major, R E*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 24th October, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of the Panjáb, K.C.S.I., C.I.E.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Mumtáz-ud-Daulah Nawáb Sir Muhammad Faiz Alí Khán Bahádur, K.C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.

DEKKHAN AGRICULTURISTS' RELIEF BILL.

The Hon'ble MR. HOPE moved that the Report of the Select Committee on the Bill for the relief of Indebted Agriculturists in certain parts of the Dekkhan be taken into consideration. He said:—

"My Lord, in making this motion it seems convenient to mention that, while the Bill is being considered, I propose to confine my remarks to the subjects of the several amendments which my deference for the views of the Local Government, no less than my personal convictions, oblige me to move in opposition to certain decisions of the Select Committee, passed by a majority which, but for the absence through illness of the Hon'ble Sir John Strachey, would have been a narrow one. I shall reserve until my motion that the Bill be passed various explanations and comments of, I hope, an uncontentious character, which may perhaps contribute to a better understanding of the measure by those who will have to work it and by the public."

The Motion was put and agreed to.

The Hon'ble MR. HOPE then moved that in section 10 of the Bill the following words be omitted (namely): "except suits of the description mentioned in section three, clauses (*y*) and (*z*)." He said:—

"My Lord, in explanation of this motion, I may remind the Council that paragraph 33 of the Secretary of State's despatch of the 26th December last contains these words: 'I am inclined to think that the principle of summary jurisdiction without appeal might be conferred experimentally on all Civil Judges in the Dekkhan with great benefit.' In consequence of this suggestion, the draft Bill submitted by the Bombay Government provided that, within certain pecuniary limits, there should be no appeal from the decisions of the Subordinate Courts in cases, including those relating to mortgages, in which agriculturists were concerned, but that the proceedings of the Courts in such cases should be subject to inspection and revision by special

officers under the District Judge. The Government of India in its executive capacity, after carefully considering whether the exclusion of mortgage-cases from appeal was desirable, allowed the Bill to be brought into this Council with the exclusion maintained, but substituted, as a further safeguard, the control of one Special Judge for that of the District Judges of the four districts. At the same time, in a letter dated July 26th, calling for the opinions of the Local Government, the High Court and local officers on the Bill generally, it invited attention to the question as still an open one. The reply of the Bombay Government on it was as follows:—

"'His Excellency in Council is of opinion that no alteration should be made in the Bill as it now stands. He considers that, though in some instances advantage may follow on the hearing of a case by an Appellate Court, yet advantage is not likely to result in so large a number of cases as to outweigh the disadvantage of allowing an appeal in all cases; that no distinction need be recognized between appeals in mortgage-cases and appeals in simple money claims; and that, where errors have to be corrected, relief can be afforded on a petition for revision as well as on a regular appeal.'

"The opinion of Mr. Justice Maxwell Melvill on the same point, concurred in by the four other Judges of the Bombay High Court who minuted on the reference, runs thus:—

"'I think that, if the Subordinate Judges and Special Judge be well selected, the system of revision will be an adequate substitute for the present system of appeals. We have had a long experience of the system of revision in the High Court. In cases in which no appeal lies applications for the exercise of our extraordinary jurisdiction are very frequent; and, though we are of course more strict in admitting such applications than we should be in admitting appeals, I do not think that any case of special hardship or injustice ever goes unredressed, or, at least without an effort to redress it. Probably, in practice, there will not, under the system proposed in the Bill, be any great difference between the procedure in revision and in appeal. That is to say, every party aggrieved by a decision of a Subordinate Judge will apply to the Special Judge to revise the decision; and if the Special Judge does his duty, he will call for the proceedings in every case in which he thinks that injustice may have worked. The system of revision seems certainly most in accordance with the general spirit of the Bill, which is to leave everything as much as possible to the discretion of the Judges. I see no practical advantage, if appeals be allowed, in limiting the right of appeal to mortgage-suits.'

"Notwithstanding this concurrence in opinion of the Local Government and five Judges of the local High Court in favour of the Bill as it stood, the Select Committee, by a majority which, but for the reason I have named, would have been a narrow one, have decided to allow appeals under the ordinary law in these mortgage-cases, and to put in the place of section 73 of the Bill as introduced a new section (10) in the Bill now presented, containing the words which I have just read in my motion. As the matter is one of primary importance, likely vitally to affect the success of the whole measure, I feel bound, as I have said, by my own convictions no less than by the obvious propriety of affording full hearing for the views of the Local Government, to request the Council to reverse this decision.

"I will now endeavour to summarize the case. Against the appeal system the following objections are urged:—

"*First*, that it is a tedious process. This is sufficiently notorious; but, as actual proof is forthcoming, I may mention that the Bombay returns of civil justice for the last five years show the average percentage of appeals pending at the end of the year to be 36 per cent., with a maximum of 44 per cent. Again, the proportion of those so pending which had lasted above four months is 57·6 per cent., with a maximum of 66 per cent. How long above four months some of them had gone on, the present forms of return do not show; but by going back to 1872 we learn that, of the 3,191 appeals pending at the end of that year, 615, or about one-fifth, were two years old, 183 were three years old, while 31 were in the fourth, 8 in the fifth, and 5 in the *sixth*, year of their existence! No wonder that sometimes, as stated in an able report on the judicial administration of Khándesh in 1875, written by the Assistant Judge, Mr. Batty, 'after all the worry and expense of a suit, followed by long-delayed decision in appeal, the judgment-creditor finds he has nothing to attach.' To expose the various causes of these delays is perhaps unnecessary; but one important cause may be mentioned, that appeal may be a double process, first to the District Court, and then on to the High Court. About 13 per cent. of

the appeals hitherto heard in a year have been such 'second' appeals; and I fear the proportion will be increased by the lately passed amendment of the Civil Procedure Code.

"*Secondly*, appeal is an expensive process. This is obvious, as the parties have to operate at the District or High Court, far from their homes, and where pleaders of a higher class are indispensable. The mere recognized costs of appeals, such as stamps, process fees, subsistence to witnesses, pleaders' fees, &c., are recorded in 1872 as 13·6 per cent. on the value. The real costs were of course much more, especially for pleaders, who, we are told in the papers before the Council, always exact higher fees than the rate authorized by law.

"*Thirdly*, appeal is a specially uncertain process. Where one Appellate Court sits in appeal upon another, the uncertainty is aggravated; and where this is not so, the natural and proper reluctance of an Appellate Court to interfere with findings on questions of fact, passed in full view of the demeanour of parties and witnesses and in the hearing of the local public, imparts a fictitious and undeserved importance to issues and refinements of law and procedure, upon which opinions may differ greatly. Hence an appeal is too often a gambling or speculative transaction, resulting in the denial of the substantial justice awarded by the Court below. Where, as sometimes happens, the Appellate Court is fond of reappreciating the evidence and meddling with facts, the uncertainty is of course greater still.

"*Fourthly*, appeal is an unsuitable mode of redress; that is, it on the whole suits those least who most need help. As I said in my speech on July 18th, 'the cases which come up in appeal are often not those which deserve to come. Many a man who has a good case cannot afford to appeal; many a man with money needlessly drags his opponent through all the Appellate Courts.' To appreciate the full meaning of this, it must be remembered that appeals lie not merely on the final decision, but on a whole string, lately much lengthened, of intermediate orders of one kind or another. Appeal, in short, is a luxury within the reach of monied litigants only.

"*Lastly*, the process is one of small general application. In 1877 the proportion of appeals to cases disposed of in the whole Bombay Presidency was just 3 per cent. In the four disturbed districts it reached 3½ per cent. in 1876, but fell to 2½ in 1878. But these are appeals in suits of all kinds. If we exclude those as to title, &c., which are known to be numerous, what will be the proportion applicable to our Bill? Yet we are asked by some to believe that by this insignificant check our Courts are kept braced up to high efficiency, and that on its withdrawal they will subside into models of superficiality, incapacity, laziness, precipitation, favouritism, corruption, and I know not what other theoretical attributes of irresponsible power. Nay rather, the truth more probably is that though now, under the existing appeal system, work is so done as to command our confidence, 68 per cent. of decisions appealed against being confirmed, still, as stated by the Bombay Legal Remembrancer, 'Subordinate Judges are left too much to themselves; their work is never sufficiently overhauled and scrutinized; their errors and shortcomings are not pointed out to them,' &c.

"The remarks just made have reference to the appeal system in general. But the majority in the Select Committee only propose that it shall be applied to 'mortgage-cases.' To this I would object that there is no real reason for making a distinction between these cases and others. The theory is that a mortgage-case is something to look very grave about; that it sometimes involves the investigation of difficult questions as to title, priorities, marshalling securities, contribution and rights of maintenance, and always involves the taking of complicated accounts. But the fact is that a mortgage-case, like most other cases, may be easy or may be difficult. Each one of the points named, title, priorities, &c., may present no special feature, and be promptly and safely settled on well-known rules. Questions of title, and curious ones too, sometimes arise about moveable property; and that litigation on them is not inconsiderable may be seen from the statistics of suits arising out of execution of decrees. As to accounts, it may be safely affirmed that they will be found, on an average, to be more complicated in money-suits than in mortgage-suits. As

account on a simple money debt, to liquidate which grain, bullocks, cash, personal service, &c., have to be brought to credit under section 13 (*f*) of the Bill, may be complicated indeed. A mortgage account, on the other hand, judging from very full statistics of the mortgages of different kinds customary in the districts of Puna, Násik, Ahmadnagar, Sholapur and Kaládgi, which I lately obtained from the Hon'ble Colonel Anderson, Survey Commissioner for Bombay, must usually contain very simple items, even where an agreement to set off profits in lieu of interest has been set aside. This conclusion, that there is no reason for making any distinction as to appeals between mortgage-cases and other cases, is that which we find given in the papers before us by authorities undoubtedly the best acquainted with the subject. The Judge of Ahmadnagar says that experience shows that any nominal classification of suit is fallacious as a test of intricacy; and Mr. Justice Maxwell Melvill, with whom his four colleagues concur, says he sees no practical advantage, if appeals are allowed, in limiting them to mortgage-suits.

"I must now say a few words about revision. It appears to be in a very great measure free from the evils which I attribute to the appeal system. As the Special Judge and his two assistants will be moving about their charges for nearly two-thirds of the year, parties will be able to come freely before them at the time most convenient to themselves, while cases which they take up *proprio motu* will of course be chiefly taken up at once on the spot, after perusal of the record. The saving to parties in time, trouble and expense is obvious; the long purse will have less advantage over the short one, and the temptations to technicality will be diminished. But, above all, the percentage of cases which will come under scrutiny—scrutiny of a direct, personal and searching character—will certainly be ten times as large as under the appeal system, and probably more. That Judges who have one-third of their whole work looked into on the spot by picked officers having nothing else to do will not be more careful in it than Judges who have only one-thirtieth, and that of a tolerably defined special class, brought by haphazard before a distant authority, I am wholly unable to believe.

"Against the substitution of revision for appeal what little has been hitherto advanced has mostly been met. But I must invite attention to the utterly insufficient grounds on which the majority of the Select Committee, in paragraph 24 of the report, attempt to justify the conclusion in favour of appeals at which they have arrived. They merely observe that the question whether appeals should be allowed in any cases, or whether we should trust entirely to the powers of superintendence and revision,

'is not so important as might at first sight appear, inasmuch as there can be little doubt that, if the right of appeal were withheld, petitions for revision would take the place of petitions of appeal; and then the chief difference would be that an application for revision not being, like the presentation of an appeal, a matter of right, might be more summarily dealt with by the superior Court.'

Here the whole of the objections to the appeal system, as also the far wider controlling influence of the revision system, are simply ignored; and it is assumed that selected officers of the judicial department will take advantage of the almost imperceptible difference of status between appellants and petitioners for revision in order to deal 'summarily'; that is, I suppose, to leave, as Mr. Justice Melvill puts it, cases of special hardship to go unredressed or without an effort to redress them. Such reasons are a virtual surrender of the case.

"In conclusion, I would beg the Council to bear in mind that the revision system secures whatever advantages the appeal system possesses, but removes the disadvantages which that system involves, and has a far wider beneficial influence; that the abolition of appeals, even without the revision safeguard, is thought desirable by the Secretary of State; that there is no real difference between mortgage-cases and other cases, as far as this question is concerned; that the exclusion of appeals in mortgage-cases is emphatically advocated by the Local Government; and finally, that the five Judges of the High Court have reported officially that revision is an adequate substitute for appeal. In view of these facts, I cannot doubt that the Council will decide favourably on the motion I have brought forward."

The Hon'ble MR. THORNTON said:—"I take the opportunity of the consideration of the first of Mr. Hope's amendments to explain the general principle which will regulate my votes this day. The measure we have to consider is, it appears to me, to all intents and purposes a local one, and, but for certain technical objections, might have been dealt with by the local legislature of Bombay. This consideration should, I think, induce the Council to accord special respect to the views and wishes of the Local Government. But, apart from this, I look upon this measure as an honest and earnest attempt by the Bombay Government to meet and grapple with a local and exceptional difficulty; and I think, therefore, that their proposals should, wherever possible, receive the cordial support of the Members of this Council, even though some of them may not be in strict accordance with our views of what is best.

"I have said that the difficulty to be grappled with is local and exceptional. I say 'local,' because I desire to protest against the notion, which has obtained some currency, that the condition of the Dekkhan raiyat is to be considered as typical of the condition of the peasantry in all parts of India. At any rate, I can assert that it is not typical of the condition of the people of the province over which my hon'ble friend Sir Robert Egerton presides.

"I say also that the difficulty is an exceptional one; for, although some of the causes which have contributed to the depressed condition of the Dekkhan raiyat—such as the burden of ancestral debt, the *crassa ignorantia* of the kunbí, the absence of a law of bankruptcy or provision for winding-up the estates of deceased persons, the rigid system of collecting the full land-revenue in good and bad seasons alike, the distance of Courts of justice from the homes of the people—were certainly not to be ignored, yet I venture to think the *causa causans* (to borrow an expression from the old logicians) was a sudden and enormous inflation of credit during the American civil war, followed by a terrible contraction of credit. Such an event would bring about in England that state of things known technically as a commercial crisis. It would more or less ruin and demoralize any peasant proprietary in the world, and how much more a simple-minded peasant proprietary in India, where, by laws or custom or from a creditable sense of family honour, it is usual for the son to take upon himself the personal liabilities of his deceased father, even though he may have received no assets from the estate.

"Truly, my Lord, after considering the report of the Dekkhan Riots Commission, my ground of astonishment is, not that 66 per cent. of the Dekkhan raiyats should be insolvent, but that 33 per cent. should be in a position to pay their debts!

"But whatever may be the causes of the situation, there it is, and it *must* be dealt with vigorously thoroughly and practically; and in so dealing with the situation, I, for one, am prepared to sacrifice a large amount of theory.

"Keeping, then, the above principle in view, I proceed to the consideration of the first amendment—that is to say, the amendment which provides that *all* cases, including mortgage-cases, coming before the small-debt courts shall not be liable to appeal. The statistics relating to appeals in the Bombay Presidency which have just been read to us by the Hon'ble Mr. Hope are certainly not encouraging. But I venture to hope that the facts he has quoted, and the deductions he has drawn, are not applicable to other provinces in India; they are most certainly not applicable to the province with which I am connected.

"Our experience in the Panjáb is that the right of appeal is greatly valued by the people, and it would also appear that the right, though freely used, is not abused; for, although in the Panjáb justice is comparatively accessible,—there being, as a rule, a Court of justice within an easy day's walk of a peasant's home—as many as 82 per cent. of appealable cases are unappealed."

His Excellency THE PRESIDENT:—"Does the Hon'ble Member mean that in 82 per cent. of the cases in which an appeal lies the decisions are unappealed?"

The Hon'ble MR. THORNTON:—"Yes, my Lord. What I am seeking to show is that, though the right of appeal exists, and is highly valued, and can be easily enforced, it is not abused in the Panjáb.

"But, although our experience of the working of an appellate system is not similar to that of Mr. Hope in the Bombay Presidency, yet, as the Local Government of that Presidency considers that the regular appellate system is objectionable in the case of the smaller class of suits by money-lenders, including mortgage-suits, and prefers to substitute and pay for a somewhat costly system of revision, control and superintendence, which is to all intents and purposes an easy, though somewhat uncertain, system of appeal, I am certainly not prepared to vote against the Hon'ble Member's amendment on this point."

His Honour THE LIEUTENANT-GOVERNOR said:—"I have very few words to say upon this amendment. I consider the Bill, as my hon'ble friend Mr. Thornton has remarked, to be a local one, and that it is for technical reasons alone that it comes before this Council. Holding this view, I think that the utmost deference should be paid to the wishes of the Local Government in regard to the details of the measure. The whole chapter in which the section which it is proposed to amend occurs sets aside many of the existing provisions of the Code of Civil Procedure; and I can see no reason why the appeal, for which revision is substituted in regard to the other classes of cases specified in section 3, should be allowed in mortgage-cases only. I consider that the same procedure should be adopted for all the classes of suits specified, as the Bombay Government desire. In their letter on the case they state distinctly that they do not wish any appeals to be allowed in mortgage or other cases; and it seems to me desirable to follow their wishes."

The Hon'ble MR. RIVERS THOMPSON said:—"As a member of the Select Committee which very carefully went through all the details of this Bill, and unfortunately a member who was in a minority on this point, I do not like allowing it to pass with a silent vote. The question before the Council, I would remind them, is not whether there should be no supervision at all as regards the proceedings of Courts in any class of cases, but the simple one whether, in dealing with disputes connected with mortgage-suits, the principle to be adopted should be one of appeal from the Subordinate Judge to a superior Court or one of revision by a Special Judge. Now I trust I shall not be out of order if I remark that, with regard to this particular question about appeals, it depends very much upon whether the next amendment which the Hon'ble Member for Bombay will move—that is, with regard to section 54—will be carried or not. It seems to me that the two sections hang or fall together. If, as the Bill now stands, the Special Judge is excluded, I am prepared to say that some system of appeal ought rightly to be admitted with regard to this particular class of case; but if it is a question whether there shall be appeals, or whether this particular class of cases shall come under the revision of a Special Judge, I am certainly in favour of the amendment proposed by the Hon'ble Member for Bombay, that the latter alternative should be adopted. I would call to the remembrance of the Council that, before even the Bill was introduced, there was a Committee of officers who considered very carefully the provisions of the measure, and it was at that time proposed, and adopted almost I believe with unanimity, that, considering the very exceptional and admittedly tentative character of this legislation, it would be very much better that a special officer should be appointed, not only for the duty of revising judicial decisions of inferior Courts, but for the general supervision of all proceedings under the Act.

"I myself fully accepted that proposal; and as the Bill was first drafted, it contained a provision for the appointment of a Special Judge. This arrangement secured, as I have said, the necessary special superintendence required for the work in the four districts to which the Bill was to apply; and that not only as regards any particular class of suits in Court, but for the whole general administration of the law. I still think that this is a necessity under the circumstances in which this measure is introduced into these four districts. They have suffered from long-standing troubles and difficulties arising from causes in a great measure beyond the control of the Government; and in the embittered relations which now exist between debtor and creditor special legislation has been resorted to for the removal of the evil. Now, when the question of appeals came before the Select Committee, while it was accepted, as a rule, that appeals should not be allowed in simple money claims, it was

decided that they should be admitted for those two classes of cases that come under clauses (*y*) and (*z*) of section 3; and stress was laid by the majority of the Committee on the fact that this class of cases was a very difficult one, and that in consequence of that difficulty Appellate Courts must be provided for securing that no injustice takes place in such litigation. I agree with Mr. Hope in thinking that, considering the class of people for whom we are legislating, and the amount for which the money-value of appeals is fixed in the measure, these mortgage-cases will probably not present greater difficulties than the general class of cases which will come under its provisions; and I am also inclined to say that, whatever these difficulties may be, they will much more advantageously be met by an officer fully vested with the powers of revision, specially selected and reserved for the consideration of these cases, than by the ordinary procedure in civil suits. It seems to me that if a system of appeals is to be allowed, and such appeals are to lie to four different Judges, holding their courts at different places, at long distances from the homes of the people, the long delay that always arises in the disposal of appeals, and the technicalities of procedure that attend such a course, will be fatal to the success of the Act. I would also point to the fact that, as regards the objection taken as to the difficulties and intricacies of such suits, in section 12 of the Bill as it now stands special provisions are made to enable the Courts to go, as it is called, behind the bond; and that in mortgage-suits also it will be in the power of those Courts to analyze the whole history of the transaction. As the general scope and object of the whole measure is to bring the two parties together, and in their presence to try and get to the foundation and origin of the debt, and the whole proceedings connected with it, the Subordinate Judges will have ample power to go into the entire case, and to arrive at a fair decision upon its merits. With these observations, I have only to say that I shall support the Hon'ble Member in his amendment."

The Hon'ble SIR JOHN STRACHEY said:—"The Hon'ble Mr. Hope, in his opening speech, referred to the fact that, although I was a member of the Select Committee on this Bill, I had unfortunately been unable to attend the meetings of the Committee; otherwise I should certainly not only have expressed in the Committee views in accord with the present amendment, but also with the other amendments of which notice has been given. I should have agreed on every point with him and my hon'ble friend Mr. Thompson. I am strongly opposed to the alteration which the Select Committee has proposed to make in the Bill in regard to the question of appeal; and I think the change, if allowed to stand, will be a most unfortunate one. I do not for a moment deny that it is necessary in a great many cases of importance to allow suitors the right of appeal. Nevertheless, I believe it to be true that, among all the causes which have rendered the administration of justice in India slow, expensive and uncertain, the system of appeal has been one of the most serious and the most mischievous. I think it has been clearly shown that nine-tenths of the cases in which it is now proposed to allow appeals will be of a most simple character, and that there is no more reason for allowing an appeal in them than there is for allowing in the other cases in which an appeal is forbidden by the Bill.

"It seems to me that far greater security for the correction of erroneous decisions, and for ensuring supervision of the Subordinate Courts by competent superior Judges, was afforded by the Bill as it stood before it was altered by the Select Committee.

"As my hon'ble friend Mr. Thompson has just said, the amendment now being considered and the second amendment which refers to the appointment of a Special Judge are closely connected with one another, and they must stand or fall together. As the Bill formerly stood, there was to be a Special Judge, who was to devote his whole time to examining the proceedings of the Subordinate Courts, and to revising their decisions whenever a failure of justice appeared to have taken place. It seems to me that every honest suitor considering himself aggrieved by the decision of the lower Court would have every opportunity under the system formerly proposed by the Bill of getting his case re-heard which he could have under the system of appeal. His petition

would be called a 'petition for revision' instead of a 'petition of appeal'; but I cannot see that he would be deprived of any single advantage which under the system of appeal he would have. It seems to me that, taking the first and second of these amendments together, it is now proposed to abolish one of the very best and most essential parts of the Bill as it was introduced. It is proposed to substitute for the provisions under which we should have got security for the constant and personal superintendence by a competent officer over all the proceedings of the lower Courts the altogether illusory and imaginary security afforded by extending the power of appeal. The Bill as it originally stood in respect to this matter was, I believe, approved by the majority of this Council. It was strongly approved by the Local Government; and we know now that it was also approved by the five Judges of the Bombay High Court. Under these circumstances, my Lord, I shall vote for the amendment."

The Hon'ble MR. STOKES said that the effect of the amendment would be to deprive the parties to all suits for foreclosure or redemption of the right of appeal which they now enjoyed, and to substitute for it a system of revision. On the expediency of providing an appeal in cases of this kind he had but little to add to what he had said when the Hon'ble Mr. Hope had introduced the Bill. He had then pointed out that, in the absence of an Appellate Court, the Judges of first instance would have no one to stand in awe of, and that the errors arising from corruption, incapacity, laziness, precipitation, ignorance and love of arbitrary power would remain uncorrected, and cause hardship and discontent. These general remarks did not pretend to be original, but were founded on the writings of the great master in these matters *di color che sanno*—Bentham—and he had heard nothing here to-day, and did not expect to hear anything, that would lead to a different conclusion. But the matter seemed more complicated than he had supposed. It now appeared that these mortgage-suits were of such importance as to demand a special procedure, or, at all events, to be free from a summary procedure, not merely because of their difficulty, of which he would say a few words hereafter, but because they related to land, and because to the Native of India land was of abnormal importance. Having no manufactories, their livelihood depended solely on the cultivation of their fields; and for that reason, as well as for others—as he understood from persons better acquainted with the subject than he could pretend to be—they attached extraordinary value to the right of appeal in all questions relating to land. The question had, therefore, a political as well as a juristic aspect. Furthermore, the suits referred to in the amendment were mortgage-suits; and, as the Bill was now framed, the number of mortgage-suits would be enormously increased. As far as he could make out, with section 22 forbidding attachments or sales of immoveable property not specifically pledged, no saukár would ever lend money except on the security of land; and, unless the nature of such litigation was different in the Bombay Presidency from what it was elsewhere, no suits could be named in which difficult questions more often arose and which were, therefore, less adapted for a summary procedure. There was always a more or less complicated account to be taken; and questions as to title, priorities, marshalling securities and contribution were certain to arise in almost every case—that is, provided the Judge understood his business, and saw difficulties where they really existed. That Bombay litigation formed no exception to this rule appears from the able paper of Mr. Naylor, the Bombay Legal Remembrancer, who wrote:—

"Suits between mortgagors and mortgagees generally entail questions of considerable importance and difficulty; and, after having given the matter much consideration, I am unable to concur with those who think that when agriculturists are parties to such suits they should be tried summarily. The intricacy of a suit in no way depends upon the social status or occupation of the parties thereto. It is to the subject-matter of an action that we must look in order to judge whether it is likely to involve complicated issues; and those who are acquainted with the usual range of litigation will unhesitatingly affirm that questions relating to mortgage-claims are amongst those which are most prolific of knotty points and legal difficulties. It makes no difference in this respect whether the value of the matter in dispute be small or great, or whether the parties to the suit belong to one class or another."

It was true that the Hon'ble Mover in his speech on introducing the Bill, and in reply to a question put by the Hon'ble Sir Alexander Arbuthnot, said that "mortgages are usually only difficult if they happen to involve questions of priorities and the like, or there are several creditors. . . . . Under the Bombay revenue system the name of the owner of every field is entered in the Government books. It would only be in most rare instances that the man whose name appeared was not the real owner; *and so* questions of title are not likely to give trouble." MR. STOKES thought the Hon'ble Member in making the latter statement must have overlooked the fact that the Bombay High Court had decided more than once that the Collectors' books were kept for purposes of revenue, and not for purposes of title (10 Bom. 187); and that the fact that a person's name was so entered did not establish his title or defeat that of any other person (10 Bom. 187, 192). As to the disadvantages in civil cases of the system of revision as compared with the system of appeal, he rejoiced to find that the remarks which he had ventured to make upon this subject, drawn as they were from theoretical considerations rather than practical experience in the Mufassal, were now confirmed by three such men as Mr. Naylor, whom he had just quoted, Mr. Wedderburn, District Judge of Ahmadnagar, and Mr. Justice West.

Mr. Naylor at page 9 of his paper said:—

"The cases in which it would be justifiable to interfere with a decision of a civil matter, except upon the application of one or other of the parties, must be very few. If the Special Judge revises a decision upon the complaint of one of the parties, he will, in effect, hear an informal appeal. But he will do so subject to the following disadvantages over a regular system of appeal (namely):—

(1) that there is no limit to the period within which applications for revision may be made or granted, and the parties can, therefore, never be certain that the decision they have obtained is final;

(2) that the application will generally have to be enquired into at a great distance from the homes of the parties, *i.e.*, wherever the Special Judge may happen to be on tour, and on no fixed date, and must, therefore, be disposed of without hearing the parties or anybody in their behalf;

(3) that the parties will have no absolute right to bring their cases before him, and that it will therefore be in his power to refuse applications without any inquiry at all.

"The right of appeal to a fixed Appellate Court within the district itself is, I think, a far preferable remedy to this; and in mortgage-cases it is most undesirable, not to say altogether inequitable, that the people should be deprived of it."

Mr. Naylor did not seem to be quite correct in saying that there was no limit to the period within which applications for revision might be made. The Limitation Act, XV of 1877, schedule II, No. 178, fixed a period of three years for this and other applications not expressly provided for. But for three years the parties would never be certain that the decision they had obtained was final; whereas now, when the periods prescribed for presenting appeals under the Code of Civil Procedure (thirty days and ninety days) had lapsed, the decision might practically be regarded as final. As to the disadvantages respectively numbered (2) and (3) he (MR. STOKES) entirely agreed with Mr. Naylor.

Mr. Wedderburn in the fifth paragraph of his note also said:—

"With regard to the efficacy of revision as a substitute for appeal, it appears to me that this method of control is better suited for criminal than for civil business. By examining a criminal return, which gives an abstract of the incriminating circumstances, and states the section under which the accused has been convicted and the amount of the punishment, a superior Court can form an opinion as to the general propriety of the orders passed, and by calling for the record can effectually remedy a failure of justice. But the difficulty of carrying out such a duty would be very much greater in civil suits, where the issues are so much more complicated. And I think it would be difficult to devise a form of return which would, within moderate dimensions, supply to the Special Judge the information necessary to enable him to carry out the revision described in section 54 of the Bill. It must also be borne in mind that, unless such returns are framed in English,* most European officers would, in making use of them, have to rely on subordinate agency, which would, in great measure, defeat the purpose of the legislature in appointing a Special Judge to exercise a vigilant personal control. If, on the other hand, the Special Judge does not rely upon civil returns, but modifies the decisions of the Subordinate Judges upon the complaint of the parties, I do not see wherein this method will materially differ from a system of appeal. To disturb the decision of the lower Court on a mere inspection of the record would be a risky proceeding; and the party to whose detriment the alteration was made would consider himself highly aggrieved if he had no opportunity of being heard in support of the original decree."

* The Subordinate Judges in this district write their judgments mostly in Maráthi.

The Council would perhaps remember that when the Bill was introduced he (MR. STOKES) had suggested that the revising Judge would have neither time nor skill to decipher and translate the records kept, as they would be in a Native language, and that he would therefore have to rely upon some corruptible subordinate, such as the sarishtádár. He was glad to find this suggestion fully supported by the District Judge of Ahmadnagar. To the same effect was the remark made by Mr. Justice West in what he would take the liberty of calling one of the most interesting and statesmanlike papers ever laid before this Council. "The brief notes of evidence and of the judgment," says Mr. West, "will, it is supposed, be nearly always in English. *It is absolutely necessary that they should be, if there is to be any trustworthy scrutiny of them by the supervising officers.*"

But to return to the general question as to the relative advantages of a system of appeal and a system of revision, Mr. Justice West, in the paper he had just quoted, remarked :—

"The power of superintendence and revision is one which in discreet hands may be very usefully exercised; yet, according to my experience, it bears much more frequently upon matters of form than of substance. If there has been any active departure from the prescribed rules of procedure, the papers recorded will usually indicate the error. Omissions to do this or that thing which ought to have been done are less readily betrayed by the record; and all signs of any total departure from justice or propriety will be carefully excluded from it. If a Subordinate Judge towards the close of a wearying case refuses to take the evidence of certain witnesses or to accept a well-grounded application for adjournment, there will, as a rule, be nothing on record to show this dereliction of duty. If he cuts short the examination of witnesses whose testimony is received, his notes or the substance of their statements will not afford any evidence of his impatience. A smooth and specious surface presented by the written proceedings is quite consistent with a defective, arbitrary and partial investigation in substance. The parties only, and the people who were present in Court, can say how far the record is an actual representation of what took place. It is the interest of the defeated litigant to point out all errors of the Judge through which, as he thinks, justice has been defeated. It is equally his interest not to indulge in misrepresentations, the discovery of which will cause distrust, and probably the dismissal of his appeal. It is thus, and thus only, that material failures of justice arising from indolence, impatience or caprice will, with any reasonable certainty, be brought to light. The record ought to be kept with such fulness and regularity that, except by a conspiracy between the Judge and his principal subordinates, it should by mere inspection afford a corroboration or refutation of most of the imputations which a disappointed suitor is apt, rightly or wrongly, to cast upon the Judge who has decided against him.

"It is true that the same disappointed suitor who, under the ordinary system, may make an appeal may, under the system of revision, present his complaints in the form of a petition for review. Some check on absolutely false statements will be imposed by a rule which shall exact a verification on oath of the matters of fact set forth in the application. But whether its assertions as to a defective examination of the witnesses or a perverted note of their statements are true or not cannot really be ascertained, in case of a denial, by means of the Judge's note, which is itself impugned. It is certain that many false or greatly exaggerated complaints will be made, and, under cover of these, a careless or hasty Judge will enjoy impunity in cases in which he has been really and seriously to blame."

He (MR. STOKES) felt it his duty to bring these remarks before the Council; for he had reason to believe that, owing to great press of work, they had not been read by some of the Hon'ble Members. They had, moreover, been made by men who had had very considerable experience in civil judicature—an advantage which, so far as he was aware, the Hon'ble Mover, however distinguished as a Collector and Magistrate, had not enjoyed. Mr. Justice West then proceeded to show that the system of revision would tend to cause deterioration of judicial work :—

"The brief notes of evidence and of the judgment will, it is supposed, be nearly always in English. It is absolutely necessary that they should be, if there is to be any trustworthy scrutiny of them by the supervising officer. But, for the purposes of publicity, of bringing the people in the Court and the Judge into effective and corrective relation, these notes might as well be written in Japanese or Hebrew. It is a rare thing for even one member of the assembly in a Subordinate Court to know English. The Subordinate Judge may take down as much as he likes and in what terms he likes. The reasons he chooses to assign for his decision may be good, bad or indifferent, and no one in Court will be a bit the wiser. If theory and experience both are not entirely at fault, this substantial withdrawal of judicial work from the light of full publicity cannot but be attended with a rapid deterioration of its quality. Few human beings are fit for irresponsibility—Natives of India least of all. From a personal examination some years ago of a large number of unappealable cases disposed of by Subordinate Judges, I became satisfied that the inherent weakness of the Native character (or indeed of

Civil Procedure Code, sections 189 to 203.

human character) showed itself as markedly in judicial proceedings as in any other work. The evidence I found was taken in a much more slovenly manner; the whole business of the Subordinate Judge was performed with far less care and precision than in the cases subject to appeal. And if this was so when the whole record was in the vernacular and open to effective discussion by every one about the Court, how much more may the same laxness be expected to prevail when everything is hidden away in an unknown tongue?"

It was said that the system of appeals led to inordinate delay and expense, to loss of time and to uncertainty, which checked exertion. He (MR. STOKES) had touched on this matter in the remarks which he made when the Bill was introduced, and was not going to repeat himself; but he would read what Mr. Justice West had written on this matter :—

"It is said, however, that this system of appeals leads to inordinate delay and expense, to loss of time and an uncertainty which checks exertion. The raiyat himself, however, does not, in fact, appeal in more than one in a hundred of the suits of small amount that are brought against him. In cases of larger amount, he belongs generally to a class needing no special protection. If he has no means, he may appeal without expense *in formâ pauperis*. If dissatisfied, he may again present his case free of cost to the High Court. His applications are rejected only if it appears that he is in the wrong. If his creditor appeals against an adverse decree, the necessary expense falls on that creditor, at least in the first instance. To be a respondent does not necessarily cost anything: a debtor successful in the Court of first instance is not even called on to appear in the Appellate Court, unless a good *primâ facie* cause appears for reversing the decree in his favour. If the decree was absolutely wrong, it will hardly be contended that it ought not to be set right. Such is the degree of uncertainty produced by the right of appeal; and this itself is controlled and restricted by the power of the Hgih Court. It is not for a moment to be compared with the uncertainty in which people would live with respect to any possible claim that might be trumped up against them under the *régime* of ill-informed, poor and practically irresponsible Judges. The loss of time is as nothing to that which will be occasioned by the enforced double appearance in many cases before Conciliator and Judge, by the necessity of bringing forward unwilling gratis witnesses and getting a presentable statement of defence driven into a stolid brain by a pleader not allowed himself to plead.

"Considered as a means for ameliorating and elevating the condition of the peasantry, this scheme of imperfect investigation, defective record and casual supervision seems as unpromising as any that could be devised. It has not, I think, emanated, and could not have emanated, from any one really acquainted with the working of the Civil Courts in this country. It meets no actual or even fancied need of the people themselves. They do not complain of the Appellate Courts except as they complain of all Courts which enforce the payment of debts. They have more confidence in the Court of higher than in that of lower rank, and, like the rest of mankind, they are pleased to think that an appeal lies open to them, even if they do not resort to it. What they really complain of about the Courts are the enormous fees, which it is not apparently proposed to reduce; the loss of time in attendance, which will be considerably increased; and the improvident sales of their property, which could as well be prevented under the existing organization as under that by which the legislature is asked to replace it. From 1880 onwards they will have in every case, or almost every case, to sell their farms outright, where now they would but contract a loan. When a suit is instituted, they will lose their patrimonies more rapidly and irrevocably than ever before. Such 'relief' will to some of their untutored minds be hardly distinguishable from a new form of oppression."

After all, on such a matter the only opinions likely to be of much practical value were those of men familiar with the working of the local Civil Courts: to such familiarity he (MR. STOKES) could not pretend; and with these remarks on appeal and revision, which he had studiously refrained from making on his own authority, he begged to state that he would oppose the motion.

The Hon'ble SIR ALEXANDER ARBUTHNOT said :—"My Lord, I intend to vote against the amendment. I had not intended to speak at any length on this question, and the few remarks I proposed to make have been for the most part anticipated by my hon'ble friend Mr. Stokes. But there is one point which has been dwelt on by some of the speakers in favour of the amendment regarding which I should like to say a word. My hon'ble friend Mr. Thornton in his interesting observations, and my hon'ble friend the Lieutenant-Governor and, if I remember right, Mr. Thompson also, dwelt on the importance of our giving the utmost possible support to the views of the Local Government in regard to what they described as an essentially local Bill. Now, my Lord, I quite agree with those Hon'ble Members that in this, as in all other matters affecting the local concerns of a particular presidency or province, we should pay the greatest and the most respectful attention to the views and opinions of the Local Government. But it appears to me that this principle may be carried too far. The Government of India exists, both in its

executive and its legislative capacity, for the purpose of directing, controlling and laying down the principles upon which this country is to be administered, both executively and legislatively. It is very desirable that, as far as we possibly can, we should abstain from interference with the Local Administrations in matters of detail; but when we come to important questions of principle, when we come to proposals which are in contravention of the principles which have been laid down by the wisest administrators and legislators who have dealt with such matters, whether in our own country or in India, then I think the Government of India are bound to consider carefully whether it is not their duty to interpose. It appears to me that in this particular matter the supporters of the amendment moved by the Hon'ble Member are ignoring the wisdom and the opinions of the most eminent men who have dealt with legislation not only in this country, but in Europe. My hon'ble friend Mr. Stokes quoted the opinion on this particular matter of the great founder of nearly all the law reforms which have taken place in England in the course of the present century—the opinion of Jeremy Bentham. It is often said that Jeremy Bentham was a man of the closet—that he was a pure theorist; but somehow or other there are very few of his theories which have not come to be copied, and that have not brought about the most beneficial results. The Mover of the amendment told us that the nominal classification of suits is fallacious as a test of intricacy. Now, it so happens that this particular test is the test which, during the last thirty or forty years, since Courts of small causes—Courts expressly framed for the purpose of exercising prompt and summary jurisdiction—were founded in England, and since those Courts have been established and extended in this country,—this, I say, has been the test which the wisest men among us, the most learned, the most thoughtful and the most practical of our predecessors have deemed it necessary and found it convenient to adopt. It appears to me that on our part it is not wise to ignore the lessons of experience, the teachings which have been handed down to us by men certainly not less eminent than those who are seated round this table. The Hon'ble Member who has moved the amendment has treated a despatch of the Secretary of State, which was the immediate origin of the preparation of the Bill now before us, as laying down that it was desirable that in regard to all suits in which the Dekkhan raiyats were concerned the right of appeal should be abolished. The despatch to which he has alluded is on some points, and certainly on this point, somewhat vague in its wording. But I must express my conviction that the framer of that despatch had no such intention as that which has been attributed to him. It seems to me that all that the Secretary of State intended was that the system of summary, or what we call small-cause, jurisdiction should be extended in these particular districts of the Dekkhan more than they have been generally extended in the Mufassal in this country. I do not for a moment believe that it was his design that in suits of the class of those which, not only throughout the Mufassal but in the Presidency-towns, it has been necessary to provide for and regulate under the ordinary rules of civil procedure, a new system should be introduced. My hon'ble friend Mr. Stokes, and the experienced officers from whose writings he has largely quoted, have, I think, sufficiently shown that the test which the wisdom of our predecessors, which the experience of the past, have pronounced to be adequate and sufficient is one which ought not to be departed from on the present occasion; and I think he might have added that, if the objections which have been advanced against the system of appeal by the Mover of the amendment and by his supporters in this Council are really valid objections, they apply to our whole system of judicature throughout India. If it be the fact that the evils which accompany that system are so great as they have been described, then I say that those evils are just as applicable to Bengal, the Panjáb, the North-Western Provinces or Madras as they are to the Dekkhan districts of Bombay. It appears to me that in arguing in support of their contention my hon'ble colleagues have somewhat overstated their case.

"Then, as it appears to me, there is another objection to the amendment which has been moved with reference to the section now under discussion.

