RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE 2ND QUARTER OF 1879.

Read again—

Public Works Department Circular No. 4R. of 5th March 1878.

" " " " 10R. of 12th March 1879.

Read also—

Returns of Accidents to Trains, &c., on the Open Lines of Railway in India for the quarter ended 30th June 1879.

No. 117T. of 18th November 1879, and annexure, from the Director General of Railways.

OBSERVATIONS.—The number of accidents to trains, rolling-stock, permanent-way, &c., increased from 752 in the corresponding quarter of the previous year to 1,065, or by 41·6 per cent., against an increase of 8·8 per cent. in the open mileage, and of 11·5 per cent. in the train mileage. The largest increase appears on the Sind, Punjab and Delhi Railway, and the largest decrease on the East Indian. The number of accidents on the former was 141 against 41, there being an increase of 100, and on the latter 171 against 246, there being a decrease of 75. There was also an increase of 40 accidents on the Northern Bengal State Railway and of 26 on each of the following three Railways, the Great Indian Peninsula, Punjab Northern, and Rangoon and Irrawaddy Valley.

2. On the Sind, Punjab and Delhi Railway the increase mainly took place under "Goods trains or parts of goods trains, engines, &c., leaving the rails," and "Miscellaneous."

3. On the East Indian Railway the derailments of goods trains, &c., increased from 39 to 64, but the number of miscellaneous accidents diminished from 107 to 6, apparently owing to the exclusion of accidents of a trifling nature which were included in the previous returns.

4. On the Northern Bengal there were 31 cases of broken rails against *nil* in the corresponding period of 1878.

Returns of Accidents to Trains, &c., on the Open Lines of Railway in India for the quarter ended 30th June 1879.

No. 117T. of 18th November 1879, and annexure, from the Director General of Railways.

OBSERVATIONS.—The number of accidents to trains, rolling-stock, permanent-way, &c., increased from 752 in the corresponding quarter of the previous year to 1,065, or by 41·6 per cent., against an increase of 8·8 per cent. in the open mileage, and of 11·5 per cent. in the train mileage. The largest increase appears on the Sind, Punjab and Delhi Railway, and the largest decrease on the East Indian. The number of accidents on the former was 141 against 41, there being an increase of 100, and on the latter 171 against 246, there being a decrease of 75. There was also an increase of 40 accidents on the Northern Bengal State Railway and of 26 on each of the following three Railways, the Great Indian Peninsula, Punjab Northern, and Rangoon and Irrawaddy Valley.

2. On the Sind, Punjab and Delhi Railway the increase mainly took place under "Goods trains or parts of goods trains, engines, &c., leaving the rails," and "Miscellaneous."

3. On the East Indian Railway the derailments of goods trains, &c., increased from 39 to 64, but the number of miscellaneous accidents diminished from 107 to 6, apparently owing to the exclusion of accidents of a trifling nature which were included in the previous returns.

4. On the Northern Bengal there were 31 cases of broken rails against *nil* in the corresponding period of 1878.

5. The casualties resulting from accidents to trains, &c., were among passengers, 1 killed and 13 injured against 6 injured, and among Railway servants, 3 killed and 20 injured against 5 killed and 10 injured in the 2nd quarter of 1878. Of the casualties to passengers 6 were injured on the Punjab Northern State Railway by the bursting of a 3rd class carriage lamp, and of the casualties to Railway servants, 1 was killed and 4 injured by a collision on the Indus Valley State Railway.

6. There were 3 collisions between passenger trains or parts of passenger trains, by which 1 passenger was injured; 15 collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line, by which 2 passengers were injured and 1 servant killed and 5 injured; 42 collisions between goods trains or parts of goods trains, causing injury to 5 servants; 6 collisions between light engines, causing injury to 1 servant; 18 cases of passenger trains or parts of passenger trains leaving the rails; 203 cases of goods trains or parts of goods trains, engines, &c., leaving the rails; 28 cases of trains or engines travelling in the wrong direction through points; 2 cases of trains running into stations or sidings at too high a speed; 307 cases of trains running over cattle, by which 1 passenger was killed; 30 cases of trains running over obstructions on the line; 8 cases of trains running through gates at level crossings; and 16 cases of bursting of boilers, &c., of engines. There were 69 failures of engine machinery, 10 of wheels, 13 of axles, 36 of couplings and 1 of a culvert, by which 1 servant was killed and 3 injured.

7. There were also reported 32 cases of broken rails; 6 cases of flooding of portions of permanent-way; 5 cases of slips in cuttings and embankments, by which 1 servant was killed and 2 injured; 98 cases of fire in trains; 30 cases of fire at stations or involving injury to bridges or viaducts; and 87 miscellaneous accidents, by which 10 passengers and 4 servants were injured.

8. With one exception all the cases of broken rails took place on the Northern Bengal State Railway; all the cases of failures of wheels occurred on the Rangoon and Irrawaddy Valley Railway.

9. The number of cattle accidents was the largest on the South Indian, the number of cases of bursting of boilers or tubes, &c., of engines, on the Sind, Punjab and Delhi, the number of failures of machinery of engines and of fire in trains on the Indus Valley, and the number of failures of couplings on the Rangoon and Irrawaddy Valley.

10. The casualties to passengers from causes other than accidents to trains, &c., were 5 killed and 21 injured, of whom 1 was killed and 1 injured by falling between carriages and platforms; 3 injured by falling on to the platform, ballast, &c., when getting into or out of trains; and 4 killed and 17 injured by falling out of carriages during the travelling of trains.

11. Of other persons killed and injured by the running of trains, &c., 2 were killed whilst passing over railways at level-crossings; 21 killed and 13 injured whilst trespassing on the line; 9 committed suicide, and 2 were injured in attempting to commit suicide; and 6 killed and 5 injured from miscellaneous causes.

12. The accidents to servants in the employ of Railways or of contractors whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., consisted of 33 killed and 119 injured; of these, 4 were killed and 11 injured during shunting operations; 3 killed and 20 injured by falling off engines, vans, wagons, &c.; 2 injured by coming in contact with overbridges, &c., during the travelling of trains; 1 killed and 2 injured by coming in contact while shunting with vehicles, &c., standing in adjoining lines; 4 killed and 7 injured whilst getting on or off trains, engines, &c.; 1 killed and 15 injured whilst loading, unloading or sheeting; 2 injured whilst breaking, spragging, or chocking wheels; 11 injured whilst working on the permanent-way or in sidings; 1 injured whilst walking along the line on the way home or to work; 6 killed and 5 injured whilst walking, crossing or standing on the line; 2 killed and 1 injured whilst passing between vehicles; 1 killed and 4 injured whilst attending to the machinery of engines; 3 killed and 2 injured whilst attending to gates at level-crossings; 3 killed and 1 injured by falling or being caught between vehicles and platforms; 1 killed and 6 injured by falling off ladders, scaffolds, platforms, &c.; 3 injured by the falling of lamps, wagon doors, timber, weights, &c.; 2 killed and 17 injured whilst coupling or uncoupling wagons; and 2 killed and 9 injured from miscellaneous causes.

13. The following table exhibits the total numbers of persons killed and injured from causes connected with the working of trains as compared with those in the previous corresponding quarter:—

	2nd Quarter, 1878.		2nd Quarter, 1879.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	...	8	...	14
From misconduct or want of caution	1	12	6	20
Servants.				
From causes beyond their own control	15	33	6	48
From misconduct or want of caution	26	57	30	91
Others.				
Whilst passing at level-crossings	3	4	2	...
Trespassers including suicides	41	10	30	15
Other persons	5	3	6	5
Total	91	124	80	193

14. In addition to the above, 29 persons are reported to have been killed and 38 injured in yards, workshops, &c., and 92 passengers to have met death in carriages and stations from causes unconnected with the working of trains.

15. It is stated that 1,691 beldars, &c., employed on maintenance on the Rajputana State Railway were not included with the number of employés shown in the Accident Returns of that line for the 1st quarter of 1879, and that the train-mileage shown in the returns under review is exclusive of the train-mileage run for Departments other than traffic.

16. There appears to be a diversity of practice in regard to the mode of arriving at the average number of servants employed.

Resolution.—With a view to secure uniformity of practice, the Government of India desires that the number of employés to be shown in these returns should be obtained by taking the number actually on the list on the 1st day of each month and then dividing the total by 3. The classes of servants to be included should be as enumerated in clauses IX to XI of para. 5 of Public Works Department Circular No. 4R. of 5th March 1878. Further, the train-mileage required to be shown in Tables 3 and 4 should be the train-mileage of all descriptions, *i.e.*, the mileage of trains run for traffic purposes, as also of those run for the Locomotive and Engineering Departments.

Order.—Ordered, that this Resolution be communicated to the Governments, Administrations and Officers noted in the margin for information and guidance, together with copies of the returns compiled.

Madras, Bombay, Bengal and the North-Western Provinces and Oudh.
Central Provinces, British Burmah and Hyderabad.
The Consulting Engineers to the Government of India for Guaranteed Railways.

Ordered also, that these papers be forwarded to the Government, Administrations and Officer marginally noted for information, and to the Foreign Department for communication to the Chief Commissioner of Mysore and Coorg for information, and that copies be forwarded to the Secretary of State for the information of Her Majesty's Government.

Punjab.
Assam.
Rajputana.
Central India.
Director General of Railways.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

J. S. TREVOR, *Major-Genl., R.E.,*
Offg. Depy. Secy. to the Govt. of India.

TABLE No. I.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the Second Quarter of 1879, as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between Accidents happening from Causes beyond their own Control, and Accidents happening otherwise.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

AMALGAMATION OF THE DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE WITH THE HOME DEPARTMENT OF THE GOVERNMENT OF INDIA.

From the Government of India, to Her Majesty's Secretary of State for India,—No. 52 (Public), dated Simla, the 28th July 1879.

In His Grace the Duke of Argyll's despatch No. 16 (Revenue), dated the 27th April 1871, the sanction of Her Majesty's Government was given to the formation of a separate Department under the Government of India for the transaction of business connected with Revenue, Agriculture, Forests, Commerce, and the Industrial Arts of India. Effect was given to this sanction in June 1871; and the Department which was then constituted was designated the "Department of Revenue, Agriculture and Commerce."

2. In July 1878, we deemed it desirable to appoint a Committee of our Secretaries to consider and report upon the best method of revising such of the Secretariat and other Establishments connected with the Government of India as might be found capable of reduction, in consequence of diminution of work caused by the recent measures for increasing the financial and administrative powers and responsibilities of the several Local Governments. The Committee submitted a report on some of the subjects which have come under its consideration; and one of these subjects was the amalgamation of the Home with that of the Revenue, Agriculture and Commerce Department. From the appended extract from that report it will be seen that the Committee unanimously recommend that the Secretariat work of the three Civil Administrative Departments, namely, Financial, Revenue, Agriculture and Commerce, and Home, be redistributed between two amalgamated Departments.

3. The urgent need which now exists for economy in all branches of the Administration, and the duty which lies upon us of setting an example to the Local Governments from which sacrifices are required, have lent weight to the recommendation made by the Committee of Secretaries. And we have, after full consideration of this proposal, and for the reasons fully set forth in the enclosed copy of our Resolution of the 14th June, sanctioned the arrangement suggested by the Committee. We shall be careful that the amalgamation of Departments does not cause any slackness in our endeavours to promote the growth of the land and forest revenue; the better and economical management of the public forests; the improvement of agriculture; the better conduct of coolie emigration; the supervision of the salt, customs and statistical departments; and the other highly important matters which have for some years past been dealt with in the Revenue, Agriculture and Commerce Secretariat. We confidently hope that under the new arrangements there will be no loss of efficiency in the administration of any of these branches of the public service. The work hitherto conducted in the three Administrative Departments of the Government of India named in the next foregoing paragraph will now, with the exception of Marine affairs, be redistributed between two Secretariats, to be called—

"The Department of Finance and Commerce."
"The Home, Revenue and Agricultural Department."

The subjects which will, henceforth, come under the cognisance of these two Departments will be as follows:—

FINANCE AND COMMERCE.

1. The public Accounts, including Estimates, Banks, Money Orders, and Alienations of Revenue.
2. The Public Expenditure.
3. The Public Ways and Means, including Loans to and from the Public Treasury.
4. The Management of the Public Funds.
5. The Mints.

6. The Paper Currency.
7. Leave, Pay, Allowances, Pensions and Gratuities of Public Officers.
8. Assessed Taxes.
9. Excise.
10. Opium.
11. Salt.
12. Customs.
13. Stamps.
14. Post Office.
15. Statistics.
16. Commerce and Trade.
17. Merchant Shipping.
18. Stores from Europe.

HOME, REVENUE AND AGRICULTURAL.

1. Law and Justice.
2. Jails and the Penal Settlements in the Andaman and Nicobar Islands.
3. Escheats; the Administration of Estates of Intestates.
4. Police.
5. Education.
6. Industry, Science and Art.
7. Sanitation.
8. The (Civil) Medical Service.
9. The Ecclesiastical Service.
10. Civil Service Questions.
11. Registration of Assurances.
12. Patents.
13. The Working of the Vagrancy Act.
14. The Working of the Arms Act.
15. Copyright.
16. Census.
17. Meteorology.
18. Gazetteers.
19. Weights and Measures.
20. Land-Revenue and Settlements.
21. Takavi.
22. Surveys:
    - I.—Great Trigonometrical.
    - II.—Topographical.
    - III.—Revenue.
    - IV.—Archæological.
    - V.—Geological.
23. Minerals.
24. Municipalities and Local Funds.
25. Emigration.
26. Agriculture and Horticulture.
27. Fibres and Silk.
28. Cattle-breeding and Cattle Disease.
29. Fisheries.
30. Forests.

All questions connected with Ports and Port-dues, Lighting and Pilot Services, Marine Surveys, and Dangers to Navigation, will be transacted in the Marine Branch of the Military Department.

4. The immediate saving effected by these arrangements will be—

	Rs.
Salary of a Secretary to Government	42,000
Salary of a Registrar	8,400
	50,400 per annum.

A further saving will, eventually, be made in the strength and cost of the Establishment of Clerks and of the Printing Establishment pertaining to the branches of business transferred to the Department of Home, Revenue and Agriculture and to the Military Department. It is hoped that such saving will amount to about Rs. 40,000, inclusive of contingencies and tour allowances.

5. We have sanctioned for Mr. A. O. Hume, C.B., whose appointment as Secretary to the Government of India is abolished, a personal allowance of Rs. 666, in addition to the salary (Rs. 3,500) of his new office as Member of the Board of Revenue, North-Western Provinces. We have done this in order that he may not lose by the abolition of an office which he has now, with certain intervals of other duty, filled for eight years. So long as Mr. Hume draws the personal allowance, our Secretary in the Home, Revenue and Agricultural Department will receive the salary of Rs. 3,500, as sanctioned in the Duke of Argyll's despatch for the junior of the two Secretaries attached to the Home and Revenue Departments.

6. We trust that the proceedings now reported will meet with Your Lordship's approval.

From Her Majesty's Secretary of State for India, to His Excellency the Right Honourable the Governor General of India in Council, No. 46 (Revenue), dated India Office, London, 6th November 1879.

PARA. 1. I have received Your Excellency's letter, in the Public Department, No. 52 of the 28th July last, transmitting papers relative to the distribution of the work hitherto performed by the Department of Revenue, Agriculture, and Commerce, between the Financial and Home Departments, and reporting the alterations made in consequence in the administrative arrangements of your Government.

2. The Department of Revenue, Agriculture, and Commerce has, since its establishment in 1871, been the means, under the able management of Mr. A. O. Hume, of introducing several important fiscal and administrative reforms, the results of which cannot fail to have a lasting effect, and I cannot but regret that it should have become necessary to deprive it of its separate and distinctive character.

3. The financial reasons stated in para. 3 of Your Excellency's letter are, however, so strong as to induce me to accede to the modification of arrangements which, when originally made by the Government of Lord Mayo, were cordially approved by my predecessor, the Duke of Argyll, as likely to effect a very important and advantageous administrative change.

4. I must observe that it is the work of the Home Office, rather than that of the Department of Revenue, Agriculture, and Commerce, that has been materially reduced by the system of decentralization, and I am, therefore, glad to notice that the growth of the revenue, the promotion of agricultural improvements, the development of the material resources of the country—objects of permanent importance, the need for which, you justly observe, is greater than ever—will not be allowed by you to suffer from a change by which the Department, whose special duty it hitherto has been to promote these objects, will be merged in other Offices.

5. With the watchful care which Your Excellency's Government will give to the subject, I trust that your confident hope will be justified that the redistribution of business you have now effected will cause no loss of efficiency in any branch of the public service.

GOVERNMENT OF INDIA.

C. BERNARD,
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 30th DECEMBER 1879.

GENERAL REMARKS.—Rain has fallen and done much good in parts of Madras, over the whole of the Punjab, and in parts of the North-West, Oudh, and Rajputana. Elsewhere rain is wanted for the spring crops, which, however, promise well. The winter harvest has been good everywhere. Prices have fallen. The public health continues to improve.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Dec. 27th)	...	*Ragi* 26·19; harvest of early dry crops; sowing of second crop paddy; standing crops in good condition.
Kurnool („ „)	...	*Ragi* 19·29; paddy being harvested, outturn half to full; blight in two taluks; pasture and water abundant.
Ganjam („ „)	...	*Ragi* 29·71.
Kistna („ „)	...	*Ragi* 27·77; dry crops being harvested, outturn half to three-fourths; 25 inches water over anicut.
Chingleput („ „) (Madras)	1·57 (average of 8 stations).	*Ragi* 22·99; sowing in two taluks; standing crops somewhat injured by insects in parts of four taluks, elsewhere doing well; harvest in parts, outturn half to three-fourths; pasture abundant.
Coimbatore („ „)	·32 (average of 3 stations).	*Ragi* 25·59; dry crops withering in parts of nine taluks; wet crops in fair condition; harvest of paddy, *cholum*, *ragi* and *cumboo*, outturn paddy three-eighths to full, others one-eighth to half.
Tanjore („ „)	5·95 (average of 12 stations).	*Ragi* 26·0; crops doing well; harvest of paddy, outturn half to full.
Madura („ „)	·14 (average of 2 stations).	*Ragi* 24·73.
Malabar („ „)	...	*Ragi* 21·68; harvest commenced in three taluks.
Travancore („ „)	...	State of food market unchanged.
		General Remarks.—General prospects generally good, but want of rain much felt in west part of South Arcot and in Trichinopoly.
Bombay— (Dec. 31st)		
Kurrachee ...	...	River at Kotri on 27th, 2 feet 1 inch against 4 feet 7 inches on same date last year; *rabi* crops coming on fairly; locusts about Sujawal, Shahbandar and Kohistan, damage in first; fever and cattle disease prevalent.
Hyderabad ...	...	Sky clear; weather seasonable; small-pox in Naushahro taluka; camels dying in taluka Moro; locusts about still.
Ahmedabad ...	...	*Rabi* sowing completed; fever gradually decreasing.
Baroda ...	...	All crops good; sugar-pressing in progress; health improving.
Surat ...	...	Standing crops healthy; fever in three talukas.
Násik ...	...	Ague in four talukas; cattle disease in two talukas; measles in one; *rabi* crops fair.
Colaba (Bombay) ...	...	Average abnormal temperature 3 degrees cool; dryness of air normal; wind normal.
Poona (Dec. 28th)	...	Cholera in city; 53 cases, 35 deaths, since 25th.
Ahmednagar ...	...	Crops in inferior soil withering; injury by rats in Kopergaon.
Sholapore ...	...	Cold has injured crops in places; prices slightly lower.
Dharwar ...	...	Late crops promising; exotic cotton blighted in three talukas.
Kánara ...	...	Harvest completed above ghat; cattle disease and fever continue.
Rajkot ...	...	Weather cold; *rabi* promising; health good.
		General Remarks.—Weather fine; crops generally promising; public health improving, but cholera in Poona.
Bengal—		
Chittagong ...	*Nil*	Weather seasonable; harvesting of *amun* nearly completed; cold-weather crops being sown; cholera still prevails in cyclone tract.
Dacca ...	*Nil*	Prospects of crops satisfactory; public health good.
24-Pergunnahs (Alipore)	*Nil*	Prospects of *amun* and winter crops fair; yield expected to be satisfactory; *amun* harvesting continues; major portion reaped and harvested; health generally good; a few cases of cholera reported from Busseerhat.
Moorshedabad ...	*Nil*	*Haimanti* paddy being harvested; *rabi* crops doing well; epidemic fever still prevalent in thana Burwa; cases also reported from other thanas; cholera appeared in Berhampore town.
Rajshahye ...	*Nil*	Weather cool and clear; heavy dews at night; winter rice still being cut; outturn generally very good where crop not damaged by floods; spring crops have come up well and thriving; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Burdwan ...	*Nil*	All *rabi* crops doing well, but some rain would improve them; health good.
Rungpore ...	Few drops of rain on 28th and 29th.	Weather cool; crops continue good; fever abating.
Bhágalpur ...	*Nil*	Weather cold; prospects of *rabi* crops and general health good.
Purneah ...	*Nil*	*Aghani* harvested with a good yield; *rabi* promises well; public health good.
Patna ...	*Nil*	Rain wanted for *rabi*.
Durbhanga ...	*Nil*	Weather cloudy; *aghani* harvest nearly finished; *rabi* continues well, but will soon be better for rain; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; crops doing well, though a shower of rain would be much beneficial to them; general health good.
Cuttack ...	*Nil*	Winter crops progressing well; rice being harvested; small-pox very prevalent.
		General Remarks.—*Amun* harvest nearly completed; outturn generally good, except in inundated places in Central Bengal and in parts of Burdwan Division; *rabi* crops promising, but rain would now be beneficial in some places; fever, cholera and small-pox still reported from some districts, otherwise public health satisfactory.
N.-W. Provinces and Oudh—		
Benares (Dec. 30th)	...	Prospects good; weather cloudy during latter part of week; a fall of rain would be advantageous to the *rabi*; health good.
Allahabad („ „)	*Nil*	Sky clear, clouds gathered heavily yesterday, but dispersed without a shower; irrigation of *rabi* in progress; sickness disappearing; wheat 13$\frac{5}{16}$, coarse *chanwal* 19½, unhusked *dhan* 37$\frac{3}{8}$ seers.
Gorakhpur („ 30th)	·3	Weather now clear; fever greatly decreased.
Jhánsi („ 31st)	...	*Rabi* prospects good; prices stationary.
Agra („ 30th)	·2 (average)	*Rabi* progressing well; sickness disappearing; weather seasonable.
Bareilly („ 31st)	Slight rain on 28th.	Weather clear and cold.
Meerut („ „)	1·0	Prospects are good.
Kumaun („ 30th)	Heavy rain.	Snow on 27th and 28th; prospects good.
Lucknow („ 31st)	Slight shower on 27th.	Weather seasonable; prospects good.
Partabgarh („ 29th)	...	Prospects good; irrigation of *rabi* crops is in full progress; sky cloudy.
Sitapur („ 31st)	·2	Prospects good.
Fyzabad („ „)	*Nil*	Prospects of crops are good.
		General Remarks.—Rain wanted in places; prospects generally good.
Punjab—(Dec. 30th)		
Delhi ...	1·3	Prices stationary.
Hissar ...	2·0	Present prospects very good.
Umballa ...	·7	Agricultural prospects good.
Jullundur ...	·8	Agricultural prospects promising; prices steady; health good.
Lahore ...	·4	Public health and agricultural prospects good.
Ferozepore ...	·6	Prices steady; prospects good.
Siálkot ...	·6	*Rabi* prospects good.
Ráwalpindi ...	1·0	Agricultural prospects good.
Peshâwar ...	·5	Crops reported to be still suffering from frost.
Mooltan ...	A drizzling rain.	Prospects good; prices have fallen slightly.
Dera Ismail Khan ...	·4	Prospects fair; health good.
		General Remarks.—The rainfall which has been general has come in good time; agricultural prospects are now very good.
Central Provinces—		
Nágpur (Dec. 31st)	...	Clear and cold; *jowar* cutting; threshing continues; prospects of *rabi* good.
Jubbulpore ...	...	Clear and cold; prospects good; few cases of small-pox; prices stationary.
Saugor	...	*Kharif* crops being gathered; *rabi* prospects good; no epidemic; prices stationary.
Seoni	...	Clear and cold; *rabi* prospects continue good.
Hoshangabad ...	...	No report received.
Raipur (Dec. 27th)	...	Clear and cool; *kharif* harvest continues; prospects of *rabi* favourable; cattle disease in Simga and Dhamtari tahsils.
Sambalpur ...	...	No report received.
		General Remarks.—Clear and cold; *kharif* harvest well forward; prospects of *rabi* continue good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(Dec. 31st)		
Akyab	·01	Total rainfall 227·22; public health good; reaping steadily progressing.
Rangoon	*Nil*	Total rainfall 113·69; no deaths from cholera or small-pox reported in Rangoon town; slight fever and small-pox continue in parts of district; very slight cattle disease; reaping of crops going on.
Bassein	*Nil*	Total rainfall 98·49; public health good; crops nearly reaped.
Prome	Slight rain.	Total rainfall 44·83; public health good; reaping nearly over.
Amherst (Moulmein) ...	*Nil*	Total rainfall 171·25; public health good; half the crops reaped threshing commenced.
Toungoo	*Nil*	Total rainfall 76·42; public health and agricultural prospects good. *General Remarks.*—General health good; some fever and small-pox slight cattle disease; weather cloudy, close and unhealthy; reaping well advanced.
Assam—(Dec. 31st)		
Gauháti	·75	Weather unsettled and variable; mornings raw and foggy; reaping and gathering of *sali* crops almost finished; prospects of other crops tolerably favourable.
Sylhet	*Nil*	Weather seasonable; reaping over; outturn about ten annas (average).
Cachar	*Nil*	Weather seasonable; prospects and outturn of rice crops very good common rice 13$\frac{5}{8}$ seers a rupee; public health good.
Dibrugarh... ...	*Nil*	*Sali dhan* almost all harvested; outturn of *moong kalai* fair; district healthy.
Berar & Hyderabad—(Dec. 31st)		
Amráoti	...	*Rabi* promising; cotton below average.
Akola	...	*Jowari* damaged by excessive cold.
Hyderabad... ...	*Nil*	Weather clearer and considerably warmer; agricultural prospects somewhat unfavourable owing to blight.
Mysore and Coorg—(Dec. 31st)		
Bangalore ...	*Nil*	Standing crops in fair condition; prospects favourable; health good; prices fluctuating; harvest in Coorg was abundant.
Mysore ...		
Mercara ...		
Central India States—(Dec. 31st)		
Indore	...	No change since last report.
Morar (Gwalior) ...	...	Weather seasonable.
Sutna ...	...	Prospects good; *jowar* 26 seers.
Rutlam ...	...	Health and agricultural prospects good.
Neemuch ...	*Nil*	
Agar ...	...	Health good; prospects favourable.
Manpur ...	...	*Rabi* crops good.
Rajputana—		
Serohi (Dec. 28th)	·15	Wells full; tanks drying; malarious fever still prevalent; crops doing well; cloudy and warm.
Marwar („ 27th)	·06	Wells full; a month's water in tanks; health good; crops excellent; cloudy, and cold intense.
Harowtee ...	·10 in Deoli	Health and prospects good.
Jhallawar (Dec. 29th)	...	Warmer and cloudy; health and prospects good.
Ajmere („ 31st)	·51	Weather cold; prospects excellent.
Bhurtpore ...	...	Prospects encouraging; weather seasonable; fever abating.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 24th December, 1879.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir John Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Sayyad Ahmad Khán Báhádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore, C.S.I.
The Hon'ble G. H. M. Batten.
The Hon'ble C. Grant.
The Hon'ble E. C. Morgan.
The Hon'ble J. Pitt-Kennedy.
The Hon'ble G. C. Paul.

RELIGIOUS CONGREGATIONS BILL.

The Hon'ble MR. STOKES presented the further Report of the Select Committee on the Bill to provide for the holding of property by certain Religious Congregations.

MILITARY CANTONMENTS ACT AMENDMENT BILL.

The Hon'ble MR. STOKES also presented the further Report of the Select Committee on the Bill to provide for the revision of proceedings in trials held under the Military Cantonments Act, 1864, section 20.

TRADES AND PROFESSIONS TAX BILL.

The Hon'ble SIR JOHN STRACHEY moved that the Bill to impose a tax on Trades and Professions be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Thompson, Hope and Colvin, the Hon'ble Mahárájá Jotíndra Mohan Tagore, and the Hon'ble Messrs. Batten, Morgan and Paul and the Mover. He said:—"MY LORD, When this Bill was introduced into the Council, some six weeks ago, I explained the reasons which rendered it desirable that the measure should be passed into law before the end of the year. The most important of these reasons was this, that all the existing License Tax Acts, excepting that in force in Lower Bengal, require the assessments and collections to be made for the calendar year; the demand of the Collector has to be published in the beginning of January, and the tax has to be paid in February. It was, however, found quite impracticable to proceed with the Bill as soon as we had originally hoped to do. We are now holding our first meeting of the Legislative Council in Calcutta on the 24th December; the Bill has not yet been referred to a

Select Committee, nor are all the papers connected with it, and all the opinions which have been received regarding it, in the hands of the Members of the Council. Under these circumstances it was clear that the idea of passing the Bill before the end of the year must be abandoned, and the Government had to consider what course should be adopted. The legal difficulties which seemed to render legislation in December necessary have however been got over, for the Government has been advised that it is in its power to give executive orders to the Local Governments, which will have the effect of preventing any fresh assessments or collections being made pending the passing of a new Act. Instructions have been issued accordingly, and no embarrassment will be caused by the delay in legislating. This delay will in other ways be advantageous. There will be more time for the careful consideration of the Bill, and there is another important advantage which we shall gain. It was not altogether satisfactory that a measure of this kind should be enacted at a time when it is not possible to lay before the Council and the public a complete explanation of the financial position, and we shall now postpone, until after the publication of the Budget, the proposal to pass the Bill into law. It must at the same time be remarked, as I have more than once had occasion to say, that all the local authorities lay great stress on the importance of not leaving the work of assessing taxes of this kind until the weather has become so hot that the Collectors and European officers cannot easily visit the places where the assessments are made, and give to the matter their full personal attention. We shall therefore endeavour to bring out the Financial Statement at a somewhat earlier date than usual, and if meanwhile the Select Committee will consider all the details of the Bill, so that they may be able to report upon it as soon as possible after the Statement is made, we may hope that from an administrative point of view the delay in proceeding with the Bill will not be injurious.

"I must now, my Lord, explain to the Council the course which the Government proposes to take.

"We have received a great number of opinions and criticisms, many of them very valuable, from the Local Governments and their officers, from various public bodies, and from other quarters, and the fresh light thus thrown upon the question will, I hope, enable us to make great improvements in the measure as it was originally introduced. I will state to the Council the principal changes which the Government now proposes in the Bill.

"In the first place it has become apparent that the wisdom of repealing all the Local Acts and substituting for them one Imperial enactment is very questionable. Circumstances vary so much in the different provinces of India, and the machinery by which measures of this kind have to be carried out differs so greatly, that there are plainly many advantages in leaving all details to be settled by the local Legislatures and local Authorities, and in contenting ourselves with prescribing those general principles only which we desire should be everywhere carried out. This is, in the present case, the more true, because, as I shall presently explain, the changes which the Government has proposed to make in the local License Acts are really, with one exception, not great, and if the modifications in the Bill which I am about to describe to the Council be adopted, those changes will become still smaller. We now propose to leave all the local Acts in force; certain amendments in the schedules which prescribe the fees to be levied on the various classes and a provision extending the tax to professional men will be required; but this can be done by a very few sections in our Bill, which, so far as it affects the trading and professional classes, will then become a very small measure. A great part of the Bill will disappear altogether, and the provisions of general application to all India will be almost confined to those which extend taxation to the official and salaried classes.

"I will now, my Lord, endeavour to state the principal points on which further explanations are necessary, and it will be convenient that I should first refer to some of the more important objections which have been made to the Bill.

"There has been a very common feeling that the Bill, in the shape in which it was introduced, was hardly to be distinguished from an income-tax on the

classes affected by it. The measure has been attacked as an unnecessary and unjustifiable attempt to re-impose, under another name, a hateful impost which was deliberately abandoned by the Government only six years ago. I fear that upon those who do not scruple to attribute to the Government of India deliberate and habitual dishonesty in all its dealings, words would be wasted in the attempt to prove that we have not been dishonest in this or any other particular instance. But, for the information of more charitable opponents, I am glad to take this opportunity of stating the facts.

"The conclusion having been arrived at that it was proper to extend to the official classes taxation somewhat similar to that which had been imposed under the License Tax Acts on traders, it was clear that there was only one reasonable way in which the decision could be carried out. This was to levy the tax by a percentage on actual salaries. It would have been impossible to have adopted any other plan. It is clear that the only reason for applying to the taxation of traders the system of classification adopted in the License Acts is, that there are no means of ascertaining the exact amount of their incomes, and it is highly desirable to avoid any minute inquisition. If it were possible to find out, by some perfectly unobjectionable means, their real income, everybody would agree that the plan of charging a percentage on that income would be the proper one to adopt. The rough process of assessment by classes necessarily leads to the injustice of taxing persons who have smaller means at the same amount as those who have larger, but this injustice was accepted as the lesser of two evils. In the case of the official classes we know every man's actual salary, and the salaries of the servants of Companies and private persons can easily be ascertained. To tax them in classes, like the traders, and not by a percentage on their salaries, would really be inequitable and indefensible. No one can believe that it would be accepted as reasonable that an officer receiving Rs. 5,000 a year should pay the same tax on his salary as one receiving Rs. 10,000; and no one would accept as a valid reason for such a conclusion the fact that this was the way in which taxation was imposed on persons deriving their incomes from trade.

"When, however, it was determined to tax the officials by a percentage on their salaries, it was naturally felt desirable to make the incidence of the tax on them and on the other classes as equal as was practicable. It was, as the Honourable Mr. Batten pointed out at the last meeting of this Council, an inevitable and logical consequence of this extension of taxation to the officials that the maximum taxes paid by the commercial classes should be raised. It was felt, as he said, that it was not right to tax a high official more heavily than an equally rich man who derived his income from commerce. 'The maximum tax on traders is now' (as Mr. Batten said) 'in Madras Rs. 800; in Bengal Rs. 500; and in Bombay only Rs. 200. Directly it is determined that officials shall be taxed by a percentage on their salaries, and any other mode of directly taxing them would, I submit, be almost absurd, it becomes impossible to maintain the maximum taxes at the sums which I have mentioned.'

"It was in consequence of all this that the schedule of the present Bill took its present form. The number of classes was increased and the differences between the various classes were diminished. The result was a schedule according to which the taxation on the trading and professional classes would undoubtedly have been assessed under a system nearly approaching the assessment of a percentage on the estimated annual amount of their earnings. In other words, the assessment would have been very like that of an income-tax; and I quite admit that this was hardly consistent with some of my own remarks, or with the Statement of Objects and Reasons, which said that 'the system of classification now in force is generally retained.' In the existing Acts, the system followed was to have a small number of classes. It was always admitted that under such a system there must be a good deal of inequality, and that the burden must fall more heavily on the poorer than on the richer persons included in a class. But this inequality was accepted as a smaller evil than that involved in making an inquisition into individual

incomes. I do not, therefore, deny that the schedule to the present Bill, although theoretically much fairer and more logical than the schedules of the existing Acts, is open to the objections to which I have alluded.

"The announcement which I have made that the Government proposes to maintain, with very little alteration, the existing License Tax Acts will, I hope, go far to remove these objections, for I do not see how it can still be said that this is an income-tax in disguise. If the present proposals be adopted, the obnoxious schedule will disappear, and the existing system will remain in force in all its main features.

"There were, my Lord, only two things which the Government in introducing this measure looked upon as essential. It desired in the first place to exempt from taxation a great multitude of people with small incomes. Experience had shown that we were taxing more than a million persons,—I now believe the number to be at least a million and a quarter—for the sake of £240,000 a year. This was clearly neither politically nor financially wise.

"The second object which the Government had was to extend taxation to the official and professional classes. There had been a very general feeling, the justice of which we could not deny, that they ought not to remain untouched when direct taxation was being levied on the traders and landholders. This feeling found expression in public meetings, and in memorials of the Chambers of Commerce of all three Presidencies.

"The Government desires that these two objects shall be carried out in the most equitable way possible, and provided that they are gained, it looks upon everything else as matter of detail. It cannot give up these taxes, because it considers it essential to maintain them; but it is most anxious to do everything in its power to reduce their defects to a minimum, and to remove, so far as practicable, every cause of difficulty which it is possible to foresee.

"I will now state as clearly as I can the course which the Government proposes to adopt.

"We desire to make no changes in the existing Acts which are not, in view of the determination to extend taxation to the professional and official classes, unavoidable.

"In regard to the professional classes, it will, I believe, be sufficient to insert in the existing Acts a single section, to the effect that the words 'trade' and 'calling,' wherever they occur, shall be deemed to include a profession.

"In regard to the official and salaried classes, no change of any importance is contemplated by the Government in the Bill as it now stands, but there are some details in regard to which alterations may be found proper. A good deal of complaint has been made regarding the sections which oblige private employers to levy the tax from persons in their employment, and which impose certain liabilities on both parties. These and many other questions will doubtless be considered by the Select Committee, and the Government will accept whatever view appears to the Committee and to the Council to be just.

"In regard to the trading classes, before coming to other matters, there is one announcement of importance which I have to make on behalf of the Government.

"When this Bill was introduced, I stated that the Government proposed that Rs. 250 should be the minimum income liable to this form of taxation, and I said that in fixing this amount we were giving greater relief to the poorer classes of traders than most of the Local Governments think necessary. It is now estimated that by this change we shall exempt not less than 1¼ million persons from taxation, and shall give up revenue to the amount of about £240,000. The Government now proposes to extend this relief still further. We find that by sacrificing an additional sum of about £100,000, we shall be able to fix the lower limit of liability to the tax at an annual income of Rs. 500, and exempt from taxation at least 250,000 more people. This the Government now proposes to do. There will remain in all India certainly not more than 250,000 traders liable to the tax. The financial result of all the changes thus proposed will be as follows. We now obtain from the license-tax £870,000 a year. We propose to give up a sum of £340,000. We expect on the other hand to obtain £240,000 from the extension of taxation to the professional, official, and salaried classes, and from raising the maximum tax on the commercial classes to the Madras limit, as I shall presently explain. Thus we expect to get altogether from these taxes £770,000, or £100,000 less than the amount which we now receive.

"The effect of these measures will be to remove from the schedules of the existing License Acts (which vary somewhat in their details in different provinces and of which it is not now necessary to speak in detail) those classes and grades including traders whose annual earnings are less than Rs. 500. Since, as I have already explained, we do not propose to repeal the existing Acts, the present classification will otherwise remain unaltered with the following exceptions. In Bombay the maximum fee now payable is Rs. 200; in Bengal, the North-Western Provinces, Oudh, the Punjab, and wherever the Northern India License Act is in force, the maximum fee is Rs. 500; and in Madras it is Rs. 800. We propose to leave the Madras Schedule unaltered; to add in the Bengal and Northern India Schedules one class with a fee of Rs. 800; and to add in Bombay two classes, one paying Rs. 500 and the other paying Rs. 800. Thus the maximum tax at present leviable in Madras will be applied throughout India.

"As, with these exceptions, no change is proposed in the present law so far as it affects the richer classes of traders, the tax will be levied exactly as it is now. Whatever objections there may have been to this form of taxation will no doubt remain, so far as the persons are concerned who are liable to it; but at any rate there will be no ground for the charge that we are completely changing the character of the existing Acts and virtually introducing an income-tax. For in this respect there will be absolutely no alteration in the present system.

"In thus avoiding anything like an income-tax, and as one of the consequences of fixing a maximum fee of Rs. 800 as the highest amount which can be demanded from any trader or professional man however rich, we find ourselves landed in a difficulty.

"The sum of Rs. 800 is much less than that which will be paid by some of the highest officers of Government at the rate of 1½ per cent. on their salaries. The number of officers in this position will, however, be very small. There will be the Viceroy, the Governors of Madras and Bombay, the Lieutenant-Governors, the Commander-in-Chief, the Members of Council, the Chief Justice, and possibly a few others. Excepting these officers, the highest salary paid to any Government officer in India is Rs. 50,000 per annum. One and a half per cent. on this sum would be Rs. 750. Thus, the maximum tax ordinarily paid by the officials, professional men, and traders, will be approximately the same; but there will be this exception, that the few high officers already mentioned will have to pay more, and some of them a great deal more, than Rs. 800 per annum. Your Excellency, for instance, will have the pleasure of paying an annual tax of Rs. 3,600.

"It is, of course, impossible to maintain that this is just, but it is an illustration of the numerous anomalies which must arise under any system of direct taxation short of a general income-tax. It is not so serious an anomaly as others which I could mention; as for instance, that presented by the fact that there are in this Province of Bengal landed proprietors receiving incomes measured in hundreds of thousands of pounds, which are now almost untouched by taxation. The only way in which we could make the richest class of traders and professional men pay as much as the high officers that I have mentioned would be by applying to them a system of assessment virtually the same as that of an income-tax. As we desire to avoid this, we must be content to let these officers pay more than their equally rich neighbours. It would no doubt be possible to fix a maximum of Rs. 800 for the official classes also, but it seems to the Government that this would lead to still worse evils. We could not with propriety, or indeed with decency, say that all Government servants with salaries between Rs. 1,200 and Rs. 50,000 a year shall pay at the rate of 1½ per cent. on their salaries, but that those officers who get more than Rs. 50,000 shall be exempted from paying

in proportion. The fact is that the system under which the trading classes are taxed being essentially different from that which is applicable to the officials, it is impossible that the burden should fall with complete equality on both classes alike. I may add that financially this part of the question has little importance. The number of traders and professional men with incomes exceeding Rs. 50,000 a year is very small, and the additional revenue obtained by making them pay more than the maximum license-fee of Rs. 800 would not be great. Taking everything into consideration, it is not worth while to add more classes to the License Acts, merely for the purpose of rendering the law more symmetrical, and theoretically more equal, and making a few rich traders and professional men pay as much as the highest officials.

"I have now, my Lord, explained all the principal changes which the Government thinks it desirable to make in the Bill now before the Council. If the motion which I am about to make be agreed to, and the Bill be referred to a Select Committee, we shall propose to the Committee to adopt these modifications in the Bill. I have no doubt that the Committee will be able to suggest other improvements.

"It will be observed from all I have said today, that, although the Government is quite ready to make many important changes in this Bill, it adheres to the opinion that the taxation of the richer members of the trading, professional, and official classes is essential. They have been contributing little or nothing towards the expenses of the State. Justice and financial considerations alike require that they should so contribute, and it is only by direct taxation that this object can be gained. My Lord, I often read in the newspapers that one of Sir John Strachey's most mischievous delusions is his persistent preference of direct to indirect taxation in India, and that his constant desire is to substitute the former for the latter. My Lord, every man's motives are best known to himself; but, if language be any indication of motive, I may ask my critics to point out any single occasion on which I have said anything of the kind. I affirm, not only that I have never, either in public or in private, maintained any such doctrine, but that no such idea has ever entered into my head. If in formerly approving the imposition of the income-tax and other forms of direct taxation, and in regretting their loss, I have erred, I have erred in company with many of the wisest and most experienced of Indian statesmen, among whom I will now name one only, Lord Lawrence, my honoured and lamented master. No man knew India better than he, and never was there a man who would have more strongly and indignantly refused his consent to measures which he thought must entail injustice and oppression on the people. He believed—and I believe—that there are some classes of the community which have borne no proper part of the public burdens, although no classes are better able than they to bear their share; that it is by direct taxation alone that they can be reached; and that with reasonably good administration, which it is certainly within our power to secure, there is no necessity whatever for any gross abuses in the assessment and collection of taxes of this kind. If we could make these classes contribute in any other way to the necessities of the State, without adding to the burdens of others who already contribute in fair proportion to their means, we should be most glad to do so; but this is impossible. We impose direct taxation upon them, not because we prefer direct taxation to indirect, but because we must tax them directly or not at all.

"I have been now speaking as if the taxation now proposed ought to be permanently maintained, independently of the actual financial position in particular years, not necessarily with its present details, but at least substantially. Those who differ from this opinion will have ample opportunity of stating their views, since, as I have already said, it is not proposed to ask the Council to pass this measure, nor even to ask the Select Committee finally to report upon it, until the Financial Statement for next year is before the Council and the public. The view that taxation of this kind, although it may be tolerated for a time, in case of unavoidable necessity, ought to be given up whenever the condition of the finances makes it possible to dispense with it, has often been maintained. It has lately been expressed very clearly and temperately and well in the

memorial submitted by the Bengal Chamber of Commerce. The Chamber produces evidence, drawn from the accounts and statements published by the Government, to show that there has been a great improvement in our financial position; it says there is a widespread impression that the Government could now afford to dispense with the license-tax altogether, and that before any attempt is made to pass the measure before us into law, a full statement of the present and prospective position of the public finances should be made. I cannot now discuss that position, but the hope with which the memorial of the Chamber concludes has been met by the announcement which I have already made that the final consideration of this Bill will be postponed until after the publication of the Financial Statement. With regard to the general financial position, I can now only repeat what I said when the Bill was introduced, that there has happily been great improvement, that we trust the country has passed through its disastrous and long-continued period of scarcity and suffering, and that the condition and prospects of the finances are highly encouraging and satisfactory.

"I have only a few more words to add. It might be supposed from many of the criticisms which this measure has received, that the Government was proposing to impose fresh and heavy taxation on the country. Nothing could be further from the real intentions of the Government; and I trust the proposed modifications of the Bill will, when they are made in it, remove every disposition to such criticisms; for they will certainly remove every justification for them. The result will be that we shall exempt from taxation about a million and three-quarters of persons who, if not absolutely, are still relatively, poor, and we shall transfer, not the whole, but the greater part, of the burden hitherto borne by these classes to about 35,000 persons, the great majority of whom are more or less highly paid Government officials. We shall get altogether £100,000 less revenue than we get now. The measure is essentially one which has for its object the equitable readjustment of taxation. It will reduce, not increase, the burdens of the country."

The Hon'ble MR. PAUL said, as a member of this Council he should always be glad to support the necessary measures of the Government, and that he did not now desire to offer any opposition to the principle of this Bill. But he thought there were rules of practice which, under ordinary circumstances, must be observed. The present motion was to refer to a Select Committee a Bill which, as it was introduced, was the one which he held in his hand. That was the Bill which he had studied before coming to the Council meeting, and he now understood, from what the hon'ble the Financial Member had said, no doubt to MR. PAUL'S great gratification, that the Bill would be shorn of many of what appeared to be its obnoxious provisions, which were in it as it was presented to the Council. The Government, as he understood the hon'ble Member, pledged itself to make alterations on the lines which had been marked out by the mover of the Bill and to lay them before the Select Committee. It then followed that it was not this Bill which was about to be referred to a Select Committee, but it was the Bill with a number of substantial amendments. That being so, he thought the proper practice was that this Bill should be withdrawn, and another Bill drawn in the manner proposed should then be introduced. If that was done, he should raise a substantial objection to such new Bill. Leave had been given to introduce this Bill, and consequently the Council were on this occasion unable to give their assent to the referring of another and an entirely different Bill. But if a fresh Bill should now be brought forward on the lines which had been indicated by Sir John Strachey, MR. PAUL would then have this objection to raise, that as it appeared on the surface of the plan that had been sketched out before the Council that the necessity for the proposed measure depended upon the publication of a Budget-statement the introduction of such fresh Bill must of necessity be postponed till after the publication of the Budget. He maintained that there was not a single member of the Council who would not be most anxious to support the Government in any necessary measures which the Government was bound to adopt; but, on the other hand, it was nothing but fair that this Council should have before it is called upon to legislate upon any measure,

the fullest information, in order that any action taken should appear to be supported by substantial reasons. Therefore he should suggest as an amendment, that this Bill be withdrawn, with liberty to the hon'ble Mover to bring in another Bill.

The Hon'ble MR. KENNEDY said he also, upon the same grounds, must oppose the motion of the Hon'ble the Financial Member as it had been brought forward. It seemed to him that they were not now called upon to refer the Bill which had been before the Council, but to refer another and a wholly different measure, with the principles or details of which, complicated as they were, he had not had an opportunity of becoming sufficiently acquainted to form any opinion whatever. Whether the Bill ought to go to a Select Committee or not, he was not in a position to form an opinion, one way or the other. The Council had before them a Bill which proposed the wise and proper course of consolidating into one Act, this part of the taxation of the country. He did not know whether he was right, but as far as he could understand the expressions used by the Financial Member, the new Bill was to be based on an entirely different principle, leaving outstanding three, or perhaps four, separate financial measures, which were to be how he knew not, in what particular form he knew not: what was to be their independent effect he knew not, but he understood they were to be in some way brought in and incorporated with this measure. That this difficulty of understanding the proposition should arise showed that the objection was not merely technical. It was an objection based on the rules which had been introduced into the Council in order to facilitate the consideration of important measures, and it was an objection which he thought to have considerable weight. When, after asking leave and explaining the grounds upon which the measure was based, the Hon'ble Member in charge asked to refer to a Select Committee a Bill which was not even based on the principles of the Bill which had been introduced, MR. KENNEDY was bound to say that he could not assent to the measure without at least knowing what the grounds of the new measure were.

The Council was told that this was not an income-tax, but though accustomed to deal with refined distinctions he was unable to see any difference between this measure and any other income-tax, save this. The great and broad general objection to an income-tax as it existed in England was, that transitory incomes, which were derived from the exertions and intellects of individuals subject to the vicissitudes of health and trade, were taxed at the same rate as incomes derived from realised property and the common sense of mankind was shocked at the injustice, though arguments were possible for the equal taxation of all incomes. That was not so here. The Financial Minister had taken good care that this precise objection should not apply, because here incomes derived from realised property were exempted, and the tax was imposed merely and exclusively on trades and professions—on the uncertain and fluctuating results of personal exertions. He could not assent to aiding the progress of a Bill which avoided the objection of equally taxing fluctuating income and realised property by carefully excluding from its operation every form of the latter.

The Hon'ble MR. MORGAN said that, when he came to the Council that day, he was unaware of the important changes which had just been proposed by Sir John Strachey. It was his intention to have opposed the Bill which was now before the Council, on grounds upon which, perhaps, it was not now necessary to enter, inasmuch as that Bill seemed to have lost its existence. But he could not avoid coming to the same conclusion as the Hon'ble Mr. Paul, that there was practically no measure before the Council, and there was no Bill to refer to a Select Committee. The Bill that was on the table proposed to repeal the existing License Tax Acts, but Sir John Strachey had stated that it was not the intention of the Government to repeal those laws, but to retain them, with very slight modifications as they at present stood. Therefore the Bill before the Council seemed to be without meaning: such clauses as applied to official salaries might stand, but otherwise it seemed to have no value; and therefore he was sorry to say he must oppose the motion.

The Hon'ble MR. BATTEN said that the Hon'ble Mr. Paul had, in the commencement of his remarks, suggested that, as the passing of this measure would depend on the condition of the finances, the further consideration of it should be postponed until after the financial statement had been made. Now he (MR. BATTEN) had not gathered from the speech of the Hon'ble Mover that the passing of the measure under discussion depended on the condition of the finances. In fact, it appeared that the financial result of the measure, if passed with the modifications suggested by the Hon'ble Sir John Strachey would be merely to remit taxation to the amount of £100,000, and that the view of the Government was that, whatever the financial position might be, taxation of the kind proposed by the Bill before the Council ought to form a part of the permanent sources of the revenue. MR. BATTEN was, therefore, unable to understand why the consideration of the measure should be postponed. It was proposed not to pass the Bill until after the financial statement was made, in order to give time for its consideration in Committee and to the opponents of this kind of taxation to give expression to their views on the general question.

Nor did MR. BATTEN follow the Hon'ble and learned Advocate General in his objection to the committal of the Bill in its present form in consequence of the modifications indicated by the Hon'ble Sir John Strachey. He did not know whether the Hon'ble Members who had just spoken had studied the provisions of the four Acts which it was proposed to amend. These Acts were passed in this Council, and in those of Bengal, Madras, and Bombay. It would be found that chapter II of the Bill now before the Council was little more than a re-enactment of the provisions of those four Acts which the Bill proposed to repeal. The modification indicated by the Hon'ble Sir John Strachey, as approved by the Government, would, instead of repealing and re-enacting the four Acts, leave them alone, which amounted to pretty much the same thing. The schedules alone would be altered, and even in these the alterations would be in the direction of maintaining the present law. No modifications were suggested in that part of the Bill which dealt with the taxation of the salaried classes or the extension of the tax to the professional classes on the same footing as the tax on traders.

The effect of referring this Bill to the Select Committee, after what had been said by Sir John Strachey, would be to enable them to consider its provisions in the light of the modifications which the Government were prepared to make. MR. BATTEN apprehended that the Select Committee would be at liberty to adopt or reject these modifications. If they rejected them, the Government would then have to consider what course it should take. But there seemed to be no sufficient reason for not referring the Bill to the Select Committee.

MR. BATTEN would ask the Council to consider what would be the effect of throwing out the Bill. It would simply be to maintain the four Acts in their present form. The taxation of the Commercial class would remain as it was; the provisions of the law, including the procedure to which so much objection had been taken, would remain in force; the million and a half people whom the Government proposed to relieve of £250,000 taxation would continue to bear that burden, and the richer officials and professional men to whom it was proposed to transfer it would remain free. On these grounds MR. BATTEN cordially supported the motion which had been put to the Council.

The Hon'ble MAHÁRÁJÁ JOTINDRA MOHAN TAGORE said he was inclined to support the view which had been taken by his friend the hon'ble and learned Advocate General, for, the modifications which had been proposed in the Bill, in so far as he understood them, would completely alter its character and make it a new Bill altogether. Moreover, it was now proposed that this tax should no longer be raised, as was originally intended, for the purpose of providing means for meeting famine-expenditure, which was its only justification, but that its proceeds should form a part of the general revenues. On the other hand there was a strong impression, as had been correctly represented by the

Chamber of Commerce and the British Indian Association, that the prospects of the finances had materially improved, and that the retrenchments which were to be effected would result in considerable saving; so much so that it would warrant the expectation of the Government being able to dispense with the License-tax altogether. Under these circumstances he respectfully submitted that, until it was clearly shown that the public impression was unfounded, and the necessity of taxation was fully established, it would be neither expedient nor just to continue a direct tax of this nature, which had caused so much hardship and oppression, and consequent irritation in the public mind. But as it was not possible to get a correct insight into the financial position of Government till the budget-statement was published, he thought it desirable that any Bill for taxation should not be brought on until that time; the more so as the Hon'ble the Financial Member himself proposed not to proceed with this Bill before the publication of the financial statement. And as he thought there could be no great necessity for hurrying on a measure of this nature so long as the Acts now in operation were allowed to remain in force, the better course, in his humble opinion, would be, to wait till the financial exposition was made, and the public allowed an opportunity of knowing how far the Government stood in need of additional taxation. For these reasons he would support the view which had been taken by the Hon'ble Mr. Paul.

The Hon'ble MR. COLVIN said that he entirely concurred in the remarks that had been made by the Hon'ble Mr. Batten in reply to the objection which had been taken by some of the preceding speakers. He did not see how it could be said that the changes suggested in the Bill were so great that they virtually left no motion for consideration by the Council. The changes, which the Financial Member had indicated, were all in the direction of remitting, not of extending, taxation. The Hon'ble Member proposed, for instance, to exempt from taxation a very large number of the lower classes of traders, namely, all those who earned less than Rs. 500 per annum, instead of those only whose earnings were below Rs. 250. Again, as regards the richer classes, he proposed to tax them at a lower rate than they would be assessed at if the Bill remained unaltered. The only extension of taxation which was intended was in respect of the professional, official, and salaried classes; but this extension had formed a part of the original Bill and was not a new proposal to the Council. These being the only alterations suggested, as he had understood the Hon'ble Member, it did not appear to him that their nature was such as to require the introduction of a new Bill; indeed, except in taxing the salaried classes—and to this, as he believed, no exception had ever been taken by anybody—the Bill, so far from making important innovations, would hardly contain anything that was not a re-enactment of the provisions contained in the existing Acts on the subject.

As to the argument that there is no necessity now for continuing the license-tax at all, he had been glad to hear the Financial Member say that direct taxation in this shape was not to be dependent hereafter on the fluctuations from year to year of the financial position, but was to be treated as a permanent source of revenue. All who had examined the subject must agree that there was no other way by which the trading classes could be made to bear their fair share of the general burden. There were great objections, no doubt, to direct taxation; so there were to indirect taxation. But it was useless to balance their respective merits for the present purpose, because there was no mode of indirect taxation by which trading incomes could be made to contribute in due proportion to the general revenues. It had been urged by the Hon'ble Mahárájá Jotindra Mohan Tagore that the license-tax, which it was proposed now to modify, had been originally justified on the ground that it was intended to supply the means of dealing with famine-expenditure, and that unless, as MR. COLVIN understood him, this tax was strictly appropriated to that one particular purpose, it ought to be abolished. MR. COLVIN was present at the discussions which took place at the time of the introduction of the License Tax Bill, and he certainly had not heard it said that the proceeds of any particular tax were to be devoted to any particular purpose.

[The Hon'ble MAHÁRÁJÁ JOTINDRA MOHAN TAGORE explained that what he had said was, that the general finances were not then in a position to meet the increased expenditure on account of famine, and therefore additional taxation was necessary to provide sufficient means for the payment of those expenses out of the general revenues.]

The Hon'ble MR. COLVIN continued: He now understood the Hon'ble Member to say that the license-tax was introduced because additional taxation was necessary to meet the expenditure on famine, and that, until it was shown that such an addition to the revenues was still required, there was no ground for continuing the license-tax. In that case the answer appeared to him to be that the necessity for the money continued with the necessity for the expenditure, and that the ordinary revenue of the country was still inadequate, without such help, to supply the yearly million or more which is necessary to provide for famine-requirements. He would not base any argument upon the state of the finances in the present year, because he had not sufficient information about them, and because the question did not really turn upon the state of the finances in one particular year. However prosperous that might be, the conditions of Indian finance did not appear to him to be such that it would be safe, on account of temporary prosperity, to relinquish a permanent branch of the revenue. The gain which had hitherto accrued upon exchange during the current year might be converted into a loss before its close. It was impossible also to shut one's eyes to the constant precariousness of our present opium-revenue. There were other items in the budget regarding which no one could foresee what a year might bring forth. Whatever might be the financial result of any single budget, he could see no sign of the finances becoming so permanently prosperous as to justify the hasty abandonment of a mode of taxation to which both the people who paid, and those who collected, the tax, were becoming familiarized, which was just and expedient in itself, which now yielded about three-quarters of a million sterling, and which might, if occasion arose, yield double that sum. For the reasons which he had given, he should support the motion before the Council.

The Hon'ble MR. HOPE said he should have supposed that the assurances given by the Hon'ble Member in charge of the Bill that the Council would not be called upon to pass the measure, or even the Select Committee to report upon it, until after the Financial Statement and exposition of ways and means for the coming year had been laid before the Council, together with the announcement of considerable additional remissions to which the Government had consented, might have precluded the necessity for further debate. This, however, had unfortunately not been the case; and objections of two important classes had been brought forward. The objection which had been brought forward by the Hon'ble Mr. Paul had been described by himself as being a technical objection.

The Hon'ble MR. PAUL explained that he did not desire to be technical, though his objection was seemingly technical.

The Hon'ble MR. HOPE observed that in that case the method with which he would deal with the first objection was very considerably simplified. The objection appeared to him to amount to this, that the declarations which had been made by the Financial Member were of such an important nature, and so materially altered the measure which was before the Council that morning, as to make that measure entirely non-existent, and that in fact there was now no Bill to refer to a Select Committee, since what was now proposed was a totally different Bill. MR. HOPE was unable to see in what respects the Bill had become a totally different Bill. All that he had heard that day appeared to be declarations on the part of the Government that it was ready to make larger remissions than the Bill as introduced had provided for, and that it no longer considered it necessary to re-enact certain local laws which were at present in force. He thought that it would remain for the Select Committee to consider those suggestions and declarations; that the Committee would be at liberty to

alter the Bill in accordance with the lines which had been sketched out or otherwise, and that it would be in a better position than if a new Bill embodying those suggestions were introduced, because it would not be in any way pledged to the adoption of the principles now suggested, as it might be held to be if it had given leave to bring in and had referred to Committee a new Bill. The Members of the Government on the Committee too would be themselves in a far better position to consider any objections of detail that might be made to the plan which had been sketched out that day than if they stood formally committed to them. It would thus be far more convenient, both for the Government and the Members of the Committee, and more in the interests of the public in general, that the present Bill should be considered by the Committee by the light of the remarks which had been made by the Hon'ble the Financial Member than that this Bill should be withdrawn and a fresh Bill hereafter substituted. On the other hand, there were very considerable advantages in this Bill being referred to a Select Committee on the present occasion in preference to the course which had been suggested (if he understood it rightly) of a new Bill being introduced, but not until the Budget-statement had been made. The advantages were that the Select Committee would have most ample time to consider and elaborate all the details of the Bill; it would be able to study carefully all the reports which had been received and to call for necessary statistics and information from the Local Governments which it might desire. The labours of the Committee would be purely provisional, inasmuch as it would not be called upon to report until after the Budget-statement of the coming year had been made, and it would be at liberty to make any alterations which, after full consideration of the Budget, it might think necessary. If the Council then decided that no taxation was requisite, the Bill would be dropped. If it decided that taxation was necessary, then there would be a measure complete, ready and carefully elaborated at hand. On the other hand, if the course which had been suggested of withdrawing this Bill and introducing a fresh measure after the financial exposition had been made were adopted, there would be considerable delay; the new Bill would necessarily be considered with far more hurry and in a perfunctory manner, while the actual assessment and collection of the tax would be put forward into the hot weather and the rains, and so the checks which were necessary for the prevention of fraud and extortion would be infinitely less, and the tax-payer would suffer.

The other point upon which a few remarks were necessary was in reference to the expectation, which had been expressed by two Hon'ble Members and by the Bengal Chamber of Commerce, that, if the state of the finances proved to be very favourable, the license-tax might be dispensed with. MR. HOPE was not aware that the great scheme of a special insurance against famine, which was deliberately adopted two years ago, had been in any way set aside. He had not heard any declaration which might lead him to suppose that, and he should have been greatly surprised if any such declaration had been made. Whilst that great scheme lasted, it would be obviously inequitable to remit one portion of the taxation which was necessary for the provision of that insurance while retaining another portion. If there was one thing more clear than another, it was that the Council had decided that the non-agricultural portion of the community should pay their own fair share of taxation for protection from famines. He found that in the first debate which took place upon the subject, that of December 19th, 1877, it was distinctly stated that—

"The next very numerous class, although, of course, a small class compared to that of the agriculturists, is the class of traders and artizans. Although prosperous in ordinary times, this is a class on which, when famine occurs, pressure is the first to fall, and it ought to contribute for its own protection. Not only does it now contribute nothing for this purpose, but it is notorious that, throughout nearly the whole of India, although there is no class which benefits so greatly from our rule, there is none which bears so insignificant a share of the expenses of the State."

It was quite unnecessary for MR. HOPE to add a string of quotations to prove that position. It would be enough if, in addition to the quotation he had made, he, with His Excellency's permission, recalled what passed on January 16th, 1878, when a suggestion similar to that which had been made by

two Hon'ble Members to-day was made by the Hon'ble Mr. Morgan. He having then urged, as had just been done, that the Budget-statement might shew that new taxation was not required, it was declared by Sir John Strachey that it was "an essential part" of the scheme of famine-insurance "that these new taxes should be imposed equally, as far as one can do these things equally, both upon the commercial and agricultural classes." Again, at a later period, His Honour the Lieutenant-Governor of Bengal made a remark which Mr. Hope took in the same sense:—

"There is no question that the proper principle to follow in respect to the raising of revenue for such purposes as that which has led to the present schemes of taxation is that all having a permanent interest in the welfare of the country should bear their share of its burdens. The measures now before the Council adjust the incidence of taxation upon all interests, whether trading or landed interests."

His Honour THE LIEUTENANT-GOVERNOR here remarked that he thought these quotations were unnecessary, as the Council was not now discussing the question of the principle of the tax.

The Hon'ble MR. HOPE said that he had made these quotations in answer to the remark which had fallen from some Hon'ble Members that this Bill should be withdrawn, as it might hereafter appear that this tax might be dispensed with. He was endeavouring to show that the license-tax could not be dispensed with, as this Council had decided before that it was part of taxation designed to serve as a permanent famine-insurance, and to be contributed by all classes of the people. He therefore considered that the quotations were perfectly pertinent and necessary to his point, and he should continue them unless his Lordship ruled that he was out of order.

His Excellency THE PRESIDENT thought that the Hon'ble Member's remarks were quite legitimate in reply to what had fallen from the Hon'ble Mahárájá Jotindra Mohan Tagore. Moreover, it was in accordance with the Rules to discuss the principle of the Bill on a motion to refer it to a Select Committee.

The Hon'ble MR. HOPE then proceeded to say that, on the occasion to which he had been referring, His Lordship the President had concluded with an observation exactly in the same sense as those which MR. HOPE had already quoted, namely:—

"I think, then, I may fairly claim for the measures now before the Council at least the modest merit of an equitable distribution of famine-charges between the two great classes of the community who are, collectively, best able to bear them, and on whom such charges most reasonably fall."

There was also another reason, quite irrespective of the Budget-question, why such remission of taxation as that suggested should not be made, and it was this. This Council had deliberately confirmed the condition laid down by the Secretary of State that the raiyats should not be made to pay any taxation in the shape of assessment upon the land outside the revenue-assessment, unless a similar amount of taxation were raised from other classes of the community also. Therefore, if the Budget-statement were to show that the sum raised by this tax might be dispensed with, that would not be sufficient, unless it could be also shown that the Government could dispense with the similar amount of taxation derived from the new rates on land. Whether the finances would be in such a position or not MR. HOPE was not able to say.

MR. HOPE would now turn to another and a totally different ground on which he opposed the suggestion that it might be possible to remit this taxation altogether, if the state of the finances should be favourable. He considered that constant changes of taxation to make up for minor fluctuations of income and expenditure were much to be deprecated. In England the mass of the people were accustomed to watch the commercial and agricultural prosperity of the country, competent to understand changes and causes, and able to accept with intelligent equanimity an extra penny of income-tax, or an increase of duty on some article of consumption. But in India the position was just the reverse, and such a general condition was absolutely unknown. Certain sections of the community, indeed, were able to understand and criticise the

financial position as people in England could, if not better. As a rule, the people were in a totally different intellectual and moral condition. Every change which took place was a source of anxiety, of disquietude, of speculation, and of rumours which were often unreasonable and even absurd. He could imagine few conditions more economically and commercially prejudicial, if not politically dangerous, than that all India should come to be thrown annually, from December to March, into a state of doubt and speculation as to what their fiscal burdens for the coming year would be.

Moreover, if constant changes were to be avoided in taxation generally, they were especially so in the case of a direct tax such as that now in question. Whatever might be the difficulties of preventing fraud and extortion in levying such a tax, they were most materially enhanced by constant changes in the rates or by abolition and re-imposition. There had been no less than fifteen different License and Income Tax Acts in the twelve years following the time when Mr. Wilson first introduced his great income-tax, and the changes which had taken place had contributed in no small degree to the irregularities which took place in the collection and to the general unpopularity of the system. Direct taxation was nothing new in India; it formed part of the fiscal system which the British found on acquiring the country; it was still in some parts imposed by the Government in its ancient forms, such as the capitation-tax in Burma and the Pándhari-tax in the Central Provinces, and it might be seen at work in most of the Native States around us. All such taxes were most productive, and proved least oppressive just in proportion as the rates remained unchanged for long periods of time, and the system was so crystallised that the tax-gatherer found no plea for demanding, and had little chance of recovering, if he did demand, more than was notoriously and justly due.

Of course, MR. HOPE continued, fluctuations of income and expenditure must occur; but we should avoid as far as possible perpetually adjusting taxation to fit them. Small fluctuations could be easily dealt with through the various expedients which loans for reproductive public works, balances, repayment of debt and optional heads of expenditure afforded; larger ones by variations of indirect taxation, which could often be effected without the people being even conscious of increase or decrease, rather than by changes in direct taxes.

Upon these grounds, MR. HOPE trusted that, if the famine-insurance scheme was to be maintained at all, it might be maintained intact in principle. It was, further, much to be desired, though he could hardly hope for so fortunate a result, that the Select Committee would go so thoroughly into the matter as to enable the Council to decide, once for all, the vexed question of twenty years as to whether taxation of the non-agricultural classes could be suitably effected by direct methods of the income or license-tax type, and, if not, to adopt some other method of reaching those classes instead.

His Honour the LIEUTENANT-GOVERNOR said it was not his intention to discuss the principle of this Bill. To the Bill as it stood he had very serious objections, which he should have felt it his duty to urge, if it had not been that the explanations which had been made by his hon'ble friend Sir John Strachey as to the intentions of the Government had met most of his objections. He believed that there was not a single member present who did not condemn the Bill which the Council was now asked to refer to a Select Committee, and no one had condemned it more than the hon'ble Mover himself; and therefore it seemed to him that the Council would be stultifying itself if they accepted the motion, as it amounted to this, that they were asked to refer a Bill to a Select Committee which was not the Bill which the Committee would be asked to consider. Under these circumstances he could not help feeling that the arguments of the learned Advocate General in favour of withdrawing the Bill were very strong and sound. The question before the Council was a question of procedure; the rules for the conduct of business did not contemplate any such mode of procedure as that suggested by Sir John Strachey. Rule 18 provided that when a Bill was introduced the member in charge of it should move either that it be referred to a Select Committee or that it be taken into consideration by the

Council, or that it be circulated for the purpose of eliciting opinions thereon. The Council was not asked to accept either of those three courses, which were the only courses really open to it, but to accept a Bill of which they had no knowledge and to refer to a Select Committee a measure which they had no opportunity of considering. HIS HONOUR could see no reason why his hon'ble friend should not do what the learned Advocate General had suggested that he should do, namely to withdraw the present Bill and to introduce another Bill which should really set out the policy and principles which the Government desired to follow. Either the Government had determined that the License-tax should become a permanent part of the fiscal system of the country under all circumstances and without reference to the condition of the finances, or it had not, but had resolved to leave the question to be settled on the publication of the annual estimates. He understood from the remarks of hon'ble members who seemed to be informed of the intentions of the Government, that it had been finally determined to make the License-tax a permanent tax, and if that were so, he thought that the proper course for the Government to pursue was to withdraw the present Bill which they had avowed themselves unable to support, and lay before the Council a Bill which should represent the real policy of the Government. It was better to say at once what was intended, and there could be no possible object under such circumstances in waiting for the Budget. There would be nothing gained by delay, if the tax was really to be imposed without reference to the state of the finances which the Budget-statement might disclose. The Council should certainly, under no circumstances, be asked to refer to a Select Committee a Bill which it was admitted they were not really to adopt.

If, on the other hand, the passing of a law introducing a License-tax was to be dependent upon the annual estimates—HIS HONOUR gathered it was not—then nothing would be gained by referring this faulty Bill to a Select Committee of the Council, and there was great strength in the objections taken by the Advocate General. An executive Committee appointed by Government could prepare a measure to meet the views of Government, and it could then be brought in whenever it might be found convenient to do so. The question being, as he had said, a mere question of procedure, and the rules of the Council contemplating no such procedure as that suggested by his hon'ble friend, and the motion before the Council not being in accordance with any of the directions of Rule 18 to which he had already referred, he would strongly urge upon the Government the propriety of acceding to the amendment of the Advocate General, to which he had not yet heard a single substantial objection raised.

It had been pointed out by Mr. Batten and Mr. Colvin that the result of following the course of either preparing a new Bill at once, or of leaving the introduction of a Bill until the financial condition of the country should be ascertained, would be that the License Tax Acts as they now stood would remain in force, and a million and a quarter of people, who would otherwise be exempted, would continue to be taxed; that the changes proposed were all in favour of the tax-payers, and that as a consequence of not following the course proposed by the Government, a number of poor traders would remain subject to the tax for some time longer. It seemed to HIS HONOUR that there was no force or truth in that objection. It would make no difference in that respect whether this Bill was withdrawn and another substituted at once, or whether the matter was left to be reported upon a few weeks hence by the Select Committee as proposed by Sir J. Strachey. The present laws would remain in force in precisely the same degree, and the men who were now taxed under them would continue to be taxed. If the Government had determined to remit taxation in respect to the poorer classes of traders, it was open to it by an executive order to exempt them or any other classes affected by the law. That had already been done once, and the Hon'ble Mover had already explained that it was the intention of Government to do it again. The same remarks would apply to the observations which had fallen from the Hon'ble Mr. Hope: the delay would be no greater if the Bill were withdrawn and

a proper one substituted than it would be if, as proposed by the Government, the presentation of the report of the Committee should be deferred till after the submission of the annual estimates. His Honour would therefore strongly impress upon the Government that it was desirable, whatever the intention of Government might be as to the permanent character of the License-tax, that it should bring in a Bill in a complete form and present it to the Council. It was surely better to bring in a Bill which should give form to the real intention of Government in such a state that the Council could examine and discuss it before it was referred to a Select Committee for consideration and report.

The Hon'ble Mr. Rivers Thompson said he could see no objection in the rules for the conduct of the business of this Council to the propriety of the course which his hon'ble colleague, Sir John Strachey, had taken in asking that this Bill should be referred to a Select Committee. The question before the Council was simply whether the Bill should be referred to a Select Committee or not, and the motion had been opposed by the hon'ble and learned members opposite on the ground, first, that the Bill as introduced was not the Bill which the Select Committee would have to consider, and secondly, that it would be much better, considering that this Bill dealt with large questions affecting the finances, that its further discussion should be postponed until the Budget-estimates for the year were laid before the Council. This Bill when introduced was called, "The Trades and Professions Tax Bill, 1879," and it was in that character only that it was proposed that it should go before a Select Committee. He did not see that there was any change or alteration in the principle of the measure since it was first brought in; but as then it extended taxation to the professional and salaried classes of the community, who had been previously exempted under the License Acts, as such it remains for the Select Committee to consider. It seemed to him that if any Hon'ble Member had taken exception to the principle of the proposal as affecting those classes, or had raised any issue upon the question of direct taxation, this was the occasion when such an objection might have been urged. But nothing of this kind had been done. The principle which the Government asserted of the propriety and necessity of imposing a tax on trades and professions remained unaffected; and he should have thought, after the exhaustive statement which his hon'ble friend Sir John Strachey had made as regards the intentions of the Government, all in a beneficial sense, all tending to relieve the poorer classes, even to the surrender of revenue amounting to £100,000, and extending the minimum-limit of taxation to Rs. 500 a year, the concessions would have satisfied hon'ble gentlemen opposite, and left no room for objection to the further progress of the measure.

In regard to the Financial Statement, to the publication of which it was desired to postpone the consideration of the proposals now submitted to the Council, it seemed to him that the sacrifice of £100,000 was not a very large sum for the Government of a country whose revenue and expenditure were something like sixty millions a year. After the fullest consideration, the Government had decided that the License-tax was to be a permanent measure on the broad and general ground that there was every possible justification for inposing a tax on classes which had hitherto been exempt from the payment of any contribution to the necessities of the State. Whether therefore the finances were prosperous or not, or whether in a few weeks hence his hon'ble friend would still be in a position to submit a satisfactory Budget, was immaterial to a question which affected only a small portion of the income, and in view to the resolution which the Government had adopted for equalising the burden of taxation and maintaining this tax as a permanent part of the fiscal administration of the country. With regard to the intention now expressed of retaining the local Acts in force, he would only say that such a course commended itself on the ground that it left to local Governments the procedure on all details which were suited to their circumstances and of which now they had gained some two years experience. In some instances this desire had been expressed by local Governments and it had therefore been decided to adopt that course. He should support the motion that the Bill be referred to a Select Committee.

The Hon'ble Sir A. Arbuthnot said that what he had to say in reply to the objection that had been urged by the hon'ble member who commenced the debate after the Hon'ble Sir J. Strachey's speech had been delivered, had been in a great measure anticipated by the remarks which had fallen from the Hon'ble Messrs. Batten and Hope, and by those which had just been made by his hon'ble colleague Mr. Rivers Thompson. But he wanted to say, with reference to the objection which had been advanced by his hon'ble and learned friend Mr. Paul, that that objection appeared to him, notwithstanding his hon'ble friend's disavowal of an intention to raise it as a merely technical objection, to be in substance more or less of the character of a technical objection. It was an objection the validity of which he should be very much disposed to recognize if the measure now before the Council, and which the Council was requested to refer to a Select Committee, were entirely a novel one. If the Government had come to the Council with a new measure of taxation, and at the first meeting after the introduction of the measure had told the Council that while they wished to refer it to a Select Committee, they proposed to make very material alterations in it—in that case Sir A. Arbuthnot thought that hon'ble members not in the secrets of the Government would be entitled to demand that before they consented to the reference, the details of the measure should be laid before them in a definite and clear form. But the measure now before them was in substance merely the amendment and modification of a law which had been in force nearly two years. The objects of the amendments had been fully explained to the Council. These objects were, in the first instance, to relieve from taxation a very considerable number of persons—he might say, in relation to the number of persons affected by the measure, an enormous number—from the pressure of taxation, and to bring under its operation certain classes of persons who were not now affected by it, but who, on principles of fair and equal justice, it had been deemed expedient to bring under taxation. The Government admitted that the measure was not in its present lines what could be called a complete measure; they had deferred to the objections which had been frequently raised, and which six years ago had led the Government to abandon an income-tax, but they admitted that in thus abandoning the income-tax, the Government and Legislature were placed under the necessity of exempting from taxation many classes of persons who, they all felt, ought in justice to be made liable to taxation. The question now before the Council was not whether the Bill should be converted into an Income-Tax Bill, but whether its main principle of relieving the poorer classes who were included under the existing Act, and of bringing certain other classes under the tax, should be affirmed; and it appeared to Sir A. Arbuthnot that it would be far more convenient, for reasons which had been very fully dwelt upon by the Hon'ble Mr. Hope, that this measure should now go before a Select Committee, than that it should be withdrawn, and a delay of some weeks should take place in framing an amended measure embodying the exact terms of the provisions which his hon'ble friend Sir J. Strachey had sketched out in his speech. It was not perhaps very important that the consequence of delaying the reference to a Select Committee would be, so far as the law was concerned, to keep the poorer classes liable to taxation; for, as had been pointed out, their exemption could be obtained by an executive order. But the amendment of the present law involved other considerations. It was a measure which, in the hands of the Select Committee, might occupy a good deal of time, and it was one in regard to which it was desirable that the Select Committee should have ample time for consideration and examination.

It would be quite open to the Select Committee, notwithstanding the announcement which had been made by the hon'ble member in charge of the Bill, not to adopt the proposal that the existing Acts should be left in force, subject to an alteration of their schedules. On further consideration it might be deemed more expedient that, as was proposed when the present Bill was introduced into the Council, the whole of the law on the subject should be contained in a single Bill. This was a point which seemed to Sir A. Arbuth-

NOT to deserve the careful consideration of the Select Committee, represented as it would be by members of all classes in the Council. The Hon'ble Mr. Batten had shown that substantially it made very little difference whether the proposal to leave in force the greater part of the existing local Acts were carried out, or the Bill were retained in its present form. It was for this reason that SIR A. ARBUTHNOT ventured to designate the objection raised by his hon'ble and learned colleague as being more or less of the character of a technical objection. As he understood the arguments of his hon'ble colleague the Financial Member, the reason which had led him to suggest, and which had led other members of the Government to agree, that this Bill should not be reported upon or passed until the financial statement for the ensuing year was laid before the Council, was this, that it was yet to be determined to what extent the remissions of taxation could be made. The intention of the Government was that a Bill similar in its principles to the existing law, but comprising within its provisions the official and professional classes, and relieving the poorer classes of tradesmen, should be passed; but what the precise rates of taxation should be, and how far the proposed remissions should affect the several classes concerned, were questions which it was not expedient or convenient finally to determine, until the Government were in a position to explain to the Council and to the public the financial situation, as far as they could explain it, when the budget-estimates had been framed. As the Hon'ble Mr. Hope had pointed out, to postpone the further proceeding with this measure until the financial statement had been made, would be to cause what seemed to him (SIR A. ARBUTHNOT) a very inconvenient amount of delay. It would drive the proceedings which would have to be taken for bringing the measure into operation, into the hot weather, and would embarrass the administrative and executive officers very seriously in their work. It seemed to him that the business which in any case the Select Committee would have to do, would be better performed with ample time and leisure for consideration, for examination, and, if necessary, for reference to the various Local Governments and Authorities who were concerned in this matter. It would be open to the Select Committee if, when the financial statement was made, the majority of them should consider that there was no necessity for retaining taxation of this kind, to urge that view upon the Council, and it would be then for the collective Council to consider the measure in all its bearings, to take into account, not only the present circumstances, but the prospects and possibilities of the future, with reference to the experience of the past, and bearing in mind these prospects and possibilities, which at the present time they must all feel were possibilities of a very serious character, to determine whether or not it was necessary to maintain a system of direct taxation as a part of the taxation of India. He hoped that under these circumstances, and after these explanations, the Council would allow this measure to go before a Select Committee, in order that it should receive from that body that ample examination and consideration which was necessary, and which the Government desired that it should receive.

His Excellency THE PRESIDENT said, it had not been his intention to make any remarks upon the present occasion, because, although, no doubt the proper time for discussing the principles of a Bill was on the motion for its reference to a Select Committee, yet, as a matter of fact, he might say that since he had had the honour of presiding over this Council, he did not remember an instance in which a Bill had encountered on its way to Committee any serious opposition not indicated at the time of its introduction. The present motion, however, had been opposed by the Hon'ble Mr. Paul on the ground, as His Excellency understood it, that there was practically nothing to refer to the Committee, because the Bill on which leave was asked to go into Committee had been altered out of existence by the statements with which his hon'ble friend Sir John Strachey had accompanied his motion. His EXCELLENCY was unable to understand how it was possible that any Bill before this Council could be altered in its progress through Council by process of announcement. That was a procedure unknown to His EXCELLENCY. The authors of a Bill, whether it were a Government Bill, or a private Bill, were, he conceived,

perfectly free to announce in Council their readiness to accept certain alterations of it, if such alterations were approved or recommended by the Select Committee to which it is referred: and announcements of this kind might sometimes be very convenient. But it was not customary, and His EXCELLENCY believed it was not possible, for a Bill to be altered in Council, before it had been considered in Committee. Hon'ble Members could reject this Bill by refusing leave to refer it to a Select Committee, but the Government would certainly oppose any motion made with that object. They could not, however, alter the Bill by the adoption of clauses which were not yet before them. Sir John Strachey had stated on behalf of the Government its intention to propose or accept in Committee certain alterations of the Bill; but, the Government had no intention of withdrawing the Bill, and no power to alter it without reference to a Committee. It would be for the Committee to recommend the alteration or retention of its present clauses; and for the Council then to accept or reject the recommendation of the Committee. His EXCELLENCY wished to remind the Council that the practical question involved in the consideration of this Bill was not whether fresh taxation should be imposed, but whether the existing taxation of the country should be maintained as it stood, or any portion of it remitted. His Honour the Lieutenant-Governor had observed that the Government should state its intention clearly on a point about which His EXCELLENCY thought the intentions of the Government had never been open to question. It was quite true that the maintenance of an additional source of revenue, or an additional charge upon revenue, which the Government had repeatedly declared that they regarded as permanent, would not be affected by the state of our finances; but the possibility or prudence of lightening the present assessment, or modifying the present incidence of a permanent tax, was a question which the Council would be better able to discuss after Hon'ble Members had heard the financial statement.

The question being put, the Council divided.

Ayes.	*Noes.*
The Hon'ble Charles Grant.	The Hon'ble G. C. Paul.
The Hon'ble G. H. M. Batten.	The Hon'ble J. Pitt-Kennedy.
The Hon'ble B. W. Colvin.	The Hon'ble E. C. Morgan.
The Hon'ble T. C. Hope.	The Hon'ble Jotíndra Mohan Tagore.
The Hon'ble Sayyad Ahmad Khán.	His Honour the Lieutenant-Governor.
The Hon'ble Rivers Thompson.	
The Hon'ble Whitley Stokes.	
The Hon'ble Sir E. B. Johnson.	
The Hon'ble Sir J. Strachey.	
The Hon'ble Sir Andrew Clarke.	
The Hon'ble Sir A. J. Arbuthnot.	
His Excellency the Commander-in-Chief.	
His Excellency the President.	

So the Motion was carried.

SUNDRY BILLS.

The Hon'ble MR. STOKES moved that the Hon'ble Mr. Morgan be added to the Select Committees on the following Bills:—

To provide for the registration of Trade-marks.

Relating to Merchant Shipping.

To define and amend the law relating to Promissory Notes, Bills of Exchange and Cheques.

The Motion was put and agreed to.

SUNDRY BILLS.

The Hon'ble MR. STOKES also moved that the Hon'ble Messrs. Grant, Kennedy and Paul be added to the Select Committees on the following Bills :—

To define and amend the law relating to Promissory Notes, Bills of Exchange and Cheques.

To define and amend the law relating to the Transfer of Property.

To define and amend the law relating to alluvion, islands and abandoned river-beds.

To provide for the grant of probates of wills and letters of administration to the estates of certain deceased persons.

To make further provision for the grant of probates of wills and letters of administration in non-contentious cases.

The Motion was put and agreed to.

MERCHANT SHIPPING BILL.

The Hon'ble MR. STOKES also moved that the Hon'ble Mr. Paul be added to the Select Committee on the Bill relating to Merchant Shipping.

The Motion was put and agreed to.

FACTORIES BILL.

The Hon'ble MR. COLVIN moved that the Hon'ble Mr. Grant be added to the Select Committee on the Bill to regulate labour in Factories.

The Motion was put and agreed to.

The Council adjourned to Friday, the 9th January, 1880.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

R. B. CHAPMAN,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 6th JANUARY 1880.

GENERAL REMARKS.—Slight rain fell during the week in some parts of Madras, Bengal, the North-Western-Provinces and Oudh, and Assam. More rain is wanted for the spring crops; but agricultural prospects, as yet, continue favourable on the whole. The public health is now generally good, except in Poona, Dharwar, North Kanara, and Moorshedabad.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Jan. 3rd)	...	*Ragi* 25·65; harvest of early dry crops; sowing of second crop paddy; standing crops in good condition.
Kurnool („ „)	...	*Ragi* 29·85; paddy being harvested; standing crops withering in one taluk; blight one taluk; pasture and water abundant.
Ganjam („ „)	·5 (in one station).	*Ragi* 30·09.
Kistna („ „)	...	*Ragi* 29·22; standing crops generally good; harvest of wet crops commenced; 22·8 inches water over anicut.
Chingleput („ „) (Madras)	...	*Ragi* 22·96; sowing in 2 taluks; standing crops somewhat injured by insects in parts of 3 taluks; elsewhere doing well; harvest outturn ½ to ¾; pasture abundant.
Coimbatore („ „)	·03 (in one station).	**Ragi 24·32; dry crops withering in parts of all taluks but one; wet in fair condition; harvest of paddy, *cholum*, *ragi*, and *cumboo*, outturn paddy ¼ to full, others ½ to ¾.**
Tanjore („ „)	·2 average of four stations).	*Ragi* 28·77; crops in good condition; harvest of paddy and a few dry grains, outturn ½ to full.
Madura ...	·70 (average of five stations).	*Ragi* 24·26.
Malabar (Jan. 3rd)	...	*Ragi* 20·34; harvest commenced in parts of 5 taluks.
Travancore („ „)	·52	*General Remarks.*—General prospects good, except in Trichinopoly, North Arcot, and western parts of South Arcot, where want of rain is much felt.
Bombay— (Jan. 7th)		
Kurrachee ...	...	No report received.
Hyderabad ...	...	Weather seasonable; horned cattle attacked with throat swelling in taluka Hala; slight damage by locusts in 4 talukas.
Ahmedabad ...	...	*Rabi* promising; prices falling.
Baroda ...	...	Weather seasonable and agricultural prospects good.
Surat ...	...	Standing crops healthy; fever in 4 talukas.
Násik ...	...	Ague in 3 talukas, cattle disease in one, measles in Dindori; *rabi* crops fair.
Colaba (Bombay) ...	...	Average abnormal temperature 2 degrees cool, wind normal, air abnormally dry on 3rd and 4th.
Poona (Jan. 4th)	...	Cholera in city, deaths 182; also in Khed taluka.
Ahmednagar ...	...	Crops in inferior soil withering; injury by rats in Kopergaon.
Sholapore ...	...	Prospects unchanged; prices stationary.
Dharwar ...	...	*Kharif* harvest completed; fever general; *rabi* crops favourable; exotic cotton slightly damaged.
Kánara ...	...	Sowing of second crop continues on coast; fever very prevalent; cholera in Honore subsided.
Rajkot ...	...	Weather cold; *rabi* promising; health good.
		General Remarks.—Prospects unchanged; cholera increasing in Poona, and fever in Kanara and Dharwar.
Bengal— (Jan. 6th)		
Chittagong ...	0·85	Weather cloudy from Friday (2nd), to-day (6th) fair; *amun* damaged to some extent by rain; cold weather crops doing well; cholera still prevailing in south.
Dacca ...	0·12	Prospects of crops good; health good.
24-Pergunnahs (Alipore)	*Nil*	Prospects of *amun* and winter crops good; fair outturn expected; reaping of *amun* still continues; public health fair.
Moorshedabad ...	*Nil*	*Rabi* crops doing well; epidemic fever still prevalent in thana Burwa; deaths from cholera still reported from Berhampore town.
Rajshahye ...	*Nil*	Weather cool and clear; heavy dews at night; winter rice still being cut; outturn generally very good where crop not damaged by floods; spring crops have come up well and are thriving; public health good.
Burdwan ...	*Nil*	Fair average rice crop reaped; spring crops promise well; health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Rungpore ...	*Nil*	Weather fair, dry, and cool; crops favourable; public health good.
Bhágalpur ...	*Nil*	Prospects of *rabi* crops and general health good.
Purneah ...	*Nil*	Prospects good all round; public health good.
Patna ...	*Nil*	Rain would do good to *rabi* crops; prospects generally favourable.
Durbhanga ...	*Nil*	*Aghani dhan* coming into market; in places harvesting completed; *rabi* continues favourable, but a little rain will do much good; prices rising; public health good.
Hazáribágh ...	*Nil*	Weather seasonable and fine; *rabi* crops doing well; prices cheap; general health good.
Cuttack ...	0·04	Winter crops good; rice being harvested; small-pox prevalent.
		General Remarks.—Slight rain in a few districts during week; in Chittagong some damage done to *amun* by rain; *rabi* crops everywhere doing very well, but require a little rain in some places, especially in Patna Division; *amun* harvest nearly finished; outturn on the whole a fair average; pulses and sugarcane also being harvested in places; small-pox and cholera reported in many districts.
N.-W. Provinces and Oudh—		
Benares (Jan. 6th)	...	Clear weather; prospects and health both good.
Allahabad („ „)	...	Cloudless sky; westerly wind; rain much needed; crops in good condition; health good, *wheat* 13⅜, coarse *chanwal* 19½, unhusked *dhan* 38 seers.
Gorakhpur („ 5th)	·4 in north of district on 27th Dec.	Weather since clear; prospects good.
Jhánsi („ 7th)	*Nil*	Prospects good; prices stationary.
Agra („ 6th)	...	*Rabi* crops thriving well; *arhur* has suffered from frost; sickness is lessening.
Bareilly („ 7th)	Slight rain on 27th Dec.	Weather clear and cold.
Meerut („ 7th)	...	Sky clear; wind west; prospects good.
Kumaun („ 5th)	...	Weather fine; cold; prospects good.
Lucknow („ 7th)	...	Weather seasonable; prospects good; *millet* large, seers 23-12.
Partabgarh („ 5th)	*Nil*	Prospects good; a little rain would have been beneficial.
Sitapur („ 7th)	*Nil*	Weather seasonable; prospects good.
Fyzabad („ 7th)	*Nil*	Crops thriving; *cane* crushing commenced.
		General Remarks.—Rain wanted in Allahabad and Partabgarh; crop thriving; health generally good.
Punjab—(Jan. 6th)		
Delhi ...	...	Prospects good; fever decreasing; prices steady.
Hissar ...	...	Crops thriving after last week's rain, and prices have fallen.
Umballa ...	...	Agricultural prospects good.
Jullundur ...	...	Crops promising; prices steady; health good.
Lahore ...	...	State of crops and health of district good.
Ferozepore ...	...	Agricultural prospects fair; prices steady.
Siálkot ...	...	No report received.
Ráwalpindi ...	...	Crops thriving well; public health improving.
Pesháwar ...	...	Weather still frosty; prices steady.
Mooltan ...	...	Crops and health good; prices steady.
Dera Ismail Khan ...	...	Crops fair; prices stationary.
		General Remarks.—Reports from all districts favourable, and public health improving.
Central Provinces—		
Nágpur (Jan. 7th)	...	Clear and cool; *rabi* promising; threshing of *kharif* crops continues; health good.
Jubbulpore ...	...	Clear; cold; prospects of *rabi* good; small-pox continues; prices stationary.
Saugor	...	Clear; cold; *rabi* prospects favourable; health good; prices stationary.
Seoni	...	Clear; prospects good; rain needed for *rabi*.
Hoshangabad ...	...	Weather seasonable; *rabi* promising; health good; prices stationary.
Raipur (Jan. 3rd)	...	Clear and cool; *rabi* doing well; cattle disease continues; prices stationary.
Sambalpur („ 2nd)	...	Castor and mustard doing well; sugarcane cutting; health good.
		General Remarks.—Clear; cold; threshing of *jowar* and *kharif* pulses continues; *rabi* promising; health improving; prices stationary.
British Burma— (Jan. 7th)		
Akyab ...	...	Public health normal; crops being reaped; good harvest expected.
Rangoon	...	Slight cholera and small-pox; fever and small-pox continue in Hanthawaddy; cattle disease very slight; reaping progressing.
Bassein	...	Public health good; slight cattle disease; reaping nearly over.
Prome	...	Slight small-pox in Prome town; otherwise public health good.
Amherst (Moulmein) ...	...	Public health good; crops nearly gathered.
Toungoo	...	Public health and crop prospects good.
		General Remarks.—No rainfall reported from any part of the province during the week; public health generally good; crops being secured satisfactorily.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(Jan. 7th)		
Gauháti	*Nil*	Weather unsettled and variable; mornings and evenings cool and foggy; prospects of crops favourable.
Sylhet	·34	Weather seasonable; prospects of cold weather crops continue good.
Cachar	·54	Weather seasonable; prospects and outturn of rice crops very good; common rice $12\frac{1}{2}$ seers a rupee; public health good.
Dibrugarh	*Nil*	Harvesting of *sali* finished; district healthy.
Mysore and Coorg—(Jan. 7th)		
Bangalore ...	...	Standing crops in good condition; prospects favourable; health generally good; four fatal cases of cholera in Nagamangala, Hassan district; prices falling.
Mysore ...	...	No report received.
Mercara ...	...	
Berar & Hyderabad—(Jan. 7th)		
Amráoti	...	*Kharif* reaping completed; *rabi* doing well.
Akola	...	*Rabi* prospects good.
Hyderabad... ...	*Nil*	*Jowari* crops damaged somewhat; outturn expected to be less than last year; weather warmer; no cattle disease.
Central India States—(Jan. 7th)		
Indore	...	Health and prospects good.
Morar (Gwalior) ...	*Nil*	
Sutna ...	...	Prospects good; *jowar* 28 seers.
Rutlam ...	...	Weather clear; public health and prospects good.
Neemuch ...	...	Season crops thriving.
Goona ...	*Nil*	
Bhopal ...	...	Health and agricultural prospects good.
Agar ...	...	
Nowgong ...	...	No report received.
Mánpur ...	...	Weather clear; *rabi* crops excellent.
Rajputana—		
Meywar (Dec. 26th)	...	Tanks, wells, health, and prospects good.
Harowtee (Jan. 3rd)	...	Health and prospects good.
Jhallawar („ 1st)	·01	Health and prospects good.
Ajmere („ 7th)	...	Prospects excellent; fever prevalent.
Jeypore ...	...	Prospects favourable; seasonable; fever disappearing.
Bhurtpore ...	...	
Ulwur (Jan. 6th)	...	Recent rain improved *rabi* prospects; health greatly improved.

SUPPLEMENT TO

The Gazette of India.

No. 3. } CALCUTTA, SATURDAY, JANUARY 17, 1880.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

REPORT OF THE INDIAN LAW COMMISSION, 1879.

COMMISSION.

NOTIFICATIONS.

Fort William, the 11th February, 1879.

No. 6.—WHEREAS it is considered expedient that a Commission should issue to enquire into and consider the provisions of the Bills marginally noted and to report thereon, and to make such suggestions as to the codification of the Substantive Law of British India as may seem desirable, the Governor General in Council doth hereby authorize and appoint the Hon'ble Whitley Stokes, C.S.I., the Hon'ble Charles Turner, C.I.E., and the Hon'ble Raymond West to be Commissioners for the purposes aforesaid, and, on or before the first day of November, 1879, to report to the Governor General in Council, under their hands and seals, their opinion on the several points herein submitted for their consideration.

The Negotiable Instruments Bill.
The Transfer of Property Bill.
The Alluvion Bill.
The Master and Servants Bill.
The Easements Bill.
The Trusts Bill.

D. FITZPATRICK,
Secretary to the Govt. of India.

Simla, the 9th October, 1879.

No. 22.—WITH reference to the Notification of this Department, No. 6, dated 11th February, 1879, it is hereby notified that the Governor General in Council has been pleased to extend the time therein prescribed for the submission of the Report of the Law Commission to the 1st December, 1879.

D. FITZPATRICK,
Secretary to the Govt. of India.

REPORT.

WE, the Commissioners appointed to enquire into and consider the Bills marginally noted and to report thereon, and to make such suggestions as to the codification of the Substantive Law of British India as may seem desirable, have now the honour to report to the Governor General in Council our opinion as follows :

The Negotiable Instruments Bill.
The Transfer of Property Bill.
The Alluvion Bill.
The Master and Servants Bill.
The Easements Bill.
The Trusts Bill.

I.

In the correspondence extending over several years which has resulted in the appointment of the Commission it has been laid down and repeated that

"the question of giving a Civil Code to India was no longer an open one." The only question, one of great practical difficulty, has been as to "the best machinery for carrying on Indian codification." In what precise sense "code" and "codification" have been used, and whether they have always been used in the same sense, is not perhaps quite certain; but for practical purposes the words may be taken, we apprehend, as referring to the systematic legislation resulting in such works as the Succession Act, the Penal Code, and the Codes of Civil and Criminal Procedure. A Code as applied to the laws just named means an orderly and systematic arrangement of the rules relating to some well-marked department of the field of jural rights and duties. In its larger sense of a general assemblage of all the laws of a community no attempt has as yet been made in this country to satisfy the conception of a Code. The time for its realization has manifestly not arrived. The rapid changes going on in social relations make it difficult to appreciate the exact extent to which laws of even a limited scope have furthered or retarded progress. The different principles involved in them have not been so wrought out to their final consequences that their ultimate consistency or inconsistency and their relative value can be pronounced on with absolute confidence. When the effects of the special laws have been ascertained by their persistence under varying circumstances, the causes will become apparent by comparison, and the general principles will be established, on the suitability of which to the people and their circumstances it will then be safe to proceed in the work of final consolidation and arrangement. In the meantime, codification in the less ambitious sense may properly proceed in meeting exigencies which daily experience brings to light along with the materials out of which the appropriate fabric may in each case be formed.

2. This, as we understand it, was the general idea of legislation which the Government of India intended to insist on in its letter No. 34, dated 10th May, 1877. After pointing out the positive gaps in the system which must needs be filled up, that letter says that the "task of arranging scientifically the various chapters of the Civil Code thus produced would then remain."

It has been objected that this plan of ultimate scientific arrangement "seems to mix up two radically different ways of looking at law," namely, that which may be called the historical, in that it simply gathers up in orderly synthesis the results of ascertained development, and the abstract, or as it has been called the anti-historical, method, which, taking its stand on the "permanent elements of society and human nature," works out from these "an orderly exposition of fundamental principles," "followed by a statement of all their leading practical applications." We have to confess that we are unable to perceive the inconsistency complained of, or to appreciate the force of the argument adduced in support of the recommendation that, while particular sections of a complete and systematic body of civil law are proceeded with, the notion of their eventual combination in due co-ordination as parts of a single and general Code ought to be abandoned.

3. Although it is necessary, in the circumstances under which Indian legislation is carried on, to deal with the several branches of the law by distinct Acts, yet the ultimate design of forming these Acts into a general Code ought never, in our opinion, to be lost sight of. Every Statute, if it is to be self-consistent and duly proportioned, must be framed with reference to some central group of ideas which dominate the whole work. In constructing a system of laws the same principle should prevail. Although the rule of construing by reference to each other all laws which relate to the same matter does not extend to Statutes relating to different subjects, yet it is obvious that the same principles may be involved in Acts which bear on very different departments of civil rights and duties. The impressions received from a study and application of one branch of the law cannot be cast off in expounding and applying another; nor is it possible that really just and philosophical conceptions of law as an organic structure should gain possession of the minds of the community, or even of the legal profession, unless the minor generalizations embodied in particular laws centre in higher generalizations drawn from the elementary truths of human nature and experience. Unless such a co-ordinating influence is allowed to operate, the development of the law, and the social growth of the community so far as it is affected by the law, must proceed irregularly and disproportionately. In one department a particular set of ideas, which lend themselves readily to the purpose, will obtain an expansion and a

predominance which are at the same time gained in another by a different set of ideas. In the course of time and the complications of human affairs the two come into collision. One must give way, and yet neither can do so without litigation, waste of energy, and personal suffering. Nothing less, perhaps, than an infallible prescience of events, together with a power and precision of language not yet vouchsafed to man, would enable a legislature to construct a system of laws involving in all its ramifications no inconsistency or want of adaptation to its intended purposes; but that affords no reason why the inevitable shortcomings should be aggravated by inattention. If a Code cannot be thrown off, as we know it cannot, by one effort of a wise and comprehensive intellect, the alternative system should be brought as nearly as possible to such a production by being animated throughout with a uniform spirit and logical method, securing, so far as may be, an essential harmony amid multitudinous details.

4. It is true that when legislation proceeds by special laws, more complete and minute attention is paid to the detailed provisions called for by the particular circumstances dealt with. But in the practical application of such laws it often becomes evident through the logical development of one set of rules that it has proceeded upon an underlying conception inconsistent with the radical idea or group of ideas involved in another special law. As the relations, then, which have revealed the latent antinomy are likely to arise again and again, it becomes necessary to subjugate the one principle to the other either by formal legislation or by a forced method of interpretation, with the injurious consequences to which we have adverted. In the case of a Code such a result can hardly arise. The leading ideas of legal relation govern the whole, and the development of each part is worked out harmoniously on the same general basis of rights and duties, however they in detail may be modified by the particular kind of activity that has to be enforced or controlled, or the kind of physical objects to which they are directed. Such is the consummation to which legislation pursued in a philosophical spirit must necessarily tend; but in India we have not at hand such materials as those out of which the Roman Code and the modern Codes of Europe were formed. The responses of a long succession of jurisprudents, the commentaries of the legists extending over centuries, are wanting. Society itself, profoundly altered in external conditions, and subjected to the operation of conflicting currents of thought, is in a state of flux, the result of which may differ widely from the course of evolution of modern institutions in Europe from their germs in the dark ages. We must provide not only for permanent needs but for pressing exigencies of the passing time; yet, in proportion as great changes are unsuitable, we ought, so far as we can, to introduce amongst the materials of the future some constant and stable elements, the virtue of which has been proved by the test of time and of manifold experiment; and which it may reasonably be expected will give a tone and character to the whole system in which they are incorporated. Englishmen, indeed, brought up in the midst of influences which give to them so marked and peculiar a political character, will move spontaneously along lines in legislation, as in other fields of action, determined for them in a great measure by their own history and their law. Their general tendency will be pretty uniform; but this should not exclude the careful analysis of all that the past and the present of English law and English ideas offer for our adoption, the conscious selection from the mass of those principles which promise to be most strong, fruitful and beneficent, and the persistent endeavour to give them recognition and a governing influence throughout the fragmentary legislation to which for some time and for some purposes we are confined. The separate laws, being thus controlled, will be in the main consistent and capable at the proper time, without any harsh disturbance of interests, and almost without a perceptible break of continuity, of uniting into a single and well-compacted general Code.

