1951

SUPPLEMENT TO

The Gazette of India.

No 1. } CALCUTTA, SATURDAY, JANUARY 4, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTION OF DEEDS, CONTRACTS, &C., ON BEHALF OF THE SECRETARY OF STATE, IN THE TERRITORIES UNDER THE ADMINISTRATION OF THE GOVERNMENT OF THE PUNJAB.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—No. 1673, under date, Fort William, the 28th December 1878.

Read again—

Home Department Resolution No. 613, dated the 11th May 1878, relative to the execution of deeds, contracts, &c., on behalf of the Secretary of State.

Read also—

A letter from the Secretary to the Government of the Punjab, No. 3979, dated the 26th ultimo, on the same subject.

RESOLUTION.

In exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Cap. fifty-nine, Section two, His Excellency the Governor General in Council is pleased to declare that the under-mentioned classes of the deeds, contracts and other instruments referred to in the twenty-second and twenty-third of Victoria, Cap. forty-one, Section two, may be executed as follows in the territories under the administration of the Government of the Punjab:

By the Joint Secretary to Government in the Irrigation Branch.	Contracts and other instruments for the supply of building materials, stores, machinery, &c., for public works, and for the execution of public works generally, and security bonds entered into by revenue subordinates for the proper execution of their duties.

ORDER.—Ordered that this Resolution be communicated to the Punjab Government for information, and be published in the Supplement to the *Gazette of India*.

(True Extract)

C. BERNARD,

Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

No. XLII of 1878.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 31st DECEMBER 1878.

GENERAL REMARKS.—No report has been received from Madras. In Mysore there has been slight rain; prices are stationary and the standing crops are in good condition; the number on gratuitous relief in hospitals has risen to 844, or 80 more than in the previous week. From Bombay no rain is reported, and prospects continue on the whole unchanged. The weather on the Upper Sind Frontier seems to be exceptionally cold. In the Central Provinces also no rain has fallen; prospects are said to be uncertain and prices are high; the crops in the Hoshangabad and Narsinghpur districts are in a bad condition; and from Seoni and Sambalpur damage by frost is reported. In Berar, where prospects continue good, the weather is clear and cool. There has been no rain in Central India and Rajputana, where prospects are favourable. In Bengal rain has fallen in some districts, but not in the Patna division, where it is much wanted; the harvest is being completed with a fair outturn, except in Sarun and Champarun, in which districts the poppy is also reported to be backward. No rain has fallen in Assam during the week, but it is threatening; prospects remain satisfactory. In British Burma reaping proceeds, and the state of the crops is on the whole good. Rain is still awaited, and the fever usually prevalent is believed to be due in part to this cause. In the North-Western Provinces and Oudh no rain has fallen and it is much needed; the somewhat precarious condition of the parts of the Partabgarh district which cannot be irrigated, was noticed last week and has not now improved. In the Punjab also there has been no rain during the week; here too the need of it has for some little time been generally felt; there is a slight rise in the prices of food grains in Hissar, Amritsar and Peshâwar, but prospects are not discouraging. As was the case last week, the point of most general interest in the returns is the lateness of the winter rains in the Upper Provinces.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras ...	...	Report not received.
Bombay (Jan. 1st)—		
Sind—		
Kurrachee ...	...	No report.
Shikárpur ...	...	*Rabi* in Rohri taluka damaged by locusts; cattle disease in 7 talukas; small-pox in 4 talukas.
Hyderabad ...	...	Weather cold; fever and small-pox continue.
Upper Sind Frontier...	...	Weather extremely cold; *rabi* sowings continue; early *rabi* healthy; fever and cough prevalent; grain very dear.
Guzerat—		
Ahmedabad ...	...	No report.
Pánch Maháls ...	...	Less cold; pulse crop in some places destroyed by late frost.
Kaira ...	...	Weather cold; *rabi* prospects good.
Surat ...	...	No report.
Broach ...	...	
Khandesh and Násik—		
Khandesh ...	...	No report.
Násik ...	...	No change.
Konkan—		
Tanna ...	...	Cholera in Shâhâpur taluka.
Colába (Dec. 30th)	...	Public-health good, except in Pen taluka, where fever prevails.
Ratnágiri („ 24th)	...	*Rabi* sowings completed; seedlings in good condition.
Deccan—		
Poona ...	...	No material change.
Ahmednagar ...	...	Crops good; slight damage in two talukas from cloudy weather; rain wanted for poor soil crops; health good.
Sholapur ...	...	No change.
Satara ...	...	Prospects continue favourable; *rabi* promising; health good; weather cold.
Southern Mahratta Country—		
Kaládgi ...	...	No change.
Belgaum ...	...	No report.
Dharwar ...	...	No material change.
Kanara ...	...	No report.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Kattywar and Gackwar's Territory—		
Rájkot ...	...	No change.
Wadhwán ...	...	Weather cold; wheat, cotton, and grain doing well; fever abating.
Baroda ...	...	Fever prevalent; condition of crops believed to be favourable.
		General Remarks.—Prospects generally unchanged since last week's report.
Bengal—		
(31st Dec. 1878).		
Chittagong ...	*Nil*	Weather dry and cold; no change to report in the state and prospects of the crops; prices have fallen considerably and continue to fall.
Noakholly ...	0·17; slight showers of rain on the 19th and 20th.	Weather cold; the reaping of the *amun* crop continues with good outturn.
Chittagong Hill Tracts...	0·22; some drizzling rain on the night of the 20th instant.	Weather cloudy, with occasional sunshine throughout the week; the gathering of the plough cultivators' paddy crop is nearly over; the prospects of tobacco and mustard are good.
Hill Tipperah ...	0·39; rain fell on the 21st instant.	The weather has since been much colder; the reaping of the late rice crop continues; the prospects of mustard and chillies are good.
Backergunge ...	*Nil*	Weather seasonably cold; the *amun* harvest is progressing very satisfactorily; new rice is selling at Rs. 3-9 a maund; health is good.
Furreedpore ...	*Nil* 0·08 at Madaripore.	Weather cold and clear; the *amun* crop is not yet entirely reaped; the prospects are good; the winter cereals are growing well; in Goalundo the *moog* and *kalai* pulses are being reaped in the high lands; Goalundo itself is now free of cholera, but it has broken out in villages within the jurisdiction of the Khanganga outpost.
Dacca ...	*Nil*	Weather cool and seasonable; the state and prospects of the crops are very good.
Mymensingh ...	0·02	Weather cold; the cold weather crops are doing well, and a slight fall of rain has proved beneficial; cholera has appeared in parts of the district.
Tipperah ...	*Nil*	Weather cloudy for two days; fair and cold during the rest of the week; the greater part of the *amun* crop has been reaped all over the district; the outturn is everywhere good.
24-Pergunnahs ...	*Nil*	Weather seasonable; the state and prospects of the crops are satisfactory; fever continues at many places of the district.
Jessore ...	0·22 0·40 at Khoolna.	Weather cold and clear, with fogs in the mornings and evenings; the *amun* harvest is progressing favourably; the prospects of the winter crops are generally fair; prices are slightly lower in parts of the district.
Nuddea ...	*Nil* 0·13 at Chooadanga. 0·42 at Bongong.	Weather cold; the prospects of the winter crops are generally good; the *amun* harvest is still going on; cholera and fever are still prevalent, and some cases of small-pox have been reported.
Moorshedabad ...	*Nil*	Weather cold and clear; the *rabi* crops promise well; the *amun* harvest is nearly over, and is a good one.
Pubna ...	0·5; slight rain on one day.	Weather clear and rather cold; the state of the crops is the same as in last week; there is still cholera about.
Rajshahye ...	*Nil*	The cutting of the rice crop is fast going on; the yield is above the average; the prospects of the *rabi* crops are good; several cases of cholera have occurred in the Singra thana and a few in Beauleah and Natore.
Bogra ...	*Nil*	Weather good and seasonable, with north wind; the standing crops are doing well, and will probably turn out well; rice is selling at 18 or 19 *kutcha* seers per rupee; cholera and ordinary fever are still prevalent in the district.
Dinagepore ...	*Nil*	Weather cold and fine; 8 annas of the *haimanta dhan* have been cut; new rice is selling at 12 to 20 seers per rupee.
Rungpore ...	*Nil*	The weather has become cold; the state and prospects of the crops continue to be good; cholera still prevails in some parts of the district.
Cooch Behar ...	*Nil*	Weather fair, and not so cold as in other years; the mornings are not yet foggy; though the harvesting of the late rice has not yet been finished, the price, which fell to Rs. 2-8, has again risen to Rs. 3-4; the prospects of the cold-weather crops continue good; cholera cases have decreased.
Jalpáiguri ...	*Nil*	Weather bright and cold; *haimanta dhan* is almost all got in and is a very good crop; land is being prepared for the *bhadoi* crop; tobacco, wheat, barley, mustard, and sugarcane are doing well.
Darjeeling ...	*Nil*	Sunshine in the day, but very cold in the night; *haimanta dhan* in the Terai is being reaped and a good outturn is expected; *teel*, mustard, and *kalái* are also being gathered.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Midnapore ...	*Nil*	Weather very cool; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather cold and seasonable; the harvesting of *amun* paddy is very nearly completed with a very good outturn throughout the district; in some of the thanas of Mohesrakha sub-division the people say it is a 16-anna crop.
Hooghly ...	*Nil*	Weather cold; wind from the north; the harvesting of *amun* paddy is in progress; the prospects of the cold-weather crops are generally good; fever is prevailing everywhere.
Burdwan ...	*Nil*	Weather dry and cold; the prospects of the *rabi* crops are good; fever is still prevalent in some parts of the district.
Bankoora ...	*Nil*	Weather very cold and clear; the cold-weather crops promise well; the *haimanta* rice is harvested; fever is decreasing in the east.
Beerbhoom ...	*Nil*	Weather cold and bright; the state and prospects of the crops are excellent; the harvest will again be a full one.
Sonthal Pergunnahs ...	*Nil*	Weather fine and cold; the state and prospects of the crops continue to be good.
Bhágalpur ...	*Nil*	Weather fine, clear, and cold; the harvesting of rice is in full swing; the outturn is excellent; the *rabi* is progressing favourably.
Monghyr ...	*Nil*	Weather cold, with west wind; excellent *aghani* rice is being cut.
Purneah ...	*Nil*	Weather cold; the state and prospects of the crops are favourable; fever still prevails.
Maldah ...	*Nil*	Weather fair and cool, with a strong west wind; the state of the crops is reported to be fair; the gathering of *kalai* and *haimanta* paddy still continues.
Durbhunga ...	*Nil*	Weather cold and seasonable; the harvesting of the paddy crop is nearly completed; the *rabi* crops promise well, but rain is wanted.
Mozufferpore ...	*Nil*	Weather very cold and clear; the harvesting of the rice crop has been completed, and the average outturn for the district is quite 12 annas; the *rabi* crops are strong and healthy, but their growth would be much promoted by an early fall of rain.
Sarun ...	*Nil*	Weather cold; west wind prevailing; the cold-weather crops are thriving well, but rain is urgently required; poppy is everywhere backward; the Sub-Deputy Opium Agent of Sewan reports that some 4,000 beeghas out of 44,000 have entirely failed; prices are stationary; public health is good.
Chumparun ...	*Nil*	Weather seasonable; no change to report; rain is required for the *rabi* crops; the *dhan* has been harvested, and has yielded on the average a 10-anna crop.
Patna ...	*Nil*	Weather cold and seasonable; the harvesting of the *dhan* crop is nearly completed; the *rabi* crops are still promising, but rain is urgently required.
Gya ...	*Nil*	Weather very cool; the thermometer in the shade was 73·6°; the condition of the *rabi* crops is good; the paddy is nearly all cut; with the exception of a few cases of small-pox, the public health is generally good; the health of the plough-cattle is good.
Shahabad ...	*Nil*	Weather seasonably cold; the paddy harvest is almost over; the outturn is a 12-anna crop on an average; the *rabi* crops are doing well; a flight of locusts was observed from Arrah on the 27th between 3 and 4 P.M. moving from westto east; public health is good.
Hazáribágh ...	*Nil*	Weather fine and cold; frosty at night; the rice crop is nearly all cut, and the prospects of the winter and spring crops are at present satisfactory.
Lohardugga ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops; the *rabi* is doing well, but some damage was done in the *rahar* crop by frost.
Manbhoom ...	*Nil*	Weather cold and seasonable; from personal enquiry on the spot made by the Deputy Commissioner on tour, it appears that the harvest has been very good in some pergunnahs, fair in most pergunnahs, and indifferent in a few pergunnahs to the west; the cold-weather crops, which are not extensively grown in this district, are doing well.
Singhbhoom ...	0·26	Weather bright and cold; the harvesting of the *dhan* crop is over; the *rabi* crops are everywhere most promising; prices are still very high, especially in the parts where exportation is going on.
Balasore ...	*Nil*	Weather cold and bright; the state and prospects of the crops are generally satisfactory.
Cuttack ...	*Nil*	Weather fine and cold; the reaping of the *sarad* rice is going on; the *rabi* harvest has commenced; cholera is still prevalent.
Pooree ...	*Nil*	Weather cloudy and cool; the *sarad* rice is being harvested; *dalua* rice is being sown; the winter crops are progressing tolerably well; common rice is selling at 15¾ to 21 seers for the rupee; a native coasting vessel is being loaded with rice for shipment; public health is good, except that two cases of cholera were reported from Mendhasal, in Khoorda.
		General Remarks.—There has been rain in some districts during the week, but it is still much wanted in most of the districts of the Patna division; the harvesting of the winter rice is being rapidly completed, and the outturn is generally spoken of as fair, except in Sarun and Chumparun; in those two districts the poppy also is backward; the winter cereals and other crops on the ground are generally doing well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. and Oudh— (Jan. 2nd)		
Benares (Dec. 31st)	*Nil*	No change.
Allahabad („ „)	...	Considerable damage from frost; rain very much wanted.
Jhánsi (Jan. 1st)	...	No change.
Agra (Dec. 31st)	*Nil*	*Arhar* injured by frost in some places.
Meerut (Jan. 1st)	...	No change; rain needed; health good.
Bareilly („ „)	...	No change; rain much wanted.
Kumaun (Dec. 28th)	...	Very dry; rain much wanted.
Lucknow (Jan. 1st)	...	No change; rain wanted.
Sitapur („ „)	...	Wind from the west; weather clear; rain needed.
Fyzabad („ „)	*Nil*	Irrigation going on.
Partabgarh (Dec. 30th)	...	*Rabi* crops are being irrigated, and where this cannot be done, the prospects are bad; rain much needed.
		General Remarks.—No change during the week; rain much needed; health good.
Punjab (Dec. 31st)—		
Delhi ...	*Nil*	Prospects fair, but rain wanted; fever decreasing; prices of food grains stationary.
Hissar ...	*Nil*	*Rabi* crops thriving, but rain wanted; slight rise in prices of food grains; health good.
Umballa ...	*Nil*	Crops and health good.
Jullundur ...	*Nil*	Crops require rain; health improving.
Amritsar ...	*Nil*	Health improving; slight rise in prices of food grains.
Lahore ...	*Nil*	Prospects fair; health improving.
Ráwalpindi ...	*Nil*	Crops require rain; fever continues, also small-pox; cattle disease prevalent.
Mooltan ...	*Nil*	State of crops and health good; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	Health improving; state of crops good.
Pesháwar ...	*Nil*	Harvest prospects good; prices of food grains rising.
		General Remarks.—Agricultural prospects generally good, but rain now wanted; health reports more favourable.
Central Provinces— (Jan. 2nd)		
Nimar ...	...	Prospects and prices unchanged.
Hoshangabad ...	...	Cold; crops bad.
Nágpur (Jan. 1st)	...	*Jowari* reaping; *tur* damaged by cold; *rabi* backward for want of rain; health good; prices stationary.
Narsinghpur ...	...	Crops bad; prices rising; fever prevails.
Seoni ...	...	Cold; wheat unfavourable; health good.
Saugor ...	...	*Arhar* injured by frost; rain wanted; prices rising; health good.
Sambalpur (Dec. 27th)	...	Weather clear and cold; prospects good; health good; prices rising.
Jubbulpore ...	...	Weather clear and cold; rain needed; frost injured castor and *arhar*, other crops promising; prices stationary; health good.
		General Remarks.—Weather cold; rain wanted; prospects uncertain; prices high; health good.
British Burma— (Jan. 2nd)		
Arakan Division— ...	...	Public health normal; fever prevalent in Akyab town and district; weather cloudy and cool; reaping continues; outturn very satisfactory.
Pegu Division—		
Thonkwa (Dec. 21st)...	...	Health generally good; slight cattle disease; reaping continues, outturn expected to be better than that of last year.
Bassein ...	...	One death from cholera in town, two in suburbs; reaping proceeding.
Henzada ...	...	Five deaths from cholera, otherwise public health good; slight cattle disease; reaping proceeding.
Prome ...	...	Public health good; no change in prospects of crops since last report.
Thayetmyo ...	...	Public health normal; fever and small-pox in parts of district; crops promise fair but cultivation scanty; reaping commenced.
Rangoon ...	...	Reports not received.
Tharrawaddy ...	...	
Tenasserim Division—		
Amherst ...	...	Reaping going on everywhere; 17 cases of cholera reported in one township, otherwise public health good.
Shwegyeen ...	...	Five deaths from cholera in district, one in town; fever prevalent; crops good.
Tounghoo ...	...	Public health good; agricultural prospects good.
Tavoy (Dec. 7th) ...	...	Public health good; prospects of crops good.
Mergui („ 14th) ...	...	Public health good; crops being reaped.
		General Remarks.—General health fair, but cases of cholera still occurring; fever prevalent in places as usual and partly due no doubt to lateness of rains; weather cool and breezy; state of crops satisfactory on the whole.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Assam—			
Gauháti	(Jan. 1st)	*Nil*	Weather seasonable, at present overcast and threatening rain; reaping of the *sáli* crops nearly over.
Sylhet	(„ „)	*Nil*	Harvesting not finished; sowing of *bura* commenced; prices falling.
Mysore and Coorg—

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Tuesday, the 31st December, 1878.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
Lieutenant-General the Hon'ble R. Strachey, R.E., C.S.I., F.R.S.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble G. C. Paul.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmed Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.

RANGOON PORT COMMISSIONERS BILL.

The Hon'ble MR. RIVERS THOMPSON introduced the Bill to appoint Commissioners for the Port of Rangoon, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Morgan and the Mover. He said that he had the honour to submit this Bill, for the introduction of which he had obtained sanction at the last meeting. He had endeavoured on that occasion to shew that the rapid growth of the trade of the Port of Rangoon reflecting, as it did, the general prosperity and progress of the Province of British Burma, which had been promoted within the last twenty years by the opening out of roads, and especially by the recent construction of the Irrawaddy Valley State Railway, had led the local authorities to consider the greater conveniences and appliances which were now necessary for facilitating the trade of the port and for placing the administration of it on a better footing. It was contemplated that what hitherto had been almost entirely under the executive administration of officers of Government, should now receive the sanction of a legal enactment, both for the security of the increasing revenues of the port, and also for the better management of its much more extended business. With this object it was intended that resident members of the mercantile community should be associated with Government officers and be formed into a corporation vested with full powers for the control of the port. He might say that what had been proposed by the Chief Commissioner of British Burma had received the cordial concurrence of all those who were interested in the commercial enterprise of the place, and from what he knew of those gentlemen from his recent connection with Burma, he could give the Council the assurance that their co-operation would be wisely and intelligently directed to promote the best interests of the Port of Rangoon. In preparing the Bill which he had the honour to introduce, they were fortunate in possessing, as a precedent to guide them, a somewhat similar measure which had been in operation in Calcutta during the last seven or eight years and the experience which had been gained in the working of that measure. Indeed, one of the first steps which was taken by the Department which was immediately under his charge, on receiving the draft Bill from the Chief Commissioner, was to ask, through His Honour the Lieutenant-Governor of Bengal, for an expression of opinion from the Calcutta Port Commissioners regarding this Bill; and valuable suggestions had been made regarding it which had been adopted in the present Bill. The Statement of Objects and Reasons which was attached to the Bill now before the Council gave generally the outline of the provisions which it was proposed to enact. It provided, in section 5, for the appointment by the Local Government of a body of Commissioners, not more than twelve and not less than nine in number, of whom a certain proportion was to be non-official. Subject to the control of the Government, these Commissioners would in future conduct the entire administration of the port. The Commissioners were empowered to construct wharves, jetties, tramways, warehouses and other conveniences for the landing, storing and shipping of goods, to lay down moorings, to improve the port by reclaiming the banks and deepening the river-bed, and, if necessary, to provide tug-steamers. They would have the control of the Conservator appointed under the Indian Ports Act and of the pilots within the port limits. Their functions with regard to the landing and shipping of goods being of special importance, were provided for by certain sections which were based upon the Calcutta Port Commissioners' Act. Under those sections, when the Commissioners had provided sufficient wharf-accommodation, they were empowered, with the previous sanction of Government, to order that all goods should be shipped and landed at those wharves, and through the agency of the Commissioners' servants, and to levy tolls and charges for the use of such wharves and for services rendered.

With reference to the practice which obtained in Rangoon as to the manner of shipping rice for export, exception had been taken to these compulsory clauses. It was known that the large staple exports from Rangoon were connected with the rice and timber trade. Large mills had been constructed on the banks of the Pegu river, a branch of the main river, and, ordinarily, vessels when loading with rice were anchored in close proximity to

those mills as a matter of convenience. It had been pointed out that, having regard to the arrangements and to the necessity which often existed of taking in cargo on both sides of the vessel, the compulsory enforcement of approaching the wharves would be a hardship upon the mercantile community. This objection had been brought to the notice of the Chief Commissioner by the Chamber of Commerce at Rangoon, and provision had been made for introducing into the Bill a clause which authorized the Chief Commissioner to exempt certain classes of vessels from this compulsory obligation to which he had alluded. He might add, however, that every year there was a diminution in the practice of ships resorting to the Pegu branch, upon which the mills were situated; and they often now took up their berths in the main river, and rice was brought down to them in cargo-boats and thence shipped on board. It was also found that, with the opening of the railway, there was a prospect of the establishment of rice-cleaning mills in the interior of the country, and all rice husked and passed down by the railway (which would shortly be connected with the wharves) would of course be more conveniently and cheaply shipped from the wharves to the vessels directly. Even for those vessels which were anchored in the mid-channel of the main river, the absence of all moorings in a very dangerous tidal way would necessitate action on the part of the Commissioners to provide better security for vessels in the port. The sections under which powers had been reserved to the Chief Commissioner to exempt certain vessels from using the wharves had been accepted by the local mercantile community as quite sufficient to meet their wishes; and it might be accepted that, setting aside the export-trade altogether, the large and increasing import-trade from foreign countries would already afford regular employment to the wharf-accommodation and appliances in the port.

To enable the Commissioners to discharge the duties which were imposed upon them, all Government lands required for port purposes by section 12 were vested in them; and in addition to the tolls and charges above referred to, the port-dues and other revenues under the Indian Ports Act would be made over to them. They were also empowered to borrow money, with the sanction of the Governor General in Council, to carry out further improvements; and he had no doubt that in a short period the Commissioners to be appointed would be able to render a good account of their trust and to shew results worthy of the chief port in the Province.

The Motion was put and agreed to.

The Hon'ble MR. RIVERS THOMPSON also moved that the Bill be published in the *British Burma Gazette*, in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

STAMP BILL.

The Hon'ble MR. COCKERELL presented the final Report of the Select Committee on the Bill to consolidate and amend the law relating to Stamps. He said that, as this Bill was of some importance to the public, he thought it might be convenient that he should state, now, that he hoped to be in a position to move that the two reports of the Select Committee be taken into consideration, and, no objection arising, that the Bill be passed, at the next meeting of the Council.

CIVIL PROCEDURE CODE AMENDMENT BILL.

The Hon'ble MR. STOKES moved for leave to introduce a Bill to amend the Code of Civil Procedure, section 4. He said that section 4 of the Code of Civil Procedure saved "any local law prescribing a special procedure for suits between landlord and tenant." It had been held that the local laws here referred to were only local laws in force when the Code was passed; and this opinion was supported by the fact that, when the legislature wished to save future laws, it said so, by inserting words such as "now or hereafter in force" (Act XV of 1877, section 6). The result of the present wording of section 4 of the Code was, therefore, to debar the local legislatures from dealing with suits between

landlord and tenant. But this kind of litigation was pre-eminently matter for the local legislatures to regulate. The Bill accordingly amended section 4 so as to save clearly all laws of local legislatures, dealing with such suits, whether passed before or after the date of the Code. It also saved laws relating to the procedure in suits between landholders and their agents, such, for example, as suits for the recovery of money or the delivery of accounts or papers (Bengal Act VIII of 1869, ss. 30, 32).

The Motion was put and agreed to.

The Hon'ble MR. STOKES then introduced the Bill. He believed it had been for some days in the hands of Hon'ble Members; but as they might have overlooked it, and as it was very brief, he would read it to the Council:

"Whereas it is expedient to amend the Code of Civil Procedure, section four; It is hereby enacted as follows:—

1. In the said section, for the words 'local law' in each of the places where they occur, the words 'any law heretofore or hereafter passed under the Indian Councils Act, 1861, by a Governor, or a Lieutenant-Governor, in Council' shall be substituted; and for the words 'landlord and tenant,' the words 'landholders and their tenants or agents' shall be substituted."

The Hon'ble MR. STOKES applied to the President to suspend the Rules for the Conduct of Business. He said the matter was one of some urgency, as the Bengal Council were desirous of dealing at once with the subject of the recovery of rent, and he believed that the Hon'ble Mr. Mackenzie had already obtained leave to introduce a Bill for that purpose.

The PRESIDENT declared the Rules suspended.

The Hon'ble MR. STOKES then moved that the Bill be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill be passed.

The Motion was put and agreed to.

BURMA COAST-LIGHTS BILL.

The Hon'ble MR. STOKES also moved for leave to introduce a Bill to amend the law relating to the maintenance of Coast-lights in the eastern part of the Bay of Bengal. He said that the present coast-light dues of one anna per ton, levied under section 3 of Act XIII of 1867 (*An Act to provide for the establishment and maintenance of Coast-lights in the eastern part of the Bay of Bengal*), had been found insufficient to pay a fair rate of interest on the capital expended on the lights which at present existed on the coast of British Burma and to provide for their maintenance. Moreover, the recent total destruction of the Krishna Shoal Light-house would immediately entail a large expenditure. It had therefore been determined to raise the present coast-light dues from one anna per ton to one anna six pie, and to subject to the dues vessels making certain voyages not mentioned in the Act but in the course of which they benefited by the lights.

The Bill would repeal Act XIII of 1867 (which had already been amended) and re-enact it with the requisite alterations in respect of the coast-light dues and a few desirable changes in wording and arrangement.

The Motion was put and agreed to.

OUDH LAND-REVENUE ACT, 1876, AMENDMENT BILL.

The Hon'ble MR. COLVIN moved for leave to introduce a Bill to amend the Oudh Land-Revenue Act, 1876. He said that the Bill, a copy of which was on the table to-day, was merely a supplement to the Bill for amending the North-Western Provinces Land-Revenue Act. It consisted of a single section, by which certain advances made to agriculturists by the State (not being advances made under the Land Improvement Act of 1871) were declared to be recoverable in the same manner as arrears of land-revenue. A provision to this effect had been inserted in the Bill for amending the North-Western Provinces Land-Revenue Act which was now under the consideration of the Council; and, as the Local Government desired that a similar change should be made in the law for Oudh, the present Bill had been framed with that object. Their wishes could not be

met by the addition of any words to the Bill for the North-Western Provinces, because, although the administration of the two Provinces had been united, their codes of law remained distinct; and it would obviously be inconvenient to amend the law of one province by a section inserted in the code of another. A separate Bill therefore was necessary. The propriety of the change in the law which the Bill was intended to effect would come before the Council for consideration when the corresponding part of the measure for the North-Western Provinces was dealt with by it; and if it was determined that the change was a proper one to make, the Council would then be asked to pass the measure which he wished to introduce to-day.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 15th January, 1879.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 7th JANUARY 1879.

GENERAL REMARKS.—General prospects in Madras remain unchanged; in the Tanjore, Trichinopoly, Tinnevelly and Coimbatore districts the crops are reported to be withering from want of rain. The famine in Madras can now happily be said to be at an end, and all relief works were ordered to be closed on the 31st ultimo; on that date the total number on the works amounted to 9,615, and that in receipt of gratuitous relief to 824. In Mysore prices are falling, and the standing crops remain in good condition. There is nothing new to notice from the Bombay Presidency, where no rain has yet fallen; the weather continues generally cold. In the Central Provinces also there has been no rain, which here as in many other parts of India is needed for the *rabi*, but prospects are nevertheless on the whole fair; in the northern districts pulses have been injured by frost; prices remain high. In Berar and Central India there has been no alteration. The very general complaint of the absence of rain comes from parts of Rajputana, and prices have begun to rise. In Bengal rain has fallen only in the Chittagong district, and the want of it continues to be much felt in most of the districts of the Patna division; general prospects are however still satisfactory, except as before in Sarun and Chumparun. Rain still holds off in Assam, a very slight shower only having fallen, but prospects remain favourable. In British Burma harvesting is far advanced with satisfactory results. Rain is urgently needed in the North-Western Provinces and Oudh, but none has yet fallen; general prospects have not however changed, though the crops in places are said to be suffering. In the Punjab also rain is still much required for the *rabi* sowings, and some hopes of it may perhaps be entertained, as clouds are gathering; prices are fluctuating. The lateness of the winter rains, now anxiously looked for, in Upper India, is again the marked feature of the reports of the week.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Ganjam (Jan. 4th)	*Nil*	Rice 11·46, *raggi* 19·42, *cholum* 12·74, *cumboo* 20·43.
Vizagapatam („ „)	*Nil*	Rice 9·8, *cholum* 16·8, *raggi* 18·0, *cumboo* 20·6.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Godávari (Jan. 4th)	*Nil*	Rice 10·23, *cholum* 16·6, *raggi* 18·82, *cumboo* 19·6; harvest, wet paddy, *aruga* and *raggi*, outturn above average; *jonna* in ear; water in Godávari 6 feet 9 inches above lock sill.
Kistna („ „)	·04 in one station; *nil* in others.	Rice 8·11, *cholum* 16·25, *raggi* 15·75, *cumboo* 15·32; Kistna 3·1 feet over anicut; later dry crops require rain; wet paddy being harvested, outturn ¾.
Nellore („ „)	·4 (average of 8 stations); *nil* in others.	Rice 8·61, *cholum* 18·91, *raggi* 17·96, *cumboo* 19·0.
Cuddapah („ „)	*Nil*	Rice 10·93, *cholum* 18·87, *raggi* 20·20, *cumboo* 21·69; *cholum*, *cumboo*, paddy and *raggi* harvested. outturn ½.
Bellary („ „)	*Nil*	Rice 11·65, *cholum* 17·53, *raggi* 20·44, *cumboo* 18·38; on works 648; camps 269; the harvest of *mungari* crop and the sowing of *hingari* crop completed; the harvest of first crop paddy and the cultivation of second crop paddy proceeding.
Kurnool („ „)	*Nil*	Rice 9·41, *cholum* 15·99, *raggi* 20·0, *cumboo* 17·45; season favourable; second crop paddy being sown; cotton, white *cholum*, wheat, Bengal gram, and gram in fair condition.
North Arcot („ „)	·13 (average of 4 stations); *nil* in others.	Rice 12·5, *cholum* 14·2, *raggi* 17 6, *cumboo* 17·8; camps and houses 305; crops generally good; harvest of paddy, *raggi*, *varagu* and indigo, outturn tolerable.
South Arcot ...	·44 (average of 4 stations); *nil* in others.	Rice 11·25, *cholum* 18·14, *raggi* 20·60, *cumboo* 20·99; camps 7; paddy, *raggi*, *cholum* and *varagu* good; paddy, *raggi*, *varagu* and *cholum* harvested in parts, outturn from ½ to ¾ of full crops.
Tanjore (Jan. 4th)	1·70 in 1 station; no report from one, *nil* in others.	Rice 8·05, *cholum* 13·37, *raggi* 14·73, *cumboo* 13·96; Cauvery and its branches almost dry; wet and dry crops require more rain, in some parts they are withering; harvest of *kar*, *kaltali*, *aravadam*, *samba*, &c., outturn ¼ to full.
Trichinopoly („ „)	·05 in one station; *nil* in others.	Rice 9·0, *cholum* 11·90, *raggi* 16·38, *cumboo* 16·74; crops withering; rain much wanted; paddy, *cholum*, *cumboo*, *raggi* and *varagu* harvested in parts; yield between 4 and 9 annas.
Madura („ „)	*Nil*	Rice 8·88, *cholum* 14·98, *raggi* 17·59, *cumboo* 18·14.
Tinnevelly („ „)	·10 in one station; *nil* in others.	Rice 8·64, *cholum* 13·44, *raggi* 20·16, *cumboo* 16·80; crops in many parts of the district—river valley excepted—reported to be withering for want of rain which is urgently required; crops in Sankaranainarkoil, Tenkasi, Satur, Ambásamudram, Tinnevelly and Ottaipidaram greatly damaged by grasshoppers and other insects; paddy harvested in parts of Srivilliputur, outturn ¼ to ⅓; harvest of *raggi*, *varagu* and *samai* in parts, outturn poor.
Coimbatore („ „)	*Nil*	Rice 10·65, *cholum* 16·24, *raggi* 20·36, *cumboo* 21·42; standing crops generally good except damage to some crops which are withering from deficient rain, insects and disease in portions of 7 taluks; harvest of some dry crops—outturn 2 to 12 annas.
Nilgiris („ „)	·05 in one station; *nil* in 2; no report from others.	Rice 8·16, *cholum* 15·99, *raggi* 16·06; harvest of *kurali* paddy and coffee—outturn of *korlai* ¾.
Salem („ „)	·38 (average of 3 stations); no report from 2 stations; *nil* in others.	Rice 10 84, *raggi* 17·69; *cumboo* 20·44, *cholum* 15·01; on works 1,490, camps 37.
South Canara („ „)	·52 (average of 3 stations).	Rice 10·79, *raggi* 14·73; second rice crop progressing.
Malabar („ „)	·02 in one station; *nil* in others.	Rice 9·25, *raggi* 15·76; harvesting begun in most taluks.
Chingleput („ „)	·07 (average of 2 stations); *nil* in others.	Rice 9·40, *raggi* 15·56, *cumboo* 15·52, works 956, children 206; crops good where water is available, withered in Chingleput and Saidapet taluks, and withering elsewhere for want of rain; *kar* cultivation is going on under large tanks and river channels; harvested in parts, outturn from ½ to ¾; pasturage sufficient in all the taluks except Saidapet.
Madras („ 7th)	·12	Rice 8·30, *raggi* 15·75, *cholum* 9·36. *General Remarks.*—General prospects continue unchanged; all relief works ordered to be closed on 31st ultimo; total number on works on that date 9,615; total number gratuitously relieved 824.
Bombay—(Jan. 8th)		
Sind—		
Kurrachee ...	...	River on 6th very low; some damage by frost in Dáder and Kacha, but no considerable effect from it anticipated; fever prevalent.
Shikárpur ...	...	No report.
Hyderabad ...	...	No change.
Upper Sind Frontier...	...	Weather cloudy and cold; *rabi* crops slightly damaged by frost; cattle disease in Thul and Kashmor taluks.
Guzerat—		
Ahmedabad ...	...	Locusts appeared in Viramgam last week causing much damage to crops.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Pánch Maháls ...	...	Weather slightly cloudy; gram progressing fairly.
Kaira ...	...	*Rabi* crops doing well; cotton thriving.
Surat ...	...	Standing crops doing well.
Broach ...	...	Weather continues cold and clear; crops saved from locusts and *khapedi* are tolerably good; fever continues in Broach, Wagra and Ankleswar talukas.
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	
Konkan—		
Tanna ...	...	*Rabi* crops promising; fever prevailing.
Colába (Jan. 6th)	...	Weather cold; public health good except in Pen taluka where fever continues; sowing of *rabi* crops vigorously progressing.
Ratnágiri (Dec. 31st)	...	*Rabi* crops in a pretty good condition.
Deccan—		
Poona (Jan. 5th)	...	No change.
Ahmednagar ...	...	Crops good but rain wanted at Kopargaon and also for crops in the poor soil elsewhere.
Sholapur ...	...	General complaint of injury to *jowari* crops by rats; crops middling.
Satara ...	...	No change.
Southern Mahratta Country—		
Kaládgi ...	...	No change.
Belgaum ...	...	Reaping of *kharif* completed; *rabi* thriving; rats damaging *rabi* in Athni and Gokák.
Dharwar ...	...	No report.
Kanara ...	...	Harvesting of sugarcane crop above ghât.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather not so cold as in last week; wheat and gram thriving.
Wadhwán ...	...	Weather cold; locusts at Jhinjhuwara, Dasára, and Limri; crops as before; fever abating.
Baroda ...	...	Weather milder; fever abating. *General Remarks.*—Weather generally continues cold; standing crops in Guzerat doing well; no change in Deccan or Southern Mahratta Country districts.
Bengal—		
Chittagong ...	0·16; showers on the nights of the 31st ultimo and 1st instant.	Weather cloudy at the time of report; the harvesting of the late rice crop continues; the threatening wet weather may cause some damage; small-pox and cholera have broken out in the Cox's Bazar sub-division.
Noakholly ...	*Nil*	Mornings foggy, weather more or less cloudy and cold; the reaping of the *amun* crop is nearly completed; the outturn is good.
Chittagong Hill Tracts...	*Nil*	Weather very cold throughout the week; cloudy on the morning of the 31st December; the mustard is in flower; tobacco is thriving well.
Hill Tipperah ...	*Nil*	Weather dry and cold; no change in the state and prospects of the crops since last report; public health is good.
Backergunge ...	*Nil*	Weather cloudy and seasonably cold; the *amun* crop has been reaped on the higher lands; the harvest is still progressing in the south of the district; the outturn is very satisfactory; new rice is selling at Rs. 3-8 a maund; health is fair.
Furreedpore ...	*Nil*	Weather cloudy at intervals; the state and prospects of the crops are good; the reaping of the *amun* paddy is finished in some and nearly finished in all the stations of the sudder sub-division; no news from Goalundo; in Madareepore some cases of small-pox are reported.
Dacca ...	*Nil*	Weather cloudy and close towards the end of the week; the state and prospects of the crops are good; the ryots complain of some damage by insects which always accompany the cloudy weather, but it is slight; prices keep very high.
Mymensingh ...	*Nil*	Temperature high for the season; the cold-weather crops promise fairly.
Tipperah ...	*Nil*	Weather fair and cold during the first part of the week; warm and cloudy during the last part; very little of the *amun dhan* remains to be reaped.
24-Pergunnahs ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable; cholera and fever are abating.
Jessore ...	*Nil*	Weather seasonably cold; the *amun* harvest is going on with fair outturn; the prospects of the winter crops are favourable; fever is very prevalent; sporadic cases of cholera are reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Nuddea ...	*Nil*	Weather much warmer than last week; the prospects of the winter crops are on the whole good; the *amun* harvest is nearly completed; fever is still prevalent in many places, and cholera to a less degree, except in and about the town of Kishnaghur, where it is very bad.
Moorshedabad ...	*Nil*	Clouds have been hanging about for the last few days, and the weather has been getting warmer; the *amun* harvest is finished; the yield is very good; a considerable quantity of the new rice is being exported by rail to Calcutta; the river is probably carrying still more; the *rabi* crops are doing well.
Pubna ...	*Nil*	Weather fine but cloudy; no change in the prospects of the crops; public health is generally good.
Rajshahye ...	*Nil*	The *dhan* and *teel* crops are still being harvested; the *rabi* crops are thriving, but some rain is required; fever is reported from all the police stations.
Bogra ...	*Nil*	Weather seasonable; no change to report in the state and prospects of the crops; the reaping of *amun* is nearly finished; sporadic cases of cholera prevail in the district, and small-pox has appeared in Adamdighi station.
Dinagepore ...	*Nil*	Weather fine generally, but cloudy for one or two days; the *rabi* sowings have been completed; the prospects of the winter crops remain good; *haimanta* rice is selling at 13 to 19 seers the rupee.
Rungpore ...	*Nil*	The weather was cloudy on the 2nd with a few drops of rain; the state and prospects of the crops are satisfactory; cholera is still prevalent in parts of the district.
Cooch Behar ...	*Nil*	Weather getting colder; a little rain is now needed, but not heavy; rice is getting dearer; the *haimanta* outturn is, however, very fair; the cold-weather crops are looking well.
Jalpáiguri ...	*Nil*	Weather bright, with hot sun; the mornings and evenings are cool; the *haimanta dhan* is now nearly all gathered, as well as the early sugarcane; the transplanting of tobacco is nearly completed; *teel* and *kalai* have been gathered and the outturn has been very fair; mustard is in flower.
Darjeeling ...	*Nil*	Weather very cold; cloudy atmosphere, threatening rain or snow; nearly half of the *haimanta dhan* has been gathered in and the outturn is very good; the minor crops are progressing favourably.
Midnapore ...	*Nil*	Weather not so cold as in the previous week; the state and prospects of the crops are favourable; public health is still bad, owing to the prevalence of malarious fever.
Howrah ...	*Nil*	Weather rather too warm for the season; the harvest is nearly complete; prices still keep up in spite of the good outturn; much fever prevails.
Hooghly ...	*Nil*	Weather clear throughout the week, except on the 30th December, when it was cloudy; cold, the wind blowing from the north; the harvesting of *amun* paddy is in progress; the prospects of the cold-weather crops are generally good; fever has somewhat abated.
Burdwan ...	*Nil*	Weather chilly and fair, but sometimes cloudy; the *amun* crop is still being reaped; the prospects of the *rabi* crops are favourable; fever and small-pox are prevalent in some parts of the Jehanabad sub-division.
Bankoora ...	*Nil*	Weather clear, but warmer; no change in the state and prospects of the crops since last report.
Beerbhoom ...	*Nil*	Weather somewhat warmer than last week; no change to report in the excellent prospects of the crops.
Sonthal Pergunnahs ...	*Nil*	Weather fine, but warmer; the state and prospects of the crops are very satisfactory; the reaping of the late rice is still going on; sugarcane is being cut.
Bhágalpur ...	*Nil*	Weather cool and seasonable; the rice crop is nearly harvested in the south; the harvest is in full swing in the north; the outturn is beyond the most sanguine expectations; exportation is going on largely and prices perhaps are falling a little; the *rabi* is in a very promising state.
Monghyr ...	*Nil*	Weather warm for the time of year; the state and prospects of the crops are very good.
Purneah ...	*Nil*	Weather cloudy at times, but no rain; the prospects of the *rabi* crops are generally good; rain is wanted in places.
Maldah ...	*Nil*	Weather cloudy and foggy; the harvesting of the rice crop is not yet completed; the cold-weather crops are doing well; a few sporadic cases of cholera are reported; fever is still prevalent.
Durbhunga ...	*Nil*	Weather dry and becoming warmer; the rice harvest has been almost completed; the outturn is on the whole good; the *rabi* crops promise well, but rain is everywhere wanted.
Mozufferpore ...	*Nil*	Weather cold and clear; the state of the *rabi* crops continues favourable; large flights of locusts passed through the district in the early part of the week, but without doing much harm.
Sarun ...	*Nil*	Weather seasonably cold; west wind is prevailing; the cold-weather crops are still doing well, but rain is urgently required to promote their growth; irrigation from wells is steadily going on where practicable; the poppy is everywhere backward; prices are stationary; the public health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Chumparun ...	Return not received.	Weather seasonable; the prospects of all crops north of Motihari are very promising; the *rabi* crops in the remaining portion of the district are very poor; the Sub-Deputy Opium Agent of Motihari reports that 20,000 beegahs out of 75,000 are a failure.
Patna ...	*Nil*	Weather seasonable; no change in the state and prospects of the crops since last report.
Gya ...	*Nil*	Weather seasonable; the maximum reading of the thermometer in the shade was 77°; the prospects of the *rabi* crops continue to be favourable; the public health is good; the health of the plough-cattle is also good.
Shahabad ...	*Nil*	Weather rather warm for the season; no change since last week; the prospects of the *rabi* crops continue good; public health is normal.
Hazáribágh ...	*Nil*	Weather fine and cold; the rice crop has been cut; the outturn is about 12 annas; the prospects of the *rabi* crops are satisfactory.
Lohardugga ...	*Nil*	Weather seasonable; no change to report; the cold-weather crops promise well.
Manbhoom ...	*Nil*	Weather seasonable; nothing new to report; if the weather keeps up, a good *mohwa* harvest may be expected a month hence.
Singhbhoom ...	*Nil*	Weather inclining to change and warmer than last week; the paddy is all harvested; the *rabi* crops are doing fairly; prices are high owing to exportation; fever is prevalent in the interior.
Balasore ...	*Nil*	Weather cool and seasonable; the rice crop is now seen to be a decidedly fair one, but the late and untimely rains in November and December have prevented it from being a bumper harvest as was at one time expected.
Cuttack ...	Return not received.	Weather cold; the reaping of the rice and *rabi* crops is going on briskly; cholera and fever are prevalent.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice is being harvested; *dalua* rice is being sown; the winter crops are progressing tolerably well; common rice is selling at 15¾ to 26¼ seers for the rupee; one native coasting vessel is being loaded with rice for shipment, and two more are waiting for cargo; public health is good.
		General Remarks.—Rain has fallen only in the Chittagong district; it is much wanted in most of the districts of the Patna division; the reaping of the late rice is being fast completed, and the outturn is on the whole satisfactory; the prospects of the cold-weather crops continue generally favourable; in Sarun and Chumparun however the prospects of the season are not so good; the rice has been a poor harvest, and the poppy and *rabi* crops are also not promising well.
N. W. P. and Oudh—		
(Jan. 8th)		
Benares (Jan. 7th)	...	**No change; rain badly wanted.**
Allahabad („ „)	...	No change.
Jhánsi („ 8th)	...	Crops on unirrigated lands are suffering from want of rain.
Agra („ 7th)	...	Rain much wanted for *rabi*; *arhar* injured in some places; sickness disappearing.
Meerut („ 8th)	...	Prospects yet unchanged; rain wanted.
Bareilly („ „)	...	No change.
Kumaun („ 4th)	...	Very dry; rain urgently required.
Lucknow („ 8th)	...	Rain wanted.
Sitapur („ „)	...	Wind east; cloudy; rain much needed.
Fyzabad („ „)	*Nil*	Irrigation continues; sugarcane in harvest in excellent crop.
Partabgarh („ 6th)	...	Prospects good, but rain much wanted.
		General Remarks.—No change during week; rain urgently wanted.
Punjab—(Jan. 7th)		
Delhi ...	*Nil*	Agricultural prospects fair; fever decreasing; rain wanted; prices of food grains rising.
Hissar ...	*Nil*	Crops thriving but rain wanted; slight variations in prices of food grains; health generally good.
Umballa ...	*Nil*	Crops now in need of rain; health good.
Jullundur ...	*Nil*	Health improving; rain wanted for the crops.
Amritsar ...	*Nil*	Health improving; *rabi* sowings require rain; prices of food grains stationary.
Lahore ...	*Nil*	Fever abating; state of crops good.
Ráwalpindi ...	*Nil*	Fever, small-pox and cattle disease still prevail; rain required for *rabi* crops.
Mooltan ...	*Nil*	Agricultural prospects and public health good; prices of food grains fluctuating slightly.
Dera Ismail Khan ...	*Nil*	Health improving; rain wanted.
Pesháwar ...	*Nil*	Harvest prospects good; prices of food grain have fallen slightly.
		General Remarks.—Rain is now wanted for the *rabi* sowings and may be looked for, as weather is becoming cloudy.
Central Provinces—		
(Jan. 9th)		
Nimár ...	...	*Rabi* prospects favourable; health good.
Hoshangabad ...	...	Cool; no improvements in crops.
Betúl (Jan. 6th)	...	Cloudy; rain needed for *rabi*; cattle disease slightly prevalent; prices of *kodo* and *kutki* fallen.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
C. Provinces—*contd.*		
Wardha ...	...	Cotton-picking nearly finished; *rabi* favourable; prices steady.
Nágpur (Jan. 8th)	...	Clear; cold; prospects of *rabi* doubtful; health good; prices unchanged.
Chánda („ 5th)	...	Clear; cold; prospects unchanged; health good; prices stationary.
Chhindwára („ 4th)	...	Clear; pleasant; *kharif* harvest good; *rabi* prospects fair; health good; prices steady.
Narsinghpur ...	...	*Rabi* injured by frost; prospects fair as yet; health good; prices high.
Bhandára (Jan. 7th)	...	Clear; cold; rice threshing nearly completed; outturn very good; prices continue high.
Seoni ...	...	*Tur* injured by frost; prospects of wheat bad.
Bálaghát ...	...	Clear; cold; rice threshing continues; fever slightly prevalent; prices steady.
Mandla ...	...	Rain wanted; prospects favourable; health good; prices stationary.
Saugor ...	...	Rain much wanted; wheat unfavourable; pulses injured by frost; prices unchanged.
Damoh ...	...	Rain wanted; crops injured by frost; health good; prices falling.
Jubbulpore ...	...	Clear; cold; rain much wanted for *rabi*; small-pox continues; prices risen.
Raipur (Jan. 4th)	...	Cool; cloudy; *tur* injured by cloudy weather; prospects of other crops favourable; small-pox and cattle disease prevalent; prices stationary.
Sambalpur („ 3rd)	...	Prospects good; cholera ceased. *General Remarks.*—Rain wanted for *rabi*; pulses injured by frost in northern districts; prospects of *rabi* on the whole fair as yet; prices high and stationary.
British Burma— **(Jan. 8th)**		
Arakan Division ...	...	Public health continues normal; fever prevalent; 7 deaths from cholera in town; in district reaping continues, outturn fair.
Pegu Division— **(*Dec. 28th*)**		
Rangoon ...	...	Two deaths from cholera in Rangoon town; in Rangoon district; reaping rapidly progressing; an unusually full crop expected; slight fever prevalent, otherwise public health good.
Rangoon (Jan. 4th)	...	Four fatal cases of small-pox in Rangoon town; reaping rapidly progressing, an unusually full crop is expected; intermittent fever prevalent in Hmawbee.
Thonkwa ...	...	Health generally good; reaping continues, outturn promises to be better than that of last year.
Thonkwa (Jan. 4th)	...	Health generally good; slight cholera in Phyapoon township; reaping progressing rapidly; excellent outturn expected.
Tharrawaddy ...	...	Public health fair; reaping continues; small-pox at Mengyee, otherwise public health good; paddy almost reaped and stacked.
Bassein ...	...	Sixteen deaths from cholera in district from 13th to 26th December; reaping progressing.
Henzada ...	...	Six deaths from cholera; otherwise public health good; slight cattle disease; reaping progressing.
Prome ...	...	Seventeen cases of cholera in Shwedoung, 10 fatal; elsewhere public health good; harvest nearly over.
Thayetmyo ...	...	General health normal; reaping going on.
Tenasserim Division— Amherst ...	...	Crops nearly all reaped; threshing commenced in some places; 4 cases of cholera reported from Gyen and Salween; few deaths of cattle from sorethroat in one township.
Shwegyeen ...	...	Fever prevalent; crops good.
Tounghoo ...	...	Four cases of cholera, otherwise public health fair; agricultural prospects good.
Tavoy (Dec. 14th)	...	Public health and prospects of crops good. *General Remarks.*—Health good on the whole, but cases of cholera and a few of small-pox occurring; harvesting far advanced and outturn generally favourable.
Assam—		
Gauháti (Jan. 8th)	·09	Weather seasonable; at present overcast and threatening; reaping of the *sali* nearly over.
Sylhet („ „)	*Nil*	Harvesting not finished; transplanting of *bura* going on; prices stationary.
Mysore and Coorg— **(Jan. 8th)**	...	Standing crops are in good condition; prices falling; for week ending 28th December gratuitously relieved in hospitals 806.
Hyderabad Assigned Districts—		
Amráoti (Jan. 8th)	...	Reaping nearly completed; *rabi* doing well.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India—		
Indore ...	*Nil*	No change since last report.
Morar ...		
Sutna ...		
Goona ...		
Rutlam ...		
Neemuch ...		
Agar ...		
Sirdarpore ...		
Nowgong ...		
Bhopal ...		
Mánpur ...		
Rajputana—		
Marwar (Dec. 28th)	...	Health and crops good; weather cold and seasonable; prices steady.
Jhallawar (Jan. 2nd)	...	Health good.
Ajmere („ 8th)	...	Weather cloudy; rain much wanted; prospects favourable; prices slightly risen; health improving.
Jeypore ...	...	Rain much needed; prices rising; health good.
Ulwur (Jan. 7th)	...	Weather cloudy; health improving.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACKNOWLEDGMENT OF THE SERVICES OF MAJOR-GENERAL W. A. CROMMELIN, C.B., R.E.

No. 35 E. G., dated Fort William, 9th January 1879.

From—Colonel J. Crofton, R.E., Deputy Secretary to the Government of India, P. W. Dept.,
To—Major-General W. A. Crommelin, C.B., R.E.

I am directed by the Viceroy and Governor General in Council to inform you that His Excellency in Council has been pleased to accept your resignation of the office of Secretary to the Government of India, in the Public Works Department, which you have tendered on the occasion of your retirement from the Army.

2. It is not within the province of the Government of India, in the Public Works Department, to comment on your distinguished military services in the Punjab, and subsequently in the Mutiny of 1857, but His Excellency in Council desires, in this place, to put on record his high sense of your valuable services in the Public Works Department, more especially as Chief Engineer in Oudh, and afterwards as Inspector General of Military Works, and Deputy Secretary to the Government of India, in the Military Works Branch of the Public Works Secretariat.

3. Your services in connection with the provision of accommodation for the European troops in India command the special acknowledgment of the Government. Your thorough acquaintance with the real wants of the soldier, in respect to barracks, enabled you to give the Government advice of the utmost value, and your notes and reports on this subject, as well as on the defences and fortresses of India, remain in the archives of the Public Works Department as a guide and text-book of information for your successors.

GOVERNMENT

DEPARTMENT OF REVENUE,

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 14th JANUARY 1879.

GENERAL REMARKS.—Nothing worthy of note has occurred in Madras during the week; nor has there been any material change in the Bombay Presidency, where rain still holds off. In Mysore the standing crops continue to be good and prices are stationary. In the Central Provinces the prospects of the *rabi* are as yet on the whole fair, but rain has not fallen and is wanted in the northern districts; prices continue high. In Berar the prospects of the *rabi* are favourable. In Central India rain has fallen only at Gwalior and Goona, and in Rajputana there has been a slight and insufficient fall at Jeypore alone; the want of rain is still much felt. In Bengal the rainfall has been confined to a few districts and was very insignificant; except, as before in Sarun and Chumparun, general prospects remain satisfactory, but if rain does not fall speedily the *rabi* harvest in many parts of the Patna division will be deficient. A slight shower of rain fell in Assam, where prospects are good. The harvest in British Burma is nearly complete. In the N.-W. Provinces and Oudh light rain has fallen throughout the Agra division and in the Jhansi, Lucknow and Sitapur districts, also in Kumaun; this has been very beneficial, but more rain is much needed. In the Punjab the weather has continued to be cloudy, but up to the 14th instant there had been no rain, which is now greatly required.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Jan. 11th)	*Nil*	Rice 8·32, *cholum* 15·61, *raggi* 16·18, *cumboo* 16·0; ague prevalent cholera spreading slightly; small-pox here and there; 2·6 feet water over anicut; standing crops generally doing well; *varige* requires rain; rice crop being harvested, outturn ¾ to full.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Kurnool (Jan. 11th)	...	Rice 9·41, *cholum* 15·99, *raggi* 20·0, *cumboo* 17·45; fever prevalent; season favourable; second crop paddy being sown; cotton, white *cholum*, Bengal gram, wheat and grain in fair condition.
Tanjore („ „)	·17 in one station on 5th, no report from one, *nil* in others.	Rice 8·02, *cholum* 13·37, *raggi* 14·87, *cumboo* 13·12; private charity about 130; Cauvery and its branches almost dry; wet and dry crops require more rain in some parts, and are withering; harvest of *kodaikalattan, vadeusamba, raggi, varagu*, &c., outturn ⅝ to ¾.
Madura („ „)	*Nil*	Rice 9·14, *cholum* 14·31, *raggi* 18·47, *cumboo* 17·86.
Malabar („ „)	*Nil*	Rice 9·21, *raggi* 15·76; prices of rice risen in 2 stations, fallen in 3, and stationary elsewhere; small-pox in 5 taluks; cattle disease in Walluvanad; harvesting of second crop in progress in most taluks.
		General Remarks.—There is nothing particular to note in the general situation.
Bombay—(Jan. 15th)		
Sind—		
Kurrachee ...	...	River still very low; harvesting of late *kharif* commenced; *rabi* prospects fair.
Hyderabad ...	...	Small-pox in Naushahro; cattle disease in 2 talukas; crops damaged by frost in Sakrand taluka.
Guzerat—		
Ahmedabad ...	...	Locusts continue in portions of Viramgam taluka; in Dhandhuka, Viramgam and Gogo talukas cold-weather crops have suffered considerably; Dholka, Sanand and Parantij talukas fare well.
Páneh Maháls ...	...	Weather unseasonable, warm and cloudy.
Surat ...	...	No change.
Broach ...	...	
Khandesh and Násik—		
Khandesh ...	...	
Násik ...	...	
Konkan—		
Tanna ...	...	*Rabi* crops good; fever throughout district.
Colába (Jan. 13th)	...	Weather cold; public health good, except in Pen taluka, where fever continues; *rabi* sowing completed.
Ratnágiri („ 7th)	...	*Rabi* crops pretty good.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Crops good; rain wanted at Kopargaon and for crops in poor soil elsewhere; crops destroyed by rats in some places in 3 talukas.
Sholapur ...	...	No change.
Satara ...	...	*Rabi* and *bagayat* crops promising; public health good.
Southern Mahratta Country—		
Kaládgi ...	...	*Ragi* crops middling, injured by rats; fever continues.
Belgaum ...	...	Considerable damage being done to *rabi* crops by rats in Gokák, Parasgad and Athni talukas.
Dharwar ...	...	No change in crops and public health.
Kanara ...	...	Second crops fair; fever prevalent.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather continues mild; locusts in Nawánagar taluka.
Wadhwán ...	...	Weather cold; locusts in Pátri and Wanod; state of crops same as before; fever abating.
Baroda ...	...	Fever abating.
		General Remarks.—No material change from last week; rain wanted in Ahmednagar for poor crops; some damage from rats in Ahmednagar, Kaladgi and Belgaum districts, and from frost in Hyderabad and Ahmedabad.
Bengal—(Jan. 14th).		
Chittagong ...	*Nil*	Weather fair; the cold-weather crops are doing well; prices have fallen.
Noakholly ...	*Nil*	Weather seasonable; the reaping of the *amun* crop is nearly completed; the outturn is good; the state and prospects of the *rabi* crops are good; a few cases of cholera are reported.
Chittagong Hill Tracts...	0·20	Weather rather cold; foggy in the morning throughout the week; the mustard is in flower; tobacco is thriving well.
Hill Tipperah ...	0·11	Weather seasonably cold; the late rice crop and the mustard are being reaped; prospects are good; prices have slightly fallen.
Backergunge ...	*Nil*	Weather seasonable; the *amun* harvest is almost finished, the outturn is very good; new rice is selling at Rs. 3-6 to Rs. 3-8 per maund; fever is reported as prevalent in the Dukhin Shabazpore Sub-division and Jhalakatty.
Furreedpore ...	*Nil*	Weather clear and cold; the reaping of *amun* is over in the Sudder Sub-division; the winter cereals are doing well; some cases of cholera are reported from thana Gopálganj.
Dacca ...	*Nil*	Weather cloudy and warm, not seasonable; the state and prospects of the crops are favourable.
Mymensingh ...	*Nil*	No change to report in the state and prospects of the crops since the last report.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Tipperah ...	*Nil*	Weather fair; scarcely any of the *amun* remains uncut; the minor crops promise well.
24-Pergunnahs ...	*Nil*	Weather warm for the season; foggy mornings; the state and prospects of the crops are favourable; cholera and fever are abating.
Jessore ...	*Nil*	Weather seasonable; the prospects of the crops are favourable.
Nuddea ...	*Nil*	Weather warmer than last week; the *amun* harvest is nearly over and the crop has been a good one; the winter crops are generally in good condition; fever is still severe in parts of the district.
Moorshedabad ...	*Nil*	Weather rather warm for the time of year; the state and prospects of the crops are satisfactory.
Pubna ...	*Nil*	Weather fine and seasonable; the harvesting of *amun dhan* has been completed with satisfactory results; the other crops promise well; public health is fair.
Rajshahye ...	*Nil*	The paddy crop is still being harvested; the *rabi* crops are thriving, but rain is much required; cases of cholera are reported from Bagmara and Singra stations.
Bogra ...	*Nil*	Weather cloudy; north wind is prevailing; the state and prospects of the crops continue the same as previously reported; cholera in Shériakándi, Sheopore, Bogra, and Dhunat, and small-pox in Adamdighi, are still prevalent.
Dinagepore ...	0·05	Weather fine; the reaping of rice still continues; about 4 annas of the crop remain to be cut; the prospects of the winter crops continue favourable.
Rungpore ...	*Nil*	Weather less cold than usual at this time of the year; nights foggy; the *amun* harvest is nearly over; the state and prospects of the crops on the ground continue good; cholera still prevails in parts of the district
Cooch Behar ...	*Nil*	Weather colder every day; a smart north-east wind in the mornings and evenings; the skies look cloudy; there may be a little rain soon; the prospect of the cold-weather crops is very fair.
Jalpáiguri ...	*Nil*	Weather bright and still hot for the time of year; the *haimunta dhan* has been gathered, except in Boda; tobacco is doing well; rain is required for mustard and wheat, which are somewhat backward; cultivation for *bhadoi* is progressing.
Darjeeling ...	*Nil*	Weather chilly, cold and misty; the *haimunta* rice has nearly all been harvested, and all the minor crops are progressing favourably.
Midnapore ...	*Nil*	Weather warm for the time of the year; the south wind has begun to blow, and the thermometer reaches 76° in the day time; the reaping of the *amun* crop is almost completed; the prospect of the winter crops is satisfactory; public health still suffers from malarious fever.
Howrah ...	*Nil*	Weather seasonable; the *amun* harvest is nearly complete; the few crops on the ground are doing well.
Hooghly ...	*Nil*	Weather clear and cool; wind from the north; the harvesting of the *amun* crop is nearly at an end; the outturn is good; the winter crops are generally doing well; fever still prevails; cholera is reported to have appeared in Gooptiparah, in thana Balaghur.
Burdwan ...	*Nil*	Weather bright and cold; the *amun* crop is still being reaped in some places; the *rabi* crops look favourable; fever still continues in some parts of the Culna and Bood-Bood sub-divisions.
Bankoora ...	*Nil*	Weather clear and warm; heavy fog on the morning of the 10th the prospects of the crops continue good; fever is abating in some parts of the district.
Beerbhoom ...	*Nil*	Weather warmer than usual at this time of the year; the harvest is well on, and the crop is everywhere a very heavy one; prices are still high.
Sonthal Pergunnahs ...	A few drops of rain on 11th instant.	Weather fine till the 11th, the state and prospects of the crops are the same as before.
Bhágalpur ...	*Nil*	Weather seasonably cold; the harvesting of paddy is nearly over; the prospects of the *rabi* crops are favourable; prices are stationary; exportation continues brisk; general health is good.
Monghyr ...	*Nil*	Weather cold, with east wind and fog; the prospects of the crops are good.
Purneah ...	Partial rain on the 10th.	Weather seasonable; the prospects of the crops are good.
Maldah ...	0·32	Weather ordinarily fair, but the cold is not felt so keenly this year as in previous years; the reaping of the winter paddy is in progress; wheat and other plants of the season are thriving; the public health is good.
Durbhunga ...	*Nil*	Weather seasonable; the *dhan* harvest is nearly completed; the *rabi* crops promise well, but require rain; prices are rising steadily.
Mozufferpore ...	*Nil*	Weather mild and cloudy; rain is much wanted for the *rabi* crops in most parts of the district, and unless it falls soon, the prospects of a good harvest are not likely to be realized.
Sarun ...	*Nil*	Weather clear and cold in the beginning and cloudy towards the close of the week; the mornings are generally foggy; west wind is prevailing; the cold-weather crops are thriving well, but rain is urgently required to promote their growth, and the want of it threatens to affect them seriously even the *rahar* plants, which hitherto have thriven well in spite of the drought, are now begin-

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
		ning to suffer; the poppy is being irrigated from wells where practicable; prices are stationary; the public health is good.
Chumparun ...	*Nil*	Weather seasonable; the prospects continue unchanged; rain would be of great benefit to the *rabi*.
Patna ...	*Nil*	Weather not so cold as in the previous week; the *rabi* crops promise well, but rain is everywhere wanted; the rice crop is nearly harvested.
Gya ...	*Nil*	Weather seasonable; the maximum reading of the thermometer in the shade was 80·5°, about three-fourths of the *kharif* crops have been cut; the prospect of the *rabi* is favourable, but a little rain is wanted; the public health is good; the health of the plough cattle is also good.
Shahabad ...	Very slight rain in the morning of the 10th.	Weather cloudy on the 9th and 10th; seasonably cold; the *rabi* crops are doing well, some rain now will do them good; public health is good.
Hazáribágh ...	*Nil*	Weather fine, but warmer; cloudy on the 10th; the prospects of the crops are at present satisfactory.
Lohardugga ...	*Nil*	Weather warmer than usual at this time of year; the prospects of the *rabi* crops are unchanged; *rahar* has been much damaged by frost, especially in the Palamow sub-division; cases of small-pox and fever are reported here and there.
Manbhoom ...	*Nil*	Weather very warm for this time of the year; nothing new to report; the standing crops are reported to be good from all directions; general health is also good.
Singhbhoom ...	*Nil*	Weather warm for the time of year; the *rabi* crops are doing well; prices are still high owing to exportation.
Balasore ...	*Nil*	Weather growing warmer by day; heavy dew at night; the harvest still proceeds, and reaping on the low plains has commenced; much mortality is still caused by the destructive malarious fever, which has attacked the district.
Cuttack ...	*Nil*	Weather cold; no change regarding the crops and public health since last report.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice is being harvested; *dalua* rice is being sown; common rice is selling at 15¾ to 26¼ seers for the rupee; three coasting vessels are being loaded; public health is good.
		General Remarks.—There has been very slight rain in a few districts only during the week; the *amun* crop is almost all reaped, and the outturn is generally satisfactory, except in Sarun and Chumparun, as before reported; the *rabi* crops are still generally in good condition, but unless rain falls soon, the harvest in many places in the Patna division will not be a good one; rain is also much required for these crops in Rajshahye and Jalpáiguri.
N. W. P. and Oudh—(Jan. 15th)		
Benares (Jan. 11th)	...	Rain badly wanted; dry crops beginning to suffer.
Allahabad („ „)	...	No change.
Jhánsi („ 15th)	·4 on 13th instant.	Rainfall, though slight, will do immense good to *rabi*.
Agra („ 14th)	Light rain throughout division.	Rain has done much good; fever very much reduced.
Meerut („ „)	*Nil*	Prospects unchanged.
Bareilly („ „)	...	No change; rain much wanted.
Kumaun („ 11th)	Slight shower on 9th instant.	Cloudy; rain much wanted but there is early prospect of rain coming.
Lucknow („ 15th)	·2 at sadr.	
Sitapur („ „)	Slight drizzle on 12th instant.	Rain needed.
Fyzabad („ „)	*Nil*	Irrigation continues.
Partabgarh („ 13th)	*Nil*	Prospects good, but rain much needed.
		General Remarks.—Rain in parts which has done much good; more much wanted.
Punjab—(Jan. 14th)		
Delhi ...	*Nil*	Prospects fair; fever decreasing; rain wanted; slight fluctuations in prices of food grains.
Hissar ...	*Nil*	Crops thriving, but rain much needed; weather cloudy; health generally good; slight variations in prices of food grains.
Umballa ...	*Nil*	Public health and state of crops good.
Jullundur ...	*Nil*	Crops suffering; health improving.
Amritsar ...	*Nil*	Health improving; rain much needed; slight fall in prices of food grains.
Lahore ...	*Nil*	Agricultural prospects fair; but rain wanted; health improving.
Ráwalpindi ...	*Nil*	Crops suffering; fever, small-pox, and cattle disease continue.
Mooltan ...	*Nil*	State of crops and health good; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	Health improving; state of crops favourable, but rain wanted.
Pesháwar ...	*Nil*	Harvest prospects less favourable, no rain having fallen.
		General Remarks.—Rain now much wanted; weather still cloudy.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—(Jan. 16th)		
Nimár ...	...	Cloudy; warmer; *rabi* prospects good; no small-pox.
Hoshangabad ...	...	Warmer; *rabi* backward and unpromising.
Betúl (Jan 13th)	...	Prospects of *rabi* moderate; rain required; prices stationary.
Wardha ...	...	Cotton picking over; outturn below 8 annas; *rabi* promising; health good.
Nágpur (Jan. 15th)	...	Clear; prospects fair; health good; prices unchanged.
Chánda („ 12th)	...	Clear and cold; outturn of rice not so good as expected; cattle disease continues; prices slightly risen.
Chhindwára ...	...	Clear and pleasant; *rabi* prospects fair; health good; prices steady.
Narsinghpur ...	...	Cloudy, unfavourable for crops; health good; prices high.
Bhandára (Jan. 14th)	...	Clear and pleasant; rice threshing continues; *jowari* being cut; *rabi* favourable; fever prevalent; prices continue high.
Seoni ...	...	No improvement in crops; prices unchanged.
Bálaghát ...	...	Clear and cool; rice threshing almost completed; small-pox in places; prices stationary.
Mandla ...	...	Rain wanted; prospects favourable; health good; prices stationary.
Saugor ...	...	Rain wanted; prospects of crops and prices unchanged.
Damoh ...	...	Rain wanted; health prospects good; prices rising.
Jubbulpore ...	...	Clear; rain much wanted; small-pox continues; prices rising.
Raipur ...	...	Prospects of *rabi* favourable; small-pox and cattle disease continue; prices slightly fallen.
Bilaspur (Jan. 11th)	...	*Rabi* promising; health good.
Sambalpur („ 10th)	...	Sugarcane crop good; no epidemic; prices rising.
		General Remarks.—Rain wanted in Northern districts; prospects of *rabi* on the whole fair as yet; prices continue high.
British Burma—(Jan. 15th)		
Arakan Division ...	...	Fever prevalent in town, otherwise public health good; reaping nearly finished, outturn favourable.
Pegu Division—		
Rangoon ...	...	One death from cholera, and 1 from small-pox in town; public health good; no cattle disease of consequence.
Thonkwa ...	...	Health good; slight cholera at Kweagat in Maoobin circle; reaping continues; prospects of crops continue the same as in previous week.
Bassein ...	...	One death from cholera in town, 28 in parts of Ngapootan townships between 3rd and 31st December; 4 in Kambai between 23rd December and 5th instant; reaping progressing; market not opened; prices expected high.
Henzada ...	...	Slight cattle disease in Okpho township; reaping continues; public health excellent.
Tharrawaddy ...	...	Cholera reported in Monio; cattle disease in Tahpoon and Toangbohlah; otherwise health fair; paddy 70 per cent.
Prome ...	...	Public health fair; prospects of a scanty water supply.
Thayetmyo ...	*Nil*	General health of men and cattle normal; total rainfall this season 32·92 inches, last year 66 13 inches; reaping nearly over.
Tenasserim Division—		
Amherst ...	...	Reaping and threshing of crops still in operation; public health good.
Shwegyeen ...	...	Public health fair; crops good.
Tounghoo ...	...	One case of cholera reported in Zayawaddie township, otherwise public health good; crops being reaped.
Tavoy (Dec. 21st)	...	Public health good; prospects of crops good.
(„ 28th)	...	Public health good; prospects of crops good; about ¾ths of the crops being reaped.
		General Remarks.—Public health generally good, but cholera still lurking in places; harvest nearly finished.
Assam—Gauháti (Jan. 15th)	·03; slight rain on 8th.	Weather seasonable; reaping of the *sali* nearly done.
Sylhet („ „)	*Nil*	Harvesting completed; transplanting of *bura* proceeding; prices stationary.
Mysore and Coorg—(Jan. 15th)	...	Standing crops are in good condition; prices stationary; for week ending 4th January—gratuitously relieved in hospitals 699.
Hyderabad Assigned Districts—Amráoti (Jan. 15th)	...	Cotton picking nearly completed; *rabi* favourable.
Central India—(Jan. 15th)	·30 at Gwalior and ·28 at Goona.	Rain much wanted in all other parts of Central India; clouds gathering at Indore and Neemuch.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—			
Marwar	(Jan. 4th)	...	Health and prospects good; light clouds; weather warmer.
Jhallawar	(„ 9th)	...	Health improved; prospects fair.
Ajmere	(„ 15th)	...	Rain much wanted; foot-and-mouth disease prevalent among cattle in parts; frost doing damage.
Jeypore	...	Slight rain.	Rainfall not enough; cloudy; health good.
Bhurtpore	(Jan. 8th)	...	Health good; rain wanted; prices high; weather cloudy; wind easterly.
Ulwur	(„ 14th)	·30	Health improving.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 15th January, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal, C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
Lieutenant-General the Hon'ble R. Strachey, R.E., C.S.I., F.R.S.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.

STAMP BILL.

The Hon'ble MR. COCKERELL moved that the Reports of the Select Committee on the Bill to consolidate and amend the law relating to Stamps be taken into consideration. He said there were two reports before the Council; the first or preliminary report had been presented by him to the Council at the commencement of September last, and at the time of its presentation he had explained very fully all the material amendments of the existing law for which the Bill, as then amended, provided. That report, together with the Bill, had been published, and from the communications which had been received from the various Local Governments he was in a position to state that this publication had extended to every Province of the Empire; it was further apparent, from the communications received, that the proposed alterations of the law had attracted the attention of public bodies and persons, such, for instance, as the British Indian Association, the Trades' Association, the Association of Attornies, vakils of the High Court and articled clerks—in short public bodies and persons who might be taken as fairly representing the sections of the community who would be most interested in a measure of this kind; so that it might reasonably be assumed that the proposals of the Committee in regard to the alteration of the Stamp-law had obtained ample publicity. In regard to this preliminary report, he need only add that the various

communications received alike from official and non-official sources were in the sense of a general approval of the provisions contained in the amended Bill, and some of these communications had especially commended the exclusion of all matter relating to Court-fees. But although, as a matter of convenience, the amendment of the law in regard to Court-fees had been altogether dropped out of this Bill, it must not be supposed that the need for fresh legislation on the subject was by any means to be ignored, or in fact that such legislation was not as necessary and as urgent as the amendment of the law with which the Council was now dealing.

But any proposal for the amendment of the law in regard to Court-fees introduced into this Council as a substantive measure dealing exclusively with that subject would be obviously incomplete if it avoided the question of the propriety of distinctly affirming the fitness of, and consequent desirability of maintaining, the existing rates of fees on the institution of suits, or of introducing such amendments of those rates as might be thought desirable. The Court-fees Act had now been in operation for nearly nine years, and as during a considerable part at least of that period there had been abnormal activity in litigation, it might fairly be said that sufficient experience had been gained to show whether the rates of institution-fees prescribed by the existing law were such as should be maintained permanently or modified. Connected also with the subject of the amendment of the law relating to Court-fees was the question of maintaining as at present, or enhancing, the rates of fees on probates, letters of administration and certificates of administration. But until the law relating to certificates of administration (Act XXVII of 1860) had undergone some alteration, it would be of no use to alter the existing rates; for practically that law was so defective as regards the provision for compelling the payment of the full fee chargeable, that until this defect was remedied, the determination of a proper rate was of secondary importance. The question of the amendment of the working provisions of Act XXVII of 1860 had been somewhat complicated by a proposal which had been recently made for extending the system of granting certificates for the collection of the debts due to the estate of a deceased person, to the grant of letters of administration to the entire estate of such person. It was probably well known to the Council that as a matter of fact these certificates for the collection of debts were largely used as though they were letters of administration to the whole property of the deceased person, and it had been proposed in consequence of this well known practice to make the law more in accordance with the practice. Whilst that project was under consideration, consequently, and the question as to the best mode of levying fees in suits remained unsettled, there were difficulties in the way of proceeding immediately with legislation relating to Court-fees. But he hoped that the matter would be vigorously taken in hand as soon as might be practicable, and that as the general Stamp Act of 1869 had been followed by the Court-fees Act of 1870, so, if this Bill should become law, the Stamp Act of 1879 would be followed by a Court-fees Act of 1880.

Turning now to the subject of the second report, he might remark that the further alterations recommended by the Committee had been adopted in consequence of the representations which they had received on the publication of the preliminary report, and these, though numerous, were not for the most part of any very great importance. The only further change which it was proposed to introduce into the schedule of rates of duties was an increase of the duty chargeable on general powers-of-attorney, to which matter he would advert presently. The rest of the alterations might be said to be confined to improving the arrangement and wording of the rules and procedure laid down in the several sections of the Bill, and rendering the whole subject generally more intelligible. Amongst the changes of this character he might specially notice the following:—Under section 9 of the Bill, a power had been given to the Governor General in Council to provide by rules for the number of impressed stamps which might be used for stamping any instrument, and the size of the paper to be used in the case of hundís or Native bills of exchange. The number of stamps to be used was now to be fixed by rule instead of, as had hitherto been done, by a substantive provision of the Act itself. The provision of the existing law

was so far imperfect that it merely prohibited the use of more than one stamp when the duty chargeable did not exceed one thousand rupees, and a single stamp for the amount required was readily procurable; but it made no regulation as to the number of stamps to be used when the conditions just mentioned did not apply; and the fact was that something more elastic than could be supplied by a substantive provision of the Act was required to regulate matters of this kind; and the Committee had therefore, he thought, done wisely in taking out of the Act the determination of a matter of this kind and leaving it to be settled by rule.

With regard to the provision in the same section for regulating the size of the paper to be used for hundís, he thought he could perhaps better explain its object by stating to the Council the different modes of stamping instruments now in force.

By far the largest number of instruments executed in British India were written on paper bearing an impressed stamp and sold by the Government; but inasmuch as this stamp-impressed paper was unsuitable for instruments drawn up in the English form, the Government conceded (by rule) the privilege of writing such instruments on unstamped paper and bringing the same, before the instrument was executed, to the Collector or other specially appointed officer, in order that the paper might be stamped by him.

Amongst the instruments to which this privileged mode of stamping extended were bills of exchange, and as this class of document included hundís, they might be so stamped. Paper stamped by the Collector in the same manner as unexecuted documents brought by private persons was supplied and sold by the Government to be used for hundís. So that there were two kinds of hundí-paper in use under the present law, and it had been found—he believed in both cases—that frauds were practised by cutting off the portion of the paper so stamped, upon which there was any writing, in the case of time-expired hundís, and using the clear portion of the stamped paper again, either once or more often as the size of the paper might permit. The new provision therefore was designed to prevent this fraud, and to make the provision effective it would further be necessary to exclude hundís from the privilege above described, which had heretofore been accorded to bills of exchange generally.

This regulation of the size of paper therefore would be confined to the case of paper sold by Government and could not therefore be productive of any inconvenience to the public. No doubt it would be extremely convenient to the public if a larger use of adhesive stamps could be permitted, but the use of adhesive stamps, except under special conditions, that is to say, where the stamp was to be affixed by somebody responsible to the Government in some way or other, would be sure to entail great loss of revenue through frauds; and the Legislature was therefore obliged to be very chary of extending this provision. In section 10, two such extensions were provided for—one in the case of notarial acts, and the other of entries of the names of advocates, vakils or attornies of the High Courts. In the case of notarial acts, the stamps had to be affixed by the Notary, who, though not a public officer in the technical sense of the word, was under the control of public officers; he had morever no interest in avoiding the obligation of affixing a stamp, because the cost of providing the stamp would have to be found by somebody else. And in the case of entries of the names of advocates, vakils or attornies on the roll of a High Court, the act of fixing the stamp was to be performed by an officer of the Court, and the paper upon which it was to be affixed remained in the Court. Therefore, in these two instances, the extension of the privilege of the use of adhesive stamps could be safely conceded with due regard to the interests of the revenue.

Sections 30 and 31 of the Bill related to the adjudication of the proper duty chargeable in any case. It had been suggested to the Committee that they were wrong in their first amendment of the law in omitting to provide for the penalty where the instrument brought for adjudication had been previously executed, and no doubt the English law required in all cases of *executed* instruments that the penalty should be paid; but the Committee had considered this matter very carefully, and the conclusion to which they came was that, in this country, where there was greater ignorance perhaps on the part of those who had to execute instruments as to the requirements of the Stamp-law, it was very desirable that a person should have the opportunity, without liability to any fine, and on payment of a very small adjudication-fee fixed by law, of resolving all honest doubt as to the amount of duty with which his instrument might be chargeable; and it was to be observed that as the Bill was framed, although executed instruments might be brought to the Collector for adjudication of the proper duty, they could only be so brought within one month of their execution; and it was thought that such a qualification was sufficient to secure the restriction of the privilege to cases in which there was a real uncertainty as to the proper stamp to be used and a *boná fide* desire to have such doubt removed.

Some alteration had been made in the language, but not in the substance, of section 40 of the Bill. That section, or its corresponding section in the Bill published, drew forth the criticism that it was quite unnecessary to say that the Collector might prosecute in certain cases, because another section in the chapter on criminal penalties laid down the conditions of offences very clearly, and also gave power to the Collector to prosecute in respect of *all* offences. It seemed therefore desirable to explain what the exact object of the provision contained in section 40 was. The language had been altered in order to indicate that object more clearly. The object was to show that, the Bill providing for a double set of penalties in circumstances constituting the same offence, both provisions might be worked concurrently, and were not intended to have a merely alternative operation.

In section 54 of the Bill provision had been made for a refund of the value of a stamp bought with the *boná fide* intention of using and which was not required for use. That provision had been inserted in consequence of the alteration of section 68 of the Bill, which had now been drawn so as to exclude absolutely sales of stamps by persons not licensed to sell. The Committee, it would be seen from the changes made at different stages of the Bill, had been undecided in their opinion in regard to this matter. The Bill as introduced, like the Bill now before the Council, had been framed so as to absolutely prohibit the sale of stamps by unlicensed persons. In consequence of representations made in regard to that prohibition, the amended Bill published with the preliminary report (Bill No. II) contained a provision by which the sale of stamps by private persons was allowed in certain cases and under certain conditions. But it had been pointed out to the Committee that whatever conditions they might impose, if the sale of stamps was allowed in any form by private persons, the privilege would be greatly abused. MR. COCKERELL could perhaps best describe to the Council the arguments urged on this side of the question by reading an extract from one of the papers received. The Judge of the Assam Valley Districts wrote:—

> Every one is familiar with the practice which prevails in India, of persons buying stamps from licensed vendors and selling them after several years, yellow with age, to any one wishing to use them for forging deeds of more or less ancient date. The Bill implies that the legislature will not interfere with this practice. As for the provision in section 66, that the original purchaser must have purchased *boná fide* to avoid a prosecution, it is, I think, of little value, as false evidence is easily procurable on this point. A purchaser, who has bought a stamp for which, after purchase, he has found no use, might, I think, be allowed to return it to the treasury within a given period, a refund of its value being made to him; and if this is done, I do not see what ground exists for permitting a purchaser to resell.

The Committee on mature consideration of this question thought it was perhaps best to prohibit sales of stamps by private persons and to facilitate the recovery of the value of any stamp-paper which was not required for use.

The only material change in the schedule which he need notice was that which he had already incidentally referred to; namely, the enhancement of the duty on certain powers-of-attorney. The change would be found in article 50 of the schedule. The Committee had provided that, where the number of persons appointed under one power-of-attorney exceeded a reasonable allowance—and by reasonable allowance he meant ten persons,—an extra

rupee should be levied upon the power-of-attorney in respect of every additional person appointed under it. The provision was novel certainly: it could not be said to derive any support from anything in the English law on the subject, but then the practice in England was very different. A single power-of-attorney for general purposes in favour of a very large number of persons was hardly ever met with. But in this country they had instances where 116 and 85 persons were appointed by one power-of-attorney, and the local Revenue-authorities, considering that that was an abuse, had ordered that the general power-of-attorney should be recognized only as covering the appointment of a single person. That order obviously was not warranted by the present law, and had to be withdrawn. But there was no doubt that the extent to which powers-of-attorney were being made to cover the appointment of a large number of persons did require some remedy, and the best mode of dealing with the subject was thought to be the course which had been adopted in the present Bill; namely, the imposition of an extra duty of one rupee for every person in excess of ten appointed under the power-of-attorney. The enhanced rate would fall only on persons who could very well afford to pay it; namely, persons who had to appoint a large number of agents because they had property in a correspondingly large number of places.

Having thus briefly commented upon the material changes introduced into the Bill now before the Council, he would proceed very briefly to notice the suggestions which had been made to the Committee, but which had not been adopted. The Committee was strongly advised by the Government of the North-Western Provinces and some of its subordinate Revenue-officers to exclude, from the definition of instrument of partition, partitions effected by the Revenue-authorities. It was urged that it would be inconvenient in practice, because it would be difficult to say at what particular stage of the proceedings this duty should be levied; that, moreover, partitions by the Revenue-authorities were very costly proceedings, and it was not desirable to increase their cost by the imposition of an *ad valorem* stamp-duty. As regards the period at which the duty should be levied, the Bill proposed that the stamp should be borne by the paper recording the final order for effecting a partition, and that final order might be the final order of the Collector or of the Commissioner, or of the chief controlling Revenue-authority; but the word "final" pointed to the stage at which the duty was to be paid. Then, as to the cost of effecting partitions being very great, from MR. COCKERELL'S own experience he should say that they were only very costly when great obstructions to the proceedings were made by some of the parties concerned. These partitions, which in some instances extended over several years and involved protracted and consequently expensive deputations of Amíns, were invariably cases in which some of the parties to the transaction were passively obstructing the progress of the work, by not producing necessary papers and in other ways witholding assistance required from them; he did not think that a case had been made out for excluding from liability to stamp-duty partitions effected by the Revenue-authorities; and to impose the liability to duty on some partitions, whilst the largest and most important class was to be specially exempted from the tax, would in his opinion be inequitable.

The Board of Revenue of the Lower Provinces also had again pressed their former proposal to compel the payment of stamp-duty on intermediate transfers of shares. The Committee had been unable to adopt the suggestion of the Board, for the simple reason that there was no way in their opinion by which the duty could be levied in such cases; for the transactions were not reduced to writing further than that a signature upon a blank deed was taken; but the whole conditions of the transfer and the obligations of the parties under it were matters of oral or parol contract; hence the document could not operate as a conveyance or be produced in Court as evidence, and there seemed consequently to be no ground for subjecting it to duty, even if any feasible mode of compelling the payment of duty could be devised.

The circumstances of the case in great measure resembled that of successive purchase and sub-purchases of property where only one conveyance of the property forming the subject of such purchase and resale was made.

In such cases one conveyance-duty only was chargeable, and the principle of this rule seemed to apply to the case under notice.

The third and last case in which the Committee had been unable to adopt the course recommended was in regard to the allowance of appeals against, and revisions of orders and certificates of, a Collector. It seemed very undesirable that these questions as to the proper stamp-duty should remain long undecided. In England there was only one authority by which such questions were disposed of—the Inland Revenue Commissioners; and in this country the Collector must for these purposes be treated as taking the place of the Inland Revenue Commissioners. But this withholding of a power of appeal or of revision, in individual cases, did not take away the general power of revision which every controlling authority could exercise over its subordinates; and it seemed quite sufficient to prevent the subordinate Revenue-authorities from going very far in a wrong direction, that there was always the probability of any specially misdirected application of the law being made the subject of orders for the future guidance and direction of the subordinate authorities concerned.

He would now in conclusion briefly summarize the effects of the amended Bill in modifying the provisions of the existing law.

It provided for a direct increase of duty in the case of the following instruments:—

I. Bonds, Conveyances, Leases, Mortgages, Settlements, } where the amount involved exceeds Rs. 10,000.

II. Bonds and other instruments chargeable as Bonds, } where the amount involved exceeds Rs. 10 but does not exceed Rs. 25.

III. Policies of insurance other than insurance against risks by sea.

It substituted *ad valorem* duties for fixed duties in the case of—

(1) Instruments guaranteeing repayment of loans at short periods;
(2) Instruments of gift;
(3) Instruments of exchange, and
(4) Instruments of partition.

It imposed a new duty on the entry of names of advocates, vakíls and attornies on the rolls of any High Court. These were the material increases of the stamp-duties imposed by the existing law. *Per contra*, the Bill provided for the reduction of the maximum limit of *ad valorem* duty in four classes of instruments—

(1) Indemnity-bonds,
(2) Security-bonds,
(3) Transfer of interests secured by other stamped deeds, and
(4) Surrenders of leases.

What these alterations in the rates of duty were likely to produce in the way of increased revenue, MR. COCKERELL had attempted to show when he presented the preliminary report of the Select Committee. Further, the present Bill aimed at rendering the Stamp-law generally more intelligible, by clearer interpretations, by a better arrangement of the matter of the law, and by the simplification of the Schedule. And it was specially designed to effect to a great extent the prevention of the evasion of the payment of duty, by the more stringent provisions which it introduced for dealing with instruments insufficiently stamped, and for putting a pressure upon the Courts to co-operate in the protection of the revenue. Of these different measures he should expect most from the more stringent provisions of the Bill for checking evasion. There could be no doubt, he thought, for the reasons he gave when presenting the preliminary report, that the majority of the Courts—he did not speak of *all*—were unwilling to give sufficient attention to the protection of the interests of the revenue. Why this should be so he

himself did not, and never had been able to, understand—why the Court, which recognised its responsibility to protect one individual from wrong-doing by another, or to give redress where wrong was inflicted by one person upon another, should be so slow to act when the wrong inflicted affected a large number of persons, he could not say, but such was certainly the case; for it must be obvious that the wilful evasion of stamp-duties or of any other tax differed from any act of fraud or attempted misappropriation of property in this only, that whereas in the latter case the wrong was inflicted by B. upon C.; in the former it was inflicted by B. upon all the other letters of the alphabet; because the person who wilfully evaded the payment of duty was attempting to shift the burden of taxation from his own shoulders to the shoulders of the community generally; for if the treasury lost by the excessive evasion of stamp-duty, the loss must be replaced by some other means of taxation.

He (MR. COCKERELL) would only further say that he was not so sanguine as to suppose that the Bill, which, if it became law, must, by reason of its affecting the transactions of such a large number of persons, be subjected to so much wear and tear, would be found absolutely without defect; but he did venture to hope that it would be found to work more conveniently and satisfactorily to the public—as being generally more intelligible—and at the same time produce a larger revenue, than any of its predecessors.

The Motion was put and agreed to.

The Hon'ble MR. COCKERELL also moved that the Bill as amended be passed. He desired, before the motion was put to the Council, to supply an omission in his previous remarks. He had omitted to offer the explanation which seemed to be called for by some of the criticisms received in regard to the Bill as first amended, in respect of the definition of "receipt" having been framed so as to cover receipts by advertisement. It had been said that an adhesive stamp could not be affixed to the paper bearing such advertisement, and no doubt this was so. But then the Committee deliberately desired to stop the practice of advertising receipts of money exceeding Rs. 20, because, so long as persons obtained the acknowledgment of their payments of money by means of these advertisements, it was hopeless to expect them to exercise their power—a power given to them for the protection of the revenue—of demanding receipts which would have to bear a stamp. No inconvenience would result to the public from the stoppage of advertised receipts in these cases; and the Committee clearly were bound to consider the interests of the revenue and the necessity for protecting them before the convenience of newspaper proprietors.

The Motion was put and agreed to.

BURMA COAST-LIGHTS BILL.

The Hon'ble MR. STOKES introduced the Bill to amend the law relating to the maintenance of coast-lights in the eastern part of the Bay of Bengal, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Rivers Thompson and Cockerell and the Mover. He had, when obtaining leave for its introduction, stated the object and reasons for the measure. He had now only to mention that the voyages which would for the first time be brought within the scope of the law relating to the Burma coast-lights were as follows:—

Voyages from ports in British Burma to Chittagong and places west of Chittagong;

Voyages from Chittagong to ports in British Burma;

Voyages to or from Chittagong and places west of Chittagong (except Calcutta), from or to Port Blair and places east of Mergui;

Voyages from places east of Mergui to Rangoon, and from Rangoon and ports in British Burma west of Rangoon to places east of Mergui;

Voyages to or from any port in British Burma other than Tavoy and Mergui, from or to Port Blair.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill be published in the *Calcutta Gazette*, the *Bombay Government Gazette*, the *Fort Saint George Gazette* and the *British Burma Gazette*, in English and in such other languages as the Local Governments, respectively, think fit.

The Motion was put and agreed to.

OUDH LAND-REVENUE ACT, 1876, AMENDMENT BILL.

The Hon'ble MR. COLVIN introduced the Bill to amend the Oudh Land-Revenue Act, 1876, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir A. J. Arbuthnot, the Hon'ble Messrs. Stokes and Cockerell, and the Hon'ble Sayyad Ahmad Khán and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. COLVIN also moved that the Bill be published in the *Government Gazette, North-Western Provinces and Oudh*, in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

HACKNEY-CARRIAGES BILL.

The Hon'ble MR. THORNTON moved for leave to introduce a Bill for the regulation of hackney-carriages in certain municipalities and cantonments. He observed that the Bill was the result of a strong representation by His Excellency the Commander-in-Chief and by the Government of the Panjáb regarding the ill-regulated and unsatisfactory condition of the hackney-carriage service in the principal cantonments and municipalities of that Province—a public inconvenience which, it appeared, could not be effectually removed without the aid of legislation.

In proof of the ill-condition of the Panjáb hackney-carriage service, he might, if need be, cite eloquent passages from official correspondence and representations in the local journals, but he would not take up the time of the Council by so doing; for personal knowledge enabled him to state that its condition might be briefly, but accurately, described by a single epithet—"infamous." Vehicles dilapidated, horses unbroken and frequently half-starved, drivers innocent of all knowledge of their profession—such were the ordinary incidents of locomotion in the Panjáb hackney-carriage, a mode of progression which might be said to combine, in a manner unprecedented even in India, the minimum of comfort and the maximum of danger. Added to which there were no authorized tables of fares, and no legal means available for promptly settling disputes.

The Municipal Committee of Lahore, the Cantonment Committee of Ambála, and, doubtless, all other Municipal and Cantonment Committees concerned, were anxious to remedy so discreditable a state of things, and the first-named Committee, some time ago, proposed bye-laws for effecting this desirable object; but it was held by high legal authority that, inasmuch as the Panjáb Municipal Act, IV of 1873, did not expressly empower Municipal Committees to make bye-laws for regulating hackney-carriage service, the proposed regulations were *ultra vires*. In these circumstances the aid of the legislature had to be invoked to obtain for the local authorities the necessary powers.

The Government of India admitted the necessity for legislation in the case of the Panjáb, but considered that the local extent of the measure might be appropriately enlarged, and its provisions made applicable to the municipalities and cantonments of all those Provinces of India which had no local legislatures. It was, therefore, provided in the draft Bill that the law should have effect—at the option of the Local Governments concerned—not only in the Panjáb, but in the North-Western Provinces and Oudh, the Central Provinces, British Burma, Assam, Ajmer and Coorg.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 29th January, 1879.

CALCUTTA;
The 15th January, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPT. OF REVENUE, AGRICULTURE, AND COMMERCE, (STATISTICAL BRANCH);
Calcutta, 18th January 1879.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 21st JANUARY 1879.

GENERAL REMARKS.—General prospects in Madras remain unchanged. No rain has yet fallen in Bombay, where the *rabi* crops however are still on the whole fairly good; some damage by locusts and rats in places is reported. In Mysore the standing crops continue to be satisfactory, and prices are falling. Rain still holds off in the Central Provinces; wheat and pulse are suffering in the northern districts, and prospects generally are not as satisfactory as could be wished. In Berar matters remain favourable as before. Rain is urgently needed in Central India, and prices are rising. Slight rain has fallen in parts of Rajputana, and the want of it is generally felt. There has been no rain in Bengal during the week, and no change of any importance has taken place; rain is much wanted in the Patna division and in a great part of the Bhágalpore division, as also in Rajshahye and Cooch Behar, but the general outlook is not discouraging; the exports of grain from some districts are large, and prices continue high in spite of the favourable rice harvest. No change is reported from Assam. In British Burma there is nothing new to note. The rain that fell during the preceding week in parts of the North-Western Provinces and Oudh has not been followed by more, except a very light shower in two tahsils of the Agra district and in Kumaun; the want of rain continues to be much felt. In the Punjab rain is greatly needed, and all crops on unirrigated lands are now suffering.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Jan. 22nd).		
Kistna (Jan. 18th)	*Nil*	Rice 9·13, *cholum* 15·65, *raggi* 16·92, *cumboo* 15·0; ague general; cholera in 6 and small-pox in 3 taluks; 2·4 feet water over anicut; later dry crops generally good; *varige* being reaped in Vinukonda taluk, outturn ¾; wet paddy also being harvested.
Kurnool („ „)	...	Rice 9·86, *cholum* 16·59, *raggi* 20·13, *cumboo* 18·51; fever prevalent; season favourable; second crop paddy being sown; white *cholum*, cotton, Bengal gram, wheat and gram in good condition.
Tanjore („ „)	·15 at Shealy on 12th; *nil* in others.	Rice 7·96, *cholum* 12·95, *raggi* 14·87, *cumboo* 13·42; private charity about 130; Cauvery and its branches almost dry; wet and dry crops require more rain, in parts of the district they suffer much; harvest of *sandikar, kuruvai, vadensamba, raggi, varagu*, &c., outturn ⅜ to ¾.
Madura („ „)	*Nil*	Rice 9·46, *cholum* 14·85, *raggi* 18·87, *cumboo* 18·17.
Malabar („ „)	1·08 in Cochin, *nil* in others.	Rice 9·64, *raggi* 15·35; prices of rice stationary in Kotayam, Ernád, and Walluvanad, fallen elsewhere; cholera slight in Cochin; small-pox in 7 taluks; cattle disease in Ernád; harvesting of second crop in progress.
		General Remarks.—General prospects unchanged; strong wind with some rain at Madras.
Bombay—(Jan. 22nd)		
Sind—		
Kurrachee ...	...	River continues very low; two cases of small-pox in town.
Hyderabad ...	...	No change.
Upper Sind Frontier...	...	Weather cold; rain wanted; *rabi* crops healthy; prospects fair; small-pox in Jacobabad taluka, 2 cases fatal; famine rates prevail.
Guzerat—		
Ahmedabad ...	...	Damage by locusts to the extent of 2 annas in Dholka; slight damage from them in Dhandhuka and Gogo.
Surat ...	...	No change.
Broach ...	...	
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	*Rabi* good; rain would be beneficial; large exports from Sinnar.
Konkan—		
Tanna ...	...	*Rabi* crops good; fever throughout district.
Colába (Jan. 20th)	...	Weather cold; public health good, except in Pen taluka, where fever continues; *rabi* sowing completed.
Ratnágiri („ 14th)	...	*Rabi* crops pretty good, sowing of *waingani* rice progressing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	
Sholapur ...	...	
Satara ...	...	*Rabi* crops slightly injured by rats in three talukas; public health good.
Southern Mahratta Country—		
Kaládgi ...	...	No change.
Belgaum ...	...	
Dharwar ...	...	Vermin causing damage to crops in three talukas; no marked improvement in public health.
Kanara ...	...	Second crop cultivation above ghât; fever continues.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather very cold; late crops healthy; prices of grain declining.
Wadhwán ...	...	Weather cold; locusts at Jhinjhuwara and Tulsand; crops same as before.
Baroda ...	...	Health good; state of prices and crops beginning to cause anxiety. *General Remarks.*—Some damage by locusts in Ahmedabad and by rats in Satara and the Southern Mahratta districts; rain required in parts of Deccan; *rabi* prospects generally continue fair.
Bengal—(Jan. 21st).		
Chittagong ...	A few drops.	Weather fine; the state and prospects of the crops are excellent; the *amun* crop is all reaped.
Noakholly ...	*Nil*	Weather seasonable; the reaping of the *amun* crop is nearly completed; the outturn is good; the prospects of the *rabi* crops are favourable.
Chittagong Hill Tracts...	*Nil*	Weather rather cold; foggy in the morning and clear at noon throughout the week; the mustard is in flower; tobacco is thriving well in some places; in others transplanting has commenced.
Hill Tipperah ...	*Nil*	Temperature a little high for the season; weather occasionally cloudy; the prospects of the crops are good everywhere; the gathering of the *amun* crop is almost finished.
Backergunge ...	*Nil*	Weather on the whole seasonable, though hotter than usual on one or two days; the winter harvest may be said to be completed all over the district; the outturn is very good; general health is good.
Furreedpore ...	*Nil*	Weather fair; rather warmer than is usual at this time of year; the crops are good; nearly all the *amun* has been reaped; the winter crops are in fair condition.
Dacca ...	*Nil*	Weather hot for the season, with clouds; the state and prospects of the crops are good.
Mymensingh ...	*Nil*	Weather cloudy and for the most part warm; the state and prospects of the crops are favourable.
Tipperah ...	*Nil*	Weather fair and cold; the *amun* crop is now all gathered; the outturn is good; the minor crops are in fair condition.
24-Pergunnahs ...	*Nil*	Weather cooler than last week; north wind blowing; the state and prospects of the crops are satisfactory; cholera and small-pox are abating.
Jessore ...	*Nil*	Weather seasonable; the *amun* harvest is nearly completed; the spring crops are promising; general health is good.
Nuddea ...	*Nil*	Weather cool; the *amun* harvest is completed over the greater part of the district with a fair outturn; the winter crops are generally doing well; cholera is bad near Kishnaghur and in other parts of the district, and fever is reported from several places.
Moorshedabad ...	*Nil*	Cool nights and mornings, hot midday; the *rabi* crops promise well; large exportations of rice are going on down stream and by rail to Calcutta; prices have risen from 13½ seers (last week) to 12 seers, notwithstanding the favourable harvest.
Pubna ...	*Nil*	Weather fine, cool, and seasonable; the harvesting of the *amun dhan* is going on; the prospects of the other crops are good; prices are still high; the public health is fairly good.
Rajshahye ...	*Nil*	The *dhan* crop is still being harvested; the *rabi* crops continue to be favourable, but want rain; reports of cholera have been received from Bagmara and Singra police stations.
Bogra ...	*Nil*	Weather seasonable; the cutting of *amun* is nearly finished; the *rabi* crops look promising; sugarcane is being cut; fever is prevalent in some parts of the district; twelve cases of cholera were reported from Bogra during the week; of these, four proved fatal.
Dinagepore ...	*Nil*	Weather fine; the rice harvest is nearly finished; the crop is above the average; mustard and other cold-weather crops are looking well.
Rungpore ...	*Nil*	Sun hot in the daytime; nights cold, with heavy dews, which supply the place of the Christmas rains; prospects continue favourable; cholera still prevails in parts of the district.
Cooch Behar ...	*Nil*	Weather not seasonable; much hotter than usual at this time of year; the *haimanta* crop is nearly harvested; coarse rice sells from Rs. 3 to 3-2 a maund; the cold-weather crops are looking well, but a little rain is wanted; public health is fair, but fever is prevalent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Jalpáiguri ...	*Nil*	Weather still continues warm for the time of year; nothing to add to previous week's report; the *haimanta* crop has turned out well; the land is being prepared for the *bhadoi* crops
Darjeeling ...	*Nil*	Alternate sunshine and clouds; heavy frost in the night; *haimanta dhan* has turned out very well; the ground is being prepared for other crops; wheat, barley, and buck-wheat have also been gathered.
Midnapore ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather rather colder than last week; the few crops on the ground are doing well.
Hooghly ...	*Nil*	Weather not cold enough for the time of the year; wind from the north; the *amun* crop is nearly harvested; the outturn is good; the prospects of the *rabi* crops are generally good; fever still prevails, as also cholera at Gooptiparah, in thana Balaghur.
Burdwan ...	*Nil*	Weather seasonable; *amun* has been reaped and harvested; the prospects of the cold-weather crops are good; public health is on the whole improving.
Bankoora ...	*Nil*	Weather clear and warm; the prospects of the crops continue to be good; fever is abating in every part of the district.
Beerbhoom ...	*Nil*	Weather seasonable; the harvest is a very full one.
Sonthal Pergunnahs ...	*Nil*	Weather clear and cold; all the crops seem to be generally doing well, but rain is wanted in Doomka; wheat and barley are in ear.
Bhágalpur ...	*Nil*	Weather fine and cold; new rice has come to the market, but prices have an upward tendency, owing to the heavy demand for exportation; the cold-weather crops require a little rain, especially in the south; general health is good.
Monghyr ...	*Nil*	Weather cold, with west wind; the state and prospects of the crops are excellent.
Purneah ...	*Nil*	Weather fine; the *rabi* crops are good, but rain is wanted in several parts of the district.
Maldah ...	*Nil*	Weather fair; the crops are doing well; cases of cholera are of rather frequent occurrence in almost all parts of the district west of the river Mahananda.
Durbhunga ...	*Nil*	Weather seasonable; the paddy harvest has been nearly completed; the *rabi* requires rain; prices are steadily rising.
Mozufferpore ...	*Nil*	Weather fine and cold; there has been no change in the state of the crops; rain is much wanted.
Sarun ...	*Nil*	Weather cold and fair; slight fogs in the mornings; west wind is prevailing; the cold-weather crops are doing well, but rain is urgently required; early mustard is being reaped; the poppy is in flower in some places; prices are stationary; public health is good.
Chumparun ...	*Nil*	Strong west winds; rain is badly wanted; the *rabi* crops are poor for want of moisture.
Patna ...	*Nil*	Weather seasonable; no change since last report; rain would do good.
Gya ...	*Nil*	Weather seasonable; the maximum reading of the thermometer in the shade was 84·5°; the *aghani* crop has almost all been cut; the *rabi* crops are flourishing, but a good shower of rain is wanted; a few cases of small-pox have been reported, otherwise the public health is generally good; the condition of the plough cattle is also good.
Shahabad ...	*Nil*	Weather rather warm for the season, but cool since the 17th; the prospects of the *rabi* crops remain favourable; some rain is wanted; public health is good.
Hazáribágh ...	*Nil*	Weather fine, but warm for the time of year; the state and prospects of the crops are at present generally good.
Lohardugga ...	*Nil*	Weather seasonable; no change to report in the state and prospects of the crops; general health is good.
Manbhoom ...	*Nil*	Weather warm and unseasonable for this time of the year; the prospects of the crops continue good and the general health is excellent.
Singhbhoom ...	*Nil*	Weather warm; the *rabi* crops on the ground are doing fairly; the oilseeds are being cut; the price of rice is stationary.
Balasore ...	*Nil*	Weather unchanged; most of the rice harvest has been reaped; malarious fever is still very prevalent.
Cuttack ...	*Nil*	Weather seasonable; the *sarad* and *rabi* crops are being harvested; cholera and fever are still present in the Julpigoree sub-division.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice is being harvested; *dalua* rice is progressing well; common rice is selling at 15¾ to 23¾ seers for the rupee; three coasting vessels are being loaded; public health is good.
		General Remarks.—There is hardly any change to report in the agricultural prospects of Bengal during the week; the rice crop has almost all been cut; the prospects of the *rabi* and other standing crops continue generally favourable, but rain is wanted in all the districts of the Patna, and in a great portion of the Bhágalpur Division, as well as in Rajshahye and Cooch Behar; prices still continue high, notwithstanding the favourable rice harvest, and from some districts large quantities of grain are being exported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. and Oudh—(Jan. 22nd)		
Benares (Jan. 21st)	...	No change; rain badly wanted.
Allahabad („ „)	...	
Jhánsi („ 22nd)	...	The late fall of rain has done good to the crops.
Agra („ 21st)	·1 in Jalesar and Firozabad	More rain wanted for *rabi*.
Meerut („ 22nd)	...	No change; rain very much wanted.
Kumaun („ 18th)	Light rain fell on 16th instant.	More rain is required.
Lucknow („ 22nd)	...	Rain wanted.
Sitapur („ „)	...	Weather clear; wind west; rain needed.
Fyzabad („ „)	*Nil*	Irrigation going on; sugar-mills at work; poppy coming up well.