"I quite agree with Sir John Strachey and Mr. Thompson that the question of appeals and the question of a supervising Judge hang together. If a majority of this Council shall this morning decide that the right of

appeal in these cases shall be abolished, and shall also decide, as I have no doubt in that case they will, that these suits shall be withdrawn from the cognizance of the established District Judges, and shall be brought under the supervision of a special officer, the result will be that the Subordinate Judges by whom the suits will be tried will be serving under two masters. The District Judges before whom appeals from all their decisions will lie in all cases other than those provided for in this Bill, not excluding cases above the value of Rs. 500 in which agriculturists are concerned, will be deprived of the opportunity of observing the working of the Judges subordinate to them in that which will form a very large portion of their jurisdiction. The Subordinate Judge will be receiving from one master that description of instruction which may be afforded by the exercise of the powers of revision; he will be receiving from another master the instruction which is afforded by the trial of appeals from his decisions. It seems to me that such a system will give rise to a great deal that is unsatisfactory in the practical working of our Courts, and will end in all sorts of complications. Sir John Strachey observed that the honest suitor under a system of revision would have every opportunity of having his appeal heard if he had a real grievance; but he omitted to remark that the application for revision might very often be preferred by dishonest suitors; and in such cases the system, it appears to me, will be open to all the objections which have been advanced against it by Mr. Naylor and by Mr. Justice West. 'Mr. Naylor points out,' as Mr. Stokes has told us, 'what a serious grievance it will be that these suits should be heard in the informal manner in which they may be heard under the Bill as it is proposed to amend it.' Taking the case which I have just suggested—the case of a dishonest suitor who prefers what will really be an appeal to the revising Judge—suppose the revising Judge does not think fit to call upon the opposite party to hear what he has got to say on the other side, then a grievous injustice may be committed. It appears to me that this is a point and an aspect of the question which ought not to be left entirely out of consideration.

"Lastly, I would remark that in depriving the people of these districts of the right of appeal in that class of cases in which it is now given in every district throughout the country—a right which elsewhere it is proposed to maintain—we shall be depriving the people of the Dekkhan of what to them, as to other Natives of India, is a valued and cherished privilege."

His Excellency THE COMMANDER-IN-CHIEF said:—"I have no intention of saying a word on this Bill, as I believe I come more strictly under the category of those referred to by my hon'ble friend Mr. Stokes who have not read all the papers. But I have listened with great interest to my hon'ble friend Mr. Thornton's speech; and if anything is clearly stated by him, it is the immense value attached by the raiyats of the Panjáb to the privilege of appeal. I must say I was rather astonished at the conclusion arrived at by the Hon'ble Member and the vote which he proposes to give. I assure you that his speech has quite convinced me of the propriety of taking a directly opposite course to that which he himself has taken. I have not altogether omitted reading a portion of the papers concerned and the Bill itself; but it appears to me that, if the Bill is intended for any purpose at all, it is for the relief of the raiyat; and it seems to me a very strange method of relieving the raiyat that we should at the very first discussion that occurs on the Bill withdraw from him his most valued privilege. I have only to say, my Lord, in conclusion that I shall vote in opposition to the amendment."

The Hon'ble MR. HOPE said:—"My Lord, I trust that the Council will extend to me some sympathy in the difficult task which I am called upon to perform, at a moment's notice, of replying to two such long speeches as those we have just heard, adverse to my amendment, and which go into such an enormous number of petty details; and I must only ask it to accept my assurance, by way of covering any omissions which I may inadvertently make, that there is not a single phrase, or a single allegation, used in either of these two speeches which is not capable of being effectively contradicted.

"In the first place, the Hon'ble the Law Member led off by saying that the objections which he put forward were not original. This I can well believe.

He proceeded further to base them upon the authority of Bentham; and the Hon'ble Sir Alexander Arbuthnot also enlarged upon the same and other authority. We were told that we were committing a great crime in ignoring the wisdom of eminent men, who were considered to be the very first authorities not only in Europe but, in fact, throughout the world. Now, in the first place, I beg to deny the premises. We are not ignoring the authority of Bentham at all; and Bentham is simply a very great name, brought in under perhaps the erroneous impression that it would frighten or persuade somebody. The mention made of Bentham by the Hon'ble the Law Member in his speech on the 18th July was that, 'in the absence of an Appellate Court, the Judges of first instance will have no one (as Bentham says) to "stand in awe" of.' Well, the whole point in this simple question is, whether the Courts will have any one to stand in awe of or not; and, therefore, all that we have got to do, in order to carry out to the full Bentham's theory, and to defer to his authority, is to take care that we keep a proper authority for Courts 'to stand in awe' of. Now, the argument in this matter, which I am glad to see neither of the Hon'ble Members has ventured to allude to, that the system of revision is much wider in its application than the system of appeal, effectively disposes of this question; for it stands to reason, except, perhaps, in the minds of persons of such very uncommon sense that I should be loth to recognize it as sense at all, that Courts which have 30 per cent. of their work carefully looked after by special officers are likely to stand a little more 'in awe' than Courts which have only 3 per cent. of their work looked after. Therefore, I entirely deny that we go against the authority of Bentham or any other of the great experiences which are held up to frighten us."

The Hon'ble SIR ALEXANDER ARBUTHNOT:—"I should like for a moment to interrupt the Hon'ble Member. I wish to remark that, if the Bill should be left as it is at present framed, there will still be a system of revision under Act XIV of 1869, which I believe is a Bombay Act."

The Hon'ble MR. HOPE:—"I am much obliged for the Hon'ble Member's interruption, which I will make a note of, and deal with in due course. Well, to continue regarding this matter of our old experiences, having answered with reference to Bentham, I may notice that it has been urged that we ought not to abandon a system which has stood a test thirty or forty years old, and that we should not cast aside the experience of the past. To that I reply, that the experience of the past is exactly what brings us to our present position; because the experience of the past has shown us that this system of appeal is *not* efficient, and that the system of non-appeal has been gradually coming round into favour, first of all in England, and now in India, where at last a little ray of light has come to us. In India even, in money cases, within the last thirty years appeals have been cut off in the Small Cause Courts; and in England the system had been much more largely extended. Therefore, the practical experiences of the past are entirely in favour of our measure.

"Next, we were told by the Hon'ble the Law Member that it was not only because mortgage-suits were difficult that he thought they should be subjected to appeal, but because they also related to land, and that land is a very important thing, and a thing to which the people of this country attach an extraordinary value. This is a change of ground from that previously taken up by the Hon'ble Member; but at the same time it is a perfectly fair and reasonable ground to occupy, and I have only to remark with regard to it that the observation seems to me to be totally irrelevant. Nobody ever said that the people do not attach value to the land. The question here really is, whether the cases which relate to land will be a bit less carefully tried under the system proposed than under the system it is proposed to abolish."

The Hon'ble MR. STOKES:—"The point, I may remark, was that the people attached an extreme value to the right of appeal in suits relating to land."

The Hon'ble MR. HOPE:—"I am much obliged to the Hon'ble Member. Now, to come to the value which people attach to the right of appeal, I cannot but think that His Excellency the Commander-in-Chief—although no doubt he will pardon me if I am in error—may possibly have misunderstood, as I myself did at first, the manner in which the Hon'ble Mr. Thornton expressed his view regarding the appreciation of the people of the Panjáb of the system of appeal. He put it—if I correctly took it down—that of the cases which might be appealed against, 82 per cent. were not appealed against. That statement, inverted, means that the people only appeal in 18 per cent. out of all the cases."

His Excellency THE COMMANDER-IN-CHIEF:—"That is exactly the view I took of it, and it only shows the appreciation the raiyat has of his position in not making futile appeals; and I suppose the Dekkhan raiyat is as sensible a man as the Panjáb raiyat."

The Hon'ble MR. THORNTON:—"Perhaps I had better explain that what I wished to say was that, as a matter of experience, in which I think my hon'ble friend the Lieutenant-Governor concurs, the peasant of the Panjáb does, as a matter of fact, attach the greatest importance to the power of appeal, and also that he does not abuse that power. I therefore adverted to the statistics to which the Hon'ble Mr. Hope has referred."

His Excellency THE COMMANDER-IN-CHIEF wished it to be understood that he had fully and rightly comprehended the remarks of his hon'ble friend Mr. Thornton.

The Hon'ble MR. HOPE:—"I am glad to find that my surmise was incorrect; but, as I did not at first fully understand the matter through the way it was put, I thought there might have been a misapprehension. But with regard to this I have only to say that, greatly as I respect the knowledge my hon'ble friend Mr. Thornton possesses of the Panjáb, and fully prepared as I should ordinarily be to accept any inference which he might draw from it, I somewhat hesitate to infer from the simple fact that the people do not appeal in 82 of the cases in which they might do so that they abstain from appealing solely through moderation. I should require a great deal more proof than those statistics afford before I should be inclined to admit that. But I do say that it appears to me that the large proportion of appeals may be very easily accounted for on one of the grounds which he assigns for it namely, that the Courts are nearer to the homes of the people, which is one of the great things we find the Dekkhan Courts are not. Whether, if the Dekkhan Courts were situated as those of the Panjáb are, the people would appeal in the same number of cases I am not prepared to say; but I do not think that any sound generalization can be drawn from one province in India as compared with another, since we find that, with regard to all these provinces, the most essential differences exist between them. As a matter of fact, we find that the people in the Dekkhan do not appeal in cases above the proportion which I have stated, and that there is an enormous mass of evidence in the Dekkhan Riots Commission Report all telling us why they do not appeal. It was *not* found there that they do not appeal because they enjoy and value their right of doing so; but it *was* found that they do not appeal simply because, for the various reasons already stated in my introductory speech on this motion, and which I will not now weary the Council by recapitulating, they find that they *cannot* appeal.

"But even as regards the matter of the people valuing this right, we are told that they do, upon the strength of a statement, if I recollect rightly, of Mr. Justice West.

"Now, I wish, with the permission of the Council, to read to it the statement of an officer—whose name, unfortunately, I am not at liberty to mention—who has not, like some of our critics, never been in the Dekkhan at all, but who has spent a large portion of his Indian service in Mufassal work of the most arduous and searching character. What he says is this"—

The Hon'ble SIR ALEXANDER ARBUTHNOT:—"Has this officer been in the Dekkhan?"

The Hon'ble MR. HOPE:—"Yes; and he was for some time Collector of one of the four districts for which we are at present legislating. He writes:—

"'Another argument is, that "the people" value the power of appeal. If by "the people" is meant the plaintiff class—the saukárs—I do not doubt this at all, since the more lengthy,

dilatory and costly are legal processes, the greater advantage has the rich and intelligent suitor over a poor and ignorant opponent; but I deny it altogether as regards the more numerous class of defendants.'

"The Hon'ble the Law Member next said that no suits could be named in which such difficulties occurred as in mortgage-cases; and that Bombay was no exception Mr. Naylor was called in to prove. Mr. Naylor, so far as I can see, states very little more than, and that not in a very different manner from, that which I stated myself. He says, which is a truism I suppose, that—

'the intricacy of a suit in no way depends upon the social status or occupation of the parties thereto';

and he goes on—

"'It is to the subject-matter of an action we must look in order to judge whether it is likely to involve complicated issues; and those who are acquainted with the usual range of litigation will unhesitatingly affirm that questions relating to mortgage claims are amongst those which are most prolific of knotty points and legal difficulties. It makes no difference in this respect whether the value of the matter in dispute be small or great, or whether the parties to the suit belong to one class or another.'

"In this he furnishes no answer whatever to the statement which I make, that the mortgage-cases may some of them be easy and others difficult. As to looking at the subject-matter, he is at variance with the other judicial officer, Mr. Wedderburn, who tells us that 'experience shows that these tests are fallacious.' There is nothing in this quotation from Mr. Naylor to controvert what I have said, that even these matters of priorities, &c., may not often all be settled on very ordinary rules. In fact, if it was not so, it would not be possible for our Subordinate Judges to deal with them so satisfactorily as we see they do, from the fact that only about 16 per cent. of all their decisions are reversed in appeal.

"The Hon'ble Mr. Stokes next passed a criticism upon an answer which I gave at the time of the introduction of the Bill to a question put by the Hon'ble Sir Alexander Arbuthnot. I was saying that 'mortgage-cases are usually only difficult if they happen to involve questions of priorities and the like, or there are several creditors'; and Sir Alexander Arbuthnot enquired 'whether there might not be questions of title.' I answered that 'under the Bombay revenue system the name of the owner of every field is entered in the Government books. It would only be in most rare instances that the man whose name appeared was not the real owner; and so questions of title are not likely to give trouble.' That is every word of it absolutely correct. The ruling of the Bombay High Court which the Hon'ble the Law Member produces is a ruling perfectly well known to every revenue-officer in the Bombay Presidency. I did not say that the entry of a man's name in the books was absolute evidence of his being an owner of a field. I did say that, owing to the system of so entering names,—and I repeat it now in more detail—in nineteen cases out of twenty it is the man to whom the field really belongs that will get his name entered, and that, therefore, if you take up a name in the books, the chances are that in nineteen cases out of twenty the person is the owner; and therefore, finally, questions of title will give a great deal less trouble where there is this system of entry than they would do if it did not exist. Questions of title are not likely to give special trouble; and I defy any one to contradict the statement."

The Hon'ble MR. STOKES:—"I wish to explain that the remark of the Hon'ble Mr. Hope was intended to convey the impression that difficult questions as to title could not arise, inasmuch as the Collector's record would serve as evidence of the title."

The Hon'ble MR. HOPE:—"I have only to say that I usually endeavour to speak with great care; that my words are carefully weighed; that what I have said is exactly what I mean, and that I neither said what the Hon'ble Member attributes to me, nor did I mean to say it. What I did say was that 'questions of title are not likely to give trouble'—and no more they are.

The Hon'ble MR. STOKES said that no one who read the opinions of the Bombay Judges between the lines—especially the remarks of Mr. Justice M. Melvill—could fail to see that they were laughing at the whole thing.

The Hon'ble MR. HOPE:—"I have no such powers of penetration as the Hon'ble Member; but I can see no irony in it, except the irony of fate, which has led to the reference he desired ending in the manner it has done."

His Excellency THE PRESIDENT said:—"I have felt in the course of this very protracted discussion that the first and second amendments placed on the notice paper by my hon'ble friend Mr. Hope are virtually and substantially interdependent parts of what for all practical purposes is the same motion, and that it is difficult to consider them with convenience or advantage separately for that reason. But, assuming that the Bill as eventually passed will be so far replaced in harmony with the original intentions and purpose of the framers of it and of the Local Government as not to exclude mortgage-cases from that supervising authority which the Bill provides for all other cases mentioned in it, I must frankly say that, after having read with care the Report of the Select Committee, and after listening with great attention to the remarks of my hon'ble colleagues the Law Member and Sir Alexander Arbuthnot, I have not heard any argument which satisfies my own judgment that there are sufficient grounds for separating mortgage-cases from all the other cases referred to in the clause which the Hon'ble Mr. Hope proposes to amend, and applying specially to those cases the system of procedure which, as I understand, the majority and the minority of the Committee have, both of them, agreed to exclude from all the other cases—a procedure which the Local Government and those who framed the measure regard as absolutely incompatible with the attainment of one of the main objects of the measure, which is to simplify and to cheapen the administration of the law to a helpless and poverty-stricken portion of the population. It appears to me that all the arguments used in favour of admitting appeals in mortgage-cases would equally apply to the extension of appeals to all the other cases referred to in this clause; and as the whole of the Committee have agreed in excluding the right of appeal from these cases, I fail to recognize that any sufficient case has been made out for applying it to mortgage-cases. With reference to the remarks of my hon'ble friend Sir Frederick Haines and my hon'ble friend Mr. Thornton, it appears to me that they wandered a little away from the practical subject we have to deal with. I have no doubt that nobody is in a better position than my hon'ble friend Mr. Thornton to tell us what are the feelings of the peasantry of the Panjáb, and what are the facts of the experience derived from the working of the appeal system in that province. But we are not legislating for the Panjáb; we are legislating for a peasantry of the most poverty-stricken, depressed, and miserable portion of the Dekkhan, and with the object of ameliorating their condition. The case which we are legislating for is avowedly an exceptional case; and it is because it is exceptional that we are called upon to legislate for it. I think we must all hope that the condition of the peasantry in the Dekkhan is not the condition of the peasantry in other parts of India; and that this exceptional and, as we are obliged to acknowledge, discreditable state of things has notoriously grown up unchecked, if not encouraged, by the practical operation in certain localities of our existing Civil Code, and the application of those legal conceptions which govern the procedure and lead to the decrees and judgments of our civil tribunals. That being the case, I must say that my own vote will be given without hesitation in favour of this amendment."

The question being put, the Council divided—

Ayes.	*Noes.*
The Hon'ble T. C. Hope.	The Hon'ble B. W. Colvin.
The Hon'ble T. H. Thornton.	The Hon'ble Whitley Stokes.
The Hon'ble Faiz Alí Khán.	The Hon'ble Sir Andrew Clarke.
The Hon'ble Rivers Thompson.	The Hon'ble Sir A. J. Arbuthnot.
The Hon'ble Sir E. B. Johnson.	His Excellency the Commander-in-Chief.
The Hon'ble Sir J. Strachey.	
His Honour the Lieutenant-Governor.	
His Excellency the President.	

So the Motion was carried.

The Hon'ble MR. HOPE next moved that for section 54 of the Bill the following section be substituted (namely):—

"54. The Local Government from time to time may, and if the Government of India so direct shall, appoint an officer, as Special Judge, to discharge in the place of the District Judge all the functions of the District Judge under this Act in respect of the proceedings of all Subordinate Judges, Village-Munsifs and Conciliators, and may cancel any such appointment.

Special Judge.

"Such Special Judge shall not, without the previous sanction of the Government of India, discharge any public function except those which he is empowered by this Act to discharge.

"If any conflict of authority arises between the Special Judge and the District Judge, the High Court shall pass such order thereon consistent with this Act as it thinks fit.

"No appeal shall lie from any decree or order passed by the District Judge under this chapter, or by the Special Judge, or by an Assistant or Subordinate Judge appointed under section fifty-two, or by a Bench, in any suit or proceeding under this Act."

He said:—"My Lord, I have already mentioned that the Government of India, while fully approving of the proposal of the Bombay Government to accompany the curtailment of appeals by inspection and revision, thought it desirable to strengthen the staff by a Special Judge.

"'The Governor General is of opinion,' it was said, 'that, looking to the arduous nature of the duties which the Act imposes on the Subordinate Judges, and the large discretion it confers on them, the appointment of a special officer of this sort, who would ordinarily be chosen from the more experienced District Judges, is essential to the proper working of the system proposed.'

The Local Government readily acceded to this.

"The majority of the Select Committee have now held that their admission of appeals in mortgage-cases which, they say, 'form a very large class, and the most important class, of cases to be heard under the Bill' renders the Special Judge unnecessary."

The Hon'ble SIR ALEXANDER ARBUTHNOT:—"If the Hon'ble Member will excuse my interrupting him, I wish to say that, as the first amendment proposed by him has been passed, I for one, and I think also my hon'ble colleagues who voted with me on the first amendment, are not disposed to oppose the second amendment, and therefore I think the time of the Council might be saved by my mentioning this at once."

The Hon'ble MR. HOPE:—"With reference to that, I have only to say that in that case I shall be most happy to save the time of the Council and myself; but as some objections have been made with reference to the question of a Special Judge which I intentionally left unanswered, perhaps I may be allowed to read my remarks on the subject, or, if that is not convenient, perhaps they might be taken as read and placed on record."

The Hon'ble SIR ALEXANDER ARBUTHNOT:—"Cannot the Hon'ble Member speak on the points on which he wishes to reply? I for my part have the strongest objection to written speeches; and I think that written speeches not delivered in Council, but placed on record, are especially open to objection."

The Hon'ble MR. HOPE:—"I quite agree with the Hon'ble Member. For reasons well known to him, however, I have found it necessary to prepare written speeches in this instance."

His Excellency THE PRESIDENT said it was desirable to save time, if possible.

The Hon'ble MR. HOPE having then waived his objection, the motion was put and agreed to.

The Hon'ble MR. HOPE then moved that for section 68 of the Bill the following section be substituted (namely):—

"68. No pleader, vakíl or mukhtár, and no advocate or attorney of a High Court, shall be permitted to appear on behalf of any party to any case before a Conciliator or a Village-Munsif, or to any case cognizable by a Subordinate Judge under this Act, the subject-matter whereof does not exceed in amount or value one hundred rupees:

Pleaders, &c., excluded in certain cases.

"Provided that any party to any such case may be permitted, on reasonable cause being shown to the satisfaction of the Conciliator, Village-Munsif or Subordinate Judge, to employ any relative, servant or dependent who is not, and has not previously been, a pleader, vakíl or mukhtár, or an advocate or attorney of a High Court, to appear either conjointly with, or in lieu of, such party:

"Provided also that a Subordinate Judge may permit a pleader, vakíl or mukhtár, or an advocate or attorney of a High Court, to appear before him on behalf of any party to any case of the description aforesaid in which, for reasons to be recorded by him in writing, he deems it desirable that the party should have such assistance.

"When a relative, servant or dependent appears in lieu of a party, he shall be furnished by him with a power-of-attorney defining the extent to which he is empowered to act."

He said:—"My Lord, the whole essential difference between this and the section now in the Bill lies in the third clause. This question of pleaders originated in a suggestion of the Secretary of State in paragraph 31 of his despatch already alluded to, that possibly the exclusion of professional pleaders from the 'Courts with summary jurisdiction and without appeal up to a limited amount,' which he recommended, would be desirable. The Bombay Government's draft Bill accordingly contained a section substantially similar to that which I am now proposing. From Conciliation and Village-Munsifs' Courts the exclusion, following in the case of the latter the Madras law, was absolute; from cases before a Subordinate Judge it only extended up to a limit of Rs. 100, and was subject to a proviso allowing the Court to admit a pleader in any case in which professional assistance seemed to it to be really desirable. This proviso remains as section 69 of the Bill now before us. The limit of Rs. 100 was carefully chosen, in order to check evasion by slight exaggeration of the claim in the petty suits which form the bulk of litigation. The Bill as introduced maintained, as does also the Bill now reported, the exclusion from Conciliation and Village Courts; but, as a sort of compromise between conflicting opinions regarding exclusion from Subordinate Judges' Courts, it adopted the expedient of empowering the Judge to refuse costs, which was said to work well in the Small Cause Courts of the Presidency-towns. To this the Bombay Government emphatically object, in the following terms:—

"'This Government fear that the compromise which has been adopted with respect to section 69 of the Bill will render the provision for the exclusion of pleaders in cases before Subordinate Judges altogether futile. The amount to be allowed in the costs of a suit on account of fees of pleaders is fixed by law (Act I of 1846, section 7; Regulation II of 1827, section 52, and Appendix L); and in the case of suits for not more than Rs. 2,000 it amounts to 3 per cent. only of the value of the suit. The amount of the fee at stake in any case contemplated by section 69 of the Bill could thus never exceed Rs. 3; and it is obvious that the possible loss of so small an amount as this will not deter either suitors from engaging or pleaders from giving professional assistance. The latter will of course depend, as they do now, for the most part upon the remuneration privately agreed upon, and when possible will take care to be paid beforehand. The Governor in Council trusts, therefore, that it will be found practicable substantially to restore the provisions of the draft Bill submitted by him,' &c.

As to the futility of the expedient about costs all parties seem now agreed, and the Select Committee unanimously struck out the section (69) regarding it. But the majority have gone further, and would get rid of a difficult question by substituting no provision at all, and leaving pleaders to appear in all cases, as at present. Now, I submit that on its merits, no less than in view of the decided opinion of the Bombay Government, the question cannot be thus passed by. As to the remarks in section 27 of the report, they seem to me to be altogether beside the mark. No one has denied, as far as I can see, that 'well-qualified pleaders are a material aid to the Judge in dealing with a case of any complication or difficulty,' nor does anybody that I know of allege that 'in suits under Rs. 100 in value the aid of pleaders cannot be required,' or that 'the difficulty of a case' depends 'on the amount at issue.' What *is* affirmed is, that well-qualified pleaders are of little use, that ill-qualified or unprincipled pleaders cause much harm, and that both are a needless expense, in cases which are *not* of complication and difficulty; and that from these alone they should be excluded. This, and no more, is accordingly what my amendment provides for. It may be added that the fees which parties can afford to pay in these petty suits are not, even when they exceed the legalized limits, sufficient to afford a livelihood to the best class of pleaders. As for the idea, to which the remarks also allude, that the saukár will get behind the exclusion of pleaders by employing as his servant and sending to Court in his behalf

'some man who, though not a professional legal practitioner, would have a considerable knowledge of law and of the ways of the Court,' it seems to me to bear a strong family likeness to certain other devices, more ingenious than practical, by which we have already been told that other provisions of the Bill may be defeated. Page 338 of Appendix C to the Commissioners' Report shows that the largest number of suits filed by one money-lender in a year in a Court taken as a test was 31. It, therefore, certainly would not pay any except the great money-lenders, who, we are told, are the most respectable, and probably would not pay even them, to employ a separate servant of the class indicated solely to carry on suits. It would also be the duty of the Court to put down, by means of the discretion allowed it, any palpable evasions of the spirit of the law, and in doubtful cases to give the defendant, under section 69, proper professional assistance. And finally, the cases in which the device could be used at all would, by the hypothesis, be only those simple ones in which knowledge of law would give no great advantage.

"But I find in the weight evidently attached by the majority of the Select Committee to 'knowledge of law and of the ways of the Court,' as I did in the remark of the Hon'ble Sayyad Ahmad when the Bill was introduced, that 'the Courts receive considerable assistance from vakíls, and that the more ignorant the suitor is, the less probability is there that he will be able to explain his case in the confusion he experiences in a Court of justice as well as he can to his adviser outside the Court'—I find, I say, in both these the traces of false ideas and practices which this Bill, by one of its fundamental provisions, aims at destroying, root and branch. What I refer to is the view of the mere lawyer, that a Court of civil justice should be a place where a man sits on a high seat, in gown and bands, to manufacture decrees out of materials laid before him, rather than the view of the practical statesman, so well set forth by Sir James Stephen, that the Judge should confront the parties, note what they say, see the facts sifted to the bottom, and pass order accordingly.

"To sum up: I am making no attack upon pleaders either in general or in particular. I say nothing whatever as to the character and qualifications of the pleaders to be ordinarily found at Subordinate Judges' Courts. I merely affirm that in all simple cases they should be excluded, because they are a heavy expense to the parties, while the Court can follow the law and ascertain the facts as well, if not better, without them, but that, on the other hand, they should be admitted wherever it is clear that they can really be of use. This is all my amendment provides for. To the objection that to give to Judges a discretionary power of exclusion will lead to subserviency on the one hand and favouritism on the other, and will destroy the independence of the Bar and the efficiency of the Judge, I reply that none of these consequences have followed the discretion, as to the costs of even advocates, which Presidency Small Cause Court Judges have for nearly thirty years enjoyed. The objection that many pleaders may be driven to seek other employment I meet by saying that, if the profession be weeded of inferior members, so much the better for those really competent and for suitors, as also that, after all, Courts and suitors are not made for pleaders. In conclusion, what I advocate is merely what is the law in France; what is aimed at by the denial of *all* costs in cases up to Rs. 100 in the Presidency-towns; what has not been objected to by the Judges of the Bombay High Court; and what is deemed essential by the Local Government."

The Hon'ble MR. THORNTON said:—"In accordance with the general principle I have already explained, I shall not vote against this amendment; at the same time, while fully sympathizing with the object of the Bombay Government, yet, judging from my own experience, I strongly doubt whether this extensive exclusion of pleaders, vakíls, mukhtárs and others from practising in the Courts will have the effect that is intended. I strongly doubt it; because, although such exclusion might be possible and beneficial in a newly-acquired province, it is questionable whether it can be beneficially introduced in a locality where people have been for years accustomed to the assistance of the legal practitioners. I very much fear the practical result will be that, while the

respectable pleaders and mukhtárs will be excluded from the Courts, a class of legal practitioners will continue to practise outside the Courts, and will be all the more unscrupulous for being unrecognized and uncontrolled.

"My opinion on this point, my Lord, is not a mere surmise, but is based upon practical experience at Delhi, where I was district officer many years ago. That district was formerly attached to the North-Western Provinces Government, and the people were accustomed to employing professional agency in Courts of law. When it was transferred to the Panjáb, the Panjáb system was introduced, which at that time excluded all legal practitioners from the Courts. It soon, however, became apparent that, although legal practitioners were excluded from the Courts, there sprung up outside the Courts a number of most disreputable and unscrupulous practitioners. The result eventually was that in the year 1853 my respected Chief and lamented friend Sir Donald Macleod—a patriarch and philanthropist to the backbone, that is, a lover of all mankind except lawyers—decided to extend the Pleaders Act to the Panjáb. But, though the results of my own experience are adverse to the proposals of the Bombay Government, it does not follow of a certainty that what happened in the Panjáb will happen in the Dekkhan; and as the Local Government strongly desires to try this measure, I shall not oppose it."

The Hon'ble MR. COLVIN said:—"As I understand the arguments which have been advanced by my hon'ble friend the Mover, he wishes to exclude pleaders in petty cases, on the ground that, even when well-qualified, they are of no use, and that, if ill-qualified, they may do great harm. Now, the first of these two propositions seems to me very questionable. I am not at all disposed to admit that well-qualified pleaders are of no use. On the contrary, I believe that in all cases they are of very great assistance to a Court. It so happens that I have served for some years in a province where no pleaders are, or ever have been, admitted; and I must say that my experience there has not led me to think that the absence of pleaders is an advantage in administering justice. More harm, I believe, results from excluding well-qualified legal practitioners than from admitting them. The apparently simple procedure of leaving parties to conduct their own cases does not tend to simplify justice, even with a practised Judge. With an inexperienced one, it is more likely to pervert it. Ignorant and uneducated litigants are not unlike a pair of the swordsmen that one sees in this country, making feints and flourishes in the air before they cross swords. They are slow to commit themselves to statements of fact, which may hereafter prove inconvenient, but are quite ready to be voluble about their adversary's private character and general misdeeds. The Court cannot arrive at the facts if it refuses to listen to anything that is confused and irrelevant, and is obliged, even in simple cases, to waste much of its time in finding the issues before it can try them. When the points in issue have been ascertained, matters are not much advanced. The parties know very well what they want, but have very confused notions of the way in which it should be proved, and of the evidence which they require. The Judge, if he wishes to do justice, must not only try the suit, but must also in a great measure conduct it on behalf of both parties without losing his impartiality. The labour and responsibility which this throws upon a conscientious Judge is excessive, and with a careless and a lazy one may lead to much injustice.

"The second part of my hon'ble friend's argument is that bad pleaders may do a great deal of harm. I do not deny this; but I doubt whether by excluding pleaders from appearing in Court we shall get rid of any harm which they may be able to do. It is not what unscrupulous pleaders do or say in Court that is usually mischievous, for there they are acting under a sense of responsibility and are subject to control. They can do much more harm out of Court by giving bad advice; and their power to do this will be in no way diminished by prohibiting their appearance in Court.

"A point to be remembered also is that by narrowing the field for legitimate practitioners, more room will be left for a worse class of legal advisers. Litigiousness and chicanery are no monopoly of unscrupulous pleaders. As has been truly

'some man who, though not a professional legal practitioner, would have a considerable knowledge of law and of the ways of the Court,' it seems to me to bear a strong family likeness to certain other devices, more ingenious than practical, by which we have already been told that other provisions of the Bill may be defeated. Page 338 of Appendix C to the Commissioners' Report shows that the largest number of suits filed by one money-lender in a year in a Court taken as a test was 31. It is not what unscrupulous pleaders do or say in Court that is usually mischievous, for there they are acting under a sense of responsibility and are subject to control. They can do much more harm out of Court by giving bad advice; and their power to do this will be in no way diminished by prohibiting their appearance in Court.

"A point to be remembered also is that by narrowing the field for legitimate practitioners, more room will be left for a worse class of legal advisers. Litigiousness and chicanery are no monopoly of unscrupulous pleaders. As has been truly

said by my hon'ble friend Mr. Thornton, there are always a tribe of petition-writers, stamp-sellers and other such hangers-on of the Courts who are ready to take the place of pleaders when pleaders are not forthcoming. These men, if they do not know much of law, often have a pretty good knowledge of the character and habits of the Court officials, and a familiarity with the forms of ordinary procedure which impose upon novices and strangers to litigation. Suitors prefer the advice of these men to none; and very bad advice they often receive. However bad it may be, the givers of it are under no kind of responsibility for what they do. There is no recognized relation between them and the litigants, and they are neither amenable to the opinion of their fellows nor to the executive control of the Court. I think that anything which is likely to throw more business into the hands of such men as these can do nothing but mischief.

"On these grounds alone I should be opposed to the exclusion of pleaders. But I must also say that Mr. Justice West's argument on this subject has made more impression on me than it appears to have produced on the Mover. It has been objected to that argument that the saukár never has a very large stake in a single case, and that it would not be worth his while therefore to employ a special agent. But a saukár does not lend money to a single individual. He has a number of transactions. It is quite impossible for him whenever he wants to recover money in Court to attend personally on every occasion. He must employ somebody. The Bill allows him to appoint an agent; and naturally he will appoint an agent, if he can procure one, who has some knowledge of the business to be done. Even if the agent has not that knowledge to commence with, the habit of attending the Courts will give him a familiarity with their practice. The raiyat, who is often an utter stranger to them, will be at a great disadvantage in contending against such an adversary. My objections to the present amendment are urged as much on behalf of the raiyat as of the Court and the pleaders—in fact, more so; and I believe, if this amendment should be carried, that the raiyat will be the chief sufferer from its effects."

The Hon'ble MR. RIVERS THOMPSON said:—"As a member of the Select Committee who voted for some such provision in the Bill as the amendment now proposed, I am of course prepared to support that amendment. My hon'ble friend Mr. Thornton has, contrary, I must say, to his usual practice, spoken in one sense and voted in another. I have no doubt the Council, while it enjoyed his speech, will gratefully accept his vote; but I think he makes one mistake. In speaking generally of the benefits of admitting pleaders, and the evil that is done by excluding them, he seems (as also does my hon'ble friend who spoke last) to have argued rather on the supposition that pleaders were absolutely excluded in all cases; but, as far as I understand the amendment, it goes only so far as to extend the exclusion to cases cognizable by a Subordinate Judge, the subject-matter of which does not exceed in amount or value one hundred rupees. Therefore, in all the larger cases, which are of greater importance, there is no prohibition against the admission of pleaders; and, practically, what the amendment will establish is that pleaders shall be excluded from suits up to one hundred rupees, but that beyond that amount they will have a right to appear; and that, even as regards smaller cases, it will always be in the option of the Court, at its own discretion, and for reasons to be recorded in writing, to admit the pleader where it is thought essential that he should appear. The argument, therefore, against the exclusion of pleaders generally has no place in the present discussion; and taking the general object of the proposed measure, namely, to attempt by conciliation to adjust all petty differences, I question whether the admission of advocates would be beneficial to either side in such cases. We are passing here legislation which is purely exceptional in its character; and in the interesting speeches which we heard on the first amendment, in which the revered name of Bentham appeared frequently, and the legal acumen of Mr. Justice West and other judicial officers was brought forward, it struck me that, had any of these eminent authorities been present here, they would have been the last persons we should have desired to consult with respect to a measure which is one rather of executive and administrative arrangement than of precise legislative requirement and procedure; and

admitting, as I do, the force of the criticisms upon which such great stress has been laid, as to the advantages of a qualified Bar in regularly constituted tribunals, I think we are dealing here with a state of things which requires exceptional treatment and on which, on the authority of those best able to advise, we are justified in going out of the beaten track. Indeed, I believe, if Jeremy Bentham had been in this room, and had had to discuss any of the sections which form part of this Bill, he would probably not have remained very long amongst us."

The Hon'ble MR. STOKES said that on the occasion of the introduction of this Bill he had expressed his views with considerable fulness against doing anything calculated to exclude pleaders in assisting Judges in the consideration of the very difficult cases which would come before them under the Bill, even when the value was limited to one hundred rupees. All these mortgage-cases would come before Subordinate Judges; and it seemed to him that the optional power of the Subordinate Judge to refuse to permit pleaders to appear was calculated to cause great subserviency on the part of the pleaders and a great suspicion of favouritism on the part of the Judge. With reference to that point, although the Hon'ble Mover had very wisely, for his own interests, refrained from a fuller citation of Mr. Justice West's remarks, he (MR. STOKES) would take the opportunity of reading to the Council another short passage from Mr. West's paper. After pointing out that it had been our long endeavour, now approaching complete success, to supply the Courts with an educated, honest and independent Bar, and that every material proceeding, being taken in public, appealed to the moral and legal consciousness of the assembly, Mr. West proceeded:—

"The sense of responsibility thus engendered in the Subordinate Judges the Bill proposes, as far as possible, to destroy. In the first place, as the great majority of suits are for sums of less than Rs. 100, the Court will not be bound to allow pleaders' fees, and certainly will not allow them, except in special cases and for favoured practitioners. The amount of possible business being thus materially cut down, many pleaders will be forced to seek other employment. At present in many of the Subordinate Courts the three, four or five pleaders who only can gain a livelihood are barely sufficient to secure to all litigants who desire it independent assistance. If the numbers are reduced by lack of employment, as has happened in some cases in Sindh, to two, a creditor by retaining both pleaders, or securing them generally to his service, virtually cuts off his adversary from effective professional aid. But what is quite as important is that the pleaders who remain will in practice be entirely dependent on the Subordinate Judge. Any independence of bearing, any troublesome persistence, on the part of a pleader will be subject to punishment by the loss of his livelihood. Thus the salutary constraint of professional opinion will be altogether removed. The Judge's efficiency will sink with his sense of responsibility, with the independence and intelligence of his natural critics and interpreters to the public."

The case of the Presidency Small Cause Courts which had been referred to by the Hon'ble Mover as justifying the discretionary power of excluding legal practitioners did not appear to be in point. In the Presidency-towns the Judges of those Courts performed their functions in the midst of a large and independent society. They were controlled by an educated public opinion; they were subject to public criticism. Some of them were barristers themselves; and none of them would for a moment dream of riding rough-shod over any barrister or pleader who appeared before him.

The amended section also went beyond what he (MR. STOKES) understood to be the requirements of the Bombay Government. It put advocates and attorneys of the High Court on the same level as district pleaders and mukhtárs; but in a letter from the Secretary to the Bombay Government, referring to the provisions of the draft Bill respecting the exclusion of legal practitioners from cases tried by Subordinate Judges, he found the following passage:—

"I am to add that, if such concession would tend to remove the objections of the opponents of those provisions, he [that is, the Governor of Bombay in Council] would not object to their being limited in their operation to district pleaders *so as not to affect pleaders or advocates or attorneys of the High Court.*"

It was a curious fact that might also be mentioned that the Hon'ble Mover had omitted all mention of this passage in the précis of that letter with which he had favoured the Council and which had been printed and circulated as a paper relating to the Bill.

The Hon'ble SIR ALEXANDER ARBUTHNOT said:—"It is perhaps almost useless that I should take up the time of the Council by any remarks on this amendment; for it is already evident what the decision of the Council is going to be. To the very strong, lucid and forcible arguments adduced against the amendment—an amendment, however, which the author of those arguments is prepared to support by his vote—I really have nothing to add that would be worth the attention of the Council. To my mind, those arguments, supported as they are by the arguments advanced by Mr. Colvin and by Mr. Stokes, are perfectly conclusive as to the inexpediency of the amendment now before us. I shall vote against the amendment."

The Hon'ble MR. HOPE said:—"The remarks of my hon'ble friend Mr. Thompson have been so complete and comprehensive with reference to the misconception under which it seemed to him, as to me, that the Hon'ble Messrs. Thornton and Colvin were labouring as regards the entire exclusion of pleaders, that there is very little left for me to say. The paragraph from the letter of Mr. Justice West upon which the Hon'ble Mr. Stokes would rely has already been answered by anticipation; and I do not find anything in it which calls for any further explanation. Mr. West states his opinion, and that opinion is of course entitled to whatever weight each reader of it may consider it to be worth. As to the control which is supposed to be exercised in Presidency Small Cause Courts by the public, I must confess that I think that control is very much exaggerated very frequently, and that all arguments of that kind may to a considerable extent be termed 'clap-trap arguments.' But, as a matter of fact, we happen to know that the arrangement checking employment of pleaders has worked for thirty years with perfect success in these Courts; and I see no reason why it should have worked otherwise.

"Regarding the charge which the Hon'ble the Law Member has made against me, of having omitted, because I supposed it would suit my purpose, a certain paragraph in a letter of the Bombay Government, I have only to say that my summary is as correct as the allegation regarding it is incorrect. Any person who will read the paragraph dispassionately will see that the Bombay Government are exactly of the opinion that they always were. But they say at the end regarding an admission of only pleaders, advocates or attorneys of the High Court that—

'if such concession would tend to remove the objections of the opponents of those provisions, he would not object to their being limited,' &c.

That is to say, the Government of Bombay offer, as a compromise, a concession which they would not mind making.

"If the Hon'ble the Law Member had expressed any desire in Select Committee to accept that compromise, it might no doubt have been considered. The only objection to inserting such a compromise in the Bill would have been that it is so utterly ridiculous, that I myself should have been ashamed of it. If, as the Hon'ble Member has been telling us, and quoting Mr. Justice West to prove, the business in these Courts is so small that only four or five pleaders can get a livelihood from it, and the tendency of our measure is to reduce this further, then I should like to know where is the business to come from which is going to support advocates and attorneys of the High Court? It is simply ridiculous to suppose that the attorneys and advocates will go out into the highways and hedges of the districts of the Dekkhan in order to carry on their business.

"Therefore, whether these words were put in or left out would not make the slightest difference in the section; and being ridiculous, as I take them to be, I think they are better left out".