5. These principles, of the highest importance yet too obvious almost for statement but that they have been called in question by an eminent authority, are, as we think, misrepresented, or at least not correctly presented, when comparison drawn between legislation and house-building. No one, for the purpose, would be so foolish, except in a simile, as to say "I will first build the rooms I want and then devise the ground-plan of the house." What I want

man, having a reasonable anticipation of his future fortune and necessities with limited present means, would do would be to build room after room as he could afford it according to a plan laid down from the first, but not so immutably fixed as to admit of no adaptation to circumstances. This is the analogy, if any, which we think ought to be drawn; and if, coming closer to the matter in hand, we could suppose the English law to have been fostered and controlled in its earlier stages by a wide and clear apprehension of general principles, it is impossible to doubt that it would have conferred through many generations greater blessings, at a much less cost, than in fact it has done to the people amongst whom it grew up. The Roman law, being in theory a *jus gentium*, freed so far as its constructors could free it from the narrowing peculiarities of a particular people, has been found more rich in general principles covering a variety of circumstances than the insular product of our own history and character. From the English law, then, we must not take at random, but choose such materials and such models for the structure we have to raise in India as will fit appropriately into a design, however remote in its accomplishment, congruous and symmetrical in the relation of its parts, and adapted, as far as human foresight extends, to the place, to the people, and to their hoped-for share in the general progress of civilized men.

6. We would not have it supposed that in thus vindicating the beneficial effect, and the necessity even, of a constant attention to uniform and expansive general principles in legislation, we in any way underrate the importance of the historical and of the practical elements of the work. The growth of law is always going on. It is the upshot of a contention ever renewed of rival interests and conflicting tendencies of thought. It thus reflects the material and moral growth of the nation. The historical element of existing law as disclosed in actual usage and the decisions of the Courts as well as in special legislation must never, therefore, be disregarded. But by the aid of comparative jurisprudence we may arrive at such clear conceptions of the life, growth and death of legal ideas in the several stages of social and moral progress that we can with a great degree of probability forecast what is already, and will more certainly be, felt as an incumbrance, and remove it. We may determine, at least approximately, what will fit into the general sphere of national thought of which the legal region is but a segment, and introduce it from another system in which it has already been submitted to experiment. We may labour with a fuller consciousness of the general ends to be pursued so as to work parallel to the legislation of the most advanced and prosperous countries. It is of the nature of the human mind and character to be deeply impressed by an orderly development of consequences from received principles, even when that development takes a course different from what unaided instinct and the first rude necessities of practice would have suggested. Thus, by timely legislation, taking just account of existing legal conditions as an outgrowth of the past and a necessary basis of the future, we may save the community many painful experiences, put it into possession of the fruits of others' labours and pains, and hasten by whole generations its entry into the great procession of the nations towards a uniformity of laws founded on uniformity in the conception of right and of the essential elements of human welfare.

7. In attempting to carry out such a scheme it is, perhaps, more difficult to determine, at any given moment, exactly what legal needs exist to be satisfied than to devise the laws which for the time will satisfy them. It is still harder to determine in what precise form and measure an infusion from a foreign system is capable of forming a vital adhesion to the existing body so as to supply an obvious deficiency, or even give a stimulus to its natural growth. The legislature, then, should be in close and appreciative communication with the felt necessities and the active thought of the society for which it is to work. It must be quick to discern permanent tendencies amongst the temporary fluctuations of popular impulse. Without binding itself in the trammels of what has grown effete, it must recognize the existing state of facts as a main element of the structure to be raised, and mould them into a symmetrical fabric with the more universal element drawn from general jurisprudence. Hence a necessity not only for an acquaintance with the contents and the working of past laws, but for a thorough insight into the actual circumstances of the community both in their mutual relation as physical facts and in the way

they are conceived by the mind of the people, in the wishes and aims thus generated, and in the moral preparation made by them for the reception of some new development or some new combination of principles. When we see the untiring care and precision with which the grounds of chemical or mechanical science are investigated, and the observations and experiments verified again and again before a fact is admitted finally as the ground-work of a law, a sense of surprise is awakened at the coarse and slovenly inductions, or the purely *à priori* assumptions, on which the spirit of system is too often content to build in the science of human action. The true use of a system is to co-ordinate the facts, not to neglect or in an arbitrary way to admit or to exclude them. The true purpose of a Code is to further the moral and material progress of a people by fostering a general harmony of thought and action, and by employing all the means afforded by existing conditions for ensuring a future amelioration. There must, then, be exact and sympathetic observation leading to true insight; there must be development; there must also be adoption and appropriation; but all without waste of force, and without neglect of any element which by its unacknowledged presence will set all calculations at fault.

8. In India itself a different set of objections has been raised to any attempt at scientific legislation. Collect, it is said, and group the existing facts of custom and practice, and leave the future wholly to natural development. The answer is that, essential as an exact ascertainment of the facts of the society and of their true relations is to the legislator, a sound theory is just as essential. It is a sound and comprehensive theory which in legal as in physical science alone gives life to the materials which it embraces. Such a theory in any department of human thought can be formed only by careful and continued reflexion on a copious store both of facts and of subsidiary theories by which the facts are viewed and classed according to various methods of arrangement. It implies the exercise of intelligence unbiassed by any predilection except for the truth, a readiness to accept all the teachings of experience, where it points out what is immediately expedient as well as what is permanently necessary. The contempt for theory which is felt by some men of considerable observing powers is, in truth, a contempt for all that makes their observations valuable. They are themselves the slaves, not unfrequently, of partial theories qualified by mere inconsistencies, which can be reconciled only by reference to some higher point of union at which a wider generalization stands ready to reconcile seemingly discordant facts. A mere empirical acquaintance with affairs may become a snare in the presence of new combinations; and in meeting the foreseen difficulties of the future, it is unsafe to yield to the suggestions of unsystematic thought, or of no thought at all, which are dear to indolence, dogmatism and mental impatience.

9. Objections of the kind that we have just been considering have in the last few years been urged so strongly, and even vehemently, in this country against all comprehensive legislation whatever, that we may be pardoned for examining the arguments that have been employed by reference in somewhat more detail to the teachings of history and of social science. It would seem as though a reaction of lassitude had quenched the energies of many distinguished administrators when we find them shrinking from projects which a few years ago they would have heartily welcomed. Legislation generally has for the time become distasteful, scientific legislation a kind of bugbear. It seems to be thought that the effort of grasping the new necessities can be avoided by a simple folding of the hands: it is overlooked that the times of great administrative progress in India have been the times also of great legislative activity. Society, it is in substance asserted, can provide for its jural needs without any intervention of the legislature; and such intervention, being unnecessary, will almost certainly be mischievous. That there is much that is plausible in these arguments cannot be denied; but we believe they have no solid foundation and would hardly have been thought of but for their accordance with the tendency which for the moment is dominant in the minds of their authors. We think that active legislation is essential to the political health of a growing society; that it meets needs which cannot otherwise be satisfied, and that the more systematic it is, provided the system itself is a moderately good one, the more beneficial it will be in its operation and influence.

10. A sense of the necessity for fixed laws is one of the earliest sentiments of every settled community. It rests on the constraining influence of habit, a

centripetal instinct and the perception of utility according to the dominant notions of the general good. The physical circumstances and the prevailing beliefs of a people form an environment or nidus in which the common tendencies of human nature are developed in a tribal or national form which then reacts strongly upon the elements from which it sprung. Thus a people's law composed of a universal and an individual element becomes as characteristic as its language. It presents itself in concrete forms the suitability of which is immediately apprehended by the popular consciousness, or which are rather determined by it in the very process of germination. By time and use what was vague and unorganized becomes in a measure fixed and symmetrical. The yet unrecognized working is felt of the instinct of order and system; a new or unfixed rule of convenience is moulded to a form consistent with the general spirit of the received custom by the influence of association and a sense of congruity; while the lapse of years surrounds with a sacred halo those earlier laws which are linked with the dim and magnified traditions of the past.

11. As a community advances, the extension of its territory, the separation of employments, the multiplied forms of individual development, enfeeble the common consciousness of legal right which made its earlier law. In the subordinate aggregations which form towns and villages, as in those divisions of the people which compose different classes, a unity of feeling springing from local neighbourhood, similar pursuits or identity of moral tendency still gives birth from a contact with new circumstances to usages whose fitness is recognized, and causes their reception as rules of custom. In the wider sphere of general law the requisite developments have to be effected by scientific evolution from the earlier established principles insensibly modified by the medium in which Courts and jurists work,* or by positive legislation on the part of the sovereign authority. The capacity for a spontaneous development of law in the people wanes as the facts to be regulated grow more complex. A sense of comparative imbecility in the presence of the more definite and palpable embodiment of the public force deprives its law-creative faculty of liveliness and vigour.† The cloudy suggestions which come from this source encounter as to all the great interests of society the clear-cut provisions of a written law. New ideas grow up, new discoveries are made, giving rise to new institutions, fashions and employments. An individualism and independence of action have meanwhile become possible and prevalent which submit to no control less powerful than that of the whole State. It is then the legislature alone which can pronounce the doom of effete laws and perform a work of reconstruction answering to the spirit and the needs of each successive generation.

12. Now this, which is true of communities in general, is in a peculiar degree true of the great community of British India. The apposition at almost every conceivable point of all that is oldest with all that is newest in civilization has produced groupings of fact and jural necessities with which it was impossible that the indigenous law should be able to cope. The legal consciousness of a people bound in the chains of caste and tradition could not develop itself concurrently with the new physical and moral changes brought in by the masterful foreigner. Those only who were familiar with the actual working of the new order of things, though in a different region, could hope to frame laws appropriate to the new world they were creating. The introduction of the English law, or of legislation founded on the English law, into British India may be compared with the general adoption in Europe in the Middle Ages, and especially in Germany, of the Roman law, though the rate of change is infinitely faster. In the slowly-won victory of the enlightened classes over the dull persistence of their ignorant countrymen, the diffusion of new ideas and the creation of new wants and new sensibilities produced in the jural sphere a craving for regulations which could not be built up upon the rude framework of Teutonic tradition. The official depositories and mouth-pieces of custom found no formulas quite adapted to the new exigencies, while the Civil law presented in a consistent

* See Maine's Ancient Law, Ch. II, pp. 31-33 (third edition).

† The establishment of the British power in India has been followed by a decline of the village-communities as independent centres of political life, which is sometimes regretted but was plainly inevitable. In providing for the growth of society as a whole, and favouring individual enterprise, the Government had to limit the authority once exercised by the small communities, and once the necessary stay of their corporate existence, but become in the presence of a higher organization a means only of isolation and obstruction. Restricted in its power to enforce rules by the predominating influence of the ubiquitous "sarkár," the village-assembly soon lost the capacity to invent them. It ceased in be an effective organ alike of the public strength and of the public will. This atrophy in its turn necessitated an increased energy on the part of the Government, and centralized legislation took the place of customary law, as it alone could provide for the extended relations springing from a freer and wider-ranging activity.

system plain rules for daily needs, which yet conformed to general principles of the widest application. There was no need to find out through costly failures the way to sound conclusions. The requisite experiment had been made, and the result so expressed as to produce instant conviction. Thus, the Roman law took its place beside the Customary law, and in the course of generations went far to supersede it. Anomalies in time grew up in this system of double origin. There were inconsistencies of judicial decision and a wilderness of contradictory literature. The Code of Frederick the Great first attempted a thorough-going remedy. The Austrian Code followed; and then the Code Napoléon collecting the opinions of the great legists of France became a model, even in its errors and defects, for half the continent of Europe.

13. We may gather from this retrospect that the influence of English government, of an English mercantile class, of English literature, and acquaintance with English institutions, made the adoption of the English law in its leading principles an inevitable necessity for modern India. The new conditions of social existence raised questions to which the indigenous law gave no answer, or worse than none. Recourse was instinctively had to the law which furnished the requisite solutions, and its decisions once admitted in a few cases exacted conformity throughout a wide area to the principles on which they rested in order to prevent obvious and glaring contradictions. The English race could effectively construct—could even imitate—no civilization but the English; and of this the English law is a vital part. Step by step it made its way by occasional direct legislation, by methods of exposition and by the judgments of the Courts in a fragmentary way into every corner of the country. Mufassal munsifs, speaking no language but their vernacular, were told at last by a Chief Justice through their superiors that they were bound to dispose of the litigation of Maráthas according to the principles of English law which the Courts at Westminster would bring to bear on the same cases.* This, which might seem a *reductio ad absurdum* of the assumptions on which the highest Courts of India had for years proceeded, was after all not a mere logical disproof of the premises from which it was inferred. It was but a somewhat premature anticipation of the result to which things were inevitably tending. The earlier and more obvious works of codification—the Criminal Codes and the Code of Civil Procedure—had then already been produced; but it was now demonstrated that a more searching and laborious task must be undertaken. In the new difficulties which were daily arising, the Native judges, cut off by an elaborate education from sympathetic accord with the thought of their own people, ill-read in their own legal literature and thoroughly conscious of the tests by which their abilities would be appraised, would resort for guidance to the English text-books—to them and to judgments of the High Courts steeped thoroughly in English law, as might be expected from judges long familiar with the lore of the reports. By the Appellate judges the decrees of the lower Courts would be approved or condemned, an improved reading of the English law only being substituted for a defective one, and the chain of precedent at every step growing stronger. A system having won acceptance, no individual judge, however enlightened and sensible, could set bounds to its predominance. Even the terms of the English Real Property Law, drawn straight from the feudal system, have become, with all their misleading connotations, a part of the common vocabulary of the Courts.

14. From such an irregular and haphazard mixture of incongruous systems, some kind of order would in time no doubt have been evolved by the Courts. But the time might be a very long one—all the longer on account of the replenishing of the High Courts periodically by barristers sent straight from England, and therefore, however able, strangers necessarily for some time to the special tendencies of thought, and the special ways of confronting facts, proper to the Indian lawyer. Meanwhile, the people would suffer from uncertainty, and the law become a luxury for the rich or a gambling excitement for men on the brink of insolvency. The Legislature was imperatively called on to regulate the new development on a rational appreciation of the principles to be adopted or rejected, of the forms in which they should be grouped and of the proper place of each greater chapter in the general system of law. A Code, in short, had become necessary in order to prevent the endless litigation, the ruinous losses, the manifold embarrassments and the discouragements to traffic

* See 2 Bom. H. C. R. 38, per Couch, C.J.

and enterprise which would attend the slow formation of a complete body of law by the wasteful process of natural selection. The necessity has not diminished with time. On the contrary, such progress as has been made, as it has rested on an assumption of principles drawn directly or by generalization from the English system, has given to those principles a range of influence,—has so imbedded them in the living body of the Indian law—that all further growth of the jural system must in some way conform to them. The choice is between the halting and contradictory action of the Courts and of chance usages growing up amongst a miscellaneous population and the systematic action of the Legislature, taking all appreciable conditions into account and aiming constantly at reducing the law not only to substantial accordance with actual necessities, but to the most simple, consistent and intelligible form.*

15. The work, moreover, must be one of cautious discrimination as well as of organization. The marked characteristic of the English law, in spite of a much larger infusion of the Roman system than our lawyers are, or were, willing to admit, is its insularity, its shrinking from general principles, its bit-by-bit growth on the results of particular cases. This empirical process has caused our law, no doubt, to grow with our growth, to mirror our history and to fit the peculiar stamp which the national character has received from our antecedents and surroundings. Moreover, a body of decisions has been collected in the reports, greatly outnumbering even the 30,000 *responsa prudentium* which Tribonian and his colleagues compiled at the bidding of the Emperor Justinian. Treated in a really scientific spirit, these decisions should be of inestimable value to the jurist and legislator. They are so many experiments which even in their not infrequent failure are in the highest degree instructive. But it must be said that when read without the aid of wide generalizations, and without the control of dominant notions drawn from the necessary relations of organized society, they may be a clog to progress and a means of almost infinite divergence from the track along which society is destined to move in the coming generations. It needs at times a Mansfield and a Cockburn to break the shackles of precedent, to go back to first principles, and to educe from them results which shall place the law once more abreast of the novel and extended needs of a time when every day brings forth some change.

16. This law, however, so isolated, so special, so indifferent to aught but a practical grasp of the legal relations which a single society presents for discussion, we must of necessity make the basis in a great measure of the law of India. It may serve the purpose; but it is certain that the good will be mixed in a needless degree with evil unless it be used with prudence and sagacity. Those peculiarities which adapt it best to England are in some respects disqualifications in India. From amid the mass of precedents and proximate rules of the practical lawyer, the Indian legislator, if his work is to be beneficial and enduring, must seize the central and governing idea. He must compare it with the results arrived at as to the same class of relations under other systems. If he finds a general accordance between them, he may safely proceed to consider how far the special circumstances of the country and the people for whom he has to legislate admit, repel, or qualify the application of an apparently universal principle. Hindú society has its own laws of unmeasured antiquity. It has its religion closely interwoven with those laws. It has the customs which that religion consecrates and springing fresh from the nature of the people. To ignore these facts is to invite failure. It is a living body that we have to deal with, identical in some respects with others of the same species, but with its individuality and its need for individual treatment as well marked as our own national character.

* Inaction on the part of the Legislature retards but does not arrest legislation. In the absence of enactments the judge makes law declaring what is the customary law, and what rules regulate rights not governed by customary law.

Beyond his own experience the judge must look for materials to the suitor who is interested to secure a particular decision rather than the accurate ascertainment of a usage or the establishment of sound principles; who frequently lacks the means requisite to procure such proof as may be available or to retain a competent advocate. In the ascertainment of the customary law, then, the Legislature has ordinarily greater facilities than the Courts. A proposed law is published. Information can be obtained from the best sources and tested by the experience of individual members, who bring to the discussion of the proposed law experience acquired in the different districts of the empire or province. It may happen, but it must happen less frequently than is possible with the imperfect machinery of Courts of justice, that customary law is rejected where it should be recognized, or recognized where proof is inadequate.

In legislating on subjects not governed by customary law, the Legislature has again this advantage over the Courts, that before it arrives at a decision, its proposals are published, and criticism from all parts of the empire invited and weighed.

17. It is true that in the sphere of the criminal law and of procedure successful steps have been taken in legislation, governed to a certain extent by English analogies. But, if scrutinized, these experiments prove rather the necessity of recasting the materials of the English law than the expediency of adopting them undigested, unassayed and unmodified. The grounds of penal legislation are much the same everywhere. Murder, theft, arson, forgery, are essentially identical wherever a possibility of committing them exists. No serious difficulty is found in drawing up parallel tables of equivalent crimes for the purposes of extradition-treaties. Procedure, again, is a merely mechanical process for getting the parties to litigation and their witnesses before the Courts, for securing a fair hearing, and for giving effect to the Court's command. But when we come to the laws of property and of the family, a very different set of considerations presents itself. The dominion of man over external nature, his right over the actions of his neighbour arising from contract, may assume endlessly various forms. His personal relations as a husband, father, brother or caste-fellow are not only susceptible of infinite variation but touch his sensibilities in their tenderest points. In dealing with the substantive private law we place ourselves in the very midst of the actual life of the sentient beings who look to us for furtherance in happiness and prosperity. Every step we take is full of the peril of wounding some unknown susceptibility. The mass of people are incapable of proceeding *per saltum* to a recognition of the ultimate advantages of great changes which at the time jar on their traditional prejudices and reduce them to a state of puzzled uncertainty.

18. If, then, by means of additional laws we wish to contribute a new expansive force to Native society, we should, first of all, free ourselves from the fetters of a too exclusive devotion to our own somewhat narrow legal system. The work to be done calls for a wider survey, for a comparison of systems and a truly philosophical induction. The late Mr. Justice Willes insisted strongly on the advantages of such a method, even for English legislation. He argues for "a really well-considered Code . . . . embodying improvements suggested by a comparison of our own laws with those of other countries," which, as he truly says, "can hardly all be mistaken." When we see how one proposition after another insisted on by the great continental jurists has to force its way after years or generations of controversy into the body of English jurisprudence, we cannot but be struck with the narrowing effect of an almost purely deductive method confining professional genius to a range in no way commensurate with human nature, and obstinately refusing admission to any legal principle which cannot be proved needless by the possibility of referring it directly to something already admitted. When one sees the vehemence with which the continental jurists themselves contest some important points, a further lesson is learned of the limitation even of highly cultivated faculties. What fits the whole scope of expanding human capacities can be determined only by the profound insight of genius; but ordinary intelligence can pronounce with certainty on the insufficiency or unfitness of many rules for any people or any system except those in whose midst they have grown up.

19. How far, and in what form, the particular rules accepted in England are suited to this country and community is thus in every case a question which must be met on grounds, not of mere prejudice or senseless imitation, but according to a just analysis of what is proposed and what are the conditions under which it is to operate. To answer the question aright, something more than mere juristic science must be brought to bear on it. There must be a competent knowledge of the existing written and unwritten law, intimacy with Native habits and modes of thought, a set of associations through which the mind of the inquirer is spontaneously affected with an emotion, or the reflex of an emotion, akin to that which will be on any occasion felt by the ordinary Mussulmán or Hindú. A large degree of this responsive faculty is no doubt sometimes acquired by men of sympathetic temperament in the work of the Courts, but in general it exacts early and familiar relations between the Native and his would-be benefactor; it requires an intercourse kept up in varying positions through several years to enable the European to go outside himself and see how matters look from the purely Native point of view. It may not be right or safe to accept the view thus presented as conclusive; but it cannot be right simply to ignore it. Proceeding on a method of disdain some of our measures may by

chance succeed; many of them must necessarily fail. We work in the dark, and our legislation, being founded on no appreciative insight into the moral nature of the Natives, can never become in its entirety a portion of their intellectual being. "Government," as Burke says, "is a practical thing made for the happiness of mankind, not to furnish out a spectacle of uniformity to gratify the schemes of visionary politicians"; while the true end of legislation is "to follow, not to force, the public inclination, to give a direction, a form, a technical dress and a specific sanction to the general sense of the community." The experience of the world, the decay of superstitions, enable us now to go back with comparative intellectual freedom to really first principles. In pursuing this course, we come upon springs of thought and action common alike to Hindú, Mussulmán and Christian. At these we should pause and appropriate all they can yield to us; employ the results with frugal skill, and, having thus established the base-line and some of the principal points of our system, leave the development of its details to time, to the sure germination of sound thoughts and to the action of the Courts, continually checked in any tendency to aberration by the constraining influence of great and conspicuous landmarks.

20. The principles, then, which we attempt to introduce in our legislation, and especially in a Code, should be comparatively few, carefully chosen and thoroughly approved. They should be cast in a form as far as possible resembling that of rules already accepted, or appear as the logical outcome of already recognized doctrines.* The new law would thus link itself naturally to the law previously existing, blend with it imperceptibly, and form a basis for a new departure. It is the characteristic of sound and fruitful principles to embrace an ever-widening mass of details within their operation. Contradictory rules and reasonings are either modified or perish before them. Those principles which in themselves are consistent with the elementary facts of human nature are sure as matters progress to be recognized as the proper complement of others already accepted. Thus, from step to step a logically organized system is formed, while by a process of reaction the character of the community itself in which this process is going on is moulded insensibly to a development in which the maximum of its beneficial energy can be put forth in the manifold lines of activity which the law leaves invitingly open in every direction consistent with the common welfare.

21. The leading principles of a Code, such as we have conceived it, would be principles of human nature itself, but principles arrived at by a process of scrupulous comparison. Its propositions should be broad, simple and readily intelligible.† Their remoter consequences should be left to be traced out by judicial interpretation and the play of the popular consciousness. The induction on which they are based should be wide and accurate for the very purpose of avoiding entanglement in the details of subordinate and derivative principles. A Code thus formed will not retard or hamper progress and development: it will afford a new outline to fill up, a new platform to start from, a new impulse to systematic thought. It is conceivable that here and there its rule will constitute a barrier in some direction which otherwise the course of social evolution would have taken; but the slight obstruction thus caused will be as nothing to the positive aid afforded by a well-devised and consistent scheme of fundamental laws. Such a scheme, by the standards it sets up, by the mental standing points which it provides and imposes, contains the most certain and effectual means of its own further amelioration in the future. As the subtilties and complications of human affairs exceed the most sagacious human prevision, it will be found in time that some rules are in effect out of harmony with others. Some will correspond to the spontaneous movement of society and some will not. It may be that those which years before rested on a more specious support of sentiment and reasoning, being in truth the weaker, their inexpediency by degrees comes out. The better-founded rules, meanwhile, gain more and more on the convictions of the community; and a sense of the real incongruousness of the two having arisen, the moment has come for revision and excision. Such a process is as inevitable as human work is necessarily imperfect; but a system

* The concrete application of the law should be facilitated by the now familiar aid of illustrations of as simple a character as possible and drawn from actual cases or the incidents of every-day life.

† "Les lois ne doivent point être subtiles: elles sont faites pour des gens de médiocre entendement."—Mont. Esprit des Lois, XXIX, 16.

sound as a whole will meanwhile have done much to form the character and the turn of legal thought which will make reparation easy and natural without any general disturbance.

22. Due regard being had to the considerations on which we have dwelt, it must be admitted that a variety of laws under the same Government is not only an embarrassment to the Courts, but an impediment to intercourse and fruitful activity. The business of merchants, bankers and carriers, pursued under different conditions in different localities, is hampered with difficulties which check enterprise resting on nice calculations and adjustments. The public law ought to be substantially the same throughout the territories under a Government, as otherwise people may expose themselves without knowing, without having reason to know it, to ruinous penalties. When Caste-laws do not restrict intercommunion, uniformity of marriage and family-laws is as obviously desirable. The law relating to immoveable property and its incidents may well admit of considerable variations according to local circumstances. Landed estates are usually collected in one province and subject to one law; but even when this is not so, little or no practical inconvenience arises from a property in Bengal being held on a different tenure from one in Madras. Within the sphere of transactions variable at the will of those who engage in them, it is in the mutually dependent and ever-extending operations of commerce that a need of uniformity of law first becomes apparent; and thus the law of contracts, first in fragmentary sections and then in a systematic collection of general principles, claimed early recognition in the formation of the Indian Code. As society with its desires and needs settles down, in various phases of its being, to an approximately permanent scheme of existence, the tendency to assimilation which in ruder times would have extended identical customs over a wider and wider field appeals to the Government to effect the same objects by legislation. The spirit of the community at large spreads by gradual infiltration through the mass of local peculiarities and subdues them to itself. Change of dwelling-place and sale of land become more frequent; and the necessity is felt of rules for the holding of property and for all common transactions which will best express the average general convictions as to what is beneficial and convenient.

23. By opponents of scientific uniformity in legislation for India we are often reminded of the extremely different social conditions and stages of progress attained in different parts of the country. That very great differences exist is undoubted; but it is in no way conclusive of the question of systematic, as opposed to casual, law-making. Looking at the matter by the light of history, we have to admit that the contrasts in civilization amongst the several provinces of the Roman Empire were not less marked than those to be observed in British India. Yet this was not allowed to prevent the growth and application of a uniform system of legal principles. The prætorian law, in fact, gained largely by its necessary adaptation to the needs of citizens and foreigners alike, and its consequent rejection of all that was specially local and peculiar. Principles of universal application according to the standards then recognized had to be sought out, because it was felt that what was a good reason for a rule to a Roman was sometimes no reason at all to a foreigner, or even to a provincial. It was in this way that the Civil Law gained that character of generality which has given it such an ascendancy on the Continent of Europe. In India analogous conditions must lead to not wholly unlike results. The law to be introduced, or framed out of existing local materials, has always to be tried by the test of its suitability to the varying circumstances of the different provinces. What is insular or cramped either in thought or in expression is thus almost certainly eliminated. The central ideas of the English law are, in such works as the Penal Code and the Contract Act, cleared from the remnants of a lower stage of organization with which, in the English books, and in the English Courts, they are still encumbered, and presented in a simplicity and generality of expression which has re-acted very perceptibly on the ideas of lawyers in England. The more searching analysis forced by his situation on the Indian lawyer and legislator may thus in the end prove highly beneficial both to the science of law, and to its practical application.

24. Still, exceptions must undoubtedly be made in many cases in which it can be seen that what is special and local cannot be made immediately to yield

to what is general without a diminution of the people's happiness. In such cases the question occurs, "Le mal de changer est-il toujours moins grand que le mal de souffrir?"* and it must receive a reasonable and considerate answer. But even the most backward districts are by degrees drawn within the general circulation of thought and activity. Their people become stamped with much the same intellectual marks as their neighbours. Transactions between them increase in frequency. After a time familiarity and habit have made a removal of anomalies welcome; and in this way a well-ordered uniformity subdues tract after tract by a perfectly natural process. It is quite possible, indeed, that, in the future, provinces which had few or no definite legal ideas of their own may become, like Gaul in ancient days, remarkable for the completeness and tenacity of their adhesion to the new system. In the meantime, the existence of necessary exceptions in particular districts is no more a reason against a systematic Code in other parts of India, than the operation in Scotland or the Channel Islands of their own laws is a reason against a scientific recension of the law of England.

25. It is not, however, necessary or desirable that a Code, taking it in even its narrower sense of an aggregate of the rules in a particular department of the law, should include chapters or separate statutes on every branch and subsection of the whole subject. As to some of these a change of circumstances, such as the discovery of an entirely new means of utilizing property, the growth or decline of population, or a rapid variation in people's conceptions and sentiments, may make it desirable to await the natural evolution of the new order of ideas. Custom itself in such cases undergoes a silent metamorphosis, which undue urgency would arrest, as it would call in alarm and prejudice to the support of established use and wont, and make reform possible only at the cost of dissatisfaction and resentment. In other cases wholly new institutions, such as railways or Government currency-notes, have to find by tentative adjustments their proper place amongst those already existing. Special and temporary legislation, and that only, is properly applicable in such instances. By degrees it is found out how far the change of facts and of ideas necessitates a permanent enlargement or modification of accepted general principles; and when this has come to pass, the time has arrived for an incorporation of the special law within the general system of the Code. In a well-ordered system a place will be ready for it.

26. A consideration of the first importance in the formation of laws is the character of the machinery by which they will be carried into effect. However well devised they may be in substance to meet the needs of the society for which they are made, yet if they involve theories and ways of regarding the facts they propose to deal with wholly foreign to the conceptions of those who are to apply them, it is inevitable that variations and errors of practice should arise which will largely detract from their success. In order that the administrator should work in the spirit of the legislator, it is necessary that the legislator should first bring himself within the sphere of thought of the administrator. He may enlarge and even transform that sphere by judicious endeavour, but it will not in general admit of sudden expansion or thaumaturgic change. Human stolidity, the force of habit, the faith in professional formulas, the disinclination to analysis of common notions—all these are factors in the problem with which the legislator has to deal. If he is bent rather on practical effect than theoretic excellence, they reconcile him to a slow march, in which his followers may accompany him, as preferable to any flight, however brilliant, in which he will be altogether alone. Thus, to make a law in India practically beneficial, account must be taken of the means of professional education,† of the constitution and relations of the several official ranks,

* Mont. Esp. des Lois, XXIX, 18.

† In some provinces necessarily, in others without such apparent necessity, the qualifications for admission to the profession of the law exact little either of technical or general knowledge.

In some provinces, and generally in the Mufassal, except in the cities, where there are law-professorships established by the Government in connexion with a University or Central College, technical education other than self-instruction is not available. The system of apprenticeship is unknown outside the Presidency-towns, nor there always resorted to.

The remuneration of professional assistance is, owing to the poverty of the people generally, meagre; and pleaders without private means are unable to provide themselves with text-books or reports, if they are sufficiently educated to study them. The judges can count on little assistance from the Mufassal Bar in any case that falls outside the range of their daily experience. The parties, at what is too often to them ruinous expense, are compelled to appeal from Court to Court, and eventually find themselves deprived of justice from the unskilfulness with which their cases have been launched or prosecuted in the Court of first instance. No radical improvement is to be expected in the administration of justice in India until the better education of the Mufassal Bar is secured; and having regard to the circumstances of the people, the most effective, because to the Bar the least expensive means of securing this result appears to be the extension of codified law.

of the special merits and defects of the administrative class, and the traditions in which they have been trained, as well as of the physical situation, the history and character, of those on whom the law is to operate. Abstract perfection must yield in this as in other ways to the narrowing conditions of actual practice and of work to be done by ordinary officials. This, however, is so far from affording any reason against scientific legislation adapted to eventual consolidation that it supplies an argument in favour of that course. A poor and generally ill-trained class of advocates must derive obvious advantages from the economy and uniformity of method of a well-constructed Code. Busy administrators, dealing off-hand with innumerable details, cannot afford the time, even if they have the turn of mind, when a legal question arises, for sifting a particular Act so as to make themselves by a special study masters of what it says and of the spirit in which it has been written. If, however, all the principal Acts are composed on substantially uniform principles and with reference to higher unities towards which those principles converge, much of the official's labour is saved. He becomes himself penetrated by the spirit of the Code, and naturally brings to bear on the construction of every passage a method of interpretation substantially identical with that of the Legislature itself. The consummation is thus furthered, though it may never be quite achieved, of a uniformity of administration giving full effect everywhere to uniformity of law.

27. If, in endeavouring to state the grounds and principles on which, as we think, sectional and eventually general codification should proceed in India, we have been led into undue prolixity, a reason or an excuse may be found in the existence at this time in this country of a strong current of feeling which is opposed to all systematic legislation whatever. Its influence may not improbably be felt even in England, and by some whose interest in this country entitles them to a full statement of the reasons on which we would base systematic legislation; but, without dwelling on any speculation of that kind, it is, we think, highly desirable that in India, and for Indian purposes, a notion to which indolence and arbitrariness incline us to give a too ready welcome should be met, and if possible dissipated. The success of laws depends in some degree everywhere—in India in a special degree—on the spirit in which they are received and administered: and the zeal of the great body of public functionaries will, we believe, be more heartily engaged in giving effect to a legal system when they perceive its solid groundwork and its beneficial aim. A Code framed according to the conceptions we have tried to set forth ought not to fail in either requisite. It involves no preference of conjectural anticipation to that clear apprehension of fact which is the only sure foundation of science. In the sphere of legislation, as in other spheres, true reformation is a process of evolution rather than of revolution. The life of a community, as of an individual, implies continuity and assimilation. Society is a complex aggregate, swayed by inherited tendencies, beliefs and sentiments with respect to family-relations, to neighbourly rights and duties, to liberty and property, which no purely speculative plan of legislation would fit. All this is true and of unspeakable importance; but the same study and experience which establish its truth reveal also the capacity for progress which every community presents, the immense efficiency of co-ordinated action, the power to control, to stimulate and to mould a national character, of a reasonable, just and consistent system of laws.

28. It is not necessary or desirable that the principles of human action, and of men's relations, as they appear separately on ultimate analysis, should be the ground of a classification of laws or of the subjects for legislation. If we may resume the comparison to a house, it is plain that in constructing one as well as another, the builder must have regard to the same principles as to strength and applicability of materials, to the same mechanical laws and the same rudiments of design. But a classification of houses—still more of rooms—according to the predominance in them of one or the other of these elements of their construction would be of no service for the ordinary uses of life. For such purposes they are classed according to a set of more obvious external characteristics—their fitness for particular purposes—not because the others are less important, but because habit has taught us to expect a general conformity to a reasonable standard which on occasion we test in the proper way. The classification according to position, shape and fitness brings the objects into connexion

along a more extended line of useful and practical ideas than one according to more abstruse resemblances. So in arranging laws, it is not so much the underlying principles of their construction which should determine their classification, as the readiness with which particular series of rules hang together, or group themselves about some central doctrine, by a spontaneous association of ideas. When we use such words as "marriage," "partnership," "insurance," each of them calls up a train of thought more closely connected in fact, than the artificial combination of the infinitely various concrete instances embraced under such a word as "contract" or as "property." The use of method in legislation, as in arranging the contents of an existing aggregate of laws, is to aid the true conception and the recollection of the individual rules, and to bring out most forcibly their mutual relations in those respects in which they bear on actual practice. A grouping thus determined has somewhat the same relation to a purely abstract system, such as Austin favoured, as the natural system in botany to the Linnæan system. It takes account of the whole being and attributes of the objects to be dealt with, instead of properties of them, determinable indeed, but not by their determination bringing sufficiently together those which for the observer have most significance, and thus combining in each species the objects which in their totality are for him most really and closely related.

29. Another observation of some importance with reference to the arrangement of laws is that the chronological order of their emergence by no means coincides with that which they would occupy either according to the abstract scheme of a speculative jurist, or their co-ordination in a complete system. The practical needs of a society, arising from its moral and physical circumstances, may give rise to an institution at a comparatively early stage of its progress, the logical reasons for which are not disengaged for ages afterwards; while simple and obvious rules spring up in the latest as in the earliest stage to meet by slight adjustment some slight change. Thus Austin's analysis of sovereignty and law followed, not preceded, the practical outgrowth of innumerable institutions logically referrible to the notions thus brought into distinctness; and in the work of practical legislation it would not be possible either to await a final resolution of aggregate right into its irreducible elements, or to make those elements, when ascertained, the basis in their crude individuality of separate jural structures. The facts with which the law has to deal are essentially complex. It must yield, therefore, to the cross-divisions of human affairs, build on organic combinations of primary ideas, and accept great leading principles rather as a permeating influence than as a sole or chief ground of discrimination from each other of the great chapters of a Code.

30. The inference from such considerations as well as from the general practice of mankind is, that neither the purely abstract principles involved in laws, nor their historical relations, however necessary a study of these may be for their full comprehension, and for their scientific reconstruction, afford a safe or convenient basis for their arrangement. The great necessary relations in society which the laws do not create, but only regulate, are those which, combining the largest collections of naturally connected doctrines, suggest the best working plan. The State, moreover, does not and cannot as such come forward in its law-making capacity until society is already formed and tolerably well advanced in a rudimentary civilization. Its very existence as a political power presupposes a community already by common consent submitting in many things to fixed laws. What the sovereign-power, wherever it resides, has under these circumstances to do is, first, to provide for its own continued existence, and next for that of the society, by checking the disruptive force of private violence. The acquisition and devolution of property must already have become subject to customary rules before law in the strictest sense becomes possible. The governing ideas are modified and defined rather than created by legislation. The family in some form must have been coeval with, if not prior to, distinct personal ownership. In its essence it involves a set of relations but very partially amenable to external coercive regulation, but its continuity of existence brings it into connexions with property which at first are recognized and then regulated.

31. In all these cases the State has to deal with relations conforming to regular types of a permanent or at least durable existence, and susceptible of

strict regulation. In the great field of personal obligations the power of legislation as bearing on the essentials is comparatively limited. The natural instinct of freedom asserts itself in making bargains, and there is no interest of the community in general to be served by checking its indulgence. The law here is concerned rather in facilitating than in controlling the action of individuals. But if one fails in the duty he has undertaken to another, the State intervenes, and by force compels him to perform this duty, as it would one directly imposed in the public interest, or else to render an equivalent. The intervention must, however, be called for. No interest of the community is so directly touched that the State should voluntarily step in to repress a breach of contract. Nor is it concerned, without invitation, to enforce redress for the large class of wrongs, ranging from inappreciably petty injuries at one end of the scale up to offences at the other. The public is but remotely interested in the contentions that arise from this source, in which, too, as in cases of contract, the right or wrong is seldom all on one side. The general characteristic of both classes of obligations is that they can be satisfied by a money-payment,—liquidated or unliquidated damages,—if not, then by some stipulated or compensatory act enforceable in a like way, from whichever source the obligation has sprung. Here the connecting link which associates cases otherwise very diverse is the substantial identity of the remedies, as in family-law it is the identity of physical and moral relations, and in the law of property the identical nature of the material objects of men's rights and duties.

32. The law of personal capacity lies rather collateral to, than in any relation of logical antecedence or sequence to, the other great branches of the law. We may regard the impersonated State as either addressing its commands only to persons of particular conditions, as alone conceived able to obey them, or to the whole body of citizens, with following clauses of exception in favour of those deemed incapable of performing the duties imposed on each man in general. In a Code recognizing caste or other distinctions of race or birth as stamping an immutable legal character on every subject from the first, the law of status in this sense, and the legislation determining it, might properly take precedence of other private laws. It would define certain dominant capacities by which the whole operation of the laws of property, family, and obligations would be pervaded and modified at every step. But in a system accepting as a principle the possibility of indefinite changes of personal condition a different set of considerations prevail. We are not met at every turn by an enlarged capacity attending a high caste or a *deminutio capitis* caused by a low caste: capacity for rights and duties presents itself as generally uniform, subject only to particular exceptions requiring special discussion. Thus, physical imbecility due to age or sex, mental, as in the case of lunacy, and disabilities arising from a foreign nationality or domicile, give rise to qualifications for their subjects of the commands and permissions that bear on others. A special extension of personal rights, as in the case of a British-born subject, is anomalous, and, like the exemption of a Native notability from attendance in Court, is best treated perhaps only as a singular provision of the particular law which in each case gives the privilege.

33. The cases of restricted capacity that we have mentioned may obviously in a general system be as well dealt with after as before the laws of property and of obligations. The case of insolvency, in which a man labours under a positive incapacity to pay debts which the law bids him pay, is a case of personal disability which cannot possibly be dealt with in legislation without an assumption of laws of property and obligation already established. Corporations and societies, whether formed for mercantile or for charitable purposes, are significant to the law solely or chiefly as artificial persons capable of holding property subject to special restrictions: the place of the law respecting them should naturally be determined by this consideration. The legal relations of such loose aggregates as the inhabitants of a hamlet, or the Dhers or Mhárs of a village, stand on the border between the political and the private law. Co-ownership and co-liability, solidarity of rights and of obligations, being notions which come into activity as a rule only when the performance of obligations is due, and not really affecting the extent or essence of the rights or duties in themselves, the rules concerning these subjects group themselves most naturally

under the law of obligations. Within the same principle falls the law of partnership.

34. The duties and rights of persons in a quasi-representative character, such as trustees, have reference necessarily in the main to property, and imply laws of property already recognized. The assignee, the incumbrancer, the judgment-creditor, the liquidator, the executor and the administrator have each his peculiar, and for some purposes representative, position. But the legal right or duty devolving on such persons on account of another is not in itself essentially varied by the devolution. It is determined only as to details by the particular law which makes them substitutes, and the law relating to it is united by a stronger association to the law of property or of succession than to the general law of persons. In like manner, the rules investing particular functionaries, unitedly or individually, with special competencies are connected more naturally with the political or public law than with a law of personal capacities. Many offices are regarded in England as freeholds. With these may be compared such groups of rights and duties as belong to a village-astrologer. The holder of such an office has no doubt a special personal position; but it consists in this, that, in consideration of his performing certain duties, he holds property or a right against the property of his fellow-villagers. There is in this no peculiar status, no medium through which the incidence upon him of the law generally is disturbed or varied.

35. Although, then, as men are the subject of all laws, it might seem proper to place the law of persons first in any complete system, yet, looking to the actual needs of society, the rules of the public law are those which must first be established. "*Jus privatum sub tutela juris publici latet*," as Bacon says; and the higher stages of its development cannot be reached save in the security afforded by fixed and known laws of penal coercion. It was practically indispensable, therefore, that the Indian Government should enact the Penal Code, the Code of Criminal Procedure and the Code of Civil Procedure before reducing to scientific order the branches of the private law which have since engaged its attention. They express the rules according to which the State will exercise its external coercive force; and though the Code of Civil Procedure ought, perhaps, in theory and in a final arrangement, to follow the laws to which it supplies a sanction, yet, as being simply imperative, it rightly stands historically where it does. The substantive law of property and of obligations, though as yet untouched in great part by legislation, was sufficiently understood when the Code was enacted to furnish unwritten rules for the common cases; and to these the procedure could be applied. So, also, could rules of authentication, such as the Registration-laws, and fiscal rules, such as the Acts relating to stamps and court-fees. Limitation may be deemed a part of procedure itself, and has called for regulation in a series of Acts. In the same branch of legislation the rules of evidence were summarized in 1855, and more completely by Act I of 1872. Its outline may be deemed completed by the Specific Relief Act, I of 1877.

36. If, now, we should suppose the legislature to proceed from the absolutely imperative rules embraced in the public law to those by which it will enforce duties by remedial interference at the request or suggestion of a person injured, we should look next for a Law of Wrongs. In a complete system, starting from the basis of what acts or abstinences one subject is to be allowed to exact from another, no doubt the laws defining rights and their exercise throughout the whole range to which compulsion is properly applicable would precede a law concerned with the infringement of such rights and the redress of the consequent injuries. But laws in the legislative era are directly concerned with duties, and but indirectly with rights. The practical measure of a right created by Statute is the obligation that this Statute imposes. To some duties there are no corresponding rights in the proper sense of an extension of the power of a private individual over the action of another. The State simply commands that, under given circumstances, a particular duty shall be done on pain of damages or a penalty for default. The notion in such cases of the conduct being properly compulsive, apart from any special engagement, is what links the law affecting them to that of private wrongs in the chapter of absolute duties. For all practical purposes, moreover, each genus of right is well established long before its species are determined and their characteristics finally settled by the later refinements of legislation. If, then, the legislature says that, apart from any exercise of volition in engaging to do this or that act, each subject shall abstain from particular classes of actions, or under circumstances shall act in particular ways, in which another subject is directly interested, those classes of actions can be easily defined by reference to well-understood rights, although the remotest distinctions of the latter may not yet have been fixed by the positive law. An "earlier Statute deals [with cases] as a genus within which a new species is brought by a subsequent Act," even without an express reference to the earlier, "*ubi enim casus exprimi non poterat . . . . casus omissus habetur pro expresso si similis fuerit ratio.*"* The law of wrongs, then, is theoretically possible and practically eligible as a subject for legislation without waiting for the detailed evolution of the laws of property and contractual obligations. As to the obligations arising from faults and failures of duty, which range from breaches of the law of quasi-contract up to the gravest civil injuries, that law itself must depend on another which defines the wrongs, and the kind of reparation which the law deems proper for each. It happens, here, as in every department, that according to any possible arrangement each class of laws is dovetailed in practice into some other. The real activities of social life are all going on together, and what a moment ago was a consequence has now become a cause in a tangle of interdependence. It is a necessary incident of all consecutive legislation that in earlier Acts there should be an anticipation of the main principles at least of others yet unconstructed.

37. As a matter of fact, the strict law of persons has acquired a definite form and purpose in the Acts relating to minority and the relations connected with it (Act IX of 1875, &c.), in the Lunacy Acts, and in the Naturalization and Extradition Acts, the last two standing on the border-land between personal and public or political law. The Companies Act, X of 1866, deals with the whole class of subjects suggested by its title. Act XX of 1863, removing the subject of temple-management from the domain of public to that of private law, has provided for the constitution of the bodies by whom the endowments are to be held and dealt with. The time for an expansion of this law and for recasting it in its final shape may hardly yet have arrived, though it seems clear that it will shortly need revision. In the department of family-law, marriage and divorce have been provided for by legislation in those sections of the community whose legal circumstances seemed to call for such regulation. Relations with regard to property as affected by marriage are in part determined by the Succession Act, X of 1865. The legal relations of parentage still await regulation, but for the great mass of the population are mingled, like all the family-relations, with religious laws which it would be political sacrilege to touch—a blunder under present conditions of thought and sensibility worse than a crime.† There is a law of guardian and ward, Act XIII of 1874, of very limited application, which may well be revised and extended. As to kinsmanship and its rights and duties—a topic of great importance under the Hindú Law of Inheritance, and of some importance under the Muhammadan law—legislation cannot be thought desirable until a systematic revision of these laws is called for with substantial unanimity by the Native communities themselves. Whenever such a work becomes expedient, Act XXI of 1850, preventing loss of property through loss of caste, and Act XV of 1856, permitting the remarriage of Hindú widows of all castes, will be embraced within further-reaching laws. The daily rule of civil life is disengaging itself by degrees in custom from the purely religious law, and the severance is hastened by the action of Courts working in a plane of thought but partially coincident with that of the Native mind: the growth of ideas in a wholly changed medium must here be awaited, not in any way anticipated. For the sections of the community not subject to the laws of Manu or of Muhammad, or other special personal law, the Succession Act provides a law which, during a trial of fourteen years, has been found well suited to their necessities, so far as can be gathered from the silence of those most interested. In matters not touching the personal law of Hindús, the same Act has been made applicable to them by the Hindú

* Bac: De Augm. B. VIII De Just. Univ. Aph. 20.

† No proposal; we are informed, has been entertained by the Government of India for legislation on the subject which would have the effect of withdrawing it in the case of Natives of this country from the control of their religious or personal laws. Any suggestions to the contrary must have rested on an entire misapprehension of the facts.

Wills Act, XXI of 1870, in the Lower Provinces of Bengal and in the towns of Madras and Bombay. As opportunities arise, it will be well to work on the same principle, by giving definition, regularity and means of authentication, so far as this can be done without causing misconception, to the various transactions which must still be governed as to their substance by rules sacred to those amongst whom they prevail, and not to be hastily moulded to conformity with a wholly alien system. The laws devised for this purpose should, however, stand for some years outside the general system of the Code, to be embraced within it only when time and use have shown with what variations, if any, they may be finally adopted.

38. Laws of the class to which we have just adverted would be instances falling under the principle we have stated of transitory circumstances met by a consciously transitory action of the legislature. To the same class would belong the rules which it may be necessary to enact on the thorny subject of change of personal law or of status attending a change of religion either on the part of the person held in view, or of some other person connected with him. It is a principle of the Hindú law as old as Manu that effect is to be given not only to local custom but to the usages of classes and of families. Under this rule it has been recognized that a Hindú family migrating may adopt the law of its new domicile or retain that of its former home. Primogeniture has been favoured in many cases. Female succession has in some been denied. The anomalies which a family may retain, it may also cast off, by indicating its submission to the general law. It was hardly an extension, therefore, of the existing law when the Privy Council in the great case of *Abraham* v. *Abraham* determined that a convert to Christianity might choose the law by which the devolution of his property should be governed. The High Court of Madras has ruled that a Hindú by his conversion subjects his estate to the operation of the Indian Succession Act (Act X of 1865). It is obvious that there are cases in which, according to the law as thus interpreted, an affected change of religion might be made a means of inflicting grievous wrong. In some districts conversions of Hindús to Muhammadanism are pretty frequent, though only amongst the lower orders. Fishermen on the Western coast oscillate sometimes between Christianity and a Hindúised Muhammadanism. The questions raised by cases such as these cannot, it is plain, be disposed of by the legislature with advertence merely to the single possibility of conversion to Christianity. Christians have become Mussalmáns; Sikhs return sometimes to ordinary Hindúism; and a family once Jains has been found included within the community of the Lingayats. In the confusion of classes and the corruption of creeds, of which some provinces present such strange examples, it may eventually be found expedient to place the law of status as to property and as to succession on a footing wholly unconnected with religious belief or profession wherever the two are not indissolubly united. But for the present, and perhaps for a generation to come, the steps taken towards the solution of this legislative problem should for the most part be local, tentative, and occasional. In the meantime it deserves consideration whether, as regards property wholly at his own disposal, the Native of India, who may under circumstances elect amongst different forms of the Hindú law, ought not to be empowered to place himself under the sway of the Succession Act, and the other general laws of the same class enacted by the legislature.* It seems highly undesirable to make a declaration of a change of faith a condition precedent to admission to an improved law of property and succession; and a public notice duly registered may perhaps be thought a sufficient safeguard against fraud on the part of one desiring to embrace the benefits of modern legislation.

39. Taking, then, the great divisions of a complete future Code to relate to (1) Public and Political Law, (2) Absolute Rights and Duties, (3) Obligations, (4) Property, (5) Personal Law, (6) Family Law, and (7) Successions, we find that the most marked deficiencies are under heads (2) and (4). For the law of

* Sir Charles Turner observes that a Hindú may by will distribute property wholly at his own disposal in accordance with the Succession Act, but he doubts whether he can merely by election place himself under a particular form of the Hindú law. He would substitute for this passage the following:—

"It deserves consideration whether, as regards property wholly at its disposal, a family which may by usage place itself under a special form of law, whether Hindú, or any other, might not be empowered to declare that its property shall be gogoverned by the Succession Act and other general laws of the same class enacted by the legislature."

property, judicial investigations, conducted now in a much more enlarged spirit than formerly, are rapidly paving the way to safe and comprehensive legislation; but to strike out into a region not thoroughly pioneered, or to follow the unsafe guidance of the English law, might do infinite harm. The work must be one of time and watchfulness and patience. Meanwhile, should the Bills which we now recommend obtain the approval of the legislature, the positive rules as to rights in the substantive Civil law will have received a considerable development. The Contract Act, with the Acts relating respectively to Negotiable Instruments, to the Transfer of Property, and to Trusts, will have settled the main principles of free bilateral transactions and fiduciary relations. The law as to the estates and interests to which the State will give effect in immoveables cannot as yet be reduced in its whole extent to systematic uniformity; but Alluvion is an important fact, which has daily to be dealt with, and our acquaintance with the broader features of the law of fixed property enables us to pronounce on the expediency of such limitations and extensions of proprietorship as are involved in a reasonable law of Easements. On the frontier-line of contract and family-law we place the Master and Servant Bill, carefully avoiding any aggression beyond what is absolutely necessary on the delicate domain of purely domestic relations. When these Acts or the chief of them have been passed,* we think that the Law of Wrongs, or of absolute private duties and rights, may next most profitably engage the attention of the legislature. This law, standing between the criminal law and the laws of property and obligations, is interwoven with both. It has numerous connexions also with the law of persons and of the family, and even with the law of succession, considering the onerous responsibilities which the latter throws on executors. If, in legislating on the subject, there will be some slight anticipation of rules yet to be precisely formulated, it may be said that there will at least be no presumption of leading principles still to be established. On the other hand, the positive rules as to rights which have already been enacted require, as a complement, a rational law of wrongs. What acts or omissions, under what circumstances, are civil wrongs may be answered generically at least on principles already accepted and embodied in our positive law, and beyond broad general rules it is not expedient to go. Such rules well co-ordinated and not frittered away in transcendental distinctions may, we apprehend, be safely left for minute development in the hands of the judges. The details of life and of social relations differ infinitely in this country from what they are in England, albeit the foundations of morality are in both countries the same: great care therefore should be exercised to avoid giving an arbitrary generality to special or secondary principles of the English system. Within firm and unmistakable outlines ample room should be afforded for the play of individual energy, for the growth of beneficial influences springing from sources within the community itself, and for the plastic force of judges and administrators at once in thorough sympathy with the legislature and thoroughly instructed in the habits, practices and tendencies of the Native community. We are not without hope that a clearly-drawn Code of absolute civil duties, well adapted to the character of the people, may, with the Penal Code and the Contract-law, serve in the course of time as the solid core of a greatly improved scheme of popular ethics. The argument that by knowing their absolute civil rights people will in many instances be led into litigation for the sake of asserting them, though it has been seriously advanced, is hardly worth serious discussion. Its natural conclusion is that all civil laws are an evil; it may be all penal laws too, since, if no one knew that he could obtain redress, no one would complain of any injury. In the one case or in the other the clearer the legal duty becomes, the fewer occasions will there usually be for litigation. Laws are made and administered in the interest of the general wellbeing. No rights should be given by law except those which it is important to maintain; and when the law conforms to this principle, the man may be regarded as a friend to society who, in vindication of his private right, enforces observance of a rule universally beneficial.

* As to the order in which the several Bills should be brought forward, none more convenient suggests itself than that in which we have here mentioned them. The Transfer of Property Bill is probably the most important in the extent of its bearing on the transactions of the people at large, and on that account might claim the first attention of the legislature; but the Negotiable Instruments Bill would probably be passed with greater rapidity, and would in its department be a very useful measure.

40. The Law of Torts, in the scope which we think ought to be given to it as a principal division of a general Code, will exact from its framers a great deal of labour and discrimination. The time to be expended on its preparation, if used with reasonable diligence, ought not to be in any way stinted. The various propositions and rules contained in it should be dwelt on for so long that they may be brought fairly and closely into comparison with the innumerable other jural notions, which will not come at a moment's notice, but present themselves spontaneously in the course of leisurely deliberation. To the legislature at large such a law will supply a subject on which all available experience and acumen may well be expended for a considerable time. Whether, then, any other far-reaching measure should at the same time be in hand may admit of question. We are inclined to think that when a topic of difficulty and great extent, having widely ramified connexions with human affairs and interests, has to be dealt with, the most effective course is to allow the mind for the time to be in a great degree possessed by it. By this, mental activity is not checked, rather stimulated; but all thoughts are for the time weighed with reference to the main and central object of consideration, until a coherent body of ideas has taken form and substance. A comparison of results then brings out the strong and the weak points of each man's conclusions and opinions; superficialities are readily disposed of. And all this care the Law of Torts in an especial degree requires. But if time and thought can be found for other subjects concurrently with this, we would suggest that the scheme set forth in paragraph 7 of the despatch of the Government of India to the Secretary of State, No. 34, dated 10th May, 1877, should be carried to completion. The laws of insurance, of carriers, and of lien are all of considerable importance; and they are to a great extent in the incipient stage in which they can be moulded according to the wisdom of the legislature without individual injury or inconvenience.* Still they do not affect the daily life of the great bulk of the people in any serious degree. No great harm will arise from the postponement of legislation regarding them until the heavier task is done.

41. When the Acts that we have suggested have been passed, the Law of Property in its whole extent will be a fit object of attention.† It is a wide and intricate subject, demanding for its mastery a mind well furnished with general principles, and with ability to grasp and measure details. To predict whether out of the multitudinous interests and rights relating to property which present themselves in India a uniform system of propositions and rules applicable to the whole country, or to a great part of it, can be evolved would be to anticipate the result which can really be reached only by close and prolonged study and observation by specially capable men.‡ In the meantime the work already accomplished by the legislature, united with other deeply reaching influences, must gradually produce great changes in the mental attitude of the people towards a scientific reformation of the law in those respects wherein an amelioration shall seem called for. When a new set of ideas has been received into the popular mind, an older set logically inconsistent may for some time stand side by side with it; but the intellectual ground having been taken away, the hold of superannuated notions by mere association is gradually loosened, and the way is prepared for their modification or complete absorption. As industry and enterprise extend in India, and larger capitals are invested in improvements

* The principal foreign trade of India is carried on with England; the internal trade has been mainly developed by the operations of English or other foreign merchants residing in the Presidency-cities and towns of export, who are familiar with English law. The law of contracts adopted by the legislature and now in force follows closely the English law. These considerations point to the desirability of securing a conformity of the mercantile law of India to the mercantile law of England, provision being made for the preservation of such Native customs as have survived the extension of commerce. To the codification of this branch of the law no objections have been taken.

† This, in its final form, will obviously include the chapters on Alluvion, as a mode of accession, and on Easements, as particular extensions and restrictions of the rights of ownership, which as subjects for practical legislation require immediate attention. Closely connected with these are incorporeal rights, which in India sometimes take peculiar and characteristic forms. The law of boundaries, the rights and duties of neighbouring owners as to delimitations and landmarks, is a topic of practical importance requiring careful investigation. There are many other objects falling under the same general title which it is not necessary to enumerate, and which indeed would in some instances vary in their name and their contents according to the presiding theory ultimately adopted.

‡ Constituted as is the Legislative Department of the Government of India, it appears to promise better results that the Law Member of Council for the time being should (save when legislation is urgently called for on any other subject) select for codification those branches of the law with which he is most familiar. Thus the valuable chapter on Powers drawn by Sir Arthur Hobhouse and included in the earlier editions of the Transfer of Property Bill came from a hand specially skilled. It has been found necessary to lay this aside for the present, but only, as we anticipate, to be resumed when a general sense of its utility and fitness has been developed by the further growth of legal conceptions.

of the land, many existing customs will so palpably be impediments to progress that their extinction will be generally welcomed. Any general law which may be framed for many years to come should be traced on spacious lines, avoiding over-interference, while leaving ample room for inevitable change. Such partial improvements as are meanwhile called for may best be made with special reference to local circumstances. For that important branch of the law which relates to landlord and tenant we have made provision, so far as at present seems expedient, by the chapter on Leases in the Transfer of Property Bill.

42. We do not think that at present our suggestions for the extension of general legislation could with advantage or prudence be pushed any further. What Bacon says of cases is equally true of laws themselves,—*Angustia prudentiæ humanæ casus omnes quos tempus reperit non potest capere*,* and the work we have proposed should not be hurried through any premature reaching beyond it to remoter aims and ends. But by the side of constructive legislation we think that a preparation might well be made for a systematic chapter on interpretation. It would be desirable, indeed, that the main propositions of such a chapter should as soon as possible be laid down, at least provisionally, and consistently adhered to throughout the component parts of the future Code. To some extent this principle has been followed; but if once the resolution be adopted of reducing the rules of interpretation to a system, they will of necessity operate forthwith more strongly and uniformly on the legislation of the future. We would not, indeed, be understood as advocating any large introduction of English legal nomenclature into the Indian law. Technical words are seldom quite correctly apprehended by Natives of India: they often have a connotation which leads one into a field of ideas quite foreign to the Indian law; and they are subjected, as time goes on, to explanations and developments in the English Courts which cannot always coincide with the intention of the Indian legislature. These are inconveniences which we would as far as possible guard against. As matters stand at present, the reports of the English Courts, inestimably valuable to the lawyer and the judge if rightly and reasonably used, are not infrequently made a means of upsetting the law in India; and as to the legal vocabulary in particular, a word originally admitted with reserve as the nearest in sense to some idea for which expression was sought has in after-days sometimes gained an established position and supported fallacious arguments. As the Code is gradually built up, such accidents would have a most mischievous effect; and yet they are almost inevitable, unless they are prevented by interposing a timely check to all ingenuity of perversion. Framed in this spirit, a Code of construction may, we think, be widely beneficial. In modern times, as the freedom of judicial interpretation becomes more restricted, the reaction of the form of the law upon its substance is more extensive and deeper than in earlier days. This is the palpable danger of a complete Code. It fixes the mobile elements of the law at the moment of its creation; it may petrify them and deprive them of their capacity of growth under the care of scientific doctrine at the call of extended needs. The danger reaches its climax when the principles of a foreign system are imposed on a community of different character and habits; and the danger lies very much in the terminology. While, then, our legislature itself takes out the kernel of English judicial wisdom, it must guard against the *lex viva*, the concrete law, becoming a composition of shells and rind. As in the field of physical science every great advance in discovery is attended with some enlargement of general conceptions and some improvement of method, so in the progress of legal development under any system accepting purely rational standards, each step towards perfection involves a recognition of human relations hitherto less clearly seen, or a change of standing point from which new truths come into view. To enable such truths to be widely appropriated, such benefits to be gained with the least incumbering admixture, should be the purpose of a good Code of interpretation. Thus, in the language of Lord Mansfield, "our jurisprudence should be bottomed on plain broad principles, such as not only judges can without difficulty apply to the cases that occur, but as those whose rights are to be decided upon by them can understand;" while, pending the enactment of a Code of interpretation, and even after its enactment, our judges and administrators may well follow the maxim of Lord Eldon that, "instead of struggling by little circumstances

* De Augm. VIII Aph. 10.

to take cases out of a general rule, it is more wholesome to struggle not to let little circumstances prevent the application of the general rule." The Digest which has been proposed would hold out too many temptations to the mischievous ingenuity that Lord Eldon condemned. It is needless, as private enterprise has supplied it. If made discriminative, it would be a bad form of legislation. Of Indian judgments, as of books, it may be said "some are to be read only in parts, others to be read but not curiously; and some few to be read wholly and with diligence." In resolving which were good, bad or indifferent, the Government would have to determine what the law was or ought to be; and, having so determined, it had better legislate at once in order to prevent all further contradictions and errors.

43. Regarding the subject of codification and of systematic legislation finally from the purely practical point of view, it is to be observed that we have one supreme and three local legislatures. We have four High Courts, one Chief Court, and several Judicial Commissioners with the powers of High Courts, of which none are bound to accept as binding the rulings of others. To the tribunal of Her Majesty in Council, which alone can constrain the decision of the local Courts of appeal, access is possible only in cases of high pecuniary value and at an expense beyond the reach of the large majority of suitors. Working under the higher Courts of appeal are a number of Judges, European and Native, who in many instances display remarkable ability, but of whom the majority have had but a defective training owing to the conditions under which they have have had to work as members of the public service. It is manifestly desirable that Judges of the first instance, by whom so large a proportion of the judicial work of the country is done, should in their often remote and isolated stations receive all the guidance and support that can be afforded them. It is desirable, too, that the superior Courts should be provided with a uniform body of rules applicable to the chief relations of social life, in order that inconsistencies and contradictions of decision may be prevented, and the great difficulty averted which must eventually arise from irreconcileable systems completely established in different parts of the country. A well-framed Code will not only reduce the necessary bulk of law-libraries, but will focus the wisdom and acumen of many learned expositors upon identical points of construction and detailed development. In such a concourse of intelligence the better interpretation, the sounder principle, must prevail; and thus the lower Courts will be trained, not only to a right understanding of particular enactments, but to a rational and effective method of dealing with the whole range of problems set before them.

44. Amongst the many communities which have in recent years recognized the great advantages of codification is that of Lower Canada, where, as in India, a heterogeneous population made it necessary to build on wide and liberal general principles. From the introduction to its Civil Code we borrow an extract with which we conclude this part of our report:—

"Prospectively, the Code promises uniformity of jurisdiction which contributes to diminish litigation, and to add to the security and stability of our civil rights.

It offers great additional means of legal education from which may be expected a higher standard of professional excellence.

It will ensure among the individual members of society a more intimate acquaintance with their civil rights and obligations, tending to increase and facilitate business-relations and to promote the natural welfare of the community. Moreover, as a barrier against the continual inroads of fragmentary legislation, it is an earnest of stability in the law itself.

To this we would add that it is an element in good government that there should be certainty in the rules regulating the conduct of the governed, so far as they are to be held by law accountable for such conduct to the State or to their fellows, in the rules regulating the rights and obligations of property, and in the rules providing remedies for the invasion of rights. Certainty in these rules conduces to the happiness and prosperity of the governed scarcely in a less degree than does their conformity to the highest standard of jurisprudence. 'It matters little what the law is, so that it be settled' may be truly said in all cases in which it is of necessity arbitrary, and in many in which it is conventional.

II.

On the six Bills referred to in the Commission.

We have carefully enquired into and considered the six Bills referred to in the margin: we have also perused the comments on those Bills sent up by the several Local Governments at the request of the Government of India, the criticisms of the same Bills volunteered by Sir James Stephen, and the important paper of Sir Henry Maine; and we are unanimously of opinion that those Bills deal with branches of the law which may properly be codified; that the proposed enactments should extend to the whole of British India; that, except in the case of the Master and Servant Bill, no class of the community should be excluded from their operation; and that, subject to certain modifications which we proceed to suggest, they should all, with the exception of the Easements Bill, be enacted with as little delay as possible. As to the Easements Bill, Mr. Stokes and Sir Charles Turner are of opinion that, with the amendments hereinafter specified, it might become law at once; but Mr. West, being of opinion that the introduction of this measure may, without public detriment, be for a short time postponed, desires not to be finally committed to all the details of the Bill, should further information suggest modifications in them.

1. The Negotiable Instruments Bill.
2. The Transfer of Property Bill.
3. The Alluvion Bill.
4. The Master and Servant Bill.
5. The Easements Bill.
6. The Trusts Bill.

In the following remarks we shall refer to the Bills as printed in the book entitled "*The Six Codifying Bills laid before the Indian Law Commission*, Calcutta, 1879."

1.—THE NEGOTIABLE INSTRUMENTS BILL.

On the Negotiable Instruments Bill.

This Bill, originally framed by the late Law Commission, was, as far back as 1867, introduced into the Legislative Council of the Governor General and referred to a Select Committee. Since then it has been redrawn by Mr. Phillips of the Calcutta Bar: it has received copious and valuable criticism from the Local Governments, the High Courts and the Chambers of Commerce in the Presidency-towns and Rangoon, and it has been carefully revised by a Select Committee comprising the Advocate General of Bengal, Mr. Evans of the Calcutta Bar, and Mr. Morgan, a leading Calcutta merchant. We have found little or nothing to change in the Bill (*a*); but we think that certain additions, which we proceed to specify, may usefully be made to it.

Chapter I: Preliminary.—Section 1, paragraph 2, saves, in our opinion rightly, local usages relating to hundís and other instruments in an oriental language. But, in order to facilitate the assimilation of the practice of Native shroffs to that of European merchants, we recommend the insertion of a proviso that such usages may be excluded by any words in the body of the instrument indicating an intention that the legal relations of the parties shall be governed by the proposed Act. An eminent critic of the Bill says that he "cannot see why uniformity of practice is desirable." The reason is that it prevents uncertainty and litigation, and facilitates dealings, not only between English and Native merchants, but between Native merchants in different parts of India. The practical working of a system of credit is made safer and more beneficial when the bills of exchange under which a banker or merchant is responsible are governed by precisely the same legal conditions as those on which he is a creditor and with reference to which the others were issued or accepted.

We think that a definition of "signed" may usefully be added. Sir Charles Turner suggests the following: '"signed" means having the name of the person whose signature is by this Act required written by such person or by an agent authorized in that behalf, or indicated by a mark intended by such person as his signature, or impressed by a stamp or seal when a stamp or seal is commonly used by such person for such purpose.'

Chapter II: Of Notes, Bills and Cheques.—To sections 4, 5, explanations shewing when an undertaking to pay is 'unconditional,' when the sum payable

(*a*) There is a misprint in Section 90, line 5, where 'drawers' should be 'drawees,' and another in Section 125 line 7, where 'from' should be 'for.'

is 'certain,' and when the payee is a 'certain person' should, we think, be added. They might run thus:—

"A promise or order to pay out of a specified fund is 'conditional'; but an undertaking to pay in terms absolute is not rendered 'conditional' by a declaration that provision for the payment will be made out of a specified fund.

A promise or order to pay is not 'conditional' by reason of the time for payment being expressed to be on the lapse of a certain period after the occurrence of a specified event which, according to the ordinary expectation of mankind, is certain to happen, although the time of its happening may be uncertain.

The sum payable may be "certain," although it includes future interest payable at a rate specified according to an indicated rate of exchange, or is expressed to be payable according to the course of exchange, or by instalments (if such instalments are declared to fall due on fixed dates), and although the instrument provides that, on default of payment of an instalment, the balance unpaid shall become due.

The person to whom payment is to be made may be a 'certain person,' although he is misnamed or designated by description only, or though it be directed that payment be made to one or to another of several persons, if it appears on the face of the instrument that there is community of interest between them.

In a bill of exchange the person to whom it is clear that the direction is given is a 'certain person,' although he may be misnamed or designated by description only. If an address only is given, and the person residing at such address accepts the direction, the uncertainty is cured. The direction may be given to a "certain person," though it be given to one or other of several persons."

Section 8.—Before 'parties,' the words 'maker or' seem wanted.

Section 18 might be extended so as to meet cases of error not uncommon in Native documents purporting to specify the sum, its half and the double of the half. It might run thus:—

"18. Where the sum undertaken or ordered to be paid is differently stated in the body of the instrument and on the face of, but outside the body of, the instrument, the sum stated in the body of the instrument is the sum undertaken or ordered to be paid.

Where the sum is in the body of the instrument stated differently in figures and in words, the sum stated in words is the sum undertaken or ordered to be paid.

Where the sum is in the body of the instrument more than once stated in words and differently, the less sum is the sum undertaken or ordered to be paid."

Section 19 should, we think, provide also for undated instruments. The requisite clause might run thus: 'A promissory note, bill of exchange or cheque, in which the date of making or drawing is not specified, takes effect from the date of the first negociation thereof.

Sections 21 *and* 23.—In the former section, after the word "acceptance" we would introduce the words "or noting for non-acceptance;" in the latter, line 7, after the word "sight" the words "or noted for non-acceptance."

Chapter III: Parties to Notes, Bills and Cheques.—Section 33: The statement of the obligations of the drawee of a cheque is not complete. After the word "must" we think there should be introduced the words "unless he has received notice that the drawee is dead or has been declared insolvent, or declared by the proper authority of unsound mind and incapable of managing his affairs;" and the following proviso should be added: "Provided that the drawee is not so liable, unless such funds have been in his hands for a sufficient time before the presentation of the cheque for payment to enable him to ascertain the state of accounts between him and the drawer."

Section 34.—For the first nine words we would substitute "subject to the other provisions of this Act," and omit the final paragraph.

Section 35.—For "all or some of several joint drawees" we would substitute "all or some or one of several drawees." We suggest that in some part of the Bill, and possibly here, a clause should be inserted showing that, to determine who is liable as an acceptor, the address to the drawee and the acceptance should be read together. We would also insert clauses showing that there may be a valid acceptance before the bill is signed or while it is otherwise incomplete, or after it is overdue: that an acceptance is invalid if the acceptor undertakes to comply with the request otherwise than by payment of money: that an acceptance may be qualified in certain specified cases. The case where the drawee is the same person as the drawer or a fictitious person should also be provided for. These clauses might run as follows:—

Time when acceptance may be made.

"A bill of exchange may be accepted—

(*a*) before it has been signed by the drawer or when it is otherwise incomplete;

(*b*) after it is overdue;

(*c*) after it has been dishonoured by a previous refusal to accept or by non-payment.

Acceptance when invalid.

"An acceptance is invalid if the acceptor undertakes to comply with the direction otherwise than by payment of money.

Acceptance unqualified or qualified.

"An acceptance may be unqualified or qualified.

"An acceptance is unqualified where the drawee, or, where there are several joint drawees, all of them, assent without qualification to the order of the drawer.

"An acceptance is qualified—

(*a*) where it is conditional, declaring the payment to be dependent on the happening of an event therein stated;

(*b*) where it undertakes the payment of part only of the sum ordered to be paid;

(*c*) where, no place of payment being specified on the order, it undertakes the payment at a specified place and not otherwise or elsewhere; or where, a place of payment being specified in the order, it undertakes the payment at some other place and not otherwise or elsewhere;

(*d*) where it undertakes the payment at a time other than that at which under the order it would be legally due;

(*e*) where it is made by one or more of several joint drawees, not being partners, and not by all.

"If the drawer and drawee of a bill of exchange be the same person, or the drawee be a fictitious person, the holder may at his option treat the instrument as a promissory note or a bill of exchange."

Where the drawee is the same person as the drawer or a fictitious person.

Sections 47 *and* 48.—We would redraw these sections thus:—

47. A negotiable instrument made, drawn, accepted, endorsed or transferred without consideration, or for a consideration which fails, creates no obligation of payment between the parties to the transaction. But if any such party has transferred the instrument with or without endorsement to a holder for consideration, such holder, and every subsequent holder deriving title from him, may recover the amount due on such instrument from the transferor for consideration or any prior party thereto.

48. Any person who, being liable as a party to a negotiable instrument to pay the amount due thereon, pays the same, may recover such amount from any party to such instrument prior to himself and to a transferee for consideration, or to himself as such a transferee.

Chapter IV: Of Negotiation.—Though the subject of delivery of negotiable instruments is to some extent treated in sections 8 and 14 and chapter IV, we would prefix to the sections dealing with negotiation clauses relating to delivery generally, and to the following effect:—

"The making, acceptance or indorsement of a promissory note, bill of exchange or cheque is completed by delivery, actual or constructive.*

As between parties standing in immediate relation, delivery to be effectual must be made by the party making, accepting or indorsing the instrument, or by a person authorized by him in that behalf.

As between such parties and any holder of the instrument other than a holder in due course, it may be shown that the instrument was delivered conditionally or for a special purpose only, and not for the purpose of transferring absolutely the property therein.

A promissory note, bill of exchange or cheque payable to bearer is negotiable by the delivery thereof.

A promissory note, bill of exchange or cheque payable to order is negotiable by the holder by indorsement and delivery thereof."

Section 60.—The rule declared in this section is incomplete. We would substitute "appearing to be due on" for the word "of" after "amount," and add: "but where such amount has been partly paid, a note to that effect may be indorsed on the instrument and the instrument negotiated for the balance."

Section 65.—Sir Charles Turner would substitute the following:—

"65. The holder of a bill of exchange payable after sight or after demand must negotiate it within a reasonable time, or present it for acceptance.

In order to charge any party thereto, a bill of exchange payable after sight or after demand, or containing a direction to that effect, must be presented for acceptance, unless such presentment has been excused by the party sought to be charged therewith.

Any other bill of exchange may be presented for acceptance.

Presentment for acceptance must be made to the drawee or to some person authorized on his behalf to accept or refuse acceptance (if after reasonable search the drawee or such per-

* Sir C. Turner would here explain 'delivery' as "the transfer of possession, actual or constructive, by the party making, accepting or indorsing an instrument with the intention of accepting the liability of a maker, acceptor or indorser, as the case may be."

On the Negotiable Instruments Bill.

son can be found) within a reasonable time after the bill is drawn and in business-hours on a business-day.

Explanation.—In determining what is a reasonable time for the negotiation or presentment of a bill for acceptance, regard must be had to the nature of the instrument, the usage of trade with regard to similar instruments, and the circumstances of the particular case, looking to the interests of the holder as well as of the drawee.

If default is made in the due presentment for acceptance of a bill of exchange payable after sight or after demand, or containing a direction that it should be presented for acceptance, no party thereto except the drawee or a party who has excused such presentment is liable on the bill: Provided that, if a competent drawee, or a person authorized to accept on his behalf, cannot after reasonable search be found, the bill is dishonoured."

Section 66.—The words "if he can, after reasonable search, be found," should apparently be inserted in line 2, after "sight."

Section 67.—For this section Sir C. Turner would substitute the following:—

"67. The drawee of a bill of exchange presented to him for acceptance may require that it be delivered to him, and may retain it for twenty-four hours, exclusive of public holidays, to consider if he will accept it. After the expiry of the twenty-four hours, he must re-deliver it to the person by whom or on whose behalf it was presented, whether he has accepted it or not."

Mr. Stokes and Mr. West would merely substitute for 'may' in line 1, the words "must if so required by the drawee."

Section 78.—Mr. West thinks that the drawer of a negotiable instrument payable on demand ought not to be subjected to risk through unreasonable delay on the part of successive holders in presenting it for payment. Unreasonable delay by parties subsequent ought, he thinks, to excuse prior parties from liability when such delay appears on the instrument.

Section 80.—We would add to clause (*a*) the words "as against any party sought to be charged therewith, if he has engaged to pay notwithstanding non-presentment." Mr. West thinks that this engagement ought not to give the person bound by it any recourse under section 48 against prior parties.

Section 83.—We would strike out "and" in the fourth line, and insert "due thereon." [The amount may not be claimable in full (sections 49 and 50), or it may have been in part paid.] We would insert "of the principal-money" after "amount" in line 3. We would then substitute "such" for "the" in line 5, and strike out "due thereon."

Similarly, in section 84, we would substitute "due thereon" for "thereof" in line 2.

Section 85.—It would be useful to insert a section to the effect that a cheque satisfied by payment is the property of the drawer, but may be retained by the drawee till accounts are settled between him and the drawer.

Chapter VII: Of discharge from liability.—We would here insert a section:—

"If a bill of exchange which has been negotiated is at or after maturity held by the acceptor in his own right, all rights of action thereon are extinguished."

Section 87.—After the words "twenty-four hours" there should be introduced "exclusive of public holidays."

Section 88.—After "payment", in line 2, there should be introduced "within a reasonable time."

Section 90.—We would either add to this section as it stands the words "unless on notice given by the holder they assent to the acceptance" or substitute the following:—

"90. If the holder of a bill acquiesce in a qualified acceptance thereof, he is bound to give notice of such acceptance to the other parties to the bill: any party to whom he omits to give notice is discharged."

Chapter VIII: Notice of dishonour.—To section 94 there should be added, after the first paragraph:—"or where presentment is excused and the bill is not accepted"; and in the second paragraph, after the word "contract," there should be introduced the words "or the acceptance is qualified."

Section 94.—Mr. West thinks that presentment excused should be equivalent to actual presentment, only against the person excusing it; but that an impossibility of presentment, as in the case of an absconding or fictitious drawee, should rank as dishonour.

On the Negotiable Instruments Bill.

Chapter X: Of reasonable time.—Sir Charles Turner would omit section 108, leaving the rule as stated in section 107. The section as it stands is, in his opinion, inconsistent with section 107, and declares a rule which is not only far more strict than the existing law, but would be highly inconvenient. Bills are often negotiated before presentation for acceptance. Cheques need not be presented on the day after they come to the holder's possession; and negotiable instruments payable on demand are frequently given as a continuing security.

Chapter XI: Acceptance and payment for honour.—The Bill contains no statement of the procedure in the case of acceptance *supra protest*. It appears to us desirable that the law of India should in this respect be assimilated to mercantile law elsewhere and to the practice obtaining in this country. We therefore recommend that the following clause be inserted:—

"An acceptor *supra protest* must personally appear before a notary public with witnesses, and declare that he accepts, under protest, the protested bill for the honour of the drawer or of a particular indorser whom he names, or generally for honour, and that he will satisfy the same at the appointed time; and then must subscribe the bill with his own hand."

Unless the person who intends to accept *supra protest* first declares in the presence of a notary that he does it for honour, and has such declaration duly recorded in the notarial register at the time, his acceptance shall be a nullity."

Section 111 should, we think, run as follows:—

"When a bill of exchange has been noted or protested for non-acceptance or for better security, any person, not being a party already liable thereon, may, with the consent of the holder, accept the same for the honour of any party."

And for section 112 we would substitute the following:—

"*Section* 112.—A person desiring to accept for honour must in the presence of a notary public subscribe the bill with his own hand, and declare that he accepts under protest the protested bill for the honour of the drawer or of a particular indorser whom he names, or generally for honour; and such declaration must be recorded by the notary in his register. Where the acceptance does not express for whose honour it is made, it shall be deemed to be made for the honour of the drawer."

How acceptance for honour must be made.

Chapter XIV: Of Foreign Bills.—Although in practice inland bills are not generally drawn in sets, they may be so drawn; and in this country, where the postal service is in parts necessarily performed with unavoidable insecurity, we think it desirable it should appear in the beginning of the Bill that inland bills may be drawn in sets. In the Commissioners' Bill it does so appear.

We would alter the heading of this chapter, and transfer section 128 to chapter XI, and section 129 to chapter IX.

Section 126.—The Exception to this section does not go far enough. If an acceptor has accepted one of the parts of a set, payment of another part which he has not accepted will not discharge him from liability to pay a holder in due course of the accepted part. Again, not only is the indorser who has indorsed two parts to different persons, but indorsers subsequent to him of the part not paid, are liable to holders of such part in due course. In the Exception, for the last thirteen words, we would therefore substitute "he and the indorsers of each part are liable on such part as if it were a separate bill."

Section 128.—A referee in case of need may be named in an inland as well as in a foreign bill of exchange, and as well by an indorser as by a drawer. When a referee is so named in an inland bill of exchange by an indorser, presentment to the referee is optional. In foreign bills it is compulsory, in order to charge the person who has given the reference and all subsequent indorsers.

A referee in case of need may accept and pay without previous protest according to Chitty (120) (see also Chalmers, art. 37, note). We would, as we have said, carry this section into chapter XI, with some additions. We would head that chapter, "Of acceptance and payment for honour and reference in case of need."

The definition "drawee in case of need" should be amended as follows—

"When in the bill or in any endorsement thereon the name," &c.;

and section 128 should run—

"Where a drawee in case of need is named in a bill of exchange or in any indorsement thereon, the bill is not dishonoured until it has been dishonoured by such drawee."

We would add a section: "A drawee in case of need may accept and pay the bill of exchange without previous protest."

On the Negotiable Instruments Bill.

Mr. West thinks the Bill ought to contain a section embodying the principle stated in *Maillard* v. *Page*, L. R. 5 Ex. 312, 319, that an acceptance and any accompanying written contract are, as between the immediate parties, to be construed together.

We think that the second clause of section 125 (as to the non-liability of a banker who has received payment for a customer of a crossed cheque) should be amended in accordance with the views of Grove and Lindley, JJ., in *Matthiessen* v. *London and County Banking Company*, 48 L. J. C. P. 529, by omitting the first word "but."

As to the arrangement of the Bill, we would suggest that the provisions in sections 26 and 103 as to presumptions, and those in sections 42, 43, and 44 as to estoppels, might better be placed together in a separate chapter headed "Special Rules of Evidence." Section 31 should, apparently, follow section 35: section 48 should precede section 47; and some other slight alterations in the arrangement may be found desirable.

2.—THE TRANSFER OF PROPERTY BILL.

On the Transfer of Property Bill.

Recognizing in this Bill, which was originally drawn by the late Law Commission and has since been repeatedly revised, the most important of the measures laid before us, we have devoted to it perhaps an undue share of the limited time at our command.

Although it has been objected to the Bill that it deals with subjects which at a later stage of the work of codification will have to be arranged under separate chapters, it has appeared to us convenient to retain for the present in a great measure the form in which it was originally drafted.

Dealing generally with the transfer of property, its arrangement enables the legislature to determine to what general principles the law of transfer should conform, and to apply such principles consistently.

Read with the Contract Act, this Bill covers almost the whole of the ground which could be profitably occupied by law relating to the transfer *inter vivos* of interests in property; and for the convenience of the practitioner it could hardly be enacted in a more accessible form.

This, it appears to us, justifies the introductory chapter, which, after declaring what rights are inalienable and by what persons transfers may be made, proceeds to declare restrictions of the transfer of property called for in the interests of society. These restrictions are identical with those which are already incorporated into the law of India in the Succession Act.

In considering the necessity for these provisions, it must not be forgotten that the number of domiciled Europeans and Eurasians holding property in India has of late years greatly increased, and that the value of the property held by them in plantations of tea and coffee, in mills and machinery and in other investments, now amounts to many millions of pounds sterling. These persons and their estates are subject to the law of succession (Act X of 1865), and it would be obviously inconsistent that they should possess powers of creating estates in their property by transfers *inter vivos* which the legislature has declared they should not enjoy by testamentary disposition. Moreover, where the declared law is silent on the subject in respect of transfers *inter vivos*, the Courts may, and probably would consider themselves bound to, recognize principles stamped with the assent of the legislature as conclusive of the question that transfers *inter vivos* creating estates in violation of these principles are invalid as opposed to public policy.

The Privy Council has already ruled that estates cannot be created by Hindús in contravention of the principles which underlie the Thellusson Act, or subject to conditions which are void for repugnancy.

The rules contained in sections 10 to 35 impugn, so far as our experience goes, no law or practice of Hindús, Muhammadans or other sects recognized in India as enjoying special personal laws, unless it may be the now obsolete practice among Muhammadans of devoting property to the maintenance of the

family of a particular saint. But to avoid any disturbance of rights enjoyed under personal laws, sufficient provision is made in the Bill.

On the Transfer of Property Bill.

The persons to whom the provisions we are now considering will in practice be found mainly applicable are property-holders who have been designated in former Acts as "persons to whom the English law applies," a phrase which gave rise to no little difficulty in the case of persons holding property in the mufassal. This class has now attained sufficient importance in numbers and wealth to demand at the hands of the legislature an explicit declaration of restrictions which may be imposed on their dealings with their property, and where these restrictions are founded on approved principles and not inconsistent with personal law, there is no reason why they should not be declared of general application.

The sections from 36 to 53 embody rules already applied in the Courts of India, or flowing naturally from accepted principles.

The rules relating to sales, mortgages, exchanges and gifts declare generally no more than is understood and applied as law in the Courts. The exceptions will be noticed in our detailed observations.

Chapter I: Preliminary.—We would expressly save, in section 2, transfers by decree or order of Courts of competent jurisdiction.

In the interpretation-clause (section 3) we would insert definitions of "ownership," and "property;" we would extend the definition of "attached to the earth" so as to include trees and shrubs; and with reference to sections 40, 56, 78, 79 and 80 of the Bill as we have revised it, we would define "notice" as follows:—

> "A person is said to have 'notice' of a fact when he actually knows that fact, or when, but for wilful abstention from inquiry which he ought to have made or gross negligence, he would have known it, or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, section 229."

We would declare that all chapters and sections of the Bill which relate to contracts should be taken as part of the Contract Act, 1872. When the body of substantive civil law enacted for India is rearranged in a more compact and convenient form than that of a series of fragmentary portions from time to time passed by the legislature,* the chapters on Sale, Mortgage, Lease and Exchange, contained in the present Bill, will probably be placed in close connection with the rules contained in the Contract Act. But till then they may fitly be left in a law containing what the Contract Act does not contain, namely, general rules regulating the transmission of property between living persons.

Chapter II: Of Transfers of Immoveable Property.—We think that chapter II should be extended to transfers of property, whether moveable or immoveable; that it should be entitled "*Of Transfers of Property by act of Parties*"; and that it should commence with two sections,—one defining "transfer," the other showing what may be transferred. The latter section should, we think, to some extent follow the analogy of the Code of Civil Procedure, section 266, clauses (*e*), (*g*), (*h*) and (*k*), as to property which may be attached.† We also think that this chapter should contain a section declaring that a transfer may be made without writing in every case in which a writing is not expressly required by law.

The Law Commissioners, by whom the original draft of this Bill was framed, observed that their chief object was to bring the rules which regulate the transmission of property between living persons into harmony with the rules affecting its devolution upon death, and thus to furnish the necessary complement of the work which they commenced in framing the law of Succession. With this view they inserted rules that conditions in restraint of alienation should be void; that conditions making an interest to cease on insol-

* This, we understand, is all that was intended by the Government of India in paragraph 18 of its Legislative despatch No. 34, dated 10th May, 1877, by the phrase "scientifically arranging the various chapters of the Civil Code thus produced", and some such rearrangement was contemplated by the late Indian Law Commissioners, who observe in their Sixth Report, referring to their rules relating to the transfer of property: "It is probable that several of these rules will eventually find a different place whenever a final distribution and rearrangement of the whole law shall have been effected; but some blending of subjects is unavoidable in a work which the Government has, for sufficient reasons, instructed us to submit to it in portions, as each portion is completed."

† In view of the more general prohibition that no transfer can be made which is opposed to the nature of the interest affected thereby, Sir Charles Turner thinks it unnecessary to declare that "a strictly personal right," &c., cannot be transferred.

On the Transfer of Property Bill.

vency or attempted alienation should also be void; that restrictions should be placed on the power of tying up property by transactions *inter vivos*, similar to those imposed by the Indian Succession Act, sections 100 to 104, in the case of wills. They also proposed rules as to when certain interests created by transactions *inter vivos* should be deemed vested. And they applied, *mutatis mutandis*, to transfers the rules of the Succession Act as to contingent bequests, conditional bequests and bequests with directions as to application and enjoyment. It seems to us that, subject to the following remarks, these rules are in themselves reasonable, and may properly be extended to the transactions *inter vivos* of all the inhabitants of India, whether they are or are not subject to the Succession Act. But as to the rule corresponding with section 100 of the Succession Act, Sir Charles Turner and Mr. West think that the law should be modified so as not to exclude the unborn beneficiary in the case supposed, but to make void any limitation beyond his interest. As to the rule corresponding with section 102 of the Succession Act, they think that, where distinct interests are given to persons as members of a class, which interests are ascertainable within the term prescribed by the rule against perpetuity, those interests should not fail by reason of other interests failing through the operation of that rule; and as to the rule corresponding with section 103 of the Succession Act, they think that, where an intermediate interest fails, the subsequent interest should not fail, if it is ascertained and vested immediately on the death of the specified persons who were living at the time of the transferor's death. Mr. Stokes is averse to making any of the modifications thus suggested. As to the rule prohibiting accumulation, we all should prefer the more liberal enactments of the Thellusson Act (39 & 40 Geo. III, c. 98), which allow an accumulation for twenty-one years, and do not affect provisions for payment of debts or for raising portions.* But as the rule embodied in the Succession Act, section 104, has now been in force for fourteen years, Mr. Stokes and Mr. West do not press its alteration. The Law Commissioners also proposed to extend to transactions *inter vivos* the rules as to election contained in Part XXVII of the Succession Act. We think that these rules also, founded as they are on principles of equity which are universally applicable, may also properly be inserted in the Bill.

We think provision should be made for the satisfaction of a right arising in favour of several persons, where, in consequence of a transfer, property is divided, and held in several shares; and we have framed a section with this object. Mr. West is of opinion that a corresponding rule is necessary for the case of a division of the property burdened with an obligation, and that the rules should apply in all cases of legal division.

Section 7 of the Bill treats of the title which the transferor of immoveable property can confer, and of the protection given to innocent transferees for value. We think that this matter should be dealt with in more detail, and have accordingly framed sections in substitution, providing for each of the following five cases:—

(1) where there is a transfer for consideration by a person, such as a Hindú widow, authorized only under circumstances in their nature variable to dispose of immoveable property;

(2) where a third person has a right to receive maintenance from the profits of immoveable property and such right does not amount to a charge;

(3) where, for the more beneficial enjoyment of his own immoveable property, a third person has, independently of any interest in the immoveable property of another, a right to restrain the enjoyment of the latter property;

(4) where a third person is entitled to the benefit of an obligation arising out of a contract and annexed to the ownership of immoveable property, but not amounting to an interest or easement; and

(5) where a person holds immoveable property as its ostensible owner with the consent of the other persons interested therein.

We recommend, too, that the Bill should here provide for the following cases:—

(*a*) where a person, erroneously representing that he is authorized to transfer certain immoveable property, assumes to transfer it for consideration and afterwards acquires an interest therein;

(*b*) where a transfer of immoveable property is made for consideration by persons having distinct interests therein;

(*c*) where several co-owners of immoveable property transfer a share therein without specifying that the transfer is to take effect on any particular share or shares of the transferors;

(*d*) where a person creates, by transfer at different times, rights in or over the same immoveable property, and such rights cannot all exist or be exercised to their full extent together. Mr. West thinks that the rule dealing with this case should be supplemented by a rule providing for the satisfaction of each later created interest to the fullest extent compatible with the rule of priority and for such adjustments as may further this object.

It seems to us that a clause resembling Act XI of 1855, section 2, which provides, in cases to which the English law is applicable, for improvements of immoveable property made by *bonâ fide* transferees who are subsequently evicted, may fitly be introduced into the Bill and applied to all persons in British India. We think, too, that such transferees should be allowed to remove growing crops which they have planted or sown on the property.

We think that the section (10) relating to transfers of land *pendente lite* should not forbid such transfers when made under the authority of the Court and on such terms as it may impose, and that the section (10A) relating to fraudulent transfers may properly be extended to cases of fraudulent forfeitures and to cases where the persons defrauded are co-owners or creditors.

Chapter III: Of Sales of Immoveable Property.—We think that "sale" should be defined as a transfer of ownership in exchange for a price paid or promised, or part-paid and part-promised. We entirely agree with Sir Henry Maine as to the desirability of rendering the system of transfer of immoveable property a system of public transfer. But we must remember that, in the absence of a much larger number of registration-offices that at present exist in India, the requirement of registration in the case of every petty transaction relating to land would be an intolerable hardship. We have in this matter been guided by the analogy of the Indian Registration Act (III of 1877, section 17), and required that sale should be made in the case of immoveable property of the value of Rs. 100 and upwards only, by a registered assurance, but that, in the case of immoveable property of a less value, it may be made either by registered assurance or by delivery of the property. As to delivery, we think it will be enough to say that it takes place, in the case of a reversion or other intangible thing, when the parties consent to the delivery: and in the case of other immoveable property, when the seller places the buyer, or such person as he directs, in possession of the property.

The rights and liabilities of the seller and buyer may, we think, be conveniently classified as follows:—(*a*) duties of seller; (*b*) rights of seller; (*c*) duties of buyer; (*d*) rights of buyer, and according to that phase in each case which is the more prominent in practice. In addition to the duties which the Bill (section 12) imposes on the seller, and which are generally recognised by the Courts, we think that, when the property is, or forms part of, a revenue-paying estate, he should be bound to present an application to the proper officer for the requisite alteration of the revenue-register;* that between the date of the contract of sale and the delivery of the property, he should take due care of the property and the title-deeds in his possession; that, on being so required, he should give the buyer, or such person as he directs, such possession of the property as its nature admits, and that he should pay all public charges and rent accrued due in respect of the property up to the date of sale. As to his duty regarding incumbrances on the property sold, we conceive that it will be in accordance with what is generally understood to be the law throughout India merely to require the seller, in the absence of a contract to the contrary, to pay the interest due on the date of sale, and, where the property is sold free from incumbrances, to discharge all incumbrances thereon then existing. As to the implied contracts of a seller, we think it will be enough to provide that

* Sir Charles Turner would also urge that these enactments are frequently required by the circumstances of large zamíndárí properties.

* In practice (according to Sir Charles Turner) the consideration-money is hardly ever fully paid until the seller has presented such an application.

On the Transfer of Property Bill.

On the Transfer of Property Bill.

he shall be deemed to contract that the interest which he assumes to transfer to the buyer subsists, and that he has power to transfer the same; provided that, where the sale is made by a person in a fiduciary character, he shall be deemed to contract to the like effect so far only as his knowledge extends.

As to the buyer's duties, we would require him, in addition to the duties expressly imposed by the Bill (sections 12, 15, 16), to pay or tender, at the time and place of completing the transfer, the purchase-money to the seller or such person as he directs. Power to retain out of the purchase-money the amount of the incumbrances should, we think, be given to the buyer only when the property is sold free of incumbrances. We would expressly require the buyer to re-transfer the property when the ownership thereof has passed to him before payment of the purchase-money, and he fails to pay or tender it. We also think that, where the ownership of the property has passed to the buyer, he should, as between himself and the seller, be expressly bound to pay all public charges which may become due in respect of the property, the principal-money due on the incumbrances subject to which the property is sold, and the interest thereon afterwards accruing due.

Chapter IV: Mortgages of Immoveable Property and Charges.—The objection raised by one eminent critic, that this chapter deals "with matters which do not transfer property, but only create a charge upon it" is one which seems to us to rest on an assumption that a transfer must of necessity extend to the whole property or interest of the transferor in the subject-matter of the transaction. We, considering ownership as generally divisible, have regarded the term "transfer" as properly applicable to any interest carved out of the aggregate called "ownership." This is consistent with the English law. "A security," says Mr. Fisher in his work on Mortgages, "is a redeemable estate or right which one person has in the property of another."

We think that the definitions of the four chief kinds of mortgage with which this chapter commences, and which were taken from Mr. Macpherson's well-known work, require some modification to adapt them to the various parts of India. Mr. West is of opinion that the words 'without delivering possession' in the definition of 'mortgage by conditional sale' are not essential, and are opposed to a common practice in the Bombay Presidency. Sir Charles Turner considers that transfer of possession is not of the essence of such mortgages, although they are very generally combined with transfer of possession and usufructuary provisions.

We are of opinion that writing and registration should be compulsory whenever the principal-money secured is one hundred rupees and upwards: when the principal is less than that sum and the property is not delivered, we would also require registration; and in all such cases we think the mortgagor, on payment of the amount remaining due, should be entitled to require the mortgagee to register an acknowledgment that any right in derogation of the interest tranferred to him has been extinguished. The requirement of registration will not only discourage fraud and facilitate investigations of title, it will also preclude some difficult questions as to priority.

Mr. West would introduce a provision in the section treating of the right to redeem, to the effect that, if the time fixed for repayment of the mortgage-money has been allowed to pass, or if no time has been fixed, the mortgagee should be entitled to reasonable notice before payment. Mr. Stokes and Sir C. Turner are opposed to this provision as unsuited to India. In mortgages for considerable sums the parties would sufficiently protect themselves: in the far more numerous cases of mortgages for small sums to saukárs, it would be inconvenient to require notice.

We think that a person interested in a share only of the mortgaged property should be entitled to redeem his own share only where the mortgagee, or, if there are several mortgagees, all of them, has or have acquired a share in the right to redeem.

The section (61) of the revised draft, declaring the right of an usufructuary mortgagor to recover possession, should, in Sir Charles Turner's opinion, enable him to do so—

where the profits are to be applied in payment of interest at a rate agreed or prescribed by law and then in reduction of principal—when the mortgagor pays or tenders

to the mortgagee, or deposits in Court as hereinafter provided, the sum then due thereon;

On the Transfer of Property Bill.

where the profits are to be taken in lieu of interest and no time is specified for redemption; or where the profits are to be so taken and the mortgage is made for a term of years, but it was not the intention of the parties that redemption should be postponed to the expiry of the term—when the sum then due on the mortgage is paid, tendered or deposited as aforesaid;

where the profits are to be taken in lieu of interest and the mortgage is made for a term, and it was the intention of the parties that redemption should not be allowed before the expiry of the term—when, after the expiry of the term, the sum then due on the mortgage is paid, tendered or deposited as aforesaid.

Explanation.—It is not necessarily to be concluded from the circumstance that a mortgage is expressed to be made for a term of years that it was the intention of the parties that redemption should not be allowed before the expiry of the term. The contrary intention may be declared by, or inferred from, other stipulations of the contract.

The case where accessions to mortgaged property have been acquired at the cost of the mortgagee should, we think, be provided for.

As the law stands, there is no implied contract on the part of the borrower to produce a security of any particular degree of safety, or any particular title, as in the case of a contract for sale. The implied contracts of the mortgagor should, therefore, in our opinion, be that the interest which he assumes to transfer subsists, and that he has power to transfer the same; that the mortgagor will defend, or, if the mortgagee is in possession, enable him to defend, the mortgagor's title to the mortgaged property; that where the mortgage is a second or subsequent incumbrance, the mortgagor will pay the interest accruing due on each prior incumbrance and at the proper time discharge the principal due thereon. There should also be, in the case of mortgaged leasehold, the stipulations specified in the Bill (section 24) as to payment of rent, performance of conditions, observance of contracts and indemnity.

For the section (27) treating of waste by a mortgagor in possession, Mr. West would substitute the following: "A mortgagor must not by any act or wilful omission destroy, or materially impair the value of, the mortgaged property or his interest therein as a security for the mortgage-money."

We recommend the omission of the section (28) requiring certain notices to be given by mortgagors making, or proposing to make, second and other subsequent mortgages. This provision (which was inserted by the Select Committee to which the Bill was referred) is a novelty, and does not seem to us likely to be of any practical use.

Section 34, expressing the present rule in the case of a mortgage by conditional sale, treats the mortgagee as having no remedy against the mortgagor personally, except in certain specified cases. Mr. West would substitute the following: "A mortgagee may sue a mortgagor for mortgage-money which has become payable in all cases except those wherein a personal liability has been excluded by express contract or by the nature of the mortgage."

Where, by any cause other than the wrongful act or default of the mortgagor or mortgagee, the mortgaged property has been wholly or partially destroyed, or the security is rendered insufficient, the mortgagee should, we think, be entitled to require the mortgagor to give him within a reasonable time another sufficient security for his debt, and if the mortgagor fails to do so, to sue him for the mortgage-money.

We think that a mortgagee interested in part only of the mortgage-money should not be precluded from suing for a partial foreclosure where the mortgagees have, with the consent of the mortgagor, severed their interests under the mortgage.