Mooltan ...	*Nil*	Public health good; agricultural prospects fair, but rain wanted; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	Fever abating; crops require rain.
Pesháwar ...	*Nil*	Harvest prospects bad for want of rain; prices of food grains stationary.
		General Remarks.—Rain much wanted; all crops beyond the reach of irrigation are suffering; health improving.
Central Provinces—(Jan. 23rd)		
Nimár ...	...	Wheat and *tur* somewhat injured by cold; prospects otherwise favourable.
Hoshangabad ...	...	Wheat bad; gram promising well.
Betúl (Jan. 20th)	...	Cold; prospects uncertain; wheat bad; prices fallen; cattle disease appearing.
Wardha ...	...	Outturn of cotton and *jowar* under half average; prospects good.
Nágpur (Jan. 22nd)	...	Cold at nights; prospects fair; prices steady.
Chánda („ 19th)	...	Clear and cold; prices risen; cattle disease in Warora and Brahmapuri; health good.
Chhindwára ...	...	Clear and pleasant; prospects fair; health good; prices steady.
Narsinghpur ...	...	Cloudy; prospects bad; prices high; health good.
Bhandára (Jan. 21st)	...	Clear and pleasant; winnowing of rice completed, that of *jowar* progressing; outturn good; health good; prices high.
Seoni ...	...	Prospects unfavourable; fever and bronchial affections prevalent; prices steady.
Bálaghát ...	...	Clear and cool; *urd* and *tur* being reaped; small-pox and fever slight; prices steady.
Mandla ...	...	Prospects somewhat favourable; prices falling; health good.
Saugor ...	...	Prospects unfavourable; prices steady.
Damoh ...	...	Prospects unfavourable; health good; prices steady.
Jubbulpore ...	...	Clear and cold; prospects unsatisfactory; prices rising; 41 deaths from small-pox; health good.
Raipur ...	...	Clear and cool; prospects good; 16 deaths from small-pox; cattle disease prevalent.
Biláspur (Jan. 18th)	...	Clear and pleasant; prospects good, but *kodur* has suffered in Mungeli; health good; prices stationary.
Sambalpur („ 17th)	...	Warm; ploughing in progress where practicable; health good; prices fallen.
		General Remarks.—Weather clear and cold; wheat and pulse failing in northern districts; prices high; health good.
British Burma—(Jan. 23rd)		
Arakan Division ...	...	Fever prevalent in the Akyab town, otherwise public health good; reaping nearly finished; outturn of crops good.
Pegu Division—		
Rangoon ...	...	Four deaths from cholera, and 3 fatal cases of small-pox in town; reaping rapidly progressing; an unusually full crop expected; fever prevalent in Hmaubee; no cattle disease; total rainfall 85·46 inches.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—*contd.*		
Thonkwa ...	...	Report not received.
Bassein ...	Slight rain on 18th; rain for 4 hours in Paiben circle.	One death from cholera in town, 29 in Regye; from 25th to 30th December cattle deaths 122; same period mean temperature 74·62°; first boat this season's rice in no quotations.
Henzada ...	...	Public health excellent; reaping nearly over.
Tharrawaddy ...	...	Health fair; crop reaped and partly thrashed; paddy Rs. 70 per 100 baskets.
Prome ...	...	Public health good; harvest over.
Thayetmyo ...	...	General health of men and cattle normal; paddy reaping over.
Tenasserim Division—		
Amherst ...	...	Reaping and threshing of crops still in operation; public health good.
Shwegyeen ...	...	Public health fair; crops good.
Tounghoo ...	·18	Public health good; agricultural prospects good. *General Remarks.*—Health generally good; some fever and cattle disease in Bassein district; crops appear good.
Assam—		
Gauháti (Jan. 22nd)	*Nil*	Weather clear and seasonable; reaping of the *sali* crops finished; mustard gathering.
Sylhet („ „)	*Nil*	Prospects good.
Mysore and Coorg— (Jan. 22nd)	...	Standing crops are in good condition; prices falling; for week ending 11th January, gratuitously relieved in hospitals 662.
Hyderabad Assigned Districts— (Jan. 22nd)	...	*Rabi* prospects good; cotton picking continued.
Central India— (Jan. 22nd)	...	Clear sky; rain urgently needed; prices rising.
Rajputana— (Jan. 22nd)	...	Rain much wanted to save gram crop; otherwise prospects unchanged.
Sirohee (Jan. 5th)	...	Tanks drying up, wells fair; health and prospects good; cloudy.
Marwar („ 18th)	..	Health and prospects good; locusts in Jálor district.
Harowtee („ 11th)	...	Health good; prospects unchanged.
Deoli ...	·08	
Bhurtpore ...	·10	More rain wanted.
Ulwur (Jan. 22nd)	·32 in southern Tahsils.	Health considerably improved.
Ajmere („ „)	...	Rain much needed to save gram crop; otherwise prospects unchanged.

SUPPLEMENT TO

The Gazette of India.

No 5. } CALCUTTA, SATURDAY, FEBRUARY 1, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 28th JANUARY 1879.

GENERAL REMARKS.—In Madras prospects are reported to be fair in most districts; extraordinary drought prevails in the Tinnevelly district. No material change has taken place in the Bombay Presidency, where local damage from rats and locusts still continues. The *rabi* is likely to be good. In Mysore matters are satisfactory as before, and prices continue to fall. No rain has yet fallen in the Central Provinces, and in the Saugor, Damoh and Jubbulpore districts prospects are gloomy; in other districts they are still on the whole fair. The report from Berar mentions clear weather and gives a favourable account of the spring crop. Central India and Rajputana exhibit no change; in the former prices are rising, and in the latter rain is needed, especially in Ajmere. In Bengal slight rain has fallen only in Chittagong and in the Chittagong Hill Tracts, and it is much wanted in other places; frost has done much damage in the Patna division and in Palamow, but otherwise the *rabi* crops are generally fairly good; large exportations continue and prices remain high. Prospects are satisfactory in Assam and also in British Burma. In the last named province, although the general health is good, there has been slight cholera in some parts of Thonkwa, Henzada, Mergui, and Bassein, where, too, there is cattle disease. The reports from the North-Western Provinces and Oudh and the Punjab repeat the complaint of want of rain, of which unfortunately there appears to be no prospect at present. There has been clear bright weather in almost every part of India. The failure of the winter rains in the north up to the present time is certainly unfortunate, but there is no reason as yet to entertain any apprehension of extensive injury to the spring crop.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—(Jan. 29th)		
Kistna (Jan. 25th)	*Nil*	Rice 9·38, *cholum* 15·43, *raggi* 16·93, *cumboo* 15·09; fever general; cholera and smallpox in some taluks; 1·7 feet water over anicut; pulse crops suffering from insects and want of rain; *varige* in ear in Repalli and Bapatla taluks.
Kurnool („ „)	...	Rice 9·85, *cholum* 16·49, *raggi* 20·47, *cumboo* 17·84; fever prevalent; season favourable; white *cholum*, cotton, Bengal gram, wheat and gram in good condition.
Tanjore („ „)	·44 (average of 8 stations); *nil* in others.	Rice 9·24, *cholum* 12·87, *raggi* 16·69, *cumboo* 13·45; private charity about 130; Cauvery and its branches almost dry; wet and dry crops require more rain, and in parts suffer; harvest of *kattalai*, *samba*, *varugu*, *dal*, &c., outturn ¼ to ⅞

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Madura (Jan. 25th)	·08 in Madura; *nil* in others.	Rice 9·31, *cholum* 14·58, *raggi* 17·87, *cumboo* 17·16.
Malabar („ „)	·49 (average of 2 stations); *nil* in others.	Rice 9·94, *raggi* 15·60; prices of rice fallen in Calicut, Wynaad, Palghaut and Ponany, stationary elsewhere; cholera slight in Kurambranád, Ernad, and Cochin; small-pox in 5 taluks; cattle disease slight in Calicut and Ernad; harvesting of second crop in progress. *General Remarks.*—General prospects fair in most districts; drought in Tinnevelly reported extraordinary.
Bombay—(Jan. 29th)		
Sind—		
Kurrachee ...	...	River on 25th 3 feet 2 inches, last year 7 feet 11 inches.
Hyderabad ...	...	Locusts have re-appeared, no damage.
Upper Sind Frontier...	...	Weather cold; *rabi* prospects fair; crops in much need of rain; prices of food grains very high; cattle disease prevalent.
Guzerat—		
Ahmedabad ...	...	Locusts to a certain extent in Dhandhuka; remaining crops in other talukas continue well.
Panch Mahâls ...	...	Locusts damaged wheat and pulse crops in some villages.
Kaira ...	...	Crops and public health good.
Surat ...	...	No change.
Broach ...	...	Weather fine; public health good except in Jambusar and Wágra where fever continues; cattle free from disease throughout district crops saved from locusts and *khapedi* good.
Khandesh and Násik—		
Khandesh ...	...	Harvesting of grain commenced; cattle disease in 4 talukas.
Násik ...	...	No change.
Konkan—		
Tanna ...	...	*Rabi* crops good; fever continues.
Colába (Jan. 27th)	...	Weather cold; fever and locusts in 2 talukas; *rabi* crops good in 3 talukas.
Ratnágiri („ 21st)	...	*Rabi* crops good; 11 deaths from fever in Malwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Ditto.
Sholapur ...	...	Ditto.
Satara ...	...	*Rabi* crops generally good; slight injuries by rats in some talukas.
Southern Mahratta Country—		
Kaládgi ...	...	No change.
Belgaum ...	...	Damage to crops by rats continues; cattle disease in Athni taluka.
Dharwar ...	...	Vermin causing damage in 2 more talukas; public health as before.
Kanara ...	...	Second crop good on coast; fever general; cattle disease in Coompta.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather cold; wheat and gram thriving; cholera at Pálitána and surrounding villages.
Wadhwán ...	...	Weather moderate; crops same as before; prices high.
Baroda ...	...	Public health fair; state of *rabi* crops inferior.
		General Remarks.—Some damage by locusts in Guzerat, and by rats in Satara and Southern Mahratta Country; *rabi* prospects fair generally; no important change.
Bengal—(Jan. 28th).		
Chittagong ...	0·2	Weather fine; nothing new to report in the state and prospects of the crops; prices show a tendency to rise; public health is good.
Noakholly ...	*Nil*	Weather cold; the reaping of the *amun* crop is finished; the prospects of the *rabi* crops are fair.
Chittagong Hill Tracts...	0·03	Weather seasonable; very cold throughout the week; cloudy on the 21st; tobacco and mustard plants are thriving well.
Hill Tipperah ...	*Nil*	Weather cloudy in the morning in the first part of the week; latterly seasonably cold and bright; the prospects of the crops continue good; sugarcane, mustard, and other winter crops are being gathered.
Backergunge ...	*Nil*	Weather warmer than usual; cultivation of the spring crops is progressing; prices have fallen in Perozepore; general health is good.
Furreedpore ...	*Nil*	Weather cold and seasonable; the *amun* has been harvested with good outturn; the *kalai* is also being reaped; the winter crops generally are doing well, except in the Bhushana thana; a little rain would do good.
Dacca ...	*Nil*	Weather cold and seasonable; the state and prospects of the crops are good.
Mymensingh ...	*Nil*	Weather seasonable; the state and prospects of the crops are good.
Tipperah ...	*Nil*	Weather seasonable; the cold-weather crops are looking well; in spite of the heavy crop of rice, prices are yet high; cholera in a sporadic form is reported from most parts of the district.
24-Pergunnahs ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable; the price of rice is very high; public health in general is good.
Jessore ...	*Nil*	Weather fine and cool; the storing of the *amun* crop is nearly completed; the winter crops promise well; general health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Nuddea ...	*Nil*	Weather cold; the *amun* harvest is over; the outturn is nowhere below the average; but the prices are still high; the winter crops generally are doing well; cholera is still reported, and a few deaths have also been caused by small-pox.
Moorshedabad ...	*Nil*	The weather has again become cooler; clear bright days; the *rabi* continues to promise well; the price of rice remains high, and exportation continues; health is good.
Pubna ...	*Nil*	Weather clear and cold; the prospects of the crops are good; public health is good; no report has been received from Serajgunge.
Rajshahye ...	*Nil*	The *dhan* crop still continues to be reaped, but it is being exported abundantly from several parts of the district; the *rabi* crops, though thriving, still require rain; cholera has disappeared.
Bogra ...	*Nil*	Weather cooler than last week; north wind is prevalent; almost all the *amun* has been reaped; the *rabi* crops are doing well; fever still prevails; cholera is on the decrease.
Dinagepore ...	*Nil*	Weather clear and cold; the cold-weather crops are progressing favourably; the price of rice varies from 13 to 18 seers per rupee.
Rungpore ...	*Nil*	Weather colder; the prospects of tobacco are good, and of wheat and mustard are moderate; rain would cause an improvement; cholera is disappearing, but small-pox is reported from Bagdogra.
Cooch Behar ...	*Nil*	Weather seasonable, clear, and cool; the reaping of the rice crop is completed; the prospects of the winter crops continue to be promising; but a little rain would have greatly benefited them; the state of the public health is good.
Jalpáiguri ...	*Nil*	Hazy foggy mornings; weather considerably cooler than last week; the ploughing of land for *bhadoi* is slowly progressing; mustard and tobacco are doing well; the plucking of the latter has commenced; in the Duárs the mustard is said to be rather backward for want of rain.
Darjeeling ...	*Nil*	Weather cloudy; very cold; threatening snow or rain; the few crops on the ground are doing well; the ground is being cleared for other crops.
Midnapore ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather seasonable; the small amount of crop still on the ground is doing well.
Hooghly ...	*Nil*	Weather cold and clear; the *amun* crop is nearly harvested; the prospects of the cold-weather crops are good; fever has much abated; cholera still continues at Gooptipara.
Burdwan ...	*Nil*	Weather cool and dry; the state and prospects of the crops are favourable.
Bankoora ...	*Nil*	Weather much cooler than last week, but clear and bright; no change in the prospects of any of the crops since last report; fever is gradually disappearing.
Beerbhoom ...	*Nil*	The weather has turned suddenly colder; there is nothing further to report about the crops.
Sonthal Pergunnahs ...	*Nil*	Weather fine and cold, but sultry in Pakour; the prospects of the crops continue satisfactory, but rain is wanted in Doomka and Godda; in Jamtara *rahar* is ripening, sugarcane is being planted, and the old crop of sugarcane is being cut.
Bhágalpur ...	*Nil*	Weather very cold; west wind is prevailing; the prospects of the winter crops are favourable; the price of rice continues high; general health is very good.
Monghyr ...	*Nil*	Weather very cold, with west wind; the state and prospects of the crops are excellent.
Purneah ...	*Nil*	Weather fine and cold; the state and prospects of the crops are fair, but rain is required in places.
Maldah ...	*Nil*	Weather fair; the reaping of the *haimanta* paddy is about to close, the *matore* plants are flowering; the wheat plants are thriving; the prospects of the crops are good; fever has abated, as the weather has become quite cool; cases of cholera are decreasing.
Durbhunga ...	*Nil*	Weather very cold, with west wind; no change since last report; the *rabi* is suffering much from want of rain; prices are rising.
Mozufferpore ...	*Nil*	Weather cold and clear; the prospects of the *rabi* crops are less promising than heretofore; the country is exceedingly dry, and rain is greatly needed.
Sarun ...	*Nil*	Weather very cold; west wind (favourable to the *rabi* crops) is prevailing; the cold-weather crops are decidedly suffering for want of rain; *rahar* and cotton are doing well; sugarcane manufacture is going on; prices are stationary; public health is good.
Chumparun ...	*Nil*	Weather seasonable; cool west winds in the day; the *rabi* crops are poor for want of rain.
Patna ...	*Nil*	Weather very cold; there has been no change in the state of the crops; rain is wanted.
Gya ...	*Nil*	Weather seasonable; the thermometer in the shade was 79·5°; the prospects of the *rabi* crops continue to be favourable, but rain is wanted to secure a good outturn; several cases of small-pox have been reported from Gya, Aurungabad, Nabinagar and Nowada; the health of the plough cattle is good.
Shahabad ...	*Nil*	Weather seasonable; no change to report; rain is urgently wanted to ensure the *rabi* crops; public health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hazáribágh ...	*Nil*	Weather fine and colder; the *rabi* crops are at present flourishing, but rain would do good.
Lohardugga ...	*Nil*	Weather cold, with frosty nights; the *rabi* crops promise well, except in the Palamow sub-division, where they are said to have been much injured by frost; general health is good.
Manbhoom ...	*Nil*	Weather cooler and more seasonable; the condition of the crops continues good; and the general health is fair.
Singhbhoom ...	*Nil*	Weather seasonable; the *rabi* crops are doing fairly; the price of rice is the same; the district is healthy.
Balasore ...	*Nil*	Weather cool and seasonable; the paddy harvest is well in now.
Cuttack ...	*Nil*	Weather fine and seasonable; the harvesting of the *sarad* and *rabi* crops is going on; the sowing of the *dalua* or spring rice has commenced; cholera is on the decrease.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice is being harvested; the prospects of the *dalua* rice are fair; common rice sells at 16 to 21 seers for the rupee; public heath is good.
		General Remarks.—There has been no rain in Bengal during the week except a slight fall in the district of Chittagong and in the Chittagong Hill Tracts; rain is much wanted in the Patna division, and is also required in Rajshahye, Rungpore, Cooch Behar, and a few other places; except in the Patna division, and in Palamow where frost has caused much injury, the prospects of the *rabi* crops are on the whole promising; the rice harvest is now generally over except in a few low lands; prices still keep very high, and are rising in some districts owing to large exportations.
N. W. P. and Oudh—(Jan. 29th)		
Benares (Jan. 28th)	...	No change; rain much needed.
Allahabad („ „)	...	No change; crops dying in light soils.
Jhánsi („ 29th)	...	No change since last report.
Agra („ 28th)	...	*Rabi* thriving; no sickness.
Meerut („ 29th)	...	} No change.
Bareilly („ „)	...	
Lucknow („ „)	...	Rain much needed.
Fyzabad („ „)	...	Rain sadly wanted; irrigation unequal to requirements of agriculturists.
Sitapur („ „)	...	Weather clear; rain wanted.
Partabgarh („ 28th)	...	Prospects doubtful; rain much needed.
		General Remarks.—Rain much wanted.
Punjab—(Jan. 28th)		
Delhi ...	*Nil*	Health improving; rain wanted; prices of food grains rising.
Hissar ...	*Nil*	Crops doing fairly; but rain much needed; prices of food grains rising; health good.
Umballa ...	*Nil*	Crops doing fairly well; but rain much wanted; health good.
Jullundur ...	*Nil*	Condition of *rabi* crops critical; health still improving.
Amritsar ...	*Nil*	Prices of food grains rising; rain much wanted for *rabi* crops; health still improving.
Lahore ...	*Nil*	Public health improving; rain much wanted.
Ráwalpindi ...	*Nil*	Cattle disease continues; rain much wanted.
Mooltan ...	*Nil*	Public health and condition of crops good; but rain wanted; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	Health improving; crops fair; but rain wanted.
Pesháwar ...	*Nil*	Harvest prospects poor; prices of food grains rising.
		General Remarks.—Clouds are again clearing off and there is no prospect of rain at present.
Central Provinces—(Jan. 30th)		
Nimár ...	...	Prospects unchanged; prices stationary.
Hoshangabad ...	...	Prospects unchanged.
Betúl (Jan. 27th)	...	Clear; prospects of gram fair; wheat below average; prices stationary.
Wardha ...	...	*Rabi* prospects fair; prices steady.
Nágpur (Jan. 29th)	...	Cold; prospects fair; health good; prices unchanged.
Chánda („ 26th)	...	Clear and cold; prospects unchanged; health good; cattle disease at Brahmapuri; prices stationary.
Chhindwára ...	...	Prospects fair; fever continues; prices steady.
Narsinghpur ...	...	*Rabi* fair; pulses average crop; wheat 14 annas.
Bhandára (Jan. 28th)	...	Winnowing of rice almost completed; outturn satisfactory; *rabi* doing well; small-pox slightly prevalent; prices falling.
Seoni ...	...	No improvement in *rabi* crops; fever continues; prices unchanged.
Balaghát ...	...	Clear and cool; inferior kind of *rabi* crops harvesting; small-pox and fever continue; prices steady.
Mandla ...	...	Prospects favourable; prices stationary.
Saugor ...	...	*Rabi* prospects very unfavourable; prices stationary.
Damoh ...	...	Prospects of *rabi* bad; health good; prices rising.
Jubbulpore ...	...	*Rabi* suffering for want of rain; small-pox continues; prices rising.
Raipur ...	...	Cool; prospects of *rabi* favourable; small-pox and cattle disease continue; prices stationary.
Sambalpur (Jan. 24th)	...	Clear; all crops harvested; health good; prices falling.
		General Remarks.—Prospects of *rabi* in Jubbulpore, Damoh, and Saugor unfavourable; in other districts continue fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(Jan. 30th)		
Arakan Division ...	...	Fever prevalent in Akyab town, otherwise public health normal; crops have been all reaped; outturn reported favourable.
Pegu Division—		
Rangoon ...	...	Four fatal cases of small-pox in town; no cholera cases; reaping rapidly progressing; an unusually full crop expected; fever prevalent in Phounglong township; no cattle disease.
Thonkwa (Jan. 18th)	Some rain on night of 17th instant.	Health generally good; some deaths from cholera reported in Kyontone circle in Phyapoon township; slight cattle disease also reported as existing in this circle; outbreak of small-pox reported at Phyapoon; reaping nearly over.
Ditto („ 25th)	...	Health generally good; reaping nearly completed; outturn reported very favourable.
Bassein ...	·48	Two deaths from cholera in town, 6 in Kanibai from 6th to 12th January; cattle deaths from 1st to 15th, 37 in Pyengmabenghla, 42 in Shwegnagoungben; mean temperature 78·32°; rice dribbling in, but no quotation.
Henzada ...	...	Seven deaths from cholera, one in Henzada township, and six in Okpho; otherwise public health good; harvest finished; threshing in operation.
Tharrawaddy ...	...	Report not received.
Prome ...	...	Public health good.
Thayetmyo ...	*Nil*	General health of men and cattle normal; few cases small-pox in Zuatoung.
Tenasserim Division—		
Amherst ...	·02	Reaping nearly over; public health good.
Shwegyeen ...	...	Public health fair; crops good.
Tounghoo ...	...	Public health good; crops all gathered in.
Tavoy (Jan. 4th)	...	Public health good; prospects of crops good; reaping nearly completed.
Ditto („ 11th)	...	Public health good; prospects of crops good; reaping nearly completed.
Mergui („ 4th)	...	Public health good with exception of a case or two of cholera in Mapaiteran; cattle healthy; paddy Rs. 100 per 100 baskets.
Ditto („ 11th)	...	Nine deaths from cholera from 1st to 11th instant at Mergui, otherwise health good; crops being reaped; cattle healthy; paddy Rs. 100 per 100 baskets.
		General Remarks.—General health good; slight cholera in some parts of Thonkwa, Bassein, Henzada and Mergui; cattle disease prevalent in Bassein; crops good.
Assam—		
Gauháti (Jan. 29th)	*Nil*	Weather clear, cool, and seasonable; mustard seeds being gathered.
Sylhet („ „)	*Nil*	Prospects of winter crops good; prices not falling.
Mysore and Coorg—(Jan. 29th)	·28 in Bangalore, and ·22 in Mysore.	Prices falling; for week ending 18th January, gratuitously relieved 624.
Hyderabad Assigned Districts—		
Amraoti (Jan. 29th)	...	*Rabi* crops continue favourable; weather clear.
Central India—(Jan. 29th)	*Nil*	No change; prices rising.
Rajputana—(Jan. 29th)		
Sirohee (Jan. 12th)	...	Tanks drying up, wells fair; health and crops good; cold, but at times cloudy and cold; season mild and agreeable.
Marwar („ 11th)	...	Health and crops good; weather seasonable; prices high with tendency to rise.
Jhallawar („ 23rd)	...	Weather seasonable; health fair.
Ajmere („ 29th)	...	Rain much wanted; prospects unchanged.
Ulwur ...	*Nil*	Prospects unchanged.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 29th January, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Excellency the Commander-in-Chief, G.C.B.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Sir J. Strachey, K.C.S.I.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
Lieutenant-General the Hon'ble R. Strachey, R.E., C.S.I., F.R.S.
The Hon'ble Mahárájá Jótíndra Mohan Tagore.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble G. H. P. Evans.
The Hon'ble G. C. Paul.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.

HACKNEY-CARRIAGES BILL.

The Hon'ble MR. THORNTON introduced the Bill for the regulation and control of Hackney-carriages in certain municipalities and cantonments, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Cockerell and Colvin, the Hon'ble Sayyad Ahmad Khán and the Mover. He said that the circumstances which had led to the introduction of the measure had been explained at the last meeting of the Council. Brie stated, its object was to provide for the regulation, where necessary, of hackney-carriages in those Provinces and parts of India in which there were no local legislatures.

It was accordingly provided in the Bill, that the law should be applicable, if required, to the following localities; namely:—

(1) to municipalities situated in the territories known as the North-Western Provinces, the Panjáb, Oudh, the Central Provinces, British Burma, Assam, Ajmer and Coorg;
(2) to cantonments situated in those territories; and
(3) to British cantonments situated in the territories of Native Chiefs.

As to the mode of operation, it was proposed that the regulation of hackney-carriages, where effected, should be effected by local rules. These local rules would be made, in the case of municipalities, by the municipal committees, subject to confirmation by the Local Government; in the case of cantonments in British territory, by the Local Government, with the previous sanction of the Governor General in Council; in the case of British cantonments in the territories of Native States by the Governor General in Council.

The several matters to be dealt with by the rules were set forth in section 5 of the Bill. They might require, *inter alia*, that carriages offered for hire, and the animals and harness used with them, should be in proper condition; that fit persons should be employed as drivers; that the fares charged should be reasonable, and that the carriages should not be over-laden.

The Bill further provided that breach of rules should be punishable with fine extending to fifty rupees, and that disputes between the hirer and owner or driver of a carriage, as to amount of fare, should be determinable by a Magistrate.

The Motion was put and agreed to.

The Hon'ble MR. THORNTON also moved that the Bill be published in the local official Gazettes, in English and in such other languages as the Local Governments think fit.

The Motion was put and agreed to.

PLEADERS BILL.

The Hon'ble MR. STOKES presented the preliminary Report of the Select Committee on the Bill to amend the Pleaders, Mukhtárs and Revenue Agents Act, 1865. He said that the Committee had made only two additions of any substantial importance. The first of these was the bringing of the practitioners in the Presidency Small Cause Courts within the scope of the Pleaders Act. He had already explained that, owing to Sir Barnes Peacock's interpretation of the expression "Courts of Small Causes" as used in that Act, there was no power to make rules as to the qualification, admission and control of those practitioners; and the expediency of making such rules would (MR. STOKES supposed) be admitted by every one except, perhaps, some of the practitioners in question.

The second addition had been suggested by the Chief Justice of Bengal, for whose wise and kindly counsel, given on this and on many other occasions, MR. STOKES wished to express his hearty thanks. The addition was the giving power to make rules for the qualification, admission and control of mukhtárs practising on the Appellate side of the High Court. The present Act, XX of 1865, section 44, purported to give such a power, and it was clear that the intention of the legislature at that time was to oblige all persons who desired to practise either in the High Court or the Mufassal Courts as mukhtárs, to be duly admitted and enrolled as recognized officers of those Courts, and to place them under the Court's supervision and control.

Accordingly, under the power thus conferred upon them, the High Court at Fort William on the 19th of January, 1871, passed the following rules relating to mukhtárs in the High Court:—

"I. Persons who have hitherto practised as mukhtárs on the appellate side of the High Court, and also persons desiring so to practise, may apply to be admitted and enrolled as mukhtárs in the High Court.

"II. No person so applying shall be admitted, except he shall satisfy the Court as to his character and competency.

"III. Every person so applying, on being approved by the Court, shall, before he is admitted and enrolled as a mukhtár, be required to give security in the sum of Rs. 2,000 for his honesty and good conduct, for his compliance with the rules and orders of the High Court, and for the faithful discharge of his duties towards the Court and towards his employers.

"IV. Every person admitted and enrolled as a mukhtár of the High Court shall be at liberty—

(1) to instruct counsel or vakíl;
(2) to inspect the records of any civil or criminal case in which he is engaged as mukhtár, and if necessary to obtain copies of any papers or documents in order to the preparation of a brief or instructions for the counsel or vakíl employed, or to be employed, in the case;
(3) to deposit in the office money or securities on behalf of his clients;
(4) to withdraw monies or securities deposited on account of his clients;
(5) to receive back original or other documents filed in any case, after the case shall have been completely disposed of;
(6) and, generally, to do all other such duties on behalf of his clients as mukhtárs are now, according to the existing practice in the Court, empowered to do; provided that no monies, securities or documents shall be handed out to any mukhtár, except on production of a special or general power-of-attorney under the hand of his client, and duly registered, authorizing him to receive the same.

"V. Mukhtárs, within the first fortnight in January in every year, or on the occasion of taking out or renewing their certificates, shall be required to satisfy the Registrar as to the state of their securities."

Soon after this, on the 15th of April, 1872, the vakíls of the High Court presented a petition to the Judges, praying that the rules so made might be reconsidered, upon the ground that the introduction of a fourth class of practitioners, under the name of mukhtárs, into the High Court was injurious to the rights and privileges to which they (the vakíls) were entitled under the Letters Patent of 1862 and 1865, and the rules made by the High Court pursuant to those Letters Patent.

Their contention was, that the Letters Patent provided for only three classes of practitioners in the High Court, namely, advocates, vakíls and attornies; that clause 10 of the Letters Patent of 1862 contained a positive prohibition against any persons being allowed to act in any way for suitors in the High Court, except vakíls and attornies, and that section 44 of Act XX of 1865 was *ultra vires* of the Indian legislature, in so far as it contravened, or enabled the High Court to contravene, this prohibition. They insisted, therefore, that the introduction of a fourth class of practitioners to act in any way for clients in the High Court, under the name of mukhtárs, was contrary to law notwithstanding section 44 of the Act of 1865; and they prayed the Judges, upon those grounds, to rescind the rules of December, 1871.

This petition was opposed by a large number of persons, professing to be the mukhtárs of the High Court, who contended that they were, and had been for years past, acting for clients in that capacity, and that their status, as such, was recognized by the vakíls and the public, as well as by the Act of 1865.

The question thus raised was argued before the Judges; and, upon reconsideration, a majority of the Court were of opinion (no formal decision was given) that the rules which they had made in 1871 were contrary to law; and those rules were consequently rescinded.

MR. STOKES did not for a moment presume to question the correctness of the opinion of the High Court as the law then stood or was supposed to stand. But three days before Act XX of 1865 was passed, the Statute 28th Vic., c. 15, had been enacted by Parliament, and under it new Letters Patent were granted to the High Courts. The sixth section of the Statute expressly saved our legislative powers, and though clause 10 of the new Letters contained a prohibition like that in clause 10 of the former Letters, the 44th clause of the new Letters expressly declared that all the provisions of the Letters Patent (including, of course, the prohibition) were subject to the legislative powers of the Governor General in Council. Furthermore, owing to the full discussion which the authority of the Indian legislature had received in Meares' case, 14 Beng. 106, in Feda Husain's case, I. L. R. 1 Calc. 431, and in Bura and Bukh Singh's case, I. L. R. 3 Calc. 63, there could now be no reasonable doubt as to the extent of those powers.

The ground was therefore cleared. This legislature was fully competent to modify the Letters Patent and to enable the High Court to regulate the mukhtárs that practised on its appellate side. As to the expediency of so doing, there could be no question. "In order to the due protection of suitors (MR. STOKES quoted Sir R. Garth) from injustice and wrong, all persons, by whatever name they may be called—vakíls, mukhtárs, agents, or otherwise—who are allowed to take any part in the business of the Court, should have a defined and recognized position as the Court's officers, and should be bound by such wholesome rules as the Court should from time to time think fit to pass. In other words, it was highly desirable, in the interests of the public, that the intention of the legislature in 1865 with regard to High Court mukhtárs, as well as others, should be fully and fairly carried out." MR. STOKES had lived too long in India to be sanguine as to the complete success of any measure intended to stop an evil practice. But he did hope and believe that the rules which the High Court at Fort William, and also, he presumed, the High Court at Allahabad, would pass as soon as the Bill became law, would to some appreciable extent restrict the dishonest and demoralizing custom of giving commission on fees paid to legal practitioners.

Act XX of 1865 having been already thrice amended, the Committee had thought it better to repeal and consolidate, with the changes proposed by the Bill and those now described, than to have the law on so small a subject contained in five Acts.

The Council adjourned to Wednesday, the 12th February, 1879.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th FEBRUARY 1879.

GENERAL REMARKS.—General prospects, both in Madras and the Bombay Presidency, have not undergone any material change; in parts of the latter damage by rats continues. In Mysore prices are still falling. Clear weather has prevailed in the Central Provinces, and in the districts of Damoh, Saugor, Hoshangabad and Chhindwára the crops are not doing well; in the eastern districts, however, matters are still favourable, and in the remainder the outlook is not discouraging. The report from Berar is satisfactory, but in Central India and Rajputana no change for the better has taken place. No rain has fallen in Bengal during the week, and the want of it is much felt in several districts; the prospects of the *rabi*, which has begun to be harvested in places, are however generally good, except as before in the Patna division and in Palamow; prices continue high. Some crops in Assam now need rain. In British Burma the crops generally are in good condition; slight cholera in a few districts and cattle disease in Bassein and Henzada are still reported. No rain has fallen in the North-Western Provinces and Oudh and in the Punjab; in the former it is much required, and if it does not come speedily the crops must suffer; in the latter clouds are again gathering and an early fall of rain is anxiously looked for.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Feb. 1st)	*Nil*	Rice 9·68, *cholum* 15·5, *raggi* 16·93, *cumboo* 15·18; ague general; cholera and small-pox in some taluks; 1½ feet water over anicut; later dry crops generally good; pulse slightly affected by insects in places.
Kurnool	(„ „)	...	Rice 10·22, *cholum* 16·49, *raggi* 20·13, *cumboo* 17·84; fever prevalent; season favourable; cotton, white *cholum*, Bengal gram, wheat, and gram in good condition; fodder and water ample.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Feb. 1st)	*Nil*	Rice 8·90, *cholum* 12·89, *raggi* 16·07, *cumboo* 15·88; private charity about 140; Cauvery and its branches dry; wet and dry crops require more rain and in parts they suffer much; harvest of *samba, kattalai, sirumaniyan, dholl, raggi, varagu,* &c., outturn ¼ to ¾.
Madura („ „)	*Nil*	Rice 9·79, *cholum* 16·33, *raggi* 17·38, *cumboo* 17·16.
Malabar („ „)	*Nil*	Rice 10·04, *raggi* 16·0; prices of rice fallen in Cherakal, Kurumbranad, and Wallavanad, risen in Palghaut, stationary elsewhere; slight cholera in Kurumbranad, Ponani, and Cochin; small-pox in 6 taluks; cattle disease slight in Ernad; harvesting of second crop nearly completed.
		General Remarks.—General prospects unchanged.
Bombay—(Feb. 5th)		
Sind—		
Kurrachee ...	...	River on 3rd 2 feet 11 inches against 7 feet 8 inches on same date last year; locusts in Ghorabári and Sákro talukas, no damage; cattle disease in some talukas; small-pox in Mánjhand taluka; fever general.
Hyderabad ...	...	Locusts have slightly damaged *rabi* crops in 2 talukas; cattle disease in 4 talukas; fever continues; weather very sultry till 4th, since then cold north wind.
Upper Sind Frontier...	...	Weather occasionally cloudy; *rabi* crops healthy but need rain; cattle disease decreasing; 3 cases of small-pox in Kashmor taluka.
Guzerat—		
Ahmedabad ...	...	Locusts entirely gone.
Pánch Mahál ...	...	Grain thriving.
Kaira ...	...	} No change.
Surat ...	...	
Broach ...	...	
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	Rats damaging crops in Násik and Sinnar.
Konkan—		
Tanna ...	...	*Rabi* crops good; fever continues.
Colába (Feb. 3rd)	...	Weather cold; fever in 2 talukas; *rabi* crops good in Alibág, Pen, and Roha; locusts in Mángaon and Mahád.
Ratnágiri (Jan. 28th)	...	*Rabi* crops good; 8 deaths from fever in Málwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Crops injured by rats in some parts of 5 talukas; *rabi* harvest commenced in 3 talukas.
Sholapur ...	...	No change.
Satara ...	...	*Rabi* crops good.
Southern Mahratta Country—		
Kaládgi ...	...	*Rabi* crops middling, injured by rats; cotton suffering from blight; fever continues in southern talukas.
Belgaum ...	...	*Rabi* reaping commenced; damage by rats continues.
Dharwar ...	...	No material change in state of crops and public health.
Kanara ...	...	Second crop plants healthy; fever prevalent; dysentery in Honáwar and Coompta; cattle disease in Coompta.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather cold; fever decreasing.
Wadhwán ...	...	} No change.
Baroda ...	...	
		General Remarks.—No change of importance; rats have done some harm in several Deccan and Southern Mahratta Country districts.
Bengal—(Feb. 4th).		
Chittagong ...	*Nil*	Weather fair; no material change in the state and prospects of the crops since last week.
Noakholly ...	*Nil*	The weather has been colder for the last five days, colder than it has been at any time this winter; mornings are foggy; the state and prospects of the *rabi* crops are fair; paddy has been almost all harvested.
Chittagong Hill Tracts...	*Nil*	Weather seasonable; very cold throughout the week; both the tobacco and mustard crops are doing well; the latter is being gathered in small quantities.
Hill Tipperah ...	*Nil*	Weather seasonably cold in the first part of the week; latterly the temperature has become a little too high for the time; no important crop is now on the field; the prospects of chillies are good; sugarcane is being cut.
Backergunge ...	*Nil*	Weather very cold; the prospects of the crops are good; prices are rising in Perozepore on account of the large exportation of rice; fever is prevalent in the Sudder sub-division.
Furreedpore ...	*Nil*	Weather seasonable; the state and prospects of the crops are generally good; rain would do good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Dacca ...	*Nil*	Weather seasonable; heavy fogs during the week; the state and prospects of the crops are favourable, but prices do not fall.
Mymensingh ...	*Nil*	Weather cold and seasonable; the state and prospects of the crops are good.
Tipperah ...	*Nil*	Weather seasonable; a little rain would be of advantage to the cold weather crops; sporadic cholera is reported from most of the thanas.
24-Pergunnahs ...	*Nil*	Weather warmer than last week; the state and prospects of the crops are good; but prices of grains continue very high; fever and cholera are prevalent at Barripore.
Jessore ...	*Nil*	Weather seasonable, but getting warmer during the day; no material alteration from last week in the state and prospects of the crops; rain is wanted in some parts of the district.
Nuddea ...	*Nil*	Weather rather warm; the winter crops still on the ground are doing fairly well; prices are still high; cholera is still prevalent.
Moorshedabad ...	*Nil*	Weather rather warm for the time of the year; the state and prospects of the crops are on the whole satisfactory; it is said that the wheat crop wants a shower or two.
Pubna ...	*Nil*	Weather warmer, with southerly and westerly wind; the prospects of the crops remain unchanged, but in Serajgunj rain is required; prices are stationary; public health is good.
Rajshahye ...	*Nil*	The mustard is still being cut; the *rabi* crops in some places appear to suffer from want of rain, but in other places they continue to thrive; public health is good.
Bogra ...	*Nil*	Weather slightly warmer in the day time; mustard is now nearly all cut; other cold-weather crops are doing well, but would be none the worse for a few showers.
Dinagepore ...	*Nil*	Weather getting warmer; mustard is being cut; other cold-weather crops are in good condition; the price of rice is unchanged, being 12 to 18 seers the rupee.
Rungpore ...	*Nil*	Weather has become very cold; the state and prospects of the crops continue to be satisfactory; public health is improving; cholera is gradually disappearing.
Cooch Behar ...	*Nil*	Weather very cold; the *haimanta dhan* has been harvested; the prospects of the winter crops are good, but rain is wanted; public health is good.
Jalpáiguri ...	*Nil*	Weather continues unchanged since last report; mustard and tobacco are doing well; *kalai* and *mussoor* require rain.
Darjeeling ...	*Nil*	Weather chilly and cold; sky cloudy; no crops of importance on the ground; land is being cultivated for other crops.
Midnapore ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather seasonable; foggy in the mornings almost throughout the district; the winter rice crop has been gathered; the *rabi* crops are doing well.
Hooghly ...	*Nil*	Weather cool and clear throughout the week; the *aman* crop has been reaped and stored; the prospects of the *rabi* crops are good; fever and cholera have much abated.
Burdwan ...	*Nil*	Weather cool and dry; the state and prospects of the crops are favourable.
Bankoora ...	*Nil*	Weather seasonable; no change in the prospects of the crops; fever is disappearing.
Beerbhoom ...	*Nil*	Weather continues cold; no change to report in the state and prospects of the crops.
Sonthal Pergunnahs ...	*Nil*	Weather warmer in Doomka; cool and seasonable elsewhere; the *dhan* has been reaped with good outturn; the crops on the ground are getting on fairly, but rain is wanted in some places.
Bhágalpur ...	*Nil*	Weather fine; less cold than last week; mustard is being harvested; other cold weather crops are thriving well; unprecedentedly large exportation of rice makes prices very high for this season; general health is good.
Monghyr ...	*Nil*	Weather cold, with strong west wind; rain is wanted to fill out the ears of corn.
Purneah ...	*Nil*	Weather fine; the state and prospects of the crops are good; rain is wanted in places.
Maldah ...	*Nil*	Weather fair and cold, with west wind blowing strong at midday during the last two days; the crops in the field are doing well; the fever, which has been very prevalent in the centre and south of the district, has now abated; sporadic cases of cholera still occur.
Durbhunga ...	*Nil*	Weather seasonable; rain is much wanted for the *rabi* crops; prices have fallen at head quarters to some extent during the week.
Mozufferpore ...	*Nil*	Weather very cold, with strong west wind; the continued dry weather is doing much harm to the *rabi* crops, the outturn of which is likely to be very small unless rain fall soon.
Sarun ...	*Nil*	Weather much cooler than last week; west wind is prevailing; the cold weather crops on unirrigated lands are stunted and thin, and a very small outturn is expected; *rahar* has been injured by frost; prices have risen; public health is good.
Chumparun ...	*Nil*	Weather cold; strong west winds; the *rabi* crops are poor for want of rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Patna ...	*Nil*	Weather cold and seasonable; no change since last report, but west wind (favourable to the *rabi* crops) is prevailing.
Gya ...	*Nil*	Sky clear; wind westerly; thermometer in the shade 84·5°; a heavy fall of rain is greatly needed to improve the prospects of the *rabi* crops; the public health is generally good, but a good many cases of small-pox are reported; the health of the plough-cattle is good.
Shahabad ...	*Nil*	Weather seasonable; the *rabi* crops are still doing well; rain is urgently wanted in most parts of the district; public health is normal; a few cases of small-pox have been reported from the interior.
Hazáribágh ...	*Nil*	Weather fine and growing warmer; the *rabi* crops are looking well throughout the district.
Lohardugga ...	*Nil*	Weather seasonable; the *rabi* crops promise well, except in the Palamow sub-division, where the prospects are not so favourable; fever is prevalent in the Palamow sub-division.
Manbhoom ...	*Nil*	Weather warm again; high winds, which are also hot; the prospects of the crops continue good; so also does the general health.
Singhbhoom ...	*Nil*	Weather seasonable; the cold weather crops are being harvested with an average outturn; the price of rice is still high, and no change has taken place during the week.
Balasore ...	*Nil*	Weather appreciably warmer; dry and breezy; the rice harvest is all in; the cold-weather crops are being gathered in some parts of the district.
Cuttack ...	*Nil*	Weather less cold than last week, but fine; the reaping of the *sarad* and cold-weather crops, and the sowing of *dalua* or spring rice are going on; a few cases of cholera here and there.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice is being harvested; *dalua* rice is progressing fairly; common rice sells at 15 to 21 seers for the rupee; public health is good.
		General Remarks.—There has been no rain in Bengal during the week; it is greatly needed in the Patna division and is also wanted in many districts in Central Bengal and in the Bhágalpur division, as well as in Furreedpore and Tiperah; the prospects of the *rabi* crops are generally favourable, except in the Patna division and in Palamow, as before reported; the rice harvest is now generally over, and the *rabi* harvest is beginning in places; high prices are generally complained of in spite of the good rice crop; in Bhágalpur and in Perozepore in Backergunge prices are still rising owing to the large exportation of rice.
N. W. P. and Oudh—(Feb. 5th).		
Benares (Feb. 4th)	...	No change; rain needed.
Allahabad („ „)	...	No change.
Bareilly („ 5th)	...	
Partabgarh („ 3rd)	...	
Jhánsi („ 5th)	...	*Rabi* prospects fair, except in Pargana Mau.
Agra („ 4th)	...	Want of rain felt; no sickness.
Meerut („ 5th)	*Nil*	Grain rising in price.
Kumaun („ 1st)	...	Very dry; unless rain falls shortly, the crops must suffer.
Sitapur („ 5th)	*Nil*	Weather clear and settled.
Lucknow („ „)	*Nil*	
Fyzabad („ „)	*Nil*	Rain much wanted.
		General Remarks.—Rain much wanted.
Punjab—(Feb. 4th).		
Delhi ...	*Nil*	Prices of food grains still rising; rain much wanted; health fair.
Hissar ...	*Nil*	Weather temperate; crops on *barani* lands suffering from want of rain; food grains have still an upward tendency in Sirsa on account of large exportations to eastern districts of the Punjab; health generally good.
Umballa ...	*Nil*	Crops fair; rain much wanted.
Jullundur ...	*Nil*	Crop prospects very critical; it has, however, again become overcast; fever still about.
Amritsar ...	*Nil*	Health still improving; rain much needed; prices of food grains have risen considerably.
Lahore ...	*Nil*	Agricultural prospects fair; but rain much needed.
Ráwalpindi ...	*Nil*	Agricultural prospects not good; rain very much wanted; weather cloudy; fever, small-pox, and cattle disease continue.
Mooltan ...	*Nil*	Condition of crops and public health good; weather cloudy; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	Crops fair; but rain wanted.
Pesháwar ...	*Nil*	Weather cloudy; harvest prospects bad; barley has risen considerably; other grains stationary.
		General Remarks.—Agricultural prospects have not improved this week; but clouds are again gathering, and crops will benefit much if rain falls within the next few days.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—(Feb. 5th)		
Nimár ...	...	*Rabi* good; *tur* harvesting; health good.
Hoshangabad ...	...	No improvement in prospects of *rabi*.
Wardha ...	...	*Rabi* fair; small-pox and cattle disease slightly prevalent; prices steady.
Nágpur (Feb. 4th)	...	Prospects of *rabi* fair; health good; prices unchanged.
Chhindwára ...	...	Outturn of *jowar* in southern tahsil below average; *rabi* prospects uncertain; fever prevalent; prices steady.
Narsinghpur ...	...	*Rabi* prospects continue good.
Bhandára (Feb. 4th)	...	Rice threshed, outturn satisfactory; *jowar* threshing, yield good; *rabi* favourable, except pulses; small-pox prevalent; prices continue high.
Seoni ...	...	No improvement in prospects of *rabi*; *tur* gathering; fever increasing; prices stationary.
Balaghát ...	...	Cool; prospects of *rabi* favourable; fever and small-pox continue; prices steady.
Mandla ...	...	Prospects of *rabi* favourable; health good; prices stationary.
Saugor ...	...	*Rabi* prospects continue unfavourable; health good; prices unchanged.
Damoh ...	...	*Rabi* prospects unfavourable; prices stationary.
Jubbulpore ...	...	*Rabi* though not good is much better than in 1878; rice imported from Raipur, wheat from Cawnpore; small-pox continues; prices falling.
Raipur ...	...	*Rabi* favourable; small-pox continues; prices stationary.
Biláspur (Feb. 1st)	...	*Rabi* promising; health good; prices stationary.
Sambalpur (Jan. 31st)	...	Sugarcane being cut and pressed; no other crops on ground; health good.
		General Remarks.—Clear and cool; *rabi* prospects favourable in eastern districts, fair in all other districts, except Damoh, Saugor, Hoshangabad, and Chhindwára, where they are unfavourable; prices continue high and stationary.
British Burma—(Feb. 5th)		
Arakan Division ...	...	Fever prevalent at Akyab, otherwise public health good; crops reaped.
Pegu Division—		
Rangoon ...	...	Two fatal cases of small-pox in town; reaping rapidly progressing; an unusually full crop expected; fever prevalent in Hpoungleng township; no cattle disease.
Thonkwa (Jan. 25th)	...	Cholera in Hpogoung and Tsanyway townships, otherwise health fair: crops partly thrashed; paddy Rs. 80 per 100 baskets.
Ditto (Feb. 1st)	...	Small-pox at Phyapoon, no deaths reported; slight outbreak of cholera in Phyapoon township; 1 fatal case of cholera at Maoobeng; otherwise health good; reaping nearly over.
Bassein ...	...	Nine deaths from cholera in Regyee township, 4 in Haymyethara and 5 in Kyoonpyaw from 6th to 12th January; cattle deaths in same townships between same dates, 35.
Henzada ...	...	Twelve deaths from cholera in Okpho township, otherwise public health good; slight cattle disease in Okpho township.
Tharrawaddy ...	...	Health fair; paddy fair; isolated cases of cholera in Tsanuya and Monio.
Prome ...	...	Report not received.
Thayetmyo ...	...	General health of men and cattle normal; a few cases of small-pox at Meaday, Thayetmyo, and Yuatoung.
Tenasserim Division—		
Amherst ...	...	Reaping nearly over; cholera reported from Moodoung, 7 deaths; paddy Rs. 75 per 100 baskets.
Shwegyeen ...	...	Seven deaths from cholera in district; crops good.
Toungboo ...	...	Public health good; crops all in; paddy Rs. 75 per 100 baskets.
		General Remarks.—Slight cholera in parts of Bassein, Thonkwa, Henzada, Amherst, and Shwegyeen districts, with a few cases of small-pox, otherwise health good; some cattle disease in Bassein and Henzada; crops good and nearly all in.
Assam—		
Gauháti (Feb. 5th)	*Nil*	Weather seasonable; mustard being gathered.
Sylhet („ „)	*Nil*	*Bura* crops want rain; prices stationary.
Mysore and Coorg—(Feb. 5th)	...	No change since last report; prices falling; for week ending 25th January gratuitously relieved 586.
Hyderabad Assigned Districts—		
Amráoti (Feb. 5th)	..	State and prospects of crops favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India—		
(Feb. 5th)	...	No change; prices rising from want of rain.
Rajputana—		
Marwár (Feb. 5th)	...	Health and crops good; locusts still damaging crops in Jálor.
Harowtee („ 1st)	...	Health good; prospects same.
Jhallawar (Jan. 30th)	...	Health and prospects fair; weather seasonable.
Ajmere (Feb. 5th)	...	Rain much wanted; locusts hovering; prospects unchanged.
Ulwur („ 4th)	...	Prices rising; barley 13 seers 12 chittacks per rupee.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

OPERATIONS OF MODEL AND EXPERIMENTAL FARMS.

No. 1.

Extract from the Proceedings of the Government of India, in the Department of Revenue, Agriculture, and Commerce, dated Calcutta, the 4th February 1879.

[AGRICULTURE AND HORTICULTURE.]

READ—

Despatch from the Secretary of State, dated the 7th February 1878, No. 29 (Statistics and Commerce).

Letter to the Governments of Madras, Bombay, and the North-Western Provinces and Oudh, and to the Chief Commissioners of the Central Provinces, British Burma, and Mysore, Nos. 97—102, dated the 21st March 1878.

Letter from the Chief Commissioner of Mysore, No. 196—3R., dated the 11th April 1878.

Letter from the Chief Commissioner of British Burma, No. 707—269, dated the 11th April 1878.

Letter from the Government of the North-Western Provinces and Oudh, No. 1358A., dated the 20th May 1878, and enclosure.

Letter from the Government of Bombay, No. 3066, dated the 17th June 1878.

Letter from the Chief Commissioner of the Central Provinces, No. 2868—136, dated the 22nd July 1878, and enclosures.

Letter from the Government of Madras, No. 1425, dated the 4th September 1878, and enclosures.

Read also—

Letter from the Government of Bengal, No. 584, dated the 23rd February 1877.

Letter to the Government of Bengal, No. 91, dated the 4th May 1877.

Letter from the Government of Bengal, No. 1595, dated the 26th May 1877.

OBSERVATIONS.

IN his despatch dated the 7th February 1878, the Secretary of State noticed an experiment at the Nagpur Model Farm in 1876-77, where, in consequence of irrigation and manuring, Jelalia wheat produced 1,600 lbs., and white-eared wheat 2,200 lbs. an acre, the average yield per acre in the country being only about 400 lbs. The value of the produce at Nagpur was estimated at Rs. 60, while the cost of cultivation, including all expenses, was given at Rs. 10 per acre. His Lordship desired to be informed "what steps are taken in the above and other provinces to impart to the agricultural community generally the lessons to be learnt from the operations of the model and experimental farms;" and observed, "as in many cases these farms appear to involve financial loss, it is the more important that their results, when satisfactory, should be utilized to the utmost for the general good of the country."

2. A copy of this despatch was circulated on the 21st March 1878 to the Governments of Madras, Bombay, and the North-Western Provinces and Oudh, and to the Chief Commissioners of the Central Provinces, British Burma, and Mysore, with a request for a report in connection with the farms maintained under their orders.

3. In Mysore, the Chief Commissioner states that no general steps have hitherto been taken in the direction indicated, the condition of the province during the past two or three years having forbidden any such measures. Mr. Harman, the Superintendent of the Bangalore Farm, has recently been authorized to make tours in the province twice in the year, once in the summer when the *ragi* crops are being sown, and again during the winter months when the crops are being reaped, in view to his acquiring practical experience in the native systems of agriculture and imparting to the ryots by personal communication and by experiments the benefits of deep ploughing, as also the advantages to be gained by the use of improved seed. The Chief Commissioner has also

under consideration a scheme for placing one or two plots of land in each district under the charge of a village patel or other suitable person, who would cultivate the land in accordance with instructions from Mr. Harman. "By this means," the Chief Commissioner observes, "it is hoped that the ryots will have an opportunity, which the location of the Government Farm at Bangalore does not afford them, of judging of the results to be obtained by a better system of farming." Since these remarks were written, however, it has been decided to abolish the Bangalore Farm and to transfer the services of Mr. Harman to the Bombay Presidency.

4. In Burma, the only Government Farm is one established at Myouktoung in the Arakan Hill Tracts for the purpose of growing and curing tobacco. As regards the cultivation of tobacco on the low lands lying along the banks of rivers, the natives have but little to learn: the farm was started with a view of testing the capabilities of soil in up-land tracts, and more especially for the purpose of teaching the people an improved method of curing the leaf; but there has not been time to judge of the results as yet.

5. Mr. Buck, Director of Agriculture and Commerce, North-Western Provinces and Oudh, in reporting on the subject, refers to that portion of the minute recorded by Sir John Strachey in November 1874, proposing the formation of a Department of Agriculture in the North-Western Provinces, in which it was suggested that a good means of reaching the agricultural community would be by experiments in the estates under the Court of Wards. This suggestion, it is said, has been carried into effect, though not to so great an extent as was desired, in consequence of the drought of 1877. To some estates, however, improved English ploughs, improved sugar-mills, and selected seeds, were sent; and in some districts, where the local officers took an interest in agricultural matters, seed and implements were distributed to estates other than those administered by the Court of Wards. As a further means of introducing improvements to the notice of the agriculturists, Mr. Buck lays great stress on the advantages of agricultural fairs; and he proposes to give greater encouragement to such fairs in future years. No attempts seem to be made by the Local Government to bring directly to the notice of the natives the results of the experiments conducted on the State Farms.

6. There are two Government Farms in the Bombay Presidency, one at Bhadgaon in Khandesh and the other at Salaru in Sind. At Salaru, nothing has as yet been done in the desired direction; but the Superintendent proposed making a tour in the cold weather months, during which he would acquire and diffuse useful information. He is to report the results of his first tour, in order that the Government of Bombay may be in a position to judge of the desirability of repeating the experiment.

At Bhadgaon, too, little appears to have been attempted. The Superintendent reports that instruction is imparted through farm apprentices, farm servants, and visitors. The system of apprentices, if carefully worked, would no doubt prove useful; but nothing can be expected from farm servants as a means of imparting agricultural information to the native community. Mr. Stormont, the Superintendent, recently visited Madras and Bangalore, under authority from the Government of Bombay, with a view to ascertain the system followed on the farms at those places; and he was instructed to report the result of his enquiries on his return to Khandesh.

The Local Government has also, after consultation with Mr. Robertson of the Sydapet Farm, decided on commencing a system of agricultural education in the Deccan, and probably, in due course, the Bhadgaon Farm will be made subsidiary to the scheme of instruction.

7. In the Central Provinces, Major Macdougall, the Superintendent of the Nagpur Farm, proposes to publish the results of "any decidedly successful experiment" in the *Rural Gazette*, a paper printed in Hindi, Mahrathi, and Urdu by the Educational Department, of which a copy is sent to every Government School in the Central Provinces. The Chief Commissioner approves of this proposal; but such a means of making known the operations of the farm seems scarcely to be what is required, the record of these experiments being useful to the agricultural community only when they can be followed and explained on the farm on which they have been tried.

8. In the Madras Presidency, good and useful work is being done under the supervision and guidance of Mr. Robertson, the Superintendent of Government Farms. Attached to the Sydapet Farm, on which experiments of various kinds are tried, is an Agricultural College, in which a complete course of agricultural instruction is afforded, and which is intended eventually to accommodate upwards of one hundred students. In view to a further diffusion of information, Mr. Robertson has proposed the establishment of small agricultural experimental stations all over the Presidency, each being placed in charge of a trained agriculturist, who is also to conduct an elementary agricultural class. This scheme is, however, at present in abeyance for want of funds.

Recently, a very interesting ploughing competition was held at the Sydapet Farm, in which European, American and native ploughs were used, the competitors as well as the visitors from different parts of the country being very numerous. Such open competitions as these afford an efficient means of interesting neighbouring cultivators in the methods and processes of the improved system of agriculture practised on the farm. The public reports shew that the exhibition was watched with very great interest and was completely successful.

9. From the facts summarised above, it may be said generally that only in the North-Western Provinces and Madras is any real effort being made to teach agricultural reform to the people. In the North-Western Provinces, a Department of Agriculture and Commerce has been created, with a Director at its head, whose special duty it is to organise the collection of agricultural and commercial statistics; to direct experiments for agricultural improvement in model farms and elsewhere; to watch and report on the progress of trade, and to suggest in what directions it may be developed, or hindrances to its prosperity removed; and to investigate facts connected with the condition of the agricultural classes. The scope and objects of the Department are clearly explained in a minute recorded by Sir John Strachey in November 1874, to which the attention of the Local Governments and Administrations was drawn in the letter from this Department dated the 11th August 1875, Nos. 11—426-433, regarding the collection of agricultural statistics.

In Madras there is a Department, which, though not as yet formally recognised as a Department of Agriculture, is practically one, with an efficient and well qualified Director at its head; but its expansion has hitherto been greatly impeded by various causes, not the least among which has been the want of funds.

10. In other provinces very little is being done, nor as matters stand can much be expected. Experimental farms indeed, when they stand alone, are of comparatively small utility. To be really useful they should be part of a system of agricultural instruction; they should be attached to a school where sound agricultural instruction is conveyed in class, and they should be the field for carrying into practice in the presence of students the theories of which the reasons have been explained to them in the class-room. If the students are taken from the classes dependent on the land for their living, satisfactory progress in the diffusion of agricultural instruction under such a system will soon be apparent. It is with much satisfaction that the Government of India has watched the recognition of these principles in Madras and the efforts that are being made there gradually to mature a complete system for their application in practice. The scheme for action in the same direction which has just been proposed by His Excellency the Governor of Bombay is also gratifying as indicating the interest taken in the matter by the Government of that Presidency. In other provinces much cannot be expected under the present system, though, defective as it is, the farms, if they are carefully and intelligently managed, intelligently supervised, and placed on a substantial and permanent basis, must gradually do good, and the Government of India desire again to commend the subject very earnestly to the attention of Local Governments and Administrations. Bengal especially is a province which is singularly deficient in opportunities for agricultural instruction, while it is perhaps of all Indian provinces the one where a reform of practice is most needed. It is also

the province of whose agricultural resources and capacities the governing body knows least. It is a matter of more than ordinary importance that the cultivating and wealthy land-owning community in this great province should be taught to realise the advantages of a better agricultural practice, and that steps should be taken to remove the reproach which now exists that the very elements of agricultural information, such as the average yield of particular crops in particular soils, are wholly absent. Efforts in this direction were made some years ago by Sir George Campbell; but these efforts, though well intentioned, were frustrated by radical errors in the selection of sites for farms, as well as in the selection of Superintendents. The results were so unsatisfactory that the farms were broken up one after the other, the last being abolished in 1877, on the ground that all the attempts which had been made to teach agriculture to the people of the country had ended in failure. This conclusion was not accepted by the Government of India, and it is desirable in connection with the present question that the views then expressed to the Government of Bengal should be brought prominently before other Local Governments and Administrations. In the letter from the Government of India to the Government of Bengal dated the 4th May 1877, No. 91, it was said:—

"His Excellency in Council is by no means prepared to admit that, because it is not necessary at present to teach to the natives on a scientific basis all the technicalities of the highest farming, there is therefore no opening for instruction of a highly useful, if of a more modest kind, adapted to the present educational and agricultural standard of the country. His Excellency in Council is unable to agree with His Honour the Lieutenant-Governor in the opinion that the attempts of the Government to teach agriculture to the people have failed everywhere. Where these attempts have failed, as at Poosah, failure has been the result of inefficient management; but where ordinary care and attention have been intelligently given to the subject, it is unquestionable that, as at Sydapet in the Madras Presidency for instance, good results have ensued.

"5. It is not necessary to employ specially qualified agricultural chemists for the purposes contemplated by Government in the establishment of model or experimental farms. The objects of the Government have been frequently stated, but they have been well and briefly summarised by Sir John Strachey in the following extract from his Minute of the 28th November 1874, proposing the creation of a Department of Agriculture and Commerce in the North-Western Provinces:—

"'The object of these model farms should be three-fold: first, to obtain complete information, based on actual facts, as to the average productiveness of different crops on the different classes of soil on which they are ordinarily cultivated, and the cost of cultivation; secondly, to establish and prove to the native agriculturists the advantages to be gained from small improvements, such as they are able themselves to carry out under existing conditions, such as deeper ploughing, economical use of canal water, selection of seed, &c; thirdly, to make experiments as to staples and industries which it may be possible to introduce if new, or to familiarise and improve if already existing in the country. The extension of sericulture, the improvement of indigenous fibres, and the manufacture of a finer class of tobacco, may be mentioned among the objects of such experiments.'

"It is to these objects that attention should be particularly directed. It is evident that lessons in such matters, especially under the second head, and instructions in such details (important though they are) as the proper storage and application of the manures ordinarily employed in the country, shewing experimentally how they may be made to retain all their fertilising elements, of which much is now wasted, the proper treatment and breeding of live stock, the improvement of the implements employed, and other similar matters, may as successfully be imparted by an energetic man of fair intelligence, possessing an adequate practical knowledge of modern farming (and consequently having such knowledge of agricultural chemistry as is essential to the successful pursuit of modern farming), as by a professional chemist of high scientific attainments.

"The Governor General in Council is convinced that lessons of this kind are urgently needed, and that if measures for the elementary instruction in such matters of the agricultural community are persevered in by the Local Governments (without whose cordial co-operation nothing can be done), they cannot fail after a reasonable time to have very considerable effect upon the cultivators in the neighbourhood for the Government farm and through them upon others further away."

11. The excellent results which have followed the creation of a Department of Agriculture, and Commerce, in the North-Western Provinces; in the impulse which has been given by it to agricultural enquiry and improvements, indicate perhaps the best form in which Government action can be directed to the promotion of the objects in view. With the establishment of such a Department in each province (and it is maintained in the North-Western Provinces entirely from provincial funds) the extension of the system, whether by

agricultural instruction in schools, or by practical teaching in experimental farms, or where means are available by a combination of both, could be regulated under efficient control and advice according to the particular requirements or circumstances of each province. From this point of view the Governor General in Council will be glad to learn that the matter has again received from the Government of Bengal and other Local Governments and Administrations the consideration which its importance merits, and he would wish to be informed at an early date of the results of that consideration.

ORDER.—Ordered, that the above Resolution be communicated for information and guidance to the Local Governments and Administrations noted in the margin, and for information to the Secretary of State for India.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

APPOINTMENT OF A COMMISSION FOR THE CODIFICATION OF INDIAN SUBSTANTIVE LAW.

No. 12 (Legislative), dated 4th March, 1875.

From—Her Majesty's Secretary of State for India,
To—The Government of India.

In preparing for Parliament the Bill for the consolidation of the law as it relates to India, which has been the subject of correspondence between your Excellency and my predecessor, it has come to my notice that section 28 of the 16 & 17 Vic., cap. 95, providing for the appointment of an Indian Law Commission, has not been repealed by the Indian Councils Act of 1861, or by any other enactment. It is at this moment of no practical force, inasmuch as the Law Commission which was appointed under the authority of that section brought its labours to a premature conclusion under circumstances with which your Excellency is probably acquainted. But the existence of that section makes it necessary to decide, previous to the introduction of a Consolidation Act, whether it is expedient that the powers which it confers should be kept alive, or any similar powers reserved to Her Majesty or to the Secretary of State for India.

2. It is difficult to exaggerate the value of the work which has been accomplished by the various persons and bodies who have contributed to the codification of Indian law, and specially by the successive Law Commissions. It is no small benefit to the people who resort so freely to English Courts of Judicature, that they should possess so many branches of the law of India stated in orderly sequence and simple language. But the work is not complete, although the portion already accomplished is considerable. The criminal law is set forth in the Penal Code. The procedure of the Criminal Courts, and most of the administrative rules essential to efficient government, are contained in the Code of Criminal Procedure. A Code of Civil Procedure has been in force for several years, and when it has been revised by you it will contain the whole procedure of the Civil Courts. These three codes are alone complete; but the whole law of contract, of evidence, of testamentary and intestate succession among Europeans, of European marriage and divorce, of limitation and prescription, are contained in a series of measures of no great compass or intricacy, which are ready to be made chapters of a Civil Code.

3. It is impossible to deny that these measures have removed a serious amount of complexity and confusion. But some of the chief branches of law remain still uncodified, and litigation on questions arising under them is still subject to needless uncertainty and cost. The causes which led to the suspension by the Law Commissioners of the process of codification are much to be regretted; but they form no ground for abandoning the completion of an indispensable task.

4. It does not, however, necessarily follow that the same or a similar machinery should continue to be employed. An unpaid Commission, containing distinguished statesmen and judges, is a proper instrument for deliberation upon important general principles. Its decisions will not only presumably be sound, but they will also be authoritative. But there are obvious reasons which make it less suitable for the treatment of laborious details upon which discussion and controversy necessarily arise. I think it preferable, therefore, to entrust to a small body of eminent draftsmen, selected for the purpose, the task of preparing for the consideration of your Legislative Council the remaining branches of the Indian Code. The form in which, if at all, they shall ultimately pass into law will depend, of course, upon the deliberations of the Legislature presided over by you. You will doubtless inform me if any changes of serious moment are contemplated. In order to reserve to Her Majesty the power of exercising, without inconvenience to the general progress of the work, her prerogative of disallowance, in case of important alterations, I shall desire that it be submitted to the Council in a series of comparatively brief Bills.

5. I shall be glad to receive from your Excellency in Council any observations upon this subject which it may occur to you to make.

I have, &c.,
(*Signed*) SALISBURY.

No. 6 (Legislative), dated 5th July, 1875.

From—The Government of India,
To—Her Majesty's Secretary of State for India.

We have the honour to reply to your Lordship's despatch of the 4th March 1875 (Legislative, No. 12), which states that it has become necessary to decide whether it is expedient that the powers conferred by section 28 of the Statute 16 & 17 Vic., cap. 95, should be kept alive, or any similar powers reserved to Her Majesty or to the Secretary of State for India; and in which, after some discussion on the work and the constitution of former Law Commissions, and of the constitution of a possible new one, your Lordship invites any observations upon the subject which it may occur to us to make. The subject seems to us one of great importance and difficulty, and we have given careful consideration to it.

2. With regard to the mere question of continuing, or modifying, or repealing the statutory provision, we hardly know what power it conferred which did not exist without it, unless it were the power of examining certain official persons and calling for certain official documents connected with the administration of India. But, though there may have been some use in conferring such a power in the year 1853, there can hardly be any use in it now. Unless, therefore, it is in contemplation to pay out of English funds any new Commissioners who may be appointed, our opinion is that the enactment in question may be repealed without being replaced by anything similar to it.

3. This opinion, however, only touches the form and not the substance of the question. The substantial question is, whether a new Indian Law Commission shall be created in any shape, and if so, in what shape?

4. That a great quantity of valuable work was done by previous Commissions is certain. How much of it would have been done without them must of course remain uncertain. We think it may be said positively that if it had not been for the Commissions, the Government of India must have sought some other skilled assistance for the preparation of its laws, beyond the legislative staff which it has actually employed in India. And it may be added with great probability that, if it had not been for the Commissions, the Supreme Indian Legislature would not have undertaken so much, or have proceeded with so much confidence, as has actually been the case.

5. These benefits, however, have been attended with two great disadvantages. One is that the discussion in India of projects of law initiated in England has not been so free as it would have been if those projects had been initiated in India itself. The other is that a body sitting in England for the purpose of producing Indian Codes, and under no other responsibility for the government of this country, has a natural tendency, an inevitable one as we believe, to do its work with reference rather to some general notions of legal symmetry than to the circumstances of the country for which the law is to operate; and then projects of law will be promoted which may not be wanted at the time, or may not be wanted at all. These two difficulties, and especially the latter, led to the extinction of the last Commission, who were dissatisfied with the slowness of the Government of India to adopt the fruits of their labour.

6. We do not anticipate any disagreement on your Lordship's part when we say that the Local Government of India should take the responsibility of judging what new laws are wanted for India, and at what time it is expedient to discuss and pass them. Yet the difficulties we have mentioned show the strong tendency of a permanent Commission sitting in England for the purpose of making laws for India to draw the initiative out of India into England. Every complaint by them of undue criticism or of undue hesitation here, is in effect a complaint that the initiation of Indian laws is retained in India; and how far such complaints may go to transfer that responsibility is strongly illustrated by the correspondence which took place in the years 1869 and 1870 between the Government of India and the Secretary of State with respect to the Contract Law. We

hardly know by what means your Lordship proposes to avoid a recurrence of the difficulties which have been already experienced, because the precise mode in which the contemplated Commission is to work is not explained in the despatch under reply. But your Lordship proposes to employ eminent draftsmen, who are not apt to be too submissive under criticism or apparent neglect of their work. And, as at present advised, we are afraid that the difficulties we have dwelt upon will be found inseparable from the employment in England of any permanent body of strong lawyers charged with the duty of turning out laws for India.

7. As an instance of the difference of view which may prevail on the question what laws it is desirable to prepare for India, we may refer to one of the works of the last Commission, which doubtless seemed to them both desirable and unexceptionable from their point of view, namely, the theoretical view of what was proper matter for codification. The work we refer to is the draft law of Negotiable Instruments. It was introduced by Mr. Massey into the Legislative Council in the year 1867, and met with a very adverse reception from the commercial members of Council. It was referred to a Select Committee, but has never proceeded beyond that stage. We are informed by our colleague, the Law Member of Council, that it was placed in his hands when he first came to the country as a desirable piece of codification, and that he devoted some time to a careful study of its provisions. In some few points it purported to alter the law. But besides this, Mr. Hobhouse satisfied himself that in attempting to declare the law, it did in fact effect substantial alterations in it—a result almost unavoidable in the reduction of unwritten law to writing—and that it must be most carefully revised, or the alterations thoroughly discussed. Then came the question whether the circumstances of India, as distinguished from an abstract approval of codification, required a Code upon the subject. To ascertain this Mr. Hobhouse made enquiries of several leading merchants and several leading lawyers in Calcutta. They all answered in the same sense, namely, that no difficulty occurred in practice; that it was a very rare thing for a dispute on a negotiable instrument to come into an Indian Court of law; that nobody wanted any change; that unless hundís, *i.e.*, the great bulk of the negotiable instruments of the country, were excepted from the measure, the Native community would dislike it extremely; and that, even with regard to English transactions, the introduction of a Code would probably only create difficulty where none now existed.

8. Again, we are aware that, from a lawyer's point of view, a Code on the subject of tortious acts or wrongs would be a valuable addition to a body of written law. But we doubt very much whether it would benefit Indian society. It would perhaps be more effectual in suggesting kinds of litigation now very rare, if not wholly unknown in India, than in removing difficulties actually felt in practice. In fact, on many subjects, rights have not become sufficiently settled to afford a basis for a codified law of wrongs. In some cases (as, for instance, the somewhat delicate subject of claims to privacy) a right has been found to exist in one territory, and not elsewhere. To propose a uniform law on such a subject would lead to much difficulty.

9. Furthermore, we have to be very careful not to introduce new laws into this country faster than it can bear. The capacity of the country to receive new law may be considered with reference to the changes which it introduces into the Indian community, to the ability of the Legislature to frame laws, and to the ability of the Judges to digest and apply them. On all these grounds we think that the introduction of new law into this country should be very gradual.

10. It must be remembered that codification cannot be accomplished without change. On some points there is conscious and intentional change, more or less, according to the case. On others there is unintentional change; how much, cannot be known till the new law has been at work for some time. By codification we mean the expression in authoritative writings of law previously to be gathered from traditions and records of a much more flexible and less authoritative character. But it is impossible to give in a few sentences the precise equivalent of a number of traditions and judgments. The moment that is attempted, the language of the Statute becomes the starting-point for fresh controversies as to its precise meaning. And partly from the imperfections of human language; partly because the legislator cannot always save himself from an erroneous view of the true mark; partly because his interpreters are subject to an equal amount

of error,—the result is that a good deal of change is introduced without being intended or foreseen.

11. Now the people of this country do not accept change readily. They have no constitutional machinery for making their sentiments known, so that we may be long in finding out how they are affected by changes in laws; but they are more or less unsettled by every change, and if the change happens to be an important one, the unsettlement is lasting. It is therefore more prudent not to make many changes simultaneously, because the inevitable disturbances resulting from each may be too much in the aggregate; and also because it is desirable to know something of the working of one before bringing on another. Indeed, in our judgment, India is not the country into which any large body of law, either actually or virtually new, can prudently be introduced, except slowly and cautiously.

12. It must further be remembered that all the laws of general importance to the country have to pass through one channel, that of the Legislative Council. The Select Committees of that body have to consider every Bill that passes through their hands, clause by clause and word by word, with all the light that external criticism invited by publication and circulation of the first draft can throw on them. This is a labour which no doubt is lightened by good draftsmanship, and by a careful consideration of the substance of the law in the first instance; but the Committees cannot with propriety or prudence be relieved from it by any means. This labour is the greatest when the draft before them deals with law previously unwritten. In order, therefore, to give the requisite attention to a new Code, a time has to be chosen when other legislation is not pressing, and when dangers arising from haste or weariness may best be avoided.

13. Then we have to consider those who administer the law. It must always be borne in mind with how small a staff of officials the business of this country is conducted. We are disposed to think that our administration of the law we have is a matter in which we are considerably more deficient than in the substance of the law itself, or in the expression of it. It is true that the labour of the Judges may ultimately be lightened by codification, and if the Codes be well framed, certainly will be so. But for a considerable time the acquisition of the new law imposes much additional labour on the Judge. This was brought to our notice in the year 1872, when great energy and ability were displayed in legislation, and a large body of new law was added to the Statute-book. We do not doubt the benefit ultimately accruing even to the Judges from these new laws; but the burden of learning them so as to be able to apply them with promptitude and accuracy has undoubtedly been great. And while the Judge is learning his work, there is risk of erroneous decisions, which again necessitate fresh legislation.

14. Since the year 1872 there has been very little codification in the sense in which we have above used the term, unless the Code for the Criminal Procedure of the High Courts just passed, and that for the Police-courts of the Presidency-towns, which we hope will soon be passed, may be considered such. On the other hand, we have bestowed a great deal of attention on the consolidation of existing laws and the repeal of such as have become obsolete. What has been done in this way will be found stated in a speech delivered by His Excellency the Viceroy at a meeting of the Legislative Council on the 15th March 1875, and reported in the proceedings of that date. Our object is to produce a new edition of Acts of Council which shall, as far as possible, represent the state of that portion of our law at the time of publication. We hope to publish in the course of the current year so much of this work as will comprise the general Acts, and the volumes containing the Provincial Acts and Regulations will follow in due course. We have put the Revenue and Rent Laws of the North-Western Provinces into a much more concise and methodical shape, not without considerable changes, both in substance and in procedure, the effect of which can hardly yet be seen. We are doing the same thing for Oudh, the Central Provinces and British Burma. And we have also turned our attention to that great branch of law which consists of judicial decisions, and which, though not the subject of legislation, is so intimately connected with it as to come properly under the cognizance of our Legislative Department. We are endeavouring to prepare a Digest embodying the judicial law which has taken its place in our system, and we anticipate that such a work will not only

be useful in itself, but will form the best starting-point for future plans of codification. We are also undertaking to supervise reports of current decisions, and, if possible, to put them into a better shape.

15. Now if, in addition to all these things, our attention was demanded by several projects of law issuing from England, we should have more on our hands than we could do. We have been doing that which we thought most required by the circumstances of the time. When the new edition of Acts is published, the work of consolidation and repeal will stand still for a while. We shall then have on our hands the Civil Procedure Code, which is not only of great bulk, but involves several controversies of considerable difficulty, and will tax the strength of Committees, of the Legislative Department, and of other Departments too. In connection with this Code, our colleague Mr. Hobhouse, informs us that he is turning his attention to a measure for the purpose of laying down rules as to various modes of relief to be granted by Courts of Justice. He conceives that they may find in such a measure a convenient and useful guide in many cases. We say no more on that subject now because it has not yet been formally brought before us. If, however, the plan should be adopted, we shall have as much codification on our hands as ought to be going on at one moment.

16. We have gone into these matters because we wish to insist that the time at which measures are brought forward is a matter next in importance to the expediency of the measures themselves, and it is one of which the Local Government of India is the most qualified to judge. The conclusion to which, as we think, all these considerations point, is that whatever professional assistance we want should be obtained, when it is wanted, by the employment of competent persons for particular legislative work; and that if a permanent body at home is appointed for the purpose, it will lead either to inconvenient pressure on the Government of India, or to waste of power by producing work at a time when it is not wanted, or to both.

17. Connected with our last remark is another consideration, that of finance. Waste of power is waste of money, and if eminent draftsmen are employed to frame laws, they must be handsomely paid for it. In our view, we should spend money to more advantage by seeking assistance when we want it. Drafts prepared in England and sent out to us to be kept till the time arrives at which the Government of India thinks it expedient to pass them would almost inevitably require to be wholly or partially redrawn. In a country like this, where the social condition of large classes of the population is rapidly changing, and where three local legislatures are employed in varying and adding to the law, the most carefully prepared Bills would soon need more or less alteration; and change in any part of a skilful and coherent draft generally involves modification, if not reconstruction, of the whole fabric.

18. Inasmuch as we are endeavouring to dissuade your Lordship from the appointment of any permanent Commission at all, it may seem out of place to offer any remarks on the constitution of that which is foreshadowed in the despatch under reply, especially as your Lordship has not entered into any particulars about it. Two remarks, however, we may venture to make, because they have a general bearing on the whole tenor of this letter, as well as a particular bearing on the composition of a Commission.

19. During the last fifteen years Indian Law has diverged more and more from English Law; and unless the draftsmen employed are familiar with Indian Law or work immediately under those who are so, they will never be able to adapt their drafts to the existing system. In drawing a new law, the most essential part of the draftsman's art is to make it fit on to the law with which it comes into contact; and unless that law is thoroughly engrained into the draftsman's mind, or unless his work is constantly supervised by some one who has his mind so furnished, inconsistencies and mistakes are sure to occur. This consideration again points to the inference that the best machinery is to be found in a single draftsman in India either possessed of the requisite knowledge or working under those who have it.

20. Again, there are many subjects or parts of subjects on which it is a great advantage that those who are framing a Bill should be able in a free and unrestrained manner to consult those who are conversant with them in their daily business. In other words, some Bills will be framed at a disadvantage unless they are framed in India. The Penal Code, which has been now pretty well

tried by time, and may be pronounced a very successful piece of legislation, was framed wholly in India. The same may be said of the Limitation Act of 1871, except that it has not undergone so long a probation. Other laws, such as the Civil Procedure Code and the Contract Act, originally framed in England, had to be very largely altered in India. The Evidence Act was completely re-cast here. It seems to us, therefore, that on each subject it would have to be considered whether the advantages which may be gained by greater legal strength in England are not counterbalanced by the disadvantage of disconnection from practical men—a consideration which would be forestalled by the appointment of a permanent body in England.

No. 1 (Legislative), dated 20th January, 1876.

From—Her Majesty's Secretary of State for India,
To—The Government of India.

The despatch of your Excellency in Council of 5th July last (No. 6 of 1875), relating to the question whether it is expedient that the powers conferred by section 28 of Statute 16 & 17 Victoria, chapter 95, for the appointment of a Law Commission, should be kept alive, or any similar powers reserved to Her Majesty or to the Secretary of State for India, has been considered by me in Council.

2. The despatch touches upon various subjects which it would be foreign to the purpose of the present communication to discuss, and on which I abstain from expressing any opinion in this place. I perceive from it with regret that, owing apparently to your sense of the difficulty of reducing law successfully to the form of a Code, you attach less importance than I should have expected to the early completion of the body of Substantive Civil Law which has long been in course of formation for India.

3. While I recognize the delicate and arduous nature of the work of codification, and feel that it must be almost impossible to execute it in such a manner as to be wholly free from the objections which you urge against it, I am convinced that the force of those objections may be reduced to a minimum by skill, moderation and discretion, and that, rating these drawbacks on codified law at the utmost, they are altogether outweighed by the vast practical usefulness which has recommended this method of legislation to most of the nations of Europe.

4. But, independently of these considerations, the long and continuous course of action which has been pursued by the Indian Government in all its branches forbids me to regard the question of giving a Civil Code to India as in any sense an open one.

5. So far back as 1829, the reform of the Indian Laws and Judicature had engaged the attention of the Government of Bengal, and it was suggested by that eminent statesman, Sir Charles Metcalfe, that the various tribunals should be united under a code of laws fitted for local purposes.

6. This policy was embodied in the Act of Parliament which was passed in 1833 for the renewal of the East India Company's Charter. That measure, while it created a Council having authority to legislate for the whole of India, and possessing a member specially qualified to aid in the exercise of that power, likewise provided for the appointment of a Law Commission, with a view to the reform of the judicial system and the enactment of such laws as might be applicable in common to all classes of the inhabitants of India, due regard being had to the rights, feelings and peculiar usages of the people.

3 & 4 Will. IV. cap. 106.

7. The general revision of the Civil and Criminal Law thereupon became and continued to be an avowed object of the Indian Government. The East India Company and the Governor General in Council directed and superintended the operations of the Commission, and when the regulation of Indian affairs again came under the consideration of Parliament,

16 & 17 Vic., cap. 95.

the Act of 1853, while it remodelled the local legislature, also directed the appointment of a Commission in England to carry on the work of legal reform.

8. The English Law Commission then created, and the succeeding Commission of 1861, which was constituted expressly for the purpose of preparing a body of Substantive Civil Law, discharged their duties under the instructions of the Home Government of India, and the discontinuance of their assistance was neither anticipated nor desired by the Government.

9. On a review of these facts, I am of opinion that the completion of a Code of Law is an accepted policy, which cannot now be abandoned without great detriment to the people and serious discredit to the Indian Government. I forbear, therefore, from dwelling on the reasons which might be adduced in favour of that policy, if its continuance were now under discussion.

10. I may, however, observe that the need of such a Code appears to me to be even greater at this moment than when its preparation was first resolved upon, because there is now an additional agency at work which is already producing embarrassing effects, and requires to be properly directed. The amalgamation of the Presidency and Mufassal Courts having taken place before the formation of the Civil Code which they were intended to administer, it has been remarked that the general direction to follow the dictates of equity, which is alone given to them for their guidance, is apt to be interpreted by many of the Judges of appeal by the light of English authorities with which they are familiar, but which are necessarily unknown to the litigant parties, and even to the Judges of first instance. Thus, it is said, many rules ill-suited to oriental habits and institutions, and which would never recommend themselves for adoption in the course of systematic law-making, are indirectly finding their way into India by means of that informal legislation which is gradually effected by judicial decisions.

11. It is manifest that the only way of checking this process of borrowing English rules from the recognized English authorities is by substituting for those rules a system of codified law adjusted to the best Native customs and to the ascertained interests of the country. Up to the present time, only two chapters of the Indian Civil Code have been enacted, treating respectively of Succession and of Contract. In order that the formation of this body of law may be carried on to the best advantage, it will be important to know on what subjects legislation is most urgently required. Your Excellency's Government enjoys peculiar opportunities of forming a judgment on this point, and I request that I may be favoured with your opinion on the question, in what order the remaining branches of law ought to be taken up, and whether each branch should, as in the case of the Contract Act, extend to the whole country, or should, like the Law of Succession, apply only in the first instance to certain special classes or provinces.

12. After receiving your reply, I will consider what is the best machinery for carrying on Indian codification.

I have, &c.,

(*Signed*) SALISBURY.

No. 34 (Legislative), dated the 10th May, 1877.

From—The Government of India,

To—Her Majesty's Secretary of State for India.

WE have now the honour to reply to your Lordship's despatch of the 20th January 1876 (Legislative, No. 1).

2. We have, in the first place, to express our regret that our answer to your Lordship's despatch of 4th March 1875 (Legislative, No. 12) was so worded as to lead your Lordship to suppose that we attach less importance than you should have expected to the early completion of the body of Substantive Civil Law which has long been in course of formation for India. We feel, on the contrary, that the reduction to a clear, compact and scientific form of the branches of our Substantive Law which are still uncodified would be a work

of the utmost utility, not only to the Judges and the legal profession, but also to the people and the Government. It would save labour and thus facilitate the despatch of business and cheapen the cost of litigation: it would tend to keep our untrained Judges from error: it would settle disputed questions on which our superior Courts are unable to agree: it would (as your Lordship has observed in the despatch under reply) preclude the introduction of technicalities and doctrines unsuited to this country: it would, perhaps, enable us to make some urgently needed social reforms without the risk of exciting popular opposition; and it would assuredly diffuse among the people of India a more accurate knowledge of their rights and duties than they will ever attain if their law is left in its present state, that is to say, partially codified, but the bulk ascertainable only from English text-books written solely with reference to the system of English law, and from a crowd of decisions, often obscure and sometimes contradictory, to be found in the English and Indian Law Reports.

3. The subject on which our opinion was invited by your Lordship's despatch of 4th March 1875 was the expediency of creating a Law Commission for India, and the proper constitution of one if created. In our despatch of 5th July 1875 (Legislative, No. 6) we addressed ourselves exclusively to the consideration of those questions, and were led to conclusions adverse to the appointment of a permanent body in England to frame the drafts of laws for India.

4. But we beg to assure your Lordship that the detailed explanation of our general objections to any such arrangement was not dictated by any desire to contest the duty of completing the codification of our Substantive Law—a duty fully recognized by the Government of India.

5. In the despatch under reply, your Lordship states that, up to the present time, only two chapters of the Indian Civil Code have been enacted, treating respectively of Succession and Contract. You observe that, in order that the formation of this body of law may be carried on to the best advantage, it will be important to know on what subjects legislation is most urgently required, and you request our opinion on the question, in what order the remaining branches of law ought to be taken up, and whether each branch should, as in the case of the Contract Act, extend to the whole country, or should, like the Law of Succession, apply only in the first instance to certain special classes or provinces.

6. To answer the question thus put, it is necessary to mention the branches of our Substantive Law which still remain uncodified.

7. Foremost in importance, both in itself and as being applicable at once to every class of the population, is the law of Contract. It is true that Act IX of 1872 (one of the two chapters of the Civil Code to which your Lordship refers) deals with Contract in general, Sale of Goods, Indemnity and Guarantee, Bailment, Agency and Partnership. But the following subjects (namely)—

(*a*) Sale of Immoveable Property, Mortgages, Exchanges, Leases;
(*b*) Insurance (Marine, Fire and Life);
(*c*) Carriers (Marine and Inland), except so far as they fall within the sections on Bailment in Act IX of 1872;
(*d*) Negotiable Instruments; and
(*e*) Bottomry, Respondentia and the other liens on moveables, except those of unpaid vendors, bailees, pawnees and agents;

are still uncodified and would properly be dealt with by chapters completing the Code of Contract Law.

8. The laws of Persons, Personal Rights and Personal Relations stand next in importance. As to the law of Persons, we already possess Acts dealing directly with minors and lunatics, and no further legislation seems necessary at present in this respect. But, save as regards the infractions provided for by the Penal Code, the law relating to Personal Rights of British subjects and of Aliens is almost untouched by the Indian Legislature. So far as regards the right of protection from bodily injury, defamation and insult, it would be conveniently dealt with in a Code of the law of Torts or Actionable Wrongs; but for the reasons mentioned in paragraph 8 of our despatch of 5th July 1875 (Legislative, No. 6), we would not now take up this subject. As to the law of Personal Relations, namely, Husband and Wife, Parent and Child, Guardian and Ward, Master and Apprentice, and Master and Servant, something has been done by way of codification. Thus, the laws as to the solemnization of Marriage and

as to Divorce have been codified so far as regards Christians and persons (such as members of the Bráhma-Samája) not professing the Christian, Jewish, Hindú, Muhammadan, Pársí, Buddhist, Sikh or Jaina religion. The law of Guardian and Ward is codified, so far as regards Europeans, their children and grandchildren, by Act XIII of 1874; but this Act is in force only in territories not under a High Court, that is to say, only in the Panjáb, Oudh, the Central Provinces, Ajmer, Coorg, Assam and British Burma. The law of Master and Apprentice is dealt with by Act XIX of 1850 and a section in Act I of 1859. But, save as aforesaid, the law of Personal Relations remains uncodified, and, so far as regards Parent and Child and Master and Servant, this defect is of much importance.

9. The law of Property has already been touched by the Succession Act and the Contract Law (Act IX of 1872) and will, to a large extent, be covered by the measures suggested in paragraph 7 of this despatch. There seems no pressing need for declaring the law as to certain matters not so covered, such as the property of the State and the ownership of animals wild by nature. The subjects of Shipping, Corporate Property, Patents, Copyright and Trade-marks have already been treated by the Indian Legislature. Settlements and Powers will be dealt with by the Transfer of Property Bill sent to Your Lordship with our despatch (Legislative, No. 3 of 1877) dated the 26th day of January last. But there remain the three important subjects of Trusts, Servitudes (or Easements) and Boundaries. As to Trusts, we beg to refer to the remarks contained in paragraphs 24-26* of the last-mentioned despatch. Except so far as regards the acquisition of a prescriptive title, the law of Servitudes is still untouched; and the subject of Boundaries in their civil aspect is also untouched save by some local laws dealing with boundary disputes and the erection and repair of boundary-marks.

10. The law relating to the acquisition of Property by accession is still uncodified, partially, so far as regards moveable, and wholly, so far as regards immoveable, property. Fixtures will be dealt with by the Transfer of Property Bill above referred to. As to Alluvion, a matter of paramount importance in the Lower Provinces, the Panjáb and Sindh, it is true that there is an old Bengal Regulation (XI of 1825) which purports to deal with that subject. But this Regulation is not only incomplete but obscure: it is encrusted with decisions (some of which are conflicting) by the late Sadr Courts, the High Courts and the Judicial Committee of the Privy Council; and lastly, it does not apply to Sindh, where, it is believed, the only rules in force on the subject are certain executive orders which, under the Indian Councils Act, section 25, have gained the force of law. As to acquisition by transfer *inter vivos* the law is also uncodified so far as regards immoveable property. But Sales, Exchanges, Mortgages and Leases will be dealt with by the Bill last mentioned, and rules as to Gifts for religious

* "24. The subject of Trusts is of itself a very large and difficult one, and whenever it is reduced into the shape of an Act, will, for proper treatment, require a separate measure. Again, so far as relates to the functions of Trustees, the subject is quite foreign to the subject of Transfer of Property; a difficulty which probably the Commissioners felt, because, though they have touched on this part of the subject of trusts, they have done so only to a slight and imperfect extent. These remarks apply to all those provisions about Trusts which are found in clauses 96 and 101 to 109, inclusive, of the Commissioner's draft.

"25. The remaining clauses which are fairly connected with the subject of Transfer of Property are those numbered 3, 97, 98 and 110; and of these the two latter are only for the purpose of qualifying the effect of the two former. The question to decide is whether it is expedient to enact such a law as is contained in clauses 3 and 97; and as at present advised we are of opinion that it is not.

"26. The effect of these two clauses is that, excepting in the case of trusts for sale and for creditors, no person shall have any interest in land as a trustee, but the persons for whom benefit is intended shall take directly the interests given to them indirectly through the trustee. With all that the Commissioners say as to the Statute of Uses we agree; but practically the bad effects of the severance of legal and equitable estates are to a great extent, if not wholly, avoided by having, as we have long had in India, a single jurisdiction instead of a double one. The Commissioners, we venture to think, can hardly have considered the impossibility of getting rid of trust-estates except by abolishing innocent and useful family arrangements; for they have not provided for those numerous cases in which a trustee has active duties to perform. Suppose, for instance, a man wishes to secure upon his land an annuity for his widow and portions for his nephews and nieces; what arrangement can possibly be so convenient or efficacious as to give the land to a trustee absolutely in fee or for some substantial interest? How can we say that an annuitant for so much a year and portionists are to have each of them the interests which the settlor has given to a trustee for the benefit of all? Again, the Commissioners themselves say that "duties in the nature of trusts will of course arise where the proprietor is under disability." We cannot see why they should not be made trusts to all intents and purposes. We cannot see why the settlor should not be allowed to name the trustees who are to work his own arrangements. If a man wishes to give land to his infant niece, why should he be compelled to make her legal owner and leave the property to be managed by whosoever may chance to be her guardian? Why may not the settlor name a trustee himself? Who is likely to make a better choice? Such questions might be multiplied, and we cannot see our way to answer them in the sense of the Commissioners' draft. We are therefore not willing to encounter the disturbance which would certainly be caused by such large alterations, even to the extent of publishing them for comment."

and charitable purposes will be prescribed by the same Bill. The Succession Act, section 178, contains rules as to Donations *mortis causâ*; but in other respects the subject of Gifts is still untouched by the Legislature.

11. Having thus enumerated the branches of our law which seem to require codification, we proceed to indicate the order in which we think they should be taken up. We should here, of course, be influenced more by the actual wants of the country than by any love for logical arrangement, legal symmetry or scientific completeness. Bearing this in mind, we should first, we think, take up the three Bills which the late Indian Law Commission framed with a view of completing the Code of Contract Law. Of these the Transfer of Property Bill is ready for introduction into our Council, and so far as regards leases and mortgages is much required: the Negotiable Instruments Bill, which was introduced and referred to a Select Committee as far back as December 1867, if rendered, as we propose to render it, an embodiment of the actual law of Bills of Exchange, Promissory Notes and Cheques, will, we doubt not, be welcomed by the mercantile community; and the Insurance Bill (which was sent out in an unfinished state) can be completed in the course of the summer, and will supply rules on subjects of great and growing importance in India.

12. Then, or pending the completion of the Insurance Bill, the Guardian and Ward Act (XIII of 1874) might be extended to the whole of British India, and possibly to all the classes to which the Succession Act applies, and the two subjects of Parent and Child and of Master and Servant might be taken up. The rules as to custody of children, which a Bill on the former subject would of course contain, would supply a want often felt by the Courts of this country. A Bill on the latter subject has already been prepared by our colleague, Mr. Stokes, and will, we think, prove useful. Much of the harshness with which Europeans and East Indians occasionally treat Native servants is due, we are convinced, to the absence of any distinct ascertainable rules as to their respective rights and duties. The opportunity might be taken to amend the law as to the right of servants to compensation for injury caused by the negligence of foremen in their masters' employment, and to enable the Local Governments and Administrations to establish a system of registering household servants.

13. Alluvion and its kindred subject Diluvion should then, we think, be dealt with.

14. We would then take up the law of Easements—a difficult and complicated subject, but one on which the law has recently been digested with exceptional care and completeness.

15. The law of Boundaries might then be dealt with. A short Act would contain all the rules that a Civil Code need provide on this subject.

16. When these measures are passed, the rights of the population will, to a large extent, have been ascertained and declared. Then (but not till then) we should deal with the subject of Torts or Actionable Wrongs, laying down clear rules as to the damages to be awarded in respect of each, and taking the opportunity to amend the law in three respects, namely, by barring suits for mere oral abuse, by finally getting rid of suits for criminal conversation, and by altering the law in the Presidency-towns so as to allow an injured person to bring a civil suit without instituting criminal proceedings.

17. The outline of a complete Civil Code would then be nearly filled in. There would remain the subjects of Carriers (Marine and Inland), Trusts, Gifts *inter vivos*, Bottomry and the other liens on Moveables which have not been treated by the Contract Act, and Accession to Moveables so far as this subject is not disposed of by sections 155-157 of the same Act. The order of dealing with them is unimportant.

18. The task of arranging scientifically the various chapters of the Civil Code thus produced would then remain; and to the finished work we should either prefix or subjoin a chapter containing rules for its interpretation. The enactment of such a chapter would be welcomed by our Mufassal Magistracy, and would afford an opportunity for abolishing the pernicious and illogical distinctions between the modes of construing remedial statutes, penal statutes and statutes imposing charges on the subject, which have been imported from England by Judges more familiar with the common-law than impressed by the importance of giving effect to the wishes of the Legislature.

19. We have now to answer your Lordship's enquiry as to whether any and which of the laws that we have recommended should apply, like the Succession Act, only to certain classes of the population. In reply to this question, we beg to say that, in our opinion, the right of pre-emption exercised by Muhammadans and their Hindú imitators, the option of certain Native mortagagees to make further advances required by the mortgagors, and the custom of Hindú merchants as to hundís (Native bills of exchange) should not be interfered with; but that, with these savings, and those mentioned in sections 49 and 93 of the Transfer of Property Bill, all the measures which we have mentioned as necessary to complete the Code of Contract Law may safely and usefully be applied in the first instance to every one in British India. A like answer may be given as regards the proposed enactments relating to Alluvion and Diluvion, Easements, Boundaries, Torts, Trusts, Gifts *inter vivos*, and, probably, Master and Servant. On the other hand, we would, in the first instance at all events, confine legislation on the subjects of Husband and Wife, Parent and Child, and Guardian and Ward to the classes to which the Succession Act applies; in other words, we would leave all persons professing the Muhammadan, Hindú, Buddhist, Sikh, Jaina or Pársí religion their existing laws and usages on these subjects. Those laws and usages are, in the case of Muhammadans, founded on the Kurán and the Traditions, and interference with them might therefore excite religious feeling. In the case of Hindús, though it would be desirable to settle certain vexed questions as to the right of a Hindú father to the custody of his child, the right of a Hindú outcaste to the custody of his minor wife, we should prefer to let them stand over for the present. The fact that in the Presidency-towns the rights of Hindú and Muhammadan fathers are expressly reserved by statute* should not be lost sight of in considering the propriety of applying to Natives our laws as to Personal Relations.

* 21 Geo. III, c. 70, s. 18. 37 Geo. III, c. 142, s. 12.

20. In conclusion, we beg to repeat our deliberate opinion that the codification of Indian Law should be carried out in India rather than in England. We adhere to the reasons against the constitution of a permanent Indian Law Commission working in England which are given in paragraphs 5, 17, 19 and 20 of our despatch of the 5th July 1875. We would add that there is nothing in parliamentary legislation which countenances the appointment of such a Commission. On the contrary, under 3 & 4 Wm. IV, c. 85, ss. 53, 54,† the Indian Law Commissioners were to do, and did, their work in India, not in England, and the existence of the Commission appointed under 16 & 17 Vic., c. 95, s. 28, to examine and consider the recommendations of the former Commission, and to report their opinion thereon to Her Majesty, was expressly limited to three years after the passing of the latter statute. We submit, further, that the finances of India can ill afford the considerable outlay which would be needed to establish and maintain for many years in London a Commission composed of eminent lawyers. A Commission like the first, acting in India under the instructions of the Governor General in Council, and reporting to the same authority, would, no doubt, be free from many of the objections above referred to: its projects of law would be suited to the country and would be freely discussed and criticised by the Indian public: the introduction of those projects would be gradual: the Bills prepared to give them effect would be passed into law soon after they were finished; and the Bills themselves would be prepared by draftsmen conversant with the Indian Acts and Regulations, and able to consult unofficially judges, lawyers and civilians familiar in practice with the subjects dealt with. But here again the financial difficulty arises. The cost of the Indian Law Commission from 1835-36 to 1849-50 was Rs. 22,29,866, or an average annual charge of Rs. 1,59,276; and there is no reason to believe that a new Commission would cost less. On the whole, we think that the assistance which our Legislative Department will doubtless require in completing our Civil Code may most economically and effectively be given by attaching to that Department one of the barristers whom the Parliamentary Counsel has trained as parliamentary draftsmen. And should your Lordship be satisfied that the appointment of a Commission is open to the objections which we have submitted to your consideration, we shall be glad if you will request Sir Henry Thring to select from his former pupils one

† Repealed by 37 & 38 Vic., c. 35.

willing to proceed to India and competent to aid us in the work of codification.

We have, &c.,

„ A. CLARKE.
„ J. STRACHEY.
„ E. B. JOHNSON.
„ WHITLEY STOKES.

P. S.—We enclose a Minute written by our Hon'ble colleague Sir E. C. Bayley after most of us had signed this despatch.

Minute by the Hon'ble Sir E. C. BAYLEY, *dated 15th May, 1877.*

I DO not dissent from the present despatch, but I think that paragraph 20 hardly expresses fully some of the objections to the establishment of a Law Commission in England.

Gentlemen of the ability and standing to whom alone a task of this sort could be committed, would hardly consent that their work should be submitted to the absolutely unrestricted revision of the Indian Government and the Indian legislature; and yet it is impossible to pass laws free from the most serious, even dangerous, errors and defects unless this condition be fulfilled. For it is only through the numerous references to persons interested or skilled in the matters which form the subject of legislation—and through the discussions for which the constitution of the Indian legislature provide—that such errors and defects can be discovered and cured. Within my own knowledge, some draft measures have been altogether abandoned in consequence of the opinions so elicited in India; and I think it may be fairly said that no one measure of importance has of late years passed into law which has not been very much modified and improved in deference to external criticism obtained by this means.

I believe it is of vital importance, both from a political and from an administrative point of view, to maintain the opportunity thus secured for the legitimate expressions of sound public opinion on our legislative measures, and this would be either altogether lost, or reduced to an unimportant minimum, if these measures received their substantial form in England.

On the whole, I believe the existing machinery for legislating in India is admirably fitted for the present requirements of the country, and I should greatly deprecate any modification which would limit its powers.

No. 46 (Legislative), dated 9th August, 1877.
From—Her Majesty's Secretary of State for India,
To—The Government of India.

The despatch of your Excellency in Council, dated 10th May, No. 34 of 1877, on the subject of the codification of Indian substantive law, has been considered by me in Council.

2. The course which your Government proposes to follow is clearly stated in the despatch under reply. The question whether the work of codification shall be initiated in India or in England is of extreme difficulty; but, on the whole, after much consideration, I am prepared to acquiesce in the plan proposed by your Excellency in Council, and I shall therefore consult Sir Henry Thring as to the selection of a skilled draftsman who shall be attached to the Legislative Department of your Government.

3. I desire, in thus sanctioning the course suggested by your Lordship in Council, to make two remarks. As the subjects which will engage the attention of your Legislative Department will be of great complexity and importance, I trust that the orders requiring all Bills to be sent to me before they become law will be strictly complied with, and you will, of course, be prepared for some delay in receiving my views upon them. I cannot undertake to deal with Bills on the subjects discussed in your despatch under reply without ample time for deliberation.

4. I would further suggest for the consideration of your Government that, when once the scheme for the completion of the Code has been finally settled, it might be expedient that the rough drafts of some of the required chapters should be prepared in this country, and, after examination by me in Council, should be transmitted to India for revision. There are exceptional facilities for obtaining skilled professional assistance in England, and I am inclined to think that, by occasional resort to the above expedient, both economy and early completion of this important work would be promoted.

I have, &c.,
(*Signed*) SALISBURY.

Extract from a despatch from Her Majesty's Secretary of State for India, to His Excellency the Governor General of India in Council,—No. 2 (Legislative), dated the 31st January, 1878.

* * * * * * *

5. Referring, now, to the general question of the preparation of Acts, and especially to the last paragraph of the despatch under reply, in which it is requested that I will continue my endeavours to procure for your Government the services of a competent Parliamentary draftsman, I have to inform you that I will not fail to bear your wishes in mind, but that there will be great difficulty in obtaining for you the assistance of a really competent man. This is shown by a letter addressed to a member of my Council by Sir Henry Thring, a copy of which I enclose. Under the circumstances stated by that gentleman, I would wish your Excellency in Council to give full consideration to the plan sketched out by Sir Henry Thring, and furnish me with your opinion, after due deliberation, whether, under a choice of difficulties, his scheme, or some modification of it, might not be adopted, as affording the best means of proceeding with Indian codification.

I have, &c.,
(*Signed*) SALISBURY.

Dated 10th November, 1877.
Demi-official from—Sir Henry Thring,
To—The Hon'ble Sir H. S. Maine.

In compliance with your request that I should suggest for the consideration of the Government of India the names of any gentlemen whom I might deem qualified for the post of Legislative Secretary to that Government, or of Assistant Legislative Secretary, I named Mr. C. P. Ilbert and Mr. G. A. R. FitzGerald. I find that neither of these gentlemen is willing to go to India. It would seem then that my duty would end by merely stating to you that I have no further recommendation to make upon the subject; but as you have consulted me in respect of the appointment of persons qualified to fill a post which, as I understand, involves the duty of drawing or assisting to draw a code for India, I may perhaps be allowed to add that, in my judgment, the best course the Government of India could adopt for carrying into effect any scheme of general or partial codification, would be to send to England instructions with respect to the subject-matter to be embodied in the form of Statutes, accompanied by directions that the English draftsmen should be employed to work out those instructions under the direct control and supervision of the Government of India. Such a plan would command the services of the best draftsmen in England; and if personal communication were required to give a complete finish to the work, a draftsman might go out from England for a few months, and finally settle any important points under the immediate supervision of the Indian Government.