The question being put, the Council divided—

Ayes.	*Noes.*
The Hon'ble T. C. Hope.	The Hon'ble B. W. Colvin.
The Hon'ble T. H. Thornton.	The Hon'ble Whitley Stokes.
The Hon'ble Faiz Alí Khán.	The Hon'ble Sir Andrew Clarke.
The Hon'ble Rivers Thompson.	The Hon'ble Sir A. J. Arbuthnot.
The Hon'ble Sir E. B. Johnson.	His Excellency the Commander-in-Chief.
The Hon'ble Sir J. Strachey.	
His Honour the Lieutenant-Governor.	
His Excellency the President.	

So the Motion was carried.

The Hon'ble MR. HOPE next moved that in section 39 the following words be substituted for the words "any of such parties" (namely):—

"or when application for execution of any decree in any suit to which any such agriculturist is a party, and which was passed before the date on which this Act comes into force, is contemplated, any of the parties";

and that in section 47 the following words be inserted after the word "suit" (namely):—

"and no application for execution of a decree passed before the date on which this Act comes into force."

He said:—"My Lord, the object of this motion is to restore to the Bill the provision for making conciliation precede application for the execution of old decrees, which has been cut out by the majority of the Select Committee. As to its details, I may explain that the words for insertion in section 47 are those which were cut out, but that the alteration in section 39 is new, and intended to meet a mere doubt of drafting, raised by Mr. Naylor, as to whether the section as it stood fully tallied in respect of these old decrees with section 47 of the Bill as introduced.

"The reasons assigned for this excision will be found in paragraph 23 of the report, and are, briefly, that every existing decree must be assumed to be just; that no influence, however mild, can rightly be applied to induce a decree-holder to forego one jot or tittle of his legal rights; and that, if the debtor cannot pay, he may resort to the Insolvency Court.

"I may point out, *in limine*, that the statement that this excision is 'adopting the view of the High Court' would seem to be mistaken. The High Court have evidently not understood what was contemplated, and have supposed that it might be intended that the Civil Court should 'ultimately refuse to execute its own' decree. What Mr. Justice Melvill would have said if the scope and grounds of the measure had been explained to him it is impossible to judge. But the High Court cannot now be fairly quoted in the matter. Such explanation I will endeavour to afford.

"I am content to accept the premise that every existing decree must be assumed to be just; although I might easily impugn it by pointing out that the present Bill, in obliging the Courts in future to go behind the bond, and giving them special powers to reduce claims which they have been in the habit of admitting, proceeds on the very contrary assumption that their decrees made in the past have often been unjust. And I also admit that the debtor *can* obtain full relief from the Insolvency Court. But I maintain that friendly mediation rightly *may*, and under existing circumstances certainly *ought*, to be applied to obtain an early settlement of these old decrees. In the first place, we know that these decrees are very commonly for amounts which the debtor may, indeed, have made himself legally liable for, but which the creditor could not have reasonably expected ever to receive. The Dekkhan Riots Commission and Mr. Auckland Colvin both bring out this fact. Then, again, we know that, owing to frauds in execution, many of these decrees have really been satisfied over and over again. I must trouble the Council to listen to one illustration of the sort of thing which goes on, taken from page 250 of Appendix C to the Commission's Report:—

"'The Subordinate Judge of Rahuri passed a decree for Rs. 19-9, including costs. In execution of the same he issued a warrant to seize property therein detailed and valued at Rs. 160.

The judgment-debtor appears to have objected; for the Subordinate Judge sent to Mr. Reid (the Magistrate) a sanction to prosecute him for resisting the attachment. Upon examination of the details of the warrant and comparison with the market prices, Mr. Reid found that, for instance, six kandies of bajri were valued at Rs. 51, the market value being Rs. 288, and 8 bullocks were valued at Rs. 32.'

"Thus, if this poor fellow had not had the pluck to stand up in defence of his rights, and even to incur criminal proceedings, he would have been simply plundered in the name of the law. This is what may, and does sometimes, happen when the warrant is duly served and returned. But sometimes it is not so. Here is a case which, for brevity' sake, I will partly summarize in my own words from the same source:—

"'Pemráj and Konirám got a decree from the Subordinate Judge at Sangamner for Rs. 7-5-11 against Bhikaji and Rámji. Execution was entrusted to a peon of the Court, who returned the warrant with an endorsement signed by Konirám stating that he did not wish for execution. Rámji petitioned the Court that his grain, cart-wheels, and silver bracelets had been attached and handed over to Pemráj. Some enquiry followed, ending with an order, dated two months after the offence, that as Rámji had not paid the fees, his petition was rejected. The peon died before the District Judge acted in the matter. Pemráj and Konirám were discharged, on accusation of an offence against public justice, by the benefit of a doubt, the Magistrate making damaging remarks. Rámji *never got back his property*, and it is believed that Pemráj has some of it yet.'

That this case is no isolated one we may infer from the fact that, according to the latest returns available, 139,285 warrants were in one year returned unexecuted as the result of 185,293 applications for execution—that is, 75 per cent.!

"Another mode in which these decrees are engines of oppression is through the fraudulent attachment of property of third parties. The civil returns for 1872 (the latest extant with these details) show that out of 4,224 suits arising from execution of decrees, 60 per cent. were decided in favour of third parties. In other words, 2,529 innocent persons were found by the Courts to have been put to the worry and expense of a civil suit in order to defend their property from falsely-alleged liability! The costs of execution, too, are enormous, being shown by the same returns to be about 22½ per cent. on the amount recovered. What with frauds, costs, &c., some decrees are a standing property to the holder; and Mr. Auckland Colvin gives instances furnished by Subordinate Judges where, after *nine* executions, the original sum due was unabated, or even increased! Finally, the Commission ascertained that in eight taluqás only, out of the thirty-six which the four disturbed districts contain, about 3,000 decrees, of above seven years' standing and of 3½ lakhs of rupees in value, were unsatisfied.

"The Local Government are surely right in recognizing the necessity, on political no less than moral grounds, of healing this festering sore, of drying up this source of fraud and oppression on the one side, and of misery, recklessness and deep discontent on the other. Various methods of doing so have been pressed upon them. It has been suggested that they should provide for the treatment of districts or parts of districts on the principle already applied to encumbered estates of taluqdárs and thákurs, settle the debts, pay off the amount and recoup themselves by various methods, by a rack-rent on the land, by taking produce in kind, by the farming system, &c. They have even been urged to allot an annual sum for charitably discharging the debts of individual needy agriculturists. But the Government of Bombay have rejected all these drastic remedies. 'It would be impracticable in the first place,' says Sir Richard Temple in his Minute of April 14th, 1879, 'and it would be in the second place impolitic, even if it were practicable, for any Government to undertake to deal with the debts of a whole peasantry.' What relief, then, do they wish to provide? For the extreme cases there is the Insolvent Court. But this is an extreme remedy. It involves some expense, some loss of self-respect, and even reasonable current credit, as also the liability of future earnings for a considerable period. A more simple middle path to speedy settlement is most necessary; and this the motion before us provides. It merely requires that, before execution of an old decree can be obtained, the parties shall go to the Conciliator, who will endeavour by friendly mediation to effect some reasonable and practicable compromise. That creditors will not object to this we may infer from their own statements at a public meeting held in Ahmadnagar in March last, as also from no exception being taken to the original provision for it in a memorial received from eleven leading Natives of Satára, nine of whom are saukárs.

"It should, however, be distinctly understood that nothing beyond mediation is intended. The supposition in paragraph 23 of the Select Committee's report, that it is contemplated that a 'decree should be placed on the same footing as an unproved claim,' and that 'the rights of the decree-holder under his decree should be brought in question,' are complete misapprehensions. Nothing of the sort is contemplated, and the words proposed for insertion will have no such effect. What is intended merely is that, if no settlement can be arrived at, the Conciliator shall give his certificate. The law will then take its course, and the decree in all its sanctity will be enforced. In all this I submit that there is nothing but what is reasonable, just and absolutely necessary on political grounds in the present state of the country; and I trust that the Council will uphold the recommendation of the Local Government accordingly. Any other course will rob the Bill of one of its essential provisions for the liquidation of existing debt."

His Honour THE LIEUTENANT-GOVERNOR said:—"I intend to vote for this amendment, because it seems to me that, if there are any cases in which conciliation is likely to be of any effect, it is in those in which a claim has been already proved, and in which all that remains is to determine the best method of satisfying it with the least trouble to the parties. I understand that the amendment takes away from the decree-holder none of the rights which he possesses under the present law; it merely provides that, before taking out execution, or before the defendant or judgment-debtor is put into the Insolvent Court, a settlement should, if possible, be made by the Conciliator; and I consider that it is perfectly reasonable and justifiable that this provision should extend to decrees which have been passed before this Act was passed, as well as to cases which may arise afterwards."

The Hon'ble MR. RIVERS THOMPSON said:—"I should be sorry to be silent on this amendment, even with the fear of my hon'ble friend Sir Alexander Arbuthnot before me. Whatever be the justice or injustice of the original decree, upon which the Hon'ble Member for Bombay has dealt with some force, the arrangement which this amendment is intended to supply is perfectly harmless and simple to carry out. The principle which permeates the whole of this measure is that, rather than go through a detailed dilatory technical procedure, every attempt should be made, not only for new debts but as regards those particular sections relating to old debts, to bring the parties together, and try by means of conciliation and adjustment to effect a satisfactory settlement of claims. If a creditor holding a decree against a debtor does not accept that conciliation; if he says, 'I hold a decree from the Court which I can execute any day I choose, and I prefer to stand on my rights,' nothing that this amendment provides need prevent or deter him from doing so. It simply means that a man having a claim, say of Rs. 250, against a debtor should come before a Conciliator before he attempts to enforce his decree; and it would be in the Conciliator's power to try and explain to him that, if the man against whom he had got a decree was in difficulties, a compromise could be effected and the matter settled in a friendly way. If the judgment-creditor did not accept this, the case would proceed in the ordinary course; and, therefore, this whole section is perfectly harmless—harmless as regards any interference with the rights of the creditor, but still opening a door for a settlement of some kind."

The Hon'ble SIR JOHN STRACHEY said:—"In regard to the merits of the question involved in Mr. Hope's present amendment I do not wish to say a word. I am perfectly satisfied to leave the case as my hon'ble friends Mr. Hope, Sir Robert Egerton and Mr. Thompson have stated it. I consider their arguments in favour of the amendment to be perfectly unanswerable."

The Hon'ble MR. STOKES said that, although he was under the disadvantage of speaking when the Hon'ble Financial Member had ruled that nothing could

really be said against the amendment, he begged to say that he would oppose it on the broad ground that any legislative provision interfering retrospectively with existing rights was *primâ facie* unconstitutional, and should not be adopted by the legislature, unless it was proved to be, which certainly was not the case at present, an absolutely overruling political necessity or a clear public gain—such, for example, as establishing a general law of Insolvency. If the amendment were adopted, any one who had undergone the expense and trouble of obtaining a decree against an agriculturist before the proposed Act was heard of would find himself precluded from executing it unless he produced a certificate from the Conciliator. Practically that requirement would often prevent him from executing his decree at all; for if the judgment-debtor refused (as he was sure to do in many cases) to appear before the Conciliator, the decree would not be executed till the lapse of a 'reasonable' time. Well, then, the question would be, how much was reasonable? The answer was, as much as the Conciliator (who would, he feared, often be a Government official, with a bias against the saukár and in favour of the raiyat) declared reasonable. The Conciliator might not make any such declaration at all, or, as had been pointed out in one of the papers, he might postpone it till the time for presenting an application for execution had expired. He (MR. STOKES) maintained that any such provision as this would disturb absolute vested rights, against which there was no equity; and he was glad to find himself supported in that view by a gentleman of large experience,—Mr. Naylor, the Legal Remembrancer of the Bombay Government, who said:—

"When the Courts have once passed a decree, their adjudication ought to be, and has always hitherto been, regarded as final. It would be subversive of all recognized principles to allow matters which have been once finally adjudicated upon by the constituted tribunals to be reopened, especially when the functionary before whom the revision is to take place is an illiterate Conciliator. Persons who may hereafter obtain decrees with the knowledge that they will have to take them before a Conciliator before being permitted to execute them will not have so much cause of complaint as the decree-holders who obtained their decrees before the date of the Act. The retrospective effect which it is proposed to give to this section in this respect is, to my mind, altogether inequitable. It is also uncalled-for, because debtors who cannot satisfy all their judgment-debts may, by taking advantage of the insolvency-provisions of the Bill, obtain their discharge on very simple and reasonable terms."

He understood the Hon'ble Mover to say that decrees would not be reopened during the process of conciliation; but it was impossible to suppose that in an informal proceeding of the kind contemplated the Conciliator and the parties would not rake up the whole case from the beginning.

The Hon'ble MR. HOPE said:—"I have very little to say with reference to this amendment in view of the complete statements made regarding it by my hon'ble friends Sir Robert Egerton, Mr. Thompson and Sir John Strachey, concluding with the remark of the latter, which has been fully verified by the result, that the arguments offered have been unanswerable. As I understand it, an argument is called unanswerable when no sufficient answer can be produced to it. The only answer produced is one which I must confess I heard with very considerable surprise—one which was produced on a previous occasion by the Hon'ble the Law Member. I must say that I felt considerable doubt at the time whether he brought it forward seriously, or whether he only used it on the principle that any stick will do to beat a dog with. The statement or suggestion that the decree will be reopened, made by Mr. Naylor, is simply inaccurate. The decree will not be reopened, as has been well put by the Hon'ble Members who have already spoken. The creditor will simply be asked, 'You have got a decree for one hundred rupees; will you take fifty down or not?' If he does, well and good; and if he says, 'No, I won't,' there is an end of the matter. It is quite impossible to call that a reopening of the whole case. Still less is it possible to apply to it the totally incorrect language in the report, in which it is said that the decree is placed on the same footing as an unproved claim. I cannot see, either, that it has any retrospective effect, any more than asking a man to make the promise I have just alluded to has. But suppose it was retrospective, I would merely remark that the Council must be aware that retrospective measures with reference to debts are not only passed constantly by this legislature, but a retrospective measure by which debts may be cut down by one-third of their amount was actually passed in this Council not two months ago, without a single word of objection from, but on the contrary on the motion of, the Hon'ble the Law Member himself; I refer of course to the insolvency-clauses of the Civil Procedure Code."

The question being put, the Council divided—

Ayes.	*Noes.*
The Hon'ble T. C. Hope.	The Hon'ble B. W. Colvin.
The Hon'ble T. H. Thornton.	The Hon'ble Whitley Stokes.
The Hon'ble Faiz Alí Khán.	The Hon'ble Sir Andrew Clarke.
The Hon'ble Rivers Thompson.	The Hon'ble Sir A. J. Arbuthnot.
The Hon'ble Sir E. B. Johnson.	
The Hon'ble Sir J. Strachey.	
His Excellency the Commander-in-Chief.	
His Honour the Lieutenant-Governor.	
His Excellency the President.	

So the Motion was carried.

The Hon'ble MR. HOPE then moved that in section 38 the words "other than an officer of revenue or police" be omitted.

He said:—"My Lord, these words are an interpolation of the majority of the Select Committee, intended, they say (paragraph 22), 'to guard against the dangers adverted to by the Hon'ble Sayyad Ahmad in his speech.' What the Hon'ble Sayyad Ahmad said was this:—

"'No doubt, a revenue or a police officer could bring influences to bear on creditors which would induce them altogether to forego their claims; but I need hardly express my conviction that the Government of India would altogether discountenance the exercise of any such influence; and I have no doubt the Council, in order to avoid even the apprehension of its exercise, will see fit to introduce a provision in the Bill prohibiting the appointment as Conciliator of any officer exercising revenue or police functions.'

"Now, although no allusion to this subject was made in the letter addressed to the Government of Bombay on the introduction of the Bill (Paper No. 3), these remarks attracted the attention of that Government; and in their reply they stated that 'it is not desirable to exclude from the office of Conciliator all revenue-officers, some of whom are capable of exerting a very intelligent and beneficial influence in that capacity.'

"Of the interpolated words, I would premise that they are, in the first place, unnecessary. No reasonable persons, either in this Council or out of it, can, I should hope, seriously suppose that the Government of Bombay would not be as anxious as themselves to discountenance all exercise of undue influence by Conciliators, whether they be officials or non-officials. There can be no doubt whatever that any evidence of such misconduct would be promptly followed by deprivation of office, and that, if the offender were an official, he would incur the severe displeasure of Government. The words, however, are not merely unnecessary but offensive. They cast beforehand, without a shadow of proof, an unworthy stigma upon the great revenue or executive department by which the bulk of the administration of this empire is carried on. Revenue-officers have in numerous capacities—as magistrates, as surveyors, as municipal councillors, and what not—to intervene in all sorts of disputes between man and man; and in these their general success and their high character are equally undeniable. The words, again, are unprecedented. There is not, as far as I can remember, any page of the Indian Statute-book containing a deliberate expression of want of confidence and an exclusion such as this. The exclusion, moreover, may be most prejudicial, as the Bombay Government point out. It is not likely that in practice revenue-officers, who have much else to do, will be largely employed as Conciliators; but occasions may easily arise when they alone can effect what is wanted. If, for instance, meetings such as that at Ahmadnagar, to which I have alluded, should result in leading bankers expressing their willingness to compound with all their debtors, a person of considerable position, intelligence and tact could alone carry the transaction through. Why, then, should the aid of such a person, if

the parties desired it, be denied merely because he happened to be a revenue-officer? I have known individuals, both European and Native, whose mere appearance on the scene was sufficient to pacify and give confidence to an angry countryside. Of police-officers I need say nothing, because no one dreams of making them Conciliators. But, finally, I would urge that where a great and experimental measure, such as that before us, has to be introduced, it is not only fair and reasonable, but indispensable to success, to leave the Local Government free to choose its own instruments. The Local Government have expressed their views and wishes very plainly in this instance; and I rely on the Council to support them."

The Hon'ble MR. THORNTON said :—"I shall vote for this amendment, because, assuming that special Courts of Conciliation are to be established, there appears to me to be no reason whatever why the Local Government should be restricted in its selection of Conciliators."

The Hon'ble MR. COLVIN said :—"In speaking upon the amendment which is now before the Council, I cannot help remarking that the statement which we have heard to-day, that the present Bill is only a local Bill, appears to me to require very large qualification. It is true that the Bill will only be of local application in the first instance; but I doubt if its future consequences will be merely local. If the provisions which this Bill contains are considered to be sound and suitable for relieving agricultural distress in the Dekkhan, it is not easy to see the grounds upon which the enactment of a similar measure could be refused, if asked for, in order to relieve a like agricultural distress in other parts of the country. It has been said no doubt that the measure is a purely tentative one, and that the experiment need not be repeated if it is not successful. I should be very glad to think that this was so. It seems to me more probable that the admission that an experiment is being made may be lost sight of, and that the results of the measure will not be waited for, but its success assumed. Before the year is out urgent applications will perhaps be made for a trial of the same experiment elsewhere; and what is now called a local and tentative law may grow into one of general application, and be treated as if it were a certain specific for the difficulties of the agricultural community everywhere.

"The changes of practice, too, which will be made by the Bill, so far from being in matters of mere technical detail, introduce new principles of very great importance. Much stress has been laid upon the necessity of deferring to local experience upon these points. It could easily be shown, I think, that in the Bill as it stands general experience has been quite sufficiently subordinated to local knowledge. For instance, it is a well-known general principle of law and of common sense that in all suits the best evidence should be obtained. The Bill, on the contrary, insists that the Courts shall go out of their way to look for the worst. It directs them to leave the comparatively safe ground of ascertained and recorded facts, and to trust in preference to the vague, conflicting, and often interested testimony of witnesses deposing to remote and doubtful transactions. They are to do this, moreover, with the express object of discovering fraud where no one has alleged it. Again, it is a matter of almost universal complaint that in India the land is changing hands, or being stripped of all profit to agriculturists by the pressure of their debts. The Bill, if it is passed, will make it almost impossible for the raiyats of the Dekkhan to borrow money at all except on a mortgage of their lands; for it will leave them no other security which a lender can safely accept. It has generally been held, too, that speedy justice is a good thing. Well, under the amendments which have been carried to-day, it is true that the delay caused by appeals has been cut off; but, on the other hand, the Bill will interpose an indefinite delay for the purpose of conciliation before a suit can be taken into court. For, as far as I can judge from its wording, the delay which a Conciliator may cause, if he chooses, has no limit. Further, it has commonly been thought that people should be free to make their own bargains, and that bargains, when made, should be kept. The Bill declares that it is the duty of the Judge, notwithstanding any agreement made by the parties, to alter and arrange the terms of their transaction for them, and, where interest forms part of a bargain, to allow as much or as little as he may think reasonable. The natural effect of this last provision will be to prevent persons from ever foreseeing the result of any transaction in which they may engage. I think that great harm may result from this. I am no advocate for usury-laws; but I would rather have seen a fixed limit to interest prescribed by the law. In that case business could have adjusted itself accordingly, and the borrower and the lender would have been able to make their arrangements. But nobody can foretell what rate of interest may appear reasonable to each individual Judge. The conditions, therefore, on which any loan is made must always remain uncertain; and constant uncertainty is a risk that people engaged in business cannot afford to run. I have enumerated some of the points upon which the Bill makes great changes because we have been charged, by implication at least, with a want of proper deference to local authority. My own doubt is whether we have not gone too far in allowing it to override general experience in such important matters. I believe that we might more justly be charged with having given to it too much weight. No doubt the Bill, taken as a whole, ought to have the effect of diminishing the raiyat's means of obtaining credit, and of curtailing the large powers which the existing law confers upon creditors; and that these are good ends to aim at. It is true also that the power of the Government in this country is so great that it can hardly ever fail to attain, in part at least, any object towards which it seriously directs its energies. The Judges, too, by whom the law must be carried into effect, and who will be confronted by the practical difficulties of doing so, may be trusted to amend the operation of much in it which (as I believe) is otherwise likely to be purely injurious. Nevertheless I cannot but feel great misgivings as to the prudence of making such very large concessions as have been made to local experience.

"I turn, now, to the particular amendment which is under the consideration of the Council. The question at issue is whether officials should be eligible for the post of Conciliator; and it is a most important question in its bearing upon the probable result of conciliation. I think that there is an excellent reason for not entrusting such duties to any officials, even if they be only revenue-officials. Conciliation by such persons is very apt to degenerate into improper pressure. In France, where, as I understand, the system of conciliation originated, no officer of the Government is allowed to discharge these functions; and it is an avowed part of the system that they should not be so employed. I believe that the intended change of procedure is much more likely to succeed in this country if we follow the French practice on this point. As to selecting police-officers for such a post, I can conceive nothing worse or more objectionable. I suppose that in all countries the subordinate officers in the police force must comprise a good many men of doubtful character. It can scarcely be otherwise; and I do not intend to say that the police force in this country necessarily includes more of them than is the case elsewhere. But I think that a man holding an office which makes him the keeper of the door, as it were, through which every claim must pass before it goes into court will be strongly tempted in all countries, if he is not an honest man, to make money by it. If a police-officer chooses to exert undue influence, there can be little doubt of his power to do so. He can summon, arrest, and search houses. If he is unscrupulous, he can even fabricate a false charge against an innocent man, and possibly have him convicted and imprisoned for years. I think that there can be no Magistrate in this country who has not seen attempts of this kind made, and few Magistrates who would care to affirm that such attempts have never been successful. It should not be possible that men who can bring such influences to bear upon suitors should be appointed Conciliators.

"In conclusion, I have only to say that, as the Bombay Government has never expressed any desire to appoint police-officers as Conciliators, and as we have been assured by my hon'ble friend the Mover that there is no intention of doing so, I cannot see any necessity for amending the Bill in the manner which is proposed."

The Hon'ble MR. STOKES said that he had only one observation to make; and that was that he did not believe that the insertion in the Bill of the words "other than an officer of revenue or police" would be regarded as setting a stigma

upon the members of those services. They were not so morbidly sensitive. By the 121st section of the Code of Criminal Procedure police-officers were expressly prohibited from taking confessions; and he had never heard that their feelings were hurt by this suitable prohibition. In this country we all knew how very desirable it was to keep the administration of the law free from any suspicion of executive influence; and he was strengthened in that opinion by the fact that the insertion of words excluding the police was in accordance with the opinion of our wise and experienced Native colleague—the Hon'ble Sayyad Ahmad Khán.

The Hon'ble MR. RIVERS THOMPSON said:—"I am not going to follow my hon'ble friend Mr. Colvin in his interesting review of the principles of this Bill, because it appears to me that the greater portion of those questions have been already disposed of, and in my opinion been rightly disposed of. The principle which I contend for as regards this amendment is that, in carrying out and giving effect to legislation of this kind, the greatest freedom of action must be left to the local authorities, and that the Local Government might quite well say that, if their hands are tied as to the agents by whom the Bill is to be carried out, they had better give up attempting to carry it out at all. In that view I am quite prepared to support the Hon'ble Mr. Hope in this amendment. I think myself that it would be improved as an amendment if we were only to omit from the section the words 'revenue or' so as to make the exclusion run 'other than an officer of police,' because the only evil contended against is that officers of police might abuse their powers of arrest, and intimidate by an official pressure, which would be injurious. I cannot conceive, however, in what way it would be injurious if the Local Government were perfectly free to employ revenue-officers in discharging the functions of a Conciliator. Their ordinary duties amongst the people would especially qualify them for such an office."

The Hon'ble Sir JOHN STRACHEY said:—"My hon'ble friend Sir Alexander Arbuthnot said to the Council just now, and I think with great truth, that, although it was the duty of this Council to carry out its own views in matters in which important principles were involved, it was equally its duty not to interfere in mere matters of detail, on which the Local Government had expressed a strong opinion. Now, in spite of the remarks which have fallen from my hon'ble friend Mr. Colvin, I can conceive no matter which is more plainly a matter of detail than this. We are not now considering whether the establishment of Courts of Conciliation is a good or a bad thing. That they are to be established is admitted by the Bill as it stands. We are simply asked whether the Local Government shall, or shall not, be at liberty to choose its own agents for this work as it pleases. It seems to me impossible to doubt that the Local Government must be the best judge of such a purely local question as this; it is infinitely more competent to judge than we are.

"In regard to the question of appointing police-officers to act as Conciliators, I understood my hon'ble friend Mr. Hope to say—and I hope he will correct me if I am wrong—that it was really unnecessary to talk about the appointment of police-officers, because it had never entered into any one's head to appoint police-officers as Conciliators. I quite agree with my hon'ble friend Mr. Stokes in not attaching much importance to the consideration that, if we mention police-officers, we shall be placing a stigma upon them. But if we put in words forbidding the Local Government to appoint a police-officer, we throw a stigma on the Local Government. Although it is highly improbable that a police-officer will ever be chosen as Conciliator, still it is conceivable that under some circumstances it will be found desirable to appoint such an officer and if the Local Government should come to the conclusion that it is proper to do so, I think it should be allowed to exercise its own discretion in the matter.

"With regard to the exclusion of revenue-officers from this duty, I should like to say a few words. If these districts of the Dekkhan are similar in this respect to those parts of India with which I am acquainted—and I have seen no reason to suppose that they are different—then I say that, of all the men that could possibly be chosen as Conciliators in the class of cases with which we have to deal, the revenue-officers would frequently be the best. They know far more about the agricultural classes than any other officers of the Government. Their duties bring them into intimate relations with the people; and the amicable settlement of disputes and the prevention of litigation are, I may say, objects which, without any fresh provisions of law, a good revenue-officer already considers to fall within the sphere of his duties. I myself, more than twenty years ago, advocated in the provinces of Northern India the establishment of Courts of Conciliation; and the opinions which I held then I hold still. I believe that Courts of Conciliation might be established in the North-Western Provinces with very great advantage. If, when advocating the establishment of those Courts, I had been asked 'Who can you appoint as Conciliators?' or if I were asked that question now, I should reply we shall be able constantly to find admirable Conciliators in our revenue-officers, who are, I may say, the natural protectors of the people. I am the last person to doubt, or to deny, the immense improvement which has taken place during the last twenty years in the Civil Courts of India. These Courts have been immensely improved, both in the character and in the acquirements of the Judges, and by the very great simplification of their procedure. We cannot be too grateful to the eminent men by whom these benefits have been conferred upon the country; and I hope that my hon'ble friend Mr. Stokes will not think me impertinent if I add that there is no one to whom we owe a larger share of that gratitude for making the procedure of our Courts simple and rational than we owe to him. But, in spite of this improvement which has taken place in the Civil Courts, it still remains as true as ever that every measure by which we can keep the people out of the Courts will be a great blessing to the country. It will be highly interesting to watch the results of this first experiment in India in establishing Courts of Conciliation, which have proved so highly useful in some other countries. It would be a great pity to interfere in any way with any of its chances of success; and I believe we should be so interfering if we were to put any check on the power of the Local Government to choose its own instruments.

"I have only one other remark to make with reference to an observation which fell from my hon'ble friend Mr. Colvin. He said that he believed that the only country in which this system of conciliation had been tried was France, but that in France no officials acted as Conciliators. Now, I am sorry to tell him that he has made a great mistake. The truth is that no one who is not an official can act as a Conciliator; all the *Juges de Paix* in the country are Conciliators, and nobody else. So my hon'ble friend has given an unfortunate illustration in support of his argument."

The Hon'ble SIR EDWIN JOHNSON said:—"I would merely remark that if this amendment is allowed to stand in its present form, I shall have to vote against it; for the objections which have been assigned to the appointment of a police-officer as a Conciliator will still remain. I quite agree in the remarks of my hon'ble friends Sir John Strachey and Mr. Thompson as to the advantage of having revenue-officers in the position of Conciliators; but I regard it as highly inexpedient to allow police-officers to hold that position, or even to be considered eligible to hold it. I have no doubt that a large number of police-officers would be found perfectly capable of discharging the duties of such an appointment in a very creditable manner; but, irrespective of other considerations, I think that, in justice to the whole body of the police, they should be exempted from the possibility of being placed in a position in which they would be liable to misrepresentation. If my hon'ble friend Mr. Thompson's proposal is agreed to, I shall be willing to vote for the amendment; but if not, I must go against it."

The Hon'ble SIR ALEXANDER ARBUTHNOT said:—"I cannot say that I attach very great importance to the particular words to which this amendment relates. Those words would not have been inserted in the Bill as revised by the Select Committee, had it not been that our attention was pointedly drawn to the matter by our very able, intelligent and experienced Native colleague—Sayyad Ahmad. It was his remarks that led the majority of the Select Committee to consider it desirable that officers of revenue and police should be expressly excluded

from the office of Conciliator under this Bill. I must say that, while I do not agree with my hon'ble friend Mr. Colvin in some of the observations which fell from him with reference to that part of the Bill that relates to the subject of conciliation, which appears to me to be the essence of the reform contemplated in the Bill, and from which, though I am not prepared to say that I am extremely sanguine, I still hope that some benefits may be obtained, and think that the experiment is one which is amply deserving of a trial, still I agree with my hon'ble colleague in all that he has said as to the expediency of excluding officers possessing the great official authority and the great influence in the eyes of our Native fellow-subjects which is possessed not only by our officers of police but by our officers of revenue. As a matter of fact, I have been accustomed to regard all officers of the Revenue Department in the Presidency in which the greater part of my service has been passed as far the most influential and the most powerful officers we have. They have often infinitely more power than the officers of police. The remarks that fell from our Native colleague Sayyad Ahmad about leaving no opening for the appointment of officers of police are, on grounds of principle, unanswerable. I think that, as a matter of fact, the objections to permitting officers of revenue to engage in this duty are very great; but I for my part shall be quite prepared to agree to the compromise which has been suggested by Sir Edwin Johnson, and which, I think, meets the views of some of my other colleagues, to limit the exclusion to the police."

The Hon'ble MR. COLVIN said:—"My Lord, I should be glad to say a few words by way of explanation, if I may be permitted to do so. My hon'ble friend Sir John Strachey has corrected a statement of mine regarding the office of Conciliators in France. I have to thank him for that correction if my remarks were generally understood to apply to judicial as well as executive officers. I know of no objection to the appointment of judicial officers as Conciliators. What I intended to say was that no officer invested with executive authority was ever appointed to be a Conciliator in France; and the fact is so. Such an appointment could not, I believe, be made.

"I may take this opportunity of correcting an error which my hon'ble friend himself has made in speaking of conciliation as a novel experiment in India. It appears that Courts of Conciliation have existed under the law in Madras since 1816."

The Hon'ble MR. HOPE said:—"I need not trouble the Council for more than two or three minutes on this matter. I said that no person, so far as I was aware, dreamt of making police-officers Conciliators, and therefore while, on the one hand, the Council would be fully justified in omitting the words proposed, on the other I do not see any great objection to leaving them in.

"There is an inaccuracy which seems to me worthy of notice in the remarks of the Hon'ble the Law Member. There is no analogy whatever in the parallel drawn by him between the case of excluding police from taking confessions and the one before us. Originally they used to take confessions; but when in the year 1860 the whole of the police in India were reconstituted—a work with which in my own Presidency I had officially much to do—one of the great things we had to do was to draw distinctly the line between police functions and magisterial functions. At that time Magistrates used to be policemen; but in the course of the reorganization that ensued these two functions were divided. The police were confined to what was strictly their own line of business; the recording of confessions went to the Magistrate. There was of course no stigma in this; but a deliberate exclusion like the present was different. However, I am perfectly willing, if the Hon'ble Sir Edwin Johnson and the Council think my amendment should be limited to the exclusion of the words 'revenue or'; and, with your Lordship's permission, I will alter it to this effect:—

"'That in section 38 the words "revenue or" be omitted.'"

The Motion, as thus amended, was then put and agreed to.

The Hon'ble MR. HOPE next moved that the following clause be added to section 7 (namely):—

Court to examine defendant as witness.

"In every suit the Court shall examine the defendant as a witness unless, for reasons to be recorded by it in writing, it deems it unnecessary so to do."

He said:—"My Lord, the Bill proposed by the Bombay Government provided against the hearing of suits in the absence of the defendant—a practice which has reached enormous proportions in the Bombay Presidency, and which is proved by the fullest evidence to be often productive of gross injustice. In my introductory speech I said that the proportions in the four districts ranged from 60 to 74 per cent. in 1876, and from 57 to 66 per cent. in 1878. But this was for all suits. In money suits only Mr. Auckland Colvin shows (Minute, p. 30) that it is from 93 to 97 per cent. The Bombay section was substantially reproduced as section 9 of the Bill introduced; but the Select Committee have cut it out altogether. From paragraph 4 of the Report it would seem that they are impressed by the obvious hardship of forcibly dragging a man away from his home and his cultivation, perhaps at a season when every day is of importance to him, merely with a view to 'compelling him to appear in a suit to which he has no defence.' To this it may be answered *in limine* that, as every man is *now* by the law of the land liable to be so dragged, under arrest if necessary, in order to give evidence in the affairs of other people with which he has no concern whatever, there can be no special hardship in obliging him to come up about a matter of primary importance to himself; and as to actual arrest, on the hardships and indignity of which some sentiment has been expended, this penalty is no more likely to be incurred by defendants than by witnesses, of whom arrests are almost unknown. The knowledge that a summons must be obeyed readily ensures attendance. On the other hand, however, the necessity for a defendant's presence is, if possible, greatly enhanced by the present Bill. I do not see how it will be possible for a Judge to comply with the requirements of section 12, to receive the defendant's admission, and weigh it so as to decide whether it is true and made with a full knowledge of his legal rights; to go into the history and merits of the case, to ascertain what defence a man may have, even though he is not aware of it, and to follow up the items of the account, unless the defendant be before him."

The Hon'ble SIR ALEXANDER ARBUTHNOT here said that he, and he believed those who had hitherto agreed with him, would not oppose this amendment.

The Hon'ble MR. HOPE said that in that case he had no further remarks to make.

The Motion was then put and agreed to.

The Hon'ble MR. HOPE then moved that the Bill, as amended, be passed.

He said:—"My Lord, in making this motion I wish, on the one hand, to give certain explanations and comments on what it contains, which I hope may be useful to those entrusted with its execution and to the public, as also, on the other, to make remarks on a few important matters not included in it. I shall do so, as far as may be, in an uncontroversial spirit, and the views I express may be taken simply as my own, and not necessitating any rejoinder from Hon'ble Members who may in any instance happen to dissent from them.

"With respect to section 2, doubts have been expressed by the Puna Sabhá, in an able and comprehensive paper which has on some points been most useful, whether the definition of 'agriculturist' covers the important class of agricultural labourers; but it is held by the Hon'ble Law Member that it does so, as of course it is intended to do.

"To section 9 it has been objected that only a defective record, and in some cases no record, is provided for; that Judges will consequently take down just what they choose, and that superior Courts will have nothing to go upon. This is not strictly accurate, since even in cases not exceeding Rs. 10 in amount or value a record of the substance of the evidence is obligatory. And it should be remembered that what is here provided merely follows what is the existing law, either in non-appealable civil cases or in summary criminal trials

by a Magistrate or Bench of Magistrates, and in certain trials before a Presidency Magistrate. A mode of record which is found not inappropriate for cases where two years' imprisonment and Rs. 1,000 fine may be inflicted is surely sufficient for the civil suits to which our Bill relates. While thus touching on procedure, I would take the opportunity of repeating and explaining what fell from me when introducing the Bill. I then said that, in view of the fact that 85 per cent. of all suits in British India are for sums under Rs. 100, and 44 per cent. for sums under Rs. 20, 'I cannot but feel, and I think the people feel too, that our Civil Procedure Code, with its six hundred and fifty sections, and all that they involve, is in minor cases a burden almost too heavy to be borne. I trust that the day may come when not only Dekkhan raiyats but all India will obtain some relief in this respect.' I do not dispute that our Civil Procedure Code, whenever its six hundred and fifty sections, just amended as they have been in some one hundred and seventy instances, and still requiring amendment as they do in perhaps as many instances more, shall have been recast with patient judgment into one work, fit to take a permanent place beside such Codes as the Indian Penal Code and Code Napoléon, may then be a suitable machine by which to regulate litigation in which great interests are at stake. But for *minor cases*, of which alone I spoke, it is, and ever must be, an intolerable burden. However refreshing to the legal intellect may be the creation and solution of subtle distinctions and dilemmas, and however noble it may seem to argue and judge with the same care whether five rupees or five lakhs of rupees are involved, the world that has to toil and live can neither wait nor pay for such entertainment. That world in England has long since settled the question by establishing County Courts, which give such satisfaction that their sphere has received, and seems likely still to receive, considerable extension. I will repeat my regret that a material simplification of procedure with a view to saving delay and expense has not been found feasible in the present Bill: the rejected sections of the original draft were perhaps not sufficiently thorough to raise the issue with advantage. But, though we seem to have in India an unlucky knack of introducing as improvements what is being abandoned in England as intolerable, I do not despair of the reform I desire being in the end successfully achieved.

"Regarding sections 12 to 15 of the Bill, I also then doubted whether they expressed intelligibly or would secure effectively the action needed for 'going behind the bond.' The objections of the Bombay Government were more fully and emphatically pronounced. In consequence of these I am glad to say that a very great improvement has been effected. But I much regret the absence of an authorization of the Court to award, with or without the aid of a jury or assessors, an equitable sum to the plaintiff instead of non-suiting him, in cases where the Court is satisfied that some money has been lent, but, through the want of books or other evidence, the actual nature and extent of the transactions are doubtful, and the precise sum due cannot be proved. This power has been shown by experience under the Taluqdárs and Thákurs Acts to be most useful in saving the creditor from unreasonable loss, and would have tended to give confidence to the money-lending class. Still, although in this and in some other points the views of the Bombay Government regarding these sections may not have been fully met, I have every hope that the latter will now be found workable and beneficial, especially if the following wise caution of Mr. Justice Maxwell Melvill be kept in view by our Judges:—

"'I can only express a hope that, in making the experiment, the Government will select men of moderate views, who will not give too loose a rein to the natural feelings of sympathy with the agriculturist and antipathy to the money-lender. These men will, in future, have to determine what rate of interest is reasonable in transactions between the money-lender and the agriculturist; and they will fail to do justice if they forget that the money-lender has many bad debts, that as high interest means bad security, so bad security means high interest, and that the money-lender's security is now more than ever weak, seeing that he cannot touch his debtor's person, nor his house, nor his clothing, nor his cattle, nor (unless the debt be specially secured) his land.'

I may add, incidentally, that it should be observed that chapter III applies to all suits and proceedings to which agriculturists are parties, irrespective of their amount or value.

"To pass on to the question of agriculturists' accounts, it does not seem to have been fully perceived in some quarters that, while sections 65 and 66 ensure to the debtor a statement of his account from the creditor's point of view, section 16 is designed to enable him to get his real liability determined under the provisions for going behind the bond. Section 19 now expresses correctly what was proposed in the Bombay draft Bill: the objections taken to it as it stood when introduced arose merely from accidental oversights in the drafting.

"Considerable criticism has been directed against section 22, which exempts land from attachment and sale in execution of decrees, unless it has been specifically pledged. In my introductory speech I sketched the position of the land-sale question, and explained the reason for the absence from the Bill of any attempt at a final comprehensive settlement of it, and for considering the restriction of sale to specifically-pledged land to be equitable. In the decision of the question I had taken no part, as this restriction had been proposed by the Bombay Government, and accepted by the Government of India and the Secretary of State, before my connection with the Bill commenced. I ventured, however, to express my views as follows:—

"'I must confess to some misgivings as to how the exemption may work in practice. The money-lender may everywhere make the execution of a bond, laying on the land all his existing unsecured advances, an indispensable condition of further accommodation. At the same time, the exemption rests as to the past upon a perfectly intelligible and reasonable basis, while as to the future the proposed village registration will at least ensure that every raiyat when he pledges his land shall understand what he is doing, and insolvency will open to him a loophole of escape when unreasonably pressed by an extortionate creditor, if he prefers that alternative.'