We would modify section 35 so as to allow powers of sale in all cases where the principal-money originally secured is five hundred rupees or upwards. They save litigation and expense. Their validity has been recognised in many parts of India. Moreover, interference with freedom of contract is *primâ facie* undesirable, and it is, in our opinion, only in small transactions, where the mortgagor is generally poor and ignorant, that any real danger exists as to the misuse of such powers. In some cases the mortgagor obtains money on easier terms by conferring a power of sale on the mortgagee, and the power is usually, and not unreasonably, inserted in mortgages to agents of indigo, coffee and similar estates, where the value of the security might be considerably impaired,

On the Transfer of Property Bill.

were the property neglected while the mortgagee was seeking a sale by order of Court.

Where the receipts from the mortgaged property are to be taken in lieu of interest, or of interest and defined portions of the principal, we do not think that a mortgagee in possession should be bound to collect the rents and profits and to repair.

The section (45) relating to mortgages made to secure the balance of a running account and expressing the maximum secured should, we think, be extended to mortgages to secure future advances and the performance of engagements.

We think that the Court should not postpone the day appointed for payment in a foreclosure-suit unless sufficient security is given as well as good cause shown, and we would modify section 50 so as to enable it to require such security.

The power conferred on a Court to order, in a foreclosure-suit, a sale in lieu of foreclosure, at the instance of the mortgagee, or at the instance of the mortgagor furnishing security for any balance which may remain unsatisfied by the proceeds of the sale, will be novel throughout the greater part of the Mufassal.* But it seems to us expedient for the mortgagor that the Court should possess this power, and that where the sale takes place at the instance of the mortgagee, he should not be allowed to recover any balance which he could not have recovered in the event of foreclosure, and that where the sale takes place at the instance of the mortgagor, the mortgagee obtains all that he is entitled to, if he receives his principal-money and interest.

Where a decree has been made for redemption, if the amount due is not paid on the day fixed by the Court, the plaintiff, where the mortgage is simple or usufructuary, should not be foreclosed, nor, where the mortgage is by conditional sale, should the property be sold.

Where one of several mortgagors redeems the mortgaged property and obtains possession thereof, we think that he should be declared entitled to a charge on the share of each of the other co-mortgagors in the property, for his proportion of the costs properly incurred in so redeeming and obtaining possession. A decision of the late Sadr Court, North-Western Provinces, is to this effect. The High Court of Bombay also has ruled that the purchaser of the interest of one of several co-sharers in an equity of redemption may redeem the whole property and hold it subject to the rights on contribution of the other co-sharers.

The Bill should, Mr. Stokes and Sir Charles Turner think, provide separately for the rights and liabilities which arise where two or more forms of mortgage are combined.

Mr. Stokes would insert the following:—

"97. Where a simple mortgagee is, under the contract of mortgage, entitled as lessee or otherwise to receive the rents and profits accruing from the mortgaged property, such rents and profits shall, in the absence of a contract to the contrary, be credited to the mortgagor against the interest of the principal-money, and if they exceed the amount due in respect of interest, against the principal-money also. In other respects the rights and liabilities of the parties are the same as if the mortgage were purely simple.

Simple mortgage usufructuary.

Where a mortgagee by conditional sale is, under the contract of mortgage, entitled as lessee or otherwise to receive the rents and profits accruing from the mortgaged property, the rights and liabilities of the parties are, up to the date on which the principal-money has become payable, the same as if the mortgage were purely usufructuary, and from and after that date the same as if the mortgage were purely by conditional sale."

Conditional mortgage usufructuary.

Sir Charles Turner thinks that it would be enough to insert a simple declaration that the mortgagee and mortgagor have respectively the same rights and liabilities as are declared to be created in each of the several forms so combined, so far as such rights and liabilities are consistent with the mortgagee's availing himself of any of his remedies. Mr. West thinks that the general provisions of the Bill sufficiently cover this matter.

* But see, as to the Presidency of Bombay, Bombay Regulation V of 1827, *ad finem*.

On the Transfer of Property Bill.

There is a common practice on the part of mortgagees of suing their mortgagors on the debt as such, and in execution selling the mortgagor's interest in the property. This is purchased by strangers to the mortgage, who are thus virtually defrauded by an enforcement of the security, of the existence of which they were wholly ignorant. In order to check this practice, we have framed a section providing that, where a mortgagee, in execution of a decree for the satisfaction of any claim, whether arising under the mortgage or not, attaches and brings to sale the mortgaged property, or the mortgagor's interest therein, his security shall be extinguished unless before the issue of the proclamation under the Civil Procedure Code, section 287, he gives notice thereof to the Court executing the decree.

We concur with the late Law Commissioners in thinking that mortgage by deposit of title-deeds should not be recognized. It is now hardly known in the Mufassal. It is opposed to the policy of our registration-law: it leads to evasions of the stamp-duty; and it is at variance with the principle of making the system of transfer of immoveable property as far as possible a system of public transfer. When the amount secured is Rs. 100 or upwards, it would also be inconsistent with our proposed rule requiring a written instrument.

The section (64) relating to the merger of charges is, in the opinion of Mr. Stokes and Sir C. Turner, in exact accordance with the English and Indian decisions on the subject. Mr. West would substitute the following: "The holder of one of two or more incumbrances may purchase another, or the property subject thereto, and hold the same with his original incumbrance as separate interests."

For section 54 (as to the right to recover a balance due on a mortgage) Sir Charles Turner would substitute the following:—

"Where the nett proceeds of any such sale are insufficient to pay the amount due for the time being on the mortgage, together with the costs, if any, awarded to the mortgagee by the decree or in execution thereof, he may recover such balance and costs—

if the sale has been made in a suit for foreclosure, under the last paragraph of section 87, in execution of the decree, by enforcing the security; and if such security is a bond, with sureties, both against such sureties and the principal:

in any case, if under the contract the mortgagee was entitled to any other remedy for the recovery of the mortgage-debt in addition to a sale of the property sold, and such other remedy has been claimed and decreed in execution of the decree; but

if such other remedy has not been claimed and decreed, then by subsequent suit, unless he has by release or abandonment or otherwise lost such other remedy, or the suit is barred by limitation."

Lastly, we all think that the Bill should contain provisions as to serving notices, and making or accepting tenders and deposits, under this chapter, when the person concerned is non-resident, or unknown, or incompetent to contract. These provisions (which will be found in the revised Bill, ss. 101, 102) are novel; but they are suggested by difficulties which have occurred in practice. Mr. West is of opinion that the following principles should be explicitly set forth: (1) a transaction in any guise, the real intent of which is to make property a security for a continuing debt, is to be deemed a mortgage; (2) an unreasonable restriction on redemption is void; (3) time specified is not of the essence of the transaction for either party. Mr. Stokes and Sir Charles Turner consider that it may be left to the Courts to determine in each instance what is the nature of a transaction, and whether time is of its essence, and that it would be inexpedient to do more, in respect of restrictions on redemption, than to give effect to the intention of the parties when it can be collected from the contract.

Chapter V: Of Leases of Immoveable Property.—A high authority objects to this chapter in that it deals "with matters which do not transfer property, but only create a limited interest in it." This is not, we venture to think, in accordance with either English or Indian law. The lessor not only creates, but conveys, an interest in the property concerned. We conceive, and have defined, a lease to be a transfer of a right to enjoy specified immoveable property, made in consideration of a premium or a rent. Such a right is "property," and the present chapter, therefore, in our opinion, rightly falls within the scope of a Bill entitled "The Transfer of Property Act."

On the Transfer of Property Bill.

We would require all leases from year to year, or for any term exceeding one year, or reserving a yearly rent, to be made by registered assurance. This agrees with the rule in the Registration Act (III of 1877), section 17, save that it omits the power given by that Act to the Local Government to exempt leases for terms not exceeding five years and for annual rents not exceeding fifty rupees. It is hardly necessary to point out that it also carries out the policy above referred to, of rendering the system of transferring immoveable property as far as possible a system of public transfer.

As to the respective rights and liabilities of the lessor and lessee, we would expressly recognize the right to distrain, subject to the local law relating to distresses. We think that the lessor's implied contract for quiet enjoyment should not in India be limited to the acts of the lessor or his transferees, or any person claiming through him or them. Where any material part of the property leased is by *vis major* destroyed or rendered substantially and permanently unfit for the purpose for which it was let, we recommend that the lessee should have the option of treating the lease as void. The lessee should, we think, in the absence of a contract or local usage to the contrary, be bound to make good only such defects as have been caused by his own act or default.

As to the effect of a surrender on an under-lease, we think that when the under-lease has been granted on terms and conditions substantially the same (except as regards the amount of rent) as those of the original lease, the under-lease should not be prejudiced. Mr. West thinks that the original lessor ought to be guarded against loss through sub-leases at reduced rents, and that sub-lessees willing to make good the terms of the original lease should be guarded against loss by any wilful forfeiture.

Mr. West would extend the section (73) relating to relief against forfeiture for non-payment of rent to all cases free from fraud and wilful neglect and reparable by damages.

Local legislation as to the relations of zamíndár and raiyat being so copious and elaborate, we think that the provisions of this chapter should not apply to leases for agricultural purposes, except in so far as the Local Government may declare all or any of such provisions to be so applicable, together with, or subject to, those of any local law for the time being in force.

Chapter VI: Of Exchanges.—This chapter will supply a distinct defect in the Contract Act. We would define "Exchange," not as an agreement, but as the fulfilment of an agreement by mutual transfer of dominion, and accordingly make the first section of this chapter run thus:—

"When two persons mutually transfer the ownership of one thing for the ownership of another, neither thing or both things being money only, the transaction is called an 'exchange.'

A transfer of property in completion of an exchange can be made only in manner provided for the transfer of such property by sale."

The effect of this will be to render a registered assurance necessary in the case of an exchange of land worth one hundred rupees or upwards. Here again we have borne in mind the expediency of rendering the system of transfer of immoveable property as far as possible a system of public transfer.

We think the clause (section 77) relating to the right of a party evicted from a thing received in exchange should be made subject to a contract to the contrary.

In accordance with the suggestion of a distinguished Native lawyer, Srínivása Rao, we recommend the insertion here of a chapter on Gift *inter vivos*, saving of course the rules of Muhammadan law on this subject. We have framed some sections on this subject which will be found in chapter VII of the revised draft of the Transfer of Property Bill annexed to this Report. They define "gift": they show how a transfer must be effected for the purpose of making a gift (*a*) of immoveable property and (*b*) of moveable property: they require registration in the case of gifts of immoveable property of whatever value (Act III of 1877, section 17, clause *a*), and in the case of gifts of moveables, whenever the property given is not delivered: they provide a rule as to the effect of giving benefits to the persons attesting gifts of land: they declare that a gift comprising both existing and future property is void as to the latter, and that a gift of a divisible thing to two or more donees, of whom one does not accept it, is void as to the interest which he would have taken had

On the Transfer of Property Bill.

he accepted it. They show when a gift may be suspended or revoked. They exempt the donor from warranty. They deal, finally, with onerous and with universal gifts. Gifts of one's whole property to a relation or friend are not uncommon before an execution or in anticipation of insolvency. For such cases of fraud section 53 of the revised Bill would provide when the property is land. But an universal gift may conceivably be honest and comprise moveable property. It should therefore, we think, be specially provided for.

Of these provisions it may be said, generally, that some have not hitherto been declared by the legislature or the Courts; but they proceed on principles already recognized. The rule declaring an universal donee liable personally for the donor's debts due at the time of the gift to the extent of the property given is not only obviously equitable but is, as we have said, required to meet a not uncommon fraud. It is also in conformity with Hindú law.

Chapter VII: Of Transfers of Debts.—We think that this chapter should be entitled "Of Transfers of Actionable Claims," and that its provisions as to charges on debts and beneficial interests in moveable property should be omitted. We would provide rules as to the application and extent of the warranty of the solvency of a debtor. We think that in India it would be expedient to declare that, as a rule, when an actionable claim is sold, he against whom it is claimed is discharged by paying the buyer the price and incidental expenses of the sale with interest from the date of payment. Lastly, we think that no judge, pleader or other officer connected with Courts of justice should be capable of buying any actionable claim falling under the jurisdiction of the Court in which he exercises his functions.

We have inserted in the repealing schedule the Statute of Uses (27 Hen. VIII, c. 10). It has no operation in the Mufassal; and in the Presidency-towns it will be inconsistent with the provisions of section 8 of the Bill as now revised.

We annex to this Report a copy (marked A) of the Bill as we have revised it.

3.—THE ALLUVION BILL.

On the Alluvion Bill.

This Bill, introduced into the Council of the Governor General on the 2nd October, 1878, has been settled by a Select Committee comprising amongst its members the Hon'ble Messrs. Evans, Thompson, Colvin, Cockerell and Thornton.

We think that this Bill should save local customs, not only in the Panjáb, but in all other territories to which it is to apply. At the same time, seeing that customs, such as *dhárdhúra*, have in a measure survived the existence of the circumstances which made them reasonable, we are of opinion that the Bill should enable all persons whose interests as riparian owners are likely to be affected by custom in any particular place, by consent to abolish the custom and place themselves under the operation of the general law. This might be effected by a registered instrument.

We would omit the definition of "owner." The Courts may safely be trusted to determine who in a given case is the riparian owner.

We would omit the first of the three definitions of "thread of the stream."

In other respects we regret that we have been unable to come to an agreement regarding this Bill. Subject to the amendments just specified and those next hereinafter mentioned, Mr. Stokes approves of the Bill as settled by the Select Committee.

He thinks that each of the provisos to sections 4 and 7 should run thus:—

"Provided that, where the land or any portion thereof forms on a site which is proved to belong to a private owner, such owner is entitled to the land or portion so formed."

This expresses the rule in the case of *Lopez* v. *Muddun Thakur*, and reverts, substantially, to the wording of the Bill as introduced to the Legislative Council. To save the rights of Government as is done by the Bill as amended by the Committee would, as appears to him, render sections 4 and 7 altogether inoperative.

On the Alluvion Bill.

He agrees with the Bombay Government and Mr. Justice Mutusámi Ayyar, that islands formed in the sea should in all cases belong to the Crown.

He thinks that, where any question arises as to the division of lands under section 4 or section 6, an appeal should be given to the Civil Courts.

For the reasons given by Mr. Ibbetson in Paper No. 32, he would, in sections 7 and 9, substitute the word "bank" for the word "frontage," and for the second clause of the rule contained in section 7 he would substitute the following:—

"Where more than one such normal can be drawn from one and the same end of any bank, and each of such normals is of different length, the shortest of such normals shall be deemed to be the including line; and where more than one of such normals, being of equal length, can be so drawn, and there is no shorter normal, the line bisecting the angle between the extreme positions of the shortest normal shall be deemed to be the including line."

He agrees with the Panjáb Government in thinking that this rule might usefully be illustrated by diagrams.

Sir Charles Turner considers that the Bill as settled by the Select Committee is defective, and where it alters, does not always improve, the law obtaining in the Presidency of Fort William. He thinks rules for the guidance of the Courts should be framed in the simplest terms, and that instances of imperceptible accretion are so rare in a land of tropical rain that they may be left to be dealt with by the Courts on a general principle sufficiently understood. He agrees that all islands formed in the sea should be declared the property of Government, but believes they will be more speedily utilized if, when connected by a ford with a shore, they are given to the owner of the shore. He would reframe the bulk of the Bill as follows:—

"Shortest ford" and "nearest land" mean respectively the ford which is shortest, and the land which is nearest, when the water is at its average height, neither swollen by flood nor shrunk by drought.

Nature and extent of rights of owners in lands regained or acquired.

Where, under the provisions of this Act, land has been regained by reason of ownership of the site, or acquired by reason of ownership of land contiguous with or proximate to such acquired land, every person having an interest in land superior to that of a tenant from year to year without right of occupancy, or a tenant-at-will, has in the land so regained or acquired an interest the same as, or similar to, the interest he had in the site or such other land, as the case may be; but nothing in this Act shall be construed to enlarge the interest of any person having an interest limited in its nature or duration in derogation of the interests of a superior landlord or reversioner.

* * * * * * * *

Re-formation of land on a site of which the surface has been submerged or carried away.

4. Where land, owned by the Government otherwise than as part of the public waste or by a private owner, is submerged by the influx of the waters of a sea, lake or river, or where its surface is by the action of such waters carried away, and the land is rendered unfit for useful occupation, the ownership thereof continues and may be transferred by operation of law or act of parties, notwithstanding such submergence or destruction of surface; and, unless in the meantime it has been abandoned, may be asserted when, by the recession of the waters, alluvial deposit or otherwise, such land again becomes fit for useful occupation.

Land gained on a site forming part of the public waste.

5. Subject to the rule declared in section 4, where, on a site forming part of the public waste, land is by any of the causes mentioned in that section rendered fit for useful occupation in any sea, lake or river,—

(*a*) if it be gained as an island separated from the shores or banks by a channel or channels not fordable at any points, it is the property of the Government:

(*b*) if it be gained as an island and the channel or channels between it and the shore or bank are fordable at any point, it belongs—

in all parts of India except the Lower and North-Western Provinces of the Presidency of Fort William in Bengal, to the Government;

in the Provinces last mentioned, to the owner of the land from which access to the island can be obtained by the ford, or, where there are more fords than one, by the shortest ford, and, as between the owners of lands from which there are fords of equal length, to such owners in equal shares:

(*c*) if it be gained as an increment to the shore or bank, it belongs to the owner of the land to which it is adjacent.

Land gained on a site not forming part of the public waste.

6. Subject to the rule declared in section 4, where, on a site not forming part of the public waste, land is by any of the causes mentioned in that section rendered fit for cultivation in a sea, lake or river—

(*a*) if it be gained, whether as an island or as an increment to the shore or bank and within the ascertainable boundaries of any estate, it belongs to the owner of such estate:

On the Alluvion Bill.

(*b*) if it be gained as an island in a sea or lake and not within the ascertainable boundaries of any estate, it belongs to the owner of the land on the shore to which it is nearest; and if different parts of it are respectively nearer to the lands of different owners, each owner is entitled to so much of the island as is nearest to his land on the shore:

(*c*) if it be gained as an increment to the shore or bank of any sea or lake and is not within the ascertainable boundaries of any estate, it belongs to the owner of the land on the shore or bank to which it is adjacent:

(*d*) if it be gained as an island in the bed of, or an increment to the bank of, a river and within the estate of the owner of the bank on the one side or the other, such estates being conterminous, but the boundary between them is not otherwise ascertainable, the middle thread of the stream in the season immediately before the land was formed shall be deemed to have been the boundary, and the land lying between the line occupied by the thread of the stream and each bank shall belong to the owner of such bank.

Land severed by inundation.

7. If land is severed by inundation, the owner retains the ownership thereof, notwithstanding such severance.

Abandoned river-beds.

8. Subject to the rule declared in section 4, where a river suddenly abandons its bed, the land thereby gained—

(*a*) if it lies in the public waste, belongs to the Government;

(*b*) if it lies within the ascertained boundaries of an estate, to the owner of such estate;

(*c*) if it lies within the estate of the owner of the bank on the one side or the other, such estates being conterminous but the boundary is not otherwise ascertainable, the middle thread of the stream in the season preceding the abandonment of the bed shall be deemed to have been the boundary, and the land lying between the line occupied by the thread of the stream and each bank shall belong to the owner of that bank.

Division of lands falling under sections 5 (*c*), 6 (*c*), 6 (*d*), and 8 between different owners on the same shore or bank.

9. Where newly-gained land falling under the rules declared in sections 5 (*c*), 6 (*c*), 6 (*d*), or 8 is adjacent to or lies in front of the lands of different owners on the same shore or bank, each of such owners is, as between himself and the others, entitled to the newly-gained land lying adjacent to or in front of his own land, and the newly-gained land shall be divided among such owners on such principles as appear to the Court equitable and consistent with the principle of the rule declared in this Act respecting the ownership of land so gained.

Revenue to be assessed on lands acquired under the Act.

Notice to be given to Collector when land becomes fit for useful occupation.

Persons liable to pay revenue or entitled to engage to be deemed to have abandoned their title to the land on failure to give notice.

10. Where land is regained or acquired by a private owner under the provisions of this Act and is not at the time assessed with revenue, it may be assessed as soon as it becomes fit for useful occupation; and if within three years after it has become fit for useful occupation the person liable to pay revenue for the same, or entitled to engage for the revenue payable in respect thereof, fails to inform the Collector of his readiness to pay the revenue (if any) payable in respect thereof, or to accept a settlement or engagement for such revenue, he shall be deemed to have abandoned his title to the land.

Dues or rent payable by sub-proprietors or tenants for lands acquired by them under section 4.

11. Where land is regained by a sub-proprietor or tenant under the provisions of section 4, and proprietary dues or rent have not been payable by him for the site thereof while unfit for useful occupation, and he is not entitled to hold the land rent-free, he shall, in respect of the land so regained, and in proportion to its extent, pay to his immediate superior in title or landlord dues or rent—

(*a*) where the rates payable by such sub-proprietor or tenant have been fixed in perpetuity—at the rates so fixed;

(*b*) where the rates have not been so fixed, but prior to the date of becoming unfit for useful occupation such sub-proprietor or tenant was entitled to hold at favourable rates—at such rates;

(*c*) and in any other cases—at such rates as are paid by sub-proprietors or tenants (as the case may be) of a similar class for land of a similar character and subject to the same conditions in the neighbourhood.

Dues or rent payable by sub-proprietors or tenants for lands acquired under section 5 or 6.

12. Where land is acquired by a sub-proprietor or tenant under the provisions of section 5 or 6, and the site thereof is not included in his original holding, nor are proprietary dues or rent paid by him for such site, unless such holding be rent-free, he must pay to his immediate superior in title or landlord, in respect of such newly-acquired land and in proportion to its extent, dues or rent (as the case may be) at the rates payable in respect of his original holding.

On the Alluvion Bill.

13. If any sub-proprietor or tenant entitled to any land under the provisions of this Act shall for three years after the same has become fit for useful occupation fail to inform his immediate superior in title or landlord of his intention to take such land and of his readiness to pay for such land such dues or rent as may be payable under this Act in respect thereof, he shall be deemed to have surrendered his rights thereto. Such surrender shall not defeat the title of any inferior proprietor or tenant who has given notice under this section to the person to whom he is required to give the same.

Omission of sub-proprietor or tenant to notify intention to take land to which he is entitled under the Act.

14. All land and islands formed, and all river-beds abandoned, under the circumstances mentioned in this Act and which are not by this Act declared to belong to private owners, are the property of the State, and any such land, island or abandoned river-bed which has not for three years after it has become fit for useful occupation been occupied by a person declared by this Act entitled thereto shall lapse to the Government.

Right of Government to land not hereinbefore provided for or unoccupied for a certain period.

15. The Local Government may for the purposes of this Act, from time to time, declare—

Power to declare season at which average height of a river shall be ascertained and where river ends and sea begins.

with reference to any river, at what season in the year, and with reference to any tidal river, at what time of the tide, the average height shall be ascertained; and

with reference to any tidal river, where, for the purposes of this Act, the river shall be deemed to end and the sea to begin.

Every declaration made under this Act shall be published in the official Gazette, and have thereupon the force of law; and no such declaration shall be altered or cancelled save with the previous sanction of the Governor General in Council."

In section 11 of the Bill he would substitute, in clause (*c*), the word "boundaries" for "area," and the word "have" for "has;" and he would add to clause (*b*):—

"or, where such right has been, immediately before any alteration in the shore or bank, enjoyed, the free access of the public to the waters of a lake, sea or river, or the free passage of cart, horse or foot-traffic along the shores or banks; and such right shall subsist notwithstanding any alteration of the shore of a sea or lake, or the bank of a river, from the causes mentioned in this Act, and be exercised in such a manner as to secure to the public as far as possible the convenience theretofore enjoyed."

He would also add to clause (*g*)—

"where such power has been heretofore enjoyed."

Mr. West thinks the Bill should provide as follows:—

"The bed of the sea, of lakes below the ordinary dry-weather level of the water, of tidal rivers and of rivers capable of use for navigation or traffic belongs, in the absence of private interests acquired by grant or prescription, to the Government.

The bed of any other river or stream may be presumed to be the property of each riparian owner as to the space lying between his frontage and the mid thread of the stream.

Explanations.—'Frontage' means the line described by the edge of the water at its medium height. 'Mid-thread' means the middle line between opposite frontages.

The up-stream and down-stream boundary of property in the bed is to be ascertained by drawing perpendiculars from the extremeties of the frontage to the mid-thread.

Where two or more equal perpendiculars shorter than all others can be drawn, the boundary is the line bisecting the greatest angle contained by them.

Where the mid-thread is a curved line, the perpendicular lines are to be drawn to lines tangential to the curve where such perpendiculars strike the mid-thread.

The bed of a lake not being the property of Government may be presumed to belong to the riparian owners according to the following rules:—

(*a*) In the case of an inlet whose length landwards exceeds its breadth, the middle line between the opposite frontages is to serve as the mid-thread of a stream up to a point where the prolongation of such line to the shore equals the perpendiculars drawn to the line from the opposite frontages.

(*b*) Land intersected by any line drawn from such point perpendicular to the general line of the shore belongs to the owner of the frontage struck by it.

(*c*) Where the two rules would give different boundaries between contiguous properties, the latter is to prevail.

(*d*) In other cases the boundary-line between properties having contiguous frontages is the shortest line that can be drawn from the point at which they meet to the line described by the edge of the water at the ordinary dry-weather level, disregarding slight inequalities.

(*e*) If two or more such lines be equal, the boundary is the line bisecting the greatest angle contained between such equal lines.

(*f*) Where the conformation of the lake prevents the application of the foregoing methods, the boundary towards the lake of properties having contiguous frontages is a line drawn from the point where they meet so as to be continually perpendicular to the edge of the water as it recedes to the ordinary dry-weather level.

If land is severed or submerged by water, the ownership thereof and of its site, if capable of identification, remains unchanged until expressly or impliedly abandoned, or the acquisition thereover of new rights inconsistent with such ownership.

On the Alluvion Bill.

Land formed by natural causes on any site belongs to each owner thereof for his interest therein.

Exception.—Land which can be identified as belonging to a property whence it has been carried away by avulsion and cast on another may at his option be taken away by the owner of the former property.

Imperceptible accretions to riparian land, and accretions to such land to which no superior claim is asserted, belong to each owner of such land for his interest therein.

Where a river is divided into channels by an island, an owner of property in such island, having a frontage on a channel, is a riparian owner with reference to owners of contiguous properties and to owners of property on the opposite bank of the river, and, as between such owners, the dividing channel only is to be deemed the river or stream.

In the districts wherein Regulation XI of 1825 is in force, and in the districts wherein the interests, rights and duties arising from formations or diminutions of land, from the submergence of land, or from its exposure by the recession of water, are governed by any customary or other local law, such Regulation and such law shall, as to all matters provided for by the same, continue in force notwithstanding anything in this Act contained.

The owner of any property abutting on, or extending into, the sea or a river or lake may apply to the Local Government to determine by survey and enquiry the proper boundary of his property, to set up proper land-marks, and to make correct plans for the said boundary with reference to known permanent objects. One of such plans shall, when the survey has been made by the person appointed by Government, be deposited in the office of the Collector, and one shall be registered by such owner, with a declaration that his ownership extends to the boundary thereby defined. After the lapse of one year without a suit to contest their correctness, such plan and declaration shall be conclusive evidence of the boundary.

Should any person deem himself injured or likely to be injured by such proceedings he may, within one year from the registration aforesaid, bring a suit for the rectification of the boundary, which shall in such case be determined according to the result of such suit; and new plans, in case of variance, shall be deposited by the person interested in the office of the Collector, and shall be registered by such person.

Such plan shall be conclusive of the boundary as between the parties to the suit. As to other persons, it shall be conclusive, unless within one year from its registration a suit is brought for a rectification of the boundary as therein defined. To any such suit the preceding section shall apply.

The expenses of the surveys hereinbefore contemplated must be defrayed by the person calling for or requiring the same, according to such rules as the Local Government may prescribe.

The Local Government, after giving public notice, may of its own accord and at the public expense make a survey of any such boundary as aforesaid; and the plans and declaration corresponding to the result may be deposited and registered by the Collector or other officer authorized on that behalf, with the like consequences and subject to the same proceedings as in the case of a private person.

The Local Government may make rules for giving effect to this Act, which, when published in the Government Gazette, shall have the force of law.

The Local Government may appoint officers either generally or specially for carrying out the provisions of this Act.

No owner of land submerged by a (lake or) river capable of use for navigation or traffic shall be at liberty, while such land is covered with water so as to be included in the bed of the stream, to occupy or make use thereof in any way which may prevent or impede the use of such river for navigation, traffic or other usual purposes. All legal regulations as to navigation, the use of the water, and of the bed of the stream, applying to a river generally, shall apply equally to those places where it flows over land which is private as to those where it flows over public property.

A custom inconsistent with this Act shall be abrogated by disuse for twelve years, or, as to any village or town, at the request of a majority of the riparian owners with the assent of the Local Government.

Section 11, clause (*a*) of Bill, extended so as, when a riparian owner is entitled to alluvion in virtue of his estate, to give it to him according to (or for) his interest in such estate."

4.—THE MASTER AND SERVANT BILL.

On the Master and Servant Bill.

We think that this Bill not only fills up a distinct gap in the system of Indian jurisprudence, but will tend in practice to prevent misunderstandings and consequent ill-feeling and litigation between Master and Servant; and its rules as to notice will preclude much uncertainty on the part of the Courts. We are of opinion, with Savigny (*System d. h. R. Rechts*, s. 55) and other jurists, that the law of hired service should be dealt with as part of the law of persons rather than as a branch of the general law of contract. The relation of

On the Master and Servant Bill.

master and servant, though, like marriage, it arises from contract, yet when once constituted involves rights and duties of a kind essentially different from those arising on a sale of timber or wool. They are but partially amenable to strict regulation, and the peculiar relation of the parties specializes and limits, while it justifies, a particular sanction and jurisdiction for enforcing the reciprocal duties that arise from it. We, therefore, all approve of the inclusion of the Acts empowering Magistrates to deal punitively with artisans who have received advances and with workmen employed on public works. We recommend the omission of the sections in their present form giving Magistrates jurisdiction in disputes between masters and domestic servants. They are not, in our opinion, open to the objections taken by an eminent critic; but they might, we think, have occasionally caused hardship. Sir Charles Turner would put nothing in the place of these sections. His reasons are fully stated in a note appended to this Report. But breaches of contract seem proper subjects for penal legislation when committed by persons from whom it is impossible to recover damages. For this and the other reasons given in the Statement of Objects and Reasons, Mr. Stokes and Mr. West are of opinion that selected Magistrates ought to have a summary power to enforce the servant's principal duties. The complaints should be made promptly and by the head of the household. The punitive jurisdiction should be exercised only in extreme cases, and means should be secured for an effective review. On the other hand, a domestic servant should have a simple, cheap and speedy remedy against a master who wrongfully discharges him or withholds his wages. To attain these ends, they propose the following sections :—

"22. If a domestic servant commits any of the following offences—

Complaint by master.

(*a*) wilfully and wrongfully fails to enter into his master's service,

(*b*) wilfully and wrongfully absents himself therefrom,

(*c*) wilfully disobeys any order which as a domestic servant he is bound to obey,

(*d*) does anything with the intention of causing wrongful gain or wrongful loss to his master,

(*e*) wilfully damages his master's property,

(*f*) intentionally insults, and thereby gives provocation to, any person to whom he is bound, as a domestic servant, to be respectful, intending, or knowing it to be likely, that such provocation will cause such person to break the public peace or to commit any other offence,

his master, or the person having control of his master's household, may, within fifteen days of the date on which such offence is committed, make a complaint of such offence to a Magistrate having jurisdiction in the case.*

Explanation.—Nothing is an offence under this section where the harm thereby caused, or intended to be caused, or known to be likely to be caused, is so slight that no person of ordinary sense or temper would complain of such harm.

"23. The Magistrate shall examine the complainant on oath, and if after such examination there is, in the Magistrate's opinion, no sufficient ground for proceeding, he may dismiss the complaint. But if, in the Magistrate's opinion, there is sufficient ground for believing that the servant has committed any offence mentioned in section 22, he shall issue his summons, or, if for reasons to be recorded by him it appears necessary, his warrant, for causing the servant to appear or to be brought at a certain time and place before him.

If the Magistrate convicts the servant of any offence triable under this section, he may by a certificate signed by him with his name of office, discharge the servant from the service of his master, and the master from all or any obligations to the servant. But if, in the opinion of the Magistrate, such discharge will not be a proper or adequate punishment, he may, after recording the facts proved and the grounds of his judgment, sentence the servant to imprisonment in the civil jail for a term which may extend to one month, or to fine which may extend to fifty rupees, or to both.

When the servant is a male under sixteen years of age, the Magistrate may sentence him to whipping in lieu of the fine or imprisonment aforesaid.

"24. If a master wrongfully discharges a domestic servant or fails to pay his wages for a period of more than fifteen days from the time when they become payable, the servant may, within three months of the date of such discharge or the expiration of such period, make complaint of the facts to a Magistrate having jurisdiction in the case.

Complaint by servant.

The Magistrate shall examine the complainant on oath, and if after such examination there is, in the Magistrate's opinion, no sufficient ground for proceeding, he shall dismiss the complaint. But if, in the Magistrate's opinion, there is sufficient ground for believing that the master has been guilty of the act or omission complained of, he shall issue his summons for causing the master to appear at a certain time and place before him.

* He will be, in the Presidency-towns, a Presidency Magistrate, and elsewhere a Magistrate of the first or second class specially empowered by the Local Government.

On the Master and Servant Bill.

If the complaint is proved, the Magistrate shall order the master to pay to the servant such sum not exceeding one hundred rupees as the Magistrate thinks reasonable compensation for such discharge or failure, together with the wages, if any, due to the servant, and, in case of non-payment of the amount so ordered to be paid, may levy the same as if it were a fine.

25. In the trial of cases under section 23 or section 24, the Magistrate shall be guided,

Procedure.

in the towns of Calcutta, Madras and Bombay by the rules contained in the Presidency Magistrates' Act, 1877, sections 114 and 237, and elsewhere by the rules regulating the trial of summons-cases. He may make such order as he thinks fit in regard to the costs of the summons or warrant.

26. If any complaint under section 22 or section 24 is, in the opinion of the Magistrate,

Frivolous or vexatious complaints.

frivolous or vexatious, the provisions of the Code of Criminal Procedure, section 209, or (in the said towns) of the Presidency Magistrates' Act, 1877, section 242, shall, *mutatis mutandis*, apply."

We agree with the Chief Commissioner of British Burma that the Bill should extend to the whole of British India. Where, as in Burma, most of the domestic servants come from Madras or Bengal, a law with which they were unfamiliar might be held sometimes *in terrorem* over their heads in order to make them submit to unjust treatment, and false and exaggerated reports gaining currency might seriously interfere with the supply of such servants. Provisions corresponding with Acts XIII of 1859 and IX of 1860, which confer magisterial jurisdiction over artizans and others who have received advances, and over workmen employed on public works, may now, we think, be made generally applicable. Both Acts have worked beneficially in large portions of the country. They have been tested by twenty years' experience; and, while the High Courts do their duty, they cannot be made a means of oppression. But we think that the section corresponding with Act XIII of 1859 should not extend to cases where the advance has been worked out or duly expended.

We are of opinion that the following minor changes should be made in the Bill.

We think that the clause (section 11) relating to the servant's obligation to be obedient should run thus: "He must obey all reasonable orders relating to his employment given by his master or by any person to whom the master has expressly or impliedly delegated power to give such orders."

We would omit the clause (section 11, clause *l*) imposing on a domestic servant the duty, on being so required, to accompany his master to any place not more than one hundred miles from the place where he entered the service. Considering the very various classes of persons included under the expression "domestic servant," it would be impossible to frame a rule on the subject which would not often give rise to hardship; and we think the matter may properly be left to arrangement in each case.

Where a servant is disabled by illness from performing his duty, he should provide at his own expense a substitute satisfactory to his master; but this rule should not in our opinion apply where the illness arises from injury received in the course of his employment.

We would not allow a master in every case to discharge without notice a servant for habitual idleness, for being declared an insolvent, or for theft, rape or adultry while in the master's service; but we think he should have that power in the case of a single instance of the servant's intoxication or insolence, or gross negligence in the performance of his duties, and also where the master discovers that the servant has been guilty of misconduct, before or after the commencement of his service, implying a defect in character which unfits him for such service.

We would omit the two sections (14, 15) dealing respectively with the master's right to sue third persons for compensation for loss of service and the effect of a servant's contributory negligence. They will find their proper place in the Code of Torts or Actionable Wrongs, which we think should be undertaken without delay. We would retain the section dealing with the servant's right to compensation for breach of the master's duties.

We would confine the master's obligation (section 17, clause *j*) to provide fellow-servants of ordinary care and reasonable skill to cases where the service is a work of danger.

On the Master and Servant Bill.

Mr. West is of opinion that the power of moderate chastisement may properly be delegated to the masters of minor servants by their parents or guardians. It will, he thinks, save boys from sudden dismissal and loss of character at an age when remote consequences cannot be appreciated by them; it is the only kind of discipline to which young and rude natures are amenable: under section 29 of the revised Bill an apprentice is subject to chastisement; and the omission of the power, so guarded as it is, may do an injury to many Native boys by preventing masters who know what boys are from employing them. It is a discipline to which virtually every English boy in a like situation and under the like circumstances is subjected—and on the whole for his good. The instances in which boys suffer any ill usage at the hands of their employers are so rare that they may be almost excluded from consideration in framing a general rule. Mr. Stokes and Sir Charles Turner, on the other hand, consider that in this country it would be inexpedient for the legislature to sanction the employment of violence by a master on any servant.

Mr. West would expressly forbid the servant to receive, without his master's consent, any premium or commission from any other person on account of any business or transaction in which he has dealt with such person as his master's agent. The prevalence of the dishonest practice at which this rule is pointed is, in his opinion, a reason for its introduction, not for its omission.

Mr. West would extend the section (27) empowering Magistrates to deal summarily with disputes between employers and their workmen employed on public works to cases where those works are on account of a municipality. In such cases, owing to the large number of persons employed, the settlement of disputes by the ordinary civil process might, in his opinion, well occupy the whole time of the employer and bring the works to a standstill. At the same time such disputes as arise are, legally, of the simplest character. Mr. Stokes and Sir Charles Turner do not consider the proposed extension desirable. We all think that the amount awarded under this section should (as is the case under Act IX of 1860) be recoverable only by distress and sale of the defaulter's moveable property.

We doubt whether the presumption in section 6, clause (*d*), that artizans and workmen are hired for no specific term, is justifiable in some parts of India, and we suggest that special inquiry on this point be made of the Local Governments. We would also suggest for consideration that the Bill should contain a rule that an artizan or workman breaking off in the middle of a day should forfeit that day's wages unless hired by the hour, and that, conversely, a master dismissing an artizan or workman in the middle of the day should pay him that day's wages.

We have considered the question raised by the first draft of the Bill, as to whether a compulsory system of registering domestic servants should be introduced by imperial legislation. We are, on the whole, opposed to such introduction. It may be that in some places registration is desirable, if not absolutely necessary; but where the expediency of legislation in this direction is recognised, the end should, in our opinion, be sought by municipal regulations under local laws.

Lastly, we would repeal and re-enact, as part of the Bill, the substance of Act XIX of 1850 (*for the binding of Apprentices*). We make this recommendation partly because the subject is intimately connected with the law of Master and Servant, partly because we think it desirable that the provisions of the Apprentice Act should now be revised with reference to the changes produced by recent legislation and by the establishment in India within the last thirty years of railway-workshops, factories and steam-packet companies. We would, for example, suggest that the provisions of that Act, as to depositing contracts of apprenticeship in the Magistrate's Court or the offices of persons appointed under Act X of 1841 to register ships, might now be modified so as to require deposit in the ordinary registration-offices.

We annex to this Report a copy (marked B) of the Bill as we have revised it.

5.—EASEMENTS BILL.

On the Easements Bill.

We concur in the opinions expressed by Sir Michael Westropp, Mr. Justice Jackson and Mr. Justice Innes that it is desirable to codify the law on this subject, which is now (to quote the Chief Justice of Bombay) "for the most part to be found only in treatises and reports practically inaccessible to a large proportion of the legal profession in the Mufassal and to the subordinate judges. We also agree with Mr. Justice Elsmie, that the frequent litigation in the case of urban easements is largely due to the fact that neither the people themselves nor the majority of the Courts understand the principles upon which such disputes should be determined.

The chief objections taken to the Bill are that, by informing people of their rights, it will provoke litigation, and that it will abolish or otherwise interfere with easements recognized only by local usage. The former objection, if valid, is an objection to all positive law declaring rights, and, in a less degree, to every decision of a Court of justice which enunciates a general rule respecting rights. But it is matter of ordinary experience that people are more prone to bring or resist claims to doubtful than to certain rights; that, in other words, litigation is promoted by doubt as to what is, and what is not, a right recognised by the Courts of justice. By its explicit declarations of the law on points now held doubtful by the people, the Bar and the Judges of the Subordinate Courts, the Bill appears to us calculated to check, rather than increase, litigation. As to the latter objection, that the Bill will interfere with local usage, we have been unable to find in the papers submitted to us a single instance of a right in the nature of an easement that would have been affected *in malam partem* by the Bill; and we strongly suspect that many of its critics have confounded rights in gross with easements properly so-called. Easements, being restrictions on the free use of property in others, are regarded with disfavour by the law; and section 7 of the Bill was accordingly framed so as to state the fact that all easements are in derogation of certain natural rights and to prevent attempts to create new kinds of easements. It enumerated the rights of one or other of which every easement must be a restriction, and thus intentionally excluded every kind of servitude not now known to the law. This, however, has been objected to on the ground that there may be in some parts of India rights not so enumerated. We admit the possibility, though not the probability, of the existence of such rights; and we recommend that section 7 should be modified as follows:—

"Easements are restrictions of one or other of the following rights (namely):—

(*a*) the exclusive right of every owner of immoveable property (subject to any law for the time being in force) to enjoy and dispose of the same, and all products thereof and accessions thereto, as he thinks fit;

(*b*) the right of every owner of immoveable property (subject to any law for the time being in force) to enjoy, without disturbance by another, the natural advantages arising from its situation.

Illustrations.

(*a*). The exclusive right of every owner of land in a town to build thereon, subject to any municipal law for the time being in force.

(*b*). The right of every owner of land that the air passing thereto shall not be unreasonably polluted by other persons.

(*c*). The right of every owner of a house that his physical comfort shall not be interfered with materially and unreasonably by noise or vibration caused by any other person.

(*d*). The right of every owner of land to so much light and air as pass vertically thereto.

(*e*). The right of every owner of land that such land, in its natural condition, shall have the support naturally rendered by the subjacent and adjacent soil of another person.

Explanation.—Land is in its natural condition when it is not excavated and not subjected to artificial pressure, and the 'subjacent and adjacent soil' mentioned in this illustration means such soil only as in its natural condition would support the dominant heritage in its natural condition.

(*f*). The right of every owner of land that, within his own limits, the water which naturally passes or percolates by, over or through, his land, shall not, before so passing or percolating, be unreasonably polluted by other persons.

(*g*). The right of every owner of land to collect, and dispose within his own limits of, all water under the land and all water on its surface which does not pass in a defined channel.

(*h*). The right of every owner of land that the water of every natural stream which passes by, through or over, his land in a defined natural channel shall be allowed by other persons to flow within such owner's limits without interruption and without material alteration in quantity, direction, force or temperature: the right of every owner of land abutting on a natu-

On the Easements Bill.

ral lake or pond, into or out of which a natural stream flows, that the water of such lake or pond shall be allowed by other persons to remain within such owner's limits without material alteration in quantity or temperature.

Explanation.—A natural stream is a stream, whether permanent or intermittent, tidal or tideless, on the surface of land or underground, which flows by the operation of nature only and in a natural and known course.

(*i*). The right of every owner of upper land, that water naturally rising in or falling on such land, and not passing in defined channels, shall be allowed by the owner of adjacent lower land to run naturally thereto.

(*j*). The right of every owner of land abutting on a natural stream, lake or pond, to use and consume its water for drinking, household-purposes and watering his cattle and sheep; and the right of every such owner to use and consume the water for irrigating such land, and for the purposes of any manufactory situate thereon, provided that he does not thereby cause material injury to other like owners."

Should, for instance, a 'natural right' to lateral access of light or air, or to the non-diminution of the supply of fish, be hereafter established in any part of India, the section as now modified will not exclude an easement in derogation of such right. We are aware that section 7, even in its new form, may operate indirectly as a statutory recognition of various rights connected with the ownership of land. But a definite conception of these is a necessary preliminary to the codification of the law of actionable wrongs, and we see no substantial objection to inserting it for the present in a Bill dealing with restrictions of the rights in question.

We would also insert the following section :—

"19. An easement may be acquired in virtue of a local custom. Such easements are called customary easements.

"*Illustrations.*

"(*a*) By the custom of a certain village, every cultivator of village-land is entitled, as such, to graze his cattle on the common pasture. A, having bought a plot of uncultivated land in the village, breaks up and cultivates that plot. He thereby acquires an easement to graze his cattle in accordance with the custom.

"(*b*) By the custom of a certain town no owner or occupier of a house can open a new window therein so as substantially to invade his neighbour's privacy. A builds a house in the town near B's house. A thereupon acquires an easement that B shall not open new windows in his house so as to command a view of the portions of A's house which are ordinarily excluded from observation, and B acquires a like easement with respect to A's house."

And to the first section of the chapter containing the rules as to the incidents of easements, we would add the following sentence: "And when any incident of any customary easement is inconsistent with such rules, nothing in this chapter shall be deemed to affect such incident."

The other amendments which we would recommend are comparatively unimportant.

We would modify the clause (section 2) saving Government-rights to regulate distribution of water, so as to avoid stating positively that the Government has such rights in the case of all rivers and streams flowing in natural channels. It is true that the preamble to the Northern India Canal and Drainage Act, 1873, contains a statement to that effect ;* but the correctness of that statement is open to doubt, and in any case it applies only to the North-Western Provinces, the Panjáb, Oudh and the Central Provinces. We would extend the clause so as to save any right of Government to regulate the collection and retention of the water of such rivers and streams, and the collection, retention and distribution of water flowing, collected, retained or distributed in or by any channel or other work constructed at the public expense for irrigation.

We would expressly save rights in gross possessed by the Government or public, and rights acquired or arising out of relations created before the proposed Act comes into force.

We would add to section 6 an illustration showing that an easement to restrain interference with privacy is recognised by the Bill, and is a negative easement. Such an easement, founded as it is on the oriental custom of secluding females, is of much importance in India: it is recognised generally in the countries whose system is founded on the Civil Law; and the decisions of the High Courts adverse to such a right should not, we think, be followed by the legislature.

* This preamble is identical with the preamble to Act XXX of 1871. Sir James Stephen says that he always understood that this "was one of the parts of that Act which was most strongly objected to and one of the principal causes of its being disallowed by the Secretary of State." As a matter of fact, the preamble was not objected to, and the reason of the disallowance was that the Act contained six sections (44 to 49) providing for the levy of a special water-rate on lands irrigable but not irrigated.

On the Easements Bill.

We think it would be well to add to the section (10) dealing with the power of lessors and mortgagors to impose easements a clause declaring that no lessee or other person having a derivative interest may impose on the property held by him as such an easement to take effect after the expiration of his own interest or in derogation of the rights of the lessor or the superior proprietor.

For the provisions of the Bill (section 11) relating to the acquisition of easements by lessees, we would substitute the following: "No lessee of immoveable property can acquire, for the beneficial enjoyment of other immoveable property of his own, an easement in or over the property comprised in his lease."

We think that easements of necessity, strictly so-called, should be separated in section 12 from those apparent and continuous easements which arise when a transfer is made, which are necessary for enjoying the thing transferred, or other immoveable property of the transferor, as it was enjoyed when the transfer took effect.

When the person entitled to set out a way of necessity refuses or neglects to do so, we think the dominant owner should be entitled to set it out. The second paragraph of section 13 declares that a way of necessity cannot be varied save with the consent of both dominant and servient owners, or unless the servient owner renders it impassable. We have struck out this paragraph, as Mr. West thinks it opposed to Indian rural economy and convenience, on account of periodical fallows of parts of the same land, of crops sown and growing at different times, and of the great temporary changes arising from the extremes of wet and dry weather making a strict adherence to the same road in all seasons in many instances almost impossible.

In the section (15) relating to the acquisition of easements by prescription (which with the exception of the clause relating to easements of support, has been the law of the land since 1871),* we would restore the words "and as of right" to the clause dealing with the access and use of light and air. Under the English Prescription Act, a claim to an easement is defeasible if the easement can be shown to have been enjoyed by express agreement in writing, and we think that the following explanation should be inserted in the Indian law:

"Nothing is an enjoyment within the meaning of this section when it has been had in pursuance of an agreement with the owner or occupier of the property over which the right is claimed, and it is apparent from the agreement that such right has not been granted as an easement, or, if granted as an easement, that it has been granted for a limited period, or subject to a condition on the fulfilment of which it is to cease."

With reference to the decision in *Angus* v. *Dalton*, L. R. 3 Q. B. 85, we think that the following explanation might usefully be inserted:

"In the case of an easement of support, where the soil of the dominant heritage is subjected to an artificial pressure not externally apparent, or where the outward thrust of things affixed thereto is enhanced by causes not externally apparent, the said period of twenty years begins when the circumstance by which the burden on the servient heritage is increased becomes known to the servient owner."

We have struck out section 18, which declares that no right to an easement can be acquired by long and continued possession, except under section 15. It was intended to abolish prescription at common law, which has been held to exist in the Presidency-towns. But it appears to be unnecessary, and might possibly mislead in the case of rural easements special to India or to particular districts, and not included amongst those enumerated in section 15, or not readily yielding to the conditions imposed by that section.

We think that the provision (section 29) as to the extent of an easement where the dominant heritage is increased by alluvion or diminished by diluvion should run thus:

"Where an easement has been granted or bequeathed so that its extent shall be proportionate to the extent of the dominant heritage, if the dominant heritage is increased by alluvion, the easement is proportionately increased; and if the dominant heritage is diminished by diluvion, the easement is proportionately diminished."

It appears to us that the section (45) relating to the extinction of an easement by alteration of the dominant heritage should be thus worded:

* See Act No. IX of 1871, section 27 = 2 & 3 Will. IV, c. 71, secs. 2, 3.

On the Easements Bill.

"An easement is extinguished—

(*a*) where the dominant heritage is substantially changed and it is not proved that the easement was intended to continue annexed thereto notwithstanding such change; or

(*b*) where by any change in the dominant heritage, the burden on the servient heritage is materially increased and cannot be reduced to its original limits, and it is not proved that the burden was intended by the parties to be subject to increase by such change."

As to the extinguishment of easements by non-user (section 59), we think that a distinction may properly be drawn in this respect between continuous and discontinuous easements, and that in the case of a discontinuous easement the dominant owner should be enabled to keep it alive by registering a declaration of his intention to retain it.

Though fully recognizing the propriety of the rule (section 52) that the servient owner has no right to require that an easement should be continued, we think, nevertheless, that the dominant owner ought not to be allowed to damage the servient heritage by suddenly and maliciously abandoning or suspending the easement. We recommend, then, that the rule should be, that the servient owner is not entitled to compensation for damage caused by the abandonment or suspension, if the dominant owner has given him such notice as will enable him, without unreasonable expense, to protect the servient heritage.

We think that the Bill may properly be supplemented by a chapter on Licenses, which, though mentioned in the Evidence Act, sections 116, 117, are nowhere dealt with in the body of Indian codified law; and we have framed rules on this subject which we think will be useful.

We annex to this report a copy (marked C) of the Bill as we have revised it, Mr. West, however, desiring it to be understood that the details of the measure should, in his opinion, be open to revision according to the further information which may become available to the Legislature by the time the Bill is before it.

6.—THE PRIVATE TRUSTS BILL.

On the Private Trusts Bill.

It seems to us that this Bill, especially the chapter dealing with constructive and resulting trusts, will supply a real defect in the codified law of India, and be of practical utility to the Mufassal Courts and pleaders. We have duly considered the remarks of Sir James Stephen on the ambiguity of the word "trust" as understood by English lawyers. But we are unable to agree that they constitute an argument of any weight against the Bill, or that its enactment will introduce the serious evils that he anticipates. Cases frequently arise in which in one sense there has been a trust, though not in the sense to which the Bill confines it. Pleaders having got hold of the word "trust," then build upon it arguments drawn from the English books which may well mislead Judges who are not more than usually circumspect. This must go on until legislation regulates this branch of the law. By saying what is a "trust" and which of the relations arising from it amongst those recognized by the English Courts are to be admitted and which not, the Legislature will obviate the very evil which Sir James Stephen fears. The Courts are introducing, and from the necessities of the case must introduce, the English Law of Trusts indiscriminately, unless the law distinctly says how far they may go. Trusts created by an old man for his own maintenance and ulterior purposes, for a widow, for a daughter, stepdaughter or daughter-in-law and her children, are of pretty frequent occurrence among the Natives of India; and it is desirable to keep them free from the complication of double estates, in which without the intervention of the legislature they are certain to become entangled. We need hardly say that the system of *benámi*, or the enjoyment of the profits of property held by another in trust for the beneficiary, was familiar to the people of India before the introduction of British rule, and in no country, owing to the extreme subdivision of immoveable property and the partition of inheritances, are constructive trusts more common. Gains made by one person at the cost of another are an every-day source of litigation: these cases must be dealt with in some way; and here, too, definite legislation will clear and simplify the law. But, apart from the Native property-holder, there is the large body of domiciled Europeans and Eurasians who have for nearly a century enjoyed and

taken advantage of a trust-law recognized by our Courts; and, now that the number and wealth of this class have increased, and every Court in the country may be called upon to administer a trust-law, the question of the advisability of its codification seems no longer open to discussion. On the Private Trusts Bill.

Chapter I: Preliminary.—We would expressly exclude from the operation of the Act private religious or charitable endowments (which may fitly be left to family or local usage); and we would declare that nothing in its second chapter (*Of the Creation of Trusts*) shall apply to trusts created before it comes into force.

To avoid the conceivable risk of confounding trusts with bailments, we recommend that the definition of "trust," which was taken from the New York Civil Code, should be modified as follows: "A 'trust' is an obligation annexed to the ownership of property, and arising out of a confidence reposed in and accepted by the owner, or declared and accepted by him, for the benefit of another, or of another and the owner." And in order to prevent the possible introduction by pedantic lawyers of conceptions resembling the English legal estate and equitable ownership, we would define the "beneficial interest" of the beneficiary as his "right against the trustee as owner of the trust-property." The beneficiary should, in our opinion, have no estate or interest in the subject-matter of the trust.

We think that the definitions of "passive trust," "active trust," "executed trust" and "executory trust" are unnecessary and should be omitted.

We would extend the definition of "notice" so as to cover cases where information is given to, or obtained by, an agent under the circumstances mentioned in the Indian Contract Act, 1872, section 229.

Chapter II: Of the Creation of Trusts.—We would provide expressly in section 4 that, where a trust is created for two purposes, of which one is lawful and the other unlawful, and the two purposes cannot be separated, the whole trust is void.

We agree with the framer of the Bill as to the expediency of excluding oral declarations of trust in every case where land forms the subject-matter: but we think that the requisite written declaration may be signed by the trustee as well as by the author of the trust; and we are of opinion that, unless the trust is declared by will, or the author is himself the trustee, the property should be actually transferred. We would, therefore, make the sections relating to the declaration and creation of trusts run as follows:—

"5. No trust in relation to immoveable property is valid unless declared by a non-testamentary instrument in writing signed by the author of the trust or the trustee and registered, or by the will of the author of the trust or the trustee.

"No trust in relation to moveable property is valid unless so declared, or unless the ownership of the property is transferred to the trustee.

"These rules do not apply where they would operate so as to effectuate a fraud.

"6. Subject to the provisions of section five, a trust is created when the author of the trust indicates with reasonable certainty, by any words or acts, (*a*) an intention on his part to create thereby a trust, (*b*) the purpose of the trust, (*c*) the beneficiary, and (*d*) the trust-property, and (unless the trust is declared by will or the author of the trust is himself to be the trustee) transfers the trust-property to the trustee."

We would declare that the subject-matter of every trust must be property transferable to the beneficiary; and, in order to preclude the complications that would arise from allowing a trust upon a trust, we would say that the subject-matter must not be a mere beneficial interest under a subsisting trust.

We think the Bill should provide for disclaimers by proposed beneficiaries.

Chapter III: Of the Duties and Liabilities of Trustees.—In the section (11) relating to the trustee's duty to fulfil the purpose of the trust, we would insert an explanation that the purpose of a trust for the payment of debts should, unless a contrary intention is expressed, be deemed to be to pay only the debts of the author of the trust existing and recoverable at the date of the instrument of trust, or, when such instrument is a will, at the date of his death, and in the case of debts not bearing interest, to make such payment without interest.

When a beneficiary's interest is forfeited to Government, we think that the trustee should be bound to hold the trust-property for the benefit of such person, in such manner as the Government directs.

On the Private Trusts Bill.

Chapter IV: Of the Rights and Powers of Trustees.—We think that the prohibition (section 32) as to enforcing a trustee's charge upon the trust-property for proper expenses paid out of his own pocket should not apply where the expenses have been incurred with the sanction of a principal Civil Court of original jurisdiction.

We think that the section (33) entitling the trustee to be indemnified by the gainer by a breach of trust should expressly exclude this right when the trustee has, in committing the breach, been guilty of fraud.

As to the management of the trust-property (section 36), we think that, for the purposes of the Land Improvement Act, 1871, every trustee in the actual receipt of the rents and profits of land should be deemed to be a landlord. A similar provision is contained in the English Statute 27 & 28 Vic., c. 114. We consider that, except with the permission of a principal Civil Court of original jurisdiction, no trustee should have power to lease trust-property for a term exceeding twenty-one years.

We would enable the trustee, with the permission of the Court, but not otherwise, to apply the trust-property, in whole or in part, to the advancement in life of a minor beneficiary.

Where power to deal with the trust-property is given to several trustees and one of them disclaims or dies, the Bill should, in our opinion, provide that the power may be exercised by the continuing trustees, unless, from the terms of the instrument of trust, it is apparent that the authority is to be exercised by a number in excess of the number of the remaining trustees.

Chapter V: Of the Disabilities of Trustees.—The Bill declares (section 46), in accordance with the present law, that, where there are more trustees than one, all must join in the execution of the trust, except where the instrument of trust otherwise provides. Mr. West is of opinion that the rule ought to be that, in the absence of a direction to the contrary, a majority of the trustees may act subject to control by the Court on application by the minority. We think that the section declaring that no trustee whose duty it is to sell trust-property may buy the same should be extended to the agents employed by such trustees for the purpose of the sale. Of the two alternative rules given in the Bill, as to when the trustee may buy the trust-property, we consider that printed in the text to be best adapted for India (namely):—

"No trustee, and no person who has recently ceased to be a trustee, may, without the permission of a principal Civil Court of original jurisdiction, buy or become mortgagee or lessee of the trust-property or any part thereof; and such permission shall not be given unless the purchase, mortgage or lease is manifestly for the advantage of the beneficiary.

"And no trustee whose duty it is to buy or to obtain a mortgage or lease of particular property for his beneficiary may buy it or obtain a mortgage or lease of it for himself."

Chapter VI: Of the Rights and Liabilities of the Beneficiary.—The Bill declares (section 56) that the beneficiary, if competent to contract, may transfer his interest, subject to the law for the time being in force as to the circumstances and extent in and to which he may dispose of it. Mr. West considers that the beneficiary should not be allowed to substitute a trust in favour of another for one in his own favour, without the assent of the trustee, except in the case of a passive trust.

We think that to the section (58) declaring the beneficiary's right to proper trustees, and a proper number of trustees, the following explanations may usefully be added:—

"*Explanation I.*—The following are not proper persons within the meaning of this section:

"A person domiciled abroad: an alien enemy: a person having an interest inconsistent with that of the beneficiary: a person in insolvent circumstances; and, unless the personal law of the beneficiary provides otherwise, a married woman and a minor.

"*Explanation II.*—When the administration of the trust involves the receipt and custody of the money, the number of trustees should be two at least."

With regard to the first of these explanations, we would observe that in Hindú and Muhammadan families, a minor son often succeeds to property burdened with a trust for dependent relations of his father, and a married woman is sometimes made by her father trustee for herself and her son or daughter.

Where a trustee has wrongfully bought trust-property, the beneficiary has under certain circumstances, a right to have the property declared subject to

the trust or retransferred. We think that to the section (61) embodying this rule should be added a clause saving the rights of lessees and others who, before the institution of a suit to have the property declared subject to the trust or retransferred, have contracted in good faith with the trustee or his sub-purchaser (8 B. P. C. 42), and disallowing the right to a declaration or retransfer when the beneficiary has ratified the sale to the trustee, with full knowledge of the facts of the case and of his rights as against the trustee.

On the Private Trusts Bill.

The section (62) enabling the beneficiary to follow trust-property saves transferees in good faith for consideration without notice of the trust, and a transferee for consideration (with or without notice) from such a transferee. Mr. West would also save a gratuitous transferee from a *bonâ fide* transferee for value, and a transferee *bonâ fide* for value from a volunteer.

Where the trustee wrongfully mingles trust-property with his own, we would adopt the rule given in the margin of the Bill, section 65, namely, that the beneficiary is entitled to a charge on the whole fund for the amount due to him. It accords with the decision in *Cook* v. *Addison*, L. R. 7 Eq. 471.

It seems to us that section 68 should be extended to the cases where one of several beneficiaries (1) knowingly obtains any advantage from a breach of trust, without the consent of the other beneficiaries, or (2) becomes aware of a breach, and either actually conceals it or does not within a reasonable time take proper steps to protect the interests of the other beneficiaries, or has deceived the trustee and thereby induced him to commit a breach; and that in such case the other beneficiaries should be entitled to have his interest under the trust impounded.

Chapter VII:—Of Vacating the Office of Trustee.—It seems unnecessary to require a trustee desiring to be discharged by the Court to institute a suit for that purpose. It will be enough to require him to present a petition.

We think express provision should be made for the appointment of a new trustee in place of one disclaiming, or accepting an inconsistent trust. Mr. West is of opinion that, if no provision has been made by the instrument of trust, the Court only should nominate the trustee.

Chapter VIII: Of the Extinction of Trusts.—The Bill should, we think, declare that no trust can be revoked by the author of the trust so as to defeat or prejudice what the trustees may have duly done in execution of the trust (1 Coll. 655, 659). Mr. West considers that a trust should not be allowed to be revocable except on the same terms as a gift.

Chapter IX: Certain Obligations in the Nature of a Trust.—We doubt the expediency of attempting to suppress the inveterate practice of entering into *benámi* transactions: we would point out that in many, perhaps most, of those transactions the parties are actuated by religious or prudential, rather than fraudulent, motives; and we think that, in lieu of section 78, clause (*d*), and section 81, the Bill should simply declare that where property is transferred to one person for a consideration paid or provided by another person, and it appears that such other person did not intend to pay or provide the consideration for the benefit of the transferee, the transferee must hold the property for the benefit of the person paying or providing the consideration.

We think that, in addition to the ten constructive trusts expressly set forth in the Bill, it should mention those that arise in the following cases:—

where a testator bequeaths certain property upon trust and the purpose of the trust appears on the face of the will to be unlawful, or during the testator's lifetime the legatee agrees with him to apply the property for an unlawful purpose:

where property is bequeathed, and the revocation of the bequest is prevented by coercion:

where property is transferred in pursuance of a contract liable to rescission or induced by fraud or mistake:

where any person, bound in a fiduciary character to protect the interests of another, enters into any dealings under circumstances in which his own interests are or may be adverse to those of such other person, and thereby gains for himself a pecuniary advantage:

where by the exercise of undue influence any advantage is gained, in derogation of the interests of another, without consideration or with notice that such influence has been exercised:

On the Private Trusts Bill.

where a tenant for life or other qualified owner of property, as representing all persons interested therein, gains some advantage; and, lastly,

where creditors compound the debts due to them, and one of them, by a secret arrangement with the debtor, gains an undue advantage over his co-creditors.

We think that some words should be inserted to show that a resulting trust cannot be implied in evasion of any law for the time being in force (*Ex p. Yallop*, 15 Ves. 60.)

Some of the rules applied by this chapter might conceivably be held to extend to the manager as such of an undivided family. We would therefore declare that nothing contained in the Act shall be deemed to affect the mutual relations of the members of undivided families as determined by any customary or personal law.

Mr. West is of opinion that the Bill should also provide for the following matters:—

(*a*) the constitution of trusts for alimentary provisions and the forfeiture of the interests of persons for whom such provisions have been made:

(*b*) the illegality of trusts (other than trusts for payment of debts, for keeping on foot a policy of life-insurance, or for public purposes) involving an accumulation of the proceeds of trust-property for more than twenty-one years:

(*c*) the power of a trustee to carry on a business, at the charge and risk of the beneficiaries, so far as may be necessary in order to its liquidation:

(*d*) the non-effect on the trustee's transactions of slight deviations by the trustee from his duty:

(*e*) the liability of a trustee of his own wrong, for losses and gains as well as for the trust-property.

He would also add, either to the Bill or to the Limitation Act, appropriate sections on limitation of certain suits relating to express or constructive trusts.

We annex a copy (marked D) of the Bill as (subject to the above remarks) we have revised it.

III.

Summary of recommendations.

In conclusion, we have to recapitulate briefly the specific recommendations which we have made in this report:—

(*a*) that the process of codifying well-marked divisions of our substantive law should continue;

(*b*) that the eventual combination of those divisions as parts of a single and general Code should be borne in mind;

(*c*) that the English law should be made the basis in a great measure of our future Codes, but that its materials should be recast rather than adopted without modification;

(*d*) that in recasting those materials, due regard should be had to Native habits and modes of thought; that the form which those materials should assume should, as far as possible, resemble that of rules already accepted; that, in other words, the propositions of our Codes should be broad, simple and readily intelligible;

(*e*) that uniformity in legislation should be aimed at, but that special and local customs should be treated considerately;

(*f*) that the existing law of persons should not at present be expanded by way of codification, save that the operation of the European *British Minors Act*, XIII of 1874, should be extended;

(*g*) that the laws relating respectively to *negotiable instruments*, to the subjects dealt with by the Transfer of Property Bill, to trusts, to alluvion, to easements, and master and servant, should be codified, and the Bills already prepared on these subjects be passed into law, subject to the amendments above suggested;

(*h*) that the Law of Wrongs should then be codified;

(*i*) that, concurrently with or after the framing of a Law of Wrongs, the laws relating to insurance, carriers and lien should be codified;

(*j*) that the legislature should then deal with the Law of Property in its whole extent;

(*k*) that *preparation* be made for a systematic chapter on interpretation; Summary of recommendations.

(*l*) that the project of framing a digest of the decisions of Indian Courts should be abandoned.

WHITLEY STOKES. (L. S.)
C. A. TURNER. (L. S.)
RAYMOND WEST. (L. S.)

The 15th November, 1879.

Note by Sir Charles Turner as to the proposal to give a special criminal jurisdiction in the case of Domestic and Agricultural Servants and Mechanics.

Note by Sir C. Turner on Master and Servant Bill.

I consider that where the misconduct of the servant amounts to a criminal act, *e. g.*, wilful damage or dishonesty, or intentional insult calculated to provoke a breach of the peace, the master is sufficiently protected by the provisions of the general law; that the peculiar character of the contract in establishing a personal relation is in itself a strong argument against the enactment of a special criminal law to enforce its obligations; that although a servant may by his poverty be unable to make compensation in damages for breach of contract, yet the power of the master to put an immediate termination to the contract ordinarily protects him against any serious damage for such breaches; that in the exceptional cases in which a master cannot at once supply the place of a servant whom he discharges, or who quits his service, the dependence of the master on the good-will of the servant will supply what is in this country sometimes wanting,—a valuable incentive to the master so to conduct himself towards the servant as to attach him to his service. The moral effect of criminal prosecution and punishment is so deteriorating to the character, that I would confine special legislation exposing servants to these penalties to cases which contain an element of fraud and are not sufficiently met by the general law, namely, where advances have been received for labour or materials and the work has not been executed; and in these cases I would still further restrict the penalties by allowing resort to them only where the advance has not been worked out or duly expended. I consider that, to force a man by terror of imprisonment in a criminal suit to serve for the whole period—it may be for years—for which he engages, if he has received a few rupees as an advance, an advance which may have been long ago recovered—is to accord the sanction of the law to a qualified form of slavery, justifiable only by political emergency, as in the case of enlistment in the army, and inconsistent with recent legislation in India, which abolishes imprisonment of any kind for the enforcement of other contracts or civil wrongs resulting in debts or measured in damages. I consider such legislation especially undesirable in this country, where ignorance of the language on the part of the master often leads to seeming disobedience on the part of the servant; where a dominant race of masters is from its circumstances encouraged to exercise arbitrary power over servants, where the servants can expect but little protection from the effect of public opinion in controlling his master's conduct, and where, among the lower grades of society, there are masters who have not been accustomed from their youth to fulfil the duties entailed by that relationship.

C. A. TURNER.

A.

THE TRANSFER OF PROPERTY BILL, 1879.

CONTENTS.

PREAMBLE.

CHAPTER I.

PRELIMINARY.

SECTIONS.

1. Short title.
   Extent.
   Commencement.
2. Repeal of Acts.
   Saving of certain enactments, incidents, rights, liabilities, &c.
3. Interpretation-clause.
4. Enactments relating to contracts to be taken as part of Act IX of 1872.

CHAPTER II.

OF TRANSFERS OF PROPERTY BY ACT OF PARTIES.

(A).—Transfer of Property, whether moveable or immoveable.

5. "Transfer" defined.
6. What may be transferred.
7. Persons competent to transfer.
8. Operation of transfer.
9. Oral transfer.
10. Condition restraining alienation.
11. Restriction repugnant to interest created.
12. Condition making interest determinable on insolvency or attempted alienation.
13. Transfer for benefit of person not in existence at date of transfer subject to prior transfer.
14. Rule against perpetuity.
15. Transfer to class some of whom come under sections 13 and 14.
16. Transfer to take effect on failure of prior transfer.
17. Transfer in perpetuity for benefit of public.
18. Direction for accumulation.
19. Vested interest.
20. Transfer for benefit of person not then living.
21. Contingent interest.
22. Transfer to members of a class who attain a particular age.
23. Transfer contingent on happening of specified uncertain event.
24. Transfer to such of certain persons as survive at some period not specified.
25. Conditional transfer.
26. Fulfilment of condition precedent.
27. Conditional transfer to one person coupled with transfer to another on failure of prior transfer.
28. Ulterior transfer conditional on happening or not happening of specified event.
29. Fulfilment of condition subsequent.
30. Prior disposition not affected by invalidity of ulterior disposition.
31. Condition that transfer shall cease to have effect in case specified uncertain event happens or does not happen.
32. Such condition must not be invalid.
33. Condition that transferee shall perform act at or before specified time.

SECTIONS.

34. Transfer conditional on performance of act, no time being specified for performance.
35. Transfer conditional on performance of act, time being specified.

Election.

36. Election when necessary.

Apportionment.

37. Apportionment of periodical payments on determination of interest of person entitled.

Severance of obligation relating to property.

38. Satisfaction of right arising in favour of several persons in consequence of transfer.

(B).—Transfer of Immoveable Property.

39. Transfer by person authorized only under certain circumstances to transfer.
40. Transfer where third person is entitled to maintenance,
    or has a right to restrain enjoyment,
    or is entitled to benefit of obligation not amounting to interest or easement.
41. Transfer by ostensible owner.
42. Transfer by person having option to require or authority to revoke transfer.
43. Transfer by unauthorized person who subsequently acquires interest in property transferred.
44. Transfer by one co-owner.
45. Joint transfer for consideration.
46. Transfer for consideration by persons having distinct interests.
47. Transfer by co-owners of share in common property.
48. Priority of rights created by transfer.
49. Transferee's right under policy.
50. Rent *bonâ fide* paid to holder under defective title.
51. Improvements made by *bonâ fide* holders under defective titles.
52. Transfer of property pending suit relating thereto.
53. Fraudulent transfer.

CHAPTER III.

OF SALES OF IMMOVEABLE PROPERTY.

54. "Sale" defined.
    Sale how made.
    Contract for sale.
55. Rights and liabilities of buyer and seller.
56. Sale of one of two properties subject to a common charge.

CHAPTER IV.

OF MORTGAGES OF IMMOVEABLE PROPERTY AND CHARGES.

57. "Mortgage," "mortgagor" and "mortgagee" defined.
    Simple mortgage.
    Mortgage by conditional sale.
    Usufructuary mortgage.
    English mortgage.
58. Mortgage when to be by assurance.

Rights and Liabilities of Mortgagor.

59. Right of mortgagor to redeem.
    Redemption of portion of mortgaged property.

SECTIONS.

60. Right to redeem one of two properties separately mortgaged.
61. Right of usufructuary mortgagor to recover possession.
62. Accession to mortgaged property.
    Accession acquired in virtue of transferred ownership.
63. Renewal of mortgaged lease.
64. Implied contracts by mortgagor.
65. Waste by mortgagor in possession.

Rights and Liabilities of Mortgagee.

66. Right to foreclosure or sale.
67. Right to sue for mortgage-money.
68. Power of sale when invalid.
69. Accession to mortgaged property.
70. Renewal of mortgaged lease.
71. Rights of mortgagee in possession.
72. Charge on proceeds of revenue-sale.
73. Right of subsequent mortgagee to pay off prior mortgagee.
74. Right of mesne mortgagee against prior or subsequent mortgagees.
75. Liabilities of mortgagee in possession.
    Waste by mortgagee.
    Loss occasioned by his default.
76. Receipts in lieu of interest.

Priority.

77. Postponement of prior mortgagee.
78. Mortgage to secure balance of account.
79. Tacking abolished.

Marshalling and Contribution.

80. Marshalling securities.
81. Contribution to mortgage-debt.

Deposit in Court.

82. Power to deposit in Court money due on mortgage.
    Right to money deposited by mortgagor.
83. Cessation of interest.

Suits for Foreclosure, Sale or Redemption.

84. Parties to suits for foreclosure, sale and redemption.

Foreclosure and Sale.

85. Decree in foreclosure-suit.
86. Procedure in case of payment of amount due and subsequent costs.
    Order absolute for foreclosure.
    Power to enlarge time.
87. Decree for sale.
    Power to decree sale at instance of mortgagee.
    Power to decree sale in foreclosure-suit at instance of mortgagor.
88. Procedure when defendant pays amount due.
    Order absolute for sale.
89. Recovery of balance due on mortgage.

Redemption.

90. Who may sue for redemption.
91. Decree in redemption-suit.
92. In case of redemption, possession.
93. In default, foreclosure or sale.
    Power to enlarge time.
94. Charge of one of several co-mortgagors who redeems.

Sale of Property subject to prior Mortgage.

95. Sale of property subject to prior mortgage.
96. Application of proceeds.

Anomalous Mortgages.

97. Mortgage not described in section 56, clauses (*b*), (*c*), (*d*) and (*e*).
98. Abandonment of security by mortgagee selling mortgaged property under decree.

SECTIONS.

Charges.

99. Charges.
100. Extinguishment of charges.

Notice and Tender.

101. Service or tender on or to agent.
102. Notice, &c., to or by person incompetent to contract.

CHAPTER V.

OF LEASES OF IMMOVEABLE PROPERTY.

103. Lease defined.
     Lessor, lessee, premium and rent defined.
104. Duration of certain leases in absence of written contract or local usage.
     Notice to determine lease.
105. Leases how made.
106. Rights and liabilities of lessor and lessee.
107. Rights of lessor's transferee.
108. Exclusion of day on which term commences.
     Duration of lease for a year.
     Option to determine lease.
109. Determination of lease.
110. Waiver of forfeiture.
111. Waiver of notice to quit.
112. Relief against forfeiture for non-payment of rent.
113. Effect of surrender and forfeiture on under-lessees.
114. Effect of holding over.
115. Exemption of leases for agricultural purposes.

CHAPTER VI.

OF EXCHANGES.

116. "Exchange" defined.
117. Right of party evicted from thing received in exchange.
118. Rights and liabilities of parties.
119. Exchange of money.

CHAPTER VII.

OF GIFTS.

120. "Gift" defined.
     Acceptance when to be made.
121. Transfer how effected.
122. Gift of existing and future property.
123. Gift to several of whom one does not accept.
124. When gift may be suspended or revoked.
125. Donor not bound to warranty.
126. Onerous gifts.
127. Universal donee.
128. Saving of donations *mortis causâ* and Muhammadan law.

CHAPTER VIII.

OF TRANSFERS OF ACTIONABLE CLAIMS.

129. Actionable claim.
130. Transfer of debts.
131. Notice to be in writing signed.
132. Debtor to give effect to transfer.
133. Warranty of solvency of debtor.
134. Discharge of person against whom claim is sold.
135. Incapacity of officers connected with courts of justice.
136. Liability of transferee of debt.
137. Mortgaged debt.
138. Saving of negotiable instruments.

THE SCHEDULE.

A Bill to amend the law relating to the Transfer of Property by act of Parties.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend certain parts of the law relating to the transfer of property by act of parties; It is hereby enacted as follows:—

Preamble.

CHAPTER I.

PRELIMINARY.

Bill III, s. 1.

1. This Act may be called "The Transfer of Property Act, 1879:"

Short title.

It extends to the whole of British India;

Extent.

And it shall come into force on the first day of *March*, 1880.

Commencement.

Bill III, s. 2.

2. On and from that day the enactments specified in the schedule hereto annexed shall be repealed to the extent mentioned in the third column thereof. But nothing herein contained shall be deemed to affect—

Repeal of Acts.

Act IX of 1872, s. 1.

Saving of certain enactments, incidents, rights, liabilities, &c.

(*a*) the provisions of any enactment not hereby expressly repealed:

(*b*) any terms or incidents of any contract or constitution of property which are consistent with the provisions of this Act and are allowed by the law for the time being in force:

3 Beng. A. C. 219.

(*c*) any right or liability arising out of a custom or personal law consistent with this Act, or out of a legal relation constituted before this Act comes into force, or any relief in respect of any such right or liability:

L. R. 2 Com. 541.

(*d*) any transfer by operation of law or by decree or order of a Court of competent jurisdiction.

Bill III, s. 3: Report, s. 2.

3. In this Act, unless there be something repugnant in the subject or context—

Interpretation-clause.

the "ownership" of a thing is the right of one or more persons to possess and use it to the exclusion of others. Such ownership is either absolute or qualified. The thing of which there may be ownership is called "property:"

"ownership:"

"property:"

Act III of 1877, s. 17, cl. (6).

"assurance" means any non-testamentary instrument which purports or operates to create, transfer, or otherwise dispose of, whether in present or in future, any right, title or interest, to or in immoveable property:

"assurance:"

"registered" means registered in British India, under the law for the time being in force regulating the registration of documents:

"registered:"

"attached to the earth" means—

"attached to the earth."

(*a*) rooted in the earth, as in the case of trees and shrubs;

(*b*) imbedded in or permanently resting upon the earth, as in the case of walls or buildings; or

See ss. 13, 44, clause (*a*). 61.

(*c*) attached to what is so imbedded or so rests, for the permanent beneficial enjoyment of that to which it is attached:

and a person is said to have "notice" of a fact when he actually knows that fact, or when but for wilful abstention from an inquiry which he ought to have made, or gross negligence, he would have known it or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, section 229.

"notice."

See Contract Act, s. 229, as to agent: 4 Cal. 212: *v.* 11 Ben. P. C. 54

4. The chapters and sections of this Act which relate to contracts shall be taken as part of the Indian Contract Act, 1872.

Bill III, s.

Enactments relating to contracts to be taken as part of Act IX of 1872.

CHAPTER II.

OF TRANSFERS OF PROPERTY BY ACT OF PARTIES.

(*A*).—*Transfer of Property, whether moveable or immoveable.*

5. In the following sections "transfer" means an act by which one living person conveys to another, or to himself and another, in present or in future, the ownership of property or an interest therein, and "to transfer" is to perform such act.

"Transfer" defined.

6. The ownership of property of any kind may be transferred, except as otherwise provided by this section or by any other law for the time being in force:—

What may be transferred.

(*a*) The chance of an heir-apparent succeeding to an estate, the chance of a relation obtaining a legacy on the death of a kinsman, or any other merely contingent or possible right or interest, cannot be transferred to any one except the present or future owner or co-owner of the property affected thereby,

Carlton v. *Peighton*, 3 Mer. cf. Act X of 1877, s. 266, clause (*k*).

(*b*) A mere right of re-entry for breach of a condition subsequent cannot be transferred to any one except the owner of the property affected thereby.

N. Y. Code, s. 462: *Smith* v. *Packhurst*, 2 Atk. 135.

(*c*) An easement cannot be transferred otherwise than by release to the owner of the servient heritage.

(*d*) An interest in property restricted in its enjoyment to the owner personally cannot be transferred by him.

(*e*) A mere right to sue for compensation for a fraud or for harm illegally caused to body, mind or reputation cannot be transferred,

cf. 11 & 12 Vic., c. 21, 27.

(*f*) A public office cannot be transferred, nor can the salary of a public officer whether before or after it has become payable.

(*g*) Stipends allowed to military and civil pensioners of Government and political pensioners cannot be transferred.

(*h*) No transfer can be made (1) in so far as it is opposed to the nature of the interest affected thereby, or (2) for an illegal purpose, or (3) to a person legally disqualified to be transferee.

Bill III, s. 5: Report, s. 4:

7. Every person competent to contract and entitled to transferable property, or authorized to dispose of transferable property not his own, is competent to transfer such property either wholly or in part, and either absolutely or conditionally, in the circumstances, to the extent and in the manner allowed and prescribed by any law for the time being in force.

Persons competent to transfer.

Bill III, s. 6: Report, s. 10: *v.* last clause, Report, s. 6: 2 W. R. 125 (buildings): 14 W. R. 379.

8. Unless a different intention is expressed or necessarily implied, a transfer of property passes forthwith to the transferee all the interest which the transferor is then capable of passing in such property, and in the legal incidents thereof.

Operation of transfer.

N. W. P., 1870, p. 251: 24 W. R. 330 (trees), "everything grown on it," Morley N. S. 259.

Such incidents include, where the property is land, the easements annexed thereto, the rents and profits thereof accruing after the transfer, and all things attached to the earth;

and, where the property is machinery attached to the earth, the moveable parts thereof;

and, where the property is a house, the easements annexed thereto, the rent thereof accruing after the transfer, and the locks, keys, bars, doors, windows and all other things provided for permanent use therewith;

and, where the property is a debt or other actionable claim, the securities therefor, but not arrears of interest accrued before the transfer;

and, where the property is money or other property yielding income, the interest or income thereof accruing after the ownership passes.

N. Y. Code, s. 453: 7 Exch., 581.

9. A transfer may be made without writing in every case in which a writing is not expressly required by law.

Oral transfer.

Report, s. 47: L. R. 3, Chan. D. 148, 285.

10. Where a transfer is subject to a condition or limitation absolutely restraining the transferee or any person claiming under him from parting with or disposing of his interest in the property transferred, the condition or limitation is void except in the case of a lease where the condition is for the benefit of the lessor or those claiming under him: provided that property may be transferred to or for the benefit of a married woman, so that she shall not have power to part with the same or her beneficial interest therein.

Condition restraining alienation.

Report, s.48.

11. Where on a transfer of property an interest is created in favour of any person, but the terms of the transfer direct that such interest shall be applied or enjoyed in a particular manner, he shall be entitled to receive and dispose of such interest as if there were no such direction.

Restriction repugnant to interest created.

Nothing in this section shall be deemed to affect the right to restrain, for the beneficial enjoyment of one piece of immoveable property, the enjoyment of another piece of such property, or to compel the enjoyment thereof in a particular manner.

12. Where property is transferred subject to a condition or limitation making any interest therein reserved or given to or for the benefit of any person to cease on his becoming insolvent or endeavouring to transfer or dispose of the same, such condition or limitation is void.

Condition making interest determinable on insolvency or attempted alienation.

Nothing in this section applies to a condition in a lease for the benefit of the lessor or those claiming under him.

Act X of 1865, s. 100. Report, s. 49.

13. Where on a transfer of property an interest is created for the benefit of a person not in existence at the date of the transfer, subject to a prior interest created by the same transfer, the interest created for the benefit of such person shall not take effect, unless it extends to the whole of the remaining interest of the transferor in the property.

Transfer for benefit of person not in existence at date of transfer, subject to prior transfer.

Illustration.

A transfers property of which he is the owner to B in trust for A and his intended wife successively for their lives, and after the death of the survivor for the eldest son of the intended marriage for life, and after his death for his second son. The interest so created for the benefit of the eldest son does not take effect, because it does not extend to the whole of A's remaining interest in the property.

Report, s. 50: Succession Act, s. 101.

14. No transfer can operate to create an interest which is to take effect after the life-time of one or more persons living at the date of such transfer, and the minority of some person who shall be in existence at the expiration of that period, and to whom, if he attains full age, the interest created is to belong.

Rule against perpetuity.

Report, s. 51: *Bentinck* v. *Duke of Portland*, 7 Chan. D. 693.

15. If on a transfer of property an interest is created for the benefit of a class of persons with regard to some of whom such interest fails by reason of any of the rules contained in sections thirteen and fourteen, such interest fails as regards the whole class.

Transfer to class some of whom come under sections 13 and 14.

Report, s. 52.

16. Where an interest fails by reason of any of the rules contained in sections thirteen, fourteen and fifteen, any interest created in the same transaction and intended to take effect after or upon failure of such prior interest also fails.

Transfer to take effect on failure of prior transfer.

17. The restrictions in sections fourteen, fifteen and sixteen shall not apply to property transferred for the benefit of the public in the advancement of religion, knowledge, commerce, health, safety or any other object beneficial to mankind.

Transfer in perpetuity for benefit of public.

Act X of 1865, s. 104: Report, s. 53.

18. Where the terms of a transfer of property direct that the income arising therefrom shall be accumulated, such direction shall be void, and the property shall be disposed of as if no accumulation had been directed.

Direction for accumulation.

Donaldson v. *Donaldson*, L. R. 3 Chan. Div. 743.

Exception.—Where the property is immoveable, or where accumulation is directed to be made from the date of the transfer, the direction shall be valid in respect only of the income arising from the property within one year next following such date; and at the end of the year such property and income shall be disposed of respectively as if the period during which the accumulation has been directed to be made had elapsed.

Report, ss. 56, 57, altered.

19. Where on a transfer of property and interest is created in favour of a person without specifying the time when it is to take effect, or in terms specifying that it is to take effect forthwith or on the happening of an event which must happen, such interest is vested, unless a contrary intention appears from the terms of the transfer.

Vested interest.

A vested interest is not defeated by the death of the transferee before he obtains possession.

Explanation.—An intention that an interest shall not be vested is not to be inferred merely from a provision whereby the enjoyment thereof is postponed, or whereby a prior interest in the same property is given or reserved to some other person, or whereby income arising from the property is directed to be accumulated until the time of enjoyment arrives, or from a provision that if a particular event shall happen the interest shall pass to another person.

Report, ss. 56, altered.

20. Where, on a transfer of property, an interest is created for the benefit of a person not then living, he acquires upon his birth, unless a contrary intention appear from the terms of the transfer, a vested interest, although he may not be entitled to the enjoyment thereof immediately on his birth.

Transfer for benefit of person not then living.

Act X of 1865, s. 107. Report, s. 59. [illegible], 72-33.

21. Where, on a transfer of property, an interest is created in favour of a person to take effect only on the happening of a specified uncertain event, or if a specified uncertain event shall not happen, such person thereby acquires a contingent interest in the property. Such interest becomes a vested interest, in the former case, on the happening of the event, in the latter, when the happening of the event becomes impossible.

Contingent interest.

Exception.—Where under a transfer a person becomes entitled to an interest in property upon attaining a particular age, and the transferor also gives to him absolutely the income to arise from such interest before he reaches that age, or directs the income or so much thereof as may be necessary to be applied for his benefit, such interest is not contingent.

Act X of 1865, s. 108. Report, s. 60.

22. Where, on a transfer of property, an interest is created in favour of such members only of a class as shall attain a particular age, such interest does not vest in any member of the class who has not attained that age.

Transfer to members of a class who attain a particular age.

Act X of 1865, s. 111. Report, s. 61.

23. Where, on a transfer of property, an interest therein is to accrue to a specified person if a specified uncertain event shall happen, and no time is mentioned for the occurrence of that event, the interest fails unless such event happens before, or at the same time as, the intermediate or precedent interest ceases to exist.

Transfer contingent on happening of specified uncertain event.

Act X of 1865, s. 112.

24. Where, on a transfer of property, an interest therein is to accrue to such of certain persons as shall be surviving at some period, but the exact period is not specified, the interest shall go to such of them as shall be alive when the intermediate or precedent interest ceases to exist, unless a contrary intention appears from the terms of the transfer.

Transfer to such of certain persons as survive at some period not specified.

Illustration.

A transfers property to B for life, and after his death to C and D, equally to be divided between them, or to the survivor of them. C dies during the life of B. D survives B. At B's death the property passes to D.

Act X of 1865, s. 113. Act X of 1865, s. 114, expanded with reference to Act IX of 1872, s. 23.

25. An interest created on a transfer of property and dependent upon a condition fails if the fulfilment of the condition is impossible, or is forbidden by law, or is of such a nature that if permitted it would defeat the provisions of any law, or is fraudulent, or involves or implies injury to the person or property of another, or the Court regards it as immoral or opposed to public policy.

Conditional transfer.

Illustrations.

(*a*). A lets a farm to B on condition that he shall walk ten miles in an hour. The lease is void.

(*b*). A gives Rs. 500 to B on condition that he shall marry A's daughter, C. At the date of the transfer C was dead. The transfer is void.

(*c*). A transfers Rs. 500 to B on condition that she shall murder C. The transfer is void.

(*d*). A transfers Rs. 500 to his niece C if she will desert her husband. The transfer is void.

Act X of 1865, s. 116.

26. Where the terms of a transfer of property impose a condition to be fulfilled before a person can take an interest in the property, the condition shall be deemed to have been fulfilled if it has been substantially complied with.

Fulfilment of condition precedent.

Illustrations.

(*a*). A transfers Rs. 5,000 to B on condition that he shall marry with the consent of C, D, and E. E dies. B marries with the consent of C and D. B has fulfilled the condition.

(*b*). A transfers Rs. 5,000 to B on condition that he shall marry with the consent of C, D and E. B marries without the consent of C, D and E, but obtains their consent after the marriage. B has not fulfilled the condition.

Act X of 1865, s. 116.

27. Where, on a transfer of property, an interest is created in favour of one person; and by the same transaction an ulterior disposition of the same interest is made in favour of another if the prior interest under the transfer shall fail, the ulterior disposition shall take effect upon the failure of the prior disposition, although the failure may not have occurred in the manner contemplated by the transferor.

Conditional transfer to one person coupled with transfer to another on failure of prior transfer.

Act X of 1865, s. 117.

But where the intention of the parties to the transaction is that the ulterior disposition shall take effect only in the event of the prior disposition failing in a particular manner, the ulterior disposition shall not take effect unless the prior disposition fails in that manner.

Illustrations.

(*a*). A transfers Rs. 500 to B on condition that he shall execute a certain lease within three months after A's death, and if he should neglect to do so, to C. B dies in A's lifetime. The transfer to C takes effect.

(*b*). A transfers property to his wife; but in case she should die in his lifetime, transfers to B that which he had transferred to her. A and his wife perish together, under circumstances which make it impossible to prove that she died before him. The transfer to B does not take effect.

Act X of 1865, s 118.

28. On a transfer of property an interest may be created to accrue to any person with the condition superadded that in case a specified uncertain event shall happen, such interest shall pass to another person; or that in case a specified uncertain event shall not happen, such interest shall pass to another person. In each case the dispositions are subject to the rules contained in sections ten, twelve, twenty-one, twenty-two, twenty-three, twenty-four, twenty-five and twenty-seven.

Ulterior transfer conditional on happening or not happening of specified event.

Act X of 1865, s. 119.

29. An ulterior disposition of the kind contemplated by the last preceding section cannot take effect unless the condition is strictly fulfilled.

Fulfilment of condition subsequent.

Illustration.

A transfers Rs. 500 to B, to be paid to him on his attaining his majority or marrying, with a proviso that, if B dies a minor or marries without C's consent, the Rs. 500 shall go to D. B marries when only 17 years of age, without C's consent. The transfer to D takes effect.

Act X of 1865, s. 120.

30. If the ulterior disposition is not valid, the prior disposition is not affected by it.

Prior disposition not affected by invalidity of ulterior disposition.

Illustration.

A transfers a farm to B for her life, and, if she do not desert her husband, to C. B is entitled to the farm during her life as if no condition had been inserted.

Act X of 1865, s. 121.

31. Subject to the provisions of section twelve, on a transfer of property an interest may be created with the condition superadded that it shall cease to exist in case a specified uncertain event shall happen, or in case a specified uncertain event shall not happen.

Condition that transfer shall cease to have effect in case specified uncertain event happens or does not happen.

Illustrations.

(*a*). A transfers a farm to B for his life, with a proviso that, in case B cuts down a certain wood, the transfer shall cease to have any effect. B cuts down the wood. He loses his life-interest in the farm.

(*b*). A transfers a farm to B, provided that, if B shall not go to England within three years after the date of the transfer, his interest in the farm shall cease. A does not go to England within the term prescribed. His interest in the farm ceases.

Act X of 1865, s. 122.

32. In order that a condition that an interest shall cease to exist may be valid, it is necessary that the event to which it relates be one which could legally constitute the condition of the creation of an interest.

Such condition must not be invalid.

Act X of 1865, s. 124.

33. Where, on a transfer of property, an interest is created subject to a condition that the person taking it shall perform a certain act at or before a specified time, and the transferor has at the time of creating the interest made an ulterior disposition thereof in favour of himself or of another if the act be not performed within such time, the prior disposition ceases to have effect if the act is not performed within such time, or if the person benefited by the prior disposition renders the performance of the act impossible within the time specified. But where the transferor has not made any such ulterior disposition thereof, the transfer is, at the option of the transferor, voidable so far as regards such interest, if it was intended that time should be of the essence of the condition, but if it was not so intended the transfer shall not be so voidable.

Condition that transferee shall perform act at or before specified time.

The intention referred to in this section is, in the case of a transfer without consideration, the intention of the transferor, and, in the case of a transfer for consideration, the intention of both the transferor and of the person from whom the consideration proceeds.

When such intention is apparent, the circumstance that the interest has actually been enjoyed under the prior disposition does not affect the operation of the condition.

34. Where, on a transfer of property, an interest is created subject to a condition that the person taking it shall perform a certain act, but no time is specified for the performance of the act, if the transferor has at the time of the transfer made an ulterior disposition of the interest in favour of another person, the prior disposition ceases to take effect when the person benefited thereby renders impossible or indefinitely postpones the performance of the condition.

Transfer conditional on performance of act, no time being specified for performance.

But if the transferor has not at the time of the transfer made any such ulterior disposition of the interest, then if the interest was created without consideration it is voidable at the option of the transferor; but if it was created for consideration it shall be so voidable only if adequate compensation for the breach of the condition cannot be made in money.

35. Where an act is to be performed by a person either as a condition to be fulfilled before an interest created on a transfer is enjoyed by him, or as a condition on the non-fulfilment of which the interest is to pass from him to another person, and a time is specified for the performance of the act, if such performance within the specified time is prevented by the fraud of a person who would be directly benefited by non-fulfilment of the condition, such further time shall as against him be allowed for performing the act as shall be requisite to make up for the delay caused by such fraud. But if no time is specified for the performance of the act, then if its performance is by the fraud of a person interested in the non-fulfilment of the condition rendered impossible or indefinitely postponed, the condition shall as against him be deemed to have been fulfilled.

Transfer conditional on performance of act, time being specified.

Election.

Report, s. 62, added to: 3 Spence 585.

36. Where a person professes to transfer property which he has no right to transfer, and as part of the same transaction confers any benefit on the owner of the property, such owner must elect either to confirm such transfer or to dissent from it; and in the latter case he shall relinquish the benefit so conferred, and the benefit so relinquished shall revert to the transferor or his representative as if it had not been disposed of,

Election when necessary.

Act X of 1865, s. 168.

subject nevertheless,

where the transfer is gratuitous and the transferor has before the election died or otherwise become incapable of making a fresh transfer,

and in all cases where the transfer is for consideration,

to the charge of making good to the disappointed transferee the amount or value of the property attempted to be transferred to him.

Illustration.

The farm of Sultánpur is the property of C and worth Rs. 800. A by an instrument of gift professes to transfer it to B, giving by the same instrument Rs. 1,000 to C. C elects to retain the farm. He forfeits the gift of Rs. 1,000.

In the same case, A dies before the election. His representative must out of the Rs. 1,000 pay Rs. 800 to B.

Act X of 1865, s. 169.

The rule in the first paragraph of this section applies whether the transferor does or does not believe that which he professes to transfer to be his own.

Act X of 1865, s. 171.

A person taking no benefit directly under a transaction, but deriving a benefit under it indirectly, need not elect.

Act X of 1865, s. 172.

A person who in his one capacity takes a benefit under the transaction may in another dissent therefrom.

Exception to the last preceding four rules.—Where a particular benefit is expressed to be conferred on the owner of the property which the transferor professes to transfer expressed to be in lieu of that property, if such owner claim that he must relinquish the particular benefit, but he is not bound to relinquish any other benefit conferred upon him by the same transaction.

Act X of 1865, s. 173.

Acceptance of the benefit by the person on whom it is conferred constitutes an election by him to confirm the transfer, if he has knowledge of his right to elect and of those circumstances which would influence the judgment of a reasonable man in making an election, or if he waives enquiry into the circumstances.

Act X of 1865, s. 174.

Such knowledge or waiver shall, in the absence of evidence to the contrary, be presumed, if the person on whom the benefit has been conferred has enjoyed it for two years without doing any act to express dissent.

Act X of 1865, s. 175.

Such knowledge or waiver may be inferred from any act of his which renders it impossible to place the persons interested in the property professed to be transferred in the same condition as if such act had not been done.

Illustration.

A transfers to B an estate to which C is entitled, and to C a coal-mine. C takes possession of the mine and exhausts it. He has thereby confirmed the transfer of the estate to B.

Act X of 1865, s. 176.

If he does not within one year after the date of the transfer signify to the transferor or his representatives his intention to confirm or to dissent from the transfer, the transferor or his representatives may, upon the expiration of that period, require him to make his election; and if he does not comply with such requisition within a reasonable time after he has received it, he shall be deemed to have elected to confirm the transfer.

Act X of 1865, s. 167.

In case of disability, the election shall be postponed until the disability ceases, or until the election is made by some competent authority.

Apportionment.

Report, s. 64: Bill III, s. 86.

37. In the absence of a contract to the contrary, all rents, annuities, pensions, dividends and other periodical payments in the nature of income shall, upon the transfer of the interest of the person entitled to receive such payments, be deemed to accrue due from day to day, and to be apportionable accordingly, but to be payable on the days appointed for the payment thereof.

Apportionment of periodical payments on determination of interest of person entitled.

Severance of Obligation relating to Property.

38. When in consequence of a transfer property is divided and held in several shares, and thereupon the benefit of any obligation relating to the property as a whole passes from one to several owners of the property, the corresponding duty shall, in the absence of a contract to the contrary amongst the owners, be performed in favour of each of such owners in proportion to the value of his share in the property, provided that the duty can be severed and that the severance does not substantially increase the burden of the obligation; but if the duty cannot be severed, or if the severance would substantially increase the burden of the obligation, the duty shall be performed for the benefit of such one of the several owners as they shall jointly designate for that purpose:

Satisfaction of right arising in favour of several persons in consequence of a transfer.

Provided that no person on whom the burden of the obligation lies shall be answerable for failure to discharge it in manner provided by this section, unless and until he has had reasonable notice of the severance.

Illustrations.

(*a*). A sells to B, C and D land situate in a village and leased to E at an annual rent of Rs. 30 and delivery of one fat sheep, B having provided half the purchase-money and C and D one-quarter each. E having notice of this must pay Rs. 15 to B, Rs. 7½ to C and Rs. 7½ to D, and must deliver the sheep according to the joint direction of B, C and D.

(*b*). Each house in the village being bound to provide ten days' labour each year on a dyke to prevent inundation, E had agreed as a term of his lease to perform this work for A. B, C and D severally require E to perform the ten days' work due on account of the house of each. E is not bound to do more than ten days' work in all, according to such directions as B, C and D may join in giving.

B. Transfer of Immoveable Property.

Bill III, s. 7.

39. Where any person authorized only under circumstances in their nature variable to dispose of immoveable property transfers such property for consideration, alleging the existence of such circumstances, they shall, as between the transferee on the one part and the transferor and other persons (if any) affected by the transfer on the other part, be deemed to have existed, if the transferee, after using reasonable care to ascertain the existence of such circumstances, has acted in good faith.

Transfer by person authorized only under certain circumstances to transfer.

Illustration.

A, a Hindú widow, whose husband has left collateral heirs, agrees, for purposes neither religious nor charitable, to sell a field, part of the property held by her as such, to B. B satisfies himself by reasonable inquiry that the income of the property is insufficient for A's maintenance, and that the sale of the field is necessary, and, acting in good faith, buys the field. As between B on the one part and A and the collateral heirs on the other part, a necessity for the sale shall be deemed to have existed.

Wilson v. Hare, L. R. 1 Ch. Richards v. Renell, 7 Ch. Div. 224. Maclean v. Mackay, L. R. 5 P. (32). S. A. 135 of 1877.

40. Where a third person has a right to receive maintenance or a provision for advancement or marriage from the profits of immoveable property, and such right does not amount to a charge on such property, or

Transfer of land where third person is entitled to maintenance,

where for the more beneficial enjoyment of his own immoveable property a third person has, independently of any interest in the immoveable property of another, a right to restrain the enjoyment of the latter property or to compel its enjoyment in a particular manner, or

or has a right to restrain its enjoyment,

where a third person is entitled to the benefit of an obligation arising out of contract and annexed to the ownership of immoveable property, but not amounting to an interest therein or easement thereon,

or is entitled to benefit of obligation not amounting to interest or easement.

such right or obligation may be enforced against a transferee with notice thereof or a gratuitous transferee of the property affected thereby, but not against a transferee for consideration and without notice of the right or obligation, nor against such property in his hands.

Illustrations.

(*a*). A. a Hindú, transfers Sultánpur to his sister-in-law B, in lieu of her claim against him for maintenance in virtue of his having succeeded to her deceased husband's property, and agrees with her that if she is dispossessed of Sultánpur, A will transfer to her an equal area out of such of several other specified villages in his possession as she may elect. A sells the specified villages to C, who buys in good faith, without notice of the agreement. B is dispossessed of Sultánpur. She has no claim on the villages transferred to C.

(*b*). A, a Hindú widow, is entitled to maintenance out of the share of her deceased husband in Basaoli, which has passed to his brother B. B sells Basaoli to C, who has notice of A's claim and that there is no other property to satisfy it. A may claim maintenance out of Basaoli in the hands of C.

(*c*). A contracts to sell Sultánpur to B. While the contract is still in force he sells Sultánpur to C. who has notice of the contract. B may enforce the contract against C to the same extent as against A.

Bill III, s. 7. Act IX of 1872, s. 10, excepn. 2.

41. Where a person holding immoveable property as its ostensible owner with the consent, express or implied, of the other persons interested therein, transfers such property for consideration, the transfer shall not be voidable on the ground that the transferor was not authorized to make it: provided that the transferee, after taking reasonable care to ascertain that the transferor had power to make the transfer, has acted in good faith.