I consider such a plan to be quite practicable, as it does not appear to me that the work of codifying or consolidating the law requires the constant personal communication which is necessary as between a minister and his draftsman in the conduct of current legislation in England.

I am, &c.,
(*Signed*) HENRY THRING.

No. 53 (Legislative), dated 24th June, 1878.
From—The Government of India,
To—Her Majesty's Secretary of State for India.

We have the honour to acknowledge the receipt of the despatch of Your Lordship's predecessor, Legislative No. 2, dated 31st January 1878, in which, referring to our request that the services of a Parliamentary draftsman might be procured for our Government, Lord Salisbury informs us that there will be great difficulty in obtaining the assistance of a really competent man. This, His Lordship says, is shown by a letter addressed to Sir Henry Maine by Sir Henry Thring, a copy of which Lord Salisbury encloses. Lord Salisbury then desires us to give full consideration to the plan sketched out by Sir Henry Thring and furnish our opinion, after due deliberation, whether, under a choice of difficulties, his scheme, or some modification of it, may not be adopted, as affording the best means of proceeding with Indian codification.

2. In reply, we beg to say that we have considered the proposal made by Sir Henry Thring with the respect due to every thing emanating from so able and distinguished a man. It amounts in effect to this: that we should employ draftsmen in London to frame our measures of codification under our direct control and supervision, and that in special cases a draftsman might come out to India for a few months and finally settle any important points arising out of his drafts. Two questions at once suggest themselves: can we exercise direct control and supervision over a gentleman working 5,000 miles away? And can the services of a draftsman of sufficient standing be secured for such temporary employment in India? As regards the first of these questions, we would observe that the substance of every complex Bill introduced into the Indian legislature, no matter how carefully framed it may be in the first instance, undergoes constant modification in Committee, partly owing to the action of the members, but chiefly owing to the communications received from and through the Local Governments. It has been found by experience that these modifications, to be made effectually, and without spoiling other parts of the same measure, must be made by the hand that originally drew the Bill, and that the expediency of making them often depends on technical considerations with which the draftsman is alone familiar. Either, then, he must be constantly present during the process of revision, or the Committee must engage in protracted correspondence which would certainly cause great loss of time and would probably lead to unsatisfactory results. With reference also to the form of a Bill, we fear that any one working in England would find it almost impossible to maintain that uniformity of structure, arrangement and wording, to which special importance has been attached in our legislation. We cannot, therefore, dispense with constant personal communication with our draftsman, As regards the second question, we cannot think it probable that any one of the lawyers whom it would be worth our while to employ would ever consent to leave his work in London and break up his professional connection for the sake of the remuneration that we could afford to give him for a few months' labour at Simla or Calcutta.

3. But these difficulties, serious as they are, are of but little importance as compared with another objection which appears to us to attach to Sir Henry Thring's proposal. It is this, that to draw even the simplest Act, the draftsman must have at his finger-ends the whole of the existing law relating to its subject-matter, and that there is not now, and probably never will be, a body of draftsmen in England familiar enough with Indian law to frame Bills which will provide for all matters which they should deal with, and steer clear of all rules which they should not repeal. In drawing a new law, the most essential part of the draftsman's art is to make it fit on to the law with which it comes into contact; and unless that law is thoroughly engrained into the draftsman's mind, or unless his work is constantly supervised by some one who has his mind so furnished, inconsistencies and mistakes provocative of litigation, wasteful of public time, costly to suitors, injurious to our intellectual prestige, are absolutely certain to occur.

4. We will now enumerate briefly the sources of the laws in force in India, all of which ought to be as well known to the Indian draftsman as the English reports and Statutes are to Sir Henry Thring himself. They fall under three heads: statutory law, case-law, and Native law and local usages.

A.—Statutory Law.

I. The Statutes relating to India. Of these there are now 195, without counting those passed before the year 1726, when the Mayors' Courts were established in the Presidency-towns.

II. The Acts of the Governor General in Council. Of these there are now about 388, filling (say) 4,000 pages.

III. The Acts of the three Local Legislative Councils. Of these there are now about 180.

IV. The unrepealed Bengal, Madras and Bombay Regulations. Of these there are still 113.

V. The unrepealed Regulations made under 33 Vic., c. 3. Of these there are 31.

B.—Case-law.

VI. The decisions of the Judicial Committee of the Privy Council reported in Moore's Indian Appeal Cases, the Law Reports (Indian Appeals) and elsewhere.

VII. The Reports of the late Supreme Court, the late Sadr Díwání Adálat, and the present High Court at Fort William.

VIII. The Reports of the late Supreme Court and the present High Court at Madras.*

IX. The Reports of the late Sadr Adálat and the present High Court at Bombay.

X. The Reports of the late Sadr Adálat and the present High Court in the North-Western Provinces.

These reports fill 263 volumes, which are constantly growing in number.

C.—Native Law and Local Usages.

These may, to some extent, be gathered from text-books and translations; but our chief sources of information are the reports of Local Governments on the draft Bills and oral communication with intelligent Natives and other persons of Indian experience.

5. The total absence of anything like a complete index to the Indian Acts and Regulations or a decent digest of the decisions of the Indian Courts enhances the difficulty of getting up in a short time the Indian law on any given subject, and it is certain that even the most industrious draftsman could not gain in less than three years a sufficient familiarity with this mass of jurisprudence.

6. We should anticipate the greatest difficulty in inducing any English lawyer with an established, or even a promising, practice (and such alone we should care to employ) to devote himself to so long and so laborious a task for the chance of being retained to draw one or two of our measures of codification.

7. It need hardly be pointed out to persons in England who interest themselves in the codification of Indian law, that this country is not a *tabula rasa* on which we may inscribe fancy Codes or copy bodies of English rules. Whatever may be the case at home or on the Continent, in this country there is not now, and never has been, any opportunity or desire for such anti-historical codification as was proposed by Bentham. With the sole exceptions of Insurance and Maritime Lien, India has either developed, with more or less completeness, or adapted to local circumstances, rules on every branch of law that could fitly be codified; and the first principle of the policy of codification which the Government of India has resumed is that as little change as possible should be made in the substance of the existing law, whether enacted by the legislature, declared by judicial decisions, or established by ancient usage. To give effect to this principle, the draftsman must obviously know, not only what to say, but what to abstain from saying; and this knowledge, we are persuaded, can only be obtained by training and study in India.

8. Since, therefore, we have reluctantly been forced to the conclusion that neither Sir Henry Thring's scheme, nor any modification of it, could be adopted with a reasonable chance of success: since we retain our opinion that the codification of Indian law should be carried out in India rather than in England; and since, from the despatch under reply, it appears impracticable to obtain a

* There are also several volumes of printed judgments of the late Sadr Adálat at Madras; but they are now hardly ever cited, and may, for the present purpose, be neglected.

Parliamentary draftsman competent to aid us in the work of codification, we feel constrained to revert to the proposal suggested rather than made in paragraph 20 of our Legislative despatch No. 34, dated 10th May 1877, namely, that a Commission should be appointed to complete the codification of the Substantive Law of this country, and to consider such other matters in relation to the laws of India as may be referred to it by the Government; but that it should act in India under the instructions of the Governor General in Council, and report to the same authority.

9. The Commission might be composed of three: a distinguished English lawyer (preferably a Barrister Judge of one of our High Courts), a Civilian Judge of one of the same Courts, and the Law Member of our Council, who should of course be President of the Commission. This would secure not only adequate legal ability and learning, but also familiarity with the practice of the Indian Courts, large experience of the working of our present laws, intimate knowledge of the people, their feelings and usages, and lastly, the due influence of the Executive on the operations of the Commissioners.

10. The cost of such a Commission would not be serious. We have reason to believe that the services of one of the ablest and most experienced of our Barrister Judges could be obtained for Rs. 5,000 a month, and the pay of the Civilian member would of course not exceed that sum. Allowing, then, Rs. 2,000 a month for the salary of a Secretary, the annual cost of such a Commission as we propose would not exceed Rs. 1,44,000. The Commission should, we think, be temporary, not permanent; and as four of the Bills mentioned in our Legislative despatch No. 34, dated 10th May 1877, have already been drawn by our colleague Mr. Stokes:* as two others (the Transfer of Property Bill and the Negotiable Instruments Bill) have already been recast by Select Committees of our Legislative Council, the codification-bills yet remaining to be drawn might be prepared, and the various chapters of the body of law thus produced might be circulated to the Local Governments, revised and arranged, within the period of five years. The total cost of the Commission (assuming it to last for the full time named) would thus be Rs. 7,20,000—a sum which we think may be regarded as quite inconsiderable when compared with the benefits which the country would derive from the early completion of its Civil Code.

* The Easements Bill.
The Alluvion Bill.
The Master and Servant Bill.
The Trusts Bill.

11. Should Your Lordship in Council approve of our present proposal, we shall be prepared to make specific recommendations as to the *personnel* of the Commission.

No. 46 (Legislative), dated 5th September, 1878.

From—Her Majesty's Secretary of State for India,
To—The Government of India.

I have to acknowledge the receipt of your Excellency's despatch, No. 53 of 1878 (Legislative), dated Simla, 24th June 1878. I have considered it in Council in connection with the correspondence which had already passed between my predecessor in office and the Government of India on the subject of the continuance and completion of a Civil Code for India, and of the machinery best suited for carrying on this important work.

2. Lord Salisbury, on March 4th, 1875, called the attention of Lord Northbrook's Government to section 28 of 16 & 17 Vict., c. 95, providing for the appointment of an Indian Law Commission, and observed that, as these provisions had not been repealed, they formed part of the statute law regulating

Indian government. The Governor General in Council, on July 5th of the same year, raised strong objections to the revival of any Law Commission in England, and Lord Salisbury in reply,* after urging on Lord Northbrook's Government that the question of giving a Civil Code to India was no longer an open one, reserved his opinion as to the best machinery for carrying on Indian codification. Some attempts subsequently made, at the instance of your Excellency in Council, to obtain skilled assistance for your Legislative Department from this country have failed through the refusal of the draftsmen nominated for this service to go to India, and you now object, in the second, third and following paragraphs of your letter under reply, to a proposal of Sir Henry Thring that drafts of Indian laws should be prepared in his office in London, and sent to India. You suggest, however, in the eighth and following paragraphs, that a Law Commission of a new description should be appointed, and that it should act in India under the instructions of the Governor General in Council.

* Despatch, 20th January 1876, No. 1.

3. I am prepared to give my favourable consideration to any proposal for reviving the Indian Law Commission in a convenient form. I share the opinion which appears to have been entertained by my predecessor, that it is very doubtful whether Parliament intended that the preparation of an Indian Code should be exclusively confided to the Law Member of Council, however great his ability and energy, and the examination of draft laws of that description exclusively entrusted to your Council for making Laws and Regulations, however well that body may be constituted for purposes of current legislation.

4. Your Excellency's present proposals are contained in paragraphs 9 and 10 of your letter, which are as follows:—

> "The Commission might be composed of three, a distinguished English lawyer (preferably a Barrister Judge of one of our High Courts), a Civilian Judge of one of the same Courts, and the Law Member of our Council, who should of course be President of the Commission. This would secure not only adequate legal ability and learning, but also familiarity with the practice of the Indian Courts, large experience of the working of our present laws, intimate knowledge of the people, their feelings and usages, and lastly, the due influence of the Executive on the operations of the Commissioners.
>
> "The cost of such a Commission would not be serious. We have reason to believe that the services of one of the ablest and most experienced of our Barrister Judges could be obtained for Rs. 5,000 a month, and the pay of the Civilian Member would, of course, not exceed that sum. Allowing, then, Rs. 2,000 a month for the salary of a Secretary, the annual cost of such a Commission as we propose would not exceed Rs. 1,44,000. The Commission should, we think, be temporary, not permanent, and as four of the Bills mentioned in our Legislative despatch, No. 34, dated 10th May 1877, have already been drawn by our colleague Mr. Stokes,* as two others (the Transfer of Property Bill and the Negotiable Instruments Bill) have already been recast by Select Committees of our Legislative Council, the Codification Bills yet remaining to be drawn might be prepared, and the various chapters of the body of law thus produced might be circulated to the Local Governments, revised and arranged, within the period of five years. The total cost of the Commission (assuming it to last for the full time named) would thus be Rs. 7,20,000, a sum which we think may be regarded as quite inconsiderable when compared with the benefits which the country would derive from the early completion of its Civil Code."

* The Easements Bill.
The Alluvion Bill.
The Master and Servant Bill.
The Trusts Bill.

5. There are some precedents which raise a certain presumption in favour of a scheme of this nature. The Indian Legislative Council was formerly assisted in its deliberations by two of the Judges of the Supreme Courts, and the Code of Indictable Offences prepared in this country and introduced into the House of Commons by the Attorney General is to be referred to a Commission very closely corresponding to that which you propose. But the cost of the plan which you submit to me will be very considerable, and I am not altogether satisfied with some of its details. I entirely agree with you that the Judges selected as Commissioners should have "large experience of the working of the present laws;" but if they have had time to obtain this experience, and are withdrawn from their judicial duties for five years, they probably will have completed their service before their labours as Commissioners are finished, so that your proposal would seem to be one for employing retired Judges rather than gentlemen actively engaged in judicial duty.

6. I am again strongly opposed to any scheme for compressing the completion of the Civil Code within a period of five years, or any other definite time. Any such attempt will tend to produce haste and consequent imperfection in an undertaking which, before all things, requires deliberate care. The branches of law which remain to be codified are, on the whole, more complex than those which have been already declared in chapters of the Code, and the difficulties of harmonizing them with the feelings and usages of the people, of which, as you justly observe, knowledge is essential to the codifier, will be unusually great. I concur with my predecessor in deprecating any arrest of codification, but I am convinced that rapidity of execution is much less important than circumspection and thorough consideration.

7. For these reasons, and having regard to the novelty and probable cost of your proposal, I am of opinion that it should, in the first instance, be carried into effect experimentally. I am willing that you should take measures for securing the services of two Judges as Commissioners during six months of the year preceding the commencement of your Legislative sittings in Calcutta during the winter of 1879. They may be treated as on leave for that period, though upon full pay; and at the end of the six months the Commissioners should report to Your Excellency, and I request that you will furnish me with their report before taking any further steps. The cost of the Commission would thus practically be confined to the expense of temporarily supplying the places of the Judges in their Courts, and it would not I, presume, be necessary in all cases to provide substitutes for them.

8. I am not sure whether I am to infer from the 10th paragraph of your letter under reply that you desire to withdraw from the cognizance of the Commissioners, Bills intended to be chapters of the Code, which have already made some progress in the Legislative Council. I am, however, of opinion that this withdrawal would be inexpedient, and I think that all codifying Bills should be submitted to the Commissioners for report. I note Your Excellency's statement that all intended chapters of the Code will be circulated to the Local Governments, and I have observed with pleasure that this appears, from the papers sent to this Office, to be your usual practice.

I have, &c.,
(*Signed*) CRANBROOK.

No. 90 (Legislative), dated 6th December, 1878.

From—The Government of India,
To—Her Majesty's Secretary of State for India.

WE have the honour to acknowledge the receipt of your Lordship's despatch No. 46 (Legislative), dated the 5th September last, on the subject of the continuance and completion of the Indian Civil Code, and to state that we accept your Lordship's proposal that the new Commissioners should, in the first instance, be appointed only for the six months preceding the commencement of our legislative sittings in Calcutta during the winter of 1879-80.

2. We have already ascertained that Mr. Justice Turner of the Allahabad High Court, and Mr. Justice West of the Bombay High Court will be willing to sit on the Commission, and we think ourselves fortunate in securing their services.

3. With reference to paragraph 8 of your Lordship's despatch, we beg to state that we had no intention of withdrawing from the cognizance of the Commissioners the Bills intended to be chapters of the Code, which have already been drafted. On the contrary, it is our desire that the attention of the Commissioners should, in the first instance, be directed to those Bills. The opinions of the local authorities on them are still coming in, and we believe that the consideration of those opinions and the final elaboration of the drafts with reference thereto will be sufficient to occupy the time of the Commissioners during the greater part of the six months' period fixed by your Lordship.

4. There is, however, another matter to which we desire that the Commissioners should apply themselves during this their first session, namely, the consideration of the subjects on which a codification of the law is most urgently needed; the order in which those subjects should be taken up, and

the extent, both as regards territory and classes of the population, which should be given to each chapter of the Code—the consideration, in short, of the general plan of operations.

5. We have already in our despatch No. 34 (Legislative), dated 10th May 1877, stated our views on this matter at some length; but we think it due to the learned persons who are now to be associated with our hon'ble colleague Mr. Stokes in the actual execution of the work, that they should be allowed an opportunity of pronouncing an opinion on the proposed scheme, and should not be absolutely bound down to every detail of a plan which, however carefully considered, was drawn up without any reference to them.

6. As we regard this matter of the selection of subjects for treatment, the order in which they are to be taken up, the general arrangement of the Code and the applicability of its various parts, as one of the first importance, and as we are accordingly anxious that the Commissioners should have all possible assistance in considering it, we would ask Your Lordship to invite two of our late law members, who have always displayed a warm interest in the progress of codification in India—we mean Sir H. Maine and Sir J. Stephen—to favour us with their opinion upon it. We trust that they will not refuse to aid us in this important work, and that their views may be communicated to us by your Lordship in time to be laid before the Commissioners when they meet next May.

We have, &c.,

(*Signed*) A. J. ARBUTHNOT.

FINANCIAL DEPARTMENT.

EXECUTION OF CONTRACTS, &c., ON BEHALF OF THE SECRETARY OF STATE FOR INDIA FOR SUPPLIES AND WORKS FOR THE CALCUTTA MINT.

No. 540, dated Fort William, the 5th February 1879.

Read the following correspondence relative to the execution of contracts, &c., on behalf of the Secretary of State for India for supplies and works for the Calcutta Mint :—

Letter from the Mint Master, Calcutta, No. 1193, dated the 29th October 1878.
Do. to do., No. 4028, dated the 9th November 1878.
Do. from do., No. 1316, dated the 21st November 1878, and enclosure.

RESOLUTION.—In exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Cap. fifty-nine, Section two, the Governor General in Council is pleased to declare that contracts for the purchase and supply of stores and building materials and for the provision of labour, also indentures to bind apprentices at the Mint, for a definite term, may be executed by the Mint Masters, Calcutta and Bombay.

Ordered, that this Resolution be communicated to the Mint Masters, Calcutta and Bombay, for information, and to the Home Department for publication in the Supplement to the *Gazette of India*.

R. H. HOLLINGBERY,
Asstt. Secy. to the Govt. of India.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 1st QUARTER OF 1878.

Circular No. 4 R., dated Fort William. 6th February 1879.

READ AGAIN—

Public Works Department Circular No. 4 R of 5th March 1878.
" " " " 27 R of 16th September 1878.

READ ALSO—

Returns of accidents to trains, &c., on railways open for traffic in India during the 1st quarter of 1878.

OBSERVATIONS.—In accordance with the instructions issued in Circular No. 4 R, just read, the system of quarterly accident returns came into force from 1st January 1878. The forms adopted were those prescribed by the Board of Trade for the railways in the United Kingdom, with scarcely any variation. The object of this change was to bring under review the accidents which occur on Indian Railways at shorter intervals, and more promptly than had been found possible with the system of annual returns. The period contained in the present return being only 3 months, no useful comparison can be made with previous returns.

Part I.—Accidents to Trains, Rolling-Stock, Permanent-way, &c.

During the quarter ending 31st March 1878, the total casualties resulting from accidents to trains, rolling-stock, &c., were 3 servants killed and 4 injured.

There were 3 collisions between passenger trains, or parts of passenger trains; 16 collisions between passenger trains and goods or mineral trains, engines or vehicles standing foul of the line, causing injury to 2 railway servants; 15 collisions between goods trains or parts of goods trains, causing the death of 1 servant and injury to another; 1 collision between light engines; 12 cases of passenger trains or parts of passenger trains leaving the rails; 130 cases of goods trains, or parts of goods trains, engines, &c., leaving the rails, causing the death of 1 servant and injury to another; 24 cases of trains or engines travelling in the wrong direction through points, by which 1 servant was killed; 3 cases of trains running into stations or sidings at too high a speed; 150 cases of trains running over cattle; 15 cases of running over obstructions; 9 cases of trains running through level crossing gates; and 4 cases of bursting of boilers or tubes of engines. There were also reported 24 cases of failures of machinery, springs, &c., of engines; 1 case of failure of wheels; 37 failures of axles; 12 failures of couplings; 1 case of a piece of rock falling upon an engine in a tunnel; 5 cases of broken rails; 1 case of slip in embankment; 151 cases of fire in trains; 3 cases of fire at stations, or involving injury to bridges or viaducts; and 116 other miscellaneous accidents.

Of the 116 miscellaneous accidents, 93 are reported by the East Indian Railway alone. These consist chiefly of cases of points being damaged, and it seems doubtful whether uniformity of practice is observed on all railways in returning this class of accidents.

Of the 37 axles which failed, 33 were wagon axles, the remaining four were 3 tender axles, and 1 trailing axle of an engine. The last four are reported in the return of the Rangoon and Irrawaddy Valley State Railway.

Part II.—Accidents to passengers from causes other than accidents to trains, &c. Persons passing over level crossings, trespassers, and others.

There were 5 passengers killed and 9 injured, of whom 1 was killed and 1 injured by falling between carriages and platforms; 1 killed and 1 injured by falling when getting into or out of trains; 1 injured whilst crossing the line at a station; 2 killed and 5 injured by falling out of carriages during the travelling of trains; and 1 killed and 1 injured through other causes. Of other persons included in Part II of the return, 3 were killed and 2 injured whilst passing over railways at level crossings; 22 killed and 11 injured while trespassing on the line; 9 were suicides; 1 injured in attempting to commit suicide; and 8 killed and 6 injured from miscellaneous causes.

Part III.—Accidents to servants in the employ of railways or of contractors whilst performing duties connected with the transit of passengers and goods.

Out of a total of 34 killed and injured, 2 were killed and 15 injured during shunting operations; 3 killed and 11 injured by falling off engines, &c.; 1 injured by coming in contact with over bridges, &c., during the travelling of trains; 7 killed and 4 injured whilst getting in or out of trains, engines, &c.; 2 killed and 4 injured whilst loading, unloading or shunting; 2 injured whilst breaking, spragging or choking wheels; 2 killed whilst working on the permanent-way or in sidings; 1 injured whilst walking along the lines on the way home or to work; 8 killed and 5 injured whilst walking, crossing or standing on the line; 1 injured whilst passing between vehicles; 1 killed and 6 injured whilst attending to the machinery of engines; 2 killed whilst attending to gates at level crossings; 2 killed and 2 injured by falling or being caught between vehicles and platforms; 2 injured by the falling of weights, &c.; 3 killed and 3 injured whilst coupling or uncoupling wagons; and 2 killed and 8 injured from miscellaneous causes.

The following table shows the general total of persons killed and injured in connection with the working of trains on all railways during the period under review:—

	Killed.	Injured
PASSENGERS—		
From causes beyond their own control		2
From their own misconduct or want of caution	5	7
SERVANTS—		
From causes beyond their own control	2	15
From their own misconduct or want of caution	35	54
Persons passing at level crossings	3	2
Trespassers (including suicides)	31	12
Other persons	8	6
	84	98

In addition to the above, 17 persons, mostly railway servants, were killed and 48 injured in yards, workshops, &c. There have also been reported 105 deaths of passengers in carriages and at stations, due to a large extent to their undertaking journeys when in bad health.

Owing to the late submission of the returns of some of the railways and the incomplete manner in which they were submitted, the compilation of the general returns for this quarter has been considerably delayed.

RESOLUTION.—Attention should be drawn to the large number of miscellaneous accidents on the East Indian Railway and enquiry made whether similar accidents are reported on other Railways. The discretionary powers relegated to Consulting Engineers in para. 2 of Circular No. 27 R, dated the 16th September 1878, should be exercised in the exclusion from the returns submitted to Government of such accidents as damage to points resulting in no further mischief. All Local Governments and Officers concerned should be requested to adopt such measures as will ensure the careful preparation and punctual submission of these returns to the Government of India.

ORDER.—Ordered, that this Resolution be communicated to the Governments, Administrations and Officers noted in the margin, for information and guidance, together with copies of the returns compiled.

Governments of Madras, Bombay, Bengal, and North-Western Provinces and Oudh.
Chief Commissioners, Central Provinces and British Burma.
Resident at Hyderabad.
Consulting Engineers to the Government of India for Guaranteed Railways.
Directors of State Railways.

Ordered, also, that these papers be forwarded to the Department, Government, Administrations and Officers marginally noted, for information, and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Home Department.
Government of the Punjab.
Chief Commissioners, Mysore and Coorg, and Assam.
Agents to the Governor General, Rajputana and Central India.

Ordered, further, that this Resolution, with Tables 1 to 4 of the returns, be published in the Supplement to the *Gazette of India*.

J. S. TREVOR, COLONEL, R.E.,
Offg. Depy. Secy. to the Govt. of India.

TABLE No. I.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the First Quarter of 1878, as KILLED and INJURED on the RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the Two former Classes, between ACCIDENTS happening from Causes beyond their own Control, and ACCIDENTS happening otherwise.

* Opened on 10th January 1878. † Opened on 15th March 1878.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th FEBRUARY 1879.

GENERAL REMARKS.—In Madras general prospects are reported to be tolerably fair, except in Tinnevelly and Tanjore and parts of Bellary. No change has taken place in the Bombay Presidency, where the weather continues cold; damage from rats still occurs in the Southern Mahratta country and parts of the Deccan. In Mysore the crops are in good condition; prices have risen slightly here and there. No rain has fallen in the Central Provinces; the spring crops are good towards the east and fair elsewhere, except in Damoh, Chhindwára, Betul, Hoshungabad and Saugor. In Berar the prospects of the *rabi* are satisfactory and reaping has commenced. No improvement has occurred in Central India and Rajputana, and prices are rising. In Bengal rain is reported to have fallen in the northern portion of the province and in Behar and parts of the Dacca division, and the standing crops have no doubt benefited by it; the want of rain is, however, still felt in many other places; the *amun* harvest has been completed, and reaping of some of the winter crops has commenced; prices are everywhere high, and owing to large exportations of rice, they are rising in some districts. Slight rain has fallen in Assam and prospects are favourable. In the report from British Burma there is nothing special to note in regard to the crops; slight cholera and some cattle disease continue in places, and a severe outbreak of fever has occurred at Hmawbee in the Rangoon district. Light showers of rain fell in one district of the North-Western Provinces and Oudh and in two districts of the Punjab. The general report from the North-West is, that there is no change, and that rain is much needed, whilst in the Punjab the almost total failure of the winter rains has rendered harvest prospects uncertain, except in the case of canal-irrigated lands. Although broadly speaking this is the state of the Province, it is satisfactory to note that in Multan and Dera Ismail Khan, districts where any real pressure would be felt at once, the state of the crops is still favourably reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 8th)	*Nil*	Rice 10·49, *cholum* 15·71, *raggi* 17·8, *cumboo* 14·95; fever general; cholera and small-pox slightly exist in some taluks; 1 foot water over anicut; *raggi* transplanted; under wells standing crops generally good; *varige*, castor, tobacco and green gram being reaped.
Kurnool („ „)	...	Rice 10·18, *cholum* 16·0, *raggi* 23·10, *cumboo* 17·69; fever prevalent; season favourable; white *cholum* being harvested, outturn ½ to ¾; cotton, Bengal gram, wheat and gram in good condition; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 9·21, *cholum* 12·59, *raggi* 16·07, *cumboo* 15·27; private charity about 130; Cauvery and its branches dry; wet and dry crops require more rain, especially the latter; in parts they suffer much, and in others they have withered; harvest of *samba, kodaikalattan, kuliyadichan, dholl, ulundu*, &c., outturn ½ to ¾.
Madura („ „)	...	Rice 9·59, *cholum* 14·98, *raggi* 16·9, *cumboo* 17·75.
Malabar („ „)	*Nil*	Rice 10·16, *raggi* 17·76; prices of rice risen in Palghaut, fallen in Calicut and Walluvanad, stationary elsewhere; cholera slight in Kurumbranad, Ponani and Cochin; small-pox in 7 taluks; cattle disease in Ernad unabated.
		General Remarks.—General prospects tolerably fair, except in Tinnevelly, Tanjore, and parts of Bellary.
Bombay—(Feb. 12th)		
Sind—		
Kurrachee ...	...	River at Kotri on 9th, 2¾ feet, on same date last year 9 feet; locusts in 3 talukas; slight damage to *rabi* in Sakro.
Hyderabad ...	...	Locusts in 4 talukas, slight damage; cattle disease in 4 talukas; small-pox in Naushahro; weather cold; crops fine but want rain.
Upper Sind Frontier...	...	Weather occasionally cloudy and cold; high winds prevail; *rabi* prospects fair; disease among cattle in Kashmor taluka.
Guzerat—		
Ahmedabad ...	...	No change.
Pánch Mahâls ...	...	Weather cold and occasionally cloudy.
Kaira ...	...	*Rabi* crops and public health good.
Surat ...	...	} No change.
Broach ...	...	
Khandesh and Násik—		
Khandesh ...	...	} No change.
Násik ...	...	
Colába (Feb. 10th)	...	Weather cold; fever and locusts in 2 talukas; *rabi* crops good in 3 talukas.
Ratnágiri („ 4th)	...	*Rabi* crops good; 9 deaths from fever in Malwan taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Deccan—		
Poona ...	...	} No change.
Ahmednagar ...	...	
Sholapur ...	...	Serious damage to standing crops by rats in all tafukas, some crops abandoned; prospects not satisfactory.
Satara ...	...	*Rabi* crops and public health good; reaping of *tur*, wheat and gram commenced.
Southern Mahratta Country—		
Kaládgi ...	...	*Rabi* crops ripening; injured by rats throughout district.
Belgaum ...	...	No change.
Dharwar ...	...	No change in state of crops and public health.
Kanara ...	...	Second crops healthy; fever continues; cattle disease in Coompta; weather fair.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather cold; public health good.
Wadhwán ...	...	Weather cold; crops same as before; prices high.
Baroda ...	...	Public health good; prices of food grains very high.
		General Remarks.—Weather continues cold; crops in some Deccan and all Southern Mahratta districts injured to some extent by rats.
Bengal—(Feb. 11th)		
Chittagong ...	*Nil*	Weather seasonable; the prospects of the cold-weather crops are good; small-pox is reported from Cox's Bazar.
Noakholly ...	*Nil*	Mornings foggy and cloudy during the last few days; the direction of the wind has been unusual and changeable; the prospects of the *rabi* crops are fair; scattered cases of sickness are reported—cholera and small-pox.
Chittagong Hill Tracts...	*Nil*	Weather seasonably cold; the gathering of the mustard crop still continues; tobacco plants are doing well; general health is good.
Hill Tipperah ...	*Nil*	Weather rather a little too hot for the season; the prospects of chillies are good; mustard and sugarcane are being cut; winter crops are not grown to any large extent.
Backergunge ...	*Nil*	Weather seasonable; the crops on the ground are doing well; the price of rice in Perozepore is still said to be rising on account of large exportations; general health is good.
Furreedpore ...	*Nil*	Weather getting warm; occasionally foggy in the mornings; the winter crop will be a fair one, but would have been better had there been more rain.
Dacca ...	0·60	Weather getting sensibly warmer; heavy fogs during the week; the state and prospects of the crops are good; the fogs have been almost as good as rain, and all crops look well.
Mymensingh ...	*Nil*	Weather fine; a little warmer than last week; the state and prospects of the crops are favourable, but a little rain is wanted for the *cheena* and *kaon* crops.
Tipperah ...	0·13	Weather seasonable; the cold-weather crops are being gathered; the outturn is fully up in the average; exportation is keeping up the price of rice; a few cases of sporadic cholera are reported from the Brahmunberiah sub-division.
24-Pergunnahs ...	*Nil*	Weather warmer; foggy mornings; the state and prospects of the crops are satisfactory, but prices of grains continue very high; public health in general is good; small-pox is reported from Barrackpore.
Jessore ...	*Nil*	Weather fine and gets warm during the day; rain is still wanted in parts of the district; the prospects of the winter crops in parts of the district are not so good from want of rain; the *cheena* and linseed crops are well reported of; public health is good.
Nuddea ...	*Nil*	Weather warm; the winter crops are fair, but rain is wanted for the wheat; cholera is still prevalent in various parts of the district.
Moorshedabad ...	*Nil*	A great change in the weather since last week; it has become perceptibly warm; the crops are in fair condition; the price of common rice continues stationary at 13 seers per rupee.
Pubna ...	*Nil*	Weather warmer than last week, but still cool and seasonable; the early spring crops have suffered from want of rain; public healthis good.
Rajshahye ...	*Nil*	The *rabi* crops continue to be flourishing, but want a little rain; land is being prepared for the *boro dhan*; public health is good.
Bogra ...	*Nil*	Weather fine and bright; prospects are generally favourable, though rain will soon be wanted; public health is good.
Dinagepore ...	0·17	Weather fine; the *rabi* crops are being cut; the cold-weather crops are good; rice continues to be dear, being 13 to 18 seers the rupee.
Rungpore ...	0·16	Weather seasonable; all crops promise well; public health is good; cholera is abating.
Cooch Behar ...	*Nil*	Weather fair; somewhat warmer; the state and prospects of the crops are favourable; nothing to add to last report; public health continues good.
Jalpáiguri ...	0·39	Weather getting sensibly warmer, and clouds gather frequently; strong east winds have been prevalent; the cultivation for *bhadoi* is progressing; wheat and barley are being harvested; mustard and tobacco are doing well; for the former crop in the Duárs portion of the district rain is wanted.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Darjeeling ...	0·15	Weather very cold; atmosphere cloudy; there is no important crop on the ground; land is being cultivated for other crops.
Midnapore ...	*Nil*	Weather much better than usual for the time of year, the thermometer registering 80° to 90°; the state and prospects of the crops are favourable; the malarious fever is abating.
Howrah ...	*Nil*	Weather seasonable; but somewhat warmer than it ought to be; the state and prospects of the crops are favourable.
Hooghly ...	*Nil*	Weather seasonable; the prospects of the winter crops are good; some of them are being cut; a few cases of cholera and small-pox are reported in the sub-division of Serampore.
Burdwan ...	*Nil*	Weather seasonable; the prospects of the standing crops are good.
Bankoora ...	*Nil*	Weather getting warmer daily; the prospects of the crops are fair; a little rain is wanted; fever is disappearing; some cases of small-pox are reported.
Beerbhoom ...	*Nil*	The weather has become much warmer; nothing to report about the crops.
Sonthal Pergunnahs ...	A few drops of rain.	Weather dry, hot, and hazy till the morning of the 9th; the *rabi* crops want rain.
Bhágalpur ...	0·92	Weather getting warm; mustard is being gathered; other *rabi* crops are thriving well, but would improve by rain; prices are high for the season; general health is good; a few cases of small-pox are reported from the interior.
Monghyr ...	0·69	Weather growing warmer; dry west winds prevail; the crops are in excellent condition.
Purneah ...	0·43	Weather fine; the *rabi* crops are good, but rain is wanted.
Maldah ...	*Nil*	Weather fair; the reaping of the paddy crop is nearly over; the wheat, barley and *rabi* plants are thriving well; the public health is improving with the blowing of the western breeze.
Durbhunga ...	0·86	Weather seasonable; rain is much wanted throughout the district; prices are stationary; health of the people is generally good.
Mozufferpore ...	0·60	Weather mild, with west wind; the prospects of the *rabi* crops on good lands are fair, but the crops are very thin and poor elsewhere.
Sarun ...	*Nil*	Weather less cold than last week; west wind (favourable to the *rabi* crops) is prevailing; the continued drought is doing much harm to the cold-weather crops; *rahur*, *masur* and peas have suffered considerable injury from the effect of the frost; poppy is in flower; prices are stationary; public health is good.
Chumparun ...	0·29	High east and west winds; weather warmer; no change to report in the state and prospects of the crops; the *rabi* crops are urgently in need of rain.
Patna ...	0·97	Weather seasonable; the prospects of the *rabi* crops are good.
Gya ...	*Nil*	Weather seasonable; the highest reading of the thermometer in the shade was 86·4°; the prospects of *rabi* continue the same, but a good fall of rain is wanted; a good many cases of small-pox have been reported; the health of the plough-cattle is good.
Shahabad ...	0·60	Weather cool in the morning; getting warm daily; the *rabi* crops are suffering for want of rain; small-pox is prevalent in the Sasseram sub-division.
Hazáribágh ...	*Nil*	Weather fine and in the day time warm; the nights are still cool; the state of the *rabi* crops is generally fair, though in parts of the district damage has been done by frost.
Lohardugga ...	*Nil*	Weather becoming warm during the day with occasional high winds; the *rahur* crop has partially suffered from frosts, but other *rabi* crops promise well; fever is still very prevalent in the Palamow sub-division.
Manbhoom ...	*Nil*	Weather very warm and most unseasonable; the crops continue good, but the large exportation is sending the price of rice up; 16 or 17 seers per rupee is the current price of common rice; general health continues good.
Singhbhoom ...	*Nil*	Weather warm for the time of the year; no change to report; rain is much required generally, and particularly for the mango which is now coming into blossom.
Balasore ...	*Nil*	Weather rapidly getting warmer; very dry; the cold-weather crops are being got in.
Cuttack ...	*Nil*	Weather fine and warm, with cold nights; the reaping of the *sarad* and *rabi* crops is going on; the spring crops are coming up; cholera is decreasing.
Pooree ...	*Nil*	Weather seasonable, sultry at Khorda; the harvesting of the *sarad* rice continues; the *dalua* rice is progressing fairly; common rice sells at 15$\frac{3}{12}$ to 21 seers for the rupee; public health is good.
		General Remarks.—There has been rain in Northern Bengal, in Behar, and in parts of the Dacca Division; wherever it has fallen it must have done good to the standing cold-weather crops, particularly in the Patna Division, where they have long suffered from drought; rain is still wanted in many other places; the *amun* harvest is now entirely over, and some of the cold-weather crops are being gathered; prices continue high in all districts, and in some they are rising owing to large exportations of rice.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. and Oudh—(Feb. 12th)		
Benares (Feb. 11th)	...	No change.
Allahabad („ „)	Slight drizzling showers on 9th at Sadr.	Reports from tahsils not received; heavy clouds gathered on 8th and 9th, but have again cleared away, apparently without any downfall worth mention.
Jhánsi („ 12th)	...	Prospects on the whole fair.
Agra („ 11th)	*Nil*	Want of rain felt.
Bareilly („ 12th)	...	No change.
Kumaun („ 8th)	*Nil*	Clouds have come and gone; the crops are suffering from the drought.
Sitapur („ 12th)	*Nil*	No change in weather.
Partabgarh („ 10th)	...	Agricultural prospects fair; if things do not get worse, about 12 annas crop may be expected.
Meerut („ 12th)	*Nil*	Prospects unchanged; no further rise in prices.
Lucknow („ „)	...	Owing to failure of rain, *rabi* prospects indifferent.
Fyzabad („ „)	...	No change in weather.
		General Remarks.—No change; rain wanted.
Punjab—(Feb. 11th)		
Delhi ...	*Nil*	Health fair; rain much wanted; prices of food grains still rising.
Hissar ...	*Nil*	Weather temperate; *barani* crops withering for want of rain; and prices of food grains rising in consequence; health good.
Umballa ...	*Nil*	Crops still fair but rain wanted; health good.
Jullundur ...	*Nil*	*Rabi* crops suffering; prices of food grains high but steady; health better.
Amritsar ...	*Nil*	Health improving; rain much needed; prices of food grains remain steady.
Lahore ...	*Nil*	Health of district fair; rain much wanted.
Ráwalpindi ...	Rain on 10th	More rain wanted; fever and small-pox still about; cattle disease still prevails.
Mooltan ...	*Nil*	State of crops good; but rain wanted; health good; prices of food grains stationary.
Dera Ismail Khan ...	*Nil*	State of crops fair; but rain wanted; health improving.
Pesháwar ...	·3	Harvest prospects bad; prices of food grains have risen considerably.
		General Remarks.—Harvest prospects unfavourable owing to the almost total failure of the winter rains.
Central Provinces—(Feb. 12th)		
Nimár (Feb. 12th)	...	Days warm; nights cold; prospects of *rabi* good.
Hoshangabad ...	...	*Rabi* prospects unchanged; health good.
Betul ...	...	Prospects of *rabi* continue unchanged; prices stationary.
Wardha ...	...	*Rabi* fair; slight small-pox and cattle disease prevalent; prices stationary.
Nágpur (Feb. 12th)	...	Bright; warm during day; threshing of *jowar* and *tur* continue; *rabi* on higher ground being harvested; health good; prices stationary.
Chanda („ 9th)	...	Clear; cold; no change in *rabi* prospects; health good; cattle disease continues; prices stationary.
Chhindwára („ 8th)	...	*Rabi* prospects poor; health good; prices steady.
Narsinghpur ...	...	*Rabi* prospects and health good.
Bhandára (Feb. 11th)	...	Clear; *rabi* crops, except pulses, continue favourable; health good; prices continue high.
Seoni ...	...	Cool; pulses harvesting; health good; prices stationary.
Balaghát ...	...	*Rabi* prospects favourable; fever and small-pox prevalent; prices steady.
Mandla ...	...	Prospects of *rabi* continue favourable; prices stationary.
Saugor ...	...	*Rabi* prospects still unfavourable; health good; prices stationary.
Damoh ...	...	*Rabi* sown later poor; prices slightly fallen.
Jubbulpore ...	...	Cloudy in the commencement of week; *rabi* fairly good; small-pox continues; prices of rice falling.
Raipur ...	...	*Rabi* generally good; small-pox and cattle disease continue; prices slightly fallen.
Biláspur (Feb. 8th)	...	*Rabi* prospects continue good; no epidemic; prices slightly falling.
Sambalpur („ 7th)	...	Sugarcane cutting and pressing continue; no other crops on ground; health good.
		General Remarks.—*Rabi* prospects continue good in Eastern districts and fair in all other districts, except Damoh, Chhindwara, Betul, Hoshangabad and Saugor, where they are reported unfavourable.
British Burma—(Feb. 12th)		
Arakan Division ...	...	Fever prevalent at Akyab town, otherwise public health continues normal.
Pegu Division—		
Rangoon ..	...	Seven fatal cases of small-pox in town; reaping finished and grain coming into market freely; outturn fair; slight cholera reported from 2 circles in Hmawbee; intermittent fever of a severe and fatal type in Hmawbee and Poungleng, especially along railway line; no cattle disease.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burmah—*contd.*

DEPT. OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH,
The 21st February 1879.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th FEBRUARY 1879.

GENERAL REMARKS.—General prospects in Madras continue on the whole tolerably fair; in Bellary damage to the crops by rats is reported. In the Bombay Presidency slight showers have fallen in Kaira, Broach and Wadhwán; the *rabi* crops in Sind need rain; injury by rats is reported from Ahmednagar and Sholapur. There has been no change in Mysore. No rain fell in the Central Provinces, where the weather has been cloudy and warm; the harvesting of the *rabi* has begun in some districts and the anticipated results are not unfavourable. In Berar matters remain satisfactory. In Central India light rain fell in Morar, Rutlam and Indore. The report from Rajputana exhibits no material alteration. In most of the districts of Bengal there has been rain during the week, and it has benefited the standing crops, especially in the Patna division, and helped the preparation of land for the next sowings; crops, in flower will, however, be somewhat injuriously affected by the wet; more rain is required in Central Bengal, Furreedpore and Chumparun; in Palamow and parts of Jessore the prospects of the *rabi* are reported to be unfavourable. In Assam the outlook is promising; as before, but more rain is wanted. In British Burma though fever, cholera and cattle disease continue in places, the general health of the Province is good. In the North-Western Provinces and Oudh light rain has fallen, and has to some extent improved prospects. There has also been drizzling rain followed by heavy dews at night in the Punjab, and this will benefit the crops; more rain is, however, required in several districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Feb. 15th)	*Nil*	Rice 11·49, *cholum* 15·73, *raggi* 18·42, *cumboo* 15·1; fever exists more or less in all taluks, cholera and small-pox in some; ·8 feet water over anicut; *varige*, *cholum*, castor, chillies, tobacco, red gram and green gram being reaped.
Kurnool („ „)	...	Rice 10·45, *cholum* 16·25, *raggi* 20·03, *cumboo* 18·04; fever prevalent; season favourable; white cholum being harvested, outturn ½ to ¾; cotton, Bengal gram, wheat and gram in good condition; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 9·12, *cholum* 13·19, *raggi* 15·97, *cumboo* 15·47; private charity about 130; Cauvery and its branches dry; wet and dry crops require more rain, especially the latter, in parts they suffer much and in some others they have withered; harvest of *samba*, *sembalai*, *kattalai*, dholl, *ulundu*, *raggi*, *varagu*, chillies, &c., outturn ¼ to ¾.
Madura („ „)	*Nil*	Rice 10·0, *cholum* 15·79, *raggi* 17·57, *cumboo* 18·11.
Malabar („ „)	*Nil*	Rice 10·30, *raggi* 16·35; prices of rice risen in Kurumbranad, Ponani and Cochin, fallen in Wynaad, stationary elsewhere; cholera slight in Kurumbranad, Ponani, and Cochin; small-pox in 8 taluks.
		General Remarks.—General prospects on the whole pretty fair, but in Bellary damage done to crops by rats, and in Tinnevelly heat very great.
Bombay—(Feb. 19th)		
Sind—		
Kurrachee ...	...	River on 16th, 2 feet 5 inches; cotton being picked in Sehwan; one case of small-pox in Kurrachee.
Hyderabad ...	...	Locusts continue; damage slight; small-pox continues in Naushahro; cattle disease in Naushahro and Mohbat Dero Jatoi; river still falling; *rabi* crops good, but want rain; clouds gathering.
Upper Sind Frontier...	...	Weather getting warm; *rabi* crops promising but require rain.
Guzerat—		
Ahmedabad ...	...	No change.
Pánch Mahál ...	...	
Kaira ...	·12	*Rabi* crops and public health good.
Surat ...	...	No change.
Broach ...	Slight rain	Weather cloudy; thunder and lightning at Broach on 18th; reaping commenced in some talukas; public health good; cotton as before.
Khandesh and Násik—		
Khandesh ...	...	Wheat harvest commenced.
Násik ...	...	Rabi being reaped.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan—		
Tanna ...	...	Rabi crops good; fever slightly prevailing.
Colába (Feb. 17th)	...	Weather cold; fever in 2 talukas; *rabi* crops good in Alibag, Pen and Roha; locusts in Mangaon and Mahád.
Ratnágiri („ 11th)	...	*Rabi* crops good; 14 deaths from fever in Malwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Rats still destructive; *rabi* harvest continues in 5 talukas.
Sholapur ...	...	Continued great damage by rats; prospects not improved.
Satara ...	...	No change.
Southern Mahratta Country—		
Kaládgi ...	...	*Rabi* reaping progressing; cotton suffering from blight; slight fever; prices rising in Hungund taluka.
Belgaum ...	...	No change.
Dharwar ...	...	Weather oppressive; no change in state of crops and public health.
Kanara ...	...	Second crop in ear in Honawar; weather cloudy; fever continues.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Wheat nearly ready for harvest; cotton being picked in some places; general health good.
Wadhwán ...	·07 on 18th	Weather cloudy; state of crops same as before.
Baroda ...	...	No change.
		General Remarks.—Rabi crops require rain in Sind; slight showers in Kaira and Broach; crops damaged by rats in Ahmednagar and Sholapur; weather in Bombay cloudy and warm.
Bengal— (Feb. 18th)		
Chittagong ...	A few drops	Weather fair; there is very little spring harvest in this district; the prospects are good.
Noakholly ...	*Nil*	The weather has been slightly warmer during the last few days; early mornings are foggy; the prospects of the *rabi* crops are fair.
Chittagong Hill Tracts...	*Nil*	Weather cold and foggy; mustard is being gathered; tobacco plants are thriving well; the hill people have begun to cut jooms.
Hill Tipperah ...	1·39	Weather cloudy and rather warm; there was rain on the 9th and 10th; the prospects of chillies are good; sugarcane is being gathered; no important crops in the field.
Backergunge ...	*Nil*	Weather has become much warmer; the crops are in good condition; general health is good.
Furreedpore ...	Heavy rain at head-quarters on the night of the 15th; a little rain at Ainpore and a few drops at Madareepore.	Weather getting warmer; the winter crops are not getting on well enough for want of rain.
Dacca ...	0·15	Weather seasonable; getting warmer; the state and prospects of the crops are good.
Mymensingh ...	0·12	Weather cloudy and a little warmer, with some slight rain; the rain has done good to the cold-weather crops; general prospects are favourable.
Tipperah ...	*Nil*	Weather fair generally and getting warmer; the gathering of the cold-weather crops continues; the outturn is a fair average one.
24-Pergunnahs ...	0·38	Weather seasonable; the state and prospects of the crops are satisfactory; prices of food-grains continue very high; public health in general is good.
Jessore ...	*Nil*	Weather cloudy and close; the winter crops in parts of the district are good, but in others are not so favourably reported of; preparations are going on for the spring crops, but slowly from want of rain; prices still range high; health is good.
Nuddea ...	Slight rain on the 9th in the north of the district.	Weather rather warm; the winter crops are generally doing pretty well; rain is wanted for wheat, &c.; prices are still high; public health has slightly improved.
Moorshedabad ...	*Nil*	Weather warm; one or two slight storms; the state and prospects of the crops are favourable; the price of rice is said to have fallen in the northern part of the district.
Pubna ...	0·16	Weather cool and pleasant; rain with thunder on the night of the 9th; the crops have benefited by the rain, but more was wanted; health is good.
Rajshahye ...	Very slight rain	The *rabi* crops have been slightly benefited by the rain and are thriving; mustard is still being cut; public health is good.
Bogra ...	0·08	Weather warm and cloudy; a small quantity of rain fell at head quarters and benefited the spring crops; more rain, however, is much wanted; public health is good.
Dinagepore ...	0·16	Weather sensibly colder; the harvesting of the rice has been completed; half the *rabi* crops has been cut.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Rungpore ...	0·55	Weather occasionally cloudy; rain has been beneficial, more would do good; cholera is abating, but small-pox prevails in parts of the district.
Cooch Behar ...	0·30	Weather colder on account of the showers of the 10th and 11th; the rain has done good to tobacco, *khesaree*, wheat, *cheena* and all other crops on the ground; public health is good.
Jalpáiguri ...	0·17	Weather cloudy; much warmer; the mustard crop is being rapidly gathered in; tobacco is doing well, as also wheat and barley, except towards Alipore and Dhupguri, where it is stated the late rain has been prejudicial to these crops.
Darjeeling ...	0·25	Weather very cold; sky cloudy, threatening snow or rain; in the hills, wheat and barley are doing well, and land is being cultivated for the *bhootta* crops; in the terai, mustard is being gathered, and land is being cultivated for *bhadoi*.
Midnapore ...	2·63	Weather seasonable; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather seasonable, but yet warmer than it ought to be at this time of the year; the state and prospects of the crops are satisfactory.
Hooghly ...	0·26	The prospects of the winter crops are good, most of them have been cut; fever and cholera are still prevailing in some places in the district, it is reported that three or four men have died in Serampore during the week from cholera.
Burdwan ...	1·16	Weather seasonable; prospects are favourable as far as the winter crops are concerned.
Bankoora ...	*Nil*	Weather at the beginning of the week clear and warm; cool and cloudy from the night of the 14th; the prospects of the crops continue good; public health is improving.
Beerbhoom ...	0·28	Weather warm, but skies cloudy; the little rain that fell on the night of the 9th was beneficial to the few cold-weather crops of the district.
Sonthal Pergunnahs ...	0·23	Weather cooler since the rain; hot early in the week; in Doomka the prospects of the crops have not much changed; rain has done a little good; in Godda the *rabi* crops are better; in Jamtara and Pakour the crops of all kinds seem good.
Bhágalpur ...	0·35	Weather cloudy and rainy for the first two days of the week, fine and cold since, cloudy again on the 15th; the rainfall has done much good to the *rabi* crops, the prospects of which are now excellent; brisk exportation keeps up the price of grains; general health is fair; a few cases of small-pox are reported here and there.
Monghyr ...	0·57	The state and prospects of the crops are excellent, and could not be better.
Purneah ...	0·51 About 1·0 in the north of the district.	Rain on 10th or 11th; weather cloudy again on the 15th; the state and prospects of the crops are good.
Maldah ...	0·91	Weather cloudy; rain on the night of the 9th, 10th and 11th instant; the state and prospects of the crops continue to be satisfactory, but prices of grain are very high, notwithstanding that the markets are well supplied; sporadic cases of cholera are reported from all parts of the district, mostly from the thana of Shibgunge.
Durbhunga ...	0·47	Weather cloudy and damp; the late rain has done some injury to the *rahar* and tobacco crops, but has benefited *moong*, *cheena*, and to some extent the other *rabi* crops; it has helped the timely preparation of *dhan* land for early sowing; the prices are steady.
Mozufferpore ...	0·43	Weather cold and cloudy; rain has fallen throughout the district, and has done much good to the *rabi* crops.
Sarun ...	0·78	Rain has been general throughout the district, except in the jurisdiction of the out-posts of Katia, Simaria, Moharain, Baratli, Gootin, Kuchiakol and Revelgunge; there was again prospect of rainfall at the time of report; west wind is prevailing; the rain of the 10th has benefited the *rabi* crops and indigo; *rahar* injured by the late frost will now germinate, though there is no probability of its yielding a good outturn; mustard is being reaped; prices (*jowar*, *cheena*, and maize excepted) are stationary; some cases of small-pox are reported.
Chumparun ...	*Nil*	Weather seasonable; the late rain has benefited the *rabi* crops, and more is required; *cheena* is now being sown.
Patna ...	0·40	Weather less cold than last week; the rain has done much good to the *rabi* crops; prospects are excellent.
Gya ...	0·09	Weather cold and cloudy; the maximum reading of the thermometer in the shade was 84·4°; the prospects of the *rabi* crops are good; the recent showers have done good; several cases of small-pox are reported; the health of the plough cattle is good.
Shahabad ...	0·73	Weather unsettled, cloudy with gentle rain on the night of the 9th and morning of the 10th; misty in the morning of the 12th; clear on the 13th and 14th; cloudy again on the 15th with every sign of coming rain; the rain of the week did good to the *rabi* crops to a certain extent, but those in flower were slightly damaged; more rain now is likely to injure the poppy and winter crops in flower; public health is good, but small-pox is on the increase.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hazáribágh ...	A slight fall of rain in parts of the district.	Weather cooler; the *rabi* crops are well forward; the slight rain which has fallen has been beneficial.
Lohardugga ...	*Nil*	Clouds are gathering; no change to report at head-quarters; the prospects of the *rabi* crops in Palamow are unfavourable; fever is still prevalent.
Manbhoom ...	*Nil*	Weather seasonable; what few crops there are on the ground need rain; if too heavy rain falls the *mohwa* will be injured; sugarcane is being harvested.
Singhbhoom ...	*Nil*	Weather very warm, without sign of rain; no change to report in the state and prospects of the crops; much fever is prevailing in the district.
Balasore ...	Return not received.	Weather warm and dry; cool sea-breeze at night; the state and prospects of the crops are good; the harvest is well in.
Cuttack ...	*Nil*	Particulars not given.
Pooree ...	*Nil*	Weather seasonable; the *sarad* rice crop is still being harvested; *dalua* rice is growing well; common rice sells at 18¾ to 21 seers for the rupee; public health is good.
		General Remarks.—There has been rain in most districts during the week; it has done much good to the standing crops, particularly in the Patna division, and has helped the preparation of lands for the next sowings, but the crops in flower will suffer a little; more rain is still wanted in places in Central Bengal, in Furreedpore, and Chumparun; the prospects of the *rabi* crops in Palamow and in parts of Jessore are not good.
N. W. P. and Oudh—(Feb. 19th)		
Benares (Feb. 18th)	·2	No more rain wanted; peas cut.
Allahabad („ 19th)	Very slight and partial showers on the 15th.	Showers beneficial where they fell; unirrigated crops all but gone.
Jhánsi („ 19th)	*Nil*	Weather clear and settled.
Agra („ „)	...	Very cloudy; rain threatens; prices rising.
Bareilly („ „)	1·0 in Northern tahsil; ·2 to ·4 elsewhere.	
Kumaun („ 15th)	Slight shower in parts on 11th.	More rain wanted.
Sitapur („ 19th)	·7 at Biswan tahsil; none at sadr.	Clouds quite gone.
Partabgarh („ 17th)	...	No change.
Meerut („ 19th)	On 15th instant 0·8 at Sadr; 0·7 at Sardhana; trifling at other places.	Prices slightly lower; prospects improved.
Lucknow („ „)	Slight showers.	
Fyzabad („ „)	...	No change in weather; prospects fair.
		General Remarks.—Light rain during the week; prospects somewhat improved.
Punjab—(Feb. 18th).		
Delhi ...	*Nil*	Prospects doubtful; rain much wanted; health fair; prices of food grains stationary.
Hissar ...	Slight fall of drizzling rain.	Crops have suffered from continued drought, which has also affected the prices of grain; health good.
Umballa ...	Slight rain on 15th.	Crops fair; but more rain much wanted; health good.
Jullundur ...	Mild showers over parts of district, none at sadr.	*Barani* crops suffering; prices steady; health continues to improve.
Amritsar ...	*Nil*	Health indifferent; rain much needed; slight rise in prices of grain.
Lahore ...	A drizzling rain on 16th.	More rain wanted; crops are suffering; health good.
Ráwalpindi ...	*Nil*	Prices rising rapidly owing to demand for Peshawar market; fever and cattle disease continue.
Mooltan ...	*Nil*	Crops and health good, but rain wanted; prices stationary.
Dera Ismail Khan ...	*Nil*	Crops fair, but rain very much wanted.
Peshawar ...	*Nil*	Harvest prospects unfavourable; prices of food grains still rising.
		General Remarks.—The drizzling rain followed by heavy dews at night will benefit the crops to some extent; in the Ferozepore district there was a fairly good fall, and the reports from that direction are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—		
Nimár ...	...	Cloudy, with strong winds; *rabi* harvesting; health good.
Hoshangabad ...	...	Wheat better than expected; gram fair.
Wardha ...	...	*Rabi* favourable; prices stationary.
Nágpur (Feb. 16th)	...	Cloudy towards end of week; prospects of *rabi* fair; gathering of wheat and linseed commenced; prices unchanged.
Chanda („ „)	...	Cloudy; prospects unchanged; health good; cattle disease continues; prices slightly risen.
Chhindwára („ 15th)	...	*Rabi* harvesting; gram good; wheat poor; pulses partially destroyed; health good; prices steady.
Bhandára („ 18th)	...	Clear; *rabi* favourable; health good; prices continue high.
Seoni ...	...	Cold; pulses gathering; health good; prices stationary.
Balaghát ...	...	Cloudy and warm; prospects of *rabi* favourable; fever and small-pox slightly prevalent; prices unchanged.
Mandla ...	...	Prospects favourable; health good; prices stationary.
Saugor („ 19th)	...	Cloudy occasionally; prospects of *rabi* unchanged; health good; prices falling.
Damoh ...	...	*Rabi* sown; later crops unfavourable; health good; prices falling.
Jubbulpore ...	...	Cloudy; crops good; small-pox continues; prices slightly easier.
Raipur ...	...	Days warm, nights cool; prospects of *rabi* favourable; pulses gathering; small-pox and cattle disease continue; prices rising.
Biláspur („ 15th)	...	*Rabi* doing well in Seorinárayan and Biláspur tahsils; wheat slightly injured in places in Mungeli; small-pox continues; prices steady.
Sambalpur („ 14th)	...	Gram gathering, and sugarcane cutting and pressing continue; 2 cholera cases in jail; prices slightly fallen.
		General Remarks.—Cloudy and warm towards end of week; *rabi* harvesting commenced in some districts; prospects continue on the whole fair.
British Burma— (Feb. 20th)		
Arakan Division ...	...	Fever prevalent in Akyab town, otherwise public health continues good; crops reaped.
Pegu Division—		
Rangoon ...	...	Five fatal cases of small-pox in town; public health improved; fevers somewhat abated.
Thonkwa ...	...	Health generally good; slight cholera in Donabyoo township; reaping almost completed; outturn excellent.
Bassein ...	...	One death from cholera in Bassein town; 25 in one circle in January; 183 cattle deaths in 3 townships in January.
Henzada ...	...	Public health excellent; slight cattle disease in Okpho township.
Prome ...	...	Health reports satisfactory.
Thayetmyo ...	...	General health normal; a few cases of cholera.
Tharrawaddy ...	...	Report not received.
Tenasserim Division—		
Amherst ...	...	Agricultural operations ended; no further report of cholera.
Shwegyeen ...	...	Ten deaths from cholera.
Toungboo ...	...	Public health good.
		General Remarks.—General health good; fever still in Akyab, cholera in Bassein, Thayetmyo and Shwegyeen; cattle disease in Bassein and a little in Henzada.
Assam—		
Gauháti (Feb. 19th)	·37; slight showers on 12th, 13th and 16th instant.	Weather seasonable; more rain wanted; land being ploughed for *asu*.
Sylhet („ „)	·41	Prices of food-stuffs falling; prospects good.
Mysore and Coorg— (Feb. 19th)	...	No change in crops and prices; for week ending 8th February, gratuitously relieved in hospitals 441.
Hyderabad Assigned Districts—		
Amráoti (Feb. 19th)	...	*Rabi* crops continue favourable; weather cloudy.
Central India— (Feb. 19th)	Slight rain at Morar, Rutlam and Indore.	Sky cloudy; no other change.
Rajputana—		
Sirohi (Feb. 2nd)	...	Tanks dry; wells good; health fair; crops fair; some damage done by locusts; much warmer; occasional clouds; season agreeable.
Marwar („ 1st)	...	Health and crops good; weather clear; cold decreasing; prices rising.
Harowtee („ 15th)	...	Health good; prices rising; prospects unchanged.
Jhallawar („ 13th)	...	Sultry and cloudy.
Ajmere („ 10th)	...	Rain threatening; prices high; if rain falls prospects will be good.
Ulwur („ 18th)	...	No change; no cattle disease death reported.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 19th February, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
Lieutenant-General the Hon'ble Sir E. B. Johnson, K.C.B.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
Lieutenant-General the Hon'ble Sir M. K. Kennedy, R.E., K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

NEGOTIABLE INSTRUMENTS BILL.

The Hon'ble MR. STOKES presented a further Report of the Select Committee on the Bill to define and amend the law relating to Promissory Notes, Bills of Exchange and Cheques.

TRANSFER OF PROPERTY BILL.

The Hon'ble MR. STOKES also presented a further Report of the Select Committee on the Bill to define and amend the law relating to the Transfer of Property.

CIVIL PROCEDURE CODE AMENDMENT BILL.

The Hon'ble MR. STOKES asked leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the Code of Civil Procedure.

Leave was granted.

CENTRAL PROVINCES EVIDENCE BILL.

The Hon'ble MR. STOKES also presented the Report of the Select Committee on the Bill to make better provision for recording evidence in the Central Provinces and moved that it be taken into consideration. He said the Committee had considered the suggestion of the Home Department that the opportunity might be taken to empower the other Local Governments to extend the procedure provided by the Bill to the rest of British India. The Committee was not prepared without further enquiry to recommend that such a power should be given; the chief justification for the present measure was, that it embodied a practice which had prevailed in the Central Provinces for the last seventeen years, and which the local authorities were not prepared to abandon for the general rule prescribed by the Code of Civil Procedure.

The only objection which could reasonably be taken to the Bill was, that it had received the unqualified approval of the Local Government concerned, and that no suggestions had been made for its amendment. MR. STOKES did not say this ironically. He did not believe that he, or any one else, could draw a Bill of any complexity that would really deserve unqualified approval and require no change either in substance or form. He had now been engaged for twenty-five years in the study and practice of the art of legal expression, and in the interpretation of the work of masters of the craft like Sir Henry Thring; and he had been more and more impressed with the great and inherent difficulties of legislative draftsmanship and the truth of

Austin's dictum, which he would take leave to read to the Council: "I will venture to affirm that what is commonly called the *technical* part of legislation is incomparably more difficult than what may be styled the *ethical*. In other words, it is far easier to conceive justly what would be useful law, than so to construct that same law that it may accomplish the design of the lawgiver." In India, moreover, these difficulties were enhanced by the practical impossibility of getting complete and perfectly accurate information as to the subject-matter and bearings of any proposed piece of legislation. In the present case, however, the matter of the Bill was extremely small and simple, and he thought that, notwithstanding the regrettable absence of criticism, the Council might safely comply with the recommendation of the Committee, and let the Bill become law with all its presumable defects.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill be passed.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 26th February, 1879.

CALCUTTA;
The 19th February, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

NOTE.—The meeting which was originally fixed for Wednesday, the 12th February, 1879, was adjourned t Wednesday, the 19th February, 1879.

Printed and published for the GOVT. OF INDIA *at the Office of* SUPDT. GOVT. PRINTING, 8, *Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No 9. CALCUTTA, SATURDAY, MARCH 1, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORT ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25th FEBRUARY 1879.

GENERAL REMARKS.—No change has occurred in Madras during the week. In the Bombay Presidency the harvesting of the *rabi* has begun and in two districts some damage has been done by rain and hail; rats continue to be destructive in Ahmednagar and part of the Southern Mahratta Country. Matters in Mysore remain as before. Slight rain has fallen in most of the districts of the Central Provinces, and in Seoni injury to the crops thereby is apprehended; the *rabi* harvest is progressing, and the results are expected to be on the whole fair; prices are stationary. In Berar the prospects of the *rabi*, which is being gathered in, are satisfactory. There has been no change in Central India. Some rain has fallen in Rajputana, and the outlook is now more promising. The rain in Bengal, though it has injured certain crops in Burdwan and Durbhunga, has been generally very beneficial; rain is still required in some districts, and in places damage has been caused by hail; the opium crop in Sarun is said to be a short one and is also affected by blight. The reports from Assam and British Burma exhibit no material alteration. In the North-Western Provinces and Oudh light rain has fallen in places and the prospects of the *rabi* are fair. In the Punjab the want of rain is still much felt, though recent showers, so far as they have extended, have done good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
[illegible]— (Feb. 26th.) (Feb. 22nd)	*Nil*	Rice 11·52, *cholum* 15·81, *raggi* 17·63, *cumboo* 15·49; six inches water passing over anicut; maize and *raggi* under wells and Bengal gram are doing well; *varige*, castor, tobacco, and some pulse crops are being gathered.
[illegible]urnool („ „)	·20 at Kurnool.	Rice 10·98, *cholum* 16·03, *raggi* 18·50, *cumboo* 18·06; fever prevalent; season favourable; white *cholum* being harvested, outturn from ½ to ¾; cotton, Bengal gram, wheat, gram, and second crop paddy in good condition; fodder and water ample.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Tanjore (Feb. 22nd)	*Nil*	Rice 9·15, *cholum* 13·51, *raggi* 16·07, *cumboo* 14·44; Cauvery and its branches dry; wet and dry crops require more rain, especially the latter; in some parts they suffer much, and in others they have withered; *samba*, paddy, *karumbalai*, *dholl*, *ulundu*, *varagu*, and groundnut being harvested, outturn ½ to ¾.
Madura („ „)	·06 at Dindigul; *nil* in others.	Rice 10·32, *cholum* 15·66, *raggi* 17·36, *cumboo* 16·71.
Malabar („ „)	·85 (average of 2 stations); *nil* in others.	Rice 10·25, *raggi* 18·29; price of rice fallen in Wynaad, stationary elsewhere; small-pox in 7 taluks.
		General Remarks.—General prospects unchanged.
Bombay—(Feb. 26th)		
Sind—		
Kurrachee ...	...	River on 23rd 2⅓ feet; on same date last year 10 feet 1 inch; some cattle disease in Kurrachee taluka, also in districts.
Hyderabad ...	...	No change as regards locusts, small-pox, and cattle disease; river falling; sky cloudy.
Upper Sind Frontier...	...	No change.
Guzerat—		
Ahmedabad ...	...	Weather cold; crops generally ripened; harvest commenced in some places.
Pánch Mahál ...	·5 (partly hail) on 18th and 19th.	No damage by rain.
Kaira ...	·15 in Anand and ·03 in Borsad.	Weather good; *rabi* reaping commenced; slight hail showers in 2 talukas.
Broach ...	...	*Rabi* reaping progressing in some talukas; public health good.
Surat ...	...	Some *rabi* crops slightly damaged by drizzling in Mandvi.
Khandesh and Násik—		
Khandesh ...	Slight showers in 11 talukas.	*Rabi* reaping progressing; crops uninjured.
Násik ...	...	Some damage to crops by hail in Násik taluka.
Konkan—		
Tanna ...	...	*Rabi* crops good; fever continues.
Colába (Feb. 24th)	...	Weather cold; fever in 2 talukas; *rabi* crops good in Alibag, Pen, and Koha; locusts in Hangaon and Mahad.
Ratnágiri („ 18th)	...	*Rabi* crops generally good; 6 deaths from fever in Malwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	Slight rain in Nagar, Jamkhed, Sheogaon, Kopargaon, and Sawgamner.	Rats still destructive; *rabi* harvest continues in 6 talukas.
Satara ...	Slight rain in 3 talukas.	Crops generally good; reaping progressing; cotton-picking commenced; public health good.
Southern Mahratta Country—		
Kaládgi ...	...	Weather cloudy; no other change.
Belgaum ...	...	*Rabi* reaping nearly completed; cotton crops indifferent; fever prevalent throughout district.
Dharwar ...	...	Weather cloudy and oppressive; harvest of late crop progressing; rats in two more talukas; no material change in public health.
Kanara ...	...	Second crop ripening on coast; fever continues.
Kattywar and Gaekwar's Territory—		
Rájkot ...	Slight rain in some places.	Weather cloudy; *rabi* harvest commenced.
Wadhwán ...	...	Weather cloudy; crops same as before.
Baroda ...	Passing showers on 18th and 19th.	*Rabi* crops healthy.
		General Remarks.—Slight rain in several Guzerat and Deccan districts; *rabi* harvest commenced; damage by rats continues in the Southern Mahratta Country.
Bengal— (Feb. 25th)		
Chittagong ...	*Nil*	Weather fair and seasonable; the prospects of the spring harvest are good.
Noakholly ...	*Nil*	Weather seasonable; the prospects of the cold-weather crops are favourable; a shower of rain would do good at this time; ploughing for the *aus* crop in some places has commenced.
Chittagong Hill Tracts...	*Nil*	Weather seasonable; the gathering of mustard is nearly over; the hill people are busily engaged in cutting *jooms*.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hill Tipperah ...	0·37	Weather getting warmer day by day; there was rain on the 16th and 17th; the prospects of chillies and sugarcane are good; the reaping of mustard in the low lands is at an end; in some parts of the district the sowing of *aus* paddy has been commenced.
Backergunge ...	*Nil*	The days are hot, but the nights and mornings are cool; the prospects of the crops are good, but rain is badly wanted in many places; prices continue unchanged without any tendency to a fall; general health is good.
Furreedpore ...	0·14	Weather getting hotter; rain is much wanted for the crops in Madareepore, Muksúdpur, and Bhushana specially; the winter cereals are doing well in Furreedpore, Ainpore and Bhánga; report from Goalundo not received.
Dacca ...	*Nil*	Weather seasonable; the crops are all looking well.
Mymensingh ...	0·71	Weather very perceptibly warmer, notwithstanding some showers of rain; the state and prospects of the crops are generally satisfactory.
Tipperah ...	*Nil*	Weather fair; temperature rising; the gathering of the cold-weather crops still continues; rain is wanted in the south for ploughing operations.
24-Pergunnahs ...	*Nil*	Weather warmer, with occasional clouds; the state and prospects of the crops are good, but the prices of food grains continue high; public health in general is good; small-pox continues at Barrackpore and is also reported in the Suburbs.
Jessore ...	0·32	Weather seasonable; no rain has been reported from the south and south-east of the district; where there has been rain good has been done, but more is wanted; the winter crops promise to be pretty fair; public health is good.
Nuddea ...	1·56	Weather cloudy and rather warm; the heavy rain on the night of the 15th was generally beneficial; the winter harvest is nearly over; prices are still high; public health has improved slightly.
Moorshedabad ...	1·84	The heavy rain of the 15th and 16th was general throughout the district; it has done much good to the *rabi* crops; the price of rice is said to be falling slightly.
Pubna ...	1·21	Weather warmer than the previous week; the prospects of all the crops have been much improved by the rain, and the price of rice has fallen at Serajgunj; public health is good.
Rajshahye ...	1·41	There was moderate rain throughout the district during the week; the prospects of the *rabi* crops have been much improved by the late rain; lands in some parts of the district are still being prepared for *boro dhan*, the transplanting of which has been elsewhere completed; public health is good.
Bogra ...	0·63	Weather seasonable; getting warmer; there were good showers in the early part of the week, which have greatly benefited the crops; *kherachi* and potatoes are being gathered in; public health is good.
Dinagepore ...	*Nil*	Weather cool; the reaping of the *rabi* crops is not yet completed; prices vary from 14 to 18 seers the rupee.
Rungpore ...	*Nil*	Weather getting warmer; the state and prospects of the crops on the ground are good; there is some small-pox in Bagdogra and cholera in Kurigram; in other respects the public health is good.
Cooch Behar ...	0·28	Weather getting warmer every day; slight rain on the 16th; mustard is being gathered; tobacco continues to promise well; lands are being cultivated for *bitri*; public health is good.
Jalpáiguri ...	*Nil*	Weather unusually hot for the time of year; a very fair average mustard crop is being harvested; other crops are doing well.
Darjeeling ...	0·07	Atmosphere getting warmer; the ground is being prepared for *bhadoi* rice sowings; the recent rain has been beneficial.
Midnapore ...	*Nil*	Weather somewhat cooler; the recent heavy fall of rain has lowered the temperature; the state and prospects of the crops are favourable.
Howrah ...	1·35	Weather rapidly growing warmer; the state and prospects of the crops are satisfactory.
Hooghly ...	*Nil*	Weather getting warmer; the winter crops are good; almost all have been cut; fever and cholera still prevail in many parts of the district; small-pox has made its appearance in Ooterparah.
Burdwan ...	*Nil*	Weather cool; the recent rain has done good to wheat, barley and cotton, but has done some harm to the other *rabi* crops.
Bankoora ...	0·92	Weather getting warmer daily; cloudy throughout the week, with clear sky at intervals; hailstones and thunderstorm in thana Gangajalghati; the rain has done much good to the crops; sugarcane is being cut and pressed.
Beerbhoom ...	0·80	Weather cloudy and growing warm; the cold-weather crops have been benefited by the rain.
Sonthal Pergunnahs ...	0·76	Weather still uncertain; there are indications of rain; in the south of the district there is hardly anything on the ground now; the winter crops have been good; the *rabi* in the north has been helped by the rain.
Bhágalpur ...	*Nil*	Weather occasionally cloudy and getting warm in the Sudder subdivision; the prospects of the *rabi* crops are good; some damage has been done to the peas and linseed by caterpillars; prices are ruling high; general health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Monghyr ...	*Nil*	Weather becoming hotter every day; a severe, though local, hail-storm on the 16th damaged the crops near the Monghyr town; the damage is, however, trifling; elsewhere every thing looks well, and a bumper *rabi* crop may be expected.
Purneah ...	*Nil*	Weather fair and rather warm; the recent rain has done much good; prospects are favourable; general health is good.
Maldah ...	0·15	Weather fair; occasionally cloudy; the *rabi* crops are thriving; prices of rice, &c., are slightly lower; public health is generally improving.
Durbhunga ...	*Nil*	Weather fair and seasonable; the late rains have benefited to a certain extent wheat, barley and some other crops, but have, on the other hand, done some injury to the *rahur*, peas and tobacco crops; prices are stationary.
Mozufferpore ...	*Nil*	Weather mild, with west wind; the *rabi* crops have been much improved by the recent fall of rain, and there is now every prospect of a fair harvest.
Sarun ...	Slight rain in most parts.	Weather cloudy at the beginning, but fair towards the end of the week; it is now getting warm; west wind is prevailing; the crops are generally doing well; mustard and peas are being harvested; the Sub-Deputy Opium Agent of Sewan reports that not only is the opium crop very short, but blight has set in as it did last year; the prices of food grains are stationary; public health is good, but small-pox is on the increase.
Chumparun ...	*Nil*	Weather getting warmer; no change to report in the state and prospects of the crops; more rain is required.
Patna ...	*Nil*	Weather seasonable; the prospects of the crops continue good.
Gya ...	0·22	Weather seasonable; the maximum reading of the thermometer in the shade was 85·2°; the state of the *rabi* crops is fair; the prices of food grains are stationary; cases of small-pox are not so frequent; the health of the plough cattle is good.
Shahabad ...	*Nil*	Weather clear; on the whole the recent rain has done good to the *rabi* crops; small-pox is prevalent.
Hazáribágh ...	0·67	Weather stormy and cloudy; cooler; the hail during the week has damaged the *mohwa* crop; the *rabi* crops are well advanced; the fall of rain has been beneficial to the backward crops.
Lohardugga ...	0·39	Light rain on the 16th and 17th; the prospects of the *rabi* crops are unchanged at head-quarters; in Palamow an improvement is reported both as regards the crops and general health.
Manbhoom ...	0·96	Weather somewhat unseasonable; the state of the *mohwa* crop on which the people largely depend for at least a couple of months is doubtful; the weather is threatening, and if heavy rain falls the crop will be seriously injured.
Singhbhoom ...	...	Return not received.
Balasore ...	0·30	Weather warm; the rice harvest has been finished; the average outturn is estimated at 11½ annas; malarial fever is much less prevalent.
Cuttack ...	0·07	Weather getting warm, but fine and seasonable; the *sárad* crop is still being reaped in some places; the *dalua* crop is progressing well; public health is on the whole good.
Pooree ...	*Nil*	Weather seasonable; the *sárad* rice is still being harvested; *dalua* rice is progressing well; common rice sells at 11¾ to 21 seers for the rupee; a few cases of cholera have been reported.
		General Remarks.—The recent rain has done much good to the crops on the ground, and has facilitated the preparation of the land for the next sowings; it has, however, injured some crops in Burdwan and Durbhunga; rain is still wanted in parts of Furreedpore and Backergunge, as well as in South Tipperah, Noakholly, Jessore and Chumparun; in Hazáribágh the *mohwa* crop has been damaged by hail, and in Manbhoom it is in a doubtful state; some damage has been done by hail near the town of Monghyr, and by catterpillars in Bhágalpur; in Sarun the opium crop is very short, and is moreover affected by blight; in Moorshedabad, Serajgunj and Maldah the price of rice has fallen a little.
N. W. P. and Oudh—		
Benares (Feb. 25th)	·2	Irrigated crops fair.
Allahabad („ „)	...	No change; earlier crops being cut.
Jhánsi („ 26th)	...	*Rabi* fair in most parts.
Agra („ 25th)	*Nil*	Prospects unchanged; prices steady.
Meerut („ 26th)	On 21st February ·5 in Sadr; ·8 in Sardhana; and ·3 in Mewana.	Prospects improved; prices slightly lower; health good.
Bareilly („ „)	...	Weather clear; prospects somewhat improved.
Kumaun („ 22nd)	Good rain fell on 15th and 16th with snow on the hills, and again on night of 21st.	Some flights of locusts have passed, but have done slight damage.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. & Oudh.—*contd*		
Lucknow } (Feb. 26th)	...	No change.
Fyzabad }		
Sitapur („ „)	*Nil*	Weather settled.
		General Remarks.—Light rain in some divisions of the North-West Provinces; *rabi* prospects fair.
Punjab—(Feb. 25th).		
Delhi ...	...	Prospects unfavourable; rain much wanted; health fair; slight fluctuations in prices of food grains.
Hissar ...	*Nil*	Crops on *baráni* lands drying up; slight fluctuations in prices of food grains; health generally good, but a few cases of small-pox and cattle disease in some villages of Rohtak.
Umballa ...	1·0	Crops fair, but more rain wanted; health good.
Jullundur ...	...	Showers about the district; crops are no worse than last week, but slight rise in prices; health good.
Amritsar ...	1·10	Health fair; slight fluctuation in prices of food grains.
Lahore ...	*Nil*	Health fair; rain much wanted for crops.
Ráwalpindi ...	Sprinkling of rain on 25th	Weather cloudy, but more rain much wanted; cattle disease decreasing.
Mooltan ...	*Nil*	Crops fair, but rain much wanted; slight fluctuations in prices of food grains.
Dera Ismail Khan ...	*Nil*	Crops fair, but rain wanted; health good.
Pesháwar ...	*Nil*	Harvest prospects bad; prices of food grains again going up.
		General Remarks.—The further fall of rain so far as it has extended has again benefited the crops, but rain is still much needed throughout the Province.
Central Provinces—(Feb. 26th).		
Nimár ...	...	*Rabi* harvesting; health good.
Hoshangabad ...	...	Warm; *rabi* prospects unchanged.
Betul ...	Slight rain	Cloudy; *rabi* harvesting; prices stationary.
Wardha ...	0·73	*Rabi* harvesting; health good; prices stationary.
Nágpur (Feb. 26th)	0·93	Cloudy and close; *rabi* harvesting; prospects fair; health good; prices stationary.
Chanda ...	...	Prospects unchanged; health good; prices slightly fallen.
Chhindwára ...	0·30	Prospects of *rabi* poor, except gram; health good; prices steady.
Narsinghpur ...	0·12	Rain injurious; no damage; fever prevalent.
Bhandára (Feb. 25th)	0·13	*Rabi* favourable; health good; prices continue high.
Seoni ...	1·23	Rain attended with thunder; cloudy; injury to crops apprehended; prices stationary.
Balaghát ...	Slight rain on the 20th	Cloudy; close; prospects of *rabi* good; small-pox and fever prevalent; prices stationary.
Mandla ...	0·42	Prospects unfavourable; health good; prices steady.
Saugor ...	0·85	*Rabi* harvesting; health good.
Damoh ...	0·39	Later sowings will benefit; health good; prices steady.
Jubbulpore ...	0·73	Slight hail storm on 25th; small-pox continues; prices stationary.
Raipur ...	...	Cloudy; close; prospects of *rabi* good; cholera made its appearance; small-pox continues; prices stationary.
Biláspur (Feb. 22nd)	Slight rain.	Cloudy; *rabi* doing well and is ready for reaping; cholera appeared; small-pox continues.
Sambalpur („ 21st)	...	Cloudy; prospects unchanged; cholera continues; prices stationary.
		General Remarks.—Cloudy; close towards end of week; rain reported from 13 districts and only in one district, Seoni, damage to crops from recent rain anticipated; *rabi* harvest continues; prospects on the whole fair; prices stationary.
British Burma—(Feb. 27th)		
Arakan Division ...	...	Public health good; cattle suffering from cow-pox in Naaf township.
Pegu Division—		
Rangoon ...	...	Seven fatal cases of small-pox in Rangoon town; no cholera; public health good, except in Hmaubee sub-division.
Bassein ...	...	Public health good; 59 cattle deaths from 29th January to 10th instant in one township.
Henzada ...	...	Five deaths from cholera in Zaloon township, otherwise public health good; slight cattle disease in two townships.
Prome ...	...	Public health good.
Tharrawaddy ...	...	A few cases of cholera, otherwise public health fair.
Thonkwa ...	...	Public health good; crops reaped, outturn excellent.
Thayetmyo ...	...	General health normal; small-pox prevalent in three townships.
Tenasserim Division—		
Amherst ...	...	Public health good; no cattle disease.
Shwegyeen ...	...	Public health fair.
Tounghoo ...	...	Public health good.
Tavoy (Feb. 8th)	...	One death from cholera, otherwise public health good.
Mergui (For fortnight ending Feb. 15th.)	...	Nineteen deaths from cholera in Mergui town; crops reaped; cattle healthy.
		General Remarks.—General health good; some cholera and a little small-pox; cattle disease in Bassein and Henzada.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—		
Gauháti (Feb. 26th)	*Nil*	Weather unseasonably hot and dry; land being ploughed and sowing of *asu* and *ban dhan* commenced.
Sylhet („ „)	*Nil*	Prospects good; prices stationary.
Mysore and Coorg— (Feb. 26th)	Slight showers in the Bangalore and Kolar districts.	No change in crops and prices; for week ending February 15th gratuitously relieved in hospitals 456.
Hyderabad Assigned Districts—		
Amráoti (Feb. 26th)	...	*Rabi* harvesting in progress; prospects good.
Central India— (Feb. 26th)	Slight rain throughout.	Prospects unchanged.
Rajputana—		
Sirohi (Feb. 9th)	...	Tanks drying; wells, health, and crops fair; locusts disappeared; warmer; close; season agreeable.
Marwar („ 22nd)	Showers on 19th and 20th instant.	Sufficient water still in tanks and wells; health and crops good; prices still rising.
Harowtee („ „)	...	Health good; prospects improved.
Jhallawar („ 20th)	...	Prospects good.
Ajmere („ 26th)	...	Weather cloudy; prospects improved.
Bhurtpore ...	Partial rain	Prospects unchanged.
Ulwur ...	General rain on 20th instant.	Rain of great service.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 26th February, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir J. Strachey, G.C.S.I.
General the Hon'ble Sir E. B. Johnson, K.C.B., C.I.E., R.A.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Mumtáz-ud-Daulah Náwáb Sir Muhammad Faiz Alí Khán Bahádur, K.C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble G. H. P. Evans.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
Lieutenant-General the Hon'ble Sir M. K. Kennedy, R.E., K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

DESTRUCTION OF RECORDS BILL.

The Hon'ble MR. STOKES presented the Report of the Select Committee on the Bill to authorize the destruction of Useless Records in Courts in British India.

INDIAN RAILWAY BILL.

Colonel the Hon'ble SIR ANDREW CLARKE presented the final Report of the Select Committee on the Bill to consolidate and amend the law relating to Railways in India.

PRESIDENCY BANKS ACT, 1876, AMENDMENT BILL.

The Hon'ble SIR JOHN STRACHEY moved for leave to introduce a Bill to amend the Presidency Banks Act, 1876. He should explain in a very few words the object of the little Bill which he asked leave to introduce. The Presidency Banks Act had now been in force nearly three years, and had worked, so far as the Government was informed, in a very satisfactory manner. The object of the Bill he proposed to introduce was not to alter any of the substantive provisions of the existing Act, but only to provide for a few omissions and improvements in detail which had been suggested. Amongst these proposed changes, the only change which had any real importance had been suggested by the Banks themselves, and it was with the object of meeting the wishes of the Presidency Banks that he now asked leave to introduce this Bill. Its necessity had mainly arisen from doubts which had been expressed as to whether the Banks had power, under the Act of 1876, to borrow money by pledging the assets or property of the Bank. The need for such a power was obvious; and this omission having been brought to the notice of the Government by the three Presidency Banks, it was with the object of removing these doubts that it was proposed to introduce the present Bill.

The other changes which it was proposed to take the opportunity of making in the existing law were for the most part so unimportant, that he need not take up the time of the Council in explaining them.

The Hon'ble MR. HOPE said he heard with great satisfaction that it was proposed to amend the Presidency Banks Act. He was not aware of the exact nature of the amendments proposed; but he felt at the time the Act

was being passed, and when he sat as a Member of the Select Committee, that it was in many points very incomplete. He trusted that the amendment the Act would receive would not only affect matters of detail, but that its general tendency would be to increase the security of the public and the shareholders of the Bank. The present Act was still in many respects defective, and the very serious malpractices which had come to light both in India and in England showed that a much greater amount of stringency than had hitherto been considered necessary, was desirable in all Acts of this description.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 5th March, 1879.

CALCUTTA;
The 26th February, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

[*a*] Firewood falling.
[*b*] Barley rising.
[*c*] Wheat, barley, bájra, jowár and gram rising and firewood falling.
[*d*] Wheat, barley, bájra, jowár and gram falling.
[*e*] Wheat, barley, and rice rising.
[*f*] Wheat, rice, bájra and gram rising.
[*g*] Wheat, barley and jowár rising.
[*h*] Barley and jowár rising.
[*i*] Wheat, barley, bájra, and gram rising.
[*j*] Wheat, barley, and bájra rising.
[*k*] Bajra rising and firewood falling.
[*l*] Jowár rising and firewood falling.
[*m*] Wheat, barley, bájra, jowár, and salt rising.
[*n*] Wheat, barley, bájra and jowar rising.

Description of Lesser Millets.

* Juar (large).
† Choti juar.
‡ Kodo.
§ Makai, kodo.
‖ Zaharra, kodo, and medua.
¶ Kodo and peas.
** Mash and peas.

Prices Current of Food-grains throughout India for the 1st half of February 1879—concluded.

QUANTITIES PER RUPEE

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPRESENTATION OF INDIA AT THE PARIS EXHIBITION OF 1878.

No. 2.

Extract from the Proceedings of the Government of India, in the Department of Revenue, Agriculture, and Commerce, dated Calcutta, the 4th March 1879.

[INDUSTRY, SCIENCE, AND ART.]

Read the following papers on the subject of the representation of India at the Paris Exhibition of 1878, and of the measures which were adopted for contributing thereto specimens of Indian woods and forest products and of the raw produce of the country :—

Despatch from the Secretary of State, No. 21 (Statistics and Commerce), dated the 31st January 1877.

Despatch to the Secretary of State, No. 4 (Industry, Science, and Art), dated the 23rd March 1877.

Despatch from the Secretary of State, No. 6 (Revenue—Forests), dated the 8th March 1877.

Resolution of the Government of India, No. 856 (Political), dated the 26th April 1877.

Despatch from the Secretary of State, No. 60 (Statistics and Commerce), dated the 26th April 1877.

Circular letter to the local Governments and Administrations, No. 1—63-73 (Industry, Science, and Art), dated the 21st July 1877.

Circular letter to the local Governments and Administrations, No. 24—983-994 (Forests), dated the 15th August 1877.

Despatch from the Secretary of State, No. 93 (Statistics and Commerce), dated the 5th July 1877.

Read also the following communications from the Secretary of State, referring to the position occupied by India at the Exhibition and the prizes awarded to the Indian Government and private exhibitors from India :—

Telegram dated the 4th May 1878.
Despatch No. 99 (Statistics and Commerce), dated the 23rd May 1878.
Despatch No. 204 (Statistics and Commerce), dated the 5th December 1878.

RESOLUTION.

The Paris International Exhibition of 1878 having been brought to a close, and the prizes awarded, the Governor General in Council desires to place on record briefly the results of the arrangements adopted for the collection and transmission of the articles exhibited by this country, and to acknowledge the services rendered by the officers entrusted with the duty of carrying out those arrangements.

2. Early in 1877, when the French Government invited the co-operation of the India Office in the representation of India at the proposed Exhibition, Her Majesty's Secretary of State for India remarked that it was undesirable for India to be represented at exhibitions like that to be held at Paris to the same extent and at so great a cost as on previous occasions. The Government of India concurred in the view expressed by the Marquis of Salisbury with the more readiness that His Royal Highness the Prince of Wales had agreed to lend his collection, which would sufficiently represent the higher class of Indian art manu-

facture, and because a collection of the raw products of India, similar to that supplied to the late Philadelphia Exhibition, was to be contributed by the India Museum in London. Under these circumstances, it was considered unnecessary to take any action in the direction of representing India at the Exhibition beyond communicating, as desired by the Secretary of State, with His Highness the Maharaja of Kashmir and other native chiefs, leaving it to them to contribute to the Exhibition if, of their own accord, they should desire to do so.

3. It was soon ascertained, however, that the surplus stores in the India Museum were inadequate to supply a suitable collection of products for the Exhibition, and that many important groups could not be exhibited unless fresh specimens were supplied. Her Majesty's Secretary of State for India, therefore, in his letter of the 26th April, asked for contributions from India, leaving it to the Government of India to determine what articles should be sent to supplement those already available at the India Museum, and observing only that if, without any material increase of cost, a larger quantity of articles than was actually needed for the Exhibition could be procured for meeting similar requirements of museums and institutions in England, it would be desirable to take the opportunity of replenishing the stores of the India Museum.

4. The Government of India asked for a specification of the articles required to supplement the collection at the India Museum; but as there was little time to spare, if a useful collection was to be made, a reply to this reference was not awaited, and steps were at once taken for the preparation in India of a list of products to be collected and for the prompt collection of good samples of them. The plan of operations was simple: the Government of India placed the whole matter in the hands of two selected officers—Dr. Brandis, the Inspector General of Forests, and Mr. J. E. O'Conor, Assistant Secretary in this Department. To the former was assigned the duty of arranging for the collection of woods and other forest products, of which there were few or none in the India Museum; and to the latter was entrusted the duty of arranging for a similar collection of the raw products of the country. Both were empowered to correspond direct with local Governments and Administrations, and on their suggestion each Government nominated a special officer to carry on the local work, these corresponding direct with Dr. Brandis and Mr. O'Conor, respectively. The results of this arrangement, both in point of economy and as regards absolute excellence of the specimens collected, are, in the opinion of the Governor General in Council, sufficient evidence of the efficiency of the system adopted. It seems clear from the experience acquired on this occasion that, whether it is desired to make only collections of primary material, or to make also collections representative of the art-manufactures of India, the appointment of one officer specially qualified by taste and knowledge for the conduct of such work will ensure much more satisfactory and expeditious results than the elaborate machinery hitherto resorted to of local and central committees and sub-committees, and that the work will be more cheaply done.

5. The collections which were made by the local officers with the help of the classified lists prepared by the two officers selected by the Government of India were sent to Calcutta in small lots from time to time, and there the specimens were sorted, prepared, classified, labelled, catalogued, packed, and despatched,—those of forest produce under the supervision of Dr. Brandis and Mr. J. S. Gamble, his Personal Assistant, now Officiating Conservator of Forests, Bengal; and those of raw produce by Mr. O'Conor. The contributions of raw produce from the Madras and Bombay Presidencies were, however, an exception to the rule: these were sent direct from Madras and Bombay, in order to save time and prevent delay which would have precluded their exhibition at Paris. The work of collection, classification, and transmission of the articles received was conducted under difficult conditions, arising mainly out of the shortness of the period during which it had to be accomplished, but the final results were quite satisfactory, the collection sent being fairly, and for many groups of raw products almost exhaustively, representative of the productions of British India and Burma. The number of wood specimens exhibited was 650, this number including 370 different species. This collection has now been presented to the French National Forest School at Nancy, where for ten years past a large proportion of the forest officers in India have received their professional education under the care of the Director and Professors of that excellent institution.

6. The awards numbered fifty-six altogether, comprising two *grands prix* (diplômes d'honneur), 10 gold medals, 15 silver medals, 20 bronze medals, and 9 honourable mentions distributed as shewn in the annexure to the letter from the Prince of Wales.

7. Mr. O'Conor was one of those whose exertions mainly contributed to the success of the Exhibition so far as the raw products of the country are concerned, and the Governor General in Council is pleased to transfer one of the gold medals awarded to himself personally by the International Jury, and to present it to that gentleman as the officer of the Government of India whose services specially merit recognition. The gold medal for carpets was probably awarded on account of a contribution made by the Jubbulpore School of Industry, and if this is the case it will be sent through the Chief Commissioner of the Central Provinces to Colonel Ward, the Superintendent, for deposit in the school. The diplomas and rest of the medals conferred on Government, excepting those awarded personally, which will be forwarded to the persons to whom they were awarded, should be deposited in the Indian Museum at Calcutta.

8. The collections made by Mr. Buck with the help of Mr. Duthie, Superintendent of the Botanical Gardens, Saharanpur, and that by Mr. Colin Browning, Inspector General of Education in the Central Provinces, reflect much credit on those officers, and His Excellency in Council desires that the thanks of the Government of India may be conveyed to them.

9. The Forest Department has already received its full meed of recognition. To Dr. Brandis, as representing the collective labours of the forest officers under the Government of India, the Jury awarded one gold medal, and to Colonel Beddome, similarly representing Madras, another. From the Bombay Presidency most contributions arrived too late for the Exhibition, but were utilised in the preparation of additional sets of wood specimens which were distributed among the offices of Conservators of Forests and other public institutions in Europe and America in accordance with the desire of the Secretary of State. The Governor General in Council has no doubt that the Governments of Madras and Bombay will fully acknowledge the credit due to such of their officers as were employed in getting up the collection. It remains for His Excellency in Council to express his acknowledgments to the forest officers employed in the provinces under the Government of India. From the Punjab, Mr. Baden-Powell, the Conservator, and the officers under his orders, sent a large, varied, carefully-named, and selected collection, which included among others a number of interesting specimens from the inner arid Himalaya, got together by the Reverend Mr. Heyde of the Moravian Mission, Lahoul. The collections from Bengal, prepared under the orders of the Conservator, Dr. Schlich, arrived mostly in good time, and furnished a large number of interesting specimens from parts of the country, the forest resources of which are not generally known. Mr. Greig, the Conservator of Forests in the North-Western Provinces, furnished specimens from the forests in Dehra Dún, Jaunsar, and Kumaun, but larger collections which had been made were not sent down to Calcutta, as the logs were unseasoned. From Oudh, a few well seasoned pieces were received, but the remainder did not arrive till after the specimens for the Exhibition had left Calcutta. The contributions of Mr. Gustav Mann from Assam, of Captain Doveton from the Central Provinces, of Mr. Drysdale from Berar, and of Major Seaton and Mr. Ribbentrop from Burma, included some fine and well-seasoned pieces of useful kinds of trees and specimens of minor forest produce. Good specimens of sandalwood from Mysore were received from Captain VanSomeren, the Conservator, but specimens of other timbers could not be forwarded in time for the Exhibition on account of the difficulty experienced in getting carriage owing to the famine. The important collection of Major-General Barwell, the Chief Commissioner of the Andamans, served to shew the numerous handsome and useful timbers which are procurable in those islands. The logs and pieces thus contributed by the various provinces were received in the rough at the workshop which had been established in Calcutta, and there, under the supervision of Messrs. Gamble and Smythies, they were prepared and finished into specimens. To these gentlemen likewise the thanks of Government are due for the great skill and indefatigable energy with which they have accomplished their portion of the work under singularly difficult circumstances.

10. The collections of specimens representing art manufactures sent from India were made in a semi-official way by various local authorities in direct communication with Lord Northbrook, the Chairman of the Indian Section of the British Commission. The Governor General in Council is gratified to find from the 5th paragraph of the letter from His Royal Highness the Prince of Wales that their exertions have been appreciated. He also desires here to record his acknowledgments of the services rendered in connection with the Indian collections by Sir Cunliffe Owen, Colonel Pearson, and Messrs. Purdon Clarke, Birdwood, and Waterfield, whose exertions have already secured the approbation of His Royal Highness.

ORDER.—Ordered, that the above Resolution and the despatch from the Secretary of State, No. 204, dated the 5th December 1878, with the enclosed letters and the list of awards made by the International Jury, be published for general information in the Supplement to the *Gazette of India*, and that copies of these papers be communicated to the several local Governments and Administrations quoted in the margin.

Madras.	Central Provinces.
Bombay.	British Burma.
Bengal.	Mysore and Coorg.
North-Western Provinces and Oudh.	Assam.
Punjab.	Hyderabad.
	Ajmere.

Ordered, that a copy of these papers be sent to Dr. Brandis and Mr. O'Conor.

Ordered, that copies of the papers published be forwarded to the Foreign and Home Departments for communication, respectively, to His Highness the Maharaja of Kashmir and to the Chief Commissioner of the Andamans.

No. 204, dated India Office, London, 5th December 1878.

From—Her Majesty's Secretary of State for India,
To—The Government of India.

I forward herewith, for Your Excellency's information and for such measures as you may think fit to take, a copy of a letter* from His Royal Highness the Prince of Wales, dated the 31st October, and of the reply thereto,† relative to the awards which have been made to India in connection with the Paris Exhibition.

* And enclosure.

† Dated 30th November 1878.

Dated Marlborough House, Pall Mall, London, 31st October 1878.

From—His Royal Highness the Prince of Wales,
To—Her Majesty's Secretary of State for India.

The International Jury of the Paris Universal Exhibition having completed their labours, I have the satisfaction to submit, for the information of the Secretary of State for India in Council, the accompanying list of awards made to India.

2. The following are the principal, *viz.*,—

Two diplomas of honour (*Grand Prix*), both awarded to Lord Lytton: one on account of the great progress made in India in the cultivation of tea; the other in acknowledgment of the personal interest taken by His Excellency in the production of raw silk for the European market, and especially for the improvement in the culture and preparation of the tasar and other wild silks of India.

Ten gold medals: two to Lord Lytton for wheat and other cereals and vegetable products; one to the Government of India for carpets; one to Mr. H. Lock, of the Calcutta Museum, for a collection of native teas; one each to Dr. Brandis and Colonel Beddome for the collections of forest produce; one to Dr. Bidie for a collection of alimentary products; one to His Highness the Maharajah of Kashmir; one to Hajee Mooktar Shah, Master Craftsman to His Highness the Maharajah of Kashmir; and one to the Murree Brewery Company for beers,—in all forty-five awards, two "Grand Prix," nine gold, fifteen silver, twenty bronze medals, and nine honourable mentions.

3. Thus, in the International competition of the present year,—the most severely contested of all that have preceded it,—the Indian Empire has taken two of the highest prizes for articles in which China has hitherto monopolised the markets of the world.

Eighteen awards (including the *Grand Prix* and gold medal) have been made for Indian teas, a distinction which it may be hoped will serve to stimulate the growing demand for them.

4. The remarkable interest taken in the Indian wild silks at the present Exhibition is principally due to the experiments made for the Government of India by Mr. Thomas Wardle, of Leek. He has now shewn that they can be spun as fine as Chinese silk and dyed of any colour. It is, therefore, probable that they will become merchantable wherever silk is woven or worn.

To mark their sense of the far-reaching effects that are likely to result from these improvements, the International Jury have awarded a *Grand Prix* to Lord Lytton and a silver medal to Mr. A. O. Hume.

5. This is also the proper occasion for me to request Your Lordship to convey to the Viceroy and Governor General of India, and to the Governors of Madras and Bombay, and the respective Lieutenant-Governors of the provinces my best thanks for the cordial assistance given by them, at my request, in the preparation of the various collections of art manufactures in India by the Royal Commission. Of the officers who acted under their orders, I would name Dr. Brandis and Lieutenant-Colonel Michael, C.S.I., as deserving of special notice for their services.

6. To Colonel Pearson, who acted under the orders of the Secretary of State in Council, the efficiency of the arrangements of forest products is mainly due. I have also been particularly indebted to Mr. George Birdwood, C.S.I., for the selection he recommended of manufactures to supplement the exhibition of my own collection of Indian presents, as well as for his admirable hand-book on the art manufactures of India. I have also to express the great obligations the Royal Commission has been under to Mr. Henry Waterfield, your Secretary in the Statistical and Commercial Department, as the channel of their communications with the India Office, and for his cordial co-operation at all times with Mr. P. Cunliffe-Owen, C.B.

7. The duties of Mr. P. Cunliffe-Owen and of Mr. C. Purdon Clarke in connection with the Indian Court have been of so exceptionable a nature, that, though they are officers of the Royal Commission, I feel it my duty to submit their names also to Your Lordship. Mr. Clarke's design for the central pavilion secured the success of the Indian Exhibition. The excellent manner in which Mr. Cunliffe-Owen has disbursed the grant made by Your Lordship in Council for the purposes of the British Indian section, and his general direction of it as Executive Secretary of the Royal Commission, will not fail to meet with your commendation. India has been represented at Paris this year with a completeness and splendour never before reached, and the effect produced throughout Europe has been quite unprecedented.

It is too well recognised to need my impressing it on Your Lordship's attention how much this has been due to Mr. Cunliffe-Owen.

THE INDIAN EMPIRE.

List of Awards.

Name.	Address.	Award.	Awarded for

Dated India Office, London, 30th November 1878.

From—Her Majesty's Secretary of State for India,

To—His Royal Highness the Prince of Wales.

I have the honour to acknowledge the receipt of Your Royal Highness' letter, dated the 31st ultimo, forwarding a list of awards made to India by the International Jury of the Paris Exhibition, and expressing Your Royal Highness' thanks for services rendered to the Royal Commission by the Governor General of India and others.

I desire, in reply, to convey to Your Royal Highness the gratification felt by myself and the Council of India at the manner in which the Jury have signified their sense of the position occupied by India at the Exhibition; and I am confident that the Government of India, to whom a copy of Your Royal Highness' letter will be communicated, will fully participate in our feelings.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 4th MARCH 1879.