"My doubts have now been more than echoed by Mr. Justice Maxwell Melvill and Mr. Justice West, the former of whom predicts that loans, excepting on mortgage, will soon be unknown; while the latter, concurring in this, adds that the mortgagee will, by the operation of the Bill, be driven on to become a purchaser, and the raiyat will have no alternative but to acquiesce in sale. Here I would only observe that the most demonstrably correct economic calculations are liable to be defeated by moral and sentimental causes, and that it by no means follows that mankind will do what logically they ought to do. It may be that the affection which the raiyat bears to his land will lead him to defeat his creditor by insolvency; that the competition amongst money-lenders, which the Dekkhan Riots Commission report, will check the exaction of landed security; and, best of all, that the difficulties of borrowing will tend to keep the raiyat's transactions within his means. The issue can only be known upon experiment. But it seems clear that the course which has been adopted was the best under the circumstances. No solution of the land-sale question generally admitted to be satisfactory is forthcoming. Mr. Justice Melvill candidly admits that he has not got one to produce; the reservation to the raiyat by 'a kind and impartial authority' of the 'minimum of land' requisite for 'a decent subsistence,' which Mr. Justice West advocates, has been severely criticized, directly and indirectly, by very competent authorities. To have postponed relief to the Dekkhan till this question was settled for all India would have been little less than criminal; to have made no attempt to check the rapid alienation of raiyats' lands, by a method equitable in itself and offering the chance of even a limited success, would have been neglectful. At the same time, it is also clear that the land-sale question cannot be put off much longer; and I earnestly hope that what has been written, said and done upon this Bill may accelerate its solution.

"I must now notice the important subject of management by the Collector provided by clause 2 of section 22 and by section 29. In my introductory speech I said that—

'compared with what we mean to compel a man to *pay*, the question of what we shall hold him to owe sinks into insignificance'; and, again, that 'we cannot justly and reasonably legislate for the summary relief of the debtor from unjust and extortionate claims, unless we also give to the creditor full and effective aid in obtaining all that is fairly due to him and

reasonably recoverable. A creditor's difficulties when he has got his decree should be reduced to a minimum. If we make the decree a just one, it should be effectively enforceable. Without ample provision on this principle, the destruction of the raiyat's credit or his bondage to secret and extortionate agreements must ensue, and all our well-intentioned interference will do harm instead of good. With such provision, the measure will not injure the raiyat's credit, but improve it.'

"In short, I look upon this provision as the keystone or test-point of the Bill. If it works well, the raiyat's credit will be secured on a satisfactory basis; if otherwise, his borrowing, even for reasonable purposes, within the limits of his true means will become most difficult, while the alternatives of absolute non-transferability of land, or eviction and a poor-law, will stare us in the face. I note, on the one hand, that the Puna Sabhá, Mr. Moore and Mr. Naylor doubt the Collector's power to manage vast numbers of small holdings, while the Commissioner and the other two Collectors consulted express no misgivings on the subject. I myself consider that there need be no fear of failure, provided it be from the first recognized that the duty is important and difficult, not to be performed by mere perfunctory orders, passed on from the Court to the kulkarní through an intervening chain of little-heeding functionaries. Success will, I anticipate, lie most frequently in a pretty close adherence to the system in Native States, and to the provisions for security and recovery still extant in our law, though of late years little resorted to. If the raiyat be retained as cultivator wherever possible,—if a reasonable rack-rent be imposed, personal security exacted, precautions taken against making away with the crop, aid given when wanted in securing a fair price, and payment required at the time means are forthcoming, I see no reason why satisfactory results should not be attained. But careful supervision by Assistant or Deputy Collectors and Mámlatdárs will be indispensable; and possibly the appointment of a special officer for a few months to start the system in the four districts might be advantageous. These, however, are details which will, I doubt not, receive full attention from the Local Government.

"The section which enabled the Court to make over moveable property to the creditor at a valuation has been struck out by the majority of the Select Committee. The fact that attached articles of property are constantly sold by auction for a mere song, and often collusively so bought by the creditor, is established beyond dispute. On the section the Puna Sabhá remark:—

"'We regard the provision as salutary. Forced sales of property under all circumstances prove very ruinous to the debtor classes. We would only recommend that the assessors who are to appraise the property should not be appointed by the Court,' &c.

Messrs. Stewart and Moore approve of it; Mr. Naylor ably defends it; Mr. West apparently objects merely to its present form; and finally, the Bombay Government, after considering the remarks made in Council, are clear for its retention. Under these circumstances, I am wholly unable to comprehend why, instead of being amended, as it easily might have been, it should have been expunged. On a matter of this kind, and considering the strong favourable evidence, I think more deference should have been paid to the views of the Local Government; and in this case, as in that of summary equitable awards to which I have already alluded, I would have moved the insertion of an amended section but that I had, unfortunately, to trouble the Council with so many other amendments of even greater importance.

"I am glad to say that section 35, limiting the powers of Subordinate Judges in the punishment of fraudulent debtors, to which I was opposed, has been expunged. The provision in section 33 for an appeal against their sentences is a step towards the separation of punishment for fraud from insolvency, which I advocated. But the punishment of concealment and fraud in the creditor, for which the Bombay draft provided, is still omitted, and must now await the further improvement of the law of Insolvency throughout India, which cannot be long deferred.

"A consideration of the chapter on Insolvency, together with the sections about going behind the bond, suggests the interesting question as to whether their combined effect may not be to destroy credit, put a stop to money-lending, render the revenue irrecoverable and bring the country to a deadlock. On

this point Mr. Justice Maxwell Melvill, who, I hope I may say without offence, has treated the problem forced upon us with equal moderation and statesmanship, makes the following remarks:—

"'I presume that the Government is satisfied that the effect of the measure will not be to destroy the raiyat's credit altogether, or to induce the money-lenders to close their shops. If this should not be the result, but if, on the contrary, it should turn out that after the agriculturists have been relieved of their existing debts on the easiest possible terms the money-lender will go on lending, not on his own terms but on such terms as may, in the uncertain future, be deemed reasonable by the Judge for the time being, it would indeed be a consummation devoutly to be wished. Regard being had (to use the phraseology of the Evidence Act) to the common course of natural events, human conduct and public and private business, I should be inclined to fear that such happy results as I have last contemplated are not likely to ensue; but it must be admitted that Natives often disappoint our most reasonable expectations, and that the consequences of such a measure as that which is proposed can only be determined by experiment.'

"What Mr. Melvill himself anticipates is tolerably evident; though he qualifies any conclusion very much in the way I myself have done when speaking of the possible effects of the restriction on the sale of unpledged land. But, perhaps, I ought to offer some explanation of the grounds on which, subject always to the same qualification, the Government may be held to be justified in anticipating that the dire results just alluded to may not come to pass, and, consequently, in persevering in the measure before us. It is a truism that a thing is worth what it will fetch, and *per contra* that in the long run, temporary disturbing causes apart, a thing will always fetch what it is intrinsically worth. Now the Bill does nothing to diminish the intrinsic value of land, but rather the reverse. The value of land depends, at bottom, on the net produce, or surplus after three deductions, for the cost of cultivation, the subsistence of the peasant and his family, and the Government demand.* Land is worth as many years' purchase of this net produce as correspond with the current rate of interest. And this rate of interest ultimately depends upon the facility of recovery. Now our Bill does not alter the Government demand or, consequently, the net produce, but it increases the facility of recovery. It must, therefore, increase the raiyat's *sound* credit, instead of diminishing it. I will make my meaning clear by illustration. Suppose a raiyat's holding yielding gross produce worth Rs. 100, of which Rs. 50 go for the three deductions I have just named, leaving Rs. 50 as net produce or margin on which the raiyat may borrow. In view of the provision in the Bill for seven years' management of unpledged lands, the money-lender would be justified in lending on a money bond Rs. 180 if the rate be 20 per cent., Rs. 228 if it be 12 per cent., and Rs. 252 if it be only 9 per cent. Which of these rates he will adopt, or whether he must exact a higher rate still, obviously depends on his chances of getting paid. But these chances are greatly improved by the Bill; for the raiyat will strive to pay punctually rather than come under the management of the Collector, and the Collector's management (if efficient, as it *must be made*) will make loss more improbable still. Notwithstanding all fair allowance for risks, lower rates will thus prove as remunerative as the present high ones. For a loan on mortgage, the principle of calculation and the advantage are the same as for a loan on personal bond; but in the end there is this difference, that in the latter case, if the saukár lends beyond the limits, he will lose his money, while in the former, if the raiyat borrows beyond them, he will lose his land.

"All this, it may be said, is very well in theory, but in practice the conditions of advances depend far more upon 'the degree of simplicity in the borrower and of rapacity in the lender than on anything else'; and to this existing uncertainty you have added the fresh one as to what rate of interest each individual Judge will think reasonable. I reply that the former uncertainty will be diminished by the Bill; and that the second will prove more imaginary than real. There will be far less temptation to extortionate bargains and frauds, and far more risk in them, now that the whole history and merits

* I of course ignore such extraneous value as the land may now possess through the means a hold on it now gives the creditor of commanding the labour of the debtor and his family and other illicit advantages.—(*Dekkhan Riots Commission Report, page* 60.)

of the case are to be laid bare in Court. And the provisions for management and recovery by the Collector, standing behind all agreements, will reduce the factor of uncertainty in credit which arises from individual character, and will assist the Courts in gradually establishing rates of interest varying within but a moderate range. Their decrees will thus in time afford the advantage, without the well-known evils, of usury laws, of which Mr. Justice West has well observed in his pamphlet on 'The Land and the Law,' that 'they set up a standard, and gave fixity to men's vague ideas of what might reasonably be asked for the use of money in those numerous cases in which the loan partook but slightly of the character of a true mercantile transaction.'

"While thus contending that the Government are justified in believing that the ultimate effects of the Bill will prove beneficial, I do not conceal from myself for a moment that a trying time of transition must intervene before all parties have understood and settled down to their new relations. It is to be fully expected that difficulties between debtor and creditor will arise in many individual cases, and even in villages or taluqás generally, and that their effects may appear in the recovery of the land-revenue. But if judicial and revenue officers alike strive to remove misconceptions and fears; if the former are even-handed and temperate in their judgments, and the latter efficient in their management of attached land; and if, I venture to add, the revenue demand can be so timed and adjusted as not to drive the raiyat to the saukár, even temporarily, in order to meet it—then I believe that all trouble will be soon and safely tided over. That the saukár will permanently cease to lend, there need be no fear whatever. The raiyat is just as likely to cease to cultivate. The raiyat is as necessary to the saukár, who can only employ his capital in agricultural dealings and banking, as the saukár is to him. The pair will not sit down and starve together, with a bag of money between them!

"Another large question, which I cannot pass over without remark, is that of the novel provisions for Village-Munsifs and Conciliators. It has two branches—the one relating to their *personnel*, and the other to their functions. I will first speak of the *personnel* available for each office. As to Village-Munsifs, it will have been gathered from what I said in my introductory speech that I did not expect that more than a patel here and there would be found qualified to be a Village-Munsif. If the suggestion which I put forward in 1863, in 1867, and again in 1871, that after a reasonably distant future date no person should be appointed patel who had not received a suitable education, had been adopted, the class would now have stood higher in education and intelligence than they do. But a knowledge of reading and writing is not, after all, indispensable to successful disposal of petty suits, though absence of interest is so; and this is just what will be in patels so rare. Now, however, that the restriction of Village-Munsifships to patels has been removed and the proposal in the Bombay draft assented to, any person of local influence will be eligible, and the field of selection will be advantageously enlarged. Virtually, it will become nearly the same as that from which Conciliators are to be drawn. As to whether competent persons can be found for the two offices, especially the latter, I observe some striking differences of opinion. On the one hand, the Puna Sarvajanak Sabhá, Mr. Byramji Jijibhai in his clear and representative memorial, and a portion of the Native Press appear to have no misgivings. On the other hand, the Collectors of Sholapur and Satára seem to be pretty much of the opinion of the Commissioner (Mr. E. P. Robertson) that 'too much power will be thrown into the hands of a class *quite incapable* of exercising impartiality, or of resisting local or personal influence and acting independently and uprightly.' One of the principal Native newspapers, too, the *Dnyán Prakásh*, which has produced several very able articles on the Bill, thinks that, though the experiment may well be tried, the difficulties in the way of obtaining proper Conciliators are insuperable. Finally, Mr. Justice West appears almost to question whether half a dozen men of integrity and intelligence can be found for Conciliators in the whole Dekkhan tract. Such an opinion, even if not meant to be taken literally, cannot but arrest our serious attention, coming, as it does, from one who is not only a

Judge of the High Court but Vice-Chancellor of the Bombay University. I do not ignore the probability that men qualified in all respects will not be easily met with; but I must confess scepticism as to a population of even three millions and a half (which the four districts comprise) being in a condition verging on that of Sodom and Gomorrah. If it be so, notwithstanding all our education, civilization and vaunted progress, then the inference seems difficult to resist, that our measures for the advancement of Natives to higher positions in the public service are premature. If the population, as a whole, are thus tainted, can our Subordinate Judges, our Deputy Collectors and our Mámlatdárs be utterly different from their caste-fellows and kinsfolk? Without pursuing this interesting dilemma, I will only say that, having spent a large share of my time in the Mufassal, and having always mixed freely and confidentially with the people of all classes, I should have no difficulty in finding a sufficiency of competent men in the districts with which I am best acquainted. It is now for those who think similarly to bestir themselves, lest the Native community lose the honourable and beneficent sphere which the legislature lays open for them, and to make good their opinions by presenting suitable persons to the notice of the authorities. And it is for the latter to strive without prejudice to give the experiment a fair trial, remembering that a knowledge of law is unnecessary, and even reading and writing are not indispensable to a successful discharge of the functions in question, in which the layman of age, influence, shrewdness and good temper may easily surpass the highly-trained judge. After all, if a competent Conciliator cannot be found for any particular local area, no one will be appointed, and the requirement of conciliation before suit will not apply there.

"Turning from *personnel* to functions, I observe considerable confusion and misapprehension of those of Conciliators. A Conciliator is neither an arbitrator nor a judge, either in our Bill or in France, whence the institution is derived. He is simply a disinterested third party, who is charged to endeavour to bring disputants to an amicable settlement. It so happens that in France the Conciliators are *Juges de Paix*, and so have a jurisdiction to try the more petty of the cases (within, say, Rs. 50) in which it is their duty to conciliate. But they conciliate in all the superior cases which they have no power to try. The functions of conciliating and trying are distinct, and have no necessary connexion with each other. Appoint our Village-Munsifs or Subordinate Judges to be Conciliators (there is nothing in the Bill to prevent this), and they will be the exact counterparts of the *Juges de Paix*, except in one particular, to which I will presently allude. Some authorities, including Mr. Justice Green of the Bombay High Court, think that they ought to be so appointed. But others, and especially the Local Government, consider that judicial functions might impart to their recommendations a weight amounting to undue pressure, which parties, and especially the ignorant raiyat, might be unable to resist. The one particular of difference from *Juges de Paix* to which I referred is the absence of power to compel attendance. Considering the doubt whether competent Conciliators can even be found at all, the Bill follows the opinion of the Bombay Government, thus expressed in Sir Richard Temple's Minute of April 14th, 1879:—

"'Though he (the Conciliator) would not have the power of deciding, or enforcing his decision if he formed one, still he would, by compelling attendance, be able, if so disposed, to put great pressure on the raiyat to admit or to compromise the claim. Such power of applying pressure by an educated man of position upon an uneducated and humble man on a claim preferred by a man generally of some education and wealth is a power that ought not to be conferred upon Honorary Conciliation Judges in the present state of society in the Dekkhan.'

I myself doubt whether the want of this power will affect the *status* of Conciliators, as some apprehend. If they can settle disputes equitably, the people, debtors as well as creditors, will readily resort to them. But here, as in the case of giving powers of conciliation to Judges, the Bill presents no obstacle to a change hereafter. The Local Government can, under section 37, give power to compel attendance whenever they think fit.

"In connection with chapter VII, some exception has been taken to the cost of the extra Subordinate Judges' Courts to be constituted, and of the

supervising officers. The object of bringing the Courts nearer to the homes of the people might, it is said, be as well, or even better, attained by making the Courts move about. The existing Judges, it is added, have not got too much to do as it is; and the new summary procedure, with the temptation to refer difficult points to arbitration, will lead to their having still less. That the Courts should move about to some extent would certainly be advantageous; and I hope that the hitherto dormant powers of section 23 of Act XIV of 1869 will now be exercised to enable them to do so. But this can never be more than a limited benefit. There are rarely above two or three villages in a taluqá containing suitable accommodation for a Subordinate Judge and his clerks, to say nothing of parties and their witnesses; and even these are often not conveniently accessible in the rains. The presence of a considerable body of strangers, too, is always a source of annoyance and expense to the villagers, even if the calls on them do not exceed those of hospitality. Time would likewise be lost in travelling and settling down at each place; pleaders in non-agriculturists' cases would be inconvenienced, and minor practical difficulties would crop up. It is questionable whether, between waiting till the next visit to the locality to begin and adjourning till the next visit to complete, any saving in time would result; while, finally, the raiyat would in very many cases be living no nearer to the selected village than to the Court's head-quarters. As to the other statement, it remains to be seen whether the duty of going more fully into cases will not neutralize any saving in time obtained in other ways. But however this may be, I can see no good reason why the judicial unit of administration should be larger than the executive unit. Every taluqá ought, in my opinion, to have its Subordinate Judge as well as its Mámlatdár. If the civil work proved insufficient to occupy the Subordinate Judge's full time, he should be invested with criminal powers. The Mámlatdár and his first karkún, being proportionately relieved, could then better overtake the multifarious and increasing duties heaped on them, besides taking back, at a great saving of expense, the registration work, of which they were a few years ago relieved.

"As to chapter VIII on Village-Registrars, I have only to say that I doubt whether kulkarnís, as a class, deserve the abuse which is bestowed upon them by some revenue-officers, and even by one Native newspaper. They perform faithfully a large amount of public business, and their hereditary service emoluments are a security for their conduct. But as to this, and also the objection that they are not sufficiently numerous to save the raiyat all trouble in resorting to them, I would point out that many other persons (among whom I may specify village schoolmasters) are eligible, and that clause (*b*) of section 55 will in many cases enable raiyats to register their deeds at the places where their saukárs reside, instead of at their own villages, if they prefer to do so. About chapter IX I have only to point out that the giving of receipts has been made obligatory; and of chapter X to say that the provisions regarding appearance by a relative, servant or dependent are copied from the Madras Village-Munsifs Regulation, IV of 1816.

"I will now notice three subjects, the entire omission of which from the Bill has been the cause of much adverse comment. The first is that of a modification of the rigidity of our land-revenue system. The Anglo-Indian Press, and seven out of the eleven vernacular newspapers of the Bombay Presidency which have noticed the Bill, have commented more or less emphatically on the absence of provisions in this direction. On the merits of the question in the abstract, it is unnecessary for me to add anything to the few remarks which I had to make, for the completion of my argument, in my introductory speech. But as to its omission from the Bill, I may say that it is held that for whatever action (if any) which may be necessary no legislation is required, but that if the fact were otherwise, the Bombay and not the Governor General's Council is the place where it should be undertaken. Legislation is unnecessary, because the question is an executive one. The power of fixing the rates of assessment, original or revised, is given to the Bombay Executive Government by sections 100 to 107 of the new Bombay Revenue Code, as it was by the previous law; the power of fixing instalments is so given by section

146; the granting of remissions is equally an executive matter. The regular mode, therefore, of securing all that the advocates of a change of system desire is by executive order, or by rules made by the Local Government under section 214 of the Code. Supposing, however, that it were thought proper to tie down the Executive Government in these matters more than it is now tied, then the proper course would be to amend the Bombay Revenue Code; and that is the function of the Bombay Legislative Council, which passed it, not of the Governor General's Council. Our present Bill, I need scarcely say, would not be before this Council at all but that it modifies the Civil Procedure Code, which the local legislatures are precluded by Act of Parliament from touching.

"Another omission which has been censured is that of any reduction of stamp or court-fees, process-fees, batta, &c. Here, again, legislation would have been superfluous. In Act VII of 1870 the Governor General in Council is empowered by section 35 to reduce or remit any of the court-fees mentioned in the schedules; and the High Court, with the sanction of the Local Government, may under chapter IV fix process-fees as it thinks proper. Act I of 1879, section 8, contains a similar power to reduce the stamps to which it applies, among which arbitration awards are included. I am not authorized to announce any decision on this subject; but it will be seen from paragraph 16 of the letter of the Bombay Government, No. 2056 of April 15th, 1879, which was published in the *Bombay Government Gazette* of the 30th of July last, that some reductions are looked upon generally with favour. I may add that the regular inspection of Courts under section 9 of Act XIV of 1869, which is now, as Mr. Naylor remarks, so little practised, is needed, *inter alia*, to check abuses connected with these charges. In 1876 the Judge of Khandesh brought to light a custom of enhancing the amount payable for stamps by requiring, in certain cases, an application on stamped paper before a witness was examined. He also found that in process-serving 'in one Court alone as much as 96 days' pay was obtained for 24 days' work, and 102 days' pay for 26 days' work, of the serving establishment.'

"The last omission I have to explain is that of any legalization of panchâyats or arbitration courts—a subject which I mentioned in my introductory speech as still under consideration. A proposal for the definite incorporation of such courts into our judicial system has been put forward by the Judge of Ahmadnagar, Mr. Wedderburn, with the concurrence of a body of Native gentlemen, including some judicial officers, whose position and attainments entitle their views to the fullest consideration. I must say frankly that I look upon as wholly visionary the idea that it is possible now-a-days to find in every village, or even in every small circle of villages, body of men sufficient in number to allow selection from them by litigants for the formation of a panchâyat, and at the same time qualified to be arbitrators by influence, intelligence and absence of interest. And even were this otherwise, I should expect that the strict regulations, involving checks and delays, which the proposal just referred to comprises, would practically destroy the freedom, simplicity and promptitude supposed to be the chief recommendations of the panchâyat system. That the provisions for arbitration in Bombay Regulation VII of 1827, which succeeded the even more efficient ones of Regulation VII of 1802, had fallen entirely into disuse before their repeal in 1861, and that the present new 'arbitration courts' are kept at work chiefly by the exertions of a very small number of disinterested and impartial individuals, are facts not very encouraging to a new departure. At the same time, as there undoubtedly is a popular sentiment, originated probably by aversion to our Courts as now conducted, running in favour of voluntary settlements, I personally can see no harm in aiding them by legislation of a purely permissive kind. We might safely revert to pretty much the position of Regulation VII of 1827. Persons whom the Government deemed of good character and competent, as also the members for the time being of any well-conducted local arbitration court, might be officially recognized as arbitrators. Such recognition should have the effect (1) that they should be entitled to the aid in their proceedings of issue of process by the Subordinate Judge of the division; and (2) that any reference for arbitration to them

might provide that in the event of any party thereto giving notice, within fifteen days of the date of the award, to the Subordinate Judge of the division that he was dissatisfied with the same, the matter in dispute should be referred back to the same court or arbitrator, sitting with such Judge as president. This would supply the recognition and control for arbitration which its advocates seem to desire, without putting any pressure on parties to resort to it. But even thus much is considered by the Local Government to be undesirable and likely to lead to prejudicial results. As they are, of course, the best judges of the state of affairs in the Dekkhan, the law will remain as it is. I may, however, point out that there is nothing to prevent parties appointing Village-Munsifs and Conciliators to be their arbitrators, and that an explanation making this clear has been added to section 43.

"In conclusion, I must observe that it would be premature to indulge in any congratulations upon the passing of this measure, and still more so to attempt to appraise its several parts, to distinguish the several sources whence they may have been derived, and to distribute praise or blame accordingly. It will be time enough to do that, if it need be done at all, when the Act has become an acknowledged failure or success. At present it is the measure of the Government of Bombay (and I am glad to think that through many vicissitudes it has substantially remained so), prepared in general consultation with myself. But I hope that we may augur well for its future from the fact that it not only has the approval of the highest official authorities but has secured, in a degree quite unprecedented, the substantial support of the Press and the public. It is a sincere and carefully matured attempt to solve a difficult problem and to meet a great emergency. If the course of events should prove that we have erred, we shall have erred in good company, and after all possible precautions to ensure success."

The Hon'ble MR. THORNTON said:—"Having been taunted in the course of this debate with having spoken one way and voted another, I think it due to myself to trouble the Council with a few more words of explanation regarding the course I have pursued. It is true that I have voted for certain provisions in this Bill of the propriety of which I am extremely doubtful; but I have done so on the distinct understanding that the Bill is local, and the measure strictly tentative and experimental. Thus, as regards the abolition of appeals in small-debt cases and the substitution of a revising agency instead, my experience in the Panjáb tells me that in that province such a measure would be exceedingly unpopular; but, while I am not prepared to admit the abolition of appeals in small-debt cases to be a universally appropriate and effective remedy for the misfortunes of the raiyat, I am not prepared to object to the experiment being tried in a portion of the Bombay Presidency. Again, my experience tells me that any attempt to exclude legal practitioners from the Courts of a locality where the people have for years been accustomed to forensic agency will positively fail or produce greater evils than those it is sought to remedy. But my opinion, though true of the Panjáb, may not be applicable to the circumstances of the Dekkhan; and I should certainly hesitate to force the results of my imperfect experience upon the Bombay Government. But it may be urged—'If you are not going to act on your Panjáb experience, why drag it in at all? Why advise the apparently inconsistent course of damning an amendment from your experience, and then voting in support of it?' I answer that I have adopted this course in order to indicate clearly and unmistakeably that, though I am prepared to vote for the measure as a local and experimental one, I do not approve of all its provisions, and am not prepared to adopt it as a triumph of statesmanship, or to advocate its extension to other localities until its success has been practically proved.

"There are, moreover, other provisions in the Bill to the success of which my own experience is adverse. Thus, it has been found in the Panjáb that the procedure of Small Cause Courts is quite unsuited for a rustic population; that the system of forced arbitration provided in section 15 of the Bill is a mistake; and that the system of official interference with the terms of contracts contemplated in chapter III—a system which prevailed, and still prevails to some extent, in the Panjáb—has a demoralizing effect upon the people, raises the rate of interest on money lent, and yet fails to teach prudence to the improvident. It is also my opinion that the extension of the period of limitation in suits on account, besides being based upon a misconception of the present law, will only stave off, and ultimately intensify, the evil it is sought to remedy, and that, while the procedure of all small-debt courts should be conciliatory, the appointment of special courts of amateur Conciliators will lead only to dissatisfaction and delay. But while I should, for the reasons above stated, object to the extension of these provisions of the Dekkhan Raiyats Bill to the Panjáb, at any rate at present, I should not feel justified on those grounds in refusing to allow them a trial in a locality upwards of a thousand miles away.

"The above explanation will, I trust, remove from the minds of Members of this Council any impression any of them may have received that in the course I have adopted I have acted with inconsistency. I would add that, so far from grudging the Bombay Government its experiment, I shall, whether in India or in England, regard it with the greatest interest, and with the earnest hope that it may work some benefit at least for the much-vexed raiyats of the Dekkhan."

His Excellency THE PRESIDENT said:—"I have no doubt that the votes given on these amendments by my hon'ble friend Mr. Thornton were influenced, as my own were, by the importance he attached to the fact that this Bill only comes before the Council at all because it happens to modify the Code of Civil Procedure, which the local legislatures are not competent to deal with. In point of fact, therefore, the Bill, though now about to be passed in this legislature, was, and is, a Bombay measure. As a Bombay Bill it came into our hands, and to me personally it is a cause of no small satisfaction that, notwithstanding the long and careful discussion given to it both in Committee and in this Council, and

'In spite of all temptations
To belong to other legislations,'

it still remains a Bombay Bill."

The Hon'ble SIR ALEXANDER ARBUTHNOT said:—"The explanation just given by my hon'ble friend Mr. Thornton was, I think, partly elicited by a remark of mine. I am sure that there is no Member of this Council who values more than I do the services and the assistance which have been invariably rendered to us by my hon'ble colleague since he became a Member of this Council; and no one who deplores more than I do the early prospect of his retirement from this Council. I quite see from the explanation with which the Hon'ble Member has now been so good as to furnish us that his course in this matter has been as consistent and straightforward as his course has always been throughout his long and distinguished official career."

The Motion was put and agreed to.

LEGAL PRACTITIONERS BILL.

The Hon'ble MR. STOKES moved that the Reports of the Select Committee on the Bill to amend the Pleaders, Mukhtárs and Revenue Agents Act, 1865, be taken into consideration. He said that, since the Bill as amended by them in August last was published as recommended in their report of the 21st of that month, several papers from various quarters containing remarks and criticism on the Bill had been received, and the Committee had made some further amendments in it. He would now mention the more important of these.

In the report last referred to, the Committee had reserved for further consideration the request of the Government of the Panjáb that the Chief Court of that Province should be empowered to enrol advocates in the same way as the High Courts were empowered by their Letters Patent. They felt at the time some doubt as to the necessity or desirability of increasing the number of authorities competent to enrol advocates. But it had been represented that the High Court of the North-Western Provinces had recently refused to enrol advocates unless they intended to practise at its own Bar;

that it was not improbable that the other High Courts would do the same; that thus the only way by which an English barrister could hitherto gain admittance to the Courts of the Panjáb on the footing of an advocate might be closed; that it was scarcely to be expected that the most promising men would be willing to practise in those Courts on any other footing; and that thus an element, which at present gave a higher tone to the Provincial Bar, would rapidly disappear. To these considerations, urged by persons most competent to form an opinion on the matter, the Select Committee had deemed it right to yield; and they had accordingly inserted a section in the Bill (41) giving the requisite powers. They had at the same time amended section 4 so as to put the advocates of the Panjáb Chief Court as regarded their privileges in other Courts on the same footing as the advocates of the High Courts; and they had added to the repealing schedule sections 42 to 44 of the Panjáb Courts Act, 1877, as the powers conferred by them would, if this Bill became law, be no longer required.

The Committee had omitted "Coorg" from the enumeration of Provinces (in section 1) to which the Bill was made directly applicable, as the Chief Commissioner had represented that there were certain portions of the Bill (those, for example, relating to revenue agents) which would be unsuitable in that province.

They had restricted the power given by sections 12 and 21 to suspend or dismiss a legal practitioner convicted of a criminal offence to the case of offences implying a defect of character unfitting the practitioner for his position as such.

They had inserted words in section 13 rendering a pleader liable to suspension or dismissal for taking instructions from any person other than the party on whose behalf he was retained, or the private servant or "recognized agent" of such party. The necessity for such a provision, in order to render effectual the prohibition against unauthorized practising as a mukhtár, had been brought to notice by the Calcutta High Court.

At the instance of some persons who had complained of the stringency of the procedure against legal practitioners guilty of misconduct, the Committee had extended from ten to fifteen days the period allowed by sections 14 and 23 for preparing an answer to a charge, and had inserted a new section (40) providing that no legal practitioner should be suspended or dismissed until he had been heard, or had had an opportunity of being heard, not only by the authority inquiring into the charge against him, but also by the authority exercising the power of suspension or dismissal.

They had also amended the second schedule so as to make all certificates to pleaders and mukhtárs except those of the lowest grade confer the privilege of practising in any Criminal Court subordinate to the High Court.

The commencement of the Act had been postponed to the 1st January, 1880, in order to allow time for some of the pleaders of the Calcutta Small Cause Court and some few pleaders up-country whose position would be affected by the Bill to apply to the High Courts of their respective Provinces for licenses to practise.

The remaining amendments were not of sufficient importance to call for special notice.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill as amended be passed.

The Motion was put and agreed to.

RAIPUR AND KHATTRA LAWS BILL.

The Hon'ble MR. STOKES moved for leave to introduce a Bill to amend the law in force in Thánás Raipur and Khattra. He said that it was recently determined, as part of a larger scheme for the redistribution of territory in the Lower Provinces of Bengal, to transfer the tracts comprised in the thánás of Raipur and Khattra in the Mánbhum district of Chutiá Nágpur to the district of Bankura, with which they were not only geographically but also, looking to the race and language of their inhabitants, more closely connected. The actual transfer was carried out on the first of this month; but, owing to these tracts having been hitherto comprised in a Scheduled district, there were certain differences between the law prevailing in them and that prevailing in the rest of the Bankura district which it was desirable to remove with the least possible delay. The present Bill had accordingly been prepared with the object of assimilating the law of these tracts to that of the rest of the Bankura district with effect from the date of the transfer. As the Bill would affect the Scheduled Districts Act, XIV of 1874, it had to be passed by the Governor General in Council.

The Motion was put and agreed to.

The Hon'ble MR. STOKES introduced the Bill. As there had not been time to circulate it, and as it was very short, he would read it to the Council:—

"A Bill to amend the law in force in Thánás Raipur and Khattra.

Preamble.

WHEREAS the territory comprised in the tháná of Raipur (including the independent police outpost of Simlapal) and the tháná of Khattra has been transferred from the district of Mánbhum to the district of Bankura;

And whereas the said territory, when included in the district of Mánbhum, formed portion of the Chutiá Nágpur Division, which is a Scheduled district under Act No. XIV of 1874 (the Scheduled Districts Act, 1874);

And whereas it is expedient that the law in force in the said territory should be the same as the law in force in the district of Bankúra; It is hereby enacted as follows:—

Short title.

1. This Act may be called "The Raipur and Khattra Laws Act, 1879":

Commencement.

and it shall come into force at once.

Laws of Bankura to apply.

2. All enactments which on the first day of October 1879 were in force in the district of Bankura and not in the said territory shall be deemed to have come into force in the said territory on that day; and all enactments which on that day were in force in the said territory and not in the district of Bankura shall be

Other laws repealed.

deemed to have been repealed on and from that day in the said territory.

Pending proceedings.

3. All proceedings commenced before any authority in the said territory before the said first day of October 1879, and still pending, shall be disposed of by such authority as the Local Government may direct, and, save as aforesaid, shall be carried on as if this Act had not been passed.

Territory to cease to be a Scheduled district.

4. The said territory shall be deemed to have ceased to be a Scheduled district on the said first day of October 1879."

The Hon'ble MR. STOKES applied to His Excellency the President to suspend the Rules for the Conduct of Business.

His Excellency THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. STOKES then moved that the Bill be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill be passed.

The Motion was put and agreed to.

The Council adjourned to Friday, the 7th November, 1879.

SIMLA;
The 24th October, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th NOVEMBER 1879.

GENERAL REMARKS.—General rain has fallen in Madras; harvesting is going on with a good outturn; prospects continue generally fair. In Bombay there was slight rain in the Deccan and a heavier fall in the Southern Mahratta Country, more is wanted in the former tract for *rabi* sowings; the *kharif* crops are being harvested. In Bengal the rains are generally over, and the cold weather set in; rain is, however, still required in places; the cyclone in Cox's Bazar sub-division of the Chittagong district is said to have damaged a fourth of the corps; prospects on the whole are very good. In the North-Western Provinces and Oudh the weather continues clear and seasonable; public health is improving; the *kharif* is being harvested and *rabi* sowings are in progress. No rain fell in the Punjab during the week; fever is still bad in several districts; prospects are favourable. In the Central Provinces also there was no rain; prospects remain good. In British Burma heavy rain has fallen; slight cattle-disease continues; no damage is reported to crops from the gale last week; agricultural prospects are satisfactory. In Assam and the other Provinces and Native States the condition of the crops is generally good.