Transfer by ostensible owner.

Illustrations.

(*a*). A, one of two co-proprietors of village land, leaves his village, and with his consent the land is registered by the Revenue-officer in the name of B, the other co-proprietor. After ten years B sells a portion of the land to C, who takes reasonable care to ascertain that B had power to make the transfer and acts in good faith. A is not entitled to have the sale set aside.

(*b*). A buys land and causes it to be transferred to his servant B to hold on his behalf, and also causes it to be entered in the revenue register in B's name. C, having ascertained that B is the registered owner of the land and pays the revenue due in respect thereof, buys the land in good faith. A cannot impeach the sale.

Bill III, s. 10A, para. 2.

42. Where a person having an option to require, or authority to revoke, a transfer of any immoveable property, transfers the property for consideration, such transfer operates in favour of the transferee (subject to any condition attached to the exercise of the option or authority) in the former case as an

Transfer by person having option to require or authority to revoke transfer.

exercise of the option, and, in the latter case, as a revocation of the former transfer to the extent of the authority.

Illustrations.

(*a*). A takes a lease of a house from B with an option of buying it at a specified price. A sells the house to C. C may require B to transfer it to him at the specified price.

(*b*). A lets a house to B and reserves power to revoke the lease if in the opinion of a specified surveyor B should make a use of it detrimental to its value. Afterwards A, thinking that such a use has been made, lets the house to C. This operates as a revocation of B's lease subject to the opinion of the surveyor as to B's use of the house having been detrimental to its value.

See Canadian Code, s. 1488.

43. Where a person erroneously represents that he is authorized to transfer certain immoveable property, and assumes to transfer such property for consideration, such transfer shall, at the option of the transferee, operate on any interest which the transferor may acquire in such property, at any time during which the contract of transfer subsists.

Transfer by unauthorized person who subsequently acquires interest in property transferred.

Sugd. V. and P., 13th edn., 207.

Nothing in this section shall impair the right of transferees in good faith for consideration without notice of the existence of the said option.

Illustration.

A, a Hindú who has separated from his father B, sells to C three fields, X, Y and Z. Of these Z does not belong to A, it having been retained by B on the partition; but on B's dying A obtains Z as heir. C, not having rescinded the contract of sale, may require A to deliver Z to him.

Bill III, s. 9.

44. Where one of two or more co-owners of immoveable property legally competent in that behalf transfers his share of such property or any interest therein, the transferee acquires as to such share or interest, and so far as is necessary to give effect to the transfer, the transferor's right to joint possession or other common or part enjoyment of the property, and to enforce a partition of the same, but subject to the conditions and liabilities affecting, at the date of the transfer, the share or interest so transferred.

Transfer by one co-owner.

Bill III, s. 18.

45. Where property is transferred for consideration to two or more persons, and such consideration is paid out of a fund belonging to them in common, they are, in the absence of a contract to the contrary, respectively entitled to interests in such property identical, as nearly as may be, with the interests to which they were respectively entitled to the fund; and where such consideration is paid out of separate funds belonging to them respectively, they are, in the absence of a contract to the contrary, respectively entitled to interests in such property in proportion to the shares of the consideration which they respectively advanced.

Joint transfer for consideration.

In the absence of evidence as to the interests in the fund to which they were respectively entitled, or as to the shares which they respectively advanced, such persons shall be presumed to be equally interested in the property.

Illustration.

A and B are the sons and C the grandson of a Hindú who has died leaving property. C's father D has also died. A partition has been made after which A and B have reunited. C remains severed in interest, his share being one-third. The separate property of D is of the same value. The whole fund belonging to A, B and C is expended in buying an estate X. A and B take one moiety of X as joint estate and C takes the other moiety as separate property.

46. Where a transfer of immoveable property is made for consideration by persons having distinct interest therein, the transferors are, in the absence of a contract to the contrary, entitled to share in the consideration equally, where their interests in the property transferred were of equal value, and, where such interests were of unequal value, proportionately to the value of their respective interests.

Transfer for consideration by persons having distinct interests.

Illustrations.

(*a*). A owning a moiety, and B and C, each a quarter share of mauza Sultánpur, exchange an eighth share of that mauza for a quarter share of mauza Lalpura. There being no agreement to the contrary, A is entitled to an eighth share in Lalpura, and B and C each to a sixteenth share in that mauza.

(*b*). A, being entitled to a life interest in mauza Atrali and B and C to the reversion, sell the mauza for Rs. 1,000. A's life interest is ascertained to be worth Rs. 600, the reversion Rs. 400. A is entitled to receive Rs. 600 out of the purchase money, B and C to receive Rs. 400.

47. Where several co-owners of immoveable property transfer a share therein without specifying that the transfer is to take effect on any particular share or shares of the transferors, the transfer, as among such transferors, takes effect on such shares equally where the shares were equal, and, where they were unequal, proportionately to the extent of such shares.

Transfer by co-owners of share in common property.

Illustration.

A, the owner of an eight annas share, and B and C, each the owner of a four annas share, in mauza Sultánpur, transfer a two-anna share in the mauza to D, without specifying from which of their several shares the transfer is made. To give effect to the transfer one-anna share is taken from the share of A, and half an anna share from each of the shares of B and C.

48. Where a person purports to create by transfer at different times rights in or over the same immoveable property, and such rights cannot all exist or be exercised to their full extent together, each later created right shall, in the absence of a special contract or reservation binding the earlier transferees, be subject to the rights previously created.

Priority of rights created by transfer.

49. Where immoveable property is transferred for consideration, and such property or any part thereof is at the date of the transfer insured against loss or damage by fire, the transferee, in case of such loss or damage, may, in the absence of a contract to the contrary, require any money which the transferor actually receives under the policy, or so much thereof as may be necessary, to be applied in reinstating the property.

Bill III, ss. 17, 36.

Transferee's right under policy.

Bill III, s. 8: Act XI of 1855, s. 1.

50. No person shall be chargeable with any rents or profits of any immoveable property, which he has in good faith paid or delivered to any person of whom he in good faith held such property, notwithstanding it may afterwards appear that the person to whom such payment or delivery was made had no right to receive such rents or profits.

Rent *bonâ fide* paid to holder under defective title.

Illustration.

A lets a field to B at a rent of Rs. 50, and then transfers the field to C. B, having no notice of the transfer, in good faith pays the rent to A. B is not chargeable with the rent so paid.

Act XI of 1855, s. 2: 2 Bomb. 225.

51. When the transferee of immoveable property makes any improvement on the property, believing in good faith that he is absolutely entitled thereto, and he is subsequently evicted therefrom by any person having a better title, the transferee or his representative in interest has a right to require the person causing the eviction either to have the value of the improvement estimated and paid or secured to the transferee, or to sell his interest in the property to the transferee at the then market value thereof irrespective of the value of such improvement.

Improvements made by *bonâ fide* holders under defective titles.

The amount to be paid or secured in respect of such improvement shall be the estimated value thereof at the time of the eviction.

When under the circumstances aforesaid the transferee has planted or sown on the property crops which are growing when he is evicted therefrom, he is entitled to such crops and to free ingress and egress to reap and carry them.

Bill III, s. 10: 8 Beng. 478: 7 Mad. 111: 11 Bom. 24, 64, 139: N.-W. P., 1867, p. 301: 10 W. R. 469: 7 W. R. 225: 15 W. R. 372: 23 W. R. 382: 2 Tayl. & Bell 113: 1 O'Kin. 303, 309: 5 W. R. P. C. 63: 8 Bom. A. C. J. 61: *Berry* v. *Gibbons*, L. R. 8 Ch. 747.

52. During the active prosecution in any Court having authority in British India, or established beyond the limits of British India by the Governor General in Council, of a contentious suit or proceeding in which any right to immoveable property is directly and specifically in question, the property cannot be transferred or otherwise dealt with by any party to the suit or proceeding so as to affect the rights of any other party thereto under any decree or order which may be made therein, except under the authority of the Court and on such terms as it may impose.

Transfer of property pending suit relating thereto.

Bill III, s. 10A: Cf. Act I of 1877, s. 25.

53. Every transfer or forfeiture of immoveable property made or incurred with intent to defraud prior or subsequent transferees thereof for consideration, or co-owners or other persons having an interest in such property, or to defeat or delay the creditors of the transferor, is voidable at the option of any person so defrauded, defeated or delayed.

Fraudulent transfer.

Where the effect of any transfer or forfeiture of immoveable property is to defraud, defeat or delay any such person, and such transfer or forfeiture is made or incurred gratuitously or for a grossly inadequate consideration, the transfer or forfeiture may be presumed to have been made or incurred with such intent as aforesaid.

Nothing contained in this section shall impair the rights of any transferee or person benefiting by the forfeiture in good faith and for consideration, or the rights of Government arising on any forfeiture for non-payment of land-revenue.

CHAPTER III.

OF SALES OF IMMOVEABLE PROPERTY.

54. "Sale" is a transfer of ownership in exchange for a price paid or promised or part-paid and part-promised.

"Sale" defined.

Such transfer, in the case of immoveable property of the value of one hundred rupees and upwards, can be made only by a registered assurance.

Sale how made.

In the case of immoveable property of a value less than one hundred rupees, such transfer may be made either by a registered assurance or by delivery of the property.

Delivery of immoveable property takes place, in the case of a reversion or other intangible thing—when the parties consent to the delivery; and in the case of other immoveable property—when the seller places the buyer, or such person as he directs, in possession of the property.

Bill III, s. 14 Beng. 312: N. P., 1866, p. 12 Suth. P., C. C. the delivery of assurance W. R. p. 229, 2 Suth. 240, W. R. Right to redeem P., 1866, p. 376.

A contract for the sale of immoveable property is a contract that a sale of such property shall take place on terms settled between the parties.

Contract for sale.

It does not, of itself, create any interest in or charge on such property.

Bill III, Report, s.

55. In the absence of a contract to the contrary, the buyer and the seller of immoveable property respectively are subject to the liabilities, and have the rights, mentioned in the rules next following, or such of them as are applicable to the property sold:

Rights and liabilities of buyer and seller.

(*a*). The seller is bound—

(1) to disclose to the buyer any defect in the property of which the seller is, and the buyer is not, aware, and which the buyer could not with ordinary care discover;

Bill III, s. (*a*).

(2) to produce to the buyer on his request for examination all documents of title relating to the property which are in the seller's possession or power;

Bill III, s. (*a*).

Bill III, s. 12 (*a*).

(3) to answer to the best of his information all relevant questions put to him by the buyer in respect to the property or the title thereto;

Bill III, s. 12 (*b*).

(4) on payment or tender of the amount due in respect of the price, to execute a proper assurance of the property when the buyer tenders it to him for execution at a proper time and place, and, where the property is, or forms part of, a revenue-paying estate, to present an application to the proper officer for the requisite alteration of the revenue-register;

New.

(5) between the date of the contract of sale and the delivery of the property, to take as much care of the property and all documents of title relating thereto which are in his possession, as an owner of ordinary prudence would take of such property and documents;

(6) to give, on being so required, the buyer, or such person as he directs, such possession of the property as its nature admits;

Bill III, s. 12 (*f*).

(7) to pay all public charges and rent accrued due in respect of the property up to the date of the sale, the interest on all incumbrances on such property due on such date; and, where the property is sold free from incumbrances, to discharge all incumbrances on the property then existing; and

Bill III, s. 12 (*g*).

(8) where the ownership of the property has passed to the buyer, to deliver to the buyer all documents of title relating thereto which are in the seller's possession or power:

provided that (1), where the seller retains any part of the property comprised in such documents, he is entitled to retain them all, and (2), where the whole of such property is sold to different buyers, the buyer of the lot of greatest value is entitled to such documents. But in case (1) the seller, and in case (2) the buyer of the lot of greatest value, is bound, upon every reasonable request by the buyer, or by any of the other buyers, as the case may be, or by any person claiming under him, and at the cost of the person making the request, to produce the said documents and furnish such true copies thereof as he may require; and, in the meantime, the seller or the buyer, as the case may be, of the lot of greatest value must keep the said documents safe, uncancelled und undefaced, unless prevented from so doing by fire or other inevitable accident;

Bill III, s. 12 (*h*).

(9) and the seller shall be deemed to contract that the interest which he assumes to transfer to the buyer subsists and that he has power to transfer the same:

provided that where the sale is made by a person in a fiduciary character, he shall be deemed to contract to the like effect, so far only as his knowledge extends.

(*b*). The seller is entitled—

Bill III, s. 12 (*i*).

(1) to the rents and profits of the property till the ownership thereof passes to the buyer;

Bill III, s. 12 (*j*).

(2) where the ownership of the property has passed to the buyer before payment of the whole of the purchase-money, to a charge upon the property in the hands of the buyer for the amount of the purchase-money, or any part thereof remaining unpaid, and for interest on such amount or part.

(*c*). The buyer is bound—

Bill III, s. 13 (*b*).

(1) to disclose to the seller any fact as to the nature or extent of the seller's interest in the property of which the buyer is, and the seller is not, aware, and which increases the value of such interest;

Bill III, s. 12 (*g*).

(2) to pay or tender, at the time and place of completing the transfer, the purchase-money to the seller or such person as he directs: provided that where the property is sold free from incumbrances, the buyer may retain out of the purchase-money the amount of the incumbrances on the property existing at the date of the transfer, and shall pay the amount so retained to the persons entitled thereto;

See Canadian Code, s. 1533.

(3) to retransfer the property where the ownership thereof has passed to the buyer before payment of the purchase-money and he fails to pay or tender such money in accordance with the last preceding clause;

Bill III, s. 12. (*c*).

(4) where the ownership of the property has passed to the buyer, to bear any loss arising from the destruction, injury or decrease in value of the property not caused by the seller;

Bill III, s. 15.

(5) where the ownership of the property has passed to the buyer, as between himself and the seller, to pay all public charges and rent which may become payable in respect of the property, the principal moneys due on the incumbrances subject to which the property is sold, and the interest thereon afterwards accruing due.

(*d*). The buyer is entitled—

Bill III, s. 13 (*c*).

(1) where the ownership of the property has passed to him, to the benefit of any improvement in, or increase in value of, the property, and to the rents and profits thereof;

Bill III, s. 12 (*e*).

(2) unless he has improperly declined to accept delivery of the property, to a charge on the property, as against the seller, to the extent of the seller's interest therein, for the amount of any purchase-money properly paid by the buyer in anticipation of the delivery and for interest on such amount; and when he properly declines to accept the delivery, also for the earnest (if any) and for the costs (if any) awarded to him of a suit to compel specific performance of the contract or to obtain a decree for its rescission.

Bill III, s. 18.

An omission to make such disclosures as are mentioned in this section, paragraph (*a*), clause (1), and paragraph (*c*), clause (1), is fraudulent.

Bill III, s. 19.

56. Where two properties are subject to a common charge, and one of the properties is sold to a buyer without notice of the charge the buyer is, as against the seller and the incumbrancer, in the absence of a contract to the contrary, entitled to have the charge satisfied out of the other property, so far as such property will extend.

Sale of one of two properties subject to a common charge.

CHAPTER IV.

OF MORTGAGES OF IMMOVEABLE PROPERTY AND CHARGES.

Bill III, s. 21: Act XXVIII of 1866, s. 19: 23 & 24 Vic., c. 145, s. 24:

57. (*a*). A mortgage is the transfer of an interest in specific immoveable property for the purpose of securing the payment of money advanced or to be advanced by way of loan, an existing or future debt, or the performance of an engagement which may give rise to a pecuniary liability.

"Mortgage," "mortgagor" and "mortgagee" defined.

English practice followed, with necessary modifications, 5 Bom. A. C. J. 109. Mortgagor need not have present ownership, N.-W. P., 1872, p. 11, *sed qu.* 12 Moo. I. A. 275, 306. Coleb. Dig. B. i, c. III, t. 96.

The transferor is called a mortgagor, the transferee a mortgagee; the principal money and interest of which payment is secured are called the mortgage-money, and the assurance (if any) by which the transfer is effected is called a mortgage-deed.

Simple mortgage.

(*b*). Where the mortgagor binds himself expressly and personally to repay the mortgage-money on a certain date, and, without delivering possession of the property, makes it a collateral security for the repayment, the transaction is called a simple mortgage and the mortgagee a simple mortgagee.

Mortgage by conditional sale.

(*c*). Where the mortgagor, without delivering possession of the property, ostensibly sells it—

on condition that on default of payment of the mortgage-money on date agreed on the sale shall become absolute, or

on condition that on such payment being made the sale shall become void, or

on condition that on such payment being made the buyer shall transfer the property to the seller,

the transaction is called a mortgage by conditional sale and the mortgagee a mortgagee by conditional sale.

Usufructuary mortgage.

(*d*). Where the mortgagor delivers or agrees to deliver actual possession of the mortgaged property to the mortgagee on the terms that he shall retain such possession until repayment of the mortgage-money, applying the rents and profits accruing from such property in reduction of the amount for the time being due under the mortgage, or accepting such rents and profits in lieu of interest, the transaction is called an usufructuary mortgage and the mortgagee an usufructuary mortgagee.

Macph. 8, 12, 59: R. B. Ghose 218, 219: 2 Moo. I. A. 487.

English mortgage.

(*e*). Where the mortgagor binds himself to repay the mortgage-money on a certain date, and transfers the mortgaged property absolutely to the mortgagee, but subject to a condition that he will retransfer it to the mortgagor upon payment of the mortgage-money as agreed, the transaction is called an English mortgage.

Bill III, s. 22. See Macph. 53:

58. Where the principal money secured is one hundred rupees or upwards, a mortgage can be effected only by registered assurance signed by the mortgagor and attested by at least two witnesses.

Mortgage when to be by assurance.

R. B. Ghose 64: This applies to defeasances.

Where the principal money secured is less than one hundred rupees, a mortgage may be effected either by registered assurance signed and attested as aforesaid or by delivery of the property.

Rights and Liabilities of Mortgagor.

Bill III, s. 23. 5 Beng. 450: 6 Beng. 562: 2 Mad. 420: 7 Mad. 395: In Cen. Provs. 13 Beng. 205. N.-W. P., 1868, p. 204: Bomb. 237: no redemption before expiration of period named. Redemption after fixed time has expired, 9 Bomb. 69. See 7 Ben. 136 (P. C.)

59. At any time after the principal money has become payable, the mortgagor, or, where there are more mortgagors than one, any of the mortgagors, has a right, on payment or tender, at a proper time and place, of all sums (if any) remaining due on the mortgage, to require the mortgagee (*a*) to re-deliver the mortgage-deed, if any, (*b*) where the mortgagee is in possession of the mortgaged property, to deliver possession thereof to the mortgagor, and (*c*) at the cost of the mortgagor either to re-transfer the mortgaged property to him, or to execute, and (where the mortgage has been effected by registered assurance) to have registered, an acknowledgment in writing that any right in derogation of his ownership or other interest transferred to the mortgagee has been extinguished.

Right of mortgagor to redeem.

6 Bom. A. C. J. 265: N.-W. P., 1869, p. 128.

provided that the right conferred by this section has not been extinguished by act of the parties or by order of a court.

The right conferred by this section is called a right to redeem, and a suit to enforce it is called a suit for redemption.

N. W. P., 1867, p. 88. 20 W. R., 387: 22 W. R. 262: 24 W. R. 24: N.-W. P., 1870, p. 4 N.-W. P., 1872, p. 92: N.-W. P., 1873, p. 148: R. B. Ghose 198: 15 Bengal 308.

Nothing in this section shall entitle a person interested in a share only of the mortgaged property to redeem his own share only, on payment of a proportionate part of the amount remaining due on the mortgage, except where a mortgagee, or, if there are more mortgagees than one, all such mortgagees, has or have acquired, in whole or in part, the share of a mortgagee.

Redemption of portion of mortgaged property.

Bill III, s. 29: *contra*, 6 Bom. A. C. J 90. But see R. B. G. 330, 331.

60. If the owner of two or more properties makes separate mortgages on them by separate assurances, each mortgage may, in the absence of a contract to the contrary, be dealt with irrespectively of the other though the mortgages are made in favour of the same mortgagee.

Right to redeem one of two properties separately mortgaged.

Illustration.

A, the owner of farms Z and Y, mortgages Z to B for Rs. 1,000. A afterwards mortgages Y to B for Rs. 1,000 making no stipulation as to any additional charge on Z. A may institute a suit for the redemption of the mortgage on Z alone.

Bill III, s. 23, clause (*e*).

61. In the case of a usufructuary mortgage, the mortgagor has a right to recover possession of the property—

Right of usufructuary mortgagor to recover possession.

(*a*) where the mortgagee is authorized to pay himself from the rents and profits of the property the principal money and interest thereof,—when such money and interest are paid;

(*b*) where the mortgagee is authorized to pay himself from such rents and profits the interest of the principal money,—when the term (if any) prescribed for the payment of the mortgage money has expired and the mortgagor pays or tenders to the mortgagee the principal money or deposits it in the court as hereinafter provided.

Bill III, s. 25: 10 Bom. 369: 11 Bom. 32.

62. Where mortgaged property in possession of the mortgagee has, during the continuance of the mortgage, received any accession, the mortgagor, upon redemption, shall, in the absence of a contract to the contrary, be entitled as against the mortgagee to such accession.

Accession to mortgaged property.

Where such accession has been acquired at the cost of the mortgagee, and is capable of separate possession or enjoyment without determent to the principal property, the mortgagor desiring to take the accession must pay to the mortgagee the cost of acquiring it. If such separate possession or enjoyment is not possible, the accession must be delivered with the property, the mortgagor being liable in the case of an acquisition necessary to preserve the property from destruction, forfeiture, or sale, or made with his assent, to pay the proper cost thereof, as an addition to the principal money, at the same rate of interest.

Accession acquired in virtue of the transferred ownership.

In the case last mentioned the profits, if any, arising from the accession shall be credited to the mortgagor.

Where the mortgage is usufructuary and the accession has been acquired at the cost of the mortgagee, the profits, if any arising, from the accession shall, in the absence of a contract to the contrary, be set-off against interest, if any, payable on the money so expended.

Illustration.

10 Bom. 369, 371, and see N.-W.P., 1866, p. 281.

A mortgages to B a field, the trees on which are the property of Government. B enters into possession of the field, and as occupant thereof buys the trees. A redeems the field. He is entitled to the trees on payment of their cost.

Bill III, s. 26.

63. Where the mortgaged property is a lease for a term of years, and the mortgagee obtains a renewal of the lease, the mortgagor, upon redemption, shall, in the absence of a contract to the contrary, have the benefit of the new lease.

Renewal of mortgaged lease.

Bill III, s. 24: N.W.P., 1867, p. 199.

64. In the absence of a contract to the contrary, the mortgagor shall be deemed to contract with the mortgagee,

Implied contracts by mortgagor.

(*a*) that the interest which the mortgagor assumes to transfer to the mortgagee subsists and that the mortgagor has power to transfer the same;

S.D.A. 1857, p. 1195; 1853, p. 575.

(*b*) that the mortgagor will defend, or, if the mortgagee be in possession, enable him to defend, the morgagor's title to the mortgaged property;

(*c*) that the mortgagor will pay all public charges accruing due in respect of the property;

Effect of for-

(*d*) and, where the mortgaged property is a lease for a term of years, that the rent payable under the lease, the conditions contained therein, and the contracts binding on the lessee have been paid, performed and observed down to the commencement of the mortgage; and that the mortgagor will, so long as the security exists, pay the rent reserved by the lease, or, if the lease be renewed, the renewed lease, perform the conditions contained therein and observe the contracts binding on the lessee, and indemnify the mortgagee against all claims sustained by reason of the non-payment of the said rent or the non-performance or non-observance of the said conditions and contracts;

feiture of lease, N.-W.P., 1869, p. 128.

(*e*) and, where the mortgage is a second or subsequent incumbrance on the property, that the mortgagor will pay the interest from time to time accruing due on each prior incumbrance as and when it becomes due, and will at the proper time discharge the principal money due on such prior incumbrance.

Nothing in clause (*c*), or in clause (*d*), so far as it relates to the payment of future rent, applies in the case of an usufructuary mortgage.

Bill III, s. 27.

65. A mortgagor in possession of the mortgaged property is not liable to the mortgagee for allowing the property to deteriorate; but he must not commit any act which is destructive or permanently injurious thereto, if the security is insufficient or will be rendered insufficient by such act.

Waste by mortgagor in possession.

Macph. 109: R. B. Ghose 147.

Explanation.—A security is insufficient within the meaning of this section unless the value of the mortgaged property exceeds by one-third, or, if consisting of buildings, exceeds by one-half, the amount for the time being due on the mortgage.

Lewin on Trusts, p. 263.

Rights and Liabilities of Mortgagee.

Bill III, s. 30. 2 Mad. 289: N.-W.P. 1870, p. 311: No foreclosure before expiration of period named. 2 Bomb. 242: Mortgagee's right to sale, 7 Bomb. A. C. J. 146: 9 Bomb. 12.

66. In the absence of a contract to the contrary, the mortgagee has, at any time after the mortgage-money has become payable to him, and before a decree has been made for the redemption of the mortgaged property, or the mortgage-money has been paid or deposited as hereinafter provided, a right to obtain from the Court an order that the mortgagor shall be absolutely debarred of his right to redeem the property, or an order that the property be sold.

Right to foreclosure or sale.

A suit to obtain an order that a mortgagor shall be absolutely debarred of his right to redeem the mortgaged property is called a suit for foreclosure.

Nothing in this section shall be deemed—

Simple mortgagee, N.-W. P. 1869, p. 184: Usufructuary, N.-W. P. 1875, p. 55. Fisher 518, 575: Qy. as to conditional mortgagees

(*a*) to authorize a simple mortgagee as such to institute a suit for foreclosure, or an usufructuary mortgagee as such to institute a suit for foreclosure or sale, or a mortgagee by conditional sale as such to institute a suit for sale; or

(*b*) to authorize a mortgagor who holds the mortgagee's rights as his trust or legal representative and who may sue for a sale of the property to institute a suit for foreclosure; or

(*c*) to authorize the mortgagee of a railway, canal or other work in the maintenance of which the public are interested, to institute a suit for foreclosure or sale; or

Cases *contra*, Macph. 195, 196.

(*d*) to authorize a person interested in part only of the mortgage-money to institute a suit relating only to a corresponding part of the mortgaged property: unless the mortgagees have, with the consent of the mortgagor, severed their interests under the mortgage.

Bill III, s. 34.

67. The mortgagee has a right to sue the mortgagor for the mortgage-money in the following cases only:—

Right to sue for mortgage-money.

6 W. R. 283.

(*a*) where the mortgagor binds himself to repay the same:

Macph. 233. Act XXXIII of 1871, s. 46: 25 W. R. 7 (partial deprivation).

(*b*) where the mortgagee is deprived of the whole or part of his security by or in consequence of the wrongful act or default of the mortgagor:

4 Moo. I. A. 464: Marsh. 209: 7 S. D. A. 47: N.-W. P. 1860, p. 28: So in the case of a Káuam mortgage, 2 Mad. 315: 6 W. R. 283 (power to usufructuary mortgagee).

(*c*) where the mortgagee being entitled to possession of the property, the mortgagor fails to deliver the same to him, or to secure the possession thereof to him without disturbance by the mortgagor or any other person.

Where, by any cause other than the wrongful act or default of the mortgagor or mortgagee, the mortgaged property has been wholly or partially destroyed, or the security is rendered insufficient as defined in section sixty-five, the mortgagee may require the mortgagor to give him within a reasonable time another sufficient security for his debt, and, if the mortgagor fails so to do, may sue him for the mortgage-money.

Bill III, s. 35. 8 Bomb. A. C. J. 142: Muhammadan law, Macph. 2.

68. A power conferred by the mortgage-deed on the mortgagee, or on any person on his behalf, to sell or concur in selling the mortgaged property, or any part thereof, is invalid, except where—

Power of sale when invalid.

(*a*) the principal money originally secured is five hundred rupees or upwards; or

(*b*) the mortgagee is the Secretary of State for India in Council; or

(*c*) the mortgaged property or any part thereof is situate within the towns of Calcutta, Madras, Bombay, Karáchi or Rangoon.

Act No. XXVIII of 1866, section 6, is repealed so far as it is inconsistent with this section.

Bill III, s. 37: 11 Bomb. 32.

69. If, after the date of the mortgage, any accession is made to the mortgaged property, the mortgagee, in the absence of a contract to the contrary, shall, for the purposes of the security, be entitled to such accession.

Accession to mortgaged property.

Illustrations.

(*a*). A mortgages to B a certain field bordering on a river. The field is increased by alluvion. For the purposes of his security, B is entitled to the increase.

(*b*). A mortgages a certain plot of building-land to B and afterwards erects a house on the plot. For the purposes of his security, B is entitled to the house as well as the plot.

Bill III, s. 38

70. When the mortgaged property is a lease for a term of years, and the mortgagor obtains a renewal of the lease, the mortgagee, in the absence of a contract to the contrary, shall, for the purposes of the security, be entitled to the new lease.

Renewal of mortgaged lease.

Bill III, s. 39.

71. When, during the continuance of the mortgage, the mortgagee takes possession of the mortgaged property, he may spend such money as is necessary—

Rights of mortgagee in possession.

Macph. 109, 113, 252: 1 Bomb. 199, 203: 5 Bomb A. C. J. 109, 116.

(*a*) for the due management of the property and the collection of the rents and profits thereof;

N.-W. P., 1867, p. 187.

(*b*) for its preservation from destruction, forfeiture or sale;

1 W. R. 133.

(*c*) for supporting the mortgagor's title to the property;

(*d*) for making his own title thereto good against the mortgagor; and

11 Moo. I. A. 241.

(*e*) when the mortgaged property is renewable leasehold, for the renewal of the lease;

and may, in the absence of a contract to the contrary, add such money to the principal-money, at the rate of interest payable on the principal and where no such rate is fixed at the rate of nine per cent. per annum.

23 & 24 Vic., c. 145, s. 11. 2 Dav. 606.

Where the property is by its nature insurable at ordinary rates, the mortgagee may also, in the absence of a contract to the contrary, insure and keep insured against loss or damage by fire the whole or any part of such property, and add the premiums paid for any such insurance to the principal-money at the same rate of interest.

Bill III, s. 42 Macph. 113, 234: I. W. R. 270. 16 W. R.

72. Where mortgaged property is sold through failure to pay arrears of revenue or rent due in respect thereof, the mortgagee has a charge on the surplus, if any, of the proceeds, after payment thereout of the said arrears, for the amount remaining due on the mortgage, unless the sale has been occasioned by some default on his part.

Charge on proceeds of revenue-sale.

Bill III, s. 43 Report, ss. 31, 33.

73. Any second or other subsequent mortgagee may at any time after the amount due on the next prior mortgage has become payable, tender such amount to the next prior mortgagee, and such mortgagee is bound to accept such tender and to give a receipt for such amount; and (subject to the provisions of the law for the time being in force regulating the registration of documents) the subsequent mortgagee shall, on obtaining such receipt, acquire, in respect of the property, all the rights and powers of the mortgagee, as such, to whom he has made such tender.

Right of subsequent mortgagee to pay off prior mortgagees.

Bill III, s. 56.

74. Every second or other subsequent mortgagee has, so far as regards redemption, foreclosure and sale of the mortgaged pro-

Rights of mesne mortgagee against prior and subsequent mortgagees.

property, the same rights against the prior mortgagee or mortgagees as his mortgagor has against such prior mortgagee or mortgagees, and the same rights against the subsequent mortgagees (if any) as he has against his mortgagor.

Bill III, s. 39.

75. When, during the continuance of the mortgage, the mortgagee takes possession of the mortgaged property,—

Liabilities of mortgagee in possession.

2 Bom. 222: Act IX of 1872, s. 151: Fisher, s. 1530. 6 Chan. Div. 427: N.-W. P., 1875, p. 100.

(*a*) he must manage the property as a person of ordinary prudence would manage it if it were his own;

2 Bomb. 231.

(*b*) he must use his best endeavours to collect the rents and profits thereof;

Macph. 113, 119.

(*c*) he must, in the absence of a contract to the contrary, out of the income of the property pay the Government revenue, all other charges of a public nature accruing due in respect thereof during such possession and any arrears of rent in default of payment of which the property may be summarily sold;

9 W. R. 488: 4 Y. & C. Appendix, 507: Fisher, s. 1530.

(*d*) he must, in the absence of a contract to the contrary, make such necessary repairs of the property as he can pay for out of the rents and profits thereof after deducting from such rents and profits the payments mentioned in clause (*c*) and the interest on the principal-money;

Bill III, s. 41:

(*e*) he must not commit any act which is destructive or permanently injurious to the property;

Macph. 118, 119, citing 7 N.-W. P. 436: 9 N.-W. P. 1: Act I of 1877, s. 54.

(*f*) where he has insured the whole or any part of the property against loss or damage by fire, he must, in case of such loss or damage, apply any money which he actually receives under the policy, or so much thereof as may be necessary, in reinstating the property;

2 Beng. P. C. 55; 5 W. R. 53, 274, &c.: Macph. 119.

(*g*) he must keep clear, full and accurate accounts of all sums received and spent by him as mortgagee and, at any time during the continuance of the mortgage, give the mortgagor, at his request and cost, true copies of such accounts and of the vouchers by which they are supported;

5 Bomb. A. C. J. 196: 12 Bomb. 88: 10 Beng. 386: N.-W. P. 1866, p. 132; *ibid.* 1868, p. 153: When he cultivates, 7 W. R. 244; R. B. Ghose 262.

(*h*) his receipts from the mortgaged property, or, where such property is personally occupied by him, a fair occupation-rent in respect thereof, shall, after deducting the expenses mentioned in clauses (*c*), (*d*), and (*e*), and interest thereon, be debited against him in reduction of the amount (if any) from time to time due to him on account of interest on the mortgage-money and, so far as such receipts exceed any interest due, in reduction or discharge of the mortgage-money. The surplus, if any, shall be paid to the mortgagor;

2 Moo. I. A. Ca. 1.

Macph. 159, 160.

(*i*) when the mortgagor tenders, or deposits in manner hereinafter provided, the amount for the time being due on the mortgage, the mortgagee must, notwithstanding the provisions in the other clauses of this section, account for his gross receipts from the mortgaged property from the date of the tender or from the earliest time when he could take such amount out of court, as the case may be.

Bill III, s. 33, last para.

If the mortgagee fail to perform any of the duties imposed upon him by this section, he may, when accounts are taken in pursuance of a decree made under this chapter, be debited with the loss, if any, occasioned by such failure.

Loss occasioned by his default.

Bill III, s. 40: Sev. 338. See 10 Moo. I. A. 340.

76. Nothing in section seventy-five, clauses (*b*), (*d*), (*g*) and (*h*), applies to cases where there is a contract between the mortgagee and the mortgagor that the receipts from the mortgaged property shall, so long as the mortgagee is in possession of the property, be taken in lieu of interest on the principal-money, or of such interest and defined portions of the principal.

Receipts in lieu of interest.

Priority.

Bill III, s. 44: Evidence Act, s. 115: N.-W. P. 1868 p. 402: 4 Mad. 373: 2 Moo. I. A. 487: 11 W. R. 286: Hindú mortgagee in possession, 8 Bom. A. C. J. 50, 55, in Guzerat, 11 Bom.

77. Where, through the fraud, misrepresentation or gross neglect of a prior mortgagee, another person has been induced to advance money on the security of the mortgaged property, the prior mortgagee shall be postponed to the subsequent mortgagee.

Postponement of prior mortgagee.

Bill III, s. 25: Report, s. 29.

78. If a mortgage made to secure future advances, the performance of an engagement or the balance of a running account expresses the maximum to be secured thereby, a subsequent mortgage on the same property shall, if made with notice of the prior mortgage, or if the instrument effecting the prior mortgage is registered, be postponed to the prior mortgage in respect of all advances or debits not exceeding the maximum, though made or allowed with notice of the subsequent mortgage.

Mortgage to secure uncertain amount when maximum is expressed.

Illustration.

A mortgages Sultánpur to his bankers, B & Co., to secure the balance of his account with them to the extent of Rs. 10,000. A then mortgages Sultánpur to C, to secure Rs. 10,000; and C gives notice thereof to B & Co. At the date of the second mortgage, the balance due to B & Co. does not exceed Rs. 5,000. B & Co. subsequently advance to A sums making the balance of the account against him exceed the sum of Rs. 10,000. B & Co. are entitled, to the extent of Rs. 10,000, to priority over C.

Bill III, s. 46: Report, s. 34: 2 Beng. App. 45: 5 Beng. 463: 11 W. R. 310.

79. No mortgagee paying off a prior mortgage, whether with or without notice of an intermediate mortgage, shall thereby acquire any priority in respect of his original security. And, except in the case provided for by section seventy-eight, no mortgagee making a subsequent advance to the mortgagor, whether with or without notice of an intermediate mortgage, shall thereby acquire any priority in respect of his security for such subsequent advance.

Tacking abolished.

Marshalling and Contribution.

Fisher 704: Bill III, s. 47: W. R. 1864, p. 374: 1 W. R. 353: 7 W. R. 483: 12 W. R. 114: Macph. 205.

80. If the owner of two properties mortgages them both to one person and then mortgages one of the properties to another person who has not notice of the former mortgage, the second mortgagee is entitled to have the debt of the first mortgagee satisfied out of the property not mortgaged to the second mortgagee, so far as such property will extend; but not so as to prejudice the rights of the first mortgagee or of any other person having an incumbrance on either property.

Marshalling securities.

Macph. 136.

Bill III, s. 48:

81. Where several properties, whether of one or several owners, are mortgaged to secure one debt, each property is liable to contribute rateably to the debt secured by the mortgage, after deducting from the value of each property the amount of any other incumbrance to which it is subject at the date of the mortgage.

Fisher 700.

Contribution to mortgage-debt.

Where of two properties belonging to the same owner, one is mortgaged to secure one debt, and then both are mortgaged to secure another debt, and the former debt is paid out of the former property, each property is liable to contribute rateably to the latter debt, after deducting the amount of the former debt from the value of the property out of which it has been paid.

Fisher 701.

Nothing in this section applies to a property liable under section eighty to the claim of the second mortgagee.

Deposit in Court.

Bill III, s. 28: Beng. Reg. I of 1798, s. 2: Macph. 171.

82. At any time after the principal money has become payable and before a suit for redemption of the mortgaged property is barred, the mortgagor, or any other person entitled to institute such suit, may deposit, in any court in which he might have instituted such suit, to the account of the mortgagee the amount remaining due on the mortgage.

Power to deposit in court money due on mortgage.

Bill III, s. 23: Beng. Reg. I of 1798, s. 2: Macph. 171.

The Court shall thereupon cause written notice of the deposit to be served on the mortgagee, and the mortgagee may, on presenting a petition (verified in manner prescribed by law for the verification of plaints) stating the amount then due on the mortgage, and his willingness to accept the money so deposited in full discharge of such amount, and on depositing in the same court the mortgage-deed if then in his possession or power, apply for and receive the money, and the mortgage-deed so deposited shall be delivered to the mortgagor or such other person as aforesaid.

Right to money deposited by mortgagor.

Bill III, s. 32: 9 N.-W. P. 1. Macph. 159, 160.

83. When the mortgagor or such other person as aforesaid has tendered or deposited in court under section eighty-two the amount remaining due on the mortgage, interest on the principal money shall cease from the date of the tender or as soon as the mortgagor or such other person as aforesaid has done all that has to be done by him to enable the mortgagee to take such amount out of court, as the case may be.

Cessation of interest.

Suits for Foreclosure, Sale or Redemption.

Bill III, s. 49.

84. Subject to the provisions of the Code of Civil Procedure, section 437, all persons having an interest in the property comprised in a mortgage must be joined as parties to any suit under this chapter, relating to such mortgage: provided that the plaintiff has notice of such interest.*

Parties to suits for foreclosure, sale and redemption.

Foreclosure and Sale.

Bill III, s. 50.

85. In a suit for foreclosure, if the plaintiff succeed, the Court shall make a decree, ordering that an account be taken of what will be due to the plaintiff for principal and interest on the mortgage and for his costs of the suit, if any, awarded to him, on the day next hereinafter referred to, or declaring the amount so due at the date of such decree,

Decree in foreclosure-suit.

and ordering that, upon the defendant paying to the plaintiff or into court the amount so due, on a day within six months from the date of declaring in court the amount so due, to be fixed by the court, the plaintiff shall deliver up to the defendant, or to such person as he appoints, all documents in his possession or power relating to the mortgaged property, and shall transfer the property to the defendant free from all incumbrances created by the plaintiff or any person claiming under him, or, where the plaintiff claims by derived title, by those under whom he claims; and shall, if necessary, put the defendant into possession of the property; but

that, if the payment is not made on or before the day to be fixed by the Court, the defendant shall be absolutely debarred of all right to redeem the property.

Bill III, s. 51.

86. If payment is made of such amount and of such subsequent costs as are mentioned in section ninety-three, the defendant shall (if necessary) be put into possession of the mortgaged property.

Procedure in case of payment of amount due.

* 14 Moo. I. A. 101: 1 W. R. 176: 21 W. R. 428: explained by Macph. 146: Seton i, 442, see Act X of 1877, sec. 32: 5 Bomb. O. C. J. 76 (legal representative of deceased mortgagor): 8 Beng. 104 (purchaser from mortgagor): Marshall 292, claimants of right of redemption, N.-W. P. 1868, p. 144.

If such payment is not so made, the plaintiff may apply to the Court for an order that the defendant and all persons claiming through or under him be debarred absolutely of all right to redeem the mortgaged property, and the Court shall then pass such order, and may, if necessary, deliver possession of the property to the plaintiff.

Order absolute for foreclosure.

W. R. 91. Provided that the Court may, upon good cause shewn, and upon such terms, if any, as it thinks fit, from time to time postpone the day appointed for such payment.

Power to enlarge time.

On the passing of an order under the second paragraph of this section the debt secured by the mortgage shall be deemed to be discharged.

In the Code of Civil Procedure, schedule IV, No. 129, for the words "Final Decree," the words "Decree absolute" shall be substituted.

Bill III, sec. 52. **87.** In a suit for sale, if the plaintiff succeed, the Court shall pass a decree to the effect mentioned in the first and second paragraphs of section eighty-five, and also ordering that, in default of the defendant paying as therein mentioned, the mortgaged property or a sufficient part thereof be sold, and that the proceeds of the sale (after defraying thereout the expenses of the sale) be paid into Court and applied in payment of what is so found due to the plaintiff and that the balance, if any, be paid to the defendant or other persons entitled to receive the same.

Decree for sale.

Power to decree sale at instance of mortgagee.

In a suit for foreclosure, if the plaintiff succeed the Court may at his instance pass a like decree in lieu of a decree for foreclosure.

15 & 16 Vic., c. 86, s. 48. When the mortgagee sues only for foreclosure, and not for foreclosure or sale, if the Court consider that he will not be damnified by a sale and if the defendant furnishes such security as the Court thinks sufficient for the full and prompt payment of the balance due for the time being by him on the mortgage, the Court may, at the instance of the defendant, pass a like decree.

Power to decree sale in foreclosure-suit at instance of mortgagor.

Bill III, s. 53. **88.** If in any case under section eighty-seven the defendant pays to the plaintiff or into court on the day fixed as aforesaid the amount due under the mortgage, the costs, if any, awarded to him and such subsequent costs as are mentioned in section ninety-three, the defendant shall (if necessary) be put in possession of the mortgaged property; but if such payment is not so made, the plaintiff or the defendant, as the case may be, may apply to the Court for an order absolute for sale of the mortgaged property, and the Court shall then pass an order that such property, or a sufficient part thereof, be sold, and that the proceeds of the sale be dealt with as is mentioned in section eighty-seven; and thereupon the defendant's right to redeem and the security shall both be extinguished.

Procedure when defendant pays amount due.

Order absolute for sale.

89. When the nett proceeds of any such sale are insufficient to pay the amount due for the time being on the mortgage, the balance, if legally recoverable from the defendant otherwise than out of the property sold, may be recovered either (if the Court thinks fit) in the same suit in the same manner as under a decree for money, or by any other legal process open to the mortgagee.

Bill III, s. 54: Kent IV. 207.

Recovery of balance due on mortgage.

Redemption.

90. Besides the mortgagor, any of the following persons may redeem, or institute a suit for redemption of, the mortgaged property:—

Bill III, s. 55.

Who may sue for redemption.

(*a*) any person (other than the mortgagee) of the interest sought to be redeemed) having any interest in or charge upon the property;

(*b*) any person having any interest in or charge upon the right to redeem the property; 3 W. R. 230: 6 W. R. 230. &c.

(*c*) any surety for the payment of the mortgage-debt or any part thereof; But see 17 W. R. 272.

(*d*) the guardian of the property of a minor mortgagor;

(*e*) the committee or other legal curator of a lunatic or idiot mortgagor;

(*f*) the judgment-creditor of the mortgagor, when he has obtained execution;

(*g*) a creditor of the mortgagor who has, in a suit for the administration of his estate obtained a decree for sale of the mortgaged property. Fisher, 768.

91. In a suit for redemption, if the plaintiff succeed, the Court shall pass a decree—

Bill III, s. 56: See Code, C. P., s. 461: N.-W. P., 1870, p. 207.

Decree in redemption-suit.

ordering that an account be taken of what will be due to the defendant for principal and interest on the mortgage, and for his costs of the suit, if any, awarded to him, on the day next hereinafter referred to, or declaring the amount so due at the date of such decree; and

ordering that upon the plaintiff paying to the defendant or into court the amount so due on a day within six months from the date of declaring in court the amount so due, to be fixed by the Court, the defendant shall deliver up to the plaintiff, or to such person as he appoints, all documents in his possession or power relating to the mortgaged property, and shall retransfer it to the plaintiff free from the mortgage and from all incumbrances created by the defendant or any person claiming under him, or, when the defendant claims by derived title, by those under whom he claims, and shall, if necessary, put the plaintiff into possession of the mortgaged property; but

that if such payment is not made on or before the day to be fixed by the Court, the plaintiff shall (unless the mortgage be simple or usufructuary) be absolutely debarred of all right to redeem the property, or (unless the mortgage be by conditional sale) that the property be sold.

Bill III, s. 57. **92.** If payment is made of such amount and of such subsequent costs as are mentioned in section ninety-three, the plaintiff shall, if necessary, be put into possession of the mortgaged property.

In case of redemption, possession.

If such payment is not so made, the defendant may (unless the mortgage is simple or usufructuary) apply to the Court for an order that the plaintiff and all persons claiming through or under him be debarred absolutely of all right to redeem, or (unless the mortgage is by conditional sale) for an order that the mortgaged property be sold.

In default, foreclosure or sale.

If he apply for the former order, the Court shall pass an order that the plaintiff and all persons claiming through or under him be absolutely debarred of all right to redeem the mortgaged property, and may, if necessary, deliver possession of the property to the defendant.

If he apply for the latter order, the Court shall pass an order that such property or a sufficient part thereof be sold, and that the proceeds of the sale (after defraying thereout the expenses of the sale) be paid into Court and applied in payment of what is found due to the defendant and that the balance be paid to the plaintiff or other persons entitled to receive the same.

On the passing of any order under this section the plaintiff's right to redeem and the security shall, as regards the property affected by the order, both be extinguished:

Provided that the Court may upon good cause shewn, and upon such terms, if any, as it thinks fit, from time to time, postpone the day fixed under section ninety-one for payment of the amount due.

Power to enlarge time.

Bill III, s. 59. **93.** In finally adjusting the amount to be paid to a mortgagee in case of a redemption or a sale by the Court under this chapter, the Court shall, unless the conduct of the mortgagee has been such as to disentitle him to costs, add to the mortgage-money such costs of suit as have been properly incurred by him since the decree for foreclosure, redemption or sale up to the time of actual payment.

Costs of mortgagee subsequent to decree.

Macph. 145. **94.** Where one of several mortgagors redeems the mortgaged property and obtains possession thereof, he has a charge on the share of each of the other co-mortgagors in the property for his proportion of the costs properly incurred in so redeeming and obtaining possession.

Charge of one of several co-mortgagors who redeems.

Sale of Property subject to prior mortgage.

Bill III, s. 60: Report, s. 25 altered: **95.** If any property the sale of which is directed under this chapter is subject to a prior mortgage, the Court may, with the consent of the prior mortgagee, order that the property be sold free from the same, giving to such prior mortgagee the same interest in the proceeds of the sale as he had in the property sold.

Act X of 1877, s. 295.

Sale of property subject to prior mortgage.

Bill III, s. 61: See Act X of 1877, s. 295. **96.** Such proceeds shall be brought into Court and applied as follows:—

Application of proceeds.

first, in payment of all expenses incident to the sale or properly incurred in any attempted sale;

secondly, if the property has been sold free from any prior mortgage, in payment of whatever is due on account of such mortgage;

thirdly, in payment of all interest due on account of the mortgage in consequence whereof the sale was directed, and of the costs of the suit in which the decree directing the sale was made;

fourthly, in payment of the principal money due on account of that mortgage; and

fifthly, the residue (if any) shall be paid to the person proving himself to be interested in the property sold, or if there be more such persons than one, then to such persons according to their respective interests therein or upon their joint receipt.

Anomalous Mortgages.

Bill III, s. 63: Bombay Reg. V of 1827, s. 15. 'No precise form is required for a mortgage,' Beng. 272: Couch, C.J. **97.** In the case of a mortgage not being a simple mortgage, a mortgage by conditional sale, an usufructuary mortgage, or an English mortgage, or a combination of the first and third, or the second and third, of such forms, the rights and liabilities of the parties shall be determined by their contract as evidenced in the mortgage-deed, and, so far as such contract does not extend, by local usage:

Mortgages not described in section 56, clauses (*b*), (*c*), (*d*) and (*e*).

Abandonment of security.

98. Where a mortgagee in execution of a decree for the satisfaction of any claim, whether arising under the mortgage or not, attaches and brings to sale the mortgaged property, or the mortgagor's interest therein, he shall be deemed to have abandoned his security thereon, unless before the issue of the proclamation under the Code of Civil Procedure, section 287, he gives notice of such security to the Court executing the decree.

Abandonment of security by mortgagee selling mortgaged property.

Charges.

Bill III, s. 64. **99.** Where immoveable property of one person is by act of parties or operation of law, made security for the payment of money to another, and the transaction does not amount to a mortgage, the latter person is said to have a charge on the property; and all the provisions hereinbefore applied to a mortgagor shall, so far as may be, apply to the owner of such property, and all the provisions hereinbefore applied to a mortgagee instituting a suit for the sale of the mortgaged property shall, so far as may be, apply to the person having such charge.

Charges.

Nothing in this section applies to the charge of a trustee on the trust-property for expenses properly incurred in the execution of his trust.

Bill III, s. 64: *Swinfen*, v. *Swinfen*, 29 Beav. 199: *Adams* v, *Angell*, 5 Chan. D, 634, 645, 7 Mad. 231: 14 W. R. 491: 3 O'Kin. 184: 5 Beng. 463: 11 Bom. 41.

100. Where the owner of a charge or other incumbrance on immoveable property, is or becomes absolutely entitled to that property, the charge or incumbrance shall be extinguished, unless he declares, by express words or necessary implication, that it shall continue to subsist, or such continuance would be for his benefit.

Extinguishment of charges.

Notice and Tender.

101. Where the person on or to whom any notice or tender is to be served or made under this chapter does not reside in the district in which the mortgaged property or some part thereof is situate, service or tender on or to an agent holding a general power of attorney from such person or otherwise duly authorized to accept such service or tender shall be deemed sufficient.

Service or tender on or to agent.

Where no such person or agent can be found in the said district, or where the person on or to whom such notice or tender should be served or made is unknown to the person required or desiring to serve the notice or make the tender, the latter person may apply to any Court in which a suit might be brought for redemption of the mortgaged property, and such Court shall direct in what manner such notice or tender shall be served or made, and any notice served or tender made in compliance with such direction shall be deemed sufficient.

102. Where under the provisions of this chapter a notice is to be served on or by, or tender or deposit made or accepted or taken out of court by any person incompetent to contract, such notice may be served or tender or deposit made, accepted or taken by the legal curator of the property of such person, but where there is no such curator, and it is requisite or desirable in the interests of such person that a notice should be served or tender or deposit made under the provisions of this chapter, application may be made to any Court in which a suit might be brought for the redemption of the mortgage to appoint a guardian *ad litem* for the purpose of serving or receiving service of such notice, or making or accepting such tender, or making or taking out of court such deposit, and for the performance of all consequential acts which could or ought to be done by such person if he were competent to contract; and the provisions of chapter XXXI of the Code of Civil Procedure shall, so far as may be, apply to such application and to the parties thereto and to the guardian appointed thereunder.

Notice, &c., to or by person incompetent to contract.

CHAPTER V.

OF LEASES OF IMMOVEABLE PROPERTY.

103. A lease of immoveable property is a transfer of a right to enjoy such property made for a certain time express or implied, or in perpetuity, in consideration of a price paid or promised, or of money, a share of crops, service, or any other thing of value, to be rendered periodically or on specified occasions to the transferor by the transferee, who accepts the transfer on such terms.

Lease defined.

The transferor is called the lessor, the transferee is called the lessee, the price is called the premium, and the money, share, service or other thing to be so rendered is called the rent.

Lessor, lessee, premium and rent defined.

104. In the absence of a contract or local law or usage to the contrary, a lease of immoveable property for agricultural or manufacturing purposes shall be deemed to be a lease from year to year, terminable, on the part of either lessor or lessee, by six months' notice expiring with the end of a year of the tenancy; and a lease of immoveable property for any other purpose shall be deemed to be a lease from month to month, terminable, on the part of either lessor or lessee, by fifteen days' notice expiring with the end of a month of the tenancy.

Bill III, s. 68: Report, s. 40: 5 Bom. A. C. J. 179: 6 *ibid.* 31; 7 *ibid. III*; and see 1 Beng. F. B. 25: 13 W. R. 190. I. L. R. 2 Calc. 146. 4 Beng. Appendix 86 12 Beng. 263. N. W. P., 1873, p. 9. Perry 480.

Duration of certain leases in absence of written contract or local usage.

Every notice under this section must be in writing signed by or on behalf of the party giving it and tendered or delivered to the party who is intended to be bound by it, or affixed on a conspicuous part of the property.

Notice to determine lease.

105. A lease of immoveable property from year to year, or for any term exceeding one year, or reserving a yearly rent, can be made only by a registered assurance.

Leases how made.

All other leases of immoveable property may be made either by assurance or by oral agreement. Bill III, s. 65.

106. In the absence of a contract or local usage to the contrary, the lessor and the lessee of immoveable property, as against one another, respectively, possess the rights and are subject to the liabilities mentioned in the rules next following, or such of them as are applicable to the property leased:—

Right and liabilities of lessor and lessee.

A.—Rights and Liabilities of the Lessor.

(*a*) the lessor is bound to disclose to the lessee any defect in the property, with reference to its intended use, of which the former is, and the latter is not, aware, and which the latter could not with ordinary care discover: Bill III, s. 66. 6 W. R. 314.

(*b*) the lessor is bound on the lessee's request to put him in possession of the property leased: 6 Beng. Appendix 44.

(*c*) the lessor shall be deemed to contract with the lessee that if the latter pays the rent reserved by the lease and performs the contracts binding on the lessee, he may hold the property leased during the time limited by the lease without interruption; 39 (3). 15 W. R. [illegible]. W. R. 191.

(*d*) where an arrear of rent is due from any lessee, the lessor may, instead of suing for the arrear, recover the same by distress and sale of the goods found in or upon the property in respect of which the arrear is due or of the produce of such property, but subject to the local law, if any, for the time being in force relating to distresses. 39 (2) altered: cf. IX of 1872, s. 93: 11 W. R. 278: 12 W. R. 149:

B.—Rights and Liabilities of the Lessee.

(*e*) if during the continuance of the lease any accession is made to the property leased, such accession (subject to the law relating to alluvion for the time being in force) shall be deemed to be comprised in the lease: 8 Beng. 73. 5 Calc. L. R. 33.

(*f*) if by fire, tempest or flood, or violence of an army or of a mob, or other irresistible force, any material part of the property leased be wholly destroyed or rendered substantially and permanently unfit for the purposes for which it was let, the lease shall, at the option of the lessee, be void:

provided that if the injury be occasioned by the wrongful act or default of the lessee, he shall not be entitled to avail himself of the benefit of this provision:

(*g*) if the lessor neglects to make, within a reasonable time after notice, repairs which he is bound to make to the property leased, the lessee may make the same himself, and deduct the expense of such repairs with interest from the rent, or otherwise recover it from the lessor:

(*h*) if the lessor neglects to make any payment which he is bound to make, and which, if not made by him, is recoverable from the lessee or against the property leased, the lessee may make such payment himself, and deduct it with interest from the rent, or otherwise recover it from the lessor:

Re Thakoor Chunder Puramanick, Beng. F. B. Rulings 595: 8 Beng. 287: 14 Beng. 201, 205: Canadian Code, s. 1640. Cf. Act XIX of 1868, s. 46: Act XVIII of 1873, s. 42.

(*i*) the lessee may remove, at any time during the continuance of the lease, all things which he has attached to the earth; provided he leaves the property leased in the state in which he received it:

(*j*) when a lease of uncertain duration determines by any means except the fault of the lessee, he or his legal representative is entitled to all the crops planted or sown by the lessee and growing upon the property leased for the season current when the lease determines, and to free ingress and egress to reap and carry them:

5 S. D. A. 205: 5 Mad. 120, 227: 7 Beng. 152: N.-W. P. 1875, p. 181: 12 W. R. 451: 16 W. R. 112: 6 S. D. A. 67. 15 W. R. 449.

(*k*) the lessee may transfer absolutely or by way of mortgage or sub-lease the whole or any part of his interest in the property leased, and any transferee of such interest or part may again transfer it. The lessee shall not, by reason only of such transfer, cease to be subject to any of the liabilities attaching to the lease:

6 Beng. 239: 12 Beng. 82.

nothing in this clause shall be deemed to authorize a tenant having an untransferable right of occupancy, the farmer of an estate in respect of which default has been made in paying revenue, or the lessee of an estate under the management of a Court of Wards, to assign his interest as such tenant, farmer or lessee:

(*l*) the lessee is bound to disclose to the lessor any fact as to the nature or extent of the interest which the lessee is about to take, of which the lessee is, and the lessor is not, aware, and which increases the value of such interest:

(*m*) the lessee is bound to pay or tender, at the proper time and place, the premium or rent to the lessor or his agent in this behalf. See 23 W. R. 34.

(*n*) the lessee is bound to keep, and on the termination of the lease to restore, the property leased in as good condition as it was in at the time when he was put in possession, subject only to the changes caused by reasonable wear and tear or irresistible force, and to allow the lessor and his agents, at all reasonable times during the term, to enter into the property leased and inspect the condition thereof and give or leave notice of any defect in such condition, and, when such defect has been caused by any act or default on the part of the lessee, his servants or agents, he is bound to make it good within three months after such notice has been given or left:

(*o*) if the lessee becomes aware of any proceeding to recover the property leased or any part thereof, or of any encroachment made upon, or any interference with, the lessor's rights concerning such property, he is bound to give, with reasonable diligence, notice thereof to the lessor:

(*p*) the lessee may use the property leased and its products (if any) as a person of ordinary prudence would use them if they were his own; but he must not use, or permit another to use, the property for a purpose other than that for which it was leased, or fell timber, pull down or damage buildings, work mines or quarries not open when the lease was granted, or commit any other act which is destructive or permanently injurious thereto: 5 Beng. 401, 416: 8 Beng. Appendix 70: 10 Beng. Appx. 41, v. 5 S. D. 205. 15 W. R. 17 W. R. 28 W. R. (1894) 2 Ch. 523. 8 Beng. 14 & 15 c. 25, s.

(*q*) he must not, without the lessor's consent, erect on the property leased any permanent structure, except for agricultural purposes:

(*r*) on the determination of the lease, the lessee is bound to put the lessor into possession of the property leased.

107. If the lessor transfers the property leased, or any part thereof, or any part of his interest therein, the transferee in the absence of a contract to the contrary shall possess all the rights, and, if the lessee so elects, be subject to all the liabilities, of the lessor as to the property or part transferred so long as he is the owner of it; but the lessor shall not by reason only of such transfer cease to be subject to any of the liabilities imposed upon him by the lease, unless the lessee elects to treat the transferee as the person liable to him: Bill III, s. clause (a) 14 W. R. 24 W. R.

Rights of lessor's transferee.

Provided that the transferee is not entitled to arrears of rent due before the transfer, and that if the lessee pay rent to the lessor without having reason to believe that such transfer has been made, Act XI of 1855, s. 4 Anon. s. 10.

the lessee shall not be liable to pay such rent over again to the transferee:

Where only a part of the property leased is transferred by the lessor, he may (subject to the provisions of section thirty-eight) determine what proportion of the premium or rent reserved by the lease is payable in respect of the part so transferred.

Bill III, s. 69.

108. Where the time limited by a lease of immoveable property is expressed as commencing from a particular day, in computing that time such day shall be excluded. Where no day of commencement is named, the time so limited begins from the making of the lease.

Exclusion of day on which term commences.

Where the time so limited is a year or a number of years, in the absence of an express agreement to the contrary, the lease shall last during the whole anniversary of the day from which such time commences.

Duration of lease for a year.

Where the time so limited is expressed to be terminable before its expiration, and the lease omits to mention at whose option it is so terminable, the lessee, and not the lessor, shall have such option.

Option to determine lease.

Bill III, s. 70: 7 W. R. 283. 3 Moo. I. A. 241: 10 W. R. 147.

109. A lease of immoveable property determines—

Determination of lease.

(*a*) by efflux of the time limited thereby:

(*b*) where such time is limited conditionally on the happening of some event—by the happening of such event:

Lease by Hindú widow, Marshall 166.

(*c*) where the interest of the lessor in the property leased terminates on, or his power to dispose of the same extends only to, the happening of any event—by the happening of such event:

3 O'Kin. 159. But see per Peacock, C. J., 10 W. R. 15.

(*d*) in case the interests of the lessee and the lessor in the whole of the property leased become vested at the same time in one person in the same right:

Surrender of right to redeem mortgaged lease, N.-W. P. 1869, p. 25; by one of several joint lessees, 9 W. R. 147.

(*e*) by express surrender, that is to say, in case the lessee yields up his interest under the lease to the lessor, by mutual agreement between them:

Marshall 250: 12 W. R. 103: 16 W. R. 227. 13 W. R. 465; But see 22 W. R. 448: 25 W. R. 147.

(*f*) by implied surrender:

(*g*) by forfeiture, that is to say, (1) in case the lessee breaks an express condition which provides that, on breach thereof, the lessor may re-enter, or the lease shall become void; or (2) in case the lessee renounces his character as such by setting up a title in a third person or by claiming title in himself, and in either case the lessor or his transferee does some act shewing his intention to determine the lease:

23 W. R. 238, 271.

(*h*) on the expiration of a notice to determine the lease, or to quit, or of intention to quit, the property leased, duly given by one party to the other.

Illustration to clause (f).

A, the lessee, accepts from the lessor a new lease of the property leased, to take effect during the continuance of the existing lease. This is an implied surrender of the former lease, and such lease determines thereupon.

Bill III, s. 71. W. R. F. B. 10: Marshall 25.

110. A forfeiture under section one hundred and nine, clause (*g*), is waived by acceptance of rent which has become due since the forfeiture, or by distress for such rent, or by any other act on the part of the lessor shewing an intention to treat the lease as subsisting:

Waiver of forfeiture.

Provided that the lessor is aware that the forfeiture has been incurred:

2 Bom. 73.

Provided also that, where rent is accepted after the institution of a suit to eject the lessee on the ground of forfeiture, such acceptance is not a waiver.

Bill III, s. 72.

111. A notice given under section one hundred and nine, clause (*h*), is waived, with the express or implied consent of the person to whom it is given, by any act on the part of the person giving it shewing an intention to treat the lease as subsisting.

Waiver of notice to quit.

Illustrations.

(*a*) A, the lessor, gives B, the lessee, notice to quit the property leased. The notice expires. B tenders, and A accepts, rent which has become due in respect of the property since the expiration of the notice. The notice is waived.

(*b*) A, the lessor, gives B, the lessee, notice to quit the property leased. The notice expires, and B remains in possession. A gives to B as lessee a second notice to quit. The first notice is waived.

Bill III, s. 73. N.-W.P. 1867, Ex. o. c. j. 1. Timmaraddi Ramáji v. Basáji Kaggagonda, 2 Bom. 70. 8 W. R. 395, per Peacock, C. J. Act XVIII of 1873, s. 54, cl. (*c*), para. 1.

112. Where a lease of immoveable property has determined by forfeiture for non-payment of rent and the lessor sues to eject the lessee if, at the hearing of the suit, the lessee pays or tenders to the lessor the rent in arrear, together with interest thereon and his full costs of the suit, or gives such security as the Court thinks sufficient for making such payment within fifteen days, the Court may, in lieu of making a decree for ejectment, pass an order relieving the lessee against the forfeiture; and thereupon the lessee shall hold the property leased as if the forfeiture had not occurred.

Relief against forfeiture for non-payment of rent.

Bill III, s. 74: 10 W. R. 334; 13 W. R. 361; N.-W.P. 1871, p. 68.

113. The surrender, express or implied, of a lease of immoveable property does not prejudice an under-lease of the property or any part thereof previously granted by the lessee on terms and conditions substantially the same (except as regards the amount of rent) as those of the original lease; but, unless the surrender is made for the purpose of obtaining a new lease, the rent payable by, and the contracts binding on, the under-lessee shall be respectively payable to, and enforceable by, the lessor.

Effect of surrender and forfeiture on under-leases.

The forfeiture of such a lease annuls all such under-leases, except where such forfeiture has been procured by the lessor in fraud of the under-lessees.

Bill III, s. 75: Report, s. 41: 3 Bom. A. C. J. 27: 12 Beng. 263 N.-W.P. 1870: p. 204. 7 W. R. 152: 16 W. R. 185: 22 W. R. 394, 548: 23 W. R. 271: 25 W. R. 234.

114. If a lessee or under-lessee of property remains in possession thereof after the determination of the lease, and the lessor or his legal representative accepts rent from the lessee or under-lessee, or otherwise assents to his continuing in possession, the lease is, in the absence of an agreement to the contrary, renewed from year to year or from month to month, according to the purpose for which the property is leased, as specified in section one hundred and six.

Effect of holding over.

Illustrations.

(*a*.) A lets a house to B for five years. B underlets the house to C at a monthly rent of Rs. 100. The five years expire, but C continues in possession of the house and pays the rent to A. C's lease is renewed from month to month.

(*b*.) A lets a farm to B for the life of C. C dies, but B continues in possession with A's assent. B's lease is renewed from year to year.

115. None of the provisions of this chapter apply to leases for agricultural purposes, except in so far as the Local Government may by notification in the official Gazette declare all or any of such provisions to be so applicable, together with, or subject to, those of the local law, if any, for the time being in force.

Exemption of leases for agricultural purposes.

CHAPTER VI.

OF EXCHANGES.

Bill III, s. 76: N. Y. Code, ss. 903, 906: 1 Mad. 100.

116. When two persons mutually transfer the ownership of one thing for the ownership of another, neither thing or both things being money only, the transaction is called an "exchange."

"Exchange" defined.

A transfer of property in completion of an exchange can be made only in manner provided for the transfer of such property by sale.

Bill III, s. 77, Code Civil, Art. 1705.

117. In the absence of a contract to the contrary, the party deprived of the thing or part thereof he has received in exchange by reason of any defect in the title of the other party is entitled at his option to compensation or to the return of the thing transferred by him.

Right of party evicted from thing received in exchange.

Bill III, s. 78.

118. Save as otherwise provided in this chapter, each party has the rights and is subject to the liabilities of a seller as to that which he gives, and has the rights and is subject to the liabilities of a buyer as to that which he takes.

Rights and liabilities of parties.

Bill III, s. 79: 1 Morl. 105.

119. On an exchange of money, each party thereby warrants the genuineness of the money given by him.

Exchange of money.

CHAPTER VII.

OF GIFTS.

120. "Gift" is the transfer of certain existing moveable or immoveable property made voluntarily and without consideration, by one person, called the donor, to another, called the donee, and accepted by or on behalf of the donee.

"Gift" defined.

Such acceptance must be made during the life-time of the donor and while he is still capable of giving.

Acceptance when to be made.

If the donee dies before acceptance, the gift is void.

L. C. 1581.

121. For the purpose of making a gift of immoveable property, the transfer must be effected by registered assurance signed by or on behalf of the donor, and attested by at least two witnesses.

Act III 1877, s. 17, (*a*).

Transfer how effected.

Such assurance shall not be considered as insufficiently attested by reason of any benefit thereby given to any person attesting it, or to his or her wife or husband; but the gift shall be void so far as concerns the person so attesting, or the wife or husband of such person, or any person claiming under either of them.

Act X of 1865, s. 54.

For the purpose of making a gift of moveable property, the transfer may be effected either by a non-testamentary instrument registered and signed as aforesaid or by delivery.

Such delivery may be made in the same way as goods sold may be delivered.

Act IX of 1872, s. 90.

122. A gift comprising both existing and future property is void as to the latter.

Gifts of existing and future property.

Burge II, 144.

123. A gift of a divisible thing to two or more donees, of whom one does not accept it, is void as to the interest which he would have taken had he accepted.

Gift to several, of whom one does not accept.

124. The donor and donee may agree that on the happening of any specified event which does not depend on the will of the donor a gift shall be suspended or revoked; but a gift which the parties agree shall be revocable wholly or in part at the mere will of the donor is void wholly or in part, as the case may be.

When gift may be suspended or revoked.

A gift may also be revoked in any of the cases (save want or failure of consideration) in which, if it were a contract, it might be rescinded.

Canadian Code, s. 811.

Save as aforesaid, a gift cannot be revoked.

Nothing contained in this section shall be deemed to affect the rights of transferees for consideration without notice.

Illustrations.

(*a*.) A gives a field to B, reserving to himself, with B's assent, the right to take back the field in case B and his descendants die before A. B dies without descendants in A's lifetime. A may take back the field.

(*b*). A gives a lákh of rupees to B, reserving to himself, with B's assent, the right to take back at pleasure Rs. 10,000 out of the lákh. The gift holds good as to Rs. 90,000, but is void as to Rs. 10,000, which continue to belong to A.

125. If the donee or any person claiming under him is by reason of the invalidity of the donor's title deprived of the thing

Donor not bound to warranty.

given, the donor is not responsible for loss caused thereby.

Act X of 1865, s. 66.

126. Where a gift is in the form of a single transfer to the same person of several things of which one is, and the others are not, burdened by an obligation, the donee can take nothing by the gift unless he accepts it fully.

Onerous gifts.

Act X of 1865, s. 100.

Where a gift is in the form of two or more separate and independent transfers to the same person of several things, the donee is at liberty to accept one of them and refuse the others, although the former may be beneficial and the latter onerous.

A donee not competent to contract and accepting property burdened by any obligation is not bound by his acceptance. But it after becoming competent to contract he retains the property given, he becomes so bound.

Onerous gift to disqualified person.

Illustrations.

(*a*). A has shares in X, a prosperous joint stock company, and also shares in Y, a joint stock company in difficulties. Heavy calls are expected in respect of the shares in Y. A gives B all his shares in joint stock companies. B refuses to accept the shares in Y. He cannot take the shares in X.

(*b*). A, having a lease for a term of years of a house at a rent which he and his representatives are bound to pay during the term, and which is more than the house can be let for, gives to B the lease, and also a sum of money. B refuses to accept the lease. He does not by this refusal forfeit the money.

127. Subject to the provisions of section one hundred and twenty-six, where a gift consists of the donor's whole property, the donee is personally liable for all the debts due by the donor at the time of the gift to the extent of the property comprised therein:

Universal donee.

128. Nothing in this chapter relates to gifts of moveable property made in contemplation of death, or shall be deemed to affect any rule of Muhammadan law.

Saving of donations *mortis causâ* and Muhammadan law.

CHAPTER VIII.

OF TRANSFERS OF ACTIONABLE CLAIMS.

129. A claim is actionable when the civil Courts recognise it as a ground for relief, whether a suit for its enforcement is or is not actually pending or likely to become necessary.

Actionable claims.

Bill III, s. 80: Report, s. 99: 36 & 37 Vic., c. 66, s. 25 (*b*): 1 Mad. 150. See 5 W. R. 230. But see 10 N.-W. P. 474, cited Macph. 122.

130. No transfer of any debt, or any beneficial interest in moveable property, shall have any operation against the debtor or against the person in whom the property is vested, until express notice of the transfer is given to him, unless he is a party to such transfer; and every dealing by such debtor or person, not being a party to, and not having received express notice of, a transfer, with the debt or property shall be valid as against such transfer.

Transfer of debts.

Illustrations.

(*a*) A owes money to B, who transfers the debt to C. B then demands the debt from A, who, having no notice of the transfer, pays B. The payment is valid, and C cannot sue A for the debt.

(*b*) A has jewels deposited with B, a jeweller. A mortgages them to C. A then executes an instrument transferring them to D, who takes it to B and gets the jewels from him before he, B, has received any notice of C's mortgage. B is justified in handing the jewels to D, and C has no remedy against D.

Bill III, s. 81. Report, s. 100.

131. Every such notice must be in writing signed by the person making the transfer, or by his agent duly authorized in this behalf.

Notice to be in writing signed.

Bill III, s. 82. Fisher, 116 : *Sichel* v. *Raphael* 10 Jur. N. S. 1165.

132. On receiving such notice, the debtor or person in whom the property is vested shall give effect to the transfer, unless where the debtor resides, or the property is situate, in a foreign country and the title of the person in whose favour the transfer is made is not complete according to the law of such country.

Debtor to give effect to transfer.

133. Where the transferor of a debt warrants the solvency of the debtor the warranty, in the absence of a contract to the contrary, applies only to his solvency at the time of the transfer, and is limited, where the transfer is made for consideration, to the amount of such consideration.

Warranty of solvency of debtor.

134. Where an actionable claim is sold, he against whom it is claimed is wholly discharged by paying to the buyer the price and incidental expenses of the sale, with interest on the price from the day that the buyer paid it.

Discharge of person against whom claim is sold.

Nothing in the former part of this section applies—

(*a*) where the sale is made to the co-heir or co-proprietor of the claim sold;

(*b*) where it is made to a creditor in payment of what is due to him;

(*c*) where it is made to the possessor of a property subject to the actionable claim;

(*d*) where the judgment of a competent Court has been delivered affirming the claim, or where the claim has been made clear by evidence and is ready for judgment.

135. No judge, pleader, clerk, bailiff or other officer connected with Courts of justice can buy any actionable claim falling under the jurisdiction of the Court in which he exercises his functions.

Incapacity of officers connected with Courts of justice.

Bill III, s. 83; *Mangles* v. *Dixon*, 3 H. L. Ca. 702: Fisher, s. 1058.

136. The person to whom a debt or charge is transferred shall take it subject to all the liabilities to which the transferor was subject in respect thereof at the date of the transfer.

Liability of transferee of debt.

Illustration.

A debenture is issued in fraud of a public company to A. A sells and transfers the debenture to B, who has no notice of the fraud. The debenture is invalid in the hands of B.

Bill III, s. 84. Dav. Conv. II, 691, 693.

137. Where a debt is transferred for the purpose of securing an existing or future debt, the original debt, if recovered by either the transferor or transferee, is applicable, first, in payment of the costs of such recovery, secondly, in or towards satisfaction of the amount for the time being secured by the transfer; and the residue, if any, belongs to the transferor.

Mortgaged debt.

Bill III, s. 85.

138. Save as provided by section one hundred and thirty-seven, nothing in this chapter applies to negotiable instruments.

Saving of negotiable instruments.

THE SCHEDULE.

B.

THE MASTER AND SERVANT BILL, 1879.

CONTENTS.

PREAMBLE.

CHAPTER I.—PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
   Exemption of Government servants and seamen,
   and clerks and domestic servants of Natives.
2. Enactments repealed.

CHAPTER II.—OF THE CONTRACT OF SERVICE.

3. Interpretation-clause.
4. Persons competent to enter into contracts of service.
5. Presumption as to wages.
6. Presumption as to term of service.
7. Withdrawal of notice.
8. Termination of contract.
9. Presumption of renewal of contract.

CHAPTER III.—OF THE RIGHTS OF THE MASTER AND THE DUTIES OF THE SERVANT.

10. Master's right to compensation when servant refuses to enter service.
11. Obligations of servant after entry.
12. Time of servant.
13. Master's power to discharge.

CHAPTER IV.—OF THE RIGHTS OF THE SERVANT AND THE DUTIES OF THE MASTER.

14. Servant's right to compensation from master refusing to receive into service.
15. Obligations of master—
    as to retaining servant;
    as to payment of wages;
    as to indemnifying servant;
    as to punishment;
    as to compensating servant for injury caused by master's neglect;
    as to servants employed in dangerous work;
    as to European domestic servants.
16. Servant's right to compensation for breach of duty imposed by section 15, clauses (*e*) and (*f*).

SECTIONS.

17. Compensation for wrongful discharge.
    Measure of compensation.
18. Termination of service by servant.
19. Wages in case of wrongful discharge or termination of contract for master's fault or by death.

CHAPTER V.—OF APPRENTICES.

20. Apprenticing child between ten and eighteen years old.
21. Apprenticing in sea-service.
22. Form and contents of contract.
23. Signatures to contract.
24. Contract not valid unless executed as prescribed and deposited.
    Certified copies.
    Evidence of age.
25. Alteration of terms of service.
26. Assignment of apprentice to new master.
27. Effect of master's death during apprenticeship.
28. Effect of master's insolvency.
29. Rights and duties of master and apprentice.
    Master's powers to chastise.

CHAPTER VI.—JURISDICTION OF MAGISTRATES.

(*A*).—*Artisans, Workmen and Labourers.*

30. Failure to perform work on account of which artisan has received an advance.

(*B*).—*Workmen employed on Public Works.*

31. Disputes between employers and workmen on railways, &c.
32. Punishment for breach of contract to work for fixed term on railway, &c.
    Power to order performance of contract.

(*C*).—*Apprentices.*

33. Complaint by apprentice against master.
34. Appropriation of sum recovered for apprentice on cancellation of contract.
35. Contract not to be cancelled for moderate chastisement.
    Liability of master for assault.
36. Complaint by master against apprentice.
37. Cancellation of contract for misconduct of apprentice.
38. Limitation of complaints.

(*D*).—*Miscellaneous.*

39. "Master," "employer" and "Magistrate."
40. Saving of prosecutions under other laws.
    Saving of civil remedies.

SCHEDULES.

A Bill to define and amend the law relating to Master and Servant.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend the law relating to master and servant and master and apprentice; It is hereby enacted as follows:— Preamble.

CHAPTER I.—PRELIMINARY.

Bill, s. 1.

1. This Act may be called "The Master and Servant Act, 1880": Short title.

It extends to the whole of British India; Local extent.

and it shall come into force on the first day of March, 1880. Commencement.

But nothing herein contained applies to servants of Government, as such, or to seamen as defined in Act No. I of 1859 (*for the amendment of the law relating to Merchant Seamen*); and nothing contained in sections three to twenty-five (both inclusive) applies to the Hindú, Jain, Sikh, Muhammadan and Buddhist clerks, and to the domestic and agricultural servants, of Hindús, Jains, Sikhs, Muhammadans and Buddhists. Exemption of Government servants and seamen, and clerks and domestic servants of Natives.

Bill, s. 2.

2. The Acts mentioned in the first schedule hereto annexed shall be repealed. But all references in any enactment to any of such Acts shall be deemed to be made to the corresponding part of this Act, and all powers conferred under the second or third of such Acts shall be deemed to have been conferred hereunder. Enactments repealed.

CHAPTER II.—OF THE CONTRACT OF SERVICE.

Bill, s. 3.

3. A contract binding one party to employ and remunerate, and the other to do personally any work, in such manner as the former party directs, and otherwise than in pursuit of an independent calling, is called a "contract of service": the remuneration contracted for is called the "wages": the party contracting, by himself or his agent to employ and remunerate is called the "master"; and the party contracting to do the work is called the "servant." Interpretation-clause. "Contract of service": "Wages": "Master": "Servant."

Dhanee Sirang v. Upendra Mohan. Tagore, 8 Beng. 244.

A "domestic servant" is a servant who contracts to do household or menial work, and includes also groom, coachman, elephant-driver, porter, cowherd, grass-cutter, gardener, poultry-man, dog-boy, household tailor, washerman, messenger, watchman, boatman, tent-pitcher, sweeper and water-carrier. "Domestic servant."

"Fellow-servants" are servants of one person jointly engaged on his behalf in an employment with a common object. "Fellow-servants."

Swainson v. N. E. Railway Co., 3 Exch. Div. 344.

Bill, s. 4.

4. Every person competent to contract may enter into a contract of service. Persons competent to enter into contracts of service.

Explanation.—For the purposes of this section a minor is competent to contract; but the contract cannot be enforced against him unless it is beneficial to him.

This modifies Act IX of 1872, s. 11, 3 Q. B. Div. 229.

Bill, s. 5.

5. In the absence of express provision as to the amount of wages, the servant is presumed to contract for the wages ordinarily paid, at the place and time of entering into the contract, by masters of the same class as the master to servants of the same class as the servant. Presumption as to wages.

6. In the absence of a contract or local usage to the contrary,— Presumption as to term of service.

(*a*) tutors, governesses and managers of tea-gardens, coffee-plantations, indigo-concerns, banks mines, breweries, cotton-mills, jute-mills, paper-mills, rice-mills, saw-mills, sugar-works and pressing-companies are presumed to be hired for a year, and the contract is terminable, on the part of either master or servant, by ninety days' notice of his intention to put an end to the service, or by payment or tender of three months' wages in advance;

(*b*) domestic servants are presumed to be hired for a month, and the contract is terminable, on the part of either master or servant, by fifteen days' notice of his intention to put an end to the service, or by payment or tender of fifteen days' wages in advance;

As to the fortnight's notice, see Bengal Regulation V of 1819, repealed Act XVII 1862.

(*c*) agricultural servants are presumed to be hired for the season, and the contract is terminable, on the part of either master or servant, by thirty days' notice of his intention to put an end to the service, or by payment or tender of a month's wages in advance, except in the case of labourers hired under Bengal Act VII of 1873, in which case the contract is terminable, on the part of either master or servant, by ninety days' notice of his intention to put an end to the service, or by payment or tender of three months' wages in advance;

(*d*) artisans and workmen are presumed to be hired for no specific term, and the contract is terminable, at the will of either party, by notice to the other that the service is at an end;

(*e*) persons hired by piecework are presumed to be hired till the job is ended: the contract is not terminable by notice, but either party may terminate it by payment or tender of the wages agreed to be paid for the job;

(*f*) clerks and all other servants not hereinbefore provided for are presumed to be hired for

a month, and the contract is terminable, on the part of either master or servant, by thirty days' notice of his intention to put an end to the service, or by payment or tender of a month's wages in advance.

Chapman's case, L. R. 1 Eq. 346, followed in the case of the *Calcutta Steam-tug Association*, 2 Ind. Jur. 17.

If the master is a public company, the order for winding it up, or where the winding-up is voluntary, the passing of the resolution authorizing the same, shall be deemed to be a notice duly given to the servant under this section, unless where express notice to put an end to the service has been duly given to the servant and is still in force.

Bill, s. 7.

7. Any notice of intention to put an end to service may, with the consent of the party receiving it, be withdrawn by the party giving it, and thereupon the service shall continue as if no such notice had been given.

Withdrawal of notice.

Bill, s. 8.

8. A contract of service is terminated—

Termination of contract.

(*a*) by the death of the master, unless where the contract provides otherwise:

(*b*) by the death of the servant:

(*c*) by mutual consent of the parties:

(*d*) on expiration of the term of service:

(*e*) on expiration of a notice to put an end to the service duly given to the master or the servant:

(*f*) by payment or tender of wages under section six:

(*g*) when the master rightfully discharges the servant:

(*h*) when the servant rightfully quits his master's service.

The provisions of this section as to the death of a master apply, where the master is a private partnership, to its dissolution.

9. Where, after the termination of a contract of service, the parties continue the relation of master and servant, they are presumed, till the contrary is proved, to have renewed the contract, except as regards the term of service, if any, expressed therein.

Presumption of renewal of contract.

CHAPTER III.—OF THE RIGHTS OF THE MASTER AND THE DUTIES OF THE SERVANT.

Bill, s. 10.

10. When a servant refuses or fails to enter his master's service, the master is entitled to compensation for the injury caused by the refusal or failure, unless the servant is prevented by some cause over which he has no control from performing his contract.

Master's right to compensation when servant refuses to enter service.

Bill, s. 11.

11. When a servant has entered his master's service, he is under the following obligations:—

Obligations of servant after entry.

(*a*) he must obey all reasonable orders relating to his employment given by his master or by any person to whom the master has expressly or impliedly delegated power to give such orders:

(*b*) he must abstain from intoxication during any part of his time belonging to his master:

(*c*) he must be respectful to his master and his master's family, guests, lodgers, visitors and customers:

(*d*) he must be diligent in his master's business:

(*e*) he must run all risks incident to the service:

(*f*) he must take the same care of his master's property entrusted to him as a man of ordinary prudence would, under similar circumstances, take of his own property of the same kind and value; and he must make good any loss which he causes to his master by want of ordinary care or reasonable skill: XI of 1872, s. 115.

(*g*) he must indemnify his master from liability to make compensation for injury caused by any wrongful act or default of the servant:

(*h*) he must use his best endeavours to protect his master against the wrongful acts and defaults of his fellow-servants, if any:

(*i*) he must, as often as he may be reasonably required, account for money or goods received from or on account of his master, or belonging to his master and coming to the servant's hands; and must, without demand, deliver to his master, as soon as, with reasonable diligence, he can find him, everything that he receives on his master's account:

(*j*) he must not set up his own title or the title of any third person to money or goods so received or coming to his hands, in opposition to his master's title thereto, except where the master's title accrued fraudulently or wrongfully, or under a voidable contract which has become void:

(*k*) he must continue in the service during the whole time that he has contracted for, unless the contract has been terminated under section eight; and in the case of a domestic servant,—

(*l*) when he is temporarily disabled by illness from performing his duties, he must provide at his own expense a substitute satisfactory to the master, or, if the master employs and pays a substitute, allow the master to deduct such payment from his wages; and

(*m*) when the master dies leaving a widow or minor children, and the widow or guardian of the children requires the servant to renew his contract for the same wages for a term not exceeding one month from the date of the death, the servant must comply with such request and the widow or guardian (as the case may be) must pay the wages accruing due to the servant during such term.

Nothing in clause (*l*) applies where the servant's illness arises from hurt received in the course of his employment.

Bill, s. 12.

12. In the absence of an express agreement to the contrary, all the time of domestic servants, not reasonably required for bathing, meals, sleep and religious duties, belongs to the master: the time of other servants belongs to the master to such extent as is usual in the business in which they serve.

Time of servant.

Bill, s. 13.

13. A master may, without notice or payment or tender of wages, discharge his servant, whether hired for a fixed term or not, for any of the following causes:—

Master's power to discharge.

(*a*) wilful breach of the obligation imposed by section eleven, clause (*a*):

(*b*) failure to perform either of the obligations imposed upon the servant by section eleven, clauses (*b*) and (*c*):

(*c*) conduct likely to injure his master's business materially:

Smith 117: *Spondet peritiam artis*, see I. L. R. 2 Calc. 33.

(*d*) claiming to be a partner with his master:

(*e*) want of reasonable skill to discharge the duties for which the servant was hired or gross negligence in their performance:

(*f*) illness disabling him from performing his duties for a continuous period of thirty days:

(*g*) imprisonment in a civil or criminal jail:

(*h*) wilful absence from his master's service without leave:

(*i*) misconduct, before or after the commencement of his service, implying a defect of character which unfits him for such service.

Willets v. *Green*, 3. Car. & K. 59. Injunction not granted to prevent breach by master, Act I of 1877, section 66, clause (*f*): Smith 124.

The existence of any such cause, though not known to the master at the time of the discharge, is sufficient to justify a discharge under this section.

CHAPTER IV.—OF THE RIGHTS OF THE SERVANT AND THE DUTIES OF THE MASTER.

Bill, s. 16.

14. Where a master refuses to receive his servant into his service, the servant is entitled to compensation for the injury caused by such refusal, unless at the date of the refusal a cause exists which, if he had entered the service, would have justified his discharge.

Servant's right to compensation from master refusing to receive into service.

When the service is to begin on a future day, a suit for such compensation may be brought, at the option of the plaintiff, either immediately on the refusal or on or after such future day.

Illustration.

Hochster v. *De La Tour*, E. & B. 678, 691. As to measure of damages, see Explanation to section 73 of Act IX of 1872.

A, in September, engages a servant, B, at Rs. 30 per mensem to accompany him on tour for three months through India, to commence on the first of November. In October, A writes to B saying that he has changed his mind and no longer requires B's services. B thereupon institutes a suit against A for compensation. Afterwards, before the first of November, B obtains another engagement at Rs. 30 per mensem to commence on the first December. There exists no cause which, if B had entered the service, would have justified his discharge. B is entitled to a decree for compensation against A.

Bill, s. 17.

15. Where a servant has entered his master's service, the master is under the following obligations:—

Obligations of master—

(*a*) he must retain the servant during the whole time that he has contracted to do so, unless the contract has been terminated under section eight:

as to retaining servant;

(*b*) he must pay the wages which he has contracted to pay: provided that, where such wages are payable periodically, and the servant is rightfully discharged, or wrongfully quits the service, the servant is not entitled to any wages for his services since the last day on which a payment became due to him under the contract:

as to payment of wages;

Ramji Manee v. *Little*, 10 Bomb. 57.

(*c*) he must indemnify the servant from liability for doing any act pursuant to an order of his master which he was bound to obey, or any unlawful act, which the servant, not having reason to believe it to be unlawful, was induced by the conduct of his master to believe to be lawful:

N. Y. Code, § 1005.

as to indemnifying servant;

Smith 189.

(*d*) he must not inflict any punishment on the servant, by way of imprisonment, corporal chastisement, forfeiture of wages or otherwise, whether the servant is or is not a minor.

as to punishment;

Nothing contained in this clause renders void any agreement under which the master may, in the events therein specified, withhold the whole or any part of the servant's wages:

Campbell v. *E. I. Co.*, Bourke 56.

(*e*) where the master personally works along with the servant, he must make compensation to the servant for injury caused to such servant by the master's want of ordinary care or reasonable skill:

as to compensating servant for injury caused by master's neglect;

(*f*) where the servant is employed in a work of danger, the master must (1) use reasonable endeavours to provide proper materials and apparatus for the work, and (2) take all other reasonable precautions so as to protect the servant against unnecessary risk: and where the servant is employed in such work along with fellow-servants, (3) use reasonable endeavours to provide fellow-servants of ordinary care and reasonable skill:

Smith 212, 213: L. R. 3 Sc. & Ir. App. Ca. 383, 2: Smith 206, 214.

as to servants employed in dangerous work;

(*g*) where the servant is a domestic servant of European birth or parentage, the master must provide him with food of proper description and in sufficient quantity, and, in case of sickness or hurt, with the necessary medical or surgical attendance and medicine.

as to European domestic servants.

Illustrations.

Rule that one wrong-doer cannot sue another for contribution does not apply.

(*a*) A, a servant, in obedience to the command of his master, B, commits a trespass on the property of C, not having reason to believe that he is doing any injury. C sues A for damages and recovers Rs. 50. A is entitled to recover the Rs. 50 from B.

(*b*) A hires B, a brick-maker, to make bricks with C's trademark thereon. B, having no reason to believe that the trademark was C's, proceeds to make the bricks accordingly. C sues B to restrain him from using the trademark

and obtains an injunction with costs which B pays. B may recover the amount so paid from A.

Drylls v. Davis, 2 B & Ad. 516.

(*c*) A orders his servant B to sell an unsound mare, but not to warrant her soundness. B sells the mare to C with a warranty of soundness. C sues and recovers damages from B for breach of the warranty. B cannot recover these damages from A.

Ashworth v. Stanwix.

(*d*) A and B are lessees of a coal pit. B acts as banksman at the mouth of the pit, and whilst so acting is guilty of negligence whereby C, a pitman in the service of A and B, is injured. Both A and B are liable for the injury.

Bill, s. 18. Cf. Act IX of 1872, s. 225.

16. When a servant has sustained particular injury by a breach of any of the obligations imposed on his master by section fifteen, clauses (*e*) and (*f*), the servant is entitled to compensation for such injury: provided that he could not have avoided the injury by the exercise of ordinary care, and at the time of the injury he had no reason to believe that the breach had been committed.

Servant's right to compensation for breach of duty imposed by section 15, clauses (*e*) and (*f*).

If by ordinary care he might have avoided injury, he is the author of his own wrong.

Illustrations.

(*a*) A hires B and C to row, and D to steer, his boat. A has done nothing to ascertain D's competence to act as steersman. Owing to D's want of reasonable skill, the boat collides with a ship in full sail and B and C are injured. B and C may sue A for compensation.

(*b*) A railway company hires A to drive a locomotive, B to be guard of a train and C to regulate the switches. The company has neglected to ascertain that C was ordinarily careful, and owing to his carelessness the train runs off the line and A is killed and B is maimed. A's legal representative and B may sue the company for compensation.

Potts v. Plunkett, Smith 214.

(*c*) A employs B to work as his servant in a mine. Owing to A's negligence the roof of the mine is left unsafe. B, having no reason to believe in the existence of the danger, begins to work in the mine and a stone falls from the roof and breaks B's leg. B may sue A for compensation.

(*d*) A orders his servant, B, to carry a bag of rice up a ladder, which A knows, but B has no reason to believe, to be unsafe. B obeys the order. The ladder breaks and B falls and fractures his thigh. B may sue A for compensation.

Bill, s. 19.

17. When a servant is wrongfully discharged, he is entitled to compensation for the injury caused by the discharge in not being allowed to serve and earn the wages contracted for.

Compensation for wrongful discharge.

The amount of such compensation is subject to the following rules in cases to which they are applicable:—

Measure of compensation.

Redgwick 163. Act IX of 1872, s. 73.

(*a*) Where the contract is to employ for a specified term, the amount shall be the difference between the wages which the servant would have received under his contract with his master and the wages which he has, or might have, received under another contract of service:

(*b*) Where no term is specified, but the contract is terminable by fifteen days' notice, the amount shall be fifteen days' wages:

(*c*) Where no term is specified, but the contract is terminable by thirty days' notice, the amount shall be a month's wages:

(*d*) Where no term is specified, but the contract is terminable by ninety days' notice, the amount shall be three months' wages.

When a servant is wrongfully discharged at a place other than the place at which he entered the service, he is also entitled to the reasonable expenses of his journey back to the latter place.

18. A servant, whether hired for a fixed term or not, may, without notice or payment or tender of the amount of wages, terminate the contract of service— Bill, s. 20.

Termination of service by servant.

(*a*) if the master wilfully or permanently breaks any of his obligations to the servant;

(*b*) if the master commits against the servant any offence punishable under the Indian Penal Code, chapter XVI (*Of offences against the human body*) or XVII (*Of offences against property*); Acts causing trifling harm are not so punishable, Act XLV of 1860, s. 95. 1 Q. B. Div. 546.

(*c*) if the servant is prevented by permanent illness or other cause over which he has no control from fulfilling his contract.

Illustrations.

(*a*). A contracts to serve B for a year for the monthly sum of Rs. 100. B refuses to pay the amount due to A for the first month. A may thereupon terminate the contract.

(*b*). A contracts to serve B. B voluntarily causes hurt to A. A may thereupon terminate the contract.

19. When the servant is wrongfully discharged, or when the contract of service is terminated otherwise than by his rightful discharge, the servant or his legal representative, as the case may be, is entitled, in addition to the compensation and expenses (if any) recoverable by him under this Act or any other law, to the wages (if any) due for the period during which the servant has actually served the master. Bill, s. 21. N. Y. Code, § 1033. Wages when contract terminated by notice to quit given by servant, N.-W. P. Rep. 1867, Misc. Rulings 1.

Wages in case of wrongful discharge or termination of contract for master's fault or by death.

For the purpose of this section all wages shall (in the absence of an express agreement to the contrary) be deemed to accrue due from day to day.

CHAPTER V.—OF APPRENTICES.

Act XIX of 1850, s. 7.

20. Any child above the age of ten and under the age of eighteen years may be bound by the persons or officers hereinafter mentioned in this behalf apprentice in any fit trade, craft or employment for any specified term not exceeding seven years, so that it be not prolonged beyond the term of majority, or, in the case of females, marriage.

Apprenticing child between ten and eighteen years old.

The persons and officers above referred to are as follows:—

(*a*) the father of the apprentice; or

(*b*) if the father is dead, the guardian of the person of the apprentice; or

(*c*) if there is no such father or guardian, or if the father is incompetent to contract or has abandoned his child, any Magistrate; or

(*d*) in the case of a child convicted of any cognizable offence, the convicting Magistrate; or

(*e*) in the case of a child brought up by any public charity, the governors, directors or managers thereof.

21. Where a boy is bound under the last preceding section apprentice in the sea service, the following conditions must be observed:— Act XIX of 1850, s. 8.

Apprenticing in sea service.

(*a*) the person to whom he is bound must be a British subject and the owner of a registered ship belonging to and trading from some port in British India which has been declared to be a registering port under Act No. X of 1841;

(*b*) the ship in which he is to be employed must be such a ship, belonging to such a person, and commanded by a British subject, who must, when the apprentice is of European birth or parentage, be also of European birth or parentage.

The master of any ship in which an apprentice is employed shall, for the purposes of this chapter, be deemed the agent of the person to whom the apprentice is bound.

Act XIX of 1850, s. 8.

22. Every contract of apprenticeship shall be according to the form in the second schedule hereto annexed or to the like effect, and in writing, and shall set forth particularly—

Form and contents of contract.

(*a*) the age of the apprentice:

(*b*) the term for which he is bound;

(*c*) what he is to be taught;

(*d*) the pecuniary consideration (if any) on either part.

Act XIX of 1850, s. 9.

23. Every such contract shall be signed as follows:—

Signatures to contract.

(*a*) by the person to whom the apprentice is bound:

(*b*) by the person by whom he is bound, or when he is bound by the governors, directors or managers of a public charity, any two of them or their secretary or other officer appointed in this behalf; and

(*c*) by the apprentice, if he is of the age of fourteen years or more at the date of the contract.

Act XIX of 1850, s. 10.

24. No such contract shall be valid unless it is executed in manner aforesaid nor until it has been deposited—

Contract not valid unless executed as prescribed and deposited.

(*a*) if it has been executed in any of the towns of Calcutta, Madras or Bombay and the apprentice is not bound to the sea service,—in the Court of a Presidency Magistrate;

(*b*) if it has been executed elsewhere in British India and the apprentice is not bound to the sea service,—in the Court of the District Magistrate;

(*c*) if the apprentice is bound to the sea service, —in the office of the person appointed under the said Act No. X of 1841 to make registry of ships at the port where the apprentice is to begin his service.

The Magistrate or officer in whose Court or office any such contract is deposited shall give to each of the parties a copy thereof certified in manner provided by the Indian Evidence Act, 1872, section 76.

Certified copies.

The age set forth in any such contract shall be evidence of the age of the apprentice in all questions arising as to the right of the master to the continuance of the service. Act XIX of 1850, s. 2.

Evidence of age.

25. At any time during the apprenticeship the terms of service may be changed or the contract may be determined: provided that such change or determination— Act XIX of 1850, s. 11.

Alteration of terms of service.

(*a*) be with the consent of both parties to the contract or their legal representatives and of the apprentice if he is above the age of fourteen years; and

(*b*) be expressed in writing on the original contract with the signature of the proper parties, according to section twenty-three.

The Magistrate or registering officer shall thereupon make under his hand corresponding endorsements on the copies of the contract deposited in his Court or office.

26. The master of any apprentice may, with the consent of the person by whom he was bound or the legal representative of such person, and with the consent of the apprentice, if he is above the age of fourteen years, assign such apprentice to any other person who is willing to take him for the residue of his apprenticeship and subject to the conditions thereof: Act XIX of 1850, s. 12.

Assignment of apprentice to new master.

Provided that such assignee shall, by endorsement under his own hand on the contract, declare his acceptance of such apprentice, and acknowledge himself bound by the agreements therein mentioned to be performed on the part of the master: and that the consent of the other parties aforesaid be expressed in writing on the same and signed by them respectively.

Every such assignment shall be certified under the hand of the Magistrate or registering officer on the copy of the contract deposited in his Court or office according to the form given in the second schedule hereto annexed.

27. If the master of any apprentice dies before the end of the apprenticeship, the following results shall ensue:—

Effect of master's death during apprenticeship.

(*a*) the contract of apprenticeship shall be thereby determined, and a proportionate part, corresponding to the unexpired portion of the term, of any premium which has been paid to such master on the binding of the apprentice to him, shall be returned out of the estate of the deceased by his legal representative to the person who has paid the same, unless such legal representative continues the business in which such apprentice has been employed, and within three months of the death of the late master offers in writing to keep the apprentice on the terms of the original contract; in which case the estate of Act XIX of 1850, s. 13

the deceased shall be discharged from all liability in respect of such premium:

XIX of 1850, s. 20.

(*b*) every such offer shall be fully expressed and certified by the legal representative on the original contract of apprenticeship, and also by the Magistrate or registering officer on the copy thereof so deposited; and the apprentice shall be bound to the legal representative so keeping him for the remainder of the term of his apprenticeship:

(*c*) the apprentice shall be entitled to be maintained for three months from the master's death out of the assets left by him: provided that during such three months the apprentice continues to live with and serve as an apprentice the master's legal representative, or such person as he appoints.

XIX of 1850, s. 22.

28. If the master of any apprentice is during the apprenticeship adjudged to have committed an act of insolvency or declared an insolvent, the apprentice shall be discharged from all obligation under the contract of apprenticeship; and if any premium was paid on binding him apprentice, he or the person by whom he was bound shall be entitled to claim the amount thereof as a debt against the estate of the insolvent.

Effect of master's insolvency.

Penn v. *Ward*, 2 C. M. & R. 338.

29. The rights and duties of the master as regards the apprentice, and the rights and duties of the apprentice as regards the master, are (subject to the provisions of the contract of apprenticeship) as nearly as may be the same as those set forth in sections eleven, twelve, fifteen and eighteen: provided that if an apprentice is guilty of misbehaviour, his master may chastise him in a moderate manner.

Rights and duties of master and apprentice.

Master's powers to chastise.

CHAPTER VI.—JURISDICTION OF MAGISTRATES.

(*A*).—*Artisans, Workmen and Labourers.*

Bill, s. 26. Act XIII of 1859, which now applies to the Presidency-towns, the Bombay and Madras Mufassal, Massúrí, Landour, Saháranpur, Mirath, Murádábád, Bareli, Naini Tál, Sháhjahánpur, Agra, Farákhábád, Cawnpore, Allahábád, Benares, Mysore, Coorg, Sindh, the Panjáb and the Districts of Nimár, Sylhet and Goálpárá, and probably elsewhere. Gold and silver money given to a goldsmith as raw material wherewith to make an idol has been held an advance within the meaning of Act XIII of 1859, s. 2, 6 Mad. H. C. Rulings, xxiv.

30. When an employer advances to an artisan, workman or labourer money on account of, or to be used as material for, any specific piece of work which the latter has contracted to execute wholly or partly by himself, and such artisan, workman or labourer wilfully and without sufficient excuse neglects or refuses to perform his contract, the employer may complain to a Magistrate, who shall thereupon issue a summons or warrant, as he thinks fit, for bringing such artisan, workman or labourer before him.

Failure to perform work on account of which artisan has received an advance.