General Remarks.—General prospects in Madras have not changed during the week. In the Bombay Presidency the *rabi* is fair in Sind, Guzerat and Konkan; in Kaladgi heavy rain has proved injurious to the crops, and in several districts in the Deccan and the Southern Mahratta Country damage is being done by rats. There has been no alteration in Mysore. Slight rain fell in a good many districts of the Central Provinces, but the weather is now clear; the harvesting of the *rabi* continues and promises fairly; prices remain stationary. The reports from Berar and Central India do not exhibit any material change. Rain has fallen in Rajputana, and the weather is cloudy; though blight is feared, prospects are fair and prices stationary. In Bengal some crops are being reaped with a fair outturn, and those on the ground are in a satisfactory condition; rain is, however, still required in parts of Central and Eastern Bengal; public health is good, but small-pox is reported from many and cholera from some districts. In part of Assam slight rain has fallen and benefited the crops, but more is wanted generally. The report from British Burma shews that the health of the Province is generally good. In the North-Western Provinces and Oudh the harvest has commenced in some districts and the out-look is fair. Harvest prospects in the Punjab have on the whole somewhat improved, especially in the Frontier districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Nistna (Mar. 1st)	*Nil*	Rice 11·41, *cholum* 15·57, *raggi* 17·78, *cumboo* 15·6; 4½ inches water passing over anicut; standing crops generally good; *varige*, pulse crops, castor, and tobacco being gathered in some localities.
Kurnool („ „)	·45 (average of 6 stations.)	Rice 10·96, *cholum* 16·53, *raggi* 19·90, *cumboo* 18·08; fever prevalent; season favourable; white cholum being harvested, outturn ½ to ¾; cotton, Bengal gram, wheat, gram, and second crop paddy in good condition; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 9·11, *cholum* 13·51, *raggi* 15·81, *cumboo* 14·27; moderate freshes in some of the principal streams; dry crops require rain in parts of the Tanjore and Pattukottai taluks, and suffer much; wet crops generally in good condition, except in a few localities; *samba*, paddy, *raggi*, *dholl*, and horse-gram being harvested, outturn ⅝ to ¾.
Madura („ „)	1·23 (average of 6 stations); *nil* in others.	Rice 10·60, *cholum* 15·93, *raggi* 18·07, *cumboo* 18·79.
Malabar („ „)	·46 (average of 5 stations); *nil* in others.	Rice 10·30, *raggi* 17·0; prices fallen at Cochin, stationary elsewhere.
		General Remarks.—General prospects unchanged; slight rain fallen in Tinnevelly; rats still doing damage to crops in Bellary.
Bombay—(Mar. 5th).		
Sind—		
Kurrachee ...	...	River still very low—only 2 feet 2 inches at Kotri on 2nd against 8 feet 5 inches on same date last year; 3 fresh cases of small-pox in Kurrachee.
Hyderabad ...	...	Small-pox in Naushahro; cattle disease in Badin; fever continues; *rabi* reaping commenced.
Upper Sind Frontier...	...	Weather cool; high winds prevailing; *sarsu* ripening; prospects good; wheat below average; food grains at famine rates; forage scarce.
Guzerat—		
Ahmedabad ...	...	Cloudy and windy during greater portion of week; weather colder.
Pánch Mahâls ...	...	Weather cloudy and unseasonably cold.
Kaira ...	...	Public health and *rabi* crops good.
Surat ...	...	Weather generally cloudy and cold.
Broach ...	...	Distress amongst poor increasing in Ankleswar taluka.
Khandesh and Násik—		
Khandesh ...	...	*Rabi* reaping progressing; cattle disease in 4 talukas.
Násik ...	...	No change.
Colába (March 3rd)	...	Weather cold; fever in Pen; locusts in Mahad; *rabi* crops good in Alibág, Pen, and Roha.
Ratnágiri (Feb. 25th)	...	*Rabi* crops good.
Deccan—		
Poona ...	...	No change.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Ahmednagar ...	...	Rats still destructive; *rabi* harvest continues throughout district.
Sholapore ...	Slight rain in all talukas except Pársi and Mádha.	
Satara ...	...	*Rabi* reaping continues; public health good.
Southern Mahratta Country—		
Kaládgi ...	2·40 at Kaládgi; 1·52 at Indi; ·53 at Bágewári; ·32 at Bagalkot; 2·01 at Badami.	Rain not favourable.
Belgaum ...	...	No change.
Dharwar ...	...	Cattle disease in two talukas; no change in state of crops and public health.
Kanara ...	...	Sugarcane crop being reaped on the coast.
Kattywar and Gaekwar's Territory—		
Rájkot ...		Weather fair; *rabi* harvest continues.
Wadhwán ...		Weather cloudy; crops same as before.
Baroda ...		Public health good; indications of increasing distress from high prices of food.
		General Remarks.—Weather generally cold; *rabi* fair in Sind, Guzerat, and Konkan; damage by rats in several Deccan and Southern Mahratta Country districts continues; heavy showers unfavourable to crops in Kaládgi.
Bengal—(March 4th).		
Chittagong ...	*Nil*	Weather fine; the prospects of the crops are favourable.
Noakholly ...	*Nil*	The early mornings are foggy; weather daily getting warmer; rain is wanted; the preparation for the early rice crop has commenced.
Chittagong Hill Tracts...	*Nil*	Weather seasonable, cloudy on the 23rd February; the gathering of the mustard crop still continues; rain is very badly wanted for the crops on the ground; public health is good.
Hill Tipperah ...	*Nil*	Weather dry and warm; in the low lands *aus* paddy is being sown in some parts of the district, and *boro* paddy is being transplanted in other parts; the gathering of sugarcane still continues; public health is good.
Backergunge ...	*Nil*	Weather warm, with clouds at intervals; the prospects of the crops are fair; rain is very much needed throughout the district; prices continue unchanged, and there appears to be no prospect of a fall; some cases of small-pox are reported from Perozepore and Patoakhally.
Furreedpore ...	*Nil*	Weather fair; west winds setting in; the winter crops are generally doing well, but would have been better for rain, which still would do good.
Dacca ...	*Nil*	Weather seasonable; still cool in the morning; the state and prospects of the crops are very good; prices have a slight tendency to fall.
Mymensingh ...	*Nil*	Weather fine; still cool in the mornings and evenings; the state and prospects of the crops are favourable.
Tipperah ...	*Nil*	Weather seasonable; the cold-weather crops are doing well; a little rain is wanted; exportation of rice is going on from three thanas; prices continue high; a few cases of small-pox are reported from Damakandi.
24-Pergunnahs ...	*Nil*	Weather seasonable; the state and prospects of the crops are good, but the prices of food grains are very high; public health in general is fair; small-pox continues at Barrackpore.
Jessore ...	*Nil*	Weather seasonable; rather hot during the day; rain is wanted in the east and south of the district, but prospects are fair; public health is good.
Nuddea ...	*Nil*	Weather warm; the winter crops are nearly harvested; the outturn is fair; cholera is still prevalent.
Moorshedabad ...	*Nil*	Weather becoming hot in the middle of the day; the state and prospects of the crops are the same as in last week.
Pubna ...	*Nil*	Weather seasonable; the state and prospects of the crops are unchanged; small-pox has broken out in thana Pubna.
Rajshahye ...	*Nil*	Weather warm in the day time, but cool at night; west winds have set in; the *rabi* harvest has commenced; *boro dhan* is still being transplanted in places; lands are being prepared for sowing *dhan*, jute, and *teel*, and in some places the sowings have commenced; a few cases of cholera and small-pox in Manda, Tanore, Lalpore, and Charghat.
Bogra ...	*Nil*	Weather clear and warm, with north-west wind blowing; the winter crops are reported to be doing well; the district is fairly healthy.
Dinagepore ...	*Nil*	Nights still cool, but weather close in the daytime; west winds have begun; the reaping of the *rabi* crops is still going on.
Rungpore ...	*Nil*	Weather becoming warmer; the state and prospects of the crops continue unchanged, but rain is required for the winter crops in Gaibanda; small-pox is prevailing in some parts of the district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Cooch Behar ...	*Nil*	Weather fair; very hot for this season of the year; occasionally windy; the prospects of tobacco are good; *bitri* cultivation is progressing; public health is good.
Jalpáiguri ...	*Nil*	Weather very much warmer than is usual at this time of the year; rain is much wanted both to soften the soil for ploughing for the *bhadoi dhan* crop, and for the wheat, barley, and potato crops not yet gathered; there has been a very good outturn of *haimánta dhan*.
Darjeeling ...	*Nil*	Weather getting warmer; no crops of importance are now on the ground; the land is being cultivated for the *bhadoi* crop.
Midnapore ...	*Nil*	Weather seasonable; the state and prospects of the crops are favourable.
Howrah ...	*Nil*	Weather growing daily hotter; the hot weather seems to have set in; the state and prospects of the crops are favourable; there is not much of any crop on the ground.
Hooghly ...	*Nil*	Weather getting warmer; the winter crops have been reaped; fever and cholera still prevail in many parts of the district; cases of small-pox in Utterparah.
Burdwan ...	*Nil*	Weather dry and gradually becoming hotter; nothing new to report in the state and prospects of the crops.
Bankoora ...	*Nil*	Weather warm, with gusts of wind; the crops being harvested are giving 10 to 12 annas; those on the ground promise fairly.
Beerbhoom ...	*Nil*	High winds and hot weather; the state and prospects of the crops are favourable.
Sonthal Pergunnahs ...	*Nil*	Weather dry; hot west wind blowing; the *rabi* crops are reported to be good every where.
Bhágalpur ...	*Nil*	Strong westerly winds prevail; the state and prospects of the crops are the same as in last week.
Monghyr ...	*Nil*	Weather fair; getting hotter; the state and prospects of the crops are good.
Purneah ...	*Nil*	Weather seasonable; dry westerly wind; the state and prospects of the crops are good.
Maldah ...	*Nil*	Weather fair; the *rabi* crops are thriving; the prices of rice, &c., are again on the increase; public health is generally improving.
Durbhunga ...	*Nil*	Weather seasonable, with west winds; no change in the prospects of the crops since last week; rain is required for indigo; prices are stationary; health of the people is good, except a few cases of small-pox.
Mozufferpore ...	*Nil*	Weather mild, with strong west winds; the *rabi* crops have improved very much of late, and are generally in a satisfactory condition; indigo sowings have commenced in some parts of the district; the poppy crop is likely to be very short, except on irrigated lands.
Sarun ...	*Nil*	Weather fair, and getting warmer daily; high west wind and dust-storms during the day; no particular change to note since last week; the crops are generally doing well; mustard and peas are being reaped; the poppy crop is in flower; indigo seed is being put in the ground; prices are stationary; public health is good.
Chumparun ...	*Nil*	High winds from the west; no change in the state and prospects of the crops since last report.
Patna ...	*Nil*	Weather getting warmer; high west winds prevail; mustard and *mussoor* are being harvested; the other *rabi* crops are in excellent condition.
Gya ...	0·04	The mornings and evenings are cool; the maximum reading of the thermometer in the shade was 92°; the condition of the *rabi* crops is good and the late showers are expected to improve them; cases of small-pox continue to be reported; the health of the plough cattle is good.
Shahabad ...	*Nil*	Weather getting warm daily; strong westerly wind in the day time with dust; the harvesting of some of the *rabi* crops has commenced; the prospects of the crops remain good on the whole; small-pox is still prevalent.
Hazáribágh ...	0·06	Weather seasonable; hot sun; cold west winds; the late rain has enabled the ryots to commence ploughing to open up the ground; the *sursoo* (mustard) crop has been gathered and has been a full one; wheat and barley are ripening and will soon be cut; gram is looking well; the fall of hail reported last week was very partial.
Lohardugga ...	1·35	A storm with heavy rain on the 24th February; high winds prevailed towards the close of the week; no change to report in the state and prospects of the crops since last week; prices are stationary.
Manbhoom ...	*Nil*	Weather seasonable; very little to report regarding the crops; the few crops on the ground are doing well; the prospects of *mohwa* are promising; the same may be said of mango; some cases of small-pox in the town of Purulia and the district have occurred.
Singhbhoom ...	0·24	Weather seasonable; no change to report; the rain will do good to the mango crop.
Ba'asore ...	*Nil*	The late showers have been beneficial, and the few crops on the ground are in good condition; the malarial fever which has raged since September last is disappearing.
Cuttack ...	0·47	Weather warm and fine; the reaping of the *sarad* crop is nearly over; the *dalua* and mango crops promise well; public health is good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Pooree ...	*Nil*	Weather seasonable; the harvesting of the *sarad* rice crop is nigh completion; *dalua* rice is looking well; cotton, castor, and other miscellaneous crops are promising; common rice sells at 15½ to 21 seers for the rupee; a few cases of cholera have been reported. *General Remarks.*—The crops on the ground are generally promising, but rain is still wanted in places in Central and Eastern Bengal; some of the crops are being reaped with fair outturn; ploughing for the early crops has commenced, and indigo is being sown in Durbhunga, Mozufferpore, and Saran; in Mozufferpore the opium crop on the unirrigated tracts is likely to be very short; small-pox is reported from many districts and cholera from some, otherwise the public health is good.
N. W. P. and Oudh—(Mar. 5th).		
Benares (Mar. 4th)	...	Harvest begun; crops fair.
Allahabad („ „)	...	No change; weather very unsettled in appearance; high westerly winds.
Jhánsi („ 5th)	...	Irrigated crops good; dry crops poor; prices stationary.
Agra („ 4th)	*Nil*	Clouds dispersing; crops thriving.
Meerut („ 5th)	*Nil*	Prices lower; health good; *rabi* prospects improved; rain wanted.
Bareilly („ „)	...	No change.
Kumaun („ 1st)	Rain fell in parts on 21st ultimo.	Crops much benefited by late rain, but locusts have done damage in a few places.
Lucknow („ 5th)	...	No change; weather settled.
Fyzabad („ „)	Slight rain in part of district.	Wheat and barley harvest commenced.
Sitapur („ 5th)	*Nil*	High west winds. *General Remarks.*—Harvest begun in places; prospects unchanged.
Punjab—(Mar. 4th).		
Delhi ...	...	Prospects unfavourable for want of rain; but prices have fallen during the week; health fair.
Hissar ...	*Nil*	*Barani* crops fast drying up; slight fall generally in prices of food grains; health good.
Umballa ...	*Nil*	Crops and health good; but more rain wanted.
Jullundur ...	*Nil*	Prices steady; crops no worse; health good.
Amritsar ...	*Nil*	Crops doubtful; very slight fluctuations in prices of food grains.
Lahore ...	*Nil*	Health of district fair; rain much wanted.
Ráwalpindi ...	·7	Prospects improved; fever and cattle disease decreasing.
Mooltan ...	·1	
Dera Ismail Khan ...	Slight shower on 2nd.	Health good; crops fair; but more rain wanted.
Peshâwar ...	1·3	Prospects much improved; prices of food grains falling. *General Remarks.*—The harvest prospects have on the whole improved somewhat during the past fortnight and especially in the Frontier districts.
Central Provinces—(Mar 5th).		
Nimár ...	...	Prospects of *rabi* unchanged; cattle disease prevalent.
Hoshangabad ...	...	Cloudy; prospects fair; prices slightly fallen.
Betul ...	·30	*Rabi* gathering; sugarcane cutting finished; prices slightly risen.
Wardha ...	...	*Rabi* harvesting progressing; health good.
Nágpur (Mar. 5th)	1·2	*Rabi* harvesting and threshing continue; prices unchanged.
Chanda ...	·51	Cloudy; *rabi* harvesting and threshing; health good; prices slightly risen.
Chhindwára ...	·4	Rain beneficial to wheat; health good; prices steady.
Narsinghpur ...	...	*Rabi* crops satisfactory; fever prevalent; prices fallen.
Bhandára (Mar. 4th)	·06	*Jowar* threshing continues; *rabi* good, except pulses; health good; prices continue high.
Seoni ...	·80	Clear; cold; prices slighly fallen.
Balaghát ...	·73	Cloudy; prospects favourable; small-pox and fever continue; prices steady.
Mandla ...	·52	Prospects improved; prices stationary.
Saugor ...	...	Cloudy at times; *rabi* harvesting; prices stationary.
Damoh ...	·41	Rain beneficial to standing crops; prices stationary.
Jubbulpore ...	...	Cloudy and unfavourable to *rabi*; small pox continues; prices stationary.
Raipur ...	...	Cloudy and close; *rabi* promising; cholera and small-pox prevalent; prices fallen.
Biláspur (Mar. 1st)	...	Cloudy at times; *rabi* good, except gram, which has been injured in places; small-pox and measles prevalent; few cases of cholera.
Sambalpur (Feb. 28th)	Slight rain on 25th.	Gram ready for harvesting; cholera continues; prices stationary. *General Remarks.*—Cloudy at commencement of week, clear now; slight rain has fallen in 10 districts; *rabi* harvesting; prospects continue fair; cholera prevalent in Chhattisgarh division; prices stationary.
British Burma—(March 5th.)		
Arakan Division ...	...	Public health continues good.
Pegu Division—		
Rangoon ...	...	Eighteen fatal cases of small-pox in Rangoon town; public health good; no cattle disease reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Thonkwa ...	...	Small-pox reported in Phyapoon township; cholera in Pantanaw town; reaping completed.
Bassein ...	...	Health good; 6 deaths in Yeagyee township from cholera from 10th to 24th February; 59 cattle deaths in same township during same period.
Henzada ...	...	Public health excellent; slight cattle disease in Okpho and Canoung townships.
Tharrawaddy ...	...	Public health fair.
Prome ...	...	Public health good.
Thayetmyo ...	...	General health normal; small-pox in Thayetmyo, Meaday, and Kama.
Tenasserim Division—		
Amherst ...	...	Public health good; no cattle disease.
Shwegyeen ...	...	Public health fair.
Tounghoo ...	...	Two cases of small-pox, otherwise public health fair. *General Remarks.*—Health generally good; some small-pox and cholera; cattle disease continues in Bassein and slightly in Henzada.
Assam—		
Gauháti (Mar. 5th)	*Nil*	Weather unseasonably dry and hot; sowing of *asu dhan* commenced.
Sylhet („ „)	·43	The slight rain has done much good to the crops; more rain wanted; prices stationary.
Mysore and Coorg—(Mar. 5th)	Slight showers in the Bangalore, Hassan, and Shimoga districts.	No change in crops and prices; for week ending 22nd February gratuitously relieved in hospitals 383.
Hyderabad Assigned Districts—		
Amráoti (Mar. 5th)	...	*Rabi* reaping progressing; weather getting warmer.
Central India—(Mar. 5th).		
Indore ...	...	Crops thriving; opium gathering commenced in Rutlam.
Morar ...	...	
Sutna ...	...	
Rutlam ...	...	
Neemuch ...	...	
Agar ...	...	
Mánpur ...	...	
Goona ...	*Nil*	
Sirdarpore ...	·30	
Nowgong ...	·07	
Rajputana—(March 5th.)	During week ending 25th February—Abu—2·82, Harowtee—2·05 in Deoli, Ajmere—·97, Ulwur—·68 average throughout State.	Weather cloudy; fears of blight; prospects fair; prices stationary; health good.

SUPPLEMENT TO

The Gazette of India.

№ 11.] CALCUTTA, SATURDAY, MARCH 15, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

SILK OF THE TASAR WORM.

No. 1.

Extract from the Proceedings of the Government of India, in the Department of Revenue, Agriculture, and Commerce, dated Calcutta, the 28th February 1879.

[FIBRES AND SILK.]

Read the Resolution of the Government of India on the subject of the development of an industry in the silk of the tasar worm, No. 5—156-165, dated the 23rd November 1875.

Read the following papers containing such further information as has been gathered in connection with the production of tasar cocoons, and the processes of reeling and dyeing the silk in compliance with the request made in the foregoing Resolution:—

Letter from the Government of Madras, No. 662, dated the 13th February 1877, and enclosure.

Letters from the Government of Bombay, No. 113, dated the 11th January 1876, and enclosures, No. 1791, dated the 12th June 1877, and No. 1381, dated the 29th April 1878, and enclosure.

Letter from the Government of Bengal, No. 712, dated the 8th March 1877.

Letter to the Government of Bengal, No. 119, dated the 18th September 1878.

Letter from the Chief Commissioner of Oudh, No. 1094, dated the 28th March 1876.

Letter from the Government of the North-Western Provinces and Oudh, No. 2746A., dated the 27th November 1877, and enclosure.

Letters from the Government of the Punjab, No. 1287, dated the 6th November 1876, and enclosures, No. 266S., dated the 25th July 1877, and enclosure, and No. 438, dated the 20th April 1878, and enclosures.

Letters from the Chief Commissioner of the Central Provinces, No. 1185—19, dated the 29th March 1876 and No. 2417—98, dated the 28th June 1876, and enclosure.

Letter from the Chief Commissioner of British Burma, No. 320—14, dated the 28th October 1876.

Letter from the Chief Commissioner of Mysore, No. 9231—188G., dated the 23rd January 1878, and enclosures.

Letter from the Chief Commissioner of Assam, No. 256, dated the 9th February 1877.

Letter from the Resident at Hyderabad, No. 11, dated the 20th May 1876, and enclosures.

Read the following despatches from the Secretary of State, having reference to the experiments made under the instructions of Mr. T. Wardle of Leek, Staffordshire, with the tasar silk of India:—

No. 25 (Revenue), dated the 22nd March 1877, and enclosure.

No. 61 (Revenue), dated the 29th August 1878, and enclosures.

Read also two letters from M. Rondot, Delegate from the Chamber of Commerce of Lyons to the Paris Exhibition, and President of the Jury of Silk Industry, soliciting information connected with wild silks, including tasar, in India.

RESOLUTION.

In the Resolution of the 23rd November 1875, the Government of India stated the facts regarding the production of tasar silk so far as they were known to it, as well as the steps taken or under consideration in reference to the utilisation of this article and the development of a regular industry. The general conclusion which seemed to be justified by the information before it was that the domestication of the tasar worm offered no prospect of remuneration even if the process were in itself possible; but that if certain difficulties arising from natural conditions connected with the collection of the worm in its wild or in a semi-domesticated state could be overcome, and that if the silk could be satisfactorily reeled and dyed,—for difficulties had been encountered in connection with both processes,—a regular and extensive export trade from India to Europe, either in the shape of cocoons or as raw silk, would spring up; for it seemed certain that European manufacturers would take the raw produce if laid down at reasonable prices.

2. The first step to be taken, however, was to procure further information. It was obviously premature to take any measures having in view the creation of a regular industry without first obtaining definite information on important points on which information was wanting either wholly or in part. Such points were: the exact cost at which the raw material could be collected or produced in commercial quantities, both in the wild and semi-domesticated state; the cost of reeling the silk; the weight of silk in proportion to cocoon; the degree in which the filaments would bear *croissure*; and the consequent ultimate value of the silk in the market. As a first step towards the obtainment of such data, the Government of Bombay and the Chief Commissioner of the Central Provinces were requested to collect a quantity of cocoons in order that careful experiments might be made with them in this country, as also under the direction of Her Majesty's Secretary of State in some of the leading filatures in France and Italy. This was done, and the results of the experiments undertaken by Mr. Wardle under the direction of the Secretary of State with the cocoons thus supplied are now before the Government of India and are stated in his reports attached to this Resolution. No experiments were made in this country, the gentlemen to whom cocoons were supplied for the purpose having pronounced them to be old and unfit for reeling, especially in this country, where the special machinery and appliances required for this purpose are not available. This is of little consequence, however, considering the success of the experiments in Europe, and having regard to the fact that in all probability filatures in India for tasar silk will not be required, and that only a trade in cocoons will prove remunerative.

3. At the same time that these cocoons were collected in the Central Provinces, the other local Governments and Administrations were invited to make proposals and suggestions in the matter.

4. The result of the enquiries and experiments made in India has not, on the whole, advanced matters very far. In the Bombay Presidency the experiments undertaken by Major Coussmaker for the semi-domestication of the worm were interrupted by the drought and famine. They have since been renewed, but as yet with inconclusive results. These are stated in a letter from Major Coussmaker, from which the following paragraphs are extracted:—

* * * * * * * *

"2. My former experiments, as well as those conducted by Mr. Woodrow, had proved that it was a mistake to attempt to rear these worms on twigs, either those cut from road-side trees, or from those which had received some care and attention in a garden, and that the plan most likely to succeed was to feed them on shrubs in localities where they could be protected from their enemies, and, if need be, from unfavourable weather. With this view, I began to collect young plants.

"3. I had noticed in 1876 that the tasar worm throve well on *Lagerstræmia indica*, an ornamental shrub, fairly abundant in the cantonment of Poona; this is a plant which throws up a good many suckers during the monsoon, and I soon got a few plants together. I took a house which was well supplied with shade and water, and my gardener managed to collect 172 plants between December and July, many of them only a few inches high, but some were large enough to be of use. There were also in the ground six bushes, and my first care, when I came in from the districts, was to cut them all back to the hard wood, and apply to their roots a fair amount of manure. The consequence was that as soon as the rain commenced the plants shot most freely into leaf.

"4. Mr. Woodrow had not been able to save any seed cocoons, but I had found three female cocoons in the districts, and the Marathi woman, who had been my chief assistant in looking after these worms before, had collected twelve. I soon had several moths from these cocoons, and found, as I had noticed before, that there was no difficulty in getting an abundant supply of fertile eggs. Hardly any females were wasted; it was only necessary to put them out overnight on any bush, and it was almost a certainty to find them paired at daybreak. I found that it was not necessary to tether them; they rarely moved from the twig on which I placed them. As fast as the young worms hatched out, I put the trays containing them among the leaves of the plants and in a few hours they commenced feeding. The weather was everything I could desire, showery with a few breaks of fine weather; the bushes were full of young shoots, and the worms throve as I have never seen them thrive before. I tied bamboo screens together and covered over the plants as they stood in the open. The worms changed their skins at intervals of 4 to 5 days instead of 6 to 8, as had been the case when I reared them indoors on gathered food, and they spun their cocoons in 28 to 35 days instead of 40 to 50, as I had noted before. The moths came out of these cocoons in 27 to 30 days, and their eggs proved fertile, producing caterpillars which grew as fast and as large as the first. The only difference that I observed was that the 'cement' of the cocoons of the later crops was less uniformly white; this may have been due to the changes in the weather or the quality of the leaf, some shrubs having been eaten off three and four times this monsoon.

"5. The *Lagerstræmia* bush proved an excellent food; it flushed so quickly that a plant 2 feet high, after being fed off quite bare, cut back, and re-potted, was again in thick leaf in a fortnight, and the same batch of worms stripped it again. In changing the plants, and in daily examining the cages, a few accidents occurred; but 100 worms yielded 71 cocoons.

"6. I enclosed an old *Carissa carandas*, which had neither been pruned nor manured, with bamboo screens, and liberated 50 worms there. In the course of a month I gathered 31 cocoons, a little larger than those of the *Lagerstræmia*, but much harder and yellower. The caterpillars seemed to thrive a little better on this bush, and completely stripped it, but the tree did not recover quickly, and did not yield another supply of food the whole monsoon.

"7. I put six worms on to a young *Zizyphus jujuba* tree in my garden, but neither enclosed it, pruned it, nor manured it. It had a great deal of leaf and flower on it, and the worms ate both. They grew very large and healthy, being in every stage of their existence a little ahead of some of the same batch feeding on *Lagerstræmia*. Five cocoons were spun here, larger than any that I had gathered from off the other trees.

"8. I let the majority of the moths fly away, for as soon as the male has left her, the female is quite ready to go and look for suitable trees to deposit her eggs on. I had not enough food for more than 100 worms at a time in my own compound, and almost every attempt which I made at bringing them up elsewhere, unsheltered by the screens, failed. Crows, squirrels, and other enemies carried them off, and I hardly got a single cocoon; but in my own compound I continued to rear a few at a time, changing them from one tree to another as I found it expedient. The result of the experiments which I made showed me plainly that plants in the ground, with or without screens over them, gave the most suitable food; that it mattered not whether the young shoots were eaten down by the caterpillars or cut off by the pruning shears. The *Lagerstræmia* never sprouted again, and it was only the very limited supply of food which I had that prevented me rearing many more worms.

"9. From the single experiment I have mentioned, *Carissa* does not seem to recover quickly. *Zizyphus* seems to grow very fast, principally at the extremities of its long straggling branches; but as I only had one tree in my compound, I could not be sure about its usual habit of growth.

"10. I baked some of the cocoons gathered from each of these three trees and sent them home to Mr. Wardle, asking him to give me an opinion on the qualities of the respective fibres. I had all the burst and injured cocoons cleaned, and sent them, together with those which Mr. Woodrow had on hand, to the Alliance Mills in Bombay to be converted into yarn. I have kept some fifty seed cocoons for next year's experiments.

"11. I have got together a good many plants for next season's experiments—353 *Lagerstræmia indica*, 10 *Lagerstræmia parviflora*, 13 *Conocarpus latifolia*; plants and cuttings all rooted and in leaf: also 136 *Carissa carandas*, 135 *Zizyphus jujuba*, 105 *Pentaptera tomentosa*, seedlings. There are besides 3 *Zizyphus* bushes in the compound, and if my gardener will but take care of these during my eight months' absence from Poona, I hope to resume my experiments under better auspices.

"12. The past season has been very favourable for tasar worms. Mr. Lyle, who was cultivating them to a small extent at Dapuri in 1876, tells me that some of the men who were under him then came to him lately and asked him whether he wanted any more cocoons as they had seen several. He happened to be on the spot and sent a man to see how many he could collect within three hours. He came back with 300, and said that he had heard that some people had been taking them into Poona for sale, presumably to the native physicians. I myself have already found many more casually this year in the districts than I usually do."

* * * * * * * *

5. In Madras, in the North-Western Provinces and Oudh, in Burma, and in the Hyderabad Assigned Districts, as also in Mysore, there would seem at present to be no prospect of establishing any traffic in the cocoons or raw silk of the undomesticated worm.

6. The late Chief Commissioner of Assam thought that any attempt to foster the trade in Sylhet would prove unsuccessful, and refrained from offering any suggestions beyond drawing attention to the existing and old-established silk industries of Assam, which in his opinion might have opened up a wide field for private enterprise were it not for the extraordinary delays that exist in communications between the province and the rest of India. Government have under consideration the question of improving the facilities for communicating with Upper Assam. It is hoped that when the contemplated improvement is effected, Colonel Keatinge's expectations will to some extent be realised; for there is at least as great a demand in the European markets for the cocoon of the eria and moonga worm as there is for that of the tasar.

7. In Bengal the tasar worm appears to abound in various localities generally in all the tree and scrub jungle lying south and west of a line marking the southern and western limit of the continuous cultivation of the Gangetic alluvial and of the Orissa littoral. Whether the insect is of one or of several species, is a matter of doubt, and the season and mode of breeding and collecting appear to vary with the locality where it is found. The price of cocoons, it is alleged, ranges from Rs. 6 to Rs. 10 per kahan (1 kahan=16 pans of 80 cocoons each, *i.e.*, 1,280 cocoons); and in regard to its yield, one kahan makes in Bankurah two pairs of dhotis, in Sooree 15 chittacks of silk, and in the Sonthal Pergunnahs from 1½ to 2 seers. These and other more detailed particulars, furnished by the Government of Bengal, though admittedly incomplete and unauthenticated in some respects, are useful as far as they go, and the Government of India will be glad to be informed of the measures which are being taken to gather further particulars as well as of their results. The Lieutenant-Governor's opinion on the proposal made by Mr. J. Deveria, to the effect that the State should undertake the rearing of tasar cocoons in the jungle mahals of Chota Nagpore for sale to reelers and exporters is also awaited.

8. From the Punjab, some samples of tasar silk, reeled from cocoons produced in the Hoshiarpur district by the Deputy Commissioner, were reported on by the authorities whom the Government of India consulted as fairly successful. Some specimens of cloth, which were also received from Hoshiarpur, were found to have been very creditably manufactured.

9. The Secretary of State, in acknowledging in his despatch No. 25, dated the 22nd March 1877, the receipt of the cocoons gathered in the Central Provinces, has forwarded a report by Mr. T. Wardle, from which it appears that although the cocoons, when made over to the filatures in France and Italy, were found to be very old and imperfect, the reelers spoke most hopefully of the

results that might be attained with fresher cocoons properly gathered and prepared. Mr. Wardle, too, said that he was prepared to dye tasar silk as reeled in Europe by his improved processes in almost any colour, even to very pale shades.

10. The first part of a further report from Mr. Wardle has meanwhile been received under cover of the Secretary of State's despatch No. 61, dated the 29th August 1878; as also some samples of tasar silk displayed at the Paris Exhibition, as prepared under Mr. Wardle's instructions. These specimens, which can be seen at the office of this Department by persons interested in the matter, are far superior to anything ever yet seen of the same kind, the organzine especially being remarkable for its excellence. The grège is softer, cleaner, and altogether better than the best raw tasar silk as yet reeled. It is clear from these samples that such difficulties as existed in the reeling of this silk have been completely overcome. Mr. Wardle's process produces silk so fine as to be capable of adaptation to any purpose for which mulberry silk is used. Excellent results have also been obtained in the spinning of tasar thread and the weaving of fabrics from spun silk. Mr. Wardle's experiments with the dyeing of the silk have also been quite successful. On the whole it is certain now that there is no inherent obstacle to the utilisation of this silk for manufacturing purposes.

11. The main question now to be answered is that of cost. Whether silk of this kind will be extensively consumed, depends upon the price at which it can be placed in the market. Mr. Wardle states that the cost of making organzine and tram from the cocoons is 20 francs the kilogramme, *viz.*, 10 francs for reeling and 10 francs for throwing. This is double the price at which ordinary tasars are now sold, and it is not easy to say whether purchasers will be found for the improved product, greatly superior as it is, though it seems that the price is susceptible of reduction. As yet the only indication of the prices likely to be given for tasar silk is an offer made by M. David, a silk manufacturer of St. Etienne, who expresses his readiness to take one or two thousand kilogrammes of cocoons delivered at Marseilles at the price of one franc the kilogramme. This price, it is clear, is much too low, for, according to the information before the Government, cocoons could not profitably be laid down in Europe at less than three or four times the sum mentioned. This, however, is a matter which admits of local verification, and it should form the subject of enquiry.

12. The results obtained by Mr. Wardle, as well as by others working independently, are so important and so full of promise as regards the manufacture of this silk and the utilisation of the manufacture for apparel and other purposes, that it is eminently desirable to thoroughly investigate the question of production. Information on this subject has been sought from various quarters, but the information in the possession of Government is not sufficient to enable it to furnish precise answers, yet it is necessary, if the attention of capitalists is to be attracted to the development of this industry, that full information should be forthcoming. M. Natalis Rondot, a delegate from the Chamber of Commerce of Lyons to the Paris Exhibition, and President of the Jury in the Silk Section, has written to the Government of India, asking for information on the following points, not only as regards the tasar worm but also as regards other undomesticated worms:—

(1) an enumeration of the different kinds of wild worms;
(2) the districts from which each kind is obtained, and in what quantities;
(3) the species of worm from which each kind of silk is manufactured;
(4) the trees on which the worms feed;
(5) the uses to which the silk is put by the natives;
(6) the markets where they are to be purchased;
(7) the probable prices of dry cocoons of each kind and of the silk as reeled by the natives;
(8) the probable quantities retained for local consumption and available for exportation to European silk mills;

(9) and the outturn in money value of the silks woven in India, which M. Rondot thinks must be considerable, especially if tasar and other similar silks commonly worn by the natives are taken into account.

13. M. David, of St. Etienne, also asks for information on the following points:—

(1) the nature of the chemical agent used by natives to soften the cocoon;
(2) whether the natives can reel a cocoon more than a year old;
(3) the length of time elapsing from the spinning of the cocoon and the emergence of the moth;
(4) whether the dark and light coloured cocoons which are found mixed in the bales sent from India are of different varieties, and whether they are found in the same localities;
(5) also, whether it would be possible to obtain bales containing only light coloured cocoons.

14. Some information, but of a vague and general kind, exists on a good many of the points enumerated by M. Rondot, and the Governor General in Council desires that an effort may be made to cause such specific information as is obtainable, with special reference to the quantity obtainable and the prices on the spot, to be furnished with as little delay as possible. It is also much to be desired that particulars of manufacture should be obtained as far as possible.

The particulars of the outturn of the filatures in Bengal are unknown; for, though the quantities exported and their values are ascertainable, Government is unable to say how much of the outturn of the filatures (there are a great many native filatures) is kept in the country, or what it is worth. Of the small local native reeling (small separately, but large in the aggregate), no more is known than of the handloom village weaving of cotton. In Assam and Burma, silk reeling and weaving are a domestic occupation of the women of the house; in other provinces it is a trade. In Bombay, there are two mills worked by steam in which silk is woven, but the extent of their operations is unknown. In short, no precise statistical account of the silk industry in India is extant, though there is a good deal of information of a more or less vague and general character. As regards silk production, Mr. Geoghegan's account of silk in India contains practically all the information that Government possesses, although for some years past much attention has been paid to the production of tasar silk. The same is to be said of the other kinds of wild silk. These are all separately distinguished and shewn in Mr. Geoghegan's book, in the section given to the wild silk producers, as well as in the appendix by Captain Hutton. Interesting information, though in most cases of a general character, has been furnished by the local Governments and Administrations, but more precise information is now desirable, and the Government of India will be glad if the Government of Bengal and the Chief Commissioners of the Central Provinces and Assam will take measures to collect it, and furnish a report giving a categorical reply to the enquiries of both M. Rondot and M. David.

ORDER.—Ordered, that, for the purposes indicated above, a copy of the Resolution, of the despatch from the Secretary of State, No. 61, dated the 29th August 1878, and extracts from M. Rondot's letters, be forwarded to the Government of Bengal and to the Chief Commissioners of the Central Provinces and Assam; and also that they be forwarded to the Government of Bombay for communication to Major Coussmaker.

Ordered, that a copy of this Resolution, and of the despatch from the Secretary of State, No. 61, dated the 29th August 1878, be forwarded for information to the Governments and Administrations mentioned on the margin.

Madras.	British Burma.
North-Western Provinces and Oudh.	Mysore and Coorg.
Punjab.	Hyderabad.

Ordered, that this Resolution and the papers read in the preamble thereof be published for general information.

Resolution of the Government of India, No. 5—156-165, dated the 23rd November 1875.

For some years past the attention of Government and of private individuals has been given to the possible development of a profitable industry in the silk of the undomesticated silk-spinning worms of India, the most important of these being the tasar (*Antheræa Paphia* and other varieties).

2. The worm abounds in most forest tracts in India. Mr. Geoghegan (page 110 of his Account of Silk in India) says that it is found "in the Sub-Himalayan tracts almost throughout the extent of the range, through the hills from Assam to Chittagong, in the Sundarbans, everywhere in the great belt of hill and forest inhabited by the Santal, the Kol, the Khond, and the Gond, in the Western Ghâts, and in portions of the Madras Presidency." Captain Coussmaker says he has found it in the jungles between Tanna and Ankola (Bombay Presidency), a distance of 330 miles, and he has reared the worm successfully in the three districts of Satara, Kolhapur, and Dharwar. The worm also abounds in the tract between the Burrakur and the Soane (Bengal Presidency), a tract of country measuring 200 miles in length by 80 miles in width, and it is largely distributed in the districts of Gurdáspur and Siálkot and in the Jummoo territory.

3. Hitherto the worm has ordinarily been confined to the jungles, but Captain Coussmaker's and other experiments seem to prove that it is quite capable of domestication. Its habitat, however, is undoubtedly the jungle tracts, and owing to this and to the collection of the cocoons having hitherto been left entirely to certain classes of aboriginal tribes inhabiting the forests, there are no accurate data on which to found an estimate of the supply available. It seems clear, however, that even now the supply is more than equal to even a greatly increased demand, and that this supply is capable of indefinite extension.

4. At present there is practically no demand in the European market for this silk, except in the shape of fabrics prepared in this country, and for these the demand is limited. Whether it is possible to create a sufficiently large demand to remunerate outlay on the part of Government is a question which cannot yet be positively answered, but the probabilities are in favour of the creation of such a demand if certain difficulties hereafter to be described can be overcome.

5. In 1872 Captain Coussmaker, an Assistant Superintendent in the Bombay Revenue Survey, who had for some years given his attention to this matter, had some tasar silk reeled off and woven into fabrics, under his superintendence, in the Dharwar jail. Samples of these fabrics were sent by the Government of Bombay to the Government of India, and were sent by them for report to Calcutta, where the samples, especially a twilled kind, were much approved. In connection with the report on these samples, it was stated to the Government of India that certain difficulties connected with the reeling and dyeing of the silk which had hitherto operated to prevent the creation of a regular and extensive trade in tasar silk had recently been overcome in Italy. Copies of the papers were sent to the Governments of Bombay and Bengal and the Central Provinces for information. The Chief Commissioner of the Central Provinces having asked to be furnished with particulars of the processes of the reeling and dyeing said to have been discovered, Her Majesty's Secretary of State for India was requested in despatch No. 6, dated the 23rd June 1873, to cause enquiries to be made in England and the large centres of silk manufacture on the Continent, and to communicate the results. While this enquiry was being originated by the Government of India, Captain Coussmaker went on leave to England, proposing, with the concurrence of the Government of Bombay, to devote some time to enquiries into the subject.

6. A reply to the despatch to Her Majesty's Secretary of State has now been received, and the result of Captain Coussmaker's enquiries has also been embodied in a letter to the Government of Bombay, of which a copy has been

communicated to the Government of India. The outcome of the researches made is as follows:—

From the papers received from the Secretary of State it appears—

(i)—That a person at Lyons, unnamed, holding the position of chief chemist to the firm of Guinon and Picard, manufacturers of chemical products at Lyons, has discovered how to reel and dye tasar silk. The reeling process, he states, is thoroughly inexpensive. He has submitted samples of the results of his process to Mr. Haden, British Vice-Consul at Lyons, and this gentleman pronounces them to be "really remarkable," adding that "he has reason to believe that if experiments carried on under inspection resulted in similar success, the Government of India would possess the information it desires." The dyeing process the inventor declares to be absolutely successful, "except as to one point which he thinks could be satisfactorily dealt with." The inventor has patented his processes in France, and would require similar protection in Italy, Great Britain, and India before doing anything for the Government of India. He declines to come to India, and he expects a fixed sum (not stated) for communicating and practically demonstrating all he knows about the matter.

(ii)—The Vice-Consul at Lyons has also been in communication with a person named Chalon, a worker in velvet at Beaurepaire in the Department of the Isére, who professes that he can reel off a thread a thousand métres (nearly 1,100 yards) in length from the unpierced cocoon. This person also requires a fixed sum before imparting the secret of his process. The Vice-Consul adds that this is probably the process to which the Government of India referred in its letter to the Secretary of State.

(iii)—The Consul at Genoa has been in communication with, amongst others, Mr. Mylins, a silk manufacturer at Buffalora, who has tried experiments in a small way, but without much success. He says, however, that no serious trials have yet been made with tasar, and expresses his willingness if the Government of India will send him a parcel of cocoons to make a series of experiments with them. The Consul says that Mr. Mylins' standing and reputation are unexceptionable and his works on a large scale.

(iv)—The Consul has also heard of an invention patented jointly by Mr. Gaddum of Latour and Mr. Bosshardt of Turin for carding the silk produced from difficult cocoons. It appears that tasar cocoons have been successfully treated by this process.

(v)—Mr. Thomas Wardle, a silk dyer of great experience, states that he has discovered a way of dyeing tasar silk in brilliant colours and of giving it the lustre of Chinese silk. Mr. Wardle is ready to continue his experiments and also to teach his process to natives of India. It is not stated whether this gentleman is ready to come to India and on what terms, but the Secretary of State has asked to be furnished with samples of dye-stuffs, and of tasar and other wild silks, so that Mr. Wardle may be in a position to continue his experiments. Local Governments have been asked to supply these samples.

7. Captain Coussmaker's enquiries in regard to reeling in England have been unsuccessful. Messrs. Mason and Company, silk spinners, have bought this and other wild silks as "waste" and have carded it, and Messrs. Lister and Company of Bradford are ready to take a large supply of pierced cocoons for the same purpose, converting them into spun silk, but no English manufacturers seem to have attempted or to be disposed to attempt the reeling of the unpierced cocoon. But Captain Coussmaker succeeded, by the good offices of Chevalier G. Jervis, Conservator of the Royal Industrial Museum at Turin, in inducing an Italian spinner to try experiments, with the result that the silk can, it is stated, be reeled at a cost of something over £2 per cwt. of cocoons. If this is actually the case, the rate is extremely low, but there is probably some mistake in the figures. The firm, which is not named, say that the reeling can be done much cheaper eventually after perfection of the process and adaptation of the machinery to this particular kind of silk. The specimens thus reeled were valued in London at from 1*s*. to 2*s*. per lb. more than the

samples reeled at Dharwar by Captain Coussmaker, and these were in Calcutta thought very good, and in London were considered equal to anything of the kind sent from India and China.

8. In addition to the results thus obtained, reference has been made direct to the Government of India by Mr. Jules Deveria of Rampore Baulea, who states that he has discovered a process of reeling tasar in an ordinary filature. The sample of the skein of the silk which he reeled under this process was not entirely successful, and a report obtained on it by the Bengal Chamber of Commerce was unfavourable.

9. With the preliminary information thus obtained, the Government of India is in a position to consider what should be the next steps to be taken in view to the development of a new industry, which may perhaps take to some extent the place of the trade in the manufacture of silk from domesticated worms. This latter industry, of which Bengal is the principal seat, is in a languishing condition and seems indeed doomed to gradual but inevitable decay. Even, however, if the Bengal silk trade were to revive and again assume the flourishing position it once held, it is quite clear that in an almost purely agricultural country like India the introduction of new manufacturing industries is desirable, and that it is of great importance to find external and internal markets for produce of which India possesses a monopoly, but which is not now utilised.

10. In stimulating the production of tasar silk, the State may aim at supplying either the local or the European markets with manufactured silk or at creating an export trade in the raw material with Europe. But before any great step in this direction can be taken, it is necessary to make further cautious and preliminary detailed enquiries, for besides the two difficulties already mentioned, both of which will probably soon be overcome, there are still others, of a somewhat more formidable character, perhaps, which tend to leave in doubt the question whether the silk of the tasar worm may be profitably employed on a large scale.

11. The two great obstacles to which attention has hitherto been directed are:—

1st.—Defective reeling in connection with the difficulty of properly dissolving the natural gum exuded in spinning by the worm.

2nd.—Difficulties in dyeing.

As regards the first, owing to the defective way in which the silk is reeled, the thread is not continuous and retains more or less of the peculiar cement (compared to plaster of Paris by Captain Coussmaker) which the worm exudes, the presence of this cement detracting from the appearance of the fibre, rendering it unfit for fine fabrics, and preventing it from taking fine colours. It has, however, it is understood, been proved by actual experiments made within the last year, that by the use of a simple alkaline solvent and by keeping the basins of water in which the cocoons are plunged when being reeled off at a temperature of about 200° Fahr., or a little higher, all difficulties of reeling, so far as the mere unwinding of the silk is concerned, disappear.

In respect to the second, there seems to be little doubt that no real effort to dye the silk has been thoroughly made, and that if attention were turned to the subject by competent persons the difficulties in question could easily be overcome.

12. The other and more serious difficulties which will require to be overcome appear to be: *1st*, the manner in which the cocoons are naturally distributed. It is true that the supply is inexhaustible, but owing to its distribution over a vast area, a thousand square miles will, in the natural condition of things, seldom probably yield as many cocoons as a single hamlet in Italy produces of the domesticated worm, and although the cocoons can be obtained for nothing, yet, as the search for them has to be made over enormous areas, if large quantities, such as a filature would require, are to be obtained (and it is only during one brief period of the year when the trees the *Antheræa* chiefly haunt are shedding their foliage that any successful search can be made), it appears doubtful whether, under these conditions, the wild cocoons would not cost more than cocoons obtained from domesticated worms.

13. It is true that the tasar worm can be entirely domesticated, but if regularly domesticated like the *Bombyx mori*, the produce obtained would perhaps be more costly than that of the *B. mori*, inasmuch as many more worms would be required to produce an equal value of silk, and if the manufacture of silk from the *Bombyx* worm is not remunerative, as seems sufficiently proved by the state of the industry in Bengal, *à fortiori* the tasar worm will not yield any profit.

14. Again, the tasar may be half domesticated, a certain number of moths being kept for laying purposes yearly, the eggs hatched, and the young worms turned out to feed themselves, thus avoiding the heavy expense (especially during the later stages) of constantly supplying fresh leaves to the worms; but here also it appears doubtful how far it will be possible to concentrate the worms or protect them from birds or other enemies if they are at all abnormally numerous on any group of trees. Under these circumstances it appears probable that it is only in a nearly wild condition that the tasar can prove remunerative.

15. The second difficulty (which is even greater than the first) depends upon an inherent defect in the filaments spun by the worm. It must be remembered that the thread of the tasar silkworm is spun from a double spinnaret, and that these filaments are not parallel, lying close side by side, but are spirals touching each other only at the exterior points of their curves, but united by the natural gum in and with which they are exuded, and it is on this spirality that the elasticity of the silk depends. Now, in reeling the silk, it is necessary that the spirals should be ground well into each other so as to form an even round thread, but it is doubtful whether the filaments can be brought to bear the amount of *croissure* necessary to produce the round thread, and without this it will be impossible to provide an article of export which will be acceptable in a European market.

16. Granting that this difficulty may be surmounted, it appears certain that it can only be done under skilled European supervision, aided by the best mechanical appliances in properly appointed filatures. It will be hopeless to expect that such reeling as is required to fit tasar for manufacture into superior fabrics for the European market can be done by natives working in their own homes. If success is to be expected in the manufacture of tasar silk, the operations of villagers must be confined to the production or collection of the cocoons. The reeling processes, if manufacture is to be attempted at all in India, must be carried out in properly organised filatures, possessing means and appliances, machinery and systematic supervision, such as are wholly unattainable by villagers in their own homes. Thus, for the proper reeling of tasar, where the basins must be kept at a heat of from 200° to 205° Fahr., nothing but steam can keep them uninterruptedly at precisely that temperature which is essential not only to enable the silk to unwind, but to keep the gum still retained by the filaments at just such a temperature when they reach the *croissure* as to be soft and yielding, but not so soft as to be worked out.

17. The conditions of successful manufacture being such, there does not appear to be any prospect of reviving the reeling of silk as a village industry, whether the silk is produced for local consumption or export. Under no circumstances would there appear to be any reasonable prospect of any proximate material enlargement of the local demand. If, therefore, anything is to be done for the country in silk, whether for the domesticated or the tasar worm, it must, it seems to the Government of India, be in the way of increased exports, either in the shape of cocoons or as raw silk so reeled as to be acceptable to the European purchaser.

18. In regard to tasar, many of the most important data necessary towards forming a satisfactory conclusion in the matter are altogether wanting, and the Government of India are of opinion that the subject should be systematically investigated, so as to set at rest all doubts which now exist.

19. Towards the attainment of this end, the first thing in regard to which it is requisite to obtain definite information, is the exact cost at which the raw material can be collected or produced in commercial quantities, both in its wild and semi-domesticated state. The next points on which further information

is requisite are the cost of reeling off the silk, the amount of silk there is in proportion to cocoon; the degree in which the filaments will bear *croissure*, and the consequent ultimate value of the silk in the market.

20. With this object in view, the Government of Bombay and the Chief Commissioner of the Central Provinces will be asked to collect cocoons in order that careful experiments may be made with them in some of the leading filatures in this country, and also under the direction of Her Majesty's Secretary of State in some of the leading filatures in France and Italy. Careful and full reports on all the points noted above will be asked for, and all reasonable expenses incurred in these experiments will be re-imbursed. The Secretary of State will be asked to have experiments efficiently carried out to test the dyeing capacities of this silk, the material furnished from the experiments to be made in the filatures in France and Italy being used for the purpose. His Lordship will also be asked to cause experiments in carding to be undertaken with pierced cocoons.

From the Government of Madras, to the Government of India, No. 662, dated the 13th February 1877.

Referring to the Resolution of the Government of India, No. 5—156-165, dated 23rd November 1875, on the development of an industry in the silk of the tasar worm, &c., I am now directed by the Governor in Council to submit copy of the Proceedings of the Board of Revenue, No. 309, dated 26th January ultimo, and to state that His Grace concurs in the opinion at which the Board have arrived after communication with the Collectors and the Superintendent of the Museum at Madras, that a traffic in the cocoons or raw silk of the undomesticated worm is never likely to be established in this Presidency.

ENCLOSURE TO FOREGOING LETTER.

Proceedings of the Board of Revenue, Madras, No. 309, dated 26th January 1877.

In their Resolution embodied in G. O., dated 10th January 1876, No. 27, the Government of India review the steps which have been taken towards the development of a profitable industry in the silk of the undomesticated silk-spinning worms of India, and, after noticing the progress made in solving the two great difficulties to which attention has hitherto been chiefly directed, *viz.*, the defective reeling and dyeing of the silk, proceed to point out that there are other and more serious obstacles to be overcome: firstly, the cost of collecting the cocoons of the undomesticated worm, owing to the vast area over which they are distributed; and, secondly, the impracticability of attempting such reeling as is required to fit tasar for the European market without skilled European supervision and the best mechanical appliances owing to certain peculiarities of the filaments spun by the worm. It was remarked that the conditions of successful manufacture are such as to prevent the reeling of silk being carried on as a village industry, and that, if anything is to be done for the country, it must be in the way of increased exports either of cocoons or the raw silk. Information concerning the cost of collection of cocoons, reeling, &c., being deficient in regard to tasar, the Government of India directed careful experiments and enquiries to be made with a view to a settlement of the doubtful points, and the Board were called upon for any suggestions they might have to offer. No information being available in the Board's Office, Collectors were requested to enquire and report as to the existence of tasar and other undomesticated silk-worms in their districts, and as to whether the raw material is utilized locally, with particulars of quality, cost of production, &c.

2. From the foregoing replies, it appears that the tasar silk-worm exists in most of the districts in the Presidency, but is nowhere very abundant. In Ganjam it is found in the Maliah tracts, but the only use to which the silk is put is as ligatures to fasten barrels of match-locks to the stocks and in the construction of arrows, for which purpose it is prized by the hill-men on account of its strength; the price is stated to be 8 annas a hundred. The cocoons do not appear to be collected for the manufacture of fabrics, as the raw material is imported from the Central Provinces and Bengal into Berhampore for the weaving which is carried on there.

Mr. Goodrich reports that the tasar worm is found in the extreme north-west of Jeypore and in the adjacent district of Bustar.; that the cocoons are collected to a certain extent, but are sent northwards to be reeled. He mentions having seen the cocoon in great abundance in Kalahandy, whence the cocoons are sent to Sonepore on the Mahanadi. The price of the best tasar silk cloth at Sonepore is stated to be a rupee a yard, the width being a yard and a half. The only portion of the Kistna district in which the tasar silk-worm is found is the Vissanapett division, but the use and value of the silk is not understood. The Deputy Tahsildar states, however, that in the Nizam's dominions, adjoining the Kistna district, considerable attention is paid to the breeding of the worm, and the process of reeling is reported to be understood. The worm is also found to a limited extent in all the other districts, except the Godavery, Bellary, Chingleput, Tanjore, Tinnevelly, Trichinopoly, Nilgiri, and Salem districts, but it appears to be confined to a few scattered villages and to be generally scarce. No mention is made of the cocoons being utilised except in the Kadiri taluq of Cuddapah, and in the Head Assistant Collector's division of North Arcot. The manufacture of silk from the domesticated worm at Kadiri is stated to have been discontinued of recent years, owing to the mulberry trees having died; but in former days, when the industry was in a more thriving condition, it appears that cocoons of undomesticated species were collected and attention paid to breeding from them. In North Arcot it is stated that no attempt is made to reel off the silk, but the filaments are torn to pieces and then subjected to a process, which the Collector terms "flipping," like cotton, *i.e.*, beaten with a bow, it is presumed, after which the silk is spun into thread and used in the manufacture of coarse cloth. The Collector of Salem reports that silk-reeling was formerly carried on in the Oossoor taluq, but has been discontinued, owing to the want of success experienced. The Collector of Coimbatore considers that the difficulties in the way of collecting the cocoons of the wild species at the exact period, when they are fit for use, and in protecting the worms in a semi-wild state from destruction, are insuperable. Mr. Thomas draws attention to the utilisation of the tasar worm in the manufacture of catgut for fishing, and suggests the advisability of encouraging the manufacture of this article as a means of employing women and children and the aged and infirm. The practical question is, as he observes, whether there is any probability of a sufficient market being found for such a product, and in the absence of statistics no conclusion can be arrived at on this point.

3. From Dr. Bidie's report it appears that there are only three important species of undomesticated silk-producing moths in Southern India, of which coloured plates have been furnished. Dr. Bidie states that the tasar moth is very generally distributed over the Presidency, but is nowhere very abundant, and the cocoons are not sufficiently abundant to repay the cost of collecting. On a microscopic examination of the filaments taken direct from the tasar cocoon, however, he has failed to detect any such quality in structure as is mentioned in paragraph 15 of the resolution of the Government of India; a representation of the filament is given in Plate I. The second species mentioned, *viz.*, *Actias Selene*, is less common than the tasar; and the third is not found in this Presidency, but is common in Coorg. Dr. Bidie understands that the silk of the former has been reeled at Pondicherry, but considers that that of the latter could never be turned to any practical purpose. The specimens of cocoons received from the districts were sent to Dr. Bidie for examination. In reply, he states that the cocoons received from Cuddapah, Kistna, Nellore, and Madura are those of the common tasar of fair quality, but rather small, those from North Arcot and Kurnool rather coarse, those from Ganjam and Vizagapatam large, dark in colour, with much glutinous matter; the single cocoon sent from Malabar is dark and imperfect. He adds that the cocoons forwarded from Ganjam and Vizagapatam, which differ considerably from those sent from other districts, may be the product of the common tasar, the extra size and dark colour being due to food and climatic peculiarities, or they may be the product of other species. Specimens of the moth are required to decide the point; the Collectors of Ganjam, Vizagapatam, and Malabar will be requested to procure them for further investigation.

4. From the information now furnished, it is clear that a traffic in the cocoons or raw silk of the undomesticated worm is never likely to be established in this Presidency. The papers will be submitted for the information of Government.

From the Government of Bombay, to the Government of India, No. 113, dated 11th January 1876.

With reference to your letter No. 154, dated 23rd November last, I am directed by His Excellency the Governor in Council to forward herewith copy of an interesting report by Captain G. Coussmaker, Assistant Superintendent, Revenue Survey, Southern Mahratta Country, No. 3, dated the 20th December following, and to state that, as pointed out therein, the tasar silk industry being still in its infancy, this Government are not yet able to supply the information called for in your letter under acknowledgment.

ENCLOSURE TO FOREGOING LETTER.

From CAPTAIN G. COUSSMAKER, *to the Government of Bombay, No. 3, dated 20th December 1875.*

I have to acknowledge the receipt of your memorandum No. 3666 of 9th instant, calling upon me for any remarks which I might have to offer as to the manner in which the requests contained in the letter No. 154, dated 23rd November last, from A. O. Hume, Esq., C.B., Secretary to Government of India, in the Department of Revenue, Agriculture, and Commerce, could best be complied with.

2. In the above-mentioned letter, No. 154, the Government of India calls upon this Presidency to supply 10 maunds of wild cocoons and 10 maunds of semi-domesticated cocoons of *Antheræa Paphia* with the two-fold view of testing their quality and of estimating the cost of their production.

3. I am afraid that this Presidency will not be in a condition to comply with these demands for some time yet to come, certainly not this year of 1875-76. Not that I think that there will be any ultimate difficulty in producing this supply and much greater, but at present we have only just begun to teach our natives to collect, and until they are thoroughly aware of the fact that these cocoons are marketable, we cannot expect them to devote much time to search for them.

4. On 4th September in the present year, after the foliage had become fully developed and consequently the cocoons were hard to find, this Government sanctioned my attempt to carry out the scheme, by which I hope to stimulate the collection, and placed a sum of money for that purpose at my disposal. In accordance with this permission, I have had circulars drawn up in English, Mahratti, Canarese, and Guzarathi (I believe, but I have not yet heard from the officer to whom I entrusted the translation). I have also had a most excellent photograph taken, life-size, shewing the insect in all its stages. These circulars I have distributed among the officials of the Forest and Revenue Departments, asking them to give all possible publicity to the facts therein detailed. In these circulars I have given a description of the insect and its habits, with a few suggestions regarding the mode of collection. I have also offered a liberal price for the cocoons and arranged to take them over from the villagers in whatever way may be most convenient to them, and with this view I have lodged sundry small sums of money with various officials, and I am glad to be able to state that one and all have cordially offered to co-operate.

5. I send a copy of my circular; the photograph and a coloured copy of the same I have already forwarded to Government.

6. I propose, in furtherance of my scheme, to sort the cocoons when I collect them; to clean those which are pierced; to destroy the life in those which contain chrysalids; and to put by a certain proportion for breeding purposes, my idea being in future to depend upon three sources of supply, *viz.*, those gathered wild in the jungles, those collected at different stages of their existence and brought up upon trees in the immediate neighbourhood of the cultivators, and lastly, those hatched out and reared under supervision either upon twigs under a roof or on small bushes easily watched over. I do not commit myself to the advocacy of any one of these methods in particular, but I think that they should all be tried. Next year I propose to issue instructions

relative to semi-domestication; this year I have simply proposed gathering, and have, with the object of giving a great and marked stimulus to the industry, offered a price above the ordinary market rate. I shall not offer so much in future, but when I shall have found out where the greatest supply is obtainable, I will then use every means in my power to instruct the producers how to increase their stock with little trouble and at little expense. Granted the supply, the next step is to find out how best to prepare the cocoons for the market.

7. With this view, as soon as I was assured of the substantial support of Government in this matter, I wrote to Chevalier Jervis at Turin, who had kindly offered to reel the uninjured cocoons for me, and to the Messrs. Satterthwaite at Lancaster, who had similarly undertaken to work up pierced cocoons, and, informing them that I had now begun to collect cocoons in large quantities, asked for instructions as to how I should treat the cocoons when I got them preparatory to shipment.

8. For, besides the defects pointed out as inherent in ordinary tasar silk by Mr. Hume, I may mention that there is another on which I have heard the manufacturers in England lay great stress, *viz.*, the bad smell that it possesses. From enquiries which I have made, I have reason to believe that this is simply owing to the fact that the chrysalids are not desiccated before coming into the hands of the reelers, and therefore when these latter work up the cocoons, the fibre is mixed with putrid and decaying insects. The desiccation of the cocoons is a point to which I mean to pay attention.

9. In June 1871, Mr. Colnaghi, Her Majesty's Consul at Turin, reported to the Secretary of State the method by which Professor Castrogiovanni destroyed the chrysalids of *Bombyx mori*; and this seems to me so simple that I am intending to prepare my cocoons for the manufacturers in a similar way, but I must first ensure a steady supply.

10. I have entered thus fully into the subject that Government may see how difficult it is for me to promise to supply the amount of cocoons required in letter No. 154 of the Government of India. It would be almost suicidal if we were to part with any quantity before we had seen a promise of a supply for the future; it would be impossible to base any calculations on the supply collected this year under an artificial stimulus. I therefore respectfully beg to suggest that the Government of India be informed that this Presidency having only just begun to devote its attention to the tasar silk industry, is not yet able to state with any degree of certainty how soon it can provide the twenty maunds called for; but as soon as it can do so without detriment to the above-mentioned trade, it will do so.

11. I may add that it is my intention, after the silk shall have been worked up in Italy and England, to submit the specimens to our Bombay mill-owners, some of whom have already commenced to correspond with me on the subject; and I believe that when their attention is directed in earnest to the matter, their enterprise will prompt them to take measures to foster the cultivation of the tasar worm, and we shall then see this industry established on the firm basis of the mutual self-interest of the producer and consumer.

Circular from CAPTAIN G. COUSSMAKER, *to the Mamledars, Forest Officers, and other Officials.*

In many places in your districts, especially those where the Aien or Mutti, the Bher or Bori, the Kurunda, the Nandrook or Pimproon, and the Kala Koor or Lendee trees are found, a caterpillar feeds on the leaves of these trees and makes cocoons, from which a kind of silk called tasar is made. This is not very fine but is very strong, and, if carefully prepared, could be made very useful, and the collection of it would be the means of livelihood to many thousands of poor people. I have for many years made enquiries regarding this business, and now Government has ordered me to take steps to spread this knowledge and to see whether we in our Presidency cannot carry on this trade as well as the Gonds and Sonthals of Central India. The history of this insect is of this wise: about the end of May or beginning of June, a moth issues from these cocoons and lays its eggs, looking somewhat like small, flat grains of jowaree on the leaves of the trees; after a few days a small dark worm comes out, which feeds upon the leaves and, growing very quickly, becomes first yellow, with black rings and spots, and afterwards green, with

beautiful small blue gold and reddish spots upon it, and sometimes besides three or four spots like silver on its side. It continues to grow till it is as big as a man's finger, and then putting two or three leaves together it makes this cocoon or house for itself, which is all made of separate threads strong enough for every purpose, like cotton. There are two crops of these cocoons in the year: the moths come out first in May, June, and July, then the caterpillars live for fifty days and make their cocoons; from these the moths come out in August, September, and October, and the caterpillars, which are their young ones, make cocoons again in October, November, and Decemher; and then as the cold weather, and after that the hot weather, comes on, the insects inside remain asleep till the rains come again, when the leaves are nice and fresh and afford good food for their young ones. I have sent a picture of the moths, caterpillars, and cocoons, which I have raised in my own house on the Nandrook, to the Collector of your zilla, and have asked him to let everybody who likes to go to his office see it. I have also sent cocoons, whole and burst, to the Collector and asked him to send them with this letter to you. Do you now call for wood-cutters, shepherds, and men who often go into the woods, get some one to read this letter to them, and shew them the cocoons and inform them that if they will get cocoons I will send money to them and buy as many as ever they get. I want cocoons of all kinds; those that are new, heavy, and whole as well as those that are old, burst, stained, light, gnawed, or cut; all will come in to use, but of course the first kind are the most valuable. I will pay whatever price you put upon them, but I do not think that it should exceed eight annas per 100 for heavy new ones, and four annas per 100 for injured and light ones. I leave you, however, to fix the price, which should be according to the facility of procuring them. As this is the first year, a little extra price might be paid, but I expect in a short time men will collect them for six and three annas per 100. At this time of the year the caterpillars will be found feeding in great numbers on the trees I mentioned, and the men should look for them so that they may know where to look for the cocoons in two months' time. If they have trees of this kind near their own houses they can cut off twigs with the caterpillars hanging to them (the caterpillars being very delicate should not be touched), and fasten the twigs on to their trees and leave them; the caterpillars will climb up of their own accord, and after a time will make their cocoons. Thus, after a very short time, the men will recognize these caterpillars wherever they see them, and then they will easily find the cocoons. When these caterpillars eat, they devour one leaf after another, leaving the twigs bare, and as they do not move much, the ground underneath becomes strewn with their dung, which is at the last as big as that of a sheep, only very rough and deeply grooved. When the men find the cocoons, they should take them carefully off the trees, and tie all that are good and heavy on to strings, which they should put away (say hanging from the rafters of the house) safe out of the reach of rats and squirrels, and, if possible, ants as well; for all these eat the insects. As regards payments, do you pay for them this one year, let me know every two months what progress is being made, and I will send a man up to receive and pay for them at your office or the villages according to the rates you fix and the quality of the cocoons, and my man will bring them away to me. No one shall be compelled to leave his own village unless he has any complaint to make to me, or is dissatisfied at the valuation made by my man.

From MAJOR COUSSMAKER, *to the Government of Bombay, No. 1, dated 5th February 1877.*

* * * * * * * *

"4. With reference to the sum spent on collecting and forwarding cocoons (Rs. 216-6-11), I received through the Forest and Revenue Departments, to whom the above-mentioned circular were sent, 46,016 cocoons, for which they paid Rs. 164-1-3. These were sent to me by rail, by banghy, by return cart, and by coolies, and the expenditure on carriage of these cocoons, as well as of 8,900 sent by one of my own men from Chiplun in Ratnagiri to Bombay by boat and thence to Poona by rail, amounted to Rs. 52-5-8. The rest of my men brought in their

own collections, coming to me at regular intervals with their reports. The before-mentioned 46,016 cocoons were collected as below :—

Collectorate.	Taluka.	In detail above 1,000.	Remarks.
Kolaba	Mangaon	2,798	
Do.	Chiplun	2,068	
Ratnagiri...	Dapoli	2,397	
Do.	Ratnagiri	1,626	
Do.	Deogarh	1,275	Collected by mamlatdars and officials of the Revenue Department.
Do.	Khed	2,912	
Tanna	Dahanu	1,136	
From other talukas of Kolaba, Tanna, Poona, and Satara		3,956	
	Total ...	18,168	
Kolaba	Mangaon	4,850	
Tanna	Kalyan	2,100	
Do.	Dahanu	1,779	
Do.	Shahapur	1,111	Collected by the Deputy Conservators and other officials of the Forest Department.
Do.	Mahim	1,066	
Forest Department in Gujarat ...	... ...	3,860	
Ditto in Khandesh ...	... ...	2,300	
From other Forest Officers in Tanna, Ratnagiri, Poona, and Satara ...		10,782	
	Total ...	27,848	

The greatest amount of these cocoons were obtained from the jungles of the Konkan; and as from thence to the Bombay market the carriage by boat and by rail is both easy and inexpensive, it may be presumed that, eventually, in this part of the country, the cultivation of the tasar silk-worm will become a permanent industry.

"5. I have mentioned in the preceding paragraph that one of my men in Ratnagiri collected 8,900; the other men in the vicinity of Poona collected 7,300, which, with the collections above detailed, make the total amount collected during the year 62,216, all gathered from the trees in hilly tracts of country. The trees on which they were principally found were, in the Konkan, *Zizyphus jujuba*, and *Zizyphus xylopyra*, *Pentaptera tomentosa*: *Bauhinia parviflora*, *Carissa carandas*, and *Celastrus montana*. In the districts of Poona, Satara, Gujarat, and Khandesh on these trees, and also on *Ficus Benjaminia* and *Ficus Tjiela*, *Conocarpus latifolia* and *Lagerstræmia parviflora*. I heard that in the Panch Mahals they were also found on *Chloroxylon Swietenia*. In the Konkan the men who collected them were Mussulmans, Mhars, and Mahrattas, more especially Katkarees, Kolies, Kunbees, Warlees, and Thakurs: men who from February to May are in the habit of cutting branches off the forest trees and spreading them, on their fields, then, placing upon these straw and manure, they weigh the whole down with a few clods of earth and set fire to it, thus applying a top dressing of ashes to their land.

6. The sum of Rs. 497-10-4 was paid for house-rent and to the people whom I employed to collect,—three men working in the neighbourhood of Poona and one man in the Konkan,—to the silk-worm tenders and other labourers. It was expended during the fifteen months under review. The monthly payments varied according to the work I found for the people to do. I tried men, women, and boys; these latter I did not find attentive enough, but the women were careful, handled the worms tenderly, and in doors were much more useful and reliable than the men, who, however, were found necessary, as leaves and twigs had to be cut and brought in from a distance; worms were looked after on the neighbouring hills and in the kooruns, and the peons also went round to the villages and collected cocoons, purchasing them from the ryots. I had a detached office building in my compound repaired, and their, and in some of the rooms of my house in the verandah, and in cages suspended from branches of the trees, I attempted to rear the worms; but, I regret to say, I failed, through the scarcity of suitable food.

7. The item Rs. 123-13-9 was expended on the construction of cages and feeding trays, some of which I suspended from the rafters of the rooms, from hooks, and from trees; others were fastened to uprights driven into the ground. In this way with wire and string-netting and with bamboo chicks, I succeeded in restraining the wandering propensities of the caterpillars, and in protecting them from their enemies; but the food failing, batch after batch died from starvation.

8. Having thus briefly accounted for my expenditure of the public money, I now propose to detail my experiments and to record my observations. Throughout the whole of the time, between the middle of August 1875 and the end of October 1876, I was hardly ever without moths; for the gathering of the cocoons from the trees, and the moving them about, shutting up in the baskets and bags, and generally disturbing them, had the effect of exciting them and caused the moths to come out repeatedly during the months of February and March. I had

upwards of 100 moths out a night, and whenever a fresh batch of seed cocoons arrived, whatever the temperature or the time of year, moths came out in large quantities. The first supplies from the district officials arrived in February, and consisted of both full and empty cocoons packed in baskets and bags. It was not easy to find out, on arrival, how many full cocoons had been sent and how many burst; for, as I have already mentioned, the shaking had so disturbed them that the consignments were found to contain many moths more or less damaged. I therefore had them all moved out on to open trays and put into a spare room. I kept a monthly record, as below, showing what moths came out, how many females paired, and after the 14th April the number of worms hatched :—

Month.	Males.	Females.	Paired.	Worms hatched.
February from 10th to 29th	355	419	48	No record kept.
March	1,126	1,217	399	.....
April	578	636	289	20,770
May	530	557	115	14,781
June	504	523	424	38,579
July	430	443	372	43,097
August	423	320	309	45,854
September from 1st to 10th	142	120	89	7,553
Total ...	4,097	4,235	2,045	170,634

9. Before the supplies from the districts came in, my men had only gathered in the neighbourhood some 300 cocoons, and these and the moths that came out of them, as well as the caterpillars which were hatched, were mostly sacrificed in experiments; and the result was, that I confirmed my former theory that the males require more liberty than the females, that these latter rarely move away from their empty cocoons, or from the twigs on to which they crawl when their wings are stiffening, while the former fly away as soon as their wings are stiff enough; and as during the rainy season there are generally several male moths flying about the station, females, when tied out, are soon paired, their talc-like discs, shining like little moons at night, act like the light of the glowworm to attract the male. In this way I succeeded in getting nearly all the females which came out during the monsoon of 1875 paired, but I failed in the rearing; my space was limited, and my cages were badly ventilated, and although I hatched out several hundreds I only gathered 50 cocoons during that season. I afterwards moved into a larger house and gave up much more room. Working on a system, I joined chairs and tables together, with bamboos connecting them so as to form a succession of benches: on these I placed bamboo-mat trays, and above I hung twigs on strings, entirely giving up the indoors cage system. In some places I put rows of small pots with twigs in them, filling them with moist earth; but I did not find this answer, as the caterpillars were always more ready to crawl down the pots than up them, and the free circulation of air was much hindered; so I determined to trust to the strings alone. For a short time everything went on well. I had plenty of good fresh leaves; the worms were not crowded, and they grew considerably; but long before the 50 days of their life were at an end, the leaves on the trees became hard or diseased, and although I had any amount in quantity at my disposal, I had none of a good quality. Caterpillar after caterpillar pined and withered away, and this has been the story the whole season. Although the trees have from time to time flushed and sent out quantities of beautiful fresh shoots, these efforts have only been spasmodic, and owing to the great scarcity of rain throughout the neighbourhood, I found it simply impossible to ensure a steady supply of suitable food from the way-side trees, numerous though these are.

10. I found that a considerable number of the young worms crawled down the legs of the chairs and tables and disappeared, so I altered my arrangement of the trays. I fastened ropes on to the rafters and to hooks in the ceiling, and passing them through broken bottle fair-leaders, so as to prevent the enemies of the worms descending and they themselves ascending, I made a succession of swinging trays, over which I put the strings of twigs as before. By this method there was great saving in the labour of tending; the worms were much more secure, and the ventilation was good; but again it was the same story, the food failed. I changed the place of the swinging trays; some I put on boughs of trees, some in one verandah, some in another; but the food was no better. I let some loose on trees in the station; but there were no fresh leaves, and they died or were taken by the birds and squirrels and lizards. I then found on a range of hills of few miles out of Poona a tract of grassy country containing many bushes and saplings of *Terminalia*, *Lagerstræmia*, and *Carissa*. Here I turned down some thousands and set men to watch them during the day. For some 5 weeks they got on well; we had a very large quantity of worms and a fair amount of leaves, when a very hot fortnight intervened, the saplings and small bushes lost their leaves, and I lost nearly all of the worms, and my men missed their chance of premia and full pay, for they were paid by the results, and were to the very last as sanguine as myself. I consider that I failed in rearing entirely through the unprecedented drought and the consequent insufficiency of suitable food.

11. Although I failed in rearing, I succeeded in breeding and in procuring fertile eggs. During the hot weather there were no wild males flying about, so I found that it was not

much use tying the females out, but during the rains I was quite successful. I therefore, from February to May, turned all the moths, as they came out, into a bedstead covered with mosquito curtains, and a fair proportion paired there; but after May I adopted the following system, which I shall always follow in future. I rigged up swinging trays as already described, and in the mat trays resting on them I placed the cocoons, covering the whole with bamboo chicks fastened up like a pent house about 3 feet high. The moths, after they came out of the cocoons, crawled up the chicks and there hung while their wings were expanding. I found that several pairs took place in these cages: each morning I looked at them, and leaving the pairs inside the cages undisturbed, I put all the rest of the moths into a large basket and covered them up. About 4 in the afternoon I looked at them and found that some pairs had taken place; these were left undisturbed, and all the unpaired females tethered to a small frame of trellis work. At dark this frame was hung up to a tree, and all the unpaired and free males liberated near it. I generally found in the morning that the majority of the tethered females were paired; the frame was then brought in doors and hung up out of the way. Great care was always taken that no pairs should be separated by force; they were always allowed to free themselves, and after they had done so, the females were put under inverted baskets to lay their eggs, while the males were put into a basket to be liberated at sunset. By systematically carrying out this method, the majority of females paired and their eggs proved fertile, but the average was less than I had formerly noticed, only 106 per moth. I did not have the eggs laid counted, only the number of worms hatched.

12. My head silk-worm tender was a Mahratta widow, who had been educated in the Female Normal School at Poona; and it is principally to her that I am indebted for the figures I have quoted. She tried every contrivance in the way of closing windows and doors, hanging up wet cloths, putting kuskas tatties to the doors, sprinkling the twigs, dipping them in water: but it was of no avail. We had no disease, no epidemic, no bad smell, but simply starvation. We kept accounts of deaths in some instances and compared the proportions of deaths among the different sizes, and found that two-thirds of those which died were under a week in age; but of 170,634 hatched between 1st April and 10th September, only 2,623 grew up and spun cocoons, and this we laid entirely to the difficulty of getting suitable food. Under this woman I had two other women and five lads at different times, some looking after the worms in my compound and some tending them in the jungles on the hills near, and at odd times they all cleaned the burst cocoons and prepared them for the manufacturers.

13. The majority of the cocoons sent to me were those of *Antheræa Paphia* and belonged to the common variety of that moth. In September 1875, Major Bowie, Deputy Commissioner at Sambulpore, sent me some belonging to another variety called by the natives of the Central Provinces the "Chateesgarh" cocoon; these were larger but much thinner and softer, and the moths slightly darker, but they paired readily with the small, hard cocoon kind, and I think that the difference between the two cocoons was simply owing to climate and feeding. The Chateesgarh moths were more delicate and limp-bodied. The remaining cocoons I received from the Bombay jungles were of *Attacus Edwardesii* and of *Cricula trifenestrata*; several moths of both these species came out, but none paired, so I can make no report about their domestication. The former of these seems distributed over the whole Presidency, and I have also received some from Mysore; the latter came from the jungles of North Kanara only; they are both described by the late Captain Thomas Hutton, and I can add nothing to his description.

14. The tree which I used for indoors rearing was the Nandruk (*Ficus Benjaminia*); the leaves stand travelling well (I sent at one time 20 miles down the line for food), and keep fresh long; it has constant flushes of young leaves, and being planted for shelter in many places along the road-side, was in every way the best suited for an experiment on a large scale; but as the trees are neither pruned nor watered, the supply of suitable leaves proved unreliable. I tried the Bher (*Zizyphus jujuba*), but it withers very quickly. However, on it, the Ain (*Terminalia*, or *Pentaptera tomentosa*), the Lendeya (*Lagerstræmia parviflora*), and the Karanda (*Carissa carandas*), a few caterpillars grew to maturity out of doors.

15. Having thus fully detailed my own experiments, I will now relate what others have done this year. Mr. Woodrow, the Superintendent of the Botanical Gardens at Ganesh Khind, had a small sum placed at his disposal by the Collector of Poona for the purpose of experimentalising in tasar sericulture. He has laid down a great many cuttings of *Ficus Benjaminia*, which will in the course of a few years grow into an extensive plantation, and from these we may be sure of getting leaves of the most suitable quality. As there are many of these same trees planted along the roads in the neighbourhood of the gardens, we expected that he would easily get a supply of food for this year's worms, so he erected a light, commodious shed, with the sides and top of coir-matting,—an economical and very effective kind of structure, which I hope hereafter to try myself. Mr. Woodrow succeeded in getting a few seed cocoons, and I also from time to time gave him fertile eggs. The result of his experiments was the same as of mine; every now and again the caterpillars throve well, but when the leaves deteriorated, the caterpillars starved and died; he got 923 good cocoons at the close of his experiments. Mr. Lyle, one of the employés of the Great Indian Peninsula Railway Company, an American by birth, tried a series of experiments in rearing these silk-worms at his house, near Dapuri: as he had no room or shed to keep them in, he constructed with much skill and ingenuity a set of large pens or cages fixed on to uprights driven into the ground under some good shade-giving trees. The sides and tops of his cages were made of bamboo chicks closely fastened together, so that no caterpillars could escape, but plenty of air could get in, and none of the silk-worms' enemies could get at them; coating the uprights with tar and

castor-oil mixed, he effectually prevented anything climbing up. Inside his cages Mr. Lyle stretched wires lengthways of the cages, and on these he hung the twigs. A good deal of light rain fell at Dapuri during the month of August when he had his cages full, and the wind driving moisture through the interstices of the chicks kept his leaves fresher than mine; and here certainly the worms throve well, quite as well as on the trees. He got some cocoons from trees along the line, and I also provided him with some fertile eggs; from these (which he began to rear on the 7th August, and which had all spun by the 20th September) he gathered 1,509 cocoons, the majority of which were as fine as any jungle-reared specimens which I have seen in this neighbourhood. He tells me that he had as many as 180 spun in a single day. He had a greater choice of food than I had, and managed to secure a superior quality of leaf throughout the 45 days. He fed the worms on *Ficus Benjaminia* and *Ficus Tjiela*, on twigs 18 inches in length, and put very close together. He noticed that they fed impartially on these two kinds of leaf; sometimes one was of better quality than the other, and this fact the worms were quick enough to find out. The great objection to *Ficus Tjiela* is that when it dries or fades the leaf rolls up and hurts the caterpillar resting on it, especially at time of moulting. This was exactly my own experience; and he also verified the fact which I had noticed, that the caterpillars would not go from Nandruk to Bher, or from Bher to Nandruk, if they had begun to eat one kind. Mr. Lyle by accident found that the worms throve very well on *Lagerstræmia Indica*, a very leafy, ornamental, flowering shrub found in most gardens; both he and I put some caterpillars on these trees, and found that they grew enormously and spun very large cocoons. I shall pay much attention to the cultivation of this shrub another time, but fear that it is a very slow grower.

There were also experiments made in Dharwar with regard to rearing the tasar silk-worm; but, owing to the small amount of seed cocoons obtained, no important result was noted. I trust this next season to make arrangements by which a constant supply of fertile eggs shall be secured from the central breeding establishment at Poona.

16. Unfortunately I shall not be in Poona myself, as on being relieved I shall, before the monsoon sets in, return to Dharwar to take up my substantive appointment in the Revenue Survey at that station; but I will hand over every thing, including 2,000 seed cocoons, to Mr. Woodrow, and give him full written instructions as to the manner in which I think it best to carry out the scheme; and I will write to each place whence I received supplies of over 1,000 cocoons, and find out whether there is any one there who will receive eggs gratis, and sell the cocoons afterwards at a fixed rate, no distinction being made between full and burst cocoons. The temptation of being dishonest on the part of agents will then be removed, and finding that full cocoons produce moths which lay eggs, the cultivators may be induced to treat them carefully and take steps to prevent any life being wasted.

17. This year's experiments have shown me the following facts, and by them my future attempts will be ruled:—

(1.)—Seed cocoons should be moved about as little as possible, for fear that the moths might come out when the weather is unsuitable.

(2.)—Feeding on twigs gathered from unpruned trees planted by the roadside is a mistake, as on twigs 18 inches long there are only 3 or 4 leaves of a suitable quality.

(3.)—Plantation should be made of the kinds of trees and shrubs which thrive best in the selected localities, and these trees should be grown as pollards. When the worms are fed out of doors, the trees should be protected with cages or nets when under shelter, either in coir-matting, covered sheds, or in portable pens or cages; the 3rd, 4th and 5th leaves from the terminal leaf of the twig should only be used, and these should be renewed three or four times daily.

(4.)—Fertile eggs can always be ensured by the system of cages, baskets, and tethering mentioned by me in paragraph 11; only the eggs of the healthiest moths should be kept for distribution or for home rearing.

(5.)—Since the silk mill in Bombay can work up the burst cocoons so beautifully, there is no need to kill a single chrysalis; all the moths should be allowed to come out of the cocoons.

(6.)—After the moths come out there are generally a few drops of excrement left in the cocoon: these should be shaken out and the cocoons put on one side to dry; after four or five days these cocoons should be carefully cleaned, all pieces of leaf or twig cleaned off from the outside, and all exuviæ, as cast skin of caterpillar and chrysalis, removed from the inside; there will then be nothing left to attract beetles, and the cocoons will be clean and ready for the market.

(7.)—The habits of the trees or shrubs used for feeding the worms on should be carefully watched, with the view of finding out the best way to treat them, so as to ensure a steady supply of suitable food.

18. The result of the manufacturing of the tasar cocoons into fabrics is as follows:—When I commenced these experiments under report I was under the impression that it would be necessary to send the cocoons or the raw silk to Europe; for, although I knew that there were mills in Bombay, I did not think that there were any in which silk was manufactured; however, I was fortunate enough to get into correspondence with Messrs. Tapidass Vurjdass and Company, Secretaries and Treasurers of the Alliance Spinning and Weaving Company, Limited. This Company has been manufacturing water-twists for the last thirteen years, and the weaving establishment has been at work for a very little over a twelve month. In this mill, spun silk has been made from Bengal chasm and from damaged cocoons of *B. Mori*. No

reeling is as yet done on the premises, but raw silk is bought in China and also in the local market; both aniline and vegetable dyes are used for the raw and spun silk. "Poplin," "Satin," "Japanese," and "Korah" silk pieces are wove, which meet with a ready sale in the local market. This enterprising Company has got out from the English silk mills four superintendents to instruct the mill hands in weaving, spinning, and managing the machinery: over the whole mill there is a (Bombay educated) Parsee Manager. The Company has ample plant for carrying on the work in all its branches, and turns out some hundreds of pounds of spun and neat silk per week; they use up this themselves, and have disposed of a large quantity besides, having largely contracted for the delivery of much more. Under these circumstances it speaks much for their public-spiritedness that they were so ready to give up time and money to work out this experiment for me. I placed the whole matter unreservedly in Messrs. Tapidass Vurjdass' hands, and sent them 112 lbs. of cocoons cleaned as well as could be done by my labourers without boiling the same. Messrs. Tapidass informed me that from these cocoons about 10 per cent. pure silk and about 30 per cent. noils or refuse were obtained, while about 30 per cent. was lost in the boiling; this loss being, I suppose, the natural cement, the dirt, and foreign matters left in by the cleaners. The Company, therefore, had about 45 lbs. to experimentalise upon: some of this they wove into all tasar cloth, some into tasar poplin; a considerable quantity was used in experiments made with the view of bleaching it, and a small amount is still on their hands. Samples of these fabrics, as well as a small skein of the yarn, are herewith attached. Of these, Nos. 2 and 4 are pure tasar throughout; the remaining six have tasar for the warp and polished coloured yarn (presumably of wool) for the weft. The skein of silk is "ungassed;" before being used for weaving it is passed through jets of gas, and the greater portion of the minute fibres which give it a wooly appearance are singed off. Messrs. Tapidass regret that they can put no value upon this material in either the form of cocoons, of yarn, or of piece-goods; as hitherto they have not found that there is any demand for tasar. If they could be supplied with the yarn as white, or as nearly white, and as capable of taking every dye, as the *B. Mori* silk is, they could then use it, but in its present condition they can make no use of it: still they are glad of having had the opportunity of experimentalising on the raw material, and feel confident that, if a demand for tasar goods should arise in the local market, they would be able from this indigenous product of the Presidency to manufacture whatever may be called for. I shall continue to make inquiries and carry on correspondence with firms who will give this stimulus, and hope that, as I have succeeded in collecting the raw material and in getting it manufactured in our Presidency, I may similarly succeed in finding the purchasers.

The vernacular names of the trees mentioned in this report are as follows as well as I can ascertain :—

Bauhinia parviflora	Kanchan.
Carissa carandas	Karanda.
Celastras montana	Mál Kawguni.
Chloroxylon Swietenia	Billoo, halda.
Conocarpus latifolia	Dawra.
Ficus Benjaminia	Nándruk.
Ficus Tjiela	Pimpri.
Lagerstræmia parviflora	Lendeya.
„ *Indica*	...
Terminalia or *Pentaptera* — *glabra* or *tomentosa*	Ain.
Zizyphus jujuba	Bher.
„ *xylopyra*	Gootie.

From the Government of Bombay, to the Government of India, No. 1791, dated 12th June 1877.

With reference to the correspondence ending with Mr. Under Secretary Lyall's letter No. 31, dated 26th ultimo, relative to experiments in the hybridising of the tasar and the oak-feeding silk-worm, I am directed to state, for the information of the Government of India, that Mr. Mowis, in spite of repeated calls from Government, has forwarded no report, and that it has been ascertained indirectly that he declines to make known the results of his processes, preferring to use his knowledge for his own benefit. He has, however, shewn the result of his experiments both in the shape of the hybridised worms and their produce to many private individuals, and there can be no doubt as to their complete success. They undoubtedly, in the opinion of this Government, open out a prospect of the rise of a most valuable industry in India, where the food on which the worm lives, *viz.*, the Nandrook (*Ficus Benjamina*) and other varieties of the *Ficus* are indigenous and abundant, and it is strongly recommended that a supply of eggs of the Yama Mai be procured from Japan, and distributed to the different model farms in this country with a view to the experiment becoming widely known and encouraged.

2. As regards Captain Coussmaker, I am to state that he has been relieved of his employment in Poona, where he experimented on tasar silk-worms and has been transferred to the Southern Mahratta Country on famine duty, from which it will be impossible to relieve him for the present; but that when the crisis has passed, arrangements will be made to carry out the suggestions of the Secretary of State relative to his employment to superintend the collection of a further supply of cocoons.

From the Government of Bombay, to the Government of India, No. 1381, dated 29th April 1878.

I am directed by His Excellency the Governor in Council to acknowledge the receipt of Mr. Assistant Secretary O'Conor's letter No. 25C., dated 30th ultimo, enquiring whether any progress has been made in the collection, under the superintendence of Captain (now Major) Coussmaker, of the further quantity of tasar cocoons required by Her Majesty's Secretary of State.

2. In reply, I am directed to forward herewith copy of a letter from Major Coussmaker, No. 9, dated 16th instant, and to state, for the information of the Government of India, that the duties of this officer as Assistant Superintendent, Revenue Survey, prevented him unavoidably from making the desired collections of tasar silk cocoons.

ENCLOSURE TO FOREGOING LETTER.

From CAPTAIN G. COUSSMAKER, *to the Government of Bombay, No. 9, dated 16th April 1878.*

With reference to your memorandum No. 120 of the 6th instant, asking "what progress has been made in the collection of tasar cocoons for the Secretary of State," I beg to inform you that I myself have collected none; that owing to my absence from Poona since April last, when I gave over charge of the Photozincographic Office and went on famine relief duty to the Belgaum Collectorate, only returning in December, and again leaving Poona after a very few days to join my appointment in this survey, I have not been able to personally superintendent any experiments in rearing tasar worms.

2. When I left Poona the first time, I, in accordance with the instructions which I received, handed over my batch of seed cocoons (some 2,000) to Mr. Woodrow, asking him to try and rear as many worms as he could, to distribute seed, and to procure, if possible, the cocoons produced therefrom. He informs me that during the monsoon many moths had come out of my cocoons and had laid fertile eggs; that somehow or another he had not been very successful in the rearing, but that he had obtained a few cocoons as a first crop, and from the moths which came out from these cocoons he had got some fertile eggs, thus proving that a second crop was obtainable; but of this batch nearly all the worms had died and he had hardly any cocoons left for another year. I have asked him to get all the burst cocoons cleaned, but, as mentioned before, I myself had no time to examine them and see how many are fit to be sent to England or elsewhere for manufacturing purposes.

3. Mr. Woodrow also informed me that the worms did not seem to thrive well under shelter, that some which he had placed upon trees seemed to feed for a time and then to disappear; he gathered very few cocoons of these. He sent away a good many eggs, but had not heard what had been the result. He had sent some to Mr. Moore, the Collector of Satara, who informs me that he liberated some on trees, but saw no more of them; he could not feel sure whether they had died, or had been carried away by any of their many enemies. Mr. Woodrow also sent me some eggs, and I let the worms loose on trees in the talukas of Belgaum where I was at work. I certainly saw them for a time and then they disappeared. On two trees in particular they throve very well for some days, but I was not able to go near them for a fortnight, and then there were none left. Owing to press of work, I was unable to keep any daily notes or watch them closely, so I cannot feel sure why this experiment failed.

4. I sent letters to twelve mamledars and forest officers, asking them whether any people in their districts would rear worms, collect and sell the cocoons if eggs were distributed gratis. From the answers which I received, it appeared that no one would engage to do so.

5. From the imperfect observations which I was able to make this last year, I gather that home-reared cocoons can be safely put by in Poona from the end of one monsoon to the beginning of another; that the moths which issue from these will lay an abundance of fertile eggs; that from this, the first crop, it is possible to obtain a supply of fertile eggs for a second crop. But why this year the first crop did not yield a full supply of cocoons, and the second crop still less, I cannot say; the weather or the food may have been against the worms, or there may have been facilities for their enemies to get at them. Mr. Woodrow himself says that he cannot for certain assign any reason.

6. My next experiments will be directed towards rearing the worms on bushes and shrubs, which can either be moved in and out of shelter or be easily covered over with cages; but close and daily observation is requisite, and the habits of the plants must be studied as well as those of the worm.

7. I have heard from Mr. Thomas Wardle, who has sent me some samples of tasar silk, thrown, dyed, wove, and printed in England, shewing manufacturers have made great progress of late in working up this material, getting almost as beautiful results from it as from *B. mori* silk, and most clearly showing, as I have always held, that if once a steady supply of tasar coooons raised under the most favourable circumstances could be ensured, the goods made therefrom would command a good price in the market.

From the Government of Bengal, to the Government of India, No. 712, dated 8th March 1877.

I am directed to acknowledge the receipt of your letter No. 7, dated the 13th February 1877, in the last paragraph of which it is stated that steps should be taken to ascertain the extent to which the tasar silk-worm is found in Bengal, and directing that, after the necessary enquiries, a report on the subject should be submitted as speedily as possible.

2. In reply, I am to state that on receipt of Mr. Hume's letter No. 244, dated 26th September 1872, the subject of the production of tasar in the Lower Provinces of Bengal was specially brought under the consideration of Government and of local officers. The two points suggested in that letter were much the same as those now under discussion, *viz.*, (1) to endeavour to obtain a more correct approximation to the probable supply of tasar-cocoons available, and (2) to set on foot experiments in order to ascertain the possibility of profitably utilizing in some way the supply existing.

3. To obtain these data, a circular was addressed to the Commissioners of the Burdwan, Chota Nagpore, Orissa, and Bhagulpore divisions, in which the following questions were specifically put:—

(1.) Is tasar silk (under any name) usually collected in the state of cocoons, or are eggs collected and hatched in so-called gardens (or enclosures in the jungle), and are the worms tended with care by the growers?
(2.) Are tasar eggs produced by moths in captivity ever fruitful, and are they kept for a future crop of worms?
(3.) On what trees do the worms feed?
(4.) If tassar cocoons are collected in the jungle, can any estimate be formed of the weight annually collected in the district? Is the right to collect them farmed out by the zemindars, and what is approximately the area on which they are collected?
(5.) What caste collects the cocoons, who rears the tasar worms, and what caste sells the tasar silk, and how? How does such silk sell?
(6.) Are there any, and (if any) what, varieties of insect-producing silk besides the ordinary silk-worm and tasar-worm?

A full collection of reports was finally received, and Mr. Geoghegan, who was at that time Secretary to the Board of Revenue, and is, as the Government of India are aware, exceptionally qualified to form an opinion, was good enough to examine the reports and favour this Government with observations on the subject, upon which the following remarks are principally based.

4. The result of the enquiries that were then made shews that the insect (or insects) known as the tasar moth or *Antheræa Paphia* is found in the jungles of Bankoora, Midnapore (west), in the northern part of Balasore, Bhagulpore (south), Sonthal Parganas (chiefly Doomka, Godda, and Rajmehal), Hazareebagh (particularly in Gaddies Gawan and Satgawan, and parganas Gola, Ootara

Kunda, and to some extent in Gaddies Palgunge and Seerampore), Lohardugga (Palamow, Bilounjah, Tamar police-station, part of Toorpa, Palkote, and Bira circles), Singbhoom, and Manbhoom. It is also found throughout the Orissa hills, though it is strange that the replies of the Chota Nagpore tributary chiefs report little or no tasar. It is probable that, though the cocoons may not be collected, the insect is to be found in those tracts. On the Orissa side Keonjhur is expressly mentioned as one of the sources of the tasar worked in Burdwan.

Roughly speaking, it appears that the tasar insect will be found throughout all tree and scrub jungle lying south and west of a line marking the southern and western limit of the continuous cultivation of the Gangetic alluvial and the Orissa littoral tracts of country.

5. In this region it is variously said to feed on the sâl, the asan, the dhao, the deota, seeda, kokore, ber, koa, tend, arjun, asta, and "plum" trees. Of these, the *sál* is the *Shorea robusta*, the *asan* the *Terminalia tomentosa*, the *ber* the *Zizyphus jujuba*, the *arjun* the *Pentaptera arjuna*, the "*plum*" is probably *Syzygium jambolanum*. The main feeding grounds are the *sál*, *asan*, and *ber* forests.

6. Whether the insect is of one or many species has not been determined. Captain Hutton maintains that several species are now included under the one name of tasar or *Antheræa Paphia*, and there is certainly great variety between individuals; but it is not easy to say whether these differentiæ constitute distinct species. With regard to Captain Hutton's remarks in the paper which forms appendix A to Mr. Geoghegan's *Silk in India*, it is observed by Mr. Geoghegan that the pairing of the sexes is left to nature; the females are left in the open air and are sought by free males. Hence, if several species interbreed so readily as Captain Hutton supposes, the present state of things must be a perfect chaos, from which it would be impossible to extract any pure breed. The natives certainly divide the insects, or their cocoons, into several classes; but the classifications (as native classifications so often are) defy all categories; nor was Mr. Geoghegan able to find that the idea of race enters into them at all.

7. The classification noticed by the Board of Trade in 1819 (see *Silk in India*, pages 110 and 111) seems to be this—

(1.) The "bonbunda" or cocoon found in its natural state in the forest.
(2.) (*a*) the mooga, female, and (*b*) the teerah, male, of cocoons formed by worms bred in domesticity of the first generation, *i. e.*, from eggs laid by moths issuing from wild cocoons collected in July or August.
(3.) (*a*) "dabba," (*b*) "buggoy," (*c*) "tarroy." It is not apparent how these are classed; the buggoy seems to depend on its colour, the tarroy on the season at which it is bred. The account is very confused.

Dr. Buchanan Hamilton (see page 111, *Silk in India*) complained of a similar difficulty in the accounts given him by the natives in Bhagulpore. He gives four kinds—dabba, sarihan, jarhan, and langga. According to one account the dabba were wild cocoons, the others successively degenerating.

8. According to the Beerbhoom tasar-weavers there are three classes of cocoons—northern, western, and southern, the southern yielding silk in much larger proportion to number of cocoons than the northern (in fact, 800 southern will yield as much as 1,280 of the northern kind). The Collector of Bankoora says the cocoons are of two sorts—tunti, smaller, and muga, larger. The report of the Collector of Burdwan gives an eight-fold division as follows:—

(1.) Moodeh ... Apparently Board of Trade's bonbunda, the wild cocoon.
(2.) Bowra ... The cocoon from which the moth has eaten out. This is obviously illogical, as a different method of classification is here introduced.
(3.) Nereh ... Not defined.
(4.) Dabba ... } "Said to be offspring of moodeh."
(5.) Buggoy ... }
(6.) Tereh ... } Male and female respectively in the *second* generation.
(7.) Mooga ... }
(8.) Ampatia ... Produces an inferior quality of silk and is principally used as a seed-cocoon.

Perhaps, putting this and the minute of the Board of Trade together, it is possible to get an explanation for certain kinds depending on their nearness to the original wild cocoon. The report of the Deputy Commissioner, Manbhoom, however, puts them in a different order. He says there are three kinds—the ampatia, collected in April and May; the mooga, collected in June and July; the dabba, in August and September. The dabba is best of those reared artificially, but the jungle cocoons are best of all.

Whether or not these classifications can be explained and reconciled, Mr. Geoghegan does not think that they point to any notion of different species prevailing in the native mind.

9. The Deputy Commissioner of Singbhoom gives still another account. According to him the mooga and terch are the female and male jungle cocoon. Cocoons in the next generation are of two sorts—loreah and buggoy; the dabba is the next generation and is the best, and is ready in September.

10. In the list of contributions from Bengal to the London Exhibition of 1873 were sets of cocoons, thread, and cloth of the three kinds named ampatia, dabba, and buggoy. There was a difference perceptible in the cloth, but none in the cocoons. Each set contained cocoons of very various shades—deep slate colour, ashen, yellowish white, and reddish white. If the names mean (as they seem to do) "having the appearance of a mango leaf" (see Captain Cousmaker's description of the worm), "white" (dhabala), and "tiger-striped" (baghai), they may point to some distinctive appearance of the *larva*. But the whole question—one species or several—can only be satisfactorily solved by a naturalist observing the insect in all stages.

11. For the most part the wild cocoon, as first plucked from the branch where it has been placed by the insect in a state of freedom, is not sent at once to market. But in Bankoora and Manbhoom, at any rate, some portion of the wild cocoons is at once converted into thread. Speaking generally, however, the jungle-borne crop is kept for seed.

The seed is not carried on from year to year, but is annually renewed from the jungle.

12. In Bankoora, the first jungle cocoons seem to be collected in Asharh, Sraban, or Bhadra (*i. e.*, from June to August), and the eggs laid in Bhadra (August). In Midnapore, the season of breeding is not given. In Bhagulpore, Jyaishtha and Asharh (May and June) are said to be the collecting months. In the Sonthal Parganas, January and February, September and October. In Hazareebagh the season varies; in some parts there are three crops, in others only one. In Manbhoom the jungle cocoons must be collected about March; in Singbhoom about April.

13. The mode of breeding seems everywhere nearly the same. As soon as the moths emerge from the cocoons kept for seed, the females are exposed and left to form their own connexions, whether with the males emerging from the same batch of cocoons or with jungle moths. Impregnation having taken place, the eggs, which are immediately laid, are collected in baskets, trays, pots, or on tufts of grass; and when, in some eight days, the worms begin to emerge, they are placed on the asan or sâl trees growing in sites defended from their enemies (birds and insects), and moved from tree to tree as they devour the foliage of their first location, till finally, in about fifty days and after five moults, they spin their cocoon upon the tree.

14. How many complete cycles there are in the year cannot be easily stated. In Midnapore it is not apparent how often the process is repeated in the year, nor is the Collector's account for Bankoora very intelligible. It is meant apparently that the jungle cocoon is collected in June, that its eggs are laid at once, and that moths from these eggs lay eggs in August, which produce cocoons in September; that the eggs laid by moths emerging from these cocoons produce cocoons in January, while from January to June they are left to nature. There must be a cycle in that interval; so in Bankoora the insect would appear to be quadrivoltine. The same would appear to be the case in Bhagulpore and in Singbhoom and Manbhoom. In the last, three out of the four bunds are formed in captivity, *i. e.*, on the trees of the breeder's plantation. Mr. Geoghegan adds that he is not sure whether, between the dabba cocoon formed in August, and the jungle cocoons which must be collected about February, *two* cycles do not intervene. This would make it quinquevoltine.

15. Mr. Forbes, the Sub-divisional officer of Palamow, gives a different account. According to him the domesticated tasar is reduced to a bivoltine. Cocoons are formed once in August and once in November. From November to the next June "the cocoons kept for seed are carefully packed in kodo-straw, just as seed-dhan is packed and stored in some dry place till June following." Not only then, if Mr. Forbes' account be strictly accurate, has the insect been thoroughly domesticated, but it has been so completely changed in habit as to become a bivoltine, the cocoons formed in November not opening to let out the moth till the following June. The whole subject requires more careful consideration. In the first place it appears open to question whether the facts are ascertained beyond all doubt. If they are correct, it might be possible to domesticate the worm without reducing the rapidity of reproduction. If without degeneracy of the breed a tasar domesticated, yet quadrivoltine, could be raised, we should have a silk-producer of twice the value of this Palamow worm.

16. With regard to outturn, whether of cocoons collected from the jungle or cocoons regularly reared, it was not to be expected that any very accurate estimate could be framed. The Collectors have (wisely) not even hazarded guesses on the subject. Perhaps some estimate might be got of the amount of cocoons sold at the marts in Burdwan, Beerbhoom, Bhagulpore, Bankoora and in Gya or Patna, and possibly of the exports to Mirzapore; but we should still be unable to reckon the amount absorbed by the local village weavers.

17. As to any cess levied by zemindars, it is said that in Midnapore the collectors pay 8 annas or 12 annas per head for the right to collect; in Balasore they pay as much as a rupee or a rupee and a half; in Bankoora no cess is said to be levied; in Bhagulpore the rate is 5 annas a head; in the Sonthal Parganas the charge is either so much a tree, or 12 annas to Re. 1-8 per patch of jungle used as feeding ground; in Hazareebagh each rearer pays 6 annas to 8 annas for the privilege; in Palamow a "koa" revenue appears to be paid to Government. In consideration of this the proprietor levies a rate which ultimately assumes the shape of a hansua-tax, or tax on the bill-hook of 4 annas per annum.

18. The chief collectors and breeders of the tasar are the aboriginal tribes —Sonthals, Paharias, Kols, Uraons, Cheros, Kherwars, &c., and the lower Hindu or semi-Hindu castes—Bagdis, Bowris, Tewirs, Bhuiyas, Bhogtar, Samantas, Chamars, Dosads, Koormees, and Gowalas are also mentioned. The breeders seem to collect their own wild cocoons from the jungle,—a different practice from that which prevails in the Central Provinces. The breeders sometimes deal direct with the weavers, but generally receive advances from a baniya or mahajun, who thus receives the cocoons and makes them over to the local weavers, or exports them to some of the marts outside the district. The belief in the necessity of ceremonial purity, and the exclusion of women from the operation of rearing tasar on this ground seem universal.

19. The price of cocoons seems to vary a good deal. Mr. Geoghegan expresses his doubts of the accuracy of much of the information on this point. In Midnapore prices run from Rs. 6 to Rs. 10 per kahan (1 kahan=16 pans of 80 cocoons each ∴=1,280). At Kalipore, near Soory, the Sonthals are said to get Rs. 8 per kahan; yet the Deputy Commissioner puts the price in the Sonthal Parganas at 350 to 450 per rupee, or, say, Rs. 3 to Rs. 4 per kahan. In Bankoora the Tantis are said to pay Rs. 6 or Rs. 7 per kahan.

The Burdwan Collector's report gives prices varying from 120 to 450 per rupee, according to the eight kinds furnished; this would be from about Rs. 3 to Rs. 10 per kahan. Yet it is said that the cheapest sort (*ampatia*) fetches Rs. 16 per kahan, if bought for breeding. This is not very intelligible, for it is not clear how the purpose of the buyer can affect the demand of the seller. The information is hearsay. In Hazareebagh the rearers get indebted to the baniya, and sell at Rs. 5 to Rs. 6 the kahan of 1,680, or about Rs. 4 to Rs. 5 the kahan. The baniya gets about 7½ to 8½ per kahan. In pargana Golah the rearers seem to get a trifle better price. In Palamow, after repaying advances at 50 per cent., the breeder gets from Rs. 4 to Rs. 6 per kahan; in Singbhoom the price is Rs. 8 to Rs. 10 per kahan; in Manbhoom the price averages Rs. 6 per kahan. The cocoons of Chota Nagpore seem almost entirely exported to Bhaugulpore, Gya, Burdwan, Benares, Azimgurh, and Mirzapore. They are not even wound off on the spot.

20. An alkaline lye is always used in reeling off; the process is of the rudest, and the thread produced foul and uneven.

21. Details as to prices of raw tasar or tasar cloth are meagre. In Midnapore raw tasar is said to fetch 6 tolahs to 8 tolahs the rupee. At Soory a piece of stuff containing 15 chittacks of raw tasar fetches Rs. 12. In Bankoora a kahan of cocoons will make two "pairs of *dhotis*," fetching Rs. 14 to Rs. 18; a thân of twilled tasar fetches Rs. 9 or Rs. 10, but the weight of silk is not given. At Soory a kahan of cocoons is said to yield 15 chittacks of silk. Prices of the Burdwan stuffs of tasar, or tasar mixed with cotton, are not given. At Bhagulpore the raw silk fetches Rs. 10 to Rs. 13 per seer: width of stuff is not mentioned, so details on that point are useless. In the Sonthal Parganas a kahan of cocoons is said to yield 1½ to 2 seers silk, which fetches Rs. 9 to Rs. 13-8 per seer.

22. With regard to the last question, enquiring if there are any varieties of insect-producing silk besides the ordinary silk-worm and tasar-worm, it is observed by Mr. Geoghegan that there are doubtless to be found in the jungles many other insects of the list given by Captain Hutton, but they are not specified by collectors, and their fibrous product does not seem to be worked up into thread.