General prospects throughout the Empire continue satisfactory.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Nov. 8th)	·48 (average of 10 stations).	*Ragi* 21·45; early dry crops harvesting; sowing of white *cholum* wheat, Bengal gram, and horse-gram continues; standing crops in good condition.
Kurnool („ „)	1·52 (average of 8 stations).	*Ragi* 24·81; yellow *cholum* and other dry crops being harvested; white *cholum*, Bengal gram, and wheat being sown; paddy blight in two taluks; pasture and water ample.
Ganjam („ „)	2·02 (average of 15 stations).	*Ragi* 28·35.
Kistna („ „)	1·21 (average of 11 stations).	*Ragi* 26·3; 38 inches water over anicut; standing crops doing well; *varagu* damaged by rain in some taluks.
Chingleput („ „) (Madras)	2·53 (average of 10 stations).	*Ragi* 21·70; standing crops doing well; ploughing, sowing, and transplanting going on actively; harvest outturn ¼ to ¾; pasture abundant.
Coimbatore („ „)	1·0 (average of 15 stations).	*Ragi* 23·30; crops generally fair; paddy attacked by insects in Erode; harvest of paddy, *cholum*, *ragi*, and *cumboo* in 7 taluks, outturn ½ to ¾, others ⅛ to full.
Tanjore („ „)	·80 (average of 11 stations).	*Ragi* 25·16; crops good; harvest of paddy, *cholum*, and *ragi*, outturn ½ to full.
Madura	.....	Report not received.
Malabar (Nov. 8th)	2·12 (average of 14 stations).	*Ragi* 17·81; second crop progressing.
Travancore („ „)	3·11	Paddy growing well.
		General Remarks.—Prospects generally fair.
Bombay (Nov. 12th)—		
Kurrachee ...	.....	River at Kotri on 10th 4 feet 11 inches, last year on same date 7 feet 10 inches; fever prevalent, also slight cattle-disease.
Hyderabad ...	.....	*Rabi* sowings continue; fever general; cattle-disease in taluka Sakrand, not contagious.
Ahmedabad ...	.....	*Kharif* harvest continues; lands being prepared for *rabi*; fever still prevalent.
Baroda ...	.....	Fever still continues, 249 deaths in city of Baroda; cholera decreasing in Nawsari; prices stationary; harvesting continues; cotton and sugarcane crops in good condition.
Surat ...	.....	*Kharif* harvest and *rabi* sowings progressing; locusts in Choryási, Bulsar, and Mándvi talukas; they disappeared in Jálalpor after damaging *jowari* in parts; fever in four talukas.
Násik ...	.....	Clear and cold weather; prices slightly higher; *rabi* sowing nearly completed.
Colaba (Bombay) ...	.....	Wind southerly till 6th, afterwards northerly, and air dry; weather fine.
Poona (Nov. 9th)	·18 at Purandhar only	
Ahmednagar ...	.....	Reaping of *bajri* and sowing of *rabi* completed with few exceptions; *rabi* crops in good condition, but a good fall of rain necessary; slight injury by rats in parts of Párner.
Sholapore ...	.....	Prospects of *rabi* generally good, but very backward in parts of Karmála, and more rain wanted; much land uncultivated.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Dharwar ...	1·35 (average) ...	Rice and early *jowari* being reaped.
Kánara ...	1·88 at Yellapur ... ·71 at Coompta.	Harvest operations continue; fever and cattle-disease prevail.
Rajkot ...	.....	*Kharif* harvest continues; *rabi* crops in good condition; fever prevalent; prices falling.
		General Remarks.—Fever still continues in Guzerat; cattle-disease in parts of Sind and in Kánara; *rabi* prospects good in Deccan, but more rain wanted; *kharif* being harvested.
Bengal—(Nov. 12th)—		
Chittagong ...	*Nil*	Weather seasonable; crops excellent; cyclone in sub-division damaged about four annas of otherwise good crop.
Dacca ...	*Nil*	Prospects of *amun* harvest good; relief operations close on 15th instant; public health good; new rice 23 seers, old rice 20 seers.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* and winter crops good; plants suffer on highlands for want of rain; jute outturn average, and *aus* 12 annas; ploughing going on; sowing of winter crops commenced in some places; common rice 10 to 12 seers; public health normal; fever prevails in some places.
Moorshedabad ...	*Nil*	Paddy and *kalai* prospects good; sowings of winter crops still going on; *amun* ripening in some places; fever in mitigated form still reported; small-pox in thanah Bharatpore; common rice averages 12 seers; no want of work for labourers.
Rajshahye ...	*Nil*	Weather fine and cool; *rabi* sowings progressing; state of *amun* paddy good; common rice 12½ to 13 seers.
Burdwan ...	*Nil*	Crop prospects pretty fair; general health good.
Rungpore ...	*Nil*	Weather cool; prospects of crops favourable; malarious fever somewhat prevalent.
Bhágalpur ...	*Nil*	Rice prospects excellent; *rabi* sowings progressing; common rice 15 seers; public health good, excepting fever in south.
Purneah ...	*Nil*	*Aghani* expected to yield an excellent harvest; *rabi* sowings completed; prospects good; common rice 14 to 15 seers; general health good; cattle-disease still continues; rivers fallen everywhere, but soil has required no irrigation yet.
Patna ...	*Nil*	Weather seasonable; prospects excellent.
Durbhanga ...	*Nil*	Weather seasonable; *dhan* promises well; *rabi* sowings continue; prices falling; general health good.
Hazáribágh ...	*Nil*	Weather seasonable, fine, and cool; paddy being harvested with full outturn; prospects of winter crops very good; rice 23 to 24 seers; district health good.
Cuttack ...	·09	General want of rain for rice crops; *rabi* progressing well; public health good.
		General Remarks.—Rain generally over and cold weather fairly set in; rain however, still wanted in places; all crops on ground doing very well; winter rice rapidly coming in ear, November rice being harvested; cold weather sowings progressing favourably; early sowings coming up well; public health generally fair, but fever prevalent in places; prices generally falling; cyclone in Cox's Bazar damaged about four annas of crop.
N.-W. P. and Oudh—		
Benares (Nov. 11th)	.....	Prospects good; *rabi* sowings in progress; fever abating.
Allahabad („ „)	.....	Weather seasonable; fever slowly abating; wheat 13⅞ seers, coarse *chanwal* 19 seers, unhusked *dhan* 33⅓ seers.
Gorakhpur („ „)	*Nil*	Weather clear and seasonable; *rabi* germinating favourably; fever abating.
Jhansi („ 12th)	.....	*Kharif* harvest being cut; *rabi* sowings in progress; prices fluctuating; fever prevalent.
Agra („ 11th)	.....	*Kharif* harvest being reaped; *rabi* sowings progressing; health improving; weather seasonable.
Bareilly („ 12th)	.....	Weather clear; sickness somewhat abating.
Meerut ...	.....	
Kumaun („ 10th)	.....	Weather fine; *rabi* sowings progressing.
Lucknow ...	.....	
Partabgarh („ 10th)	*Nil*	Weather cool; sky clear; agricultural operations progressing; fever abating; wind westerly; cattle-disease on the decrease.
Sitapur („ 12th)	*Nil*	Fever still prevails.
Fyzabad („ „)	*Nil*	Ague and fever prevalent; *rabi* sowings in progress.
		General Remarks.—Health improving; weather clear and seasonable; *rabi* sowings progressing
Punjab—(Nov. 11th)—		
Delhi ...	.....	Prices have fallen slightly; fever prevails.
Hissar ...	.....	Weather seasonable; *rabi* prospects good; prices stationary; health better.
Umballa ...	.....	Grain crops promising; health fair.
Jullundur ...	.....	Crops cut; prices steady; fever prevalent.
Lahore ...	.....	State of crops good; fever prevails.
Ferozepore ...	.....	Agricultural prospects fair; prices steady.
Sialkot ...	.....	Rain wanted for rice crop.
Rawalpindi ...	.....	Agricultural prospects good; fever continues.
Peshawar ...	.....	Harvest prospects good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Mooltan ...	.....	*Kharif* crops nearly removed; *rabi* sowings in progress; prices stationary; health good.
Dera Ismail Khan ...	.....	*Rabi* sowings going on; prices stationary; health good. *General Remarks.*—No rain during past week; prospects generally favourable; prices having a downward tendency; the usual autumn fevers prevail.
Central Provinces—		
Nágpur (Nov. 12th)	.....	Clear; rice reaping commenced in places; cotton picking continues; *rabi* sowings nearly completed; prospects favourable; health good.
Jubbulpore ...	.....	Clear; cotton generally good; all *kharif* crops almost cut; *rabi* sowings well forward; fever prevalent; prices stationary.
Saugor ...	.....	Clear; *kharif* reaping continues; *rabi* sowings well advanced; fever abating; price of *jowar* fallen.
Seoni ...	.....	Cotton picking and *rabi* sowings continue; prospects favourable; four deaths from cholera.
Hoshangabad ...	.....	Cotton and *jowar* doing well; *rabi* sowings being vigorously pushed on; fever prevalent.
Raipur (Nov. 8th)	.....	Cool, pleasant; outturn of cotton below average; *rabi* sowings progressing; cattle-disease continues; prices stationary.
Sambalpur („ 7th)	.....	Clear, cool; rice harvest continues, yield good; small-pox continues; prices falling. *General Remarks.*—Weather clear and seasonable; *kharif* harvest and cotton picking continues; *rabi* sowings completed in some districts and well forward in others; prospects continue favourable; prices stationary.
British Burma—(Nov. 12th)		
Akyab ...	*Nil*	Total rainfall 224·06; slight cholera reported from two townships, otherwise public health good; agricultural prospects very good.
Rangoon ...	13·3	Total rainfall 113·68; slight small-pox in Rangoon town and fever in two townships, otherwise public health good; health of cattle fair; crops progressing favourably, some destroyed by recent gale in Hmaulchee township, none in Pegu township, as was expected.
Bassein ...	7·79	Total rainfall 97·61; public health good; slight cattle-disease; crop report generally favourable.
Prome ...	*Nil*	Total rainfall 44·83; public health good; crops satisfactory.
Amherst (Moulmein) ...	9·72	Total rainfall 171·19; public health good; crop prospects good; early paddy reaped in some parts.
Toungoo ...	·44	Total rainfall 76·42; public health good; agricultural prospects good. *General Remarks.*—Public health generally good; slight cattle-disease continues; little or no damage to crops from recent gale reported; agricultural prospects favourable.
Assam—(Nov. 12th)—		
Gauháti ...	*Nil*	Weather cool; mornings foggy; prospects of *sali* and other crops good.
Sylhet ...	*Nil*	Prospects good, unless insects intervene.
Cachar ...	*Nil*	Weather seasonable; prospects of crops very good; common rice 14½ seers per rupee; public health good.
Dibrugarh ...	*Nil*	*Sali dhan* satisfactory; rain wanted for pulse; some fever and cattle-disease reported.
Berar & Hyderabad—(Nov. 12th)		
Amráoti ...	.....	*Rabi* sowings continue; crops good.
Akola ...	.....	*Kharif* prospects excellent.
Hyderabad ...	1·3	Total rainfall 36·03; *kharif* harvests progressing; *rabi* crops continue good; public health fair.
Mysore and Coorg—(Nov. 12th)		
Bangalore ...	·03	Crops generally in good condition; *ragi* being harvested in parts, prices stationary; health good.
Mysore ...	.....	No reports received.
Mercara ...	.....	
Central India States (Nov. 12th)—		
Indore ...	*Nil*	Weather pleasant and seasonable; prospects good; gram 10 seers 3 chittaks.
Morar (Gwalior) ...	*Nil*	
Sutna ...	*Nil*	Prospects good; *jowar* 20 seers.
Rutlam ...	*Nil*	Weather clear; health improving.
Neemuch ...	*Nil*	
Goona ...	.....	No report received.
Bhopal ...	.....	
Ágar ...	*Nil*	Health good; prospects favourable.
Nowgong ...	*Nil*	
Mánpur ...	*Nil*	Weather fine; sowings of the *rabi* crops commenced; fever prevalent

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Nov. 12th)	.....	Cold; fever still prevalent.
Serohi („ 9th)	.....	Wells pretty full; tanks nearly dry; fever prevalent; hot days; cold nights.
Marwar ...	.....	
Meywar („ 7th)	.....	Tanks and wells good; fever still prevalent; sowing general.
Harowtee („ 8th)	.....	Fever prevalent; prospects good.
Jhallawar („ 6th)	.....	Mild fever prevalent; prospects good.
Ajmere („ 12th)	.....	Seasonable; fever ceasing; sowing commenced.
Jeypore ...	.....	Sowing active; fever decreasing; seasonable.
Bhurtpore ...	.....	*Kharif* harvesting; *rabi* sowings active; prospects good; fever decreasing.
Ulwur (Nov. 11th)	.....	*Rabi* sowings progressing; fever somewhat abating.

C. BERNARD,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 7th November, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.

His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.

The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.

Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.

The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.

General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.

The Hon'ble Whitley Stokes, C.S.I., C.I.E.

The Hon'ble Rivers Thompson, C.S.I.

The Hon'ble T. C. Hope, C.S.I.

The Hon'ble B. W. Colvin.

The Hon'ble G. H. M. Batten.

FACTORIES BILL.

The Hon'ble MR. COLVIN introduced the Bill to regulate labour in Factories, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Thompson and Hope and the Mover. He said that he had explained the general object of the Bill to the Council when he asked for permission to introduce it. There was very little to add to what he had said on that occasion, except that there were two or three points in the Bill as now introduced which must be regarded rather as experiments in solving some of the difficulties connected with it than as final settlements of them. For instance, the present definition of the word "factory" would probably require some amendment. It was now defined to mean a trade establishment in which fifty or more persons were employed in any manual labour exercised by way of trade. He should have been glad to have made the employment of steam, water or other mechanical power a part of the definition. Objections had been made to this addition: he was not sure that those objections were insuperable; but in any case the matter was one which had better not be finally settled until further information had been obtained from the Local Governments. Again, the determination of the age below which persons should be defined to be children and young persons and the age under which the employment of children should be prohibited were questions on which it would be desirable to obtain similar information. The ages entered in the proposed Act must, therefore, be regarded as tentative until further enquiry had been made.

There were other points in the Bill besides those mentioned which he had no doubt would require amendment by the Committee; but he did not think that there was anything else which he need at present bring to the notice of the Council.

The Hon'ble MR. BATTEN said that, before the motion that the Bill be referred to a Select Committee was put to the vote, he begged, as he would not be a member of that Committee, to offer a few observations which had occurred to him in the perusal of the Bill. The Bill, if enacted in its present form, would be a purely permissive Bill. Unless the Local Government took action upon it, the sole matter which would be positively enacted—and this was also permissive—would be that it might be called "The Factories Act, 1880."

That, he thought, was a very innocuous provision, to which probably nobody would object. But a power seemed to be given—he said "seemed to be given" because it was not given directly, but only by implication—to Local Governments to extend, with the previous sanction of the Governor General in Council, the other sections of the Act to their respective provinces. The words were: "* * the other sections of this Act apply only to those parts of British India to which they may, from time to time, be extended by the Local Government, with the previous sanction of the Governor General in Council, by a notification in the official Gazette."

The power to extend was, however, not given in direct terms. When the Local Governments extended the sections, they were to apply. He presumed, however, that the section as it stood was rightly drafted; but it certainly did not seem quite clear. He had not seen the papers previous to the preparation of the Bill, except casually; but he understood that there had been not only a wonderful unanimity of opinion among most of the different Local Governments that the provisions of the Bill were required in the abstract, but also an extraordinary unanimity in their opinion that, in the concrete, they were not required for their particular provinces. If the Local Governments remained of that opinion, the Bill, if passed into law, would stand on record *in terrorem*; and probably it would be so far useful, and in any case everybody would have full legal authority to call it "the Factories Act, 1880"; but beyond that it would have no application. He hoped that he was right in supposing that the wording of the first section, if enacted, would permit the Local Governments to apply any particular section or provision of the Act without extending the whole of the sections *en bloc*. He did not know whether that was the case or not; but he thought it extremely desirable: for he could well imagine that a Local Government might at first wish to restrict the operation of the Act to certain sections—for instance, to the appointment of Inspectors and the compelling of notice being given of injuries occurring to persons in factories. If such were the case, then it would be merely necessary to apply sections 3 and 8 and such portions of sections 9, 10 and 11 as might be required to enforce sections 3 and 8. As he said before, however, he was not aware whether the wording admitted of this partial application of the Bill or not. If the mere existence of the Act in its potential but inactive form would not in itself be sufficient to keep the occupiers of factories on their best behaviour, possibly the appointment of Inspectors and the compelling of information as to injuries in factories might be sufficient for that purpose. At any rate, they would give the Local Government power to ascertain what was going wrong, and, if necessary, to apply the more stringent provisions of the Act.

The only other observation he had to make—and in this he had to some degree been anticipated by the Hon'ble the Mover—was as to the definition of the word "factory." It appeared to him at present to be much too wide. He did not think in the discussions that had taken place in India and in England on the subject, and which had resulted in the present Bill being prepared, that there had been any idea of applying the proposed Factory Act to factories in which nothing but merely simple individual manual labour was used as the motive-power; and, if that was the case, he did not see why we should extend it to anything more. For instance, supposing that Ranken and Company on the occasion of a fancy ball were obliged to employ fifty darzis, each working with his own needle or sewing machine,—under the definition given in the Bill that would be a factory. And so, in the same way, fifty weavers, each using the hand-loom, would become a factory. It appeared to him that that was hardly contemplated in the discussions which had led to the Bill; and he hoped the Select Committee, for whose consideration he was induced to make these suggestions, would see their way to restricting the definition of the word "factory" as it now stood in the Bill.

The Hon'ble MR. HOPE said that he could not feel that the Hon'ble Mover had, on the occasion when he asked for leave to introduce the Bill, made out any very strong case for legislation. At the same time, as the object of the Bill was limited to protecting those who were not in a position to

protect themselves, it appeared to him a humane one, and, as such, one to which we could not refuse our sympathy, and to which no reasonable person could offer any objection. The three points chosen appeared to come well within that object, that was to say, the question of age, of hours, and of fencing machinery. That of inspection was merely ancillary; we could not see what was done under those heads unless they were brought under inspection. But it would be readily admitted, he thought, that it was indispensable that our legislation upon those points should be entirely in harmony with the circumstances and peculiarities of India. Probably very little of the experience derived in English factories would be of much use in India; and he fully agreed with the Hon'ble Member in his remarks on a former occasion that "the differences between England and India of climate, character and habits of life of the people were so great that much which was needed there would not only be inapplicable, but perhaps actually injurious here."

It did not, however, seem to him that the Bill which had been introduced at all corresponded with the principle which the Hon'ble Mover had laid down, and therefore he had heard with very great relief to-day that to a very great extent—in fact in almost every particular—the Bill was to be considered merely as a sort of carcass put forward for the Select Committee to work on. Consequently we could not be considered to be pledged in principle, much less in detail of course, to the sanction which he doubted not would be given to the introduction of the Bill to-day.

As to the details of the measure, as he observed that the Hon'ble the Mover had proposed that he (MR. HOPE) should serve on the Select Committee, he need not trouble the Council at any great length, or further than to say that in almost every particular the details of the Bill as now before them appeared to be open to objection. The age put down would have the effect of treating as "young persons who had not attained to an age at which they would be considered free agents" some who had actually got wives and families and were in the position of grown-up men and women. As to hours of employment, one of the most obvious results of fixing a daily instead of a weekly maximum would be to enforce working on Sundays all over India, which, he ventured to think, was not one of the objects which Earl Shaftesbury, at least, had in view in bringing the matter before Parliament. As to the fencing of dangerous machinery, he thought that a great deal too much power would be put into hands which were not skilled for exercising it; and perhaps it might be sufficient to empower the Inspector to apply to the Magistrate for an order, which could be obtained now under the regular criminal law, in any case in which he thought the fencing insufficient. As to inspection itself, he thought that some mode of appealing and of obtaining competent sanction before prosecuting should be provided. Likewise, with regard to the age, we were all well acquainted with the immense difficulty of ascertaining the ages of children in this country, and the Bill might very well lead to great oppression unless this could be got over.

He merely made these remarks because he thought that the Bill, if it went out as it was, might cause a great deal of apprehension in the country which, he hoped, would prove to be unnecessary.

As to the general application of the Bill, his remarks had rather a wider scope; and he fully agreed with the Hon'ble Member who had just spoken that the definition of "factory" as it now appeared was one which was far too wide. In fact, if it were allowed to stand in anything approaching to its present form, he should anticipate the worst results from the Bill. It covered industries where there was no machinery used and no close rooms; it likewise covered industries of a purely temporary character which were carried on for perhaps only a couple of months in the year; and even, as his hon'ble friend Mr. Batten had pointed out, it covered work which was carried on only for a day. On the other hand, there were certain industries which he was not sure whether the definition properly covered or not—possibly it did—such, for instance, as Government mines and factories. It might perhaps be more simple if a schedule of the particular industries with regard to which legislation was thought necessary

could be appended to the Bill, and then the Local Government were empowered to extend the provisions of the Bill to them when necessary.

Having made these remarks with the object which he had just explained, of removing a misapprehension which might otherwise not unreasonably arise, he would only say that, as the Hon'ble Member was so liberally disposed as to the details of the Bill, he might rely upon his thorough co-operation in putting it into practical shape within the lines which he had endeavoured faintly to draw.

The Hon'ble MR. COLVIN wished to say a few words in reply to the observations made by his hon'ble friends who had just spoken. He was not sure whether the criticism made by his hon'ble friend Mr. Batten of the wording of the first section was justified by the drafting or not; but if it should prove to be so and if an amendment in the sense suggested should be necessary, he had little doubt that the Select Committee would agree to make it. Nor did he anticipate any objection to the Bill being modified, if necessary, so as to allow of Local Governments applying a part only of the Act, and not the whole of it, when they thought such a course desirable. It was unnecessary to follow his hon'ble friends Mr. Batten and Mr. Hope in their criticisms of the definition of the word "factory," because it had been fully recognized that the present definition was merely provisional.

As regards the Hon'ble Mr. Hope's remarks, he was glad to hear that he considered that the general object of the Bill was good and that it would have his support so far. He was not prepared, however, altogether to accept Mr. Hope's view of the Bill when he spoke of it as merely a skeleton, which (if he had understood him correctly) might be altered by the Committee at pleasure; because the two main objects which the Bill was intended to effect—namely, that of affording security to life and limb from accident and of protecting children and young persons who had not attained to an age at which they would be considered free agents from being overworked—were essential to the Bill. On these points he should not wish it to be understood that he would consent to any material alteration. He would not follow his hon'ble friend in all the objections—of which he said that he had so many—to the details of the Bill, because, as it was proposed to make him a member of the Select Committee, he would probably have ample opportunity hereafter of bringing them to notice; and the Committee would, no doubt, be glad to receive any criticisms which were likely to be of use in framing the measure.

The Hon'ble SIR EDWIN JOHNSON said that he did not know whether this was the proper time and stage of the Bill at which to offer suggestions. He observed that the proposed Bill was, with the sanction of the Supreme Government, to be applied by Local Governments at their discretion. The whole of the clauses of the Bill, in fact, could be applied by any Local Government within its jurisdiction, under the general sanction of the Supreme Government; but he would ask the Select Committee to take into consideration that several of the factories with which they proposed to deal and for which they proposed to legislate were factories under the Government of India; and, if there was no objection on the part of the Select Committee, he would propose that in any measure having reference to factories generally, its special application to our military manufacturing establishments should only be sanctioned under the authority of the Supreme Government.

His EXCELLENCY THE PRESIDENT remarked that he understood the intention of the terms expressed in the first section to be that the application of the provisions under the Bill would be made by the Local Government only with the previous sanction of the Governor General in Council. That would involve a previous reference to the Supreme Government.

The Hon'ble SIR EDWIN JOHNSON observed that, in his opinion, before any principles were applied to the military factories, they should be specially brought to the notice of the Supreme Government for previous sanction. That was a suggestion which he merely offered for the consideration of the Select Committee.

protect themselves, it appeared to him a humane one, and, as such, one to which we could not refuse our sympathy, and to which no reasonable person could offer any objection. The three points chosen appeared to come well within that object, that was to say, the question of age, of hours, and of fencing machinery. That of inspection was merely ancillary; we could not see what was done under those heads unless they were brought under inspection. But it would be readily admitted, he thought, that it was indispensable that our legislation upon those points should be entirely in harmony with the circumstances and peculiarities of India. Probably very little of the experience derived in English factories would be of much use in India; and he fully agreed with the Hon'ble Member in his remarks on a former occasion that "the differences between England and India of climate, character and habits of life of the people were so great that much which was needed there would not only be inapplicable, but perhaps actually injurious here."

It did not, however, seem to him that the Bill which had been introduced at all corresponded with the principle which the Hon'ble Mover had laid down, and therefore he had heard with very great relief to-day that to a very great extent—in fact in almost every particular—the Bill was to be considered merely as a sort of carcass put forward for the Select Committee to work on. Consequently we could not be considered to be pledged in principle, much less in detail of course, to the sanction which he doubted not would be given to the introduction of the Bill to-day.

As to the details of the measure, as he observed that the Hon'ble the Mover had proposed that he (MR. HOPE) should serve on the Select Committee, he need not trouble the Council at any great length, or further than to say that in almost every particular the details of the Bill as now before them appeared to be open to objection. The age put down would have the effect of treating as "young persons who had not attained to an age at which they would be considered free agents" some who had actually got wives and families and were in the position of grown-up men and women. As to hours of employment, one of the most obvious results of fixing a daily instead of a weekly maximum would be to enforce working on Sundays all over India, which, he ventured to think, was not one of the objects which Earl Shaftesbury, at least, had in view in bringing the matter before Parliament. As to the fencing of dangerous machinery, he thought that a great deal too much power would be put into hands which were not skilled for exercising it; and perhaps it might be sufficient to empower the Inspector to apply to the Magistrate for an order, which could be obtained now under the regular criminal law, in any case in which he thought the fencing insufficient. As to inspection itself, he thought that some mode of appealing and of obtaining competent sanction before prosecuting should be provided. Likewise, with regard to the age, we were all well acquainted with the immense difficulty of ascertaining the ages of children in this country, and the Bill might very well lead to great oppression unless this could be got over.

He merely made these remarks because he thought that the Bill, if it went out as it was, might cause a great deal of apprehension in the country which, he hoped, would prove to be unnecessary.

As to the general application of the Bill, his remarks had rather a wider scope; and he fully agreed with the Hon'ble Member who had just spoken that the definition of "factory" as it now appeared was one which was far too wide. In fact, if it were allowed to stand in anything approaching to its present form, he should anticipate the worst results from the Bill. It covered industries where there was no machinery used and no close rooms; it likewise covered industries of a purely temporary character which were carried on for perhaps only a couple of months in the year; and even, as his hon'ble friend Mr. Batten had pointed out, it covered work which was carried on only for a day. On the other hand, there were certain industries which he was not sure whether the definition properly covered or not—possibly it did—such, for instance, as Government mines and factories. It might perhaps be more simple if a schedule of the particular industries with regard to which legislation was thought necessary

could be appended to the Bill, and then the Local Government were empowered to extend the provisions of the Bill to them when necessary.

Having made these remarks with the object which he had just explained, of removing a misapprehension which might otherwise not unreasonably arise, he would only say that, as the Hon'ble Member was so liberally disposed as to the details of the Bill, he might rely upon his thorough co-operation in putting it into practical shape within the lines which he had endeavoured faintly to draw.

The Hon'ble MR. COLVIN wished to say a few words in reply to the observations made by his hon'ble friends who had just spoken. He was not sure whether the criticism made by his hon'ble friend Mr. Batten of the wording of the first section was justified by the drafting or not; but if it should prove to be so and if an amendment in the sense suggested should be necessary, he had little doubt that the Select Committee would agree to make it. Nor did he anticipate any objection to the Bill being modified, if necessary, so as to allow of Local Governments applying a part only of the Act, and not the whole of it, when they thought such a course desirable. It was unnecessary to follow his hon'ble friends Mr. Batten and Mr. Hope in their criticisms of the definition of the word "factory," because it had been fully recognized that the present definition was merely provisional.

As regards the Hon'ble Mr. Hope's remarks, he was glad to hear that he considered that the general object of the Bill was good and that it would have his support so far. He was not prepared, however, altogether to accept Mr. Hope's view of the Bill when he spoke of it as merely a skeleton, which (if he had understood him correctly) might be altered by the Committee at pleasure; because the two main objects which the Bill was intended to effect—namely, that of affording security to life and limb from accident and of protecting children and young persons who had not attained to an age at which they would be considered free agents from being overworked—were essential to the Bill. On these points he should not wish it to be understood that he would consent to any material alteration. He would not follow his hon'ble friend in all the objections—of which he said that he had so many—to the details of the Bill, because, as it was proposed to make him a member of the Select Committee, he would probably have ample opportunity hereafter of bringing them to notice; and the Committee would, no doubt, be glad to receive any criticisms which were likely to be of use in framing the measure.

The Hon'ble SIR EDWIN JOHNSON said that he did not know whether this was the proper time and stage of the Bill at which to offer suggestions. He observed that the proposed Bill was, with the sanction of the Supreme Government, to be applied by Local Governments at their discretion. The whole of the clauses of the Bill, in fact, could be applied by any Local Government within its jurisdiction, under the general sanction of the Supreme Government; but he would ask the Select Committee to take into consideration that several of the factories with which they proposed to deal and for which they proposed to legislate were factories under the Government of India; and, if there was no objection on the part of the Select Committee, he would propose that in any measure having reference to factories generally, its special application to our military manufacturing establishments should only be sanctioned under the authority of the Supreme Government.

His Excellency THE PRESIDENT remarked that he understood the intention of the terms expressed in the first section to be that the application of the provisions under the Bill would be made by the Local Government only with the previous sanction of the Governor General in Council. That would involve a previous reference to the Supreme Government.

The Hon'ble SIR EDWIN JOHNSON observed that, in his opinion, before any principles were applied to the military factories, they should be specially brought to the notice of the Supreme Government for previous sanction. That was a suggestion which he merely offered for the consideration of the Select Committee.

The Hon'ble SIR ANDREW CLARKE said that, with reference to the remarks of his hon'ble friend Sir Edwin Johnson, he should like to say that one of the largest employers of juvenile labour in India were the Railway workshops. He thought some provision should be made for exempting them from the operation of the Act, and any other similar establishments. That was a point into which, he thought, the Committee might also enquire. So far as he was aware, the arsenals and dockyards in England were exempted from the operation of the Factories Act.

The Hon'ble MR. COLVIN said that the point raised had perhaps better be dealt with in committee. It was not, of course, intended that the Government of India should prescribe rules for private factories which it would be at liberty to neglect in its own. At the same time, it could hardly part with the control of its own establishments. Perhaps the rules to be framed by the Local Governments might be made subject to the sanction of the Supreme Government, and the necessary control so reserved. He thought that it was a matter which, having been brought to notice, might safely be left to the Select Committee.

The Motion was then put and agreed to.

The Hon'ble MR. COLVIN also moved that the Bill be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

GLANDERS AND FARCY BILL.

The Hon'ble MR. STOKES moved for leave to introduce a Bill for the better prevention of Glanders and Farcy among Horses. He said that the subject of legislation for preventing the spread of infectious diseases generally among animals had been for some time under the consideration of the Government of India. Recently the prevalence of glanders in the upper parts of the Panjáb had directed special attention to that disease. It was at first thought that Magistrates could, under the provisions of the Criminal Procedure Code, section 518, take summary action for the prevention of the evil and order the destruction of such animals as were duly certified to be affected with the disease, and instructions were issued to them to take action accordingly in the districts of Ráwalpindí and Pesháwar near the trunk road between the railway terminus and the armies in Afghanistan. Government had, however, since been advised that such action, so far as regards the destruction of animals the property of private persons, was not authorized by law. A Magistrate might, under section 518, direct the owner of a glandered horse, which was in a high-road or in some other public place and causing danger to other horses, to take certain order with it—to remove it, for example, to a certain distance from the public place. But the Magistrate had no power to order the owner to destroy the horse. Nor could he interfere with horses in private premises at some distance from the public place. Now it appeared that glanders was more or less rife among the horses and ponies of the Government mail stations, and also in the villages along the road from Ráwalpindí to Pesháwar and Jamrud. Veterinary surgeons had been told off to examine all Government animals along the road; but the preventive measures against the spread of the disease would not be complete unless horses and ponies belonging to private persons were examined and, if necessary, destroyed, both on the road and in the cities and villages adjoining it. In view of the very serious consequences which might result to the forces on the frontier if the disease should appear among the artillery or cavalry horses, or among the baggage-mules or ponies, and of its highly infectious nature, it had been thought advisable to deal at once with the subject of glanders, and the present Bill had accordingly been prepared.

As the matter was one with which the local legislatures were fully competent to deal (in Madras there was already a local Act on the subject, and MR. STOKES understood that similar legislation was contemplated by the Bengal Council for the town and suburbs of Calcutta), the Bill was confined to those provinces of the empire where there was no local legislature;

and as, even in these provinces, the necessity for its provisions would only exist at certain times, namely, during an outbreak of the disease, and within certain limited areas, the Local Government was empowered, by notification in the Gazette, to apply the Act to, and again withdraw it from, such local areas within the territories administered by it as it might think fit. This would enable the Local Government to deal, for example, with military cantonments, with camping-grounds, with localities where large horse-fairs were held, and with lines of road frequented by horse-dealers; and thus stamp out disease and prevent the loss of valuable animals. But glanders was not only contagious as regards animals of the equine species: man also became affected with it by contagion or inoculation. Of all contagious animal diseases, it was, therefore, the one over which the strictest supervision should be enforced.

The provisions of the Bill briefly were that certain officers, to be called Inspectors, were to be appointed, who were to be empowered to search for, seize and, on the certificate of a duly appointed veterinary surgeon, destroy any horse which was affected with glanders or farcy (the latter disease was also prevalent and was highly infectious); that the owners or all persons in charge of diseased horses were to give immediate notice of the disease to an Inspector or a police-officer; that the buildings or other places in which diseased horses might have been were to be disinfected and their internal fittings destroyed; and that no horse which had been in contact with a diseased horse was to be removed, except in good faith for the purpose of preventing infection, without a license. General powers to make rules in all matters for carrying out the purposes of the Act were conferred on the Local Governments. Finally, for the protection of Government and Government officers, all diseased horses which had been destroyed in the Panjáb under the recent orders of the Local Government or the Governor General in Council were declared to have been destroyed in accordance with law. In preparing the Bill, the provisions of the English Contagious Diseases of Cattle Act (41 & 42 Vic., c. 74), as well as those of the Madras Act (II of 1866), to which he had referred, had been duly borne in mind.

The Hon'ble SIR EDWIN JOHNSON said that the necessity for introducing a Bill of the character of the contemplated measure had been very prominently brought to the notice not only of the military authorities but of the Government on financial grounds, and he looked to very great and good results from the Bill which the Hon'ble Member proposed to introduce. His Excellency the Commander-in-Chief, if he made any remarks on the subject, would be able to speak as to the anxiety which His Excellency, in common with the Government of India, felt when he heard that, at the very crisis of our operations in the recent campaign in Afghanistan, those dangerous diseases were rampant. But leaving the military consideration apart,—though its importance could not be overrated—he would remind His Lordsh and the Council that every endeavour was at present being made to improve the breed of horses throughout the country generally. With that object we were spending certainly not very large sums, but sufficiently important to justify their being considered in connection with any Bill of this sort. Now, if we were making that expenditure with a view to improving the breed of horses for all purposes—agricultural and others as well as military—it was surely worth our while to take care that those horses were properly cared for, and that we should do our best to prevent their destruction by contagious diseases. His (the Military) Department had already obtained the concurrence of the Financial Department to establish a Veterinary College. He was not certain whether His Excellency the President had yet had the papers before him; but the matter was now one of detail between the two departments, which were at present dealing with the question as to the locality of the College. The necessity for such a College had been accepted long ago; the question, however, had been rather bandied backwards and forwards with reference to its situation; and the Lieutenant-Governor of the Panjáb was extremely anxious to see it established. He mentioned all this to show that the measure proposed to be introduced by the Hon'ble Member had a general application and was not a mere question of one service—the military; and, therefore, when the Select Committee

came to consider it, they would, he trusted, bear that in mind. But there was another point which he had to ask his hon'ble friend Mr. Stokes to consider. The proposed measure was limited to the better prevention of glanders and farcy among horses. There was however, another disease which was almost as bad as either of those, and from which we suffered very considerably in the army. He referred to the Ludhiána disease, which had almost put a regiment out of service owing to the danger of allowing it to mix with other troops—a regiment now on the frontier and actually in the field. Therefore, when his hon'ble friend Mr. Stokes was drafting the Bill, he hoped he would recollect the existence of the Ludhiána disease as one almost as dangerous as farcy and glanders.

His Excellency THE COMMANDER-IN-CHIEF said that he could recognize no necessity for any strong advocacy of the Bill. It appeared to him that the necessity for it was every day self-evident. As his hon'ble friend Sir Edwin Johnson had remarked, it was not only a very important military measure, but it was important to all owners of horses in every shape and form. The owner of a tattoo was relatively interested in the health of that animal and of course in the preservation of its life. The Bill would have this beneficial effect that it would enable us to visit out-of-the-way places, apart from those in which the disease might be generated and introduced among the valuable property of the Government.

On lines of dák there were frequent cases of glanders amongst the animals engaged in traffic, and it was of the utmost importance that Government and Government officials, on being made aware of the existence of such a disease, should be able to swoop down upon it and stamp it out at once. The meaner animals, he believed, were greatly the cause of the spread of this disease among the troops in quarters. Grass-cutters' tattoos, for instance, which were sometimes out for days together in a district, rubbing against country animals and browsing over defiled and tainted pasture, picked up and disseminated the disease, which, as was well known, often assumed a very virulent form. He believed, therefore, that the proposed measure would be of the utmost value not only to the military service, but to the Government and the country generally.

As regards the Ludhiána disease, he was not quite sure whether it was contagious. It was a disease about which very little was known, and in fact up to the present it had remained one of the mysteries, like cholera. He thought, however, that his hon'ble friend Sir Edwin Johnson was perfectly right in suggesting that this disease should be brought within the scope of the proposed Bill. He had no doubt that the loss by Ludhiána disease in horses affected by it amounted to something like 70 per cent., so that the destruction of the animal was really no great hardship on the owner affected by it. He would, however, suggest that the highest veterinary authority on the subject should be called upon to forward to the Select Committee appointed to deal with the Bill a list of the contagious diseases which might be brought under its provisions.

The Hon'ble MR. STOKES remarked that there could not be any Select Committee if the Bill was to be passed at the next meeting of the Council.

His Excellency THE COMMANDER-IN-CHIEF suggested that, in that case it might be advisable to consult Mr. Evans, Inspecting Veterinary Surgeon, who was at present in Simla. It was of great practical importance that information on this point should be derived from trustworthy veterinary authority; and perhaps his hon'ble friend Sir Edwin Johnson could communicate with Mr. Evans on the subject.

The Hon'ble SIR EDWIN JOHNSON remarked that he was quite prepared to do so; but, as His Excellency had observed, the disease was an extremely difficult one to deal with, and we had no very accurate knowledge regarding it, or whether it was contagious or not. He was not sure, therefore, whether before the next meeting of the Council Mr. Evans would be able off-hand to give such an opinion as would be of much value in framing the Bill. Still he would take care that Mr. Evans was consulted, and his opinion forwarded to the Legislative Department, who could work upon it in communication with the Military Department.

The Hon'ble MR. STOKES said that he should be sorry to commit himself to any undertaking to bring the Ludhiána disease within the scope of the Bill. In the first place, he did not know exactly what that disease was. He was told that it was a kind of anthrax, and that it might be communicated by inoculation—as, for example, by means of flies. But there did not seem to be a particle of evidence that it was infectious or contagious in the common acceptation of those terms. In the second place, he considered himself in a merely executive matter like this little but the instrument of the Executive Departments concerned; and he had received no instructions from the Home Department or from the Military Department regarding the matter. He would suggest that the Bill, which was one of great urgency, should now be passed in its present form; and then, as soon as they had found by inquiry from the authorities competent to give an opinion on the subject what the Ludhiána disease really was, and whether it was communicable by proximity or contact, an amending Bill might, if necessary, be brought in and passed.

The Hon'ble SIR EDWIN JOHNSON observed that it just depended whether the Legislative Department was prepared to consider this disease in their present Bill or not. If they were unable to do so, he agreed with his hon'ble friend Mr. Stokes that it would be preferable to go on with the original question of dealing with farcy and glanders rather than let the proposed Bill await a discussion which might take weeks and weeks. He was very much inclined to favour the view of the case taken by Mr. Stokes that it would be advisable —indeed very necessary—to refer to many other authorities besides Mr. Evans in regard to legislating for the Ludhiána disease. He would rather see the Bill passed as it was and amended afterwards, if necessary.

The Motion was put and agreed to.

FOREIGN JURISDICTION AND EXTRADITION BILL.

The Hon'ble MR. STOKES presented the Report of the Select Committee on the Bill to amend the Foreign Jurisdiction and Extradition Act, 1872.

TOWN-DUTIES AND TOLLS BILL.

The Hon'ble SIR JOHN STRACHEY asked leave to postpone the motion for leave to introduce a Bill to regulate the levy of town-duties and tolls in Municipalities.

Leave was granted.

The Council adjourned to Friday, the 14th November, 1879.

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th NOVEMBER 1879.

GENERAL REMARKS.—Rain fell in most of the districts of the Madras Presidency, and the north-east monsoon has been so far favorable; harvesting is going on with a satisfactory outturn; prospects are good. In Bombay there was no rain, it is wanted in parts of the Deccan; fever prevails throughout the Presidency, but especially in Guzerat; the crops are in good condition. In Bengal also no rain has fallen during the week, and its want is felt in Orissa; the cyclone in the Cox's Bazar sub-division is now reported to have damaged about three-eighths of the winter rice crop; general prospects are very good. In the North-Western Provinces and Oudh the weather has been fine and seasonable; the public health is slowly improving, but the ravages of fever have been very severe; the *rabi* sowings are nearly completed. In the Punjab prospects remain favourable and prices have a downward tendency; fever, though still bad in some districts, is abating. In the Central Provinces the weather has been seasonable; the harvesting of the *kharif* is proceeding with a good outturn; prices are falling. In Burma the wet weather is now over; agricultural prospects are very satisfactory, and crops have commenced to be reaped in places. In Assam and the other Provinces and States the weather has been clear and prospects remain good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Nov. 15th)	.....	*Ragi* 23·35; early dry crops being harvested; white *cholum*, wheat, and Bengal gram being sown; standing crops in good condition.
Kurnool („ „)	.....	*Ragi* 24·81; more rain wanted in one taluk; dry crops being harvested, outturn ¾ to full; white *cholum*, Bengal gram, and wheat being sown; paddy blight in two taluks.
Ganjam („ „)	·4 (average of 2 stations).	*Ragi* 28·64.
Kistna („ „)	.....	*Ragi* 26·28; 36 inches water over anicut; standing crops generally good; *varagu* re-sown where damaged by rains; black paddy partly harvested, outturn ½ to full.
Chingleput (Madras) („ „)	3·7 (average of 11 stations).	*Ragi* 22·11; standing crops doing well; ploughing, sowing, and transplanting going on actively; harvest outturn ⅛ to ¾; pasturage abundant.
Coimbatore („ „)	·77 (average of 13 stations).	*Ragi* 23·55; crops generally good; harvest of paddy, *ragi*, and *cumboo* in 8 taluks, outturn ½ to full, others ⅛ to ¾.
Tanjore („ „)	3·87 (average of 10 stations).	*Ragi* 25·15; crops good; harvest of paddy, *cholum*, *ragi*, and *cumboo*, outturn ½ to full.
Madura („ „)	1·45 (average of 10 stations).	*Ragi* 19·57.
Malabar („ „)	1·28 (average of 12 stations).	*Ragi* 18·33; second crop progressing.
Travancore („ „)	2·34	*General Remarks.*—General prospects good.
Bombay (Nov. 19th)—		
Kurrachee ...	.....	River on 16th 4 feet 4 inches, against 7 feet 3 inches on same date last year; fever prevalent; slight cattle-disease.
Hyderabad ...	.....	Sowings continue; fever general; weather unsettled.
Ahmedabad ...	.....	*Kharif* harvest going on; lands being prepared for *rabi*; fever decreasing.
Baroda ...	.....	Fever still prevails, 204 deaths in city of Baroda; crops thriving; reaping of *bajri* and rice nearly over; locusts have appeared in some villages of Nawsari.
Surat ...	.....	*Kharif* harvest and *rabi* sowing progressing; locusts damaged certain crops in Choryási and Mándvi; slight cholera and fever.
Násik ...	.....	Cold; fever in the town of Násik and in 3 talukas; *kharif* reaping mostly completed; *rabi* sowings progressing; standing *rabi* crops good, but slightly injured by rats in Násik talukas.
Colaba (Bombay) ...	.....	Weather fine.
Poona (Nov. 16th)	*Nil*	Rain required for *jowar*.
Ahmednagar ...	.....	Reaping of *bajri* and sowing of *rabi* completed; *rabi* crops in good condition; rain generally required, but immediately wanted in Sheagaon; slight damage by rats in parts of Párner, Shrigonda, and Dharwar; prospects fair; health good; *rabi* sowings continue.
Sholapore ...	.....	No reports received.
Dharwar ...	.....	
Kánara ...	.....	Harvest commenced above Ghát talukas; cattle-disease and fever prevail.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Rajkot ...	.....	Cotton and *rabi* crops in good condition; fever still prevalent; days warm, nights and early mornings intensely cold. *General Remarks.*—Prospects continue good, but rain wanted in some parts of the Deccan; fever throughout the Presidency, especially prevalent in Guzerat; some damage by locusts in Surat; cattle-disease in Kánara.
Bengal—		
Chittagong ...	*Nil*	Weather fair; damage to crops from cyclone in Satkania and Cox's Bazar sub-division about six annas; harvest would have been sixteen annas had there been no cyclone; elsewhere prospects favourable; early *amun* being cut; cholera has broken out in cyclone-stricken tract.
Dacca ...	*Nil*	Weather clear but warm; *amun* being reaped, outturn good; winter crops being sown; floods quite subsided; relief operations finally closed on 15th; new rice 22 seers, old rice 20 seers.
24-Pergunnahs (Calcutta)	*Nil*	Prospects of *amun* and winter crops good, an average outturn expected; cultivation of winter crops going on; common rice 10½ to 12½ seers; public health normal; fever in some places.
Moorshedabad ...	*Nil*	Prospects of paddy and *kalai* good; fever in mitigated form still reported from some thanahs of sudder circle; small-pox cases still in thanah Bharatpur; common rice averages 13 seers; no want of work for labourers.
Rajshahye ...	*Nil*	Weather cloudy at end of week; sowings continue; common rice 12½ to 13 seers.
Burdwan ...	*Nil*	Crop prospects fairly good; general health good.
Rungpore ...	*Nil*	Weather cool; prospects of crops favourable; malarious fever somewhat prevalent.
Bhágalpur ...	*Nil*	Rice prospects excellent; early rice being harvested; *rabi* sowings nearly completed; general health good, except in Banka, whence bad type of fever reported; common rice 19 seers.
Purneah ...	*Nil*	Prospects excellent all round; *rabi* sowing still continues; rice 14 to 15 seers; health of people fair, that of cattle still continues bad; water-level still high, but all inundations have subsided.
Patna ...	*Nil*	Prospects very favourable.
Durbhanga ...	*Nil*	*Dhan* promises well; *rabi* sowing continues; tobacco, too, promises favourably; prices falling; general health good.
Hazáribágh ...	*Nil*	Weather seasonable; paddy harvest nearly completed and yielded a bumper crop; sowings of winter crops going on; prices cheap and stationary; general health good.
Cuttack ...	*Nil*	More rain wanted both for rice and *rabi* crops. *General Remarks.*—No rain during week; it is still wanted in Orissa; *amun* rapidly coming in ear and ripening; earlier *amun* being cut with good outturn; *rabi* sowing still going on, and young plants coming up well; prices falling; relief operations in Dacca finally closed; cyclone in Chittagong damaged about six annas of crops in Satkania and Cox's Bazar; cholera broken out in cyclone-stricken tract; public health on the whole good; fever still prevalent in places.
N.-W. P. and Oudh—		
Benares (Nov. 18th)	.....	Prospects continue good; *rabi* germinating favourably; fever still prevalent.
Allahabad („ „)	.....	Weather on the whole seasonable; for two days wind easterly and clouds gathering; late rice and some *jowar* still uncut; fever abating slowly; wheat 13¾, coarse *chanwal* 18¾, unhusked *dhan* 37⅛ seers.
Gorakhpur („ 19th)	*Nil*	Weather clear and seasonable; *rabi* germinating favourably, fever abating.
Jhansi („ „)	.....	*Kharif* harvest being reaped; *rabi* sowings in progress; fever abating.
Agra („ 18th)	.....	*Kharif* harvest over, excepting *jowar*, which is being reaped; *rabi* sowings continue in many places; the young crops are above ground; health improving.
Bareilly („ 19th)	.....	Wind still in west; health improving.
Meerut ...	.....	No report received.
Kumaun („ 17th)	.....	Weather fine; wheat 10 seers per rupee.
Lucknow ...	.....	No report received.
Partabgarh („ 17th)	*Nil*	Reaping of *jowar* and *mash* continues; *rabi* sowings nearly finished; fever continues to abate, but many recently recovered therefrom are suffering from dysentery, which has increased the percentage of mortality; cattle-disease almost disappeared; prices falling.
Sitapur („ 19th)	.....	Weather seasonable; fever still prevails.
Fyzabad („ „)	*Nil*	Ague and fever prevalent; *rabi* sowing finished; irrigation going on. *General Remarks.*—Weather fine and seasonable; health improving and fever abating though slowly; *rabi* sowings nearly finished.
Punjab—(Nov. 18th)—		
Delhi ...	...	Further slight fall in prices of food-grains; fever still prevails.
Hissar ...	...	Weather seasonable; *rabi* crops good; prices stationary; health improving.
Umballa ...	...	Grain crop promising; wheat sown; health fair.
Jullundur ...	...	Crops cut; prices steady; fever prevalent.
Lahore ...	...	Agricultural prospects and health good.
Ferozepore ...	...	Agricultural prospects fair; slight fall in prices.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*contd.*		
Siálkot ...	...	Rain now wanted for *rabi* crops.
Ráwalpindi ...	...	*Rabi* sowings nearly completed; fever decreasing.
Pesháwar ...	·1	Harvest prospects good; prices of wheat and barley slightly lower.
Mooltan ...	...	*Kharif* crops all removed; *rabi* sowings in progress; prices steady; health fair.
Dera Ismail Khan ...	...	*Rabi* sowings in progress; prices stationary; health fair. *General Remarks.*—Prospects continue favourable and prices have still a downward tendency.
Central Provinces—		
Nágpur (Nov. 19th)	.....	Cotton picking continues, outturn below average owing to injury done by last rain; *jowar* harvest commenced; *rabi* thriving; fever prevalent; prices falling.
Jubbulpore ...	.....	Cloudy occasionally; *rabi* sowings, except in low lands, completed; prospects of *kharif* good; prices easier.
Saugor ...	.....	*Kharif* crops partially harvested, outturn good; cotton picking commenced; *rabi* sowings approaching completion; fever declining; prices falling.
Seoni ...	.....	Cotton picking; rice cutting continues; cholera ceased.
Hoshangabad ...	.....	Cotton picking; *jowar* cutting commenced; *rabi* sowings nearlye completed; fever prevalent; prices falling.
Raipur (Nov. 15th)	.....	Clear and cool; rice harvest and *rabi* sowings continue; cattle-diseas in Singa and Dhamtari tahsils; prices unchanged.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

RAILWAY CONFERENCE.