If the Magistrate, after hearing such evidence as the parties may adduce, is satisfied of the truth of the complaint, he shall, at the option of the employer, either—

(*a*) order the artisan, workman or labourer, on or before such day as the Magistrate directs, to repay the money advanced or such part thereof as the Magistrate thinks fit, together with any materials delivered by the employer to the artisan workman or labourer for the purpose of the contract, or

(*b*) order him to execute the work according to the terms of the contract.

If the artisan, workman or labourer fails to comply with either of such orders, the Magistrate may sentence him to imprisonment for a term which may extend to three months, or, when the order is for repayment of money, for such term or until such money is sooner repaid.

Where the Magistrate makes an order under clause (*b*), he may also, at the employer's request, require the artisan, workman or labourer to execute a bond, with sufficient sureties, for the due performance of the order; and, in default of his executing such bond, or furnishing such sureties to the satisfaction of the Magistrate, may sentence him to imprisonment for a term which may extend to three months.

Where the bond is executed, but the order under clause (*b*) is not duly performed, payment of the penalty of the bond may be enforced in manner provided by the Code of Criminal Procedure, section 396, or (in the towns of Calcutta, Madras and Bombay) by the Presidency Magistrates Act, 1877, section 77.

Nothing in this section applies to cases where the advance has been, in accordance with the contract, worked off or expended.

(*B*).—*Workmen employed on Public Works.*

Bill, s. 27. Act IX of 1860, which now applies to the Panjáb, nine Bombay Districts, Nimár, Nadiyá, 24-Parganas and Báráset, part of the Central Provinces and probably elsewhere.

31. Any Magistrate may enquire into and decide disputes as to wages, hire of carriage and price of work between any employers and their workmen employed in the construction of any railway, canal or other public work sanctioned by Government: Provided that the amount in dispute does not exceed two hundred rupees.

Disputes between employers and workmen on railways, &c.

Cases under this section shall be dealt with, so far as may be, as if they were trials under the Code of Criminal Procedure, chapter XVI. But no appeal shall lie from the decision in any such case.

When the Magistrate has heard and decided the case, he shall make an order for the payment, immediately or within such time as he directs, of such sum of money (if any) as appears to him to be justly due, and, if the person ordered to pay fails to pay such sum immediately or within such time as the Magistrate directs, the Magistrate shall issue his warrant to levy the money by distress and sale of the moveable property of the defaulter.

Bill, s. 28.

32. Whoever contracts to work for a specified term on any such railway, canal or other public work, or to execute any specific work in connection therewith, and who wilfully and without sufficient excuse neglects or refuses to perform such contract, shall be liable, on conviction before a Magistrate, to a fine not exceeding twenty rupees.

Punishment for breach of contract to work for fixed term on railway, &c.

But the Magistrate may, at the request of the employer, instead of punishing the servant so neglecting or refusing, order him by himself or another to execute the work according to the terms of his contract; and if he fail to comply with such order, the Magistrate may sentence him to imprisonment for a term which may extend to two months.

Power to order performance of contract.

(*C*).—*Apprentices.*

Act XIX of 1850, s. 13.

33. Upon complaint made to any Magistrate by or on behalf of any apprentice of refusal or neglect to provide for him, or to teach him according to the contract of apprenticeship, or of cruelty or other ill-treatment by his master, or by the agent under whom he has been placed by his master, the Magistrate may summon the master or his agent, as the case may be, if he is within his jurisdiction, to appear before him at a reasonable time, to be stated in the summons, to answer the complaint; and at such time, whether the master or his agent be present or not (service of the summons being proved), may examine into the matter of the complaint; and, upon proof thereof, may cancel the contract of apprenticeship, and assess upon the offender, whether he be the master or his agent, a reasonable sum for behoof of the apprentice, not exceeding four times the amount of the premium paid upon the binding, or if no premium or a less premium than fifty rupees was paid, not exceeding two hundred rupees; and, if the offender fails to pay the sum so assessed, may levy the same by distress and sale of his moveable property, and, if the offender is not the master but his agent, by distress and sale of the moveable property of the master also.

Complaint by apprentice against master.

Act XIX of 1850, s. 17.

34. The Magistrate may order any sum recovered under section thirty-three to be either laid out in binding the apprentice to another master, or otherwise for his benefit, or paid to the person by whom any premium was paid when he was bound apprentice.

Appropriation of sum recovered for apprentice on cancellation of contract.

Act XIX of 1850, s. 14.

35. No contract of apprenticeship shall be cancelled on account of moderate chastisement for misbehaviour given to any apprentice by his master or the agent of his master; and the provision for enabling the contract of apprenticeship to be cancelled shall not bar any criminal proceeding against any master or his agent for an assault or other offence committed against his apprentice for which he would be liable to be punished, whether or not any proceedings be taken for cancelling the contract of apprenticeship.

Contract not to be cancelled for moderate chastisement.

Liability of master for assault.

Act XIX of 1850, s. 15.

36. Upon complaint made to any Magistrate by or on behalf of the master of any apprentice of any ill-behaviour of such apprentice, or if such apprentice has absconded, the Magistrate may issue his warrant for apprehending such apprentice, and may hear and determine the complaint, and punish the offender, by an order for keeping the offender, if a boy, in confinement in any suitable place, not being a criminal gaol, for any time not exceeding one month, of which one week may be in solitary confinement, during which time such allowance shall be made for his subsistence by the master or his agent as the Magistrate may order; and, if the offender be a boy of not more than fourteen years of age, may order him to be privately whipped: or, if the offender be a girl, or in the case of any boy the Magistrate deem any such punishment unfit, he may pass an order empowering the master of the apprentice or his agent to keep the offender in close confinement in his own house, or on board the vessel to which he belongs upon bread and water, or such other plain food as may be given without injury to the health of the apprentice, for a period not exceeding one month.

Complaint by master against apprentice.

Act XIX of 1850, s. 16.

37. Upon complaint of wilful and repeated ill-behaviour on part of the apprentice, and on the demand of the master, the Magistrate may order the contract of apprenticeship to be cancelled, whether or not the charge is proved; but only with the consent of the apprentice and of his father or guardian, if the charge is not proved. Such cancelling shall be with or without refund of the whole or part of any premium paid to the master on binding such apprentice as to the Magistrate seems fit; and all sums so refunded shall be applied under the direction of the Magistrate for behoof of the apprentice.

Cancellation of contract for misconduct of apprentice.

Act XIX of 1850, s. 18.

38. No Magistrate shall entertain a complaint on the part of a master against an apprentice unless it be brought within one month after the cause of complaint arose; or, if the cause of complaint arose on boardship during a voyage, within one month after the arrival thereof at a port or place in British India;

and no Magistrate shall entertain a complaint on the part of an apprentice against his master or the agent of his master unless it be brought within three months after the cause of complaint arose; or if the cause of complaint arose on boardship during a voyage, within three months after the arrival of the ship at a port or place in British India.

Limitation of complaints.

(*d*).—*Miscellaneous.*

Bill, s. 29.

39. In this chapter "master" and "employer" include also any person authorized to act on behalf of a master or employer; and "Magistrate" means in the towns of Calcutta, Madras and Bombay a Presidency Magistrate, and elsewhere a Magistrate of the first or second class empowered by the Local Government to act under this chapter.

"Master," "employer" and "Magistrate."

Bill, s. 30.

40. Nothing herein contained shall prevent any person from being prosecuted under any other law for any offence punishable under this chapter: provided that no person shall be punished twice for the same offence;

Saving of prosecutions under other laws.

2. Mad.

and no order made under this chapter for the payment of money shall, while the same remains unpaid, deprive the complainant of any civil remedy which he might have had but for this Act.

Saving of civil remedies.

THE FIRST SCHEDULE.

ENACTMENTS REPEALED.

(*See section 2.*)

Number and year.	Subject.
XIX of 1850 ...	For the binding of Apprentices.
XIII of 1859 ...	For the punishment of breaches of contract by artificers, workmen and labourers in certain cases.
IX of 1860 ...	For the speedy determination of certain disputes between workmen engaged on railway and other public works and their employers.

THE SECOND SCHEDULE.

FORMS.

(*See sections 22 and 26.*)

A.—Form of Agreement.

This agreement, made the day of in the year between A. B. of and C. D. of , witnesseth that the said A. B. doth this day bind E. F., a boy (*or* girl) of the age of years completed, son (*or* daughter) of the said A. B. (*or otherwise describing the relation in which A. B. and E. F. stand*) to dwell with and serve the said C. D., as an apprentice, from this day forth for years (*in the case of a girl add*, "or until the time of her marriage, which shall first happen"), during all which term the said apprentice shall faithfully serve the said C. D. according to his (*or* her) skill and ability in all lawful business, and demean and behave himself (*or* herself) honestly, orderly and obediently, in all things towards the said C. D. and his (*or* her) family. And the said C. D. for himself (*or* herself) and his (*or* her) executors and administrators, in consideration [of the premium or sum of paid by the said A. B. to the said C. D., and] of the faithful service of the said E. F., doth agree with the said A. B., his (*or* her) executors and administrators, that he (*or* she) will teach or cause to be taught to the said E. F., in the best way and manner that he (*or* she) can, the trade (craft or employment) of a during the said term; and will also, during the said term, provide the said apprentice with good, wholesome and sufficient food, clothes, lodging, washing and all other things necessary, fit and reasonable for an apprentice (and further, *here insert any special agreements*).

If there is no premium, the words between brackets may be omitted.

If E. F. is not above the age of fourteen years, the words between brackets may be omitted.

In witness whereof, the parties have hereunto set their hands and seals, the day and year above written.

A. B. L. S.

C. D. L. S.

B.—Form of Order of Assignment.

(To be endorsed on the Agreement.)

Be it known to all men that on the day of in the year personally, appeared before G. H., Magistrate of C. D. of with E. F., his (*or* her) apprentice, and J. K. of , and desired that the agreement of apprenticeship whereby the said E. F. was bound to the said C. D. might be assigned to the said J. K., and the said G. H., having satisfied himself, by personal examination of the said E. F. and by other lawful ways and means, that such assignment is for the benefit of the said E. F., and is made with the consent of [the said E. F., and of] all persons whose consent thereunto by law is required, doth allow such assignment; and the contract of apprenticeship whereby the said E. F. was on the day of in the year bound to the said C. D. as an apprentice to learn the trade (craft *or* employment) of a shall henceforth endure, unto the end of the said term, as if the said J. K. had been originally party to the said deed, and had executed the same, in the place of the said C. D., and shall be bound, for himself (*or* herself), his (*or* her) executors or administrators, to fulfil the agreements by the said C. D. to be performed, and the said E. F. shall henceforth be bound unto the said J. K., in like manner as he (*or* she) was by the said agreement bound unto the said C. D.

C. D. *E. F.* *J. K.*

In witness whereof, the said C. D., E. F. and J. K. have hereunto set their hands before me, the day and year above written.

G. H., Magistrate.

C.

THE EASEMENTS BILL, 1879.

CONTENTS.

PREAMBLE.

PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
2. Savings.
3. Repeal of Act XV of 1877, sections 26 and 27.

CHAPTER I.—OF EASEMENTS GENERALLY.

4. "Easement" defined.
   Dominant and servient heritages and owners.
5. Affirmative easements.
   Negative easements.
6. Continuous and discontinuous, apparent and non-apparent, easements.

8. Easements restrictive of certain rights.
   (*a*) Exclusive right to enjoy:
   (*b*) Rights arising from situation.

CHAPTER II.—THE IMPOSITION, ACQUISITION AND TRANSFER OF EASEMENTS.

9. Who may impose easements.
10. Servient owners.
11. Lessor and mortgagor.
    Lessee.
12. Who may acquire easements.
13. Easements of necessity.
14. Direction of way of necessity.
15. Acquisition by prescription.
16. Exclusion in favour of reversioner of servient heritage.
17. Rights which cannot be acquired by prescription.
18. Customary easements.
19. Transfer of dominant heritage passes easement.

CHAPTER III.—THE INCIDENTS OF EASEMENTS.

20. Rules controlled by contract or title.
    Incidents of customary easements.
21. Bar to use unconnected with enjoyment.
22. Exercise of easement.
    Confinement of exercise of easement.
23. Right to alter mode of enjoyment.
24. Right to do acts to secure enjoyment.
    Accessory rights.
25. Liability for expenses necessary for preservation of easement.
26. Liability for damage from want of repair.
27. Servient owner not bound to do anything.
28. Extent of easements—
    Easement of necessity.
    Other easements.

SECTIONS.

(*a*) Right of way;
(*b*) Right to light or air acquired by grant;
(*c*) Prescriptive right to light or air;
(*d*) Prescriptive right to pollute air and water;
(*e*) Other prescriptive rights.

29. Increase of easement.
30. Partition of dominant heritage.
31. Obstruction in case of excessive user.

CHAPTER IV.—THE DISTURBANCE OF EASEMENTS.

32. Right to enjoyment without disturbance.
33. Suit for disturbance of easement.
34. When cause of action arises for removal of support.
35. Polluting air and water previously impure.
36. Suit for continuing disturbance.
37. Injunction to restrain disturbance.
38. Abatement of obstruction of easement.

CHAPTER V.—THE EXTINCTION, SUSPENSION AND REVIVAL OF EASEMENTS.

39. Extinction by dissolution of right of servient owner.
40. Extinction by release.
41. Extinction by revocation.
42. Extinction on expiration of limited period or happening of dissolving condition.
43. Extinction on termination of necessity.
44. Extinction of useless easement.
45. (*a*) Extinction by substantial change of dominant heritage.
    (*b*) Extinction by material and permanent increase of burden.
46. Extinction on permanent alteration of servient heritage by superior force.
47. Extinction by destruction of either heritage.
48. Extinction by unity of ownership.
49. Extinction by non-user.
50. Extinction of accessory rights.
51. Suspension of easement.
52. Servient owner not entitled to require continuance, nor to compensation for suspension.
53. Revival of easements.

CHAPTER VI.—LICENSES.

54. "License" defined.
55. Who may grant license.
56. Grant may be express or implied.
57. Accessory licenses annexed by law.
58. License when transferable.
59. Grantor's duty to disclose defects.
60. Grantor's duty not to render property unsafe.
61. Grantor's transferee not bound by license.
62. License when revocable.
63. Revocation express or implied.
64. License when deemed revoked.
65. Licensee's rights on revocation.
66. Licensee's rights on eviction.

A Bill to define and amend the law relating to Easements and Licenses.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend the law relating to Easements and Licenses; It is hereby enacted as follows :—

Preamble.

PRELIMINARY.

Bill, s. 1. Short title. **1.** This Act may be called "The Easements Act, 1880:"

Local extent. It extends to the whole of British India except the scheduled districts;

Commencement. and it shall come into force on the first day of *March, 1880.*

Bill, s. 2. Savings. **2.** Nothing herein contained shall be deemed to affect—

(*a*) any right of the Government to regulate the collection, retention and distribution of the water of rivers and streams flowing in natural channels and of natural lakes and ponds; or of water flowing, collected, retained or distributed in or by any channel or other work constructed at the public expense for irrigation;

(*b*) any customary or other right (not being a license) in or over immoveable property which the Government, the public or any person may possess irrespective of other immoveable property; or

(*c*) any right acquired, or arising out of a relation created, before this Act comes into force;

(*d*) any law not hereby expressly repealed.

Bill s. 3. **3.** Sections 26 and 27 of the Indian Limitation Act, 1877, and the definition of 'easement' contained in that Act, are hereby repealed.

Repeal of Act XV of 1877, sections 26 and 27.

All references to the said sections, or to sections 27 and 28 of Act No. IX of 1871, shall be read as made to sections fifteen and sixteen of this Act.

CHAPTER I.—OF EASEMENTS GENERALLY.

Bill, s. 4. "Easement" defined. **4.** An easement is a right which the owner or occupier of certain land possesses as such for the beneficial enjoyment of that land, to do and continue to do something, or prevent and continue to prevent something being done, in, or upon, or in respect of, certain other land not his own.

Dominant and servient heritages and owners. The land for the beneficial enjoyment of which the right exists is called the dominant heritage, and the owner or occupier thereof the dominant owner: the land on which the liability is imposed is called the servient heritage, and the owner thereof the servient owner.

Explanation.—In the first and second clauses of this section, the expression 'land' includes also things permanently attached to the earth: the expression 'beneficial enjoyment' includes also possible convenience, remote advantage, and even a mere amenity; and the expression 'to do something' includes removal and appropriation by the dominant owner, for the beneficial enjoyment of the dominant heritage, of any part of the soil of the servient heritage or anything growing or subsisting thereon.

Illustrations.

(*a*). A, as the owner of a certain house, has a right of way thither over his neighbour B's land for purposes connected with the beneficial enjoyment of the house. This is an easement.

(*b*). A, as the owner of a certain house, has the right to go on his neighbour B's land, and to take water for the purposes of his household out of a spring therein. This is an easement.

(*c*). A, as the owner of a certain house, has the right to conduct water from B's stream to supply the fountains in the garden attached to the house. This is an easement.

(*d*). A, as the owner of a certain house and farm, has the right to graze a certain number of his own cattle on B's field, or to take, for the purpose of being used in the house, by himself, his family, guests, lodgers and servants, water or fish out of C's tank, or timber out of D's wood, or to use, for the purpose of manuring his land, the leaves which have fallen from the trees on E's land. These are easements.

(*e*). A dedicates to the public the right to occupy the surface of certain land for the purpose of passing and repassing. This right is not an easement.

(*f*). A is bound to cleanse a watercourse running through his land and keep it free from obstruction for the benefit of B, a lower riparian owner. This is not an easement.

Bill, s. 5 Affirmative easements. **5.** Easements are either affirmative or negative. An affirmative easement is one authorizing the dominant owner to do in, upon or in respect of, the servient heritage, something for the beneficial enjoyment of the dominant heritage.

Negative easements. A negative easement is one binding the servient owner to refrain, for the beneficial enjoyment of the dominant heritage, from doing something in, upon or in respect of, the servient heritage.

Illustrations.

The following are affirmative easements :—

(*a*). A right of way annexed to A's house over B's land.

(*b*). An easement annexed to A's land to conduct water across B's land by an artificial watercourse.

(*c*). An easement annexed to A's house to discharge water by a spout or conduit, or projecting eaves, on B's land.

(*d*). An easement annexed to A's farm to go to his neighbour B's tank to water A's cattle, or to B's well to draw water for the use of A's household.

(*e*). An easement annexed to A's land to throw back upon the lands of riparian owners higher up a natural stream water which, unless so thrown back, would pass from such lands.

(*f*). An easement annexed to A's land to discharge the water of a natural stream upon B's land lying lower down the stream, either polluted or with the force of its natural current increased or diminished.

(*g*). An easement annexed to A's dock to place the vessels therein so that their bowsprits project over B's wharf.

(*h*). An easement annexed to A's house to burn corpses on B's land.

(*i*). An easement annexed to A's land to thresh grain on B's field.

The following are negative easements :—

(*j*). An easement annexed to B's house to receive light and air by its windows without obstruction by his neighbour A. This binds A to refrain, for the beneficial enjoyment of B's house, from exercising his right to build on his own land.

(*k*). An easement annexed to A's land encumbered by buildings, to receive the support of his neighbour B's soil. This binds B to refrain, for the beneficial enjoyment of A's land, from exercising his right to excavate his own soil.

(*l*). An easement annexed to A's house to insert beams in, or to place beams on, his neighbour B's wall. This binds B to refrain, for the beneficial enjoyment of A's house, from exercising his right to pull down his own wall.

(*m*). An easement annexed to A's house to discharge the rain running from its roof upon his neighbour B's land. This binds B to refrain, for the beneficial enjoyment of A's house, from exercising his right to build on his own land so as to prevent the discharge.

(*n*). A customary easement annexed to B's house to restrain his neighbour A from opening doors or windows in such a position as to command a view into B's housetop or courtyard. This binds A to refrain, for the beneficial enjoyment of B's house, from exercising his right to make openings in his own walls of such a character as to interfere with B's privacy.

Bill, s. 6. Continuous and discontinuous, apparent and non-apparent, easements. **6.** Easements are either continuous or discontinuous, apparent or non-apparent.

A continuous easement is one whose exercise is or may be continual without the act of man.

A discontinuous easement is one that needs the act of man for its exercise.

An apparent easement is one that has some permanent visible sign of its existence.

A non-apparent easement is one that has no such sign.

Illustrations.

(*a*). A right annexed to B's house to receive light by the windows without obstruction by his neighbour A. This is a continuous easement.

(*b*). A right of way annexed to A's house over B's land. This is a discontinuous easement.

(*c*). Rights annexed to A's land to lead water thither across B's land by an aqueduct and to draw off water thence by a drain. These are apparent easements.

(*d*). A right annexed to A's house to prevent B from building on his own land. This is a non-apparent easement.

Bill, s. 14. Easement for limited time or on condition. **7.** An easement may be permanent, or for a term of years or other limited period, or subject to periodical interruption, or exerciseable only at a certain place, or at certain times, or between certain hours, or for a particular purpose, or on condition that it shall commence or become void or voidable on the happening of a specified event or the performance or non-performance of a specified act.

Bill, s. 7. Easements restrictive of certain rights. **8.** Easements are restrictions of one or other of the following rights (namely) :—

Exclusive right to enjoy. (*a*). The exclusive right of every owner of immoveable property (subject to any law for the time being in force) to enjoy and dispose of the same and all products thereof and accessions thereto:

Rights arising from situation. (*b*). The right of every owner of immoveable property (subject to any law for the time being in force) to enjoy without disturbance by another the natural advantages arising from its situation.

Illustrations.

(*a*). The exclusive right of every owner of land in a town to build thereon, subject to any municipal law for the time being in force. N.-W. P (1870), 169, 182.

(*b*). The right of every owner of land that the air passing thereto shall not be unreasonably polluted by other persons.

(*c*). The right of every owner of a house that his physical comfort shall not be interfered with materially and unreasonably by noise or vibration caused by any other person. Recognized by the High Court, N.-W. P., No. 114 of 1878, 28th November, 1878, *Makadeo Misser* v. *Phaikoo Singh.*

(*d*). The right of every owner of land to so much light and air as pass vertically thereto.

(*e*). The right of every owner of land that such land, in its natural condition, shall have the support naturally rendered by the subjacent and adjacent soil of another person.

Explanation.—Land is in its natural condition when it is not excavated and not subjected to artificial pressure; and the "subjacent and adjacent soil" mentioned in this illustration means such soil only as in its natural condition would support the dominant heritage in its natural condition. *Mayor of Birmingham* v. *Allen*, 40 L. J. Ch.

(*f*). The right of every owner of land that, within his own limits, the water which naturally passes or percolates by, over or through his land, shall not, before so passing or percolating, be unreasonably polluted by other persons.

(*g*). The right of every owner of land to collect, and dispose within his own limits of, all water under the land and all water on its surface which does not pass in a defined channel. Marshall 506.

(*h*). The right of every owner of land that the water of every natural stream which passes by, through or over his land in a defined natural channel shall be allowed by other persons to flow within such owner's limits without interruption and without material alteration in quantity, direction, force or temperature: the right of every owner of land abutting on a natural lake or pond, into or out of which a natural stream flows, that the water of such lake or pond shall be allowed by other persons to remain within such owner's limits without material alteration in quantity or temperature. L. R. 6 Ind. App. 33; 3 W. R. 218; 13 W. R. 48; 8 W. R. 535.

(*i*). The right of every owner of upper land that water naturally rising in or falling on such land, and not passing in defined channels, shall be allowed by the owner of adjacent lower land to run naturally thereto. 20 W. R. 287.

(*j*). The right of every owner of land abutting on a natural stream, lake or pond to use and consume its water for drinking, household purposes, and watering his cattle and sheep; and the right of every such owner to use and consume the water for irrigating such land, and for the purposes of any manufactory situate thereon, provided that he does not thereby cause material injury to other like owners,

Explanation.—A natural stream is a stream, whether permanent or intermittent, tidal or tideless, on the surface of land or underground, which flows by the operation of nature only and in a natural and known course.

CHAPTER II.—THE IMPOSITION, ACQUISITION AND TRANSFER OF EASEMENTS.

Bill, s. 8.

9. An easement may be imposed by any one in the circumstances and to the extent in and to which he may transfer his interest in the servient heritage.

Who may impose easements.

Illustrations.

(*a*). A is tenant of B's land under a lease for an unexpired term of twenty years and has power to transfer his interest under the lease. A may impose an easement on the land to continue during the time that the lease exists or for any shorter period.

(*b*). A is tenant for his life of certain land with remainder to B absolutely. A cannot, unless with B's consent, impose an easement thereon which will continue after the determination of his life-interest.

(*c*). A, B and C are co-owners of certain land. A cannot, without the consent of B and C, impose an easement on the land or on any part thereof.

(*d*). A and B are lessees of the same lessor, A of a field X for a term of five years, and B of a field Y for a term of ten years. A's interest under his lease is transferable; B's is not. A may impose on X, in favour of B, a right of way terminable with A's lease.

(*e*). A is the trustee of certain land for the benefit of B. A cannot, without the consent of B, impose an easement on the trust-property.

Bill, s. 9.

10. Subject to the provisions of section nine, a servient owner may impose on the servient heritage any easement that does not lessen the utility of the existing easement. But he cannot, without the consent of the dominant owner, impose an easement on the servient heritage which would lessen such utility.

Servient owners.

Illustrations.

(*a*). A has, in respect of his mill, a right to the uninterrupted flow thereto, from sunrise to noon, of the water of B's stream. B may grant to C the right to divert the water of the stream from noon to sunset: provided that A's supply is not thereby diminished.

(*b*). A has, in respect of his house, a right of way over B's land. B may grant to C, as the owner of a neighbouring farm, the right to feed his cattle on the grass growing on the way: provided that A's right of way is not thereby obstructed.

Bill, s. 10.

11. Subject to the provisions of section nine, a lessor may impose, on the property leased, any easement that does not derogate from the rights of the lessee as such, and a mortgagor may impose, on the property mortgaged, any easement that does not render the security insufficient within the meaning of the Transfer of Property Act, section 63. But a lessor or mortgagor cannot, without the consent of the lessee or mortgagee, impose any other easement on such property, unless it be to take effect on the termination of the lease or the redemption of the mortgage.

Lessor and mortgagor.

No lessee or other person having a derivative interest may impose on the property held by him as such an easement to take effect after the expiration of his own interest or in derogation of the right of the lessor or the superior proprietor.

Lessee.

Bill, s. 11.

12. An easement may be acquired by the owner of the dominant heritage or, on his behalf, by any person in possession of the same.

Who may acquire easements.

One of two or more co-owners may, with or without the consent of the other or others, acquire an easement for the beneficial enjoyment of the heritage held in co-ownership.

No lessee of immoveable property can acquire for the beneficial enjoyment of other immoveable property of his own an easement in or over the property comprised in his lease. 7 Mad. 64.

13. Where one person transfers or bequeathes immoveable property to another,—

Easements of necessity.

(*a*) if an easement in other immoveable property of the transferor or testator is absolutely necessary for enjoying the subject of the transfer or bequest, the transferee or legatee shall be entitled to such easement, or

(*b*) if such an easement is apparent and continuous and necessary for enjoying the said subject as it was enjoyed when the transfer or bequest took effect, the transferee or legatee shall, unless a different intention is expressed or necessarily implied, be entitled to such easement;

(*c*) if an easement in the subject of the transfer or bequest is absolutely necessary for enjoying other immoveable property of the transferor or testator, the transferor or the legal representative of the testator shall be entitled to such easement, or

(*d*) if such an easement is apparent and continuous and necessary for enjoying the said property as it was enjoyed when the transfer or bequest took effect, the transferor or the legal representative of the testator shall, unless a different intention is expressed or necessarily implied, be entitled to such easement.

Where a partition is made of the joint property of several persons,— 8 Bom. 181.

(*e*) if an easement over the share of one of them is absolutely necessary for enjoying the share of another of them, the latter shall be entitled to such easement, or

(*f*) if such an easement is apparent and continuous and necessary for enjoying the share of the latter, he shall, unless a different intention is expressed or necessarily implied, be entitled to such easement.

The easements mentioned in this section, clauses (*a*), (*c*) and (*e*), are called easements of necessity.

Where immoveable property passes by operation of law, the persons from and to whom it so passes are, for the purpose of this section, to be deemed, respectively, the transferor and transferee.

Illustrations.

(*a*). A sells B a field, inaccessible except by passing over A's adjoining land, or by trespassing on the land of a stranger. B is entitled to a right of way over A's adjoining land to the field sold.

(*b*). A, the owner of two fields, sells one to B, and reserves the other. The field reserved is inaccessible except by passing over the field sold to B. A is entitled to a right of way over B's field to the field reserved.

(*c*). A grants B the minerals under a certain field belonging to A. B is entitled, if there is no other way by which he can lawfully gain the minerals, to dig through the surface of the field and to carry the minerals over it.

(*d*). A sells B a house, with windows overlooking A's land, which A retains. The light which passes over A's land to the windows is necessary for enjoying the house as it was enjoyed when the grant took effect. B is entitled to the light, and A cannot afterwards obstruct it by building on his land.

(*e*). A sells B a house, with windows overlooking A's land. The light passing over A's land to the windows is necessary for enjoying the house as it was enjoyed when the grant took effect. Afterwards A sells the land to C. Here C cannot obstruct the light by building on the land, for he takes it subject to the burdens to which it was subject in A's hands.

(*f*). A is the owner of a house and adjoining land. The house has windows overlooking the land. A simultaneously sells the house to B and the land to C. The light passing over the land is necessary for enjoying the house as it was enjoyed when the sale was made. Here A impliedly grants B a right to the light, and C takes the land subject to the restriction that he may not build so as to obstruct such light.

(*g*). A is the owner of a house and adjoining land. The house has windows overlooking the land. A, retaining the house, sells the land to B, without reserving any easement. The light passing over the land is necessary for enjoying the house as it was enjoyed when the sale took effect. A is entitled to the light, and B cannot build on the land so as to obstruct such light.

(*h*). A sells B a factory. B is entitled, as against A, to pollute the air, when necessary, with smoke and vapours from the factory.

(*i*). A, the owner of two adjoining houses, Y and Z, sells Y to B, and retains Z. B is entitled to the benefit of all the gutters and drains common to the two houses and necessary for enjoying Y as it was enjoyed when the sale was made, and A is entitled to the benefit of all the gutters and drains common to the two houses and necessary for enjoying Z as it was enjoyed when the sale was made.

(*j*). A, the owner of two adjoining buildings, sells one to B, retaining the other. B is entitled to a right to lateral support from A's building, and A is entitled to a right to lateral support from B's building.

(*k*). A, the owner of two adjoining buildings, sells one to B, and the other to C. C is entitled to lateral support from B's building, and B is entitled to lateral support from C's building.

(*l*). A grants land to B for the purpose of building a house thereon. B is entitled to such amount of lateral and subjacent support from A's land as is necessary for the safety of the house.

(*m*). Under the Land Acquisition Act, 1870, the officer of a Railway Company compulsorily acquires a portion of B's land for the purpose of making a siding. The Company is entitled to such amount of lateral support from B's adjoining land as is essential for the safety of the siding.

(*n*). Owing to the partition of joint property, A becomes the owner of an upper room in a building and B becomes the owner of the portion of the building immediately beneath it. A is entitled to such amount of vertical support from B's portion as is essential for the safety of the upper room.

(*o*). A lets a house and grounds to B for a particular business. B has no access to them other than by crossing A's land. B is entitled to a right of way over that land suitable to the business to be carried on by B in the house and grounds.

(*p*). A lets land to B, but excepts all the trees of a certain age growing on the land. A and the intending purchasers of the trees are entitled to a right of way over the land for the purpose of examining the trees. A is also entitled to a right of way over the land for the purpose of felling and removing the trees when they have attained the specified age.

Bill, s. 13.

14. When a right to a way of necessity is created under section thirteen, the transferor, the legal representative of the testator, or the owner of the share in which the right exists, as the case may be, is entitled to set out the way; but it must be reasonably convenient for the dominant owner.

Direction of way of necessity.

When the person so entitled to set out the way refuses or neglects to do so, the dominant owner may set it out.

Bill, s. 15. Act XV of 1877, s. 26.

15. Where the access and use of light or air to and for any building have been peaceably enjoyed therewith, as an easement, and as of right, without interruption, and for twenty years,

Acquisition by prescription.

and where support from one person's land, or things affixed thereto, has been peaceably received by another person's land subjected to artificial pressure, or by things affixed thereto, as an easement, without interruption, and for twenty years,

and where any way or watercourse, or the use of any water, or any other easement (whether affirmative or negative), has been peaceably and openly enjoyed by any person claiming title thereto, as an easement and as of right, without interruption, and for twenty years,

the right to such access and use of light or air, support, way, watercourse, use of water or other easement shall be absolute.

Each of the said periods of twenty years shall be taken to be a period ending within two years next before the institution of the suit wherein the claim to which such period relates is contested.

Explanation I.—Nothing is an enjoyment within the meaning of this section when it has been had in pursuance of an agreement with the owner or occupier of the property over which the right is claimed and it is apparent from the agreement that such right has not been granted as an easement, or if granted as an easement, that it has been granted for a limited period, or subject to a condition on the fulfilment of which it is to cease.

Explanation II.—Nothing is an interruption within the meaning of this section, unless where there is an actual cessation of the enjoyment by reason of an obstruction by the act of some person other than the claimant, and unless such obstruc-

tion is submitted to or acquiesced in for one year after the claimant has notice thereof and of the person making or authorizing the same to be made.

Explanation III.—Suspension of enjoyment in pursuance of a contract between the dominant and servient owners is not an interruption within the meaning of this section.

Explanation IV.—In the case of an easement of support, where the soil of the dominant heritage is subjected to artificial pressure not externally apparent, or where the outward thrust of things affixed thereto is enhanced by causes not externally apparent, the said period of twenty years begins when the circumstance by which the burden on the servient heritage is increased becomes known to the servient owner.

Explanation V.—In the case of an easement to pollute water, the said period of twenty years begins when the pollution first prejudices perceptibly the servient heritage.

Illustrations.

(*a*). A suit is brought in 1881 for obstructing a right of way. The defendant admits the obstruction, but denies the right of way. The plaintiff proves that the right was peaceably and openly enjoyed by him, claiming title thereto as an easement and as of right, without interruption, from first January 1860 to first January 1880. The plaintiff is entitled to judgment.

(*b*). In a like suit also brought in 1881, the plaintiff merely proves that he enjoyed the right in manner aforesaid from 1858 to 1878. The suit shall be dismissed, as no exercise of the right by actual user has been proved to have taken place within two years next before the institution of the suit.

(*c*). In a like suit the plaintiff shows that the right was peaceably and openly enjoyed by him for twenty years. The defendant proves that for a year of that time the plaintiff was entitled to possession of the servient heritage as lessee thereof and enjoyed the right as such lessee. The suit shall be dismissed, for the right of way has not been enjoyed 'as an easement' for twenty years.

(*d*). In a like suit the plaintiff shews that the right was peaceably and openly enjoyed by him for twenty years. The defendant proves that the plaintiff on one occasion during the twenty years had admitted that the user was not of right and asked his leave to enjoy the right. The suit shall be dismissed, for the right of way has not been enjoyed 'as of right' for twenty years.

Bill, s. 16. Act XV of 1877, s. 27.

16. Provided that, when any land or water upon, over, or from which any easement has been enjoyed or derived has been held under or by virtue of any interest for life or any term of years exceeding three years from the granting thereof, the time of the enjoyment of such easement during the continuance of such interest or term shall be excluded in the computation of the said last-mentioned period of twenty years, in case the claim is, within three years next after the determination of such interest or term, resisted by the person entitled, on such determination, to the said land or water.

Exclusion in favour of reversioner of servient heritage.

Illustration.

A sues for a declaration that he is entitled to a right of way over B's land. A proves that he has enjoyed the right for twenty-five years; but B shews that during ten of these years C had a life-interest in the land, that on C's death B became entitled to the land, and that within two years after C's death he contested A's claim to the right. The suit must be dismissed, as A, with reference to the provisions of this section, has only proved enjoyment for fifteen years.

Bill, s. 17.

17. Easements acquired under section fifteen are said to be acquired by prescription, and are called prescriptive rights.

Rights which cannot be acquired by prescription.

None of the following rights can be so acquired:—

(*a*) a right which would tend to the total destruction of the servient heritage or the subject of the right;

(*b*) a right which would be inconsistent with, and not subordinate to, an actual and existing grant made by the servient owners;

(*c*) a right to the free passage of light or air to an open space of ground;

(*d*) a right to surface-water not flowing in a stream and not permanently collected in a pool, tank or otherwise;

(*e*) a right to underground water not passing in a defined channel.

Explanation.—In this section the expression 'servient owner' means the person who, in case the acquisition referred to were made, would be the owner of the property on which liability would be imposed; and the expression 'servient heritage' means such property.

New.

18. An easement may be acquired in virtue of a local custom. Such easements are called customary easements.

Customary easements.

Illustrations.

(*a*). By the custom of a certain village every cultivator of village land is entitled, as such, to graze his cattle on the common pasture. A, having bought a plot of uncultivated land in the village, breaks up and cultivates that plot. He thereby acquires an easement to graze his cattle in accordance with the custom.

(*b*). By the custom of a certain town no owner or occupier of a house can open a new window therein so as substantially to invade his neighbour's privacy. A builds a house in the town near B's house. A thereupon acquires an easement that B shall not open new windows in his house so as to command a view of the portions of A's house which are ordinarily excluded from observation, and B acquires a like easement with respect to A's house.

Bill, s. 19.

19. Where the dominant heritage is transferred or devolves, by act of parties or by operation of law, the transfer or devolution shall, unless a contrary intention appears, be deemed to pass the easement to the person in whose favour the transfer or devolution takes place.

Transfer of dominant heritage passes easement.

Illustration.

A has certain land to which a right of way is annexed. A lets the land to B for twenty years. The right of way vests in B and his legal representative so long as the lease continues.

CHAPTER III.—THE INCIDENTS OF EASEMENTS.

Bill, s. 20.

20. The rules contained in this chapter are controlled by any contract between the dominant and servient owners relating to the subject-matter and by the provisions of the instrument or decree, if any, by which the easement referred to was imposed.

Rules controlled by contract or title.

And when any incident of any customary easement is inconsistent with such rules, nothing in this chapter shall affect such incident.

Incidents of customary easements.

Bill, s. 21.

21. An easement must not be used for any purpose not connected with the enjoyment of the dominant heritage.

Bar to use unconnected with enjoyment.

Illustrations.

(*a*). A, as owner of a farm, Y, has a right of way over B's land to Y. Lying beyond Y, A has another farm, Z, the beneficial enjoyment of which is not necessary for the beneficial enjoyment of Y. He must not use the easement for the purpose of passing to and from Z.

(*b*). A, as owner of a certain house, has a right of way to and from it. For the purpose of passing to and from the house, the right may be used, not only by A, but by the members of his family, his guests, lodgers, servants, workmen, visitors and customers, for this is a purpose connected with the enjoyment of the dominant heritage. So if A lets the house, he may use the right of way for the purpose of collecting the rent and seeing that the house is kept in repair.

Bill, s. 22.

22. The dominant owner must exercise his right in the mode which is least onerous to the servient owner; and when the exercise of an easement can without detriment to the dominant owner be confined to a determinate part of the servient heritage, such exercise shall, at the request of the servient owner, be so confined.

Exercise of easement.

Confinement of exercise of easement.

Illustrations.

(*a*). A has a right of way over B's field. A must enter the way at either end, and not at any intermediate point.

(*b*). A has a right annexed to his house to cut thatching-grass in B's swamp. A when exercising his easement must cut the grass so that the plants may not be destroyed.

Bill, s. 23.

23. Subject to the provisions of section twenty-two, the dominant owner may from time to time alter the mode and place of enjoying the easement, provided that he does not thereby impose any additional burden on the servient heritage.

Right to alter mode of enjoyment.

Panjáb Record, 1867, p. 156.

Exception.—The dominant owner of a right of way cannot vary his line of passage at pleasure, even though he does not thereby impose any additional burden on the servient tenement.

Illustrations.

(*a*). A, the owner of a saw-mill, has a right to a flow of water sufficient to work the mill. He may convert the saw-mill into a corn-mill, provided that it can be worked by the same amount of water.

(*b*). A has a right to discharge on B's land the rain-water from the eaves of A's house. This does not entitle A to advance his eaves if by so doing he imposes a greater burden on B's land.

(*c*). A, as the owner of a paper-mill, acquires a right to pollute a stream by pouring in the refuse-liquor produced by making in the mill paper from rags. He may pollute the stream by pouring in similar liquor produced by making in the mill paper by a new process from bamboos, provided that he does not substantially increase the amount, or injuriously change the nature, of the pollution.

(*d*). A, a riparian owner, acquires, as against the lower riparian owners, a prescriptive right to pollute a stream by throwing sawdust into it. This does not entitle A to pollute the stream by discharging into it poisonous liquor.

Bill, s. 24.

24. The dominant owner is entitled, as against the servient owner, to do all acts necessary to secure the full enjoyment of the easement; but such acts must be done at such time and in such manner as, without detriment to the dominant owner, to cause the servient owner as little inconvenience as possible; and the dominant owner must repair as far as practicable the damage (if any) caused by the act to the servient tenement.

Right to do acts to secure enjoyment.

Rights to do acts necessary to secure the full enjoyment of an easement are called accessory rights.

Accessory rights.

Illustrations.

(*a*). A has an easement to lay pipes in B's land to convey water to A's cistern. A may enter and dig the land in order to mend the pipes, but he must restore the surface to its original state.

(*b*). A has an easement of a drain through B's land. The sewer with which the drain communicates is altered. A may enter upon B's land and alter the drain, to adapt it to the new sewer: provided that he does not thereby impose any additional burden on B's land.

(*c*). A, as owner of a certain house, has a right of way over B's land. The way is out of repair, or a tree is blown down and falls across it. A may enter on B's land and repair the way or remove the tree from it.

(*d*). A, as owner of a certain field, has a right of way over B's land. B renders the way impassable. A may deviate from the way and pass over the adjoining land of B, provided that the deviation is reasonable.

(*e*). A, as owner of a certain house, has a right of way over B's field. A may remove rocks to make the way.

(*f*). A has an easement of support from B's wall. The wall gives way. A may enter upon B's land and repair the wall.

(*g*). A has an easement to have his land flooded by means of a dam in B's stream. The dam is half swept away by an inundation. A may enter upon B's land and repair the dam.

Bill, s. 25.

25. The expenses incurred in constructing works, or making repairs, or doing any other act necessary for the user or preservation of an easement, must be defrayed by the dominant owner.

Liability for expenses necessary for preservation of easement.

Bill, s. 26.

26. Where an easement is enjoyed by means of an artificial work, the dominant owner is liable to make compensation for any damage to the servient heritage arising from the want of repair of such work.

Liability for damage from want of repair.

Bill, s. 27.

27. The servient owner is not bound to do anything for the benefit of the dominant heritage, and he is entitled, as against the dominant owner, to use the servient heritage in any way consistent with the enjoyment of the easement; but he must not do any act tending to restrict the easement or to render its exercise more inconvenient.

Servient owner not bound to do anything.

N.-W. P. (1867), p. 1

Illustrations.

(*a*). A as owner of a house has a right to lead water and send sewage through B's land. B is not bound as servient owner to clear the watercourse or scour the sewer.

(*b*). A grants a right of way through his land to B as owner of a field. A may feed his cattle on grass growing on the way, provided that B's right of way is not thereby obstructed; but he must not build a wall at the end of his land so as to prevent B from going beyond it, nor must he narrow the way so as to render the exercise of the right less easy than it was at the date of the grant.

(*c*). A, in respect of his house, is entitled to an easement of support from B's wall. B is not bound as servient owner to keep the wall standing and in repair. But he must not pull down or weaken the wall so as to make it incapable of rendering the necessary support.

(*d*). A, in respect of his mill, is entitled to a watercourse through B's land. B must not drive stakes so as to obstruct the watercourse.

(*e*). A, in respect of his house, is entitled to a certain quantity of light passing over B's land. B must not plant trees, so as to obstruct the passage to A's windows of that quantity of light.

Bill, s. 28.

28. With respect to the extent of easements and the mode of their enjoyment, the following provisions shall take effect :—

Extent of easements.

Easement of necessity.

An easement of necessity is co-extensive with the necessity.

Other easements.

The extent of any other easement and the mode of its enjoyment must be fixed with reference to the probable intention of the parties and the purpose for which the right was imposed or acquired.

In the absence of evidence as to such intention and purpose—

Right of way.

(*a*) a right of way of any one kind does not include any other kind :

Right to light or air acquired by grant.

(*b*) the extent of a right to the passage of light or air to a certain window, door or other opening, imposed by assurance or will, is the quantity of light or air that entered the opening at the time the assurance was made or the testator died :

Prescriptive right to light or air.

(*c*) the extent of a prescriptive right to the passage of light or air to a certain window, door or other opening, is that quantity of light or air which has been accustomed to enter that opening during the whole of the prescriptive period, irrespectively of the purposes for which it has been used :

Prescriptive right to pollute air and water.

(*d*) the extent of a prescriptive right to pollute air or water is the extent of the pollution at the commencement of the period of user on completion of which the right arose; and

Other prescriptive rights.

(*e*) the extent of every other prescriptive right and the mode of its enjoyment must be determined by the accustomed user of the right.

Bill, s. 29.

29. The dominant owner cannot, by merely altering or adding to the dominant heritage, substantially increase an easement.

Increase of easement.

Where an easement has been granted or bequeathed so that its extent shall be proportionate to the extent of the dominant heritage, if the dominant heritage is increased by alluvion, the easement is proportionately increased, and if the dominant heritage is diminished by diluvion, the easement is proportionately diminished.

Save as aforesaid, no easement is affected by any change in the extent of the dominant or the servient heritage.

Illustrations.

(*a*). A, the owner of a mill, has acquired a prescriptive right to divert to his mill part of the water of a stream. A alters the machinery of his mill. He cannot thereby increase his right to divert water.

(*b*). A has acquired an easement to pollute a stream by carrying on a manufacture on its banks by which a certain quantity of foul matter is discharged into it. A extends his works and thereby increases the quantity discharged. He is responsible to the lower riparian owners for injury done by such increase.

(*c*). A, as the owner of a farm, has a right to take, for the purpose of manuring his farm, leaves which have fallen from the trees on B's land. A buys a field and unites it to his farm. A is not thereby entitled to take leaves to manure this field.

Bill, s. 30.

30. Where a dominant heritage is divided between two or more persons, the easement becomes annexed to each of the shares, but not so as to increase substantially the burden on the servient heritage: provided that such annexation is consistent with the terms of the instrument or decree (if any) under which the division was made or the easement was imposed and, in the case of prescriptive rights, with the user during the prescriptive period.

Partition of dominant heritage.

Illustrations.

(*a*). A house, to which a right of way by a particular path is annexed, is divided into two parts, one of which is granted to A, the other to B. Each is entitled, in respect of his part, to a right of way by the same path.

(*b*). A house, to which is annexed the right of drawing water from a well to the extent of fifty buckets a day, is divided into two distinct heritages, one of which is granted to A, the other to B. A and B are each entitled, in respect of his heritage, to draw from the well fifty buckets a day, but the amount drawn by both must not exceed fifty buckets a day.

(*c*). A, having in respect of his house an easement of light, divides the house into three distinct heritages. Each of these continues to have the right to have its windows unobstructed.

Bill, s. 31.

31. In case of excessive user of an easement, the servient owner may, without prejudice to any other remedies to which he may be entitled, obstruct the user, but only on the servient heritage: provided that such user cannot be obstructed when the obstruction would interfere with the lawful enjoyment of the easement.

Obstruction in case of excessive user.

Illustration.

A, having a right to the free passage over B's land of light to four windows, six feet by four, increases their size and number. It is impossible to obstruct the passage of light to the new windows without also obstructing the passage of light to the ancient windows. B cannot obstruct the excessive user.

CHAPTER IV.—The Disturbance of Easements.

Bill, s. 32.

32. The owner or occupier of the dominant heritage is entitled to enjoy the easement without disturbance by any other person.

Right to enjoyment without disturbance.

Illustration.

A, as owner of a house, has a right of way over B's land. C unlawfully enters on B's land, and obstructs A in his right of way. A may sue C for compensation, not for the entry, but for the obstruction.

Bill, s. 33.

33. The owner of any interest in the dominant heritage, or the occupier of such heritage, may institute a suit for compensation for the disturbance of the easement or of any right accessory thereto: provided that the disturbance has actually caused substantial damage to the plaintiff.

Suit for disturbance of easement.

Explanation I.—The doing of any act likely to injure the plaintiff by affecting the evidence of the easement, or by materially diminishing the value of the dominant heritage, is substantial damage within the meaning of this section and section thirty-five.

Explanation II.—Where the easement disturbed is a right to the free passage of light passing to the openings in a house, no damage is substantial, within the meaning of this section, unless it falls within the first Explanation, or interferes materially with the physical comfort of the plaintiff, or prevents him from carrying on his accustomed business in the dominant heritage as beneficially as he had done previous to instituting the suit.

Explanation III.—Where the easement disturbed is a right to the free passage of air to the openings in a house, damage is substantial, within the meaning of this section, if it interferes materially with the physical comfort of the plaintiff, though it is not injurious to his health.

Illustrations.

(*a*). A places a permanent obstruction in a path over which B, as tenant of C's house, has a right of way. This is substantial damage to C, for it may affect the evidence of his reversionary right to the easement.

(*b*). A, as owner of a house, has a right to walk along one side of B's house. B builds a verandah overhanging the way about ten feet from the ground and so as not to occasion any inconvenience to foot-passengers using the way. This is not substantial damage to A.

34. The removal of the means of support to which a dominant owner is entitled does not give rise to a right to recover compensation unless and until substantial damage is actually sustained.

When cause of action arises for removal of support.

Bill, s. 35.

35. The circumstance that air or water, the subject of an easement, is already polluted by similar or different means does not, of itself, deprive the dominant owner of his right to recover compensation from any person who adds to the pollution.

Polluting air and water previously impure.

Bill, s. 36.

36. Where the disturbance of an easement is continued after compensation has been recovered for the original act of disturbance, another suit may be instituted for compensation for the continuance; and the decision in the former suit is no bar to the latter.

Suit for continuing disturbance.

Bill, s. 37.

37. Subject to the provisions of the Specific Relief Act, 1877, sections 52 to 57 (both inclusive), an injunction may be granted to restrain the disturbance of an easement—

Injunction to restrain disturbance.

(*a*) if the easement is actually disturbed,—when compensation for such disturbance might be recovered under this chapter:

(*b*) if the disturbance is only threatened or intended,—when the act threatened or intended must necessarily, if performed, disturb the easement.

Bill, s. 38.

38. Notwithstanding the provisions of section twenty-four, the dominant owner cannot himself abate a wrongful obstruction of an easement.

Abatement of obstruction of easement.

7 Mad. H. C. Rulings, XXXV.

CHAPTER V.—The Extinction, Suspension and Revival of Easements.

Bill, s. 39

39. When, from a cause which preceded the imposition of an easement, the person by whom it was imposed ceases to have any right in the servient heritage, the easement is extinguished.

Extinction by dissolution of right of servient owner.

Exception.—Nothing in this section applies to an easement lawfully imposed by a mortgagor in accordance with section eleven.

Illustrations.

(*a*). A transfers Sultánpur to B on condition that he does not marry C. B imposes an easement on Sultánpur. Then B marries C. B's interest in Sultánpur ends, and with it the easement is extinguished.

(*b*). A, in 1860, lets Sultánpur to B for thirty years from the date of the lease. B, in 1861, imposes an easement on the land in favour of C, who enjoys the easement peaceably and openly as an easement without interruption for twenty-nine years. B's interest in Sultánpur then ends, and with it C's easement.

(*c*). A and B, tenants of C, have permanent transferable interests in their respective holdings. A imposes on his holding an easement to draw water from a tank for the purpose of irrigating B's land. B enjoys the easement for twenty years. Then A's rent falls into arrear and his interest is sold. B's easement is extinguished.

(*d*). A mortgages Sultánpur to B, and lawfully imposes an easement on the land in favour of C in accordance with the provisions of section eleven. The land is sold to D in satisfaction of the mortgage-debt. The easement is not thereby extinguished.

Bill, s. 40.

40. An easement is extinguished when the dominant owner releases it, expressly or impliedly, to the servient owner.

Extinction by release.

Such release can be made only in the circumstances and to the extent in and to which the dominant owner can alienate the dominant heritage.

An easement may be released as to part only of the servient heritage.

Explanation I.—An easement is impliedly released—

(*a*) where the dominant owner expressly authorizes an act of a permanent nature to be done on the servient heritage, the necessary consequence of which is to prevent his future enjoyment of the easement, and such act is done in pursuance of such authority;

(*b*) where any permanent alteration is made in the dominant heritage of such a nature as to shew that the dominant owner intended to cease to enjoy the easement in future.

Explanation II.—Mere non-user of an easement is not an implied release within the meaning of this section.

Illustrations.

(*a*). A, B and C are co-owners of a house to which an easement is annexed. A, without the consent of B and C, releases the easement. This release is effectual only as against A and his legal representative.

(*b*). A grants B an easement over A's land for the beneficial enjoyment of his house. B assigns the house to C. B then purports to release the easement. The release is ineffectual.

(*c*). A, having the right to discharge his eavesdroppings into B's yard, expressly authorizes B to build over this yard to a height which will interfere with the discharge. B builds accordingly. A's easement is extinguished.

(*d*). A, having an easement of light to a window, builds up that window with bricks and mortar so as to manifest an intention to abandon the easement permanently. The easement is impliedly released.

(*e*). A, having a projecting roof by means of which he enjoys an easement to discharge eavesdroppings on B's land, alters the roof, so as to direct the rain-water into a different channel and discharge it on C's land. The easement is impliedly released.

Bill, s. 41.

41. An easement is extinguished when the servient owner, in exercise of a power reserved in this behalf, revokes the easement.

Extinction by revocation.

Bill, s. 42.

42. An easement is extinguished where it has been imposed for a limited period, or acquired on condition that it shall become void on the performance or non-performance of a specified act, and the period expires or the condition is fulfilled.

Extinction on expiration of limited period or happening of dissolving condition.

Bill, s. 43.

43. An easement of necessity is extinguished when the necessity comes to an end.

Extinction on termination of necessity.

Illustration.

A grants B a field inaccessible except by passing over A's adjoining land. B afterwards purchases a part of that land over which he can pass to his field. The right of way over A's land, which B had acquired, is extinguished.

Bill, s. 44.

44. An easement is extinguished when it becomes incapable of being at any time and under any circumstances beneficial to the dominant owner.

Extinction of useless easement.

Bill, s. 45.

45. An easement is extinguished—

(*a*) where the dominant heritage is substantially changed and it is not proved that the easement was intended to continue annexed thereto nothwithstanding such change, or

Extinction by substantial change of dominant heritage.

(*b*) where, by any change in the dominant heritage, the burden on the servient heritage is materially increased, and cannot be reduced to its original limits, and it is not proved that the burden was intended to be increased by such change.

Extinction by material and permanent increase of burden.

Bill, s. 46.

46. An easement is extinguished where the servient heritage is by superior force so permanently altered that the dominant owner can no longer exercise his right:

Extinction on permanent alteration of servient heritage by superior force.

Provided that, where a way of necessity is destroyed by superior force, the dominant owner has a right to another way over the servient heritage; and the provisions of section fourteen apply to such way.

Illustrations.

(*a*). A grants to B, as the owner of a certain house, a right to fish in a river running through A's land. The river changes its course permanently, and runs through C's land. B's easement is extinguished.

(*b*). Access to a path over which A has a right of way is permanently cut off by an earthquake. A's right is extinguished.

Bill, s. 47.

47. An easement is extinguished when either the dominant or the servient heritage is completely destroyed.

Extinction by destruction of either heritage.

Illustration.

A has a right of way over a road running along the foot of a sea-cliff. The road is washed away by a permanent encroachment of the sea. A's easement is extinguished.

Bill, s. 48.

48. An easement is extinguished when the same person becomes entitled to the absolute ownership of the whole of the dominant and servient heritages.

Extinction by unity of ownership.

Illustrations.

(*a*). A, as the owner of a house, has a right of way over B's field. A mortgages his house, and B mortgages his field, to C. Then C forecloses both mortgages and becomes thereby absolute owner of both house and field. The right of way is extinguished.

(*b*). The dominant owner acquires only part of the servient heritage: the easement is not extinguished, except in the case illustrated in section 43.

(*c*). The servient owner acquires the dominant heritage in common with a third person: the easement is not extinguished.

(*d*). The separate owners of two separate dominant heritages jointly acquire the heritage which is servient to the two separate heritages; the easements are not extinguished.

(*e*). The joint owners of the dominant heritage jointly acquire the servient heritage: the easement is extinguished.

(*f*). A single right of way exists over two servient heritages for the beneficial enjoyment of a single dominant heritage. The dominant owner acquires one only of the servient heritages. The easement is not extinguished.

(*g*). A has a right of way over B's road. B dedicates the road to the public. A's right of way is not extinguished.

Bill, s. 49.

49. A continuous easement is extinguished when it totally ceases to be used as such for an unbroken period of twenty years.

Extinction by non-user.

A discontinuous easement is extinguished when, for a like period, it has not been exercised or the dominant owner has not registered under the Indian Registration Act, 1877, a declaration of his intention to retain the easement.

Such period shall be reckoned, in the case of a continuous easement, from the day on which its exercise was obstructed by the servient owner, or rendered impossible by the dominant owner, and in the case of a discontinuous easement, from the day on which it was last exercised by any person as annexed to the dominant heritage, or the day on which the dominant owner registers the said declaration.

Where an easement is exerciseable only at a certain place, or at certain times, or between certain hours, or for a particular purpose, its exercise during the said period at another place, or at other times, or between other hours, or for another purpose, does not prevent its extinction under this section.

The circumstance that, during the said period, no one was in possession of the servient heritage, or that the easement could not be exercised, or that a right accessory thereto was exercised, or that the dominant owner was not aware of its existence, or that he exercised it in ignorance of his right to do so, does not prevent its extinction under this section.

An easement is not extinguished under this section—

(*a*) when the cessation is in pursuance of a contract between the dominant and servient owners;

(*b*) when the dominant heritage is held in co-ownership, and one of the co-owners exercises the easement within the said period, or

(*c*) when the easement is a necessary easement.

Where several heritages are respectively subject to rights of way for the benefit of a single heritage, and the ways are continuous, such rights shall, for the purposes of this section, be deemed to be a single easement.

Illustration.

A has, as annexed to his house, rights of way from the high road thither over the heritages X and Z and the intervening heritage Y. Before the twenty years expire, A exercises his right of way over X. His rights of way over Y and Z are not extinguished.

Bill, s. 50.

50. When an easement is extinguished, the rights (if any) accessory thereto are also extinguished.

Extinction of accessory rights.

Illustration.

A has an easement to draw water from B's well. As accessory thereto, he has a right of way over B's land to and from the well. The easement to draw water is extinguished under section forty-nine. The right of way is also extinguished.

Bill, s. 51.

51. An easement is suspended when the dominant owner becomes entitled to possession of the servient heritage for a limited interest therein, or when the servient owner becomes entitled to possession of the dominant heritage for a limited interest therein.

Suspension of easement.

Bill, s. 52.

52. The servient owner has no right to require that an easement be continued; and, notwithstanding the provisions of section twenty-six, he is not entitled to compensation for damage caused to the servient heritage in consequence of the extinguishment or suspension of the easement, if the dominant owner has given to the servient owner such notice as will enable him, without unreasonable expense, to protect the servient heritage from such damage.

Servient owner not entitled to require continuance, nor to compensation for suspension.

Where such notice has not been given, the servient owner is entitled to compensation for damage done to the servient heritage by such extinguishment or suspension.

Illustration.

A, in exercise of an easement, diverts to his canal the water of B's stream. The diversion continues for many years, and during that time the bed of the stream partly fills up. A then abandons his easement, and restores the stream to its ancient course. B's land is consequently flooded. B sues A for compensation for the damage caused by the flooding. It is proved that A gave B a month's notice of his intention to abandon the easement, and that such notice was sufficient to enable B, without unreasonable expense, to have prevented the damage. The suit must be dismissed.

Bill, s. 53.

53. An easement extinguished under section forty-seven revives (*a*) when the destroyed heritage is, before twenty years have expired, restored by the deposit of alluvion, (*b*) when the destroyed heritage is a servient building and before twenty years have expired such building is rebuilt upon the same site, and (*c*) when the destroyed heritage is a dominant building and before twenty years have expired such building is rebuilt upon the same site and in such a manner as not to impose a greater burden on the servient tenement.

Revival of easements.

An easement extinguished under section forty-eight revives when the grant or bequest by which the unity of ownership was produced is set aside by the decree of a competent Court. A necessary easement extinguished under the same section revives when the unity of ownership ceases from any other cause.

A suspended easement revives if the cause of suspension is removed before the right is extinguished under section forty-nine.

Illustration.

A, as the absolute owner of field Y, has a right of way thither over B's field Z. A obtains from B a lease of Z

for twenty years. The easement is suspended so long as A remains lessee of Z. But when A assigns the lease to C or surrenders it to B, the right of way revives.

CHAPTER VI.—LICENSES.

"License" defined.

54. Where one person grants to another, or to a definite number of other persons, a right to do, or continue to do, in or upon the immoveable property of the grantor, something which would, in the absence of such right, be unlawful, and such right does not amount to an easement or an interest in the property, the right is called a license.

Who may grant license.

55. A license may be granted by any one in the circumstances and to the extent in and to which he may transfer his interest in the property affected by the license.

Grant may be express or implied.

56. The grant of a license may be express or implied from the conduct of the grantor; and an agreement purporting to create an easement, which is ineffectual for that purpose, may operate to create a license.

Accessory licenses annexed by law.

57. All licenses necessary for the enjoyment of any interest or the exercise of any right are implied in the constitution of such interest or right. Such licenses are called accessory licenses.

Illustration.

A sells the trees growing on his land to B. B is entitled to go on the land and take away the trees.

"It is founded on personal confidence," 3 Kent 583.

License when transferable.

58. Unless a different intention is expressed or necessarily implied, a license to attend a place of public entertainment may be transferred by the licensee; but, save as aforesaid, a license cannot be transferred by the licensee or exercised by his servants or agents.

Illustration.

A grants B a right to walk over A's field whenever he pleases. The right is not annexed to any immoveable property of B. The right cannot be transferred.

Grantor's duty to disclose defects.

59. The grantor of a license is bound to disclose to the licensee any defect in the property affected by the license, likely to be dangerous to the person or property of the licensee, of which the grantor is and the licensee is not aware.

Grantor's duty not to render property unsafe.

60. The grantor of a license is bound not to do anything likely to render the property affected by the license unsafe to the licensee.

17 Q. B. 574.

Grantor's transferee not bound by license.

61. When the grantor of the license transfers the property affected thereby, the transferee is not bound by the license.

License when revocable.

62. A license may be revoked by the grantor, unless

Gale 69.

(*a*) it is coupled with a transfer of property and such transfer is in force:

(*b*) the licensee, acting upon the license, has executed a work of a permanent character and incurred expenses in the execution.

Revocation express or implied.

63. The revocation of a license may be express or implied.

Illustrations.

(*a*) A, the owner of a field, grants a license to B to use a path across it. A, with intent to revoke the license, locks a gate across the path. The license is revoked.

(*b*) A, the owner of a field, grants a license to B to stack hay on the field. A lets or sells the field to C. The license is revoked. Gale 65.

License when deemed revoked.

64. A license is deemed to be revoked— 3 Kent 58

(*a*) when, from a cause preceding the grant of it, the grantor ceases to have any interest in the property affected by the license:

(*b*) when the licensee releases it, expressly or impliedly, to the grantor or his representative:

(*c*) where it has been granted for a limited period, or acquired on condition that it shall become void on the performance of a specified act, and the period expires or the condition is fulfilled:

(*d*) where the property affected by the license is destroyed or by superior force so permanently altered that the licensee can no longer exercise his right:

(*e*) where the licensee becomes entitled to the absolute ownership of the property affected by the license:

(*f*) where the license is granted for a specified purpose and the purpose is attained, or abandoned, or becomes impracticable:

(*g*) where the license is granted to the licensee as holding a particular office, employment or character, and such office, employment or character ceases to exist:

(*h*) where the license totally ceases to be used as such for an unbroken period of twenty years and such cessation is not in pursuance of a contract between the grantor and the licensee:

(*i*) in the case of an accessory license, when the interest or right to which it is accessory ceases to exist.

Licensee's rights on revocation.

65. Where a license is revoked, the licensee is entitled to a reasonable time to leave the property affected thereby and to remove any goods which he has been allowed to place on such property. L. R. 5 C. 384: L. R. 9 Q. 400.

Licensee's rights on eviction.

66. Where a license has been granted for consideration and the licensee without any fault of his own is evicted by the licensor before he has fully enjoyed under the license the right for which he contracted, he is entitled to recover compensation from the licensor.

9. Who may be beneficiary.
   Disclaimer by beneficiary.
10. Who may be trustee.
    No one bound to accept a trust.
    Acceptance of trust.
    Disclaimer of trust.

CHAPTER III.

OF THE DUTIES AND LIABILITIES OF TRUSTEES.

11. Trustee to execute trust.
12. Trustee to inform himself of state of trust-property.
13. Trustee to protect title to trust-property.
14. Trustee not to set-up title adverse to beneficiary.
15. Care required from trustee.
16. Conversion of perishable property.
17. Trustee to be impartial.
18. Trustee to prevent waste.
19. Accounts and information.
20. Investment of trust-money.
    Mortgage of land pledged to Government under Act XXVI of 1871.
    Deposit in Government Savings Bank.
21. Sale by trustee directed to sell within specified time.
22. Transfer to beneficiary on completion of purpose.
23. Liability for breach of trust.

SECTIONS.

24. No set-off allowed to trustee.
25. Non-liability for predecessor's default.
26. Non-liability for co-trustee's default.
    Joining in receipt for conformity.
27. Several liability of co-trustees.
    Contribution as between co-trustees.
28. Non-liability of trustee paying without notice of transfer by beneficiary.
29. Liability of trustee where beneficiary's interest is forfeited to Government.
30. Indemnity of trustees.

CHAPTER IV.

OF THE RIGHTS AND POWERS OF TRUSTEES.

31. Right to title-deeds.
32. Right to reimbursement of expenses.
    Right to recoupment for erroneous over-payment.
33. Right to indemnity from gainer by breach of trust.
34. Right to apply to Court for opinion in management of trust-property.
35. Right to settlement of accounts.
36. General authority of trustee.
37. Power to sell in lots, and either by public auction or private contract.
38. Power to sell under special conditions.
    Power to buy-in and re-sell.
    Time allowed for selling trust-property.
39. Power to convey.
40. Power to vary investments.
41. Power to apply property of minors, &c., for their maintenance, &c.
42. Power to give receipts.
43. Power to several trustees of whom one disclaims or dies.
44. Suspension of trustee's powers by decree.

CHAPTER V.

OF THE DISABILITIES OF TRUSTEES.

45. Trustee cannot renounce after acceptance.
46. Trustee cannot delegate.
47. Co-trustees cannot act singly.
48. Control of discretionary power.
49. Trustee may not charge for services.
50. Trustee may not use trust-property for his own profit.
51. Trustee for sale or his agent may not buy.
52. Trustee may not buy beneficiary's interest without permission.
    Trustee for purchase.
53. Co-trustees may not lend to one of themselves.

CHAPTER VI.

OF THE RIGHTS AND LIABILITIES OF THE BENEFICIARY.

54. Rights to rents and profits.
    Right to transfer of possession.

SECTIONS.

55. Right to specific execution.
Right to compel transfer of possession.
56. Right to inspect and take copies of instrument of trust, accounts, &c.

OF THE EXTINCTION OF TRUSTS.

76. Trust how extinguished.
77. Revocation of trust.
78. Revocation not to defeat what trustees have duly done.

CHAPTER IX.

OF CERTAIN OBLIGATIONS IN THE NATURE OF TRUSTS.

79. Where obligation in nature of trust is created.
80. Where it appears that transferor did not intend to dispose of beneficial interest.
81. Transfer to one for consideration paid by another.
82. Trust incapable of execution or executed without exhausting trust-property.
83. Transfer for illegal purpose.

SECTIONS.

84. Bequest for illegal purpose.
Bequest of which revocation is prevented by coercion.
85. Transfer pursuant to rescindible contract.
86. Transfer in fraud of transferor's creditors.
87. Debtor becoming creditor's representative.
88. Advantage gained by fiduciary.
89. Advantage gained by exercise of undue influence.
90. Advantage gained by qualified owner.
91. Property acquired with notice of existing contract.
92. Purchase by person contracting to buy property to be held on trust.
93. Advantage secretly gained by one of several compounding creditors.
94. Constructive trusts in cases not expressly provided for.
95. Obligor's duties, liabilities and disabilities.
96. Saving of rights of *bonâ fide* purchasers.

THE SCHEDULE.

A Bill to define and amend the law relating to Private Trusts and Trustees.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

Trusts in India of various kinds, 18 W. R. (P. C.) 359. Trusts for benefit of creditors, 1 Bomb. 233: 9 Bomb. 249: 10 Bomb. 327. Trustee misapplying trust-funds, Suth. F.B. 60. As to family religious trusts, 10 Beng. 19: Norton, II, 406. As to pagoda-trustees, see 1 Mad. 415: 7 Mad. 77: Act XX of 1863. Property purchased in name of an idol, 15 Beng. 176.

WHEREAS it is expedient to define and amend the law relating to private trusts and trustees; It is hereby enacted as follows:—

Preamble.

CHAPTER I.

PRELIMINARY.

Short title. Commencement.

1. This Act may be called "The Private Trusts Act, 1879:" and it shall come into force on the first day of March, 1880.

Local extent. Savings.

It extends to the whole of British India; but nothing herein contained affects the rules of Muhammadan law as to *waqf*, or the mutual relations of the members of an undivided family as determined by any customary or personal law, or applies to public or private religious or charitable endowments, or to trusts to distribute prizes taken in war among the captors; and nothing in the second chapter of this Act applies to trusts created before the said day.

Repeal of enactments.

2. On and from that day the Statutes and Acts mentioned in the schedule hereto annexed shall be repealed to the extent therein mentioned.

Bill, s. 3.

Interpretation-clause. "trust":

3. A "trust" is an obligation annexed to the ownership of property and arising out of a confidence reposed in and accepted by the owner or declared and accepted by him, for the benefit of another, or of another and the owner:

"author of the trust": "trustee": "beneficiary":

the person who reposes or declares the confidence is called the "author of the trust": the person who accepts the confidence is called the "trustee": the person for whose benefit the confidence is accepted is called the "beneficiary":

"trust-property": "beneficial interest": "interest":

the subject-matter of the trust is called "trust-property", or "trust-money"; the "beneficial interest" or "interest" of the beneficiary is his right against the trustee as owner of the trust-property; and the

"instrument of trust":

instrument, if any, by which the trust is declared is called the "instrument of trust":

"breach of trust":

A breach of any duty imposed on a trustee, as such, by any law for the time being in force, is called a "breach of trust":

and in this Act, unless there be something repugnant in the subject or context, "registered" means registered under the law for the registration of documents for the time being in force: a person is said to have "notice" of a fact either when he actually knows that fact or when, but for wilful abstention from inquiry or gross negligence, he would have known it, or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, 1872, section 229; and all expressions used herein and defined in the Indian Contract Act, 1872, shall be deemed to have the meanings respectively attributed to them by that Act.

"registered": "notice":

Expressions defined in Act IX of 1872.

e. g., 'fraud,' s. 27 *infra*.

CHAPTER II.

OF THE CREATION OF TRUSTS.

Lawful purpose.

4. A trust may be created for any lawful purpose. The purpose of a trust is lawful, unless it is (*a*) forbidden by law, or (*b*) is of such a nature that if permitted it would defeat the provisions of any law, or (*c*) is fraudulent, or (*d*) involves or implies injury to the person or property of another, or (*e*) the Court regards it as immoral or opposed to public policy.

Bill, s. 10. 9 Beng. 377: Act IX of 1872, s. 23. Beng. Regn. II of 1793, sec. 19, forbids Collectors to make their subordinates their trustees. Perpetuity, 14 Beng. 175. When Court will interfere, L. R. 9 Eq. 475.

Every trust of which the purpose is unlawful is void. And where a trust is created for two purposes, of which one is lawful and the other unlawful, and the two purposes cannot be separated, the whole trust is void.

Explanation:—In this section, the expression "law" includes, where the trust-property is immoveable and situate in a foreign country, the law of such country.

See *Nelson v. Bridport*, 8 Beav. 547.

Illustrations.

(*a*) A conveys property to B in trust to apply the profits to the nurture of female foundlings to be trained up as prostitutes. The trust is void.

(*b*) A conveys property to B in trust for C for his life and after his death to D for his life, and after D's death to such of the sons of D as shall first attain the age of 25. A, B, C and D are persons to whom the Indian Succession Act, 1865, applies. The trust after D's death is void.

Act X of 1865 s. 101: 2 Spence 24.

(*c*). A bequeathes property to B in trust to employ it in carrying on a smuggling business, and out of the profits thereof to support A's children. The trust is void.

(*d*). A, while in insolvent circumstances, transfers property to B in trust for A during his life, and after his death for B. A is declared an insolvent. The trust for A is invalid as against his creditors.

Bill, s. 5.

Trust of immoveable property.

5. No trust in relation to immoveable property is valid unless declared by a non-testamentary instrument in writing signed by the author of the trust or the trustee and registered, or by the will of the author of the trust or the trustee.

No trust in relation to moveable property is valid unless declared as aforesaid, or unless the ownership of the property is transferred to the trustee.

Trust of moveable property.

These rules do not apply where they would operate so as to effectuate a fraud.

Lewin, 7th edition, p. 57: Underhill 37, 40.

6. Subject to the provisions of section five, a trust is created when the author of the trust indicates with reasonable certainty, by any words or acts, (*a*) an intention on his part to create thereby a trust, (*b*) the purpose of the trust, (*c*) the beneficiary, and (*d*) the trust-property, and (unless the trust is declared by will, or the author of the trust is himself to be the trustee) transfers the trust-property to the trustee.

Creation of trust.

Bill, ss. 6, 7. Whether voluntary declaration of trust is binding against Hindú declarant, 4 Mad. 462. Transmutation of possession unnecessary, 2 Bomb. 143 (a Pársí case). Act I of 1877, s. 8: See 7 Bomb. A. C. J. 149. *Harland* v. *Trigly*, 1 Brown, Ch. 124. *Green* v. *Marsden*, 1. Drew. 646.

Illustrations.

(*a*) A bequeathes certain property to B, "having the fullest confidence that he will dispose of it for the benefit of C." This creates a trust so far as regards A and C.

(*b*) A bequeathes certain property to B, "hoping he will continue it in the family." This does not create a trust, as the beneficiary is not indicated with reasonable certainty.

(*c*) A bequeathes certain property to B, requesting him to distribute it amongst such members of C's family as B should think most deserving. This does not create a trust, for the beneficiaries are not indicated with reasonable certainty.

Palmer v. *Simmonds*, 2 Drew. 221.

(*d*) A bequeathes certain property to B, desiring him to divide the bulk of it among C's children. This does not create a trust, for the trust-property is not indicated with sufficient certainty.

Messenger v. *Andrews*, 4 Russ. 478.

(*e*) A bequeathes a shop and stock-in-trade to B on condition that he pays A's debts and a legacy to C. This is a condition, not a trust for A's creditors and C.

Bill, s. 8. cf. Act IX of 1872, ss. 11 and 12.

Who may create trusts.

7. A trust may be created—

(*a*) by every person competent to contract, and

(*b*) with the permission of a principal Civil Court of original jurisdiction, by or on behalf of a minor;

but subject in each case to the law for the time being in force as to the circumstances and extent in and to which the author of the trust may dispose of the trust-property.

8. The subject-matter of a trust must be property transferable to the beneficiary.

Subject of trust.

It must not be a merely beneficial interest under a subsisting trust.

Bill, s. 9, para. 1. 'Person' includes 'corporation' (Act I of 1868): but the statutes of Mortmain are not in force in India.

Who may be beneficiary.

9. Every person capable of holding property may be a beneficiary.

A proposed beneficiary may renounce his interest under the trust by disclaimer addressed to the trustee, or by setting up, with notice of the trust, a claim inconsistent therewith.

Disclaimer by beneficiary.

Bill, s. 9, para. 2. *King* v. *Bellard*, 1 H. & M. 343: Act IX of 1872, s. 11.

Who may be trustee.

10. Every person capable of holding property may be a trustee; but where the trust involves the exercise of discretion, he cannot execute it unless he is competent to contract.

No one bound to accept a trust.

No one is bound to accept a trust.

Bill, s. 10. Lewin 180. N. Y. Code, § 1174, requires a consideration in case of acknowledgment.

Acceptance of trust.

Subject to the provisions of section five, a trust is accepted by any words or acts of the trustee, indicating with reasonable certainty such acceptance.

Disclaimer may be by parol, *Bingham* v. *Ld. Clanmorris*.

Disclaimer of trust.

Instead of accepting a trust, the intended trustee may, within a reasonable period, disclaim it, and such disclaimer shall prevent the trust-property from vesting in him.

Mucklow v. *Fuller*, Williams Exors., 1287, 1796.

A disclaimer by one of two or more co-trustees vests the trust-property in the other or others and makes him or them sole trustee or trustees from the date of the creation of the trust.

Illustrations.

Sheridan v. *Joyce*, 1 Jones & Lat. 401.

(*a*) A bequeathes certain property to B and C, his executors as trustees for D. B and C prove A's will. This is, in itself, an acceptance of the trust, and B and C hold the property in trust for D.

(*b*) A transfers certain property to B, in trust to sell it and to pay out of the proceeds A's debts. B accepts the trust and sells the property. So far as regards B, a trust of the proceeds is created for A's creditors.

(*c*) A bequeathes a lákh of rupees to B upon certain trusts and appoints him his executor. B severs the lákh from the general assets and appropriates it to the specific purpose. This is an acceptance of the trust.

CHAPTER III.

OF THE DUTIES AND LIABILITIES OF TRUSTEES.

Bill, s. 11. Lewin 190.

Trustee to execute trust.

11. The trustee is bound to fulfil the purpose of the trust, and to obey the directions of the author of the trust given at the time of its creation, except as modified by the consent of all the beneficiaries being competent to contract.

Where the beneficiary is incompetent to contract, his consent may, for the purposes of this section, be given by a principal Civil Court of original jurisdiction.

Nothing in this section shall be deemed to require a trustee to obey any direction when to do so would be impracticable, illegal or manifestly injurious to the beneficiaries.

Explanation.—Unless a contrary intention be expressed, the purpose of a trust for the payment of debts shall be deemed to be (*a*) to pay only the debts of the author of the trust existing and recoverable at the date of the instrument of trust, or, when such instrument is a will, at the date of his death, and (*b*) in the case of debts not bearing interest, to make such payment without interest.

Lewin 471.

Lewin 477

Illustrations.

(*a*) A, a trustee, is simply authorised to sell certain land by public auction. He cannot sell the land by private contract.

(*b*) A, a trustee for X, Y and Z, is authorised to sell certain land to B for a specified sum. X, Y and Z, being competent to contract, consent that A may sell the land to C for a less sum. A may sell the land to C for the latter sum.

Boss v. *Godsal*, Lewin 291: 2 Spence 926 n. Another case, *Morris* v. *M.* 4 Jur. N. S. 802.

(*c*) A, a trustee for B and her children, is directed by the author of the trust to lend, on B's request, trust-property to B's husband, C, on the security of his bond. C becomes insolvent, and B requests A to make good the loan. A may refuse to make it.

Bill, s. 12. Lewin 190, 243, 264, 268.

Trustee to inform himself of state of trust-property.

12. A trustee is bound to acquaint himself as soon as possible with the nature and circumstances of the trust-property; to obtain, where necessary, a transfer of the trust-property to himself; and (subject to the provisions of the instrument of trust) to get in trust-moneys invested on insufficient or hazardous security.

Lewin 533: 3 V. & B. 359.

Illustrations.

4 Moo. I. A. 452.

(*a*). The trust-property is a debt outstanding on personal security. The instrument of trust gives the trustee no discretionary power to leave the debt so outstanding. The trustee's duty is to recover the debt without unnecessary delay.

Lewin 216 2 Spence 929: *Bái Jaddo* v. *Tribhuvandás*, 9 Bomb. 333.

(*b*). The trust-property is money in the hands of one of two co-trustees. No discretionary power is given by the instrument of trust. The other co-trustee must not allow the former to retain the money for a longer period than the circumstances of the case require.

Bill, s. 13. Spence 46, 196, 923: Act I of 1877, s. 10, expl. 1.

Trustee to protect title to trust-property.

13. A trustee is bound to maintain and defend all such suits, and (subject to the provisions of the instrument of trust) to take such other steps as, regard being had to the amount or value of the trust-property, may be reasonably requisite for the preservation of the trust-property and the assertion or protection of the title thereto.

Lewin 270.

Illustration.

See *Macnamara* v. *Carey*, 1 Ir. L. R. Eq. 9, cited Lewin 771.

The trust-property is immoveable property which has been given to the author of the trust by an unregistered instrument. Subject to the provisions of the Indian Registration Act, 1877, the trustee's duty is to cause the instrument to be registered.

Bill, s. 18. Lewin 262: Underhill 121.

Trustee not to set-up title adverse to beneficiary.

14. The trustee must not for himself or another set-up or aid any title to the trust-property adverse to the interest of the beneficiary.

Bill s. 14. Lewin 270: 2 Spence 917, 933: Act IX of 1872, ss. 151, 152: N. Y. Code, s. 1197.

Care required from trustee.

15. A trustee is bound to deal with the trust-property as carefully as a man of ordinary prudence would deal with such property if it were his own; and, in the absence of a contract to the contrary, a trustee so dealing is not responsible for the loss, destruction or deterioration of the trust-property.

Illustrations.

Lewin 284: Burge III, 968.

(*a*). A, living in Calcutta, is a trustee for B, living in Bombay. A remits trust-funds to B, by bills drawn by a person of undoubted credit in favour of the trustee as such, and payable at Bombay. The bills are dishonoured. A is not bound to make good the loss.

2 Spence 933: Grant's *Bankers*, third edition, 351.

(*b*). A, a trustee of leasehold property, directs the tenant to pay the rents on account of trust to a banker, B, then in credit. The rents are accordingly paid to B, and A leaves the money with B only till wanted. Before the money is drawn out, B becomes insolvent, A having had no reason to believe that B was in insolvent circumstances. A is not bound to make good the loss.

(*c*). A, a trustee of two debts for B, releases one and compounds the other, in good faith and reasonably believing that it is for B's interest to do so. A is not bound to make good any loss caused thereby to B.

(*d*). A, a trustee directed to sell the trust-property by auction, sells the same, but does not advertise the sale and otherwise fails in reasonable diligence in inviting competition. A is bound to make good the loss caused thereby to the beneficiary. Lewin 389: Dart 69.

(*e*). A, a trustee for B, in execution of his trust, sells the trust-property, but from want of due diligence on his part, fails to receive part of the purchase-money. A is bound to make good the loss thereby caused to B. 47 L. J. Ch. 606.

(*f*). A, a trustee for B of a policy of insurance, has funds in hand for payment of the premiums. A neglects to pay the premiums, and the policy is consequently forfeited. A is bound to make good the loss to B. Lewin 270.

(*g*). A bequeathes certain moneys to B and C as trustees, and authorises them to continue trust-moneys upon the personal security of a certain firm in which A had himself invested them. A dies and a change takes place in the firm. B and C must not permit the moneys to remain upon the personal security of the new firm. *Cummins* v. *Cummins*, 3 J. & L. 64.

(*h*). A, a trustee for B, allows the trust to be executed solely by his co-trustee C. C misapplies the trust-property. A is personally answerable for the loss resulting to B.

Bill, s. 16. Lewin 274, 280: Dart 59.

Conversion of perishable property.

16. Where the trust is created for the benefit of several persons in succession, and the trust-property is of a wasting nature or a future or reversionary interest, the trustee is bound, unless an intention to the contrary may be inferred from the instrument of trust, to convert the property into property of a permanent and immediately profitable character.

Illustrations.

(*a*). A bequeathes to B all his property in trust for C during his life, and on his death for D, and on D's death for E. A's property consists of three leasehold houses, and there is nothing in A's will to shew that he intended the houses to be enjoyed in specie. B should sell the houses, and invest the proceeds in accordance with section twenty.

(*b*). A bequeathes to B his three leasehold houses in Calcutta and all the furniture therein in trust for C during his life, and on his death for D, and on D's death for E. Here an intention that the houses and furniture should be enjoyed in specie appears clearly, and B should not sell them.

Bill, s. 17. *Ellis* v. *Barker*, 7 Ch. Div. 104.

Trustee to be impartial.

17. Where there are more beneficiaries than one, the trustee is bound to be impartial, and must not execute the trust for the advantage of one at the expense of another.

Where the trustee has a discretionary power, nothing in this section shall be deemed to authorise the Court to control the exercise reasonably and in good faith of such discretion. Dart 89, citing *Mines* v. *Leman*, 20 Beav. 269.

Illustration.

A, a trustee for B, C and D, is empowered to choose between several specified modes of investing the trust-property. A in good faith chooses one of these modes. The Court will not interfere, although the result of the choice may be to vary the relative rights of B, C and D.

Bill, s. 15. Kerr 79: see Lewin. The trustee is not responsible for suffering permissive waste.

Trustee to prevent waste.

18. Where the trust is created for the benefit of several persons in succession and one of them is in possession of the trust-property, if he commits, or threatens to commit, any act which is destructive or permanently injurious

thereto, the trustee must take measures to prevent such act.

Bill, s. 19. Lewin 591: 2 Spence 921.

19. A trustee is bound (*a*) to keep clear and accurate accounts of the trust-property, and (*b*), at all reasonable times, at the request of the beneficiary, to furnish him with full and accurate information as to the amount and state of the trust-property.

Accounts and information.

Lewin 591.

Bill, s. 20. Act XXVIII of 1866, ss. 5 and 32. As to the necessity of some such provisions, see *DeSouza* v. *DeSouza*, 12 Bom. 184. cf. 23 & 24 Vic., c. 145, s. 25.

20. Where the trust-property consists of money and cannot be applied immediately or at an early date to the purposes of the trust, the trustee must (subject to any direction contained in the instrument of trust) invest the money on the following securities and on no others:—

Investment of trust-money.

(*a*) in promissory notes, debentures, stock or other securities of the Government of India, or of the United Kingdom of Great Britain and Ireland;

(*b*) in bonds, debentures and annuities charged by the Imperial Parliament on the revenues of India;

cf. 32 & 33 Vic., c. 132, s. 2.

(*c*) in stock or debentures of, or shares in, Railway or other Companies, the interest whereon shall have been guaranteed by the Secretary of State for India in Council;

cf. 34 & 35 Vic., c. 47, s. 13.

(*d*) in debentures or other securities for money issued by, or on behalf of, any municipal body, under the authority of any Act of a Legislature established in British India;

Lewin 298: 2 Spence 925: 16 Beav. 600.

(*e*) on a first mortgage of immoveable property situate in British India: provided that the property is not a leasehold for a term of years and that the value of the property exceeds by one-third, or, if consisting of buildings, exceeds by one-half, the mortgage-money; or,

(*f*) on any other security expressly authorised by the instrument of trust:

The Statute excepts investment on Consols.

Provided that, where there is a person competent to contract and entitled in possession to receive the income of the trust-property for his life, or for any greater estate, no investment on any security mentioned or referred to in clauses (*d*), (*e*) and (*f*) shall be made without his consent in writing.

27 & 28 Vic., c. 114, s. 61.

Nothing in this section shall be deemed to preclude an investment on a mortgage of immoveable property already pledged as security for an advance under the Land Improvement Act, 1871, or, in case the trust-money does not exceed one thousand rupees, a deposit thereof in a Government Savings Bank.

Mortgage of land pledged to Government under Act XXVI of 1871.

Deposit in Government Savings Bank.

Bill, s. 21, para. 2. Dart 58.

21. Where a trustee directed to sell within a specified time extends such time as between himself and the beneficiary, the burden of proving that the latter is not prejudiced by the extension lies upon the trustee, unless the extension has been authorised by a principal Civil Court of original jurisdiction.

Sale by trustee directed to sell within specified time.

Illustration.

A bequeathes property to B, directing him, with all convenient speed and within five years, to sell it, and apply the proceeds for the benefit of C. In the exercise of reasonable discretion, B postpones the sale for six years. The sale is not thereby rendered invalid, but C, alleging that he has been injured by the postponement, institutes a suit against B to obtain compensation. In such suit the burden of proving that C has not been injured lies on B.

Lewin 390.

Bill, s. 22. 2 Spence 47: Smith, § 3129.

22. When the purpose of the trust is completely fulfilled, the trustee must on demand transfer the trust-property to his beneficiary, unless the trustee has notice of any title in another which is paramount to the beneficiary's interest and of an intention to assert such title.

Transfer to beneficiary on completion of purpose.

Bill, Lewin 768 2 Spence 936 Williams Exors. 1739. Includes a fraudulent minor: L. R. 2 Eq. 538: *Walker* v. *Symonds*, 3 Swanst. 1 W. & T. 175: 2 Spence 936.

23. Where the trustee commits a breach of trust, he is liable to make good the loss which the trust-property has thereby sustained, unless the beneficiary has by fraud induced the trustee to commit the breach, or the beneficiary, being competent to contract, has himself, without coercion or undue influence having been brought to bear on him, concurred in the breach, or subsequently acquiesced therein, with full knowledge of the facts of the case and of his rights as against the trustee:

Liability for breach of trust.

Illustrations.

Lewin 315: 4 Moo. I. A. 452. Notwithstanding indemnity clause, 29 B. 218.

(*a*) A trustee improperly leaves trust-property outstanding and it is consequently lost. He is liable to make good the property lost, but he is not liable to pay interest thereon.

(*b*) A bequeathes a house to B in trust to sell it and pay the proceeds to C. B neglects to sell the house for a great length of time, whereby the house is deteriorated and its market price falls. B is answerable to C for the loss.

Lewin 310.

(*c*) A trustee is guilty of unreasonable delay in investing trust-money in accordance with section twenty or in paying it to the beneficiary. The trustee is liable to pay interest thereon for the period of the delay.

Lewin 307. 2 Spence 921.

(*d*) The duty of the trustee is to invest trust-money in any of the securities mentioned in section twenty, clause (*a*), (*b*), (*c*) or (*d*). Instead of so doing, he retains the money in his hands. He is liable, at the option of the beneficiary, to be charged either with the amount of the principal money and interest, or with the amount of such securities which he might have purchased with the trust-money when the investment should have been made, and the intermediate dividends and interest thereon.

2 Spence 925: *Robinson* v. *Robinson*, 1 DeG. M. & G. 256.

(*e*) The instrument of trust directs the trustee to invest trust-money either in any of such securities, or on mortgage of immoveable property. The trustee does neither. He is liable for the principal-money and interest.

2 Spence 927: *Pride* v. *Fooks*, 2 Beav. 430: Lewin 315: 1 Seton 479.

(*f*) The instrument of trust directs the trustee to invest trust-money in any of such securities and to accumulate the dividends thereon. The trustee disregards the direction. He is liable at the option of the beneficiary to be charged either with the amount of the principal-money and compound interest, or with the amount of such securities which he might have purchased with the trust-money when the investment should have been made, together with the amount of the accumulation which would have arisen from a proper investment of the intermediate dividends.

Lewin 308.

(*g*) Trust-property is invested in one of the securities mentioned in section twenty, clause (*a*), (*b*), (*c*) or (*d*). The trustee sells such security for some purpose not authorised by the terms of the instrument of trust. He is liable at the option of the beneficiary either to replace the security, with the intermediate dividends and interest thereon, or to account for the proceeds of the sale with interest thereon.

Lewin 770.

(*h*) The trust-property consists of land. The trustee sells the land to a purchaser for consideration without notice of the trust. The trustee is liable, at the option of the beneficiary, to purchase other land of equal value to be settled upon the like trust, or to be charged with the proceeds of the sale with interest, or to be charged with the present estimated value of the land sold, after deducting therefrom any decrease of price caused by subsequent improvements.

Bill, s. 24. *Wiles* v. *Gresham*, 2 Drew. 258, 266.

24. A trustee who is liable for a loss occasioned by a breach of trust in respect of one portion of the trust-property cannot set-off against his liability a gain which has accrued to another portion of the trust-property through another and distinct breach of trust.

No set-off allowed to trustee.

Bill, s. 25. *Tebbs* v. *Carpenter*, 1 Mad. 290: Lewin 191.

25. Where a trustee succeeds another, he is not, as such, liable for the acts or defaults of his predecessor.

Non-liability for predecessor's default.

Bill, s. 26. Lewin 240, 251: Smith § 3105: Kent IV. 335: 1 Seton 462.

26. Subject to the provisions of sections thirteen and fifteen, one trustee is not, as such, liable for a breach of trust committed by his co-trustee:

Non-liability for co-trustee's default.

Provided that, in the absence of an express declaration to the contrary in the instrument of trust, a trustee is so liable—

Act I of 1877, s. 54, *Ill.* (*b*). 2 Spence 923. See *Wilkins* v. *Hogg*, 3 Giff. 116.

(*a*) where he has delivered trust-property to his co-trustee without seeing to its proper application:

(*b*) where he allows his co-trustee to receive trust-property and fails to make due enquiry as to the co-trustee's dealings therewith, or allows him to retain it longer than the circumstances of the case reasonably require:

(*c*) where he becomes aware of a breach of trust committed or intended by his co-trustee, and either actively conceals it or does not within a reasonable time take proper steps to protect the beneficiary's interest.

Bone v. Cook, M'Cle. 168.

A co-trustee who joins in signing a receipt for trust-property and proves that he has not received the same is not answerable, by reason of such signature only, for loss or misapplication of the property by his co-trustee.

Joining in receipt for conformity.

Illustration.

A bequeathes certain property to B and C, and directs them to sell it and invest the proceeds for the benefit of D. B and C accordingly sell the property and the purchase-money is received by B and retained in his hands. C pays no attention to the matter for two years and then calls on B to make the investment. B is unable to do so, becomes insolvent and the purchase-money is lost. C may be compelled to make good the amount.

Bill, s. 27. No primary liability in respect of a breach of trust, *Wilson* v. *Moore*, 1 My. & K. *Lockhart* v. *Reilly*, 1 De G. & J. 476. Lewin 776.

27. Where co-trustees jointly commit a breach of trust, or where one of them by his neglect enables the other to commit a breach of trust, each is liable to the beneficiary for the whole of the loss occasioned by such breach.

Several liability of co-trustees.

But as between the trustees themselves, if one be less guilty than another, and has had to refund the loss, the former may compel the latter or his legal representative to make good such loss, and if all be equally guilty, any one or more of the trustees who has had to refund the loss may compel the others to contribute.

Contribution as between co-trustees.

Nothing in this section shall be deemed to authorise a trustee, who has been guilty of fraud, to contribution.

Lingard v. *Bromley*, 1 & B. 114.

Bill, s. 28. See Under p. 156.

28. When any beneficiary's interest becomes vested in another person and the trustee, not having notice of the vesting, pays or delivers trust-property to the person who would have been entitled thereto in the absence of such vesting, the trustee is not liable for the property so paid or delivered.

Non-liability of trustee paying without notice of transfer by beneficiary.

New.

29. When the beneficiary's interest is forfeited or awarded by legal adjudication to Government, the trustee is bound to hold the trust-property for the benefit of such person in such manner as the Government may direct in this behalf.

Liability of trustee where beneficiary's interest is forfeited to Government.

Bill, s. Act XX of 1866, shortene See sect 15 & 26 *supra*.

30. Subject to the provisions of the instrument of trust, and of sections twenty-three and twenty-six, trustees shall be respectively chargeable only for such moneys, stocks, funds and securities as they respectively actually receive, and shall not be answerable the one for the other of them, nor for any banker, broker or other person in whose hands any trust-property may be placed, nor for the insufficiency or deficiency of any stocks, funds or securities, nor otherwise for involuntary losses.

Indemnity of trustees.

CHAPTER IV.

OF THE RIGHTS AND POWERS OF TRUSTEES.

Bill, 2 Sp 1 Day.

31. A trustee is entitled to have in his possession the instrument of trust and all the documents of title (if any) relating solely to the trust-property.

Right to title-deeds.

Bill, s. Lewin 3

32. Every trustee may re-imburse himself, or pay or discharge out of the trust-property, all expenses properly incurred in or about the execution of the trust or the realisation, preservation or benefit of the trust-property, or the protection or support of the beneficiary.

Right to re-imbursement of expenses.

Not in on cons don v. 8 Price

If he pays such expenses out of his own pocket, he has a first charge upon the trust-property for such expenses and interest thereon; but such charge (unless the expenses have been incurred with the sanction of a principal Civil Court of original jurisdiction) shall be enforced only by prohibiting any disposition of the trust-property without previous payment of such expenses and interest.

Lewin 548. Bal Hy

If the trust-property fail, the trustee is entitled to recover from the beneficiary personally on whose behalf he acted and at whose request, expressed or implied, he made the payment, the amount of such expenses.

Lewin 324.

Where a trustee has by mistake made an over-payment to the beneficiary, he may re-imburse the trust-property out of the beneficiary's interest. If such interest fail, the trustee is entitled to recover from the beneficiary personally the amount of such over-payment.

Right to recoupment for erroneous overpayment.

Bill, s. 33. Underhill, p. 163.

33. A person other than a trustee who has gained an advantage from a breach of trust must indemnify the trustee to the extent of the amount actually received by such person under the breach; and where he is a beneficiary, the trustee has a charge on his interest for such amount.

Right to indemnity from gainer by breach of trust.

Nothing in this section shall be deemed to entitle a trustee to be indemnified who has in committing the breach of trust been guilty of fraud.

Bill, s. 34. Act XXVIII of 1866, s. 43: 1 Seton 493.

34. Any trustee may, without instituting a suit, apply by petition to a principal Civil Court of original jurisdiction for its opinion, advice or direction on any present questions respecting the management or administration of the trust-property other than questions of detail, difficulty or importance, not proper for summary disposal.

Right to apply to Court for opinion in management of trust-property.

A copy of such petition shall be served upon, and the hearing thereof may be attended by, such of the persons interested in the application as the Court thinks fit.

The trustee stating in good faith the facts in such petition and acting upon the opinion, advice or direction given by the Court shall be deemed, so far as regards his own responsibility, to have discharged his duty as such trustee, in the subject-matter of the application.

The costs of every application under this section shall be in the discretion of the Court to which it is made.

Bill, s. 35. 2 Spence 46: Underhill, p. 164.

35. When the duties of a trustee as such, are completed, he is entitled to have the accounts of his administration of the trust-property examined and settled, and where nothing is due to the beneficiary under the trust, to an acknowledgment in writing to that effect.

Right to settlement of accounts.

Bill, s. 36. Lewin 504.

36. In addition to the powers expressly conferred by this Act and by the instrument of trust, and subject to the restrictions, if any, contained in such instrument and to the provisions of section seventeen, a trustee may do all acts which are reasonable and proper for the realisation, protection or benefit of the trust-property, and for the protection or support of a beneficiary who is not competent to contract.

General authority of trustee.

27 & 28 Vic., c. 114: Lewin 505.

Every trustee in the actual possession or receipt of the rents and profits of land as defined in the Land Improvement Act, 1871, shall be deemed to be a landlord for the purposes of that Act.

Except with the permission of a principal Civil Court of original jurisdiction, no trustee shall lease trust-property for a term exceeding twenty-one years from the date of executing the lease, nor without reserving the best yearly rent that can be reasonably gotten.

Bill, s. 37. Act XXVIII of 1866, s. 2, extended to moveables.

37. Where the trustee is empowered to sell any trust-property, he may sell the same either together or in lots, and either by public auction or private contract, and either at one time or at several times, unless the instrument of trust otherwise directs.

Power to sell in lots, and either by public auction or private contract.

Bill, s. 38. Act XXVIII of 1866, s. 3. See 1 Dav. Conv. 507.

38. The trustee making any such sale may insert such stipulations, either as to title or evidence of title, or otherwise, in any conditions of sale, or contract for sale, as he thinks fit; and may also buy-in the property or any part thereof at any sale by auction, and rescind or vary any contract for sale, and re-sell the property so bought in, or as to which the contract is so rescinded, without being responsible to the beneficiary for any loss occasioned thereby.

Power to sell under special conditions.

Power to buy-in and re-sell.

Bill, s. 21, para. 1. Lewin 265, 390: Dart 58, 88.

Where a trustee is directed to sell trust-property, or to invest trust-money in the purchase of property, he may exercise a reasonable discretion as to the time of effecting the sale or purchase.

Time allowed for selling trust-property.

Illustrations.

(*a*) A bequeathes property to B, directing him to sell it with all convenient speed and pay the proceeds to C. This does not render an immediate sale imperative.

(*b*) A bequeathes property to B, directing him to sell it at such time and in such manner as he shall think fit and invest the proceeds for the benefit of C. This does not authorise B, as between him and C, to postpone the sale to an indefinite period.

Lewin 390: Dart 59.

Bill, s. 39. Act XXVIII of 1866, s. 4.

39. For the purpose of completing any such sale, the trustee shall have power to convey or otherwise dispose of the property sold in such manner as may be necessary.

Power to convey.

Bill, s. 40. Act XXVIII of 1866, s. 32. See *Waite* v. *Littlewood*, 41 L. J. Ch. 636.

40. A trustee may, at his discretion, call in any trust-property invested in any security and invest the same on any of the securities mentioned in section twenty, and from time to time vary any such investments for others of the same nature:

Power to vary investments.

Provided that, where there is a person competent to contract and entitled at the time to receive the income of the trust-property for his life, or for any greater estate, no such change of investment shall be made without his consent in writing.

Bill, s. 41. Act XXVIII of 1866, s. 33.

41. Where any property is held by a trustee in trust for a minor, such trustee may, at his discretion, pay to the guardians (if any) of such minor, or otherwise apply for or towards his maintenance or education, or advancement in life, or the reasonable

Power to apply property of minors, &c., for their maintenance, &c.

expenses of his marriage or funeral, the whole or any part of the income to which he may be entitled in respect of such property; and such trustee shall accumulate all the residue of such income by way of compound interest, by investing the same and the resulting income thereof from time to time in any of the securities mentioned in section twenty for the benefit of the person who shall ultimately become entitled to the property from which such accumulations have arisen: Provided that such trustee may at any time, if he thinks fit, apply the whole or any part of such accumulations as if the same were part of the income arising in the then current year.

Where the income of the trust-property is insufficient for the minor's maintenance or education, or advancement in life, or the reasonable expenses of his marriage or funeral, the trustee may, with the permission of a principal Civil Court of original jurisdiction, but not otherwise, apply the whole or any part of such property for or towards such maintenance, education, advancement or expenses.

See Acts XL of 1858, XX of 1864, and XIII of 1874.

Nothing in this section shall be deemed to affect the provisions of any local law for the time being in force relating to the persons and property of minors.

Bill, s. 42. Act XXVIII of 1866, s. 36, shortened.

42. A trustee may give a receipt in writing for any money paid or property transferred to him by reason or in the exercise of any trust reposed in him, and in the absence of fraud such receipt shall discharge the person paying or transferring the same therefrom, and from seeing to the application thereof, or being accountable for any loss or misapplication thereof.

Power to give receipts.

43. When an authority to deal with the trust-property is given to several trustees and one of them disclaims or dies, the authority may be exercised by the continuing trustees, unless from the terms of the instrument of trust it is apparent that the authority is to be exercised by a number in excess of the number of the remaining trustees.

Power to several trustees of whom one disclaims or dies.