23. In concluding this letter, I am to say that the above account incorporates the best information that is available to this Government on the subject of tasar silk in Bengal; and although the information conveyed is not very complete, it is hoped it will prove of some service to the Government of India in the investigations which are now on hand regarding the progress and development of the tasar industry. If information on other subjects is required, the Lieutenant-Governor would be glad to be favoured with specific instructions on each point to which the attention of those interested in the industry may be called. The directions in which it has been suggested by Mr. Geoghegan that further inquiry should be made are (1) the unity or diversity of the species known as tasar; (2) the possibility of complete domestication and how many breeds in the year can be had under this system; and (3) the value of the silk if properly reeled. If we cannot get this tested in this country (and the regular Bombyx-silk planters may have objections to furnishing information), it is possible to send cocoons home. The chrysalis can be killed by boiling, and the cocoons will not suffer in the least, as they are as hard as iron. If the cocoons are sent home, the lye necessary in winding off must not be forgotten. It is, however, believed that the Government of India expected Captain Coussmaker to make some experiments on this point, and that Government are already probably in possession of information on the subject.

From the Government of India, to the Government of Bengal, No. 119, dated 18th September 1878.

I am directed to forward, for such consideration as it may seem to merit, the accompanying communication from Mr. J. Deveria of Lakhanháti, in which he proposes that Government should undertake the rearing of tasar cocoons in the jungle mehals of Chota Nagpore for sale to reelers and exporters.

2. I am to request that the Government of India may be informed of the conclusions arrived at in the matter by His Honour the Lieutenant-Governor.

ENCLOSURE TO FOREGOING LETTER.

From J. DEVERIA, Esq., *to the Government of India, dated Galunpur, 25th August 1878.*

* * * *

2. The silk cocoons of Bengal are, from various causes, which I do not purpose to discuss here, deteriorating a good deal in quality, and, owing to the very unsatisfactory and unstable market ruling in Europe, the production of silk in quantity has also decreased, and is falling off from day to day. Under these circumstances, the tasar cocoon could, I believe, be taken in hand and utilised to very great advantage.

3. The tasar cocoon, as you are aware, is spun by a hardy caterpillar that works in the open air, and requires no other aid from man than protection against bird and beast.

4. The food naturally required by the tasar worm is found growing vigorously in all the jungle tracts of Western Bengal wherever there is a laterité soil. Thus, there is no reason at all why the Government of Bengal should not cause its Forest Department to work up the production of the cocoons in aid of its forest revenues.

5. The silk manufacturers both in India and in Europe would gladly buy up tasar cocoons in large quantities, and the Department could add largely to its income by the step.

6. In Chota Nagpur the Government own over 800 khas mahals in one portion of the district alone, and it recovers therefrom a royalty of between Rs. 1,800 and Rs. 2,300.

7. This royalty is levied by the Government from the people who rear the cocoons, through the intervention of middlemen or farmers, who buy up the right of collecting the royalty at an auction-sale for a lump sum, and thereafter recoup themselves out of the rearers.

8. The farmers, it is needless to urge, are very hard upon the growers of cocoons or *jeebuniahs* (as I shall call them for the future), and in reality, by exacting the royalty, the Government hamper the extension of the cocoon-growing operations.

9. Instead of this, if the Government were to register the names of all *jeebuniahs*, give them small advances, as is done in the Opium Department to *assamees*, and take in return cocoons at a fair rate, the extension of the business would be secured. The Government could, when its crops of cocoons have come in, give notice of sale of the same, and thus ensure to itself a fixed and standing source of revenue. The cocoons are being sought after in France, and this season a gentleman came out to India simply to buy tasar cocoons for a firm in France.

10. The pecuniary aspect of the business is easy to work out, thus :—

	Rs.	A.	P.
Creditor.—			
Three men for 45 days, at Rs. 4 each per monh, for protecting the worms	18	0	0
Seed for 30,000 caterpillars, say, at 200 eggs per month, 150 cocoons at Rs. 4-8 per 1,000 cocoons, say	0	12	0
Total expense	18	12	0
Debtor—			
Value of 30,000 cocoons, at Rs. 4 per 1,000	120	0	0
Less half-share to be given to rearers	60	0	0
Total balance	60	0	0
Refund of salary paid to the men or rearers	18	0	0
Balance in favour of account	78	0	0

11. I calculate that three men will be able to protect 300 trees between them. These trees each will yield at least 100 cocoons, so the crop will amount to 30,000 cocoons, which, at the lowest rate of Rs. 4 per 1,000, will leave the Government a profit of Rs. 78.

12. That I have not over-estimated the crop will be evident from the fact of my having obtained 32 cocoons here off two small *branches only* of an almond tree.

13. There will be the expense of drying, sorting and housing the cocoons; but, on the other hand, when working largely, there are means of grouping men so as to protect whole hill sides at very small extra cost, and the profits are then much greater.

14. Another great advantage is that the outlay of Government money will come back in the course of three to four months. I mean the advances made to the *jeebuniahs*.

15. I have before stated that the Government possess over 800 khas mehals in one portion of Chota Nagpur, and that royalty derived from it was about

Rs. 2,300. For the purpose of an example, if the Forest Department were to appropriate 20 acres in each village or, say, 20 acres × 800 villages = 16,000 acres in the khas mehals, and that each acre contained only 30 trees, 16,000 acres × 30 trees = 480,000 trees. Now, if each of these trees could yield 50 cocoons, 50 × 480,000 = 24,000,000 cocoons.

16. Applying my previous calculation of Rs. 78 profit for each 30,000 cocoons reared, the Government ought to be able to earn 800 × 78 = Rs. 62,400 out of those khas mehals in cocoons. Or, if the establishment, thus—

	Per month. Rs.	Yearly. Rs.
Salary of Superintendent	500	6,000
„ of Moonshee	50	600
„ of 20 peons, at Rs. 5	100	1,200
House-rent, travelling, and contingencies . .	300	3,600
Total . .		10,400

were deducted, the Government would still have a clear profit of 52,000 per year left.

17. Hitherto the Government have been in the habit of leasing these khas mehals to *ticcadars* at a nominal rent, and the mehals continue uncared for and without being improved in *any way*; whereas, if they were resumed and made the base of operations for the Government tasar silk business, they would yield an enormous revenue.

18. I have been all over the jungle country I allude to; can converse freely with the Sonthals and other jungly tribes in their *own* languages; so that what I write is after personal observation and information procured from the men themselves.

19. The revenue of the khas mehals could be collected by the superintendent of the tasar mehal, and, as the profit of the middlemen would fall into the hands of the Government, there would be no loss at all by the arrangement.

20. As there never has been a recognized market for the tasar cocoon, it may be urged that the enormous quantities that could be reared under the Government could not be disposed of. This matter need not be taken into consideration, because, if the supply could only be ensured at a cheap figure, the demand would be unlimited.

21. I may mention that one silk firm alone in India could give up 10,000 basins a day for the reeling of tasar cocoons for at least five months in the year, or 150 days × 10,000 = 1,500,000; each basin will work off 100 cocoons a day, whence 1,500,000 × 100 = 150,000,000 cocoons, and turning it into weight by calculating at 4,000 cocoons to the maund, the firm could work off each season 37,500 maunds of cocoons, representing, at Rs. 16 (cost price) per maund, Rs. 6,00,000. The said firm usually lay out about three times that amount each year in manufacturing silk, and would, I believe, be glad to obtain the quantity of cocoons I mention so as to keep their men from idling during the rains.

22. The tasar cocoons keep, if well sunned and taken care of, for several years; so even if there is no immediate demand, the cocoons could be stored up in godowns if necessary without any loss in their value. Before concluding, I beg to point out that in Lower Bengal, where the laterite soil is wanting, the Government could have the *Terminalia Catappa*, or common almond tree, planted out for the tasar cocoons.

23. I have just reared a crop of tasar cocoons (obtained from seed from Chota Nagpur) off the *Terminalia Catappa*, and they were in every respect as good as the parent stock.

24. The *Terminalia* grows fast and vigorously, and the worms I reared fed on the trees out in the open air through a very rainy season.

From the Chief Commissioner of Oudh, to the Government of India, No.1094, dated 28th March 1876.

In reply to your communication No. 5—160, dated 23rd November last, inviting suggestions in regard to the development of the tasar silk industry, I

am desired to say that the only points on which the Chief Commissioner feels competent to express an opinion are the extent to which the raw material is forthcoming, the cost at which it can be collected or produced in commercial quantities, and the prospect of increasing the supply of the wild or semi-domesticated article.

2. Sir George Couper can say with the greatest certainty that the supply is altogether insignificant, the cost of collecting the cocoons where they are to be found, though only in scanty numbers, would be prohibitive, and there is no reasonable prospect of increasing the supply. In some districts the cocoons of a worm called the "kaswari" are occasionally found on bair trees; these are rare now, but are said to have been more plentiful some years ago when the raw silk was used for tying matchlock barrels on to the stocks. The silk was never used for manufacture, nor did it form an article of commerce.

3. As regards the supply in the Oudh forests, the Conservator reports that "though there are some tasar silk-worms in the Oudh forests, they are very scarce indeed; and without protection and cultivation it would not pay to collect the cocoons. During the past week I have been on the look-out for cocoons in the forests in which they are found, *viz.*, in the Tulsipur forests, and have only seen six cocoons, four on dhao (*Conocarpus latifolia*), one on chittonia (*Zizyphus xylopyra*), and one on sâl (*Shorea robusta*)."

From the Director of Agriculture and Commerce, North-Western Provinces and Oudh, to the Government of the North-Western Provinces and Oudh, No. 985A—CLIV-5, dated 16th November 1877.

I have the honour to submit the report of the tasar silk promised in this office No. T—368A., dated the 3rd August last.

2. The worm occurs to such a small extent in these provinces that it would be needless for me to make any proposals or suggestions regarding the development of the trade in tasar silk; but if the Government of India desire, attempts can be made to introduce it into the forest tracts of the North-Western Provinces and Oudh.

3. Enquiries were made from the Commissioners of Meerut, Bareilly, Allahabad, Benares, Jhansi, and Kumaun, being the divisions in which there are large areas under forest, and also from the officers of the Forest Department. It appears from their reports that the tasar silk is either not found, or is not known in any district, except Mirzapur, Lalitpur, and Garhwal, the quantity found in the last two being very insignificant.

4. The Commissioner of Jhansi reports that the "worm is found in the jungles of his division, but evidently it is scarce, and so little is known about it that I have not been able to obtain any satisfactory report on the subject. I can, however, state that no trade in the cocoons or silk exists at present." A few samples of the cocoons procured by him from Lalitpur are herewith forwarded.

5. The Assistant Conservator of Forests, Garhwal Division, states that he believes, from the enquiries he has made, that cocoons are not procurable in his division, but he has sent specimens of a few in the hills further north, obtained from the villagers, who make no use of them.

6. The only place in the North-Western Provinces, then, where any appreciable amount of tasar cocoons is gathered, is the wild tracts lying to the south of the Mirzapur district, which belong more properly to the region of Central India than of the North-Western Provinces. Cocoons are there collected by Kols, Chamars, and other jungly castes in the month of October, and are sold at the local bazars to putwas and other traders, who take them for sale to the Patna and Gya districts, and also to Ahraura Bazar in Mirzapur. From the last place the greater part of the cocoons are exported to Bengal and the Central Provinces, and a small part reeled there. The silk thus reeled is sent in its raw state to Benares, Patna and other districts. No weaving of cloth worth the name is carried on, there being only one family in Ahraura engaged in the manufacture. The selling price of cocoons in Mirzapur is from Rs. 5 to Rs. 5-8 per one thousand, but the trade is by no means extensive. Five specimen cocoons received from Mirzapur are herewith forwarded.

From the Deputy Commissioner of Hoshiarpur, to the Commissioner and Superintendent, Jullundhur Division, No. 507, dated 4th October 1876.

I informed you in my No. 447, dated 26th August last, of the first results of my experiments in the domestication of the tasar silk-worm.

2. I mentioned that cocoons were being produced by the worms hatched in my verandah, that these cocoons were produced very sparingly by hand-fed worms, most of which, indeed, died off, but pretty freely by the worms reared in the open on the ber tree (I have not been able to ascertain that the worms feed on any other tree but the ber tree). It is found on the grafted or Cabuli, as well as the common country ber, but it does not live on the hill variety of the ber which is distinguished by small leaves and by a white under side of the leaf. The cocoons from the earliest batch of worms appeared about the 10th August, or about 25 days from the birth of the worms. Cocoons went on being formed till about the 25th August, or a little later.

3. But hardly had the last cocoons formed when a second generation of moths began to hatch out from this batch of cocoons, and about the 3rd of September the second generation of worms began to appear.

4. I had these moths of the second hatching taken to Bharwain, and there I found, that wild males visited the females at night. I got a considerable number of eggs from this batch, and have distributed them over the district in all directions with a view to seeing how the insects would thrive under simple treatment in various parts of the district. They are all hatched now, and cocoons of the second batch will be formed immediately.

5. I now send specimens of reeled silk of one, two, three and five strands, and also of carded cocoons, which have all been turned out by a native, under my observation, from tasar cocoons of this district. This man sometimes said that he had learned the art from a Bengali, and sometimes that, being a silk grower, he had experimented on the native cocoon and found how to reel it, but had never reeled it in any quantity. He has reeled a good deal for me with great ease, and it appears to be of very excellent quality.

6. The process is most simple; the difficulty was dissolving the gum, and that has been entirely overcome, and under this treatment the thread reels off easily and rapidly. The preparation of the cocoons for reeling is extremely easy, and the whole process of preparation and the method of reeling could easily be learned in a day, and be carried out by women and children.

7. If, then, the silk proves to be of any mercantile value, the prospects of development of a new industry may fairly be entertained, for, from first to last, there is almost no expense, and the trouble involved, which consists in watching the worms while feeding on the trees and in reeling the silk, is small, and the labour, such as it is, of the lightest description.

8. I will be very glad to learn if the silk, of which I send samples, both reeled and corded, should be submitted to competent judges and what its commercial value may be. I should mention that these samples are mostly made from old cocoons, and that if fresh cocoons were used and a little extra care taken, the silk could probably be turned out even more glossy and soft.

From the Deputy Commissioner of Hoshiarpur, to the Commissioner and Superintendent, Jullundhur Division, No. 13, dated 10th January 1878.

I have the honour to report on the progress of my tasar silk experiment during the past year, with reference to correspondence ending with your No. 350 of 23rd February 1877.

2. I collected a large number of cocoons and they hatched out freely, as many as 100 moths being sometimes in the netted verandah together. This was at Bharwain in the latter half of July. I thus secured a large number of fertile eggs, and these were distributed throughout the district to persons likely to take an interest in the matter, with suitable directions for raising the worms on trees in the open.

3. The eggs hatched; but just then occurred the severe drought, and almost every worm throughout the district died. It seems absolutely necessary for the health, and even existence of the worm, that it should have damp weather during the month of its life in the larva stage. As regards rearing

cocoons then, the experiment has this year been a total failure, but from an explained cause, *viz.*, the exceptional circumstances of the season.

4. I tried to rear the worms by feeding them with leaves in the method practised with the *Bombyx mori*, but was no more successful than last year. Most of the worms died, and the few that survived to spin turned out small and weak cocoons. It seems established that this worm will not thrive except on the tree in the open. There again it has a terrible enemy in the ichneumon-fly and in birds; to these numbers succumb. But, as reported last year, I think with care it will be possible to rear them in this semi-domesticated state. I have now a plantation of young *ber* trees close to my house, in which an experiment under favourable conditions can be made next rains.

5. The past year, however, and the Government grant of money, have not in other respects been unproductive of results.

6. Securing the services of the reeler I had last year, I located him in the Industrial School, and got him to teach four boys, Rajputs and Brahmins from Unah tahsil, and they were apt pupils, and learned the art of reeling, which I hope will be useful hereafter.

7. I enclose specimens of reeled tasar produced in our Industrial School; also of tasar yarn and of thread spun from the yarn, this latter dyed. Also, I send a sample of silk cloth woven in a Jullundhur loom from the silk thus reeled at Hoshiarpur. I venture to think that this cloth is better than the ordinary specimens of Berhampur tasar.

8. I have had the opportunity of getting a reliable opinion from England as to the merits of this Hoshiarpur tasar, and I enclose a copy of the correspondence for the information of Government. Messrs. Dresser and Company of Coventry are a first-class firm.

9. I have also ascertained that the tasar thread is valued at Amritsar at Rs. 10 per seer, which is, I believe, a remunerative price, once the rearing of cocoons and the reeling of them (a very simple operation) was established as a cottage industry.

* * *

ENCLOSURE TO FOREGOING LETTER.

From MESSRS. J. BILL DRESSER & COMPANY, *to* MESSRS. SIR TITUS SALT, BART., SONS & COMPANY, *Saltaire, dated Coventry, 24th November 1877.*

In reply to your letter of yesterday. Tasar raw silk, such as the sample you have sent us, and which we have ticketed and marked S, is thrown into various descriptions of net silk, such as *organzine*, *tram* and *singles*. For tasar *organzine*, *tram*, we are to-day asked 7*s.* 6*d.* nett, which will be probably obtained, or somewhere thereabouts. We have an enquiry now for these silks.

At our last public silk sales in London in October, tasar singles and trams fetched, however, very low prices—3*s.* 6*d.* to 5*s.*

Your sample S seems to us superior to the bulk of the tasar now offering; and speaking for ourselves, if the quality of your sample can be maintained in the bulk, we should be glad of a consignment of one or more bales from India to test the market. Should this meet the views and designs of your correspondents, we shall be most happy to do our best to obtain as good a price as possible.

Any further information we can give you is very much at your service.

We return your sample by post.

We have a house in London and many foreign connections.

Copy of memorandum from SIR TITUS SALT, BART., SONS & COMPANY, *Saltaire, Bradford, to* TITUS SALT, ESQ., *dated 27th November 1877.*

Noil worth 1*s.* to 1*s.* 3*d.* *here.* It fluctuates as much as 50 per cent. in 7 days' time: last year it was in demand, caused by the Metallassa trade.

The noil yarn is worth about 1*s.* 6*d.* to 1*s.* 10*d.*

From F. HALSEY, ESQ., *to the Secretary to the Financial Commissioner, Punjab, dated Madhopur, 14th June 1877.*

In reply to your letter of 9th June, I am sorry to be unable to give a satisfactory report of the tasar cocoons sent to me from the Central Provinces.

Without the use of a strong alkali, it is found impossible to reel off the silk from the cocoons, and if an alkali be used, the reeled silk becomes almost useless.

The cocoons sent to me from the Central Provinces were also mostly rat-eaten or pierced (caused by the exit of the moth), and consequently not adapted for reeling.

I am generally of opinion that where the *Bombyx mori* thrives, few will be found who will undertake the rearing or reeling of the tasar; also, I think, it would be a mistaken policy to encourage the cultivation where the more valuable *Bombyx mori* exists.

There is no doubt that the tasar cocoon would be made use of; but before it can, special machinery will have to be constructed, and no manufacturer will go to the expense of this, unless he be sure of a constant and large supply of the raw material.

From the Chief Commissioner of the Central Provinces, to the Government of India No. 1185—49, dated Nagpur, 29th March 1876.

In your letter No. 155, dated 23rd November last, on the subject of tasar cocoons, it was requested that 50 maunds of cocoons might be collected at the proper season at different railway stations in the Central Provinces, exact accounts being kept showing the cost of collection, &c. Of these 50 maunds, 10 to 15 might be pierced. Some other information was also called for, and lastly it was asked that, if possible, a couple of maunds of cocoons (live, if available), might be sent to Mr. F. Halsey at Madhopur in the Punjab.

2. In paragraph 3 of this office letter No. 4533—199, dated 16th December, the Chief Commissioner stated how he proposed to get together the cocoons required by Government, and in the 4th paragraph he said that he would try to send a couple of maunds of cocoons to Mr. F. Halsey.

In January the Deputy Commissioner of Chanda reported that he would be able to send two maunds of cocoons to Mr. Halsey, and he was directed to do so. The cost of these two maunds he estimated as follows:—

	Rs.
Price of two maunds of cocoons, at Rs. 20 per maund ...	... 40
Carriage up to Hinganghat Railway Station ...	... 4
Railway charges beyond	... (not known)

and these two maunds have since been sent.

3. Replies regarding the 50 maunds required by Government have now been received from the District Officers of Chanda, Betul, Seoni, Raipur, and Sambalpur, and the replies may be epitomised thus:—

Chanda. The District Officer has now got together 8 maunds of unpierced cocoons and a few seers of pierced ones, and the cost of the 8 maunds of unpierced ones is 8 maunds, at Rs. 32 per maund = Rs. 256.

They will be carried by Dhimars to Hinganghat, and the exact payment on this account is hence not accurately known and will be reported hereafter. The Deputy Commissioner further reports that the outturn of cocoons in the Khalsa is estimated at 375 maunds.

Betul. The Deputy Commissioner can collect no cocoons until October next, and then he will only be able, he thinks, to collect about 3 maunds, which, inclusive of transport to the Itarsi station of the Great Indian Peninsula Railway, cost about Rs. 105, that is, Rs. 35 per maund put down on the line of rail.

Seoni. The Deputy Commissioner reported a little time ago that the tasar crop had entirely failed, and that the Koshtas were importing cocoons in large quantities from Benares. The Deputy Commissioner, however, purchased 1 maund 36 seers (4 seers of which were pierced) of the Seoni crop for Rs. 102-9-7, which he now has. The estimated average outturn in the Seoni district is 80 maunds per year, and this outturn, the District Officer thinks, could be increased up to 150 maunds, if the cultivation of tasar in the reserved forests were permitted. The cost of transport to Jubbulpore would be stationary, and about Re. 1 per maund. The Deputy Commissioner thinks there would be no difficulty in his arranging for 10 maunds in October next by his giving advances to the rearers. The price per maund he estimates at about Rs. 40.

Raipur. The Deputy Commissioner reports that the increased attention paid to lac has caused tasar cultivation to recede, and he thinks that even if he made arrangements beforehand, it would be difficult for him in October next to get together from 50 to 60 maunds of cocoons, pierced and unpierced. The price per maund at Raipur would be about Rs. 38, or, if sent on by cart to Sambalpur to go thence by boat to Calcutta, Rs. 40.

The Deputy Commissioner does not think that the industry in his district is ever likely to expand, even if the demand for cocoons were brisk.

Sambalpur. The Deputy Commissioner cannot get any cocoons before the close of the present year, but by making arrangements beforehand, he thinks he could get a limited quantity at a cost of Rs. 60 per maund of unpierced cocoons of the small variety, and Rs. 40 per maund of the large variety at Sambalpur.

The Deputy Commissioner does not think that the cost of collection and transport would vary much whether a large quantity had to be collected or a small. He thinks that if funds were made available to him, he would find little difficulty in collecting 500 maunds. "To do so I would," he writes, "require a special establishment of, say, a mohurrir on Rs. 15 and three chuprasis on Rs. 5 per mensem for a period of six months. With this establishment it might perhaps be possible for us even to collect 1,000 maunds of cocoons; but as there are no data on which anything like an accurate estimate of the annual outturn of cocoons in this district can be based, I fear that if Government were to enter the market as a very large purchaser, it would cause a serious increase in price, and perhaps ruin the tasar silk weavers of the district."

4. The information above given may perhaps enable Government to determine whether it will collect cocoons in any quantity during the present year; if it should determine to do so, the local authorities should be permitted to make advances in April or May next. For the present there are only some 10 maunds collected, nearly 2 maunds of which are at Seoni, and which can be sent at once to Jubbulpore, and 8 maunds now ready at Chanda. The Chief Commissioner will be glad to hear what Government wishes done with these 10 maunds, that is, where are they to be sent, and to whom?

From the Chief Commissioner of the Central Provinces, to the Government of India, No. 2417—98, dated 28th June 1876.

With reference to your letter No. 51, dated 21st April 1876, I am directed by the Chief Commissioner to say that the Deputy Commissioners of Seoni and Chanda having satisfied themselves, to the best of their ability, that the worms were killed and the cocoons properly dried, forwarded them to the Bombay Government for transmission to the Secretary of State, and I am now to annex copy of a letter, No. 26 of 1876, from the Bombay Government to the Under Secretary of State for India, intimating the despatch of the Chanda cocoons and the probable transmission at an early date of those for Seoni.

2. With reference to paragraph 4 of your letter under reply, I am to say that the Chief Commissioner fears it will not be possible to put down cocoons at a railway station at a price not exceeding Rs. 30 per maund; the lowest price at which the Deputy Commissioner of Chanda reported his ability to supply them was at Rs. 37 per maund put down at Mul, a tahsili thirty miles distant from Chanda, and so much farther from the line of rail.

3. The Deputy Commissioner of Chanda mentions a curious fact regarding excessive dryage among the cocoons, which the Chief Commissioner will give in his own words :—

"The cocoons reached Chanda about the middle of March. Since then the dryage has been so great as to reduce their weight by about a half. This will be seen from the following table. They were received in two consignments :—

Date of despatch from Mul.	Weight at Mul.	Weight when received at Chanda.	Weight on 6th May.	No. of cocoons reported by Tahsildar of Mul.
	M. S.	M. S.	M. S.	
8th March 1876 ...	... 1 34	1 34	3 35	15,850
10th „ „ ...	... 5 36	5 25		55,000
	7 30	7 19		70,850

"The weighing on the 6th May was carried out by the Deputy Commissioner, and on the 7th the cocoons were counted before him. The number was found to be 70,680, or only 170 short of the number reported by the Tahsildar of Mul. It is possible that there may have been some slight mistake in the Tahsildar's counting, and a few may have dropped in transit. I fear the Chief Commissioner may be surprised at the great dryage, but I have no reason to believe that there has been any unfair dealing anywhere. Since their receipt at Chanda the cocoons have been kept in a large chest in the malkhana, the key of which is kept by the District Nazir."

From the Chief Commissioner of British Burma, to the Government of India, No. 320—14, dated 28th October 1876.

I am directed to acknowledge the receipt of your endorsement No. 5—161, dated the 23rd November 1875, forwarding a copy of Resolution No. 5—156-165 of the same date, regarding the development of an industry in the tasar and other wild silk-spinning worms of India, and asking for proposals or suggestions on the subject.

2. In reply, I am to say that from reports received it appears that the tasar worm is not found in the Pegu Division; that in the Arakan Division cocoons are to be found only in the town of Akyab, and in the Tenasserim Division only in the Amherst District. In the latter district the Deputy Commissioner reports that the worm is found on a variety of trees, and that the natives recognise it as a silk-producing creature, but make no use of the cocoons.

3. Specimens of a cocoon were received from the Deputy Commissioner of Henzada. These were sent to Calcutta, and on examination were found to belong to the mulberry silk-worm, *Bombyx mori*, the manufacture of silk from which has been found by experiments in Bengal to be unremunerative.

4. Two attempts were made at the Magayee plantation by the Forest Department to breed the worm, but both have resulted in failures.

From the Chief Commissioner of Mysore, to the Government of India, No. 9231—188G., dated 23rd January 1878.

With reference to the Resolution of the Government of India, No. 5—156-165, dated 23rd November 1875, on the possible development of a profitable industry in the silk of the undomesticated silk-spinning worms of India, especially that of the tasar (*Antheræa Paphia*), I am directed to submit copies of the marginally noted Proceedings of the Chief Commissioner on the subject, from which it will be seen what action has been taken in the matter to give effect to the orders of Government, and that further little or nothing is known of the tasar-worm by the officials or people of this province.

Proceedings of the Chief Commissioner, No. 7308—162, dated 20th December 1875.
Ditto ditto „ 7579—132, „ 1st November 1876.
Ditto ditto „ 8972—163, „ 1st December 1876.
Ditto ditto „ 11156—221, „ 1st February 1877.

2. The Chief Commissioner much regrets the delay in the collection and submission of the information called for, which, I am directed to state, is mainly attributable to the pressure of work owing to the prolonged famine and failure of rains throughout the country.

ENCLOSURE TO FOREGOING LETTER.

Extract from the Proceedings of the Chief Commissioner of Mysore, General Department, No. 579—32G., dated 1st November 1876.

Read again—

Government of India Resolution No. 5—156-165, dated 23rd November 1875, on the subject of the development of an industry in the silk of the tasar and other wild silk-spinning worms of India.

Read also—

Chief Commissioner's Proceedings No. 7308—162G., dated 20th December 1875.

Order thereon by the Chief Commissioner of Mysore.

In the Chief Commissioner's Proceedings above recorded, the Commissioners of Divisions, Deputy Commissioners of Districts, Superintendent of Coorg, &c., were desired to make careful enquiries as to the localities (if any) where the tasar cocoons could be obtained, the probable quantity procurable, and as to other particulars of interest.

2. The services of Captain M. F. Coussmaker, Assistant Superintendent, Mysore Revenue Survey, who had offered his assistance in procuring photographs and papers descriptive of the worms and cocoons, were also enlisted, and before his departure to England that officer reported that he had himself circulated notices to all the districts in which the tasar-worm was likely to be met with.

3. The enquiries made in this office order No. 7308—162G., dated 20th December last, have elicited replies from several district officers and from the Commissioner of the Nundydroog Division, who forwards reports from the Bangalore and Tumkur districts. The Commissioners of the Ashtagram and Nagar divisions have not yet replied.

4. The result of the reference is to show that little or nothing is known of the tasar worm by the officials or people, though the enquiries made have led to the discovery of the cocoons in certain taluks of the Bangalore District, where forest abounds, and also in the Manjarabad forest country. Mr. Ricketts, the Deputy Commissioner of Bangalore, reports that "the cocoons are reported to be found on *yelachi*, *nayibela*, *heddarane*, and certain other trees, the tender leaves thereof being the natural food of the worms, and that they are said to be rare and procurable only in small quantities." He adds that "during the early rains another kind of tasar cocoon of a smaller size is found in the jungles of Magadi and Closepet," and that offers have been made to him by some silk manufacturers to make experiments on both these products. The result of these experiments will be awaited.

5. The Chief Commissioner concludes that if the appearance and habits of the tasar-worm and cocoons were more generally known, they would be found more or less in all the forest tracts of the province. In order to effect this object, the following descriptive notice, prepared by Captain Coussmaker of the Bombay Revenue Survey, will be separately printed and distributed in all taluks. Copies of the photographs illustrative of the tasar caterpillar and its cocoons will also be forwarded to the Deputy Commissioners, who might circulate them among the taluk amildars for inspection.

6. The Deputy Commissioners of the six districts marginally named are authorized to expend any small amount up to a limit of Rs. 50, in causing a search to be made for the worm, and procuring specimens of cocoons, as well as full information as to its prevalence, habitat, &c.

Bangalore. Tumkur. Mysore. | Hassan. Shimoga. Kadur.

7. The Chief Commissioner desires that all cocoons may be sent to the Superintendent, Central Jail, and that Dr. Henderson will make such experiments as the means at his disposal admit, in order to ascertain the character and value of the thread, a report being submitted on the subject as soon as practicable.

Descriptive notice of the Tasar Silk-worm.

In order to ascertain whether the silk produced by the *tasar-worm* can be developed into a useful industry, to supply the place of the silk-worm, which of late years has been found very difficult, if not impossible, to rear, the Government of India have directed enquiries to be made as to the localities in which the tasar-worm is to be found, the probable quantity procurable, and such other particulars of interest regarding it.

The tasar-worm is usually found in forests, and is said to feed on the *yelachi*, *nayibela*, and *heddarane*, and other trees, the tender leaves of which are its natural food. The Deputy Commissioners have received the Chief Commissioner's instructions as to the measures to be taken for searching for the tasar caterpillar or worm and its cocoons, and the following description is given to aid this object.

About the end of May or beginning of June a moth issues from these cocoons and lays its eggs, which look somewhat like small flat grains of jowari on the leaves of the trees; after a few days a small dark worm emerges, which feeds upon the leaves, and growing very quickly, becomes first yellow with black rings and spots, and afterwards green with beautiful small blue, gold and reddish spots upon it, and sometimes besides three or four spots like silver on its side. It continues to grow till it is as big as a man's finger, and then, pulling two or three leaves together, it makes a cocoon or house for itself, which is all made of separate threads strong enough for every purpose like cotton. There are two crops of the cocoons in the year: the moths come out first in May, June and July, then the caterpillars live for 50 days and make their cocoons; from these the moths come out in August, September and October, and the caterpillars make cocoons again in October, November and December, and then, as the cold weather and after that the hot weather comes on, the insects inside remain dormant till the rains come again, when the leaves are nice and fresh, and afford good food for their young ones. Cocoons of all kinds those that are new, heavy and whole, as well as those that are old, burst, stained, light, gnawed, or cut, will come to use, but the first kind are the most valuable.

During the rainy season the caterpillars will be found feeding in great numbers on the trees above-mentioned, and also on those marginally detailed, and the men should look for them, so that they may know where to look for the cocoons in two months' time. If they have trees of the above kind near their own houses, they can cut off twigs with the caterpillars hanging to them (the caterpillars being very delicate should not be touched), and fasten the twigs on to their trees and leave them; the caterpillars will climb up of their own accord, and after a time make their cocoons. Thus, after a very short time, the men will recognize these caterpillars wherever they see them, and then they will easily find the cocoons. When the caterpillars eat, they devour one leaf after another, leaving the twigs bare, and as they do not move much, the ground underneath becomes strewn with their dung, which is at the last as big as that of a sheep, only very rough and deeply grooved. When the men find the cocoons, they should take them carefully off the trees, and tie all that are good and heavy on to strings, which they should put away (say hanging from the rafters of the house) safe out of the reach of rats and squirrels, and if possible ants as well, for all these eat the insects.

	Kanarese.
Matti ...	Matti.
Jáir or bori-guti mara ...	Yelachi.
Karunda. (Hind) ...	Karunda.
Nandrook. (Tel) ...	Tella barrauki.
Kalakur or Sendi ...	Ven-táku or Beuteak.

2. The amildars of taluks will explain the above to all the people in the taluk, and induce them to try the experiment which has proved very successful and remunerative in Bombay.

From the Deputy Commissioner of the Kadur District, to the Commissioner of the Nagar Division, No. 110, dated 31st May 1876.

Adverting to your circulars as per margin and the Chief Commissioner's Proceedings therein alluded to, I have the honour to report that, on the receipt thereof, I addressed Captain Coussmaker on the subject with a view of

No. 533, dated 2nd January 1876.
„ 601 „ 6th March „

ascertaining the Kanarese names of the trees on which it was stated the tasar silk cocoons were to be found. I also asked for specimens of the cocoons for circulation to the amils. That officer very kindly furnished me with a pamphlet, a photograph of the worms, &c., as well as with a few cocoons. The latter were circulated to the amils with the following results.

2. The accompanying two specimens in packet marked A were received from the amil of Lakvalli. Some were found in Yedehalli Hobli, in a clump of bamboo, the others in the Lakavalli Hobli on the "Karematti mara" (*Terminalia tomentosa*). These were collected in the hot weather, and the amil states that a few only could be procured, but promises to continue his enquiries during the monsoons, and report if the cocoons are procurable in any large quantities. He also adds that he was informed by the Forest Ranger that on the "Bandarike mara," as well as on the tall grasses known to the natives as "Gardahullu" and "Nuggihullu," and several shady forest trees in his range, he was asked to watch and report to the amil the places where he might come across them again in his rounds.

3. The amil of Banavar sends two specimens (*vide*-packet market B) found on the "Hirikalgudda," and reports that they are procurable on the "Belvantha mara," "Jala mara" and "Dindiga mara."

4. The other amils report that cocoons are not at present procurable.

5. I have desired the amils to get the village officials, shepherds, &c., to make a search during the monsoons, and to direct them, when looking for them, to search under the trees and mark those which have the ground strewn with the dung of the caterpillars, which is said to be as big as that of sheep, only very rough and deeply grooved, so that eventually they will be able to procure the cocoons more readily. Should I succeed in getting a suitable supply, I shall sumbit a further report. It will be seen that the Lakavalli and Banavar specimens differ from each other.

From Dr. J. Shortt, *Inspector of Vaccination, Madras Presidency, to the Chief Commissioner of Mysore, No. 1459, dated 26th January 1877.*

I observed some little time ago in the newspapers that an interest was evinced in the matter of "tasar silk" and that arrangements were about being made for collecting the worm; under the circumstances, I have the honour to send you a short account of the tasar silk-worm, with the original drawings of the worm in its different stages, and to request the favour of the same being presented to the Chief Commissioner.

Should the Chief Commissioner wish it, I dare say I shall be able in a little time to send him some cocoons from this. I was not in Madras at the time, or I should have sent this before.

A brief account of the Tasar Silk-worm, by Surgeon J. Shortt, M.D., *Superintendent General of Vaccination, Madras Presidency.*

(Reprinted from the "Madras Monthly Journal of Medical Science.")

Some time ago I observed that accounts of the silk-worm were called for by the Board of Revenue, especially of those that are indigenous to the country, and as I was then in camp I could not attend to the subject, but having had drawings of the tasar silk-worm by me for some time, and believing that the subject is one of great interest, I now beg to submit the following remarks explanatory of the drawings that accompany it:

The *Phalæna pipa*, Linn; *Antheræa Mylitta*, *Saturnia Mylitta*, Drury, is commonly met with in most parts of Southern India. My attention was first attracted to the subject in 1855-56 whilst in the jungles of Orissa with the Topographical Survey. I there observed that it was bred in the most of the hill villages, and that a large quantity of tasar silk was exported from thence to Calcutta, Madras and other places. The hill natives, Ooriahs, and some of the lower tribes, as well as Tellingas, first collect cocoons, and in most instances, from their size and form, they are able to recognize the male from the female cocoons pretty correctly, and carefully preserve them till the moths emerge, when the males are let loose, while the females are carried to a tree they select for the purpose in the vicinity of the asan or *Pentaptera tomentoas* (*Terminali*

tomentosa), on which they are placed, where they soon begin to creep along the branches with quivering wings, and in a short time, varying from one to eight hours, the males by some instinct get attracted to the spot that contains the females, and an immediate union of the sexes takes place. This lasts from three to four hours, and shortly after the female begins to deposit from 100 to 200 eggs on various parts of the twigs of the tree; 33 of these eggs weigh five grains. These eggs when freshly deposited are sticky, but as they dry they adhere firmly to the bark of the stem where they were deposited, and often to each other, forming a cluster. The moth dies the next day and the male also perishes about the same time.

I should mention here that the natives watch the tree to keep away crows and the birds from destroying the moth, as well as to ascertain the time of the arrival of the male, by which they pretend to prognosticate the success or failure of the undertaking, attributing the rapidity of arrival as a sign of prosperity, and a lateness of arrival as indicative of non-success; but, as I have ascertained for myself, there is no truth in such assertions.

Others, again, keep the moths on small branches or twigs of the asan or ber trees about the outside of their huts, or tied on to other trees till the union is effected and the eggs are deposited. The eggs are of the size of a split peppercorn: nine of them in line occupy the space of one inch in length. They are circular and bi-convex with a light creamy colour. These they keep till the young larva begin to emerge from the eggs, when they are taken and tied on to asan trees, on which the young disperse themselves. A watch is kept during the day to keep away squirrels, birds, crows, &c., and at night a fire is kindled in the vicinity to frighten away bats, while the root stem is surrounded with ashes to prevent ants having access to them; and in the selection of trees, care is taken to avoid those that are infested with ants.

The worm is very small, scarcely perceptible when first hatched, but before it attains maturity it is from three to four inches long and from two to three lines in girth. The larva is of a light green colour with a slightly yellowish streak on either side, and the sixth and seventh segments are marked with an oblong yellow spot, and on the back are several round darker coloured spots surmounted with a few dark coarse hairs, while smaller ones are scattered all over the body. The larva is chiefly found on the *bair* or *Zizyphus jujuba*, *asan* or *Pentaptera tomentosa*, and the *teak* or *Tectona grandis*. I have found them chiefly on the bair tree in Madras, although I got one cocoon from a teak tree, and another from a casuarina at Mr. H. Church's, Perambore. The larva when ready to undergo transformation forms a cord round a twig from a peculiar resinous substance it secretes, and with which it also encircles the selected part of the branch, and then prolongs it to the extent of one or two inches. If the branch is thick the cord is short and stout and about a line in girth, but if it be a twig the cord is thin, from three to four inches long, and fastened to an upper and thicker branch and prolonged to the end of the twig with several intermediate ties of the same material. From the end of the cord, which is solid, begins the expansion of the cocoon, which is reticulated with fine fibres of the same stuff as the cord is made of on the outer surface, thus giving firmness and solidity to the cocoon; and as it approaches completion, a few of the leaves in the vicinity are drawn to line and conceal the cocoon externally, and thus to a certain extent mask it from observation; but this only occurs on the bair tree, for I have seen no such leaves attached to the cocoons found on other trees where the foliage is large and dense. The larva now imprisons itself within the cocoon, and the same secretion that forms the cord is freely applied to all parts to make it water-tight. Having done this, the transformation commences, and lasts nine months before the moth is perfected, having its head at the upper part next to the cord, from whence it appears to discharge an acid secretion which readily dissolves the plastering from the cocoons, and the fibres of silk giving way, the perfected moth emerges from its prison, as a rule early in the morning about daybreak. That the secretion is an acid can be readily ascertained by examining an empty cocoon immediately after the moth has emerged, as, the part being moist, it can be readily tested with litmus when it is seen to give an acid re-action. This knowledge I have practically applied by adding diluted sulphuric acid to the water in which the cocoons are boiled to dissolve the gummy

substance out and loosen the thread, and it can then be readily wound off on a hand-reel.

The male and female moths differ in size, the male measuring from the tip of one wing to the other between four and five inches, whilst the female measures from six to seven inches in expanse of wing. Both are of a uniform yellowish brown, having a couple of lunated transparent talc-like spots in each wing, and it is chiefly in the form of these spots that they differ from other moths of the same kind, namely, the *Saturnia atlas*, in which they are of a triangular form, and the moths themselves have a greater expanse of wings.

It takes from ten to twelve days for the eggs to hatch, and from six to seven weeks from the extrusion of the young larva to the completion of the cocoon.

When the cocoons have been collected they are taken home and placed in an earthen chatty containing water, to which a quantity of wood ashes is added to facilitate the solution of the gummy substance, and weighted with stones to keep them under water. Should the ashes not suffice, the boiling is prolonged for hours before the cocoons are softened and the threads loosened, when they are reeled off on a hand-reel, and the fibres from several cocoons are reeled off together to form a single strand of thread, and are subsequently formed into hanks for disposal. By this means a good many natives get their living about the hill villages of the Tributary Mehals of Cuttack, as also in the Sumbulpore district.

The cocoon is slightly rough, of a greyish white colour, and slightly reticulated externally with an internal smooth varnished surface; is of an oval form measuring one and a half inches in length and one inch in breadth: the average weight with the chrysalis is 150 grains, that of the chrysalis itself 130 grains, the empty cocoon twenty grains, and the prepared thread twelve grains. But the cocoons vary much in size, and while some are large others are small.

I have now over thirty cocoons in my possession, some of which were in my keeping for the last five months, whilst others were but recently collected. The Orissa Paiks and other hillmen cut the cocoons up into circular strips to tie around their matchlocks to keep the barrel firm in the stock; they also use it as a cord for various other purposes, and it is reckoned to be very strong and durable.

The soundness of cocoons may be ascertained by their weight, as well as by movement of the chrysalis within when they are shaken, and should my duties keep me at the Presidency, I intend trying some experiments for their propagation, and will, if desirable, submit a drawing of the larva, with an account of any further experiment that I may conduct. The difficulty in carrying out such an experiment for the propagation of the species consists in securing at the same time both male and female moths, and for this purpose a large number of cocoons is necessary, as otherwise it is possible that the few one possesses may turn out either all males or all females, as has happened to me more than once. For instance, on the 17th June a female moth emerged, and on the 23rd two other females issued; shortly afterwards they discharged a slightly viscid secretion, and from three to four hours after their escape from the cocoons they began to deposit a large number of eggs (about 200) without a previous union of the sexes, which union is essential for fertile eggs, otherwise the eggs do not perfect. Of the cocoons now in my possession I am indebted to G. H. Cammiade, Esq., for several very good specimens; to R. H. Bell, Esq., for a couple that that gentleman has had for some months in keeping; F. Church, Esq., for a couple of cocoons and a female moth. A large quantity of cocoons may be collected from the bair trees about Madras, but the labour of searching for them will cost more than the silk produced will realize. I lately heard of a gentleman in Madras who succeeded in collecting and reeling off about ten pounds of this silk.

From the Chief Commissioner of Assam, to the Government of India, No. 256, dated 9th February 1877.

* * * * * * * * *

3. After careful inquiry, the Chief Commissioner has come to the conclusion that the tasar silk-worm (*Antheræa Paphia*) is either not to be found in the

forests of this province at all, or is very seldom to be met with. There is an undomesticated silk-spinning worm, called the "katkuri mugá," found in Upper Assam. When found in mangoe trees, this silk-worm is called by the natives "amvat." But this silk-worm is very scarce, and any attempt to collect "katkuri" cocoons, and to develope an industry in that silk, could not fail to be unprofitable. It is believed that the "katkuri" might be domesticated, and it might then be possible to secure a fair supply of cocoons. But the filaments spun by the "katkuri mugá" are delicate and brittle, and are not continuous, and considerable difficulty would be experienced in reeling. The Chief Commissioner thinks that when we possess a semi-domesticated silk-worm in the "muga" worm eminently adapted to the circumstances of the country and of the people, and from the cocoons of which a good description of thread can be obtained without difficulty, to attempt to create a "katkuri" silk industry would be but to court failure. The tasar worm is said to be found in the jungles of Cachar and in Sylhet, in the terai jungles under the Khasi and Jaintia and North Cachar Hills. But Colonel Keatinge much doubts if the tasar worm is found so far east. Still in Sylhet, at least, there is found an undomesticated silk-spinning worm, more or less closely related to the *Antheræa Paphia*. Mr. Weynton, a tea-planter in Sylhet, has made experiments with this worm. Half of the worms he collected he placed out in the open on a common banian tree (*Ficus Indica*), and the other half he kept in the house. He discovered that the silk from the cocoons raised under cover was far inferior to that from the cocoons gathered from the tree in the open; and he strongly recommends the open-air system of rearing. In regard to the reeling of the filaments of the tasar cocoons, Mr. Weynton writes as follows:—

"The gum alluded to in paragraph 10 [of the Government of India Resolution] is dissolved by mixing in the water ashes of burnt bamboo, any particles that adhere being easily removed during reeling by an occasional flick of the thread by the finger and thumb. The constant breakage of the thread during reeling I have seen obviated, or rather repaired, by the reeler rejoining the ends by a rapid twist of the forefinger and thumb, moistened by a pinch of the gum from a half steeped cocoon kept at hand for the purpose. The rapidity with which the splicing is done by an experienced woman is remarkable.

"My own impression is that this bee kage can be get over by well steeping the cocoons in the ashes and water, to thoroughly dissolve the gum; and if the 'lye' could be clarified by filtering or straining, so as to remove the woody particles while retaining the potash, tasar skeins would soon form an important item of export. * * * Care must be taken that the solution of potash be not too strong, and that the threads led into the reeler be sufficiently wide apart to ensure a thorough drying."

4. The Chief Commissioner, however, is of opinion that any attempt to foster the growth of a tasar silk industry in Sylhet would prove abortive. The extent of country in which the cocoons are to be found is limited, and Colonel Keatinge does not think that the domestication of the wild worm on any large scale is feasible in Sylhet.

5. With regard to the general issues raised, the Chief Commissioner has no suggestions to offer. The difficulty in connection with the unwinding of the filaments from the cocoon appears to have been got over, and some such operation as that described by Mr. Weynton might prove successful in combating the difficulty in regard to the brittleness of the tasar filament.

6. While, however, deprecating any attempt to create a tasar silk industry in this province, Colonel Keatinge would draw attention to the existing and old-established silk industries of Assam which might open a wide field for private enterprise if it were not for the extraordinary delays that exist in communications between Assam and the rest of India,—delays which make it impossible for European merchants to visit the province or to supervise operations in which they have invested capital.

7. The three principal silk-worms of Assam are—

I.—The pát silk-worm (*Bombyx mori*).

II.—The eria silk-worm (*Attacus ricini*).

III.—The mugá silk-worm (*Antheræa Assama*).

8. The culture of the Bombyx worm, which is reared on the leaves of the "muni" tree (*Morus Indica*) presents very great difficulties in Assam; and the question of extending the pát silk industry need not be seriously discussed.

9. The eria worm is a domesticated worm. In Lower Assam it is reared chiefly on the leaves of the castor-oil plant (*Ricinis communis*), and in Upper Assam it is reared almost entirely on the leaves of the "kesseru" tree (*Heteropanax fragrans*). Both these plants are easily cultivated, and could be raised in sufficient quantities to supply the largest filatures. The eria silk industry is in a fairly flourishing condition, owing to the very high esteem in which eria silk stuffs are held by the neighbouring hill tribes and the Thibetans. Eria thread sells at about Rs. 3 per seer.

10. We now come to the mugá worm. In former years the mugá silk industry was most important; but latterly it has been gradually falling into decay. The mugá worm produces two distinct kinds of silk, according to the description of tree on which it is reared—the "mugá" silk and the "mejánkuri" silk. When the object is to produce mugá silk, the worm is reared (in Upper Assam) on the soom tree (*Machilus odoratissimus*) and (in Lower Assam) on the sualu tree (*Tetranthera monopetala*). When it is wished to obtain mejánkuri silk, the worm is reared on the adakuri tree (*Tetranthera polyantha*). The mugá thread sells for about Rs. 8 per seer. The mejánkuri thread is much finer, glossier, and of a lighter colour (and therefore more easily dyed) than the mugá thread, and fetches about fifty per cent. more. Both threads are very easily reeled. As has been stated in my letter No. 3832, dated 21st November 1876, the soom tree is gregarious, and hundreds of square miles of soom forest are to be found in Upper Assam. The adakuri tree is plentiful in Upper Assam; but it is not, like the soom, a gregarious tree; and if the production of mejánkuri silk on a large scale were to be attempted, it would be necessary to form nurseries from which plantations could be stocked.

11. The manner in which the *Antheræa Assama* is reared in the soom forests of Upper Assam has been described frequently in various reports, and need not be detailed here. The Chief Commissioner would, however, remark that the semi-domestic culture of the mugá worm would appear to be the culture best suited to the tasar worm.

12. The mugá and eria silk stuffs, which in former times were the dress of the whole population in this province, are being gradually superseded by less expensive English piece-goods; and Colonel Keatinge is of opinion that any efforts to stimulate the local consumption of these silks would be useless; that we must look to creating an export trade of cocoons or silk thread if we would wish to maintain the silk production of Assam. To this end it will be necessary to decide the points noted in paragraph 19 of the Government Resolution, in respect to the cocoons of the Assam silk-worms, and the Chief Commissioner would be very glad if the Government of India would cause experiments to be made on them in some of the leading filatures in India.

From the Resident at Hyderabad, to the Government of India, No. 11, dated 20th May 1876.

With reference to your endorsement No. 5—164 of the 23rd November last, forwarding copy of the Resolution of the Government of India regarding the development of the industry in tasar silk, and inviting proposals and suggestions on the subject, I have the honour, by desire of the Officiating Resident, to forward, for the information of His Excellency the Viceroy and Governor General in Council, copy of a report,* with enclosure, received from the Commissioner, Hyderabad Assigned Districts.

* No. 1527—334, dated 12th May 1876.

2. It will be perceived from these papers that the tasar silk-worm does not abound in any of the forests in Berar, that there is no silk industry in the province, and Sir R. Meade has consequently no proposals to submit on this subject at present in connection with the Hyderabad Assigned Districts.

ENCLOSURES TO FOREGOING LETTER.

From the Commissioner of the Hyderabad Assigned Districts, to the Second Assistant Resident at Hyderabad, No. 1527—334, dated 12th May 1876.

I have now the honour to reply to your letter No. 940, dated 13th December 1875, forwarding copy of Resolution by the Government of India, in the

Department of Revenue, Agriculture, and Commerce, No. 5—156-165 of the 23rd November 1875, on the subject of the development of the tasar silk industry in India.

2. The officers whom I consulted were the Deputy Conservator of Forests and the Deputy Commissioners of Booldana, Woon and Bassim, the three districts in which there are forests.

3. The Deputy Commissioner of Booldana reports that there are no wild silk-spinning worms in his district.

4. The Deputy Commissioner of Woon states that he has been able to collect very little information about the tasar worm, which is not found in any quantity, and about which no trouble is taken. The inhabitants of the jungles collect the few cocoons they find and sell them to the grain-dealers, who again sell them at Chanda in the Central Provinces. The worm when found is usually on the *daora* and *ain* trees. On a rough estimate, about 10,000 cocoons are found in the year, but no silk is reeled in the district. The Deputy Commissioner's informants told him that tasar worms found in a black soil country were not to be compared with those found in a red soil district, and therefore they could not compete with cocoon-gatherers in Chanda.

5. The Deputy Commissioner of Bassim reports that tasar worms are rarely seen there. In the Poosud talook a few cocoons are found, but there are no purchasers for them. Silk is neither reeled nor woven into fabrics, nor do any of the inhabitants know how to rear the worms.

6. A copy of the Deputy Conservator's reply is appended for the Resident's perusal.

From the Deputy Conservator of Forests, Hyderabad Assigned Districts, to the Commissioner of the Hyderabad Assigned Districts, No. 121—208, dated Chickulda, 8th May 1876.

In reply to your letter No. 217-18, dated 18th January 1876, I have the honour to state that to the best of my belief the tasar silk-worm does not abound in any of the forests of Berar.

2. In the Melghat, some years ago, small quantities of cocoons used to be collected by the Koorkoos and sold to purchasers from Boorhanpoor in the Central Provinces, but since the introduction of strict forest conservancy, the collection of cocoons and such like articles of minor produce has been discouraged owing to the great danger of fire that results from allowing people to wander over the forests indiscriminately, as must be done if minor produce is to be collected in any quantity.

3. In a few more years, when the forests will have become denser and the present rank growth of grass in a great measure eradicated, I hope to be able to take steps for developing the resources of the Melghat and other forests in Berar in the matter of minor produce.

From the Secretary of State for India, to the Government of India, No. 25 (Revenue), dated 22nd March 1877.

With reference to Your Excellency's despatch, dated 21st April (No. 3, Silks and Fibres) 1876, I have to inform you that the tasar cocoons from Bombay and the Central Provinces arrived last July, and that samples were sent to Mr. T. Wardle, to Mr. Mylins, of Buffalora, in Lombardy, to Messrs. Lister of Bradford, to Mr. A. B. Farn, and to Messrs. Durant and Company of Copthall Court. With regard to experiments in the south of France and Italy, Mr. Wardle himself undertook a journey with a view to getting samples of the cocoons wound at filatures in France and near Milan.

2. Messrs. Lister, of Bradford, were unable to make the experiments with the tasar cocoons, as they are not silk winders (*filateurs*). Only one other reply has as yet been received, namely, a preliminary report from Mr. Wardle, written after his return from Italy, a copy of which is herewith transmitted for the information of your Government, together with some samples sent with it.

3. It will be seen that the cocoons are reported to have been very old and imperfect, but the experiments indicated that good results would be obtained with new and fresh cocoons. If, therefore, you are desirous that the experiments should be continued, it is desirable that another more carefully selected

supply should be sent home; and I would suggest that the collection should be made under the superintendence of Captain Coussmaker.

4. Further reports will be transmitted for the information of Your Excellency's Government as soon as they are received at this office.

5. Mr. Wardle reports that he has made improvements in the dyeing of the tasar silks. It is important that his dyeing experiments should be continued, and I therefore request that the collection of the Indian dye stuffs may be completed and forwarded to me with as little delay as possible.

ENCLOSURE TO FOREGOING LETTER.

From THOMAS WARDLE, Esq., *to* J. FORBES WATSON, Esq., M.D., *India Office, dated Leek, 3rd January 1877.*

Since my return from France, in November last, I have been so much occupied with my dyeing operations as to have been unable to write my report sooner.

I took with me some of the tasar cocoons, and gave out a small quantity to one of the best silk reelers in the south of France, who at once put them in process of reeling.

The cocoons were so imperfect, that in submitting them to the first preparation, a great part, almost three-quarters, proved to have holes in their top ends, which made reeling impossible, and prevented my giving you an account of the quantity of silk which may be obtained from cocoons in a good state. They are too old by ten or twelve years, very likely more, and are very defective, the reelers thinking they had been over suffocated or killed, and that they appear to be of the second crop or pickings, being extremely small and weak, twice as much so as those the reelers possessed, and which had more body in them.

I have since sent a kilogramme to this firm, and shall be able to have some more particulars from them shortly.

The cost of working them into organzine and tram would not be above 10 francs to 12 francs per kilogramme. This seems to me a little high, but of course it was difficult to form an exact opinion; but the reelers said the cost might be lower. They were reeled by the ordinary French process, two to five cocoons at once.

I went on to Italy by appointment to a large silk reeling establishment near————————in Piedmont, and had some cocoons wound there, and I have to report that the cocoons having (in the opinion of these reelers) been either hatched wholly or partially, or eaten through by a grub, owing to their being so old, that but very little silk could be reeled from them, at least 50 per cent. of the cocoons were unreelable. From one kilogramme of cocoons only the enclosed small quantity was obtained. The superior reeling of the Italians over the rough and imperfect native reeling shows itself very markedly in these samples, which possess so much more excellent a lustre and silkiness, indicating what a great improvement may be made in this article by proper management in manufacturing it.

A beautiful result would be obtainable with new and fresh cocoons.

The size of these samples of organzine is 50/65 "deniers." The samples labelled singles were simply the first attempts at reeling.

I have forwarded to this firm the remainder of the case of cocoons you sent me, and expect in the course of a month to have them back reeled, with a full report of costs, quantities, &c., as you wished.

I tried several modes of softening the cocoons, including those you suggested. I found the cocoons yield best to soap, potash, and glycerine combined.

If the whole of the 800 lbs. of cocoons you have had collected, and sent over from India are similar in age and imperfections, I fear the result will be disappointing in quantity; but the reelers, both French and Italian, spoke most hopefully of the results with properly gathered and prepared cocoons.

I have been pursuing my experiments in dyeing tasar silks, and am very much pleased to inform you that I am now prepared to dye this silk in almost any kind of colour, even to very pale shades.

If there is any hope of a large quantity of tasar or other wild silks being annually produced, a splendid industry may be commenced in India, or may be worked here, first, by a new and improved system of reeling, by which each cocoon can be reeled separately, instead of at present, in several threads; secondly, by my improvements in dyeing and finishing these silks.

I hope to call very shortly on you to show you the remarkable improvements in the dyeing of these silks,—results which will make the relationship of them vastly nearer to those of the mulberry worm silks. I am now ready to examine and apply the dye-stuffs of Indian native produce which you have ordered to be collected. When do you expect them to arrive? My improvements will render their application to tasar and kindred silks much more effective and varied than under my previous methods.

From the Secretary of State for India, to the Government of India, No. 61 (Revenue), dated 29th August 1878.

Referring to my predecessor's despatch No. 25 of the 22nd March 1877, I now transmit, for Your Excellency's information, copies of the first part of a further report by Mr. Thomas Wardle on tasar silk and Indian dye-stuffs, and of a memorandum thereon by Dr. Birdwood, C.S.I., together with the samples of silk referred to in the report; and also copies of a letter from Mr. Wardle, of the 31st July last, and of its enclosure, relative to an offer by M. David, of St. Etienne, to purchase 2,000 kilogrammes of tasar cocoons for the purpose of making manufacturing experiments at his own cost.

2. With regard to this latter subject, Mr. Wardle has been informed that M. David should be advised to procure the cocoons he requires in the ordinary course of trade through some firm in Bombay or Calcutta. I desire, however, that the information which M. David wishes for, relative to the native method of dealing with tasar cocoons, &c., may be procured and transmitted to me at an early date for communication to him.

3. It seems impossible to attach too much importance to the improvements introduced by Mr. Wardle in the manufacture of this silk, the results of which may confidently be expected to open up a large field of enterprise for the supply of this article to the European markets, and to bring into more extended use one of the raw products of India for which there has hitherto been but a limited demand.

4. I shall address Your Excellency further on this subject upon receipt of the second part of Mr. Wardle's report.

Memorandum by Dr. George Birdwood, C.S.I., *dated 10th August 1878, on* Mr. T. Wardle's *Report on Tasar Silk and Indian Dye-stuffs of 1st August 1878.*

It would be difficult to speak too highly of the patience, ability and perseverance with which Mr. Wardle has carried out these experiments, or of the importance of the results obtained. These are, in brief, that he has succeeded in preparing Indian wild silk almost as fine as the finest Chinese silk, and in dyeing it almost any colour.

Whereas 1,000 yards of Indian wild silk formerly weighed from 10 to 15 drachms, it can be now prepared of the weight of only 3 drachms and under, the same quantity of the finest Chinese silk weighing 2 drachms to 4 drachms. In dyeing this wild silk Mr. Wardle's success has hitherto been chiefly with the aniline dye series. The defect of these colours is that they are crude, flaring and inharmonious, but a process has been suggested to Mr. Wardle by which it may be possible to dye silks and other stuffs with the aniline series in rich, deep, and artistic tones. I would suggest that Mr. Wardle's paper should be communicated at once to the Government of India. The portion of the report still due from him, on the application of the native dye-stuffs of India to Indian wild silk and other woven fabrics, will be principally of artistic interest. The present report is of very pressing practical interest, as M. David's letter shows. For nearly 100 years the Indian Government went on endeavouring to increase the export of Indian silk by importing eggs from China and mulberry trees and expert labour from France and Italy and elsewhere, but all in vain. Even after the abolition of the Company's trading monopoly the same false and costly course was pursued, until in 1838 the attention of the Government of Bombay was officially drawn to the wild silk of the country, undoubtedly originally derived from China, and thoroughly acclimatised. Beyond ascertaining that wild silk was produced all over the Bombay Presidency, nothing was then done by Government. But Dr. MacKenzie and Captain Coussmaker and others continued to give great attention to the subject, and the result of

their enthusiastic labours, combined with Mr. Wardle's long interest in their researches, has been to lead to the experiments now reported, which afford a substantial ground of hope that a staple may have at last been added to the export trade of India. In fact, if the results of Mr. Wardle's experiments are confirmed, he will have succeeded in making Indian wild silk merchantable wherever silk is woven and worn.

As to M. David's letter, it may be submitted to the Government of India; but probably the better plan, in his own interest, would be for him to write to some firm in Bombay or Calcutta to send him direct the 2,000 kilogrammes of cocoons he wants.

When the second part of Mr. Wardle's report on the native dye-stuffs of India is received, it might be desirable to make a comprehensive report on the whole subject of those experiments.

Mr. Wardle's *Report on Tasar Silk and Native Dye-stuffs of India.—(First Part). Dated Leek, 1st August 1878.*

I have completed the first part of my examination, and have now the honour of laying the results before the Government of India.

Last winter I received a communication from Dr. Birdwood asking me to undertake the arrangement of exhibits of Indian silks and dye-stuffs in the India Section at the Paris Exhibition.

I have done so, and the results of those exhibits form the basis of this report, especially that part which relates to the tasar and other wild silks of India.

I have not had sufficient time to examine all the dye-stuffs of India which were sent to me. In a few months the examination will be completed and will form the substance of my second report.

In dealing with the tasar cocoons sent to me, I have endeavoured, with signal success, to improve the manufacture of this silk.

This has been accomplished to an extent that will greatly increase its importance in the silk industry of Europe, as well as making it much less unyielding in its resistance to tinctorial matters.

Much of the import of tasar silk is of such low and badly reeled quality as to be totally unfit for nearly all European textile work; and even where the quality happens to be better than it usually is, it is much too coarse in thread for any but the coarsest kind of work; consequently its use is and has always been extremely circumscribed.

I shall be able to show that there is no longer any necessity for this, nor for any obstacles to be interposed for the extended use and cultivation of this silk, and that it promises to be as useful in degree as that of the mulberry worm.

I believe also that the same may be said for several other species of Indian wild silks.

Several of the samples to illustrate this accompany my report; the rest, including the dyed specimens, are under exhibition at Paris, but shall be described here.

I have given the samples now sent the same numbers as those in the Paris Exhibition case. The report will, therefore, correspond in numbering and explanation with the monograph I have written, and which is appended to the second edition of Dr. Birdwood's Handbook of the Indian Section.

Nos. 8 and 9 are samples of tasar, organzine, and tram, illustrative of the quality and state of manufacture such as is now used in England for weaving, and a good representation of the present state of its manufacture, which gives a size of 255 deniers (15 drachms per 1,000 yards). The sizes of tasar generally used in England run from 152 deniers (9 drachms) to 255 deniers (15 drachms). These are very coarse sizes, and must necessarily be unfit to produce such fine textile work as the mulberry silk, which can be and is manufactured into organzine and tram of 21 deniers and upwards (1¼ drachms), and from which are made the finest silk fabrics.

Nos. 13 to 17 are samples reeled for the market by the natives from the cocoons in various parts of India. They show the more or less rude and imperfect states in which it is prepared for the market and for native use.

I send them only to point out the contrast between them and the next sample, 17*a*, which shows what, under proper management, this fibre is capable of. This is raw tasar silk reeled from the cocoons I received from India.

In September 1876 I proceeded, with your permission, to Italy with some of the cocoons, to have my ideas of cocoon-reeling and throwing carried out (cocoon-reeling being a branch of silk industry not practised in England), and I am glad to report that I there met with the success I anticipated. The house which I employed to make the experiments, Messrs. Gaddum and Company, were so much impressed with the importance of the results as to say to me they would send out to India a person for the purpose of collecting tasar cocoons on their own account.

I have subsequently heard of their interesting themselves in this manufacture.

This sample, 17*a*, is raw silk as wound from the cocoon, the fibres of six cocoons being wound together, forming one thread ready to be thrown into organzine or tram in the usual way, and capable of yielding sizes of from 51 deniers upwards, *i. e.*, 3 drachms and upwards, per 1,000 yards.

In addition to this greater fineness of thread, as compared with that of the present tasar silk of commerce, you will notice an almost entire absence of lumps, technically called "foul slubs," which have hitherto prevented tasar silk being substituted for the mulberry silks.

So that instead of organzine and tram of 15 drachms to 9 drachms per 1,000 yards, you have before you the improved silk capable of yielding organzine and tram of 51 deniers, or 3 drachms per 1,000 yards skein, and this with a silk primarily so much thicker in fibre than the mulberry silks.

At the end of the report, I have added a table of microscopic measurements which I have made of the thickness of the primary fibres of the mulberry silks (China, India, Italy, France, Japan, and those of the tasar and other wild silks of India). From this it will be seen that tasar silk is from three to four times thicker in fibre than the mulberry silks.

Tasar silk possesses the greatest strength and tensile power, and it has as much lustre as any silk.

No. 19 is a sample of tasar organzine (51 deniers or 3 drachms per 1,000 yards) manufactured in Italy from the cocoons under my own instructions and superintendence. The improvement in quality, fineness, and cleanness will be seen to be most marked, and that, instead of the coarse sizes of tasar now used, of 152 to 255 deniers (9 to 15 drachms), there may be obtained by proper management organzine and tram of excellent quality from the same cocoons of 51 deniers (3 drachms) and upwards, which can be woven into a great variety of stuffs, for which until now only the mulberry silks have been available.

The attention of all interested in or connected with silk manufacture cannot be too strongly drawn to this fact, nor can its value be overrated.

There is a most important future in store for the tasar silk industry, and as great improvements will take place as those which resulted from the introduction of proper machinery and skill many years ago in the mulberry silk district of Bengal, when it was found that Bengal silks, in place of being then almost unworkable, could be manufactured in such a way as to bring them into extended use in Europe, so as even to rival French and Italian silks. The cost of making organzine and tram from the cocoons with the improved mode is about 20 francs per kilogramme—10 francs for reeling and 10 francs for throwing.

You will observe from the samples, and from what I have just stated, that the success in improving this manufacture is complete, and that tasar silk, when properly made, is ready to take its place in all the silk textile industries where extreme fineness is not required, such, for instance, as cloths of which a material is all tasar, or mixed cloth, with tasar weft, for trimmings, braids, elastic boot webs, where silk of 3 to 6 drachms is in constant use, also for the weft or shute of ribbons, the chief obstacle to its use hitherto for this last purpose having been its foulness (slubbiness). Now this imperfection is removed, there will be an extensive demand for it in the ribbon trade.

The difference between the ordinary tasar, selling with difficulty at 3*s.* to 4*s.* per lb., and the samples I submit is due to improved methods of manufacture, which I am ready to communicate to you, and even to teach to the native workmen if that course is thought more useful.

In the meantime, however, I would strongly urge that the greatest encouragement be given to the proper gathering and collecting of tasar cocoons and the exportation of them in a compressed state, and that encouragement be given to the planting and cultivation of the most suitable trees and plants which feed the tasar worm in the likely labour centres, near good roads where the cost of carriage can be minimized.

The worm feeds on the following trees and plants:—

Rhizophora calceolaris, Linn.
Terminalia alata glabra. (Assun tree.)
Terminalia tomentosa. (The Saj tree.)
Terminalia Catappa. (Country Almond tree.)
Tectona grandis. (Teak tree.)
Zizyphus jujuba. (Ber tree.)
Shorea robusta. (Sâl tree.)
Bombax heptaphyllum. (Semul.)
Careya sphærica.
Pentaptera tomentosa.
Pentaptera glabra.
Ricinus communis. (Castor Oil plant.)
Cassia lanceolata.

I am quite sure that a very largely increased production of cocoons will meet with a ready sale, especially in France and England. Even the unwindable and pierced cocoons and waste will have a ready market, since our spinners, as I shall show further on, can utilize all such refuse, and make excellent yarns and cloths from them.

I may mention that I took the opportunity, whilst on the jury of the Paris Exhibition, to draw the attention of M. Colcombet, a juror, and M. David, two of the largest manufacturers of ribbons in St. Etienne, to the improved tasar. After thoroughly inspecting it, they said that if the Government of India could enable them to obtain cocoons, or point out how they may be obtained at about one franc per kilogramme, they would buy all that India produced, so certain were they of finding a ready sale and extended use for this, in place of the more costly silks.

M. David has since written to me asking me to obtain 2,000 kilogrammes (4,400 lbs.) of tasar cocoons for experiment. He says many uses may be found for well reeled tasar, the only important question is that of an economical means of doing so.

These economical means are at hand; for in place of the ordinary mode of reeling and throwing silk from the tasar cocoons into organzine and tram, which costs about 35 francs per kilogramme, or 12*s.* 8*d.* per lb., it can be done by the improved mode at about 20 francs per kilogramme, or 7*s.* 3*d.* per lb., and this cost will be decreased when the cocoons are properly collected and the industry better regulated.

Not less important than manufacturing is the dyeing of tasar silk, in the investigation of which I have been so long engaged.

I am happy to be able to report that the dyeing of this silk can now be successfully accomplished in all shades of colour.

The results I have exhibited at Paris in three grades. The first consists of organzine and tram of the same coarse quality as at present used in England for weaving into self-coloured dress pieces, dyed in a variety of reds, blues, greens, yellows, and tertiary colours, with the dye-stuffs native to India, and with which I was furnished by the Government of India for examination.

An exposure of upwards of two months to the sunshine of Paris has only very slightly affected them, although placed in a position exposed to the direct rays of the morning and mid-day sun. The colours are not of the vivid intensity and crudeness of those produced by the aniline dyes, but they possess more tone and are fitter for all purposes of true decorative art, and possess much more permanency: but on those points I hope to treat more definitely when I have the honour of presenting my report on the dye-stuffs of India, and their applicability to tasar silk, at present under examination.

By the advice of Dr. Birdwood, I also exhibit tasar silk dyed with ordinary aniline dyes, in order to show what could be done on it with these dyes, which in Europe have almost replaced the better and faster materials. I have

therefore dyed two grades of tasar organzine in a variety of delicate shades of aniline dyes—one, the second, is the improved organzine, the third is ordinary tasar organzine of good quality.

In dyeing the *improved* organzine, a very important fact appears. The silk takes the dyes with less difficulty. I have no doubt that one of the main reasons why the natives cannot dye tasar silk will be in the fact that the methods of their rude manufacture partly destroy whatever affinity such silk has for tinctorial impregnation.

It is not unlikely that before tasar silk can be really well dyed in India, a considerable improvement must be effected in all the manufacturing operations, even from the time the cocoon becomes completed.

It would, perhaps, be hardly within the scope of this Report to go into the chemical reasons for this opinion, but they are no less important than real.

I have also to report similar success in applying printed colours upon tasar silk cloths, samples of which I send with the Report Nos. 21 and 25. It is, as far as I am aware, the first time any attempt has been made, either in Europe or in the East, to print on wild silk cloth of any kind.

So that now printed tasar silk can be successfully used for wall damasks, curtains, furniture coverings, hangings, women's and girls' dresses, with great effect, and I would draw the attention of upholsterers and broad silk manufacturers to these specimens, and especially three under No. 55 of twill silk, made of this material from the warp and weft of Nos. 8 and 9, 255 deniers.

The fabrics made of tasar silk are very strong, most durable, and possess much lustre. The patterns printed in blue are the first successful application of indigo on silk as a print, and not as a pencil blue as formerly.

The tone of blue is very rich, modified to some extent by the natural ground colour of the silk (which is fortunately incapable of being made vividly white), and has consequently controlled too great a brightness.

They will prove remarkably fast; in fact, none of the colours are printed in aniline or any other fugitive dyes.

These fabrics are woven with organzine and tram of the coarse native-reeled and English-thrown tasar of 15 drachms per 1,000 yards, and are not really such good examples of what can be done in printing on fabrics of improved manufacture, samples of which I hope before long to submit to you, but they effectively serve the purpose of showing that now a great variety of colours can be applied to tasar silk fabrics in printing as well as in dyeing, and I cannot conceive of any more beautiful application of them than to the walls of rooms after the manner of damask, if well designed.

I come now to treat of spinning tasar silk. This is effected after the manner of spinning cotton, wool, flax or any other short fibre that cannot be wound off in a continuous thread.

Since the important improvements which have been made in England of late years in silk spinning machinery, a new and large industry has sprung up whereby all refuse silk and unwindable cocoons of the mulberry silk manufacture are submitted to the operations of carding, combing, and spinning, and threads of beautiful regularity and silkiness are made.

I have exhibited a series to show to what uses the waste of tasar silk and the cocoons pierced by the exit of the moth can be put after being spun in this way.

There are probably not less than forty firms in England engaged in this operation, and many more in Switzerland, France, and Italy, but it is only recently that tasar waste silk has attracted notice, and large quantities have been a drug in the market for a long time. They have been bought up, and have been spun and woven into fabrics for upholstery and dresses of surprising perfection and interest, and a demand which cannot be fully supplied has arisen for a further supply.

I send sample No. 56*a* which I have had spun and woven from unwindable cocoons out of those I received from India; also five samples, No. 57, made of tasar waste and printed in colours.

Also samples of yarns spun from tasar waste for weaving, sewing, and knitting stockings.

Probably of not less importance in the future are the other wild silks of India, particularly that of the Arrindi or Eria worm of Assam, known under the following names:—

Phalæna Cynthia, (Roxburgh).
Bombyx Cynthia, (Oliver).
Samia Cynthia, (Hübner).
Saturnia Cynthia, (Westwood).
Saturnia Arrundi, (Royle).
The Arrindi or Arrundi silk-worm moth (Roxburgh).

With this I must connect the *Attacus ricini* (Boisduval), the same insect, as far as I can gather, except that it is fed on the *Ricinus communis*, or Palma Christi plant, and is reared in a domesticated state in Assam, and over a great part of Hindustan, more especially in the districts of Dinagepur and Rangpur.

Mr. Hugon gives the following interesting particulars about it:—"The larva, when at full size, is about 3½ inches long. It spins its cocoon in four days. The hill tribes settled in the plains are fond of eating the chrysalis."

The cocoon is much smaller than that of the tasar, and is soft. The natives cannot wind the silk, but spin it like cotton. Dr. Helfer says that the insect is so productive as to give sometimes twelve broods a year, and that the worm grows rapidly, and offers no difficulty whatever for an extensive speculation.

Mr. Atkinson says the filament is so delicate as to render it impracticable to wind off the silk; it is therefore spun like cotton. The yarn thus manufactured is woven into a coarse kind of white cloth, of a seemingly loose texture, but of incredible durability, the life of one person being seldom sufficient to wear out a garment made of it.

The winding of the Eria cocoon is said to have been recently accomplished. The thickness of the Eria filament is $\frac{1}{3800}$ of an inch.

Leaving the question as to whether it be successfully wound or not, one important consideration respecting its use presents itself, namely, its capability of being spun like cotton or wool. The great improvements made in late years in England in spinning machinery have proved that marvellous results in making an even thread from waste silk and unwindable cocoons for sewing and weaving purposes may be attained, and I will venture to predict a future for this and the produce of all unwindable silk-worm cocoons that will compensate for collection.

The industry of the natives should be stimulated to the gathering in of all kinds of wild silk cocoons, whether windable or not, for there is no doubt that those kinds which cannot be wound can be most easily spun, and there is at the present moment a request on the part of silk spinners for a larger supply of tasar silk cocoons and tasar silk waste for spinning purposes, and no doubt other silk cocoons would be gladly bought up.

A worm so prolific, and yielding such exceedingly fine silk gives a large promise of future supply to the spinner. I should be glad to have your authority for a further and thorough effort to make silk marketable in Europe.

Besides the Eria worm there are also the following which furnish good silk cocoons, all of which I have exhibited in Paris:—

The *Attacus Atlas*.

The Mooga or Moonga silk (*Antheræa Assama*) giving five broods a year. I send a sample of this silk, No. 35. It promises to be useful silk under proper care.

The *Bombyx Attacus*, "Yama mai," a native of Japan, but found in India. In Japan the silk of this worm is said to be most highly prized, and reserved for the use of royalty, but this I am inclined to doubt, as the silk is of a coarseish character. This I was assured by the Japanese at the Paris Exhibition is not now the case; they showed me several highly interesting fabrics made with it. The cocoon is of a beautiful pale green colour and is easily wound. It has been reared in Europe, and a cross between it and *Bombyx Attacus pernyi* is a success in France, being so hardy that the eggs will hatch at freezing point. A successfully encouraged cultivation of it in India would make a valuable addition to our Eastern sericulture.

The thickness of the fibre is $\frac{1}{950}$ part of an inch, being a little finer than tasar silk. It is also very much whiter in colour, which is an advantage for dyeing.

In addition to these are the following:—A silk called "Ya baine," from Prome, in Burma; Pat silk from Assam (*Bombyx textor*); Mezankuri silk, rare; *Actias Selene*.

In Simla, Balfour states there are eight or nine species of *Bombyx*, probably all silk-producers.

I plead for the utilization and extended cultivation of all these wild silks, particularly the Tasar, Mooga, Eria and Yama mai.

The difficulties of manufacturing, dyeing, and printing are, I am thankful to report, overcome.

It only remains for the Government of India, if I may presume to urge it, to give that encouragement and constant support to the increased production of the wild silk industry of India, and not to the wild silk only, but also to the mulberry silk, that has for centuries been accorded by Sovereigns and Statesmen in France to the permanent establishment and encouragement of the silk trade in that country, to make India a chief exporter of raw material, as France now is of the manufactured products.

The following table contains the series of microscopic measurements to which I referred in the earlier part of this report:—

Microscopic measurements of the diameter of the primary Fibre of Tasar Silk and other Silks.

Names of Silks or Worms producing them.		Country.	Food of larva.	Measurements of the diameter of the primary Fibre.			
				French metric scale.		English scale.

From Mr. Wardle, *to the Under Secretary of State for India, dated Leek, 31st July 1878.*

Since writing my report I have received from M. David, who I am told is the largest silk manufacturer at St. Etienne, an order for 2,000 kilogrammes of tasar cocoons, for the purpose of making manufacturing experiments with this silk at his own cost.

I enclose a translated copy of part of his letter.

Will you have the kindness to inform me if the Government of India will authorize the collection of the cocoons, and supply them to M. David with the information he desires?

I have no opportunity of obtaining them for him.

Copy of a letter from M. David, *of St. Etienne,* to Mr. Wardle.

I offer to buy one to two thousand kilogrammes tasar cocoons delivered at Marseilles at one franc per kilogramme; these cocoons to be of the year's crop, and well killed, not pierced. Kindly impress on your Bombay friends to kill the worms in the cocoons well. In case the moths come out on the road, the cocoons would be useless. A friend of mine has just received a bale of these cocoons and the moths came out of them at Marseilles.

In order to facilitate the reeling in France, kindly give me the following information:—

1st.—What is the chemical agent made use of by the natives to soften the cocoon and make it ready for reeling?

2nd.—Can the natives reel a cocoon more than a year old?

3rd.—What is the length of time elapsing from the making of the cocoon and the time of the coming out of the moth: does not that time vary greatly?

4th.—The cocoons in the bales are mixed in colour, dark and light: are these different varieties, and are they found on the same spots? Would it be possible to get only light coloured ones?

I shall be thankful for answers to the above questions, which will facilitate my task.

Many uses may be found for well reeled tasar. The only important question at present is that of an economical means of so doing.

From M. Natalis Rondot, *to the Government of India, dated Paris, the 29th July 1878.*

Le jury de l'industrie de la soie a examiné avec un vif intérêt l'exposition des soies provenant des vers à soie sauvages de l'Inde, et en particulier la collection formée par M. Thomas Wardle.

Le jury a jugé que ces travaux, quoique incomplets, avaient une grande valeur, et il a cherché le moyen de mettre en lumière son jugement.

Sur ma proposition, il a décerné le diplôme d'honneur, qui est la récompense la plus haute, au Gouvernement des Indes. * * *

* * * * * * * * *

Tout en reconnaissant que l'exposition actuelle fournit, bien plus que les précédentes, du point de vue de la production de la soie des vers sauvages dans l'Inde, un ensemble de faits et de spécimens dignes d'une sérieuse attention, le jury a été frappé de l'indifférence au moins apparente qu'on a montrée pour les soies autres que celles du tussah, et, quel que soit le mérite des résultats obtenus par M. Thomas Wardle, le jury n'est pas convaincu que ce soient les produits du tussah qui aient le plus de valeur pour l'industrie européenne.

Tandis que nous avons obtenu sur les soies du tussah des renseignements nombreux, j'ai le regret de dire que nous n'avons eu que de très rares informations sur les autres soies des vers sauvages.

Je me propose de présenter, dans un livre, comme je l'ai fait à la suite de l'exposition de Vienne, un aperçu de l'état de l'industrie de la soie. Je voudrais pouvoir m'étendre sur les soies de l'Inde.

Je connais les résultats des essais qui ont été faits de ces soies, mais nous n'avons en Europe aucune notion certaine de la provenance réelle de la plupart de ces soies et des quantités qu'il serait possible d'obtenir. Je ne parle pas du prix qu'on ne connaît pas.

Permettez-moi, Monsieur, de vous prier de m'aider dans ma recherche des faits relatifs à ces soies.

Je désirerais distinguer *nettement* ces soies, signaler les provenances des unes et des autres, les espèces qui les fournissent, les arbres qui nourissent les vers, les usages qu'en font les indigènes, les prix probables des cocons secs de chaque sorte ou des soies filées par les indigènes.

Je désirerais pouvoir donner une idée des quantités de ces cocons ou de ces soies que les fabriques européennes pourraient se procurer.

Dans des notes que la Commission Royale m'a transmisés, je n'ai trouvé que des généralités très vagues. On parle de quantités énormes, on parle de prix égaux à ceux du coton.

Tout ce que vous voudrez bien, Monsieur, me dire sur le sujet sera fort intéressant pour moi.

Ce qui ne le serait pas moins, ce serait un aperçu de l'importance en valeur de la fabrication des tissus de soie dans l'Inde. La collection exposée par S. A. R. le Prince de Galles ne nous a rien appris de nouveau, mais elle nous a forcés de nous occuper de nouveau de ces manufactures dans lesquelles on trouve des preuves d'une habileté peu commune.

Certainement, on ne saurait dire exactement le nombre des métiers ou celui des ouvriers employés à ce travail, mais il ne serait pas impossible d'apprécier la valeur de cette fabrication.

Elle doit être considerable, surtout si l'on tient compte de la production des tissus qui entrent dans la consommation générale, comme les tissus de tussah et autres de ce genre.

On a beaucoup écrit sur l'Inde et cependant nous ne savons que fort peu de chose de l'état de son industrie. Sur quels points de son immense territoire le tissage de la soie est-il entrepris dans une large mesure; dans quelles villes fabrique-t-on encore les tissus de soie, d'or ou d'argent qui rappellent l'ancienne fabrication hindoue? ou fait-on les velours qu'on couvre ailleurs de broderies? nous l'ignorons, ou plutôt ce que nous en savons est douteux ou peu de chose.

From M. NATALIS RONDOT, *to the Government of India.*

J'ai reçu la lettre que vous m'avez fait l'honneur de m'écrire le 6 Septembre dernier, ainsi que les documents qui l'accompagnaient. Je vous remercie des informations que vous avez bien voulu me communiquer.

* * * * * * *

Le jury a voulu marquer, par sa décision prise à l'unanimité, l'importance qu'il attache à toutes les mesures, comme à tous les travaux pris ou accomplis dans l'Inde en vue de fournir à l'industrie européenne les soies des vers sauvages.

Par suite du cours actuel des modes, par suite aussi d'une direction différente de la consommation, la soie du ver du mûrier est moins employée, moins recherchée, et cette moindre recherche a amené une moindre demande, non seulement dans l'Inde, mais en Chine, au Japon, en Italie, en France, &c.

Il faut à présent des soies d'un prix moindre, et les soies de l'eria, du moonga, du tussah, auraient dans les circonstances présentes une application avantageuse à plusieurs titres. Les fabricants ont fait de nombreux essais, et l'exposition présente les resultats de ces essais, soit pour la filature et l'ouvraison, soit pour la teinture, soit pour le mariage avec d'autres matières textiles et le tissage.

La question est de savoir si la récolte de ces soies, ou de ces cocons, donnera des produits assez abondants pour que l'industrie soit assurée d'approvisionnements suffisants pendant la période qui paraît s'ouvrir pour l'emploi de ces soies.

Nous savons que ces soies sont en abondance en Chine, et l'Ambassadeur de Chine, en ce moment à Paris, a transmis des instructions pour obtenir des informations. Toutefois la qualité des soies de vers sauvages de Chine laisse à désirer, et l'on préférerait les soies de l'Inde qui sont plus nerveuses.

Le jury a jugé qu'il convenait d'exposer l'état des choses dans le travail d'ensemble que je dois faire en son nom, et c'est pourquoi j'attache tant de prix à posséder sur ces soies et leur emploi dans l'Inde, comme aussi sur leur prix, des données aussi étendues que possible.

Son Altessse Royale Monseigneur le Prince de Galles m'a fait l'honneur de me promettre de faire réunir, au département de l'Inde, à Londres, les documents et les indications qui s'y trouvent et de me les communiquer, mais, d'après ce qui m'a été déjà dit par M. le Dr. Birdwood et. M. Thomas Wardle, je m'attends à n'avoir à cette source que des renseignements d'un ordre très général et peu actuels.

Je prends donc la liberté de vous prier de me donner, si l'occasion se présente à vous, Monsieur, de nouveaux faits sur la quantité probable de soies vers sauvages récoltés dans l'Inde, sur les marchés où elles peuvent être achetées, sur le prix moyen de chaque sorte courante, sur la quantité probable retenue par la consommation locale.

DEPT. OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH,
The 14th March 1879.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 11th MARCH 1879.

GENERAL REMARKS.—In Madras general prospects are on the whole fair. In the Bombay Presidency, where the hot weather has commenced, the *rabi* harvest is in progress; there has been slight rain in Sind and Kaladgi. As regards the latter place, it is said that the season of employment is over, and that there are symptoms of distress among the poor; but these circumstances can scarcely be related by way of cause and effect, inasmuch as the report further states that the *rabi* harvest continues. Some distress is also noted in part of Broach, but no specific cause is assigned. Matters remain very satisfactory in Mysore, and prices are falling. In the Central Provinces the harvesting of the *rabi* is going on, and fairly good results are anticipated; the weather is clear and warm. It is believed that the outturn, so far, has been better than was expected. In Berar the crops are being gathered in, and in Central India prospects are fair. Excepting in Ajmere good rain has fallen in Rajputana, and the outlook is generally promising. Rain is still wanted in many parts of East and Central Bengal and in part of Mozafferpore, but the crops on the ground are on the whole in good condition; the *rabi* is being harvested and a fair crop is expected, except in Rajshahye, where it is below the average; ploughing is going on and sowings of early staples have commenced in parts; small-pox in many and cholera in some places continue. The report from Assam shews that rain is much wanted there. In the North-Western Provinces and Oudh the *rabi* harvest is in progress, and prospects are fair. The condition of the Punjab is reported to have much improved. It is, in particular, fortunate that there has been rain in the frontier districts and in Multan and Rawalpindi, parts of the Province where prices, owing no doubt in some measure to the operations in Afghanistan, have been ruling high.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 8th)	*Nil*	Rice 11·38, *cholum* 15·13, *raggi* 17·71, *cumboo* 15·86; river level equal to the crest of the anicut; standing crops generally good; castor, tobacco, chillies and some pulse crops being harvested, outturn ½ to ¾.
Kurnool („ „)	*Nil*	Rice 10·73, *cholum* 15·9, *raggi* 18·50, *cumboo* 17·17; season favourable; Bengal-gram and gram harvested, outturn ⅓; second crop paddy and cotton in good condition; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 9·21, *cholum* 14·27, *raggi* 16·86, *cumboo* 14·37; some of the principal branches of the Cauvery flow with about one foot water; dry crops require rain, wet generally in good condition; *samba*, paddy, *raggi*, *dholl* and ground-nut being harvested, outturn ¼ to ¾.
Madura („ „)	*Nil*	Rice 10·09, *cholum* 14·71, *raggi* 17·13, *cumboo* 17·08.
Malabar („ „)	·19 (average of 3 stations); *nil* in others.	Rice 10·07, *raggi* 16·07; prices fallen in Palghat, risen in 4 stations, stationary elsewhere; pasture withering.
		General Remarks.—General prospects fair on the whole.
Bombay—(Feb. 12th).		
Sind—		
Kurrachee ...	·95 on 7th and 8th instant; ·05 in Kotri on 8th.	River continues very low; measles in Ghorabári taluka.
Shikarpur ...	Slight rain on 9th.	Weather still cloudy, injurious to fruit trees; fever, cold, and coughs prevalent; cattle disease in 9 and small-pox in 6 talukas.
Hyderabad ...	Slight rain in most talukas on 7th and 8th.	Small-pox in Sakrand, 22 cases, 8 deaths; *rabi* reaping commenced; sky overcast.
Guzerat—		
Ahmedabad ...	...	Cold weather crops generally good; harvesting progressing.
Páneh Maháls ...	...	Weather getting hot.
Kaira ...	...	Weather cloudy; *rabi* reaping progressing.
Broach ...	...	Distress in Ankleswar continues.
Surat ...	...	*Rabi* reaping commenced; hot weather set in.
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	
Konkan—		
Tanna ...	...	*Rabi* crops good; fever slightly prevailing.
Colába (Feb. 10th)	...	Weather cold; fever in Pen; *rabi* good in Alibág, Pen and Roha, but slightly damaged by locusts in Múngaon and Mahád.
Ratnágiri („ 4th)	...	*Rabi* good; 18 deaths from fever in Málwan taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	
Satara ...	...	
Southern Mahratta Country—		
Kaládgi ...	·79 at Bagalkot.	*Rabi* harvest continues; injury by rats; employment season over, symptoms of distress among poor; immigrants from Nizam's country into two talukas.
Belgaum ...	...	No change.
Dharwar ...	...	Weather oppressive; no change in state of crops; public health slightly improved; cattle disease extending.
Kanara ...	...	Second crop being harvested on coast.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather hot; general health good.
Wadhwán ...	...	Weather good; crops same as before.
Baroda ...	...	Cotton picking commenced; *rabi* being harvested; health good.
		General Remarks.—Slight rain in Sind and Kaládgi; *rabi* harvest progressing; hot weather begun.
Bengal—(March 11th).		
Chittagong ...	0·09	Weather seasonable; somewhat cloudy; more rain wanted for cold-weather crops; small-pox in Cox's Bazar and Teknaaf.
Noakholly ...	*Nil*	Weather much warmer until 5th, when temperature fell; prospects of crops unchanged; rain wanted.
Chittagong Hill Tracts...	*Nil*	Weather getting warmer daily; cloudy on 4th; *joom* cutting still continues; want of rain much felt throughout district; gathering of mustard over, an average outturn obtained.
Hill Tipperah ...	*Nil*	Weather warm; prospects of chillies and *teel* fair; sugarcane still being cut; *aus* paddy being sown; public health good.
Backergunge ...	*Nil*	Weather dry and hot; rain badly wanted throughout district; prices stationary; health fair.
Furreedpore ...	*Nil*	Weather fair; prospects of crops good, but rain wanted in many places.
Dácca ...	*Nil*	Nights colder than usual at this season; prospects of crops good.
Mymensingh ...	*Nil*	Weather fine and seasonable; prospects of crops favourable.
Tipperah ...	*Nil*	Weather hot and overcast; rain wanted for ploughing; cold-weather crops mostly gathered, outturn good; exportation of rice still going on, prices keep up, ranging from Rs. 2-12 to Rs. 3-4 a maund; a few cases of small-pox in thana Daudkandi.
24-Pergunnahs ...	*Nil*	Weather cooler than last week; nothing further to report about crops; rain wanted; public health generally good.
Jessore ...	*Nil*	Weather hot and seasonable; winter crops being harvested; rain wanted; cholera has appeared in east of district.
Nuddea ...	*Nil*	Weather cooler than last week; no change in prospects of crops.
Moorshedabad ...	*Nil*	Weather very hot till 5th, then cool; no change in prospects of crops.
Pubna ...	*Nil*	Weather colder than last week; a west-south-west wind; prospects of crops good; small-pox has not spread in thana Pubna; public health generally satisfactory.
Rajshahye ...	*Nil*	Weather during first part of week warm during day, but cool at night; latterly somewhat cooler; *rabi* crops generally not more than an eight or a nine-anna one, though somewhat better in low lands of Nattore; lands being prepared for *dhan* sowings; five deaths from cholera in Bagmara; a few cases of small-pox in Chárghát and Lallpore.
Bogra ...	*Nil*	Weather seasonable; standing crops fair, but would be improved by rain; *kherachi* being cut; no alteration in price of rice; 13 cases of small-pox in Bogra and Adamdighi; health of people generally good.
Dinagepore ...	*Nil*	Strong winds; weather cool; cold-weather harvest nearly over; land being prepared for rice.
Rungpore ...	*Nil*	Two days of strong westerly wind followed by cooler weather; prospects of crops continue favourable, but rain wanted; small-pox still prevails in Bagdogra sub-division.
Cooch Behar ...	*Nil*	Weather fair; cooler than last week; *bitree* cultivation progressing; cold-weather crops doing well; tobacco generally a good crop; public health good.
Jalpáiguri ...	*Nil*	Weather again cooler; crops everywhere satisfactory; an outbreak of cholera in a tract not very far from station; otherwise general health good.
Darjeeling ...	*Nil*	Weather getting warmer; sunshine during day; no important crops on land; ground being cultivated for *bhootta* and early rice.
Midnapore ...	*Nil*	Weather seasonable; prospects of crops favourable.
Howrah ...	*Nil*	Weather seasonable; prospects of crops as before.
Hooghly ...	*Nil*	Weather getting daily warmer; few crops on ground; fever and cholera still prevail in some parts of district.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Burdwan ...	*Nil*	Weather getting warmer; prospects of crops unchanged.
Bankoora ...	*Nil*	Weather getting warmer daily; crops being harvested; outturn fair.
Beerbhoom ...	*Nil*	Weather warm and sunny; no crops now on ground.
Sonthal Pergunnahs ...	*Nil*	Weather dry, but cooler; *rabi* in north good; hardly any *rabi* grown in south.
Bhágalpur ...	*Nil*	Strong westerly winds; linseed crop considerably damaged by rain in February; wheat, barley, &c., much benefited and promise a large harvest.
Monghyr ...	*Nil*	Particulars not received.
Purneah ...	*Nil*	Weather seasonable; nights cold; days hot; west wind; prospects of crops good.
Maldah ...	*Nil*	Weather fair, rather hot during day; prospects of crops good; prices of food-grains somewhat lower; public health improving.
Durbhunga ...	*Nil*	Weather clear, with west wind; *rabi* crops look pretty well; prices stationary; health of people good.
Mozufferpore ...	*Nil*	Weather mild, strong west wind in early part of week; in Mozufferpore and Hajeepore Sub-divisions state of *rabi* crops continues favourable; want of rain, however, affecting crops in Seetamurhee Sub-division; indigo sowings retarded by west wind.
Sarun ...	*Nil*	Weather getting warmer; dry west wind; prospects of crops good; prices of food-grains stationary; public health good.
Chumparun ...	*Nil*	Weather fine; prospects of crops unchanged.
Patna ...	*Nil*	Weather warm during first, and cool during second, half of week; *rabi* prospects generally good, though gram and other pulses somewhat damaged by caterpillars.
Gya ...	*Nil*	Mornings and evenings cool; maximum reading of thermometer in shade 94·3°; condition of *rabi* crops good; cases of small-pox in a few stations; health of plough cattle good.
Shahabad ...	*Nil*	Weather seasonable; *rabi* crops mostly being harvested; gram somewhat injured by caterpillars; public health fair, though small-pox still prevalent in some places.
Hazáribágh ...	*Nil*	Weather seasonable; hot sun; cold west winds; wheat and barley ripening, and will soon be cut; outturn will be good; gram well forward.
Lohardugga ...	*Nil*	Weather seasonable; prospects unchanged; *rabi* crop in head-quarters sub-division promises to turn out well, in Palamow sub-division fairly; ploughing going on.
Manbhoom ...	*Nil*	Weather warm and seasonable; nothing new to report about crops; prospects of *mohwa* good; a few cases of cholera in Purulia town.
Singhbhoom ...	*Nil*	Weather seasonable; nothing new to report about crops.
Balasore ...	*Nil*	Weather seasonable and dry; few crops on ground in good condition; public health good.
Cuttack ...	*Nil*	Weather seasonable, but warm; *dalua* crop progressing well; recent rainfall did much good to it and mango crop; in several places lands ploughed; a few cases of cholera here and there.
Pooree ...	1·38	Weather seasonable; *sarad* rice harvested; sugarcane being pressed; *kulthi* and other winter crops being harvested; rain did much good to mango and *dalua* crops; rice sells at 15¾ to 21 seers per rupee; a few cases of cholera.
		General Remarks.—Prospects of standing crops generally favourable; rain still wanted in several places in East and Central Bengal, and in Seetamurhee in Mozufferpore; *rabi* crops being harvested, outturn generally fair, but below average in Rajshahye; in Bhágalpur linseed crop considerably damaged by rain in February; in Patna and Shahabad gram and other pulses somewhat injured by caterpillars; ploughing going on; sowings of early crops commenced in places; small-pox in many places, cholera in some.
N. W. P. and Oudh—(Mar. 12th).		
Benares (Mar. 11th)	...	No change; crop being cut.
Allahabad („ „)	...	No change.
Jhánsi („ 12th)	...	
Agra („ 11th)	...	No change; crops thriving.
Meerut („ 12th)	*Nil*	Very cloudy and hot; watered crops flourishing; no sickness.
Bareilly („ 12th)	...	No change; prospects good.
Kumaun („ 8th)	Light rain fell in parts on 2nd instant.	Locusts still about have done damage in a few places; prospects fair.
Sitapur („ 12th)	*Nil*	Cloudy; harvesting has commenced.
Partabgarh („ 10th)	...	Prospects good.
Lucknow („ 12th)	...	Harvest commenced; no change in prospects.
Fyzabad („ „)	*Nil*	*Rabi* harvest in progress; sugarcane sowings begun.
		General Remarks.—Harvest progressing; prospects fair.
Punjab—(Mar. 11th).		
Delhi ...	*Nil*	Prospects unfavourable; slight fluctuations in prices of food-grains; health fair.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.W. P. & Oudh—*contd.*		
Hissar ...	*Nil*	Cloudy and warm; an early fall of rain would save the *barani* crops which are seriously affected; slight variations in prices of food-grains; health generally good.
Umballa ...	·4	Condition of crops and public health good.
Jullundur ...	5	Crops have benefited; health good.
Amritsar ...	*Nil*	State of crops doubtful; health fair; slight fall in the prices of wheat and barley.
Lahore ...	Sprinkling of rain on 9th and 10th.	More rain required for the crops; health good.
Rawálpindi ...	·6	Agricultural prospects improved; sickness decreasing.
Mooltan ...	·6	Harvest prospects good; health good; prices of food grains stationary.
Dera Ismail Khan ...	·85	The fall has been general throughout the division, and prospects are greatly improved.
Peshâwar ...	·4	Prospects improving; prices of food grains fluctuating slightly.
		General Remarks.—Agricultural prospects much improved.
Central Provinces—(Mar 12th).		
Nimár ...	...	*Raggi* almost harvested; prices slightly fallen.
Hoshangabad ...	...	Hot; prospects fairly good; few cases of cholera at Harda.
Betúl ...	...	*Rabi* harvest continues; gram good; wheat below average; cattle disease in places; prices slightly fallen.
Wardha ...	...	*Rabi* harvest completed; prices stationary.
Nágpur (Mar. 12th)	...	Hot; *rabi* harvest continues; prices unchanged.
Chanda ...	...	Cloudy; outturn of *rabi* in northern part of district good, elsewhere much below average; health good; prices slightly fallen.
Chhindwára ...	...	Clear and hot; wheat improved by recent rainfall; health good; prices steady.
Narsinghpur ...	...	Crops and health good.
Bhandára (Mar. 11th)	...	Clear; *rabi* harvest continues; prospects favourable; slight small-pox; prices continue high.
Seoni ...	...	*Rabi* harvest progressing; health good; prices stationary.
Bálaghát ...	...	Clear and hot; prospects of *rabi* favourable; fever and small-pox prevalent; prices stationary.
Mandla ...	...	Later sowings of *rabi* benefited by previous week's rain; health good; prices steady.
Saugór ...	...	Cloudy at times; *rabi* harvest continues; crops injured by hail in some villages of Kurai tahsil; health good; prices stationary.
Damoh ...	...	Reaping of pulses progressing; health good; prices steady.
Jubbulpore (Mar. 12th)	...	Clear; *rabi* harvest commenced; small-pox continues; prices stationary, except of gram which has slightly fallen.
Raipur ...	...	Days warm; nights cool; prospects of *rabi* favourable; cholera and small-pox continue; prices stationary.
Biláspur ...	...	Clear and warm; *rabi* good; small-pox, cholera, and measles continue; prices steady.
Sambalpur (Mar. 8th)	...	Ploughing for sugarcane sowings continue; cholera continues.
		General Remarks.—Clear and warm; *rabi* harvest continues; previous week's rain is reported to have done some good to wheat in Chhindwára and Mandla, and some damage by hail reported from Saugor; prospects on the whole continue fair.
British Burma ...	...	Report not received.
Assam—		
Gauháti (Mar. 12th)	·01	Unseasonably hot and dry; rain wanted for tea and rice crops.
Sylhet („ „)	*Nil*	Rains are urgently wanted; prospects not yet threatened; prices stationary.
Mysore and Coorg—(Mar. 12th)	Light showers in Hassan and Shimoga districts.	State of the crops and prospects good; prices falling; for week ending 1st March, gratuitously relieved in hospitals 322.
Hyderabad Assigned Districts—		
Amráoti (Mar. 12th)	...	*Rabi* harvesting and threshing; weather warm.
Central India—(Mar. 12th)		
Indore ...	*Nil*	Prospects fair.
Morar ...		
Sutna ...		
Goona ...		
Rutlam ...		
Neemuch ...		
Ágar ...		
Mánpur ...		
Sirdarpore ...		
Nowgong ...		
Bhopal ...		

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Rajputana—			
Sirohi	(Mar. 2nd)	1·80 in week ending 23rd Feb.	Wells good; months' water-supply in tanks; health fair; crops good; season agreeable.
Marwar	(„ 1st)	Good rain reported from some districts.	Health and crops good; strong wind; prices fluctuating.
Harowtee	(„ „)	·96 in Kotah; 1·23 in Tonk; and 1·47 in Shahpura.	Health good; prospects improved.
Jhallawar	(Feb. 27th)	1·03	Health and prospects good.
Ajmere	(Mar. 12th)	*Nil*	Crops ripening; prospects good.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

LEGAL EFFECT OF SECTION 56 OF THE ADMINISTRATOR GENERAL'S ACT.

No. 309, dated Fort William, the 13th March 1879.

From—C. BERNARD, Esq., C.S.I., Offg. Secy. to the Govt. of India, HOME DEPT.,
To—The Administrator General.

I am directed to acknowledge the receipt of your letter No. 1296, dated the 18th December 1878, in which you—

(1) draw attention to the law (Act II of 1874, Section 56) which forbids any person, other than the Administrator General, from receiving or retaining any commission or agency charges for anything done as executor or administrator under any probate or letters of administration;

(2) report that a practice is extending up whereby private persons in Calcutta take commission on estates to which they administer;

(3) ask that the advice of the Law Officers be obtained and that steps should be taken to make known that such taking of commission is illegal.

2. In accordance with your request the learned Advocate General has been consulted; and I am now directed to forward a copy of Mr. Paul's opinion. He holds that a private person, who, in India, takes commission for anything done as executor or administrator, breaks the law and renders himself liable to penalties. And he advises that steps be taken to bring this provision of the law to the notice of the Court of Chancery in England, as that Court may not be aware of the state of the Indian law on this point.

3. The Governor General in Council observes that the office of Administrator General was established in 1849, chiefly in order to provide safeguards against the mal-administration of the estates of deceased persons by private

firms. Those safeguards are four, namely,—the requirement of competent legal ability on the part of the Administrator General; the requirement of large security for the due execution of his office; the stringent rules as to the investment of assets in the Administrator General's hands; and the half-yearly examination of his accounts by auditors appointed by Government. A provision of law, corresponding to Section 56 of the present Act which you quote, was inserted in Act VII of 1849, the first Administrator General's Act. Again in 1855, when Act VIII of that year was passed, an attempt was made to relax the rule prohibiting private executors and administrators from receiving commission for acts done as such. But the Legislative Council, guided by Sir Lawrence Peel, Sir Barnes Peacock, and Mr. Allen, refused to alter the law. The clear rule of law, as embodied in Section 56 of Act II of 1874, has been explained by the learned Advocate General. The Governor General in Council, as at present advised, has no intention of asking the Legislature to repeal that section. That being so, it is inexpedient that the law should be habitually disobeyed. The best way of making generally known the provisions of the law on this point will be to publish the learned Advocate General's opinion, Your letter, Mr. Paul's opinion, and the present reply will accordingly be published in the *Supplement to the Gazette of India*, and the result of such publication will doubtless be that the practices of which you complain will cease.

4. A copy of the present correspondence will be submitted to Her Majesty's Secretary of State, in order that he may, if he sees fit, cause the state of the Indian law on this point to be brought to the notice of the Court of Chancery, in any case which may arise respecting the allowance of commission to private persons administering to estates in India under the orders of that Court.

No. 71, dated Fort William, the 25th January 1879.

From—R. LEYCESTER UPTON, Esq., Offg. Solicitor to the Govt. of India,

To—The Offg. Under Secretary to the Govt. of India, HOME DEPT.

Referring to your letter No. 55 of the 14th instant, I have the honour to send you a copy of the Honourable the Advocate General's opinion on the questions therein referred to.