Nos. 262-81 R. T., dated Simla, November 18, 1879.

RESOLUTION—By the Govt. of India, PUBLIC WORKS DEPT.

Read again—

Public Works Department Resolution Nos. 2831-41R., dated 2nd July 1879.

Read also—

From Government of Bombay, No. 2068, dated 14th August 1879, and enclosures.
To „ „ No. 3717R., dated 5th September 1879.
„ Consulting Engineer, Calcutta, No. 3718R., dated 5th September 1879.
Public Works Department Circular No. 30R., dated 12th September 1879.

RESOLUTION.—With reference to the Resolution just read, the Governor General in Council is pleased to decide that the proposed Railway Conference shall meet at Calcutta on the 6th January 1880, and desires that the Agents of the Guaranteed Railway Companies be invited to nominate one or more delegates to represent their Companies.

2. The Government of Bengal should nominate two or three officers to represent the State Lines in that province, and the Director General of Railways should appoint delegates for other State Railways.

3. The Conference will meet at the Public Works Secretariat at noon on the above-named date.

4. The draft Rules and Regulations for Indian Railways will be brought before the Conference, as previously proposed; and the Government of India desires also to consider the question of adopting some uniform system of recording locomotive miscellaneous services, such as shunting, piloting, light-running, &c.

5. The names of all delegates should be submitted for the information of the Government of India at an early date.

6. It is proposed to appoint Major-General J. S. Trevor, R.E., President, and Mr. Bradford Leslie, C.E., Vice-President, of the Conference.

ORDER.—Ordered, that this Resolution be communicated to the Governments and officers noted in the margin for information and guidance; and to the Governments of the North-Western Provinces and Oudh and the Punjab; the Chief Commissioners of the Central Provinces, British Burma, and Assam; the Resident at Hyderabad; the Agents to the Governor General for Central India and Rajputana; and the several Departments of the Government of India, for information; and to the Foreign Department for communication to the Chief Commissioner of Mysore.

Governments of Madras, Bombay and Bengal.
Director General of Railways.
Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that this Resolution be published for general information in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Major-General, R.E.,*

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 25th NOVEMBER 1879.

GENERAL REMARKS.—The north-east monsoon has set in in the Madras Presidency, giving some more rain to all the districts, except Bellary; agricultural operations are progressing, and general prospects are good. There has been no rain in the Bombay Presidency; prospects, however, continue good, except in parts of the Deccan where rain is wanted; fever is abating in Guzerat; locusts have appeared here and in Sind. In Bengal also no rain has fallen as yet, and it is much wanted in Orissa; general prospects are good, except in the cyclone-stricken parts of Chittagong. In the North-Western Provinces and Oudh the weather continues fine and seasonable, and fever is abating except in Benares; the *kharif* harvest is almost over, the young *rabi* crops are promising. In the Punjab agricultural prospects are generally favourable, but rain will soon be required; prices are stationary in some districts and declining in others; fever is still prevalent in some of the districts. In the Central Provinces the weather is clear and cold; the *kharif* harvest is progressing, giving a generally good outturn; the produce of cotton is below the average; *rabi* crops are promising; prices are stationary in some and falling in other districts. In British Burma the general health is good; crop prospects are satisfactory, and reaping is progressing. In Assam and the other Provinces and States the weather continues clear and prospects are favourable; in Malwa every possible acre is under opium.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Nov. 22nd)	...	[illegible] being harvested; *cholum* and Bengal [illegible] crops in good condition.
Kurnool („ „)	·77 (average of 3 stations).	*Ragi* 24·98; rain wanted in one taluk; dry crops being harvested; outturn ¾ to full; paddy harvest commenced in one taluk, blight in two taluks; wheat and Bengal gram being sown; pasture and water ample.
Ganjam („ „)	·73 (average of 13 stations).	*Ragi* 28·4.
Kistna („ „)	5·46 (average of 11 stations).	*Ragi* 26·28; crops generally damaged by storm of 19th; 80 inches of water over anicut.
Chingleput (Madras) („ „)	2·51 (average of 11 stations).	*Ragi* 22·76; standing crops doing well; being injured by insects in parts of three taluks; ploughing, sowing, and transplanting going on actively; harvest outturn ½ to ¾; pasturage abundant.
Coimbatore („ „)	·47 (average of 4 stations).	*Ragi* 23·39; crops generally good; parts of one taluk reported to suffer from deficiency of rain; harvest of paddy, *ragi*, *cumboo*, and *samai* in eight taluks, outturn of paddy ½ to ¾, others ½ to ¾.
Tanjore („ „)	·39 (average of 2 stations).	*Ragi* 26·65; crops good; harvest of paddy, *ragi*, and *cholum*, outturn ¾ to full.
Madura („ „)	·32 (average of 4 stations).	*Ragi* 22·04.
Malabar („ „)	·85 (average of 6 stations).	*Ragi* 18·83; second crop progressing.
Travancore („ „)	*Nil*	Prices stationary. *General Remarks.*—General prospects good.
Bombay—(Nov. 26th)—		
Kurrachee ...	...	Report not received.
Hyderabad ...	...	*Rabi* crops coming on; sowings continue; fever, coughs and colds prevalent; frequent deaths in district jail; locusts in Tando Bago eating leaves of trees.
Ahmedabad ...	...	*Kharif* harvest nearly over; *rabi* sowing progressing; fever decreasing; weather getting cold.
Baroda ...	...	*Rabi* sowings continue; cotton crops good; locusts in some villages near Nowsari; fever abating.
Surat ...	...	Crops generally healthy; locusts disappeared, making little damage; slight cholera in Chikhli; fever in almost all talukas.
Násik ...	...	Cold and fever in four talukas; *kharif* good; *rabi* sowing in progress; locusts in Peint.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*contd.*		
Colaba (Bombay) ...	...	Average abnormal temperature 3° cool; abnormal wind northerly; weather fine.
Poona (Nov. 23rd)	*Nil*	Prices of *bajri* and *jowari* slightly risen.
Ahmednagar ...	...	*Rabi* crops withering in parts of Párner and Sheagaon; rain urgently wanted; slight injury by rats in parts of Párner.
Sholapore ...	...	*Rabi* prospects generally good; rain wanted in three talukas.
Dharwar ...	...	*Kharif* reaping and *rabi* sowing nearly completed; prospects fair; slight fever and cattle disease in Hángal taluka.
Kánara ...	...	Harvest completed on coast, continues above Ghát; cattle disease and fever prevail.
Rajkot ...	...	*Kharif* harvest nearly completed; *rabi* good; fever prevalent; weather cold. *General Remarks.*—Prospects continue good, except in parts of Deccan, where rain is wanted; public health not good, but fever abating in Guzerat; locusts in parts of Sind and Guzerat.
Bengal—		
Chittagong (Nov. 26th)	*Nil*	Weather seasonable; prospects of crops favourable, except in cyclone-stricken parts; early *amun* being cut; cholera prevails in cyclone tract.
Dacca ...	*Nil*	Weather cold and clear; *amun* outturn good; sowing of cold weather crops proceeding briskly; public health very good.
24-Pergunnahs (Alipore)	*Nil*	Prospects of *amun* and winter crops good; in some places *amun* being reaped; fair outturn expected; sowing of winter crops going on; some fever reported.
Moorshedabad ...	*Nil*	Prospects of paddy, *kalai*, and sugarcane good; fever in mitigated form still reported from some thanas; small-pox cases reported from Bharatpore and Hariharpara police stations; rice falling.
Rajshahye ...	*Nil*	Weather warmer and rather cloudy; paddy-cutting going on; sowings continue.
Burdwan ...	*Nil*	Crop prospects good; general health good.
Rungpore ...	*Nil*	Weather cool; prospects of crops continue favourable; fever somewhat prevalent.
Bhágalpur ...	*Nil*	Weather cold and seasonable; paddy being reaped; *rabi* crops all sown and promising well; slight cholera about; otherwise general health good.
Purneah ...	*Nil*	Prospects of crops still continue excellent; *aghani* being cut in many places; *rabi* sowings still continue; health of people good, that of cattle improving; rivers much subsided everywhere.
Patna ...	*Nil*	Prospects of crops good.
Durbhanga ...	Slight rain on 20th.	Dhán prospects favourable. *Sathia* crop cut and being brought into market; *rabi* sowings going well; prices stationary; public health good; cattle disease [illegible] there.
Hazáribágh ...	*Nil*	Weather very cold and seasonable; prospects of winter crops good; food-grains cheap; health good.
Cuttack ...	*Nil*	Rain very much wanted for *rabi* and rice; prices stationary; fever prevalent. *General Remarks.*—No rain, more still wanted in Orissa; prospects continue favourable, except in cyclone-stricken parts of Chittagong; early *amun* being reaped, and late crop fast ripening. In Nuddea outturn of *amun* in half of district will be fair; *rabi* sowings nearly completed, and crops everywhere doing well and very promising; prices generally falling; public health on the whole good, but fever still prevalent in places, and cholera in cyclone tract of Chittagong.
N.-W. Provinces and Oudh—		
Benares (Nov. 25th)	...	Prospects continue good; *rabi* germinating favourably; fever still prevalent.
Allahabad („ „)	...	Weather clear and seasonable; later *kharif* crops are being harvested; *rabi* sowings completed; fever continues to abate; wheat 13½; coarse *chawal* 19$\frac{1}{16}$; unhusked *dhan* 36¼ seers.
Gorakhpur („ 24th)	*Nil*	Weather colder; *rabi* germinating well; cutting of late rice has commenced; excellent outturn; fever rapidly decreasing.
Jhansi („ 26th)	...	*Rabi* prospects good; fever abating; *kharif* outturn generally average; prices falling.
Agra („ 25th)	...	*Kharif* harvest almost over; *rabi* sowings continue; young crops promising; weather seasonable; fever abating.
Bareilly („ 26th)	...	No change since last week.
Meerut („ „)	...	Wind west; sharp frost at night; *kharif* being harvested; fever diminishing; cheapest wheat 15¼, gram 18, barley 22, *jowar* 20½ seers.
Kumaun („ 25th)	...	Weather fine; some locusts in district.
Lucknow („ „)	...	Weather seasonable; public health improving; *bajra* 22, *barley* 23½ seers.
Partabgarh („ 24th)	*Nil*	*Rabi* sowings finished; the earlier sowings have germinated well; health slowly improving.
Sitapur („ 26th)	*Nil*	Prospects fair; fever abating.
Fyzabad („ „)	*Nil*	Fever abating. *General Remarks.*—Weather favourable; *kharif* harvest nearly over; young *rabi* crops promising; health improving and fever abating except in Benares.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—		
Delhi (Nov. 25th)	...	Prices steady; fever prevalent.
Hissar ...	...	Weather seasonable; state of *rabi* crops good; prices stationary; health good.
Umballa ...	...	Wheat sown and crops progressing; health fair.
Jullundur ...	...	Prices falling; fever prevalent.
Amritsar ...	...	Crop prospects fair; prices stationary.
Lahore ...	...	Prospects good; health fair.
Ferozepore ...	...	Agricultural prospects fair; prices steady.
Siálkot ...	...	Wheat sowings progressing in irrigated lands.
Ráwalpindi ...	...	Agricultural prospects good; fever decreasing.
Pesháwar ...	...	Harvest prospects good; prices firm.
Mooltan ...	...	*Rabi* sowing still in progress; prices falling.
Dera Ismail Khan ...	...	Agricultural prospects and health fair.
		General Remarks.—Agricultural prospects generally favourable, but rain will soon be required.
Central Provinces –		
Nágpur (Nov. 26th)	...	Cloudy at the commencement of the week, clear now; cotton-picking continues; *jowar* is being cut; *rabi* doing well; fever prevalent; prices falling.
Jubbulpore ...	...	Cold; cotton-picking commenced; prospects generally good; prices easier.
Saugor	...	Very cold; it is feared cotton and other crops will be injured by frost; *jowar* and *mung* being threshed; *rabi* healthy; prices declining.
Seoni	...	Cotton-picking continues; pulses slightly damaged by frost; *rabi* promising; health good.
Hoshangabad ...	...	*Rabi* sowings nearly completed; *jowar* harvesting; cotton-picking progressing; fever prevalent; prices falling.
Raipur (Nov. 22nd)	...	Cloudy; rice harvest continues; *rabi* sowings almost completed; cattle disease in Dhamtari and Simga tahsils; prices slightly fallen.
Sambalpur („ 21st)	·06	Rice harvest continues; outturn good; small-pox decreasing; prices stationary.
		General Remarks.—Clear and cold; *kharif* harvest and cotton-picking continue; outturn of the former generally good, of the latter below average in some districts; *rabi* thriving and promising; prices stationary in some districts and declining in others.
British Burma (Nov. 26th)—		
Akyab	*Nil*	Total rainfall 224·06; cholera reported from Ooreetoung East township, otherwise public health good; crop prospects very good throughout Division.
Rangoon	·01	Total rainfall 113·69; slight fever prevalling in district, otherwise public health good; a few cases of small-pox; health of cattle fair; crops still partially affected by floods in Pegu township, otherwise good; reaping commenced in parts of Hmawbee township.
Bassein	·88	Total rainfall 98·49; public health good; crop prospects fair.
Prome	*Nil*	Total rainfall 44·88; public health good; prospects of crops satisfactory; reaping commenced.
Amherst (Moulmein) ...	*Nil*	Total rainfall 171·19; public health and agricultural prospects good.
Toungoo	*Nil*	Total rainfall 76·42; public health and prospects of crops good.
		General Remarks.—General health good; crop prospects satisfactory; reaping proceeding in several districts.
Assam—		
Gauháti (Nov. 26th)	*Nil*	Weather cool; *sali* and other crops doing well.
Sylhet	*Nil*	Reaping progressing; prospects good.
Cachar (Nov. 25th)	*Nil*	Weather seasonable; prospects of crops very good; public health good; common rice 16 seers per rupee.
Dibrugarh („ 26th)	*Nil*	Harvesting of *sali dhan* well advanced; rain wanted for pulses; public health good.
Berar & Hyderabad—		
Amráoti (Nov. 26th)	...	*Rabi* crops have germinated and are progressing favourably.
Akola	...	*Rabi* sowings completed; *kharif* harvest commenced.
Hyderabad (Nov. 27th)	*Nil*	A little rain in the country by which the *rabi* crops have benefited; slight fever prevails at Gulburga.
Mysore and Coorg—		
Bangalore (Nov. 26th)	*Nil*	Crops generally in good condition; dry crops being reaped; prospects favourable; health improving; prices slightly fallen.
Mysore ...	...	Report not received.
Mercara ...	...	Report not received.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States—		
Indore (Nov. 26th)	*Nil*	Weather cold; all prospects good; prices of *jowar* and *mucca* falling, but wheat 9 seers 3 chittacks, gram 10 seers 3 chittacks.
Morar (Gwalior) ...	*Nil*	Weather seasonable.
Sutna ...	*Nil*	Prospects good; *jowar* 24 seers.
Rutlam ...	*Nil*	Weather clear and cold; health and prospects good.
Neemuch ...	*Nil*	Weather cool.
Goona ...	...	Report not received.
Bhopal ...	*Nil*	Prospects favourable; slight fall in prices of food grains.
Agar ...	*Nil*	Health good; prospects favourable.
Nowgong	*Nil*	
Mánpur	...	Report not received.
		General Remarks.—Sowing has been well done, state of land being most favourable; every possible acre under opium in Malwa.
Rajputana—		
Abu (Nov. 26th)	...	Much colder; fever less.
Serohi	...	Report not received.
Marwar (Nov. 14th)	...	Tanks, wells, almost full; fever abating; crops being gathered; *rabi* sowings commenced.
Meywar („ 21st)	...	Tanks, wells, prospects good; fever less.
Harowtee („ 22nd)	...	Health improving; prospects good.
Jhallawar	...	Fever still prevalent; prospects good.
Ajmere (Nov. 26th)	...	Weather cold; prospects excellent.
Jeypore	...	Prospects good; fever decreasing; seasonable.
Bhurtpore	...	*Kharif* reaping and *rabi* sowing active; fever decreasing; seasonable.
Ulwar	...	Report not received.
Nepal—		
Katmandú	...	Report not received.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING 2nd DECEMBER 1879.

General Remarks.—Slight rain fell in most of the districts of the Madras Presidency. In Bombay, the North-Western Provinces and Oudh, the Central Provinces, and the Punjab, unusually cold weather has caused some slight damage to crops. The cold is also noticeable in Bengal, Central India, and Rajputana. Rain is wanted in Orissa, and the crops on high unirrigated lands in Cuttack have begun to suffer. On the whole, the prospects of the winter harvest are good, while the spring crops also promise very well. Fever is still prevalent, except in Madras, British Burma, and Assam.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Nov. 29th)	*Nil*	*Ragi* 25·30; harvest of early dry crops; sowing of *cholum* and Bengal gram continue; standing crops in good condition.
Kurnool („ „)	...	*Ragi* 27·43; dry crops being harvested, outturn ¼ to full; wheat and Bengal gram being sown; blight in 2 taluks; pasture and water ample.
Ganjam („ „)	·62 (average of 9 stations).	*Ragi* 29·21.
Kistna („ „)	·7 (average of 5 stations).	*Ragi* 25·37; crops fair, except where damaged by storm of 19th; 25 inches of water over anicut.
Chingleput (Madras) („ „)	·46 (average of 3 stations).	*Ragi* 23·11; sowing and transplanting in 2 taluks; in parts of 4 taluks standing crops somewhat injured by insects; elsewhere doing well; harvest in parts, outturn ½ to ¾; pasturage abundant.
Coimbatore („ „)	1·0 (in one station).	*Ragi* 23·48; crops withering in parts of 3 taluks from deficiency of rain, elsewhere fair; harvest of paddy, *ragi* and *cumbu* in 7 taluks, outturn of paddy ¼ to ½, others ¼ to full.
Tanjore („ „)	·39 (average of 4 stations).	*Ragi* 26·00; crops generally in good condition; harvest of paddy, outturn ½ to full.
Madura („ „)	·05 (in one station).	*Ragi* 23·30.
Malabar („ „)	·23 (average of 5 stations).	*Ragi* 17·81; prices almost stationary; second crop progressing.
Travancore („ „)	·33	Prices stationary. *General Remarks.*—General prospects good.
Bombay—		
Kurrachee ...	...	Report not received.
Hyderabad (Dec. 3rd)	...	*Rabi* sowings continue; temperature low, several frosty nights, nearly 6 degrees of frost on 26th; deaths in district jail continue; a cloud of locusts passed north of Shahdádpur and Sháhpur; fever, coughs, and colds prevalent.
Ahmedabad („ „)	...	*Kharif* harvest nearly over; *rabi* sowing progressing; fever decreasing; slight cattle disease in Sanand; weather cold.
Baroda („ „)	...	*Rabi* sowing continues; fever abating; prices stationary.
Surat („ „)	...	Crops generally healthy; fever throughout district; slight cholera in Chikli.
Násik ...	...	Slight injury to crops by frost.
Colaba (Bombay) ...	...	Average abnormal temperature 4 degrees cool; abnormal wind northerly, and air dry.
Poona (Nov. 30th)	...	Weather cold.
Ahmednagar (Dec. 3rd)	...	Rain wanted in district; crops in inferior soil withering, blighted by the cold in parts of seven talukas.
Sholapore ...	...	Cold weather causes injury to *rabi* crops in places.
Dharwar ...	...	*Joweri* slightly injured in places by west wind; prospects fair; cattle disease in Hangal taluka.
Kánara ...	...	Ground being prepared for second crop on Coosa; fever and bowel disease prevail.
Rajkot ...	...	Weather cold; *rabi* crops promising; *kharif* harvest over; health generally good. *General Remarks.*—Weather cold; frost in Násik and Hyderabad; crops injured by cold in parts of Deccan; fever abating in Gujarat.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—(Dec. 2nd).		
Chittagong ...	*Nil*	Weather fine; rice crop generally good; *amun* being harvested; severe outbreak of cholera in cyclone tracts.
Dacca ...	*Nil*	Weather seasonable; *amun* outturn satisfactory; prospects of winter crops favourable; health good.
24-Pergunnahs (Alipore)	*Nil*	Prospects promising; *amun* harvesting commenced; cultivation of winter crops going on in some places; cases of ordinary fever reported.
Moorshedabad ...	*Nil*	Prospects of paddy, *kalai*, and sugarcane good; *amun* being harvested; isolated cases of fever; otherwise public health good; small-pox amongst cattle reported from Burwa and Hariharpara Police Stations.
Rajshahye ...	*Nil*	Weather continues fine; harvesting and sowing operations progressing.
Burdwan ...	*Nil*	Crops all good; health fair.
Rungpore ...	*Nil*	Weather cool; prospects of crops continue favourable; fever still prevalent.
Bhágalpur ...	*Nil*	Weather cold; paddy being reaped; *rabi* promises well; general health good.
Purneah ...	*Nil*	Prospects of crops excellent all round; *rabi* and oil-seeds still being sown; country still moist enough for sowings; cholera and small-pox prevalent.
Patna ...	*Nil*	Prospects of crops good.
Durbhanga ...	*Nil*	*Dhan* being harvested and prospects good; *rabi* sowing continues; prices falling; public health good.
Hazáribágh ...	*Nil*	Weather seasonable, fine and cold; prospects of winter crops good; prices cheap and stationary; district health good.
Cuttack ...	*Nil*	Want of rain greatly felt for *rabi* and rice; fever and small-pox prevalent in certain parts of district. *General Remarks.*—Rain much wanted in Orissa; paddy on unirrigated high lands damaged partially in Cuttack; rice being reaped, very good outturn expected in most places; cold weather sowings nearly finished; young plants looking well and promising; prices in many districts comparatively cheaper; cholera severe in cyclone tracts of Chittagong; some cholera and small-pox also reported in places; fever still prevalent in parts of Orissa and some other places.
N.-W. Provinces and Oudh—		
Benares (Dec. 2nd)	...	*Rabi* prospects continue favourable; fever abating.
Allahabad („ „)	...	Frost at night unusually excessive; seven degrees registered recently; damage done to *arhar*, tobacco, and vegetables; weather otherwise seasonable; health much improved; *kharif* mostly harvested; wheat 13½, coarse *chanwal* 10½, unhusked *dhan* 37¾ seers.
Gorakhpur	*Nil*	Agricultural prospects continue favourable; fever decreasing.
Jhánsi (Dec. 3rd)	...	*Kharif* harvested; *rabi* germinating; prices stationary.
Agra („ 2nd)	...	*Kharif* being harvested; *rabi* sowings progressing well; weather seasonable; fever abating.
Bareilly („ 3rd)	...	Weather cold; *kharif* harvest not yet complete; health much improved.
Meerut („ „)	...	Weather very cold; fever somewhat abating; prices stationary.
Kumaun („ 1st)	...	Weather extraordinarily cold; *rabi* sowings almost completed; locusts have appeared in places but have done little damage.
Lucknow („ 3rd)	...	Prospects good; fever prevalent but abating.
Partabgarh („ 1st)	*Nil*	Prospects good; health improving.
Sitapur („ 3rd)	...	*Rabi* germinating well; health improving.
Fyzabad („ „)	*Nil*	*Rabi* being irrigated; *jarhan*, rice, and *kewant* being cut; fever diminished. *General Remarks.*—Weather cold, but seasonable in other respects; prospects good; health improving and fever abating.
Punjab—(Dec. 2nd)		
Delhi ...	...	Slight fluctuations in prices of food-grains with downward tendency; fever decreasing.
Hissar ...	...	Weather clear and cold; rain now wanted for *rabi* crops; sickness decreasing.
Umballa ...	...	*Rabi* promising; health good.
Jullundur ...	...	Agricultural prospects fair; sugar crop suffering from frost; prices steady; fever still prevalent.
Lahore ...	...	Crop prospects good; fever prevalent.
Ferozepore ...	...	Agricultural prospects fair; slight fall in prices; health good.
Siálkot ...	...	*Rabi* sowing still in progress.
Ráwalpindi ...	...	Agricultural prospects good; fever continues.
Pesháwar ...	...	Agricultural prospects good; prices steady.
Mooltan ...	...	State of crops and health good; prices have again fallen slightly.
Dera Ismail Khan ...	...	*Rabi* sowings in progress; prices stationary. *General Remarks.*—No rain this week; agricultural prospects generally favourable, and prices have still a downward tendency.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nágpur (Dec. 3rd)	...	*Jowar* harvest continues; yield good; *rabi* prospects favourable.
Jubbulpore ...	...	*Tur* and cotton damaged by frost; small-pox abating; prices easier.
Saugor	...	Cotton and pulses damaged by frost; *rabi* doing well; health good; prices declining.
Seoni	...	Very cold; *jowar*, *jagni*, and *tur* somewhat injured by frost; *cotton* yield below average.
Hoshangabad ...	...	*Rabi* sowings completed; *cotton* and *till*, injured by frost; fever continues; prices slightly risen.
Raipur (Nov. 29th)	...	Kharif crops harvesting; prospects of *rabi* favourable; cattle disease continues; prices stationary.
Sambalpur („ 27th)	...	Clear; cold; rice harvest continues; small-pox declining. *General Remarks.*—Clear and very cold; *kharif* harvest continues; some damage to cotton and pulses from frost reported from northern districts; prospects of *kharif* generally good; *rabi* thriving; prices stationary.
British Burma—		
Akyab (Dec. 3rd) ...	*Nil*	Total rainfall 224·06; public health good; agricultural prospects very good; slight cattle disease.
Rangoon	*Nil*	Total rainfall 113·69; slight fever in parts of district, also a few cases of small-pox, otherwise public health good; health of cattle good; some crops slightly damaged by rats in Pegu township, otherwise prospects good; reaping continues in Hmawbee township.
Bassein	*Nil*	Total rainfall 98·49; public health good; crops in fair condition.
Prome	*Nil*	Total rainfall 44·83; public health fair; crop prospects good.
Amherst (Moulmein) ...	·06	Total rainfall 171·25; public health good; slight damage to crops from late gale.
Toungoo	*Nil*	Total rainfall 76·42; public health and agricultural prospects good. *General Remarks.*—General health good; slight cattle disease; reaping proceeding; prospects favourable.
Assam— (Dec. 3rd)		
Gauháti	*Nil*	Weather cool; mornings foggy; reaping of *sali* commenced; prospects of other crops favourable.
Sylhet	*Nil*	Reaping of *aman* and *sail* progressing; prospects of crops good.
Cachar	*Nil*	Weather seasonable; prospects of crops very fair; public health good; rice 18 seers a rupee.
Dibrugarh	*Nil*	*Sali dhan* almost harvested; rain wanted for mustard; district healthy.
Berar & Hyderabad— (Dec. 3rd)		
Amráoti	...	*Rabi* crops coming on well.
Akola	...	Cotton-picking commenced; crops favourable.
Hyderabad... ...	*Nil*	Season prospects continue good.
Mysore and Coorg—		
Bangalore (Dec. 3rd)	*Nil*	Standing crops in good condition; harvesting continues; prospects favourable; health generally good; prices falling.
Mysore		Report not received.
Mercara		
Central India States— (Dec. 3rd)		
Indore ...	...	Weather cold; everything promising; wheat 10 seers, gram 10 seers 14 chittacks.
Morar (Gwalior) ...	...	Weather seasonable.
Sutna ...	...	Prospects good; *jowar* 25 seers.
Rutlam ...	...	Health and prospects good.
Neemuch ...	...	Weather cool.
Goona ...	...	Report not received.
Bhopal ...	...	
Ágar ...	...	
Nowgong	...	
Mánpur	...	Weather fair; cutting of *jowari* crop in progress; wheat and gram crops doing well; preparation and sowing of opium fields progressing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Rajputana—		
Abu (Dec. 3rd)	...	Cold and seasonable; fever abating.
Serohi (Nov. 30th)	...	Tanks drying, wells full; malarious fever very prevalent; prospects fair; cold.
Marwar („ 22nd)	...	Tanks and wells almost full; fever abating; sowings commenced; rain crops being gathered; seasonable; prices rising.
Meywar („ 28th)	...	Tanks, wells, health, and prospects good.
Harowtee („ 29th)	...	Health and prospects good.
Jhallawar („ 27th)	...	Fever abating; prospects good; much cooler.
Ajmere (Dec. 3rd)	...	Seasonable; prospects good.
Jeypore	...	Sowings completed; seasonable; fever abating.
Bhurtpore	...	Sowing nearly completed; seasonable; fever abating.
Ulwur	...	Report not received.

No 51.} CALCUTTA, SATURDAY, DECEMBER 20, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 57.

The Council met at Government House on Friday, the 14th November, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble G. H. M. Batten.

TRADES AND PROFESSIONS TAX BILL.

The Hon'ble SIR JOHN STRACHEY moved for leave to introduce a Bill to impose a tax on Trades and Professions. He said:—

"MY LORD,—Nearly two years have elapsed since the Government of India resolved that it was necessary to take active measures for the improvement of its financial position, and especially for providing funds to meet the heavy charges and obligations which are entailed upon the State by the periodical occurrence of famine.

"I do not now propose to consider how far those measures have been financially successful. When they were taken, India was only just recovering from one of the most terrible and widespread famines recorded in her history. The year that followed, although less disastrous than its predecessors, was not prosperous; and it is only now, in the year 1879, that it seems possible to hope, with some confidence, that the long period of scarcity and famine through which the country has been passing has really ended. The seasons have this year been favourable. In almost all parts of India, the prospects of agriculture, on which almost everything else depends, appear excellent, and we see, I hope, general signs of increasing prosperity.

"Unfortunately, famine was succeeded by war, and by another misfortune, which, considered from a merely financial point of view, was still more serious. I refer, of course, to the great disturbance in the relations between silver and gold, which has entailed upon the revenues of India such grave consequences. I do not now propose to enter into any general questions of finance. The time is not far distant when they will come under discussion. All that I will now say is that I feel satisfied that India will be well able to bear all her own proper burdens; that I see much that is encouraging and satisfactory in the condition and prospects of her finances, and no cause whatever for despondency.

"Among the financial measures taken at the beginning of last year, one of the most important was the imposition throughout India of a License-tax on traders. I will not recapitulate the reasons which led the Government of India to adopt this form of taxation, but I shall have to refer to them presently. Reserving whatever further remarks I may desire to make on this subject, it is sufficient now to say, as I said in this Council on the 9th February, 1878, that there was this strongest of all possible justifications for taxing the commercial and trading classes, that excepting that small section of them composed of Europeans, they paid scarcely anything towards the expenses of the State.

"We have now had sufficient experience of the new taxes to enable us to form a judgment on their merits and their defects. **Financially, the License-tax has been successful, for it yields already about £870,000 a year;** and taxes of this kind become more productive as knowledge and experience are gained by the assessing officers. With one exception the tax has been successful in other respects also. The greater part of the amount which it has yielded has been assessed and collected without difficulty or opposition; and although the tax has undoubtedly been unpopular, as all direct taxation must be, there has been only one really serious and valid objection to it. It has become clear that it descends too low, and that it falls on large numbers of people, on whom the imposition of taxation in such a form is neither expedient nor profitable.

"In the North-Western Provinces, Oudh and Madras, no person was made liable to the tax whose annual earnings were less than two hundred rupees; but throughout the rest of India, in Bengal, Bombay and the Panjáb, the minimum taxable income was fixed at one hundred rupees.

"When, my Lord, the Council was discussing the imposition of the License-tax, I spoke on this subject as follows:—

"'As to the objection, which has been raised in some quarters, that this tax will fall mainly on the poor, I content myself with simply denying the fact. It will touch no person whose nett earnings are less than rupees 100 a year; and if anybody asserts that, in the Provinces to which this Bill refers, any man is poor who possesses an income of rupees 100 a year, he is ignorant of the facts. Such a man is not poor; he is a man far removed above poverty, and well able to pay his contribution towards ensuring the country against famine. To say that our new taxation will fall upon the poor, is either an error or a calumny."

"I do not retract or qualify a word of what I then said.

"I assert as positively as ever that, in the greater part of India, a man with rupees 100 a year is not poor. Strange as it may sound to English ears, a small trader or artisan or agriculturist in India, whose nett income is £10 a year, certainly commands more, not only of the necessaries, but of the comforts, of life, than a man with five or six times that income in England; and it is also certain that the taxes paid by the former are far less onerous than those of the latter. In confirmation of this, I may remind the Council of the

remarks made by the Lieutenant-Governor of Bengal, Sir Ashley Eden, when the Northern India License Bill was under discussion; no one is likely to question his authority on such a subject. Repudiating the assertion that the tax would fall on the poorest classes,—

'It may be difficult,' he said, 'for men who know nothing of the country to realise that practically a Native with an income of rupees 100 a year is in a better position than a European trader or mechanic in Europe with an income of £100 a year. I am sure that every one really acquainted with the Native habits and modes of life and requirements will agree with me that this is so.'

"It is not, therefore, on the ground that the License-tax falls heavily on the poor, that I now admit that it affects a very large class which ought to be exempted. The reason for exempting them is, that the numbers brought under taxation have been far larger than was anticipated, and experience shows that it is not politically wise or financially worth while to collect from a great multitude of people fees so small as those which are imposed on the smaller incomes by the present License-tax.

"The difficulty of preventing extortion and oppression on the part of the petty officials entrusted with the duty of collecting the tax has proved, in some parts of India, serious, and it is impossible to doubt that there has often been reason for the numerous complaints which have been made. Fully as this must be admitted, and greatly as it must be regretted, it would be a mistake and an injustice to suppose that such abuses have been universal; and as experience has been gained, there has been, I hope, everywhere, improvement in the manner in which the assessments and collections have been made. I see no reason to doubt that if the existing limit of liability to the License-tax were maintained, the Local Governments would everywhere succeed in removing all serious cause for complaint on such grounds as those of which I am now speaking. This is merely a question of good or bad administration. In some Provinces, we are assured already by the Local Governments that the tax is levied in so satisfactory a manner that no reason exists, in their opinion, for any large exemption of the smaller incomes. Thus, in Bombay, where there were at first many complaints of over-assessment and oppression, we are now informed that the collections are made without any trouble or complaint, and that all former difficulties have been removed. The Bombay Government does not think it necessary to exempt incomes of rupees 100 a year from liability to the tax. So also in the Panjáb. The Lieutenant-Governor has given a decided opinion that, so far as that Province is concerned, the only change that should be made in the minimum limit of liability is to raise it from rupees 100 to rupees 120.

'The reason,' it is stated, 'which Sir Robert Egerton has for this opinion is, that the Act is now fairly understood, and its provisions accepted by the people of this Province. The machinery is now in working order, and cases of oppression and hardship will become with each assessment more rare. Great care has already been taken in examining and amending the first assessments; and it is consequently, in His Honour's opinion, wiser to continue a tax which has been accepted and is working fairly well, than to make changes which may be theoretically right, but which, inasmuch as they are novel, will distract the minds of the people, and which, by diminishing the income derived from the License-tax, may necessitate the imposition of fresh and strange taxation. For these reasons, the Lieutenant-Governor would desire to maintain the present minimum with the slight alteration proposed by the Financial Commissioner.'

"When opinions of this kind are expressed by the Governor of Bombay and the Lieutenant-Governor of the Panjáb, Sir Richard Temple and Sir Robert Egerton, than whom there are certainly no higher or more competent authorities, I think that I may claim to have made good my assertion that, even in those Provinces where incomes of rupees 100 a year have been taxed, there is no foundation for the statements which have been made in some quarters that the result has been general and unjust oppression of the poor.

"Nevertheless, the Government of India has come to a decided conclusion that an alteration of the law is desirable, and I can explain the reasons for this conclusion in a few words.

"When the License Tax Acts were passed, it was left to the Local Governments to determine what should be the lowest limit of taxable income. The

only interference exercised by the Government of India was to prevent this limit being less than rupees 100, for some of the Local Governments would have gone lower. It was not then foreseen how disproportionately large would be the number of persons assessed in the lowest classes, and how comparatively small would be the financial return.

"The schedules attached to the various Local Acts differ so much that I cannot give strictly accurate statistics, but there is no doubt that more than a million persons whose incomes are between rupees 100 and rupees 250 a year are now liable to the tax, and that the amount which they pay does not exceed £240,000. The mere statement of this fact is sufficient. It cannot be right for the sake of raising so small a sum to impose direct taxation on so great a multitude of people. Although there has not been in any part of India any reason whatever for thinking that the tax has actually led to political discontent, or the smallest apprehension of anything of the kind occurring, it is nevertheless politically wise to amend the law.

"In regard to the amount which it would be desirable to fix as the lower limit of liability to the tax, every Government in India has been consulted. I have already referred to the opinions of the Governments of Bombay and of the Panjáb, and have said that they were disposed to make little or no alteration in the existing limit of rupees 100. The Government of the North-Western Provinces and Oudh thinks that rupees 240 would be a suitable amount; this is rupees 40 higher than the present minimum in those Provinces. In Bengal, as the Council is aware, the Lieutenant-Governor, with the approval of the Government of India, exempted, not long ago, all incomes between rupees 100 and rupees 250 from liability to the tax. This was done by executive order; the Act gave to the Lieutenant-Governor the necessary authority. Both Sir Ashley Eden and Sir Steuart Bayley, who is now acting as Lieutenant-Governor of Bengal, concur in thinking that rupees 250 may properly be adopted in future as the minimum. The Government of Madras has also accepted rupees 250.