Bill, s. 43. *Mitchelson* v. *Piper*, 8 Sim. 64.

44. Where a decree has been made in a suit for the execution of a trust, the trustee must not exercise any of his powers except in conformity with such decree or with the sanction of the Court by which the decree has been made or, where an appeal against the decree is pending, of the Appellate Court.

Suspension of trustee's powers by decree.

CHAPTER V.

OF THE DISABILITIES OF TRUSTEES.

Bill, s. 44. Lewin 230: Smith, § 1138: Kent IV, 344 n.

45. A trustee who has accepted the trust cannot afterwards renounce it, except (*a*) with the permission of a principal Civil Court of original jurisdiction, or (*b*) if the beneficiary is competent to contract, with his consent, or (*c*) by virtue of a special power in the instrument of trust.

Trustee cannot renounce after acceptance.

Bill, s. 45. 2 Calc. Rep: Sewin 231: L Spence 920.

46. A trustee cannot delegate his office, or any of his duties, either to a co-trustee or to a stranger, unless (*a*) the instrument of trust so provides, or (*b*) the delegation is in the regular course of business, or, (*c*) the delegation is necessary, or (*d*) the beneficiary, being competent to contract, consents to the delegation.

Trustee cannot delegate.

4 DeG. & J. 259.

Explanation.—The appointment of an attorney or proxy to do an act merely ministerial and involving no independent discretion is not a delegation within the meaning of this section.

Illustrations.

Titley v. *Wolstenholm*, 7 Beav. 436.

(*a*) A bequeathes certain property to B and C on certain trusts to be executed by them or the survivor of them or the assigns of such survivor. B dies. C may bequeath the trust-property to D and E upon the trusts of A's will.

(*b*) A is a trustee of certain property with power to sell the same. A may employ an auctioneer to effect the sale.

(*c*) A bequeathes to B fifty houses let at monthly rents in trust to collect the rents and pay them to C. B may employ a proper person to collect these rents.

Bill, s. 46. Lewin 236: Kent IV, 306: N. Y. Code, § 1203.

47. When there are more trustees than one, all must join in the execution of the trust, except where the instrument of trust otherwise provides.

Co-trustees cannot act singly.

Bill, s. 47. N. Y. Code, § 1204: Lewin 530, 531: 2 Spence 87: Kerr, *Injunctions*, 461: *Re Hodges*, Chan. D. 754.

48. Where a discretionary power conferred on a trustee is not exercised reasonably and in good faith, such power may be controlled by a principal Court of original civil jurisdiction.

Control of discretionary power.

Bill, s. 48. Lewin, 253, 268, 540, 542: 2 Spence 944: 1 W. & T. 251: 6 Beng. 278.

49. In the absence of express directions to the contrary contained in the instrument of trust, or of a contract to the contrary entered into with the beneficiary or the Court at the time of accepting the trust, a trustee has no right to remuneration for his trouble, skill and loss of time in executing the trust.

Trustee may not charge for services.

As to them, see Acts XVII of 1864, II of 1874, XX of 1858 and XX of 1864.

Nothing in this section applies to any Official Trustee, Administrator General, Public Curator or person holding a certificate of administration.

Bill, s. 49. N. Y. Code, § 1178.

50. A trustee may not use or deal with the trust-property for his own profit or for any other purpose unconnected with the trust.

Trustee may not use trust-property for his own profit.

Bill, s. 50. Lewin 438, 440.

51. No trustee whose duty it is to sell trust-property, and no agent employed by such trustee for the purpose of the sale, may, directly or indirectly, buy the same, or any interest therein, on his own account or as agent for a third person.

Trustee for sale or his agent may not buy.

Bill, s. 51. *Contra* Lewin 441: 2 Spence 944: Dart 43: Rule does not

52. No trustee, and no person who has recently ceased to be a trustee, may, without the permission of a principal Civil Court of original jurisdiction, buy or

Trustee may not buy beneficiary's interest without permission.

apply to passive trustees: *Pooley* v. *Quilter*, 4 Drew. 189: Dart 44.

become mortgagee or lessee of the trust-property or any part thereof, and such permission shall not be given unless the purchase, mortgage or lease is manifestly for the advantage of the beneficiary.

Dart 34.

Trustee for purchase.

And no trustee whose duty it is to buy or to obtain a mortgage or lease of particular property for his beneficiary may buy it, or obtain a mortgage or lease of it, for himself.

Bill, s. 52. Lewin 298.

Co-trustees may not lend to one of themselves.

53. A trustee or co-trustees whose duty it is to invest trust-money on mortgage or personal security must not invest it on a mortgage by, or on the personal security of, himself or one of themselves.

CHAPTER VI.

OF THE RIGHTS AND LIABILITIES OF THE BENEFICIARY.

Bill, s. 53. 1 Spence 496.

Rights to rents and profits.

54. The beneficiary has a right to the rents and profits of the trust-property; and, where he is exclusively interested in the trust-property and competent to contract, he may require the trustee to transfer the possession of the property to him or to such person as he directs. But where other persons are also interested therein, the Court may, in its discretion, direct, either that the trustee shall remain in possession of the trust-property, or that it shall be transferred to the beneficiary, under such conditions and restrictions as the Court in each case thinks fit.

Lewin 576, 585: 2 Beng. A. C. J. 409: 2 Beng. O. C. J. 93.

Right to transfer of possession.

Bill, s. 54. Lewin 589: Act I of 1877, s. 12, cl. (*a*).

Right to specific execution.

55. The beneficiary is entitled to have the intention of the author of the trust specifically executed to the extent of the beneficiary's interest;

and where there is only one beneficiary and he is competent to contract, or where there are several beneficiaries and they are competent to contract, and all of one mind, he or they may require the trustee to stay execution and transfer the possession of the trust-property: provided that, where the trust is to sell immoveable trust-property and the proceeds are to be divided amongst several persons, particular sharers cannot elect that their own respective undivided shares shall not be sold.

Right to compel transfer of possession.

Bill, s. 67.

Stanley v. *Stanley*, L. R. 7 Ch. D. 589.

Nothing in the second clause of this section applies to property transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest.

Illustrations.

(*a*). Certain Government securities are given to trustees upon trust to accumulate the interest until A attains the age of 24, and then to transfer the gross amount to him. A on attaining majority may, as the person exclusively interested in the trust-property, require the trustees to transfer it immediately to him.

(*b*). A bequeathes Rs. 10,000 to trustees upon trust to purchase an annuity for B, who has attained his majority and is otherwise competent to contract. B may claim the Rs. 10,000.

Lewin 590.

(*c*). A transfers certain property to B and directs him to sell or invest it for the benefit of C, who is competent to contract. C may elect to take the property in its original character.

Bill, s. 55. *Exp. Holdsworth*, 4 Bing. N. C. 386: Lewin 582.

Right to inspect and take copies of instrument of trust, accounts, &c.

56. The beneficiary has a right as against the trustee and all persons claiming under him with notice of the trust to inspect and take copies of the instrument of trust, the documents of title relating solely to the trust-property, the accounts of the trust-property and the vouchers (if any) by which they are supported, and the cases submitted and opinions taken by the trustee for his guidance in the discharge of his duty.

Bill, s. 56. Lewin 593.

Right to transfer beneficial interest.

57. The beneficiary, if competent to contract, may transfer his interest, but subject to the law for the time being in force as to the circumstances and extent in and to which he may dispose of such interest:

Provided that when property is transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest, nothing in this section shall authorise her to transfer such interest during her marriage.

Bill, s. 57. N. Y. Code, § 1215.

Right to sue for execution of trust.

58. Where no trustees are appointed or all the trustees die, disclaim or are discharged, or where for any other reason the execution of a trust by the trustee is or becomes impracticable, the beneficiary may institute a suit for the execution of the trust, and the trust shall, so far as may be possible, be executed by the Court until the appointment of a trustee or new trustee.

Bill, s. 58. Lewin 718.

Right to proper trustees.

59. The beneficiary has a right (subject to the provisions of the instrument of trust) that the trust-property shall be properly protected and held and administered by proper persons and by a proper number of such persons.

Lewin 32—39, 718.

Explanation I.—The following are not proper persons within the meaning of this section:—

A person domiciled abroad: an alien enemy: a person having an interest inconsistent with that of the beneficiary: a person in insolvent circumstances; and, unless the personal law of the beneficiary provides otherwise, a married woman and a minor.

Explanation II.—When the administration of the trust involves the receipt and custody of the money, the number of trustees should be two at least.

Illustrations.

(*a*). A, one of several beneficiaries, proves that B, the trustee, has improperly disposed of part of the trust-property, or that the property is in danger from B's being in insolvent circumstances, or that he is incapacitated from acting as trustee. A may obtain a receiver of the trust-property.

Brown v. *Higgs*, 8 Ves. 561.

(*b*). A bequeathes certain jewels to B in trust for C. B dies during A's lifetime; then A dies. C is entitled to have the property conveyed to a trustee for him.

(*c*). A conveys certain property to four trustees in trust for B. Three of the trustees die. B may institute a suit to have three new trustees appointed in the place of the deceased trustees.

(*d*). A conveys certain property to three trustees in trust for B. All the trustees disclaim. B may institute a suit to have three trustees appointed in place of the trustees so disclaiming.

(*e*). A, a trustee for B, refuses to act, or goes to reside permanently out of British India, or is declared an insolvent, or compounds with his creditors, or suffers a co-trustee to commit a breach of trust. B may institute a suit to have A removed and a new trustee appointed in his room.

Bill, s. 60. Lewin 724: Act I of 1877, s. 54. Kerr 170.

Right to compel to any act of duty.

60. The beneficiary has a right that his trustee shall be compelled to perform any particular act of his duty as such, and restrained from committing any contemplated or probable breach of trust.

Illustrations.

(*a*) A contracts with B to pay him monthly Rs. 100 for the benefit of C. B writes and signs a letter declaring that he will hold in trust for C the money so to be paid. A fails to pay the money in accordance with his contract. C may compel B, on a proper indemnity, to allow C to sue on the contract in B's name.

Act I of 1877, s. 64, ill. (*f*).

(*b*). A is trustee of certain land, with a power to sell the same and pay the proceeds to B and C equally. A is about to make an improvident sale of the land. B may sue on behalf of himself and C for an injunction to restrain A from making the sale.

Bill, s. 61. 1 W. & T. L. C. 172: Lewin 444.

Wrongful purchase by trustee.

61. Where a trustee has wrongfully bought trust-property, the beneficiary has a right to have the property declared subject to the trust or re-transferred by the trustee, if it remains in his hands unsold, or, if it has been bought from him by any person with notice of the trust, by such person. But in such case the beneficiary must repay the purchase-money paid by the trustee, with interest and such other expenses (if any) as he has properly incurred in the preservation of the property; and the trustee or purchaser must (*a*) account for the nett profits of the property, (*b*) be charged with an occupation-rent, if he has been in actual possession of the property, and (*c*) allow the beneficiary to deduct a proportionate part of the purchase-money, if the property has been deteriorated by the acts or omissions of the trustee or purchaser.

Nothing in this section—

(*a*) impairs the rights of lessees and others who, before the institution of a suit to have the property declared subject to the trust or retransferred, have contracted in good faith with the trustee or purchaser; or

(*b*) entitles the beneficiary to have the property declared subject to the trust or retransferred where he, being competent to contract, has himself, without coercion or undue influence having been brought to bear on him, ratified the sale to the trustee with full knowledge of the facts of the case and of his rights as against the trustee.

Bill, s. 62. Lewin 728, 729, 730: 6 Bomb. O. C. J. 59: I. L. R. 1 Bomb. 237: 4 D. M. G. 372: Lewin 762: Dart 939: Smith § 3110

Following trust-property—into the hands of third persons;

62. Where trust-property comes into the hands of a third person inconsistently with the trust, the beneficiary may require him to admit formally, or may institute a suit for a declaration, that the property is comprised in the trust.

into that into which it has been converted.

Where the trustee has disposed of trust-property, and the money or other property which he has received therefor can be traced in his hands, or the hands of his legal representative, or legatee, the beneficiary has, in respect thereof, rights as nearly as may be the same as his rights in respect of the original trust-property.

As to moveables, see Act IX of 1872, s. 108.

Exception I.—Nothing in this section entitles the beneficiary to any right in respect of property in the hands of—

5 W. R. 120: W. R. 1864, p. 225.

(*a*) a transferee in good faith for consideration without having notice of the trust, either when the purchase-money was paid, or when the conveyance was executed, or

(*b*) a transferee for consideration from such a transferee.

Brace v. *Duchess of Marlborough*, 2 P. W. 491: and see Story § 977.

A judgment-creditor attaching trust-property is not a transferee for consideration within the meaning of this exception.

Exception II.—Nothing in this section applies to money, currency-notes and negotiable instruments in the hands of a *bonâ fide* holder to whom they have passed in circulation, or shall be deemed to affect the Indian Contract Act, 1872, section 108, or the Transfer of Property Act, section 136.

Illustrations.

(*a*) A, a trustee for B of Rs. 10,000, wrongfully invests the Rs. 10,000 in the purchase of certain land. B is entitled to the land.

(*b*) A, a trustee, wrongfully purchases land, in his own name, partly with his own money, partly with money subject to a trust for B. B is entitled to a charge on the land for the amount of the trust-money so misemployed.

Lewin 7[illegible]

Bill, s. 63. *Kennedy* v. *Daly*, 1 Sch. & Lef. 379.

Acquisition by trustee of trust-property wrongfully converted.

63. Where a trustee wrongfully sells or otherwise transfers trust-property and afterwards himself becomes the owner of the property, the property again becomes subject to the trust, notwithstanding any want of notice on the part of intervening transferees in good faith for consideration.

Bill, s. 64. Lewin 312: *Docker* v. *Somes*, 2 M. & K. 655: *Fyse* v. *Foster*, L. R. 8 Ch. 80[illegible] Lewin 314: 1 Seton 47[illegible]

Wrongful employment of trust-funds in trade.

64. Where a trustee wrongfully sells trust-property and employs the proceeds in trade or business, the beneficiary may, at his option, charge him either with the principal-money and the actual profits arising from such employment or with the principal-money and compound interest.

Bill, s. 65. Lewin 278, 764. cf. Contract Act, s. 1[illegible] Underhill, Art. 63.

Right in case of blended property.

65. Where the trustee wrongfully mingles the trust-property with his own, the beneficiary is entitled to a charge on the whole fund for the amount due to him.

Bill, s. 66. Pollock, Ptp. § 25, altered as to notice.

66. If a partner, being a trustee, wrongfully employs trust-property in the business or on the account of the partnership, no other partner is liable therefor in his personal capacity to the beneficiaries, unless he had notice of the breach of trust.

Wrongful employment by partner-trustee of trust-property for partnership purposes.

The partners having such notice are jointly and severally liable for the breach of trust.

Illustrations.

Lewin 255, 764.

(*a*). A and B are partners. A dies, having bequeathed all his property to B in trust for Z, and appointed B his sole executor. B, instead of winding-up the affairs of the partnership, retains all the assets in the business. Z may compel him, as partner, to account for so much of the profits as are derived from A's share of the capital. B is also answerable to Z for the improper employment of A's assets.

Flockton v. *Bunning*, 8 Ch. 323 n.: Pollock, Ptp. p. 90.

(*b*). A, a trader, bequeathes his property to B in trust for C, appoints B his sole executor, and dies. B enters into partnership with X and Y in the same trade and employs A's assets in the partnership-business. B gives an indemnity to X and Y against the claims of C. Here X and Y are jointly liable with B to C, as having knowingly become parties to the breach of trust committed by B.

Bill, s. 68. *Raby* v. *Ridehalgh*, 7 D. M. G. 104. Lewin 777: See sec. 39 *supra*.

67. Where one of several beneficiaries—

Liability of beneficiary joining in breach of trust.

(*a*) joins in committing a breach of trust; or

(*b*) knowingly obtains any advantage therefrom, without the consent of the other beneficiaries; or

(c) becomes aware of a breach of trust committed or intended to be committed, and either actually conceals it, or does not within a reasonable time take proper steps to protect the interests of the other beneficiaries; or

(*d*) has deceived the trustee and thereby induced him to commit a breach of trust,

the other beneficiaries are entitled to have all his beneficial interest impounded as against him and all who claim under him (otherwise than as transferees for consideration without notice of the breach) until the loss caused by the breach has been compensated.

Nothing in this section applies to property transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest.

Bill s. 69.

68. Every person to whom a beneficiary transfers his interest has the rights, and is subject to the liabilities, of the beneficiary in respect of such interest at the date of the transfer.

Rights and liabilities of beneficiary's transferee.

CHAPTER VII.

OF VACATING THE OFFICE OF TRUSTEE.

Bill, s. 70.

69. The office of a trustee is vacated by his death or by his discharge from his office.

Office how vacated.

Bill, s. 71. 2 Spence 920.

70. A trustee may be discharged from his office only as follows:—

Discharge of trustee.

(*a*) by the extinction of the trust;

(*b*) by the completion of his duties under the trust;

(*c*) by such means as may be prescribed by the instrument of trust;

(*d*) by appointment under this Act of a new trustee in his place;

(*e*) by consent of himself and the beneficiary, or, where there are more beneficiaries than one, all the beneficiaries, being competent to contract, or

(*f*) by the Court to which a petition for his discharge is presented under this Act.

Bill, s. 72. Lewin 572, 574.

71. Notwithstanding the provisions of section eleven, every trustee may apply by petition to a principal Civil Court of original jurisdiction to be discharged from his office; and if the Court finds that there is sufficient reason for such discharge, it may discharge him accordingly, and direct his costs to be paid out of the trust-property. But where there is no such reason, the Court shall not discharge him, unless a proper person can be found to take his place.

Petition to be discharged from trust.

See *Ardill* v. *Savage*, 1 Ir. Eq. Rep. 79, as to capricious retirement.

Bill, s. 73. Act XXVIII of 1866, s. 34. 23 & 24 Vic., c. 145, s. 27. *Re Roche*, Dr. & War. 287: Lewin 466, 467.

72. Whenever any person appointed a trustee disclaims, or any trustee dies or is for a continuous period of six months absent from British India, or leaves British India for the purpose of residing abroad, or is declared an insolvent, or desires to be discharged from the trust, or refuses or becomes in the opinion of a principal Civil Court of original jurisdiction unfit or personally incapable to act in the trust, or accepts an inconsistent trust, a new trustee may be appointed in his place by—

Appointment of new trustees on death, &c.

(*a*) the person nominated for that purpose by the instrument of trust (if any), or

(*b*) if there be no such person, or no such person able and willing to act, the author of the trust, if he be alive and competent to contract, or the surviving or continuing trustees or trustee for the time being, or legal representative of the last surviving and continuing trustee, or the retiring trustees, if they all retire simultaneously, or the last retiring trustee. 5 Beng. 184.

Every such appointment shall be by writing under the hand of the person making it.

The Official Trustee may, with his consent and by the order of the Court, be appointed under this section in any case in which only one trustee is to be appointed and such trustee is to be the sole trustee.

For the purpose of this section, any refusing or retiring trustee shall, if willing to act in the execution of the power, be considered a continuing trustee.

Bill, s. 74. Insolvent trustee, 32 & 33 Vic., c. 71, s. 117.

73. Whenever any such vacancy or disqualification occurs, and it is found impracticable to appoint a new trustee under section seventy-two, the beneficiary may, without instituting a suit, apply by petition to a principal Civil Court of original jurisdiction for the appointment of a

Appointment by Court.

trustee or a new trustee, and the Court may appoint a trustee or a new trustee accordingly.

Lewin 720: Smith, § 3153: 7 Hare 106: Bill, s. 59.

In appointing new trustees, the Court shall have regard (*a*) to the wishes of the author of the trust, as expressed in, or to be inferred from, the instrument of trust, (*b*) to the wishes of the person, if any, empowered to appoint new trustees, (*c*) to the question whether the appointment will promote or impede the execution of the trust, and (*d*) where there are more beneficiaries than one, to the interests of all such beneficiaries.

Rule for selecting new trustees.

Re Tempest, L. R. 1 Ch. Ap. 84.

Bill s. 73, paras. 3 and 4.

74. Whenever any new trustee is appointed under section seventy-two or section seventy-three, all the trust-property for the time being vested in the surviving or continuing trustees or trustee, or in the legal representative of any trustee, shall become vested in such new trustee, either solely or jointly with the surviving or continuing trustees or trustee, as the case may require.

Vesting of trust-property in new trustees.

Every new trustee so appointed, and every trustee appointed by a Court either before or after the passing of this Act, shall have the same powers, authorities and discretions, and shall in all respects act, as if he had been originally nominated a trustee by the author of the trust.

Powers of new trustees.

Bill s. 75. As to discretion of surviving trustee, L. R. 11 Eq. 439.

75. On the death or discharge of one of several co-trustees, the trust survives, and the trust-property passes to the others, unless the instrument of trust expressly declares otherwise.

Survival of trust.

CHAPTER VIII.

OF THE EXTINCTION OF TRUSTS.

Bill s. 76. N. Y. Code, §1208 altered: *Frith* v. *Cartland*, 34 L. J. Ch. 301.

76. A trust is extinguished—

Trust how extinguished.

(*a*) when its purpose is completely fulfilled; or

(*b*) when its purpose becomes unlawful; or

(*c*) when the fulfilment of its purpose becomes impossible, by destruction of the trust-property, or otherwise; or

(*d*) when the trust, being revocable, is expressly revoked.

Bill s. 77. N. Y. Code, §1209, altered: *Eyeroft* v. *Christie*, 28 Beav. 238.

77. A trust constituted by will may be revoked at the pleasure of the testator.

Revocation of trust.

A trust otherwise constituted can be revoked only—

Jyibhai v. *Manbhai*, Bom. 139. N. W. P. 1870, p. 420.

(*a*) where all the beneficiaries are competent to contract—by their consent; or

(*b*) where the trust has been declared by a non-testamentary instrument or by word of mouth—in exercise of a power of revocation expressly reserved to the author of the trust.

Illustration.

8 Chan. D. 749.

A conveys property to B in trust to sell the same and pay out of the proceeds the claims of A's creditors. A reserves no power of revocation. If no communication has been made to the creditors, A may revoke the trust. But if the creditors are parties to the arrangement, the trust cannot be revoked without their consent.

New. Lewin 468.

78. No trust can be revoked by the author of the trust so as to defeat or prejudice what the trustees may have duly done in execution of the trust.

Revocation not to defeat what trustees have duly done.

CHAPTER IX.

OF CERTAIN OBLIGATIONS IN THE NATURE OF TRUSTS.

Bill s. 78.

79. An obligation in the nature of a trust is created in the following cases.

Where obligation in nature of trust is created.

Bill s. 78, cl. (*a*). Lewin 183: 2 Spence 102.

80. Where the owner of property transfers or bequeathes it and it cannot be inferred consistently with the attendant circumstances that he intended to dispose of the beneficial interest therein. In this case the transferee or legatee must hold such property for the benefit of the owner or his legal representative.

Where it appears that transferor did not intend to dispose of beneficial interest.

Illustrations.

(*a*). A conveys land to B without consideration and declares no trust of any part. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in the land. B holds the land for the benefit of A.

(*b*). A conveys to B two fields, Y and Z, and declares a trust of Y, but says nothing about Z. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in Z. B holds Z for the benefit of A.

Fowkes v. *Pascoe*, L. 10: Ch. App. 351.

(*c*). A transfers certain stock into the joint names of himself and B. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in the stock during his life. A and B hold the stock for the benefit of A during his life.

(*d*). A makes a gift of certain land to his wife B. She takes the beneficial interest in the land free from any trust in favour of A, for it may be inferred from the circumstances that the gift was for B's benefit.

Bill s. 78, cl. (*d*); s. 81.

81. Where property is transferred to one person for a consideration paid or provided by another person, and it appears that such other person did not intend to pay or provide such consideration for the benefit of the transferee, the transferee must hold the property for the benefit of the person paying or providing the consideration.

Transfer to one for consideration paid by another.

Bill s. 78, cl. (*b*). Smith & Jarman, Wills, 1. No express charitable trust. I. L. R. Bomb. 4

82. Where a trust is incapable of being executed, or where the trust is completely executed without exhausting the trust-property, the trustee, in the absence of a direction to the contrary, must hold the trust-property, or so much thereof as is unexhausted, for the benefit of the author of the trust or his legal representative.

Trust incapable of execution or executed without exhausting trust-property.

Illustrations.

Lewin 134: Spence 33.

(*a*) A conveys certain land to B—

"upon trust," and no trust is declared; or

"upon trusts to be thereafter declared," and no such declaration is ever made; or

upon trusts that are too vague to be executed; or

upon trusts that become incapable of taking effect:

In each of these cases B holds the land for the benefit of A.

(*b*) A transfers Rs. 10,000 in the four per cents. to B in trust to pay the interest annually accruing due to C for her life. A dies. Then C dies. B holds the fund for the benefit of A's legal representative.

Contra in England. But see Lewin 148.

(*c*) A conveys land to B upon trust to sell it and apply one moiety of the proceeds for certain charitable purposes and the other for the maintenance of the worship of an idol. B sells the land, but the charitable purposes wholly fail, and the maintenance of the worship does not exhaust the second moiety of the proceeds. B holds the first moiety and the part unapplied of the second moiety for the benefit of A or his legal representative.

(*d*) A bequeathes Rs. 10,000 to B, to be laid out in buying land to be conveyed for purposes which either wholly or partially fail to take effect. B holds for the benefit of A's legal representative the undisposed of interest in the money or land if purchased.

Bill s. 78, cl. (*c*). L. R. 9 Eq. 475: 16 Eq. 283.

83. Where the owner of property transfers it to another for an illegal purpose and such purpose is not carried into execution, or the transferor is not as guilty as the transferee, or the effect of permitting the transferee to retain the property might be to defeat the provisions of any law, the transferee must hold the property for the benefit of the transferor.

Transfer for illegal purpose.

Transfer of Property Bill, s. 9: Kent IV, 332: Smith, § 711.

84. Where a testator bequeathes certain property upon trust and the purpose of the trust appears on the face of the will to be unlawful, or during the testator's lifetime the legatee agrees with him to apply the property for an unlawful purpose, the legatee must hold the property for the benefit of the testator's legal representative.

Bequest for illegal purpose.

Where property is bequeathed and the revocation of the bequest is prevented by coercion, the legatee must hold the property for the benefit of the testator's legal representative.

Bequest of which revocation is prevented by coercion.

See Act I of 1877, s. 35.

85. Where property is transferred in pursuance of a contract which is liable to rescission or induced by fraud or mistake, the transferee must, on receiving notice to that effect, hold the property for the benefit of the transferor subject to repayment by the latter of the consideration actually paid.

Transfer pursuant to rescindible contract.

Bill s. 78, cl. (*e*). 4 Mad. 88: 5 Mad. 474: 2 Ind. Jur. O. S. 7: 13 Eliz., c. 5.

86. Where the effect of a transfer of property is to defraud or delay the present or future creditors of the transferor, or co-owners or other persons interested in such property, and the transfer is gratuitous or the transferee has notice of the intended fraud, the transferee must hold the property for their benefit to the extent necessary to satisfy their just demands.

Transfer in fraud of transferor's creditors.

87. Where a debtor becomes the executor or other legal representative of his creditor, he must hold the debt for the benefit of the persons interested therein.

Bill s. 78, cl. (*f*). See sec. 13. ill. (*a*), *supra*.

Debtor becoming creditor's representative.

88. Where a trustee, executor, partner, agent, director of a company, legal adviser, or other person bound in a fiduciary character to protect the interests of another person, by availing himself of his character, gains for himself any pecuniary advantage or where any person so bound enters into any dealings under circumstances in which his own interests are, or may be, adverse to those of such other person and thereby gains for himself a pecuniary advantage, he must hold for the benefit of such other person the advantage so gained.

Bill s. 78. cl. (*g*). Act I of 1877 s. 3, ills. (*b*), (*c*), (*e*). (*f*): L. R. 2 Ind. App. 18: 2 Spence 299: Lewin 165, 171: Story, § 323.

Advantage gained by fiduciary.

Illustrations.

(*a*) A, an executor, buys at an undervalue from B, a legatee, his claim under the will. B is ignorant of the value of the bequest. A must hold for the benefit of B the difference between the price and value.

(*b*) A, a trustee, uses the trust-property for the purpose of his own business. A holds for the benefit of his beneficiary the profits arising from such user.

(*c*) A, a trustee retires from his trust in consideration of his successor paying him a sum of money. A holds such money for the benefit of his beneficiary.

(*d*) A, a partner, buys land in his own name with funds belonging to the partnership. A holds such land for the benefit of the partnership.

(*e*) A, a partner, employed on behalf of himself and his co-partners in negotiating the terms of a lease, clandestinely stipulates with the lessor for payment to himself of a lákh of rupees. A holds the lákh for the benefit of the partnership. *Fawcett v. Whitehouse*, 1 R. & M. 132.

(*f*) A and B are partners. A dies. B, instead of winding up the affairs of the partnership, retains all the assets in the business. B must account to A's legal representative for the profits arising from A's share of the capital.

(*g*) A, an agent employed to obtain a lease for B, obtains the lease for himself. A holds the lease for the benefit of B.

(*h*) A, a guardian, buys up for himself incumbrances on his ward B's estate at an undervalue. A holds for the benefit of B the incumbrances so bought, and can only charge him with what he has actually paid.

89. Where by the exercise of undue influence any advantage is gained in derogation of the interests of another, the person gaining such advantage without consideration or with notice that such influence has been exercised must hold the advantage for the benefit of the person whose interests have been so prejudiced.

Advantage gained by exercise of undue influence.

90. Where a tenant for life, co-owner, mortgagee, or other qualified owner of any property, by availing himself of his position as such, gains an advantage in derogation of the rights of the other persons interested in the property, or where any such owner, as representing all persons interested in such property, gains any advantage, he must hold, for the benefit of all persons so interested, the advantage so gained, but subject to repayment by such persons of their due share of the expenses properly incurred, and to an indemnity by the same persons against liabilities properly contracted, in gaining such advantage.

Bill s. 78, cl. (*h*). Lewin 166, 725: 2 Spence 301: Act I of 1877, s. 3, ill. (*d*). cf. 5 Beng. 458, mortgagee buying equity of redemption.

Advantage gained by qualified owner.

Illustrations.

(*a*). A, the tenant for life of leasehold property, renews the lease in his own name and for his own benefit. A holds the renewed lease for the benefit of all those interested in the old lease.

(*b*). A village belongs to a Hindú family. A, one of its members, pays nazráná to Government and thereby procures his name to be entered as the inámdár of the village. A holds the village for the benefit of himself and the other members.

10 Moo. I. A. 322: 14 Moo. I. A. 305.

(*c*). A mortgages land to B, who enters into possession. B allows the Government revenue to fall into arrear with a view to the land being put up for sale and his becoming himself the purchaser of it. The land is accordingly sold to B. Subject to the repayment of the amount due on the mortgage, and of his expenses properly incurred as mortgagee, B holds the land for the benefit of A.

Bill s. 78, cl. (*i*). 2 Spence 195: Lewin 128, 729: Smith § 725: Act I of 1877, s. 3, ills. (*g*), (*h*).

91. Where a person acquires property with notice that another person has entered into an existing contract affecting that property, of which specific performance could be enforced, the former must hold the property for the benefit of the latter to the extent necessary to give effect to the contract.

Property acquired with notice of existing contract.

Bill, s. 78, cl. (*j*). Smith § 728.

92. Where a person contracts to buy property to be held on trust for certain beneficiaries and buys the property accordingly, he must hold the property for their benefit to the extent necessary to give effect to the contract.

Purchase by person contracting to buy property to be held on trust.

Story Eq. Jur. § 378.

93. Where creditors compound the debts due to them, and one of such creditors, by a secret arrangement with the debtor, gains an undue advantage over his co-creditors, he must hold for the benefit of such creditors the advantage so gained.

Advantage secretly gained by one of several compounding creditors.

Bill, s. 78, cl. (*k*). e.g., Panjáb co-sharer absentees.

94. In any case not coming within the scope of any of the preceding sections, where there is no trust, but the person having possession of property has not the whole beneficial interest therein, he must hold the property for the benefit of the persons having such interest, or the residue thereof (as the case may be), to the extent necessary to satisfy their just demands.

Constructive trusts in cases not expressly provided for.

Illustrations.

Spence 297.

(*a*) A, an executor, distributes the assets of his testator B to the legatees without having paid the whole of B's debts. The legatees hold for the benefit of B's creditors, to the extent necessary to satisfy their just demands, the assets so distributed.

(*b*). A by mistake assumes the character of a trustee for B, and under colour of the trust receives certain monies. B may compel him to account for such monies.

(*c*). A makes a gift of a lákh of rupees to B, reserving to himself, with B's assent, power to revoke at pleasure the gift as to Rs. 10,000. The gift is void as to Rs. 10,000, and B holds that sum for the benefit of A.

95. The person holding property in accordance with any of the preceding sections of this chapter must, so far as may be, perform the same duties, and is subject, so far as may be, to the same liabilities and disabilities, as if he were a trustee of the property for the person for whose benefit he holds it:

Bill, s. 79.

Obligor's duties, liabilities and disabilities.

Provided that, (*a*) where he rightfully cultivates the property or employs it in trade or business, he is entitled to reasonable remuneration for his trouble, skill and loss of time in such cultivation or employment; and (*b*) where he holds the property by virtue of a contract with the person for whose benefit he holds it, or with any one through whom such person claims, he may, without the permission of the Court, buy or become lessee or mortgagee of the property or any part thereof. Underhill, p. 128.

96. Nothing contained in this chapter shall impair the rights of transferees in good faith for consideration, or create an obligation in evasion of any law for the time being in force.

Bill, s. 80. L. R. 8 Ch. 747.

Saving of rights of *bonâ fide* purchasers.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 9th January, 1880.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B., C.I.E.
The Hon'ble Sir J. Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Sayyad Ahmad Khan Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore, C.S.I.
The Hon'ble G. H. M. Batten.
The Hon'ble C. Grant.
The Hon'ble E. C. Morgan.

RELIGIOUS CONGREGATIONS BILL.

The Hon'ble MR. STOKES moved that the Reports of the Select Committee on the Bill to provide for the holding of property by certain Religious Congregations be taken into consideration. He reminded the Council that this Bill had originated in the complaint made, as far back as 1873, by certain members of the Simla Union Church, that they laboured under a hardship in being unable, without constantly recurring trouble and expense, to keep up a permanent and effective body of trustees to whom to commit the property of the church. The Secretary to the Calcutta Missionary Conference, about the same time, made a similar representation; and there were, as afterwards appeared, other bodies associated for religious purposes in India who experienced like difficulties.

A Bill was accordingly framed on the model of the Statute known as Peto's Act, 12 & 13 Vic., c. 28. It merely provided that when property of certain descriptions was conveyed on trust for any religious congregation, and no special provision was made for the appointment of new trustees, new trustees might be appointed in such manner as the congregation might determine; and that, on the appointment of new trustees, whether in exercise of the powers thus conferred or otherwise, the property should vest in them without any further conveyance. Persons professing Hindúism, Muhammadanism or Buddhism were excepted from the provisions of the Bill, as it was thought undesirable to interfere with the laws regulating their endowments.

Since the publication of the Bill several communications had been received from the Local Governments and many of the religious bodies to which the Bill applied, all of which had been carefully considered by the Select Committee to which the Bill had been referred. The Committee had got rid of the ambiguous term "congregation". They had rendered the Bill applicable to immoveable property held for whatever purpose, as well as to moveable property. They had provided for deciding cases of dispute as to what constituted membership of the bodies to which the Bill applied, and for the dissolution of those bodies, and the distribution of their property on

being dissolved. These amendments had been mentioned to the Council when the preliminary Report was presented last September, and the present Report stated two further amendments—that words had been inserted in section 3 requiring the memorandum of appointment of trustees to be registered, and that a section had been added declaring that, where there was an instrument containing provisions for the dissolution of a religious body or the distribution of its property on such dissolution, those provisions should not be over-ridden by the Bill.

With these remarks he might ask His Excellency the President to put the motion; but, first, he thought it necessary to notice a criticism received from the Local Government which styled itself, somewhat inaccurately, "His Grace the Governor in Council." He would quote the criticism verbatim:—

"2. His Grace the Governor in Council much doubts the expediency of creating these perpetual trusts. He observes that they must be for 'a religious purpose;' but what is 'a religious purpose?' Would Mormonism be included? Further, he fails to see with what reason Native Christians are to be shut out. Referring to the last sentence of clause 1, it appears that, in 'Hindus,' converts to Christianity from a particular religion, followed by the majority of the people of India, would be included."

MR. STOKES ventured to say that he had seldom, if ever, read any statement regarding a short and simple Bill, which betrayed so many misconceptions. First, His Grace "much doubts the expediency of creating these perpetual trusts." But the Bill did not create any trust whatever, either perpetual or temporary. It assumed that a trust had been created, and made provision, in certain cases, for the appointment of new trustees and the vesting of the trust-property. Secondly, His Grace observed that these imaginary trusts must be "for a religious purpose." But the words quoted did not appear in the Bill in any one of its stages. The question "what is a religious purpose?" did not therefore arise. The question whether the Bill would apply to Mormon-societies might, MR. STOKES thought, be left unanswered as not very likely to arise in India. When, if ever, it did so arise, our Courts would probably look at the case of *Hyde* v. *Hyde*, L. R. 1 P. & D. 130, as to the non-recognition of a Mormon marriage.

Again, His Grace the Governor in Council failed to see with what reason Native Christians were shut out. The answer was that they were not shut out. If Hon'ble Members would look at section 1, they would see that the Bill applied to every person in British India except "Hindús, Muhammadans or Buddhists," and persons whom the Governor General in Council might exclude from the operation of the proposed Act. His Grace obviously supposed that "Hindú" was necessarily an ethnic term, and consequently included Native Christians. But, from its connection with "Muhammadans" and "Buddhists," it was clear that the expression "Hindús" was here in the Bill (as it was in the Succession Act, section 331) used strictly as a theological term, and that the exception could not, therefore, apply to converts from Hindúism to Christianity.

MR. STOKES had only further to observe that the Bill would supply an admitted want, and that it had been received with considerable favour by the representatives of many different denominations of Christians in the country,—the Protestant Bishops of Lahore and Rangoon, the learned and excellent Bishop Caldwell, the Roman Catholic Bishop of Bombay, and others,—whose remarks Hon'ble Members would find in the papers laid before them.

The Hon'ble MR. HOPE said there was one question regarding which he should be glad to receive an explanation, which he had no doubt the Hon'ble Mover of the Bill would be able satisfactorily to give, but on which he did not find an answer appearing clearly on the face of the Bill, although it might be latent under certain provisions which he had not fully grasped. A large number of those whose opinion was asked in regard to the Bill had urged the necessity of providing some sort of definition of what a "member" of a religious body was. This matter had been noticed by the Calcutta Missionary Conference, the Judicial Commissioner of the Central Provinces, the Madras Government, the Chief Commissioner of Mysore, the Wesleyan Mission in Mysore, the Legal Remembrancers for Bengal and Bombay, the Archdeacon of Calcutta,

the Bishops of Calcutta and Rangoon, and the Judicial Commissioner of Oudh. Some of these authorities had suggested a solution of one kind; others of another; and there could be no doubt that the drawing up of a precise definition of what should constitute church-membership was a matter of extreme delicacy, difficulty and doubt. It was provided in section 9 that when any question arose, either in connection with the matters thereinbefore referred to or otherwise, as to whether any person was a member of any such body as aforesaid, any person interested in such question might apply by petition to the High Court for its opinion on such question, and that opinion would have the force of a decree. MR. HOPE would be glad to know whether, if there was a provision in the trust-deed stating what membership should mean, that provision would stand absolutely good in all voting in respect of the matters provided for in sections 2, 6 and 7 of the Bill. He was inclined to think it would.

The Hon'ble MR. STOKES replied that he thought it would; and he was sorry he had not brought with him a case (*Forbes* v. *Eden*, L. R. 1 Scotch Appeals 580) which he was looking at only half-an-hour previously in the Legislative Council House, and in which Lord Cranworth laid down that the Court was bound to take cognizance of the provisions of any instrument upon which a voluntary religious association was organised, for the purpose of satisfying itself as to who was entitled, as a member, to the funds.

The Hon'ble MR. HOPE said he was quite satisfied on that point. He would wish further to know the meaning of the words "or otherwise" in section 9 which he had before quoted. Did they mean *any* question in connection with disputes in the body?

The Hon'ble MR. STOKES explained that the words "or otherwise" referred to things *ejusdem generis* with any of those previously mentioned, such as the appointment of a new trustee, the dissolution of the association, and the like. It would not authorize the Court to decide questions as to the exact nature of the religious teaching to be afforded by the body.

The Hon'ble MR. HOPE expressed himself satisfied upon this point also. He was much obliged for the explanations, which he had thought it best to elicit, in view of the importance of the two points in question.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill as amended be passed.

The Motion was put and agreed to.

BOMBAY CIVIL COURTS ACT, 1869, AMENDMENT BILL.

The Hon'ble MR. STOKES also moved for leave to introduce a Bill to amend the Bombay Civil Courts Act, 1869. He said that the Government of Bombay had lately represented that the repeal of section 30 of the Bombay Civil Courts Act, XIV of 1869, by the Repealing Act, 1876, had deprived that Government of a power it formerly possessed under that section, of from time to time altering the limits of the local jurisdiction of the Subordinate Judges. The section in question ran as follows:—

"30. The present Principal Sadr Amíns shall be the first Subordinate Judges of the first class, and (subject to any alteration of the limits of their ordinary local jurisdiction which may from time to time be made by the Governor of Bombay in Council) shall severally exercise the jurisdiction of Subordinate Judges of the first class under this Act, within the local limits within which, immediately before the passing of this Act, they respectively exercised the jurisdiction of Principal Sadr Amíns.

First Subordinate Judges of first class.

"The present Sadr Amíns and Munsifs shall be the first Subordinate Judges of the second class, and (subject to any alteration of the limits of their local jurisdiction which may from time to time be made by the Governor of Bombay in Council) shall severally exercise the jurisdiction of Subordinate Judges of the second class under this Act, within the local limits within which, immediately before the passing of this Act, they respectively exercised the jurisdiction of Munsifs."

First Subordinate Judges of second class.

Now, it seemed to the Government of India that this section rather assumed the existence of such a power than conferred it; but, as it was quite clear that the Local Government should possess such a power, the present Bill had been prepared to confer it. It would merely add to the Bombay Civil Courts Act, 1869, a section conferring power on the Governor of Bombay in Council to fix and alter the local limits of the ordinary jurisdiction of the Subordinate Judges, and would validate such orders as might have already been issued fixing or altering such limits.

The Motion was put and agreed to.

BURMA SURVEY BILL.

The Hon'ble MR. RIVERS THOMPSON introduced the Bill to provide for the demarcation and survey of land in British Burma, for the introduction of which leave had been given at Simla. The main objects of the Bill, he said, were in connection with the Cadastral-survey, which had been already commenced in that Province as a preliminary to the proper assessment and settlement of the land,—a measure of great importance as affecting the general interests of the province, and calculated to enhance its public revenues. He should mention that, as prepared by the Chief Commissioner, the Bill was intended, as a General-survey Act, to meet the necessities of the frequent surveys which were undertaken in connection with the alignment of new roads, the construction of railways, of canals and embankments, or other similar projects. But on full consideration it was decided by the Government of India that in legislating upon this subject it was desirable to restrict the character of the Bill to a Revenue-survey Bill, as objections existed to giving it any wider application. He need not detain the Council by detailing the reasons which influenced that decision. It would be sufficient to say that, in a new and somewhat delicate and difficult duty connected with scientific surveys of land in Burma, and in a work which was likely to extend over very many years and to be carried out by officers who had no experience in the conduct of accurate and detailed measurements of land, it was thought better to keep the Bill as simply a Revenue-survey Bill, having sole reference to the preliminary and professional work to be undertaken for the purpose of the proper adjustment of the land-revenue. It seemed to the Government of India also, with regard to the other objects which the Chief Commissioner had in view, that the Land-acquisition Act of 1870, which contained ample provisions for the acquisition of land for public purposes, secured all that was necessary in these respects. The Bill, therefore, which he (MR. RIVERS THOMPSON) now proposed to submit to the Council was one which dealt only with questions connected with the Revenue-survey. Of course, experience had been gained in the numerous surveys and settlements which had been made in the older and more advanced provinces of India as regards such legislation; and the present Bill had at least the recommendation of being concise and simple in its provisions, capable of effecting—what was very essential—a cheap survey, and, he hoped, of securing the objects which it was desired to secure.

The Bill provided, after notification by the Chief Commissioner, for the entry upon land for the purposes of demarcation and for the subsequent professional-survey. It proposed to confer powers for laying down boundaries, for erecting boundary-marks, for effecting clearances and removing obstructions in performing that work, and for giving compensation to any who had suffered loss from the clearances made. The first few sections of the Bill related to the appointment and functions of Demarcation-officers. On the completion of a demarcation, the Demarcation-officer was required to submit to an officer, to be called the Boundary-officer, a report of all his proceedings, with the maps which he had prepared. The Boundary-officer would be one who was qualified to exercise regular judicial functions; and it would be his duty, as a Court of first instance, to hear and decide all cases of dispute which may have arisen regarding boundaries and all objections taken regarding the demarcation-proceedings. It was intended that there should be an appeal from the decision of the Boundary-officer to the Commissioner of the division, and

in certain cases, where there might be intricacy or interference with private rights, there would be a final appeal to the Judicial Commissioner. Ample provision had thus been made for securing the protection of all individual rights. When an order determining a boundary became final, permanent boundary-marks would be laid down, and the Cadastral-survey Department would enter upon the field. As these Survey-officers, to perform their duties properly, would need similar powers to those which were exercised by the officers who conducted the preliminary operations, it was proposed, by section 28 of the Bill, to invest with those powers any officer appointed by the Local Government for such surveys. The only other point which required notice was that the 32nd section of the Bill gave the Chief Commissioner power to make rules for the collection and record of all information connected with survey-proceedings, such as it was usually the practice to collect in such cases.

In the ordinary course he (MR. RIVERS THOMPSON) would have concluded his remarks with a motion to refer the Bill to a Select Committee. But the fact was that the draft of the Bill which was now laid upon the table was only prepared last night, and it had therefore not been sufficiently long in the hands of the Members to enable them to consider and criticise its provisions. Under the circumstances, with his Excellency the President's permission, he would propose to defer the motion to refer the Bill to a Select Committee to the next meeting of the Council, when, if any Hon'ble Member required any explanations regarding the measure, he would be glad to give them.

BURMA DISTRICT CESSES AND RURAL POLICE BILL.

The Hon'ble MR. RIVERS THOMPSON also presented the Report of the Select Committee on the Bill to amend the law relating to District Cesses and Rural Police in British Burma.

FACTORIES BILL.

The Hon'ble MR. COLVIN moved that the Hon'ble Mr. Morgan be added to the Select Committee on the Bill to regulate labour in Factories.

The Motion was put and agreed to.

The Council adjourned to Friday, the 23rd January, 1880.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 9th January, 1880.

DEPARTMENT OF FINANCE AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 16th January 1880.

R. B. CHAPMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 13th JANUARY 1880.

GENERAL REMARKS.—Rain fell during the week in parts of British Burma and Assam, and there were slight showers in two districts of Madras. The prospects of the spring crops still continue favourable, but rain would now be of general benefit. The public health is on the whole good, except in parts of the Bombay Presidency.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Jan. 10th)	...	*Ragi* 26·51; standing crops in good condition; early dry crops being harvested; second crop paddy being sown.
Kurnool („ „)	...	*Ragi* 29·7; paddy being harvested, withered in one taluk from want of water; *cholum* and cotton harvest commenced; pasture and water abundant.
Ganjam („ „)	·18 (average of 5 stations).	*Ragi* 30·8.
Kistna („ „)	...	*Ragi* 32·57; standing crops slightly injured by blight in one taluk, elsewhere doing well; wet paddy being reaped; later crops being sown; 20 inches water over anicut.
Chingleput („ „) (Madras)	...	*Ragi* 22·7; ploughing in one taluk; sowing and planting in 3 taluks; standing crops somewhat injured by insects in parts of 4 taluks, elsewhere doing well; harvest outturn ½ to ¾; pasture abundant.
Coimbatore („ „)	...	*Ragi* 24·02; dry crops withering in parts of all taluks but one; wet crops in fair condition; harvest of paddy, *cholum*, *ragi*, and *cumboo*, outturn of paddy ¼ to full, others ⅛ to ½.
Tanjore („ „)	·16 (in one station).	*Ragi* 29·26; crops in good condition; harvest of paddy and a few dry grains, outturn ¾ to full.
Madura („ „)	...	*Ragi* 24·46.
Malabar („ „)	...	*Ragi* 21·59; harvest of second crop commenced in 7 taluks, in others almost completed.
Travancore („ „)	...	State of food market unchanged.
		General Remarks.—General prospects good, except in Trichinopoly, North Arcot, and Western parts of South Arcot, where want of rain is still much felt.
Bombay— (Jan. 14th)		
Kurrachee ...	...	Report not received.
Hyderabad ...	...	*Rabi* crops healthy; ordinary flow general; small-pox prevalent in taluka Naushahro; in taluka Hála locusts have slightly damaged *rabi* crops; weather unseasonably mild.
Ahmedabad ...	...	*Rabi* promising; prices falling.
Baroda ...	...	Weather suddenly has become warmer; crops thriving; public health still affected by fever, but improving.
Surat ...	...	Crops generally healthy; fever in Mandvi and Pardi.
Násik ...	...	Ague still prevalent in 4 talukas, cattle disease in one; measles in Dindori; *rabi* crops fair.
Colaba (Bombay) ...	...	Temperature normal till 10th, afterwards 3 degrees cool; vapour in air slightly excessive, wind normal.
Poona (Jan. 11th)	...	Cholera in city, cases 114, deaths 97.
Ahmednagar ...	...	Crops in inferior soil withering; injury by rats in Kopergaon.
Sholapore ...	...	Prospects unchanged; public health good.
Dharwar ...	...	Slight fever; *rabi* crops promising; exotic cotton somewhat blighted.
Kánara ...	...	Sowing of second crop continues; severe fever and cattle disease prevail.
Rajkot ...	...	Weather cold; *rabi* promising; health good.
		General Remarks.—*Rabi* crops promising; weather warmer; 97 deaths from cholera in Poona city; severe fever in Kanara; fever in Gujerat.
Bengal— (Jan. 14th)		
Chittagong ...	*Nil*	Weather fair; harvesting of *amun* completed; cold-weather crops progressing; cholera in cyclone tract decreasing.
Dacca ...	*Nil*	Prospects of crops good; public health good.
24-Pergunnahs (Alipore)	*Nil*	*Amun* harvest nearly completed, outturn satisfactory; prospects of winter crops fair; public health generally good; some cattle disease in Baraset.
Moorshedabad ...	*Nil*	*Rabi* crops doing well; fever in mitigated form still prevalent in thana Burwa; cholera cases still in Berhampore town, but none fatal.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Rajshahye ...	*Nil*	Weather cool and clear; heavy dews at night; winter rice still being cut; outturn generally very good where crop not damaged by floods; spring crops have come up well and are thriving; public health good.
Burdwan ...	*Nil*	Spring crops good; health good.
Rungpore ...	*Nil*	Weather fair and cool; crops favourable; public health good.
Bhágalpur ...	*Nil*	Prospects of *rabi* crops and general health good.
Purneah ...	*Nil*	Prospects of *rabi* crops good; paddy to the north still being reaped; health of people and cattle good.
Patna ...	*Nil*	Rain would benefit *rabi* crops.
Durbhanga ...	*Nil*	Weather foggy; threshing of *aghani* crop in progress; *rabi* continues favourable; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; rain much wanted for *rabi* crops; district health good.
Cuttack ...	*Nil*	Rice being harvested; winter crops good; small-pox prevalent.
		General Remarks.—Rice nearly all harvested except here and there in low lands; threshing in progress; prospects of cold-weather crops generally continue favourable, but rain wanted in parts of Patna Division, and in Hazáribágh, Lohardugga, Nuddea, and Burdwan; pulses being reaped and sugarcane pressed in some districts; fever, small-pox, and cholera still reported in some places; otherwise general health good.
N.-W. Provinces and Oudh—		
Benares ...	...	Rain wanted; prospects and health continue good.
Allahabad (Jan. 13th)	...	Weather still clear; rain much needed in unirrigable lands; *rabi* crops thriving well; health excellent; prices almost stationary.
Gorakhpur („ 12th)	*Nil*	*Rabi* prospects good, but would be improved by more rain.
Jhánsi („ 14th)	...	*Rabi* prospects fair; prices stationary.
Agra („ 13th)	...	*Rabi* crops thriving well; weather seasonable; sickness disappearing.
Bareilly („ 14th)	...	Weather clear and cold; prospects good.
Meerut („ 14th)	...	Prospects good; wind westerly; health improving.
Kumaun („ 13th)	...	Weather fine; comparatively warmer; crops good.
Lucknow („ 14th)	...	Weather seasonable; prospects good; millet large, seers 23·8.
Partabgarh („ 12th)	*Nil*	Prospects good; rain needed.
Sitapur („ 14th)	*Nil*	Prospects good; health good.
Fyzabad („ 14th)	*Nil*	Prospects good.
		General Remarks.—Health good; *rabi* crops promising; rain wanted in Gorakhpur and Allahabad; prices stationary.
Punjab—(Jan. 13th)		
Delhi ...	...	Prospects good; health improving.
Hissar ...	...	Crops continue to do well; prices stationary.
Umballa ...	...	No report received.
Jullundur ...	...	Crops promising; prices falling; health good.
Lahore ...	...	Crop prospects fair; health good.
Ferozepore ...	...	Agricultural prospects fair; prices steady.
Siálkot ...	...	Harvest prospects fair.
Ráwalpindi ...	...	Agricultural prospects good; health improving.
Peshávar ...	...	*Rabi* prospects good; prices have fallen slightly.
Mooltan ...	...	Crops and health good; prices steady.
Dera Ismail Khan ...	...	Crops prospects fair.
		General Remarks.—No rain during week, but reports generally favourable.
Central Provinces—		
Nágpur (Jan. 14th)	...	Clear; threshing of *jowar* continues; *rabi* generally good; no epidemic; prices slightly easier.
Jubbulpore ...	...	Seasonable; *rabi* prospects good; few cases of small-pox; prices stationary.
Saugor	...	Seasonable; *rabi* doing well; health good; prices stationary.
Seoni	...	Clear; *rabi* doing well, but needs rain; few cases small-pox.
Hoshangabad ...	...	Seasonable; *rabi* promising; prices slightly fallen.
Raipur (Jan. 10th)	...	Cool and clear; *rabi* doing well, but requires slight rain; cattle disease continues; prices unchanged.
Sambalpur („ 9th)	...	Clear and cloudy alternately; *sugar-cane* cutting and pressing continue; slight small-pox.
		General Remarks.—Clear; *kharif* crops cut; threshing continues; prospects of *rabi* generally good; prices stationary.
British Burma— (Jan. 14th)		
Akyab ...	...	Public health good; reaping in progress.
Rangoon	1·9	Two fatal cases of small-pox in town; fever and small-pox continue in parts of the Hanthawadi District; slight cattle disease, reaping going on.
Bassein	·3	Public health good; slight cattle disease; reaping nearly over.
Prome	...	Small-pox continues, otherwise public health good.
Amherst (Moulmein) ...	·3	Public health good; crops nearly gathered.
Toungoo	...	A few cases of small-pox; otherwise public health fair.
		General Remarks.—General health good, but small-pox somewhat prevalent; slight cattle disease continues; unseasonable rain fallen in places, but no damage to crops reported; harvest nearly over.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Assam—(Jan. 14th)		
Gauhâti	·41	Weather unsettled; mornings raw and foggy; prospects of crops favourable.
Sylhet	·09	Weather cool and pleasant; prospects of cold weather crops good.
Cachar	*Nil*	Weather seasonable; outturn of rice crops good; common rice at 73⅝ seers a rupee; public health good.
Dibrugarh	1·73	Ploughing for *asee dhan* commenced; prospects of mustard fair; district healthy.
Mysore and Coorg—(Jan. 14th)		
Bangalore ...	...	Standing crops in good condition generally; prospects continue favourable; health good; prices slightly fallen.
Mysore ..	...	No report received.
Mercara ...	...	
Berar & Hyderabad—(Jan. 14th)		
Amráoti	...	*Rabi* prospects good.
Akola	...	*Rabi* crops doing well.
Hyderabad (Jan. 15th)	...	Agricultural prospects still rather unfavourable; paddy is selling at 24 seers per rupee, *jowar* at 18 and wheat at 6½.
Central India States—(Jan. 14th)		
Indore	...	Health good; prospects favourable.
Morar (Gwalior) ...	*Nil*	
Sutna ...	...	Prospects good; *jowar* 29 seers.
Rutlam ...	...	Weather clear and cold; public health and agricultural prospects good.
Neemuch ...	...	No report received.
Goona ...	...	Crops and health good; wheat 15 seers.
Bhopal ...	...	Public health good.
Agar ...	...	Health good; agricultural prospects favourable.
Nowgong ...	...	Fever still prevalent; prospects of crops good.
Mánpur ...	...	Maximum thermometer 72°; weather fine; *rabi* crops excellent.
Rajputana—		
Abu ...	...	No report received.
Sirohee (Jan. 4th)	...	Wells full; tanks drying; malarious fever declining; prospects fair again; colder.
Marwar (,, 3rd	3·37	Wells almost full; one week's water in tanks; health good; crops flourishing.
Meywar ...	...	No report received.
Harowtee (Jan. 10th)	...	Health and prospects good.
Jhallawar ...	...	
Ajmere (Jan. 15th)	...	*Rabi* crops never more prosperous; health good.
Jeypore ...	...	Prospects promising; fever disappearing; seasonable.
Bhurtpore ...	...	
Ulwur ...	...	No report received.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

REPORT OF THE INDIAN LAW COMMISSION, 1879.

COMMISSION.

NOTIFICATIONS.

Fort William, the 11th February, 1879.

No. 6.—WHEREAS it is considered expedient that a Commission should issue to enquire into and consider the provisions of the Bills marginally noted and to report thereon, and to make such suggestions as to the codification of the Substantive Law of British India as may seem desirable, the Governor General in Council doth hereby authorize and appoint the Hon'ble Whitley Stokes, C.S.I., the Hon'ble Charles Turner, C.I.E., and the Hon'ble Raymond West to be Commissioners for the purposes aforesaid, and, on or before the first day of November, 1879, to report to the Governor General in Council, under their hands and seals, their opinion on the several points herein submitted for their consideration.

The Negotiable Instruments Bill.
The Transfer of Property Bill.
The Alluvion Bill.
The Master and Servants Bill.
The Easements Bill.
The Trusts Bill.

D. FITZPATRICK,
Secretary to the Govt. of India.

Simla, the 9th October, 1879.

No. 22.—WITH reference to the Notification of this Department, No. 6, dated 11th February, 1879, it is hereby notified that the Governor General in Council has been pleased to extend the time therein prescribed for the submission of the Report of the Law Commission to the 1st December, 1879.

D. FITZPATRICK,
Secretary to the Govt. of India.

REPORT.

WE, the Commissioners appointed to enquire into and consider the Bills marginally noted and to report thereon, and to make such suggestions as to the codification of the Substantive Law of British India as may seem desirable, have now the honour to report to the Governor General in Council our opinion as follows :

The Negotiable Instruments Bill.
The Transfer of Property Bill.
The Alluvion Bill.
The Master and Servants Bill.
The Easements Bill.
The Trusts Bill.

I.

In the correspondence extending over several years which has resulted in the appointment of the Commission it has been laid down and repeated that

"the question of giving a Civil Code to India was no longer an open one." The only question, one of great practical difficulty, has been as to "the best machinery for carrying on Indian codification." In what precise sense "code" and "codification" have been used, and whether they have always been used in the same sense, is not perhaps quite certain; but for practical purposes the words may be taken, we apprehend, as referring to the systematic legislation resulting in such works as the Succession Act, the Penal Code, and the Codes of Civil and Criminal Procedure. A Code as applied to the laws just named means an orderly and systematic arrangement of the rules relating to some well-marked department of the field of jural rights and duties. In its larger sense of a general assemblage of all the laws of a community no attempt has as yet been made in this country to satisfy the conception of a Code. The time for its realization has manifestly not arrived. The rapid changes going on in social relations make it difficult to appreciate the exact extent to which laws of even a limited scope have furthered or retarded progress. The different principles involved in them have not been so wrought out to their final consequences that their ultimate consistency or inconsistency and their relative value can be pronounced on with absolute confidence. When the effects of the special laws have been ascertained by their persistence under varying circumstances, the causes will become apparent by comparison, and the general principles will be established, on the suitability of which to the people and their circumstances it will then be safe to proceed in the work of final consolidation and arrangement. In the meantime, codification in the less ambitious sense may properly proceed in meeting exigencies which daily experience brings to light along with the materials out of which the appropriate fabric may in each case be formed.

2. This, as we understand it, was the general idea of legislation which the Government of India intended to insist on in its letter No. 34, dated 10th May, 1877. After pointing out the positive gaps in the system which must needs be filled up, that letter says that the "task of arranging scientifically the various chapters of the Civil Code thus produced would then remain."

It has been objected that this plan of ultimate scientific arrangement "seems to mix up two radically different ways of looking at law," namely, that which may be called the historical, in that it simply gathers up in orderly synthesis the results of ascertained development, and the abstract, or as it has been called the anti-historical, method, which, taking its stand on the "permanent elements of society and human nature," works out from these "an orderly exposition of fundamental principles," "followed by a statement of all their leading practical applications." We have to confess that we are unable to perceive the inconsistency complained of, or to appreciate the force of the argument adduced in support of the recommendation that, while particular sections of a complete and systematic body of civil law are proceeded with, the notion of their eventual combination in due co-ordination as parts of a single and general Code ought to be abandoned.

3. Although it is necessary, in the circumstances under which Indian legislation is carried on, to deal with the several branches of the law by distinct Acts, yet the ultimate design of forming these Acts into a general Code ought never, in our opinion, to be lost sight of. Every Statute, if it is to be self-consistent and duly proportioned, must be framed with reference to some central group of ideas which dominate the whole work. In constructing a system of laws the same principle should prevail. Although the rule of construing by reference to each other all laws which relate to the same matter does not extend to Statutes relating to different subjects, yet it is obvious that the same principles may be involved in Acts which bear on very different departments of civil rights and duties. The impressions received from a study and application of one branch of the law cannot be cast off in expounding and applying another; nor is it possible that really just and philosophical conceptions of law as an organic structure should gain possession of the minds of the community, or even of the legal profession, unless the minor generalizations embodied in particular laws centre in higher generalizations drawn from the elementary truths of human nature and experience. Unless such a co-ordinating influence is allowed to operate, the development of the law, and the social growth of the community so far as it is affected by the law, must proceed irregularly and disproportionately. In one department a particular set of ideas, which lend themselves readily to the purpose, will obtain an expansion and a

predominance which are at the same time gained in another by a different set of ideas. In the course of time and the complications of human affairs the two come into collision. One must give way, and yet neither can do so without litigation, waste of energy, and personal suffering. Nothing less, perhaps, than an infallible prescience of events, together with a power and precision of language not yet vouchsafed to man, would enable a legislature to construct a system of laws involving in all its ramifications no inconsistency or want of adaptation to its intended purposes; but that affords no reason why the inevitable shortcomings should be aggravated by inattention. If a Code cannot be thrown off, as we know it cannot, by one effort of a wise and comprehensive intellect, the alternative system should be brought as nearly as possible to such a production by being animated throughout with a uniform spirit and logical method, securing, so far as may be, an essential harmony amid multitudinous details.

4. It is true that when legislation proceeds by special laws, more complete and minute attention is paid to the detailed provisions called for by the particular circumstances dealt with. But in the practical application of such laws it often becomes evident through the logical development of one set of rules that it has proceeded upon an underlying conception inconsistent with the radical idea or group of ideas involved in another special law. As the relations, then, which have revealed the latent antinomy are likely to arise again and again, it becomes necessary to subjugate the one principle to the other either by formal legislation or by a forced method of interpretation, with the injurious consequences to which we have adverted. In the case of a Code such a result can hardly arise. The leading ideas of legal relation govern the whole, and the development of each part is worked out harmoniously on the same general basis of rights and duties, however they in detail may be modified by the particular kind of activity that has to be enforced or controlled, or the kind of physical objects to which they are directed. Such is the consummation to which legislation pursued in a philosophical spirit must necessarily tend; but in India we have not at hand such materials as those out of which the Roman Code and the modern Codes of Europe were formed. The responses of a long succession of jurisprudents, the commentaries of the legists extending over centuries, are wanting. Society itself, profoundly altered in external conditions, and subjected to the operation of conflicting currents of thought, is in a state of flux, the result of which may differ widely from the course of evolution of modern institutions in Europe from their germs in the dark ages. We must provide not only for permanent needs but for pressing exigencies of the passing time; yet, in proportion as great changes are unsuitable, we ought, so far as we can, to introduce amongst the materials of the future some constant and stable elements, the virtue of which has been proved by the test of time and of manifold experiment; and which it may reasonably be expected will give a tone and character to the whole system in which they are incorporated. Englishmen, indeed, brought up in the midst of influences which give to them so marked and peculiar a political character, will move spontaneously along lines in legislation, as in other fields of action, determined for them in a great measure by their own history and their law. Their general tendency will be pretty uniform; but this should not exclude the careful analysis of all that the past and the present of English law and English ideas offer for our adoption, the conscious selection from the mass of those principles which promise to be most strong, fruitful and beneficent, and the persistent endeavour to give them recognition and a governing influence throughout the fragmentary legislation to which for some time and for some purposes we are confined. The separate laws, being thus controlled, will be in the main consistent and capable at the proper time, without any harsh disturbance of interests, and almost without a perceptible break of continuity, of uniting into a single and well-compacted general Code.

5. These principles, of the highest importance yet too obvious almost for statement but that they have been called in question by an eminent authority, are, as we think, misrepresented, or at least not correctly presented, by the comparison drawn between legislation and house-building. No one, we suppose, would be so foolish, except in a simile, as to say "I will first build the rooms I want and then devise the ground-plan of the house." What a sensible

man, having a reasonable anticipation of his future fortune and necessities with limited present means, would do would be to build room after room as he could afford it according to a plan laid down from the first, but not so immutably fixed as to admit of no adaptation to circumstances. This is the analogy, if any, which we think ought to be drawn; and if, coming closer to the matter in hand, we could suppose the English law to have been fostered and controlled in its earlier stages by a wide and clear apprehension of general principles, it is impossible to doubt that it would have conferred through many generations greater blessings, at a much less cost, than in fact it has done to the people amongst whom it grew up. The Roman law, being in theory a *jus gentium*, freed so far as its constructors could free it from the narrowing peculiarities of a particular people, has been found more rich in general principles covering a variety of circumstances than the insular product of our own history and character. From the English law, then, we must not take at random, but choose such materials and such models for the structure we have to raise in India as will fit appropriately into a design, however remote in its accomplishment, congruous and symmetrical in the relation of its parts, and adapted, as far as human foresight extends, to the place, to the people, and to their hoped-for share in the general progress of civilized men.

6. We would not have it supposed that in thus vindicating the beneficial effect, and the necessity even, of a constant attention to uniform and expansive general principles in legislation, we in any way underrate the importance of the historical and of the practical elements of the work. The growth of law is always going on. It is the upshot of a contention ever renewed of rival interests and conflicting tendencies of thought. It thus reflects the material and moral growth of the nation. The historical element of existing law as disclosed in actual usage and the decisions of the Courts as well as in special legislation must never, therefore, be disregarded. But by the aid of comparative jurisprudence we may arrive at such clear conceptions of the life, growth and death of legal ideas in the several stages of social and moral progress that we can with a great degree of probability forecast what is already, and will more certainly be, felt as an incumbrance, and remove it. We may determine, at least approximately, what will fit into the general sphere of national thought of which the legal region is but a segment, and introduce it from another system in which it has already been submitted to experiment. We may labour with a fuller consciousness of the general ends to be pursued so as to work parallel to the legislation of the most advanced and prosperous countries. It is of the nature of the human mind and character to be deeply impressed by an orderly development of consequences from received principles, even when that development takes a course different from what unaided instinct and the first rude necessities of practice would have suggested. Thus, by timely legislation, taking just account of existing legal conditions as an outgrowth of the past and a necessary basis of the future, we may save the community many painful experiences, put it into possession of the fruits of others' labours and pains, and hasten by whole generations its entry into the great procession of the nations towards a uniformity of laws founded on uniformity in the conception of right and of the essential elements of human welfare.

7. In attempting to carry out such a scheme it is, perhaps, more difficult to determine, at any given moment, exactly what legal needs exist to be satisfied than to devise the laws which for the time will satisfy them. It is still harder to determine in what precise form and measure an infusion from a foreign system is capable of forming a vital adhesion to the existing body so as to supply an obvious deficiency, or even give a stimulus to its natural growth. The legislature, then, should be in close and appreciative communication with the felt necessities and the active thought of the society for which it is to work. It must be quick to discern permanent tendencies amongst the temporary fluctuations of popular impulse. Without binding itself in the trammels of what has grown effete, it must recognize the existing state of facts as a main element of the structure to be raised, and mould them into a symmetrical fabric with the more universal element drawn from general jurisprudence. Hence a necessity not only for an acquaintance with the contents and the working of past laws, but for a thorough insight into the actual circumstances of the community both in their mutual relation as physical facts and in the way

they are conceived by the mind of the people, in the wishes and aims thus generated, and in the moral preparation made by them for the reception of some new development or some new combination of principles. When we see the untiring care and precision with which the grounds of chemical or mechanical science are investigated, and the observations and experiments verified again and again before a fact is admitted finally as the ground-work of a law, a sense of surprise is awakened at the coarse and slovenly inductions, or the purely *à priori* assumptions, on which the spirit of system is too often content to build in the science of human action. The true use of a system is to co-ordinate the facts, not to neglect or in an arbitrary way to admit or to exclude them. The true purpose of a Code is to further the moral and material progress of a people by fostering a general harmony of thought and action, and by employing all the means afforded by existing conditions for ensuring a future amelioration. There must, then, be exact and sympathetic observation leading to true insight; there must be development; there must also be adoption and appropriation; but all without waste of force, and without neglect of any element which by its unacknowledged presence will set all calculations at fault.

8. In India itself a different set of objections has been raised to any attempt at scientific legislation. Collect, it is said, and group the existing facts of custom and practice, and leave the future wholly to natural development. The answer is that, essential as an exact ascertainment of the facts of the society and of their true relations is to the legislator, a sound theory is just as essential. It is a sound and comprehensive theory which in legal as in physical science alone gives life to the materials which it embraces. Such a theory in any department of human thought can be formed only by careful and continued reflexion on a copious store both of facts and of subsidiary theories by which the facts are viewed and classed according to various methods of arrangement. It implies the exercise of intelligence unbiassed by any predilection except for the truth, a readiness to accept all the teachings of experience, where it points out what is immediately expedient as well as what is permanently necessary. The contempt for theory which is felt by some men of considerable observing powers is, in truth, a contempt for all that makes their observations valuable. They are themselves the slaves, not unfrequently, of partial theories qualified by mere inconsistencies, which can be reconciled only by reference to some higher point of union at which a wider generalization stands ready to reconcile seemingly discordant facts. A mere empirical acquaintance with affairs may become a snare in the presence of new combinations; and in meeting the foreseen difficulties of the future, it is unsafe to yield to the suggestions of unsystematic thought, or of no thought at all, which are dear to indolence, dogmatism and mental impatience.

9. Objections of the kind that we have just been considering have in the last few years been urged so strongly, and even vehemently, in this country against all comprehensive legislation whatever, that we may be pardoned for examining the arguments that have been employed by reference in somewhat more detail to the teachings of history and of social science. It would seem as though a reaction of lassitude had quenched the energies of many distinguished administrators when we find them shrinking from projects which a few years ago they would have heartily welcomed. Legislation generally has for the time become distasteful, scientific legislation a kind of bugbear. It seems to be thought that the effort of grasping the new necessities can be avoided by a simple folding of the hands: it is overlooked that the times of great administrative progress in India have been the times also of great legislative activity. Society, it is in substance asserted, can provide for its jural needs without any intervention of the legislature; and such intervention, being unnecessary, will almost certainly be mischievous. That there is much that is plausible in these arguments cannot be denied; but we believe they have no solid foundation and would hardly have been thought of but for their accordance with the tendency which for the moment is dominant in the minds of their authors. We think that active legislation is essential to the political health of a growing society; that it meets needs which cannot otherwise be satisfied, and that the more systematic it is, provided the system itself is a moderately good one, the more beneficial it will be in its operation and influence.

10. A sense of the necessity for fixed laws is one of the earliest sentiments of every settled community. It rests on the constraining influence of habit, a

centripetal instinct and the perception of utility according to the dominant notions of the general good. The physical circumstances and the prevailing beliefs of a people form an environment or nidus in which the common tendencies of human nature are developed in a tribal or national form which then reacts strongly upon the elements from which it sprung. Thus a people's law composed of a universal and an individual element becomes as characteristic as its language. It presents itself in concrete forms the suitability of which is immediately apprehended by the popular consciousness, or which are rather determined by it in the very process of germination. By time and use what was vague and unorganized becomes in a measure fixed and symmetrical. The yet unrecognized working is felt of the instinct of order and system; a new or unfixed rule of convenience is moulded to a form consistent with the general spirit of the received custom by the influence of association and a sense of congruity; while the lapse of years surrounds with a sacred halo those earlier laws which are linked with the dim and magnified traditions of the past.

11. As a community advances, the extension of its territory, the separation of employments, the multiplied forms of individual development, enfeeble the common consciousness of legal right which made its earlier law. In the subordinate aggregations which form towns and villages, as in those divisions of the people which compose different classes, a unity of feeling springing from local neighbourhood, similar pursuits or identity of moral tendency still gives birth from a contact with new circumstances to usages whose fitness is recognized, and causes their reception as rules of custom. In the wider sphere of general law the requisite developments have to be effected by scientific evolution from the earlier established principles insensibly modified by the medium in which Courts and jurists work,* or by positive legislation on the part of the sovereign authority. The capacity for a spontaneous development of law in the people wanes as the facts to be regulated grow more complex. A sense of comparative imbecility in the presence of the more definite and palpable embodiment of the public force deprives its law-creative faculty of liveliness and vigour.† The cloudy suggestions which come from this source encounter as to all the great interests of society the clear-cut provisions of a written law. New ideas grow up, new discoveries are made, giving rise to new institutions, fashions and employments. An individualism and independence of action have meanwhile become possible and prevalent which submit to no control less powerful than that of the whole State. It is then the legislature alone which can pronounce the doom of effete laws and perform a work of reconstruction answering to the spirit and the needs of each successive generation.

12. Now this, which is true of communities in general, is in a peculiar degree true of the great community of British India. The apposition at almost every conceivable point of all that is oldest with all that is newest in civilization has produced groupings of fact and jural necessities with which it was impossible that the indigenous law should be able to cope. The legal consciousness of a people bound in the chains of caste and tradition could not develop itself concurrently with the new physical and moral changes brought in by the masterful foreigner. Those only who were familiar with the actual working of the new order of things, though in a different region, could hope to frame laws appropriate to the new world they were creating. The introduction of the English law, or of legislation founded on the English law, into British India may be compared with the general adoption in Europe in the Middle Ages, and especially in Germany, of the Roman law, though the rate of change is infinitely faster. In the slowly-won victory of the enlightened classes over the dull persistence of their ignorant countrymen, the diffusion of new ideas and the creation of new wants and new sensibilities produced in the jural sphere a craving for regulations which could not be built up upon the rude framework of Teutonic tradition. The official depositories and mouth-pieces of custom found no formulas quite adapted to the new exigencies, while the Civil law presented in a consistent

* See Maine's Ancient Law, Ch. II, pp. 31-33 (third edition).

† The establishment of the British power in India has been followed by a decline of the village-communities as independent centres of political life, which is sometimes regretted but was plainly inevitable. In providing for the growth of society as a whole, and favouring individual enterprise, the Government had to limit the authority once exercised by the small communities, and once the necessary stay of their corporate existence, but become in the presence of a higher organization a means only of isolation and obstruction. Restricted in its power to enforce rules by the predominating influence of the ubiquitous "sarkár," the village-assembly soon lost the capacity to invent them. It ceased in be an effective organ alike of the public strength and of the public will. This atrophy in its turn necessitated an increased energy on the part of the Government, and centralized legislation took the place of customary law, as it alone could provide for the extended relations springing from a freer and wider-ranging activity.

system plain rules for daily needs, which yet conformed to general principles of the widest application. There was no need to find out through costly failures the way to sound conclusions. The requisite experiment had been made, and the result so expressed as to produce instant conviction. Thus, the Roman law took its place beside the Customary law, and in the course of generations went far to supersede it. Anomalies in time grew up in this system of double origin. There were inconsistencies of judicial decision and a wilderness of contradictory literature. The Code of Frederick the Great first attempted a thorough-going remedy. The Austrian Code followed; and then the Code Napoléon collecting the opinions of the great legists of France became a model, even in its errors and defects, for half the continent of Europe.

13. We may gather from this retrospect that the influence of English government, of an English mercantile class, of English literature, and acquaintance with English institutions, made the adoption of the English law in its leading principles an inevitable necessity for modern India. The new conditions of social existence raised questions to which the indigenous law gave no answer, or worse than none. Recourse was instinctively had to the law which furnished the requisite solutions, and its decisions once admitted in a few cases exacted conformity throughout a wide area to the principles on which they rested in order to prevent obvious and glaring contradictions. The English race could effectively construct—could even imitate—no civilization but the English; and of this the English law is a vital part. Step by step it made its way by occasional direct legislation, by methods of exposition and by the judgments of the Courts in a fragmentary way into every corner of the country. Mufassal munsifs, speaking no language but their vernacular, were told at last by a Chief Justice through their superiors that they were bound to dispose of the litigation of Maráthas according to the principles of English law which the Courts at Westminster would bring to bear on the same cases.* This, which might seem a *reductio ad absurdum* of the assumptions on which the highest Courts of India had for years proceeded, was after all not a mere logical disproof of the premises from which it was inferred. It was but a somewhat premature anticipation of the result to which things were inevitably tending. The earlier and more obvious works of codification—the Criminal Codes and the Code of Civil Procedure—had then already been produced; but it was now demonstrated that a more searching and laborious task must be undertaken. In the new difficulties which were daily arising, the Native judges, cut off by an elaborate education from sympathetic accord with the thought of their own people, ill-read in their own legal literature and thoroughly conscious of the tests by which their abilities would be appraised, would resort for guidance to the English text-books—to them and to judgments of the High Courts steeped thoroughly in English law, as might be expected from judges long familiar with the lore of the reports. By the Appellate judges the decrees of the lower Courts would be approved or condemned, an improved reading of the English law only being substituted for a defective one, and the chain of precedent at every step growing stronger. A system having won acceptance, no individual judge, however enlightened and sensible, could set bounds to its predominance. Even the terms of the English Real Property Law, drawn straight from the feudal system, have become, with all their misleading connotations, a part of the common vocabulary of the Courts.

14. From such an irregular and haphazard mixture of incongruous systems, some kind of order would in time no doubt have been evolved by the Courts. But the time might be a very long one—all the longer on account of the replenishing of the High Courts periodically by barristers sent straight from England, and therefore, however able, strangers necessarily for some time to the special tendencies of thought, and the special ways of confronting facts, proper to the Indian lawyer. Meanwhile, the people would suffer from uncertainty, and the law become a luxury for the rich or a gambling excitement for men on the brink of insolvency. The Legislature was imperatively called on to regulate the new development on a rational appreciation of the principles to be adopted or rejected, of the forms in which they should be grouped and of the proper place of each greater chapter in the general system of law. A Code, in short, had become necessary in order to prevent the endless litigation, the ruinous losses, the manifold embarrassments and the discouragements to traffic

* See 2 Bom. H. C. R. 38, per Couch, C.J.

and enterprise which would attend the slow formation of a complete body of law by the wasteful process of natural selection. The necessity has not diminished with time. On the contrary, such progress as has been made, as it has rested on an assumption of principles drawn directly or by generalization from the English system, has given to those principles a range of influence,—has so imbedded them in the living body of the Indian law—that all further growth of the jural system must in some way conform to them. The choice is between the halting and contradictory action of the Courts and of chance usages growing up amongst a miscellaneous population and the systematic action of the Legislature, taking all appreciable conditions into account and aiming constantly at reducing the law not only to substantial accordance with actual necessities, but to the most simple, consistent and intelligible form.*

15. The work, moreover, must be one of cautious discrimination as well as of organization. The marked characteristic of the English law, in spite of a much larger infusion of the Roman system than our lawyers are, or were, willing to admit, is its insularity, its shrinking from general principles, its bit-by-bit growth on the results of particular cases. This empirical process has caused our law, no doubt, to grow with our growth, to mirror our history and to fit the peculiar stamp which the national character has received from our antecedents and surroundings. Moreover, a body of decisions has been collected in the reports, greatly outnumbering even the 30,000 *responsa prudentum* which Tribonian and his colleagues compiled at the bidding of the Emperor Justinian. Treated in a really scientific spirit, these decisions should be of inestimable value to the jurist and legislator. They are so many experiments which even in their not infrequent failure are in the highest degree instructive. But it must be said that when read without the aid of wide generalizations, and without the control of dominant notions drawn from the necessary relations of organized society, they may be a clog to progress and a means of almost infinite divergence from the track along which society is destined to move in the coming generations. It needs at times a Mansfield and a Cockburn to break the shackles of precedent, to go back to first principles, and to educe from them results which shall place the law once more abreast of the novel and extended needs of a time when every day brings forth some change.

16. This law, however, so isolated, so special, so indifferent to aught but a practical grasp of the legal relations which a single society presents for discussion, we must of necessity make the basis in a great measure of the law of India. It may serve the purpose; but it is certain that the good will be mixed in a needless degree with evil unless it be used with prudence and sagacity. Those peculiarities which adapt it best to England are in some respects disqualifications in India. From amid the mass of precedents and proximate rules of the practical lawyer, the Indian legislator, if his work is to be beneficial and enduring, must seize the central and governing idea. He must compare it with the results arrived at as to the same class of relations under other systems. If he finds a general accordance between them, he may safely proceed to consider how far the special circumstances of the country and the people for whom he has to legislate admit, repel, or qualify the application of an apparently universal principle. Hindú society has its own laws of unmeasured antiquity. It has its religion closely interwoven with those laws. It has the customs which that religion consecrates and springing fresh from the nature of the people. To ignore these facts is to invite failure. It is a living body that we have to deal with, identical in some respects with others of the same species, but with its individuality and its need for individual treatment as well marked as our own national character.

* Inaction on the part of the Legislature retards but does not arrest legislation. In the absence of enactments the judge makes law declaring what is the customary law, and what rules regulate rights not governed by customary law.

Beyond his own experience the judge must look for materials to the suitor who is interested to secure a particular decision rather than the accurate ascertainment of a usage or the establishment of sound principles; who frequently lacks the means requisite to procure such proof as may be available or to retain a competent advocate. In the ascertainment of the customary law, then, the Legislature has ordinarily greater facilities than the Courts. A proposed law is published. Information can be obtained from the best sources and tested by the experience of individual members, who bring to the discussion of the proposed law experience acquired in the different districts of the empire or province. It may happen, but it must happen less frequently than is possible with the imperfect machinery of Courts of justice, that customary law is rejected where it should be recognized, or recognized where proof is inadequate.

In legislating on subjects not governed by customary law, the Legislature has again this advantage over the Courts, that before it arrives at a decision, its proposals are published, and criticism from all parts of the empire invited and weighed.

17. It is true that in the sphere of the criminal law and of procedure successful steps have been taken in legislation, governed to a certain extent by English analogies. But, if scrutinized, these experiments prove rather the necessity of recasting the materials of the English law than the expediency of adopting them undigested, unassayed and unmodified. The grounds of penal legislation are much the same everywhere. Murder, theft, arson, forgery, are essentially identical wherever a possibility of committing them exists. No serious difficulty is found in drawing up parallel tables of equivalent crimes for the purposes of extradition-treaties. Procedure, again, is a merely mechanical process for getting the parties to litigation and their witnesses before the Courts, for securing a fair hearing, and for giving effect to the Court's command. But when we come to the laws of property and of the family, a very different set of considerations presents itself. The dominion of man over external nature, his right over the actions of his neighbour arising from contract, may assume endlessly various forms. His personal relations as a husband, father, brother or caste-fellow are not only susceptible of infinite variation but touch his sensibilities in their tenderest points. In dealing with the substantive private law we place ourselves in the very midst of the actual life of the sentient beings who look to us for furtherance in happiness and prosperity. Every step we take is full of the peril of wounding some unknown susceptibility. The mass of people are incapable of proceeding *per saltum* to a recognition of the ultimate advantages of great changes which at the time jar on their traditional prejudices and reduce them to a state of puzzled uncertainty.

18. If, then, by means of additional laws we wish to contribute a new expansive force to Native society, we should, first of all, free ourselves from the fetters of a too exclusive devotion to our own somewhat narrow legal system. The work to be done calls for a wider survey, for a comparison of systems and a truly philosophical induction. The late Mr. Justice Willes insisted strongly on the advantages of such a method, even for English legislation. He argues for "a really well-considered Code . . . . embodying improvements suggested by a comparison of our own laws with those of other countries," which, as he truly says, "can hardly all be mistaken." When we see how one proposition after another insisted on by the great continental jurists has to force its way after years or generations of controversy into the body of English jurisprudence, we cannot but be struck with the narrowing effect of an almost purely deductive method confining professional genius to a range in no way commensurate with human nature, and obstinately refusing admission to any legal principle which cannot be proved needless by the possibility of referring it directly to something already admitted. When one sees the vehemence with which the continental jurists themselves contest some important points, a further lesson is learned of the limitation even of highly cultivated faculties. What fits the whole scope of expanding human capacities can be determined only by the profound insight of genius; but ordinary intelligence can pronounce with certainty on the insufficiency or unfitness of many rules for any people or any system except those in whose midst they have grown up.

19. How far, and in what form, the particular rules accepted in England are suited to this country and community is thus in every case a question which must be met on grounds, not of mere prejudice or senseless imitation, but according to a just analysis of what is proposed and what are the conditions under which it is to operate. To answer the question aright, something more than mere juristic science must be brought to bear on it. There must be a competent knowledge of the existing written and unwritten law, intimacy with Native habits and modes of thought, a set of associations through which the mind of the inquirer is spontaneously affected with an emotion, or the reflex of an emotion, akin to that which will be on any occasion felt by the ordinary Mussulmán or Hindú. A large degree of this responsive faculty is no doubt sometimes acquired by men of sympathetic temperament in the work of the Courts, but in general it exacts early and familiar relations between the Native and his would-be benefactor; it requires an intercourse kept up in varying positions through several years to enable the European to go outside himself and see how matters look from the purely Native point of view. It may not be right or safe to accept the view thus presented as conclusive; but it cannot be right simply to ignore it. Proceeding on a method of disdain some of our measures may by

chance succeed; many of them must necessarily fail. We work in the dark, and our legislation, being founded on no appreciative insight into the moral nature of the Natives, can never become in its entirety a portion of their intellectual being. "Government," as Burke says, "is a practical thing made for the happiness of mankind, not to furnish out a spectacle of uniformity to gratify the schemes of visionary politicians;" while the true end of legislation is "to follow, not to force, the public inclination, to give a direction, a form, a technical dress and a specific sanction to the general sense of the community." The experience of the world, the decay of superstitions, enable us now to go back with comparative intellectual freedom to really first principles. In pursuing this course, we come upon springs of thought and action common alike to Hindú, Mussulmán and Christian. At these we should pause and appropriate all they can yield to us; employ the results with frugal skill, and, having thus established the base-line and some of the principal points of our system, leave the development of its details to time, to the sure germination of sound thoughts and to the action of the Courts, continually checked in any tendency to aberration by the constraining influence of great and conspicuous landmarks.

20. The principles, then, which we attempt to introduce in our legislation, and especially in a Code, should be comparatively few, carefully chosen and thoroughly approved. They should be cast in a form as far as possible resembling that of rules already accepted, or appear as the logical outcome of already recognized doctrines.* The new law would thus link itself naturally to the law previously existing, blend with it imperceptibly, and form a basis for a new departure. It is the characteristic of sound and fruitful principles to embrace an ever-widening mass of details within their operation. Contradictory rules and reasonings are either modified or perish before them. Those principles which in themselves are consistent with the elementary facts of human nature are sure as matters progress to be recognized as the proper complement of others already accepted. Thus, from step to step a logically organized system is formed, while by a process of reaction the character of the community itself in which this process is going on is moulded insensibly to a development in which the maximum of its beneficial energy can be put forth in the manifold lines of activity which the law leaves invitingly open in every direction consistent with the common welfare.

21. The leading principles of a Code, such as we have conceived it, would be principles of human nature itself, but principles arrived at by a process of scrupulous comparison. Its propositions should be broad, simple and readily intelligible.† Their remoter consequences should be left to be traced out by judicial interpretation and the play of the popular consciousness. The induction on which they are based should be wide and accurate for the very purpose of avoiding entanglement in the details of subordinate and derivative principles. A Code thus formed will not retard or hamper progress and development: it will afford a new outline to fill up, a new platform to start from, a new impulse to systematic thought. It is conceivable that here and there its rule will constitute a barrier in some direction which otherwise the course of social evolution would have taken; but the slight obstruction thus caused will be as nothing to the positive aid afforded by a well-devised and consistent scheme of fundamental laws. Such a scheme, by the standards it sets up, by the mental standing points which it provides and imposes, contains the most certain and effectual means of its own further amelioration in the future. As the subtilties and complications of human affairs exceed the most sagacious human prevision, it will be found in time that some rules are in effect out of harmony with others. Some will correspond to the spontaneous movement of society and some will not. It may be that those which years before rested on a more specious support of sentiment and reasoning, being in truth the weaker, their inexpediency by degrees comes out. The better-founded rules, meanwhile, gain more and more on the convictions of the community; and a sense of the real incongruousness of the two having arisen, the moment has come for revision and excision. Such a process is as inevitable as human work is necessarily imperfect; but a system

* The concrete application of the law should be facilitated by the now familiar aid of illustrations of as simple a character as possible and drawn from actual cases or the incidents of every-day life.

† "Les lois ne doivent point être subtiles: elles sont faites pour des gens de médiocre entendement."—Mont. Esprit des Lois, XXIX, 16.

sound as a whole will meanwhile have done much to form the character and the turn of legal thought which will make reparation easy and natural without any general disturbance.

22. Due regard being had to the considerations on which we have dwelt, it must be admitted that a variety of laws under the same Government is not only an embarrassment to the Courts, but an impediment to intercourse and fruitful activity. The business of merchants, bankers and carriers, pursued under different conditions in different localities, is hampered with difficulties which check enterprise resting on nice calculations and adjustments. The public law ought to be substantially the same throughout the territories under a Government, as otherwise people may expose themselves without knowing, without having reason to know it, to ruinous penalties. When Caste-laws do not restrict intercommunion, uniformity of marriage and family-laws is as obviously desirable. The law relating to immoveable property and its incidents may well admit of considerable variations according to local circumstances. Landed estates are usually collected in one province and subject to one law; but even when this is not so, little or no practical inconvenience arises from a property in Bengal being held on a different tenure from one in Madras. Within the sphere of transactions variable at the will of those who engage in them, it is in the mutually dependent and ever-extending operations of commerce that a need of uniformity of law first becomes apparent; and thus the law of contracts, first in fragmentary sections and then in a systematic collection of general principles, claimed early recognition in the formation of the Indian Code. As society with its desires and needs settles down, in various phases of its being, to an approximately permanent scheme of existence, the tendency to assimilation which in ruder times would have extended identical customs over a wider and wider field appeals to the Government to effect the same objects by legislation. The spirit of the community at large spreads by gradual infiltration through the mass of local peculiarities and subdues them to itself. Change of dwelling-place and sale of land become more frequent; and the necessity is felt of rules for the holding of property and for all common transactions which will best express the average general convictions as to what is beneficial and convenient.

23. By opponents of scientific uniformity in legislation for India we are often reminded of the extremely different social conditions and stages of progress attained in different parts of the country. That very great differences exist is undoubted; but it is in no way conclusive of the question of systematic, as opposed to casual, law-making. Looking at the matter by the light of history, we have to admit that the contrasts in civilization amongst the several provinces of the Roman Empire were not less marked than those to be observed in British India. Yet this was not allowed to prevent the growth and application of a uniform system of legal principles. The prætorian law, in fact, gained largely by its necessary adaptation to the needs of citizens and foreigners alike, and its consequent rejection of all that was specially local and peculiar. Principles of universal application according to the standards then recognized had to be sought out, because it was felt that what was a good reason for a rule to a Roman was sometimes no reason at all to a foreigner, or even to a provincial. It was in this way that the Civil Law gained that character of generality which has given it such an ascendancy on the Continent of Europe. In India analogous conditions must lead to not wholly unlike results. The law to be introduced, or framed out of existing local materials, has always to be tried by the test of its suitability to the varying circumstances of the different provinces. What is insular or cramped either in thought or in expression is thus almost certainly eliminated. The central ideas of the English law are, in such works as the Penal Code and the Contract Act, cleared from the remnants of a lower stage of organization with which, in the English books, and in the English Courts, they are still encumbered, and presented in a simplicity and generality of expression which has re-acted very perceptibly on the ideas of lawyers in England. The more searching analysis forced by his situation on the Indian lawyer and legislator may thus in the end prove highly beneficial both to the science of law, and to its practical application.

24. Still, exceptions must undoubtedly be made in many cases in which it can be seen that what is special and local cannot be made immediately to yield

to what is general without a diminution of the people's happiness. In such cases the question occurs, "Le mal de changer est-il toujours moins grand que le mal de souffrir?"* and it must receive a reasonable and considerate answer. But even the most backward districts are by degrees drawn within the general circulation of thought and activity. Their people become stamped with much the same intellectual marks as their neighbours. Transactions between them increase in frequency. After a time familiarity and habit have made a removal of anomalies welcome; and in this way a well-ordered uniformity subdues tract after tract by a perfectly natural process. It is quite possible, indeed, that, in the future, provinces which had few or no definite legal ideas of their own may become, like Gaul in ancient days, remarkable for the completeness and tenacity of their adhesion to the new system. In the meantime, the existence of necessary exceptions in particular districts is no more a reason against a systematic Code in other parts of India, than the operation in Scotland or the Channel Islands of their own laws is a reason against a scientific recension of the law of England.

25. It is not, however, necessary or desirable that a Code, taking it in even its narrower sense of an aggregate of the rules in a particular department of the law, should include chapters or separate statutes on every branch and subsection of the whole subject. As to some of these a change of circumstances, such as the discovery of an entirely new means of utilizing property, the growth or decline of population, or a rapid variation in people's conceptions and sentiments, may make it desirable to await the natural evolution of the new order of ideas. Custom itself in such cases undergoes a silent metamorphosis, which undue urgency would arrest, as it would call in alarm and prejudice to the support of established use and wont, and make reform possible only at the cost of dissatisfaction and resentment. In other cases wholly new institutions, such as railways or Government currency-notes, have to find by tentative adjustments their proper place amongst those already existing. Special and temporary legislation, and that only, is properly applicable in such instances. By degrees it is found out how far the change of facts and of ideas necessitates a permanent enlargement or modification of accepted general principles; and when this has come to pass, the time has arrived for an incorporation of the special law within the general system of the Code. In a well-ordered system a place will be ready for it.

26. A consideration of the first importance in the formation of laws is the character of the machinery by which they will be carried into effect. However well devised they may be in substance to meet the needs of the society for which they are made, yet if they involve theories and ways of regarding the facts they propose to deal with wholly foreign to the conceptions of those who are to apply them, it is inevitable that variations and errors of practice should arise which will largely detract from their success. In order that the administrator should work in the spirit of the legislator, it is necessary that the legislator should first bring himself within the sphere of thought of the administrator. He may enlarge and even transform that sphere by judicious endeavour, but it will not in general admit of sudden expansion or thaumaturgic change. Human stolidity, the force of habit, the faith in professional formulas, the disinclination to analysis of common notions—all these are factors in the problem with which the legislator has to deal. If he is bent rather on practical effect than theoretic excellence, they reconcile him to a slow march, in which his followers may accompany him, as preferable to any flight, however brilliant, in which he will be altogether alone. Thus, to make a law in India practically beneficial, account must be taken of the means of professional education,† of the constitution and relations of the several official ranks,

* Mont. Esp. des Lois, XXIX, 18.

† In some provinces necessarily, in others without such apparent necessity, the qualifications for admission to the profession of the law exact little either of technical or general knowledge.

In some provinces, and generally in the Mufassal, except in the cities, where there are law-professorships established by the Government in connexion with a University or Central College, technical education other than self-instruction is not available. The system of apprenticeship is unknown outside the Presidency-towns, nor there always resorted to.

The remuneration of professional assistance is, owing to the poverty of the people generally, meagre; and pleaders without private means are unable to provide themselves with text-books or reports, if they are sufficiently educated to study them. The judges can count on little assistance from the Mufassal Bar in any case that falls outside the range of their daily experience. The parties, at what is too often to them ruinous expense, are compelled to appeal from Court to Court, and eventually find themselves deprived of justice from the unskilfulness with which their cases have been launched or prosecuted in the Court of first instance. No radical improvement is to be expected in the administration of justice in India until the better education of the Mufassal Bar is secured; and having regard to the circumstances of the people, the most effective, because to the Bar the least expensive means of securing this result appears to be the extension of codified law.

of the special merits and defects of the administrative class, and the traditions in which they have been trained, as well as of the physical situation, the history and character, of those on whom the law is to operate. Abstract perfection must yield in this as in other ways to the narrowing conditions of actual practice and of work to be done by ordinary officials. This, however, is so far from affording any reason against scientific legislation adapted to eventual consolidation that it supplies an argument in favour of that course. A poor and generally ill-trained class of advocates must derive obvious advantages from the economy and uniformity of method of a well-constructed Code. Busy administrators, dealing off-hand with innumerable details, cannot afford the time, even if they have the turn of mind, when a legal question arises, for sifting a particular Act so as to make themselves by a special study masters of what it says and of the spirit in which it has been written. If, however, all the principal Acts are composed on substantially uniform principles and with reference to higher unities towards which those principles converge, much of the official's labour is saved. He becomes himself penetrated by the spirit of the Code, and naturally brings to bear on the construction of every passage a method of interpretation substantially identical with that of the Legislature itself. The consummation is thus furthered, though it may never be quite achieved, of a uniformity of administration giving full effect everywhere to uniformity of law.

27. If, in endeavouring to state the grounds and principles on which, as we think, sectional and eventually general codification should proceed in India, we have been led into undue prolixity, a reason or an excuse may be found in the existence at this time in this country of a strong current of feeling which is opposed to all systematic legislation whatever. Its influence may not improbably be felt even in England, and by some whose interest in this country entitles them to a full statement of the reasons on which we would base systematic legislation; but, without dwelling on any speculation of that kind, it is, we think, highly desirable that in India, and for Indian purposes, a notion to which indolence and arbitrariness incline us to give a too ready welcome should be met, and if possible dissipated. The success of laws depends in some degree everywhere—in India in a special degree—on the spirit in which they are received and administered: and the zeal of the great body of public functionaries will, we believe, be more heartily engaged in giving effect to a legal system when they perceive its solid groundwork and its beneficial aim. A Code framed according to the conceptions we have tried to set forth ought not to fail in either requisite. It involves no preference of conjectural anticipation to that clear apprehension of fact which is the only sure foundation of science. In the sphere of legislation, as in other spheres, true reformation is a process of evolution rather than of revolution. The life of a community, as of an individual, implies continuity and assimilation. Society is a complex aggregate, swayed by inherited tendencies, beliefs and sentiments with respect to family-relations, to neighbourly rights and duties, to liberty and property, which no purely speculative plan of legislation would fit. All this is true and of unspeakable importance; but the same study and experience which establish its truth reveal also the capacity for progress which every community presents, the immense efficiency of co-ordinated action, the power to control, to stimulate and to mould a national character, of a reasonable, just and consistent system of laws.

28. It is not necessary or desirable that the principles of human action, and of men's relations, as they appear separately on ultimate analysis, should be the ground of a classification of laws or of the subjects for legislation. If we may resume the comparison to a house, it is plain that in constructing one as well as another, the builder must have regard to the same principles as to strength and applicability of materials, to the same mechanical laws and the same rudiments of design. But a classification of houses—still more of rooms—according to the predominance in them of one or the other of these elements of their construction would be of no service for the ordinary uses of life. For such purposes they are classed according to a set of more obvious external characteristics—their fitness for particular purposes—not because the others are less important, but because habit has taught us to expect a general conformity to a reasonable standard which on occasion we test in the proper way. The classification according to position, shape and fitness brings the objects into connexion

along a more extended line of useful and practical ideas than one according to more abstruse resemblances. So in arranging laws, it is not so much the underlying principles of their construction which should determine their classification, as the readiness with which particular series of rules hang together, or group themselves about some central doctrine, by a spontaneous association of ideas. When we use such words as "marriage," "partnership," "insurance," each of them calls up a train of thought more closely connected in fact, than the artificial combination of the infinitely various concrete instances embraced under such a word as "contract" or as "property." The use of method in legislation, as in arranging the contents of an existing aggregate of laws, is to aid the true conception and the recollection of the individual rules, and to bring out most forcibly their mutual relations in those respects in which they bear on actual practice. A grouping thus determined has somewhat the same relation to a purely abstract system, such as Austin favoured, as the natural system in botany to the Linnæan system. It takes account of the whole being and attributes of the objects to be dealt with, instead of properties of them, determinable indeed, but not by their determination bringing sufficiently together those which for the observer have most significance, and thus combining in each species the objects which in their totality are for him most really and closely related.

29. Another observation of some importance with reference to the arrangement of laws is that the chronological order of their emergence by no means coincides with that which they would occupy either according to the abstract scheme of a speculative jurist, or their co-ordination in a complete system. The practical needs of a society, arising from its moral and physical circumstances, may give rise to an institution at a comparatively early stage of its progress, the logical reasons for which are not disengaged for ages afterwards; while simple and obvious rules spring up in the latest as in the earliest stage to meet by slight adjustment some slight change. Thus Austin's analysis of sovereignty and law followed, not preceded, the practical outgrowth of innumerable institutions logically referrible to the notions thus brought into distinctness; and in the work of practical legislation it would not be possible either to await a final resolution of aggregate right into its irreducible elements, or to make those elements, when ascertained, the basis in their crude individuality of separate jural structures. The facts with which the law has to deal are essentially complex. It must yield, therefore, to the cross-divisions of human affairs, build on organic combinations of primary ideas, and accept great leading principles rather as a permeating influence than as a sole or chief ground of discrimination from each other of the great chapters of a Code.

30. The inference from such considerations as well as from the general practice of mankind is, that neither the purely abstract principles involved in laws, nor their historical relations, however necessary a study of these may be for their full comprehension, and for their scientific reconstruction, afford a safe or convenient basis for their arrangement. The great necessary relations in society which the laws do not create, but only regulate, are those which, combining the largest collections of naturally connected doctrines, suggest the best working plan. The State, moreover, does not and cannot as such come forward in its law-making capacity until society is already formed and tolerably well advanced in a rudimentary civilization. Its very existence as a political power presupposes a community already by common consent submitting in many things to fixed laws. What the sovereign-power, wherever it resides, has under these circumstances to do is, first, to provide for its own continued existence, and next for that of the society, by checking the disruptive force of private violence. The acquisition and devolution of property must already have become subject to customary rules before law in the strictest sense becomes possible. The governing ideas are modified and defined rather than created by legislation. The family in some form must have been coeval with, if not prior to, distinct personal ownership. In its essence it involves a set of relations but very partially amenable to external coercive regulation, but its continuity of existence brings it into connexions with property which at first are recognized and then regulated.