The original letter and its enclosures which accompanied your letter under reply are returned.

Opinion by the Honourable the Advocate General,—dated Calcutta, the 24th January 1879.

The sole principle upon which executors in England were allowed to charge commission on assets collected in India was that the Indian courts allowed commission—see note to (*Cockerell v. Barber, 2 Rup., 589, and Mathews v. Bagshaw, 14 Bear, 123*). That last decision was in 1851. No reference is made in that report to the Administrator General's Act of 1849, probably because the collections were made before that Act passed, and possibly because no one knew of the Act; but there is a note (p. 126) which refers to that Act. I can find no case in which the question has since come before the English courts. I am, however, of opinion, should the present state of the law, embodied in Act II of 1874, which is a continuation of Act VII of 1849, and other intervening Acts, be brought to the notice of the Court of Chancery in any case which may arise there, that commission will not be allowed. Presumably the Administrator General's Act of 1849, passed soon after the failures in 1847-48, had for its object the protection of estates against failure of agents, and accordingly a public officer was appointed on the terms of giving security to Government, and submitting his accounts for audit by Government. The taking of commission by a private individual is contrary to law. An executor or administrator who appropriates part of the estate as commission takes what he is prohibited by law from taking, and is guilty of criminal breach of trust, because he takes to himself what has come into his hands for another.

In my opinion an Indian executor or administrator, other than the Administrator General, who charges or retains commission, is indictable under Section 405 of the Indian Penal Code coupled with Sections 23, 24. Before enforcing the law some public notice should, I think, be given, the matter having been brought to the notice of Government some time ago, and nothing having been done to stop what may be said to be a growing and improper practice.

No. 1296, dated Calcutta, the 18th December 1878.

From—F. S. COLLIS, Esq., Offg. Administrator General of Bengal,

To—The Offg. Secretary to the Government of India, HOME DEPT.

Enclosed will be found copies of the *Solicitors' Journal*, November 2nd, of the *Englishman*, December 6th, and I have the honour to call your attention to an article in the former entitled "Administration of estates of persons dying in India," and notes on that article in the latter. That commission is taken by persons other than the Administrators General in administering to estates of deceased persons in India, and that the law, as laid down in Section 56 of Act II of 1874, is thus broken, I think, there can be no doubt. This illegal practice, in my opinion, amounts to a criminal breach of trust as defined by the Penal Code (see Section 405, coupled with Sections 23 and 24 which define "wrongful gain" and "dishonestly".) Putting the Penal Code to one side, I consider a person who takes commission or agency charges in cases contemplated by Section 56, and thus breaks the law, is guilty of a misdemeanour, and has committed an indictable offence. In Russell on Crimes, Volume 1, p. 86, it is stated that where an offence is not so at common law, but made an offence by Act of Parliament, an indictment will lie when there is a substantive prohibitory clause, though there may be afterwards a particular provision and particular remedy. See also p. 87, which shows that wherever a Statute forbids the doing of a thing, the doing of it wilfully, without any corrupt motive, is indictable. Now that a statement has appeared in the public press to the effect that the law is being frequently broken, and which statement the Government knows from previous communications from the Administrator General to be correct, I would respectfully, but strongly, urge on Government the desirability of referring the question to the Law Advisers of the Crown. So far I have put the matter on strict legal grounds, but I think by the present illegal practice the interests of those most concerned are sacrificed, inasmuch as estates administered to by my office reap advantages which could not be obtained elsewhere: for instance, all remittances are made by me through the Government channel, while my books are open for examination by the Government auditors. Again, ample security is furnished by the Administrator General for the faithful discharge of his duties. Moreover, I have every reason to believe that considerable cost is entailed on estates by the person administering thereto having to find security.

I have contented myself with looking at this matter from two points of view, namely, from the legal one, and from the one on which the parties interested might wish to be heard. There is a third view of the case, but which is so personal to the Administrator General that I do not care to discuss it, especially as the attention of Government has been already more than once called to it by Mr. Broughton. I may, however, be permitted to say that, while the illegal practice of which I complain was confined to one or two offenders, the result was not of very serious consequence to my office. Things are now changed, and I find this practice has considerably extended ever since I held office two years ago. Should the Law Advisers agree in my view of this question, and should their opinion be published, I hardly think this illegal course of conduct will be persevered in, and thus matters may be righted.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS, PUNJAB, OF FASL RABBI OF 1878-79, UP TO 31st JANUARY 1879.

CANAL DIVISION.		WATER DISTRIBUTED DURING JANUARY 1879.			NAVIGATION RETURN CANAL.	LAND IRRIGATED (APPROXIMATE).					CHIEF CROPS (APPROXIMATE).		REMARKS.
		Depth in Canal at negative Gauge.		Gross Consumption, cubic feet per second.	Principal items of Traffic.	Zila.					Name.	Area in acres.	
		Full supply.	Actual throughout.	Estimated full supply.	Actual average throughout.	Up.	Down.		Average.	During month.			
Bari Doab Canal.	1st Division	4·9	3·31	3073·60	456·38	...	...	Gurdáspur	1·48	0·06	Wheat ...	133,961	The volume entering the Bari Doab Canal at its head was 3581·96 cubic feet per second, of which 3·22 cubic feet per second was lost through escapes in the 2nd Division. There is an increase of 19,854 acres as compared with the corresponding period of last year, and of this 13,279 acres are due to irrigation on the Kasur and Sobraon Branches. There is a great demand for water and the whole supply of the river is being utilized. The volume entering the Western Jumna Canal head was 1,941 cubic feet per second of this, 10 cubic feet per second passed out at the tail of the Delhi Canal.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 18th MARCH 1879.

GENERAL REMARKS.—General prospects in Madras have not changed during the week. In Bombay also there has not been any material alteration in the crops; the weather is generally cool. No particulars of the distress in Kaladgi and Broach referred to in the report for the preceding week are given, but it is said that there is slight distress in two talukas of Satara. In Mysore matters remain as before, as also in the Central Provinces, where the *rabi* harvest continues. The reports from Berar, Central India and Rajputana do not contain anything calling for notice. In Bengal rain fell in a few districts only, and the want of it is much felt in several places; prospects are however on the whole promising; a severe hailstorm in Tipperah killed 17 and wounded 10 persons. Rain is needed in Assam. The report from British Burma is only on public health, which is generally fair. In the North-Western Provinces and Oudh the *rabi* harvest is progressing and the outlook is on the whole satisfactory. Rain has fallen generally in the Punjab, and there is a further improvement in harvest prospects.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 15th)	*Nil*	Rice 11·36, *cholum* 15·48, *raggi* 17·86, *cumboo* 15·86; 7½ inches of water passing over anicut; *raggi* under wells and later maize generally doing well; pulse crops being harvested; castor, cotton, and tobacco being gathered.
Kurnool („ „)	*Nil*	Rice 10·88, *cholum* 16·15, *raggi* 21·07, *cumboo* 17·66; season favourable; cotton being picked in Koilkuntla, Sirwell, and Pattikonda; outturn ⅛ to ¾; second crop paddy in good condition; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 9·71, *cholum* 13·31, *raggi* 17·21; *cumboo* 15·15; rivers almost dry; dry crops require rain, wet generally in good condition; harvest of *samba* paddy, *ollatdan*, *raggi*, and *cholum*, outturn ⅜ to ¾.
Madura („ „)	*Nil*	Rice 10·36, *cholum* 17·14, *raggi* 17·16, *cumboo* 17·16.
Malabar („ „)	*Nil*	Rice 10·07, *raggi* 17·73; prices stationary throughout the district; pasture withering.
		General Remarks.—General prospects unchanged.
Bombay—(Mar. 19th).		
Sind—		
Kurrachee ...	0·3 in Kurrachee; ·20 in Kotri; ·13 in Tháno Bula Khan; ·05 in Sehwan; ·11 in Keti Bandar; ·20 in Mirpur Batoro; ·34 in Tatta; ·02 in Jerruck; ·10 in Johi; ·01 in Dádu; ·15 in Sákro; ·03 in Ghorabári; ·20 in Belo.	Measles in Shahbandar taluka; one fresh case of small-pox in Kurrachee.
Guzerat—		
Ahmedabad ...	...	No change.
Páncb Mahals ...	...	Weather pleasant.
Kaira ...	...	No change.
Surat ...	...	*Rabi* crops being reaped.
Broach ...	...	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...		
Konkan—		
Tanna ...	...	*Rabi* crops and public health good.
Colaba (March 17th)	...	Mornings cold; fever in Pen; *rabi* crops good in Alibág, Pen, and Roha, but damaged by locusts in Mángaon and Mahád.
Ratnágiri („ 11th)	...	*Rabi* good; six deaths from fever in Málwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	*Rabi* harvesting finished in seven talukas.
Satara ...	...	*Rabi* reaping nearly over; slight distress in two talukas.
Southern Mahratta Country—		
Kaládgi ...	·16 in Sindgi.	
Belgaum ...	1·63 in Gokák.	*Rabi* reaping nearly completed; cotton picking commenced.
Dharwar ...	...	No change.
Kanara ...	...	Harvesting continues; fever prevalent; weather fair.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Harvesting continues; public health good.
Baroda ...	...	Public health good; weather unusually cool.
		General Remarks.—No material change from last week; weather generally cool.
Bengal—(March 18th).		
Chittagong ...	0·02	Weather cloudy now and then, otherwise seasonable; some cold-weather crops collected; land being prepared for *pania aus*; small-pox still prevalent in Cox's Bazar.
Noakholly ...	*Nil*	Mornings foggy; afternoons windy and cloudy; state of *rabi* crops getting bad for want of rain.
Chittagong Hill Tracts...	0·42	Weather very hot; a fall of rain on 5th; *júm* cutting still continues; rain improved prospects of chilly and other spring crops.
Hill Tipperah ...	*Nil*	Weather dry and warm; state and prospects of crops unchanged.
Backergunge ...	*Nil*	Weather very hot and dry; prospects not favourable in consequence of drought; rain expected soon; no fall in prices.
Furreedpore ...	*Nil*	Weather fair and hot; state and prospects of crops fair; rain much wanted.
Dacca ...	0·6	Weather seasonable; state and prospects of crops good.
Mymensingh ...	*Nil*	Weather hot for time of year; state and prospects of crops good; a little rain wanted.
Tipperah ...	*Nil*	Weather hot with occasional storms; rain wanted; cold-weather crops being harvested; outturn fair; ploughing in progress; a hail-storm passed over station on evening of 12th, killing 17 persons and wounding 10.
24-Pergunnahs ...	*Nil*	Weather seasonable; no crops to report upon; prices of food-grain continue very high; public health in general good.
Jessore ...	0·17	Weather hot; storm on evening of 12th; winter harvest nearly all gathered in; rain wanted for spring sowings of indigo.
Nuddea ...	0·25 in Ranaghat; 0·44 in Bongong.	Weather clear and hot; winter crops nearly all harvested; outturn only fair and below average.
Moorshedabad ...	*Nil*	Weather warm; *rabi* crops being reaped; lands being ploughed for *aus* and *aman dhan*; indigo and mulberry in fair state.
Pubna ...	*Nil*	Weather seasonable; mornings cloudy; a south-west wind during day; rain required for *chcena* and rice at Serajgunj.
Rajshahye ...	*Nil*	Weather hot during day, but still cool at night; rain wanted for *bora dhan*.
Bogra ...	*Nil*	Weather seasonable; crops fair; rain would benefit them; health of district good.
Dinagepore ...	*Nil*	High westerly winds; weather somewhat cloudy; most of spring crops harvested; lands being prepared for *boro* and *bhadoi dhan*.
Rungpore ...	*Nil*	Strong dry westerly winds blowing daily; prospects of crops unchanged, but rain wanted; small-pox prevails in Bagdogra sub-division.
Cooch Behar ...	*Nil*	East winds in morning changing to west winds in afternoon; prospect of all cold-weather crops good; country very dry; public health generally good.
Jalpáiguri ...	*Nil*	Weather rapidly getting hotter; rain wanted; tobacco, the only crop now on land, doing well; ground being prepared for *bhadoi dhan* sowings.
Darjeeling ...	*Nil*	Sun shine strong; westerly wind during latter part of week; no crops of importance.
Midnapore ...	*Nil*	Weather seasonable; state and prospects of crops favourable.
Howrah ...	*Nil*	Weather seasonable; nothing particular to remark regarding state and prospects of crops.
Hooghly ...	0·45	Weather generally clear; a sharp thunderstorm on 12th; few crops on ground; fever and cholera still prevail.
Burdwan ...	*Nil*	Weather dry; no change in state and prospects of crops.
Bankoora ...	0·14	Weather hot; sugarcane giving good outturn; indigo promises fairly; cases of small-pox still frequent.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Beerbhoom ...	*Nil*	Hot season now set in; nothing to report about crops.
Sonthal Pergunnahs ...	*Nil*	Weather cool for the season; state and prospects of corps as before.
Bhágalpur ...	*Nil*	Weather hot and cloudy; state and prospects of crops excellent.
Monghyr ...	0·01	Weather hot; west winds; gram crop a bad one; other crops good.
Purneah ...	*Nil*	Weather hot and dry; west wind; state and prospects of crops good.
Maldah ...	*Nil*	Weather fair; state and prospects of crops satisfactory; prices somewhat lower; health improving.
Durbhunga ...	*Nil*	Weather fair; *rabi* crops being reaped; indigo sowings in progress; prices stationary; health of people good.
Mozufferpore ...	*Nil*	Weather warm with west wind; reaping of *rabi* crops commenced; public health good.
Sarun ...	*Nil*	Weather appreciably warmer; high west wind and dust-storms during middays; cold-weather crops being everywhere cut; outturn expected to be eight annas; poppy heads being tapped; indigo sowings still going on; mango in blossom, and promises a fair harvest; prices (rice excepted) fallen; public health good.
Chumparun ...	*Nil*	Cool nights; hot days; strong west winds blowing during day; clouds hanging about; state and prospects of crops good.
Patna ...	*Nil*	Nights still cool, days hot; state and prospects of crops unchanged.
Gya ...	*Nil*	Weather seasonable; maximum reading of thermometer in shade 99·6°; *rabi* crops ready and in some places being cut; prices of food-grains a little easier; health of plough-cattle good.
Shahabad ...	*Nil*	Weather getting warm; about three-fourths of *rabi* harvested; outturn good on the whole; small-pox still prevalent.
Hazáribágh ...	*Nil*	Weather seasonable; cloudy on 14th; harvesting of wheat and barley crops commenced; prospects of crops favourable.
Lohardugga ...	*Nil*	Weather getting hot; west winds occasionally; no change to report at head-quarters; prospects of *rabi* crops in Palamow less favourable than was anticipated; prices stationary.
Manbhoom ...	0·01	Weather warm and seasonable; few crops on ground doing well; if weather holds up, *mohwa* harvest ought to be first-rate; district fairly healthy; cholera disappeared from town.
Singhbhoom ...	*Nil*	Weather very warm during week, but sky clouded on 14th; nothing to report about crops.
Balasore ...	*Nil*	Weather hot and dry; rain required for ploughing for next crop; public health fair.
Cuttack ...	*Nil*	Weather hot; spring rice doing well.
Pooree ...	*Nil*	Weather seasonable; *sarad* rice harvest completed; *dalua* looking well; common rice sells at 15¾ to 21 Calcutta seers per rupee; miscellaneous crops promising.
		General Remarks.—Rain in a few districts during week; prospects of standing crops generally fair; but rain greatly needed in Backergunge and Noakholly and some other districts; *rabi* crops being harvested; ploughing for early crops in progress; spring sowings of indigo still going on; a severe hail-storm in Tipperah on 12th caused some loss of life.
N. W. P. and Oudh—(Mar. 19th).		
Benares (Mar. 18th)	...	No change.
Allahabad („ „)	...	No change; high west winds.
Jhánsi („ 19th)	...	Harvest commenced; rest as before.
Agra („ 18th)	Slight rain in 5 Parganas.	
Meerut („ 20th)	·5	Crops good; prices stationary; locusts have done little harm; health good.
Bareilly („ 19th)	Rain on 14th	Rain has done good; prospects generally favourable.
Kumaun („ 15th)	Heavy rain on 12th and 13th.	Hail fell in some places; prospects favourable.
Sitapur („ 19th)	*Nil*	Wind west; weather settled.
Partabgarh („ 17th)	...	Agricultural prospects good.
Lucknow („ 19th)	...	No change; harvest operations going on; prospects fair.
Fyzabad („ 19th)	*Nil*	
		General Remarks.—Rain in places, which has done some good; otherwise prospects unchanged.
Punjab—(Mar. 18th).		
Delhi ...	·9	Prospects improved; slight fluctuations in prices of wheat grains; health good.
Hissar ...	1·2	Prospects brighter; slight fall in prices of food grains; health generally good but small-pox about.
Umballa ...	·9	Crop fair; health good.
Jullundur ...	1·4	Crops greatly benefited; health good.
Amritsar ...	1·	Crops flourishing; slight fall in prices of food grains; health good.
Sealkot ...	1·8	Prospects of *rabi* considerably improved.
Lahore ...	·9	Agricultural prospects much improved; health good.
Ráwalpindi ...	1·0	Agricultural prospects fair; fever and cattle disease continue.
Mooltan ...	·9	Health and harvest prospects good; prices of food grains stationary.
Dera Ismail Khan ...	·5	Crops flourishing; health good.
Pesháwar ...	·8	Harvest prospects improving; prices of food grains falling.
		General Remarks.—Rain having been general during the past week; harvest prospects have further improved.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces— (Mar 19th).		
Nimár ...	...	Cool; *rabi* nearly reaped; prospects excellent; health good; prices slightly easier.
Hoshangabad ...	...	Prospects unchanged; cholera at Harda ceased.
Betúl ...	...	Warm; *rabi* harvest continues; prospects unchanged; small-pox prevalent; prices stationary.
Wardha ...	...	*Rabi* harvest almost completed; prices stationary.
Nágpur (Mar. 19th)	...	*Rabi* harvest continues; prices unchanged.
Chánda ...	...	Hot; *rabi* harvest continues; health good; prices slightly fallen.
Chhindwára ...	...	Warm; prospects unchanged; *rabi* gathering; small-pox towards south of district; prices steady.
Narsinghpur ...	...	*Rabi* harvest progressing; yield below average; health good; prices fallen.
Bhandára (Mar. 18th)	...	Clear; *rabi* harvest continues; small-pox prevalent; prices high.
Seoni ...	...	*Rabi* harvest progressing; health good; prices stationary.
Bálaghát ...	...	Cloudy and hot; *rabi* harvest continues; small-pox prevalent; prices stationary.
Mandla ...	...	*Rabi* reaping; health good; prices steady.
Saugor ...	...	*Rabi* harvesting; prices slightly declined.
Damoh ...	...	*Rabi* harvesting continues; health good; prices steady.
Jubbulpore ...	...	Clear; *rabi* harvesting; small-pox continues; prices slightly fallen.
Raipur ...	...	Warm; cloudy at intervals; *rabi* gathering; prospects continue good; cholera and small-pox prevalent; prices slightly fallen.
Biláspur (Mar. 15th)	...	Hot; *rabi* gathering; prospects good; cholera and small-pox continue.
Sambalpur („ 14th)	...	Very hot; sugarcane sowings continue; cholera abating.
		General Remarks.—*Rabi* harvest progressing in all districts; prospects continue on the whole fair; cholera in Eastern districts abating.
British Burma— (Mar. 19).		
Arakan Division ...	...	Public health continues good; slight cattle disease in one township.
Pegu Division—		
Rangoon ...	...	Fifteen fatal cases of small-pox in Rangoon town; slight small-pox reported from Pegu; fevers still very prevalent in Hmaubee, otherwise public health fair.
Henzada ...	...	Public health fair; small-pox prevailing in parts of district.
Bassein ...	...	Public health good; 159 cattle deaths in Yaigyee township from 17th February to 3rd March.
Tharrawaddy ...	...	Public health fair.
Prome ...	...	Health good.
Thayetmyo ...	...	General health normal; small-pox in Thayetmyo, Mindoon, Kama, and Meaday.
Tenasserim Division—		
Amherst ...	...	Public health good; no cattle disease.
Shwegyeen ...	...	Ten deaths from cholera in district.
Toungboo ..	...	Public health good.
		General Remarks.—General health fair; small-pox in Rangoon town and district, Henzada, and Thayetmyo; cholera in Shwegyeen; cattle disease still in Bassein.
Assam—		
Gauháti (Mar. 19th)	·03	Unseasonably hot and dry; strong westerly winds lately; land being ploughed for *asu*; rain wanted for tea and rice crops.
Sylhet („ „)	1·22	Rain partial; more wanted; prices stationary.
Mysore and Coorg— (Mar. 19th)	...	No change since last report; for week ending 8th March, gratuitously relieved in hospitals 296.
Hyderabad Assigned Districts— (Mar. 19th)	...	*Rabi* harvest progressing; weather getting warmer.
Central India— (Mar. 19th)	*Nil*	Prospects unchanged.
Rajputana—		
Ajmere (Mar. 19th)	.12	Prospects good; small-pox commencing.
Sirohi („ 9th)	...	Tanks drying; wells good; health fair; prospects good; cool and pleasant; cloudy and close; much warmer; season agreeable.
Harowtee („ 8th)	...	Health good; prospects unchanged.
Jhallawar („ 13th)	...	No change.
Bhurtpore („ 12th)	...	Weather cloudy; wind easterly; health good.
Ulwur („ 19th)	·18	Rain beneficial; health good.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 5th March, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir J. Strachey, G.C.S.I.
General the Hon'ble Sir E. B. Johnson, K.C.B., C.I.E., R.A.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Mumtáz-ud-Daulah Nawáb Sir Muhammad Faiz Alí Khán Bahádur, K.C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
Lieutenant-General the Hon'ble Sir M. K. Kennedy, R.E., K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

CIVIL PROCEDURE CODE AMENDMENT BILL.

The Hon'ble MR. STOKES presented the Report of the Select Committee on the Bill to amend the Code of Civil Procedure.

DESTRUCTION OF RECORDS BILL.

The Hon'ble MR. STOKES moved that the Report of the Select Committee on the Bill to authorize the destruction of Useless Records in Courts in British

India be taken into consideration. He said that the only important change the Committee had made in the Bill was by extending its provisions to records, books and papers kept in Revenue-offices (which in many parts of British India were judicial tribunals), and to the records of the Administrator General.

The Committee had conferred the power to make rules for the destruction of the former records on the Chief Revenue-Authority, and that of making rules for the destruction of the latter on the High Court. In each case the rules would require the sanction of Government.

There were some minor amendments which he need not mention as they were all enumerated in the report.

The Hon'ble MR. HOPE moved that the Bill be referred back to the Select Committee for consideration as to whether it should not comprise (whether by direction for including in the Rules, or otherwise) provision to ensure the preservation of important records for certain periods, the early return to the parties, where practicable, of documents put in evidence, and the giving of due notice before the destruction of such records and documents.

He said that at first sight it might appear that the subject of this Bill was a very trivial one, and that the mode in which it was proposed to deal with useless records was amply sufficient, namely, that their destruction should be regulated by rules made by the High Courts, and approved, in certain cases, by the Local Governments, and, so far as they related to Bengal, by the Governor General in Council. The Council need, however, only look as far as the Bill itself in order to see that a certain amount of importance attached to the subject. It appeared that the very basis of the Bill, the ground upon which it was required at all, was that legislation was necessary in order to authorize the destruction of the property of other people; and the end which the Bill would secure was that the Government would be protected from suits by private parties on account of anything they might do with regard to that property. That, he thought, was a very important fact, and such great power and great immunity ought not to be conferred except under suitable precautions and restrictions. The mode in which it was proposed to deal with the matter was to give a power of making Rules to the High Courts, subject to certain control provided in the Bill, which was pretty much the system which prevailed at present. It therefore seemed necessary, first, to look into the working of the present system. Now, he had unfortunately some considerable experience as an actual litigant in the Civil Courts, and also the experience which he might possess in common with all the administrative officers in the country; and he had seen and heard from time to time many objections to the method which was followed in the destruction of records. In the first place, there was a great tendency in the Courts to absorb documents; for one reason or another original title-deeds, agreements, accounts and other such documents were drawn into the Courts. It was true that there was a provision in the Civil Procedure Code by which a party, under certain circumstances, could get back a document from the Court by putting in a copy, but in practice, for a variety of reasons, that provision was very little resorted to. It often happened that the real point in the case turned upon the hand-writing or signature to a document, or on whether it was or was not forged. Therefore, in a variety of cases, documents could not practically be so got back by the people by whom they were deposited in Court. And when the time came when the document might be given back, there were other practical difficulties to be encountered. The Court had to be petitioned, and in doing so a certain amount of expense had to be incurred. The Court had then to order a search for the document, and sometimes it could not be found, or was reported to be eaten up by white-ants. In short, when once a document was in Court, it was uncommonly difficult to get it out. Furthermore, when a man, on perfectly reasonable grounds, believed that his document was safe in the custody of the Court, and left it so, he might on enquiry be told that it had been destroyed as a useless record. Such, MR. HOPE said, had been his own experience, and with regard to some other Provinces in India, the enquiries he had made of competent persons corroborated it, and showed that the practice of documents being

kept in Court and destroyed unnecessarily prevailed there also, and had been known to result in considerable expense and inconvenience.

However, if they wished to see how the present powers, which the Bill proposed to legalize, were likely to be used, they should look to the present rules of the Courts, which were the best guide to see whether the proposed legislation was wise. He had had considerable difficulty in getting hold of even some of them. When he applied for them some time ago, they were not to be had in the Legislative Department at all, and the Select Committee itself, if he was rightly informed, had not thought it necessary to take the trouble to look into them. However that might be, by hook or by crook he had at last managed to get hold of the rules of four of the different Courts in India. He did not wish to go into any detailed criticism of these four sets of rules, not only because it might be invidious to do so, but because a general statement would, he hoped, suffice for his purpose. Under these rules the destruction of useless records was provided for in very diverse ways; and he might safely say that if the provisions in some of the rules were not utterly superfluous, then provisions in others were utterly insufficient. He did not wish to trouble the Council with any great detail unless it proved necessary to do so. He thought his purpose would be insured by inviting attention to the three objects which his motion comprised, and for which, as it seemed to him, either the Act, or the rules to be made under the Act, should make definite provision. The Act need not go into detail, but might well require that the rules should provide *inter alia* for these three things. First, "the preservation of important records for certain periods." By that he meant that records of a certain class of cases should be kept so many years, and of other classes of cases for longer or shorter periods, and of certain cases in perpetuity. Secondly, "the early return to the parties, where practicable, of documents put in evidence;" and thirdly, "the giving of due notice before the destruction of such records and documents," by which he meant, the giving notice, as far as practicable, to parties who had put valuable papers into Court. As a matter of fact, he found that nearly the whole of what he wished to see provided in the rules relating to all parts of India was provided, although not very clearly and completely, in the rules of the Calcutta High Court. Therefore, what he asked was nothing more than what some of the judicial authorities had found perfectly reasonable, although others had not done so. The reason why he did not make a definite motion that such and such words be inserted in the Bill was that these matters were better discussed quietly in Committee, and the exact wording could be best settled then. If his motion were carried, he would then, with the concurrence of the Law Member and the other gentlemen on the Committee, propose to add two or three members to the Committee, including himself, so as to give him an opportunity of stating his views. The mode by which he proposed to meet the object he had in view was one common in our Acts, namely, to say that the rules under the Act should provide for such and such main points. Practically, it would thus be seen that his request might be summed up as a petition for time and consideration, and in that light it did not appear to him to be unreasonable. He trusted, considering the desire which the Hon'ble mover had always evinced to have his drafts rendered as complete as possible, that he would not withhold his support from the motion now before the Council.

The Hon'ble MAHÁRÁJÁ JOTÍNDRA MOHAN TAGORE said that he endorsed generally the views expressed by his hon'ble friend to his left. The MAHÁRÁJÁ could speak from personal experience that the facilities for taking back documents filed in Courts were not such as could be desired, and instances were not unknown in which, in the over-anxiousness to clear the record-room, important documents had been destroyed along with useless records. Too much precaution, he thought, could not be taken to prevent such proceedings. The object aimed at by the Hon'ble Member was certainly a good one and deserved consideration; but he (THE MAHÁRÁJÁ) confessed he was not prepared to offer any suggestion for the attainment of that object. He believed it could not be expected that the legislature should lay down any hard and fast rules for the purpose; but he submitted the Select Committee

might well be requested to consider whether certain principles, on the basis of which the local authorities should frame their rules, could not be embodied in the Act, with a view to preserve important documents from destruction. Such a course, it seemed to him, would have the additional advantage of securing a sort of uniformity in the rules, which he thought was desirable but which could not be obtained if their framing were left entirely to the discretion of the local authorities. For these reasons, he begged to give his support to the motion now before the Council.

The Hon'ble SIR MUHAMMAD FAIZ ALÍ KHÁN said he entirely concurred with the remarks which had been made by the Hon'ble Member who had just spoken.

The Hon'ble MR. COCKERELL said that, as a Member of the Select Committee to which this Bill was referred, he desired to submit to the Council that the course suggested in this motion was wholly unnecessary. The Bill was designed simply to give legal authorization to the practice which, in regard to the large majority of judicial records, had been in force in some parts of the Empire at least for about half a century; he drew attention to this fact as in itself suggesting a sufficient comment on the allegation that had been made as to the Government seeking immunity through this Bill from the legal consequences of dealing with private property: For although there had been no express legal authority for the destruction of any records or documents, he had never heard of a single instance of suits being brought against the Government for damage accruing to any individual through the practice which this Bill was to legalize; and he did not believe that it could be justly affirmed that the practice in question had worked injuriously to public or private interests.

Hitherto, except in the Bombay Presidency and Sindh, and quite recently also in Oudh and the Central Provinces, there had been no express enactment on this subject, and it was, he believed, open to doubt whether any statutory power was needed to effect all that was required as regarded the large mass of records and documents; for public records might be held to be the property of the State, and property in private documents deposited in Courts and public offices, it might be reasonably argued, became vested in the State, if after repeated notice the former owners persistently neglected to withdraw them.

The Bill, so far from giving any additional power to the High Courts to that which they had heretofore exercised in regard to this matter, imposed this important restriction, that the rules to be framed by them must obtain the sanction of Government, and then be published in the usual way before they could be acted upon.

But the Hon'ble mover of the amendment now before the Council was not satisfied with the degree of security to public and private interests to be obtained from these provisions, and thought, apparently, that the power of making rules for the destruction of records should be conferred only subject to certain conditions and qualifications as to the contents of such rules, for the due preservation of important papers, and due previous notice to parties affected by the contemplated destruction of any records or private documents.

The Bengal rules, under which papers were destroyed, now in force, contained the very conditions on both these points, which the Hon'ble mover would impose by express enactment; and having regard to this fact, the Committee considered it inexpedient to attach to the power of making rules conditions, the obligatory principle of which had been fully recognized in the spontaneous action of the Courts themselves.

For whilst, on the one hand, nothing was gained by enforcing in an enactment obligations which were already admitted and acted up to, there was, on the other hand, this objection to such a course, that by its adoption you did positive harm, inasmuch as you thereby weakened the sense of responsibility under which the discretionary power conferred on the Courts was to be exercised; for it was impossible to forecast such an exhaustive list of the necessary conditions and qualifications, as would dispense with the need for the exercise of discretion in any case or circumstances.

In providing that the rules to be made must meet with the approval of the Government, he submitted that all that was necessary or desirable had been done in the Bill as it now stood.

As regarded the suggested provision to be made in this Bill for ensuring the early return to their owners of documents put in evidence, he confessed his inability to see any connection between such a provision and the Bill under discussion, which dealt only with the destruction of records which had become useless.

Acts which dealt with the production of private documents—such, for instance, as the Civil Procedure Code, the Registration and Stamp Acts—contained in themselves proper provision for the due return of all such documents, and if this were not so, the proper place for the needed remedy would be in those enactments and not in the present Bill. The suggestion that some provision of this kind was needed proceeded of course on the hypothesis that documents produced in evidence were unnecessarily detained, and that their owners did experience difficulty in their recovery. But was it really the case that such a state of things existed at the present time? In the first place, he would remark that, under the law of procedure, as it now stood, original documents were not required to be filed with the record of any suit or proceeding; they had to be produced at the hearing of a case, and might then be withdrawn by their owners on copies being furnished by the latter for filing with the record. He might venture to say also, with some confidence in regard to this part of India at least, that no such difficulty in the way of the early return of private documents, as was apparently supposed to be felt, really existed. The true difficulty in regard to the return of documents, when they had been filed here, was precisely in the opposite direction, that was to say, the tendency of the owners of such documents was to leave them where they were, and often considerable pressure was required to induce such persons to withdraw them. So much was this found to be the case in regard to documents brought for registration, that it was found necessary to give power in the Registration Acts, to destroy all documents not reclaimed within two years from the date of their deposit.

For these reasons, he was of opinion that the proposal contained in the motion now before the Council should be rejected.

The Hon'ble MR. THORNTON said that, after the speech of his hon'ble friend on the right (Mr. Cockerell), he had little to say except to express general concurrence in the remarks made by him. He (MR. THORNTON) did not think that the Imperial legislature was in a position to issue directions as to the nature of the documents to be preserved, and the time during which they should be preserved, in the Courts and Revenue-offices throughout British India. These were matters which the local authorities, that is to say, the Judges of the High Courts and the Local Governments, were far better able to deal with than this Council—because they were matters which greatly depended, even as regarded general principles, upon local considerations. For example, in localities where there was an elaborate system of survey, settlement, record and registration of titles, the preservation of old and unclaimed documents relating to land was a matter rather of sentimental than serious interest; on the other hand, in localities where there had been no survey or registration of titles, the preservation of such documents was a matter of serious importance. So with regard to the time during which documents should be preserved. This would vary greatly according to the state of land-registration and other local peculiarities. In these circumstances, he did not think the time of the Council would be usefully occupied in attempting to frame rules or lay down principles suited to the varied circumstances and differing conditions of the several Local Governments and Administrations. Another of the Hon'ble Mr. Hope's proposals seemed open to still greater objection. It was the proposal that provision should be made for the early return to the parties of documents put in evidence. The law (section 144 of the Code of Civil Procedure) already made ample provision for the return of documents filed by parties to a suit. Any dilatoriness on the part of Judges in carrying out those provisions was a defect, not in the law, but in the working of the law, and the proper remedy rested, not with the legislature, but with the executive; if the Bombay Judges were guilty of the delays imputed to them, so much the worse for the Bombay

Judges; but it was not the fault of the law, and was no ground for legislative, though it might be for executive, action.

But though he was not in favour of the legislature attempting to lay down even general rules on the subject, there was nothing, he would observe, to prevent the Government of India, in the Home Department, exercising general supervision and calling the attention of Local Governments from time to time to observed defects in local rules for the destruction of records, and he felt sure that defects so pointed out would, if practicable, be at once remedied.

His Honour THE LIEUTENANT-GOVERNOR did not propose to support the amendment. At the same time, he felt that the objections raised to the Bill as it now stood were not altogether unreasonable. There did seem a want of great security that the interests of suitors filing documents should be attended to in the preparation of rules under the Act. It was, however, no doubt an unusual course to adopt to refer the Bill back to the Select Committee, and, on the whole, he thought the suggestion made by the Hon'ble Member who had just spoken would meet the object in view, namely, that the Government should undertake to draw the attention of the Local Governments to the points which had been noticed, and give them special instructions in framing rules to take all the precautions that might be necessary. HIS HONOUR thought that, if the Hon'ble gentleman and some of the other members who had just spoken, and who were practically acquainted with these questions, had been put upon the Committee, this discussion would not have arisen. The Select Committee appeared to him too small; and he hoped that in Bills of this sort, affecting the people at large, care would in future be taken to add to the Select Committee gentlemen acquainted with the practical working of the Administration.

The Hon'ble MR. THORNTON observed that, though he was not a Member of the Select Committee, he was invited to sit with the Committee and was in all respects treated as a Member, and he bore a full share of the responsibility which devolved upon the Committee in the consideration and settlement of the Bill.

The Hon'ble MR. STOKES said that he had been about to explain, in reference to His Honour's remarks, that the Hon'ble Mr. Thornton, though not formally, was substantially, a member of the Select Committee, whose meeting he had attended at MR. STOKES' request, and in the deliberations of which he had greatly aided.

The Hon'ble Mr. Hope's motion suggested three amendments of the Bill, of which the first would be impracticable, the second would be incongruous, and the third, if practicable, would be useless. The first—that the Bill should insure the preservation of important records for certain periods—would be impracticable, because, so great was the diversity of practice as to the files into which civil records were divided, so serious was the difference of local circumstances—as, for example, the size of the record-rooms, and the time in which they became filled—so various were the laws under which proceedings took place in the Courts and Revenue-offices of British India, that no two High Courts, no two Local Governments, no two Revenue-Authorities and, he thought he might add, no two members of a Select Committee, would ever agree as to what should be deemed "important records" and what periods should be fixed for their preservation. This assertion was not without basis. Before the report was presented, he had studied the rules for the destruction of records respectively prepared by two of the superior Courts—the High Court at Fort William and the Chief Court of the Panjáb; and he came to the conclusion that it would be impossible to make anything like a complete list of documents to be preserved in perpetuity or for any given term which would be accepted by each Court as satisfactory. He had not seen the rules issued by the Madras and Bombay High Courts; they were in the hands of Mr. Hope; but the Secretary had been informed by that Hon'ble gentleman that they presented startling contrasts to the rules issued at Calcutta and Lahore. So far from these long-standing discrepancies being regrettable, they seemed to MR. STOKES to show that each set of rules was adapted to its special environment, and therefore more likely to succeed in the struggle for existence than any general regulations which they could possibly frame in Committee for this congeries of countries called British India.

The Bill, in abstaining from detailed specification of documents, followed the precedent set not only by this Council in the Central Provinces Laws Act, but also by the Bombay legislature in the Acts mentioned in the schedule to the Bill. But the Bill improved on former legislation by requiring the approval of two Authorities to each set of rules—that was to say, the High Court and the Government of India, or the High Court and the Local Government, or the Chief Controlling Revenue-Authority and the Local Government. On the whole, he trusted that the Council would agree with him in thinking that those high Authorities were far better suited to regulate such a matter than any Committee of this Council would be, and that tribunals entrusted by law with almost unlimited power over our lives, liberty and most valuable property, might safely be relied on to make rules as to the trumpery documents with which this Bill proposed to deal. He would conclude what he had to say on this part of the subject by quoting what one of their ablest and most experienced Judges (Mr. Justice Innes of the Madras High Court) had written on the Bill:

"I think the proposed Act is a very good one, as it leaves a proper discretion to do all that is required by rules to be framed by the Authorities best capable of judging what is wanted."

The second amendment suggested by the Hon'ble Member would, as he had said, be incongruous. Mr. Hope proposed that the Bill should provide for the early return to the parties of documents put in evidence. But such a provision would obviously be out of place in a little Act dealing with the destruction of useless records. It was matter for the Codes of Procedure, and there it was already sufficiently provided for. The Hon'ble gentleman appeared to forget that it was not necessary for the parties to civil suits to file original documents. Copies could be filed and the originals need only be produced at the trial. Their detention in Court, unless, indeed, they were impounded, was not, as Mr. Cockerell had pointed out, required by the law. They could be got back by substituting certified copies. This was all set forth in the Code of Civil Procedure, sections 59, 62, 143, 144. So the Code of Criminal Procedure, section 367, provided for the return, at the conclusion of the proceedings, of documents produced before criminal Courts and not impounded.

The third proposed amendment, as to giving due notice before destruction of records and documents, would, as he had said, if it were practicable, be useless. How and where was such a notice to be given? Was it to be published in the Gazette, or by proclamation, or served on every person concerned? To have any conceivable effect, such a notice must contain a complete list of all the records and documents proposed to be destroyed, and any one who had seen, as he had, even one Bengálí *nathi*, would know that the preparation of such a list would be impracticable with the limited official staff and funds at the disposal of the Judicial and Revenue Authorities. But furthermore, the notice, if it were practicable, would be of no earthly use; for no one would read this list. Moreover, as he had explained, no one need leave an original document in Court. Whoever did so must, therefore, be held to care little or nothing about the document so left, and formal notice to him after a long lapse of years that this document, worthless in his eyes, was about to be burnt or turned into pulp if he did not remove it, would certainly be treated with the polite contempt which he believed the Natives of this country sometimes expressed for certain points in our over-elaborate system of administration.

For these reasons, he opposed this motion, and speaking for himself—his Hon'ble colleague Mr. Cockerell had spoken for himself with no uncertain sound—if the motion were carried and the Bill referred back to the Select Committee, he saw no chance of their altering their opinion.

The Hon'ble SIR ALEXANDER ARBUTHNOT was not prepared to say that he agreed with every word that had been uttered in the course of the debate in opposition to the amendment moved by the Hon'ble Member, but he might say that in everything that had been said by his hon'ble friend

Mr. Cockerell he entirely concurred. It would be useless for him to advert to the various arguments which had been adduced against the amendment. But one remark he might be permitted to make, and that was that the appeal which had been made by his Hon'ble colleague MR. Hope to the general experience of those who were engaged in the administration of the country, was in no way supported by the communications which had been addressed to the Government of India with reference to this Bill. They had before them reports from the Government of Bengal and the High Court at Calcutta, from the Chief Commissioner of British Burma, the Government of Madras, the Chief Commissioner of Assam, the Lieutenant-Governor of the Panjáb, the Chief Commissioners of Ajmer and the Central Provinces, the Government of Bombay, the Government of the North-Western Provinces, the Chief Commissioner of Mysore, and the Residents of Haidarábád and Baroda. In not one of these communications was a word said, that would lead SIR ALEXANDER ARBUTHNOT to the conclusion that the precautions which his Hon'ble colleague deemed to be necessary, ought to be taken by this Council. He (SIR ALEXANDER ARBUTHNOT), perhaps, need say but little as to that part of the motion which provided for the early return of documents to the parties; but he could not help being struck by some of his Hon'ble colleague's remarks on this point. His Hon'ble colleague alleged that it often happened that documents could not be got back, that documents could not be found, and that, not unfrequently, they were eaten up by white-ants. It appeared to SIR ALEXANDER ARBUTHNOT that none of these contingencies were contingencies against which this Council could effectively provide. What his Hon'ble colleague Mr. Thornton had said on that part of the amendment appeared to him quite convincing. But in his opinion it was not to be regretted that this debate had taken place, and he should be very glad if the proceedings of this Council were more often characterised by discussion and debate.

With reference to the suggestion which had been made by His Honour the Lieutenant-Governor of Bengal, he thought he might say, on the part of the Government of India, that the Executive Government would be careful to draw the attention of the various Authorities concerned, to the allegations which had been made, and to the arguments which had been used, in the course of this debate, and would direct their serious attention to the necessity of so framing the rules as to prevent, as far as might be possible, any of the evils against which this amendment was directed, occurring in their respective territories.

The Hon'ble MR. HOPE said he felt himself in a position of some difficulty, between his desire not to take up the time of the Council, and his inclination to point out the very obvious answers which existed to almost every one of the objections which had been advanced; and if, in his desire to be merciful to the Council, he failed to be just to the cause of the people, which he believed himself to be serving, he should no doubt be somewhat to blame. He did not wish to take up time with captious objections; but he would demur, first of all, to the statements which had been made by the Hon'ble Mr. Cockerell, who was a Member of the Select Committee on the Bill. First, he understood the Hon'ble Member to say that all that was at present contemplated was to stereotype the practice which had existed in Bengal for half a century, without a single suit being instituted against Government for the loss of a document which had been destroyed. That might be taken in two ways. If MR. HOPE was to understand that the Hon'ble Member approved of the rules passed by the High Court, and that those rules had acted so well, then those rules contained, and this Bill did not, all the safe-guards which he was anxious to see provided. And he might add, with reference to the remarks which fell from Sir Alexander Arbuthnot, who said that he had carefully looked through the papers and had found nothing therein which showed the necessity for this amendment, that he, to a certain extent, had taken the idea of a part of his amendment from the papers which were received from Bengal and printed as No. 9. Mr. Field, in a very able report on the subject, mentioned that in all the rules from the earliest times—in 1833, in 1852, and in 1865—provision had been made for the return of documents to the parties to whom they belonged, and that the rules of 1852 required the preservation of original documents filed by the parties,

So, if it was the system prevailing in Bengal which the Hon'ble Member wished to stereotype, then it was clear that MR. HOPE's view was in accord with that of the Hon'ble Member. But if the system he desired to confirm was that shown by all the rules as they were found in other places, then MR. HOPE demurred to the propriety of stereotyping rules such as those he found laid down by the Madras High Court. These rules occupied only half a page, and it was there said that, excepting judgments and decrees of the Civil Courts, and any documents which the Judge, for special reasons, might order to be preserved, all records, including documents put in by parties as exhibits, were to be destroyed after three years! Now, was it the system in Madras or that in Bengal, or the general want of system, which the Hon'ble Member desired to stereotype?

Another point which had been dwelt upon by more than one Hon'ble Member was, that the rules would not be acted upon until they had been sanctioned, and His Honour the Lieutenant-Governor supported Mr. Thornton's suggestion, which MR. HOPE admitted was an exceedingly good one, that the Home Department should draw the attention of the Local Governments to the desirability of providing in the rules for the objects MR. HOPE desired. But as to that MR. HOPE would point out that, according to the present Bill, it did not follow that there were going to be any new rules at all. The Bill merely said that the Court might, from time to time, make rules, and section 6 of the Bill provided that the rules now in force should continue and have the force of law until they were rescinded. Therefore, it did not follow that there would be any new rules passed in consequence of the passing of this Bill; and therefore the effect of the suggestion would at best be that the next time any rules were revised, these matters would be taken into consideration. Further, some of these rules were made by the High Courts, and he did not know whether the High Courts would altogether relish receiving a letter from the Home Department pointing out what was desirable. Again, if it was desirable to put such directions into a letter, why might not they be sufficiently sifted to be put in the shape of directions in broad terms into the Act? Again, the Hon'ble Mr. Cockerell had remarked that what MR. HOPE wanted was to impose restrictions which had already been recognized as obligatory. But what MR. HOPE had said in regard to the rules in force in the Madras Presidency distinctly showed that the restrictions he desired were *not* held to be obligatory there.

Another point was one which had been dwelt upon by the Hon'ble Mr. Thornton and other Hon'ble Members, but with reference to which MR. HOPE must point out that the scope of his amendment had been entirely misunderstood. The Hon'ble Member had pointed out that it would not be possible, on account of the varying circumstances and advancement of different Provinces of India, to prescribe in the Act the nature of the documents which should be preserved and the time after which they might be destroyed. But MR. HOPE's amendment did not contain anything which could bear such a construction. All that he contended for was that each Court should in the Rules prescribe, amongst other things, periods for the destruction of records in proportion to the importance of the documents. Therefore, everything that had been said by Hon'ble Members on this point might be held to have been unintentionally irrelevant.

With reference to the epigrammatic summary by the Hon'ble the Law Member, of the amendments which MR. HOPE had proposed, that the first of them was impracticable, the second incongruous, and the third, if it were practicable, would be useless, he would remark that epigrams were somewhat dangerous things, and he was afraid that epigrams of that sort would seldom bear scrutiny. He might take up the time of the Council by replying in the same style; but he would only say that to him it seemed that such of the Hon'ble Law Member's remarks as were not irrelevant were erroneous. The first objection, that the amendment was "impracticable," was founded upon a totally mistaken construction of it, namely, that it contemplated that the Act should specify in every case beforehand what sorts of documents should be preserved and what should not; and that there should be a uniform system of rules throughout India. But for this MR. HOPE did not contend, and

such a contention, it would be seen, would not be in accord with the manner in which the entire Bill had been drafted. All that he wished was to secure that the rules should provide for the preservation of documents for suitable periods. He regretted to hear that, by the Hon'ble Member, all those records which contained valuable evidence, accounts and deeds, were designated as "trumpery documents." That was the key-note of the Hon'ble Law Member's treatment of the Bill, and though it would seem to be also the view which the High Court of Madras entertained, he must altogether repudiate it.

With reference to the objection made by one Hon'ble Member, and which finally came from the Hon'ble Mover of the Bill, in the form that the second part of MR. HOPE'S motion was "incongruous," inasmuch as it related to the early return of documents put in evidence, and the explanation that it was incongruous because the law already provided that documents filed in Court should be given back to the parties, he must point out that that was an error apparently arising from a too superficial consideration of the requirements of the law. The upshot of the sections of the Civil Procedure Code to which reference had been made (59, 62, and 143-4) was, that a person should ordinarily be entitled to the return of his document when he asked for it. But what was provided in the Bengal rules was, that to every copy of a decree given to the parties to a suit a printed notice should be attached, calling upon them to remove their documentary evidence as soon as the decree became final; and again, that at another stage notice should, wherever practicable, be given to the person or persons on whose behalf any documents were brought into Court, calling on them to take them back into their own keeping within six months,—thus giving the owners of documents in Court a fair warning, which they would neglect at their peril.

The third objection was that, if the measure proposed were not impracticable, it was useless. MR. HOPE submitted that it was neither the one nor the other. If it was impracticable, he should like to have explanation as to how analogous provisions came to exist in the rules of the Bengal High Court, and to have worked, according to the Hon'ble Mr. Cockerell, satisfactorily for nearly half a century, and to have been re-enacted in the new set of rules in July, 1877. The rules provided that notice to withdraw their documents should, wherever practicable, be given to the parties both at the time of decree and on a subsequent occasion, that certain records should be preserved for various periods of time, and that certain documents should be preserved even though not taken away. If that was not practicable, then the Bengal High Court had put very foolish provisions in their recent rules. If it was, then the supposition of the Hon'ble Law Member that no staff of clerks would be able to carry out MR. HOPE'S proposal, and that notices could not be issued, was opposed to the facts. As to the assertion that MR. HOPE'S views were not corroborated by the general experience of the country, he would remind the Council that he had already pointed out that such corroboration did exist in some of the papers, and would also observe that in the reports received on Bills, it did not often occur that the Council got remarks from all quarters upon specific points unless attention had actually been drawn to them and opinions had been required. If a circular were now to go to the Local Governments asking if they considered, on the whole, that provision should be made in the rules under the Act for securing the early return of documents put in evidence and the giving of due notice before the destruction of important records and documents, he believed that five out of six of them would think it very reasonable that such provision should be made.

In conclusion, he would submit that he had, he believed, given effectual answers to the whole of the objections which had been made. The argument against his motion amounted to this, that the interests of suitors were already sufficiently protected by the existing system. If so, he did not see why they should legislate at all in the matter. What he urged was, that if they were going to make a law, they must sufficiently protect the interests of those who would be affected by it. He would remind the Council that his motion was simply for time and for the re-consideration of the Bill with the assistance of a

Committee larger than the present one, the smallness of which had been so suitably commented upon by His Honour the Lieutenant-Governor. If after the Committee had obtained copies of all the rules in force in the different Provinces and looked at them, and had asked the Local Governments if they thought the provisions suggested by his motion were desirable or otherwise, the Committee should come to the conclusion that no amendment in the Bill was necessary, he should be perfectly satisfied. There was no urgency for the passing of the Bill, and there was nothing which made it necessary that his plea for time for further consideration should be denied.

When he was referring to the rules of the Madras High Court, he had accidentally omitted to mention that he had also consulted the Panjáb rules. They were generally good rules compared with some others, but were open to exception. For instance: it was first provided in Rule 12 that the file A in all civil suits for immoveable property should be preserved in perpetuity. But that was governed by a later rule which said that, when the record-room was over-crowded, the Deputy Commissioner might, with the sanction of the Commissioner, order the destruction of "all records of suits for or relating to rights in immoveable property which had been decided for twenty years and upwards." What then would be the position of an unfortunate man who, relying upon Rule 12, and believing that under it certain important papers relating to his property were safe and to be preserved, left them there rather than make an application for the return of them which might be opposed by his other sharers in the land, but who, when he did apply to the Court for them in some emergency, was told that the papers had been burnt five or six years previously, as there was no space for them in the record-room? It was true that, in such cases, an abstract of the property and right concerned, and the final order, were preserved; but, having proper regard to the protection of property, he thought that no such abstract or final order of a Court would compensate for the loss of an original document giving a title to land. The Panjáb rules contained no provision at all for notice or return of documents to parties, and he would conclude by offering them as an illustration of his case.

His Excellency THE PRESIDENT said that the amendment appeared to him in its main character to be undesirable, nor was it desirable in the real interests of the owners of documents which had been put in evidence. He did not think that that view had been disputed by any Hon'ble Member, and it did not seem to him that the Hon'ble Member had shown that the identical rule was practicable in all parts of India, or that directions in support of that object should properly be the result of legislative enactment instead of executive orders. Although he sympathized with the object of the amendment, he did not feel in a position to support it. He therefore opposed the motion.

The amendment was put and negatived.

The Hon'ble MR. STOKES' motion was then put and agreed to.

The Hon'ble MR. HOPE moved that the following words be omitted:—

In the Preamble, "and Revenue-offices."

In section 4, "and offices."

In section 6, "or Revenue-office."

The inclusion of these words, as far as he was able to make out, was owing to some remarks which fell from the Hon'ble Mr. Thornton on the 16th October last. He said—

"If legislative sanction was really necessary to authorize the destruction of public records on the ground that, amongst those records, there were documents which were private property, why should the scope and operation of the present Bill be confined to judicial records only? Why should not its operation be extended so as to embrace the records of other departments of the Government? The records of the Revenue, Settlement, Police and other departments were very voluminous."

There was also an allusion to the matter in a letter from the Government of the Panjáb and in a letter from the Government of Bengal; but whether the Bengal Government supported the proposal or not, MR. HOPE thought was not exactly clear. It appeared to him that, before making this important addition to the Bill, all the Local Governments should be consulted, because, adopting the argument recently used in the other case, the circumstances of suits and the nature of the work under different Governments were so various, that

legislation which might be exceedingly desirable in one Province, might be totally undesirable in another. What might be the force of that objection, he left others to consider. But he would ask, in the first place, what were "revenue-records?" If they were the records and letters of the Collector, he, as the head of the district, was corresponding perpetually on every kind of subject. His records and letters were all filed and kept together, and it would not be possible for a letter relating to the settlement of land-revenue and a paper relating to any ordinary matter to be treated differently. But besides considering the circumstances and varying conditions of different parts of India, the words "Revenue-office" were totally unsuitable. But again why "Revenue-offices" only? Why not Police and other offices? Why select Revenue-offices in particular? Why not include the Secretariat offices? The reason for legislation given was that the papers in Revenue-offices sometimes included private documents. Did all valuable documents of private persons always stick with the Collector and never come to the Government of India or the Local Governments? If all the other public departments were not included, the provision would be an imperfect provision, which would not answer the ends it was intended to meet. MR. HOPE would put aside the question, which had been mentioned in a letter from a Bengal officer, Mr. Field, as to whether it was necessary to have legislation, a question which the Hon'ble Mr. Cockerell also seemed doubtful about. Leaving that aside, MR. HOPE would say that such documents were exceedingly rare as compared with the mass of other records, and he thought that greater care would be taken of them if they were left as they were than if destruction of them were legalised. But private documents were by no means the most important documents. All manner of reports and accounts of the early history of the country from the time of Sir John Malcolm were amongst the records of Revenue-offices. It was only the Local Government which could judge how far these papers could be destroyed, and it would be very much safer to leave the matter to the discretion of the heads of Departments themselves, than to have formal rules rigidly acted on with the force of law. In short, it seemed to MR. HOPE that when they proceeded to legislate as to particular correspondence, they were over-legislating. It might be reasonable to legislate for the records of Courts, but not as to the correspondence of ordinary offices. It might next be a question whether they should not legislate in regard to their own private correspondence, so that no man should keep a document belonging to another person without the permission of the State. He therefore held that Revenue-offices should not be included in the Bill,—in the first place, because the matter could not be properly provided for by legal rules; secondly, because legislation was unnecessary, and thirdly, on the ground that we should avoid over-legislation.

The Hon'ble MR. THORNTON said that his hon'ble friend's amendment was based upon two objections which appeared somewhat inconsistent one with another; one being that the provisions of the Bill were too extensive, and the other that they were not extensive enough. As for the first objection, that is to say, that no case had been made out for the extension of the Act to Revenue-offices, he would explain that, as rules for the destruction of records in Revenue-offices already existed—at any rate he could vouch for the fact of their existence in one Province—it was thought desirable to include these offices within the scope of the enactment. But it would be observed that the Act was permissive in its character, and that if in any locality no rules were required to regulate the destruction of useless documents in Revenue-offices, they need not be made. As for the second objection, namely, that, if the provisions of the Act were made applicable to Revenue-offices, they should be made applicable to all Government offices, he would remark that the argument was theoretically plausible; but there was a difference between the case of Revenue-offices and the offices of Government not included within the scope of the Bill, namely, that, in the case of the former, there was some evidence that destruction of records was carried on and that rules were required; in the case of the latter, there was no such evidence. He (MR. THORNTON) was not afflicted with a phrenzy for legislative symmetry, and preferred not to legislate unless there were grounds for believing that legislation was practically wanted.

Should it appear, hereafter, that other Government offices required to be relieved by periodical destruction of papers, including private documents, it would not be difficult to pass an amending Act.

The Hon'ble MR. STOKES said the extension of the Bill to records, books and papers contained in revenue-offices (the expression "revenue-records" did not occur in the Bill) was made not merely at the suggestion of the Hon'ble Mr. Thornton, but also of Mr. Barkley (now, or lately, a Judge of the Chief Court at Lahore), and lastly, of Mr. Field and Mr. O'Kinealy with the concurrence of His Honour the Lieutenant-Governor of Bengal. Such records, he was told, occasionally did comprise private documents, and for this reason they should be dealt with in the Bill. He was therefore compelled to oppose this motion also, and to express a hope that the Hon'ble gentleman would now allow the Bill to become law.

The Hon'ble MR. HOPE said that, in the first place, no answer had been given to his question as to what revenue-records were. In the second place, he believed it was a mistake to suppose that the power given was purely permissive. The object of the rules was the protection of private parties, and therefore the word "may" would be construed as obligatory and imposing a duty for the benefit of the subject. Instead therefore of the Bill being permissive, it *required* that rules should be made. He knew that rules existed in Bombay, as well as in the Panjáb. But his argument was that it would be better to leave the framing of this sort of rules to the action of the Local Government instead of requiring them to be made as law. The Council had no proof, except from the two Local Governments named, that any of them desired or found it necessary to have legislation on the subject, and he thought that it was much better to leave the matter in the hands of the executive officers.

The Motion was put and negatived.

His Honour THE LIEUTENANT-GOVERNOR moved, as an amendment to section 5, that all the words after the word "sanction" in line 2, to the word "rules" in line 6 be omitted. Great stress had just been laid, and he thought very properly, on the importance of the rules under this Bill being approved by the Local Government. If the rules went before the Local Government, it had been said, local peculiarities would receive that consideration which they could receive only at the hands of the Local Government; and it was on the ground of the local knowledge which was required to make rules under the Act work satisfactorily that the proposal to give detailed instructions in the Bill as to the form of the rules had just been negatived. But he was surprised to see, in the face of that argument, that, as regarded the largest Province of India, namely, Bengal, the Local Government had been entirely set aside, and such protection as the people would get from the security given to them of having the rules, which would be framed by the Court, tested, examined, and confirmed by the local executive authorities was set aside, and the section provided that the rules for all the District Courts of Bengal should be framed by the High Court, and should be submitted, not to the Local Government, to whom the rules framed in the other Provinces must be submitted, but to the Government of India, which had just avowed itself not to be in a position to deal with these local questions. The only security to persons interested in suits would be to provide that the rules should be approved and sanctioned by the Local Government, and he therefore proposed the amendment. An alteration had been made in the Bill since he had expressed his approval of its principles.

The Hon'ble MR. COCKERELL wished to say a few words in explanation of the vote which he intended to give in reference to this amendment. The Bill as introduced into the Council provided for the rules to be framed under the Act by the High Court at Calcutta being referred for the sanction of the Local Government; but it had been represented to the Committee that such a provision would be inconsistent with the general practice obtaining in cognate cases, under which the Government of India was the general referee in matters in regard to which the action of this High Court required the concurrence or approval of the Executive Administration. He was not going to

say anything on the very delicate question of the relations between the Local Government and the High Court of Calcutta in the matter of executive control. It was well known to the Council that on this point high functionaries had from time to time displayed extreme sensitiveness. He (MR. COCKERELL) had advocated in Committee the propriety of making the reference, in the case of the High Court at Calcutta no less than in the case of other High Courts, to the Local Government, but had been over-ruled on the ground that it would be an innovation on the existing practice. But he thought that, in a Bill of the kind before the Council, it was essentially necessary, whatever might be the general practice, that rules framed by the High Court at Calcutta should be made subject to the approval of the Local Government.

The Hon'ble MR. STOKES said that, as the Bill was originally framed, it provided that all rules made by the High Courts should be submitted to the Local Government for approval. But the High Court at Calcutta had observed, with perfect accuracy, that the practice was that rules made by that High Court should be approved by the Government of India, and not by the Local Government, and the Committee altered the Bill accordingly. Now His Honour objected that he would have no opportunity of seeing that the rules made by the High Court at Calcutta were adapted to the circumstances of the Province. It seemed to MR. STOKES that, by adopting a middle course, namely, by providing that the rules should be submitted, in the case of the High Court at Calcutta, "through the Local Government to the Governor General in Council," the difficulty raised by His Honour the Lieutenant-Governor would be obviated and the *amour propre* of the High Court preserved. And he proposed, with the permission of His Excellency the President, to move an amendment to that effect.

His Honour THE LIEUTENANT-GOVERNOR strongly objected to any distinction being made between the High Court at Calcutta and the High Courts of other Provinces in a Bill such as this. If local experience and the control of the local executive was called for in one case, it was called for just as much in the other.

The Hon'ble MR. STOKES said that the change which His Honour proposed would be very annoying to the Calcutta High Court. No one knew better than His Honour that the world was governed by feeling as well as reason, and that neither of these factors should be disregarded by a legislature. Besides, such distinctions as were made by the Bill had often been made by this Council; see, for instance, Act X of 1875, section 5, which provided that, for the exercise of its original criminal jurisdiction, each High Court might hold sittings in the Mufassal, "in the case of the High Court at Fort William, with the consent of the Governor General in Council, in all other cases, with the consent of the Local Government." Parliament, moreover, in framing the High Courts Act (24 & 25 Vic., c. 104) had made a clear distinction between the Local Governments of Madras, Bombay and North-Western Provinces and the Local Government of Bengal. In fact the latter Government was ignored.

The Hon'ble MR. HOPE said the amendment proposed was entirely in harmony with the vote which had been just passed on the first of his two amendments. It was held that the Local Government was best fitted to deal with questions such as would be provided for in the rules passed under the Act.

The Hon'ble SIR JOHN STRACHEY gave his support to the amendment of His Honour the Lieutenant-Governor. He thought it was not right that the legislature should in any way, even in a small matter like this, recognise the principle that the relations between the High Court of Fort William and the Local Government of Bengal ought to differ in any way from the relations of the High Courts of other Provinces with the Local Governments of those Provinces.

The Hon'ble SIR ALEXANDER ARBUTHNOT said there were two amendments before the Council, one proposed by His Honour the Lieutenant-Governor, and one moved by his Hon'ble friend the Law Member. He now ventured to propose

a third amendment. He ventured to suggest that the reference to the Government of India of the rules made under the Bill be not confined to the Province of Bengal, but be extended to all the Provinces of India. It seemed to him that by taking that course they would to some extent meet the objections which had been advanced by the Hon'ble Mr. Hope, and they would also meet the other objection to which allusion had just been made, but which he would not more specifically characterize. He did not think that the amendment, which he was about to propose, would entail much additional labour on the Government of India, and the effect of it would be, that in those matters in which uniformity might be desirable, uniformity would be ensured; and that in those respects in which defects in the rules might be capable of a remedy, a remedy would be given. He would move that, for section 5 of the Bill, the following be substituted, that is to say:—

"All rules made under this Act shall, after being confirmed by the Local Government and sanctioned by the Governor General in Council, be published in the local official Gazette, and shall thereupon have the force of law."

His Honour THE LIEUTENANT-GOVERNOR then said that the amendment now proposed by the Hon'ble Sir Alexander Arbuthnot would meet his view, and he therefore withdrew his amendment.

The Hon'ble MR. STOKES also withdrew his amendment. The Hon'ble Sir Alexander Arbuthnot's amendment was in exact accordance with the procedure prescribed by the Court Fees Act, section 20, as to rules made under that section.

The Hon'ble SIR ALEXANDER ARBUTHNOT'S amendment was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill as amended be passed.

The Motion was put and agreed to.

PRESIDENCY BANKS ACT AMENDMENT BILL.

The Hon'ble SIR JOHN STRACHEY introduced the Bill to amend the Presidency Banks Act, 1876, and moved that it be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Morgan, Hope, Colvin and the Mover. He said that the Statement of Objects and Reasons annexed to the Bill left him little or nothing to say on behalf of the motion made. When he had asked leave to introduce the Bill, he had explained to the Council the object with which it was brought forward. The most important provision in the Bill was that which he had stated last week. He then said—"Its necessity had mainly arisen from doubts which had been expressed as to whether the Banks had power, under the Act of 1876, to borrow money by pledging the assets or property of the Bank." The three Presidency Banks presented memorials to the Government and begged that the law might be so amended that all doubt on this subject might be removed. The other sections of the Bill provided for some small amendments which it was thought desirable to take this opportunity of making. There were only one or two of those amendments on which he need say anything more than was said in the Statement of Objects and Reasons. The provision by which it was proposed that the President and Vice-President should not be eligible for election for two consecutive years was based on the model of the Bank of England. He believed that the Governor and Deputy Governor of the Bank of England practically served for two years; and if on discussion in Committee it should be thought right that the Presidents and Vice-Presidents of the Presidency Banks should be allowed to serve two consecutive years, the Government had no objection to offer. He might add, in reference to some remarks which had been made by one of the Banks, that at one time it was thought it might be necessary to make legal provision to enable the Banks to make loans on provincial debentures. The Government had been advised that these securities did not differ from other securities guaranteed by the Secretary of State for India. His Hon'ble friend Mr. Hope at the last meeting of the Council made some remarks which appeared to show—SIR JOHN STRACHEY was not sure that he interpreted the Hon'ble Member correctly—that he desired to take the opportunity of urging the pro-

priety of making some important changes in the existing law. SIR JOHN STRACHEY thought it right therefore to say that the Executive Government did not consider that any important changes in the existing law ought now to be made; and under these circumstances, he did not consider that any useful purpose was to be gained by discussing the subject. As he had said last week, the Act had been in force very nearly three years, and there was no doubt that it had worked on the whole exceedingly well. Such small amendments as it was now proposed to make were for the most part proposed in accordance with a desire expressed by the Banks themselves, and there appeared to the Government no reason for altering at present any of the substantive provisions of the law.

The Hon'ble MR. STOKES said that he wished to supplement his hon'ble friend's remarks by a few words explanatory of the doubt which had been raised as to the power of the Directors of the Presidency Banks to borrow in India by pledging assets. It might, at first sight, be supposed that they already possessed such a power, for power to borrow was so necessary to a banking company that its directors could not be deprived of it save by express words or necessary implication. Furthermore, there was clause (*a*) of section 36 of the Presidency Banks Act, which authorized the Banks to do "all such matters and things as may be incidental or subsidiary to the transacting of the various kinds of business hereinbefore specified." In point of fact, a high legal authority in England had held that the Directors of the Presidency Banks had this power to borrow, and his view was supported by Mr. Justice Lindley, in the new edition of his treatise on Partnership and Companies (p. 270), and by the decision of the Judicial Committee in the *Bank of Australasia* v. *Breillat*, 6 Moo. P. C. 152. Certain leading members of the Calcutta Bar, however, had thought it possible that the particularity with which the Directors' powers were specified in the Act might possibly lead the Judges to hold that power to borrow by way of pledging assets (which power was not so specified) was not intended to be conferred on the Directors; in other words, that the Act was in this respect restrictive of the ordinary powers of Bank Directors. MR. STOKES had a better opinion of the Judges; but the existence of such a doubt, when expressed by gentlemen of great professional eminence, fully justified the proposed legislation

The Hon'ble MR. HOPE said he had only to explain that, at the last meeting, the Council were not in possession of any information as to what the general scope of the Bill was to be, and therefore he thought it not out of place to express his general opinion that the opportunity should be taken to amend the Act in the direction which he had indicated. But now that he had seen the Bill, he thought that the amendments he had in view could not well come within its scope. He, therefore, disclaimed any desire to hamper this Bill by any such suggestions. Time, he thought, would soon show important amendments made in the law relating to banks in England, which we should be compelled to adopt here.

The Motion was put and agreed to.

The Hon'ble SIR JOHN STRACHEY also moved that the Bill be published only in English in the *Gazette of India*, the *Calcutta Gazette*, the *Fort Saint George Gazette* and the *Bombay Government Gazette*.

The Motion was put and agreed to.

The Council adjourned to Wednesday, the 12th March, 1879.

CALCUTTA;
The 5th March, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

PROCEEDINGS OF THE RAILWAY CONFERENCE HELD AT CALCUTTA IN FEBRUARY 1879.

Nos. 1080--1104 R., dated Fort William, 13th March 1879.

Read again—

Public Works Department Resolution Nos. 375--99 R of the 20th January 1879.

Read also—

Letter No. 7 of 24th February 1879, from Colonel J. S. Trevor, R.E., President, submitting the Proceedings of the Railway Conference held at Calcutta in February 1879.

OBSERVATIONS.—The Conference of Railway Delegates assembled at Calcutta on the 10th February in accordance with Government of India Resolution Nos. 375—99, dated 20th January 1879, and held six meetings.

2. The primary object of the Conference was to lay down rules for the interchange of rolling-stock between all connected railways.

Twenty-two rules were framed and passed and a resolution was recorded to the effect that these rules, with the approval of the several Boards of Directors, should come into force on the 1st September next.

3. The Conference also had under consideration the want of a revised set of general rules and regulations for all Indian Railways, and the following resolutions were passed:—

(i).—In the opinion of this Conference, a revised set of general rules and regulations for all Indian Railways should be compiled and published under Section 14 of the new Draft Act, or under the corresponding section of the Act as passed.

(ii).—That Government be asked to appoint an officer to compile the rules and regulations, and that the Agent of each Company be requested to decide, on behalf of his own Company, on the adoption or modification of such rules.

(iii).—That the Agents of the several Companies be invited to send in to the Secretary of the Railway Conference any new rules or regulations they would like added to those now in force on their lines, and also any corrections or alterations they wished to have made in the existing rules.

4. The question of establishing Provident Funds for Railway employés was discussed, and it was suggested that certain proposals submitted by the Agents of the Bombay, Baroda and Central India and Madras Railways be referred to the various Boards of Directors and the Government of India, with a view to ascertain if they would be prepared to contribute to such a fund out of working expenses, and if so, to what extent.

5. The Hon'ble Sir Andrew Clarke brought before the Conference the subject of technical and industrial education for the children of Railway employés, and said that he would be glad to learn the views of the Agents on the establishment of a large Central Technical and Industrial School in the hills for the elder children of Railway employés. The State to build the school, the annual maintenance to be paid by the parents, and by a grant-in-aid, per pupil attending, from the revenue of the several lines. Schools to be constructed to accommodate at least 800 boys or 800 girls, as the expense per head for smaller numbers would be, in Sir Andrew Clarke's opinion, almost prohibitory. The Agents stated that they would, after communication with their London Boards, address Government on this matter.

6. Sir Andrew Clarke introduced for discussion the draft Railway Bill which was read clause by clause, and various suggestions and alterations were noted for the consideration of the Select Committee to which the Bill had been referred.

RESOLUTION.—The Government of India learn with satisfaction that a practical set of rules for the interchange of rolling-stock have been passed by the Conference.

2. The Resolutions touching on the compilation of a revised set of general rules and regulations are approved. Copies of the existing rules and regulations, and also the corrections and alterations which are desired by the Railway authorities should be submitted to the Government of India at an early date.

3. The question of instituting Provident Funds should be taken into consideration.

4. Attention should be invited to paras. 34, 35 and 36 of the Conference Minutes on the subject of establishing a Central Technical and Industrial School for the children of Railway employés; on this point Government will await the communications promised by the Agents of the Railway Companies.

5. The thanks of the Government of India should be conveyed to the Railway Delegates for the care and attention they have bestowed on the subjects brought before them, and for the careful and conciliatory manner in which the intricate question of interchange of rolling-stock has been dealt with. The thanks of His Excellency the Governor General in Council are also due to Major-General J. S. Trevor, R.E., the President of the Conference, for his conduct of this special matter of the interchange of rolling-stock.

ORDER.—Ordered, that this Resolution, together with the Proceedings of the Conference, be communicated to the Governments and Administrations and Officers marginally noted, for information and guidance, and to the Government of the Punjab, the Chief Commissioner of Assam, the Agents to the Governor General for Central India and Rajputana, the Director of State Railway Stores, and the several Departments of the Government of India for information.

The Governments of Madras, Bombay, Bengal and North-West. rn Provinces and Oudh.
The Chief Commissioners of the Central Provinces, British urmah, and Mysore and Coorg.
The Resident at Hyderabad.
The Consulting Engineers for Guaranteed Railways.
The Directors of State Railways.

Ordered also, that this Resolution be published for general information in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Colonel, R.E.*,
for *Secretary*.

Interchange of Rolling-Stock between all connected Broad Gauge Railways in India.

Proceedings of the Conference of Railway Delegates assembled at Calcutta on the 10th of February 1879 in accordance with Government of India Public Works Department Resolution No. 375—99 (Railway), dated 20th January 1879.

No. 1.

1. At a Meeting of the Railway Delegates held at the Public Works Secretariat in Calcutta on the 10th February 1879—

PRESENT:

COLONEL J. S. TREVOR, R. E., ...			PRESIDENT.
G. L. MOLESWORTH, ESQ., Consg. Engr. to Govt. of India,	Delegate from	State Rys.	VICE-PRESIDENT.
BRADFORD LESLIE, ESQ., Agent and Chief Engr.	„	E. I. R. Co.,	MEMBERS.
FRANKLIN PRESTAGE, ESQ., Agent,	„	E. B. Ry. Co.,	
COLONEL J. H. JENKINS, B. S. C., Agent,	„	O. & R. Ry. Co.,	
D. ROSS, ESQ., Traffic Manager. / JABEZ LIGHTFOOT, ESQ., Auditor. (Joint with one vote.)	„	S. P. & D. Ry. Co.,	
F. MATHEW, ESQ., Agent and Chief Engr.	„	B. B. & C. I. Ry. Co.,	
H. CONDER, ESQ., General Traffic Manager.	„	G. I. P. Ry. Co.,	
A. M. SAUNDERS, ESQ., Agent and Manager.	„	Madras Ry. Co.,	

The following officers also attended the Meeting and joined in the discussion, but did not vote on the questions put to the Meeting:—

N. ST. L. CARTER, ESQ., Traffic Manager, E. I. Ry. Co.
CAPTAIN W. SEDGWICK, R. E., Offg. Manager, P. N. State Railway.
J. CONDER, ESQ., Traffic Manager, I. V. State Railway.
CAPTAIN R. A. SARGEAUNT, R.E., Secy. to the Conference.

2. The following rule which had been previously proposed and circulated was read, *viz.*:—

Rule for regulating the mode in which the decisions of the Conference of Railway Delegates are to be arrived at and given effect to.

"It shall not be competent for any representative of a Railway Company to intimate the withdrawal of his Company from any resolution arrived at by the majority of the Conference, but no resolution will be brought in force till three months have elapsed from the date on which it may be passed, and it will be open to the London Board of Directors of any Company within that period to record its dissent, on which such resolution will, as regards their line, be inoperative."

Proposed by Mr. Saunders and seconded by S. P. & D. Ry. Delegate that the three months in the above rule be extended to six months. There being no objection raised to this extension of time, the proposition was carried. With this modification the rule was agreed to (subject, as far as the Great Indian. Peninsula Railway are concerned, to paras. 2 and 3 of their Agent's letter No. 1415 of the 30th January 1879, addressed to the Consulting Engineer for R ailways, Bombay, being recorded below.)

Extract from Great Indian Peninsula Railway Agent's letter No. 1415.

"2. With regard, however, to the rule proposed to be adopted for regulating the mode in which the decisions of the Conference are to be arrived at and given effect to, the circumstances of the English Railway Clearing House are hardly sufficiently similar to form a guide to the rule which should be adapted to provide for alterations in India. Moreover, any resolution of the Conference would scarcely be in the hands of the Directors in sufficient time to enable them to communicate their opinion upon it within three months."

"3. I am therefore to state that the Agent cannot accept any decision arrived at by the Conference until it has been approved of by the Board of Directors."

3. General rules for the interchange of rolling-stock were then discussed.

The following rules were agreed to as applicable to all Indian broad gauge railways:—

GENERAL.

RULE I. The day is to be reckoned as 24 hours, commencing at midnight. Madras time to be adopted in all cases. The week to end at midnight on Saturday.

No *dies non* to be allowed under these rules.

RULE II. All stock to be considered as handed over when entered in the number-taker's book at the junction station, and it is to be so entered directly it is put into the lines or sidings in which such stock is usually placed for that purpose.

Calculation of free time and demurrage charges to be reckoned from the first complete hour after delivery, fractions of hours being disregarded.

RULE III. Passenger carriages, horse-boxes, carriage trucks, break-vans, and passenger road or luggage vans, are to be, in all cases, reckoned as coaching vehicles, whether they run upon passenger or goods trains. All other kinds of vehicles are to be reckoned as goods vehicles.

RULL IV. No return vehicle shall be run, whether loaded or empty, unless otherwise mutually arranged, or any other than the exact route to its own line by which it was received, under a penalty of rupees twenty-two per diem from the time it was missent, until it returns to a station on the route by which it was received.

Vehicles may under the above conditions be loaded on their return journey to any station on the route to the owning line, or beyond *vid* the owning line.

RULE V. So soon as the rolling-stock of any Railway passes into the custody or possession of any other Railway, such other Railway is to be responsible for all and every contingency that may arise from the use of such stock

while it remains in their possession. Except that if the contingency is clearly traceable to defect of material or workmanship, the actual repair or replacement of the vehicle in which there was such defect, but not of any other vehicle or any other consequent damage, is to be at the expense of the owning Railway.

The cost of repairs arising from ordinary wear and tear to be always borne by the owning Railway, but cases of palpable damage (such as dropping heavy weights into wagons and so damaging the bottoms, neglect of greasing or oiling and other similar neglects), and all cases of accidents or collision to be borne by the Railway in whose custody or possession the stock may be at the time the damage occurs.

No claim shall be admitted for the cost of repairs of stock unless sent to the Railway which is responsible for the payment of it, within three months of the time at which the repairs are completed.

RULE VI. Six additional days to be allowed in case of damage to the stock of either Railway on the line of another Railway for the repairs of such stock, and no demurrage shall be charged for those six days. But if the damage is such as will require longer than six days to complete the repair, the stock must be returned to the owning Railway. If not sent within the six additional days, whether repaired or not, demurrage will be charged after the expiration of the six days unless specially exempted by the Traffic Managers of the owning Railway. Notice to be sent within one month to the owning Railway in all cases how and when the damage took place and the nature of it.

COACHING.

RULE VII. The exchange of passenger stock to be subject in extent to mutual arrangement between the respective Railways.

RULE VIII. The mileage charge on coaching vehicles to be seven pies per mile both on the outward journey and in returning, except that no mileage is to be charged on the return journey for horse boxes, carriage trucks, hospital carriages, prison vans, and special saloon carriages not used for ordinary traffic, unless returning under load.

Double horse boxes while carrying four or more horses to be counted and charged mileage as two vehicles.

RULE IX. Coaching vehicles to be allowed one hour for every twelve and a half miles run on foreign lines, and twenty-four hours extra at destination, free of demurrage.*

RULE X. Demurrage to be charged on all coaching vehicles detained beyond the time named in Rules VI and IX at the rate of eight annas per hour.

The Conference adjourned till 11 A. M. on the following day.

No. 2.

4. The Conference re-assembled at 11 A. M. on Tuesday, the 11th February.

PRESENT:

As on the 10th, with the exception that the Eastern Bengal Railway Company was represented by Mr. G. Low Calder, Chief Accountant, instead of by Mr. Prestage.

The proceedings of the previous meeting were read.

5. The discussion of the rules for the interchange of rolling-stock was continued.

GOODS.

RULE XI. The interchange of goods stock to extend to all connected lines and branches. A fair proportion of through traffic being accepted at junctions in time of pressure.

(N. B.—*This rule has been modified in accordance with Resolution under para. 25, page 316.*)

RULE XII. All consignments of less than three tons to be transhipped at junction. In all other respects, the interchange of goods traffic and stock shall be unrestricted.

* *Vide* para. 8, page 313.

Traffic Managers to be at liberty to make exceptions by mutual agreement as to the amount to be transhipped in cases of consignments which, from their bulk or weight, fully occupy a wagon, or require exceptional care, such as furniture, glass-ware, stationery, millinery, pictures, musical instruments, &c., &c.

The above two rules were unanimously agreed to.

6. The following rule was then proposed:—

No mileage charge to be made on goods vehicles when running empty, or returning with a load of eighty-one maunds or more to the owning line.

Mr. Molesworth proposed as an amendment that all words after the word "empty" be struck out.

For.	*Against.*
Mr. Molesworth.	Colonel Jenkins.
,, Mathew.	Mr. Leslie.
,, Conder (G. I. P. Ry.)	,, Calder.
,, Saunders.	
The S. P. and D. Ry. Delegate.	

Colonel Trevor did not vote.

The amendment was carried and the rule passed as under, *viz.*:—

RULE XIII. No mileage charge to be made on goods vehicles when running empty.

7. The following rule was next proposed:—

* That subject to the proviso in Rule XIII, mileage be paid to the sending Railway for goods vehicles of all descriptions at the rate of one pie per ton, or fraction of a ton of goods conveyed in either direction in such vehicles, in respect of every mile a goods vehicle of one Railway may carry goods on the line of another Railway.

Mileage to be paid on the weight entered in the invoice of charges.

This rule was agreed to by all Members of the Conference except Mr. Conder, Great Indian Peninsula Railway, who proposed a mileage rate of ⅓rd of a pie per ton.

* (*For Rule XIV as finally passed*, vide *page 316.*)

[When read at the following Meeting the mileage rate was further discussed, and Mr. Conder (Great Indian Peninsula Railway) suggested that, with the view of obtaining an unanimous proposal, a compromise as to the rate of mileage be made, and that the rate be fixed at half of a pie per ton, and the daily speed at 150 miles. This met with no seconder].

8. The Conference agreeing that a free allowance of time should be made according to the mileage run on a foreign line or lines, and also that 24 hours should be allowed for unloading and the same for re-loading free of demurrage: it was put to the Meeting whether the allowance of time should be reckoned both for coaching and goods vehicles by miles per hour, or by miles per day.

For miles per hour.	*For miles per day.*
Col. Jenkins.	Mr. Molesworth.
Mr. Leslie.	,, Conder (G. I. P. Ry.)
,, Mathew.	,, Saunders.
,, Calder.	
The S. P. and D. Ry. Delegate.	

Colonel Trevor did not vote.

Carried, that the reckoning be made at per hour.

9. Mr. Leslie proposed an allowance of seven miles per hour.

For.	*Against.*
Mr. Leslie.	Mr. Molesworth.
Col. Jenkins.	,, Conder (G. I. P. Ry.)
The S. P. and D. Ry. Delegate.	,, Mathew.
Mr. Calder.	,, Saunders.
Col. Trevor.	

Carried.

10. The opposers of this motion wished the following opinions to be recorded:—

Messrs. Molesworth and Mathew were in favor of a speed of six and a half miles an hour.

Messrs. Conder (G. I. P. R.) and Saunders were of opinion that the speed should be fixed at 140 miles a day.

11. The opinion of the majority being in favor of speed of seven miles an hour, the following rule was passed, *viz.*:—

* Goods vehicles to be allowed one hour for every seven miles run on a foreign line, and for unloading and re-loading 24 hours for each and every operation free of demurrage.

* (*For Rule XV*, vide *page 316.*)

12. Mr. Conder proposed that a free allowance of twelve hours at each junction be granted. This being supported by Mr. Saunders only, was lost.

13. It was then proposed that demurrage should be at the rate of one anna per ton of carrying capacity.

For.	*Against.*
The S. P. and D. Ry. Delegate.	Mr. Conder (G. I. P. R.)
Mr. Calder.	,, Molesworth.
,, Leslie.	,, Saunders.
Col. Jenkins.	,, Mathew.
,, Trevor.	

Carried.

14. Mr. Conder, in recording his dissent, stated that, in his opinion, the rate of demurrage should be Rs. 12 a day, or if the hourly rate had to be adopted, it should be annas 8 per hour. With this opinion Mr. Saunders concurred. Messrs. Molesworth and Mathew were in favor of the rate being fixed at annas 8 per hour.

15. The following clause was passed by the majority, *viz.*:—

RULE XVI. Demurrage to be charged on all goods vehicles detained beyond the time named in Rules VI and XV at the rate of one anna per ton of carrying capacity per hour.

The Conference adjourned till 11 A.M. on the following day.

No. 3.

THE CONFERENCE RE-ASSEMBLED AT 11 A. M. ON WEDNESDAY, THE 12TH FEBRUARY 1879.

16. PRESENT:—As at Meeting No. 1.

The proceedings of the previous meeting were read.

17. Proposed by the Sind, Punjab and Delhi Railway Delegate that—

RULE XVII. The receiving Railway may call upon the forwarding Railway to accept empty wagons with a view to equalize the ton-mileage.

This rule was agreed to without dissent.

18. Proposed by Mr. Leslie, and seconded by the Sind, Punjab and Delhi Railway Delegate, that—

RULE XVIII. The Railway on which through traffic originates shall provide wagons for such traffic. But when the through traffic offering is more than the wagon stock of the sending Railway can cope with, it may call on the receiving Railway to place a daily average capacity of wagon stock at its disposal at the junction for traffic to, and *vid*, the receiving Railway; and in the event of failure to comply within one week, the sending Railway shall be entitled to charge two pies per ton-mile on all traffic to the extent of the wagon stock short supplied, which it may send through in its own stock: provided that the receiving Railway shall not be required to supply more wagons than sufficient to maintain an equal interchange of stock based on the carrying capacity. Open wagons to be accepted if supplied with proper sheets and ropes.

This rule was agreed to by all members of the Conference with the exception of Mr. Conder (Great Indian Peninsula Railway), who did not vote.

19. Proposed—

RULE XIX. In case any goods vehicles are loaded on the homeward journey to any station short of the junction with the owning Railway, the Audit Offices of the respective Railways shall make a special return of the same to each other, and the mileage charge under Rule XIV shall be charged to the Railway so loading such wagons.

This rule was agreed to without dissent.

20. Proposed by Mr. Conder (Great Indian Peninsula Railway), and seconded by the Sind, Punjab and Delhi Railway Delegate, that—

Whatever amount is paid for mileage, demurrage or penalty for wrong sending by any Company for the use of vehicles of other Companies, is, in all cases, to belong, and be paid over to, the owning Company.

Mr. Leslie proposed as an amendment that the word "demurrage" be struck out—

For.	*Against.*
Mr. Leslie.	Mr. Molesworth.
,, Prestage.	,, Conder (G. I. P. R.)
Col. Jenkins.	,, Saunders.
Mr. Mathew.	The S. P. and D. Ry. Delegate.
Col. Trevor.	

The amendment was carried, and the rule passed as under—

RULE XX. Whatever amount is paid for mileage, and penalty for wrong sending by any Railway for the use of vehicles of other Railways, is in all cases to belong to, and be paid over to, the owning Railway.

21. The following rule was proposed:—

RULE XXI. Each Railway to accept the statements of other Railways with respect to the loads and wagons, unless the number-takers at the junction notice and record that the loads have been interfered with, when the actual contents, and their condition, must be ascertained and recorded by a responsible officer of the receiving Railway.

This rule was unanimously agreed to.

22. Proposed that—

RULE XXII. The accounts referring to any mileage, demurrage, or penalty for wrong sending, in which any Railway is concerned, shall be open to the inspection of such Railway.

This rule was passed without dissent.

23. The want of a revised set of rules and regulations for all Railways in India was brought by the President before the Conference. Several of the existing rules and regulations were made under Act XVIII of 1854, Section 29, and now require revision.

The President suggested that these rules should be printed in the manner adopted on English Railways, *i. e.*, such portions as relate to all Railways being in a uniform type, and the special rules for each Railway, if any, exhibited in a type peculiar to each Railway.

Such a compilation, he thought, could best be prepared by an independent Officer, in communication with an Officer of each Company nominated for the purpose.

Resolved that,—In the opinion of this Conference, a revised set of general rules and regulations for all Indian Railways should be compiled and published under Section 14 of the new draft Act, or under the corresponding section of the Act as passed.

Resolved further that,—Government be asked to appoint an Officer to compile the rules and regulations, and that the Agent of each Company be requested to decide, on behalf of his own Company, on the adoption or modification of such rules.

Resolved also that,—The Agents of the several Companies be invited to send in to the Secretary of the Railway Conference any new rules or regulations they would like added to those now in force on their lines, and also any corrections or alterations they wished to have made in the existing rules.

This was agreed to.

[Mr. Conder (Great Indian Peninsula Railway) not having been aware that this question was to be brought before the Conference, preferred not to express any opinion].

The Conference adjourned till 3 P.M. on the following day.

No. 4.

24. The Conference re-assembled at 3 P.M. on Thursday, the 13th February.

Present as at Meeting No. 1, except that Mr. Carter did not attend.

The proceedings of the previous Meeting were read.

25. Mr. Saunders proposed that the following be added to Rule XI, *viz.*:—

It shall not be competent for any Railway Company to refuse to receive traffic booked through from connected Railways, so as to devote all their resources to traffic booked locally, but a fair proportion of through traffic must be accepted.

Mr. Molesworth proposed, as an amendment, that the following be added to Rule XI, *viz.*:—

A fair proportion of through traffic being accepted at junctions in times of pressure.

The amendment was carried unanimously.

26. Mr. Conder (Great Indian Peninsula Railway) stated that from what he had heard there was a disposition to re-consider Rules XIV, XV and XVIII, and requested that they might receive further discussion, and, with the consent of the President, he made the three following propositions, which were voted on as a whole:—

(i). That the mileage rate for goods vehicles on foreign lines be fixed at $\frac{2}{3}$rds of a pie per ton, or fraction of a ton, of goods conveyed.

(ii). That goods vehicles be allowed one hour for every $6\frac{1}{2}$ miles run on a foreign line.

(iii). That in Rule XVIII the rate per ton-mile be fixed at double the ordinary mileage rate.

For.	*Against.*
Mr. Conder.	Colonel Jenkins.
,, Prestage.	The S. P. and D. Ry. Delegate.
,, Mathew.	Mr. Leslie.
	,, Saunders.

Colonel Trevor and Mr. Molesworth did not vote.

The motion was lost.

27. After further discussion, Mr. Conder (Great Indian Peninsula Railway) was given to understand that if he would withdraw the third item of his proposals, the Conference would, for the sake of arriving at a general agreement, accept his first two proposals. Mr. Conder (Great Indian Peninsula Railway) wishing to meet the general views of the Conference, and agreeing that a unanimous proposal on this much vexed and important question was desirable, withdrew his third item accordingly, and the following was put to the Conference:—

(i). That the mileage rate for goods vehicles on foreign lines be fixed at $\frac{2}{3}$rds of a pie per ton, or fraction of a ton of goods conveyed.

(ii). That goods vehicles be allowed one hour for every $6\frac{1}{2}$ miles run on a foreign line.

Carried without dissent.

The following rules were then passed:—

RULE XIV. That, subject to the provisos in Rules XIII and XVIII, mileage be paid to the sending Railway for goods vehicles of all descriptions at the rate of $\frac{2}{3}$rds of a pie per ton, or fraction of a ton, of goods conveyed in either direction in such vehicles, in respect of every mile a goods vehicle of one Railway may carry goods on the line of another Railway.

RULE XV. Goods vehicles to be allowed one hour for every six and a half ($6\frac{1}{2}$) miles run on a foreign line, and 24 hours for unloading and 24 hours for re-loading at destination, and 12 hours at intermediate stations for each of these operations, free of demurrage.

28. It was decided that the rules should be printed consecutively.

The Conference adjourned till 11 A.M. on Saturday, the 15th February.

No. 5.

29. The Conference re-assembled at 11 A.M. on Saturday, the 15th February.

Present as at Meeting No. 1, except that the following were absent:—Mr. Molesworth, Captain Sedgwick, and Messrs. Carter and J. Conder.

30. The Minutes of Meetings were read from commencement, and some additions and verbal alterations made, which were embodied in the proceedings.

31. The rules for the interchange of rolling-stock, as settled from time to time by the Conference having been separately printed*, were read and confirmed.

32. It was resolved that these rules, subject to the approval of the several Boards of Directors, come into force on the 1st September 1879. It being arranged that any notices which may have been given to terminate existing agreements be considered as expiring on the 31st August 1879.

33. Mr. Saunders brought forward for discussion the question of establishing Provident Funds for Railway employés. It was decided that this should be taken up at a subsequent Meeting.

34. The President, at the desire of Sir Andrew Clarke, handed to the Delegates copies of the Rules for Free Passes on State Railways. He also stated that Sir Andrew Clarke trusted that all Companies would endeavour to encourage the education of the children of all Railway employés, and grant them free conveyance to and from school. The Agents present promised that the matter should continue to receive consideration.

35. Sir Andrew Clarke (through the President) said that he would be glad to learn the views of the Agents on the establishment of a large Central Technical and Industrial School in the Hills for the elder children of Railway employés. The State to build the school, the annual maintenance to be paid by the parents, and by a grant-in-aid, per pupil attending, from the Revenue of the several lines. Schools to be constructed to accommodate at least 800 boys or 800 girls, as the expense per head for smaller numbers would be, in Sir Andrew Clarke's opinion, almost prohibitory.

36. The Agents stated that they would, after communication with their London Boards, address Government on this matter.

The Conference adjourned till 11 A. M. on Monday, the 17th February.

No. 6.

37. The Conference re-assembled at 11 A. M. on Monday, the 17th February.

Present as at Meeting No. 5.

38. The Minutes of the previous Meeting were read.

39. Colonel Sir Andrew Clarke, K.C.M.G., C.B., R.E., joined the Conference.

40. The draft Railway Act was read clause by clause, and various suggestions and alterations were noted for the consideration of the Select Committee to which the Bill had been referred.

41. With reference to Minute No. 33 the following resolution was passed:—

The Conference is of opinion that it is necessary to establish Provident Funds on all Railways, irrespective of surplus profits. They therefore suggest that Mr. Saunders' proposal, as well as one submitted by Mr. Mathew,† be referred to the various Boards of Directors and the Government of India, with a view to ascertain if they would be prepared to contribute to such a Fund out of working expenses, and if so, to what extent.

The Conference was dissolved.

CALCUTTA:
The 17th February 1879.

J. S. TREVOR, *Colonel, R. E.,*
President.

* Attached.
† Printed and attached.

INTERCHANGE OF ROLLING STOCK.

General Rules for the interchange of Rolling-Stock between all connected Broad Gauge Railways in India, passed by the Conference of Railway Delegates assembled at Calcutta in February 1879.

PRESENT:

COLONEL J. S. TREVOR, R.E.			PRESIDENT.
G. L. MOLESWORTH, ESQ., Consg. Engr. to Govt. of India, Delegate from State Rys. ...			VICE-PRESIDENT.
BRADFORD LESLIE, ESQ., Agent and Chief Engr.	„	E. I. Ry. Co.	MEMBERS.
FRANKLIN PRESTAGE, ESQ., Agent.	„	E. B. Ry. Co.,	
COLONEL J. H. JENKINS, B.S.C., Agent.	„	O. & R. Ry. Co.,	
D. ROSS, ESQ., Traffic Manager. / JABEZ LIGHTFOOT, ESQ., Auditor.	Joint with one vote. „	S. P. & D. Ry. Co.,

H. CONDER, ESQ., General Traffic Manager,	„	G. I. P. Ry. Co.,	
A. M. SAUNDERS, ESQ., Agent and Manager,	„	Madras Ry. Co.,	

RESOLUTION 32.—It was resolved that these rules, subject to the approval of the several Boards of Directors, come into force on the 1st September 1879. It being arranged that any notices which may have been given to terminate existing agreements be considered as expiring on the 31st August 1879.

GENERAL.

RULE I. The day is to be reckoned as 24 hours, commencing at midnight, Madras time being adopted in all cases. The week to end at midnight on Saturday.

No *dies non* to be allowed under these rules.

RULE II. All stock to be considered as handed over when entered in the number-taker's book at the junction station, and it is to be so entered directly it is put into the lines or sidings in which such stock is usually placed for that purpose.

RULE III. Passenger carriages, horse boxes, carriage trucks, break-vans, and passenger road or luggage vans, are to be, in all cases, reckoned as coaching vehicles, whether they run upon passenger or goods trains. All other kinds of vehicles are to be reckoned as goods vehicles.

RULE IV. No return vehicle shall be run, whether loaded or empty, unless otherwise mutually arranged, on any other than the exact route to its own line by which it was received, under a penalty of rupees twenty-two per diem from the time it was missent, until it returns to a station on the route by which it was received.

Vehicles may be loaded on their return journey to any station on the owning line.

RULE V. So soon as the rolling-stock of any Railway passes into the custody or possession of any other Railway, such other Railway is to be responsible for all and every contingency that may arise from the use of such stock while it remains in their possession. Except that if the contingency is clearly traceable to defect of material or workmanship, the actual repair or replacement of the vehicle in which there was such defect, but not of any other vehicle or any other consequent damage, is to be at the expense of the owning Railway.

The cost of repairs arising from ordinary wear and tear to be always borne by the owning Railway; but cases of palpable damage (such as dropping heavy weights into wagons and so damaging the bottoms, neglect of greasing or oiling and other similar neglects), and all cases of accidents or collision to be borne by the Railway in whose custody or possession the stock may be at the time the damage occurs.

No claim shall be admitted for the cost of repairs of stock unless sent to the Railway which is responsible for the payment of it, within three months of the time at which the repairs are completed.

RULE VI. Six additional days to be allowed in case of damage to the stock of either Railway on the line of another Railway for the repairs of such stock, and no demurrage shall be charged for those six days. But if the damage is such as will require longer than six days to complete the repair, the stock must be returned to the owning Railway. If not sent within the six additional days, whether repaired or not, demurrage will be charged after the expiration of the six days unless specially exempted by the Traffic Manager of the owning Railway. Notice to be sent within one month to the owning Railway in all cases how and when the damage took place and the nature of it.

COACHING.

RULE VII. The exchange of passenger stock to be subject in extent to mutual arrangement between the respective Railways.

RULE VIII. The mileage charge on coaching vehicles to be seven pies per mile both on the outward journey and in returning, except that no mileage is to be charged on the return journey for horse boxes, carriage trucks, hospital carriages, prison vans, and special saloon carriages not used for ordinary traffic, unless returning under load.

Double horse boxes while carrying four or more horses to be counted and charged mileage as two vehicles.

RULE IX. Coaching vehicles to be allowed one hour for every twelve and a half ($12\frac{1}{2}$) miles run on foreign lines, and twenty-four hours extra at destination, free of demurrage.

RULE X. Demurrage to be charged on all coaching vehicles detained beyond the time named in Rules VI and IX at the rate of eight annas per hour.

GOODS.

RULE XI. The interchange of goods stock to extend to all connected lines and branches. A fair proportion of through traffic being accepted at junctions in time of pressure.

RULE XII. All consignments of less than three tons to be transhipped at junction. In all other respects the interchange of goods traffic and stock shall be unrestricted.

Traffic Managers are at liberty to make exceptions by mutual agreement as to the amount to be transhipped in cases of consignments which, from their bulk or weight, fully occupy a wagon, or require exceptional care, such as furniture, glass-ware, stationery, millinery, pictures, musical instruments, &c., &c.

RULE XIII. No mileage charge to be made on goods vehicles when running empty.

RULE XIV. That subject to the proviso in Rules XIII and XVIII, mileage be paid to the sending Railway for goods vehicles of all descriptions at the rate of two-thirds ($\frac{2}{3}$rds) of a pie per ton, or fraction of a ton of goods conveyed in either direction in such vehicles, in respect of every mile a goods vehicle of one Railway may carry goods on the line of another Railway.

RULE XV. Goods vehicles to be allowed one hour for every six and a half miles run on a foreign line, and twenty-four hours for unloading and twenty-four hours for re-loading at destination, and twelve hours at intermediate stations for each of these operations, free of demurrage.

RULE XVI. Demurrage to be charged on all goods vehicles detained beyond the time named in Rules VI and XV at the rate of one anna per ton of carrying capacity per hour.

RULE XVII. That the receiving Railway may call upon the forwarding Railway to accept empty wagons with a view to equalize the ton-mileage.

RULE XVIII. The Railway on which through traffic originates shall provide wagons for such traffic. But when the through traffic offering is more than the wagon stock of the sending Railway can cope with, it may call on the receiving Railway to place a certain daily average capacity of wagon stock at its disposal at the junction for traffic to, and *viâ*, the receiving line; and in the event of failure to comply wholly or in part within one week, the sending line shall be

entitled to charge two pies per ton-mile on all traffic to the extent of the wagon stock short supplied, which it may send through in its own stock: provided that the receiving Railway shall not be required to supply more wagons than sufficient to maintain an equal interchange of stock based on the carrying capacity. Open wagons to be accepted if supplied with proper sheets and ropes.

RULE XIX. In case any goods vehicles are loaded on the homeward journey to any station short of the junction with the owning Railway, the Audit Offices of the respective Railways shall make a special return of the same to each other, and the mileage charge under Rule XIV shall be charged to the Railway so loading such wagons.

RULE XX. Whatever amount is paid for mileage, and penalty for wrong sending by any Railway for the use of vehicles of other Railways is in all cases to belong to and be paid over to the owning Railway.

RULE XXI. Each Railway to accept the statements of other Railways with respect to the loads and wagons, unless the number-takers at the junction notice and record that the loads have been interfered with, when the actual contents and their condition must be ascertained and recorded by a responsible officer of the receiving Railway.

RULE XXII. The accounts referring to any mileage or demurrage question in which any sending Railway is concerned shall be open to the inspection of such Railway.

Submitted by A. M. Saunders, Esq., Agent and Manager, Madras Railway Company.

MEMORANDUM.

PROVIDENT OR SUPERANNUATION FUND.

IT is admitted on all sides that it is desirable to establish a Fund of this kind for the Railway Service, and what is wanted is a scheme that shall apply generally to all the Indian Railways, like the Leave Rules for Officers of the Service.

2. To secure the establishment of a Fund, unanimity and concerted action among all the Companies is wanted to decide upon the measure of assistance that shall be asked for as a charge against revenue. The detailed rules might be framed by a Committee of representatives of all the Companies.

3. The Chairman of the Madras Railway, in his memorandum on the subject, states that the gift of one month's salary for each year of faithful continuous service "may be assumed to be not an exaggerated representation of the prevalent idea of what is desirable and just." This, in my opinion, is what the Railway Service should ask for—one month's pay for each year of service—the average monthly salary of the five years previous to retirement being taken for the calculation.

NOTE.—It would be desirable to make some limitation to the grant, say as follows:—service of less than ten years to receive nothing, and service between ten and fifteen years half allowance.

4. As a matter of course deductions would be made from salaries sufficient to provide an equal sum to the bonus proposed, say after thirty years' service. For this purpose it is estimated that a deduction from salaries of 6 per cent. would be sufficient.

NOTE.—These deductions with compound interest under any circumstances to be returned to the subscriber or his legal representative in case of death. Should subscribers, however, on retirement, elect to take an annuity as proposed below, in such case, his subscriptions with interest would lapse, being applied towards the purchase of the annuity.

5. Under the rules of a Fund established on this basis, a subscriber would be entitled, after thirty years' service, to receive an amount equal to about sixty months' pay, thirty of which would have accrued from his own subscriptions and thirty from the bonus grant.

6. Should it be considered desirable to offer an annuity or pension, this might be provided for as follows; but in every case the subscriber should be allowed the option of taking the principal sum or the annuity at his pleasure.

7. The annuity offered should be one purchased by the joint amount of his subscriptions and bonus. A table of factors for age to be used for the calculation might be drawn up, and then approved by Government.

NOTE.—Provision should be made for the payment of the annuity in England through the Company at contract rate of exchange, if desired; and a limitation made of maximum to be granted.

8. Some general provisions would be required, among which should be included the following:—

(*a*).—Fund to apply only to members of the service drawing say Rs. 25 per mensem and upwards. Provision for meritorious service of men drawing lower pay than Rs. 25 to be made from the Sick and Allowance Fund.

(*b*).—If members at present in the service elect to take an annuity, they should be allowed to pay back subscriptions and interest.

(*c*).—Service on any Indian Railway duly certified to count for bonus.

(*d*).—All loss on annuities, depreciation on Government Paper, as well as the bonus, to be chargeable to Revenue.

ADDENDUM.

Calculation of probable pensions in the case of three persons whose average salaries have been Rs. 750, and salaries for five years previous to retirement Rs. 1,000, gives results as follows:—

First Case.—Sixteen years' service, retiring at the age of 55. Annuity nearly Rs. 2,650 per annum, or a little more than one-fifth of pay on retirement.

Second Case.—Twenty-four years' service, retiring at the age of 50. Annuity nearly Rs. 3,850 per annum, or nearly one-third of pay on retirement.

Third Case.—Thirty years' service, retiring at the age of 55. Annuity nearly Rs. 5,800 per annum, or nearly one-half of pay on retirement.

Submitted to Conference by F. Mathew, Esq., Agent and Chief Engineer, B. B. and C. I. Railway Co.

HEADS of proposed RULES for the establishment of "PENSION AND RETIRING ALLOWANCE" FUNDS for members of the permanent Indian Establishment on the B. B. and C. I. and the G. I. P. Railways, in supersession of the existing Provident Funds—considered and adopted, for recommendation to the consideration and approval of the Boards of Directors, at a Joint Meeting of the undersigned representatives of the Staff of the two Companies held in Bombay at the Offices of the G. I. P. Railway Company, on Thursday the 24th October 1878.

---

1. The Fund for each Railway to be managed by a Committee consisting of the Agent, Auditor, Chief Engineer, Traffic Manager, Locomotive Superintendent, and Storekeeper of the Railway for the time being.

2. Members' contributions and all other moneys accruing to the Funds to be invested from time to time in Indian Guaranteed Railway Stock, or in Government Paper, in the names of the Agent, Auditor, and one other Head of Department to be settled by the Directors, as Trustees of the Fund.

3. All officers and servants on the permanent establishment of the Company concerned who are not less than twenty years of age, whose salaries are not less than Rs. 40 per month, and who are in the service of the Company when the new Fund is established, to have the right of joining the new Fund.

4. All persons who enter the service later shall join the new Fund if, or when, they are twenty years of age and receive salaries of not less than Rs. 40 per month.

5. Every member of each of the existing Provident Funds to be notified that on the establishment of the new "Pension and Retiring Allowance" Funds the present Provident Funds will be discontinued; their Rules, so far as they provide for direct contribution to the Provident Fund from the Company's revenue or other sources, and for further subscriptions from members, will be cancelled; and the amount at credit of each member of the existing Funds who is qualified to join the new Funds will be dealt with as the Board of Directors may determine on his account, if he does not elect, within six months

of being so notified, to join the new "Pension and Retiring Allowance" Fund established for the permanent staff of his Company. The amounts at the credit of members of the existing Provident Funds whose salaries are less than Rs. 40 per mensem to be also dealt with as the Board of Directors may determine.