"**The Government of India now proposes that rupees 250 shall be the minimum income liable to this form of taxation. It will be understood, from** what I have said, that in fixing this amount we are really giving greater relief to the poorer classes of traders than most of the Local Governments think necessary; but it is better in this matter to err on the side of liberality. We think also that it will be desirable to maintain the same limit of rupees 250 throughout India. When the tax was first imposed, it was urged that circumstances differed much in different Provinces, and that it was not certain that the same minimum limit of taxable income would everywhere be appropriate. There is undoubtedly truth in this, but it is very difficult in practice to arrive at satisfactory conclusions on such questions, and it appears best to have a uniform limit. There is no part of India in which it will be a hardship to oblige a trader with an income of rupees 250 to pay a fee of four rupees a year. As I have already stated, it is estimated that by the changes now proposed we shall exempt more than a million persons from taxation, and shall give up revenue to the amount of about £240,000.

"There are various other points in which the existing License Acts require amendment, but I need not now detain the Council with explanations of them, and I have to speak of other matters of importance.

"In the first place, I must explain why the apparently unusual course has been taken of introducing a Bill such as this at Simla. The explanation is simple. All the License Tax Acts, excepting that in force in Lower Bengal, require the assessments and collections to be made for the calendar year. The Collector makes his demand on the first January, and the whole of the tax must be paid into the treasury, under serious penalties for default, by the first February. It is, therefore, obvious that if important alterations are to be made in the existing law, they ought to be made before the first January. Much confusion and embarrassment would follow from any subsequent change unless we are prepared to leave the present system of taxation virtually unaltered for the greater part of another year. There is another reason which renders it highly desirable that the intentions of the Government in regard to the License-

tax should be made publicly known as soon as possible. If the Collectors are allowed to make their inquiries and prepare their lists and their assessments on the assumption that the law is to remain unaltered, they will have, later on, to do a great part of their work over again; and it is extremely important that they should know what is proposed as early as possible in the cold season when they can give personal attention to this part of their duties. The Government has this year been obliged, by obvious reasons connected with the affairs of Afghanistan, to remain longer in this part of India than has been usual; and if the introduction of the present measure were to be delayed until the Government reaches Calcutta, it would hardly be possible that it should become law, as I now hope it may do, by the end of December.

"I come now, my Lord, to another and very important part of my subject. It is a question which has, for some time past, been before the Government, and its consideration has been rendered the more necessary by the proposal to sacrifice £240,000 a year out of the sum now yielded by the License-tax.

"The reasons which originally led the Government to confine this tax to trades and dealings, and not to bring under it the professional and official classes, were, as I thought, fully explained by me at the time. My observations were, I suppose, misunderstood; at all events they have been widely misrepresented. It has been alleged that I asserted that traders generally benefit by famines, and that justice required that no officials should be taxed, and arguments have been gravely brought forward to show that this cannot be. No such absurd assertions were ever made by me. My statement was that when scarcity affects one part of India, the producers of grain, the dealers in grain, and other traders in parts of the country not so affected, make large profits; and that while the agricultural and trading classes are, on the one hand, those that require large measures of relief in a region suffering from extreme scarcity, so, on the other hand, these are the classes which are in a position to obtain large profits when their own Provinces are flourishing, and other Provinces are suffering. I said further that the less wealthy members of the professional and official classes, who depend on fixed incomes for their support, or on incomes little affected by competition, suffer from the pressure of high prices, not only when scarcity prevails in their own Provinces, but when it prevails elsewhere. The high prices which, under such circumstances, serve to enrich the producing and trading classes, entail (I said) suffering on the small officials and on those subsisting on wages the amount of which they are powerless to regulate. The general truth of all this cannot, I feel sure, be impugned, and I shall not waste the time of the Council in further repudiating ridiculous opinions which have been attributed to me, but which I certainly never expressed.

"Apart from that natural dislike which is everywhere felt to any new taxation, and from complaints as to the manner in which the License-tax has been assessed, the principal objection to it has been that it is partial, and does not go far enough. The commercial communities in the three Presidency-towns have submitted memorials praying for its extension to the official classes, and there has been, no doubt, a very general feeling, shared by the officials themselves, that they ought to bear their share of the new taxation. The arguments contained in the memorials to which I have referred, if their logical consequences had been accepted, would have led to the imposition of an Income-tax rather than to an extension of the License-tax; but the re-imposition of a general Income-tax was not thought desirable, and it was determined that the new taxation should be confined to certain classes of the community. Fresh taxation was imposed on landholders throughout the greater part of India; and traders were specially and unhesitatingly selected as constituting that class which bore the smallest share of the expenses of the State, compared with the great benefits it receives from our rule. It may be a fair subject for argument whether the line drawn by the Government of India, when it did not extend the tax beyond traders and landholders, and did not include the professional and official classes, was the best possible line; but it is altogether misleading to suggest, as has been done, that the official classes were alone excepted.

"It is perhaps not necessary to refer more to the past. But I may remark that in matters such as these, Governments cannot be guided by mere abstract ideas, and that, in the nature of the case, conflicting opinions have to be reconciled, and divergent interests to be considered. There has been no disguise that on this occasion advocates of an Income-tax were not wanting. As on many other occasions, a compromise was adopted, which, like all compromises, was open to criticism from one side or the other.

"The Government has never concealed from itself that there are practical inconveniences, as well as political evils, in not bringing the wealthier portion of the professional and salaried classes under taxation similar to that which has been placed on traders and, in the Bengal Presidency, on landholders; and now that we are proposing to modify that taxation, and to make a sacrifice of revenue, the re-consideration of the whole subject has (as I have already said) been forced upon us. Every Local Government in India has now concurred with the Supreme Government in the opinion that taxation similar in amount to that already borne by the wealthier classes of traders should be extended to the wealthier classes of officials, and that the License-tax should apply generally, as it already does in Calcutta, not only to trades but to professions. Although it is not proposed by the Bill which I am asking leave to introduce that any taxation shall be actually levied from any person until after the commencement of the next official year on the first April, 1880, it seemed plainly desirable not to delay the announcement which I have now made. It would not have been proper, when it became necessary to make important alterations in the License Tax Acts, as they affect traders, to leave the public under the impression, for several months to come, that the Government proposed to make no alteration in the law as it affected the official and professional classes. The proposal of the Government now is to deal with the whole subject in a single measure. It wishes, for the reasons which I have already explained, that this measure should be placed before the public as soon as possible, and that it should become law before the end of the year.

"I will postpone the observations which I shall have to make in some detail in explanation of the Bill which I am asking leave to introduce. I will now give a summary only of its more important provisions.

"In order to avoid minute inquisition into incomes, the existing License Tax Acts, as the Council is aware, divide the persons taxed into classes. The Bill maintains this system, with (as I shall notice presently) some modifications which are obviously required in the case of the higher grades. The classification is so arranged, that the average incidence of the tax shall always be as near as possible to one-and-a-half per cent. on estimated annual earnings. On the lowest class of all, that is, on incomes between rupees 250 and rupees 350, the average rate will be somewhat less. It is proposed to make no difference between the trading and professional classes; but separate provisions will be necessary for the taxation of the salaried classes, whether official or non-official. The rough process of classification, which is desirable in the case of traders and professional persons, whose exact incomes are unknown, would obviously be inexpedient and inconvenient in the case of the salaried classes. The amount of the actual salaries of all public servants is known, and those of the servants of companies and private persons can easily be ascertained. It is proposed, therefore, to assess the salaried classes by a percentage on their actual salaries. This was the plan adopted under the Certificate Act, No. IX of 1868, after the plan of taxing them by classes had first been tried under the License Act No. XXI of 1867. Following the precedents of those two Acts, it is proposed to exempt from liability to the tax the military servants of Government not in civil employment, whose pay and allowances do not exceed rupees 500 per mensem, or rupees 6,000 per annum; and for all other salaried persons, it is proposed, following the same precedents, to make rupees 100 per mensem, or rupees 1,200 per annum, the lower limit of taxable income. The rate of the tax will be nearly the same as the average rate assessed on traders, or one-and-a-half per cent.

"It is estimated that the extension of taxation to the official and professional classes, in the manner now proposed, will yield very nearly the same amount as that sacrificed by giving up the tax on the lower classes of traders, or about £240,000. From a merely financial point of view, the Bill will therefore, if it becomes law, have no appreciable effect upon our revenues. We shall gain no more than we lose, and the measure will only be one of re-adjustment of taxation. But we shall obtain somewhat greater equality in the incidence of taxation, and we shall remove, I hope, all grounds for the assertion (the justice of which, however, I am far from admitting) that we have placed undue burdens on the poor, and shewn undue favour to the rich. We shall transfer to about 35,000 persons, three-fifths of whom are more or less highly paid officials, the greater portion of the burden now borne by upwards of a million traders, who, if not actually poor, belong, at any rate, to the humbler classes of the community."

The Motion was put and agreed to.

The Hon'ble SIR JOHN STRACHEY introduced the Bill to impose a Tax on Trades and Professions. He said:—

"MY LORD,—It is not necessary that I should detain the Council much longer in explanation of this Bill, and I have already sufficiently stated the reasons which make the Government desirous that it should be introduced and published with no avoidable delay. The Bill, so far as the trading classes are concerned, follows in most respects the provisions of the existing License Tax Acts.

"It differs from them, however, in some important particulars.

"In the first place, this will be an Imperial measure, which will supersede all the Local License Tax Acts now in force. There will not, I think, be any difference in the opinion that under the circumstances this course will be the most convenient to adopt. The Bill, as I have already said, will apply to all persons exercising professions, and to persons in service, whether public or private, as well as to the commercial classes. For the latter class, *i. e.*, persons engaged in trade, the lowest income taxable will be Rs. 250 per annum.

"All incomes derived from business have been grouped, as under the present Acts, in classes, which have been so arranged that practically the average incidence of the tax upon each of these classes may be expected to be about 1½ per cent. There will thus be little or no change in regard to the greater number of persons who are now taxed and who will remain liable under the new measure. But, under the existing Acts, the highest fees that can be levied on the largest incomes vary from Rs. 200 in Bombay to Rs. 800 in Madras. The extension of taxation to other classes, in the manner that has been proposed, will obviously render it necessary to remove what would otherwise be an indefensible advantage in favour of the richer members of the trading classes. The schedule has therefore been so arranged that the richer traders will pay, like others, at the rate of about 1½ per cent. on their presumed incomes.

"In the assessment of incomes the system actually in force will be generally maintained. No inquisition will be made; the assessing officer will proceed, as under the existing Acts, upon the best information that is available to him, without making enquiries of the persons to be assessed.

"Persons, however, who object to their assessment may, after paying half of the sum assessed, demand that their objections should be heard, and may shew, if they wish, that their assessment has been erroneous. The orders passed on such objections have been made open to revision, in order to afford the means of remedy where the objections may not have received due consideration.

"As the sums payable under the proposed Act will, in some cases, be much larger than those leviable under the existing License Tax Acts, provision has been made for payment of the tax, whenever it exceeds Rs. 40, in two instalments. For the same reason, it has been provided that a person whose income ceases during the year of taxation may claim a proportionate abatement from the sum assessed upon his profits for the entire year.

"To remove doubts which may arise in the case of persons who are in the receipt of salaries, a definition has been introduced of the word 'pay.' In the case of persons receiving salaries, whether from the Government or from private employers, the tax will be levied at a fixed and uniform rate of 1½ per cent.

"Salaries of less than Rs. 100 per mensem or Rs. 1,200 per annum will not be liable to taxation. In this respect the precedents of the License Tax of 1867 and of the Certificate Tax of 1868 have been followed. Military officers

also and soldiers in receipt of allowances not exceeding Rs. 500 per mensem or Rs. 6,000 per annum have been exempted, as they were then; but it is not proposed to continue the same exemption to members of the Police, which has now become a purely civil force.

"Provision has been made, in the case of persons in private employ, for the collection of the tax through their employers.

"The Bill has been made applicable to the whole of British India, but power has been reserved to exempt such territories and classes of persons as cannot properly be brought under its operation.

"Such a class is the commercial class, or rather a portion of it, in the Central Provinces, who already pay the Pándharí tax. In several of the Scheduled Districts which are now exempt from the operation of the License-Tax it will, no doubt, be necessary to make similar exemptions under the new measure.

"There is, I think, only one other matter which need now be noticed.

"In the existing License Tax Acts, prominent attention was drawn, in the Preamble and in the body of the Acts, to the fact that these taxes were imposed with the object of effecting 'a permanent increase of the revenue, in order to provide means for defraying the public expenditure from time to time incurred, and to be incurred, for the relief and prevention of famine in British India.' These words have been omitted in the present Bill, and it is desirable that I should explain the reason.

"I do not now propose to enter into any discussion in regard to the measures taken by the Government nearly two years ago with the object of protecting the country against the financial liabilities involved by the occurrence from time to time of famine, and of providing to the utmost of its power the means of preventing and relieving these calamities. Nor shall I now consider how far the Government has been able to carry these objects into effect. The time is not distant when the proper opportunity for such discussions will arrive. Meanwhile, I have only a few words to say.

"I quite admit that the financial part of this subject was somewhat complicated, and that it was not very easy of comprehension to a person who had not given careful attention to it. The difficulty has been increased by the fact that, since the Government of India explained the policy which it hoped to carry out, that policy has been very seriously modified by the obligation, placed on us by the Secretary of State, of greatly reducing our expenditure on those productive public works the construction of which we had looked upon as the best safeguard against famine.

"I had supposed, my Lord, that, if there was one thing which had been made clearer than another in regard to the measures in question, it was this,—that, although it was sometimes convenient to talk of a Famine Insurance Fund (I believe, however, that I myself on no single occasion used the expression), the Government altogether repudiated the idea that it was desirable to constitute any separate fund from the produce of the new taxes for the purpose of meeting expenditure on Famine. I said in the plainest language that I could find, in the debate in this Council on the 9th February, 1878, that the creation of any separate fund would not only be useless but mischievous,—that it would disturb the adjustment of grants and accounts, and cause suspicion and trouble to all concerned. I will repeat the words which I used on that occasion:—

> 'What the Government desires is to establish a sense of the obligation under which it is placed in respect to the expenditure due to famine, which shall be felt in the same way as the obligation to provide proper Courts of Justice, Police, Education and so forth. For none of these objects has it ever entered into the mind of any one to suggest a special allocation of the revenue or a separate fund. Nor can any greater reason be found for a separate Famine Fund than for separate funds for any of those other objects which are obligatory on the Government.'

"The words that were inserted in the existing License Tax Acts and which I have quoted served undoubtedly to increase the misapprehension of these questions; and, although the policy of the Government remains unchanged, it is thought desirable to omit them.

"It has, my Lord, unhappily become the fashion of late to attribute to political opponents, not only ignorance and lack of wisdom, but the basest motives of deliberate dishonesty. The Government of India, or some of its Members, have had, in respect of this subject of famine-insurance, their full

share of this vile usage, degrading to those alone who practise it. To such people scorn and silence are the only fitting reply, and they will certainly receive no reply from me. They will doubtless find in the omission of all reference to famine in the preamble of this Bill fresh evidence of the intention of the Government to evade or repudiate the solemn obligations which it assumed.

"To honourable critics of another stamp and to the public I give the assurance that the Government proposes no change of policy. It undertook, for the first time nearly two years ago, the responsibility of making provision for the protection of the country against the financial consequences of famine. It has never, notwithstanding the new and unexpected difficulties which have supervened, swerved from the policy of which it then proclaimed the necessity, and it will continue, to the utmost of its power, to carry out that policy in the future."

The Hon'ble MR. BATTEN said:—"The Hon'ble Sir J. Strachey has in the course of his first speech mentioned the reasons for which it was thought justifiable to exempt the professional classes and officials from the taxation imposed by the Acts of 1878. I think there is much force in those reasons, but their force is certainly less in the case of the richer persons of those classes, who can well afford to bear their share in the burden which was then thrown exclusively on the commercial classes. I am, therefore, glad to find that the measure now proposed is designed to relieve the poorer traders and artizans at the expense of the more wealthy, professional, official and other salaried persons. I still think, however, that the reasons to which I have referred justify the exemption of officials and other salaried persons, who are in receipt of less than one hundred rupees a month, from taxation of this kind, although persons who derive their income from trades or handicrafts are subjected to the tax if their incomes are as low as two hundred and fifty rupees a year. The lower paid officials and other salaried persons are not only more hardly pressed by high prices in times of scarcity than are tradesmen and handicraftsmen, owing to the greater fixity of their incomes and the greater difficulty they have in protecting themselves by claiming increased salaries; but their standard of living and their consequent necessary expenditure is higher. This remark applies to all small-salaried persons, whether Natives or others; but it applies especially to the poorer European and Eurasian clerks. I do not think that any one will deny that this class on salaries between Rs. 20 and Rs. 100 a month is comparatively in more straitened circumstances than is the class of petty traders and artizans who earn an equivalent income. On these grounds, I think that the proposed minimum salary of one hundred rupees per mensem, for persons to be taxed under chapter III of the Bill, is fair and equitable. But I would go a step further and apply the same minimum to the poorer classes of professional persons whom it is now proposed to tax under chapter II. These poorer professional persons are very much in the same position as the poorer salaried persons, and it would be difficult in some cases to draw a line between them. They belong to the same stratum of society and live in much the same way. I would therefore ask that this point may be considered by the Council. The financial sacrifice from exempting professional persons whose income is less than rupees 1,200 per annum will be quite insignificant. I am aware that there may be some difficulty in defining this class, but I have no doubt that, with the help of the able Secretary in the Legislative Department, that difficulty can be surmounted. The idea is, that no person, whether salaried or professional, who was not subject to taxation under the Acts of 1878, shall be subjected to taxation under the measure now to be introduced, if his income is less than rupees 100 per mensem or rupees 1,200 per annum, and I have no doubt that words can be found to embody this idea.

"I am afraid that the commercial classes who have loudly demanded—I do not say unjustly demanded—that the taxation which they have been paying for the last two years shall be shared by Government officials and professional persons, will be somewhat disagreeably surprised to find that the inevitable and logical consequence of a compliance with their demand will be to raise very considerably the maximum taxes which they themselves will have to pay. The maximum tax is now, in Madras rupees 800; in Bengal rupees 500; and in

Bombay only rupees 200. Directly it is determined that officials shall be taxed by a percentage on their salaries—and any other mode of directly taxing them would, I submit, be almost absurd—it becomes impossible to maintain the maximum taxes on the commercial classes at the sums which I have mentioned.

"These taxes represent respectively one-and-a-half per cent. on monthly salaries of rupees 4,444, rupees 2,777 and rupees 1,111. Now, there are many officials receiving salaries higher than even the highest of these amounts, and consequently many officials who, if taxed at one-and-a-half per cent. on their salaries, will pay more than the maximum taxes now levied on the commercial classes. There can be no possible reason for taxing the highest paid officials at a less percentage than the lower paid, and there can be no possible reason why any officials should be taxed higher than equally wealthy gentlemen who derive their incomes from commerce.

"If your Lordship will permit me to make a personal illustration, I would ask if there is any reason why a company, firm or merchant, with an annual income of rupees 2,40,000, should be taxed less than the Viceroy, who draws an equivalent salary, and who will have to pay at one-and-a-half per cent. on that salary an annual tax of rupees 3,600? Hence, it seems to me that the taxation of officials involves, and rightly involves, higher taxation of the richest commercial classes, who have hitherto escaped with comparatively the lightest burden, especially in the Bombay Presidency. In that fortunate Presidency a merchant with an income, say, of rupees 50,000 a year—and I hope there are many such—has paid less than half per cent. as his tax, while his poorer brethren have been taxed at four times that rate.

"Besides extending taxation to official and professional incomes, the present Bill will remove these unjust inequalities in the taxation of the commercial classes, and I think on both grounds it deserves the support of this Council."

The Hon'ble SIR JOHN STRACHEY:—I should like to say a few words with reference to one suggestion made by the Hon'ble Mr. Batten that, with regard to the minimum amount of taxable income, the professional classes should be treated, not like the traders, but like the officials. I am sorry that we had not this suggestion before us when the Bill was framed; for I think it is one that well deserves consideration. In drafting the Bill, the precedents of the Certificate and License Tax Acts of 1867-68 were, in regard to this matter, simply followed; but I think Mr. Batten has given very cogent reasons in support of the view he has now stated to the Council. Financially, the question has no importance at all. The amount we should receive from the tax would, for all practical purposes, be much the same under both plans. Therefore, on merely financial grounds, there could be no objection to Mr. Batten's proposal. As this subject has not been before the Government, I am not now able to say anything definite regarding it; and until it has been further considered by the Government, I must reserve the final expression of my own opinion. I think, however, I may say without impropriety, that my own personal present feeling is decidedly in favour of the adoption of the suggestion which the Hon'ble Member has made.

His Excellency THE COMMANDER-IN-CHIEF:—There is one point that strikes me with reference to this License Tax. In some municipalities a professional tax is already levied, which is the same thing. It affects the income of all professional men exactly in the same way. Is it proposed by this Bill that a man should pay twice under those heads?

The Hon'ble MR. BATTEN:—Yes. He will pay both the municipal and the imperial tax.

The Hon'ble SIR JOHN STRACHEY:—There is no change made in that case in the existing law.

His Excellency THE COMMANDER-IN-CHIEF:—This is a matter which affects a certain number of military men who already protest against the municipal tax now imposed on them, as your Lordship is aware, in Madras. There is a great deal of feeling on the part of the military authorities in Madras with reference to the incidence of the professional tax as it stands now. Sir Neville

Chamberlain, for instance, is bound to pay for a license to draw his sword in Madras—to exercise his profession—and he positively cannot carry out the duties of the commission imposed upon him by the Queen without paying this tax.

In various other stations—in Bellary, for instance—I understand that they even go the length of taxing the battery-horses belonging to Government under the Municipal Act. There is a very strong feeling with regard to this tax amongst the officers serving in Madras, and if the proposed new tax is now placed on the top of that, naturally the irritation will be doubled.

There are also certain officers who pay British income-tax on part of their pay. Now, that is certainly a first charge on the pay they receive, and I should like to know whether an officer who draws an income of, say, rupees 2,000 or rupees 6,000, and has to pay a certain sum on part of that income as British income-tax, is not entitled to rate himself in the next lower number in the schedule as an abatement.

The Hon'ble MR. BATTEN:—He does not come under the schedule at all. The tax on officials will be 1½ per cent. on their salaries, and the schedule does not apply to them.

His Excellency THE COMMANDER-IN-CHIEF:—But the principle is the same; and what I should like to know is, whether an officer is entitled to an abatement of taxation on the sum on which he has already been taxed under the head of income-tax elsewhere.

His Excellency THE PRESIDENT:—I may mention, with reference to one portion of the remarks of my hon'ble friend Sir Frederick Haines, that the Government of India have at present in preparation a Bill for the purpose of prohibiting the levy of any municipal tax upon military officers without the previous sanction of the Governor General in Council.

His Excellency THE COMMANDER-IN-CHIEF:—That of course meets every objection that I could possibly urge on that point.

The Hon'ble SIR JOHN STRACHEY moved that the Bill be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

TOWN-DUTIES AND TOLLS BILL.

The Hon'ble SIR JOHN STRACHEY moved for leave to introduce a Bill to regulate the levy of town-duties and tolls in municipalities. He said—"In the Financial Statement for the present year, 1879-80, it was stated as follows:—

"'In connection with the subject of customs-duties, it may be mentioned, here, that the Government of India has for many years past had under consideration the necessity of imposing more complete checks on the system by which through a large part of India octroi-duties are levied for municipal purposes. The Government of India has emphatically condemned the imposition of local taxes on articles which have been either subjected to, or relieved from, imperial taxation, and has insisted that the duties actually levied shall, in all cases, fall solely upon articles locally consumed, and shall not be allowed to become taxes on through traffic, or to affect injuriously the general trade of the country.

"'Although much has been done in this respect towards the enforcement of appropriate rules, continued attention will be given to the subject, so that there may be no danger of finding that the principles by which the Government of India is guided in regard to its commercial legislation have been set aside by the local authorities, and that the efforts taken to free the trade of the country from impolitic restrictions have not thus been frustrated."

"My Lord, it is in fulfilment of the pledge, thus publicly given some months ago, that my present motion is made. The principles by which the levy of octroi-duties should be regulated were laid down by the Government of India so far back as 1868. I venture to say that those principles were unimpeachably correct, and their accuracy has never, in my opinion, been successfully impugned.

"'In the Resolution issued by the Government of India in 1868, it was stated as follows:—

"'Such duties should be restricted to articles actually consumed in the towns, and should not be imposed upon articles of general commerce, or interfere with the natural course of transit-trade. The Government of India has reason to believe that these sound principles, the truth of which has been established by the prolonged experience of those countries of Europe in which octroi-duties form commonly a source of municipal revenue, have been frequently lost sight of, and that to meet the burden of an annually increasing expenditure upon police, education or sanitary improvements, a widespread system of taxation has been introduced, injurious to interests on which the burden in a great measure falls, and standing in the way of the proper development of the commerce of the country. It is to little purpose that the Imperial Government reduces or abolishes customs-duties in the interests of trade, if municipalities are permitted to levy duties on articles of commerce passing through their limits. In all parts of India municipal taxation is largely on the increase, and there is a growing tendency to overlook, for the sake of small local improvements, the real injury that is being inflicted upon important general interests. The Government of India does not consider it necessary to recapitulate, here, any of the standard arguments against transit-duties. Such duties have long since been condemned by universally accepted maxims of policy."

"The Government at the same time, in 1868, laid down the principles by which the levy of octroi-duties ought to be regulated. Those principles were that town-duties on articles of consumption should fall entirely on the population of the town for the benefit of which such taxation was imposed, and that a jealous guard should be kept lest octroi should extend to any article belonging to the transit or general trade of the country. The articles on which these duties might be imposed, and on which they might not be imposed, were enumerated. The first class of articles on which octroi-duties might, subject to certain restrictions, be levied, were articles of food or drink; animals for slaughter; articles used for fuel, for lighting or for washing; articles used in the construction of buildings; drugs, gums, spices, perfumes and tobacco.

"The second class of articles, on which the levy of octroi-duties was prohibited, comprised articles liable already to customs-duty and imported into India by sea; salt, opium and liquors, and drugs liable to excise-duty. The articles were so chosen that municipal taxation should not encroach on imperial taxation, and that, in the words already quoted, important general interests should not be overlooked for the sake of small local improvements.

"Provisions were at the same time made regarding the refund of duties when goods were re-exported from towns; and for providing bonded warehouses, or other appliances for the storage of goods in transit, and for other purposes.

"These orders of the Government of India were received, I may say, with general disapproval and general opposition, by almost all local authorities wherever octroi-duties were levied; for this plain reason, that they had the effect of largely, in some cases, curtailing the existing municipal income. In consequence of the pressure thus brought upon the Government by the local authorities, some relaxation of those orders—I myself think unfortunately—was sanctioned by the Government of India.

"In 1871, it was allowed that the following classes of commodities might be added to the list of dutiable goods:—piece-goods and other textile fabrics, and metals and articles of metal, provided that the duty should not exceed one-and-a-half per cent. *ad valorem*. But, although I think these relaxations were to be regretted, nevertheless, in the main, the orders of 1868 were maintained in force; and if they had been properly carried out, they would have been quite sufficient to prevent any great abuses arising.

"Now, for the last ten years, the Government of India has been attempting to get these orders executed. Things are doubtless very much better than they were; but, although it may seem a confession of weakness on the part of the Government of India, still the fact must be admitted that its success has been very indifferent in securing the execution of these orders. The fact is, that it is difficult even for a Government like the Government of India to get its orders carried out when those orders are regarded by the local authorities as opposed to their local interests. In a circular issued by the Government of India, in the Home Department, on this subject, only about two years ago, it was said, with reference to the orders of 1868—

"'The Government of India are glad to acknowledge that for some time better arrangements were made, and that a general desire was exhibited, to comply with the instructions issued; but of late years, owing either to the relaxation of vigilance on the part of Local Governments and Administrations, or to other causes, the Government of India have seen with concern that in isolated places octroi has again exceeded its proper limits, and is at the present moment, in different parts of the country, acting as a tax on through traffic, and affecting injuriously the general trade of the country."

"I will give a few illustrations of the things that are now liable to occur. I will first refer to representations which have been made from time to time by the Bombay Chamber of Commerce—a body which has always taken a most enlightened and excellent view, in my opinion, of this whole question, and which has repeatedly pressed on the Government (I wish their representations had had the success they deserved)the necessity for reform.

"In an address presented to your Excellency by the Bombay Chamber of Commerce in December 1876, the Chamber made the following remarks, which, with your Excellency's permission, I will read to the Council:—

"'In the year 1875, the Chamber instituted an enquiry into the nature and extent of the transit and town-duties levied by municipalities in the interior of this Presidency. The results of this enquiry induced the Chamber to urge upon His Excellency the Governor of Bombay in Council the expediency of abolishing, in all municipalities of the Presidency, all transit-duties and all town-duties having the character of transit-duties, and of confining town-duties, in accordance with the principles of municipal taxation defined by the Government of India in its Resolution dated 15th November, 1868, to a few articles of local consumption, such as ghee, firewood, fruit, vegetables, fowls, eggs and animals for slaughter, which did not enter into the general trade of the country. The Chamber, in its representation to the Government of Bombay, showed that transit-duties in their naked form were levied in Karáchí, Broach and Surát; that in nearly every municipality in the mufassal, the town-duties levied were converted into transit-duties by the stringent and illiberal nature of the rules under which refunds were granted; and that the duties levied by certain municipalities on certain articles were very high. In Karáchí, for instance, the town-duty on wheat was 2½ to 3 per cent., and on wool, 1 to 1½ per cent., of the value; in Surát, the town-duty on yarn was about 3 to 3½ per cent., and on copper 5 per cent.—in either case, about the same as the imperial customs-duty; while in Ahmadábád the town-duty on yarn was no less than 6½ per cent., or nearly twice the imperial customs-duty.

"'The town-duty levied on yarn imported into Ahmadábád is particularly objectionable. It is, we believe, quite understood to be a protective duty in favour of the two mills in that town against other yarn, whether of English or of Indian manufacture; and constituted as the mufassal-municipalities of this Presidency are, it illustrates the necessity of the strictest vigilance on the part of the Government with respect to the rate and incidence of every tax imposed by these municipalities. The town-duty levied on yarn brought into Surát is open to similar objections, and we have mentioned a few instances in which the town-duties in other places are much too high. We earnestly hope that your Lordship will order an immediate revision of all the taxes imposed by the municipalities of this Presidency to be made, abolishing all transit-duties, and all town-duties having the character of transit-duties, or which have a protective effect, and reducing those which are high, or press heavily on any article."

"Again, on the 14th March, 1878, the Bombay Chamber of Commerce addressed the Government. It said:—

"'It is, we believe, universally accepted that the great principles of an octroi-duty are that it should be small and that it should never be allowed to operate as a transit-duty. Yet in numerous instances, whether the articles have already borne customs-duty or not, the taxes levied, under the name of octroi, by district-municipalities, are excessive, while the refusal to grant refunds when the articles are re-exported, or the limitations or restrictions imposed on the granting of refunds, have the effect of converting the town-duties paid into transit-duties."

"The Chamber then gave a list of cases in illustration of that statement, and they added:—

"'Numerous other instances could be furnished, but the Chamber has reason to believe that in almost every city and town-municipality throughout the Presidency, excessive duties are levied, and on articles on which no municipality should have any right to levy a duty. It has, however, been specially brought to the Chamber's notice, that at Barsee very heavy taxes have been levied on machinery erected there, and that at Veerumgaum a duty of 4 per cent. was levied on hoop-iron sent there for the purpose of binding bales of cotton, and no refund was allowed. At Wudwan no duties appear to be charged on articles entering the town, but iron or similar articles cannot come out of it without being taxed at the rate of about 10 per cent.: a duty of Rs. 600 would be levied on the removal of an old cotton-press. Other impositions, and of a similar character, are, it has come to the knowledge of the Chamber, levied in many parts of the Presidency."

"I have quoted these passages only as illustrations of what is liable to occur at the present time, and of things that, at any rate, were actually occurring only a short time ago. I do not say that in these particular instances the

state of things thus described now prevails. The Government of Bombay, since Sir Richard Temple has been in Bombay, has been paying great attention to this subject, both in that Presidency and in Sindh, and I believe that things are much better than they were. But although, as I say, I only give these as illustrations, it is impossible to doubt that a more or less similar state of things still exists in many places where octroi-duties are levied. One of the most preposterous illustrations of this system was to be found not long ago at Karáchí. Karáchí, as we all know, has been—and we hope it will be a great deal more in the future—one of the chief ports for the export to Europe of Indian produce. One of the great staples of the country, which has its outlet towards the sea at Karáchí, is wheat; and with the object of removing all obstacles to the growth of this most important trade, the duty on the export of wheat was everywhere abolished by the Government of India. Two years ago, it was found by the Government of India that one of the very largest sources of municipal revenue at Karáchí was an octroi-duty levied at the rate of from 2½ to 3 per cent. on all the wheat brought down from the Panjáb and Sindh for export to Europe. I think no terms can be too strong in reprobation of such a state of things. It has now happily ceased; a better system has been introduced in spite of the strong protests of the municipality of Karáchí, which naturally liked very much having its local wants supplied at the expense of other people. This is, of course, an extreme case, and I do not mean to say that such cases are common; but, nevertheless, it is an illustration of what has been going on.

"Now, if such things be allowed, it is really useless for the Government of India to attempt to establish proper principles of commercial legislation, and it may save itself the trouble of trying to reform its customs-tariff; for when we have taken off duties and carried out the principles of free trade, at a serious loss perhaps to the Imperial revenues, traders and manufacturers may find that, after all, they are no better off than before, and that heavier burdens than those from which they have been relieved have been imposed or are maintained by local municipalities for local purposes.

"We are often told that the great merit of taxation of this kind is that it is popular; that the people have long been familiar with it; and that it is inexpedient to force municipalities to substitute unpopular taxation for imposts that are not practically felt by the people. Now, up to a certain point, this is perfectly true. The Government of India has no desire to embark in any general crusade against octroi-duties. It has not objected to octroi-duties when they are properly managed. Going back to the principles laid down in 1868 by the Government of India, from which, in regard to this matter, there has since been no departure, it was said that—

"'If these principles be strictly acted upon, and the duties be moderate in amount, the Governor General in Council is of opinion that there is in many parts of India nothing objectionable in this system of taxation for local purposes. In wealthy communities like those of Europe it may be admitted that the balance of argument is in favour of raising municipal revenues by direct taxation only, and leaving the local trade entirely free. But in so poor a country as India, it will, in the judgment of the Governor General in Council, be more commonly the best course to combine direct with indirect taxation; for by this means alone can a sufficiently broad base be secured for raising a sufficient income without undue pressure on individuals. So long as octroi-duties on grain and other articles of consumption are kept at a moderate rate, they do not injuriously affect small retail-transactions with which the poorer classes are mainly concerned. That such duties are commonly far more popular in India than any direct taxation is a strong argument in their favour, and the prejudice against them, founded on the common practice of England, should not be allowed to prevent their introduction under suitable limitations where there is reason to think that the general feeling would be to prefer them to other forms of taxation."

"The Government of India still holds this view. It makes no objection to octroi-duties so long as they are properly regulated, but it refuses to allow them to become taxes on the general trade of the country. With reference to the question of their popularity, I may add that it often happens that the greater the popularity of those taxes, the more objectionable they are, for often in practice this popularity—as in the case I have just given of Karáchí—only means that the people of the town have managed to provide for their own local wants without placing any burden on themselves; that they have transferred their own proper burdens to the shoulders of other people, and thus the popularity of

the tax leads sometimes to its being grossly abused. The Government of India having, as I have said, not succeeded in its efforts to reform all this by executive order, has come to the conclusion that the only certain remedy is to be found in legislation, which will place on all local authorities obligations impossible to be disregarded; which will prevent these duties operating as transit-duties or interfering with the general interests of trade, and which will guard against collision with imperial taxation or with the general principles of our commercial policy.

"The main features of the Bill which I am asking for leave to introduce will be as follows. It will prohibit the levy under any circumstances of any duty upon any article not intended for actual consumption within the limits of the municipality in which the duties are levied.

"The articles which may be taxed, and which may not be taxed, will be enumerated. They will be generally those on which taxation was authorized or prohibited in 1868, by the orders to which I have already referred. The Bill will contain provisions for securing, when necessary, the establishment of proper bonded warehouses and for securing that all due facilities are given for refunds.

"The farming of duties to contractors will be prohibited. The Bill will contain provisions by which it is hoped that the improper levy of duties on articles of through trade or on anything not actually consumed in the town will be effectually prevented, and there will be provisions regulating the rates at which the duties may be levied.

"Besides dealing with this matter of octroi-duties the Bill will define the conditions under which tolls may be levied in municipalities, for this also has been found by experience to be very necessary. The general principle will be affirmed that tolls may be levied only for the purpose of defraying the cost of construction of a particular work, or for its maintenance. If the Bill be introduced, it will at once be sent to all Local Governments, Chambers of Commerce and other local authorities, for their opinion.

"The Government does not disguise from itself the fact that a measure of this kind may often have serious effects in reducing existing municipal revenues, and the manner in which, in cases where the expenditure cannot be reduced, loss of income of this kind is to be made good, will require careful consideration by the Local Governments and the municipal authorities. The Government of India desires to give ample time for such consideration, and it will have no wish to force on with undue haste changes which it knows it may often be difficult to make in the existing system of municipal taxation. It will treat with care and liberality all representations that may be made on this subject; but the Government desires that it should everywhere be distinctly understood that it will not any longer tolerate the neglect of principles essential to the interests of the general commerce of the country."

The Motion was put and agreed to.

GLANDERS AND FARCY BILL.

The Hon'ble MR. STOKES introduced the Bill for the better prevention of Glanders and Farcy among Horses. He said that the Bill was of the shortest and simplest character, but would not on that account, he hoped, be the less effective. It enabled the Local Government to appoint Inspectors, who would be public servants within the meaning of the Penal Code, and would therefore have the powers and be subject to the liabilities conferred and imposed on such persons by that Code. These Inspectors would be authorized to search for and to seize horses which they had reason to believe to be diseased, and on the certificate of a duly appointed veterinary surgeon, who would examine the animals, to destroy any horses affected with glanders or farcy. The owners or persons in charge of diseased horses would be bound to give immediate notice of the disease either to the Inspector or to some officer of Police. The Bill did not—like the corresponding English enactment—expressly provide that the officer of Police, to whom such notice was given, should communicate with the Inspector; but such a provision was unnecessary, as the Executive Government could, and doubtless would, give the necessary order. The buildings or other places in which diseased horses might have been kept were to be disin-

fected, and their internal fittings destroyed. There was a prohibition in the Bill against removal, without license, of a horse which had been with a diseased horse, and there were provisions regarding vexatious entries, searches and seizures. The Local Government was empowered to make rules for regulating entries and searches by the Inspectors, for the destruction of horses certified to be destroyed, for the disposal of their carcasses, and for the disinfecting of buildings and places in which diseased horses had been.

That was the nature of the Bill, and he thought such a measure could hardly be simpler. He would now refer to another matter which was mentioned by his hon'ble and gallant friends, the Commander-in-Chief and Sir Edwin Johnson, as to the propriety of including in the present Bill the so-called Ludhiána disease. On that point, he had said that he did not know what the Ludhiána disease was, and he had objected to legislating about it until inquiry had shown the necessity for doing so. Since the last meeting of Council, however, inquiries had been made, and information had been received on the subject from probably the most competent authority in India on such a matter—Mr. Griffith Evans—at present acting for the principal Veterinary Surgeon of the Army.

Mr. Evans said that the Ludhiána disease was not to be placed in the same category as glanders, except that they were both classed among the specific diseases; that was, diseases due to a specific virus. The virus, however, was different in the two cases. Furthermore, he said, that the history of the Ludhiána disease was entirely against the idea of its being infectious or contagious in the common acceptation of those terms; but that it was readily communicated by inoculation For instance, Mr. Evans said that less than a drop of the blood of a diseased animal, if introduced into the circulation of another animal, would communicate the disease. Flies, he said, had been known to communicate the disease in that way; but it was difficult to communicate the disease except through some opening in the circulation. Mr. Evans had further informed the Secretary in the Military Department, Colonel Allen Johnson, that the cause of this Ludhiána disease was foul, bad stabling with unremoved putrid soil, and the only precaution to be taken before death was segregation. He further said that the animals affected were not dangerous in life, the virus being in the blood. They should not therefore be killed. When, however, they died, they should, according to Mr. Evans, be buried and cut up when in the earth, in order to prevent *doms* and outcastes from exhuming the bodies. It was clear, MR. STOKES thought, that if there was to be legislation respecting this Ludhiána disease, it might properly be by a separate Bill. Considering the great urgency with which, in view of the present state of affairs on the frontier, the present measure was required, he would now ask His Excellency the President to suspend the Rules for the conduct of Business.

The Hon'ble MR. STOKES applied to the President to suspend the Rules for the Conduct of Business.

His Excellency THE PRESIDENT declared the Rules suspended.

The Hon'ble MR. STOKES then moved that the Bill be taken into consideration.

The Hon'ble SIR EDWIN JOHNSON said that, as the question of dealing with the Ludhiána disease in the present Bill had been raised by him, it was scarcely necessary for him to state, in view of the inquiry instituted since the last meeting of the Council and the result of which had been read to them by his hon'ble friend Mr. Stokes, that he entirely concurred in the omission from the present Bill of any legislation in regard to the disease in question.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill be passed.

The Motion was put and agreed to.

BURMA SURVEY BILL.