31. In all these cases the State has to deal with relations conforming to regular types of a permanent or at least durable existence, and susceptible of

strict regulation. In the great field of personal obligations the power of legislation as bearing on the essentials is comparatively limited. The natural instinct of freedom asserts itself in making bargains, and there is no interest of the community in general to be served by checking its indulgence. The law here is concerned rather in facilitating than in controlling the action of individuals. But if one fails in the duty he has undertaken to another, the State intervenes, and by force compels him to perform this duty, as it would one directly imposed in the public interest, or else to render an equivalent. The intervention must, however, be called for. No interest of the community is so directly touched that the State should voluntarily step in to repress a breach of contract. Nor is it concerned, without invitation, to enforce redress for the large class of wrongs, ranging from inappreciably petty injuries at one end of the scale up to offences at the other. The public is but remotely interested in the contentions that arise from this source, in which, too, as in cases of contract, the right or wrong is seldom all on one side. The general characteristic of both classes of obligations is that they can be satisfied by a money-payment,—liquidated or unliquidated damages,—if not, then by some stipulated or compensatory act enforceable in a like way, from whichever source the obligation has sprung. Here the connecting link which associates cases otherwise very diverse is the substantial identity of the remedies, as in family-law it is the identity of physical and moral relations, and in the law of property the identical nature of the material objects of men's rights and duties.

32. The law of personal capacity lies rather collateral to, than in any relation of logical antecedence or sequence to, the other great branches of the law. We may regard the impersonated State as either addressing its commands only to persons of particular conditions, as alone conceived able to obey them, or to the whole body of citizens, with following clauses of exception in favour of those deemed incapable of performing the duties imposed on each man in general. In a Code recognizing caste or other distinctions of race or birth as stamping an immutable legal character on every subject from the first, the law of status in this sense, and the legislation determining it, might properly take precedence of other private laws. It would define certain dominant capacities by which the whole operation of the laws of property, family, and obligations would be pervaded and modified at every step. But in a system accepting as a principle the possibility of indefinite changes of personal condition a different set of considerations prevail. We are not met at every turn by an enlarged capacity attending a high caste or a *deminutio capitis* caused by a low caste: capacity for rights and duties presents itself as generally uniform, subject only to particular exceptions requiring special discussion. Thus, physical imbecility due to age or sex, mental, as in the case of lunacy, and disabilities arising from a foreign nationality or domicile, give rise to qualifications for their subjects of the commands and permissions that bear on others. A special extension of personal rights, as in the case of a British-born subject, is anomalous, and, like the exemption of a Native notability from attendance in Court, is best treated perhaps only as a singular provision of the particular law which in each case gives the privilege.

33. The cases of restricted capacity that we have mentioned may obviously in a general system be as well dealt with after as before the laws of property and of obligations. The case of insolvency, in which a man labours under a positive incapacity to pay debts which the law bids him pay, is a case of personal disability which cannot possibly be dealt with in legislation without an assumption of laws of property and obligation already established. Corporations and societies, whether formed for mercantile or for charitable purposes, are significant to the law solely or chiefly as artificial persons capable of holding property subject to special restrictions: the place of the law respecting them should naturally be determined by this consideration. The legal relations of such loose aggregates as the inhabitants of a hamlet, or the Dhers or Mhárs of a village, stand on the border between the political and the private law. Co-ownership and co-liability, solidarity of rights and of obligations, being notions which come into activity as a rule only when the performance of obligations is due, and not really affecting the extent or essence of the rights or duties in themselves, the rules concerning these subjects group themselves most naturally

under the law of obligations. Within the same principle falls the law of partnership.

34. The duties and rights of persons in a quasi-representative character, such as trustees, have reference necessarily in the main to property, and imply laws of property already recognized. The assignee, the incumbrancer, the judgment-creditor, the liquidator, the executor and the administrator have each his peculiar, and for some purposes representative, position. But the legal right or duty devolving on such persons on account of another is not in itself essentially varied by the devolution. It is determined only as to details by the particular law which makes them substitutes, and the law relating to it is united by a stronger association to the law of property or of succession than to the general law of persons. In like manner, the rules investing particular functionaries, unitedly or individually, with special competencies are connected more naturally with the political or public law than with a law of personal capacities. Many offices are regarded in England as freeholds. With these may be compared such groups of rights and duties as belong to a village-astrologer. The holder of such an office has no doubt a special personal position; but it consists in this, that, in consideration of his performing certain duties, he holds property or a right against the property of his fellow-villagers. There is in this no peculiar status, no medium through which the incidence upon him of the law generally is disturbed or varied.

35. Although, then, as men are the subject of all laws, it might seem proper to place the law of persons first in any complete system, yet, looking to the actual needs of society, the rules of the public law are those which must first be established. "*Jus privatum sub tutela juris publici latet*," as Bacon says; and the higher stages of its development cannot be reached save in the security afforded by fixed and known laws of penal coercion. It was practically indispensable, therefore, that the Indian Government should enact the Penal Code, the Code of Criminal Procedure and the Code of Civil Procedure before reducing to scientific order the branches of the private law which have since engaged its attention. They express the rules according to which the State will exercise its external coercive force; and though the Code of Civil Procedure ought, perhaps, in theory and in a final arrangement, to follow the laws to which it supplies a sanction, yet, as being simply imperative, it rightly stands historically where it does. The substantive law of property and of obligations, though as yet untouched in great part by legislation, was sufficiently understood when the Code was enacted to furnish unwritten rules for the common cases; and to these the procedure could be applied. So, also, could rules of authentication, such as the Registration-laws, and fiscal rules, such as the Acts relating to stamps and court-fees. Limitation may be deemed a part of procedure itself, and has called for regulation in a series of Acts. In the same branch of legislation the rules of evidence were summarized in 1855, and more completely by Act I of 1872. Its outline may be deemed completed by the Specific Relief Act, I of 1877.

36. If, now, we should suppose the legislature to proceed from the absolutely imperative rules embraced in the public law to those by which it will enforce duties by remedial interference at the request or suggestion of a person injured, we should look next for a Law of Wrongs. In a complete system, starting from the basis of what acts or abstinences one subject is to be allowed to exact from another, no doubt the laws defining rights and their exercise throughout the whole range to which compulsion is properly applicable would precede a law concerned with the infringement of such rights and the redress of the consequent injuries. But laws in the legislative era are directly concerned with duties, and but indirectly with rights. The practical measure of a right created by Statute is the obligation that this Statute imposes. To some duties there are no corresponding rights in the proper sense of an extension of the power of a private individual over the action of another. The State simply commands that, under given circumstances, a particular duty shall be done on pain of damages or a penalty for default. The notion in such cases of the conduct being properly compulsive, apart from any special engagement, is what links the law affecting them to that of private wrongs in the chapter of absolute duties. For all practical purposes, moreover, each genus of right is well established long before its species are determined and their characteristics finally settled by the later refinements of legislation. If, then, the legislature says that, apart from any exercise of volition in engaging to do this or that act, each subject shall abstain from particular classes of actions, or under circumstances shall act in particular ways, in which another subject is directly interested, those classes of actions can be easily defined by reference to well-understood rights, although the remotest distinctions of the latter may not yet have been fixed by the positive law. An "earlier Statute deals [with cases] as a genus within which a new species is brought by a subsequent Act," even without an express reference to the earlier, "*ubi enim casus exprimi non poterat . . . . casus omissus habetur pro expresso si similis fuerit ratio.*"* The law of wrongs, then, is theoretically possible and practically eligible as a subject for legislation without waiting for the detailed evolution of the laws of property and contractual obligations. As to the obligations arising from faults and failures of duty, which range from breaches of the law of quasi-contract up to the gravest civil injuries, that law itself must depend on another which defines the wrongs, and the kind of reparation which the law deems proper for each. It happens, here, as in every department, that according to any possible arrangement each class of laws is dovetailed in practice into some other. The real activities of social life are all going on together, and what a moment ago was a consequence has now become a cause in a tangle of interdependence. It is a necessary incident of all consecutive legislation that in earlier Acts there should be an anticipation of the main principles at least of others yet unconstructed.

37. As a matter of fact, the strict law of persons has acquired a definite form and purpose in the Acts relating to minority and the relations connected with it (Act IX of 1875, &c.), in the Lunacy Acts, and in the Naturalization and Extradition Acts, the last two standing on the border-land between personal and public or political law. The Companies Act, X of 1866, deals with the whole class of subjects suggested by its title. Act XX of 1863, removing the subject of temple-management from the domain of public to that of private law, has provided for the constitution of the bodies by whom the endowments are to be held and dealt with. The time for an expansion of this law and for recasting it in its final shape may hardly yet have arrived, though it seems clear that it will shortly need revision. In the department of family-law, marriage and divorce have been provided for by legislation in those sections of the community whose legal circumstances seemed to call for such regulation. Relations with regard to property as affected by marriage are in part determined by the Succession Act, X of 1865. The legal relations of parentage still await regulation, but for the great mass of the population are mingled, like all the family-relations, with religious laws which it would be political sacrilege to touch—a blunder under present conditions of thought and sensibility worse than a crime.† There is a law of guardian and ward, Act XIII of 1874, of very limited application, which may well be revised and extended. As to kinsmanship and its rights and duties—a topic of great importance under the Hindú Law of Inheritance, and of some importance under the Muhammadan law—legislation cannot be thought desirable until a systematic revision of these laws is called for with substantial unanimity by the Native communities themselves. Whenever such a work becomes expedient, Act XXI of 1850, preventing loss of property through loss of caste, and Act XV of 1856, permitting the remarriage of Hindú widows of all castes, will be embraced within further-reaching laws. The daily rule of civil life is disengaging itself by degrees in custom from the purely religious law, and the severance is hastened by the action of Courts working in a plane of thought but partially coincident with that of the Native mind: the growth of ideas in a wholly changed medium must here be awaited, not in any way anticipated. For the sections of the community not subject to the laws of Manu or of Muhammad, or other special personal law, the Succession Act provides a law which, during a trial of fourteen years, has been found well suited to their necessities, so far as can be gathered from the silence of those most interested. In matters not touching the personal law of Hindús, the same Act has been made applicable to them by the Hindú

* Bac. De Augm. B. VIII De Just. Univ. Aph. 20.

† No proposal, we are informed, has been entertained by the Government of India for legislation on the subject which would have the effect of withdrawing it in the case of Natives of this country from the control of their religious or personal laws. Any suggestions to the contrary must have rested on an entire misapprehension of the facts.

Wills Act, XXI of 1870, in the Lower Provinces of Bengal and in the towns of Madras and Bombay. As opportunities arise, it will be well to work on the same principle, by giving definition, regularity and means of authentication, so far as this can be done without causing misconception, to the various transactions which must still be governed as to their substance by rules sacred to those amongst whom they prevail, and not to be hastily moulded to conformity with a wholly alien system. The laws devised for this purpose should, however, stand for some years outside the general system of the Code, to be embraced within it only when time and use have shown with what variations, if any, they may be finally adopted.

38. Laws of the class to which we have just adverted would be instances falling under the principle we have stated of transitory circumstances met by a consciously transitory action of the legislature. To the same class would belong the rules which it may be necessary to enact on the thorny subject of change of personal law or of status attending a change of religion either on the part of the person held in view, or of some other person connected with him. It is a principle of the Hindú law as old as Manu that effect is to be given not only to local custom but to the usages of classes and of families. Under this rule it has been recognized that a Hindú family migrating may adopt the law of its new domicile or retain that of its former home. Primogeniture has been favoured in many cases. Female succession has in some been denied. The anomalies which a family may retain, it may also cast off, by indicating its submission to the general law. It was hardly an extension, therefore, of the existing law when the Privy Council in the great case of *Abraham* v. *Abraham* determined that a convert to Christianity might choose the law by which the devolution of his property should be governed. The High Court of Madras has ruled that a Hindú by his conversion subjects his estate to the operation of the Indian Succession Act (Act X of 1865). It is obvious that there are cases in which, according to the law as thus interpreted, an affected change of religion might be made a means of inflicting grievous wrong. In some districts conversions of Hindús to Muhammadanism are pretty frequent, though only amongst the lower orders. Fishermen on the Western coast oscillate sometimes between Christianity and a Hindúised Muhammadanism. The questions raised by cases such as these cannot, it is plain, be disposed of by the legislature with advertence merely to the single possibility of conversion to Christianity. Christians have become Mussalmáns; Sikhs return sometimes to ordinary Hindúism; and a family once Jains has been found included within the community of the Lingayats. In the confusion of classes and the corruption of creeds, of which some provinces present such strange examples, it may eventually be found expedient to place the law of status as to property and as to succession on a footing wholly unconnected with religious belief or profession wherever the two are not indissolubly united. But for the present, and perhaps for a generation to come, the steps taken towards the solution of this legislative problem should for the most part be local, tentative, and occasional. In the meantime it deserves consideration whether, as regards property wholly at his own disposal, the Native of India, who may under circumstances elect amongst different forms of the Hindú law, ought not to be empowered to place himself under the sway of the Succession Act, and the other general laws of the same class enacted by the legislature.* It seems highly undesirable to make a declaration of a change of faith a condition precedent to admission to an improved law of property and succession; and a public notice duly registered may perhaps be thought a sufficient safeguard against fraud on the part of one desiring to embrace the benefits of modern legislation.

39. Taking, then, the great divisions of a complete future Code to relate to (1) Public and Political Law, (2) Absolute Rights and Duties, (3) Obligations, (4) Property, (5) Personal Law, (6) Family Law, and (7) Successions, we find that the most marked deficiencies are under heads (2) and 4). For the law of

* Sir Charles Turner observes that a Hindú may by will distribute property wholly at his own disposal in accordance with the Succession Act, but he doubts whether he can merely by election place himself under a particular form of the Hindú law. He would substitute for this passage the following:—

"It deserves consideration whether, as regards property wholly at its disposal, a family which may by usage place self under a special form of law, whether Hindú, or any other, might not be empowered to declare that its property hall be governed by the Succession Act and other general laws of the same class enacted by the legislature."

property, judicial investigations, conducted now in a much more enlarged spirit than formerly, are rapidly paving the way to safe and comprehensive legislation; but to strike out into a region not thoroughly pioneered, or to follow the unsafe guidance of the English law, might do infinite harm. The work must be one of time and watchfulness and patience. Meanwhile, should the Bills which we now recommend obtain the approval of the legislature, the positive rules as to rights in the substantive Civil law will have received a considerable development. The Contract Act, with the Acts relating respectively to Negotiable Instruments, to the Transfer of Property, and to Trusts, will have settled the main principles of free bilateral transactions and fiduciary relations. The law as to the estates and interests to which the State will give effect in immoveables cannot as yet be reduced in its whole extent to systematic uniformity; but Alluvion is an important fact, which has daily to be dealt with, and our acquaintance with the broader features of the law of fixed property enables us to pronounce on the expediency of such limitations and extensions of proprietorship as are involved in a reasonable law of Easements. On the frontier-line of contract and family-law we place the Master and Servant Bill, carefully avoiding any aggression beyond what is absolutely necessary on the delicate domain of purely domestic relations. When these Acts or the chief of them have been passed,* we think that the Law of Wrongs, or of absolute private duties and rights, may next most profitably engage the attention of the legislature. This law, standing between the criminal law and the laws of property and obligations, is interwoven with both. It has numerous connexions also with the law of persons and of the family, and even with the law of succession, considering the onerous responsibilities which the latter throws on executors. If, in legislating on the subject, there will be some slight anticipation of rules yet to be precisely formulated, it may be said that there will at least be no presumption of leading principles still to be established. On the other hand, the positive rules as to rights which have already been enacted require, as a complement, a rational law of wrongs. What acts or omissions, under what circumstances, are civil wrongs may be answered generically at least on principles already accepted and embodied in our positive law, and beyond broad general rules it is not expedient to go. Such rules well co-ordinated and not frittered away in transcendental distinctions may, we apprehend, be safely left for minute development in the hands of the judges. The details of life and of social relations differ infinitely in this country from what they are in England, albeit the foundations of morality are in both countries the same: great care therefore should be exercised to avoid giving an arbitrary generality to special or secondary principles of the English system. Within firm and unmistakable outlines ample room should be afforded for the play of individual energy, for the growth of beneficial influences springing from sources within the community itself, and for the plastic force of judges and administrators at once in thorough sympathy with the legislature and thoroughly instructed in the habits, practices and tendencies of the Native community. We are not without hope that a clearly-drawn Code of absolute civil duties, well adapted to the character of the people, may, with the Penal Code and the Contract-law, serve in the course of time as the solid core of a greatly improved scheme of popular ethics. The argument that by knowing their absolute civil rights people will in many instances be led into litigation for the sake of asserting them, though it has been seriously advanced, is hardly worth serious discussion. Its natural conclusion is that all civil laws are an evil; it may be all penal laws too, since, if no one knew that he could obtain redress, no one would complain of any injury. In the one case or in the other the clearer the legal duty becomes, the fewer occasions will there usually be for litigation. Laws are made and administered in the interest of the general wellbeing. No rights should be given by law except those which it is important to maintain; and when the law conforms to this principle, the man may be regarded as a friend to society who, in vindication of his private right, enforces observance of a rule universally beneficial.

* As to the order in which the several Bills should be brought forward, none more convenient suggests itself than that in which we have here mentioned them. The Transfer of Property Bill is probably the most important in the extent of its bearing on the transactions of the people at large, and on that account might claim the first attention of the legislature; but the Negotiable Instruments Bill would probably be passed with greater rapidity, and would in its department be a very useful measure.

40. The Law of Torts, in the scope which we think ought to be given to it as a principal division of a general Code, will exact from its framers a great deal of labour and discrimination. The time to be expended on its preparation, if used with reasonable diligence, ought not to be in any way stinted. The various propositions and rules contained in it should be dwelt on for so long that they may be brought fairly and closely into comparison with the innumerable other jural notions, which will not come at a moment's notice, but present themselves spontaneously in the course of leisurely deliberation. To the legislature at large such a law will supply a subject on which all available experience and acumen may well be expended for a considerable time. Whether, then, any other far-reaching measure should at the same time be in hand may admit of question. We are inclined to think that when a topic of difficulty and great extent, having widely ramified connexions with human affairs and interests, has to be dealt with, the most effective course is to allow the mind for the time to be in a great degree possessed by it. By this, mental activity is not checked, rather stimulated; but all thoughts are for the time weighed with reference to the main and central object of consideration, until a coherent body of ideas has taken form and substance. A comparison of results then brings out the strong and the weak points of each man's conclusions and opinions; superficialities are readily disposed of. And all this care the Law of Torts in an especial degree requires. But if time and thought can be found for other subjects concurrently with this, we would suggest that the scheme set forth in paragraph 7 of the despatch of the Government of India to the Secretary of State, No. 34, dated 10th May, 1877, should be carried to completion. The laws of insurance, of carriers, and of lien are all of considerable importance; and they are to a great extent in the incipient stage in which they can be moulded according to the wisdom of the legislature without individual injury or inconvenience.* Still they do not affect the daily life of the great bulk of the people in any serious degree. No great harm will arise from the postponement of legislation regarding them until the heavier task is done.

41. When the Acts that we have suggested have been passed, the Law of Property in its whole extent will be a fit object of attention.† It is a wide and intricate subject, demanding for its mastery a mind well furnished with general principles, and with ability to grasp and measure details. To predict whether out of the multitudinous interests and rights relating to property which present themselves in India a uniform system of propositions and rules applicable to the whole country, or to a great part of it, can be evolved would be to anticipate the result which can really be reached only by close and prolonged study and observation by specially capable men.‡ In the meantime the work already accomplished by the legislature, united with other deeply reaching influences, must gradually produce great changes in the mental attitude of the people towards a scientific reformation of the law in those respects wherein an amelioration shall seem called for. When a new set of ideas has been received into the popular mind, an older set logically inconsistent may for some time stand side by side with it; but the intellectual ground having been taken away, the hold of superannuated notions by mere association is gradually loosened, and the way is prepared for their modification or complete absorption. As industry and enterprise extend in India, and larger capitals are invested in improvements

* The principal foreign trade of India is carried on with England; the internal trade has been mainly developed by the operations of English or other foreign merchants residing in the Presidency-cities and towns of export, who are familiar with English law. The law of contracts adopted by the legislature and now in force follows closely the English law. These considerations point to the desirability of securing a conformity of the mercantile law of India to the mercantile law of England, provision being made for the preservation of such Native customs as have survived the extension of commerce. To the codification of this branch of the law no objections have been taken.

† This, in its final form, will obviously include the chapters on Alluvion, as a mode of accession, and on Easements, as particular extensions and restrictions of the rights of ownership, which as subjects for practical legislation require immediate attention. Closely connected with these are incorporeal rights, which in India sometimes take peculiar and characteristic forms. The law of boundaries, the rights and duties of neighbouring owners as to delimitations and landmarks, is a topic of practical importance requiring careful investigation. There are many other objects falling under the same general title which it is not necessary to enumerate, and which indeed would in some instances vary in their name and their contents according to the presiding theory ultimately adopted.

‡ Constituted as is the Legislative Department of the Government of India, it appears to promise better results that the Law Member of Council for the time being should (save when legislation is urgently called for on any other subject) select for codification those branches of the law with which he is most familiar. Thus the valuable chapter on Powers drawn by Sir Arthur Hobhouse and included in the earlier editions of the Transfer of Property Bill came from a hand specially skilled. It has been found necessary to lay this aside for the present, but only, as we anticipate, to be resumed when a general sense of its utility and fitness has been developed by the further growth of legal conceptions.

of the land, many existing customs will so palpably be impediments to progress that their extinction will be generally welcomed. Any general law which may be framed for many years to come should be traced on spacious lines, avoiding over-interference, while leaving ample room for inevitable change. Such partial improvements as are meanwhile called for may best be made with special reference to local circumstances. For that important branch of the law which relates to landlord and tenant we have made provision, so far as at present seems expedient, by the chapter on Leases in the Transfer of Property Bill.

42. We do not think that at present our suggestions for the extension of general legislation could with advantage or prudence be pushed any further. What Bacon says of cases is equally true of laws themselves,—*Angustia prudentiæ humanæ casus omnes quos tempus reperit non potest capere,** and the work we have proposed should not be hurried through any premature reaching beyond it to remoter aims and ends. But by the side of constructive legislation we think that a preparation might well be made for a systematic chapter on interpretation. It would be desirable, indeed, that the main propositions of such a chapter should as soon as possible be laid down, at least provisionally, and consistently adhered to throughout the component parts of the future Code. To some extent this principle has been followed; but if once the resolution be adopted of reducing the rules of interpretation to a system, they will of necessity operate forthwith more strongly and uniformly on the legislation of the future. We would not, indeed, be understood as advocating any large introduction of English legal nomenclature into the Indian law. Technical words are seldom quite correctly apprehended by Natives of India: they often have a connotation which leads one into a field of ideas quite foreign to the Indian law; and they are subjected, as time goes on, to explanations and developments in the English Courts which cannot always coincide with the intention of the Indian legislature. These are inconveniences which we would as far as possible guard against. As matters stand at present, the reports of the English Courts, inestimably valuable to the lawyer and the judge if rightly and reasonably used, are not infrequently made a means of upsetting the law in India; and as to the legal vocabulary in particular, a word originally admitted with reserve as the nearest in sense to some idea for which expression was sought has in after-days sometimes gained an established position and supported fallacious arguments. As the Code is gradually built up, such accidents would have a most mischievous effect; and yet they are almost inevitable, unless they are prevented by interposing a timely check to all ingenuity of perversion. Framed in this spirit, a Code of construction may, we think, be widely beneficial. In modern times, as the freedom of judicial interpretation becomes more restricted, the reaction of the form of the law upon its substance is more extensive and deeper than in earlier days. This is the palpable danger of a complete Code. It fixes the mobile elements of the law at the moment of its creation; it may petrify them and deprive them of their capacity of growth under the care of scientific doctrine at the call of extended needs. The danger reaches its climax when the principles of a foreign system are imposed on a community of different character and habits; and the danger lies very much in the terminology. While, then, our legislature itself takes out the kernel of English judicial wisdom, it must guard against the *lex viva*, the concrete law, becoming a composition of shells and rind. As in the field of physical science every great advance in discovery is attended with some enlargement of general conceptions and some improvement of method, so in the progress of legal development under any system accepting purely rational standards, each step towards perfection involves a recognition of human relations hitherto less clearly seen, or a change of standing point from which new truths come into view. To enable such truths to be widely appropriated, such benefits to be gained with the least incumbering admixture, should be the purpose of a good Code of interpretation. Thus, in the language of Lord Mansfield, "our jurisprudence should be bottomed on plain broad principles, such as not only judges can without difficulty apply to the cases that occur, but as those whose rights are to be decided upon by them can understand;" while, pending the enactment of a Code of interpretation, and even after its enactment, our judges and administrators may well follow the maxim of Lord Eldon that, "instead of struggling by little circumstances

* De Augm. VIII Aph. 10.

to take cases out of a general rule, it is more wholesome to struggle not to let little circumstances prevent the application of the general rule." The Digest which has been proposed would hold out too many temptations to the mischievous ingenuity that Lord Eldon condemned. It is needless, as private enterprise has supplied it. If made discriminative, it would be a bad form of legislation. Of Indian judgments, as of books, it may be said "some are to be read only in parts, others to be read but not curiously; and some few to be read wholly and with diligence." In resolving which were good, bad or indifferent, the Government would have to determine what the law was or ought to be; and, having so determined, it had better legislate at once in order to prevent all further contradictions and errors.

43. Regarding the subject of codification and of systematic legislation finally from the purely practical point of view, it is to be observed that we have one supreme and three local legislatures. We have four High Courts, one Chief Court, and several Judicial Commissioners with the powers of High Courts, of which none are bound to accept as binding the rulings of others. To the tribunal of Her Majesty in Council, which alone can constrain the decision of the local Courts of appeal, access is possible only in cases of high pecuniary value and at an expense beyond the reach of the large majority of suitors. Working under the higher Courts of appeal are a number of Judges, European and Native, who in many instances display remarkable ability, but of whom the majority have had but a defective training owing to the conditions under which they have have had to work as members of the public service. It is manifestly desirable that Judges of the first instance, by whom so large a portion of the judicial work of the country is done, should in their often remote and isolated stations receive all the guidance and support that can be afforded them. It is desirable, too, that the superior Courts should be provided with a uniform body of rules applicable to the chief relations of social life, in order that inconsistencies and contradictions of decision may be prevented, and the great difficulty averted which must eventually arise from irreconcileable systems completely established in different parts of the country. A well-framed Code will not only reduce the necessary bulk of law-libraries, but will focus the wisdom and acumen of many learned expositors upon identical points of construction and detailed development. In such a concourse of intelligence the better interpretation, the sounder principle, must prevail; and thus the lower Courts will be trained, not only to a right understanding of particular enactments, but to a rational and effective method of dealing with the whole range of problems set before them.

44. Amongst the many communities which have in recent years recognized the great advantages of codification is that of Lower Canada, where, as in India, a heterogeneous population made it necessary to build on wide and liberal general principles. From the introduction to its Civil Code we borrow an extract with which we conclude this part of our report:—

"Prospectively, the Code promises uniformity of jurisdiction which contributes to diminish litigation, and to add to the security and stability of our civil rights.

It offers great additional means of legal education from which may be expected a higher standard of professional excellence.

It will ensure among the individual members of society a more intimate acquaintance with their civil rights and obligations, tending to increase and facilitate business-relations and to promote the natural welfare of the community. Moreover, as a barrier against the continual inroads of fragmentary legislation, it is an earnest of stability in the law itself.

To this we would add that it is an element in good government that there should be certainty in the rules regulating the conduct of the governed, so far as they are to be held by law accountable for such conduct to the State or to their fellows, in the rules regulating the rights and obligations of property, and in the rules providing remedies for the invasion of rights. Certainty in these rules conduces to the happiness and prosperity of the governed scarcely in a less degree than does their conformity to the highest standard of jurisprudence. 'It matters little what the law is, so that it be settled' may be truly said in all cases in which it is of necessity arbitrary, and in many in which it is conventional.

II.

On the six Bills referred to in the margin.

1. The Negotiable Instruments Bill.
2. The Transfer of Property Bill.
3. The Alluvion Bill.
4. The Master and Servant Bill.
5. The Easements Bill.
6. The Trusts Bill.

We have carefully enquired into and considered the six Bills referred to in the margin: we have also perused the comments on those Bills sent up by the several Local Governments at the request of the Government of India, the criticisms of the same Bills volunteered by Sir James Stephen, and the important paper of Sir Henry Maine; and we are unanimously of opinion that those Bills deal with branches of the law which may properly be codified; that the proposed enactments should extend to the whole of British India; that, except in the case of the Master and Servant Bill, no class of the community should be excluded from their operation; and that, subject to certain modifications which we proceed to suggest, they should all, with the exception of the Easements Bill, be enacted with as little delay as possible. As to the Easements Bill, Mr. Stokes and Sir Charles Turner are of opinion that, with the amendments hereinafter specified, it might become law at once; but Mr. West, being of opinion that the introduction of this measure may, without public detriment, be for a short time postponed, desires not to be finally committed to all the details of the Bill, should further information suggest modifications in them.

In the following remarks we shall refer to the Bills as printed in the book entitled "*The Six Codifying Bills laid before the Indian Law Commission*, Calcutta, 1879."

1.—THE NEGOTIABLE INSTRUMENTS BILL.

On the Negotiable Instruments Bill.

This Bill, originally framed by the late Law Commission, was, as far back as 1867, introduced into the Legislative Council of the Governor General and referred to a Select Committee. Since then it has been redrawn by Mr. Phillips of the Calcutta Bar: it has received copious and valuable criticism from the Local Governments, the High Courts and the Chambers of Commerce in the Presidency-towns and Rangoon, and it has been carefully revised by a Select Committee comprising the Advocate General of Bengal, Mr. Evans of the Calcutta Bar, and Mr. Morgan, a leading Calcutta merchant. We have found little or nothing to change in the Bill (*a*); but we think that certain additions, which we proceed to specify, may usefully be made to it.

Chapter I: *Preliminary*.—Section 1, paragraph 2, saves, in our opinion rightly, local usages relating to hundís and other instruments in an oriental language. But, in order to facilitate the assimilation of the practice of Native shroffs to that of European merchants, we recommend the insertion of a proviso that such usages may be excluded by any words in the body of the instrument indicating an intention that the legal relations of the parties shall be governed by the proposed Act. An eminent critic of the Bill says that he "cannot see why uniformity of practice is desirable." The reason is that it prevents uncertainty and litigation, and facilitates dealings, not only between English and Native merchants, but between Native merchants in different parts of India. The practical working of a system of credit is made safer and more beneficial when the bills of exchange under which a banker or merchant is responsible are governed by precisely the same legal conditions as those on which he is a creditor and with reference to which the others were issued or accepted.

We think that a definition of "signed" may usefully be added. Sir Charles Turner suggests the following: '"signed" means having the name of the person whose signature is by this Act required written by such person or by an agent authorized in that behalf, or indicated by a mark intended by such person as his signature, or impressed by a stamp or seal when a stamp or seal is commonly used by such person for such purpose.'

Chapter II: *Of Notes, Bills and Cheques*.—To sections 4, 5, explanations shewing when an undertaking to pay is 'unconditional,' when the sum payable

(*a*) There is a misprint in Section 90, line 5, where 'drawers' should be 'drawees,' and another in Section 125, line 7, where 'from' should be 'for.'

is 'certain,' and when the payee is a 'certain person' should, we think, be added. They might run thus:—

"A promise or order to pay out of a specified fund is 'conditional'; but an undertaking to pay in terms absolute is not rendered 'conditional' by a declaration that provision for the payment will be made out of a specified fund.

A promise or order to pay is not 'conditional' by reason of the time for payment being expressed to be on the lapse of a certain period after the occurrence of a specified event which, according to the ordinary expectation of mankind, is certain to happen, although the time of its happening may be uncertain.

The sum payable may be "certain," although it includes future interest payable at a rate specified according to an indicated rate of exchange, or is expressed to be payable according to the course of exchange, or by instalments (if such instalments are declared to fall due on fixed dates), and although the instrument provides that, on default of payment of an instalment, the balance unpaid shall become due.

The person to whom payment is to be made may be a 'certain person,' although he is misnamed or designated by description only, or though it be directed that payment be made to one or to another of several persons, if it appears on the face of the instrument that there is community of interest between them.

In a bill of exchange the person to whom it is clear that the direction is given is a 'certain person,' although he may be misnamed or designated by description only. If an address only is given, and the person residing at such address accepts the direction, the uncertainty is cured. The direction may be given to a "certain person," though it be given to one or other of several persons."

Section 8.—Before 'parties,' the words 'maker or' seem wanted.

Section 18 might be extended so as to meet cases of error not uncommon in Native documents purporting to specify the sum, its half and the double of the half. It might run thus:—

"18. Where the sum undertaken or ordered to be paid is differently stated in the body of the instrument and on the face of, but outside the body of, the instrument, the sum stated in the body of the instrument is the sum undertaken or ordered to be paid.

Where the sum is in the body of the instrument stated differently in figures and in words, the sum stated in words is the sum undertaken or ordered to be paid.

Where the sum is in the body of the instrument more than once stated in words and differently, the less sum is the sum undertaken or ordered to be paid."

Section 19 should, we think, provide also for undated instruments. The requisite clause might run thus: 'A promissory note, bill of exchange or cheque, in which the date of making or drawing is not specified, takes effect from the date of the first negociation thereof.

Sections 21 *and* 23.—In the former section, after the word "acceptance" we would introduce the words "or noting for non-acceptance;" in the latter, line 7, after the word "sight" the words "or noted for non-acceptance."

Chapter III: Parties to Notes, Bills and Cheques.—Section 33: The statement of the obligations of the drawee of a cheque is not complete. After the word "must" we think there should be introduced the words "unless he has received notice that the drawee is dead or has been declared insolvent, or declared by the proper authority of unsound mind and incapable of managing his affairs;" and the following proviso should be added: "Provided that the drawee is not so liable, unless such funds have been in his hands for a sufficient time before the presentation of the cheque for payment to enable him to ascertain the state of accounts between him and the drawer."

Section 34.—For the first nine words we would substitute "subject to the other provisions of this Act," and omit the final paragraph.

Section 35.—For "all or some of several joint drawees" we would substitute "all or some or one of several drawees." We suggest that in some part of the Bill, and possibly here, a clause should be inserted showing that, to determine who is liable as an acceptor, the address to the drawee and the acceptance should be read together. We would also insert clauses showing that there may be a valid acceptance before the bill is signed or while it is otherwise incomplete, or after it is overdue: that an acceptance is invalid if the acceptor undertakes to comply with the request otherwise than by payment of money: that an acceptance may be qualified in certain specified cases. The case where the drawee is the same person as the drawer or a fictitious person should also be provided for. These clauses might run as follows:—

Time when acceptance may be made.

"A bill of exchange may be accepted—

(*a*) before it has been signed by the drawer or when it is otherwise incomplete;

(*b*) after it is overdue;

(*c*) after it has been dishonoured by a previous refusal to accept or by non-payment.

Acceptance when invalid.

"An acceptance is invalid if the acceptor undertakes to comply with the direction otherwise than by payment of money.

Acceptance unqualified or qualified.

"An acceptance may be unqualified or qualified.

"An acceptance is unqualified where the drawee, or, where there are several joint drawees, all of them, assent without qualification to the order of the drawer.

"An acceptance is qualified—

(*a*) where it is conditional, declaring the payment to be dependent on the happening of an event therein stated;

(*b*) where it undertakes the payment of part only of the sum ordered to be paid;

(*c*) where, no place of payment being specified on the order, it undertakes the payment at a specified place and not otherwise or elsewhere; or where, a place of payment being specified in the order, it undertakes the payment at some other place and not otherwise or elsewhere;

(*d*) where it undertakes the payment at a time other than that at which under the order it would be legally due;

(*e*) where it is made by one or more of several joint drawees, not being partners, and not by all.

"If the drawer and drawee of a bill of exchange be the same person, or the drawee be a fictitious person, the holder may at his option treat the instrument as a promissory note or a bill of exchange."

Where the drawee is the same person as the drawer or a fictitious person.

Sections 47 *and* 48.—We would redraw these sections thus:—

47. A negotiable instrument made, drawn, accepted, endorsed or transferred without consideration, or for a consideration which fails, creates no obligation of payment between the parties to the transaction. But if any such party has transferred the instrument with or without endorsement to a holder for consideration, such holder, and every subsequent holder deriving title from him, may recover the amount due on such instrument from the transferor for consideration or any prior party thereto.

48. Any person who, being liable as a party to a negotiable instrument to pay the amount due thereon, pays the same, may recover such amount from any party to such instrument prior to himself and to a transferee for consideration, or to himself as such a transferee.

Chapter IV: Of Negotiation.—Though the subject of delivery of negotiable instruments is to some extent treated in sections 8 and 14 and chapter IV, we would prefix to the sections dealing with negotiation clauses relating to delivery generally, and to the following effect:—

"The making, acceptance or indorsement of a promissory note, bill of exchange or cheque is completed by delivery, actual or constructive.*

As between parties standing in immediate relation, delivery to be effectual must be made by the party making, accepting or indorsing the instrument, or by a person authorized by him in that behalf.

As between such parties and any holder of the instrument other than a holder in due course, it may be shown that the instrument was delivered conditionally or for a special purpose only, and not for the purpose of transferring absolutely the property therein.

A promissory note, bill of exchange or cheque payable to bearer is negotiable by the delivery thereof.

A promissory note, bill of exchange or cheque payable to order is negotiable by the holder by indorsement and delivery thereof."

Section 60.—The rule declared in this section is incomplete. We would substitute "appearing to be due on" for the word "of" after "amount," and add: "but where such amount has been partly paid, a note to that effect may be indorsed on the instrument and the instrument negotiated for the balance."

Section 65.—Sir Charles Turner would substitute the following:—

"65. The holder of a bill of exchange payable after sight or after demand must negotiate it within a reasonable time, or present it for acceptance.

In order to charge any party thereto, a bill of exchange payable after sight or after demand, or containing a direction to that effect, must be presented for acceptance, unless such presentment has been excused by the party sought to be charged therewith.

Any other bill of exchange may be presented for acceptance.

Presentment for acceptance must be made to the drawee or to some person authorized on his behalf to accept or refuse acceptance (if after reasonable search the drawee or such per-

* Sir C. Turner would here explain 'delivery' as "the transfer of possession, actual or constructive, by the party making, accepting or indorsing an instrument with the intention of accepting the liability of a maker, acceptor or indorser, as the case may be."

On the Negotiable Instruments Bill.

son can be found) within a reasonable. time after the bill is drawn and in business-hours on a business-day.

Explanation.—In determining what is a reasonable time for the negotiation or presentment of a bill for acceptance, regard must be had to the nature of the instrument, the usage of trade with regard to similar instruments, and the circumstances of the particular case, looking to the interests of the holder as well as of the drawee.

If default is made in the due presentment for acceptance of a bill of exchange payable after sight or after demand, or containing a direction that it should be presented for acceptance, no party thereto except the drawee or a party who has excused such presentment is liable on the bill: Provided that, if a competent drawee, or a person authorized to accept on his behalf, cannot after reasonable search be found, the bill is dishonoured."

Section 66.—The words "if he can, after reasonable search, be found," should apparently be inserted in line 2, after "sight."

Section 67.—For this section Sir C. Turner would substitute the following:—

"67. The drawee of a bill of exchange presented to him for acceptance may require that it be delivered to him, and may retain it for twenty-four hours, exclusive of public holidays, to consider if he will accept it. After the expiry of the twenty-four hours, he must re-deliver it to the person by whom or on whose behalf it was presented, whether he has accepted it or not."

Mr. Stokes and Mr. West would merely substitute for 'may' in line 1, the words "must if so required by the drawee."

Section 78.—Mr. West thinks that the drawer of a negotiable instrument payable on demand ought not to be subjected to risk through unreasonable delay on the part of successive holders in presenting it for payment. Unreasonable delay by parties subsequent ought, he thinks, to excuse prior parties from liability when such delay appears on the instrument.

Section 80.—We would add to clause (*a*) the words "as against any party sought to be charged therewith, if he has engaged to pay notwithstanding non-presentment." Mr. West thinks that this engagement ought not to give the person bound by it any recourse under section 48 against prior parties.

Section 83.—We would strike out "and" in the fourth line, and insert "due thereon." [The amount may not be claimable in full (sections 49 and 50), or it may have been in part paid.] We would insert "of the principal-money" after "amount" in line 3. We would then substitute "such" for "the" in line 5, and strike out "due thereon."

Similarly, in section 84, we would substitute "due thereon" for "thereof" in line 2.

Section 85.—It would be useful to insert a section to the effect that a cheque satisfied by payment is the property of the drawer, but may be retained by the drawee till accounts are settled between him and the drawer.

Chapter VII: Of discharge from liability.—We would here insert a section:—

"If a bill of exchange which has been negotiated is at or after maturity held by the acceptor in his own right, all rights of action thereon are extinguished."

Section 87.—After the words "twenty-four hours" there should be introduced "exclusive of public holidays."

Section 88.—After "payment", in line 2, there should be introduced "within a reasonable time."

Section 90.—We would either add to this section as it stands the words "unless on notice given by the holder they assent to the acceptance" or substitute the following:—

"90. If the holder of a bill acquiesce in a qualified acceptance thereof, he is bound to give notice of such acceptance to the other parties to the bill: any party to whom he omits to give notice is discharged."

Chapter VIII: Notice of dishonour.—To section 91 there should be added, after the first paragraph:—"or where presentment is excused and the bill is not accepted"; and in the second paragraph, after the word "contract," there should be introduced the words "or the acceptance is qualified."

Section 94.—Mr. West thinks that presentment excused should be equivalent to actual presentment, only against the person excusing it; but that an impossibility of presentment, as in the case of an absconding or fictitious drawee, should rank as dishonour.

On the Negotiable Instruments Bill.

Chapter X: Of reasonable time.—Sir Charles Turner would omit section 108, leaving the rule as stated in section 107. The section as it stands is, in his opinion, inconsistent with section 107, and declares a rule which is not only far more strict than the existing law, but would be highly inconvenient. Bills are often negotiated before presentation for acceptance. Cheques need not be presented on the day after they come to the holder's possession; and negotiable instruments payable on demand are frequently given as a continuing security.

Chapter XI: Acceptance and payment for honour.—The Bill contains no statement of the procedure in the case of acceptance *supra protest*. It appears to us desirable that the law of India should in this respect be assimilated to mercantile law elsewhere and to the practice obtaining in this country. We therefore recommend that the following clause be inserted:—

"An acceptor *supra protest* must personally appear before a notary public with witnesses, and declare that he accepts, under protest, the protested bill for the honour of the drawer or of a particular indorser whom he names, or generally for honour, and that he will satisfy the same at the appointed time; and then must subscribe the bill with his own hand."

Unless the person who intends to accept *supra protest* first declares in the presence of a notary that he does it for honour, and has such declaration duly recorded in the notarial register at the time, his acceptance shall be a nullity."

Section 111 should, we think, run as follows:—

"When a bill of exchange has been noted or protested for non-acceptance or for better security, any person, not being a party already liable thereon, may, with the consent of the holder, accept the same for the honour of any party."

And for section 112 we would substitute the following:—

How acceptance for honour must be made.

"*Section* 112.—A person desiring to accept for honour must in the presence of a notary public subscribe the bill with his own hand, and declare that he accepts under protest the protested bill for the honour of the drawer or of a particular indorser whom he names, or generally for honour; and such declaration must be recorded by the notary in his register. Where the acceptance does not express for whose honour it is made, it shall be deemed to be made for the honour of the drawer."

Chapter XIV: Of Foreign Bills.—Although in practice inland bills are not generally drawn in sets, they may be so drawn; and in this country, where the postal service is in parts necessarily performed with unavoidable insecurity, we think it desirable it should appear in the beginning of the Bill that inland bills may be drawn in sets. In the Commissioners' Bill it does so appear.

We would alter the heading of this chapter, and transfer section 128 to chapter XI, and section 129 to chapter IX.

Section 126.—The Exception to this section does not go far enough. If an acceptor has accepted one of the parts of a set, payment of another part which he has not accepted will not discharge him from liability to pay a holder in due course of the accepted part. Again, not only is the indorser who has indorsed two parts to different persons, but indorsers subsequent to him of the part not paid, are liable to holders of such part in due course. In the Exception, for the last thirteen words, we would therefore substitute "he and the indorsers of each part are liable on such part as if it were a separate bill."

Section 128.—A referee in case of need may be named in an inland as well as in a foreign bill of exchange, and as well by an indorser as by a drawer. When a referee is so named in an inland bill of exchange by an indorser, presentment to the referee is optional. In foreign bills it is compulsory, in order to charge the person who has given the reference and all subsequent indorsers.

A referee in case of need may accept and pay without previous protest according to Chitty (120) (see also Chalmers, art. 37, note). We would, as we have said, carry this section into chapter XI, with some additions. We would head that chapter, "Of acceptance and payment for honour and reference in case of need."

The definition "drawee in case of need" should be amended as follows—

"When in the bill or in any endorsement thereon the name," &c.;

and section 128 should run—

"Where a drawee in case of need is named in a bill of exchange or in any indorsement thereon, the bill is not dishonoured until it has been dishonoured by such drawee."

On the Negotiable Instruments Bill.

We would add a section: "A drawee in case of need may accept and pay the bill of exchange without previous protest."

Mr. West thinks the Bill ought to contain a section embodying the principle stated in *Maillard* v. *Page*, L. R. 5 Ex. 312, 319, that an acceptance and any accompanying written contract are, as between the immediate parties, to be construed together.

We think that the second clause of section 125 (as to the non-liability of a banker who has received payment for a customer of a crossed cheque) should be amended in accordance with the views of Grove and Lindley, JJ., in *Matthiessen* v. *London and County Banking Company*, 48 L. J. C. P. 529, by omitting the first word "but."

As to the arrangement of the Bill, we would suggest that the provisions in sections 26 and 103 as to presumptions, and those in sections 42, 43, and 44 as to estoppels, might better be placed together in a separate chapter headed "Special Rules of Evidence." Section 31 should, apparently, follow section 35: section 48 should precede section 47; and some other slight alterations in the arrangement may be found desirable.

2.—THE TRANSFER OF PROPERTY BILL.

On the Transfer of Property Bill.

Recognizing in this Bill, which was originally drawn by the late Law Commission and has since been repeatedly revised, the most important of the measures laid before us, we have devoted to it perhaps an undue share of the limited time at our command.

Although it has been objected to the Bill that it deals with subjects which at a later stage of the work of codification will have to be arranged under separate chapters, it has appeared to us convenient to retain for the present in a great measure the form in which it was originally drafted.

Dealing generally with the transfer of property, its arrangement enables the legislature to determine to what general principles the law of transfer should conform, and to apply such principles consistently.

Read with the Contract Act, this Bill covers almost the whole of the ground which could be profitably occupied by law relating to the transfer *inter vivos* of interests in property; and for the convenience of the practitioner it could hardly be enacted in a more accessible form.

This, it appears to us, justifies the introductory chapter, which, after declaring what rights are inalienable and by what persons transfers may be made, proceeds to declare restrictions of the transfer of property called for in the interests of society. These restrictions are identical with those which are already incorporated into the law of India in the Succession Act.

In considering the necessity for these provisions, it must not be forgotten that the number of domiciled Europeans and Eurasians holding property in India has of late years greatly increased, and that the value of the property held by them in plantations of tea and coffee, in mills and machinery and in other investments, now amounts to many millions of pounds sterling. These persons and their estates are subject to the law of succession (Act X of 1865), and it would be obviously inconsistent that they should possess powers of creating estates in their property by transfers *inter vivos* which the legislature has declared they should not enjoy by testamentary disposition. Moreover, where the declared law is silent on the subject in respect of transfers *inter vivos*, the Courts may, and probably would consider themselves bound to, recognize principles stamped with the assent of the legislature as conclusive of the question that transfers *inter vivos* creating estates in violation of these principles are invalid as opposed to public policy.

The Privy Council has already ruled that estates cannot be created by Hindús in contravention of the principles which underlie the Thellusson Act, or subject to conditions which are void for repugnancy.

The rules contained in sections 10 to 35 impugn, so far as our experience goes, no law or practice of Hindús, Muhammadans or other sects recognized in India as enjoying special personal laws, unless it may be the now obsolete practice among Muhammadans of devoting property to the maintenance of the

family of a particular saint. But to avoid any disturbance of rights enjoyed under personal laws, sufficient provision is made in the Bill.

On the Transfer of Property Bill.

The persons to whom the provisions we are now considering will in practice be found mainly applicable are property-holders who have been designated in former Acts as "persons to whom the English law applies," a phrase which gave rise to no little difficulty in the case of persons holding property in the mufassal. This class has now attained sufficient importance in numbers and wealth to demand at the hands of the legislature an explicit declaration of restrictions which may be imposed on their dealings with their property, and where these restrictions are founded on approved principles and not inconsistent with personal law, there is no reason why they should not be declared of general application.

The sections from 36 to 53 embody rules already applied in the Courts of India, or flowing naturally from accepted principles.

The rules relating to sales, mortgages, exchanges and gifts declare generally no more than is understood and applied as law in the Courts. The exceptions will be noticed in our detailed observations.

Chapter I: Preliminary.—We would expressly save, in section 2, transfers by decree or order of Courts of competent jurisdiction.

In the interpretation-clause (section 3) we would insert definitions of "ownership," and "property;" we would extend the definition of "attached to the earth" so as to include trees and shrubs; and with reference to sections 40, 56, 78, 79 and 80 of the Bill as we have revised it, we would define "notice" as follows:—

> "A person is said to have 'notice' of a fact when he actually knows that fact, or when, but for wilful abstention from inquiry which he ought to have made or gross negligence, he would have known it, or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, section 229."

We would declare that all chapters and sections of the Bill which relate to contracts should be taken as part of the Contract Act, 1872. When the body of substantive civil law enacted for India is rearranged in a more compact and convenient form than that of a series of fragmentary portions from time to time passed by the legislature,* the chapters on Sale, Mortgage, Lease and Exchange, contained in the present Bill, will probably be placed in close connection with the rules contained in the Contract Act. But till then they may fitly be left in a law containing what the Contract Act does not contain, namely, general rules regulating the transmission of property between living persons.

Chapter II: Of Transfers of Immoveable Property.—We think that chapter II should be extended to transfers of property, whether moveable or immoveable; that it should be entitled "*Of Transfers of Property by act of Parties*"; and that it should commence with two sections,—one defining "transfer," the other showing what may be transferred. The latter section should, we think, to some extent follow the analogy of the Code of Civil Procedure, section 266, clauses (*e*), (*g*), (*h*) and (*k*), as to property which may be attached.† We also think that this chapter should contain a section declaring that a transfer may be made without writing in every case in which a writing is not expressly required by law.

The Law Commissioners, by whom the original draft of this Bill was framed, observed that their chief object was to bring the rules which regulate the transmission of property between living persons into harmony with the rules affecting its devolution upon death, and thus to furnish the necessary complement of the work which they commenced in framing the law of Succession. With this view they inserted rules that conditions in restraint of alienation should be void; that conditions making an interest to cease on insol-

* This, we understand, is all that was intended by the Government of India in paragraph 18 of its Legislative despatch No. 34, dated 10th May, 1877, by the phrase "scientifically arranging the various chapters of the Civil Code thus produced", and some such rearrangement was contemplated by the late Indian Law Commissioners, who observe in their Sixth Report, referring to their rules relating to the transfer of property: "It is probable that several of these rules will eventually find a different place whenever a final distribution and rearrangement of the whole law shall have been effected; but some blending of subjects is unavoidable in a work which the Government has, for sufficient reasons, instructed us to submit to it in portions, as each portion is completed."

† In view of the more general prohibition that no transfer can be made which is opposed to the nature of the interest affected thereby, Sir Charles Turner thinks it unnecessary to declare that "a strictly personal right," &c., cannot be transferred.

On the Transfer of Property Bill.

vency or attempted alienation should also be void; that restrictions should be placed on the power of tying up property by transactions *inter vivos*, similar to those imposed by the Indian Succession Act, sections 100 to 104, in the case of wills. They also proposed rules as to when certain interests created by transactions *inter vivos* should be deemed vested. And they applied, *mutatis mutandis*, to transfers the rules of the Succession Act as to contingent bequests, conditional bequests and bequests with directions as to application and enjoyment. It seems to us that, subject to the following remarks, these rules are in themselves reasonable, and may properly be extended to the transactions *inter vivos* of all the inhabitants of India, whether they are or are not subject to the Succession Act. But as to the rule corresponding with section 100 of the Succession Act, Sir Charles Turner and Mr. West think that the law should be modified so as not to exclude the unborn beneficiary in the case supposed, but to make void any limitation beyond his interest. As to the rule corresponding with section 102 of the Succession Act, they think that, where distinct interests are given to persons as members of a class, which interests are ascertainable within the term prescribed by the rule against perpetuity, those interests should not fail by reason of other interests failing through the operation of that rule; and as to the rule corresponding with section 103 of the Succession Act, they think that, where an intermediate interest fails, the subsequent interest should not fail, if it is ascertained and vested immediately on the death of the specified persons who were living at the time of the transferor's death. Mr. Stokes is averse to making any of the modifications thus suggested. As to the rule prohibiting accumulation, we all should prefer the more liberal enactments of the Thellusson Act (39 & 40 Geo. III, c. 98), which allow an accumulation for twenty-one years, and do not affect provisions for payment of debts or for raising portions.* But as the rule embodied in the Succession Act, section 104, has now been in force for fourteen years, Mr. Stokes and Mr. West do not press its alteration. The Law Commissioners also proposed to extend to transactions *inter vivos* the rules as to election contained in Part XXVII of the Succession Act. We think that these rules also, founded as they are on principles of equity which are universally applicable, may also properly be inserted in the Bill.

We think provision should be made for the satisfaction of a right arising in favour of several persons, where, in consequence of a transfer, property is divided, and held in several shares; and we have framed a section with this object. Mr. West is of opinion that a corresponding rule is necessary for the case of a division of the property burdened with an obligation, and that the rules should apply in all cases of legal division.

Section 7 of the Bill treats of the title which the transferor of immoveable property can confer, and of the protection given to innocent transferees for value. We think that this matter should be dealt with in more detail, and have accordingly framed sections in substitution, providing for each of the following five cases:—

(1) where there is a transfer for consideration by a person, such as a Hindú widow, authorized only under circumstances in their nature variable to dispose of immoveable property;

(2) where a third person has a right to receive maintenance from the profits of immoveable property and such right does not amount to a charge;

(3) where, for the more beneficial enjoyment of his own immoveable property, a third person has, independently of any interest in the immoveable property of another, a right to restrain the enjoyment of the latter property;

(4) where a third person is entitled to the benefit of an obligation arising out of a contract and annexed to the ownership of immoveable property, but not amounting to an interest or easement; and

(5) where a person holds immoveable property as its ostensible owner with the consent of the other persons interested therein.

We recommend, too, that the Bill should here provide for the following cases:—

(*a*) where a person, erroneously representing that he is authorized to transfer certain immoveable property, assumes to transfer it for consideration and afterwards acquires an interest therein;

(*b*) where a transfer of immoveable property is made for consideration by persons having distinct interests therein;

(*c*) where several co-owners of immoveable property transfer a share therein without specifying that the transfer is to take effect on any particular share or shares of the transferors;

(*d*) where a person creates, by transfer at different times, rights in or over the same immoveable property, and such rights cannot all exist or be exercised to their full extent together. Mr. West thinks that the rule dealing with this case should be supplemented by a rule providing for the satisfaction of each later created interest to the fullest extent compatible with the rule of priority and for such adjustments as may further this object.

It seems to us that a clause resembling Act XI of 1855, section 2, which provides, in cases to which the English law is applicable, for improvements of immoveable property made by *bonâ fide* transferees who are subsequently evicted, may fitly be introduced into the Bill and applied to all persons in British India. We think, too, that such transferees should be allowed to remove growing crops which they have planted or sown on the property.

We think that the section (10) relating to transfers of land *pendente lite* should not forbid such transfers when made under the authority of the Court and on such terms as it may impose, and that the section (10A) relating to fraudulent transfers may properly be extended to cases of fraudulent forfeitures and to cases where the persons defrauded are co-owners or creditors.

Chapter III: Of Sales of Immoveable Property.—We think that "sale" should be defined as a transfer of ownership in exchange for a price paid or promised, or part-paid and part-promised. We entirely agree with Sir Henry Maine as to the desirability of rendering the system of transfer of immoveable property a system of public transfer. But we must remember that, in the absence of a much larger number of registration-offices that at present exist in India, the requirement of registration in the case of every petty transaction relating to land would be an intolerable hardship. We have in this matter been guided by the analogy of the Indian Registration Act (III of 1877, section 17), and required that sale should be made in the case of immoveable property of the value of Rs. 100 and upwards only, by a registered assurance, but that, in the case of immoveable property of a less value, it may be made either by registered assurance or by delivery of the property. As to delivery, we think it will be enough to say that it takes place, in the case of a reversion or other intangible thing, when the parties consent to the delivery: and in the case of other immoveable property, when the seller places the buyer, or such person as he directs, in possession of the property.

The rights and liabilities of the seller and buyer may, we think, be conveniently classified as follows:—(*a*) duties of seller; (*b*) rights of seller; (*c*) duties of buyer; (*d*) rights of buyer, and according to that phase in each case which is the more prominent in practice. In addition to the duties which the Bill (section 12) imposes on the seller, and which are generally recognised by the Courts, we think that, when the property is, or forms part of, a revenue-paying estate, he should be bound to present an application to the proper officer for the requisite alteration of the revenue-register;* that between the date of the contract of sale and the delivery of the property, he should take due care of the property and the title-deeds in his possession; that, on being so required, he should give the buyer, or such person as he directs, such possession of the property as its nature admits, and that he should pay all public charges and rent accrued due in respect of the property up to the date of sale. As to his duty regarding incumbrances on the property sold, we conceive that it will be in accordance with what is generally understood to be the law throughout India merely to require the seller, in the absence of a contract to the contrary, to pay the interest due on the date of sale, and, where the property is sold free from incumbrances, to discharge all incumbrances thereon then existing. As to the implied contracts of a seller, we think it will be enough to provide that

* Sir Charles Turner would also urge that these enactments are frequently required by the circumstances of large zamíndárí properties.

* In practice (according to Sir Charles Turner) the consideration-money is hardly ever fully paid until the seller has presented such an application.

On the Transfer of Property Bill.

On the Transfer of Property Bill.

he shall be deemed to contract that the interest which he assumes to transfer to the buyer subsists, and that he has power to transfer the same; provided that, where the sale is made by a person in a fiduciary character, he shall be deemed to contract to the like effect so far only as his knowledge extends.

As to the buyer's duties, we would require him, in addition to the duties expressly imposed by the Bill (sections 12, 15, 16), to pay or tender, at the time and place of completing the transfer, the purchase-money to the seller or such person as he directs. Power to retain out of the purchase-money the amount of the incumbrances should, we think, be given to the buyer only when the property is sold free of incumbrances. We would expressly require the buyer to re-transfer the property when the ownership thereof has passed to him before payment of the purchase-money, and he fails to pay or tender it. We also think that, where the ownership of the property has passed to the buyer, he should, as between himself and the seller, be expressly bound to pay all public charges which may become due in respect of the property, the principal-money due on the incumbrances subject to which the property is sold, and the interest thereon afterwards accruing due.

Chapter IV: Mortgages of Immoveable Property and Charges.—The objection raised by one eminent critic, that this chapter deals "with matters which do not transfer property, but only create a charge upon it" is one which seems to us to rest on an assumption that a transfer must of necessity extend to the whole property or interest of the transferor in the subject-matter of the transaction. We, considering ownership as generally divisible, have regarded the term "transfer" as properly applicable to any interest carved out of the aggregate called "ownership." This is consistent with the English law. "A security," says Mr. Fisher in his work on Mortgages, "is a redeemable estate or right which one person has in the property of another."

We think that the definitions of the four chief kinds of mortgage with which this chapter commences, and which were taken from Mr. Macpherson's well-known work, require some modification to adapt them to the various parts of India. Mr. West is of opinion that the words 'without delivering possession' in the definition of 'mortgage by conditional sale' are not essential, and are opposed to a common practice in the Bombay Presidency. Sir Charles Turner considers that transfer of possession is not of the essence of such mortgages, although they are very generally combined with transfer of possession and usufructuary provisions.

We are of opinion that writing and registration should be compulsory whenever the principal-money secured is one hundred rupees and upwards: when the principal is less than that sum and the property is not delivered, we would also require registration; and in all such cases we think the mortgagor, on payment of the amount remaining due, should be entitled to require the mortgagee to register an acknowledgment that any right in derogation of the interest tranferred to him has been extinguished. The requirement of registration will not only discourage fraud and facilitate investigations of title, it will also preclude some difficult questions as to priority.

Mr. West would introduce a provision in the section treating of the right to redeem, to the effect that, if the time fixed for repayment of the mortgage-money has been allowed to pass, or if no time has been fixed, the mortgagee should be entitled to reasonable notice before payment. Mr. Stokes and Sir C. Turner are opposed to this provision as unsuited to India. In mortgages for considerable sums the parties would sufficiently protect themselves: in the far more numerous cases of mortgages for small sums to saukárs, it would be inconvenient to require notice.

We think that a person interested in a share only of the mortgaged property should be entitled to redeem his own share only where the mortgagee, or, if there are several mortgagees, all of them, has or have acquired a share in the right to redeem.

The section (61) of the revised draft, declaring the right of an usufructuary mortgagor to recover possession, should, in Sir Charles Turner's opinion, enable him to do so—

where the profits are to be applied in payment of interest at a rate agreed or prescribed by law and then in reduction of principal—when the mortgagor pays or tenders

to the mortgagee, or deposits in Court as hereinafter provided, the sum then due thereon;

On the Transfer of Property Bill.

where the profits are to be taken in lieu of interest and no time is specified for redemption; or where the profits are to be so taken and the mortgage is made for a term of years, but it was not the intention of the parties that redemption should be postponed to the expiry of the term—when the sum then due on the mortgage is paid, tendered or deposited as aforesaid;

where the profits are to be taken in lieu of interest and the mortgage is made for a term, and it was the intention of the parties that redemption should not be allowed before the expiry of the term—when, after the expiry of the term, the sum then due on the mortgage is paid, tendered or deposited as aforesaid.

Explanation.—It is not necessarily to be concluded from the circumstance that a mortgage is expressed to be made for a term of years that it was the intention of the parties that redemption should not be allowed before the expiry of the term. The contrary intention may be declared by, or inferred from, other stipulations of the contract.

The case where accessions to mortgaged property have been acquired at the cost of the mortgagee should, we think, be provided for.

As the law stands, there is no implied contract on the part of the borrower to produce a security of any particular degree of safety, or any particular title, as in the case of a contract for sale. The implied contracts of the mortgagor should, therefore, in our opinion, be that the interest which he assumes to transfer subsists, and that he has power to transfer the same; that the mortgagor will defend, or, if the mortgagee is in possession, enable him to defend, the mortgagor's title to the mortgaged property; that where the mortgage is a second or subsequent incumbrance, the mortgagor will pay the interest accruing due on each prior incumbrance and at the proper time discharge the principal due thereon. There should also be, in the case of mortgaged leasehold, the stipulations specified in the Bill (section 24) as to payment of rent, performance of conditions, observance of contracts and indemnity.

For the section (27) treating of waste by a mortgagor in possession, Mr. West would substitute the following: "A mortgagor must not by any act or wilful omission destroy, or materially impair the value of, the mortgaged property or his interest therein as a security for the mortgage-money."

We recommend the omission of the section (28) requiring certain notices to be given by mortgagors making, or proposing to make, second and other subsequent mortgages. This provision (which was inserted by the Select Committee to which the Bill was referred) is a novelty, and does not seem to us likely to be of any practical use.

Section 34, expressing the present rule in the case of a mortgage by conditional sale, treats the mortgagee as having no remedy against the mortgagor personally, except in certain specified cases. Mr. West would substitute the following: "A mortgagee may sue a mortgagor for mortgage-money which has become payable in all cases except those wherein a personal liability has been excluded by express contract or by the nature of the mortgage."

Where, by any cause other than the wrongful act or default of the mortgagor or mortgagee, the mortgaged property has been wholly or partially destroyed, or the security is rendered insufficient, the mortgagee should, we think, be entitled to require the mortgagor to give him within a reasonable time another sufficient security for his debt, and if the mortgagor fails to do so, to sue him for the mortgage-money.

We think that a mortgagee interested in part only of the mortgage-money should not be precluded from suing for a partial foreclosure where the mortgagees have, with the consent of the mortgagor, severed their interests under the mortgage.

We would modify section 35 so as to allow powers of sale in all cases where the principal-money originally secured is five hundred rupees or upwards. They save litigation and expense. Their validity has been recognised in many parts of India. Moreover, interference with freedom of contract is *primâ facie* undesirable, and it is, in our opinion, only in small transactions, where the mortgagor is generally poor and ignorant, that any real danger exists as to the misuse of such powers. In some cases the mortgagor obtains money on easier terms by conferring a power of sale on the mortgagee, and the power is usually, and not unreasonably, inserted in mortgages to agents of indigo, coffee and similar estates, where the value of the security might be considerably impaired,

On the Transfer of Property Bill.

were the property neglected while the mortgagee was seeking a sale by order of Court.

Where the receipts from the mortgaged property are to be taken in lieu of interest, or of interest and defined portions of the principal, we do not think that a mortgagee in possession should be bound to collect the rents and profits and to repair.

The section (45) relating to mortgages made to secure the balance of a running account and expressing the maximum secured should, we think, be extended to mortgages to secure future advances and the performance of engagements.

We think that the Court should not postpone the day appointed for payment in a foreclosure-suit unless sufficient security is given as well as good cause shown, and we would modify section 50 so as to enable it to require such security.

The power conferred on a Court to order, in a foreclosure-suit, a sale in lieu of foreclosure, at the instance of the mortgagee, or at the instance of the mortgagor furnishing security for any balance which may remain unsatisfied by the proceeds of the sale, will be novel throughout the greater part of the Mufassal.* But it seems to us expedient for the mortgagor that the Court should possess this power, and that where the sale takes place at the instance of the mortgagee, he should not be allowed to recover any balance which he could not have recovered in the event of foreclosure, and that where the sale takes place at the instance of the mortgagor, the mortgagee obtains all that he is entitled to, if he receives his principal-money and interest.

Where a decree has been made for redemption, if the amount due is not paid on the day fixed by the Court, the plaintiff, where the mortgage is simple or usufructuary, should not be foreclosed, nor, where the mortgage is by conditional sale, should the property be sold.

Where one of several mortgagors redeems the mortgaged property and obtains possession thereof, we think that he should be declared entitled to a charge on the share of each of the other co-mortgagors in the property, for his proportion of the costs properly incurred in so redeeming and obtaining possession. A decision of the late Sadr Court, North-Western Provinces, is to this effect. The High Court of Bombay also has ruled that the purchaser of the interest of one of several co-sharers in an equity of redemption may redeem the whole property and hold it subject to the rights on contribution of the other co-sharers.

The Bill should, Mr. Stokes and Sir Charles Turner think, provide separately for the rights and liabilities which arise where two or more forms of mortgage are combined.

Mr. Stokes would insert the following:—

"97. Where a simple mortgagee is, under the contract of mortgage, entitled as lessee or otherwise to receive the rents and profits accruing from the mortgaged property, such rents and profits shall, in the absence of a contract to the contrary, be credited to the mortgagor against the interest of the principal-money, and if they exceed the amount due in respect of interest, against the principal-money also. In other respects the rights and liabilities of the parties are the same as if the mortgage were purely simple.

Simple mortgage usufructuary.

Where a mortgagee by conditional sale is, under the contract of mortgage, entitled as lessee or otherwise to receive the rents and profits accruing from the mortgaged property, the rights and liabilities of the parties are, up to the date on which the principal-money has become payable, the same as if the mortgage were purely usufructuary, and from and after that date the same as if the mortgage were purely by conditional sale."

Conditional mortgage usufructuary.

Sir Charles Turner thinks that it would be enough to insert a simple declaration that the mortgagee and mortgagor have respectively the same rights and liabilities as are declared to be created in each of the several forms so combined, so far as such rights and liabilities are consistent with the mortgagee's availing himself of any of his remedies. Mr. West thinks that the general provisions of the Bill sufficiently cover this matter.

* But see, as to the Presidency of Bombay, Bombay Regulation V of 1827, *ad finem*.

On the Transfer of Property Bill.

There is a common practice on the part of mortgagees of suing their mortgagors on the debt as such, and in execution selling the mortgagor's interest in the property. This is purchased by strangers to the mortgage, who are thus virtually defrauded by an enforcement of the security, of the existence of which they were wholly ignorant. In order to check this practice, we have framed a section providing that, where a mortgagee, in execution of a decree for the satisfaction of any claim, whether arising under the mortgage or not, attaches and brings to sale the mortgaged property, or the mortgagor's interest therein, his security shall be extinguished unless before the issue of the proclamation under the Civil Procedure Code, section 287, he gives notice thereof to the Court executing the decree.

We concur with the late Law Commissioners in thinking that mortgage by deposit of title-deeds should not be recognized. It is now hardly known in the Mufassal. It is opposed to the policy of our registration-law: it leads to evasions of the stamp-duty; and it is at variance with the principle of making the system of transfer of immoveable property as far as possible a system of public transfer. When the amount secured is Rs. 100 or upwards, it would also be inconsistent with our proposed rule requiring a written instrument.

The section (64) relating to the merger of charges is, in the opinion of Mr. Stokes and Sir C. Turner, in exact accordance with the English and Indian decisions on the subject. Mr. West would substitute the following: "The holder of one of two or more incumbrances may purchase another, or the property subject thereto, and hold the same with his original incumbrance as separate interests."

For section 54 (as to the right to recover a balance due on a mortgage) Sir Charles Turner would substitute the following:—

"Where the nett proceeds of any such sale are insufficient to pay the amount due for the time being on the mortgage, together with the costs, if any, awarded to the mortgagee by the decree or in execution thereof, he may recover such balance and costs—

if the sale has been made in a suit for foreclosure, under the last paragraph of section 87, in execution of the decree, by enforcing the security; and if such security is a bond, with sureties, both against such sureties and the principal:

in any case, if under the contract the mortgagee was entitled to any other remedy for the recovery of the mortgage-debt in addition to a sale of the property sold, and such other remedy has been claimed and decreed in execution of the decree; but

if such other remedy has not been claimed and decreed, then by subsequent suit, unless he has by release or abandonment or otherwise lost such other remedy, or the suit is barred by limitation."

Lastly, we all think that the Bill should contain provisions as to serving notices, and making or accepting tenders and deposits, under this chapter, when the person concerned is non-resident, or unknown, or incompetent to contract. These provisions (which will be found in the revised Bill, ss. 101, 102) are novel; but they are suggested by difficulties which have occurred in practice. Mr. West is of opinion that the following principles should be explicitly set forth: (1) a transaction in any guise, the real intent of which is to make property a security for a continuing debt, is to be deemed a mortgage; (2) an unreasonable restriction on redemption is void; (3) time specified is not of the essence of the transaction for either party. Mr. Stokes and Sir Charles Turner consider that it may be left to the Courts to determine in each instance what is the nature of a transaction, and whether time is of its essence, and that it would be inexpedient to do more, in respect of restrictions on redemption, than to give effect to the intention of the parties when it can be collected from the contract.

Chapter V: Of Leases of Immoveable Property.—A high authority objects to this chapter in that it deals "with matters which do not transfer property, but only create a limited interest in it." This is not, we venture to think, in accordance with either English or Indian law. The lessor not only creates, but conveys, an interest in the property concerned. We conceive, and have defined, a lease to be a transfer of a right to enjoy specified immoveable property, made in consideration of a premium or a rent. Such a right is "property," and the present chapter, therefore, in our opinion, rightly falls within the scope of a Bill entitled "The Transfer of Property Act."

On the Transfer of Property Bill.

We would require all leases from year to year, or for any term exceeding one year, or reserving a yearly rent, to be made by registered assurance. This agrees with the rule in the Registration Act (III of 1877), section 17, save that it omits the power given by that Act to the Local Government to exempt leases for terms not exceeding five years and for annual rents not exceeding fifty rupees. It is hardly necessary to point out that it also carries out the policy above referred to, of rendering the system of transferring immoveable property as far as possible a system of public transfer.

As to the respective rights and liabilities of the lessor and lessee, we would expressly recognize the right to distrain, subject to the local law relating to distresses. We think that the lessor's implied contract for quiet enjoyment should not in India be limited to the acts of the lessor or his transferees, or any person claiming through him or them. Where any material part of the property leased is by *vis major* destroyed or rendered substantially and permanently unfit for the purpose for which it was let, we recommend that the lessee should have the option of treating the lease as void. The lessee should, we think, in the absence of a contract or local usage to the contrary, be bound to make good only such defects as have been caused by his own act or default.

As to the effect of a surrender on an under-lease, we think that when the under-lease has been granted on terms and conditions substantially the same (except as regards the amount of rent) as those of the original lease, the under-lease should not be prejudiced. Mr. West thinks that the original lessor ought to be guarded against loss through sub-leases at reduced rents, and that sub-lessees willing to make good the terms of the original lease should be guarded against loss by any wilful forfeiture.

Mr. West would extend the section (73) relating to relief against forfeiture for non-payment of rent to all cases free from fraud and wilful neglect and reparable by damages.

Local legislation as to the relations of zamíndár and raiyat being so copious and elaborate, we think that the provisions of this chapter should not apply to leases for agricultural purposes, except in so far as the Local Government may declare all or any of such provisions to be so applicable, together with, or subject to, those of any local law for the time being in force.

Chapter VI: Of Exchanges.—This chapter will supply a distinct defect in the Contract Act. We would define "Exchange," not as an agreement, but as the fulfilment of an agreement by mutual transfer of dominion, and accordingly make the first section of this chapter run thus:—

"When two persons mutually transfer the ownership of one thing for the ownership of another, neither thing or both things being money only, the transaction is called an 'exchange.'

A transfer of property in completion of an exchange can be made only in manner provided for the transfer of such property by sale."

The effect of this will be to render a registered assurance necessary in the case of an exchange of land worth one hundred rupees or upwards. Here again we have borne in mind the expediency of rendering the system of transfer of immoveable property as far as possible a system of public transfer.

We think the clause (section 77) relating to the right of a party evicted from a thing received in exchange should be made subject to a contract to the contrary.

In accordance with the suggestion of a distinguished Native lawyer, Srínivása Rao, we recommend the insertion here of a chapter on Gift *inter vivos*, saving of course the rules of Muhammadan law on this subject. We have framed some sections on this subject which will be found in chapter VII of the revised draft of the Transfer of Property Bill annexed to this Report. They define "gift": they show how a transfer must be effected for the purpose of making a gift (*a*) of immoveable property and (*b*) of moveable property: they require registration in the case of gifts of immoveable property of whatever value (Act III of 1877, section 17, clause *a*), and in the case of gifts of moveables, whenever the property given is not delivered: they provide a rule as to the effect of giving benefits to the persons attesting gifts of land: they declare that a gift comprising both existing and future property is void as to the latter, and that a gift of a divisible thing to two or more donees, of whom one does not accept it, is void as to the interest which he would have taken had

he accepted it. They show when a gift may be suspended or revoked. They exempt the donor from warranty. They deal, finally, with onerous and with universal gifts. Gifts of one's whole property to a relation or friend are not uncommon before an execution or in anticipation of insolvency. For such cases of fraud section 53 of the revised Bill would provide when the property is land. But an universal gift may conceivably be honest and comprise moveable property. It should therefore, we think, be specially provided for.

On the Transfer of Property Bill.

Of these provisions it may be said, generally, that some have not hitherto been declared by the legislature or the Courts; but they proceed on principles already recognized. The rule declaring an universal donee liable personally for the donor's debts due at the time of the gift to the extent of the property given is not only obviously equitable but is, as we have said, required to meet a not uncommon fraud. It is also in conformity with Hindú law.

Chapter VII: Of Transfers of Debts.—We think that this chapter should be entitled "Of Transfers of Actionable Claims," and that its provisions as to charges on debts and beneficial interests in moveable property should be omitted. We would provide rules as to the application and extent of the warranty of the solvency of a debtor. We think that in India it would be expedient to declare that, as a rule, when an actionable claim is sold, he against whom it is claimed is discharged by paying the buyer the price and incidental expenses of the sale with interest from the date of payment. Lastly, we think that no judge, pleader or other officer connected with Courts of justice should be capable of buying any actionable claim falling under the jurisdiction of the Court in which he exercises his functions.

We have inserted in the repealing schedule the Statute of Uses (27 Hen. VIII, c. 10). It has no operation in the Mufassal; and in the Presidency-towns it will be inconsistent with the provisions of section 8 of the Bill as now revised.

We annex to this Report a copy (marked A) of the Bill as we have revised it.

3.—THE ALLUVION BILL.

On the Alluvion Bill.

This Bill, introduced into the Council of the Governor General on the 2nd October, 1878, has been settled by a Select Committee comprising amongst its members the Hon'ble Messrs. Evans, Thompson, Colvin, Cockerell and Thornton.

We think that this Bill should save local customs, not only in the Panjáb, but in all other territories to which it is to apply. At the same time, seeing that customs, such as *dhárdhúra*, have in a measure survived the existence of the circumstances which made them reasonable, we are of opinion that the Bill should enable all persons whose interests as riparian owners are likely to be affected by custom in any particular place, by consent to abolish the custom and place themselves under the operation of the general law. This might be effected by a registered instrument.

We would omit the definition of "owner." The Courts may safely be trusted to determine who in a given case is the riparian owner.

We would omit the first of the three definitions of "thread of the stream."

In other respects we regret that we have been unable to come to an agreement regarding this Bill. Subject to the amendments just specified and those next hereinafter mentioned, Mr. Stokes approves of the Bill as settled by the Select Committee.

He thinks that each of the provisos to sections 4 and 7 should run thus:—

"Provided that, where the land or any portion thereof forms on a site which is proved to belong to a private owner, such owner is entitled to the land or portion so formed."

This expresses the rule in the case of *Lopez* v. *Muddun Thakur*, and reverts, substantially, to the wording of the Bill as introduced to the Legislative Council. To save the rights of Government as is done by the Bill as amended by the Committee would, as appears to him, render sections 4 and 7 altogether inoperative.

On the Alluvion Bill.

He agrees with the Bombay Government and Mr. Justice Mutusámi Ayyar, that islands formed in the sea should in all cases belong to the Crown.

He thinks that, where any question arises as to the division of lands under section 4 or section 6, an appeal should be given to the Civil Courts.

For the reasons given by Mr. Ibbetson in Paper No. 32, he would, in sections 7 and 9, substitute the word "bank" for the word "frontage," and for the second clause of the rule contained in section 7 he would substitute the following:—

"Where more than one such normal can be drawn from one and the same end of any bank, and each of such normals is of different length, the shortest of such normals shall be deemed to be the including line; and where more than one of such normals, being of equal length, can be so drawn, and there is no shorter normal, the line bisecting the angle between the extreme positions of the shortest normal shall be deemed to be the including line."

He agrees with the Panjáb Government in thinking that this rule might usefully be illustrated by diagrams.

Sir Charles Turner considers that the Bill as settled by the Select Committee is defective, and where it alters, does not always improve, the law obtaining in the Presidency of Fort William. He thinks rules for the guidance of the Courts should be framed in the simplest terms, and that instances of imperceptible accretion are so rare in a land of tropical rain that they may be left to be dealt with by the Courts on a general principle sufficiently understood. He agrees that all islands formed in the sea should be declared the property of Government, but believes they will be more speedily utilized if, when connected by a ford with a shore, they are given to the owner of the shore. He would reframe the bulk of the Bill as follows:—

"Shortest ford" and "nearest land" mean respectively the ford which is shortest, and the land which is nearest, when the water is at its average height, neither swollen by flood nor shrunk by drought.

Nature and extent of rights of owners in lands regained or acquired.

Where, under the provisions of this Act, land has been regained by reason of ownership of the site, or acquired by reason of ownership of land contiguous with or proximate to such acquired land, every person having an interest in land superior to that of a tenant from year to year without right of occupancy, or a tenant-at-will, has in the land so regained or acquired an interest the same as, or similar to, the interest he had in the site or such other land, as the case may be; but nothing in this Act shall be construed to enlarge the interest of any person having an interest limited in its nature or duration in derogation of the interests of a superior landlord or reversioner.

* * * * * * * *

Re-formation of land on a site of which the surface has been submerged or carried away.

4. Where land, owned by the Government otherwise than as part of the public waste or by a private owner, is submerged by the influx of the waters of a sea, lake or river, or where its surface is by the action of such waters carried away, and the land is rendered unfit for useful occupation, the ownership thereof continues and may be transferred by operation of law or act of parties, notwithstanding such submergence or destruction of surface; and, unless in the meantime it has been abandoned, may be asserted when, by the recession of the waters, alluvial deposit or otherwise, such land again becomes fit for useful occupation.

Land gained on a site forming part of the public waste.

5. Subject to the rule declared in section 4, where, on a site forming part of the public waste, land is by any of the causes mentioned in that section rendered fit for useful occupation in any sea, lake or river,—

(*a*) if it be gained as an island separated from the shores or banks by a channel or channels not fordable at any points, it is the property of the Government:

(*b*) if it be gained as an island and the channel or channels between it and the shore or bank are fordable at any point, it belongs—

in all parts of India except the Lower and North-Western Provinces of the Presidency of Fort William in Bengal, to the Government;

in the Provinces last mentioned, to the owner of the land from which access to the island can be obtained by the ford, or, where there are more fords than one, by the shortest ford, and, as between the owners of lands from which there are fords of equal length, to such owners in equal shares:

(*c*) if it be gained as an increment to the shore or bank, it belongs to the owner of the land to which it is adjacent.

Land gained on a site not forming part of the public waste.

6. Subject to the rule declared in section 4, where, on a site not forming part of the public waste, land is by any of the causes mentioned in that section rendered fit for cultivation in a sea, lake or river—

(*a*) if it be gained, whether as an island or as an increment to the shore or bank and within the ascertainable boundaries of any estate, it belongs to the owner of such estate:

On the Alluvion Bill.

(*b*) if it be gained as an island in a sea or lake and not within the ascertainable boundaries of any estate, it belongs to the owner of the land on the shore to which it is nearest; and if different parts of it are respectively nearer to the lands of different owners, each owner is entitled to so much of the island as is nearest to his land on the shore:

(*c*) if it be gained as an increment to the shore or bank of any sea or lake and is not within the ascertainable boundaries of any estate, it belongs to the owner of the land on the shore or bank to which it is adjacent:

(*d*) if it be gained as an island in the bed of, or an increment to the bank of, a river and within the estate of the owner of the bank on the one side or the other, such estates being conterminous, but the boundary between them is not otherwise ascertainable, the middle thread of the stream in the season immediately before the land was formed shall be deemed to have been the boundary, and the land lying between the line occupied by the thread of the stream and each bank shall belong to the owner of such bank.

Land severed by inundation.

7. If land is severed by inundation, the owner retains the ownership thereof, notwithstanding such severance.

Abandoned river-beds.

8. Subject to the rule declared in section 4, where a river suddenly abandons its bed, the land thereby gained—

(*a*) if it lies in the public waste, belongs to the Government;

(*b*) if it lies within the ascertained boundaries of an estate, to the owner of such estate;

(*c*) if it lies within the estate of the owner of the bank on the one side or the other, such estates being conterminous but the boundary is not otherwise ascertainable, the middle thread of the stream in the season preceding the abandonment of the bed shall be deemed to have been the boundary, and the land lying between the line occupied by the thread of the stream and each bank shall belong to the owner of that bank.

Division of lands falling under sections 5 (*c*), 6 (*c*), 6 (*d*), and 8 between different owners on the same shore or bank.

9. Where newly-gained land falling under the rules declared in sections 5 (*c*), 6 (*c*), 6 (*d*), or 8 is adjacent to or lies in front of the lands of different owners on the same shore or bank, each of such owners is, as between himself and the others, entitled to the newly-gained land lying adjacent to or in front of his own land, and the newly-gained land shall be divided among such owners on such principles as appear to the Court equitable and consistent with the principle of the rule declared in this Act respecting the ownership of land so gained.

Revenue to be assessed on lands acquired under the Act.

Notice to be given to Collector when land becomes fit for useful occupation.

Persons liable to pay revenue or entitled to engage to be deemed to have abandoned their title to the land on failure to give notice.

10. Where land is regained or acquired by a private owner under the provisions of this Act and is not at the time assessed with revenue, it may be assessed as soon as it becomes fit for useful occupation; and if within three years after it has become fit for useful occupation the person liable to pay revenue for the same, or entitled to engage for the revenue payable in respect thereof, fails to inform the Collector of his readiness to pay the revenue (if any) payable in respect thereof, or to accept a settlement or engagement for such revenue, he shall be deemed to have abandoned his title to the land.

Dues or rent payable by sub-proprietors or tenants for lands acquired by them under section 4.

11. Where land is regained by a sub-proprietor or tenant under the provisions of section 4, and proprietary dues or rent have not been payable by him for the site thereof while unfit for useful occupation, and he is not entitled to hold the land rent-free, he shall, in respect of the land so regained, and in proportion to its extent, pay to his immediate superior in title or landlord dues or rent—

(*a*) where the rates payable by such sub-proprietor or tenant have been fixed in perpetuity—at the rates so fixed;

(*b*) where the rates have not been so fixed, but prior to the date of becoming unfit for useful occupation such sub-proprietor or tenant was entitled to hold at favourable rates—at such rates;

(*c*) and in any other cases—at such rates as are paid by sub-proprietors or tenants (as the case may be) of a similar class for land of a similar character and subject to the same conditions in the neighbourhood.

Dues or rent payable by sub-proprietors or tenants for lands acquired under section 5 or 6.

12. Where land is acquired by a sub-proprietor or tenant under the provisions of section 5 or 6, and the site thereof is not included in his original holding, nor are proprietary dues or rent paid by him for such site, unless such holding be rent-free, he must pay to his immediate superior in title or landlord, in respect of such newly-acquired land and in proportion to its extent, dues or rent (as the case may be) at the rates payable in respect of his original holding.

13. If any sub-proprietor or tenant entitled to any land under the provisions of this Act shall for three years after the same has become fit for useful occupation fail to inform his immediate superior in title or landlord of his intention to take such land and of his readiness to pay for such land such dues or rent as may be payable under this Act in respect thereof, he shall be deemed to have surrendered his rights thereto. Such surrender shall not defeat the title of any inferior proprietor or tenant who has given notice under this section to the person to whom he is required to give the same.

Omission of sub-proprietor or tenant to notify intention to take land to which he is entitled under the Act.

14. All land and islands formed, and all river-beds abandoned, under the circumstances mentioned in this Act and which are not by this Act declared to belong to private owners, are the property of the State, and any such land, island or abandoned river-bed which has not for three years after it has become fit for useful occupation been occupied by a person declared by this Act entitled thereto shall lapse to the Government.

Right of Government to land not hereinbefore provided for or unoccupied for a certain period.

15. The Local Government may for the purposes of this Act, from time to time, declare—

with reference to any river, at what season in the year, and with reference to any tidal river, at what time of the tide, the average height shall be ascertained; and

with reference to any tidal river, where, for the purposes of this Act, the river shall be deemed to end and the sea to begin.

Power to declare season at which average height of a river shall be ascertained and where river ends and sea begins.

Every declaration made under this Act shall be published in the official Gazette, and have thereupon the force of law; and no such declaration shall be altered or cancelled save with the previous sanction of the Governor General in Council."

In section 11 of the Bill he would substitute, in clause (*c*), the word "boundaries" for "area," and the word "have" for "has;" and he would add to clause (*b*):—

"or, where such right has been, immediately before any alteration in the shore or bank, enjoyed, the free access of the public to the waters of a lake, sea or river, or the free passage of cart, horse or foot-traffic along the shores or banks; and such right shall subsist notwithstanding any alteration of the shore of a sea or lake, or the bank of a river, from the causes mentioned in this Act, and be exercised in such a manner as to secure to the public as far as possible the convenience theretofore enjoyed."

He would also add to clause (*g*)—

"where such power has been heretofore enjoyed."

Mr. West thinks the Bill should provide as follows:—

"The bed of the sea, of lakes below the ordinary dry-weather level of the water, of tidal rivers and of rivers capable of use for navigation or traffic belongs, in the absence of private interests acquired by grant or prescription, to the Government.

The bed of any other river or stream may be presumed to be the property of each riparian owner as to the space lying between his frontage and the mid-thread of the stream.

Explanations.—'Frontage' means the line described by the edge of the water at its medium height. 'Mid-thread' means the middle line between opposite frontages.

The up-stream and down-stream boundary of property in the bed is to be ascertained by drawing perpendiculars from the extremeties of the frontage to the mid-thread.

Where two or more equal perpendiculars shorter than all others can be drawn, the boundary is the line bisecting the greatest angle contained by them.

Where the mid-thread is a curved line, the perpendicular lines are to be drawn to lines tangential to the curve where such perpendiculars strike the mid-thread.

The bed of a lake not being the property of Government may be presumed to belong to the riparian owners according to the following rules:—

(*a*) In the case of an inlet whose length landwards exceeds its breadth, the middle line between the opposite frontages is to serve as the mid-thread of a stream up to a point where the prolongation of such line to the shore equals the perpendiculars drawn to the line from the opposite frontages.

(*b*) Land intersected by any line drawn from such point perpendicular to the general line of the shore belongs to the owner of the frontage struck by it.

(*c*) Where the two rules would give different boundaries between contiguous properties, the latter is to prevail.

(*d*) In other cases the boundary-line between properties having contiguous frontages is the shortest line that can be drawn from the point at which they meet to the line described by the edge of the water at the ordinary dry-weather level, disregarding slight inequalities.

(*e*) If two or more such lines be equal, the boundary is the line bisecting the greatest angle contained between such equal lines.

(*f*) Where the conformation of the lake prevents the application of the foregoing methods, the boundary towards the lake of properties having contiguous frontages is a line drawn from the point where they meet so as to be continually perpendicular to the edge of the water as it recedes to the ordinary dry-weather level.

If land is severed or submerged by water, the ownership thereof and of its site, if capable

of identification, remains unchanged until expressly or impliedly abandoned, or the acquisition thereover of new rights inconsistent with such ownership.

Land formed by natural causes on any site belongs to each owner thereof for his interest therein.

Exception.—Land which can be identified as belonging to a property whence it has been carried away by avulsion and cast on another may at his option be taken away by the owner of the former property.

Imperceptible accretions to riparian land, and accretions to such land to which no superior claim is asserted, belong to each owner of such land for his interest therein.

Where a river is divided into channels by an island, an owner of property in such island, having a frontage on a channel, is a riparian owner with reference to owners of contiguous properties and to owners of property on the opposite bank of the river, and, as between such owners, the dividing channel only is to be deemed the river or stream.

In the districts wherein Regulation XI of 1825 is in force, and in the districts wherein the interests, rights and duties arising from formations or diminutions of land, from the submergence of land, or from its exposure by the recession of water, are governed by any customary or other local law, such Regulation and such law shall, as to all matters provided for by the same, continue in force notwithstanding anything in this Act contained.

The owner of any property abutting on, or extending into, the sea or a river or lake may apply to the Local Government to determine by survey and enquiry the proper boundary of his property, to set up proper land-marks, and to make correct plans for the said boundary with reference to known permanent objects. One of such plans shall, when the survey has been made by the person appointed by Government, be deposited in the office of the Collector, and one shall be registered by such owner, with a declaration that his ownership extends to the boundary thereby defined. After the lapse of one year without a suit to contest their correctness, such plan and declaration shall be conclusive evidence of the boundary.

Should any person deem himself injured or likely to be injured by such proceedings he may, within one year from the registration aforesaid, bring a suit for the rectification of the boundary, which shall in such case be determined according to the result of such suit; and new plans, in case of variance, shall be deposited by the person interested in the office of the Collector, and shall be registered by such person.

Such plan shall be conclusive of the boundary as between the parties to the suit. As to other persons, it shall be conclusive, unless within one year from its registration a suit is brought for a rectification of the boundary as therein defined. To any such suit the preceding section shall apply.

The expenses of the surveys hereinbefore contemplated must be defrayed by the person calling for or requiring the same, according to such rules as the Local Government may prescribe.

The Local Government, after giving public notice, may of its own accord and at the public expense make a survey of any such boundary as aforesaid; and the plans and declaration corresponding to the result may be deposited and registered by the Collector or other officer authorized on that behalf, with the like consequences and subject to the same proceedings as in the case of a private person.

The Local Government may make rules for giving effect to this Act, which, when published in the Government Gazette, shall have the force of law.

The Local Government may appoint officers either generally or specially for carrying out the provisions of this Act.

No owner of land submerged by a (lake or) river capable of use for navigation or traffic shall be at liberty, while such land is covered with water so as to be included in the bed of the stream, to occupy or make use thereof in any way which may prevent or impede the use of such river for navigation, traffic or other usual purposes. All legal regulations as to navigation, the use of the water, and of the bed of the stream, applying to a river generally, shall apply equally to those places where it flows over land which is private as to those where it flows over public property.

A custom inconsistent with this Act shall be abrogated by disuse for twelve years, or, as to any village or town, at the request of a majority of the riparian owners with the assent of the Local Government.

Section 11, clause (*a*) of Bill, extended so as, when a riparian owner is entitled to alluvion in virtue of his estate, to give it to him according to (or for) his interest in such estate."

4.—THE MASTER AND SERVANT BILL.

We think that this Bill not only fills up a distinct gap in the system of Indian jurisprudence, but will tend in practice to prevent misunderstandings and consequent ill-feeling and litigation between Master and Servant; and its rules as to notice will preclude much uncertainty on the part of the Courts. We are of opinion, with Savigny (*System d. h. R. Rechts*, s. 55) and other jurists, that the law of hired service should be dealt with as part of the law of persons rather than as a branch of the general law of contract. The relation of

On the Master and Servant Bill.

master and servant, though, like marriage, it arises from contract, yet when once constituted involves rights and duties of a kind essentially different from those arising on a sale of timber or wool. They are but partially amenable to strict regulation, and the peculiar relation of the parties specializes and limits, while it justifies, a particular sanction and jurisdiction for enforcing the reciprocal duties that arise from it. We, therefore, all approve of the inclusion of the Acts empowering Magistrates to deal punitively with artisans who have received advances and with workmen employed on public works. We recommend the omission of the sections in their present form giving Magistrates jurisdiction in disputes between masters and domestic servants. They are not, in our opinion, open to the objections taken by an eminent critic; but they might, we think, have occasionally caused hardship. Sir Charles Turner would put nothing in the place of these sections. His reasons are fully stated in a note appended to this Report. But breaches of contract seem proper subjects for penal legislation when committed by persons from whom it is impossible to recover damages. For this and the other reasons given in the Statement of Objects and Reasons, Mr. Stokes and Mr. West are of opinion that selected Magistrates ought to have a summary power to enforce the servant's principal duties. The complaints should be made promptly and by the head of the household. The punitive jurisdiction should be exercised only in extreme cases, and means should be secured for an effective review. On the other hand, a domestic servant should have a simple, cheap and speedy remedy against a a master who wrongfully discharges him or withholds his wages. To attain these ends, they propose the following sections :—

"22. If a domestic servant commits any of the following offences—

Complaint by master.

(*a*) wilfully and wrongfully fails to enter into his master's service,

(*b*) wilfully and wrongfully absents himself therefrom,

(*c*) wilfully disobeys any order which as a domestic servant he is bound to obey,

(*d*) does anything with the intention of causing wrongful gain or wrongful loss to his master,

(*e*) wilfully damages his master's property,

(*f*) intentionally insults, and thereby gives provocation to, any person to whom he is bound, as a domestic servant, to be respectful, intending, or knowing it to be likely, that such provocation will cause such person to break the public peace or to commit any other offence,

his master, or the person having control of his master's household, may, within fifteen days of the date on which such offence is committed, make a complaint of such offence to a Magistrate having jurisdiction in the case.*

Explanation.—Nothing is an offence under this section where the harm thereby caused, or intended to be caused, or known to be likely to be caused, is so slight that no person of ordinary sense or temper would complain of such harm.

"23. The Magistrate shall examine the complainant on oath, and if after such examination there is, in the Magistrate's opinion, no sufficient ground for proceeding, he may dismiss the complaint. But if, in the Magistrate's opinion, there is sufficient ground for believing that the servant has committed any offence mentioned in section 22, he shall issue his summons, or, if for reasons to be recorded by him it appears necessary, his warrant, for causing the servant to appear or to be brought at a certain time and place before him.

If the Magistrate convicts the servant of any offence triable under this section, he may by a certificate signed by him with his name of office, discharge the servant from the service of his master, and the master from all or any obligations to the servant. But if, in the opinion of the Magistrate, such discharge will not be a proper or adequate punishment, he may, after recording the facts proved and the grounds of his judgment, sentence the servant to imprisonment in the civil jail for a term which may extend to one month, or to fine which may extend to fifty rupees, or to both.

When the servant is a male under sixteen years of age, the Magistrate may sentence him to whipping in lieu of the fine or imprisonment aforesaid.

"24. If a master wrongfully discharges a domestic servant or fails to pay his wages for a period of more than fifteen days from the time when they become payable, the servant may, within three months of the date of such discharge or the expiration of such period, make complaint of the facts to a Magistrate having jurisdiction in the case.

Complaint by servant.

The Magistrate shall examine the complainant on oath, and if after such examination there is, in the Magistrate's opinion, no sufficient ground for proceeding, he shall dismiss the complaint. But if, in the Magistrate's opinion, there is sufficient ground for believing that the master has been guilty of the act or omission complained of, he shall issue his summons for causing the master to appear at a certain time and place before him.

* He will be, in the Presidency-towns, a Presidency Magistrate, and elsewhere a Magistrate of the first or second class specially empowered by the Local Government.

On the Master and Servant Bill.

If the complaint is proved, the Magistrate shall order the master to pay to the servant such sum not exceeding one hundred rupees as the Magistrate thinks reasonable compensation for such discharge or failure, together with the wages, if any, due to the servant, and, in case of non-payment of the amount so ordered to be paid, may levy the same as if it were a fine.

25. In the trial of cases under section 23 or section 24, the Magistrate shall be guided, in the towns of Calcutta, Madras and Bombay by the rules contained in the Presidency Magistrates' Act, 1877, sections 114 and 237, and elsewhere by the rules regulating the trial of summons-cases. He may make such order as he thinks fit in regard to the costs of the summons or warrant.

Procedure.

26. If any complaint under section 22 or section 24 is, in the opinion of the Magistrate, frivolous or vexatious, the provisions of the Code of Criminal Procedure, section 209, or (in the said towns) of the Presidency Magistrates' Act, 1877, section 242, shall, *mutatis mutandis*, apply."

Frivolous or vexatious complaints.

We agree with the Chief Commissioner of British Burma that the Bill should extend to the whole of British India. Where, as in Burma, most of the domestic servants come from Madras or Bengal, a law with which they were unfamiliar might be held sometimes *in terrorem* over their heads in order to make them submit to unjust treatment, and false and exaggerated reports gaining currency might seriously interfere with the supply of such servants. Provisions corresponding with Acts XIII of 1859 and IX of 1860, which confer magisterial jurisdiction over artizans and others who have received advances, and over workmen employed on public works, may now, we think, be made generally applicable. Both Acts have worked beneficially in large portions of the country. They have been tested by twenty years' experience; and, while the High Courts do their duty, they cannot be made a means of oppression. But we think that the section corresponding with Act XIII of 1859 should not extend to cases where the advance has been worked out or duly expended.

We are of opinion that the following minor changes should be made in the Bill.

We think that the clause (section 11) relating to the servant's obligation to be obedient should run thus: "He must obey all reasonable orders relating to his employment given by his master or by any person to whom the master has expressly or impliedly delegated power to give such orders."

We would omit the clause (section 11, clause *l*) imposing on a domestic servant the duty, on being so required, to accompany his master to any place not more than one hundred miles from the place where he entered the service. Considering the very various classes of persons included under the expression "domestic servant," it would be impossible to frame a rule on the subject which would not often give rise to hardship; and we think the matter may properly be left to arrangement in each case.

Where a servant is disabled by illness from performing his duty, he should provide at his own expense a substitute satisfactory to his master; but this rule should not in our opinion apply where the illness arises from injury received in the course of his employment.

We would not allow a master in every case to discharge without notice a servant for habitual idleness, for being declared an insolvent, or for theft, rape or adultry while in the master's service; but we think he should have that power in the case of a single instance of the servant's intoxication or insolence, or gross negligence in the performance of his duties, and also where the master discovers that the servant has been guilty of misconduct, before or after the commencement of his service, implying a defect in character which unfits him for such service.

We would omit the two sections (14, 15) dealing respectively with the master's right to sue third persons for compensation for loss of service and with the effect of a servant's contributory negligence. They will find their proper place in the Code of Torts or Actionable Wrongs, which we think should be undertaken without delay. We would retain the section dealing with the servant's right to compensation for breach of the master's duties.

We would confine the master's obligation (section 17, clause *j*) to provide fellow-servants of ordinary care and reasonable skill to cases where the service is a work of danger.

On the Master and Servant Bill.

Mr. West is of opinion that the power of moderate chastisement may properly be delegated to the masters of minor servants by their parents or guardians. It will, he thinks, save boys from sudden dismissal and loss of character at an age when remote consequences cannot be appreciated by them; it is the only kind of discipline to which young and rude natures are amenable: under section 29 of the revised Bill an apprentice is subject to chastisement; and the omission of the power, so guarded as it is, may do an injury to many Native boys by preventing masters who know what boys are from employing them. It is a discipline to which virtually every English boy in a like situation and under the like circumstances is subjected—and on the whole for his good. The instances in which boys suffer any ill usage at the hands of their employers are so rare that they may be almost excluded from consideration in framing a general rule. Mr. Stokes and Sir Charles Turner, on the other hand, consider that in this country it would be inexpedient for the legislature to sanction the employment of violence by a master on any servant.

Mr. West would expressly forbid the servant to receive, without his master's consent, any premium or commission from any other person on account of any business or transaction in which he has dealt with such person as his master's agent. The prevalence of the dishonest practice at which this rule is pointed is, in his opinion, a reason for its introduction, not for its omission.

Mr. West would extend the section (27) empowering Magistrates to deal summarily with disputes between employers and their workmen employed on public works to cases where those works are on account of a municipality. In such cases, owing to the large number of persons employed, the settlement of disputes by the ordinary civil process might, in his opinion, well occupy the whole time of the employer and bring the works to a standstill. At the same time such disputes as arise are, legally, of the simplest character. Mr. Stokes and Sir Charles Turner do not consider the proposed extension desirable. We all think that the amount awarded under this section should (as is the case under Act IX of 1860) be recoverable only by distress and sale of the defaulter's moveable property.

We doubt whether the presumption in section 6, clause (*d*), that artizans and workmen are hired for no specific term, is justifiable in some parts of India, and we suggest that special inquiry on this point be made of the Local Governments. We would also suggest for consideration that the Bill should contain a rule that an artizan or workman breaking off in the middle of a day should forfeit that day's wages unless hired by the hour, and that, conversely, a master dismissing an artizan or workman in the middle of the day should pay him that day's wages.