6. Members to pay to the Fund four per cent. monthly on their salaries while they are members of the Fund. The term 'salaries' not to include overtime, batta, and other fluctuating allowances.

7. Any member of the Fund who resigns the service of the Company of his own accord before he has completed ten years' service, or who is dismissed for misconduct at any time, only to receive back the amounts he has contributed to the Fund, with compound interest thereon at the rate of four per cent. per annum up to the date of his retirement or dismissal, *less* any amount lost by the Company through his fraud or dishonesty.

8. Any member of the Fund who may resign the service of the Company of his own accord, and not on medical certificate, after ten but before the completion of twenty years' service, to receive, in addition to his own contributions, with four per cent. compound interest thereon, not more than one-half the rates of retiring gratuity or pension grantable in respect of his service and salary under Rule 10.

9. If any member of the Fund should die after completion of ten but before completion of twenty years' service, his contributions to the Fund, with four per cent. compound interest thereon up to the date of his death, shall be paid over to his family or other recognized heirs, together with the same gratuity as would have been allowed to him, under Rule 8, in the case of his voluntary resignation.

10. Pensions or gratuities to be allowed to members of the new Funds at the following rates on retirement from the Company's service, *viz.*:—

(*a*).—*Up to fifteen years' service.*—On medical certificate that the member is disqualified for further service, or if he is retired on account of reduction or re-organization of the establishment—a gratuity equal to one month's salary for every year of his service, such salary to be the average, under Rule 6, for the last five years of the member's service.
Besides this gratuity, the member's contributions to the Fund, with compound interest thereon at four per cent. per annum to date of his retirement, to be refunded to him.

(*b*).—*After service of fifteen years.*—On medical certificate, as above, a pension at the rate of twenty-five per cent. of the average salary drawn by the member during the five years previous to his retirement.

(*c*).—For each additional complete year of service after fifteen and up to twenty years' service the retiring pension on medical certificate of twenty-five per cent. to be increased by five per cent. of the average salary of the five years previous to retirement, giving upon retirement after twenty or more years' service a pension at the rate of one-half of the average salary of the five years previous to retirement.

(*d*).—No medical certificate to be necessary for retirement on pension after the attainment of fifty-five years of age, or after twenty or more years' service.

(*e*).—No pension to exceed Rs. 10,000 per annum.

(*f*).—In reckoning claims for pension, only complete years of service to count.

11. The medical certificate required to be that of a Board of reference consisting of the Company's principal Medical Officer, and, with the approval of Government, a Presidency Surgeon, and the Chairman for the time being of the Government Civil Service Medical Board in Bombay. All examination fees payable to any of these officers to be paid from the Fund.

12. All pensions and gratuities allowed under these Rules to be granted in the name of the Railway Company in whose service the member of the Fund concerned is employed.

13. All pensions to commence and gratuities to be due at date of the member's retirement from the service.

14. All pensions and gratuities payable to persons resident in India to be paid only in India and in rupees.

15. All pensions payable to retired European members of the establishment residing out of India to be payable in England only, and at the rate of exchange named for the Company's transactions in their contracts with Government. Retiring gratuities to such members to be paid in India in rupees, or in England at the above rate of exchange, at the option of the members concerned.

16. Service to include privilege leave, but no other leave or period of absence from duty.

17. Any member of the Fund who has once left the Company's service and received gratuity or pension under these Rules, but who may be re-employed by the Company, to reckon his second period of service only from the date of such re-employment as a ground of claim for further gratuity or pension on subsequent final retirement.

18. Upon the death of a member of the Fund after his retirement upon pension from the Company's service, the amount contributed by him to the Fund, with compound interest thereon at four per cent. per annum up to the date of his retirement, to be paid to his family, or as he may by will direct, or failing these, to his legal representatives, *less* one-half of any sum paid to him during his life by way of pension.

19. The assets of the existing Provident Funds to be made over to the Committee and Trustees of the respective "Pension and Retiring Allowance" Funds, *less* the proportion of the existing Provident Funds due at date of transfer to members of those Funds who are not eligible for membership of the new Funds, and to those members of the existing Provident Funds who, though eligible to join the new Funds, may elect, under Rule 5, not to join them.

20. All members of the "Pension and Retiring Allowance" Funds who become entitled to pension under the Rules to have the option of paying up in one or more instalments the whole or part of the amount required, in addition to the balance at their individual credit in the accounts of the Funds (including their share of the amount transferred from the existing Provident Funds), to make up the sum that would have been at their credit at date of their retirement if the "Pension and Retiring Allowance" Fund concerned had been in operation from the date when they became eligible to join it. The sum that would have so been at their credit to be calculated on the basis of a four cent. contribution on their monthly salaries, with compound interest thereon at the rate of four per cent. per annum. Any member who does not so pay up the balance required, to receive on retirement a pension bearing the same proportion only to the full pension allowable under these Rules in respect of his service and salary, as the amount actually at his credit, with interest to date of retirement, bears to the amount that would have been at his credit if he had been a member of the Fund from the beginning of his service.

21. The Railway Company concerned to provide from Revenue any amounts required from time to time to make good the grants to members of the Fund made under the Rules.

22. The Board of Directors to retain the right of dealing with special cases within the limits of the Rules, and to decide any point of difference between the Committee of Management and members of the Funds.

23. The modifications in the present Provident Fund Rules rendered necessary by the adoption of this new scheme to be specially considered and decided on by the Boards of Directors before transfer of any of the securities and moneys of those Funds to the Trustees of the respective new Funds.

Meerut division remarks that there was a great demand for water for rice and sugarcane at the beginning of the month, and for rabi paleo during the latter half. On the Dún canals paleo commenced on the 2nd week; late rice and sugarcane still being watered.

Note.—Besides this rabi irrigation there was some additional kharif (irrigation recorded) extending over an area of 11,248 acres in the following divisions, *viz.*:—

Division.	Sugarcane.	Rice.	Indigo.	Cotton.	Food-grains.	Fodder crops.	Miscellaneous.	Total.

Decrease	...	...	...	...	...	...	...	...	...	...	...	...

Remarks.

There is a slight increase in the total quantity of food grains moved both ways on the canal as compared with previous month's returns.

During November the bulk of the grain traffic was downwards, but December's returns show that a reaction has taken place, and that the coarse kinds of grain are being moved upwards.

There is a fair demand for downward freights, cotton and salt being the principal items moved through to Cawnpore. Cotton shows an increase of about 15,000 maunds as compared with the same period last year, while salt is less by 10,000 maunds. There is no real falling off, though, in the salt traffic from Moradnagar, weekly returns give about the same quantity put down at the ghat as was done last year.

There is considerable improvement in the timber and firewood trade, but the bulk of this traffic is now carried in boats instead of rafts as formerly.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 25th MARCH 1879.

GENERAL REMARKS.—Prospects in Madras have improved in consequence of rain having fallen generally over the whole Presidency. This rain has also extended to some districts of Mysore. In Bombay the reaping of the *rabi* harvest has been nearly completed. Slight distress continues in two talukas of Sattara, as reported last week; in Kaladgi the people are leaving their homes in quest of employment; and in Dharwar rats are causing considerable damage. Otherwise prospects seem generally good. In the Central Provinces and Berar also the *rabi* has been almost completed with fair results. In Rajputana and Central India things are unchanged. In Bengal the *rabi*, which has, as elsewhere, been mostly gathered, has given a generally fair outturn, except in Rajshahye, where it has been injured by want of rain. Some rain has fallen in Eastern Bengal and Orissa, but it is much wanted still in several districts both for the crops in the ground and for ploughing and sowing. In Assam also rain is greatly wanted; in Sylhet the price of rice is rising. In the North-Western Provinces and Oudh, prospects continue fair, and in the Punjab further improvement is reported.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 22nd)	0·63 (average of two stations.)	Rice 11·31, *cholum* 15·48, *ragi* 18·1, *cumboo* 15·58; 6 inches water passing over anicut; standing crops doing well; Bengal-gram, *ulundu* and horse-gram being harvested in some talukas; cotton being picked.
Kurnool („ „)	*Nil*	Rice 10·95, *cholum* 16·25, *cumboo* 20·66, *ragi* 17·68; cotton being picked in four talukas, outturn from ¼ to ¾; second crop paddy in good condition; fodder and water ample.
Tanjore („ „)	2·52 (average of 13 stations.)	Rice 9·86, *cholum* 13·38, *ragi* 17·41, *cumboo* 15·75; some branches of the Cauvery contain about 6 to 12 inches water; crops, wet and dry, generally in good condition, slightly improved by late rains; *samba* paddy, *kumbalai*, *oltadan*, *cholum* being harvested, outturn ⅜ to ¾.
Madura („ „)	2·48 (average of 13 stations.)	Rice 10·41, *cholum* 17·01, *ragi* 17·21, *cumboo* 17·16.
Malabar („ „)	0·99 (average of 13 stations.)	Rice 9·98, *ragi* 17·92, prices slightly risen in three talukas, stationary elsewhere. *General Remarks.*—General prospects improved owing to general fall of rain over the whole Presidency.
Bombay—(Mar. 26th).		
Sind—		
Kurrachee (Mar. 26th)	At Manora from 10th to 16th, 1·20; at Bullakhan 26.	River on 23rd, 2 feet 10 inches; last year 8 feet 5 inches; three fresh cases of small-pox in Kurrachee; Hyderabad no change.
Guzerat—		
Ahmedabad (Mar. 26th)	...	No change.
Broach („ „)	...	*Rabi* harvest progressing; cases of dropsy in Wágra villages.
Surat („ „)	...	No change.
Khandesh and Násik—		
Khandesh (Mar. 26th)	...	No change.
Násik („ „)	...	*Rabi* harvest good.
Konkan—		
Tanna (Mar. 26th)	...	*Rabi* and public health good.
Colába („ 24th)	...	No change.
Ratnágiri („ 18th)	...	*Rabi* generally good; 17 deaths from fever in Málwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	*Rabi* harvest nearly finished.
Satara ...	...	Reaping almost completed; slight distress in two talukas; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Southern Mahratta Country—		
Kaládgi ...	...	Weather cloudy; people leaving homes in quest of employment in places; *rabi* harvest nearly completed.
Belgaum ...	...	Cattle disease in two talukas.
Dharwar ...	...	Sugarcane planting commenced; rats causing considerable damage; no change in state of public health.
Kanara ...	...	Harvest of second crop on coast land being prepared for monsoon crop.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather hot; harvest nearly completed; public health good.
Wadhwán ...	...	Weather hot; crops same as before.
Baroda ...	...	No change.
		General Remarks.—*Rabi* harvest generally approaching completion; weather hot.
Bengal—(Mar. 25th).		
Chittagong ...	*Nil*	Weather cool; state and prospects of crops unchanged.
Noakholly ...	0·36	Weather cooler during week; a sharp thunderstorm on evening of 13th and again on 14th; hail said to have fallen in northern part of district on 13th; rain done some good to crops.
Chittagong Hill Tracts...	0·2	Weather cloudy throughout week; *jum* cutting nearly over; rain badly wanted for chilly and other spring crops; 6 cases of cholera reported, of which 5 proved fatal.
Hill Tipperah ...	0·80	Weather cooler than last week; some rain on evening of 13th; state and prospects of *boro* crop fair; land being prepared here and there for sowing early rice.
Backergunge ...	*Nil*	Weather clear and hot throughout day; nights and mornings cool; want of rain severely felt; prices continue unchanged; cholera in Motbaria and Tooskhali.
Furreedpore ...	*Nil* 0·40 Goalundo.	A severe storm at Goalundo; weather much colder everywhere; rain much wanted everywhere; ploughing going on.
Dacca ...	*Nil*	Weather very cool at night for season; state and prospects of crops favourable.
Mymensingh ...	*Nil*	Weather cool for time of year; state and prospects of crops favourable; but rain wanted, especially for spring rice.
Tipperah ...	*Nil* 0·92 Brahmunbaria.	Weather cool; rain much wanted all over district for ploughing; nearly all cold-weather crops off the ground.
24-Pergunnahs ...	*Nil*	Weather cooler; no crops on ground; high prices continue; public health in general good.
Jessore ...	*Nil*	Weather fairly cool for time of year; rain wanted still; winter harvest nearly over.
Nuddea ...	*Nil*	Weather cool still at night, but hot in day; crops mostly cut; those on ground fair.
Moorshedabad ...	*Nil*	Cool nights and mornings, hot midday; no change to report about crops; cholera in some thanas.
Pubna ...	*Nil*	Weather warm in day, but cool at night; rain still required; small-pox still in town and thanas Pubna and Mowpore; cholera also appeared in town and interior.
Rajshahye ...	*Nil*	Weather cooler than previous week; *rabi* harvest in progress, outturn not good owing to want of rain; spring rice requires rain; lands being prepared for sowing rice crop.
Bogra ...	*Nil*	Weather cool for time of year; standing crops pretty good; rain much wanted; public health fair.
Dinagepore ...	*Nil*	High westerly winds; weather hot during day, but cool at night; most of *rabi* crops harvested; sowing of spring rice commenced.
Rungpore ...	*Nil*	Strong westerly wind during day, causing cool nights; prospects crops good; cultivation of *aus* rice being commenced; rain much wanted in most places; small-pox still prevails in Bagdogra subdivision.
Cooch Behar ...	*Nil*	Weather beginning to be hot; strong west wind during day; sowing of early rice commenced; tobacco being still cut; prospects of *cheena* and *kaon* good; cholera in places.
Jalpáiguri ...	*Nil*	High west winds prevailed during early part of week; weather very hot, but since last few days temperature decreased; rain much wanted; sporadic cholera here and there.
Darjeeling ...	...	Weather getting sensibly warm; strong westerly wind during week; land being cleared for sowing; very dry; rain wanted.
Midnapore ...	*Nil*	Weather seasonable; state and prospects of crops favourable; small-pox at Sudder Station; cholera at Tumlook.
Howrah ...	*Nil*	Weather rapidly growing warmer; state and prospects of crops favourable.
Hooghly ...	*Nil*	Weather clear throughout week; some crops yet on ground; fever, cholera, and small-pox still prevail in places.
Burdwan ...	*Nil*	Weather dry, but cool; state and prospects of crops unchanged.
Bankoora ...	*Nil*	Only a drizzle at Chatna; prospects of crops fair; rain wanted for cotton; small-pox still continues in some villages.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Beerbhoom ...	*Nil*	Weather fairly cool for time of year; sugarcane good wheat being reaped.
Sonthal Pergunnahs ...	*Nil*	Weather fine, dry, and cool; state and prospects of crops favourable; very few crops on ground.
Bhágalpur ...	*Nil*	Clear weather, with strong westerly wind; *rabi* crops, linseed excepted yielding well; prices keep high owing to exportation.
Monghyr ...	*Nil*	West wind with cool nights; *rabi* harvest going on; opium and gram inferior.
Purneah ...	*Nil*	Weather cool and dry; strong westerly winds; state and prospects of crops unchanged.
Maldah ...	*Nil*	Weather clear and hot during day, but cool at night; harvesting of late winter crops far advanced; prices of all sorts of grain gone down a little; health fair.
Durbhunga ...	*Nil*	Mornings cool again; a strong west wind in early part of week, but during last two days wind fallen; *rabi* crops being gathered, outturn generally good; rain wanted for indigo.
Mozufferpore ...	*Nil*	Weather mild, with west wind; harvesting of *rabi* crops continues, outturn very fair; *cheena* and *moong* being sown.
Sarun ...	*Nil*	Weather rapidly getting warmer; high west wind and dust-storms during midday; cold-weather crops nearly all harvested; *cheena* being sown; rain much wanted for *cheena* and indigo; poppy-heads being tapped; prices stationary; public health good.
Chumparun ...	*Nil*	Weather fine, cool nights, hot days, with high west winds; *rabi* fair on the whole; harvest commenced; indigo coming up well but damaged a little by west winds.
Patna ...	*Nil*	Weather unusually cool; *rabi* crops being harvested; outturn fair.
Gya ...	*Nil*	Morning cool; maximum reading of thermometer in shade 101·3°, *rabi* crops being cut in places; prices of food-grains remain stationary; small-pox in places; health of plough-cattle good.
Shahabad ...	*Nil*	Weather cool at night, but hot and windy in day; sowing of *cheena* commenced; *rabi* harvest going on; public health fair, but small-pox still prevalent.
Hazáribágh ...	*Nil*	Weather seasonable; mornings and evenings cool; days warm; crops being rapidly gathered; prospects fair.
Lohardugga ...	*Nil*	Weather cool and pleasant; prospects unchanged; *mohwa* crop backward; prices either stationary or rising slightly; small-pox in Palamow.
Manbhoom ...	*Nil*	Weather seasonable; *mohwa* harvest a splendid one; cholera hanging about; it does not seem epidemic.
Singhbhoom ...	*Nil*	Weather seasonable and getting very hot; nothing to report about crops.
Balasore ...	0·03	Weather very variable in temperature; slight rain in parts of district; morning fogs; state and prospects of crops unchanged.
Cuttack ...	0·68	Weather cool for the season; strong evening breezes, sometimes bringing showers; *dalua* rice in ear, and in places attacked by worms; land being ploughed for next crops; sporadic cases of cholera reported.
Pooree ...	*Nil*	Weather seasonable; at Khurda very sultry; *dalua* looking well; common rice sells at 15¾ to 21 seers per rupee.
		General Remarks.—Rain in places in Eastern Bengal and Orissa; it is much wanted in several districts both for crops on ground and for ploughing and sowing operations; *rabi* crops mostly gathered; outturn fair on the whole; *rabi* in Rajshahye not good; gram and opium crops in Monghyr inferior; *mohwa* crop in Lohardugga backward, but excellent in Manbhoom.
N. W. P. and Oudh—(Mar. 26th).		
Benares (Mar. 25th)	...	No change; *rabi* almost cut.
Allahabad („ „)	*Nil*	Heat increasing; wind less.
Jhánsi („ 26th)	...	No change.
Agra (Mar. 25th)	...	Prospects unchanged; crops thriving.
Meerut („ 26th)	*Nil*	Crops good; health good; prices stationary.
Kumaon („ 22nd)	Heavy rain fell in parts on 17th.	Hail fell in a few places, but did no real damage; prospects much improved by the late rain.
Bareilly („ „)	...	No change.
Sitapur („ „)	*Nil*	Weather seasonable; prospects fair.
Partabgarh („ 24th)	...	Agricultural prospects fair; *rabi* crops being cut.
Lucknow („ 26th)	...	Prospects fair.
Fyzabad („ „)	*Nil*	*General Remarks.*—No change; prospects continue fair.
Punjab—(Mar. 20th)		
Delhi ...	*Nil*	Agricultural prospects improved; health good; slight fluctuations in prices of food grains.
Hissar ...	*Nil*	Weather getting warm; crops ripening; the *barani* prospects somewhat improved; prices of grain stationary; small-pox about, otherwise health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—*continued.*		
Umballa ...	*Nil*	Agricultural prospects fair; health good.
Jullundur ...	*Nil*	Public health and state of crops good.
Amritsar ...	*Nil*	Health good; crops fair; price of wheat fallen slightly.
Ferozepore ...	*Nil*	Harvest prospects good.
Lahore ...	*Nil*	State of crops and health of district good.
Sialkot ...	*Nil*	*Kharif* sowings proceeding well.
Ráwalpindi ...	*Nil*	Agricultural prospects fair; cattle disease continues.
Mooltan ...	*Nil*	Public health and state of crops good; prices of wheat and grain falling.
Dera Ismail Khan ...	0·9	Health good; crops flourishing.
Pesháwar ...	*Nil*	Prospects improved; slight fluctuation in prices of food grains.
		General Remarks.—Agricultural prospects continue to improve.
Central Provinces—(Mar. 26th)		
Hoshangabad ...	...	Prospects unchanged; slight cholera in tahsil Harda.
Betúl ...	...	*Rabi* harvesting; prospects better than anticipated; small-pox continues; prices slightly risen.
Wardha ...	...	Threshing *rabi* crops completed; prices steady.
Nágpur (Mar. 26th)	...	Days hot, mornings cool; harvest continues; outturn fair; small-pox in Ramtek tahsil; cattle disease generally prevalent.
Chánda ...	...	Clear; hot; harvest progressing; health good; prices stationary.
Chhindwára ...	...	Clear; warm, harvest progressing; small-pox prevalent; prices steady.
Narsinghpur ...	...	*Rabi* harvest progressing; health good; prices stationary.
Bhandára (Mar. 25th)	...	Clear; *rabi* harvest continues, outturn good; small-pox prevalent; prices continue high.
Seoni ...	...	*Rabi* harvest progressing; small-pox in Luknádon; prices stationary.
Bálaghát ...	...	*Rabi* harvesting, small-pox continues; prices steady.
Mandla ...	...	*Rabi* harvest continues; health good; prices stationary.
Saugor ...	...	Cloudy, hot; reaping continues; health good; prices of wheat fallen and gram risen.
Damoh ...	...	Reaping *rabi* in progress; health good; prices falling.
Jubbulpore ...	...	Clear; small-pox continues; prices stationary.
Raipur ...	...	*Rabi* harvest almost completed; cholera and small-pox continue; prices risen.
Biláspur („ 22nd)	...	Clear; hot; *rabi* harvest progressing; cholera and small-pox continue; prices stationary.
Sambalpur („ 21st)	...	Very hot; sugarcane plantation continues; cholera decreasing.
		General Remarks.—*Rabi* cutting and threshing continue; outturn on the whole fair; cholera at Chhattisgarh division abating, small-pox prevalent in ten districts.
British Burma—(Mar. 26).		
Arakan Division ...	...	Public health good in Akyab and Sandoway districts; small-pox in Kyoukphyoo town and cholera in district.
Pegu Division—		
Rangoon ...	...	Twenty-two fatal cases of small-pox and one fatal case of cholera in Rangoon town; slight small-pox and fever in Pegu; otherwise health fair in the district; slight cattle disease.
Thonkwa (Mar. 22nd)	...	Two deaths from cholera and two from small-pox at Shwedoung, otherwise health good.
Henzada ...	...	Public health fair; small-pox prevailing in parts of the district.
Bassein ...	...	Five deaths from cholera; cattle disease, 90 deaths in two circles from 6th to 19th March.
Tharrawaddy ...	...	No report received.
Prome ...	...	One death from cholera; health generally good.
Thayetmyo ...	...	General health normal; small-pox in Thayetmyo, Mindoon, Kama and Meaday.
Tenasserim Division—		
Amherst ...	...	Public health good.
Shwegyeen ...	...	
Tounghoo ...	...	
Mergui (Mar. 15th)	...	Three deaths from cholera in Mergui town; cattle healthy.
Tavoy („ „)	...	Public health good.
		General Remarks.—Health good generally, a few scattered cases of cholera and small-pox in Kyoukphyoo town, Rangoon town and district, Thonkwa, Henzada and Thayetmyo; cattle disease continues in Bassein.
Assam—		
Gauháti (Mar. 26th)	*Nil*	Weather unseasonably hot and dry; lands prepared for *asu;* want rain greatly.
Sylhet („ „)	*Nil*	Rain much wanted; price of rice rising.
Mysore and Coorg—(Mar. 26th)	...	Rain has fallen in some districts; crops damaged slightly in parts of Kolar and Chitaldroog by rats; for week ending 15th March, gratuitously relieved in hospitals, 241.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Hyderabad Assigned Districts—(Mar. 26th)	...	*Rabi* harvest almost completed; weather warm.
Central India—(Mar. 26th)	*Nil*	Prospects the same.
Rajputana—		
Sirohi (Mar. 16th)	...	Tanks drying; wells fair; health and crops good; season agreeable, occasionally close, cloudy, cool and windy.
Marwar („ 15th)	...	Sufficient water supply; health and prospects good; weather cloudy; slight rain throughout the state; prices falling.
Harowtee („ „)	8·05 (at Deoli); 0·28 (at Tonk).	Health good; high westerly wind.
Jhallawar („ 20th)	...	Health good; weather seasonable.
Ajmere („ 26th)	...	Prospects good; heavy showers this morning.
Alwár („ 25th)	0·27 (in one Tahsil).	Crop healthy; tanks drying; health good.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Thursday, the 13th March, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
General the Hon'ble Sir E. B. Johnson, K.C.B., C.I.E., R.A.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Mumtáz-ud-Daulah Nawáb Sir Muhammad Faiz Alí Khán Bahádur, K.C.S.I.
The Hon'ble T. H. Thornton, D.C.L., C.S.I.
The Hon'ble G. H. P. Evans.
The Hon'ble E. C. Morgan.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
Lieutenant-General the Hon'ble Sir M. K. Kennedy, R.E., K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

INDIAN RAILWAY BILL.

Colonel the Hon'ble SIR ANDREW CLARKE moved that the Reports of the Select Committee on the Bill to consolidate and amend the law relating to Railways in India be taken into consideration. In doing so, he said :—

"My Lord, At an earlier stage of the measure, when presenting our first report from the Committee, I said I would, when at this stage, explain how we had dealt with the very many suggestions and varied criticisms we had received

from public Administrations and from private individuals; and this explanation will be best afforded by a perusal of the Bill, in which many of the suggestions will be found adopted and criticisms given due weight.

"Where we have not thought it desirable to embody any specific recommendation or to adopt any alteration, we have, by the very large and liberal powers conferred in the eighth clause on Railway-Administrations, enabled those bodies, when experience proves the necessity and the public interests require, to make such rules and arrangements consistent with the law as will meet any omission which we have made.

"That the law even now is complete, or that we have anticipated every contingency, is what we cannot claim. A recent case will show this. We had discussed at our last meeting the propriety of considering what course should be adopted in the case of persons who were travelling, or sought to travel, on Railways, whilst suffering from dangerous, infectious or contagious diseases, and we left the subject believing that we had sufficiently provided for this contingency, when an incident that happened subsequent to this decision of ours showed that there was still something wanting. That deficiency we have now supplied, and the subject is to be dealt with by special rules.

"The Committee has adhered as closely as possible to the existing law and practice, and has limited its task to the definition of what might have been before obscure, and to the simplification of what might have been confusing.

"The greatest innovation in this measure, strange to say, is to be found in the fourth clause, which gives legality to the employment of locomotives in our Railways—a power which, although we have embarked during the last quarter of a century on the construction and working of some thousands of miles of Railway, we do not now possess; by this omission State and Company being rendered liable to be indicted for the use of engines as perpetrators of a common nuisance or disturbers of the public peace and safety.

"We have extended the provisions and protection of the law to Railways owned by private individuals and to those in Native States, and we have also brought within its influence the auxiliary carriage by water of the fleets and ferries working on our great rivers in connection with our land-lines.

"A small, but by no means an unimportant, extension of what constitutes a Railway-servant has been made, and this will now include those most independent of gentlemen—the coolies—employed by the sub-agents of Contractors of the Companies for loading and unloading trains. Their exemption, hitherto, from the application of the law had left the Railway-Administration and its customers completely at their mercy, and this was sorely felt during the recent heavy famine-traffic.

"Although, hitherto, it has not been the custom to permit public running on a line until it had been certified after inspection as fit for traffic, yet this prohibition has not been compulsory as it is in England, and I now ask for power to make it so here also.

"The new law in reference to accidents will slightly increase the number of accidents to be reported over those hitherto required to be brought to notice; but the extension will not entail much additional labour on the Railway-staff.

"By the Bill, as last settled, it was left optional to the various Railway Companies to make at their own will and pleasure such general rules as they might think fit for the working and management of their lines. It is most satisfactory to me to have to say that I carried the late Railway Conference entirely with me, in rendering it obligatory to make these rules. Under this provision, the very many suggestions for securing the safety, comfort and convenience of the travelling public will be from time to time considered and drafted as the case and circumstances may dictate.

"The legislation regulating the carriage of property by Railway has been brought within this Bill, and has been removed altogether from the operation of the Carriers Act of 1865, by which the Railways in their arrangements with their customers have been hitherto guided.

"To avoid my making any error or giving cause for any misunderstanding, and to render unnecessary any attempt by me to explain a very intricate and technical matter, I should prefer to quote in full paragraphs 9, 10, 11, 12, 13 and 14 of the Report of the Select Committee. They are as follows:—

"'9. On further considering the question of the liability of carriers by Railway for loss or damage to ordinary goods, as distinguished from goods for which a special insurance-rate, as it is sometimes called, is chargeable, we are of opinion that no mere adaptation of section 7 of the Railway and Canal Traffic Act, 1854, such as is proposed in paragraph 7 of our former report, will suffice to put the law into as clear and simple a form as is desirable. The amendment we propose in section 10 will be found when the entire law bearing on the point is looked to, to be, except in one particular to which we shall presently advert, an amendment in point of form only; but it is nevertheless desirable that we should explain it in some detail.

"'10. The law now governing the liability of Railway Companies in India in such cases has recently come under the consideration of the High Court at Bombay in the case of *Kuvarji Tbolsee Dass* v. *The Great Indian Peninsula Railway Company*. It has to be collected with some pains from sections 151, 152 and 161 of the Indian Contract Act, which treat of the responsibility of bailees in general, the Carriers Act of 1865, which treats of the responsibility of common carriers, and section 11 of the Railway Act of 1854.

"'By these enactments it was intended to provide * that a Railway Company should be liable for loss of, or damage to, ordinary goods only when such loss or damage arose from the neglect or misconduct of its servants; and further, that no Company should by any special contract be able to relieve itself of liability in such cases. But, though the Bombay High Court, in the case just referred to, held that the effect of these enactments when taken together was, at all events as regards the main point, in accordance with the intention of the framers, it arrived at this conclusion only after a discussion which makes it clear that some simplification in point of form is desirable.

* See, as regards the Railway Act, the Statement of Objects and Reasons of the Carriers Act, 1865.

"'11. What we now propose is to remove contracts to carry by Railway altogether from the operation of the Carriers Act of 1865, and to frame the section of this Bill regarding them in such a manner that the whole law will be found in that section and the provisions of the Contract Act relating to bailments.

"'Under sections 151 and 152 of the Contract Act, carriers by Railway will be bound to take the same care of the goods entrusted to them as a prudent man would take of his own; and where they take such care, they will not be liable for any loss or damage that may occur.

"'Under section 10 of the Bill, they will be prohibited, as a rule, from freeing themselves by any special contract from the obligation thus imposed upon them.

"'12. So far the law will be in strict accordance with the existing law, or what the existing law was intended to be; but here we have introduced an alteration of some, though not of very great, importance by excepting from the general rule prohibiting special contracts such contracts in writing as may be in a form approved of by the Governor General in Council, and may be signed by the consignor.

"'It will be observed that this exception corresponds to the proviso regarding special contracts in section 7 of the Railway and Canal Traffic Act, 1854, with this difference that, while the latter Act provides that the special contract shall be effectual and relieve the Company only if it is held by the Court to be reasonable, thus leaving the validity of the contract to be determined *ex post facto*, our exception makes the contract good, if in a form to be approved beforehand, and thus avoids the uncertainty which, owing to the different views that may be taken by different Judges as to the reasonableness of a contract, frequently attaches to such transactions in England.

"'13. It need hardly be said that contracts going to relieve absolutely from liability for neglect or misconduct would usually be held unreasonable in England; but there are cases in which it has been held that a carrier by Railway may reasonably exempt himself, at least conditionally or partially, from such liability, as, *e.g.*, where he stipulates that he shall not be liable unless a claim is made within a certain time after the loss or damage has occurred, or where he is willing to carry subject to the ordinary liability at a fair rate, but offers as an alternative to carry free from all liability at a lower rate, or where he exempts himself only from liability for damage arising from loss of market caused by delay. It is to meet cases of this sort that the exception has been introduced.

"'14. Our attention having been directed since the submission of our previous report to the danger to which carriers by Railway in this country are exposed of having fraudulent claims brought against them in respect of valuable property of small bulk alleged to have been lost in transit (a point dwelt on at some length by the Select Committee in the Act of 1854), we have deemed it well to omit the limitation of Rs. 100, which we introduced into Bill No. II, and to require (section 11) that such property shall (as at present) be declared in all cases, whatever be its value.'

"The very great importance of this subject to the trade of India must plead for me in giving the Council so long a quotation. In case of goods lost or damaged, a subject on which we have received many communications, we have, in accordance with the Carriers Act of 1865, section 91, relieved the owner from, and thrown upon the carrier, the onus of showing how the loss or damage was occasioned. By section 14, we have somewhat enlarged the powers now held by the Railway Companies to get rid of property left on their hands beyond the reasonable time in which it may be expected that the owner should remove it, and provision has been made to prevent speculative persons from using the Station-premises to the serious injury of traffic by blocking it up with their goods. A recent incident in Southern India has led to power being taken to deal with persons suffering from infectious diseases. This power is necessary, but in giving it effect, the Railway-Administration will not be relieved from its duty of taking care to see that everything proper for the protection and convenience of the person removed shall be attended to.

"We have mitigated the penalties hitherto following any one who smoked tobacco whilst travelling by Railway. Some other alterations have been made, which involve no actual change in the law, but which were principally made in order to secure simplicity and clearness. With these I will not trouble the Council. The Committee has received many suggestions, all of which have been carefully considered, and have more or less led to the moulding of the present measure. But whilst the Committee has jealously guarded the interests of the public, the users and customers of the Railway, it is to me a source of very considerable satisfaction, and bearing in mind how legislation in this direction was formerly met from the Railway authorities, it is a source of congratulation to this Council, that I am able to present for its acceptance and adoption, and for Your Lordship's approval, a measure complete, I think, and sufficient in itself, and one which has at the same time received the sanction and approbation of the very able and efficient Agents and Managers of the various Railway Companies of India. I take this occasion to thank those gentlemen for the aid and co-operation which they have afforded me in this matter as well as in others, and I would desire to record my appreciation of the relations that now exist between their Administrations and the Department with which I am connected—relations which cannot fail to be beneficial to the trade, the commerce, and the industry of India.

"A few words here, my Lord, illustrating the present condition and prospects of the Railways of India, may not at this moment be inopportune, because representations have of late been put forth which are not by any means favourable to Railway enterprise in this country.

"The total outlay on the Capital Account of the Guaranteed Railways up to the 30th March of this year (1879) may be taken at about 97 millions sterling, including debenture capital. The nett receipts of these lines for this coming year ending in March 1880 are estimated at 528 lákhs, or about £4,861,000 at the current rates of exchange, and this will yield a dividend of 5 per cent. on the aggregate investment.

"As from these nett receipts the State has to pay to certain Companies earning profits in excess of the guaranteed interest, a moiety of the surplus, this dividend is slightly decreased; but it is not till one comes to review the present condition of the Capital Account that the practical value of Railway enterprise as inaugurated by Lord Dalhousie becomes more apparent and, to say the very least, hopeful and encouraging. This has been put to the test by the recent arrangement for the purchase of the East Indian Railway. This line is to be acquired at a premium of 25 per cent. In 1877 it yielded a return of 9 per cent.; this last year its returns we may take with safety at 8½ per cent. From these figures it is clear that had not the Company been obliged to pay the State one half the surplus profits in excess of the guaranteed capital, coupled with the power of the State to effect a compulsory purchase, the value of the shares would have stood very much higher.

"I do not consider that I shall be making at all too bold a statement in saying that this purchase will have been effected at 30 per cent. below what would have been the market-value of the property had it not been subject to the condition to which I have alluded.

"The Great Indian Peninsula, Bombay, Baroda and Central India Railways are also surplus-paying lines with their shares at high premiums. The Oudh and Rohilkhand has almost risen to its guarantee, and when once it has been linked on to the East Indian Railway by the bridge now authorized over the Ganges at Benares, and when its present northern terminus has been extended, there is every prospect of this line also paying a considerable surplus.

"The total capital outlay on State Railways up to the end of this financial year will be Rs. 22,20,00,000, and the probable nett revenue for the ensuing year will be Rs. 32,87,000; but in this very early stage, and in the very incomplete condition of these lines, no fair judgment can be pronounced on these figures. We must rather compare them, as I have done, with the history of the older lines.

"I must here rather qualify my concurrence in the wisdom of executing Railways by the State, and subject to the same rules and conditions as all other State expenditure, and this method certainly leads to make our State lines compare unfavourably with the Guaranteed lines. I do not find fault with these rules in themselves; but their application must, and does, frequently retard the progress of works at most critical periods. This, in addition to the reason I have given, is often due to the financial necessities of the State; but, however right or proper it may be, that the State having undertaken the duty of constructing Railways must, in doing so, subject its proceedings to its ordinary rules, and must be guided by its financial necessities, this does not the less remove the fact that the progress of a Railway is often interrupted for want of funds, and that this delay must tend to enhance its cost very considerably. Owing to this, the lines constructed by the State are severely weighted in any comparison which may be made between them and their more fortunate neighbours, the Guaranteed lines, that have not been subject to similar checks and restrictions.

"A few words, illustrating especially the financial position and prospects of the State lines, may not be without interest, and may dispel some of the fears and anxieties which I have seen expressed by those who are no doubt well-wishers to the success of these undertakings.

"I have never concealed my own doubts as to the wisdom of the policy of working, whatever I may be prepared to admit as to the advantages of constructing, lines under the direct authority of the State, and then only through the agency of responsible contractors; so that in bearing my testimony to the efficiency, under many drawbacks—not the least of them being the difficulty of obtaining for an administration working under the hard and stiff rules of a Government bureau, that elasticity and freedom of action which is the very essence of commercial enterprise—I cannot but admit that whilst a Manager or an Administration is seeking superior authority, through the tortuous routes by which it can usually be only approached, a market may be lost or a traffic diverted. The public suffers a double loss, for it suffers through the individual and through its Government.

"But in spite of all this, and remembering that the older enterprises run from one certain mart to another through known and well-beaten tracks of long established trade-routes, the light lines opened during the last four years, though still far from complete, and though even yet fragmentary in every detail and in equipment, give results far more promising as to their future than the heavier lines which have passed beyond all the trials of their early youth.

"The receipt and expenditure per traffic train-mile of the State lines compare very favourably with similar statements of the Guaranteed lines; I will not weary the Council with the figures in detail, but will prefer, because it will, I think, more clearly describe what I want to show, to confine myself to a comparison of the nett receipts of the older with the younger lines.

"The East Indian Railway in the first six years of its life never touched 7 per cent. any one half-year. The Rájputána gave the last half-year of which

the returns are complete, and within four years of its opening, 2·55 per cent. The Jabalpur line in its sixth year had a percentage of nett earning of 2·36. The Tirhut line barely into its second year gave 1·32.

"The Neemuch and Holkar line, equally heavily weighted as was the Great Indian Peninsula Railway, gave the first year a return exceeding 2 per cent. the latter not reaching that till its fourth year.

"The Sind, Panjáb and Delhi, as well as the Oudh and Rohilkhand, had in their earlier existence to some extent still to labour under conditions adverse to doing a good business, and are in the same category as some of our State lines, broken up or interlaced with other systems; but even admitting all this, the early progress of the latter will stand a comparison with the former.

"This success—a success which, I think, no one will now question—was hardly even anticipated at so early a stage of the railway-life of India by the great proconsul who was its originator; and coming down to more recent times, when a further forecast was made of railway development during the rule of Lord Lawrence, I find that it was even then calculated that the general revenues of India would have to be bearing at the present moment a burden of interest amounting to more than one million sterling. As a matter of actual fact, we have to-day a mileage of open lines in excess of what was contemplated at the time of the forecast, and the nett receipts from these lines are almost in equilibrium with the charge for interest on their capital cost.

"One feature in connection with the capital expended on railways in India has an almost exceptional interest, namely, that this capital represents the total amount which these undertakings have cost. Mistakes have been made, some money has been perhaps used unwisely, nay, possibly, even extravagantly. But on the whole in return for this capital which represents every shilling that has been expended on these undertakings, the community has received full value, and this value has been secured without the loss or ruin which has so often attended the earlier history of similar enterprises in other parts of the world.

"Satisfactory and hopeful then as are our railway interests, I can only regret the circumstances which are now somewhat checking the further progress of those lines which this Empire so much needs, though I believe and trust that the very caution that we are now exercising will eventually justify, and that at no distant date, vigorous and consistent measures for completing the main arterial systems of railway-communication throughout this peninsula."

The Motion was put and agreed to.

The Hon'ble MR. THORNTON said that, although the Bill had been greatly improved by the Select Committee both in arrangement and in substance, and although the objections he had to many provisions in Bill No. II had been remedied in Bill No. III, there were some points in the Bill under consideration in regard to which he would invite explanation from the Hon'ble the Mover.

The object of his first question was to ascertain whether sufficient provision had been made in the Bill for securing the reasonable comfort and convenience of travellers, and especially Native travellers. He observed, and observed with satisfaction, that section 8 of the Bill did impose upon Railway-Administrations the obligation to make rules for preventing over-crowding of carriages and "for regulating the travelling upon, and the use, working and management of, Railways," and that these rules were subject to the approval of the Government of India; but he would ask whether the wording of the latter clause was sufficiently wide to make it obligatory on Railway-Administrations to provide for the reasonable wants of travellers, and especially Native travellers, at stations, such as suitable waiting-accommodation, drinking-water and other necessary requirements. In the case of English travellers the want of a legal obligation was to a great extent supplied by the pressure brought to bear upon Railway-Administrations by public opinion in the newspapers; but this force was in great measure non-existent in the case of Native travellers. He would suggest, therefore, that, if there was any doubt upon the subject, it might be removed by a suitable amendment of clause (*d*) of section 8.

The next question he would ask the Hon'ble the Mover related to a small matter—contained in section 29. That section declared that persons neglecting or refusing to give an account of the quantity and description of property tendered for conveyance by rail, or giving a false account of such property, shall be punished with fine which may extend to one hundred rupees for every ton of such property, or for any parcel exceeding one hundred-weight, &c., &c. Why, he would ask, was the quantity of goods referred to in this section expressed in weights taken from the English system? In India we had, in the *ser*, a legal unit of weight familiar to the people. Why should not the quantities in question be expressed in multiples of the *ser*, instead of in weights which were unknown quantities to nine-tenths of the people affected by the section and, he would add, to most of the Native Judges who would have to decide cases under its provisions? He would venture to recommend that, in this section, for the word "hundred-weight," the words "forty sers" should be read; and for the word "ton," the words "eight hundred sers"—amounts which would be popularly known as "one maund" and "twenty maunds" respectively.

The third point in regard to which he would invite explanation from the Hon'ble Mover was of more importance. It related to section 42, which imposed penalties on the owners and persons in charge of cattle straying or driven on to Railways. The section provided, *inter alia*, that—

"The owner or person in charge of any bulls, cows, &c., straying on any Railway provided with fences suitable for the exclusion of such animals, shall be punished with fine which may extend to ten rupees for each animal, in addition to any amount that may be recovered under the Cattle-Trespass Act, 1871."

And again that—

"Whenever any such animals are wilfully driven, or knowingly permitted to be, on any Railway not so provided, otherwise than for the purpose of lawfully crossing the Railway, or for any other lawful purpose, the person in charge of such animals, or if he cannot be identified, then the owner of the said animals, shall be punished with fine which may extend to fifty rupees for each animal, in addition to any amount that may be recovered under the same Act."

In regard to these clauses—or rather the corresponding clauses in Bill No. II,—the Panjáb Government wrote as follows:—

"Section 40"—that is, section 42 of the present Bill—"in a country like the Panjáb is one of great importance; and, unless the Act, in respect of clause 2 of this section, be amended, the Lieutenant-Governor is of opinion that it will give rise to great oppression and unpopularity, as the draft section throws upon the owners of cattle a very unjust burden. The clause is similar to one which was proposed in 1871, but which was rejected. No penalties should be imposed on the owners of cattle found on the railway unless the line be fenced. Where a fence considered sufficient is in existence, then no claim for damage to owners of cattle should lie; but the Lieutenant-Governor would strongly protest against the enactment of clause 2, or the imposition of any penalties before railways are properly fenced."

Notwithstanding the strong protest he had just read, the clauses referred to had been retained by the Select Committee. In the course they had adopted, the Committee were doubtless influenced by cogent reasons; but these reasons had nowhere been explained. The matter was not referred to in the report of the Committee, nor was it, so far as he could hear, touched upon by the Hon'ble the Mover in his speech. It seemed due to the Lieutenant-Governor of the Panjáb that some explanation should be afforded of the grounds on which his strongly-felt objections had been over-ruled.

Colonel the Hon'ble SIR ANDREW CLARKE said that the whole point of his Hon'ble friend's last objection turned upon whether the men in charge of herds of cattle wilfully allowed the cattle of which they were in charge to graze upon railway-embankments. It was only when they *wilfully* did that, that they would be liable to penalty. The Council could, from their own experience of herdsmen in this country, say whether it was not their common practice to turn their herds on wherever they found good pasturage; the banks of railway-lines were covered with excellent pasturage, and therefore herdsmen were in the habit of driving cattle to feed upon it. Where the Police drove the cattle off they found it necessary, in some instances, to follow them up to the owners. Personally, he should like to see every railway-line fenced, but it was uncommonly hard upon the travelling public that their lives should be risked in consequence of cattle being wilfully driven upon the line to graze.

The question had been frequently raised in the interests of the public, and he thought that the principle of the clause to which objection had been taken was a right one. It seemed to him a self-evident proposition that such a provision should be made to prevent accidents.

His Excellency THE PRESIDENT supported the view which was taken by the Hon'ble Member in charge of the Bill. Herdsmen in this country, as was well known, were in the habit of deliberately driving their cattle and leaving them to feed on the best pasturage they could find, quite irrespective of the ownership of the land. If, as a matter of necessity, there must be lines of railway which were unfenced, then he thought some punishment must be provided for wilfully driving cattle to feed on the banks of such railways.

Colonel the Hon'ble SIR ANDREW CLARKE said, with reference to the other points raised by his Hon'ble friend, that the various proposals respecting the comfort and convenience of passengers were so many and in such detail that the Select Committee thought them beyond the scope of a legislative enactment. But by making it obligatory on the Railway Companies to make rules in consultation with the Consulting Engineer to Government, and providing that those rules should be subject to the sanction of Government, the Committee thought that it would be in the power of Government to secure all that was necessary for the comfort and convenience of passengers. He thought that, as a general rule, the desire of the Railway Companies and Administrations was to provide, as far as possible, for the various wants of passengers. A great deal in that respect had been done in recent years, but it was not an easy task to provide all that was necessary, and there were, no doubt, deficiencies in many of the railways.

With reference to the over-crowding of passengers, his experience was that the Natives themselves were to blame, for they would force themselves into carriages in which there was no available room, and he thought it was not the desire of the Railway-Administration to put more persons into a carriage than the carriage was intended to accommodate.

His Honour THE LIEUTENANT-GOVERNOR suggested the addition of a few words to clause (*b*) of section 8. He could not agree with Sir A. Clarke that Native passengers were alone to blame themselves for over-crowding. He believed that they were helpless in the matter and were ill-treated by railway-servants. He had himself very often seen passengers forced by guards into carriages where there was no room. He thought it necessary to pass rules to regulate the accommodation of passengers in such matters as water-supply, shelter from the sun, and other station-accommodation.

General the Hon'ble SIR E. B. JOHNSON said that he had constantly, when travelling as Quarter Master General, seen Native third class passengers locked up and utterly unable to leave their carriages when passengers of the first and second classes were allowed to parade the platform of a railway-station. If there was time to allow passengers to leave the train, he thought that the Natives should also be allowed to quit their carriages. He would require Station-masters to open the doors of all the carriages at each halting station.

The Hon'ble MR. STOKES agreed with His Honour the Lieutenant-Governor that the Bill as it stood did not make it compulsory on Railway Companies to make general rules to provide for the comfort and convenience of passengers. He would therefore suggest the addition to section 8, clause (*b*), of the words "and the provision to be made for the accommodation and convenience of passengers."

With respect to the other question, regarding the use of the English words "ton" and "hundred-weight," it ought to be remembered that this Bill was a consolidating measure, and those words were in the existing law, Act XVIII of 1854, section 14, and had never, so far as he knew, given rise to the slightest difficulty. As to the propriety of using the Hindústání term "ser" because it was the name of the standard weight recognised by the Indian legislature, he regretted to say that that was only nominally so; the ser was declared to be the standard weight of India by an Act (No. XXXI of 1871) which, though passed more than seven years ago, had unfortunately not been brought into force.

Colonel the Hon'ble SIR ANDREW CLARKE observed that, as a general rule in all Guaranteed Railways, the maximum carrying capacity of every wagon was marked on it both in tons and in maunds for the information both of the public and the servants of the Company.

The Hon'ble MR HOPE said the report of the Select Committee on the Bill, although it was dated 26th February, was only in the hands of the Members some time on Friday last. No sufficient time was thus afforded for consideration. Moreover, when he glanced at the report, it struck him that the Committee was an exceedingly limited one. There seemed to be more than one conspicuous omission of well-known names which might have been added to it. He need only mention one Member, the Hon'ble gentleman on his left (Lieutenant-General Sir M. Kennedy), who might be supposed to be able to give valuable advice. However, notwithstanding this short notice and imperfect Committee, he had come to the Council with the intention of accepting this Bill on trust, just as other Hon'ble Members had on occasion to accept on trust Bills which they had not had time to go through themselves. But what had taken place led him to doubt the expediency of doing so. A number of objections of various kinds had been raised, some of which were held by Hon'ble Members to be of considerable importance to the Native community, and some provisions of this Bill imposed serious and possibly undeserved penalties on individuals. Suggestions had been devised to meet some of those objections, but he had not been able to catch what it was proposed to do; and he very much doubted whether objections of this kind, which were fundamental objections, could be satisfactorily disposed of in a few minutes at the Council table. He would suggest whether it would not be better to refer the Bill back to the Select Committee, to republish it, and to allow Local Governments, and amongst others the Panjáb Government, time to consider the provisions of the Bill as they now stood. He was aware that he could not, according to the Rules, move for the re-committal of the Bill, unless indeed he claimed advantage on the ground of its not having been seven days in his hands, but he threw out the suggestion for the consideration of the Hon'ble Member in charge.

His Excellency THE PRESIDENT remarked that, considering the immense importance of some of the suggestions which had been made by the Hon'ble Mr. Thornton, he thought it would be impossible on the spur of the moment to meet those suggestions. It appeared to HIS EXCELLENCY scarcely desirable that the Bill should be hurried through the Council, and as the Hon'ble Mr. Hope had expressed a wish that the Committee should be enlarged, HIS EXCELLENCY thought the opportunity should be taken to do so.

The Hon'ble MR. STOKES observed that if the Bill were now referred back to the Select Committee, with the addition of other Hon'ble Members, he doubted whether the further report could be presented in sufficient time to be taken into consideration before the departure of the Council from Calcutta. Besides, even if the report were presented before the next meeting, Hon'ble Members, such as the Hon'ble Mr. Hope, might again raise the objection that the Bill had not been in their hands for the full period of seven days prescribed by the Rules. The Bill was quite too important a measure to be passed at Simla. The result of referring the Bill back to the Committee would therefore probably be to postpone the passing of it till the Council had returned next November to Calcutta.

Colonel the Hon'ble SIR ANDREW CLARKE thought that the objections which had been raised by his hon'ble friend Mr. Thornton had been sufficiently met by the explanations which had been offered in answer to them, and the suggestions for the amendment of the Bill which had been made. He admitted that, as regarded the trespassing of cattle on Railway-lines, there was a choice of evils. Either the risk of accidents from cattle-trespass in unfenced lines of Railway must be taken, or provision must be made for the punishment of the owners of cattle wilfully driven on embankments for pasturage, where the persons in charge of such cattle could not be identified. With regard to the necessity for making provision for the comfort and convenience of Native passengers, he thought it had been met by the amendment which had been suggested by his hon'ble friend Mr. Stokes. There was nobody more anxious to provide for

the comfort and convenience of passengers than the officers of the Railway-Administration themselves, and for his own part, he had at once accepted the suggestion which had been made. With regard to the question of the weights to be recognised, the Bill followed the existing law in that respect; it had been found to work satisfactorily and he had heard no objection to it. This important Bill had nearly been completed and was ready to be brought up when his hon'ble friend Sir Michael Kennedy joined the Council. If he had been here when the deliberations of the Committee were proceeding, SIR ANDREW CLARKE would have been glad to have had the benefit of his experience in settling the provisions of the Bill. The Bill had been a very long time under consideration, and the Committee had received a very large number of criticisms which had all been very carefully discussed and considered.

The Hon'ble MR. STOKES begged to remind His Excellency the President that the Bill was in one important respect most urgently needed. The absence from the present law of any provision legalizing the use of locomotives on railways, made it necessary that this Bill should be passed without further delay. For want of such a provision (the insertion of which had been expressly directed by the Secretary of State), every Railway Company in the country, and the Government as the proprietor of State Railways, were liable to protracted and expensive litigation. The suggested amendments of the section relating to cattle-trespass could not possibly be adopted; and the importance of the other two amendments had been exaggerated. There would be no difficulty in making them at once. The amendments which had been drawn up, he was of opinion, fully met the objections which had been taken to sections 8 and 29. He had often known amendments of infinitely more importance and difficulty made by the Council under circumstances precisely similar to the present.

His Honour THE LIEUTENANT-GOVERNOR suggested the substitution in section 29 of the words "five rupees for every maund of three thousand two hundred tolas" for the words which had been proposed by the Hon'ble Mr. Thornton. That would make the provision harmonise with the expression used in other Acts.

The Hon'ble MR. STOKES said that, on consideration, he thought it would be better to insert his amendment of section 8 as a new clause after clause (*b*) of that section. His motion would therefore be that the following clause be inserted after clause (*b*) of section 8:—

"*(c)* for regulating the provision to be made for the accommodation and convenience of passengers;

and that the present clauses (*c*) and (*d*) be lettered respectively (*d*) and (*e*)."

The Motion was put and agreed to.

The Hon'ble MR. THORNTON then moved that, for clause 3 of section 29 of the Bill, the following shall be substituted:—

"shall be punished with fine which may extend to five rupees for every maund (of 3,200 tolas) of such property; and such fine shall be in addition to any charge to which such property may be liable."

The Motion was put and agreed to.

Colonel the Hon'ble SIR ANDREW CLARKE then moved that the Bill as amended be passed.

The Hon'ble MAHÁRÁJÁ JOTÍNDRA MOHAN TAGORE wished to take the liberty before this Bill was passed, to point out once again that it appeared to be somewhat unfair to visit the shortcomings of Railway Companies upon the owners of cattle which strayed upon the unfenced embankments of railway-lines. Although cases had been known where persons employed in tending cattle had been found wilfully to drive the cattle under their charge upon railway-embankments for the purpose of grazing upon the pasturage there, yet it was difficult to prove where the offence was wilful and where it was not, especially with regard to unfenced lines, and it was hard to punish the owner for a matter which might have been purely accidental or unavoidable. He thought it should be made incumbent on Railway Companies to fence their lines of railway before inflicting any penalty for the trespass of cattle thereon.

The Hon'ble MR. COCKERELL desired to submit that the grievance put forward by the Hon'ble Member who last spoke was wholly sentimental. No one was better aware than that Hon'ble Member that the whole country of Bengal might be said, broadly speaking, to be unfenced; yet they had every day experience of cattle being taken from fields which were unfenced and carried to the pound, and there impounded until the owners paid the fine prescribed by law for their release; and if the cattle were unclaimed, they were

sold to pay the expenses of their keep. Now, although the Bill before the Council imposed an additional fine for the wilful driving of cattle on lines of railway and the land belonging thereto which were unfenced, the principle of the enactment was the same as that of the Cattle Trespass Act, against which no objection of this kind had ever been urged.

In both cases the law threw upon the owners of grazing cattle the burden of taking such care of their property as would prevent it from causing injury to others, whilst the punishments imposed by the law were less or greater, according as the absence of due care entailed risk of injury to property only, or to life as well as property.

The Hon'ble MR. HOPE thought the objection which had been taken by the Hon'ble Mahárájá had been looked upon in an erroneous light; because, although the statement which had just been made that the whole of Bengal was an unfenced country might be true, it should be borne in mind that the penalty of impounding prescribed under the Cattle Trespass Act was an ordinary penalty; but the penalties under this Bill were extraordinary, and over and above the ordinary penalty imposed by law for the offence of cattle-trespass. Therefore, it seemed to MR. HOPE that there was no parallel between the two cases.

The Hon'ble MR. STOKES considered that the distinction made by this Bill was a perfectly reasonable one. Under ordinary circumstances, cattle-trespass caused no injury to life, limb or valuable property; but the trespassing of cattle on railway-lines was attended with extreme risk to the lives and limbs of passengers, and to valuable engines and carriages of the Companies. The legislature was therefore perfectly right in imposing extraordinary penalties on persons who allowed cattle to stray on such lines, whether fenced or unfenced. To require that all Indian Railways should be properly fenced was, in the present state of our finances, to ask an impossibility.

The Hon'ble MAHÁRÁJÁ JOTÍNDRA MOHAN TAGORE thought that the reference which the Hon'ble Mr. Stokes had made to the important question of the risk to lives and limbs of passengers travelling by Railways ought to be an additional reason why it should be incumbent on Railway Companies to fence their lines.

His Honour THE LIEUTENANT-GOVERNOR remarked that very few of the State lines were yet fenced and that the speed of the lines was regulated with reference to that fact; it would be done in time, but the fencing of railway-lines could not be effected in a day, and in the meanwhile there would be danger of the traffic on Railways being entirely stopped if fencing was made a *sine qua non* to the running of trains.

Colonel the Hon'ble SIR ANDREW CLARKE observed that there was another reason why railway-embankments should be protected from the trespass of cattle. The grazing upon them of cattle caused injury to the embankments.

The Hon'ble MR. EVANS said that in this country, as a rule, there were no fences—arable and pasture land of various proprietors lay in one plain side-by-side. There was no fence between the land of each proprietor nor between the crops and the grazing grounds. It was the admitted duty of every owner of cattle to employ herdsmen to prevent their trespassing. If the cattle trespassed, they were impounded and fines levied under the Cattle Trespass Act. There would be nothing contrary to the custom and habits of the country if the Railway were left unfenced. Efforts were being made to fence the Railways to diminish the risk of accidents, not because adjacent land-owners had any right to ask that they should be fenced. Meanwhile, heavy penalties must be imposed to protect the lives of passengers. The penalties sufficient for the protection of crops were not sufficient for the protection of the lives of the passengers by rail.

The Hon'ble SIR ALEXANDER ARBUTHNOT said the motion before the Council was that the Bill be passed. The Hon'ble Mahárájá Jotíndra Mohan Tagore had offered an objection, but had not moved an amendment. It seemed to SIR ALEXANDER ARBUTHNOT under all the circumstances to be undesirable that the passing of this Bill, which had been a long time under the consideration of a Select Committee, should be any longer postponed. The objections which had been raised in the course of that day's discussion had all, he thought, been thoroughly sifted, and as far as he was competent to judge, had been satisfactorily met. But with reference to this Bill, and also with reference to another Bill before the Council, objections had been raised to the effect that the Select Committees which had to report upon the Bills and to sift their

provisions were unduly small. It appeared to him that there was considerable force in that objection, and that in the case of a Bill of such importance, and in the case of most of the Bills which came before the Council, it was very desirable that in future the Select Committees appointed should be somewhat larger. In the case of the present Bill, he agreed in the observation which had been made that it would have been very desirable to have had the benefit of the experience of Sir Michael Kennedy on the Select Committee, and he had no doubt that Sir Michael would have been added to the Committee if he had arrived at Calcutta at an earlier period in the progress of the Bill. It would have been better, also, if one or more of the Native Members of the Council had been sitting on a Bill which so materially affected the safety and comfort of every portion of the Native community. He would only add that he hoped no further objections would be made to the Bill being now passed.

The Hon'ble MR. STOKES had had nothing to do with the formation of the Committee on the Railway Bill. He regretted the absence from the Committee of the Hon'ble Sir M. Kennedy and Mahárájá Jotíndra Mohan Tagore; but he was confident that the omission to secure their assistance was due to mere forgetfulness on the part of the overworked Member in charge of the Department of Public Works. As to the Bills in his (MR. STOKES') charge and actually passing through the Council, he begged to inform the Hon'ble Sir A. Arbuthnot that the Committee on each was abundantly full. Thus, the Committee on the Transfer of Property Bill consisted of seven Members, including the Hon'ble Mahárájá Jotíndra Mohan Tagore. On the Bill to amend the Code of Civil Procedure, six Members were sitting. On the Negotiable Instruments Bill, there were five Members. On the Alluvion Bill, there were seven. On each of the Bills dealing respectively with Legal practitioners and Coast-lights, there were three Members,—a number which, in his opinion, was amply sufficient for those Bills.

The Hon'ble MR. HOPE explained, with reference to the remarks he had made about the omission of Sir Michael Kennedy from the Committee, that his hon'ble friend had been nearly two months in Calcutta. He arrived before the assembling of the recent Railway Conference, from whose deliberations the Select Committee stated that they had derived great advantage. He therefore could not apprehend what there was to have prevented the Committee from obtaining the advice of his hon'ble friend. He merely mentioned these facts in support of the remarks which he had made regarding the smallness of the Select Committee on this Bill.

The Motion that the Bill be passed was then put and agreed to.

NORTH-WESTERN PROVINCES LAND-REVENUE ACT AMENDMENT BILL.

The Hon'ble MR. COLVIN asked leave to postpone the presentation of the Report of the Select Committee on the Bill to amend the North Western Provinces Land-Revenue Act, 1873.

Leave was granted.

PRESIDENCY BANKS ACT AMENDMENT BILL.

The Hon'ble MR. STOKES, in the absence of the Hon'ble Sir John Strachey, moved that the order of the Council of the 5th instant directing the publication of the Bill to amend the Presidency Banks Act, 1876, in the *Gazette of India*, the *Calcutta Gazette*, the *Fort Saint George Gazette* and the *Bombay Government Gazette* be rescinded. The effect of allowing the order to remain unrescinded would be to postpone unnecessarily the passing of the Bill until the Council met at Simla or even until it returned to Calcutta. The present intention of Sir John Strachey was that the Bill, which merely effected a few trivial alterations in the Presidency Banks Act, should, if the Council consented, be passed at their meeting on Wednesday next.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then presented the Report of the Select Committee on the Bill.

BURMA ELEPHANTS BILL.

The Hon'ble MR. THORNTON presented the final Report of the Select Committee on the Bill to prevent the indiscriminate destruction of wild Elephants in British Burma.

The Council adjourned to Wednesday, the 19th March, 1879.

CALCUTTA;
The 13th March, 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

NOTE.—The meeting which was originally fixed for Wednesday, the 12th March, 1879, was adjourned to Thursday, the 13th March, 1879.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 19th March 1879.

PRESENT:

The Hon'ble Sir A. J. Arbuthnot, K. C. S. I., Senior Member of the Council of the Governor General, *presiding*.
His Honour the Lieutenant-Governor of Bengal, K. C. S. I.
The Hon'ble Whitley Stokes, C. S. I.
The Hon'ble Rivers Thompson, C. S. I.
The Hon'ble Mumtáz-ud-Daulah Nawáb Sir Muhammad Faiz Alí Khán Bahádur, K. C. S. I.
The Hon'ble T. H. Thornton, D. C. L., C. S. I.
The Hon'ble G. H. P. Evans.
The Hon'ble F. R. Cockerell.
The Hon'ble Sayyad Ahmad Khán Bahádur, C. S. I.
Lieutenant-General the Hon'ble Sir M. K. Kennedy, R. E., K. C. S. I.
The Hon'ble T. C. Hope, C. S. I.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

CIVIL PROCEDURE CODE AMENDMENT BILL.

The Hon'ble MR. STOKES presented the supplementary Report of the Select Committee on the Bill to amend the Code of Civil Procedure. Since the former report had been presented he had received valuable communications from Mr. Justice Ainslie and Mr. Justice Sewell White, both of the Calcutta High Court, which had led the Select Committee to make some changes in the Bill, and one or two further amendments of the Code. Under these circumstances, the Committee now recommended that the Bill as amended should be republished; but, considering the urgency with which some of the amendments were required, they were of opinion that the passing of the Bill should not be delayed for more than two months.

ALLUVION BILL.

The Hon'ble MR. STOKES also presented the preliminary Report of the Select Committee on the Bill to define and amend the law relating to alluvion, islands and abandoned river-beds.

PRESIDENCY BANKS ACT AMENDMENT BILL.

The Hon'ble MR. STOKES also moved that the Report of the Select Committee on the Bill to amend the Presidency Banks Act, 1876, be taken into consideration. He said that since the report was presented, the Government of India had received a telegram and a letter from the Bank of Madras proposing two changes in the Act. To enable the Council to understand this proposal, he must read the part of the Act relating to the qualifications of a Director, so far as it was material for his present purpose. It was very brief and clear:—

"No person shall be qualified to serve as a director of a Bank who is not a proprietor or holder *in his own right* of unencumbered stock or shares of such Bank to the nominal amount of Rs. 10,000 at the least.

"No person shall be qualified to serve as a director if he holds *the office of* director, provisional director, promoter, *agent* or manager of any other joint-stock Bank established or having a branch or agency in British India."

Now, the Madras Bank wanted the Government to make two changes in this rule; first, they wanted us to insert after the words "in his own right," the words "or in right of a firm in which he is a partner;" and, secondly, they wanted us to define the word "agent" so as to prevent the member of a mercantile firm acting merely as the correspondent of a joint-stock Bank, such as the Comptoir d'Escompte, from being thereby disqualified as a Director. It was difficult to speak gravely of the latter proposition. The duties of the firm which had raised this question were, so far as regarded the Comptoir d'Escompte, simply to collect some of the Bank's bills and invest and remit the proceeds for the credit of the Paris Bank, as directed from time to time. No lawyer would hold for a moment that this constituted the collecting firm an "agent" in the sense in which that word was used in the Act. By 'agent,' as there used, was meant the gentleman at the head of the branch of a Bank doing its local business and thereby competing with the Presidency Bank—as Mr. Harper was the agent of the Oriental Bank in Calcutta and Mr. Stevens in Madras. And the present able and learned Advocate General of Madras (Mr. O'Sullivan) had given an opinion (which the Bank of Madras had sent us yesterday) distinctly to that effect. It would therefore be idle to introduce such a definition, and the Government of India objected to make useless changes in the law. The other alteration which the Bank of Madras proposed was of a substantial nature. They wanted to have it laid down in the Act that a man might be

qualified as a Director of a Presidency Bank if he merely belonged to a firm holding shares in the Bank to the amount of Rs. 10,000. The Government of India opposed this change on principle. The object of the requirement that shares should be held by a Director "in his own right" was to guarantee that every Director should personally have a considerable beneficial interest in the well-being of the concern. It was obvious that this security would be weakened if they were to allow a member of a partnership which, under the Indian Companies Act, section 4, might consist of no less than twenty persons, to be qualified as a Director merely because his firm held shares in the Bank to the amount of Rs. 10,000. The whole matter had been carefully considered both in the Financial Department and by himself; and the Government of India declined to make the proposed modifications because one would be useless and the other would be wrong.

The Motion was put and agreed to.

The Hon'ble MR. STOKES then moved that the Bill be passed.

The Motion was put and agreed to.

BURMA ELEPHANTS BILL.

The Hon'ble MR. THORNTON moved that the Reports of the Select Committee on the Bill to prevent the indiscriminate destruction of wild elephants in British Burma, or, to use the amended title proposed by the Committee, the 'Bill for the preservation of wild elephants,' be taken into consideration.

The Bill, it would be remembered, was originally applicable to British Burma only, but its scope and local operation had been enlarged by the Committee and a revised edition, embodying the amendments of the Committee, had been published under the designation of Bill No. II.

All the Local Governments and Administrations affected, or which might be affected, by the measure in its amended form, had accepted its provisions, with the exception of the Madras Government, which had a not unnatural predilection for its own enactment of 1873. As, however, the present Bill, if it became law, would not operate in the Madras Presidency, unless specially extended thereto by the Madras Government, there appeared no necessity to make any alteration in the present Bill on that account. The only alteration of any importance made in Bill No. II by the Select Committee was the insertion of a provision making the previous concurrence of the Governor General in Council necessary before the Local Government could extend the Act to any local area not specified in the first section. The object of the amendment was simply to provide a security that the Act should not be extended to any new local area without mature deliberation.

The Hon'ble MR. EVANS wished to ask a question of the Hon'ble Member in charge of the Bill. He had an impression that there were some few permanently settled zamíndárís in Bengal where elephants were still caught and that the right to catch them had been enjoyed by the zamíndárs before and since the Permanent Settlement. In some cases he was informed that the papers of the Permanent Settlement shewed that the right had been expressly assessed and permanently settled. It was no doubt necessary to pass a Bill to prevent the indiscriminate destruction of wild elephants; but it might be necessary to make some special provision for such cases as he had referred to. He wished to ask whether there was any provision for such cases, and whether the point had been considered by the Select Committee.

The Hon'ble MR. THORNTON said that the possibility of claims, such as those adverted to by Mr. Evans, being put forward had been considered by the Committee, and it was partly for this reason that a wide discretion was allowed to Local Governments in the matter of levying a royalty on elephants; for the Hon'ble Member would perceive that the levy of the impost was not obligatory but might, if deemed necessary or called for, be remitted altogether.

The main object of the Bill was to assert clearly and distinctly on behalf of the State the right to regulate and control the capture and destruction of wild elephants and the right to demand a royalty on elephants killed or captured. But the manner in which, and the extent to which, these rights were to be enforced were advisedly left in great measure to the Executive Government, by whom any claims to exemption made by individuals or classes would, he felt sure, receive the most careful and the most equitable consideration.

The Motion was put and agreed to.

The Hon'ble MR. THORNTON also moved that the Bill as amended be passed.

The Motion was put and agreed to.

The Council adjourned *sine die*.

CALCUTTA;
The 19th March 1879.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

A. O. HUME,
Secretary to the Govt. of India.

SUPPLEMENT TO

The Gazette of India.

No. 15.] SIMLA, SATURDAY, APRIL 12, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 8th APRIL 1879.

GENERAL REMARKS.—In Madras general prospects continue on the whole fair. The state of things in Mysore is favourable; prices are stationary. In the Bombay Presidency the *rabi* harvest is nearly finished; in Dharwar the outturn of late crops is not expected to exceed $2\frac{3}{4}$ annas; no remarks regarding distress in any part of the Presidency occur in the report. The reaping of the *rabi* crops in the Central Provinces is almost complete, and threshing continues; the results are generally fairly good; prices remain steady. In Berar the harvest has been gathered in, and in Rajputana it is progressing. From Central India it is reported that prices have fallen at Indore. Rain still holds off in Bengal, and it is much needed in several districts for the crops on the ground as well as for ploughing and sowing operations; in some places the *rabi* is still being harvested, and the results are generally fair, except in Nattore and Chumparun; cholera and small-pox are prevalent in several districts. The want of rain is still felt in Assam; in Sylhet the price of rice is rising, and the *bura* rice will, it is expected, not yield more than an eight-annas crop. In British Burma public health is good. The *rabi* harvest in the North-Western Provinces and Oudh is progressing with generally fair results. In the Punjab harvest prospects are fairly favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (April 5th)	*Nil*	Rice 11·4, *cholum* 15·24, *raggi* 17·85, *cumboo* 15·32; nearly 5 inches water passing over anicut; *raggi* under wells and later maize coming into ear in parts; *dalwa* paddy in Collair lands doing fairly; cotton, castor, tobacco, dholl, and Bengal gram being harvested in some localities.
Kurnool („ „)	*Nil*	Rice 11·18, *cholum* 16·65, *cumboo* 17·39, *raggi* 20·85; cotton being picked in 4 taluks, outturn $\frac{1}{2}$ to $\frac{3}{4}$; second crop paddy in good condition, except in Koilkuntla, where under some tanks it is being destroyed by rats; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 10·14, *cholum* 14·37, *raggi* 17·41, *cumboo* 15·12; Cauvery and some of its branches contain about 6 to 18 inches of water; wet and dry crops in good condition; *chittraikar* and *cholum* being harvested, outturn $\frac{1}{2}$ to $\frac{3}{4}$.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—*continued.*		
Madura (April 5th)	·45 (average of 2 stations); *nil* in others.	Rice 10·59, *cholum* 17·95, *raggi* 17·99, *cumboo* 17·57.
Malabar („ „)	·70 (average of 10 stations); *nil* in others.	Rice 10·03, *raggi* 18·33; prices stationary; pasture reviving.
		General Remarks.—General prospects on the whole fair.
Bombay (April 9th)—		
Sind—		
Kurrachee ...	...	River rising at Kotri—on 6th 3 feet 7 inches against 12 feet last year.

Ratnágiri („ 1st)	...	Reaping of *waingani* rice begun; 50 deaths from fever in Malwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	*Rabi* harvest finished throughout district.
Satara ...	...	*Rabi* reaped; weather hot; health good.
Southern Mahratta Country—		
Kaladgi ...	...	Cotton damaged by rats; picking continues.
Belgaum ...	...	*Rabi* reaped; cotton picking nearly completed.
Dharwar ...	...	Outturn of late crops estimated not to exceed 2¾ annas; public health slightly improved.
Kanara ...	1·30 above Ghát	Weather cool.
Kattywar and Gaekwar's Territory—		
Rajkot ...	...	Weather hot; general health good.
Wadhwan ...	...	Weather hot; crops good.
Baroda ...	...	Weather seasonable.
		General Remarks.—No material change from last week's report.
Bengal—		
Chittagong ...	*Nil*	Small-pox and cattle disease still prevalent in Cox's Bazar.
Noakholly ...	*Nil*	Public health good.
Chittagong Hill Tracts...	*Nil*	Cholera abated.
Hill Tipperah ...	*Nil*	Public health generally fair; small-pox and cholera in places in interior.
Backergungo ...	*Nil*	Cholera in Perozepore Sub-Division.
Furreedpore ...	*Nil*	Cholera and small-pox in places.
Dacca ...	*Nil*	
Myraensingh ...	*Nil*	
Tipperah ...	*Nil*	
24-Pergunnahs ...	*Nil*	Cholera in Barripore and Busseerhat.
Jessore ...	*Nil*	Sporadic cholera cases.
Nuddea ...	*Nil*	Small-pox and cholera in many places.
Moorshedabad ...	*Nil*	Cholera still prevalent; small-pox cases in Jungypore.
Púbna ...	*Nil*	Cholera and small-pox still prevalent.
Rajshahye ...	*Nil*	Four cholera cases in Godagoree Police Station.
Bogra ...	*Nil*	Public health fairly good; cholera and small-pox much abated.
Maldáh ...	*Nil*	Cholera and small-pox in several places.
Dinagepore ...	*Nil*	
Rungpore ...	*Nil*	Fever caused by great variations in temperature; small-pox still prevalent in north and west; cholera again appeared in Kurigram and vicinity.
Cooch Behar ...	*Nil*	Cholera very bad in places.
Jalpáiguri ...	*Nil*	Eight fatal cholera cases in Patgrám and six in Boda.
Darjeeling ...	*Nil*	
Midnapore ...	*Nil*	Small-pox prevalent in town; considerable mortality.
Howrah ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Hooghly ...	*Nil*	Fever, small-pox, and cholera still in places.
Burdwan ...	*Nil*	
Bankoora ...	*Nil*	
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	*Nil*	
Bhágalpur ...	*Nil*	
Monghyr ...	*Nil*	
Purneah ...	*Nil*	
Durbhunga ...	*Nil*	
Mozufferpore ...	*Nil*	Public health good.
Sarun ...	*Nil*	Public health good.
Chumparun ...	*Nil*	
Patna ...	*Nil*	
Gya ...	*Nil*	Small-pox continues; health of plough cattle good.
Shahabad ...	*Nil*	Small-pox still prevalent; cholera at Sasseram.
Hazáribágh ...	*Nil*	
Lohardugga ...	*Nil*	
Manbhoom ...	*Nil*	Health of district better; cholera ceased in town.
Singhbhoom ...	*Nil*	Small-pox in Dhalbhoom, twenty persons attacked.
Balasore ...	*Nil*	Public health fair, but cholera in places, and some cattle disease.
Cuttack ...	*Nil*	Some sporadic cholera cases, otherwise health good.
Pooree ...	*Nil*	
		General Remarks.—No rain this week; it is much wanted in several districts for standing crops and for ploughing and sowing operations; *rabi* harvest still going on in some places, outturn generally fair, except in Nattore and Chumparun; *mohwa* in Hazáribágh and Lohardugga not good, but excellent in Singhbhoom and Manbhoom; cholera and small-pox in several places.
N. W. P. and Oudh (April 9th)—		
Benares (April 8th)	...	No change.
Allahabad („ „)	*Nil*	Heat increasing; crops nearly all cut.
Jhánsi („ 9th)	...	No change.
Agra („ 8th)	...	Harvesting progressing; no sickness.
Bareilly („ 9th)	...	*Rabi* being reaped; outturn seems generally better than was expected.
Meerut („ „)	*Nil*	Health good; harvest begun; prices stationary.
Kumaun („ 5th)	Rain fell all over district on 1st instant.	Rain attended with hail fell in places, but area damaged by it is small; prospects improved.
Lucknow („ 9th)	...	No change.
Sitapur („ „)	...	No change; prospects fair.
Partabgarh („ 7th)	...	Prospects good, but prices rising slightly.
Pyzabad („ 9th)	*Nil*	High westerly winds.
		General Remarks.—Prospects unchanged.
Punjab (April 8th)—		
Delhi ...	*Nil*	Reaping in progress; health fair; prices of food-grains falling.
Hissar ...	*Nil*	Gram and barley now being cut; prices of food-grains have a downward tendency; health generally good.
Jullundur ...	*Nil*	Crops doing well; small-pox about, otherwise district healthy.
Amritsar ...	*Nil*	Crops fair; health good.
Ferozepore ...	*Nil*	Harvest prospects good.
Lahore ...	*Nil*	Harvest prospects and health good.
Ráwalpindi ...	*Nil*	Agricultural prospects and public health fair; locusts have caused some damage.
Mooltan ...	*Nil*	Crops and health good; prices of wheat and barley have risen this week.
Dera Ismail Khan ...	*Nil*	Crops favourable; health good.
Pesháwar ...	*Nil*	Prices of wheat and barley have risen.
		General Remarks.—Harvest prospects are still fairly favourable.
Central Provinces (April 9th)—		
Nimár ...	...	Weather seasonable; health good; prices hardening.
Hoshangabad ...	...	Outturn of wheat below average, but good in quality; gram good.
Betúl ...	...	Hot; *rabi* threshing continues; small-pox in Betúl tahsil; price of rice risen.
Wardha ...	...	Heat intense; health good; prices steady.
Nágpur (April 9th)	...	Warm; *rabi* threshing continues; slight cholera and small-pox; prices steady.
Chánda ...	...	Clear; hot; *rabi* threshing continues; small-pox in places; prices stationary.
Chhindwára ...	...	Clear and warm; threshing continues; health good; prices steady.
Nasiughpur ...	...	Harvesting nearly completed; crops poor.
Bhándara (April 8th)	...	Clear; *rabi* threshing continues, outturn favourable; cholera on the eastern road; prices continue high.
Seoni ...	...	*Rabi* harvest continues; slight small-pox; prices stationary.
Bálaghát ...	...	Very hot; *rabi* cutting and threshing continue; small-pox prevalent; prices stationary.
Mandla ...	...	*Rabi* reaping continues; health good; prices stationary.
Saugor ...	...	Hot; harvesting continues; small-pox prevalent; prices rising.
Damoh ...	...	Crops reaped; outturn poor; small-pox very prevalent; prices steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central Provinces—*continued.*		
Jubbulpore ...	...	Clear; reaping and winnowing of *rabi* in progress; small-pox continues; prices slightly easier.
Raipur ...	...	Days warm, nights cool; *rabi* cutting and threshing continue; cholera and small-pox prevalent; prices steady.
Biláspur (April 5th)	...	Clear and warm; reaping finished; threshing continues, outturn good; small-pox continues; cholera abating; cattle disease prevalent; prices steady.
Sambalpur („ 4th)	...	Hot; sugarcane planting continues; cholera prevalent.
		General Remarks.—Hot; *rabi* cutting almost completed; threshing continues, outturn on the whole fair; cholera in the Eastern Districts continues, some isolated cases reported from Nágpur; small-pox in nine districts; prices steady.
British Burma (April 9th)—		
Arakan Division ...	...	Public health continues good.
Pegu Division—		
Rangoon ...	...	Twenty fatal cases of small-pox in Rangoon town; public health of the district good; slight cattle disease reported in Pegu.
Thonkwa ...	...	One death from cholera, otherwise public health good; slight cattle disease in Pyapoon and Pantanaw townships.
Bassein ...	...	Public health good.
Henzada ...	...	Public health fair; small-pox prevailing in parts of district.
Thayetmyo ...	...	General health normal; small-pox in Thayetmyo, Mindoon, Kama, and Meaday.
Tharrawaddy ...	...	Reports not received.
Prome ...	...	
Tennaserim Division—		
Amherst ...	...	Public health good; no cattle disease.
Shwegyeen ...	...	Public health good.
Tavoy (for fortnight ending March 29th)	...	Public health good; cattle healthy.
Mergui(„ „)...	...	
		General Remarks.—Health generally good; some small-pox; slight cattle disease in two districts.
Assam—		
Gauháti (April 9th)	*Nil*	Unseasonably hot and dry; sowing of rice crops not commenced for want of rain.
Sylhet („ „)	*Nil*	*Bura* rice cannot be more than half a crop; price of rice rising.
Mysore and Coorg (April 9th)—	...	Agricultural prospects favourable; prices generally stationary; public health good; for week ending 29th March—gratuitously relieved in hospitals, 208.
Hyderabad Assigned Districts—		
Amráoti (April 9th)	...	Harvest completed; weather warmer; occasionally cloudy.
Central India (April 9th)		
Indore	*Nil*	Prices of grain lower at Indore.

Remarks.

GANGES CANAL.

The total maundage of food-grains moved both ways during the month shows an increase of nearly 50,000 maunds, as compared with the corresponding period last year, and 20,000 maunds over the quantity carried during previous month.

Cotton shows an increase of 6,000 maunds over previous year's return, while salt from Moraudnugger is slightly less.

N. B.—1. The nett collections for 1874-75 cannot be separately given for Imports and Exports, as, in the Returns furnished by Local Governments, refunds on Imports and Exports are not distinguished.

2. The figures for British Burma for 1877-78 and 1878-79 include collections at Tavoy and Mergui for April to February only.

3. Realised in the Bombay Presidency on the frontiers of the Portuguese and Hubsán territory and in the Madras Presidency on the frontiers of the French Settlements.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 5th April 1879.

A. O. HUME,
Secretary to the Government of India.

SUPPLEMENT TO
The Gazette of India.

No. 17.] CALCUTTA, SATURDAY, APRIL 26, 1879.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPT. OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH,
The 22nd April 1879.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd APRIL 1879.

GENERAL REMARKS.—General prospects in Madras continue fair. In Mysore the crops are satisfactory, and the out-look is favourable; prices are stationary. The harvesting of the *rabi* is still going on in the Bombay Presidency, and in a few places preparations for *kharif* cultivation have commenced; the weather is generally hot. In some districts of the Central Provinces threshing and winnowing have been completed, and are progressing in others; the outturn is on the whole fair; prices are steady, but shew a tendency to rise; cholera still prevails in the eastern districts. Ploughing operations are being carried on in Berar. In Central India prices are rising at Indore. The *rabi* harvest is approaching completion in Rajputana. In Bengal slight rain has fallen only in Furreedpore, Jessore, Rungpore, Darjeeling, Midnapore and parts of Balasore; the want of rain continues to be felt generally; the *rabi* harvest has been completed; cholera and small-pox are prevalent. Good rain has now fallen in Assam; the price of rice in Sylhet is however reported to be rising. Public health in British Burma is generally satisfactory; cattle disease has re-appeared. The state of things in the North-Western Provinces and Oudh is on the whole fair; cholera has appeared in the northern districts. In the Punjab the *rabi* crops are being gathered in and the weather is seasonable; cholera is reported in several districts, but here, as in some other places, it is due to the return of pilgrims from the Hardwár fair. Throughout the whole of India there has been no rainfall of any volume except in Assam, and the weather appears in almost all provinces to have been exceptionally hot for the time of year.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (April 19th)	*Nil*	Rice 11·29, *cholum* 14·63, *raggi* 18·35, *cumboo* 14·83; river-level below top of anicut; *raggi* under wells and later maize are in ear and being reaped in parts.
Kurnool („ „)	*Nil*	Rice 11·25, *cholum* 16·44, *raggi* 20·94, *cumboo* 17·30; fever prevalent; cotton picking continues; 2nd crop paddy being harvested, outturn ½ to ¾; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 10·67, *cholum* 16·74, *raggi* 17·92, *cumboo* 15·07; some branches of the Cauvery contain about 6 to 12 inches of water; wet and dry crops generally in good condition; harvest of *chittaraikkaduppug*, gingelly, and chillies, outturn ⅞ to ¾.
Madura („ „)	·37 (average of 3 stations); *nil* in others.	Rice 10·62, *cholum* 18·36, *raggi* 18·33, *cumboo* 18·1.
Malabar („ „)	·67 (average of 11 stations); *nil* in others.	Rice 10·31, *raggi* 18·29; prices slightly fallen in Kurambranad, Wynaad and Walluvanad, stationary elsewhere. *General Remarks.*—General prospects fair.
Bombay (April 23rd)—		
Sind—		
Kurrachee ...	...	River slowly rising at Kotri, 4 feet 2 inches against 13 feet 11 inches last year; Western Nára commenced to flow on 11th; one case of small-pox in Manjhand; measles in all talukas of Jerruck district.
Shikarpur ...	...	River 3 feet 6 inches against 11 feet 10 inches on same date last year; cattle disease decreasing; small-pox in 10 talukas; wheat crops damaged by insects in 2 talukas.
Hyderabad ...	Slight rain on 14th	Reaping progressing; small-pox in 3 northern talukas; sky overcast; *nala* Shahadakpur river rising.
Upper Sind Frontier...	...	Weather warm; nights cool; *rabi* harvest progressing; two fresh cases of small-pox in Thul taluka.
Gujerat—		
Ahmedabad ...	...	No change.
Kaira ...	...	No change.
Surat ...	...	No change.
Broach ...	...	Four cases of cholera in Broach, one fatal; crops almost reaped; mornings cool; days warm.
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	Ditto.
Konkan—		
Tanna ...	...	Slight cholera in Bassein taluka.
Colába (April 21st)	...	Weather warm; fever in Pen; *rabi* reaping nearly finished.
Ratnágiri („ 15th)	...	Reaping of *waingani* crops continues; fever in Rájápur taluka.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Ditto.
Sholapur ...	...	Ditto.
Satara ...	...	Weather warm; slight fever in 3 talukas; cattle disease in Khánápur taluka.
Southern Mahratta Country—		
Kaladgi ...	...	Cotton picking continues; weather very hot; fields being prepared for *kharíf* cultivation; people from Nizam's country coming for employment.
Belgaum ...	...	No change.
Dharwar ...	...	No change.
Kanara ...	...	Monsoon crop preparations continue.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather hot; health generally good; cholera continues.
Wadhwan ...	...	Weather hot; health good.
Baroda ...	...	Health good; outturn of cotton better than was expected.
		General Remarks.—Weather generally hot; river rising in Sind.
Bengal (April 23rd)—		
Chittagong ...	*Nil*	Cholera in town and parts of district.
Noakholly ...	*Nil*	Weather unfavourable to general health.
Chittagong Hill Tracts...	*Nil*	
Hill Tipperah ...	*Nil*	A few cholera cases in and about Agartala.
Backergunge ...	*Nil*	Public health bad; cholera, small-pox, and fever prevalent.
Furreedpore ...	·28	Cholera and small-pox in places.
Dacca ...	*Nil*	
Tipperah ...	*Nil*	
Mymensingh ...	*Nil*	
24-Pergunnahs ...	*Nil*	Sporadic cholera in Baraset; small-pox in suburbs.
Jessore ...	·82	Cholera still in places.
Nuddea ...	*Nil*	Small-pox and cholera in several places.
Moorshedabad ...	*Nil*	Cholera still prevalent.
Pubna ...	*Nil*	Cholera and small-pox still prevalent.
Rajshahye ...	*Nil*	Cholera in several places; cattle plague appeared in some villages.
Bogra ...	*Nil*	Public health fair; cattle disease somewhat prevalent in Gohál.
Maldah ...	*Nil*	Cholera and small-pox cases still occur.
Dinagepore ...	*Nil*	Cholera and small-pox about.
Rungpore ...	·38 on 22nd	Small-pox in Bagdogra sub-division; cholera in Kurigram.
Cooch Behar ...	*Nil*	Cholera very bad, taking an epidemic form in some places.
Jalpáiguri ...	*Nil*	
Darjeeling ...	·84	
Midnapore ...	·30	Small-pox prevalent; considerable mortality.
Howrah ...	*Nil*	
Hooghly ...	*Nil*	Fever prevails in some places; cholera in Serampore; small-pox in Serampore, Boidobatty, and Utterpara.
Burdwan ...	*Nil*	
Bankoora ...	*Nil*	Small-pox increasing in Bankoora town, but mortality decreasing.
Beerbhoom ...	*Nil*	
Sonthal Pergunnahs ...	*Nil*	
Bhágalpur ...	*Nil*	Some small-pox cases, otherwise public health good.
Monghyr ...	*Nil*	Small-pox prevalent.
Purneah ...	*Nil*	
Durbhunga ...	*Nil*	
Mozufferpore ...	*Nil*	
Sarun ...	*Nil*	Public health good.
Chumparun ...	*Nil*	
Patna ...	*Nil*	
Gya ...	*Nil*	Small-pox cases in a few out-stations only; health of plough cattle generally good.
Shahabad ...	*Nil*	Cholera abating in Sasseram; small-pox still prevalent.
Hazáribágh ...	*Nil*	
Lohardugga ...	*Nil*	Small-pox prevalent.
Manbhoom ...	*Nil*	
Singhbhoom ...	*Nil*	
Balasore ...	One heavy shower confined to very narrow limits.	Cholera deaths in various quarters; a few small-pox cases reported.
Cuttack ...	*Nil*	
Pooree ...	*Nil*	Public health good.
		General remarks.—Slight rain only in Furreedpore, Jessore, Rungpore, Darjeeling, Midnapore and in places in Balasore; it is generally much wanted for standing crops and for ploughing and sowing operations; *rabi* harvest now completed; outturn not good in Noakholly, inferior in Purneah, and ten to twelve annas in Mozufferpore; prospects of *mohwa* crop in Lohardugga gloomy; *mohwa* will be also short in Hazáribágh; mango crop in Maldah will be very scanty.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N. W. P. and Oudh (April 23rd)—		
Benares (April 22nd)	...	No change.
Allahabad („ „)	...	Heat increasing; fever prevalent.
Jhánsi („ 23rd)	...	Harvest over; prices rising.
Agra („ 22nd)	...	Clouds about; sickness continues.
Bareilly („ 23rd)	...	No change.
Meerut („ „)	Slight shower on 21st	Weather unsettled; prices rather easier; cholera 58 seizures, 32 deaths.
Kumaun („ 19th)	...	Weather seasonable; pilgrims from Hardwár have brought cholera in the district.
Lucknow („ 23rd)	...	No change.
Sitapur („ „)	...	No change; prospects fair.
Fyzabad („ „)	...	No change.
		General Remarks.—No change in agricultural prospects; cholera has appeared in the northern districts.
Punjab (April 22nd)—		
Delhi ...	*Nil*	Reaping in progress; prices of food-grains still falling; cholera prevailing among pilgrims from Hardwár.
Hissar ...	*Nil*	Weather seasonable; reaping and harvesting in progress; slight fluctuations in prices of food-grains, with general tendency downwards; health good generally, but cholera among pilgrims.
Umballa ...	*Nil*	Harvest prospects fair; cholera among pilgrims.
Jullundur ...	*Nil*	Crops fair and ripe; *kharíf* sowing in progress; cholera and small-pox about.
Amritsar ...	*Nil*	Reaping in progress; rise in prices of food-grains.
Ferozepore ...	*Nil*	Harvest prospects good.
Lahore ...	*Nil*	Harvest prospects fair; health generally good, but cholera has appeared among Hardwár pilgrims.
Siálkot ...	*Nil*	Crops being cut.
Ráwalpindi ...	*Nil*	Agricultural prospects fair; public health indifferent.
Mooltan ...	*Nil*	*Rabi* crops being cut; prices of food-grains have fallen; health good.
Dera Ismail Khan ...	*Nil*	Health good; *rabi* crops being cut.
		General Remarks.—Weather seasonable for harvesting; health generally good, the out-break of cholera being confined almost entirely to pilgrims from Hardwár.
Central Provinces (April 23rd)—		
Nimár ...	...	Health good; prices slightly rising.
Hoshangabad ...	...	Threshing and winnowing nearly completed, outturn much below average.
Betúl ...	...	Very hot during day; *rabi* gathered, outturn below average; prices slightly risen.
Wardha ...	...	Harvest completed; small-pox slight; prices steady.
Nágpur (April 23rd)	...	Hot; *rabi* harvest completed; slight cholera in Ramtek tahsil.
Chánda ...	...	Clear and hot; fever slightly prevalent; prices stationary.
Narsinghpur ...	...	Threshing and winnowing continue; prices falling.
Bhandara (April 22nd)	...	Clear; very hot; winnowing completed, outturn favourable; fever and small-pox continue; prices high.
Seoni ...	...	*Rabi* threshing continues; one case of small-pox; cholera reported.
Bálaghát ...	...	Very hot; threshing continues; cholera and small-pox prevalent; prices steady.
Mandla ...	...	Threshing and winnowing continue; prices stationary.
Saugor ...	...	Very warm; harvesting almost finished; outturn very poor; small-pox increasing; prices rising.
Damoh ...	...	Threshing and winnowing progressing; small-pox prevalent; prices stationary.
Jubbulpore ...	...	Clear; small-pox continues; prices stationary.
Bilaspur (April 19th)	...	Clear and hot; threshing continues; outturn good; small-pox and cholera prevalent; prices slightly risen.
Sambalpur („ 18th)	...	Weather oppressive; no crops on ground; fever and cholera continue.
		General Remarks.—Very hot; threshing and winnowing completed in some districts and continue in others, outturn on the whole fair; cholera in eastern districts continues; prices steady and showing tendency to rise.
British Burma (April 23rd)—		
Arakan Division ...	...	Public health good; slight cholera in two townships of Akyab district.
Pegu Division—		
Rangoon ...	...	One death from cholera and five from small-pox in Rangoon town; public health of district normal; fever still prevalent; slight cattle disease.
Henzada ...	...	Public health excellent.
Bassein ...	...	Health good; 64 cattle deaths in one circle from 18th to 24th ultimo.
Tharrawaddy ...	...	Public health fair; a few cases of small-pox.
Prome ...	...	Health good.
Thayetmyo ...	...	General health normal; small-pox in four townships.
Thonkwa (April 12th)	...	Health generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Tennaserim Division—		
Amherst ...	...	Public health good.
Shwegyeen ...	...	
Toungoo ...	...	Health good; 95 buffaloes have died from small-pox in Zykwaddie township during week.
		General Remarks.—Public health generally good; a little cholera and small-pox; cattle disease re-appeared.
Assam—		
Gauháti (April 23rd)	3·2	Weather cooler; cholera in station and district; sowing of crops not yet finished.
Sylhet („ „)	1·72	Rain most welcome; price of rice rising.
Mysore and Coorg (April 23rd)—	...	Crops in good condition; prospects favourable; prices stationary; for week ending 12th April,—gratuitously relieved in hospitals, 174.
Hyderabad Assigned Districts— (April 23rd)	...	Weather hot; ploughing operations in progress.
Central India (April 23rd)		
Indore ...	*Nil*	Weather seasonable; prices rising.
Morar ...	...	No change.
Sutna ...		
Goona ...		
Rutlam ...		
Neemuch ...		
Agar ...		
Sirdarpore ...		
Mánpur ...		
Nowgong ...		
Bhopal ...		
Rajputana—		
Sirohi (April 20th)	...	Tanks dry; wells fair; health improving; crops harvested; prices falling; weather seasonable.
Marwar („ 12th)	...	Health and prospects good; heat increasing; prices stationary.
Meywar („ 18th)	...	Tanks, wells, and health good; crops gathered and being threshed.
Jhallawar („ 17th)	...	Health good.
Ajmere („ 23rd)	...	Harvest cut; weather seasonable; health good.
Jeypore ...	...	Fair harvest secured; a few cases of cholera amongst those returned from Hardwár; weather seasonable.
Bhurtpore ...	Slight rain on 21st instant.	Prices stationary.
Ulwur ...	...	Cholera reported in seven villages of Lachhmangarh tahsil; two or three deaths in each village daily.

MARINE SURVEYS—CASUALTIES AND DANGERS TO NAVIGATION.

The information contained in this Notice is to be carefully considered, to be noted in the Sailing Directions, and compared with the Chart when the ship is navigating the parts to which it refers.

Hydrographic Notice.

[No. 15.]

SOUTH INDIAN OCEAN.

SEYCHELLE, FARQUHAR ISLANDS, AND MADAGASCAR.

The following information relating to Seychelle and Farquhar islands, also to port Robinson, Madagascar (lately published at the Hydrographic Department of the British Admiralty), is derived from the remarks and surveys of Commander W. J. L. Wharton, H. M. ships *Shearwater* and *Pawn*, 1875-78:—

(*All Bearings are Magnetic. Variation in* 1879):—

Seychelle islands 4° 30′ *W.*—*Farquhar islands* 7° 20′ *W.*

Port Robinson (*Madagascar*) 9° 20′ *W.*—*Port Radama* 11° *W.*

SEYCHELLE ISLANDS.*

MAHE island—Port Victoria.—Vessels approaching port Victoria should pass all chequered buoys and beacons surmounted by balls on the starboard hand, and all black buoys and beacons with half-balls on the port hand.

Light.—A lighthouse, built of coral, 42 feet high, painted white, is situated 70 yards from the edge of the coral reef at the south side of the entrance to the harbour channel. Care must be taken not to mistake the lighthouse for a conspicuous white tower situated on the mainland shore northward of the town.

A fixed *red* light, visible 9 miles, is exhibited from the lighthouse between the bearings of South through West to N. W. ½ N., except where obscured by the adjacent islands. A red sector of light is also shown over the anchorage in port Victoria.

Night anchorage.—By means of a bearing of this light, an anchorage can be obtained at night to the north-west of St. Anne's island, whose bold peak presents a good object; but a stranger is not advised to attempt to pass the buoys; they are too small to be seen at night.

To enter Port Victoria.—On rounding the northern end of St. Anne's island, a red and white chequered buoy with staff and ball will be observed bearing W. by S., distant 1¼ miles from the north point of the island.

Pass this buoy at a distance of about 100 yards on the starboard hand, and a black buoy with staff and half-ball, which lies 2¾ cables to the south-east of the chequered buoy, on the port hand.

Steer S. W. by S. until beacon island is in line with the south point of St. Anne's island, then keep these objects in line astern, which will lead between two buoys placed on 3-fathom patches on either side of the entrance to the inner harbour channel, and will lead a vessel in until the lighthouse bears S. W. Thence the lighthouse—which, as before remarked, is 70 yards from the edge of the reef—the posts on the reef, and the eye, must be the guides to the inner anchorage.

Caution.—The posts erected on the points of the coral reef bordering the harbour channel are not unfrequently washed away and are not always promptly replaced. The buoys in the outer anchorage are very small, and are not kept painted.

A mooring buoy belonging to the Messageries Maritimes Company is placed in 12 fathoms water 4 cables N. E. by E. of the lighthouse. Vessels anchoring in the vicinity of this buoy should give it a berth of half a cable; the anchors lie east and west.

The inner harbour, a basin in the coral reef, is of irregular shape. The channel into it is 200 yards wide, and has well defined and steep edges.

With the two following exceptions the harbour is clear of detached rocks: one of 12 feet N. by E., 1¼ cables from the Long or Victoria pier end, and another of 14 feet S. E. ½ S., three-quarters of a cable from the pier. These are both small and do not generally show, but they are clear of the most convenient berths.

Position.—The observation spot on Houdouls Jetty is situated in lat. 4° 37′ 15″ S., long. 55° 27′ 23″ E., depending upon Aden (telegraph office) being in 44° 58′ 32″ E., and Rodriguez (Transit of Venus Observatory, 1874, Mathurin bay) being in 63° 26′ 15″ E.†

Pier.—Victoria pier, 1,050 yards long, is built over the shore reef to the inner harbour, and is terminated by a T head, at present used as a coal depôt. A vessel can lie alongside, but would require careful mooring to keep her off the reef, which projects under water. There are no bollards for securing.

* *See* British Admiralty charts:—Indian ocean, No. 748*b*; Seychelle group, No. 721; Approaches to port Victoria, also plan of port Victoria, No. 722; scale, *m* = 1¾ inches and 6 inches.
This notice cancels the British Admiralty Hydrographic Notice, No. 20 of 1870.

† Hydrographic Department, 1878.

Water.—Water of an excellent quality (price two shillings per ton) is conveyed by a pipe to the landing place, two-thirds of the way along Victoria pier. Boats can fill up on either side of the pier at high water, but the northern side dries at low-water springs.

Mails.—The mail steam vessels of the Messageries Maritimes Company call at port Victoria on their way to and from Aden and Mauritius once a month, except during the south-west monsoon (or from May to October), when they call only on their return voyage to Aden.

Tides.—It is high water, full and change, at port Victoria at 4h. 15m.; springs rise 5½ feet; neaps 3 feet.

PLATTE island is low, but has trees on it, and of late years cocoanut trees have grown. The island was visible from the *Shearwater's* masthead from a distance of 12 miles.*

La Perle reef.—A dangerous shoal known as La Perle reef, said to have 12 feet least water, lying to the south-west of and distant 10 miles from Platte island, was examined in 1875. The danger appeared to consist of a reef about 3 miles in length, N.W. by N. and S.E. by S., but of little width: no dry sand or rocks were visible. A small isolated patch has been reported a mile or two farther westward, but was not seen by the *Shearwater*. The vessel anchored in 7½ fathoms, 1½ miles from a long line of breakers, but the swell was too heavy to allow a boat to venture nearer the breakers than at a distance of several hundred yards, where there was 4 fathoms. The breakers were not continuous, and were observed especially in three spots about a mile apart.†

La Perle reef appears to be on the southern extreme of a bank of soundings connected with Platte island; on this bank 14 fathoms was obtained. Commander Wharton places the centre of La Perle reef in lat. 6° 1′ S., long. 55° 17½′ E., and Platte island, south end, in lat. 5° 53′ S., long. 55° 23½′ E.; Houdouls jetty, Mahé, Seychelles being in 55° 27′ 23″ E.

COETIVY island, examined by Commander Wharton in 1875, is about 5¾ miles long, 1½ miles wide, 40 feet high, and covered with cocoanut trees; it has several sand hills, but none are higher than the trees. The island is fringed by a reef which, at the south end, extends 3 miles from the shore. The reef is dry at low water, and breaks heavily; there is deep water close to its east and north sides; but on the west and south-west sides a bank of soundings, with 5 to 20 fathoms sand and coral, extends 2 to 6 miles from the shore of the island; this bank may plainly be seen.

There is anchorage anywhere on the western side of Coetivy, but the most convenient for communication is off the settlement near the centre of the island. Anchor in 10 fathoms with the huts bearing East 7 cables distant, and north-west extreme of island N.E. by N. The shore reef is broken at this part, and a boat can land on the sandy beach, but care must be taken to avoid the shoal patches which lie at a quarter of a mile from the shore.

The population, consisting of 60, are all employed by the proprietor, who exports oil to Mauritius.

POSITION.—The north end of Coetivy is in lat. 7° 6′ S., long. 56° 16¾′ E., Houdouls jetty, Mahé, Seychelles, being in 55° 27′ 23″ E.

FARQUHAR ISLANDS.‡

These islands, formerly known as Joao de Nova, are a dependency of Mauritius. The group forms an *atol* 11½ miles long in a north-east and south-west direction, but the central lagoon being shallow, with numerous dry banks and patches, affords no shelter except to small vessels. The largest islands of the group, situated on the eastern side of the reef, are low, with a few bush-covered sand hills 30 to 50 feet high. The reef which fringes the group appears tolerably steep except in the north-west part, where a sand bank of 6 to 12 fathoms, plainly visible, extends westward 3½ miles. The outer edge of the bank lies W. by N. nearly 5 miles from Trois isles; eastward of Trois isles the bank extends 3 to 8 cables from the shore, and shoals rapidly from 20 to 5 fathoms.

There is good anchorage on the bank off the entrance of the lagoon channel, except during the hurricane season, December to April inclusive. The best berth is in 7 fathoms, sand, with Race point bearing South, and the north extreme of the north island E.¼N. Here the tides run strongly the ebb to the west, flood E.N.E.; the flood is the stronger of the two streams. Little or no swell was found at this anchorage, although the sea was heavy outside. South-east winds prevail from April or October; during the remainder of the year the winds are variable.

Trois isles, on the north-west reef, are mere specks of islands bush-covered; there are really six islets, but three are bare and almost awash at low water. Goelette, on the south-east side, is low and bare, with a small sand hill. The reef extends 5 miles W.S.W. of Goelette, and 4 miles S.W. by W. of the western wooded Trois isles, where there is another shallow break in the reef.

Lagoon.—The entrance to the inner harbour is situated at the west end of the north island. The harbour is small, and, except in cases of emergency, for vessels drawing less than 10 feet practically useless, on account of the narrow crooked entrance and the rapidity of the tides. Probably the least water in the channel is 3 fathoms, but there are numerous coral heads on which the depth may possibly be less.

Tides.—It is high water full and change at 4 hours; springs rise 7 feet, neaps 5 feet.

Settlement.—The islands are at present leased by a Mauritius firm, who have about 40 people employed, and have planted a considerable number of cocoanuts. The chief settlement, named Grand Poste, is at the west end of the north island, where a stone house with a flagstaff stands on a sand hill 35 feet high.

* Lieutenant Taylor, H.M.S. *Cossack*, 1869, remarked that vessels bound to the southward from the Seychelles should not attempt to pass to windward of the islands and reefs lying between Seychelles and the north end of Madagascar, the winds being variable, the weather frequently thick and hazy, the currents strong and uncertain, apparently for a great part of the year. The *Cossack* experienced the strong westerly current very unequally, and twice in proceeding from Seychelles to Madagascar had to use steam to ensure the safety of the vessel.

† Originally published in British Admiralty Notice to Mariners, No. 39 of 1875.

‡ *See* British Admiralty chart:—Farquhar islands, No. 718; scale, $m = 0{\cdot}8$ inch.

POSITION.—The stone house at Grand Poste is in lat. 10° 6′ 45″ S., long 51° 10′ 24″ E. depending on the Martello tower, Cooper island, Mauritius being in 57° 29′ 32″ E.

Turtle and fish abound; boobies and terns breed in great numbers on the islands. Fresh water may be obtained by digging.

MADAGASCAR,—NORTH WEST COAST.*

PORT ROBINSON, about 6 miles west of cape Amber, is a snug harbour, and has the advantage of a straighter channel than either port Jenkinson or port Liverpool, which are situated immediately to the westward; the reefs on either side can be clearly seen from aloft, and the eye must be the chief guide in entering the channel, which has a depth of 9 to 12 fathoms, and is 130 yards wide at the narrowest part. The tides run strongly in the entrance but directly through the passage, which is open on a S.E. by S. bearing.

The *Fawn* found a good berth in 11 fathoms, sand and mud, with the north-west point of entrance bearing N.N.W.½W., and Rocky point W. by S; the reefs being three-quarters of a cable distant on either side. Further in there would probably be more room to turn, but this part was not examined.