The Hon'ble MR. RIVERS THOMPSON moved for leave to introduce a Bill to provide for the survey and demarcation of land in British Burma. He said that

it would be in the recollection of the Council that, when he had the honour to introduce the Bill for the improvement of the rural Police in British Burma, he made allusion to the intention, which was then contemplated, of introducing a cadastral survey into the Province. As the Rural Police Bill depended partly on the increase of the rate at which the local cesses were raised, and those cesses were based upon the land-revenue, the reference to the cadastral survey was in connection with the arrangements in that Province for the better improvement of the land and the adjustment of the land-revenue. When he spoke of an intention to introduce the cadastral survey into Burma, he should more properly have expressed himself if he had said that last cold season such a measure had been already tentatively introduced into the Province; since then much experience had been gained and changes had been made in the principles upon which the survey was to be conducted, and it was now settled that it should not be so limited in its operation, but should be directed to much more detailed work, and to a regular professional field-survey. Such a work was now in hand by the two survey-parties employed in the Rangoon and Bassein districts, and so far as it had gone, it had been attended with the most satisfactory results. He (MR. THOMPSON) thought that it was impossible to overrate the importance or value of such work, either for geographical or administrative purposes, and especially with reference to the proper settlement of land, and the assessment of the land-revenue. With regard, however, to the deputation of the survey-parties to the Province, it was found necessary for the proper conduct of operations that power should be taken under the legislature to enable those officers to carry on many of the duties connected with the cadastral survey—such as the right of entering upon land; the procuring of witnesses and other parties interested in the survey; the clearing of obstructions in the execution of the work; giving compensation for such clearances; the settlement of boundary-disputes, and the procedure, if necessary, in appeal from such decisions; and, finally, and more important of all, the erection of permanent boundary-marks. The Bill would contain provisions for giving legal powers with regard to all those matters. The necessity for such a law had been recognized in all places where surveys on a large scale had been introduced, and it was especially necessary in Burma, where such a difficult operation as the conduct of a survey was entirely a new thing; where boundaries were very imperfectly defined, and the people of the country, and the district-officers who had to deal with the results of the survey, had no experience of the kind to guide them. The necessity, therefore, for legislation in this direction was obvious, and if permission was given to introduce the Bill, he would take the opportunity, at a later stage, of explaining more fully the provisions of the measure.

The Motion was put and agreed to.

FOREIGN JURISDICTION AND EXTRADITION BILL.

The Hon'ble MR. STOKES moved that the Report of the Select Committee on the Bill to amend the Foreign Jurisdiction and Extradition Act, 1872, be taken into consideration. He said that, in accordance with the suggestion of the Bengal Government and in order to save trouble to those who had to work the law, the Committee recommended that the Act of 1872 should be repealed and re-enacted with the new sections incorporated in it.

In drafting the Consolidation Bill, the only substantial alteration we had made consisted in the addition of sections 206, 208 and 224 of the Penal Code to the schedule of extradition-offences. Those sections dealt with (section 206) the fraudulent removal or concealment of property to prevent its seizure as a forfeiture or in execution of a decree; (section 208) fraudulently suffering a decree for sum not due; and (section 224) resistance or obstruction by a person to his lawful apprehension.

We had introduced a definition of "European British subject," a phrase which, if left undefined, was apt to give rise to difficulties; and we had got rid of the phrase "Native State," which was defined and used in a peculiar sense in Act XI of 1872.

In making this latter amendment, we were well aware that, from a logical point of view, the mode in which the phrase "Native State" was defined and used in Act XI of 1872, might not be open to exception; but the extension given to the meaning of the words, going as it did to include as "Native States" all countries in Europe,—even England—was so very wide and arbitrary as to have, in a recent case of some importance, which came before the High Court at Allahabad, given rise to a question as to whether it was really intended by the legislature that Cyprus should be treated as a "Native State." This being so, and seeing that, as the phrase occurred only twice in the Act, little would be gained in point of brevity by retaining it, the Committee had dispensed with it altogether, making such alterations in the sections (8 and 9) in which it occurred as its omission necessitated.

Lastly, we had, with a view to giving effect to the twentieth article of the Treaty recently concluded with Portugal, added a section to provide for the execution in British India of commissions to take evidence issued by criminal Courts in foreign territories. A similar provision was contained in the English Extradition Act, 1870, section 24. The section would not of course apply in the case of any criminal matter of a political character.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill as amended be passed.

The Motion was put and agreed to.

FACTORIES BILL.

The Hon'ble MR. COLVIN moved that the Hon'ble Mr. Batten be added to the Select Committee on the Bill to regulate labour in Factories.

The Motion was put and agreed to.

The Council adjourned *sine die*.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 16th December 1879.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 16th DECEMBER 1879.

GENERAL REMARKS.—Slight rain fell during the week in Madras; and also in parts of Bengal, doing much good in Cuttack. The outturn of the autumn harvest is generally good, and the spring crops are promising, but require rain in the Punjab. The general health continues to improve.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Dec. 13th)	...	*Ragi* 26·96; harvest of early dry crops; sowing of second crop paddy; standing crops in good condition.
Kurnool („ „)	...	*Ragi* 27·67; paddy being harvested; standing crops withering in 1 taluk; blight in 2 taluks; prices stationary; pasture and water sufficient.
Ganjam („ „)	1·08 (average of 10 stations).	*Ragi* 29·15.
Kistna („ „)	...	*Ragi* 25·35; later dry crops being sown; standing crops generally fair; 36 inches water over anicut
Chingleput (Madras) („ „)	...	*Ragi* 23·11; standing crops doing well; planting, sowing, and transplanting in 3 taluks; in parts of all taluks except one crops injured by insects; harvest outturn ½ to ¾; pasturage abundant.
Coimbatore („ „)	...	*Ragi* 25·88; crops withering in parts of 6 taluks; harvest of paddy and some dry crops in 8 taluks; outturn, paddy ½ to full, dry crops ¼ to full.
Tanjore („ „)	·37 (average of 3 stations).	*Ragi* 26·19; crops good, except in 6 taluks; harvest of paddy, *varagu*, and *ragi*, outturn ¼ to full.
Madura („ „)	2·18 (average of 5 stations).	*Ragi* 24·07.
Malabar („ „)	·32 in 1 station.	*Ragi* 19·76; prices stationary; second crop progressing.
Travancore („ „)	·84	*General Remarks.*—General prospects good.
Bombay— (Dec. 17th)		
Kurrachee ...	Total rainfall from 1st January in Kurrachee 2·02; Kotri 2·58; Mánjhand 2·51.	River very low at Kotri, on 14th 2 feet 10 inches, last year on same date 5 feet 2 inches; crops in Johe damaged by frost; rice being harvested; extensive *rabi* sowing, wheat in Sehwan; locusts about Jerruck and Kohistan, no damage.
Hyderabad ...	...	Rice crops in Guni injured by *ruhra*, a minute insect; locusts still flying about in northern talukas.
Ahmedabad ...	...	*Rabi* sowing progressing; weather cold; fever continues.
Baroda ...	...	Fever abating but mortality therefrom still considerable; cotton good; *rabi* sowings still continue.
Surat ...	...	Crops generally healthy; fever abating.
Násik ...	...	Crops slightly injured by frost in 2 talukas.
Colaba (Bombay) ...	...	Average abnormal temperature 5 degrees cool and air dry, except from 13th to 15th, when the average abnormal temperature was 2 degrees cool and the air less dry; abnormal wind northerly.
Poona (Dec. 14th)	...	Prices of *bajri* and *jowari* falling.
Ahmednagar ...	...	Crops in inferior soil withering; injury by rats in Kopargaon.
Sholapore ...	Slight rain.	Weather cloudy and cold; prospects unchanged; public health good.
Dharwar ...	...	Reaping of early crop completed; slight fever generally prevalent.
Kánara ...	...	Sowing of second crop on coast; cholera in Honore, 2 deaths.
Rajkot ...	...	Weather cold; *rabi* promising; health good.
		General Remarks.—*Rabi* sowings progressing and crop prospects generally good; fever in Gujrat; slight frost in Sind and Násik.
Bengal—(Dec. 16th)		
Chittagong ...	1·01	Weather cloudy; harvesting continues; standing paddy slightly damaged; cholera still in cyclone tracts.
Dacca ...	0·90	Prospects of crops good; public health good.
24-Pergunnahs (Alipore)	0·52	Prospects of *amun* and winter crops fair, but will be affected by late rain; *amun* harvesting commenced; ordinary fever in some places.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Moorshedabad ...	0·19	*Haimanti* paddy being harvested; prospects of *rabi* crops good; fever taken almost epidemic form in thana Burwa; isolated cases also reported from other thanas; cholera cases in thana Bharatpore; small-pox amongst cattle still reported from Hariharpara Police Station.
Rajshahye ...	0·18	Cutting of *dhan* fast going on; sowing of spring crops being vigorously pushed on and prospects good; a few isolated cases of fever and a few deaths from cholera in Nattore Sub-division; general health of people good.
Burdwan ...	A very slight drizzling shower on 10th	Rice harvest a good average; spring crops most promising; health good.
Rungpore ...	*Nil*	Weather cool; prospects of crops good; fevers still prevalent.
Bhágalpur ...	*Nil*	Prospects of crops and public health good.
Purneah ...	*Nil*	*Aghani* still being cut, estimated outturn about 14 annas; *rabi* sowing in progress; cholera abating; some cases of cattle disease.
Patna ...	*Nil*	Prospects favourable.
Durbhanga ...	*Nil*	*Aghani* harvest in progress; *rabi* continues promising; prices falling; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; cloudy; a good shower will do much good to *rabi* crops and facilitate ploughing of lands; health good.
Cuttack ...	1·54	Rice being harvested; *rabi* progressing favourably; fever and small-pox prevalent.
		General Remarks.— Slight rain in many districts on 10th; it has done much good in Cuttack, where it was needed, but has affected both *amun* and winter crops in 24-Pergunnahs, and slightly damaged *amun* in Chittagong; reaping of *amun* going on rapidly; outturn on the whole will be very fair; prospects of *rabi* crops reported on favourably; prices now much easier; public health on the whole fair, although fever, cholera, and small-pox still reported in some places; on the whole general outlook of province satisfactory.
N.-W. Provinces and Oudh—		
Benares (Dec. 16th)	...	Prospects continue favourable; fever abating.
Allahabad („ „)	...	Weather fine; no signs of rain; *kharif* harvested; *rabi* strong and healthy; irrigation operations in progress; fever rapidly dying out; *wheat* 13¼, coarse *chawal* 19¼, unhusked *dhan* 36⅛ seers.
Gorakhpur („ 15th)	*Nil*	Weather seasonable; *rabi* prospects good; *sugarcane* cutting commenced; crop below average; fever much diminished.
Jhánsi („ 17th)	...	*Rabi* fair; prices stationary.
Agra („ 16th)	...	*Rabi* crops progressing well; weather seasonable; health improving.
Bareilly („ 17th)	...	Weather cold; health good.
Meerut („ „)	...	Cold continues; health improving; prices stationary.
Kumaun („ 16th)	...	Weather fine.
Lucknow („ 17th)	...	Prospects good; health improving.
Partabgarh („ 15th)	*Nil*	Prospects good; irrigation of *rabi* crops is in full progress.
Sitapur („ 17th)	...	Weather fine; health better; *rabi* promising.
Fyzabad („ „)	*Nil.*	
		General Remarks.—Health improving; weather fine; *rabi* crops promising.
Punjab—(Dec. 16th)		
Delhi ...	...	Slight rise in prices of food grains; health returns more favourable.
Hissar ...	...	*Rabi* prospects goood; rain wanted; prices fluctuating; health improving.
Umballa ...	...	*Rabi* promising but rain wanted; health fair.
Jullundur ...	...	Crops require rain; prices steady; health good.
Lahore ...	...	Crop prospects good; those in northern part of district very promising; health good.
Ferozepore ...	...	Agricultural prospects fair; prices steady.
Siálkot ...	...	Agricultural prospects fair; rain wanted.
Ráwalpindi ...	...	Crops require rain; health improving.
Pesháwar ...	...	Standing crops suffering from frost; prices of food grains slightly lower; rain wanted.
Mooltan ...	...	*Rabi* crops improving; prices have risen.
Dera Ismail Khan ...	...	Prospects fair; health good.
		General Remarks.—No rain during the week, but prospects generally good.
Central Provinces—		
Nágpur (Dec. 17th)	...	Cold; *kharif* injured by cold; *rabi* good.
Jubbulpore ...	...	Cloudy; prospects good; *cotton* and *tur* damaged by frost; prices easier.
Saugor	...	Cloudy; *rabi* good; prices stationary; health good.
Seoni	...	Cloudy; cotton-picking continues; *rabi* good.
Hoshangabad ...	...	Cold; *jowar* and *til* harvesting; prices falling.
Raipur (Dec. 13th)	...	Clear; *rabi* prospects favourable; cattle disease continues; prices stationary.
Sambalpur („ 12th)	...	Clear; *kharif* harvest almost completed; *cotton* below average; prices stationary; health good.
		General Remarks.—Cold; *kharif* harvesting almost completed; *rabi* favourable; *pulses* suffered from frost in some districts towards north; prices steady; health improving.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(Dec. 17th)		
Akyab	1·96	Total rainfall 226·02; slight cholera in Naaf township, otherwise public health good; agricultural prospects good.
Rangoon	*Nil*	Total rainfall 113·69; a few cases of fever and small-pox, otherwise public health good; slight cattle disease; reaping commenced throughout district.
Bassein	*Nil*	Total rainfall 98·49; public health and prospects of crops good.
Prome	*Nil*	Total rainfall 44·83; public health good; crop prospects satisfactory.
Amherst (Moulmein) ...	*Nil*	Total rainfall 171·25; public health and agricultural prospects good reaping commenced everywhere.
Toungoo	*Nil*	Total rainfall 76·42; public health and prospects of crops good; reaping commenced.
		General Remarks.—General health good; reports of crops satisfactory.
Assam—(Dec. 17th)		
Gauháti	*Nil*	Weather cool; mornings foggy; *sali* paddy being reaped; prospects of other crops and tea favourable.
Sylhet	1·22	Prospects good.
Cachar	Slight rain on Wednesday night and Thursday morning.	Weather seasonable; prospects of crops unchanged; common rice 17½ seers per rupee; public health good.
Dibrugarh... ...	*Nil*	Paddy nearly half reaped; other crops fair; district healthy.
Berar & Hyderabad—(Dec. 17th)		
Amráoti	...	Cotton-picking continued; outturn somewhat disappointing.
Akola	...	*Rabi* crops somewhat damaged by excessive cold.
Hyderabad... ...	*Nil*	Crops flourishing.
Mysore and Coorg—(Dec. 17th)		
Bangalore ...	...	Reaping of dry crops almost completed; standing crops generally in good condition; prospects favourable; health generally good; prices stationary.
Mysore ...	...	
Mercara ...	·23	
Central India States—(Dec. 17th)		
Indore	...	Prospects good.
Morar (Gwalior) ...	...	Weather seasonable.
Sutna „ ...	...	No report received.
Rutlam „ ...	...	
Neemuch „ ...	...	Weather cool.
Goona „ ...	...	Health and crops good; wheat 14 seers.
Bhopal „ ...	...	Prospects of crops good.
Agar „ ...	...	Health good; prospects favourable.
Nowgong „ ...	...	No report received.
Mánpur „ ...	...	
Rajputana—		
Abu ...	...	No report received.
Serohi (Dec. 14th)	...	Wells full; tanks drying; malarious fever still prevalent; prospects fair; colder.
Marwar („ 13th)	...	Two months' water supply in tank; wells almost full; health and prospects good; seasonable; prices steady.
Meywar („ 12th)	...	Tanks, wells, health, and crops good.
Harowtee („ 13th)	...	Health and prospects good.
Jhallawar („ 11th)	...	Clear; cold; health good; prospects excellent.
Ajmere ...	...	No report received.
Jeypore, Bhurtpore („ 17th)	...	Prospects encouraging; fever abating.
Ulwur ...	...	No report received.

Irrigation.

PROGRESS AND REVENUE REPORTS ON IRRIGATION WORKS IN RAJPUTANA FOR THE YEARS 1874-75 TO 1876-77.

Nos. 409—17 I., dated Simla, the 17th December 1879.

Read—

Letter No. 102 S of the 18th January 1879, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana, Public Works Department, submitting the Progress and Revenue Reports on Irrigation Works in Rajputana for the years 1874-75 to 1876-77, inclusive.

OBSERVATIONS.—The reports now received are very full and complete on almost all points. The Revenue Report is submitted for the first time; the rules for assessment, collection and crediting of revenue from these Irrigation Works were finally approved by the Government of India in December 1877, and the statements of financial results appended to, and embodied in, the report have been compiled according to those rules.

2. The arrangements for storing water in Ajmir and Mhairwara are of vital importance to the country: there is little or no water in the rivers except in the rainy season; and no permanent supply in the wells; all is dependent on the rainfall, which is precarious and generally small in quantity, averaging from 18 to 22 inches in the year, and varying from 5½ to 43½ inches in exceptional seasons. In the adjacent State of Jodhpoor the annual rainfall averages between 4 and 5 inches only. In the Ajmir District, where the nullahs are sandy, a sufficient amount of water is absorbed during the rains to supply wells within a short distance from the stream on either bank; beyond this limit, unirrigated lands extend to the foot of the hills on either side. In Mhairwara, where the beds of the drainage outfalls are rocky and the declivity is great, the rainfall, if unarrested, flows off rapidly and benefits the country but little, as the soil is shallow and not retentive of moisture. Hence the necessity for retention of the rainfall by artificial means is very great.

3. The construction of embankments for this purpose dates from a very early period; the Bisalya tank, it is stated, was made about 1050 A. D., and the Anasaugor, close to the town of Ajmir, not long after: but with 4 or 5 exceptions the old embankments seem to have fallen into disrepair, or been obliterated before the country came under British administration in 1818: and the revival of irrigation in these tracts has taken place under British rule.

4. The gross area of Ajmir and Mhairwara, the British portion of Rajputana, according to the settlement survey at the last revision of the land revenue in 1873-74, was 2,753 square miles, of which 1,238 square miles were yielding revenue to Government, 235 square miles were held on rent-free jaghirs, and 1,280 on feudal tenure. Of the area yielding revenue to Government, 171,416 acres were cultivated, 139,898 were culturable, and 448,749 were barren. It is assumed that from this large area, which is returned in the settlement report as unassessable, no revenue is derived from grazing and pasture lands. The cultivated area is 21 per cent., and the total cultivated and culturable is only 40 per cent. of the total area. Of the cultivated area, 33,488 acres were dependent on wells, 18,461 were irrigated from tanks, 16,438 were in the beds of tanks, and 103,029 acres were dependent on the rainfall.

5. The number of wells in existence at the date of the settlement was 13,061, of which 3,001 were out of use, and 10,060 were in operation, irrigating about 3·3 acres each on an average.

6. The number of tanks registered up to the close of the period dealt with in these reports is 621, of which 458 tanks were constructed before the charge of the Irrigation Works was made over to the Public Works Department in 1869-70, mainly through the exertions and influence of Colonel Dixon, who held charge of the districts for many years, 159 tanks have been constructed by the villagers themselves, and 4 new tanks only have been constructed since 1869-70 through the agency of the Public Works Department.

7. Besides affording direct irrigation, the tank embankments are of great value in raising the spring level in their vicinity and for considerable distances along the valleys below, making irrigation from wells possible where without this aid it would be an impossibility. Nearly all the tanks, except the few of very large size, are dry in the month of March, and the beds of the majority are cultivated for the spring crop. Some of them only serve the purpose of storage reservoirs to raise the spring level, no direct irrigation being taken from them. As an instance of the extent to which springs are affected by local rain, or the existence of a reservoir, it is mentioned in the settlement report of 1875 that a well at Dewa on the southern border of Mhairwara, 60 feet in depth, was found quite dry in the dry season of 1871-72, and the following year it was brimming over.

8. The old tanks vary in size from one capable of irrigating a few acres to rather large lakes such as the Anasaugor at Ajmir; the four new tanks are calculated to irrigate 6,972 acres, as follows:—

	Acres.
Bheer Reservoir	1,260
Bulad „	1,150
Jalea „	4,192
Rajosi „	370

The last, the Rajosi, is a restoration of a very old work, breached many years ago, beyond the recollection of any one now living; the other three are entirely new works. In future reports the capacity and area irrigable with full supply should be stated for each of the larger tanks, old or new, and as many of the others as possible.

9. The old tanks subject to Government assessment of revenue are divided into five classes—

I.—Tanks irrigating both harvests, the beds remaining submerged.

II.—Ditto irrigating the rabi crop once or perhaps twice.

III.—Ditto giving only a sowing watering for the rabi.

IV.—Ditto irrigating the kharif, and in seasons of favorable rain, giving sowing watering for rabi.

V.—Ditto irrigating kharif when large supply is not required.

The numbers of tanks of each class at the last settlement were—

Total unassessed ...		180
GRAND TOTAL ...		458

10. The Financial Statements are compiled from the year 1869-70, when the works came under the control of the Public Works Department. The capital expenditure previous to that year, amounting to Rs. 6,17,563, is the outlay on construction of the assessed tanks and those benefitting wells numbering 326 (according to the statement at page 43 of the report, but elsewhere given at 328,) between 1835-36 and 1846-47. Subsequent outlay, it is stated, was mostly defrayed from the "talao" cess, and has been omitted. The tanks excluded from this initial capital account will be brought either on to it, or on to the revenue account as the case may be, on their becoming useful for irrigation by restoration or repair.

11. The additions to the capital outlay each year, and the aggregate at the close of the period under review, are as follow :—

	Old works.	New reservoirs.	Total.
	Rs.	Rs.	Rs.
To end of 1868-69	6,17,563	...	6,17,563
During 1869-70	13,254	8,623	21,877
" 1870-71	3,217	1,226	4,443
" 1871-72	18,015	12,886	30,901
" 1872-73	29,223	1,32,552	1,61,775
" 1873-74	5,644	1,54,868	1,60,512
" 1874-75	3,331	1,42,694	1,46,025
" 1875-76	...	1,04,134	1,04,134
" 1876-77	723	38,204	38,927
Total ...	6,90,970	5,95,187	12,86,157

Of the aggregate outlay on the new reservoirs, a sum of Rs. 1,86,980 was expended (previous to 1874-75) from Productive Public Works funds ; but the estimated returns from these works not being sufficiently remunerative, they are not classed as Productive Public Works. It is not stated how many works have been brought on to the capital account in addition to the 326 mentioned above.

12. The revenue accounts commence with the year 1869-70. No water-rates, properly so called, are levied on irrigation from the old tanks ; the credit to the works on this account is from a share of the land revenue. On the four new tanks water-rates are charged as detailed in Appendix K. The total land revenue of Ajmir-Mhairwara by the last settlement amounts to Rs. 3,04,593 including cesses; deducting the latter, the amount is Rs. 2,61,557, of which Rs. 53,144 was allotted as the share due to the Government tanks, and Rs. 2,288 was on account of village tanks. The area of irrigation registered at time of settlement from the Government tanks was 17,227 acres, and from the village tanks 1,107 acres.

13. The yearly demand is assessed variously for the different classes of tanks. On the first two classes the irrigated area is measured annually, and the lump sum at which each tank was assessed at the settlement is made up by a rate on the area actually irrigated, unless the rate so derived exceeds a certain fixed maximum or falls below a fixed minimum. The area irrigated from the tanks of the fourth and fifth classes is not measured annually, but the whole amount assessed at the settlement is levied, subject to remissions in case of

extreme drought. In addition to the above water revenue, a portion of the assessment on lands irrigated by wells only is credited to the tank system ; the water share has been taken at half the assessment on half the number of assessed wells in the district, and yields an amount of Rs. 20,609. The above items are, under the rules in force, entered in the accounts as "indirect", revenue, the direct returns being comparatively trifling, and consisting of realizations from sales of produce, rents of buildings, &c.

14. In the statement of revenue, Table D I at page 8 of the Report, Rs. 2,288 is added as share due to village tanks ; but as no Government funds are expended on these tanks, this item is not fairly a credit to the system of Government works, and in the booked accounts of the Public Works Department it is omitted.

15. The general results, abstracted from the booked accounts for the five years up to and including 1873-74, are as follows, including allowance for leave and pension charges under "Capital" outlay :—

	Capital outlay at end of year.	Working expenses.	Gross revenue, direct and indirect.	Net revenue.
	Rs.	Rs.	Rs.	Rs.
1869-70	6,30,817	37,045	73,753	36,708
1870-71	6,34,034	19,996	1,01,336	81,340
1871-72	6,53,957	64,826	85,741	20,915
1872-73	6,85,341	60,879	85,974	25,095
1873-74	6,91,238	81,769	84,776	3,007
Total ...	...	2,64,515	4,31,580	1,67,065
Yearly average ...	...	52,903	86,316	33,413

The average annual profit by these figures is 4·83 per centum on the capital debit at the close of this period. This is, however, but a rough approximation to the actual results. The capital debit represents fairly the expenditure in money on the construction of the works ; but from the rates at which the majority were executed as given in Colonel Dixon's report, it is evident that labour and material were to a considerable extent supplied gratis. The cost of the works, if constructed now, would probably be four, or even five times as great.

16. The revision of the land revenue settlement took place in 1873-74, the revenue for subsequent years is credited as then fixed, and the area irrigated is given, but this latter apparently is only accurate for the first class of tanks, the entries for the second class being the areas recorded at time of settlement. The results for the three years subsequent to the revision of the settlement are given below—

	Capital outlay at close of year.	Gross revenue, direct and indirect.	Working expenses.	Net revenue.
	Rs.	Rs.	Rs.	Rs.
1874-75	6,94,779	71,689	41,421	30,268
1875-76	6,94,779	83,316	55,356	27,960
1876-77	6,95,532	81,499	70,697	10,802
Total ...	...	2,36,504	1,67,474	69,030
Yearly average ...	...	78,835	55,825	23,010

and the average annual profit for this period is only 3·3 per centum.

17. There are some discrepancies between the figures given in the body of the report, and those in the Examiner's statements, which should be explained or corrected in the next report, but they do not materially affect the general results. In the Examiner's statements also there are some errors in the classification of the revenue, which should be corrected in future statements, a large portion of the "indirect" revenue having been entered as "direct."

18. The entries of revenue in the Examiner's statements are apparently the amount of actual collections during the year. The assessments for the year should also be shown to exhibit clearly the results of each year's operations.

19. It appears that the revenue on "âbi," or cultivation on submerged land in the beds of tanks, was credited in the years 1874-75 and 1875-76, but not in 1876-77, and the credit to the works on this account in the latter year would have amounted to Rs. 14,290, no inconsiderable addition. The credits in the two former years on this account were comparatively small, aggregating only Rs. 2,919. The reasons for the omission of the credit in 1876-77 should be explained.

20. The working expenses include outlay on extensions and new works, aggregating Rs. 67,356 in the eight years ending 1876-77. Expenditure of this description, including a proper share of the establishment charges, should be deducted to exhibit the actual expense of maintenance of the works. The number of new and restored works, added to the number in operation at the time of the last land settlement, should be stated.

21. The areas irrigated during the three years since the revision of settlement, as given in the Examiner's statements, do not correspond with the figures given in the body of the report, and it is not apparent how these latter have been arrived at. The areas of land irrigated directly from the tanks; the submerged areas which were cultivated, and the double cropped area should be shown separately: as well as the approximate area irrigated from wells, a share of land revenue on which is credited to the works. In the Settlement Report the total area of land irrigated from wells is given as 33,488 acres, but the assessment on this is not shown separately.

22. Turning to the new tanks, three of which came into operation during the last three years dealt with in the report, the capital account at the end of 1876-77, including allowance for leave and pension charges, is as follows:—

Tank.	Capital outlay.	Estimated cost.
	Rs.	Rs.
Bheer	2,07,490	1,98,238
Bulad	88,072	61,098
Rajaosi	40,363	30,011
Jâlea	2,86,924	2,30,477
Total ...	6,22,849	5,19,824

The first three works are complete; at the Jâlea reservoir only some work on the ducts remained to be finished at the close of the period.

23. The Revenue figures for the three works in operation were as follow:—

	1874-75.	1875-76.	1876-77.	Total.
	Rs.	Rs.	Rs.	Rs.
BHEER.				
Gross Revenue	321	288	1,193	1,802
Working Expenses	...	1,127	1,302	2,429
Net Revenue ...	321	—839	—109	—627
BULAD.				
Gross Revenue	...	158	1,003	1,161
Working Expenses	...	...	1,765	1,765
Net Revenue ...	...	158	—762	—604
RAJAOSI.				
Gross Revenue	...	4	244	248
Working Expenses	...	...	441	441
Net Revenue ...	...	4	—197	—193

The areas actually irrigated, as compared with the maximum estimated irrigable area from each reservoir, are given below in acres:—

Reservoir.	1874-75.	1875-76.	1876-77.	Estimated irrigable area.
Bheer	72	87	310	1,260
Bulad	...	41	211	1,150
Rajaosi	...	1	59	370

In future reports the area of double cropped land should be given, as well as the area of land irrigated from old wells in which the spring level has been raised by percolation from the reservoir, or new wells, the supply in which is similarly dependent on them. It is stated that many wells have already been benefitted by the Bheer reservoir, but the number is not given, nor any approximation to the area of irrigation thus supplied.

24. It is too early yet to form an opinion on the probable financial results of these works: it is however satisfactory to learn that the demand for irrigation in the kharif of the year succeeding those under review was for more than three times the area irrigated in 1876-77. The supply in the Bheer reservoir

appears to have been considerably less than it was estimated could be supplied from the catchment area with a given amount of rainfall. Experiments on evaporation, absorption, and quantity of rainfall available for storage, are referred to in the report; the results of these experiments cannot fail to be of great interest, and should be given in future reports.

25. The cost of maintenance compared with area irrigated should be shown in future reports. From the figures given it would appear to be very high on the old tanks. The average amount of working expenses for the last 3 years was Rs. 55,825, and the average irrigation appears to have been 20,081 acres, giving a rate of Rs. 2·77 per acre. The establishment charges are especially high, but this point is receiving attention from the local officers.

The suggestion of the Executive Engineer to enlist the active intervention of the cultivators themselves in the control, management and maintenance of the tanks is especially deserving of notice, and the Government of India will be glad to afford every aid and encouragement to any practical scheme which is likely to effect this most desirable result.

26. Although the apparent and direct financial results of the irrigation works in Rajputana as exhibited in these reports are very poor, the testimony of all acquainted with the localities is that without the tanks the country could not be permanently inhabited. The Committee of 1874 recorded its opinion that "the tanks have reclaimed Mhairwara from being a wild jungle through which no man could pass with safety. But for the tanks, the greater part of the population of the district would be a migratory one, cultivating in years of good rains, and emigrating to Oodeypur and Malwa in years of scarcity." Colonel Dixon was of opinion that the tanks had raised the level of the springs throughout the district, and his successor, Major Lloyd, held the same view: and the former officer considered that the large increase in land revenue during his incumbency was wholly due to the tanks. Yet in the reports now submitted the average area annually due to the tanks is put down at only about 20,000 acres, the total cultivated area recorded at the last settlement being 171,416 acres. The area of land irrigated from wells, of which a share of the revenue is considered a fair credit to the tanks, is not shown, and the credit on this account seems to be much less than can be fairly claimed. The Committee fixed the share at one-fourth only of the calculated water share of the assessment, which again bears to the entire assessment the proportion of Rs. 2-8-0 to Rs. 3-12-6, or about two-thirds, while at the same time it is stated in the Committee's report that in Mhairwara (Beawar and Todgurh Sub-Collectorates) the chief supply in the wells is due to the tanks; and although in Ajmir the supply is mainly due to percolation from nullahs, it is stated, as a well known fact, that the fertility of the Ajmir valley for 10 miles below the Anasaugor tank depends almost entirely on that lake, the direct irrigation from the lake being little or none. By far the greater proportion of the irrigation from wells is, it would appear, dependent on the tanks. It should not be difficult to ascertain the actual number of wells the supply in which is wholly or mainly dependent on the tanks, and this should be done as soon as possible. As the results are now exhibited, it might be supposed that it was not financially justifiable to expend Government funds on these works, while, if the opinions of the various local officers quoted above are even to a small extent correct, the abandonment of the works would bring ruin to the province, and it is of the utmost importance that their full value should be ascertained and recorded.

27. A very important question is alluded to in this report as still under consideration connected with the larger class of tanks, *viz.*, whether they should be drained annually to supply the maximum area of irrigation, or whether a reserve should be maintained in them from a year of good rainfall to supply deficiencies in a subsequent year. The former system would yield the best direct financial result, but for the prevention or mitigation of famine the latter would be most effectual.

The Government of India will be glad to receive a report on the subject when a definite conclusion has been arrived at.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governor General's Agent and Chief Commissioner of Rajputana for information and guidance.

Also that copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, Irrigation Branch, for information.

Also that copy of the Resolution and of the Report be forwarded to the Home, Revenue and Agricultural Department, and to the Department of Finance and Commerce, for information.

Also that copy of the Resolution be forwarded to the Publisher of the *Gazette of India* for publication in the Supplement to the Gazette.

ALEX. FRASER, Major-Genl., R. E.,
Secy. to the Govt. of India.

J. K. OTTLEY, *Captain, R.E.,*
Asst. Secy. to Govt., Punjab, P. W. D., Irrigation Branch.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 23rd DECEMBER 1879.

General Remarks.—Rain has again fallen in the Madras Presidency; in the other Provinces there has been little or none. Some rain now would be of benefit to the spring crops, the prospects of which continue so far satisfactory. The winter harvest is progressing with a favourable outturn. The public health has much improved.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—	(Dec. 24th)		
Bellary	(Dec. 20th)	...	*Ragi* 25·74; harvest of early dry crops; sowing second crop paddy; standing crops in good condition.
Kurnool	(„ „)	...	*Ragi* 29·09; paddy being harvested; standing crops withering in one taluk, blight in two taluks; pasture and water ample.
Ganjam	(„ „)	...	*Ragi* 29·03.
Kistna	(„ „)	·72 (average of 2 stations).	*Ragi* 26·85; later dry crops being sown; standing crops fair; 30 inches water over anicut.
Chingleput (Madras)	(„ „)	·32 (average of 6 stations).	*Ragi* 22·96; standing crops doing well, but injured somewhat by insects; sowing commenced in three taluks; harvest in parts, outturn ½ to ¾; pasture abundant.
Coimbatore	(„ „)	·15 (average of 10 stations).	*Ragi* 25·67; crops withering in parts of eight taluks; harvest of paddy, *cholum*, *ragi*, *cumboo* in seven taluks; outturn ½ to full.
Tanjore	(„ „)	2·09 (average of 12 stations).	*Ragi* 27·14; crops generally good.
Madura	(„ „)	·23 (average of 5 stations).	*Ragi* 24·26.
Malabar	(„ „)	1·46 (average of 14 stations).	*Ragi* 18·75; second crop progressing.
Travancore	(„ „)	·49	*General Remarks.*—General prospects good.
Bombay—	(Dec. 24th)		
Kurrachee	...	...	River at Kotri on 21st 2½ feet against 4 feet 10 inches on same date last year; total rainfall from 1st January to date at Tatta 2·47, Sakro 3·18, Ghorabari 2·74, Mirpur Batoro 3·57, Sajawal 4·54, Mugalbhin 2·52, Sháhbundar 3·34; *rabi* crops coming on fairly; measles in Sháhbandar taluka; locusts about Ghorabari, Sujawal, and Jerruck, damage in last; fever generally prevalent.
Hyderabad	...	...	No report received.
Ahmedabad	...	...	*Kharif* crops slightly damaged by frost in Parántij; *rabi* sowing progressing; fever continues.
Baroda	...	...	*Rabi* sowings completed; all crops in good condition; fever dying out.
Surat	...	...	Standing crops generally good; sickness decreasing.
Násik	...	...	Ague in four talukas; cattle disease in one; standing *rabi* crops good.
Colaba (Bombay)	...	...	Dryness of air normal; wind normal.
Poona	(Dec. 21st)	...	Price of *bajri* falling.
Ahmednagar	...	...	Crops in inferior soil withering; injury by rats in Kopargaon.
Sholapore	...	...	Prospects unchanged; expected outturn of *rabi* crops maximum 12, minimum 8 annas in rupee.
Dharwar	...	...	Harvest of early crops progressing; slight fever general; *rabi* crops well.
Kánara	...	...	Sowing of second crop continues on coast; cattle disease and fever prevail; cholera at Honore; up to 14th, 9 deaths.
Rajkot	...	...	Weather cold; *rabi* promising; health good.
			General Remarks.—*Rabi* crop prospects generally good, but crops withering in inferior soils in parts of Deccan; frost in Gujrat; public health improving.
Bengal—			
Chittagong	...	*Nil*	Weather cloudy; harvesting of *aman* not completed; winter crops being sown; cholera not abated in cyclone tract.
Dacca	...	*Nil*	Prospects of crops good; public health good.
24-Pergunnahs (Calcutta)	...	*Nil*	Prospects of *aman* and winter crops fair; an average outturn expected; *aman* harvesting going on; health generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Moorshedabad ...	*Nil*	*Haimanti* paddy being harvested; outturn good; *rabi* crops doing well; epidemic fever still prevalent in thana Burwa; isolated cases also reported from other thanas; cattle disease still reported from Hariharpara Police Station.
Rajshahye ...	*Nil*	Cutting of *dhan* fast going on; outturn more than average in some places but less in others; sowing of winter crops nearly finished; general health good.
Burdwan ...	*Nil*	Spring crops promise well; health good.
Rungpore ...	*Nil*	Weather cold and dry; crops good; fever abating.
Bhágalpur ...	*Nil*	Weather cold; prospects of crops and health good.
Purneah ...	*Nil*	Good *aghani* crop; *rabi* thriving well; much of *aghani* harvested; *rabi* sowing all finished; public health much better than usual at this season.
Patna ...	*Nil*	Rain would benefit *rabi*.
Durbhanga ...	*Nil*	Aghani harvest in progress; *rabi* favourable; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable, fair, and very cold; *rabi* crop is likely to suffer from want of rain; *soorgoojah* and *koorthee* have yielded a fair outturn; prices stationary; health good.
Cuttack ...	*Nil*	Rice being harvested; winter crops progressing well; small-pox prevalent. *General Remarks.*—Some rain now required for *rabi* crops in some districts; *aman* harvest being rapidly completed; outturn on the whole expected to be a good average; prospects of *rabi* crops generally excellent; fever and cholera still reported in many places, and small-pox in some; prices generally much fallen, and still falling in some districts.
N.-W. Provinces and Oudh—		
Benares (Dec. 23rd)	...	*Rabi* prospects continue favourable; fever abating.
Allahabad („ „)	...	Weather seasonable; crops looking healthy, though rain is wanted; but little sickness is reported; wheat 13 5/6, coarse *chawal* 19 1/4, and unhusked *dhan* 37 1/2 seers per rupee.
Gorakhpur („ 24th)	*Nil*	Weather seasonable; prospects good.
Jhánsi ...	...	Report not received.
Agra („ „)	*Nil*	*Rabi* crops progressing favourably; weather seasonable; sickness disappearing.
Bareilly („ 24th)	...	Irrigation of *rabi* in progress; weather clear.
Meerut („ „)	...	Cloudy sky; health improving; prices stationary.
Kumaun („ 23rd)	...	Weather cold and cloudy; market prices unchanged.
Lucknow („ 24th)	...	Prospects good; health improving.
Partabgarh („ 22nd)	*Nil*	Prospects good.
Sitapur („ 24th)	...	*Rabi* prospects good; health improving.
Fyzabad („ „)	*Nil*	Prospects good. *General Remarks.*—Prospects are generally good.
Punjab—(Dec. 23rd)		
Delhi ...	...	Prospects fair; prices steady; health improving.
Hissar ...	...	*Rabi* crops thriving, but require rain.
Umballa ...	...	*Rabi* promising; health good.
Jullundur ...	...	Crops healthy; prices steady; health good.
Lahore ...	Slight sprinkling of rain with thunder.	
Ferozepore ...	...	Prospects fair; prices steady.
Siálkot ...	...	*Rabi* prospects fair; slight rise in prices.
Ráwalpindi ...	...	Rain required for crops.
Pesháwar ...	...	Crops still suffering from frost; prices stationary; rain wanted.
Mooltan ...	...	Crops and health good; prices steady.
Dera Ismail Khan ...	...	Prospects fair; health good. *General Remarks.*—Nothing more than a slight sprinkling of rain this week, but clouds are still gathering.
Central Provinces—		
Nágpur (Dec. 24th)	...	Clear, cold; *kharif* harvest progressing; *rabi* thriving and promising.
Jubbulpore ...	...	Clear; cold; prospects good; few cases of small-pox; prices easier.
Saugor	...	Clear; *kharif* harvested; cotton-picking continues; *rabi* prospects good; prices stationary.
Seoni	...	*Rabi* in excellent condition.
Hoshangabad ...	...	Cotton-picking continues; *rabi* promising; prices stationary.
Raipur (Dec. 20th)	...	Cloudy; *kharif* harvest continues; *rabi* promising; cattle disease prevalent; prices unchanged.
Sambalpur („ 19th)	...	Cloudy; *kharif* crops, except rice on low land, have been gathered; health good; prices rising. *General Remarks.*—*Kharif* harvest progressing; yield of all crops favourable, except of cotton; *rabi* promising; prices unchanged.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—		
Akyab	1·19	Total rainfall 227·21; public health good; agricultural prospects favourable.
Rangoon	*Nil*	Total rainfall 113·69; slight fever and small-pox continue in part of district, otherwise public health good; slight cattle diseases; reaping progressing.
Bassein ...	*Nil*	Total rainfall 98·49; public health good; reaping going on.
Prome ...	*Nil*	Total rainfall 44·83; public health satisfactory; reaping progressing.
Amherst (Moulmein) ...	*Nil*	Total rainfall 171·25; public health good; half the crops reaped; threshing commenced.