Water could probably be found at all times by digging in the valley on the north-east side of the harbour.

The country in the neighbourhood of Port Robinson seems almost deserted. Herds of cattle roam over the hills and plains, but no foot-steps of men were seen, although the dry grass on the hills had recently been burnt. Wild pigs, guinea fowl, and wild fowl were seen in the neighbourhood.

Tides.—It is high water full and change at Port Robinson at 4 hrs. 15 min.; springs rise 7 feet.

CAPE AMBER.—The country about cape Amber presents a broken outline, the highest points of which are probably above 1,000 feet high: the hills are bare with the exception of the peaks, which are grass-covered; Liverpool hill is remarkable from being broader than the other hills, and from being the only wooded hill in the neighbourhood except Dark round hill. These two show dark by contrast, Robinson hills are of rounded basalt, and covered with grass.

Off cape Amber, during the south-east trade, there is a heavy sea, which gives an appearance of shoal water: but the broken water is caused by the strong westerly current round the cape meeting the tidal stream from Mozambique channel.

PORT RADAMA, Northern Approach to.—A coral reef on which H.M.S. *Vestal* recently struck lies S. ¾ W., about 6½ miles from the southern Bermabomey island, and N.N.E. ¾ E. from the centre of Erandza island. This reef uncovers at low water, and is of considerable extent; its outer edge lies nearly 3 miles from the adjacent mainland.†

Great caution is necessary in entering any of the bays in this locality.

MARINE SURVEY DEPARTMENT,
Calcutta, 3rd April 1879.

The information contained in this Notice is to be carefully considered, to be noted in the Sailing Directions, and compared with the chart when the ship is navigating the parts to which it refers.

Hydrographic Notice.

[No. 16.]

TORRES STRAIT AND NEW GUINEA SOUTH-EAST COAST.

THE following information (lately published at the Hydrographic Department of the British Admiralty) is derived from the remarks of officers of H. M. ships employed on the Australian station: received through Commodore A. H. Hoskins, C.B. Also from journals of the Reverend Messrs. Macfarlane and Chalmers, of the London mission vessels *Ellangowan* and *Bertha*, 1877-78:—

All Bearings are Magnetic. Variation in 1879.

Normandy Sound 4¾° *Easterly. Port Moresby* 6° *Easterly.*

TORRES STRAIT.—PRINCE OF WALES' CHANNEL.‡§

Ipili reef.—The small red beacon formerly placed upon a portion of wreck lying on the north-west part of this reef has disappeared.

Sunk reefs (*d*).—These reefs, lying on the north side of Prince of Wales' channel, are reported by the signalman at Goode island to extend one and a half miles farther to the westward than is shown on the Admiralty charts or to the longitude of 142° 6′ 15″ E. As these extension shoals are said to narrow Prince of Wales' channel, great care should be taken when navigating in this vicinity.

* *See* British Admiralty charts:—Madagascar, northern portion, cape St. Andrew to Antongil bay. No. 758. ports and anchorages in the vicinity of cape Amber, No. 676; scale, $m = 0{\cdot}4$ inch. Also, Hydrographic Notice, No. 31 of 1877.

† Information by Navigating Lieutenant C. H. S. Douglas, H.M.S. *Vestal*, 1878.

‡ *See* British Admiralty charts:—Australia, northern portion, No. 2759*a*; Coral sea and Great Barrier reefs, No. 2764; Australia, north and east coast, sheet 20, No. 2354; Torres Strait, north-east and east entrances, No. 2422; Torres strait, western channel, No. 2375; and Admiralty plan:—Normandy sound and Prince of Wales' channel, No. 691; scale, $m = 2$ inches: Also, Australia Directory, vol. 2, 1864, pp. 240—243; and Hydrographic Notice, No. 27 of 1875, page 2, and No. 37 of 1878.

§ Navigating Lieutenant H. S. Penn, H. M. S. *Sappho*, 1878.

Normandy sound.—The following buoys and beacons have been placed in this channel:—

A red buoy north of and close to Ghibbar rock.

A black beacon on the southern edge of the reef extending westward from Wai-weer island; the beacon lies North, distant 5 cables from the east side of Black rock.

A black buoy close off the western edge of the reef which extends west from Thursday island, west extreme.

Ellis channel.—The following buoys and beacons have been placed in this channel:—

A red buoy on Hovell rock, with Quoin point, the south extreme of Goode island, in line with Vivien point, the south extreme of Thursday island bearing W. by N. ½ N., and channel rock in line with the south-east point of Thursday island bearing N. E. ½ N.

A red beacon on the western edge of Madge reefs bearing S. E. by E. ½ E., distant 7 cables from Vivien point.

A black beacon on the eastern edge of Madge reefs bearing S.S.E., distant 7½ cables from east extreme of Thursday island.

A red buoy S. S. E. from the east extreme of Thursday island, distant 6½ cables.

A black buoy at both the east and west extremities of Hovell bank.

It is intended to place a red buoy north of the west Hovell bank buoy, distant 1½ cables.

GREAT NORTH-EAST CHANNEL.

Cocoa-nut isle.—H. M. S. *Sappho*, in 1878, anchored in 17 fathoms, with Cocoa-nut isle bearing E. ½ S., and Dove islet bearing N. N. E.

NEW GUINEA.—SOUTH-EAST COAST.*

Caution bay to Port Moresby.—Inside the Barrier reef which extends between these places the least water found by H. M. S. *Sappho* was 4 fathoms.

Basilisk passage.—Immediately inside this passage a depth of 3¾ fathoms was obtained by H.M.S. *Sappho*.

Port Moresby.—A coral reef (*Conflict reef*) awash at low water, lies S. W. by W. ½ W. from the south-west extreme of Ethel island (on the eastern side of port Moresby), distant 7 cables.

This reef is a quarter of a mile long in a north-west and south-east direction, and 200 yards broad.

The shoal lying N. by W. ½ W., distant 3 cables from Paga point, the east entrance point of port Morseby, formerly supposed to have not less than 2 fathoms water on it, appears nearly awash at low water.

Port Moresby to Round head.—H. M. S. *Sappho*, in 1878, found the channel between these places inside the Barrier reef clear of dangers, until within 5 miles of Round head, except a few sunken dangers, which were easily seen.

Round head.—This point extends about 1½ miles farther south-west than was formerly supposed; numerous sunken dangers exist in the vicinity, extending from 5 miles north of the head to about the same distance south of it.

Great care is requisite when navigating among these dangers, as, except under favourable conditions, they are not seen well from aloft.

Hood lagoon.—From the eastern entrance point of this lagoon (on which is situated the native village of Kerepunu) a reef extends W. N. W. for a distance of 3 miles, approaching the north shore of Hood bay to a distance of one mile at its western extremity.

H. M. S. *Sappho* entered the lagoon by passing north of this reef, keeping about half a mile off the shore of Hood bay, and carried a depth of 5 fathoms to the entrance of the lagoon, where anchorage was obtained in 8 fathoms, mud.

The discoloured water from Hood lagoon renders it very difficult to see the reef at the entrance from aloft. A large vessel should not attempt to enter the lagoon, as some shoals of about 2½ fathoms are situated within a mile of the entrance; anchorage in 6 or 8 fathoms water may be obtained outside these shoals under shelter of the reef.

Coast.—Between the east entrance point of Hood lagoon and Keppel point, which is situated 9½ miles to the eastward, the coast is indented by several large though inaccessible bays; and mangrove swamps, extending several miles inland, commence about 5 miles eastward of Hood lagoon, and extend round Keppel point.

Keakaro bay, from the western shore of which a reef extends nearly across to the opposite side, is situated immediately east of Keppel point.

Between Keakaro bay and Macfarlane harbour the land near the beach is sandy and dry, but farther back appears low.

Macfarlane harbour.—This name is applied to the outer expansion of Marshall lagoon. A good deep passage is said to exist leading from seaward into this harbour.

The eastern entrance point is a high bluff; on the western side of the harbour, the land is low and apparently swampy; in this harbour are situated two native villages.

Between Macfarlane harbour and Cheshunt bay the coast forms two bays.

Cheshunt bay is situated about 11 miles eastward of the entrance to Macfarlane harbour, between cape Rodney and Brethren isles, a group of five rocks covered with brushwood lying N.W.byW. from that cape, distant 4 miles. The mission vessel anchored on the eastern side of this bay.

A bank which uncovers at low water extends some distance from the shore at the head of Cheshunt bay.

* *See* British Admiralty charts:—Australia, northern portion, No. 2759*a*; Coral sea and Great Barrier reefs, No. 2764; Papua or New Guinea, sheets 5, 6, 7, and 8 Nos. 2121, 2122, 2123, 2124; and Admiralty plan:—Port Moresby, No. 2126; scale, *m* = 2·9 inches: Also, Australia Directory, vol. 2, 1864, pp. 367—378, 383, 391; and Hydrographic Notices No. 8 of 1873, No. 25 of 1875, page 6, and No. 11 of 1877.

A considerable stream, to which the name of Cheshunt river was applied, discharges into the sea at the head of Cheshunt bay; a depth of one fathom was found at the entrance, immediately inside of which the water is midchannel deepened to 3 fathoms, and maintained that depth for some distance; at about 6 miles from the entrance the depth was found to be 10 feet.

After passing the entrance points a large stream coming from the northward empties itself into a fine basin; three miles eastward of this, Cheshunt river is joined by another stream from the northward 75 yards wide, to which the name of Reynolds river was given; between these rivers the main stream is about 150 yards wide, the banks on both sides being covered with mangroves; above Reynolds river the stream is about 100 yards wide, contracting to a width of 75 yards at 6 miles from the entrance, at which position the tidal influence was still experienced.

Cape Rodney.—A shoal extends about half a mile from the shore along the southern edge of this cape, and detached coral dangers lie between it and the Barrier reef.

Between Sandbanks bay and cape Rodney the *Ellangowan*, drawing 6 feet, found a good passage inside the Barrier reef.

Sandbanks bay.—This bay is situated about 10 miles eastward of cape Rodney; the eastern side is low and formed by a long reef and sandbanks extending from a mangrove swamp; a forest of large trees lines the shore round the head of this bay, and a river (Domaru river), said to be of considerable size, falls into the bay on the western side, off the mouth of which anchorage was found in 2 fathoms at low water.

Between Sandbanks bay and Cloudy bay there is a small bight, into which a river flows.

Cloudy bay.—This bay is divided by a reef extending from Sewell island in a south-westerly direction for a distance of 4½ miles, off the extremity of which are several detached shoals; the *Ellangowan* anchored in the western portion of the bay about 2½ miles from Sewell island; at low water it dries between Eugenia islet and the main, and also between Eugenia and Sewell islands.

Colombier point, the east entrance point of Cloudy bay, is situated about 3½ miles westward of its former supposed position; several detached shoals lie south of Colombier point and in the bight immediately east of it.

Baxter bay.—Between Colombier point and Table point the coast forms two indentations, the eastern and larger of which has been named Baxter bay, where the *Ellangowan* found good shelter from the trade wind. There are several shoals in the western part of this bay.

Amazon bay.—This bay is much encumbered with shoals; coral reefs surround Amazon island. Double rock and the eastern Amazon island are also connected by a reef, between which and the western Amazon island there is anchorage for small vessels.

Amazon bay was entered from the westward by passing between the western Amazon island and the mainland.

Coast.—Between Baxter bay and Amazon bay there is a fine tract of level land, thickly wooded, extending to the inland hills, between which extensive valleys were seen.

Toulon island.—The summit of this island, covered with grass, and about 300 feet high, rises sharply from the narrow belt of low land which extends half round the island. A reef encircles Toulon island.

Mayri bay.—At the eastern extremity of Amazon bay the coast recedes and forms a fine, large bay, affording good, safe anchorage in S. E. winds.

Millport harbour, situated midway beteen port Glasgow and Mayri bay, with a depth of 3 fathoms in the entrance, apparently afforded good anchorage.

Barrier reef.—Several reefs awash are said to exist about 3 miles northward of that portion of the sunken Barrier reef lying beteen the meridians of 149° 43′ E. and 149° 50′ E.

Coast.—From the western point of Amazon bay to a few miles east of port Glasgow the hills, covered with vegetation, come boldly down to the shore; plantations are seen on the sides of many of them as high as 1,000 feet above the sea.

Between Dufaure island and Isabel cove the coast is indented by four bays, to which the names of Argyle bay, port Dudfield, Ellangowan bay, and Meikle bay have been given.

Port Dudfield is completely landlocked, with a depth of 10 fathoms in the centre, and 7 fathoms at the head.

Ellangowan bay is described as a fine bay of considerable extent.

Fyfe bay, formed between Roux islands and the mainland, afforded anchorage to the *Ellangowan* in 6 fathoms.

A shoal, with 2 fathoms water on it, is reported to lie in lat. 10° 41′ S., long. 150° 2′ E. (approx.), or S.E. ¼E. from the southern Roux island, distant 2½ miles.

Baxter harbour, at the head of Farm bay, afforded anchorage in 6 fathoms.

Stacey island.—South cape is the southern extremity of Stacey island, which is separated from the mainland by a channel one cable broad (Marri pass), in the centre of which there is a depth 9 fathoms.

H.M.S. *Sappho* in 1878 found good anchorage in 13 fathoms, about a quarter of a mile W.N.W. from the Mission Station, established on the northern point of Stacey island. A black rock, awash at high water, is situated W. by N. ¼N., distant 4½ cables from the extremity of this point.

Bertha lagoon, of considerable extent, is situated immediately north of Stacey island; in many places it is too shallow even for a boat, but on the western side a channel was found sufficiently deep to admit of the *Ellangowan* proceeding as far as the village, close to which a river falls into the lagoon.

Tiesot island.—A sunken danger is reported to exist N.W., distant half a mile from the north-west extremity of this island.

Tests island.—At the west extreme of East islet there is a lagoon about 2 miles long and one broad, with two entrances, one a quarter of a mile wide, and from 4 to 9 fathoms deep, with a rock in the centre, which may be passed on either side. The other entrance is too narrow to be available for any but small vessels. In the lagoon there are numerous shoals, but good anchorage with shelter from any wind may be obtained near the entrance.

China strait.—A sunken rock (*China rock*), which seldom breaks, is reported to lie in the northern part of this strait, with Paplas island bearing S.S.W., distant 1½ miles, and the centre of Didymus island S.E.¾S., distant 2 miles.

Heath island.—H.M. schooner *Conflict* anchored in the bay, on north-east side of this island, in 9 fathoms, sand, with Dinner island bearing N.5°E. and Peninsular point (Hayter island) bearing N.60°E.

On approaching this anchorage from seaward the soundings gradually decrease from a depth of 17 fathoms, sand.

The bay affords good shelter from S.E. winds; a missionary station has been established here.

Moresby island.—A sunken danger, on which there is a depth of 3 fathoms, is situated about two-thirds of a mile from the shore, on the north side of Moresby island. From the shoal cape Lookout bears S.39°E., distant one mile, and Pitt island S.59°W., distant three-quarters of a mile.

LOUISIADE ARCHIPELAGO.*

Calvados chain.—A shoal of coral ground, with 13 or 14 fathoms water upon it, lies 2¾ miles south of the south-west extreme of Stanton island. From the shoal Huxley island summit bears N.84°E., distant 5 miles, and summit of Mewstone N.53°W., distant 9¾ miles.

A sunken danger, with 3 fathoms upon it, lies 5¾ miles S S.E. from the east extreme of Stanton island. From the shoal Huxley island summit bears N.3°E., distant 3½ miles, and summit of Mewstone N.62°W., distant 11 miles.

A shoal of coral ground, on which the bottom was clearly seen, is situated 1¾ miles S.¾W. from Robinson island south extreme. From the shoal Quoin rock bears N.35°W. distant 3½ miles, and Kalouma island, west extreme, N.50°E. distant 4 miles.

Joannet island, N.W. bay.—From the north side of the small island situated in the centre of this bay a sandy spit, about 20 yards wide, and dry at low water, extends north for some distance.

This spit, together with numerous reefs, completely block the channel between the island and the north shore of the bay.

Sud-est island.—A shoal, on which the bottom was clearly seen, is situated about 3 miles from the south-west point of Sud-est island, with Bousquet point bearing N.37°W., distant 7 miles, and mount Rattlesnake bearing N.45°E.

RAILWAY.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 2nd QUARTER of 1878.

Circular No. 10 R., dated Fort William, 12th March 1879.

Read again—

Public Works Department Circular No. 4 R of 6th February 1879.

Read also—

Returns of accidents to trains, &c., on railways open for traffic in India for the 2nd quarter of 1878.

OBSERVATIONS.—*Part I.—Accidents to Trains, Rolling Stock, Permanent Way, &c.*—The total casualties resulting from accidents to trains, &c., during the quarter ending 30th June 1878, were among passengers 6 injured, and among servants 5 killed and 10 injured. The casualties to passengers occurred on the Oudh and Rohilkhand Railway, and were nearly all due to an accident which

was caused by a mail train being turned into a wrong line, and coming into collision with a dead mud buffer. The injuries sustained were very slight. In another collision on the Oudh and Rohilkhand Railway, 4 servants were killed and 3 injured.

There were 3 collisions between passenger trains or parts of passenger trains; 13 collisions between passenger trains and goods or mineral trains, engines, or vehicles standing foul of the line by which 1 servant was injured; 18 collisions between goods trains or parts of goods trains, by which 4 railway servants were killed and 4 injured; 4 collisions between light engines, causing injury to one railway servant; 9 cases of passenger trains or parts of passenger trains leaving the rails; 112 cases of goods trains or parts of goods trains, engines, &c., leaving the rails; 12 cases of trains or engines travelling in the wrong direction through points, by which 5 passengers and 1 servant received slight scratches; 2 cases of trains running into stations or sidings at too high a speed; 224 cases of trains running over cattle; 20 cases of trains running over obstructions; 11 cases of trains running through level crossing gates; and 7 cases of bursting of boilers, tubes, &c., of engines. There were 22 failures of engine machinery, 3 of tyres, 28 of axles and 19 of couplings.

There were 13 cases in which axles failed on the Great Indian Peninsula Railway and 10 on the East Indian Railway. The casualties resulting from this class of accidents were 2 servants injured.

There have also been reported 4 cases of broken rails; 4 cases of flooding of portions of permanent way by which 1 servant was killed and 1 injured; 10 cases of slips in cuttings and embankments; 79 cases of fire in trains; 8 cases of fire at stations or involving injury to bridges or viaducts; and 140 other accidents.

As observed in the returns for the first quarter of 1878, the number of miscellaneous accidents is the largest on the East Indian Railway, *viz.*, 107, and they consist chiefly of points being damaged. It has already been laid down in Public Works Department Circular No. 4 R of 6th February 1879, that such accidents, as damage to points resulting in no further mischief, should be excluded from the returns.

The total number of accidents of all descriptions included in Part I was 752 against 733 during the previous quarter, and the number of persons killed and injured thereby were 5 and 16 against 3 and 4 respectively.

It is observed that the derailment of a wagon on the Rajputana State Railway on the 21st June, caused by a stone being placed on the line, has been classified under heading 6 of the key to Part I. This accident should have been shown under heading 10, "Trains running over obstructions on the line."

The case in which the feed pipe of the engine of a mail train was bent on the Northern Bengal Railway on the 21st April, in consequence of its running over a bullock, should have been excluded from the return of trains running through level crossing gates over cattle or other obstructions as required by the heading of the return and entered in the general return.

Part II.—Accidents to passengers from causes other than accidents to trains, &c., persons passing over level crossings, trespassers and others.—There was 1 passenger killed and 14 injured, of whom 1 was injured by falling between carriages and platforms; 1 killed and 1 injured by falling when getting into or out of trains; 1 injured by the closing of carriage doors; 8 injured by falling out of carriages during the travelling of trains; and 3 injured through other causes. Of other persons included in this part of the return 3 were killed and 4 injured whilst passing over railways at level crossings; 29 killed and 10 injured while trespassing on the line; 12 were suicides; and 5 killed and 3 injured from miscellaneous causes.

As compared with the first quarter of 1878, the number of passengers killed shows a decrease of 4, and the number of passengers injured an increase of 5.

Part III.—Accidents to servants in the employ of railways or of contractors whilst performing duties connected directly with the transit of passengers and goods.—Out of a total of 36 killed and 77 injured, 4 were killed and 12 injured during shunting operations; 6 killed and 14 injured by falling off engines, &c.; 1 injured by coming in contact, while shunting, with vehicles, &c., standing on adjoining lines; 4 killed and 5 injured while getting in or out of trains, engines, &c.; 4 injured while loading, unloading or sheeting; 1 killed whilst breaking, spragging or chocking wheels; 1 injured whilst working at cranes or capstans; 1 injured whilst working on the permanent way or in sidings; 3 killed whilst walking along the lines on the way home or to work; 4 killed and 5 injured whilst walking, crossing or standing on the line; 2 killed whilst passing between vehicles; 2 injured whilst attending to the machinery of engines; 1 injured by falling or being caught between vehicles and platforms; 2 injured by falling off ladders, scaffolds, &c., 4 killed and 5 injured whilst coupling or uncoupling vehicles; and 8 killed and 24 injured from miscellaneous causes.

As compared with the previous quarter, the number killed shows an increase of 2, and the number injured an increase of 12.

The totals of persons killed and injured from causes connected with the working of trains on all railways were as follows:—

	Killed.	Injured.
PASSENGERS—		
From causes beyond control	...	8
„ misconduct or want of caution	1	12
SERVANTS—		
From causes beyond control	15	30
„ misconduct or want of caution	26	57
Persons passing at level crossings	3	4
Trespassers (including suicides)	41	10
Other persons	5	3
TOTAL ...	91	124

In addition to the above, 25 persons were killed and 44 injured in yards, workshops, &c. There have also been reported 103 deaths of passengers in carriages and at stations, due largely to their undertaking journeys when in bad health.

RESOLUTION.—Resolved that the attention of the authorities concerned be invited to the remarks with regard to the classification of certain accidents noted above and to the large number of miscellaneous accidents on the East Indian Railway.

Madras.
Bombay.
Bengal.
North-Western Provinces and Oudh.
Central Provinces.
British Burmah.
Hyderabad.
Consulting Engineers to the Government of India for Guaranteed Railways.
Directors of State Railways.

ORDER.—Ordered, that this Resolution be communicated to the Governments, Administrations and Officers noted in the margin, for information and guidance, together with copies of the returns compiled.

Ordered also, that these papers be forwarded to the Department, Government and Administrations marginally noted for information, and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

TABLE No. 4.

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c., on the several Railways open for Traffic in INDIA during the Second Quarter of 1878, distinguishing the different CLASSES of ACCIDENTS, the Number of Passengers and others, and the Number of Railway Servants KILLED or INJURED thereby.

	RAILWAYS.	1.—Collisions between passenger trains, or parts of passenger trains.	2. Collisions between passenger trains and goods or mixed trains, or engines and vehicles standing foul of the line.	3. Collisions between goods trains, or parts of goods trains.	4. Collisions between light engines.	5. Passenger Trains, or parts of passenger trains, leaving the rails.	6. Goods trains, or parts of goods trains, engines, &c., leaving the rails.	7. Trains or engines travelling in the wrong direction through points.	8. Trains running into stations or sidings at too high a speed.	9. Trains running over cattle on the line.	10. Trains running over obstructions on the line.	11. Trains running through gates at level-crossings.	12. The bursting of boilers or tubes, &c., of engines.	13. The failure of machinery, springs, &c., of engines.	14. The failure of tyres.	15. The failure of wheels.	16. The failure of axes.	17. The failure of brake apparatus.	18. The failure of couplings.	19. The failure of tunnels, bridges, viaducts, culverts, &c.	20. Broken rails.	21. The flooding of portions of permanent-way.	22. Slips in cuttings or embankments.	23. Fire in trains.	24. Fire at stations, or involving injury to bridges or viaducts.	25. Other accidents.	Total all Classes.	Number of Passengers and Others.		Number of Servants.		Total all Classes.		Mean miles of Railway open.	Number of Passengers carried.	Train mileage of all descriptions.	Passenger mileage.	Per Mile Open.			Total Passengers.			
																												Killed.	Injured.	Killed.	Injured.	Killed.	Injured.					Number of passengers carried.	Train mileage of all descriptions.	Passenger mileage.	Per Million of Passengers.		Per Million of Passenger Miles.

Allahabad,
The 3rd April 1879.

G. H. D. WALKER,
Asst. Secy. to Govt., N.-W. P., P. W. D., I. B.

Remarks.

GANGES CANAL.

The upward movement of grain continued throughout the month, and the returns show about the same quantity carried as was moved during January. The bulk of the juár boated was for Meerut and stations above that point.

There is a considerable decrease in the cotton trade, and a corresponding increase in the salt traffic from Muradnagar.

There is not much change in the raft traffic as compared with the previous month's returns.

A. O. HUME,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 29th APRIL 1879.

GENERAL REMARKS.—General prospects in Madras are fair. In Mysore the standing crops are good; prices remain stationary. In the Bombay Presidency slight rain has fallen in the Kurrachee, Hyderabad, Belgaum, and Dharwar districts; the *rabi* harvest is nearly over, and preparations for the cultivation of the *kharif* are general; in the Upper Sind Frontier food-grains are selling at famine rates, and forage is scarce. The *rabi* harvest has been completed in some districts of the Central Provinces, and is progressing in others; the results are generally fair; in a few districts ploughing for the *kharif* has commenced; prices continue steady; cholera is abating. Prices are still rising in Central India. In Rajputana matters are, on the whole, satisfactory. Ploughing operations continue in Berar. In Bengal, though the slight rain that has fallen in a few districts has done some good, the prospects of the crops and cultivation generally are not encouraging; owing to continued drought the results of the spring rice harvest which has begun in places are not expected to be good; cholera and small-pox are still prevalent. Heavy rain fell in Assam, and the station of Gauhati was visited by a cyclone on the 28th April; the rain has been of much benefit, but in Sylhet a great part of the *bura* rice has altogether failed; public health in British Burma is, on the whole, good; small-pox prevails in places, and cattle disease is reported in three districts. The weather in the North-Western Provinces and Oudh is seasonable, and the state of things generally fair; relief-works have been opened in one pargana of the Jhansi district; cholera is decreasing. In the Punjab the harvest is progressing with generally satisfactory results; cholera continues in several districts.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (April 26th)	*Nil*	Rice 11·43, *cholum* 14·29, *raggi* 18·65, *cumboo* 14·29; *dalwa* paddy in Kolair lands, and *raggi* and tobacco under wells doing well; later maize, *raggi*, cotton, and tobacco being harvested in some taluks.
Kurnool („ „)	·40 in Nandikotkur	Rice 11·15, *cholum* 16·44, *raggi* 20·89, *cumboo* 17·27; cotton picking continues; second crop paddy being harvested, outturn ½ to ¾; fodder and water ample.
Tanjore („ „)	*Nil*	Rice 10·78, *cholum* 18·90, *raggi* 18·19, *cumboo* 15·07; some branches of the Cauvery contain about 6 to 18 inches of water; wet and dry crops, though generally in good condition, require rain in 3 taluks; harvest of *chittraikkadappu*, *cholum*, *gingelly*, and chillies, outturn ⅜ to ¾.
Madura („ „)	·80 (average of 6 stations); *nil* in others.	Rice 10·62, *cholum* 18·08, *raggi* 18·33, *cumboo* 17·41.
Malabar („ „)	·62 (average of 3 stations); *nil* in others.	Rice 10·23, *raggi* 18·82; prices slightly risen in Walluvanad, fallen in Palghaut, stationary elsewhere; sowing of first crop begun generally; pasture scanty.
		General Remarks.—General prospects continue generally fair.
Bombay (April 30th)—		
Sind—		
Kurrachee ...	·23 in Kohistan on 14th.	River on 26th, 5 feet 1 inch, last year 14 feet 2 inches on same date; small-pox in Mánjhand; measles in 4 talukas; *kharif* preparations and sowings progressing; 7 or 8 shocks of earthquake in Dadu on 25th—duration 3 or 4 minutes; much fever about.
Shikarpur ...	...	River 3 feet 5 inches, against 11 feet 2 inches on same date last year—unusually low for time of year.
Hyderabad ...	·58 on 29th	Hail with rain; small-pox in 4 talukas; *rabi* nearly reaped.
Upper Sind Frontier...	...	Weather warm and close; nights cool; *rabi* harvesting continues; *sarsu* reaped; *battai* in progress; food-grains at famine rates; forage scarce.
Guzerat—		
Ahmedabad ...	...	Weather warm; manuring operations progressing in some talukas; general health good; slight cholera in Gogo and Dhandhuka, in city one death.
Pánch Mahála ...	...	Weather clear and very hot.
Kaira ...	...	Weather getting warmer; cotton picking nearly over; public health good.
Broach ...	...	Two cholera cases in Broach, one fatal; no fresh cases of dropsy; weather very hot.
Surat ...	...	One death from cholera in Olpád; in some places *jowari* crops reported to be lost now thriving.
Khandesh and Násik—		
Khandesh ...	...	No change.
Násik ...	...	Ditto.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—*continued.*		
Konkan—		
Colába (April 28th)	...	Weather warm; fever in Pen; *rabi* reaping nearly finished.
Ratnágiri(„ 22nd)	...	Reaping of *waingáni* rice crops almost completed; 5 deaths from fever in Málwan taluka.
Deccan—		
Poona ...	...	No change.
Ahmednagar ...	...	Ditto.
Sholapur ...	...	Ditto.
Satara ...	...	Weather warm; slight fever in 3 talukas; cattle disease in Khánápur taluka.
Southern Mahratta Country—		
Kaladgi ...	...	Cotton picking almost completed.
Belgaum ...	·73 in Belgaum ·20 in Chikodi ·97 in Gokák	Fever in Gokák; large numbers of beggars in Athni; 2 large flights of locusts through Bidi taluka.
Dharwar ...	Slight rain in 4 talukas.	*Rabi* harvest nearly over; tillage commenced.
Kanara ...	...	Agricultural operations continue; public health satisfactory.
Kattywar and Gaekwar's Territory—		
Rájkot ...	...	Weather hot; fever prevails in many Holkar talukas; cholera at Songarh and some surrounding villages.
Wadhwan ...	...	Weather hot; public health good.
Baroda ...	...	Health good.
		General Remarks.—Showers in Kurrachee, Hyderabad, Belgaum, and Dharwar districts; heat elsewhere great; preparations for monsoon sowings general.
Bengal—(April 30th)		
Chittagong ...	·7	
Noakholly ...	*Nil*	Weather unfavourable to general health.
Chittagong Hill Tracts...	*Nil*	
Hill Tipperah ...	*Nil*	Cholera still prevails.
Backergunge ...	*Nil*	In Sudder and Perozepore sub-division cholera and small-pox still prevalent; cattle disease also appeared in Patoakhally and Bhola sub-divisions; public health fair.
Furreedpore ...	·67	
	Goalundo ... 2·05	
	Madareepore ·10	
Dacca ...	·21	
Tipperah ...	1·0	
Mymensingh ...	·91	
24-Pergunnahs ...	*Nil*	Sporadic cholera and small-pox cases in suburbs.
Jessore ...	*Nil*	Cholera still somewhat prevalent.
Nuddea ...	*Nil*	Cholera and small-pox prevailing.
Moorshedabad ...	*Nil*	Cholera in several thanas.
Pubna ...	1·34	Public health still not good; small-pox and cholera remain.
Rajshahye ...	·92	Cholera, small-pox, and cattle plague still reported.
Bogra ...	*Nil*	
Maldah ...	*Nil*	Cholera and small-pox cases still occur.
Dinagepore ...	*Nil*	Sickness increasing all over district.
Rungpore ...	·38	Small-pox still prevalent in Bagdogra, and cholera in Kurigram sub-division.
Cooch Behar ...	*Nil*	Cholera still very bad.
Jalpáiguri ...	·69	
Darjeeling ...	·67	
Midnapore ...	·23	Small-pox still prevalent, causing considerable mortality.
Howrah ...	*Nil*	
Hooghly ...	*Nil*	Fever and small-pox in some places.
Burdwan ...	·43	
Bankoora ...	·43	
Beerbhoom ...	·15	
Sonthal Pergunnahs ...	*Nil*	
Bhágalpur ...	*Nil*	
Monghyr ...	*Nil*	Small-pox prevalent.
Purneah ...	*Nil*	
Durbhunga ...	*Nil*	Small-pox raging in places; general health fair.
Mozufferpore ...	*Nil*	
Sarun ...	*Nil*	Small-pox prevalent at Sudder station.
Chumparun ...	*Nil*	
Patna ...	*Nil*	
Gya ...	*Nil*	Small-pox still prevalent.
Shahabad ...	*Nil*	Small-pox continues; cholera at Sasseram abating.
Hazáribágh ...	*Nil*	
Lóhardugga ...	*Nil*	Small-pox still prevalent.
Manbhoom ...	*Nil*	

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*continued.*		
Singhbhoom ...	*Nil*	
Balasore ...	·83	Cholera deaths in many villages, especially in north; foot-and-mouth disease among cattle in places in south.
Cuttack ...	*Nil*	
Pooree ...	*Nil*	Public health good.
		General Remarks.—Slight rain in places has done some good; owing to long drought prospects of crops and cultivation generally unfavourable; *rabi* crops now being harvested in Noakholly, outturn indifferent; spring rice harvest commenced in places, outturn on the whole not expected good; cholera and small-pox prevalent in several places.
N. W. P. and Oudh (April 30th)—		
Benares (April 29th)	...	No change.
Allahabad („ „)	...	
Jhánsi („ 30th)	...	Relief works started in Pargana Moth on 16th; weather seasonable.
Agra („ 29th)	...	Heat increasing; fever prevalent; cholera decreasing.
Bareilly („ 30th)	...	No change.
Meerut („ „)	...	Hotter; cloudy occasionally; harvest completed, outturn 10 annas; cheapest wheat grain 17¾ seers; *jowar* 22½ seers; cholera 73 seizures, 28 deaths.
Lucknow („ „)	...	No change.
Sitapur („ „)	*Nil*	Prospects fair.
Partabgarh („ 28th)	...	Heat on the increase; prices rising; early *sawan* being cut, the later *sawan* irrigated.
Fyzabad („ 30th)	...	No change.
		General Remarks.—Weather seasonable; cholera decreasing.
Punjab (April 29th)—		
Delhi ...	...	Reaping in progress; slight fluctuations in prices of food-grains; cholera prevailing.
Hissar ...	...	Harvesting still in progress; weather seasonable; prices of food-grains stationary; several fatal cases of cholera in the division, chiefly among the returning pilgrims.
Umballa ...	...	Crops harvested; cholera prevailing.
Jullundur ...	...	Crops being gathered; cases of cholera and small-pox frequent.
Amritsar ...	...	Crops being reaped; prices of wheat and barley falling; several cases of cholera.
Ferozepore ...	...	Harvest prospects good.
Lahore ...	...	Crops average; health generally good.
Siálkot ...	...	Crops being cut.
Ráwalpindi ...	...	Crops about average; cases of cholera have occurred.
Mooltan ...	...	*Rabi* crops under sickle; prices of food-grains falling; health good.
Dera Ismail Khan ...	...	Crops being cut and threshed; prospects good; health good.
Peshâwar ...	...	Slight fluctuations in prices of food-grains.
		General Remarks.—Rainfall at above stations *nil*; weather continues seasonable for harvesting crops.
Central Provinces (April 30th)—		
Nimár ...	...	Heat increasing; small-pox continues; prices steady.
Hoshangabad ...	...	Hot; harvest over; small-pox continues; prices stationary.
Betúl ...	...	Very hot; outturn of *rabi* below average; wheat imported from Hoshangabad; health good; prices stationary.
Wardha ...	...	Harvest over; ploughing for *kharif* commenced; small-pox slight; prices steady.
Nágpur (April 30th)	...	Hot and cloudy; harvest completed; ploughing for *kharif* commenced; cholera abating.
Chánda ...	...	Hot; harvest almost completed; few cholera cases; prices stationary.
Narsinghpur ...	...	Harvest completed; outturn of wheat below average; gram fair.
Seoni ...	...	*Rabi* harvest continues; few cholera cases reported; prices stationary.
Bálaghát ...	...	Hot; cloudy; *rabi* threshing and winnowing continue; prices stationary.
Mandla ...	...	Harvesting and threshing continue; health good; prices falling.
Saugor ...	...	Hot; *rabi* threshing and winnowing continue; small-pox increasing; prices rising.
Damoh ...	...	Winnowing continues; health good; prices steady.
Jubbulpore ...	...	Clear; small-pox continues; prices slightly risen.
Raipur ...	...	Warm; harvest completed; cholera and small-pox continue; prices slightly fallen.
Bilaspur (April 26th)	...	Hot; clear; *rabi* outturn good; cholera and small-pox continue; fever slightly prevalent.
Sambalpur („ 25th)	...	Cloudy and close; fever, small-pox and cholera prevalent.
		General Remarks.—Hot; *rabi* harvest completed in some districts and progressing in others, outturn continues on the whole fair; cholera abating; prices generally steady.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma (April 30th)—		
Arakan Division ...	...	Public health continues good.
Pegu Division—		
Rangoon ...	...	Twelve deaths from small-pox in Rangoon town; 2 deaths from cholera in district, otherwise public health good.
Thonkwa (April 19th)	...	One death from cholera; 5 cattle-deaths in one circle; public health good.
Bassein ...	...	Health of town good; small-pox prevalent in Yaigyee and Thaboung; cattle disease, 247 deaths in Laymyetna township in February and March, 754 in Yaigyee from 24th February to 7th April, 22 in Kyoonpyaw from 16th February to 7th March, and 112 in Thaboung from 21st March to 22nd April.
Henzada ...	...	Public health good; 3 fatal cases of small-pox in Kyankheng.
Tharrawaddy ...	...	General health good; small-pox prevalent.
Prome ...	...	Health generally good; 2 cases of small-pox in Prome town.
Thayetmyo ...	...	General health normal; small-pox in Thayetmyo, Mindoon, Kama and Myadai.
Tenasserim Division—		
Amherst ...	...	Public health good; no cattle disease.
Shwegyeen ...	...	Public health fair.
Toungoo ...	...	Public health good; 59 deaths from cattle disease in Zeywadee township.
Tavoy (April 12th)	...	Public health good.
Mergui („ „)	...	Ditto.
		General Remarks.—Health generally good; small-pox prevalent in places; cattle disease in three districts.
Assam—		
Gauhâti (April 30th)	2·0; heavy rain during week.	At 7-30 P.M. on 28th a cyclone passed over the station, the wind veering round first from south, then east, and lastly north; cholera still bad; rain has done much good; sowing of *aus* crops continued.
Sylhet („ „)	3·34	Much *bura* rice has failed altogether; cultivation for *aman*, *sâil* and *aus*; tea prospects better.
Mysore and Coorg (April 30th)—	*Nil*	Standing crops in good condition; prices stationary; State relief entirely stopped.
Hyderabad Assigned Districts—		
Amráoti (April 30th)	...	Weather very hot; ploughing operations continued.
Central India (April 30th)		
Indore ...	...	Weather warm; prices rising.
		General Remarks.—Health good throughout Central India.
Rajputana—		
Sirohi (April 27th)	...	Tanks dry; wells fair; health good; occasionally cloudy and clear, alternating with breezes; season variable, somewhat irregular.
Marwar („ 19th)	...	Supply sufficient; health and crops good; weather seasonable; prices falling.
Meywar („ 25th)	...	Tanks, wells and health good; threshing of crops being carried on; weather seasonable.
Harowtee („ 19th)	...	Health good; weather cloudy and sultry.
Jhallawar („ 24th)	...	Health good; weather seasonable.
Ajmere („ 30th)	...	Prices still remain high; few cases of cholera.
Jaypore ...	...	Prospects good; weather seasonable.
Bhurtpore ...	...	Hot winds; health good; harvesting over.
Dholpur ...	A few cents rain in 2 tahsils.	Cholera in 42 tahsils, 2 fatal cases in each daily; hot wind.

THE ITALIAN GENERAL TARIFF.

No. 38, dated India Office, London, the 20th March 1879.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I FORWARD herewith, for the information of Your Excellency's Government, six copies of a Table showing the alterations which have been made in the Italian General Tariff in consequence of the new Treaty of Commerce between Italy and Austria-Hungary.

Duties on Importation into Italy.

No.	Denomination of the Goods.	Unit upon which the Duties are Calculated.	Treaty Tariff of December 27, 1878, between Italy and Austria-Hungary.	Italian General Tariff of May 30, 1878.	Treaty Tariff of 1867 between Italy and Austria-Hungary.
			Fr. c.	Fr. c.	Fr. c.

Resolution by the Government of India, No. 1 (Agriculture and Horticulture), dated the 4th February 1879.

RESOLUTION—The Governor General in Council has read with interest the Report transmitted by the Government of the North-Western Provinces and Oudh on the Administration of the Department of Agriculture and Commerce in that province for the year 1877-78. This Report shows in a clear and concise manner the important work performed by the Department at the several farms, public gardens, and estates under the Court of Wards in the province in connection with agricultural projects and improvements, as well as in the collection of agricultural and commercial statistics and the promotion of trades and manufactures. His Excellency in Council is glad to be able to express entire acquiescence in His Honour the Lieutenant-Governor and Chief Commissioner's estimate of the great value of the work being done under Mr. E. C. Buck's direction, and to endorse strongly His Honour's commendation of Mr. Buck's ability and industry.

2. His Excellency in Council desires to take this opportunity of inviting the attention of other Local Governments and Administrations to this interesting Report, as an illustration of what results can be achieved by an intelligent supervision and direction of agricultural improvements in a province.

ORDER.—Ordered, that the foregoing Resolution, with the letter from the Government of the North-Western Provinces and the Report under notice, be published in the Supplement to the *Gazette of India*, and communicated to the Local Governments and Administrations noted in the margin, in continuation of the Resolution of the Government of India No. 1 (Agriculture and Horticulture), dated the 4th February 1879, on the subject of imparting to the agricultural community the lessons to be learnt from the operations of model and experimental farms.

		Resident at	Hyderabad.

No. 616, dated Allahabad, the 19th March 1879.

From—C. ROBERTSON, Esq., Secy. to the Govt., North-Western Provinces and Oudh,

To—The Secy. to the Govt. of India, Dept. of Revenue, Agriculture and Commerce.

IN accordance with the orders contained in your No. 240, dated 23rd August 1878, I am desired to forward, for the information of His Excellency the Governor General in Council, a Report by the Director of Agriculture and Commerce in these Provinces on the Administration of his Department for the past year.

2. The Report speaks for itself as to the nature and extent of the operations Mr. Buck is engaged in. Reports under the principal heads have already been submitted to Government, and orders passed thereon. Mr. Buck will be asked to refer separately any point which has not been already disposed of.

3. The summary given in the present Report is short and concise, but suffices to show that much valuable work is being done and information acquired. Sir George Couper takes this opportunity of recording his appreciation of the zeal,

talent, and industry Mr. Buck has brought to bear on the discharge of the multifarious duties entrusted to him, and of the highly important services he is rendering to the Administration of these Provinces.

No. 616½.

COPY forwarded to Mr. Buck, with the request that he will refer separately any point on which he is desirous of obtaining the orders of Government.

REPORT ON THE ADMINISTRATION OF THE DEPARTMENT OF AGRICULTURE AND COMMERCE, NORTH-WESTERN PROVINCES AND OUDH, FOR THE YEAR 1877-78.

THE work under this Department is divided under the following heads:—

I.—Agriculture.
II.—Commerce.
III.—Village records.

I.—Agriculture includes the following sub-divisions:—

(*A*) Farms and public gardens.
(*B*) Arboriculture.

(*A*) FARMS AND PUBLIC GARDENS.

These are now connected with this Department:—

(1) The botanical gardens—one at Saháranpur and two at Mussoorie (under one superintendence).
(2) An experimental and arboricultural farm at Cawnpore.
(3) A sewage farm at Allahabad.
(4) The horticultural and arboricultural gardens at Lucknow.
(5) A tobacco farm at Gházipur, with a branch at Pusa in Bengal.
(6) An orchard and tobacco plantation in Kumaun.
(7) A seed and stock farm in the Dún.
(8) A silk farm in the Dún.
(9) Farming operations under the Court of Wards.

Separate reports have been submitted during the year on the working of the above institutions, and it is not necessary for me to do more now than supply a brief abstract of their operations.

(1) *Botanical Gardens at Saháranpur and Mussoorie.*

THE SAHARANPUR BOTANICAL GARDENS.

These are not under my executive charge; but I am required to keep Government informed of progress in the gardens, and bring to the notice of Government any points in connection with them which require Government orders.

General character.

Mr. Duthie joined as successor to Dr. Jameson at the beginning of 1877. Mr. Nisbet, head-gardener, having held temporary charge for a year and a half, after continued ill health, died during the year. A report has already been sent up to Government on these gardens, and I need not now re-enter into details which were then given. During the year I visited the gardens more than once, and, as I had to make them my head-quarters for a month while preparing a collection for the Paris Exhibition, learned a great deal about their capabilities, and have in the special report described the operations of the year. I take the opportunity now to discuss a little more fully the character which the gardens have assumed, and the work which I think they ought to perform, since it will be easier from a general report like that now under submission to judge of the position which they bear in relation to other kindred institutions maintained by Government than in a special account describing these gardens alone.

SAHARANPUR BOTANICAL GARDENS.

In the first place, their net cost is large (Rs. 25,000); and in 1877-78 I was asked by Government whether the expenditure could be cut down. I objected on the grounds that it would be a pity to take any hasty action in diminishing the capabilities of the only scientific institution of the north of India which had become historical, and which I believed had done, and was doing, a great deal of practical good in the distribution of trees and plants, in addition to the scientific ends which it served. His Honour allowed these pleas to be admitted.

Its objects.

The botanical collection which Saháranpur possesses is valuable, and must be maintained. It is being, and will be, increased under the skilled management of Mr. Duthie, whose scientific attainments are exceptional. In this direction it is due to the dignity of the Province to maintain what is a national heirloom, and to grant ungrudgingly the funds required for the purpose. During the year, Mr. Duthie, in agreement with me, considered it desirable to clear out the plantations and drain the grounds, and the improvements which were effected were mainly defrayed from the sale of felled timber. The botanical collection was at the end of the year in a much better condition—I may almost say a better state of health—than at the beginning, and a fresh start can now be made. The objects with which the botanical collection is maintained are, I conceive, to collect North India products for examination and arrangement, and also to ascertain what useful products from other parts of the world can be successfully grown in the north of India, and not to make a scientific collection of plants from all parts of the world, as at Kew. The first object is one which chiefly concerns the Superintendent; the second is one in which this Department, as representing agricultural and economic interests, is specially concerned; and during the year I impressed upon the Superintendent the desirability of increasing the utility of the gardens in this direction. It seemed to me that a very great deal of action was still required.

Flower garden.

Next to expenditure on the objects above noted, which are the legitimate work of the botanical gardens, comes expenditure on laying out the grounds. Here I judged that much of the expenditure was, under existing conditions, unnecessary. There is no public, as at Calcutta or London, for whom to make scenic effects, and money spent on raising beds of annuals and roses is wasted, if no other object is served than to beautify the gardens. There is not a native gardener in the place who understands flower-gardening, and a very large number of hands are employed to no purpose. The only plea for maintaining a flower garden at all is for training gardeners for supply to the number of India or for propagating Indian plants; and these objects cannot be effected without a practical and well-trained English gardener in charge. Mr. Duthie asked for a successor to Mr. Nisbet, and I hope the arrangement will be made; otherwise the flower-gardening, which has been hitherto conducted by natives in the most ignorant way, had better be discontinued.

Vegetable seeds.

Next is expenditure on vegetable gardening. This is maintained with a laudable object. Seeds are brought out from England and multiplied at Saháranpur for distribution to British regiments and the public (gratis to the former, and at a low price to the latter). Here, again, I found the greatest ignorance and bad management to prevail, the native gardeners having no pretension to any knowledge of the proper way in which to cultivate and select for seed; and I have not been surprised to learn from several gentlemen who are skilled vegetable growers that for the last two or three years at least the Saháranpur seeds have been comparatively worthless. A practical gardener is considered by the Superintendent and myself as absolutely necessary to superintend this branch of the work.

Distribution of plants and seeds.

Next comes distribution of plants and trees. The canal plantations were believed to depend a good deal upon the gardens; but reports from canal officers indicated that the connection between canal plantations

SAHARANPUR BOTANICAL GARDENS.

and the gardens were being fast severed, and that little was obtained except seeds. Foresters had been trained at Saháranpur for them, but the training was not of the kind required. I represented to Government that advantage should be taken of Saháranpur to raise trees of utility, especially foreign trees, for distribution to road plantations and district groves; and this is the chief direction which distributions will now take. For the last two or three years no systematic distribution has been effected; demand has been left to chance purchasers, and active measures are necessary on the part of Government in this Department, outside the gardens, to create a field to which the gardens may supply useful trees which are there found successful. This is one reason why I recommended Government to allow this Department to become interested in arboricultural extension.

Rhea.

Fruit trees are raised to some extent for distribution. But very little advance has been made on outside culture, and cultivation of rhea has lately been a prominent feature in the work of the gardens. I found the plantation had been much neglected under Mr. Nisbet, and a great deal had to be done to bring it into order. Separate reports have been submitted on this subject, which give an account of the action which I took with reference to rhea cultivation.

MUSSOORIE GARDENS.

The Mussoorie gardens attached to Saháranpur provide a botanical collection and a distributing centre for hill productions, and are as supplementary to Saháranpur for the collection of hill products which will not thrive in the plains. Similar work was done during the year in clearing and improving, as at Saháranpur, and the collection is being fast improved. Gardening is not such a prominent feature here as at Saháranpur, though I consider the gardens ought to be utilised to train hill-gardeners, who are much wanted; and I have obtained the consent of the Superintendent to institute a system for training hill-gardeners. Both here and at Chajuri (a third garden, at a lower elevation) fruit and other trees and plants are raised for distribution, and, so far as they are raised at any cost to Government, I doubt the wisdom of continuing the expense. There is no country near Mussoorie where (as in Kumaun) fruit trees can be distributed, since the whole of the hill territory in the neighbourhood is under Native rule. I have proposed it, therefore, as a necessary element in the maintenance of the Mussoorie and Chajuri gardens, that, outside the cost of botanical collections, no expenditure shall be maintained which does not result in an equivalent income. There is a ready market at Mussoorie, and the cost of whatever gardening is maintained ought to be recouped by sale of produce to the public. During the year the Superintendent placed by my advice a strong staff of gardeners, under a skilled native, at Chajuri (which had been much neglected), with the view of enabling gardening operations to be conducted in an efficient and remunerative form.

(2) *An Experimental and Arboricultural Farm at Cawnpore.*

THE CAWNPORE FARM.

The Cawnpore Farm is practically, since the abolition of the farm at Bulandshahr, the only farm retained for experimental purposes. A few experiments are still conducted at Allahabad, but they are, on account of the absence of irrigation, restricted to a very limited extent.

Its area.

During the year arrangements were made for the purchase of the adjacent premises hitherto used as an orphanage by the Society for the Propagation of the Gospel. The arrangement provides accommodation for myself and my office, and permits me for the first time to reside on the farm during a portion of the year—a consideration which I believe to be very important for the further progress of

operations. Acres 63·3 were added to the farm lands, which now consist of the following areas:— THE CAWNPORE FARM.

(1) *Government land.*—The areas are—

	Acres.	Roods.	Poles.
Under trees	32	1	14
„ crops	8	3	26
Roads and buildings	8	1	38
Tank	4	1	13
Total	54	0	11
(2) *Land taken on lease*	116	2	24
	170	2	35

Flower-gardening having hitherto monopolised too much attention (chiefly because the "farmers" sent out from England for the cotton farms some years ago were gardeners and not farmers), flower business was transferred to Lucknow. The last one, who was useless except to grow roses, resigned under compulsion, and the farm has since been under the temporary management of an indigo-planter. He is going, and the question now is, whether to try the experiment of a trained farmer from home, or a manager experienced in Indian agriculture. I am in favour of the latter, on the principle that we must work from below and not from above, by inductive and not deductive processes.

The drought destroyed the value of field experiments; an account of them is given in the farm report, and I need do no more than to note other operations on the farm, which were— Experiments.

(1) *Trials of English and improved ploughs*, the results of which proved that the B. F. O. (Ransom and Sims) and American ploughs (supplied by the Secretary of State) were the best adapted for Indian conditions. A further account is given below.

(2) *The trial of new seed wheat*, both from England and those parts of India of which the wheat has the best reputation: none of the new seed produced better results than the native seed.

(3) *Sub-soil drainage* was tried with at present indefinite results.

(4) *Water-lifts.*—Arrangements were made for the trial of every kind of water-lift in which there appeared *primâ facie* to be any merit (see remarks in general note).

(5) *Winnowing by machinery*, with good results.

The chief strength of our endeavours on the experimental farm has, therefore, been devoted to these objects, and some further remarks on the prospects in view appear desirable. In a note submitted by me last year to Government I brought forward the following difficulties with regard to the introduction of improved ploughs, which I consider the most important step which can be taken, because the improvement of one acre with a new plough means the improvement of several millions of acres if its use can be extended. Introduction of improved ploughs.

(1) *Disinclination of cultivators.*—I have made attempts through Collectors to introduce ploughs on the Court of Wards' estates, and sent out 30 B. F. O. ploughs and 12 Madras ploughs as the best adapted. I also sent men to instruct the cultivators, so that no objection might be raised on the score of ignorance, and trust that the step thus taken may lead to a greater familiarity with their use which may overcome the disinclination which now prevails. The drought completely stopped progress in 1877; but in 1878 the farm instructors went out, and the ploughs were used. It does not belong to this report to include an account of the results in 1878; but I may give

CAWNPORE FARM.

the following extract from the officer in charge of the Etawah district, not that I place too much reliance on what I may call sensational cases:—

"Several zamindars, having seen the results produced by the improved ploughs mentioned in your letter No. $\frac{811 A.}{LXXX}$ of 1878 to the Collector of Etawah, of their own accord have come to me and asked me to ascertain where they can be procured, and at what price, as they are anxious to get them. Etawah being a small city, and there being few good blacksmiths, and only one model left at the tahsili to imitate, similar ploughs cannot be quickly enough produced."

The Collector of Banda has made much progress on Court of Wards' estates with great success, and I expect a report from him at an early date of an encouraging nature.

(2) *Inaptitude of English implements.*—I notice in my note "a seemingly absurd, but perfectly valid, objection, that the driver of the bullocks cannot reach his bullocks' tails." Criticisms, which I was glad to receive, denied that this was an objection; but the following note by Mr. D. Reid, a well-known Bengal planter, proves that the objection has force:—

Introduction of improved ploughs.

"The ploughman was highly delighted with Mr. Macrae's sub-soiler, because he could get at the tails of his cattle; and the native does really get more work out of his bullocks when he can reach over to twist their tails."

[No plough successfully used on the farm has overcome this difficulty, and two men must work with all that we have at present approved. Mr. Macrae's "sub-soiler" has not yet been tried.]

Another point is, that the plough must be light for the cultivator to carry on his shoulder. The B. F. O. is 64 lbs., which is too heavy, and a lighter plough is wanted. Of all yet tried, the American plough sent by the Secretary of State is the best in this respect. I saw Messrs. Ransom and Sims in London, and Mr. Fuller, my Assistant, visited their workshops at Ipswich with the object of discussing with them what plough is best suited to conditions in India; and the result was the choice of an eagle American plough, very like that sent by the Secretary of State. An Indian plough was sent to Messrs. Ransom and Sims for their inspection; but there seems little chance of any improvement being effected by its modification at home. The principle on which it works is a wrong one according to English notions.

Another objection is, that native cattle are trained to turn round in the opposite direction to that required by the English plough. If native cultivators are to accept the plough, we must make the share turn the other way; for they cannot be expected to change their old custom and train their cattle in a new way. The difficulty can be overcome as I have pointed out, but it has been necessary to discover it.

The Madras farm plough, which is an improved native plough, has been thoroughly tried at Cawnpore, and has not given satisfaction; but it has been distributed to natives, and will be allowed a thorough trial. The improvements appear to add to the weight and draught.

(3) *Weakness of draught cattle.*—This must be accepted, at any rate for years to come; and every beginning must be made with ploughs of light draught. The B. F. O. and American ploughs are both fairly good in this respect, and can be drawn by ordinary cattle; but the American plough appears to be the best of the two.

(4) *Expense of ploughs.*—This must be, and has been greatly, overcome by manufacture in Indian bazars, at any rate of the rough parts of the plough. The B. F. O. and American ploughs have now been turned out at Cawnpore for Rs. 15 and Rs. 10 each, which are the lowest prices we can hope to reach with good work. The native blacksmiths give very strong metal, and their ploughshares are less brittle than English ones; but it remains to be seen how they will wear. In appearance the ploughs are admirable. For next ploughing season a number of ploughs will be distributed at these prices for payment, to be made by instalments, Rs. 2 or Rs. 3, at each six-monthly harvest.

CAWNPORE FARM.

(5) *Difficulty of keeping them in order.*—The least complicated plough is best; and in this respect the American ploughs—both that sent out by the Secretary of State and that selected by Mr. Fuller—are far superior to any others. There will not be any practical difficulty in keeping the plough in order, and it is intended, if the plough is found to meet with native approval, to establish agencies throughout the province.

I have thus indicated the steps which have been taken towards overcoming the difficulties which exist in the way of the introduction of an improved plough. The question is of the very highest importance to the country, if it is true that a larger amount of food-crops can be raised by its means throughout India; and I cannot but insist that the native's verdict will in this respect be the surest.

English farmers and indigo-planters have given theirs in favour of the plough, but they do not cultivate under the same conditions as Indian cultivators; and it is now our duty, having overcome as far as we can the practical difficulties in the way of a new plough, to see that they give it a full trial, and it may be safely promised that they will, if the produce is larger, take to the use of any plough which is adapted to their labour and means.

Arboriculture.

Arboriculture was for the first time made part of the farm work, and nurseries of *carob prosopis, inga dulcis*, and other fruit and fodder bearing trees for distribution commenced. (The arboricultural operations of the Department will be further described under the head of Arboriculture.)

Sheep-breeding.

Stock-breeding.—Horned cattle are not bred at the farm, but half-bred English rams are reared for distribution, and were sent to the districts of Budaun and Banda, where there was reason to believe that special interest would be taken in sheep-breeding. New rams were also ordered from Australia.

The net expenditure to Government for the Cawnpore Farm was Rs. 1,837 during the year under report.

(3) *Sewage Farm at Allahabad.*

ALLAHABAD SEWAGE FARM.

The *Allahabad Farm* not being suited, on account of absence of irrigation, for experimental purposes, has been maintained for the purpose of proving the agricultural value of the sewage of a city in India. The manager, being under a contract, had to be kept, and under the circumstances could best be utilised in superintending operations, and in preparing a statistical record of results.

The way of raising municipal income.

Operations are fully described in the farm report, and it is sufficient in this place to indicate that land manured with latrine filth brings without irrigation about Rs. 20 an acre, and with irrigation about Rs. 40 an acre, more than the ordinary rent on leases of not less than five years. It is worth mentioning that at Cawnpore some land (where canal water and latrine manure are unlimited in supply) has lately let at more than £20 an acre. The enhancement of income which is estimated for the city of Allahabad when the system is completed is Rs. 10,000.

The results tend to prove that municipalities should buy land round the city, and gradually raise its value as market garden ground; that they should make a monopoly of the city manure, and, if possible, arrange for a free water-supply, which doubles its value, and thus recoup the whole expenditure which they are obliged to make for sanitary purposes. The sewage farm costs nothing to Government.

(4) *A Horticultural and Arboricultural Garden at Lucknow.*

LUCKNOW HORTICULTURAL GARDENS. Acclimatisation of seeds and plants.

The Lucknow gardens came under this Department in May 1878; they had hitherto been under Dr. Bonavia, whose special appointment at Lucknow terminated at the beginning of the year. They are chiefly maintained for horticultural objects, but some attention has also been paid to arboriculture and useful plants. Successful experiments had been carried on by Dr. Bonavia for the production of acclimatised flower seeds, and the seeds raised at Lucknow are becoming popular for the two reasons, that they are cheaper and more certain of germination. Similar experiments were conducted in vegetable seeds, the improvements of native vegetables being also one of the objects in view, and some success has been obtained.

The Superintendent reported of the flower seeds that "they germinate quicker, in greater proportion, and are more certain than imported seeds, while the plants came into flower sooner and flowered more abundantly." These effects are the result of several years' work, and are important, if they indicate that a similar result may be obtained by patient experiment with plants of a more useful kind. The trees to which especial attention must be drawn as having been successfully raised are *eucalypti* and *carobs*. The Superintendent considers that he has proved that of the *eucalypti*, *rostrata* and *sideroxylon* are the two best adapted to these Provinces, and that their hardiness is established. *Carobs* have fruited abundantly, and supplied quantities of seeds for distribution. The successful establishment of this tree is due to Dr. Bonavia, and may prove of the highest importance.

The net cost of the gardens to Government was in the year under report Rs. 2,640.

(5) *A Tobacco Farm at Gházipur, with a Branch at Pusa in Bengal.*

TOBACCO FARMS. Position of affairs.

The operations conducted during the year by Messrs. Begg, Sutherland, who have now the full control over these farms, have been important. At the beginning of the year 1877, I had obtained the consent of His Honour the Lieutenant-Governor of Bengal for the above firm, whom North-West Government had established at Gházipur, to treat with the Bengal Government for the occupation of the Pusa Stud Estate; and arrangements were eventually concluded by which they entered into possession of Pusa a few months later.

The position of affairs at the beginning of the year under report was the following. In 1876-77, a crop had been raised from 52½ acres at Gházipur; a severe hailstorm reduced the value of the crops, according to the firm's estimate, by fully one-third. The outturn was nearly 59,000 lbs., exclusive of second cuttings retained by cultivators, but was not sent to England on account of its being so much broken by hail.

Meanwhile, the enterprise was running a very great risk of complete failure through the unfortunate illness of the Virginian curer, Mr. Williamson, who had both worked too hard and exposed himself too freely to the climate, the dangers of which he had not appreciated. Already I had taken him to the Himalayas and obtained his temporary recovery; but in April he became so ill, that I strongly urged the firm to send him to Java for a sea-trip, with the secondary object of instituting enquiries into Java tobacco culture, which has there been very successful. To relieve Mr. Williamson, a European apprentice had previously been placed by me at Government expense on the farm, with the consent of the firm, who were at that time unwilling to undergo the expense themselves, and, luckily, things were kept going until Mr. Williamson's return in July.

TOBACCO FARMS. Outturn of 1876-77.

The ensuing drought, which was extreme at Gházipur in 1877, prevented the growth of anything like a good crop at that farm; but the firm had, in anticipation of obtaining Pusa, secured a second professional curer and manufacturer from America (Mr. Cabaniss), who arrived in time to raise an excellent crop on 200 acres at Pusa—a result which justified my conclusions previously placed before Government as to the greater suitability of Upper Bengal climate for tobacco. At Gházipur, however, there was as much difficulty experienced in keeping the crop alive as the curer, and on 60 acres the outturn was only 50,000 lbs. of an inferior quality. Before this was cut, I had to send Mr. Williamson again to the hills, whence he returned in improved health, though he has since, under medical advice, been allowed by the firm to take a sea-voyage to America.

The Pusa crop on 200 acres realised an outturn of more than 150,000 lbs., of which 15,000 lbs. have been sent to England and valued at prices varying from 2½*d.* to 5½*d.*; but the brokers say that it would have fetched more if it had been kept longer in this country to mature. Of the remainder, a large quantity will be manufactured, and a portion sent to England as cured leaf.

General management.

The two estates have now been placed by the firm, Messrs. Begg, Sutherland & Co., in the immediate charge of a member of the firm, who has taken up his residence at Pusa, visiting Gházipur when his presence is required there. The apprentice whom I appointed to relieve Mr. Williamson has been taken over by the firm, and is paid by them as assistant manager. There are two professional American curers, one for each estate, who will now be relieved of all those worries of management which went some way to endanger Mr. Williamson's life, and a fifth (English) assistant has been trained in Germany in the cigar-making trade, and will shortly join; meanwhile, Mr. Williamson has been commissioned by the firm to import the best machinery of all kinds for tobacco and cigar-making while on leave in America.

Progress made.

The above statement proves not only the progress which the enterprise is making, but also the vigour with which Messrs. Begg, Sutherland are at work, and how fully they have justified the confidence which Government placed in them. When, at the outset, advice was given to employ Government agency alone, the issue was decided in favour of utilising commercial enterprise as most likely to succeed; and it is certain that Government alone could never have made such rapid strides as Messrs. Begg, Sutherland, who, while they have connections in the trade in England and America, have not to ask the leave of half a dozen authorities when they want a new curer.

Results.

The results of the operations hitherto undertaken are still uncertain. The firm are sanguine, and I am sanguine, as to ultimate success; but time is still wanted. A crop sown in July 1877 is cut in January, cured by March, sent home in the rains, kept in bond for a year (two are better), and opened for sale in 1879. Of all the tobacco sent home, only the small parcels of 1876 (which were the produce of a crop injured by hail and grown in a dry season) have been tested in the market. They realised a price three times as great as Indian leaf previously exported, and about two-thirds the price of American leaf of the same class.

The tobacco of 1877 has not yet been subjected to sale; but an offer was made by a wholesale English firm for a very large quantity annually at a price which would have paid a sure profit. It would, however, be premature, and possibly indiscreet, to discuss the question at the present stage; and I prefer to reserve facts for a future report.

No official report has been received in this office on the samples sent to England through official channels; but I have understood that

TOBACCO FARMS.

they have not been favourably judged. This report does not agree with the fact that good prices have been privately offered to the firm in England, or with the opinion of the American curers, who are as good judges as any professionals can be, and time must be asked for before any final verdict is given. Sales in the open market are the best test; and if these can be effected on favourable terms, no doubt will remain as to the results.

The above remarks refer to cured leaf. But attention is also being given to manufacture; and as the speciality of Virginians is smoking tobacco and not cigars, first experiments have been made with smoking tobacco. Samples of "Black Cavendish" sent to regiments in Mr. Williamson's absence during the year under report were practically condemned by the troops; and as the tobacco was certainly not of the best class, it was a pity the experiment was made. But a smoking "mixture" offered to the public has succeeded far better, and is showing signs of finding general favour. Manufactured tobacco must, however, be much more restricted to the local market than cured leaf; and although an individual firm will no doubt make more profits by local sale in India, yet competition with the world must probably take the form of export of cured leaf.

Comparison between tobacco and tea.

A comparison of tobacco with tea may give some idea of the possible position which the former may take as a product of India. An acre of tea produces in Eastern Bengal about 300 lbs. on the average; three or four years elapse before it begins to yield, and full vigour only lasts for a few years without expensive manuring. Cost of cultivation and manufacture is given at various rates; but there is reason to believe that, including export, it is not less than 4 annas a pound. The average price, good leaf and bad, is said not to exceed 9 annas a pound. At these rates, net profits on 100 acres would be $300 \times 5 \text{ annas} \times 100 = \text{Rs. } 9{,}375$. An acre of tobacco produces about 800 lbs. on the average; cost of cultivation and curing can, including export, be kept probably to 2 annas, and, if manufacture is added, to 3 annas. The price of cured leaf ought to be, if it is to compete with American tobacco, 6*d.* a pound, or 4 annas, and of manufactured tobacco in India about 10 annas. The minimum net profits of 100 acres at these rates are $800 \times 2 \text{ annas} \times 100 = \text{Rs. } 10{,}000$ for cured tobacco, and $800 \times 6 \times 100 = \text{Rs. } 30{,}000$ for manufactured.

The above figures show that there is as good, if not a better, margin for profit in tobacco than in tea. The market in which it competes is of larger extent, and it is almost proved that tobacco cured in India can be sold in London at a profit for a price at which it would not pay America to send it. The indications which I have given of the thorough manner in which exportation is progressing under Messrs. Begg, Sutherland may at least convince Government that the position (whether low or high) which India can occupy in the tobacco market of the world will be in a very few years thoroughly established.

(6) *Orchard and Tobacco Plantations in Kumaun.*

KUMAUN ORCHARD AND TOBACCO PLANTATIONS.

Tobacco experiments in the hills.

In bringing the American curer to Kumaun for the preservation of his health, I was permitted by Government to institute with his assistance tobacco experiments in the hills. The curer believed that a finer leaf, which would obtain a better market at home, could be raised in the hills—such, indeed, as is exported from Java. The year under report comprises the termination of a first experiment under Mr. Robert Troup, planter at Ránikhet, and the commencement of another in the following season at the Government fruit nurseries at the same place. Both have failed. The first crop of three or four acres was badly cultivated and burnt up. Seed for the second crop came out too late from America, and the situation proved too cold for the plant. But neither experiment was conclusive, and arrangements have been made for a third, and still more thorough, trial on the estate of another planter (Mr. Norman Troup). To enter fully into details now will be to trench on the operations of the year subsequent to that under report, and it is sufficient at present to inform Government that a third trial has been taken in hand under conditions which ought to ensure a thorough experiment. A trained cultivator is to be sent from Gházipur, the services of an American curer are to be placed at the disposal of the planter, and the best cigar-leaf seed has been ordered. The Manager of the Gházipur and Pusa Estates has in the meanwhile visited Mr. Troup, and thoroughly interested him in the project.

KUMAUN ORCHARD AND TOBACCO PLANTATIONS.

Establishment of orchards.

The original idea conceived by myself with reference to Kumaun was to establish a tobacco plantation on new land, and to import a Mulatto curer, whom Mr. Williamson thought he could obtain on cheap terms. The attempt, however, failed. But when the Commissioner of Kumaun was consulted on the matter, he had expressed a wish to give a further impetus to fruit cultivation by establishing Government orchards, and the original proposals to Government were made to continue the two projects. In the year under report land was chosen and inspected, but subsequently abandoned, in consequence of certain disadvantages in soil and position which I need not describe in detail. New land has since been selected, on which I will report next year. Meanwhile, fruit trees have been raised at the Government nurseries at Ránikhet, while the tobacco experiments have for the time become altogether dissociated from the orchard project.

Position of Kumaun to N. W. P.

It will be convenient at this place to make a few remarks as to the position of Kumaun with respect to the agricultural interests of the North-Western Provinces. Kumaun possesses a climate and natural conditions not common to any other part of the Provinces (or indeed of India) in British occupation. There is therefore a *primâ facie* presumption that it can be made to yield certain products which India requires either for consumption or export which cannot be produced elsewhere. A successful commencement was made thirty years ago with tea, which subsequently being extended to the lower hill countries east of Bengal, found there a climate better suited to its production. There are now plantations in Kumaun which yield about 300,000 lbs. out of the 30 million pounds produced in India. The frost and cold of the winter months prevent such large acreage yields as are given under the sub-tropical moisture of Assam and similar climates, and Kumaun finds it difficult therefore to compete against the lower hills. A better tea of the finer classes is undoubtedly produced, and commands a higher price in private sales, since it can be better used as a "whole" or unmixed tea than the Assam leaf, which is employed chiefly for flavouring by home dealers; but demand for such classes is far more limited in the home markets, and Kumaun planters have therefore hitherto chiefly occupied themselves in providing green teas for Central Asia, where they are carried by Kabuli traders, who visit Kumaun yearly, and often purchase the whole, or nearly the whole, produce of an estate. During the last two years, however, owing to Russian restrictions on export to Central Asia and to combination amongst the Kabulis, prices have fallen, and sales are now made which give a very much smaller profit to planters. This circumstance is one reason why I am anxious to induce thorough experiments in tobacco in Kumaun, which may, if a better leaf can be raised there than in the plains, provide large profits. Tea plantations have increased the prosperity of the Kumaun agricultural classes so greatly (by opening up communications and bringing in a large labouring population, for whom they are required to raise food), that the decline of tea would now be a great blow to this division of the Provinces if nothing were brought forward to take its place. Labour is supplied from the Native States, Tehri, Kashmir, and Nipal (chiefly the last), and the greater part of the cash paid for tea filters through these foreign labourers to the agricultural population of

Backward state of tea.

KUMAUN ORCHARD AND TOBACCO PLANTATIONS.

Kumaun. Next to tobacco, or perhaps before it, the most promising product is fruit. Large quantities of fruit, chiefly apples and dried stone-fruits, are brought annually from Kabul to India; and there seems no reason why Kumaun should not supersede that country as the orchard for the plains. The experiments which have been made by the Commissioner of Kumaun (Sir H. Ramsay) and at the Government nurseries founded by Sir William Muir at Ránikhet, as well as by one or two of the planters, prove that apples and apricots can be raised with the very greatest success in the Himalayas. Large quantities of young trees have already been distributed by the nurseries; but private enterprise is deterred from making any rapid steps by the length of the period which intervenes between the outlay of capital in the plantation of orchards and the returns realised from them. The consequence is, that apples are still selling for 6*d.* apiece in Naini Tal, although the far lower price offered in native bazars in the plains for inferior Kabul fruit is sufficient to guarantee substantial profits. These are the reasons which have induced the Commissioner of Kumaun and myself to give an impetus to fruit-growing, by the establishment of large orchards, which may, if found desirable after the lapse of some years, be eventually placed in private hands. The object in view in this case is not merely to bring money to Kumaun, but also to add to the food-supply of the population of the plains, who depend almost entirely on vegetable productions for sustenance. Chestnuts (which provide the greater portion of food in the Pyrenees) are also not unlikely to succeed in the Himalayas, although experimental cultivation has not been so successful as in the case of apple and some of the stone-fruits. But as chestnuts possess extreme importance in their adaptability for exportation, every possible measure will be taken to increase their cultivation on the chance of their proving a success.

Adaptability of Kumaun for fruit cultivation.

Experiments in the plains with hill potato.

The production of potatoes for seed also received my attention during the year. New potato stock had been introduced both by the Commissioner and myself to Kumaun in previous years; and as experiment at Cawnpore had proved that potatoes from the hills gave better crops than seed sown in the plains (where only the very smallest can be preserved through the rains), I commenced a system of export in 1877, which resulted in the disposal of 273 maunds. There is difficulty, however, in providing ripe tubers in sufficient time, since the crop in the hills is taken up in October, the same month that it is required for seed in the plains, and carriage to the nearest railway is slow. On the whole, the results were favourable, and when the railway connects the hills with the plains, success will be more certain. The project is important, as potatoes form one of the few products which can be made to supply rapidly a large amount of food after a failure of the autumn harvest in the north of India; and I trust that every attempt may therefore be made to induce the agriculturists of the plains to accustom themselves to obtain potato seed from hill cultivators. I am glad to know that some of the zamindars who took the seed last year were pleased with the result.

The net cost of Gházipur and Kumaun operations was Rs. 6,060, defrayed from the rent paid by Messrs. Begg and Sutherland.

SEED AND STOCK FARM IN THE DUN.

(7) *Seed and Stock Farm in the Dún.*

Suitability of the Dún.

The same principles which led to the utilisation of Kumaun for the supply of products and seed which cannot be produced in the plains, suggested the project of establishing a seed and stock farm in the Dún, which possesses a climate healthier, both for cereals and for animal life, than any other portion of the plains. There is land still belonging to Government in the Dún, and the Superintendent is

SEED AND STOCK FARM IN THE DUN.

in favour of utilising it for the purpose. Strong and good cereal seed is a very urgent want throughout the Province, and the best way in which to raise a supply has been for some time the subject of consideration. His Honour Sir George Couper was in favour of some practical attempt being undertaken, and the suggestion to utilise Dún land was therefore placed before the Commissioner of the division for discussion with the Superintendent of the Dún. What further action has been proposed or taken will be noticed in the next report. It is necessary, however, to remove at once any idea that may be formed that model farms are to be multiplied. There were four years ago three model farms in the Province. There are now only two, one of which at Allahabad is practically only a sewage farm, and will be eventually handed over to the municipality; the other, the experimental farm at Cawnpore. The Dún land, if utilised at all, will be used only for the production of good seed and for stock-breeding, and not as a model farm.

Stock-breeding.

With regard to stock-breeding little has been done, and little could be done until existing conditions were better known. During the year under report Mr. Fuller, my Assistant, was sent to Hissar to learn what arrangements were conducted there, and was desired to place all the facts ascertained by him before Government, as well as any propositions which might seem feasible. Further enquiries are to be made this season in the cattle-breeding districts of the Sub-Himalayan tracts. Mr. Fuller's report is before Government, and has been circulated for opinion; and I need only say here that it is not at all certain that it will not be wiser to depend upon Hissar as a central breeding establishment than to attempt any independent measures. If, however, any are undertaken, it is not improbable that the Dún will form one of the best centres of supply.

Sheep-breeding.

[Sheep-breeding was, as I have noticed under the head of "Cawnpore Farm," undertaken to a small extent there, and distribution made to two districts, of which Banda was one. Banda lies in a tract of country which has for years past been utilised for sheep and cattle breeding on account of the large area of pasture land available. The Collector has during the year folded a large number of ewes, for which rams with which he has been supplied have been exclusively used, and the lambs when sufficiently hardy are to be distributed in the neighbourhood. The natives themselves refused to take the rams, not feeling sure that the new breed would suit the climate, and it remains to be seen how far they were right or wrong. New Australian rams were ordered for the Cawnpore establishment, because it was believed that, coming from a hotter climate than England, they would suit the North-Western Provinces better. The other district to which rams were sent was Budaun, where five were made over to zamindars.]

(8) *A Silk Farm in the Dún.*

THE DUN SILK FARM.

The silk farm is under personal charge of Mr. Ross, Superintendent of the Dún, who in the year under report brought operations through a third season. The second season was a failure, owing to Mr. Ross' absence; but in this year he made some progress. The annual report states that "the practical points of success were the health of the acclimatised worms and the large weight of good silk produced from good cocoons," which facts taken together prove that good silk can be successfully produced in the Dún. Professional opinion on the silk has not yet been received. It has been in previous reports explained, but the statement may be repeated, that the merits of the Dún for silk culture are (1) that eggs can be removed to and stored in a cold atmosphere in the Himalayas, which prevents quick germination,

THE DUN SILK FARM.

resulting in feeble worms; (2) that mulberry trees like the climate; (3) that worms are healthier in the spring of the year (when eggs are hatched) than in the lower plains.

Its advantages.

The remaining advantage of cheap labour is of course shared by other parts of India. The great advantage is, therefore, that of being able to rear strong, healthy worms; and that this can be done is now proved.

Instruction of natives in silk production.

One feature in the year's operations must be noted. Two professional reelers, prisoners in Bengal jails, were imported, one of whom proved a failure, the other a success. Mr. Ross has now taken in hand the instructions of natives of the Dún, with the view of extending the industry among the agricultural population, so as to give immediate and practical effect to the lead given by the Government farm. The net cost to Government on the silk farm has been Rs. 3,454.

(9) *Farming Operations under the Court of Wards.*

With the following remarks made in Sir John Strachey's minute on the organisation of this Department I fully agree:—

OPERATIONS IN COURT OF WARDS' ESTATES.

Sir John Strachey's view.

"Estates under the Court of Wards afford another means of promoting agricultural improvements. No one can be less inclined than I am to try doubtful experiments at other people's expense; but I believe that, under proper superintendence, much might be done on these estates through the agency of the cultivators themselves. They might often be induced to try new seeds, new plants, or new methods of cultivation. The rapid increase of potato, opium, and indigo cultivation in these Provinces sufficiently proves that no real bar exists to the adoption of novelties by the agricultural classes when once they are convinced that they are remunerative. The successful introduction of an improvement on one or two Court of Wards' estates would have a much better chance of leavening the agriculture of the surrounding country than any number of equally successful experiments on the model farms. In fact, while the latter must be utilised chiefly in teaching experience to the Government, and in proving what experiments are likely to meet with success and what with failure, the latter should be employed in reproducing, for the education of the agricultural classes, any of those experiments in which success has been obtained. While leaving the general control over those estates, as at present, in the hands of the district officers, much might be done in the direction of agricultural improvements through the agency of the special department. 'These estates,' it was said in the Report on the Administration of these Provinces for 1871-72, 'should be our model farms; and the higher cultivation, the greater appearance of comfort, the trim villages, and the skilful utilisation of natural advantages, should testify to the people what the effects of an enlightened management can be.'

"But it appears to me that Court of Wards' estates might, under intelligent inquiry, be made the medium for investigations of a still more important character. Great ignorance prevails regarding the real condition of the cultivating population; the manner in which they live, the profits which they realise from their holdings, and the relations which exist between them and the money-lending classes, are subjects on which much light might be thrown. Even among experienced officers whose attention has been specially devoted to the subject a wide divergence of opinion will be found as to the real margin which, taking good and bad years together, proprietors realise from their estates after payment of the Government demand. The facts stand out that a year of scarcity reduces a large portion of the cultivating community to a condition of severe distress; that in some parts of the country the people are always under-fed; that throughout these Provinces the majority of them are in debt to the money-lending classes.

An examination of 1,000 cultivators taken at random in a district in the Lower Doab proved that, while 25 per cent. were irretrievably in debt, 50 per cent. more were in the constant habit of borrowing, and that only 25 per cent. never resorted to the money-lender at all. The fact is equally prominent that a large number of proprietors who bore up under the exactions of oppressive Native Governments have broken down, or are breaking down, under the demands of a Government whose intentions at least are infinitely more benevolent. The extreme importance of ascertaining the causes which tend to these results is apparent, and no better instrument for the purpose can be found than the Court of Wards' estates. They afford the opportunity of investigating facts connected with the condition of the cultivating classes, of discovering what remedies may be applied for their improvement, and of ascertaining the results of investing capital, not only on works of agricultural utility, but also in relieving cultivators during periods of pressure and temporary scarcity with money or food, and in assisting them at proper times in the purchase of cattle or agricultural implements."

OPERATIONS IN COURT OF WARDS' ESTATES.

Experiments ought not to be made at the expense of Court of Wards' estates unless probabilities in their favour are established facts. We have at present advanced very little beyond the experimental stage, and the only improvements which I have dared to suggest for introduction on Court of Wards' estates have been English ploughs, new wheat seed, and new sugar-mills.

Introduction of new implements and seeds.

In 1877 operations were practically defeated by the drought, and I refrained from making any attempt in the year under report to press experiments forward at a time when all official agricultural energy was devoted to the preservation of vegetable, animal, and human life. The following distributions were made (expense of carriage being defrayed from the Farm Budget):—

12 Madras ploughs.
16 B. F. O. ploughs.
59 Sugar-mills.
176 maunds wheat seed.

Separate reports have been submitted to Government on the two latter; the former could not be tried on account of the want of rain. Of the new sugar-mills and the wheat seed an account has been given under the Cawnpore Farm. I am convinced that little good will be obtained in any attempts I myself or higher authority may make in working through Court of Wards' estates, unless district officers have more time to attend to such matters, and are allowed to consider them of practical importance to the country. It would be better still—and I have stated this opinion in a letter to Government on the subject—to place Court of Wards' estates under the intelligent management of selected European managers or of covenanted officers, who could easily be spared without cost to the State, if the more economical system of providing Judicial Courts with Native Magistrates were further extended. I cannot personally watch agricultural undertakings on any estate; agricultural operations which require continual supervision can only be superintended by local officers; and I must use every opportunity to insist that, if Government wish to extend improvements, which are proved to be successful, among native agricultural classes, they must either provide special local agency for the purpose, or, by giving them leisure, permit and require district officials to interest themselves in the work. As the surest, I advocate special and well-selected agency in the superintendence of Court of Wards' estates.

(*B*) ARBORICULTURE.

ARBORICULTURE. Nurseries.

The duty of providing nurseries for district arboriculture was entrusted to this Department just as the year was closing. Arrange-

ARBORICULTURE.

ments had hitherto been made in the Public Works Department, and the orders of Government now required that, while nurseries should be maintained by this Department, avenues and roadside planting should remain under the Public Works Department. The chief change has been to reduce the number of small nurseries which were kept up at much waste of money, and concentrate operations on one or two large nurseries in each district and on provincial nurseries, under professional supervision, at Saháranpur, Cawnpore, Lucknow, and Gorakhpur. The last-named nursery has been placed under Forest supervision. The others already existed.

Its object.

His Honour the Lieutenant-Governor having desired that fruit or fodder trees only should in future be planted, steps have been taken to raise plantations of carobs, prosopis, mangoes, and other useful trees; the provincial nurseries being especially used for the introduction of new and foreign trees, which will be distributed thence to the districts.

The scheme prepared in the North-Western Provinces agrees very much in plan with a similar programme lately promulgated by the Government of India in the Forest Department, in conjunction with which it will probably be very advantageous for the provincial scheme to be combined.

The main object of the proposals is to secure the plantation of useful trees throughout the plains, and thus supplement the work done in the forest lands under the Himalayas, which, useful as it is, does not materially affect the well-being of the districts at any distance from the mountain range. It is, and I believe reasonably, assumed that the aridity of the North-Western climate, increased as it is by the continual clearance of wood and scrub before advancing cultivation, may be kept in check by the plantation of trees wherever room can be found for them; and it is manifestly desirable that, if this idea is carried out, trees of which the fruit or foliage is useful as food should be selected for the purpose. The first step is to organise the nursery system, and this has been commenced. As the year under report was at its close when orders issued, the above explanation of the nature of the measures which have been undertaken is sufficient for the present report.

II.—Commerce may be divided under the following heads:—

(*A*) Collection of trade statistics.

(*B*) Promotion of trades and manufactures.

(*A*) COLLECTION OF TRADE STATISTICS.

(*A*). In describing what has been done for the registration of trade statistics, it is desirable to call attention to the programme which was adopted at the Simla Conference in June 1876, at which it was decided that traffic should be divided and registered under the following heads:—

1*st*.—Trade with foreign countries, *i.e.*, as regards the North-Western Provinces and Oudh, trade with Nipal and Tibet.

2*ndly*.—With provinces and Native States immediately surrounding the North-Western Provinces and Oudh.

3*rdly*.—Traffic within the Provinces, including the traffic of principal roads, rivers, canals, and railways, and the trade of municipalities.

Arrangements were made for the registration of foreign trade, and reports have been submitted on our trade with Nipal and Tibet, to which I refer for details.

With regard to trade with other provinces and Native States, a cordon of posts was established round the Province, and registration effected of all traffic which passed the boundary by road and river; and a provincial report has already been submitted

to Government in which detailed results are shown. It is impossible to say more of these statistics than that they indicate in a general way the character and amount of exports and imports. It is idle to pretend that accuracy of detail has been obtained. An attempt was made to provide for supervision by placing traffic registration under the special charge of one officer in each district; but district officers have so many duties to perform, that they cannot be expected to devote much time to the investigation of work conducted on the extreme boundaries of their districts. This system of frontier registration is, by the orders of the Secretary of State, to be discontinued next year. But, meanwhile, the returns of the year under report and of the current year will, however inaccurate, have provided a very useful, and I believe valuable, indication of the general flow and character of the trade which this Province conducts with other parts of India.

In the above remarks I have purposely omitted to allude to railway traffic, the registration of which is by far the most important, while it admits at the same time of being rendered the most complete.

At the Simla Conference there was a general understanding that Bengal should provide returns for the East Indian Railway,—Punjab, for the Sind, Punjab and Delhi Railway,—and the North-Western Provinces, for the Oudh and Rohilkhand Railway. The railway statistics eventually obtained by Bengal and the Punjab were, however, of a local character, and proved practically useless for the compilation of a synopsis of railway traffic between different provinces and between one part and another of the same province. I visited Calcutta with the object of obtaining more complete statistics through the Bengal Office, but objections were there raised to my proposals on the score of difficulty and expense. I felt convinced however that, through the agency of the East Indian Railway Audit Office, a system could be established, at comparatively small expense, under which the railway trade of any part of each province with any part of every other province could be completely registered; and my expectations were realised at a visit which was paid to the Audit Office by Mr. O'Conor, Assistant Secretary to the Government of India, and myself, in November 1877. I subsequently visited Jamalpur to arrange preliminaries, and since October 1877 the system which I proposed has been in working order, in anticipation of the sanction of the Government of India, which was finally accorded in a Resolution dated 22nd February 1878. The provinces included in this scheme are Bengal, the North-Western Provinces and Oudh, the Punjab, and the Central Provinces, as well as Bombay, Rajputana, and Ajmere, so far as that portion of this railway trade is concerned which passes between them and the four provinces first named. The whole expenditure does not exceed Rs. 5,000. It is satisfactory to record that railway statistics of a year, *viz.*, from October 1877 to October 1878, are now complete, and that at the present time returns are provided quarterly showing the amount and value of each class of merchandise exported from and imported to not only each province, but each section of the province, as well as from and to the ports of Calcutta and Bombay. Since the close of the year under report, the whole of the arrangements connected with the railway trade of the four provinces named have been placed by the Government of India under my control.

The registration of internal trade was confined to the collection of statistics in (1) the Rohilkhand and the Meerut Divisions, (2) in the Benares Division, in which localities Government required information in connection with light railways, and special reports were submitted to Government in the Public Works Department on the returns attained. The funds allotted for trade registration did not admit of further expenditure, and, with the exception of municipal registration effected in some of the Rohilkhand towns in connection with the above enquiries, town registration could not be undertaken. It is a question whether a municipality should not be required to provide Government returns of their trade at their own expense, since it is of importance to every town to maintain a history of its own trade.

(*B*). PROMOTION OF TRADES AND MANUFACTURES.

(*B*) The only attempts which have been made to promote the interests of special trades of large commercial importance are those which have been described already under the head of "Agriculture," *viz.*, those in connection with tobacco, silk, and rhea fibre, and I need not add anything in this place to the account I have already given of the first two of the undertakings named.

Rhea would deserve further notice, but that the action which has been taken in connection with the attempts to develop an industry in this fibre is due so much more to the Government of India than to this Department, that it would be out of place to describe the operations as belonging to provincial action.

I desire now to offer some brief remarks on the subject of promoting commercial enterprise in new directions with a view partly of explaining what action has been taken, and partly of inviting an expression of the wishes of Government on the subject. In developing new enterprise, Government can afford assistance in three ways. First, by making enquiry, and bringing such facts as may be elicited before the notice of the commercial public; secondly, by offering prizes or bonuses for the successful establishment of a new undertaking; thirdly, by itself actively engaging in the enterprise as pioneer.

The first duty is one which I have on the part of Government undertaken. I have taken steps to obtain through the agency of village records complete statistics of agricultural products in the Province. I next took the opportunity afforded by the requisition made upon this Department for the Paris Exhibition, of making a collection of all North-Western Provinces products other than agricultural which are, or are likely to be, the subject of commerce; and I am preparing a series of volumes in continuation of those edited by Mr. Atkinson of the Civil Service, and entitled "Economic Products of the North-Western Provinces." The volume which has been prepared in the year under report, and which is now under issue from press, is that on Dyes and Tans, Mr. Atkinson having already edited two volumes—one on Gums and Resins, the other on the Minerals of Kumaun. The most important volume of the series will be that on Agricultural Products, of which Mr. Wright's valuable agricultural memorandum for Cawnpore (prepared partly in communication with this Department) is to form the basis. Material has been collected during the year in each district which, when supplemented by further enquiries, will enable Mr. Wright and myself to expand his memorandum into an agricultural dictionary for the Province.

In the meantime enquiries of a more special character have been made in the interest of particular trades, in respect to which it is premature at present to predicate any definite results. The glass manufacture of the reh-covered plains of the northern districts and the wool supplies of Bhutan and Tibet have been the subject of detailed investigation, and I shall shortly be in a position to publish some interesting facts regarding them.

The second and third means of assisting commercial enterprise, *viz.*, by offering prizes, or by active engagement in a new enterprise, may be treated together. An instance of the second method of giving aid is supplied by the action taken by the Government of India in offering a prize of Rs. 50,000 for a successful Rhea machine; and of the third by the steps taken for the development of the tobacco and silk industries. Much more could be done if funds were available; while but little progress can be made without either actual expenditure, or concessions which are equivalent to a grant-in-aid. Some little time ago I pointed out that one method of action, already practised not unsuccessfully, might be more persistently followed: I refer to the utilisation of jail machinery. For the development of such industries as pottery and glass-making, it is almost safe to say that nothing is wanted but skilled instruction, since the plant of these trades is extremely cheap. I am firmly convinced that immense development would follow the introduction of skilled professional knowledge into the country; and if Government are unable to provide funds sufficient for independent experiment, I again take the opportunity of noticing that a more economical way of effecting the object may be found in carrying out the system (already partly encouraged) of providing our jails with specially qualified warders. If, on the other hand, this proposal is considered for any reason unfeasible, then I venture to trust that Government will acknowledge the expediency of following up the action which they have already adopted in the case of tobacco, by granting me sufficient funds to enable me to carry out experiments, or to offer substantial prizes, under the direction of my own Department. If the principle I have proposed is admitted to be a sound one, I shall be prepared to place before Government projects for approval.

A first step has been taken for the encouragement and possible improvement of art manufacture by the establishment of a central depôt at Allahabad, where samples

of textile fabrics and ornamental ware are being collected for exhibition and sale. Samples are not allowed to be exhibited until passed in this Department, and only duplicates of passed samples can be sold at the depôt. It is intended, in conjunction with this undertaking, to obtain and provide new patterns to manufacturers, where means exist of adopting such measures. The collection has only lately been commenced, and a more complete account must be awaited in my next report.

During the year samples of teas and cotton fabrics were sent to the Colonies, and there is reason to believe that some opening may be found for these articles of commerce in Australia. One of the Kumaun tea-planters has obtained a favourable report and further orders through the agency of this Department.

I may allude, in conclusion, to the collection of products which was made for the Paris Exhibition, and which occupied some weeks of my time in the cold weather of the year under report. The collection was, I believe, intended as much for the India Museum in Kensington as for the Paris Exhibition, and was received with favourable comments by the Government of India.

From Home Department, No. 55, dated 20th February 1879, forwarding Rules prescribed by the Governor General in Council, for enquiring into, and reporting on, serious accidents on State Railways.

ORDER.—**Ordered, that these Rules be forwarded to the Governments of Bombay, Bengal, North-Western Provinces and Oudh**; the Chief Commissioners, Central Provinces, British Burmah and Mysore; the Resident, Hyderabad; the Consulting Engineers to the Government of India for Guaranteed Railways, and the Director of State Railways, Western System, for information and guidance. Also to the Governments of Madras and the Punjab, the Chief Commissioner, Assam, and the Agents to the Governor General for Central India and Rajputana, for information.

Ordered also, that this Resolution be forwarded to the Home Department for information, and that it and the Rules be published in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Major-General, R.E.,*
Offg. Dy. Secy. to the Govt. of India.

RULES FOR ENQUIRING INTO, AND REPORTING ON, SERIOUS ACCIDENTS ON STATE RAILWAYS.

GENERAL.

THE following Rules are prescribed by the Governor General in Council for enquiring into, and reporting on, serious accidents on State Railways:

Serious accidents are accidents attended with loss of life or limb or other serious injury or danger of such loss or injury to persons travelling, or being upon the Railway; or accidents that have, or might have, caused large loss of public or private property.

2. In the case of any State Railway passing through Native States, the Government of India will, from time to time, direct what official shall, for the purposes of these Rules, be regarded as the Magistrate of the District in respect of the portions of the Railway situate in each such State.

3. Throughout these Rules, the words, "nearest District Superintendent of Police" shall be substituted for the words "Railway Police Superintendent" in respect of State Railways, whereon a Railway Police Superintendentship has not been established.

SECTION I.

Duties of Managers and Railway Officers.

4. On the occurrence of any serious Railway accident, it shall be the duty of the nearest Station Master to give immediate notice thereof in writing, or by telegraph, when possible—

(a) to the nearest Magistrate;
(b) to the Railway Police Superintendent;
(c) to the Officer in charge of the Police Station in the jurisdiction of which the accident occurred.

5. It shall be the duty of the Manager to give notice of the accident—

(a) in the case of accidents on Railways open for public traffic only, to the Consulting Engineer to Government for Guaranteed Railways, who has been authorized by Government to investigate and report on such accidents, and who, for the purposes of these Rules, is hereinafter called the Government Inspector;
(b) to the Director of the Railway System, in as full detail as practicable;
(c) to the Secretary to the Local Government in the Judicial Department within 12 hours after the occurrence, in order that the Local Government may, if necessary, watch over the investigation.

6. The Manager shall, in cases of serious personal injury, afford medical aid to the sufferers, and pay all their expenses while in hospital.

7. The Manager shall cause departmental enquiry to be held promptly for the thorough investigation of the causes of every serious accident, and shall require the Superintendent of Railway Police to be present at the enquiry if possible; in his unavoidable absence, an officer of Police should be present; also he shall communicate the result of the enquiries to the Magistrate mentioned in Rule 4, and if an open line, to the Government Inspector, with a statement of the persons, if any, whom the Railway authorities intend to prosecute, unless the matter should form the subject of a Magisterial enquiry under Rule 8.

8. It shall be the duty of the Manager to bring to justice all Railway subordinates guilty of crime, or of breaches of the Railway Act or Rules and Regulations calculated to cause serious accident, and to require the Superintendent of Railway Police to make a report of all cases in which there appears to be ground for suspecting Railway subordinates of such misconduct. Also he shall require the Superintendent of Railway Police to prosecute all persons whom it may be decided should be prosecuted.

9. The Manager shall facilitate the movements of the Medical Officers, the Police, the Magistrate, the Government Inspector and others concerned, in reaching promptly the scene of the accident. And he shall assist these authorities in conducting enquiries, and depute some responsible and intelligent officer to aid them in obtaining evidence and securing the attendance of the Railway subordinates.

10. In cases in which it is the duty of the Railway Officers to arrest any offender under Section 24 of Act XVIII. of 1854, or otherwise, the Manager shall see that he is at once arrested, or when such offender is himself a Railway Officer whose removal would cause danger or grave inconvenience, that precautions are taken to prevent his escape pending the arrival of a substitute.

11. He shall arrange for the attendance at the Court or place of enquiry of any officer or servant of the Railway upon the requisition of the Magistrate or other Civil officer.

12 He shall maintain at each Railway station a list of Magistrates or other officers (such list to be furnished by the Magistrate having jurisdiction over the place where the station is situate), to whom reports of accidents should be made; and he shall furnish Magistrates with a list of Railway Officers to whom any summons may be sent for service on subordinate Railway servants.

13. In the case of judicial enquiries, he shall report the result to the Director of State Railways, and forward copy of the decision of the Court.

14. He shall report monthly to the Director of State Railways all Railway accidents of a serious nature, whether happening on the open or unopen line, and report what steps have been, or are being taken, in order to prevent recurrence of similar accidents.

15. He shall issue such detailed instructions as will give effect to the foregoing Rules, and furnish the Director of State Railways with copy of all such detailed instructions as issued.

SECTION II.

Duties of the Railway and District Police.

16. An investigation may be made by the Railway Police in the case of any Railway accident.

17. Where there is no Railway Police, the duties imposed by these Rules on Railway Police must be discharged by the District Police, in addition to their duties as such.

18. In the case of serious accidents, the Railway Police Superintendent, if any, or the District Superintendent of Police, shall proceed without delay to the scene of the accident, If either officer be himself unable so to proceed, he shall depute a subordinate, who, in the case of the District Police, shall be an Assistant Superintendent of Police. The officer unable to proceed shall also at once inform his departmental superior and the Magistrate of the District.

19. Such accident shall forthwith be investigated by the Railway Police, or the District Police, as the case may be. If the investigation be made by the Railway Police, immediate information shall be given to the District Police, either direct or through the Magistrate of the District. The result of the Police investigation, prescribed by this Rule shall be reported to the Manager of the Railway, and to the Magistrate of the District.

20. When the investigation is made by the Railway Police, and officers of the District Police arrive on the scene of the accident, the latter shall afford all necessary assistance, and shall, if occasion arise, carry the investigation beyond the limits of the Railway premises. But the Railway Police Superintendent, if present, is primarily entrusted with the duty of investigation within such limits. Subject to any provisions elsewhere contained in these Rules, the further prosecution of the case on the conclusion of the preliminary local Police investigation shall rest with the Railway Police.

SECTION III.

Duties of Civil Officers.

21. It shall be in the discretion of the Magistrate of the District, on receiving information of the occurrence of a serious Railway accident within the meaning of Rule 1, either—

(a) himself to proceed to the scene of such accident and make any enquiry;
(b) to depute a subordinate Magistrate to make enquiry; or
(c) to direct investigation to be made by the District Police.

22. In all serious cases, it will be the duty of the Superintendent of Railway Police, if any, to proceed without delay to the scene of the accident to conduct this enquiry. If unable to go, he will at once report the fact to the Magistrate.

23. The Magistrate or other officer shall summon any servant of the Railway, and all other persons whose presence he may think necessary, and, after taking the evidence and completing this enquiry, shall, if he consider there are sufficient grounds for judicial investigation, take the requisite steps to bring to trial any person he may consider criminally liable for the accident.

24. The Manager, or the Magistrate of the District, or the District Superintendent of Police, may require the Civil Surgeon of the District or any District Medical Officer to proceed to the scene of any Railway accident attended with personal injury, for the purpose of rendering medical aid, and of making before the investigating authorities any professional statements that may be required; and it shall be the duty of such Civil Surgeon or Medical Officer to proceed accordingly.

25. In cases where technical points are involved, the Magistrate or other officer should be careful to call for and take the opinion of professional persons.

26. The result of this preliminary local enquiry will be communicated by the Magistrate to the Manager of the Railway.

27. Should the Magistrate have delayed judicial action until receipt of the Railway Departmental report, he will then decide whether to discharge the persons accused, or to proceed with the case.

28. If the Manager of the Railway do not prosecute the persons considered liable by the Civil Officer, the Magistrate will arrange for their prosecution.

29. If, in the course of the judicial enquiry, the Magistrate wishes for the assistance of the Government Inspector, or Manager of the Railway, or for the attendance of any officer of the Railway, to explain or give evidence upon any matter relating to Railway supervision, management, or working, he will issue a requisition to such officers to attend the Court.

30. On the conclusion of the judicial enquiry, the Magistrate will, if necessary, report the result for the information of the Local Government, and he will send a copy of his decision to the Manager of the Railway.

31. Magistrates, through whose jurisdiction a State Railway passes, shall maintain a list of Railway officers (such list to be furnished by the Manager), to whom summons may be sent for service on subordinate Railway servants, and shall furnish the Manager with a list of Magistrates or other officers to whom reports of accidents should be made.

SECTION IV.

Government Inspector's duties.

32. On receiving notice of a serious accident, the Government Inspector shall proceed himself, or by deputy, to the scene of the accident, shall note the facts, watch the proceedings, and make such enquiries and investigations as he may think fit, calling upon the Manager or Officer in charge of the Line for any assistance needed, and shall form his own conclusions.

33. He shall send his report with any notes he may desire to record to the Government concerned, forwarding copy to the Manager of the Railway, or to the Magistrate having jurisdiction in British or in Native Territory as the case may be.

34. He shall assist the Magistrate so far as he can in person or by deputy in the judicial enquiry whenever called upon to do so.

35. In important cases, where a remedy or change of system appears necessary, he shall inform the Government of India what steps have been or are proposed to be taken by the Railway to prevent a recurrence of similar accidents, and whether in his opinion further action in the matter is desirable.

„ from the Consulting Engineer, Calcutta, No. 3317, dated 2nd December 1878, and enclosures.

OBSERVATIONS.—Owing to want of uniformity in the system of working out the averages for the columns headed "Average number employed" in the Casualty Returns of the different Indian Railways for the year under review, it appears doubtful whether the figures in the General Return are in all instances quite correct.

2. The Returns of the Sind Section, for example, in Form No I, show the average number of Europeans employed during the year under General Administration and Engineer's Department as 3 and 3½ respectively, without any casualties; while in the Numerical Return the numbers under the same heading are shown as 2 and 3 respectively.

3. The principle adopted on the East Indian Railway, of taking the number of persons employed on the 1st of each month and dividing by 12, seems to be both sufficiently correct and simple; and the Government of India desires that it may be followed on all Railways in future.

4. The late submission of the Returns of some of the Railways has delayed the compilation of the General Return, which should have been issued by the Government of India early in January last.

RESOLUTION.—All Local Governments and Officers concerned should be requested to give attention to the points above noticed, and to adopt such measures as will ensure the careful preparation and punctual submission of these Returns to the Government of India in future.

ORDERED, that this Resolution be forwarded to the Governments, Administrations and Officers noted in the margin for information and guidance, with the copies of the Returns compiled.

Madras, Bombay, Bengal, and North-Western Provinces and Oudh.
Central Provinces, British Burmah and Mysore.
Hyderabad.
The Consulting Engineers to the Government of India for Guaranteed Railways.
The Director of State Railways, Western System.

Ordered also, that copies of the Returns may be forwarded to the Secretary of State for the information of Her Majesty's Government.

Ordered further, that the Returns may be published in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Major-General, R.E.,*
Offg. Depy, Secy. to the Govt. of India.

Documents accompanying.

1.—Numerical Return of Railway Employés on the 30th September 1878.
2.—Casualty Returns for the year ending with that date.

Numerical Return of all races employed on open lines of Railways and on the Steam Flotilla on the 30th September 1878.

A. O. HUME,
Secretary to the Govt. of India

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 7th May, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Excellency the Commander-in-Chief, G.C.B.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.S.I.
The Hon'ble Sir J. Strachey, G.C.S.I.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B.
The Hon'ble Whitley Stokes, C.S.I.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble F. R. Cockerell.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.

OUDH CIVIL COURTS BILL.

The Hon'ble MR. COCKERELL moved for leave to introduce a Bill to amend the law relating to Civil Courts in Oudh. He said that the origin of the proposed legislation was the necessity which had arisen for levelling up the judicial establishments of the "Non-Regulation" to the standard of those maintained in the "Regulation" Provinces.

From the time of the introduction of uniform Codes of Procedure into *all* the Provinces of the Empire, this result must have been foreseen as sooner or later inevitable; for an elaborate Code of Procedure naturally not only promoted an increase of litigation, but also tended in a still more marked degree to enhance the time occupied in the disposal of every contested suit. The Secretary to the Government of the North-Western Provinces, in a letter addressed to the Government of India relating to this measure, wrote:—

"Although Sir George Couper has always been strongly in favour of the non-regulation system, he must admit that, owing to various causes, it is now out of date. It is enough to mention one fact; and that is the number of legal practitioners who practise in our Courts. Formerly, the parties appeared in person, and the Judge had little difficulty in ascertaining the facts of the case. Now, in a great number of suits the parties are represented by barristers or pleaders; it is not only much more difficult to get at the bottom of the case, but a great deal of time is taken up by the arguments of the lawyers; and it is no exaggeration to say that a case which would formerly have been disposed of in an hour, now often occupies the Court for two days."

Now he (MR. COCKERELL) did not wish it to be inferred from his citation of this passage that he in any way endorsed the suggestion that the action of lawyers in the conduct of cases tended to mystify or obscure the true facts and history thereof; on the contrary, he could say from his own experience that the aid afforded by the presence of lawyers on behalf of the parties in the trial of cases was extremely valuable; but at the same time it was an unquestionable fact that the interposition of these gentlemen did tend to protract the trial of suits in a great degree, and that such interposition had considerably increased of late years, and was one of the direct results of the introduction of a clear and elaborate law of procedure.

It was a somewhat remarkable fact also that in this little Oudh Province the proportion of contested to uncontested suits was far greater than in any other Province; it amounted to about 45 per cent. of the entire number of suits disposed of, whilst (to take, for the sake of comparison, a case in the extreme converse direction) in the Bombay Presidency the ratio of contested to uncontested suits was, according to the latest published statistics, barely one to five. The strain of increased judicial work upon the Oudh officers in their dual capacity of Judges and Revenue Administrators became so great, and the