We have considered the question raised by the first draft of the Bill, as to whether a compulsory system of registering domestic servants should be introduced by imperial legislation. We are, on the whole, opposed to such introduction. It may be that in some places registration is desirable, if not absolutely necessary; but where the expediency of legislation in this direction is recognised, the end should, in our opinion, be sought by municipal regulations under local laws.

Lastly, we would repeal and re-enact, as part of the Bill, the substance of Act XIX of 1850 (*for the binding of Apprentices*). We make this recommendation partly because the subject is intimately connected with the law of Master and Servant, partly because we think it desirable that the provisions of the Apprentice Act should now be revised with reference to the changes produced by recent legislation and by the establishment in India within the last thirty years of railway-workshops, factories and steam-packet companies. We would, for example, suggest that the provisions of that Act, as to depositing contracts of apprenticeship in the Magistrate's Court or the offices of persons appointed under Act X of 1841 to register ships, might now be modified so as to require deposit in the ordinary registration-offices.

We annex to this Report a copy (marked B) of the Bill as we have revised it.

5.—THE EASEMENTS BILL.

On the Easements Bill.

We concur in the opinions expressed by Sir Michael Westropp, Mr. Justice Jackson and Mr. Justice Innes that it is desirable to codify the law on this subject, which is now (to quote the Chief Justice of Bombay) "for the most part to be found only in treatises and reports practically inaccessible to a large proportion of the legal profession in the Mufassal and to the subordinate judges". We also agree with Mr. Justice Elsmie, that the frequent litigation in the case of urban easements is largely due to the fact that neither the people themselves nor the majority of the Courts understand the principles upon which such disputes should be determined.

The chief objections taken to the Bill are that, by informing people of their rights, it will provoke litigation, and that it will abolish or otherwise interfere with easements recognized only by local usage. The former objection, if valid, is an objection to all positive law declaring rights, and, in a less degree, to every decision of a Court of justice which enunciates a general rule respecting rights. But it is matter of ordinary experience that people are more prone to bring or resist claims to doubtful than to certain rights; that, in other words, litigation is promoted by doubt as to what is, and what is not, a right recognised by the Courts of justice. By its explicit declarations of the law on points now held doubtful by the people, the Bar and the Judges of the Subordinate Courts, the Bill appears to us calculated to check, rather than increase, litigation. As to the latter objection, that the Bill will interfere with local usage, we have been unable to find in the papers submitted to us a single instance of a right in the nature of an easement that would have been affected *in malam partem* by the Bill; and we strongly suspect that many of its critics have confounded rights in gross with easements properly so-called. Easements, being restrictions on the free use of property in others, are regarded with disfavour by the law; and section 7 of the Bill was accordingly framed so as to state the fact that all easements are in derogation of certain natural rights and to prevent attempts to create new kinds of easements. It enumerated the rights of one or other of which every easement must be a restriction, and thus intentionally excluded every kind of servitude not now known to the law. This, however, has been objected to on the ground that there may be in some parts of India rights not so enumerated. We admit the possibility, though not the probability, of the existence of such rights; and we recommend that section 7 should be modified as follows:—

"Easements are restrictions of one or other of the following rights (namely):—

(*a*) the exclusive right of every owner of immoveable property (subject to any law for the time being in force) to enjoy and dispose of the same, and all products thereof and accessions thereto, as he thinks fit;

(*b*) the right of every owner of immoveable property (subject to any law for the time being in force) to enjoy, without disturbance by another, the natural advantages arising from its situation.

Illustrations.

(*a*). The exclusive right of every owner of land in a town to build thereon, subject to any municipal law for the time being in force.

(*b*). The right of every owner of land that the air passing thereto shall not be unreasonably polluted by other persons.

(*c*). The right of every owner of a house that his physical comfort shall not be interfered with materially and unreasonably by noise or vibration caused by any other person.

(*d*). The right of every owner of land to so much light and air as pass vertically thereto.

(*e*). The right of every owner of land that such land, in its natural condition, shall have the support naturally rendered by the subjacent and adjacent soil of another person.

Explanation.—Land is in its natural condition when it is not excavated and not subjected to artificial pressure, and the 'subjacent and adjacent soil' mentioned in this illustration means such soil only as in its natural condition would support the dominant heritage in its natural condition.

(*f*). The right of every owner of land that, within his own limits, the water which naturally passes or percolates by, over or through, his land, shall not, before so passing or percolating, be unreasonably polluted by other persons.

(*g*). The right of every owner of land to collect, and dispose within his own limits of, all water under the land and all water on its surface which does not pass in a defined channel.

(*h*). The right of every owner of land that the water of every natural stream which passes by, through or over, his land in a defined natural channel shall be allowed by other persons to flow within such owner's limits without interruption and without material alteration in quantity, direction, force or temperature: the right of every owner of land abutting on a natu-

On the Easements Bill.

ral lake or pond, into or out of which a natural stream flows, that the water of such lake or pond shall be allowed by other persons to remain within such owner's limits without material alteration in quantity or temperature.

Explanation.—A natural stream is a stream, whether permanent or intermittent, tidal or tideless, on the surface of land or underground, which flows by the operation of nature only and in a natural and known course.

(*i*). The right of every owner of upper land, that water naturally rising in or falling on such land, and not passing in defined channels, shall be allowed by the owner of adjacent lower land to run naturally thereto.

(*j*). The right of every owner of land abutting on a natural stream, lake or pond, to use and consume its water for drinking, household-purposes and watering his cattle and sheep; and the right of every such owner to use and consume the water for irrigating such land, and for the purposes of any manufactory situate thereon, provided that he does not thereby cause material injury to other like owners."

Should, for instance, a 'natural right' to lateral access of light or air, or to the non-diminution of the supply of fish, be hereafter established in any part of India, the section as now modified will not exclude an easement in derogation of such right. We are aware that section 7, even in its new form, may operate indirectly as a statutory recognition of various rights connected with the ownership of land. But a definite conception of these is a necessary preliminary to the codification of the law of actionable wrongs, and we see no substantial objection to inserting it for the present in a Bill dealing with restrictions of the rights in question.

We would also insert the following section :—

"19. An easement may be acquired in virtue of a local custom. Such easements are called customary easements.

"*Illustrations.*

"(*a*) By the custom of a certain village, every cultivator of village-land is entitled, as such, to graze his cattle on the common pasture. A, having bought a plot of uncultivated land in the village, breaks up and cultivates that plot. He thereby acquires an easement to graze his cattle in accordance with the custom.

"(*b*) By the custom of a certain town no owner or occupier of a house can open a new window therein so as substantially to invade his neighbour's privacy. A builds a house in the town near B's house. A thereupon acquires an easement that B shall not open new windows in his house so as to command a view of the portions of A's house which are ordinarily excluded from observation, and B acquires a like easement with respect to A's house."

And to the first section of the chapter containing the rules as to the incidents of easements, we would add the following sentence : "And when any incident of any customary easement is inconsistent with such rules, nothing in this chapter shall be deemed to affect such incident."

The other amendments which we would recommend are comparatively unimportant.

We would modify the clause (section 2) saving Government-rights to regulate distribution of water, so as to avoid stating positively that the Government has such rights in the case of all rivers and streams flowing in natural channels. It is true that the preamble to the Northern India Canal and Drainage Act, 1873, contains a statement to that effect ;* but the correctness of that statement is open to doubt, and in any case it applies only to the North-Western Provinces, the Panjáb, Oudh and the Central Provinces. We would extend the clause so as to save any right of Government to regulate the collection and retention of the water of such rivers and streams, and the collection, retention and distribution of water flowing, collected, retained or distributed in or by any channel or other work constructed at the public expense for irrigation.

We would expressly save rights in gross possessed by the Government or public, and rights acquired or arising out of relations created before the proposed Act comes into force.

We would add to section 6 an illustration showing that an easement to restrain interference with privacy is recognised by the Bill, and is a negative easement. Such an easement, founded as it is on the oriental custom of secluding females, is of much importance in India : it is recognised generally in the countries whose system is founded on the Civil Law ; and the decisions of the High Courts adverse to such a right should not, we think, be followed by the legislature.

* This preamble is identical with the preamble to Act XXX of 1871. Sir James Stephen says that he always understood that this "was one of the parts of that Act which was most strongly objected to and one of the principal causes of its being disallowed by the Secretary of State." As a matter of fact, the preamble was not objected to, and the reason of the disallowance was that the Act contained six sections (44 to 49) providing for the levy of a special water-rate on lands irrigable but not irrigated.

On the Easements Bill.

We think it would be well to add to the section (10) dealing with the power of lessors and mortgagors to impose easements a clause declaring that no lessee or other person having a derivative interest may impose on the property held by him as such an easement to take effect after the expiration of his own interest or in derogation of the rights of the lessor or the superior proprietor.

For the provisions of the Bill (section 11) relating to the acquisition of easements by lessees, we would substitute the following : "No lessee of immoveable property can acquire, for the beneficial enjoyment of other immoveable property of his own, an easement in or over the property comprised in his lease."

We think that easements of necessity, strictly so-called, should be separated in section 12 from those apparent and continuous easements which arise when a transfer is made, which are necessary for enjoying the thing transferred, or other immoveable property of the transferor, as it was enjoyed when the transfer took effect.

When the person entitled to set out a way of necessity refuses or neglects to do so, we think the dominant owner should be entitled to set it out. The second paragraph of section 13 declares that a way of necessity cannot be varied save with the consent of both dominant and servient owners, or unless the servient owner renders it impassable. We have struck out this paragraph, as Mr. West thinks it opposed to Indian rural economy and convenience, on account of periodical fallows of parts of the same land, of crops sown and growing at different times, and of the great temporary changes arising from the extremes of wet and dry weather making a strict adherence to the same road in all seasons in many instances almost impossible.

In the section (15) relating to the acquisition of easements by prescription (which with the exception of the clause relating to easements of support, has been the law of the land since 1871),* we would restore the words "and as of right" to the clause dealing with the access and use of light and air. Under the English Prescription Act, a claim to an easement is defeasible if the easement can be shown to have been enjoyed by express agreement in writing, and we think that the following explanation should be inserted in the Indian law :

"Nothing is an enjoyment within the meaning of this section when it has been had in pursuance of an agreement with the owner or occupier of the property over which the right is claimed, and it is apparent from the agreement that such right has not been granted as an easement, or, if granted as an easement, that it has been granted for a limited period, or subject to a condition on the fulfilment of which it is to cease."

With reference to the decision in *Angus* v. *Dalton*, L. R. 3 Q. B. 85, we think that the following explanation might usefully be inserted :

"In the case of an easement of support, where the soil of the dominant heritage is subjected to an artificial pressure not externally apparent, or where the outward thrust of things affixed thereto is enhanced by causes not externally apparent, the said period of twenty years begins when the circumstance by which the burden on the servient heritage is increased becomes known to the servient owner."

We have struck out section 18, which declares that no right to an easement can be acquired by long and continued possession, except under section 15. It was intended to abolish prescription at common law, which has been held to exist in the Presidency-towns. But it appears to be unnecessary, and might possibly mislead in the case of rural easements special to India or to particular districts, and not included amongst those enumerated in section 15, or not readily yielding to the conditions imposed by that section.

We think that the provision (section 29) as to the extent of an easement where the dominant heritage is increased by alluvion or diminished by diluvion should run thus :

"Where an easement has been granted or bequeathed so that its extent shall be proportionate to the extent of the dominant heritage, if the dominant heritage is increased by alluvion, the easement is proportionately increased ; and if the dominant heritage is diminished by diluvion, the easement is proportionately diminished."

It appears to us that the section (45) relating to the extinction of an easement by alteration of the dominant heritage should be thus worded :

* See Act No. IX of 1871, section 27 = 2 & 3 Will. IV, c. 71, secs. 2, 3.

On the Easements Bill.

"An easement is extinguished—

(*a*) where the dominant heritage is substantially changed and it is not proved that the easement was intended to continue annexed thereto notwithstanding such change; or

(*b*) where by any change in the dominant heritage, the burden on the servient heritage is materially increased and cannot be reduced to its original limits, and it is not proved that the burden was intended by the parties to be subject to increase by such change."

As to the extinguishment of easements by non-user (section 59), we think that a distinction may properly be drawn in this respect between continuous and discontinuous easements, and that in the case of a discontinuous easement the dominant owner should be enabled to keep it alive by registering a declaration of his intention to retain it.

Though fully recognizing the propriety of the rule (section 52) that the servient owner has no right to require that an easement should be continued, we think, nevertheless, that the dominant owner ought not to be allowed to damage the servient heritage by suddenly and maliciously abandoning or suspending the easement. We recommend, then, that the rule should be, that the servient owner is not entitled to compensation for damage caused by the abandonment or suspension, if the dominant owner has given him such notice as will enable him, without unreasonable expense, to protect the servient heritage.

We think that the Bill may properly be supplemented by a chapter on Licenses, which, though mentioned in the Evidence Act, sections 116, 117, are nowhere dealt with in the body of Indian codified law; and we have framed rules on this subject which we think will be useful.

We annex to this report a copy (marked C) of the Bill as we have revised it, Mr. West, however, desiring it to be understood that the details of the measure should, in his opinion, be open to revision according to the further information which may become available to the Legislature by the time the Bill is before it.

6.—THE PRIVATE TRUSTS BILL.

On the Private Trusts Bill.

It seems to us that this Bill, especially the chapter dealing with constructive and resulting trusts, will supply a real defect in the codified law of India, and be of practical utility to the Mufassal Courts and pleaders. We have duly considered the remarks of Sir James Stephen on the ambiguity of the word "trust" as understood by English lawyers. But we are unable to agree that they constitute an argument of any weight against the Bill, or that its enactment will introduce the serious evils that he anticipates. Cases frequently arise in which in one sense there has been a trust, though not in the sense to which the Bill confines it. Pleaders having got hold of the word "trust," then build upon it arguments drawn from the English books which may well mislead Judges who are not more than usually circumspect. This must go on until legislation regulates this branch of the law. By saying what is a "trust" and which of the relations arising from it amongst those recognized by the English Courts are to be admitted and which not, the Legislature will obviate the very evil which Sir James Stephen fears. The Courts are introducing, and from the necessities of the case must introduce, the English Law of Trusts indiscriminately, unless the law distinctly says how far they may go. Trusts created by an old man for his own maintenance and ulterior purposes, for a widow, for a daughter, stepdaughter or daughter-in-law and her children, are of pretty frequent occurrence among the Natives of India; and it is desirable to keep them free from the complication of double estates, in which without the intervention of the legislature they are certain to become entangled. We need hardly say that the system of *benámi*, or the enjoyment of the profits of property held by another in trust for the beneficiary, was familiar to the people of India before the introduction of British rule, and in no country, owing to the extreme subdivision of immoveable property and the partition of inheritances, are constructive trusts more common. Gains made by one person at the cost of another are an every-day source of litigation: these cases must be dealt with in some way; and here, too, definite legislation will clear and simplify the law. But, apart from the Native property-holder, there is the large body of domiciled Europeans and Eurasians who have for nearly a century enjoyed and

On the Private Trusts Bill.

taken advantage of a trust-law recognized by our Courts; and, now that the number and wealth of this class have increased, and every Court in the country may be called upon to administer a trust-law, the question of the advisability of its codification seems no longer open to discussion.

Chapter I: Preliminary.—We would expressly exclude from the operation of the Act private religious or charitable endowments (which may fitly be left to family or local usage); and we would declare that nothing in its second chapter (*Of the Creation of Trusts*) shall apply to trusts created before it comes into force.

To avoid the conceivable risk of confounding trusts with bailments, we recommend that the definition of "trust," which was taken from the New York Civil Code, should be modified as follows: "A 'trust' is an obligation annexed to the ownership of property, and arising out of a confidence reposed in and accepted by the owner, or declared and accepted by him, for the benefit of another, or of another and the owner." And in order to prevent the possible introduction by pedantic lawyers of conceptions resembling the English legal estate and equitable ownership, we would define the "beneficial interest" of the beneficiary as his "right against the trustee as owner of the trust-property." The beneficiary should, in our opinion, have no estate or interest in the subject-matter of the trust.

We think that the definitions of "passive trust," "active trust," "executed trust" and "executory trust" are unnecessary and should be omitted.

We would extend the definition of "notice" so as to cover cases where information is given to, or obtained by, an agent under the circumstances mentioned in the Indian Contract Act, 1872, section 229.

Chapter II: Of the Creation of Trusts.—We would provide expressly in section 4 that, where a trust is created for two purposes, of which one is lawful and the other unlawful, and the two purposes cannot be separated, the whole trust is void.

We agree with the framer of the Bill as to the expediency of excluding oral declarations of trust in every case where land forms the subject-matter: but we think that the requisite written declaration may be signed by the trustee as well as by the author of the trust; and we are of opinion that, unless the trust is declared by will, or the author is himself the trustee, the property should be actually transferred. We would, therefore, make the sections relating to the declaration and creation of trusts run as follows:—

"5. No trust in relation to immoveable property is valid unless declared by a non-testamentary instrument in writing signed by the author of the trust or the trustee and registered, or by the will of the author of the trust or the trustee.

"No trust in relation to moveable property is valid unless so declared, or unless the ownership of the property is transferred to the trustee.

"These rules do not apply where they would operate so as to effectuate a fraud.

"6. Subject to the provisions of section five, a trust is created when the author of the trust indicates with reasonable certainty, by any words or acts, (*a*) an intention on his part to create thereby a trust, (*b*) the purpose of the trust, (*c*) the beneficiary, and (*d*) the trust-property, and (unless the trust is declared by will or the author of the trust is himself to be the trustee) transfers the trust-property to the trustee."

We would declare that the subject-matter of every trust must be property transferable to the beneficiary; and, in order to preclude the complications that would arise from allowing a trust upon a trust, we would say that the subject-matter must not be a mere beneficial interest under a subsisting trust.

We think the Bill should provide for disclaimers by proposed beneficiaries.

Chapter III: Of the Duties and Liabilities of Trustees.—In the section (11) relating to the trustee's duty to fulfil the purpose of the trust, we would insert an explanation that the purpose of a trust for the payment of debts should, unless a contrary intention is expressed, be deemed to be to pay only the debts of the author of the trust existing and recoverable at the date of the instrument of trust, or, when such instrument is a will, at the date of his death, and in the case of debts not bearing interest, to make such payment without interest.

When a beneficiary's interest is forfeited to Government, we think that the trustee should be bound to hold the trust-property for the benefit of such person, in such manner as the Government directs.

On the Private Trusts Bill.

Chapter IV: Of the Rights and Powers of Trustees.—We think that the prohibition (section 32) as to enforcing a trustee's charge upon the trust-property for proper expenses paid out of his own pocket should not apply where the expenses have been incurred with the sanction of a principal Civil Court of original jurisdiction.

We think that the section (33) entitling the trustee to be indemnified by the gainer by a breach of trust should expressly exclude this right when the trustee has, in committing the breach, been guilty of fraud.

As to the management of the trust-property (section 36), we think that, for the purposes of the Land Improvement Act, 1871, every trustee in the actual receipt of the rents and profits of land should be deemed to be a landlord. A similar provision is contained in the English Statute 27 & 28 Vic., c. 114. We consider that, except with the permission of a principal Civil Court of original jurisdiction, no trustee should have power to lease trust-property for a term exceeding twenty-one years.

We would enable the trustee, with the permission of the Court, but not otherwise, to apply the trust-property, in whole or in part, to the advancement in life of a minor beneficiary.

Where power to deal with the trust-property is given to several trustees and one of them disclaims or dies, the Bill should, in our opinion, provide that the power may be exercised by the continuing trustees, unless, from the terms of the instrument of trust, it is apparent that the authority is to be exercised by a number in excess of the number of the remaining trustees.

Chapter V: Of the Disabilities of Trustees.—The Bill declares (section 46), in accordance with the present law, that, where there are more trustees than one, all must join in the execution of the trust, except where the instrument of trust otherwise provides. Mr. West is of opinion that the rule ought to be that, in the absence of a direction to the contrary, a majority of the trustees may act subject to control by the Court on application by the minority. We think that the section declaring that no trustee whose duty it is to sell trust-property may buy the same should be extended to the agents employed by such trustees for the purpose of the sale. Of the two alternative rules given in the Bill, as to when the trustee may buy the trust-property, we consider that printed in the text to be best adapted for India (namely):—

"No trustee, and no person who has recently ceased to be a trustee, may, without the permission of a principal Civil Court of original jurisdiction, buy or become mortgagee or lessee of the trust-property or any part thereof; and such permission shall not be given unless the purchase, mortgage or lease is manifestly for the advantage of the beneficiary.

"And no trustee whose duty it is to buy or to obtain a mortgage or lease of particular property for his beneficiary may buy it or obtain a mortgage or lease of it for himself."

Chapter VI: Of the Rights and Liabilities of the Beneficiary.—The Bill declares (section 56) that the beneficiary, if competent to contract, may transfer his interest, subject to the law for the time being in force as to the circumstances and extent in and to which he may dispose of it. Mr. West considers that the beneficiary should not be allowed to substitute a trust in favour of another for one in his own favour, without the assent of the trustee, except in the case of a passive trust.

We think that to the section (58) declaring the beneficiary's right to proper trustees, and a proper number of trustees, the following explanations may usefully be added:—

"*Explanation I.*—The following are not proper persons within the meaning of this section:

"a person domiciled abroad: an alien enemy: a person having an interest inconsistent with that of the beneficiary: a person in insolvent circumstances; and, unless the personal law of the beneficiary provides otherwise, a married woman and a minor.

"*Explanation II.*—When the administration of the trust involves the receipt and custody of the money, the number of trustees should be two at least."

With regard to the first of these explanations, we would observe that in Hindú and Muhammadan families, a minor son often succeeds to property burdened with a trust for dependent relations of his father, and a married woman is sometimes made by her father trustee for herself and her son or daughter.

Where a trustee has wrongfully bought trust-property, the beneficiary has under certain circumstances, a right to have the property declared subject to

the trust or retransferred. We think that to the section (61) embodying this rule should be added a clause saving the rights of lessees and others who, before the institution of a suit to have the property declared subject to the trust or retransferred, have contracted in good faith with the trustee or his sub-purchaser (8 B. P. C. 42), and disallowing the right to a declaration or retransfer when the beneficiary has ratified the sale to the trustee, with full knowledge of the facts of the case and of his rights as against the trustee.

On the Private Trusts Bill.

The section (62) enabling the beneficiary to follow trust-property saves transferees in good faith for consideration without notice of the trust, and a transferee for consideration (with or without notice) from such a transferee. Mr. West would also save a gratuitous transferee from a *bonâ fide* transferee for value, and a transferee *bonâ fide* for value from a volunteer.

Where the trustee wrongfully mingles trust-property with his own, we would adopt the rule given in the margin of the Bill, section 65, namely, that the beneficiary is entitled to a charge on the whole fund for the amount due to him. It accords with the decision in *Cook* v. *Addison*, L. R. 7 Eq. 471.

It seems to us that section 68 should be extended to the cases where one of several beneficiaries (1) knowingly obtains any advantage from a breach of trust, without the consent of the other beneficiaries, or (2) becomes aware of a breach, and either actually conceals it or does not within a reasonable time take proper steps to protect the interests of the other beneficiaries, or has deceived the trustee and thereby induced him to commit a breach; and that in such case the other beneficiaries should be entitled to have his interest under the trust impounded.

Chapter VII:—Of Vacating the Office of Trustee.—It seems unnecessary to require a trustee desiring to be discharged by the Court to institute a suit for that purpose. It will be enough to require him to present a petition.

We think express provision should be made for the appointment of a new trustee in place of one disclaiming, or accepting an inconsistent trust. Mr. West is of opinion that, if no provision has been made by the instrument of trust, the Court only should nominate the trustee.

Chapter VIII: Of the Extinction of Trusts.—The Bill should, we think, declare that no trust can be revoked by the author of the trust so as to defeat or prejudice what the trustees may have duly done in execution of the trust (1 Coll. 655, 659). Mr. West considers that a trust should not be allowed to be revocable except on the same terms as a gift.

Chapter IX: Certain Obligations in the Nature of a Trust.—We doubt the expediency of attempting to suppress the inveterate practice of entering into *benámi* transactions: we would point out that in many, perhaps most, of those transactions the parties are actuated by religious or prudential, rather than fraudulent, motives; and we think that, in lieu of section 78, clause (*d*), and section 81, the Bill should simply declare that where property is transferred to one person for a consideration paid or provided by another person, and it appears that such other person did not intend to pay or provide the consideration for the benefit of the transferee, the transferee must hold the property for the benefit of the person paying or providing the consideration.

We think that, in addition to the ten constructive trusts expressly set forth in the Bill, it should mention those that arise in the following cases:—

where a testator bequeaths certain property upon trust and the purpose of the trust appears on the face of the will to be unlawful, or during the testator's lifetime the legatee agrees with him to apply the property for an unlawful purpose:

where property is bequeathed, and the revocation of the bequest is prevented by coercion:

where property is transferred in pursuance of a contract liable to rescission or induced by fraud or mistake:

where any person, bound in a fiduciary character to protect the interests of another, enters into any dealings under circumstances in which his own interests are or may be adverse to those of such other person, and thereby gains for himself a pecuniary advantage:

where by the exercise of undue influence any advantage is gained, in derogation of the interests of another, without consideration or with notice that such influence has been exercised:

On the Private Trusts Bill.

where a tenant for life or other qualified owner of property, as representing all persons interested therein, gains some advantage; and, lastly,

where creditors compound the debts due to them, and one of them, by a secret arrangement with the debtor, gains an undue advantage over his co-creditors.

We think that some words should be inserted to show that a resulting trust cannot be implied in evasion of any law for the time being in force (*Ex p. Yallop*, 15 Ves. 60.)

Some of the rules applied by this chapter might conceivably be held to extend to the manager as such of an undivided family. We would therefore declare that nothing contained in the Act shall be deemed to affect the mutual relations of the members of undivided families as determined by any customary or personal law.

Mr. West is of opinion that the Bill should also provide for the following matters:—

(*a*) the constitution of trusts for alimentary provisions and the forfeiture of the interests of persons for whom such provisions have been made:

(*b*) the illegality of trusts (other than trusts for payment of debts, for keeping on foot a policy of life-insurance, or for public purposes) involving an accumulation of the proceeds of trust-property for more than twenty-one years:

(*c*) the power of a trustee to carry on a business, at the charge and risk of the beneficiaries, so far as may be necessary in order to its liquidation:

(*d*) the non-effect on the trustee's transactions of slight deviations by the trustee from his duty:

(*e*) the liability of a trustee of his own wrong, for losses and gains as well as for the trust-property.

He would also add, either to the Bill or to the Limitation Act, appropriate sections on limitation of certain suits relating to express or constructive trusts.

We annex a copy (marked D) of the Bill as (subject to the above remarks) we have revised it.

III.

Summary of recommendations.

In conclusion, we have to recapitulate briefly the specific recommendations which we have made in this report:—

(*a*) that the process of codifying well-marked divisions of our substantive law should continue;

(*b*) that the eventual combination of those divisions as parts of a single and general Code should be borne in mind;

(*c*) that the English law should be made the basis in a great measure of our future Codes, but that its materials should be recast rather than adopted without modification;

(*d*) that in recasting those materials, due regard should be had to Native habits and modes of thought; that the form which those materials should assume should, as far as possible, resemble that of rules already accepted; that, in other words, the propositions of our Codes should be broad, simple and readily intelligible;

(*e*) that uniformity in legislation should be aimed at, but that special and local customs should be treated considerately;

(*f*) that the existing law of persons should not at present be expanded by way of codification, save that the operation of the European British Minors Act, XIII of 1874, should be extended;

(*g*) that the laws relating respectively to negotiable instruments, to the subjects dealt with by the Transfer of Property Bill, to trusts, to alluvion, to easements, and master and servant, should be codified, and the Bills already prepared on these subjects be passed into law, subject to the amendments above suggested;

(*h*) that the Law of Wrongs should then be codified;

(*i*) that, concurrently with or after the framing of a Law of Wrongs, the laws relating to insurance, carriers and lien should be codified;

(*j*) that the legislature should then deal with the Law of Property in its whole extent;

(*k*) that preparation be made for a systematic chapter on interpretation; Summary of recommendations.

(*l*) that the project of framing a digest of the decisions of Indian Courts should be abandoned.

WHITLEY STOKES. (L. S.)
C. A. TURNER. (L. S.)
RAYMOND WEST. (L. S.)

The 15th November, 1879.

Note by Sir Charles Turner as to the proposal to give a special criminal jurisdiction in the case of Domestic and Agricultural Servants and Mechanics.

Note by Sir C. Turner on Master and Servant Bill.

I consider that where the misconduct of the servant amounts to a criminal act, *e. g.*, wilful damage or dishonesty, or intentional insult calculated to provoke a breach of the peace, the master is sufficiently protected by the provisions of the general law; that the peculiar character of the contract in establishing a personal relation is in itself a strong argument against the enactment of a special criminal law to enforce its obligations; that although a servant may by his poverty be unable to make compensation in damages for breach of contract, yet the power of the master to put an immediate termination to the contract ordinarily protects him against any serious damage for such breaches; that in the exceptional cases in which a master cannot at once supply the place of a servant whom he discharges, or who quits his service, the dependence of the master on the good-will of the servant will supply what is in this country sometimes wanting,—a valuable incentive to the master so to conduct himself towards the servant as to attach him to his service. The moral effect of criminal prosecution and punishment is so deteriorating to the character, that I would confine special legislation exposing servants to these penalties to cases which contain an element of fraud and are not sufficiently met by the general law, namely, where advances have been received for labour or materials and the work has not been executed; and in these cases I would still further restrict the penalties by allowing resort to them only where the advance has not been worked out or duly expended. I consider that, to force a man by terror of imprisonment in a criminal suit to serve for the whole period—it may be for years—for which he engages, if he has received a few rupees as an advance, an advance which may have been long ago recovered—is to accord the sanction of the law to a qualified form of slavery, justifiable only by political emergency, as in the case of enlistment in the army, and inconsistent with recent legislation in India, which abolishes imprisonment of any kind for the enforcement of other contracts or civil wrongs resulting in debts or measured in damages. I consider such legislation especially undesirable in this country, where ignorance of the language on the part of the master often leads to seeming disobedience on the part of the servant; where a dominant race of masters is from its circumstances encourged to exercise arbitrary power over servants, where the servants can expect but little protection from the effect of public opinion in controlling his master's conduct, and where, among the lower grades of society, there are masters who have not been accustomed from their youth to fulfil the duties entailed by that relationship.

C. A. TURNER.

A.

THE TRANSFER OF PROPERTY BILL, 1879.

CONTENTS.

PREAMBLE.

CHAPTER I.

PRELIMINARY.

SECTIONS.
1. Short title.
Extent.
Commencement.
2. Repeal of Acts.
Saving of certain enactments, incidents, rights, liabilities, &c.
3. Interpretation-clause.
4. Enactments relating to contracts to be taken as part of Act IX of 1872.

CHAPTER II.

OF TRANSFERS OF PROPERTY BY ACT OF PARTIES.

(A).—Transfer of Property, whether moveable or immoveable.

5. "Transfer" defined.
6. What may be transferred.
7. Persons competent to transfer.
8. Operation of transfer.
9. Oral transfer.
10. Condition restraining alienation.
11. Restriction repugnant to interest created.
12. Condition making interest determinable on insolvency or attempted alienation.
13. Transfer for benefit of person not in existence at date of transfer subject to prior transfer.
14. Rule against perpetuity.
15. Transfer to class some of whom come under sections 13 and 14.
16. Transfer to take effect on failure of prior transfer.
17. Transfer in perpetuity for benefit of public.
18. Direction for accumulation.
19. Vested interest.
20. Transfer for benefit of person not then living.
21. Contingent interest.
22. Transfer to members of a class who attain a particular age.
23. Transfer contingent on happening of specified uncertain event.
24. Transfer to such of certain persons as survive at some period not specified.
25. Conditional transfer.
26. Fulfilment of condition precedent.
27. Conditional transfer to one person coupled with transfer to another on failure of prior transfer.
28. Ulterior transfer conditional on happening or not happening of specified event.
29. Fulfilment of condition subsequent.
30. Prior disposition not affected by invalidity of ulterior disposition.
31. Condition that transfer shall cease to have effect in case specified uncertain event happens or does not happen.
32. Such condition must not be invalid.
33. Condition that transferee shall perform act at or before specified time.

SECTIONS.

34. Transfer conditional on performance of act, no time being specified for performance.
35. Transfer conditional on performance of act, time being specified.

Election.

36. Election when necessary.

Apportionment.

37. Apportionment of periodical payments on determination of interest of person entitled.

Severance of obligation relating to property.

38. Satisfaction of right arising in favour of several persons in consequence of transfer.

(B).—Transfer of Immoveable Property.

39. Transfer by person authorized only under certain circumstances to transfer.
40. Transfer where third person is entitled to maintenance,
or has a right to restrain enjoyment,
or is entitled to benefit of obligation not amounting to interest or easement.
41. Transfer by ostensible owner.
42. Transfer by person having option to require or authority to revoke transfer.
43. Transfer by unauthorized person who subsequently acquires interest in property transferred.
44. Transfer by one co-owner.
45. Joint transfer for consideration.
46. Transfer for consideration by persons having distinct interests.
47. Transfer by co-owners of share in common property.
48. Priority of rights created by transfer.
49. Transferee's right under policy.
50. Rent *bonâ fide* paid to holder under defective title.
51. Improvements made by *bonâ fide* holders under defective titles.
52. Transfer of property pending suit relating thereto.
53. Fraudulent transfer.

CHAPTER III.

OF SALES OF IMMOVEABLE PROPERTY.

54. "Sale" defined.
Sale how made.
Contract for sale.
55. Rights and liabilities of buyer and seller.
56. Sale of one of two properties subject to a common charge.

CHAPTER IV.

OF MORTGAGES OF IMMOVEABLE PROPERTY AND CHARGES.

57. "Mortgage," "mortgagor" and "mortgagee" defined.
Simple mortgage.
Mortgage by conditional sale.
Usufructuary mortgage.
English mortgage.
58. Mortgage when to be by assurance.

Rights and Liabilities of Mortgagor.

59. Right of mortgagor to redeem.
Redemption of portion of mortgaged property.

SECTIONS.

60. Right to redeem one of two properties separately mortgaged.
61. Right of usufructuary mortgagor to recover possession.
62. Accession to mortgaged property.
Accession acquired in virtue of transferred ownership.
63. Renewal of mortgaged lease.
64. Implied contracts by mortgagor.
65. Waste by mortgagor in possession.

Rights and Liabilities of Mortgagee.

66. Right to foreclosure or sale.
67. Right to sue for mortgage-money.
68. Power of sale when invalid.
69. Accession to mortgaged property.
70. Renewal of mortgaged lease.
71. Rights of mortgagee in possession.
72. Charge on proceeds of revenue-sale.
73. Right of subsequent mortgagee to pay off prior mortgagee.
74. Right of mesne mortgagee against prior or subsequent mortgagees.
75. Liabilities of mortgagee in possession.
Waste by mortgagee.
Loss occasioned by his default.
76. Receipts in lieu of interest.

Priority.

77. Postponement of prior mortgagee.
78. Mortgage to secure balance of account.
79. Tacking abolished.

Marshalling and Contribution.

80. Marshalling securities.
81. Contribution to mortgage-debt.

Deposit in Court.

82. Power to deposit in Court money due on mortgage.
Right to money deposited by mortgagor.
83. Cessation of interest.

Suits for Foreclosure, Sale or Redemption.

84. Parties to suits for foreclosure, sale and redemption.

Foreclosure and Sale.

85. Decree in foreclosure-suit.
86. Procedure in case of payment of amount due and subsequent costs.
Order absolute for foreclosure.
Power to enlarge time.
87. Decree for sale.
Power to decree sale at instance of mortgagee.
Power to decree sale in foreclosure-suit at instance of mortgagor.
88. Procedure when defendant pays amount due.
Order absolute for sale.
89. Recovery of balance due on mortgage.

Redemption.

90. Who may sue for redemption.
91. Decree in redemption-suit.
92. In case of redemption, possession.
93. In default, foreclosure or sale.
Power to enlarge time.
94. Charge of one of several co-mortgagors who redeems.

Sale of Property subject to prior Mortgage.

95. Sale of property subject to prior mortgage.
96. Application of proceeds.

Anomalous Mortgages.

97. Mortgage not described in section 56, clauses (*b*), (*c*), (*d*) and (*e*).
98. Abandonment of security by mortgagee selling mortgaged property under decree.

SECTIONS.

Charges.

99. Charges.
100. Extinguishment of charges.

Notice and Tender.

101. Service or tender on or to agent.
102. Notice, &c., to or by person incompetent to contract.

CHAPTER V.

OF LEASES OF IMMOVEABLE PROPERTY.

103. Lease defined.
Lessor, lessee, premium and rent defined.
104. Duration of certain leases in absence of written contract or local usage.
Notice to determine lease.
105. Leases how made.
106. Rights and liabilities of lessor and lessee.
107. Rights of lessor's transferee.
108. Exclusion of day on which term commences.
Duration of lease for a year.
Option to determine lease.
109. Determination of lease.
110. Waiver of forfeiture.
111. Waiver of notice to quit.
112. Relief against forfeiture for non-payment of rent.
113. Effect of surrender and forfeiture on under-lessees.
114. Effect of holding over.
115. Exemption of leases for agricultural purposes.

CHAPTER VI.

OF EXCHANGES.

116. "Exchange" defined.
117. Right of party evicted from thing received in exchange.
118. Rights and liabilities of parties.
119. Exchange of money.

CHAPTER VII.

OF GIFTS.

120. "Gift" defined.
Acceptance when to be made.
121. Transfer how effected.
122. Gift of existing and future property.
123. Gift to several of whom one does not accept.
124. When gift may be suspended or revoked.
125. Donor not bound to warranty.
126. Onerous gifts.
127. Universal donee.
128. Saving of donations *mortis causâ* and Muhammadan law.

CHAPTER VIII.

OF TRANSFERS OF ACTIONABLE CLAIMS.

129. Actionable claim.
130. Transfer of debts.
131. Notice to be in writing signed.
132. Debtor to give effect to transfer.
133. Warranty of solvency of debtor.
134. Discharge of person against whom claim is sold.
135. Incapacity of officers connected with courts of justice.
136. Liability of transferee of debt.
137. Mortgaged debt.
138. Saving of negotiable instruments.

THE SCHEDULE.

A Bill to amend the law relating to the Transfer of Property by act of Parties.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend certain parts of the law relating to the transfer of property by act of parties; It is hereby enacted as follows:—

Preamble.

CHAPTER I.

PRELIMINARY.

Bill III, s. 1.

1. This Act may be called "The Transfer of Property Act, 1879:"

Short title.

It extends to the whole of British India;

Extent.

And it shall come into force on the first day of *March*, 1880.

Commencement.

Bill III, s. 2.

2. On and from that day the enactments specified in the schedule hereto annexed shall be repealed to the extent mentioned in the third column thereof. But nothing herein contained shall be deemed to affect—

Repeal of Acts.

Act IX of 1872, s. 1.

(*a*) the provisions of any enactment not hereby expressly repealed:

Saving of certain enactments, incidents, rights, liabilities, &c.

(*b*) any terms or incidents of any contract or constitution of property which are consistent with the provisions of this Act and are allowed by the law for the time being in force:

4 Beng. A. C. 219.

(*c*) any right or liability arising out of a custom or personal law consistent with this Act, or out of a legal relation constituted before this Act comes into force, or any relief in respect of any such right or liability:

L. R. 2 Bom. 541.

(*d*) any transfer by operation of law or by decree or order of a Court of competent jurisdiction.

Bill III, s. 3: Report, s. 2.

3. In this Act, unless there be something repugnant in the subject or context—

Interpretation-clause.

the "ownership" of a thing is the right of one or more persons to possess and use it to the exclusion of others. Such ownership is either absolute or qualified. The thing of which there may be ownership is called "property:"

"ownership:"

"property:"

Act III of 1877, s. 17, cl. (*b*).

"assurance" means any non-testamentary instrument which purports or operates to create, transfer, or otherwise dispose of, whether in present or in future, any right, title or interest, to or in immoveable property:

"assurance:"

"registered" means registered in British India under the law for the time being in force regulating the registration of documents:

"registered:"

"attached to the earth" means—

"attached to the earth."

(*a*) rooted in the earth, as in the case of trees and shrubs;

(*b*) imbedded in or permanently resting upon the earth, as in the case of walls or buildings; or

See ss. 13, 14, clause (*s*). 61.

(*c*) attached to what is so imbedded or so rests, for the permanent beneficial enjoyment of that to which it is attached:

and a person is said to have "notice" of a fact when he actually knows that fact, or when but for wilful abstention from an inquiry which he ought to have made, or gross negligence, he would have known it or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, section 229.

"notice."

See Contract Act, s. 229, as to agent: 4 Cal. 212: *v.* 11 Ben. 54 P. C.

Bill III, s. 4.

4. The chapters and sections of this Act which relate to contracts shall be taken as part of the Indian Contract Act, 1872.

Enactments relating to contracts to be taken as part of Act IX of 1872.

CHAPTER II.

OF TRANSFERS OF PROPERTY BY ACT OF PARTIES.

(*A*).—*Transfer of Property, whether moveable or immoveable.*

5. In the following sections "transfer" means an act by which one living person conveys to another, or to himself and another, in present or in future, the ownership of property or an interest therein, and "to transfer" is to perform such act.

"Transfer" defined.

6. The ownership of property of any kind may be transferred, except as otherwise provided by this section or by any other law for the time being in force:—

What may be transferred.

(*a*) The chance of an heir-apparent succeeding to an estate, the chance of a relation obtaining a legacy on the death of a kinsman, or any other merely contingent or possible right or interest, cannot be transferred to any one except the present or future owner or co-owner of the property affected thereby,

Carlton v. *Peighton*, 3 Mer.

(*b*) A mere right of re-entry for breach of a condition subsequent cannot be transferred to any one except the owner of the property affected thereby.

N. Y. Code, s. 462: *Smith* v. *Packhurst*, 2 Atk. 135.

(*c*) An easement cannot be transferred otherwise than by release to the owner of the servient heritage.

(*d*) An interest in property restricted in its enjoyment to the owner personally cannot be transferred by him.

(*e*) A mere right to sue for compensation for a fraud or for harm illegally caused to body, mind or reputation cannot be transferred,

s. 11 & 12 Vic., c. 21, 27.

(*f*) A public office cannot be transferred, nor can the salary of a public officer whether before or after it has become payable.

(*g*) Stipends allowed to military and civil pensioners of Government and political pensioners cannot be transferred.

(*h*) No transfer can be made (1) in so far as it is opposed to the nature of the interest affected thereby, or (2) for an illegal purpose, or (3) to a person legally disqualified to be transferee.

Bill III, s. 5: Report, s. 4:

7. Every person competent to contract and entitled to transferable property, or authorized to dispose of transferable property not his own, is competent to transfer such property either wholly or in part, and either absolutely or conditionally, in the circumstances, to the extent and in the manner allowed and prescribed by any law for the time being in force.

Persons competent to transfer.

Bill III, s. 6: Report, s. 10: *v.* last clause, Report, s. 6: 2 W. R. 125 (buildings): 14 W. R. 379.

N. W. P., 1870, p. 251: 24 W. R. 380 (trees), "everything grown on it," Morley N. S. 259.

8. Unless a different intention is expressed or necessarily implied, a transfer of property passes forthwith to the transferee all the interest which the transferor is then capable of passing in such property, and in the legal incidents thereof.

Operation of transfer.

Such incidents include, where the property is land, the easements annexed thereto, the rents and profits thereof accruing after the transfer, and all things attached to the earth;

and, where the property is machinery attached to the earth, the moveable parts thereof;

and, where the property is a house, the easements annexed thereto, the rent thereof accruing after the transfer, and the locks, keys, bars, doors, windows and all other things provided for permanent use therewith;

and, where the property is a debt or other actionable claim, the securities therefor, but not arrears of interest accrued before the transfer;

and, where the property is money or other property yielding income, the interest or income thereof accruing after the ownership passes.

N. Y. Code, s. 453: 7 Exch., 581.

9. A transfer may be made without writing in every case in which a writing is not expressly required by law.

Oral transfer.

Report, s. 47: L. R. 2. Chan. D. 148, 385.

10. Where a transfer is subject to a condition or limitation absolutely restraining the transferee or any person claiming under him from parting with or disposing of his interest in the property transferred, the condition or limitation is void except in the case of a lease where the condition is for the benefit of the lessor or those claiming under him: provided that property may be transferred to or for the benefit of a married woman, so that she shall not have power to part with the same or her beneficial interest therein.

Condition restraining alienation.

11. Where on a transfer of property an interest is created in favour of any person, but the terms of the transfer direct that such interest shall be applied or enjoyed in a particular manner, he shall be entitled to receive and dispose of such interest as if there were no such direction.

Restriction repugnant to interest created.

Nothing in this section shall be deemed to affect the right to restrain, for the beneficial enjoyment of one piece of immoveable property, the enjoyment of another piece of such property, or to compel the enjoyment thereof in a particular manner.

Report, s. 48.

12. Where property is transferred subject to a condition or limitation making any interest therein reserved or given to or for the benefit of any person to cease on his becoming insolvent or endeavouring to transfer or dispose of the same, such condition or limitation is void.

Condition making interest determinable on insolvency or attempted alienation.

Nothing in this section applies to a condition in a lease for the benefit of the lessor or those claiming under him.

Act X of 1865, s. 100. Report, s. 49.

13. Where on a transfer of property an interest is created for the benefit of a person not in existence at the date of the transfer, subject to a prior interest created by the same transfer, the interest created for the benefit of such person shall not take effect, unless it extends to the whole of the remaining interest of the transferor in the property.

Transfer for benefit of person not in existence at date of transfer, subject to prior transfer.

Illustration.

A transfers property of which he is the owner to B in trust for A and his intended wife successively for their lives and after the death of the survivor for the eldest son of the intended marriage for life, and after his death for his second son. The interest so created for the benefit of the eldest son does not take effect, because it does not extend to the whole of A's remaining interest in the property.

Report, s. Succession Act, s. 101.

14. No transfer can operate to create an interest which is to take effect after the life-time of one or more persons living at the date of such transfer, and the minority of some person who shall be in existence at the expiration of that period, and to whom, if he attains full age, the interest created is to belong.

Rule against perpetuity.

Report, s. 51: *Rentinck* v. *Duke of Portland*, 7 Chan. D. 693.

15. If on a transfer of property an interest is created for the benefit of a class of persons with regard to some of whom such interest fails by reason of any of the rules contained in sections thirteen and fourteen, such interest fails as regards the whole class.

Transfer to class some of whom come under sections 13 and 14.

Report, s. 52.

16. Where an interest fails by reason of any of the rules contained in sections thirteen, fourteen and fifteen, any interest created in the same transaction and intended to take effect after or upon failure of such prior interest also fails.

Transfer to take effect on failure of prior transfer.

17. The restrictions in sections fourteen, fifteen and sixteen shall not apply to property transferred for the benefit of the public in the advancement of religion, knowledge, commerce, health, safety or any other object beneficial to mankind.

Transfer in perpetuity for benefit of public.

Act X of 1865, s. 104: Report, s. 53.

18. Where the terms of a transfer of property direct that the income arising therefrom shall be accumulated, such direction shall be void, and the property shall be disposed of as if no accumulation had been directed.

Direction for accumulation.

Donaldson v. *Donaldson*, L. R. 3 Chan. Div. 743.

Exception.—Where the property is immoveable, or where accumulation is directed to be made from the date of the transfer, the direction shall be valid in respect only of the income arising from the property within one year next following such date; and at the end of the year such property and income shall be disposed of respectively as if the period during which the accumulation has been directed to be made had elapsed.

Report. ss. 56, 57, altered.

19. Where on a transfer of property and interest is created in favour of a person without specifying the time when it is to take effect, or in terms specifying that it is to take effect forthwith or on the happening of an event which must happen, such interest is vested, unless a contrary intention appears from the terms of the transfer.

Vested interest.

A vested interest is not defeated by the death of the transferee before he obtains possession.

Explanation.—An intention that an interest shall not be vested is not to be inferred merely from a provision whereby the enjoyment thereof is postponed, or whereby a prior interest in the same property is given or reserved to some other person, or whereby income arising from the property is directed to be accumulated until the time of enjoyment arrives, or from a provision that if a particular event shall happen the interest shall pass to another person.

Report, s. 58, altered.

20. Where, on a transfer of property, an interest is created for the benefit of a person not then living, he acquires upon his birth, unless a contrary intention appear from the terms of the transfer, a vested interest, although he may not be entitled to the enjoyment thereof immediately on his birth.

Transfer for benefit of person not then living.

Act X of 1865, s. 107. Report, s. 59. IX, 72-88.

21. Where, on a transfer of property, an interest is created in favour of a person to take effect only on the happening of a specified uncertain event, or if a specified uncertain event shall not happen, such person thereby acquires a contingent interest in the property. Such interest becomes a vested interest, in the former case, on the happening of the event, in the latter, when the happening of the event becomes impossible.

Contingent interest.

Exception.—Where under a transfer a person becomes entitled to an interest in property upon attaining a particular age, and the transferor also gives to him absolutely the income to arise from such interest before he reaches that age, or directs the income or so much thereof as may be necessary to be applied for his benefit, such interest is not contingent.

22. Where, on a transfer of property, an interest is created in favour of such members only of a class as shall attain a particular age, such interest does not vest in any member of the class who has not attained that age.

Act X of 1865, s. 108. Report, s. 60.

Transfer to members of a class who attain a particular age.

23. Where, on a transfer of property, an interest therein is to accrue to a specified person if a specified uncertain event shall happen, and no time is mentioned for the occurrence of that event, the interest fails unless such event happens before, or at the same time as, the intermediate or precedent interest ceases to exist.

Act X of 1865, s. 111. Report, s. 61.

Transfer contingent on happening of specified uncertain event.

24. Where, on a transfer of property, an interest therein is to accrue to such of certain persons as shall be surviving at some period, but the exact period is not specified, the interest shall go to such of them as shall be alive when the intermediate or precedent interest ceases to exist, unless a contrary intention appears from the terms of the transfer.

Act X of 1865, s. 112.

Transfer to such of certain persons as survive at some period not specified.

Illustration.

A transfers property to B for life, and after his death to C and D, equally to be divided between them, or to the survivor of them. C dies during the life of B. D survives B. At B's death the property passes to D.

25. An interest created on a transfer of property and dependent upon a condition fails if the fulfilment of the condition is impossible, or is forbidden by law, or is of such a nature that if permitted it would defeat the provisions of any law, or is fraudulent, or involves or implies injury to the person or property of another, or the Court regards it as immoral or opposed to public policy.

Act X of 1865, s. 113. Act X of 1865, s. 114, expanded with reference to Act IX of 1872, s. 23.

Conditional transfer.

Illustrations.

(*a*). A lets a farm to B on condition that he shall walk ten miles in an hour. The lease is void.

(*b*). A gives Rs. 500 to B on condition that he shall marry A's daughter, C. At the date of the transfer C was dead. The transfer is void.

(*c*). A transfers Rs. 500 to B on condition that she shall murder C. The transfer is void.

(*d*). A transfers Rs. 500 to his niece C if she will desert her husband. The transfer is void.

26. Where the terms of a transfer of property impose a condition to be fulfilled before a person can take an interest in the property, the condition shall be deemed to have been fulfilled if it has been substantially complied with.

Act X of 1865, s. 115.

Fulfilment of condition precedent.

Illustrations.

(*a*). A transfers Rs. 5,000 to B on condition that he shall marry with the consent of C, D, and E. E dies. B marries with the consent of C and D. B has fulfilled the condition.

(*b*). A transfers Rs. 5,000 to B on condition that he shall marry with the consent of C, D and E. B marries without the consent of C, D and E, but obtains their consent after the marriage. B has not fulfilled the condition.

Act X of 1865, s. 116.

27. Where, on a transfer of property, an interest is created in favour of one person, and by the same transaction an ulterior disposition of the same interest is made in favour of another if the prior interest under the transfer shall fail, the ulterior disposition shall take effect upon the failure of the prior disposition, although the failure may not have occurred in the manner contemplated by the transferor.

Conditional transfer to one person coupled with transfer to another on failure of prior transfer.

Act X of 1865, s. 117.

But where the intention of the parties to the transaction is that the ulterior disposition shall take effect only in the event of the prior disposition failing in a particular manner, the ulterior disposition shall not take effect unless the prior disposition fails in that manner.

Illustrations.

(*a*). A transfers Rs. 500 to B on condition that he shall execute a certain lease within three months after A's death, and if he should neglect to do so, to C. B dies in A's lifetime. The transfer to C takes effect.

(*b*). A transfers property to his wife; but in case she should die in his lifetime, transfers to B that which he had transferred to her. A and his wife perish together, under circumstances which make it impossible to prove that she died before him. The transfer to B does not take effect.

Act X of 1865, s. 118.

28. On a transfer of property an interest may be created to accrue to any person with the condition superadded that in case a specified uncertain event shall happen, such interest shall pass to another person; or that in case a specified uncertain event shall not happen, such interest shall pass to another person. In each case the dispositions are subject to the rules contained in sections ten, twelve, twenty-one, twenty-two, twenty-three, twenty-four, twenty-five and twenty-seven.

Ulterior transfer conditional on happening or not happening of specified event.

Act X of 1865, s. 119.

29. An ulterior disposition of the kind contemplated by the last preceding section cannot take effect unless the condition is strictly fulfilled.

Fulfilment of condition subsequent.

Illustration.

A transfers Rs. 500 to B, to be paid to him on his attaining his majority or marrying, with a proviso that, if B dies a minor or marries without C's consent, the Rs. 500 shall go to D. B marries when only 17 years of age, without C's consent. The transfer to D takes effect.

Act X of 1865, s. 120.

30. If the ulterior disposition is not valid, the prior disposition is not affected by it.

Prior disposition not affected by invalidity of ulterior disposition.

Illustration.

A transfers a farm to B for her life, and, if she do not desert her husband, to C. B is entitled to the farm during her life as if no condition had been inserted.

31. Subject to the provisions of section twelve, on a transfer of property an interest may be created with the condition superadded that it shall cease to exist in case a specified uncertain event shall happen, or in case a specified uncertain event shall not happen.

Act X of 1865 s. 121.

Condition that transfer shall cease to have effect in case specified uncertain event happens or does not happen.

Illustrations.

(*a*). A transfers a farm to B for his life, with a proviso that, in case B cuts down a certain wood, the transfer shall cease to have any effect. B cuts down the wood. He loses his life-interest in the farm.

(*b*). A transfers a farm to B, provided that, if B shall not go to England within three years after the date of the transfer, his interest in the farm shall cease. A does not go to England within the term prescribed. His interest in the farm ceases.

32. In order that a condition that an interest shall cease to exist may be valid, it is necessary that the event to which it relates be one which could legally constitute the condition of the creation of an interest.

Act X of 1865, s. 122.

Such condition must not be invalid.

33. Where, on a transfer of property, an interest is created subject to a condition that the person taking it shall perform a certain act at or before a specified time, and the transferor has at the time of creating the interest made an ulterior disposition thereof in favour of himself or of another if the act be not performed within such time, the prior disposition ceases to have effect if the act is not performed within such time, or if the person benefited by the prior disposition renders the performance of the act impossible within the time specified. But where the transferor has not made any such ulterior disposition thereof, the transfer is, at the option of the transferor, voidable so far as regards such interest, if it was intended that time should be of the essence of the condition; but if it was not so intended, the transfer shall not be so voidable.

Act X of 1865, s. 124.

Condition that transferee shall perform act at or before specified time.

The intention referred to in this section is, in the case of a transfer without consideration, the intention of the transferor, and, in the case of a transfer for consideration, the intention of both the transferor and of the person from whom the consideration proceeds.

When such intention is apparent, the circumstance that the interest has actually been enjoyed under the prior disposition does not affect the operation of the condition.

34. Where, on a transfer of property, an interest is created subject to a condition that the person taking it shall perform a certain act, but no time is specified for the performance of the act, if the transferor has at the time of the transfer made an ulterior disposition of the interest in favour of another person, the prior disposition ceases to take effect when the person benefited thereby renders impossible or indefinitely postpones the performance of the condition.

Transfer conditional on performance of act, no time being specified for performance.

But if the transferor has not at the time of the transfer made any such ulterior disposition of the interest, then if the interest was created without consideration it is voidable at the option of the transferor; but if it was created for consideration it shall be so voidable only if adequate compensation for the breach of the condition cannot be made in money.

35. Where an act is to be performed by a person either as a condition to be fulfilled before an interest created on a transfer is enjoyed by him, or as a condition on the non-fulfilment of which the interest is to pass from him to another person, and a time is specified for the performance of the act, if such performance within the specified time is prevented by the fraud of a person who would be directly benefited by non-fulfilment of the condition, such further time shall as against him be allowed for performing the act as shall be requisite to make up for the delay caused by such fraud. But if no time is specified for the performance of the act, then if its performance is by the fraud of a person interested in the non-fulfilment of the condition rendered impossible or indefinitely postponed, the condition shall as against him be deemed to have been fulfilled.

Transfer conditional on performance of act, time being specified.

Election.

Report, s. 62, added to: 2 Spence 585.

36. Where a person professes to transfer property which he has no right to transfer, and as part of the same transaction confers any benefit on the owner of the property, such owner must elect either to confirm such transfer or to dissent from it; and in the latter case he shall relinquish the benefit so conferred, and the benefit so relinquished shall revert to the transferor or his representative as if it had not been disposed of,

Act X of 1865, s. 168.

subject nevertheless,

where the transfer is gratuitous and the transferor has before the election died or otherwise become incapable of making a fresh transfer,

and in all cases where the transfer is for consideration,

to the charge of making good to the disappointed transferee the amount or value of the property attempted to be transferred to him.

Election when necessary.

Illustration.

The farm of Sultánpur is the property of C and worth Rs. 800. A by an instrument of gift professes to transfer it to B, giving by the same instrument Rs. 1,000 to C. C elects to retain the farm. He forfeits the gift of Rs. 1,000.

In the same case, A dies before the election. His representative must out of the Rs. 1,000 pay Rs. 800 to B.

Act X of 1865, s. 169.

The rule in the first paragraph of this section applies whether the transferor does or does not believe that which he professes to transfer to be his own.

Act X of 1865, s. 171.

A person taking no benefit directly under a transaction, but deriving a benefit under it indirectly, need not elect.

Act X of 1865, s. 172.

A person who in his one capacity takes a benefit under the transaction may in another dissent therefrom.

Exception to the last preceding four rules.—Where a particular benefit is expressed to be conferred on the owner of the property which the transferor professes to transfer expressed to be in lieu of that property, if such owner claim that he must relinquish the particular benefit, but he is not bound to relinquish any other benefit conferred upon him by the same transaction.

Act X of 1865, s. 173.

Acceptance of the benefit by the person on whom it is conferred constitutes an election by him to confirm the transfer, if he has knowledge of his right to elect and of those circumstances which would influence the judgment of a reasonable man in making an election, or if he waives enquiry into the circumstances.

Act X of 1865, s. 174.

Such knowledge or waiver shall, in the absence of evidence to the contrary, be presumed, if the person on whom the benefit has been conferred has enjoyed it for two years without doing any act to express dissent.

Act X of 1865, s. 175.

Such knowledge or waiver may be inferred from any act of his which renders it impossible to place the persons interested in the property professed to be transferred in the same condition as if such act had not been done.

Illustration.

A transfers to B an estate to which C is entitled, and to C a coal-mine. C takes possession of the mine and exhausts it. He has thereby confirmed the transfer of the estate to B.

Act X of 1865, s. 176.

If he does not within one year after the date of the transfer signify to the transferor or his representatives his intention to confirm or to dissent from the transfer, the transferor or his representatives may, upon the expiration of that period, require him to make his election; and if he does not comply with such requisition within a reasonable time after he has received it, he shall be deemed to have elected to confirm the transfer.

Act X of 1865, s. 167.

In case of disability, the election shall be postponed until the disability ceases, or until the election is made by some competent authority.

Apportionment.

Report, s. 64: Bill III, s. 86.

37. In the absence of a contract to the contrary, all rents, annuities, pensions, dividends and other periodical payments in the nature of income shall, upon the transfer of the interest of the person entitled to receive such payments, be deemed to accrue due from day to day, and to be apportionable accordingly, but to be payable on the days appointed for the payment thereof.

Apportionment of periodical payments on determination of interest of person entitled.

Severance of Obligation relating to Property.

38. When in consequence of a transfer property is divided and held in several shares, and thereupon the benefit of any obligation relating to the property as a whole passes from one to several owners of the property, the corresponding duty shall, in the absence of a contract to the contrary amongst the owners, be performed in favour of each of such owners in proportion to the value of his share in the property, provided that the duty can be severed and that the severance does not substantially increase the burden of the obligation; but if the duty cannot be severed, or if the severance would substantially increase the burden of the obligation, the duty shall be performed for the benefit of such one of the several owners as they shall jointly designate for that purpose:

Satisfaction of right arising in favour of several persons in consequence of a transfer.

Provided that no person on whom the burden of the obligation lies shall be answerable for failure to discharge it in manner provided by this section, unless and until he has had reasonable notice of the severance.

Illustrations.

(*a*). A sells to B, C and D land situate in a village and leased to E at an annual rent of Rs. 30 and delivery of one fat sheep, B having provided half the purchase-money and C and D one-quarter each. E having notice of this must pay Rs. 15 to B, Rs. 7½ to C and Rs. 7½ to D, and must deliver the sheep according to the joint direction of B, C and D.

(*b*). Each house in the village being bound to provide ten days' labour each year on a dyke to prevent inundation, E had agreed as a term of his lease to perform this work for A. B, C and D severally require E to perform the ten days' work due on account of the house of each. E is not bound to do more than ten days' work in all, according to such directions as B, C and D may join in giving.

B. Transfer of Immoveable Property.

39. Where any person authorized only under circumstances in their nature variable to dispose of immoveable property transfers such property for consideration, alleging the existence of such circumstances, they shall, as between the transferee on the one part and the transferor and other persons (if any) affected by the transfer on the other part, be deemed to have existed, if the transferee, after using reasonable care to ascertain the existence of such circumstances, has acted in good faith.

Transfer by person authorized only under certain circumstances to transfer.

Illustration.

A, a Hindú widow, whose husband has left collateral heirs, agrees, for purposes neither religious nor charitable, to sell a field, part of the property held by her as such, to B. B satisfies himself by reasonable inquiry that the income of the property is insufficient for A's maintenance, and that the sale of the field is necessary, and, acting in good faith, buys the field. As between B on the one part and A and the collateral heirs on the other part, a necessity for the sale shall be deemed to have existed.

Wilson v. Hare, L. R. 1 Ch. Richards v. Revell, 7 Ch. Div. 224. Mackie v. Mackay, L. R. 5 P. (32). S. A. 135 of 1877.

40. Where a third person has a right to receive maintenance or a provision for advancement or marriage from the profits of immoveable property, and such right does not amount to a charge on such property, or

Transfer of land where third person is entitled to maintenance,

where for the more beneficial enjoyment of his own immoveable property a third person has, independently of any interest in the immoveable property of another, a right to restrain the enjoyment of the latter property or to compel its enjoyment in a particular manner, or

or has a right to restrain its enjoyment,

where a third person is entitled to the benefit of an obligation arising out of contract and annexed to the ownership of immoveable property, but not amounting to an interest therein or casement thereon,

or is entitled to benefit of obligation not amounting to interest or casement.

such right or obligation may be enforced against a transferee with notice thereof or a gratuitous transferee of the property affected thereby, but not against a transferee for consideration and without notice of the right or obligation, nor against such property in his hands.

Illustrations.

(*a*). A. a Hindú, transfers Sultánpur to his sister-in-law B, in lieu of her claim against him for maintenance in virtue of his having succeeded to her deceased husband's property, and agrees with her that if she is dispossessed of Sultánpur, A will transfer to her an equal area out of such of several other specified villages in his possession as she may elect. A sells the specified villages to C, who buys in good faith, without notice of the agreement. B is dispossessed of Sultánpur. She has no claim on the villages transferred to C.

(*b*). A, a Hindú widow, is entitled to maintenance out of the share of her deceased husband in Basaoli, which has passed to his brother B. B sells Basaoli to C, who has notice of A's claim and that there is no other property to satisfy it. A may claim maintenance out of Basaoli in the hands of C.

(*c*). A contracts to sell Sultánpur to B. While the contract is still in force he sells Sultánpur to C. who has notice of the contract. B may enforce the contract against C to the same extent as against A.

Bill III, s. 7: Act IX of 1872, s. 108, excepn 2.

41. Where a person holding immoveable property as its ostensible owner with the consent, express or implied, of the other persons interested therein, transfers such property for consideration, the transfer shall not be voidable on the ground that the transferor was not authorized to make it: provided that the transferee, after taking reasonable care to ascertain that the transferor had power to make the transfer, has acted in good faith.

Transfer by ostensible owner.

Illustrations.

(*a*). A, one of two co-proprietors of village land, leaves his village, and with his consent the land is registered by the Revenue-officer in the name of B, the other co-proprietor. After ten years B sells a portion of the land to C, who takes reasonable care to ascertain that B had power to make the transfer and acts in good faith. A is not entitled to have the sale set aside.

(*b*). A buys land and causes it to be transferred to his servant B to hold on his behalf, and also causes it to be entered in the revenue register in B's name. C, having ascertained that B is the registered owner of the land and pays the revenue due in respect thereof, buys the land in good faith. A cannot impeach the sale.

Bill III, s. 10A, para. 2.

42. Where a person having an option to require, or authority to revoke, a transfer of any immoveable property, transfers the property for consideration, such transfer operates in favour of the transferee (subject to any condition attached to the exercise of the option or authority) in the former case as an

Transfer by person having option to require or authority to revoke transfer.

exercise of the option, and, in the latter case, as a revocation of the former transfer to the extent of the authority.

Illustrations.

(*a*). A takes a lease of a house from B with an option of buying it at a specified price. A sells the house to C. C may require B to transfer it to him at the specified price.

(*b*). A lets a house to B and reserves power to revoke the lease if in the opinion of a specified surveyor B should make a use of it detrimental to its value. Afterwards A, thinking that such a use has been made, lets the house to C. This operates as a revocation of B's lease subject to the opinion of the surveyor as to B's use of the house having been detrimental to its value.

See Canadian Code, s. 1488.

Sngd. V. and P., 13th edn., 297.

43. Where a person erroneously represents that he is authorized to transfer certain immoveable property, and assumes to transfer such property for consideration, such transfer shall, at the option of the transferee, operate on any interest which the transferor may acquire in such property, at any time during which the contract of transfer subsists.

Transfer by unauthorized person who subsequently acquires interest in property transferred.

Nothing in this section shall impair the right of transferees in good faith for consideration without notice of the existence of the said option.

Illustration.

A, a Hindú who has separated from his father B, sells to C three fields, X, Y and Z. Of these Z does not belong to A, it having been retained by B on the partition; but on B's dying A obtains Z as heir. C, not having rescinded the contract of sale, may require A to deliver Z to him.

Bill III, s. 9.

44. Where one of two or more co-owners of immoveable property legally competent in that behalf transfers his share of such property or any interest therein, the transferee acquires as to such share or interest, and so far as is necessary to give effect to the transfer, the transferor's right to joint possession or other common or part enjoyment of the property, and to enforce a partition of the same, but subject to the conditions and liabilities affecting, at the date of the transfer, the share or interest so transferred.

Transfer by one co-owner.

Bill III, s. 18.

45. Where property is transferred for consideration to two or more persons, and such consideration is paid out of a fund belonging to them in common, they are, in the absence of a contract to the contrary, respectively entitled to interests in such property identical, as nearly as may be, with the interests to which they were respectively entitled to the fund; and where such consideration is paid out of separate funds belonging to them respectively, they are, in the absence of a contract to the contrary, respectively entitled to interests in such property in proportion to the shares of the consideration which they respectively advanced.

Joint transfer for consideration.

In the absence of evidence as to the interests in the fund to which they were respectively entitled, or as to the shares which they respectively advanced, such persons shall be presumed to be equally interested in the property.

Illustration.

A and B are the sons and C the grandson of a Hindú who has died leaving property. C's father D has also died. A partition has been made after which A and B have reunited. C remains severed in interest, his share being one-third. The separate property of D is of the same value. The whole fund belonging to A, B and C is expended in buying an estate X. A and B take one moiety of X as joint estate and C takes the other moiety as separate property.

46. Where a transfer of immoveable property is made for consideration by persons having distinct interest therein, the transferors are, in the absence of a contract to the contrary, entitled to share in the consideration equally, where their interests in the property transferred were of equal value, and, where such interests were of unequal value, proportionately to the value of their respective interests.

Transfer for consideration by persons having distinct interests.

Illustrations.

(*a*). A owning a moiety, and B and C, each a quarter share of mauza Sultánpur, exchange an eighth share of that mauza for a quarter share of mauza Lalpura. There being no agreement to the contrary, A is entitled to an eighth share in Lalpura, and B and C each to a sixteenth share in that mauza.

(*b*). A, being entitled to a life interest in mauza Atrali and B and C to the reversion, sell the mauza for Rs. 1,000. A's life interest is ascertained to be worth Rs. 600, the reversion Rs. 400. A is entitled to receive Rs. 600 out of the purchase money, B and C to receive Rs. 400.

47. Where several co-owners of immoveable property transfer a share therein without specifying that the transfer is to take effect on any particular share or shares of the transferors, the transfer, as among such transferors, takes effect on such shares equally where the shares were equal, and, where they were unequal, proportionately to the extent of such shares.

Transfer by co-owners of share in common property.

Illustration.

A, the owner of an eight annas share, and B and C, each the owner of a four annas share, in mauza Sultánpur, transfer a two-anna share in the mauza to D, without specifying from which of their several shares the transfer is made. To give effect to the transfer one-anna share is taken from the share of A, and half an anna share from each of the shares of B and C.

48. Where a person purports to create by transfer at different times rights in or over the same immoveable property, and such rights cannot all exist or be exercised to their full extent together, each later created right shall, in the absence of a special contract or reservation binding the earlier transferees, be subject to the rights previously created.

Priority of rights created by transfer.

49. Where immoveable property is transferred for consideration, and such property or any part thereof is at the date of the transfer insured against loss or damage by fire, the transferee, in case of such loss or damage, may, in the absence of a contract to the contrary, require any money which the transferor actually receives under

Transferee's right under policy.

the policy, or so much thereof as may be necessary, to be applied in reinstating the property.

Bill III, s. 8: Act XI of 1855, s. 1.

50. No person shall be chargeable with any rents or profits of any immoveable property, which he has in good faith paid or delivered to any person of whom he in good faith held such property, notwithstanding it may afterwards appear that the person to whom such payment or delivery was made had no right to receive such rents or profits.

Rent *bonâ fide* paid to holder under defective title.

Illustration.

A lets a field to B at a rent of Rs. 50, and then transfers the field to C. B, having no notice of the transfer, in good faith pays the rent to A. B is not chargeable with the rent so paid.

Act XI of 1 55, s. 2: 2 Bomb. 225.

51. When the transferee of immoveable property makes any improvement on the property, believing in good faith that he is absolutely entitled thereto, and he is subsequently evicted therefrom by any person having a better title, the transferee or his representative in interest has a right to require the person causing the eviction either to have the value of the improvement estimated and paid or secured to the transferee, or to sell his interest in the property to the transferee at the then market value thereof irrespective of the value of such improvement.

Improvements made by *bonâ fide* holders under defective titles.

The amount to be paid or secured in respect of such improvement shall be the estimated value thereof at the time of the eviction.

When under the circumstances aforesaid the transferee has planted or sown on the property crops which are growing when he is evicted therefrom, he is entitled to such crops and to free ingress and egress to reap and carry them.

Bill III, s. 10: 8 Beng. [illegible]; 7 Mad. [illegible]; 11 Bom. [illegible]; 64, 1867, p. 301; 10 W. R. 469; 7 W. R. 225; 15 W. R. [illegible]; [illegible]; 11 [illegible]; 1 Ch. [illegible]; 20 [illegible] 5 W. R. P. [illegible] 43; 8 Beng. [illegible]; 8 [illegible]; [illegible]; 5 Ch. [illegible]; [illegible]; Ch. [illegible] s. [illegible]; Ch. [illegible] 1 of [illegible]; [illegible].

52. During the active prosecution in any Court having authority in British India, or established beyond the limits of British India by the Governor General in Council, of a contentious suit or proceeding in which any right to immoveable property is directly and specifically in question, the property cannot be transferred or otherwise dealt with by any party to the suit or proceeding so as to affect the rights of any other party thereto under any decree or order which may be made therein, except under the authority of the Court and on such terms as it may impose.

Transfer of property pending suit relating thereto.

53. Every transfer or forfeiture of immoveable property made or incurred with intent to defraud prior or subsequent transferees thereof for consideration, or co-owners or other persons having an interest in such property, or to defeat or delay the creditors of the transferor, is voidable at the option of any person so defrauded, defeated or delayed.

Fraudulent transfer.

Where the effect of any transfer or forfeiture of immoveable property is to defraud, defeat or delay any such person, and such transfer or forfeiture is made or incurred gratuitously or for a grossly inadequate consideration, the transfer or forfeiture may be presumed to have been made or incurred with such intent as aforesaid.

Nothing contained in this section shall impair the rights of any transferee or person benefiting by the forfeiture in good faith and for consideration, or the rights of Government arising on any forfeiture for non-payment of land-revenue.

CHAPTER III.

OF SALES OF IMMOVEABLE PROPERTY.

54. "Sale" is a transfer of ownership in exchange for a price paid or promised or part-paid and part-promised.

"Sale" defined.

Such transfer, in the case of immoveable property of the value of one hundred rupees and upwards, can be made only by a registered assurance.

Sale how made.

In the case of immoveable property of a value less than one hundred rupees, such transfer may be made either by a registered assurance or by delivery of the property.

Delivery of immoveable property takes place, in the case of a reversion or other intangible thing—when the parties consent to the delivery; and in the case of other immoveable property—when the seller places the buyer, or such person as he directs, in possession of the property.

Bill III, s. 11: 14 Beng. 307, 312: N.-W. P., 1866, p. 87; 12 Suth. W. R. P., C. 6: as to the delivery of assurance, W. R. 1864, p. 222: 5 W. R. 248: Mor. N. S. 356.

A contract for the sale of immoveable property is a contract that a sale of such property shall take place on terms settled between the parties.

Contract for sale.

Right of redeem, N.-W. P., 1866, p. 87.

It does not, of itself, create any interest in or charge on such property.

Bill III, s. 1

55. In the absence of a contract to the contrary, the buyer and the seller of immoveable property respectively are subject to the liabilities, and have the rights, mentioned in the rules next following, or such of them as are applicable to the property sold:

Bill III, s. Report, s.

Rights and liabilities of buyer and seller.

(*a*). The seller is bound—

(1) to disclose to the buyer any defect in the property of which the seller is, and the buyer is not, aware, and which the buyer could not with ordinary care discover;

Bill III, s. 1 (a).

(2) to produce to the buyer on his request for examination all documents of title relating to the property which are in the seller's possession or power:

Bill III, s. 1 (a).

Bill III, s. 12 (a).

(3) to answer to the best of his information all relevant questions put to him by the buyer in respect to the property or the title thereto;

Bill III, s. 12 (h).

(4) on payment or tender of the amount due in respect of the price, to execute a proper assurance of the property when the buyer tenders it to him for execution at a proper time and place, and, where the property is, or forms part of, a revenue-paying estate, to present an application to the proper officer for the requisite alteration of the revenue-register;

New.

(5) between the date of the contract of sale and the delivery of the property, to take as much care of the property and all documents of title relating thereto which are in his possession, as an owner of ordinary prudence would take of such property and documents;

(6) to give, on being so required, the buyer, or such person as he directs, such possession of the property as its nature admits;

Bill III, s. 12 (g).

(7) to pay all public charges and rent accrued due in respect of the property up to the date of the sale, the interest on all incumbrances on such property due on such date; and, where the property is sold free from incumbrances, to discharge all incumbrances on the property then existing; and

Bill III, s. 12 (i).

(8) where the ownership of the property has passed to the buyer, to deliver to the buyer all documents of title relating thereto which are in the seller's possession or power:

provided that (1), where the seller retains any part of the property comprised in such documents, he is entitled to retain them all, and (2), where the whole of such property is sold to different buyers, the buyer of the lot of greatest value is entitled to such documents. But in case (1) the seller, and in case (2) the buyer of the lot of greatest value, is bound, upon every reasonable request by the buyer, or by any of the other buyers, as the case may be, or by any person claiming under him, and at the cost of the person making the request, to produce the said documents and furnish such true copies thereof as he may require; and, in the meantime, the seller or the buyer, as the case may be, of the lot of greatest value must keep the said documents safe, uncancelled und undefaced, unless prevented from so doing by fire or other inevitable accident;

Bill III, s. 12 (j).

(9) and the seller shall be deemed to contract that the interest which he assumes to transfer to the buyer subsists and that he has power to transfer the same:

provided that where the sale is made by a person in a fiduciary character, he shall be deemed to contract to the like effect, so far only as his knowledge extends.

(b). The seller is entitled—

Bill III, s. 12 (k).

(1) to the rents and profits of the property till the ownership thereof passes to the buyer;

Bill III, s. 12 (l).

(2) where the ownership of the property has passed to the buyer before payment of the whole of the purchase-money, to a charge upon the property in the hands of the buyer for the amount of the purchase-money, or any part thereof remaining unpaid, and for interest on such amount or part.

(c). The buyer is bound—

Bill III, s. 13 (b).

(1) to disclose to the seller any fact as to the nature or extent of the seller's interest in the property of which the buyer is, and the seller is not, aware, and which increases the value of such interest;

Bill III, s. 12 (g). See Canadian Code, s. 1533.

(2) to pay or tender, at the time and place of completing the transfer, the purchase-money to the seller or such person as he directs: provided that where the property is sold free from incumbrances, the buyer may retain out of the purchase-money the amount of the incumbrances on the property existing at the date of the transfer, and shall pay the amount so retained to the persons entitled thereto;

Bill III, s. 12 (c).

(3) to retransfer the property where the ownership thereof has passed to the buyer before payment of the purchase-money and he fails to pay or tender such money in accordance with the last preceding clause;

Bill III, s. 12 (e).

(4) where the ownership of the property has passed to the buyer, to bear any loss arising from the destruction, injury or decrease in value of the property not caused by the seller;

Bill III, s. 15.

(5) where the ownership of the property has passed to the buyer, as between himself and the seller, to pay all public charges and rent which may become payable in respect of the property, the principal moneys due on the incumbrances subject to which the property is sold, and the interest thereon afterwards accruing due.

(d). The buyer is entitled—

Bill III, s. 13 (c).

(1) where the ownership of the property has passed to him, to the benefit of any improvement in, or increase in value of, the property, and to the rents and profits thereof;

Bill III, s. 12 (e).

(2) unless he has improperly declined to accept delivery of the property, to a charge on the property, as against the seller, to the extent of the seller's interest therein, for the amount of any purchase-money properly paid by the buyer in anticipation of the delivery and for interest on such amount; and when he properly declines to accept the delivery, also for the earnest (if any) and for the costs (if any) awarded to him of a suit to compel specific performance of the contract or to obtain a decree for its rescission.

Bill III, s. 13.

An omission to make such disclosures as are mentioned in this section, paragraph (a), clause (1), and paragraph (c), clause (1), is fraudulent.

Bill III, s. 19.

Sale of one of two properties subject to a common charge.

56. Where two properties are subject to a common charge, and one of the properties is sold to a buyer without notice of the charge the buyer is, as against the seller and the incumbrancer, in the absence of a contract to the contrary, entitled to have the charge satisfied out of the other property, so far as such property will extend.

CHAPTER IV.

OF MORTGAGES OF IMMOVEABLE PROPERTY AND CHARGES.

Bill III, s. 21: Act XXVIII of 1866, s. 19: 23 & 24 Vic., c. 145, s. 24:

"Mortgage," "mortgagor" and "mortgagee" defined.

57. (a). A mortgage is the transfer of an interest in specific immoveable property for the purpose of securing the payment of money advanced or to be advanced by way of loan, an existing or future debt, or the performance of an engagement which may give rise to a pecuniary liability.

English practice followed, with necessary modifications, 5 Bom. A. C. J. 109. Mortgagor need not have present ownership, N.-W. P., 1872, p. 11, *sed qu.* 12 Moo. I. A. 275, 306. Colebr. Dig. B. i, c. III, t. 96.

The transferor is called a mortgagor, the transferee a mortgagee; the principal money and interest of which payment is secured are called the mortgage-money, and the assurance (if any) by which the transfer is effected is called a mortgage-deed.

Simple mortgage.

(b). Where the mortgagor binds himself expressly and personally to repay the mortgage-money on a certain date, and, without delivering possession of the property, makes it a collateral security for the repayment, the transaction is called a simple mortgage and the mortgagee a simple mortgagee.

Mortgage by conditional sale.

(c). Where the mortgagor, without delivering possession of the property, ostensibly sells it—

on condition that on default of payment of the mortgage-money on date agreed on the sale shall become absolute, or

on condition that on such payment being made the sale shall become void, or

on condition that on such payment being made the buyer shall transfer the property to the seller,

the transaction is called a mortgage by conditional sale and the mortgagee a mortgagee by conditional sale.

Usufructuary mortgage.

(d). Where the mortgagor delivers or agrees to deliver actual possession of the mortgaged property to the mortgagee on the terms that he shall retain such possession until repayment of the mortgage-money, applying the rents and profits accruing from such property in reduction of the amount for the time being due under the mortgage, or accepting such rents and profits in lieu of interest, the transaction is called an usufructuary mortgage and the mortgagee an usufructuary mortgagee.

Macph. 8, 12, 59: R. B. Ghose 218, 219: 2 Moo. I. A. 483.

English mortgage.

(e). Where the mortgagor binds himself to repay the mortgage-money on a certain date, and transfers the mortgaged property absolutely to the mortgagee, but subject to a condition that he will retransfer it to the mortgagor upon payment of the mortgage-money as agreed, the transaction is called an English mortgage.

Bill III, s. 22. See Macph. 53:

Mortgage when to be by assurance.

58. Where the principal money secured is one hundred rupees or upwards, a mortgage can be effected only by registered assurance signed by the mortgagor and attested by at least two witnesses.

R. B. Ghose 64: This applies to defeasances.

Where the principal money secured is less than one hundred rupees, a mortgage may be effected either by registered assurance signed and attested as aforesaid or by delivery of the property.

Rights and Liabilities of Mortgagor.

Bill III, s. 28. 5 Beng. 450: 6 Beng. 562: 2 Mad. 420: 7 Mad. 395: In Cen. Provs. 13 Beng. 205: N.-W. P., 1868, p. 204: Bomb. 237: no redemption before expiration of period named. Redemption after fixed time has expired, 9 Bomb. 66. See 7 Ben. 136 (P. C.)

Right of mortgagor to redeem.

59. At any time after the principal money has become payable, the mortgagor, or, where there are more mortgagors than one, any of the mortgagors, has a right, on payment or tender, at a proper time and place, of all sums (if any) remaining due on the mortgage, to require the mortgagee (a) to re-deliver the mortgage-deed, if any, (b) where the mortgagee is in possession of the mortgaged property, to deliver possession thereof to the mortgagor, and (c) at the cost of the mortgagor either to re-transfer the mortgaged property to him, or to execute, and (where the mortgage has been effected by registered assurance) to have registered, an acknowledgment in writing that any right in derogation of his ownership or other interest transferred to the mortgagee has been extinguished.

6 Bom. A. C. J. 265: N.-W. P., 1869, p. 128.

provided that the right conferred by this section has not been extinguished by act of the parties or by order of a court.

The right conferred by this section is called a right to redeem, and a suit to enforce it is called a suit for redemption.

N. W. P., 1867, p. 88. 20 W. R., 24 W. R. N.-W.P., 1870, p. N.-W.P., 1872, p. N.-W.P., 1873, p. R.B. G 198: 15 Beng 303.

Redemption of portion of mortgaged property.

Nothing in this section shall entitle a person interested in a share only of the mortgaged property to redeem his own share only, on payment of a proportionate part of the amount remaining due on the mortgage, except where a mortgagee, or, if there are more mortgagees than one, all such mortgagees, has or have acquired, in whole or in part, the share of a mortgagee.

Bill III, s. 29 *contra*, 6 Bom. A. C. J 90. But see R. G. 330, 331.

Right to redeem one of two properties separately mortgaged.

60. If the owner of two or more properties makes separate mortgages on them by separate assurances, each mortgage may, in the absence of a contract to the contrary, be dealt with irrespectively of the other though the mortgages are made in favour of the same mortgagee.

Illustration.

A, the owner of farms Z and Y, mortgages Z to B for Rs. 1,000. A afterwards mortgages Y to B for Rs. 1,000 making no stipulation as to any additional charge on Z. A may institute a suit for the redemption of the mortgage on Z alone.

Bill III, s. 28 clause (c).

Right of usufructuary mortgagor to recover possession.

61. In the case of a usufructuary mortgage, the mortgagor has a right to recover possession of the property—

(a) where the mortgagee is authorized to pay himself from the rents and profits of the property the principal money and interest thereof,—when such money and interest are paid;

(*b*) where the mortgagee is authorized to pay himself from such rents and profits the interest of the principal money,—when the term (if any) prescribed for the payment of the mortgage money has expired and the mortgagor pays or tenders to the mortgagee the principal money or deposits it in the court as hereinafter provided.

Bill III, s. 25: 10 Bom. 369: 11 Bom. 32.

62. Where mortgaged property in possession of the mortgagee has, during the continuance of the mortgage, received any accession, the mortgagor, upon redemption, shall, in the absence of a contract to the contrary, be entitled as against the mortgagee to such accession.

Accession to mortgaged property.

Where such accession has been acquired at the cost of the mortgagee, and is capable of separate possession or enjoyment without determent to the principal property, the mortgagor desiring to take the accession must pay to the mortgagee the cost of acquiring it. If such separate possession or enjoyment is not possible, the accession must be delivered with the property, the mortgagor being liable in the case of an acquisition necessary to preserve the property from destruction, forfeiture, or sale, or made with his assent, to pay the proper cost thereof, as an addition to the principal money, at the same rate of interest.

Accession acquired in virtue of the transferred ownership.

In the case last mentioned the profits, if any, arising from the accession shall be credited to the mortgagor.

Where the mortgage is usufructuary and the accession has been acquired at the cost of the mortgagee, the profits, if any arising, from the accession shall, in the absence of a contract to the contrary, be set-off against interest, if any, payable on the money so expended.

Illustration.

10 Bom. 369, 371, and see N.-W.P., 1866, p. 281.

A mortgages to B a field, the trees on which are the property of Government. B enters into possession of the field, and as occupant thereof buys the trees. A redeems the field. He is entitled to the trees on payment of their cost.

Bill III, s. 26.

63. Where the mortgaged property is a lease for a term of years, and the mortgagee obtains a renewal of the lease, the mortgagor, upon redemption, shall, in the absence of a contract to the contrary, have the benefit of the new lease.

Renewal of mortgaged lease.

Bill III, s. 24: N.W.P., 1867, p. 199.

64. In the absence of a contract to the contrary, the mortgagor shall be deemed to contract with the mortgagee,

Implied contracts by mortgagor.

(*a*) that the interest which the mortgagor assumes to transfer to the mortgagee subsists and that the mortgagor has power to transfer the same;

S.D.A. 1857, p. 1195; 1853, p. 575.

(*b*) that the mortgagor will defend, or, if the mortgagee be in possession, enable him to defend, the mortgagor's title to the mortgaged property;

(*c*) that the mortgagor will pay all public charges accruing due in respect of the property;

Effect of forfeiture of lease, N.-W.P., 1869, p. 128.

(*d*) and, where the mortgaged property is a lease for a term of years, that the rent payable under the lease, the conditions contained therein, and the contracts binding on the lessee have been paid, performed and observed down to the commencement of the mortgage; and that the mortgagor will, so long as the security exists, pay the rent reserved by the lease, or, if the lease be renewed, the renewed lease, perform the conditions contained therein and observe the contracts binding on the lessee, and indemnify the mortgagee against all claims sustained by reason of the non-payment of the said rent or the non-performance or non-observance of the said conditions and contracts;

(*e*) and, where the mortgage is a second or subsequent incumbrance on the property, that the mortgagor will pay the interest from time to time accruing due on each prior incumbrance as and when it becomes due, and will at the proper time discharge the principal money due on such prior incumbrance.

Nothing in clause (*e*), or in clause (*d*), so far as it relates to the payment of future rent, applies in the case of an usufructuary mortgage.

Bill III, s. 27.

65. A mortgagor in possession of the mortgaged property is not liable to the mortgagee for allowing the property to deteriorate; but he must not commit any act which is destructive or permanently injurious thereto, if the security is insufficient or will be rendered insufficient by such act.

Waste by mortgagor in possession.

Macph. 109: R. B. Ghose 147.

Explanation.—A security is insufficient within the meaning of this section unless the value of the mortgaged property exceeds by one-third, or, if consisting of buildings, exceeds by one-half, the amount for the time being due on the mortgage.

Lewin on Trusts, p. 263.

Rights and Liabilities of Mortgagee.

Bill III, s. 30. 2 Mad. 289: N.-W. P. 1870, p. 311: No foreclosure before expiration of period named. 2 Bomb. 242: Mortgagee's right to sale, 7 Bomb. A. C. J. 146: 9 Bomb. 12.

66. In the absence of a contract to the contrary, the mortgagee has, at any time after the mortgage-money has become payable to him, and before a decree has been made for the redemption of the mortgaged property, or the mortgage-money has been paid or deposited as hereinafter provided, a right to obtain from the Court an order that the mortgagor shall be absolutely debarred of his right to redeem the property, or an order that the property be sold.

Right to foreclosure or sale.

A suit to obtain an order that a mortgagor shall be absolutely debarred of his right to redeem the mortgaged property is called a suit for foreclosure.

Nothing in this section shall be deemed—

Simple mortgagee, N.-W. P. 1869, p. 184: Usufructuary, N.-W. P. 1875, p. 55. Fisher 518, 575: Qy. as to conditional mortgagees.

(*a*) to authorize a simple mortgagee as such to institute a suit for foreclosure, or an usufructuary mortgagee as such to institute a suit for foreclosure or sale, or a mortgagee by conditional sale as such to institute a suit for sale; or

(*b*) to authorize a mortgagor who holds the mortgagee's rights as his trust or legal representative and who may sue for a sale of the property to institute a suit for foreclosure; or

Cases *contra*, Macph. 195, 196.

(*c*) to authorize the mortgagee of a railway, canal or other work in the maintenance of which the public are interested, to institute a suit for foreclosure or sale; or

(*d*) to authorize a person interested in part only of the mortgage-money to institute a suit relating only to a corresponding part of the mortgaged property: unless the mortgagees have, with the consent of the mortgagor, severed their interests under the mortgage.

Bill III, s. 34.

67. The mortgagee has a right to sue the mortgagor for the mortgage-money in the following cases only:—

Right to sue for mortgage-money.

6 W. R. 283.

(*a*) where the mortgagor binds himself to repay the same:

Macph. 233. Act XXIII of 1871, s. 46: 25 W. R. 7 (partial deprivation).

(*b*) where the mortgagee is deprived of the whole or part of his security by or in consequence of the wrongful act or default of the mortgagor:

4 Moo. I. A. 464: Marsh. 209: 7 S. D. A. 47: N.-W. P. 1860, p. 28: So in the case of a Kánam mortgage, 2 Mad. 315: 6 W. R. 283 (power to usufructuary mortgagee).

(*c*) where the mortgagee being entitled to possession of the property, the mortgagor fails to deliver the same to him, or to secure the possession thereof to him without disturbance by the mortgagor or any other person.

Where, by any cause other than the wrongful act or default of the mortgagor or mortgagee, the mortgaged property has been wholly or partially destroyed, or the security is rendered insufficient as defined in section sixty-five, the mortgagee may require the mortgagor to give him within a reasonable time another sufficient security for his debt, and, if the mortgagor fails so to do, may sue him for the mortgage-money.

Bill III, s. 35. 8 Bomb. A. C. J. 142: Muhammadan law, Macph. 2.

68. A power conferred by the mortgage-deed on the mortgagee, or on any person on his behalf, to sell or concur in selling the mortgaged property, or any part thereof, is invalid, except where—

Power of sale when invalid.

(*a*) the principal money originally secured is five hundred rupees or upwards; or

(*b*) the mortgagee is the Secretary of State for India in Council; or

(*c*) the mortgaged property or any part thereof is situate within the towns of Calcutta, Madras, Bombay, Karáchí or Rangoon.

Act No. XXVIII of 1866, section 6, is repealed so far as it is inconsistent with this section.

Bill III, s. 37: 11 Bomb. 32.

69. If, after the date of the mortgage, any accession is made to the mortgaged property, the mortgagee, in the absence of a contract to the contrary, shall, for the purposes of the security, be entitled to such accession.

Accession to mortgaged property.

Illustrations.

(*a*). A mortgages to B a certain field bordering on a river. The field is increased by alluvion. For the purposes of his security, B is entitled to the increase.

(*b*). A mortgages a certain plot of building-land to B and afterwards erects a house on the plot. For the purposes of his security, B is entitled to the house as well as the plot.

Bill III, s. 38.

70. When the mortgaged property is a lease for a term of years, and the mortgagor obtains a renewal of the lease, the mortgagee, in the absence of a contract to the contrary, shall, for the purposes of the security, be entitled to the new lease.

Renewal of mortgaged lease.

Bill III, s. 39.

71. When, during the continuance of the mortgage, the mortgagee takes possession of the mortgaged property, he may spend such money as is necessary—

Rights of mortgagee in possession.

Macph. 109, 113, 252: 1 Bomb. 199, 203: 5 Bomb A. C. J. 109, 116.

(*a*) for the due management of the property and the collection of the rents and profits thereof;

N.-W. P., 1867, p. 187.

(*b*) for its preservation from destruction, forfeiture or sale;

1 W. R. 133.

(*c*) for supporting the mortgagor's title to the property;

(*d*) for making his own title thereto good against the mortgagor; and

11 Moo. I. A. 241.

(*e*) when the mortgaged property is renewable leasehold, for the renewal of the lease;

and may, in the absence of a contract to the contrary, add such money to the principal-money, at the rate of interest payable on the principal and where no such rate is fixed at the rate of nine per cent. per annum.

23 & 24 Vic c. 145, s. 11 2 Dav. 606.

Where the property is by its nature insurable at ordinary rates, the mortgagee may also, in the absence of a contract to the contrary, insure and keep insured against loss or damage by fire the whole or any part of such property, and add the premiums paid for any such insurance to the principal-money at the same rate of interest.

Bill III, s. [illegible] Macph. 113, 254: I. W. R. 2: 16 W. R. [illegible]

72. Where mortgaged property is sold through failure to pay arrears of revenue or rent due in respect thereof, the mortgagee has a charge on the surplus, if any, of the proceeds, after payment thereout of the said arrears, for the amount remaining due on the mortgage, unless the sale has been occasioned by some default on his part.

Charge on proceeds of revenue-sale.

Bill III, s. [illegible] Report, ss. [illegible] 33.

73. Any second or other subsequent mortgagee may at any time after the amount due on the next prior mortgage has become payable, tender such amount to the next prior mortgagee, and such mortgagee is bound to accept such tender and to give a receipt for such amount; and (subject to the provisions of the law for the time being in force regulating the registration of documents) the subsequent mortgagee shall, on obtaining such receipt, acquire, in respect of the property, all the rights and powers of the mortgagee, as such, to whom he has made such tender.

Right of subsequent mortgagee to pay off prior mortgagees.

Bill III, s. [illegible]

74. Every second or other subsequent mortgagee has, so far as regards redemption, foreclosure and sale of the mortgaged pro-

Rights of mesne mortgagee against prior and subsequent mortgagees.

perty, the same rights against the prior mortgagee or mortgagees as his mortgagor has against such prior mortgagee or mortgagees, and the same rights against the subsequent mortgagees (if any) as he has against his mortgagor.

Bill III, s. 39.

75. When, during the continuance of the mortgage, the mortgagee takes possession of the mortgaged property,—

Liabilities of mortgagee in possession.

2 Bom. 222: Act IX of 1872, s. 151: Fisher, s. 1580.

(*a*) he must manage the property as a person of ordinary prudence would manage it if it were his own;

8 Chan. Div. 427: N.-W. P., 1875, p. 100.

(*b*) he must use his best endeavours to collect the rents and profits thereof;

2 Bomb. 231.

(*c*) he must, in the absence of a contract to the contrary, out of the income of the property pay the Government revenue, all other charges of a public nature accruing due in respect thereof during such possession and any arrears of rent in default of payment of which the property may be summarily sold;

Macph. 113, 119.

2 W. R. 488: 4 Y. & C. Appendix, 507: Fisher, s. 1530.

(*d*) he must, in the absence of a contract to the contrary, make such necessary repairs of the property as he can pay for out of the rents and profits thereof after deducting from such rents and profits the payments mentioned in clause (*c*) and the interest on the principal-money;

Bill III, s. 41:

(*e*) he must not commit any act which is destructive or permanently injurious to the property;

Macph. 118, 119, citing 7 N.-W. P. 436: 9 N.-W. P. 1: Act I of 1877, s. 54.

(*f*) where he has insured the whole or any part of the property against loss or damage by fire, he must, in case of such loss or damage, apply any money which he actually receives under the policy, or so much thereof as may be necessary, in reinstating the property;

2 Beng. P. C. 55; 5 W. R. 53, 271, &c.: Macph. 119.

(*g*) he must keep clear, full and accurate accounts of all sums received and spent by him as mortgagee and, at any time during the continuance of the mortgage, give the mortgagor, at his request and cost, true copies of such accounts and of the vouchers by which they are supported;

5 Bomb. A. C. J. 196: 12 Bomb. 88: 10 Beng. 386: N.-W. P. 1866, p. 132; *ibid.* 1868, p. 153: When he cultivates, 7 W. R. 244; B. B. Ghose 262.

(*h*) his receipts from the mortgaged property, or, where such property is personally occupied by him, a fair occupation-rent in respect thereof, shall, after deducting the expenses mentioned in clauses (*c*), (*d*), and (*e*), and interest thereon, be debited against him in reduction of the amount (if any) from time to time due to him on account of interest on the mortgage-money and, so far as such receipts exceed any interest due, in reduction or discharge of the mortgage-money. The surplus, if any, shall be paid to the mortgagor;

2 Moo. I. A. Ca. 1.

Macph. 159, 160.

(*i*) when the mortgagor tenders, or deposits in manner hereinafter provided, the amount for the time being due on the mortgage, the mortgagee must, notwithstanding the provisions in the other clauses of this section, account for his gross receipts from the mortgaged property from the date of the tender or from the earliest time when he could take such amount out of court, as the case may be.

If the mortgagee fail to perform any of the duties imposed upon him by this section, he may, when accounts are taken in pursuance of a decree made under this chapter, be debited with the loss, if any, occasioned by such failure.

Bill III, s. 33, last para.

Loss occasioned by his default.

76. Nothing in section seventy-five, clauses (*b*), (*d*), (*g*) and (*h*), applies to cases where there is a contract between the mortgagee and the mortgagor that the receipts from the mortgaged property shall, so long as the mortgagee is in possession of the property, be taken in lieu of interest on the principal-money, or of such interest and defined portions of the principal.

Bill III, s. 40: Sev. 333. See 10 Moo. I. A. 340.

Receipts in lieu of interest.

Priority.

77. Where, through the fraud, misrepresentation or gross neglect of a prior mortgagee, another person has been induced to advance money on the security of the mortgaged property, the prior mortgagee shall be postponed to the subsequent mortgagee.

Bill III, s. 44: Evidence Act, s. 115: N.-W. P. 1868 p. 402: 4 Mad. 373: 2 Moo. I. A. 487: 11 W. R. 286: Hindú mortgagee in possession, 8 Bom. A. C. J. 50, 55, in Guzerat, 11 Bom.

Postponement of prior mortgagee.

78. If a mortgage made to secure future advances, the performance of an engagement or the balance of a running account expresses the maximum to be secured thereby, a subsequent mortgage on the same property shall, if made with notice of the prior mortgage, or if the instrument effecting the prior mortgage is registered, be postponed to the prior mortgage in respect of all advances or debits not exceeding the maximum, though made or allowed with notice of the subsequent mortgage.

Bill III, s. 35: Report, s. 29.

Mortgage to secure uncertain amount when maximum is expressed.

Illustration.

A mortgages Sultánpur to his bankers, B & Co., to secure the balance of his account with them to the extent of Rs. 10,000. A then mortgages Sultánpur to C, to secure Rs. 10,000; and C gives notice thereof to B & Co. At the date of the second mortgage, the balance due to B & Co. does not exceed Rs. 5,000. B & Co. subsequently advance to A sums making the balance of the account against him exceed the sum of Rs. 10,000. B & Co. are entitled, to the extent of Rs. 10,000, to priority over C.

79. No mortgagee paying off a prior mortgage, whether with or without notice of an intermediate mortgage, shall thereby acquire any priority in respect of his original security. And, except in the case provided for by section seventy-eight, no mortgagee making a subsequent advance to the mortgagor, whether with or without notice of an intermediate mortgage, shall thereby acquire any priority in respect of his security for such subsequent advance.

Bill III, s. 46: Report, s. 34: 2 Beng. App. 45: 5 Beng. 463: 11 W. R. 310.

Tacking abolished.

Marshalling and Contribution.

Fisher 704: Bill III, s. 47: W. R. 1864, p. 374: 1 W. R. 353: 7 W. R. 483: 12 W. R. 114: Macph. 205.

80. If the owner of two properties mortgages them both to one person and then mortgages one of the properties to another person who has not notice of the former mortgage, the second mortgagee is entitled to have the debt of the first mortgagee satisfied out of the property not mortgaged to the second mortgagee, so far as such property will extend; but not so as to prejudice the rights of the first mortgagee or of any other person having an incumbrance on either property.

Marshalling securities.

Macph. 136.

Bill III, s. 48:

81. Where several properties, whether of one or several owners, are mortgaged to secure one debt, each property is liable to contribute rateably to the debt secured by the mortgage, after deducting from the value of each property the amount of any other incumbrance to which it is subject at the date of the mortgage.

Fisher 700.

Contribution to mortgage-debt.

Where of two properties belonging to the same owner, one is mortgaged to secure one debt, and then both are mortgaged to secure another debt, and the former debt is paid out of the former property, each property is liable to contribute rateably to the latter debt, after deducting the amount of the former debt from the value of the property out of which it has been paid.

Fisher 701.

Nothing in this section applies to a property liable under section eighty to the claim of the second mortgagee.

Deposit in Court.

Bill III, s. 23: [illegible] s. 2: [illegible] 171.

82. At any time after the principal money has become payable and before a suit for redemption of the mortgaged property is barred, the mortgagor, or any other person entitled to institute such suit, may deposit, in any court in which he might have instituted such suit, to the account of the mortgagee the amount remaining due on the mortgage.

Power to deposit in court money due on mortgage.

Bill III, s. 23: Beng. Reg. I of 1798, s. 2: Macph. 171.

The Court shall thereupon cause written notice of the deposit to be served on the mortgagee, and the mortgagee may, on presenting a petition (verified in manner prescribed by law for the verification of plaints) stating the amount then due on the mortgage, and his willingness to accept the money so deposited in full discharge of such amount, and on depositing in the same court the mortgage-deed if then in his possession or power, apply for and receive the money, and the mortgage-deed so deposited shall be delivered to the mortgagor or such other person as aforesaid.

Right to money deposited by mortgagor.

Bill III, s. 22: 9 N.-W. P. 1. Macph. 159, 160.

83. When the mortgagor or such other person as aforesaid has tendered or deposited in court under section eighty-two the amount remaining due on the mortgage, interest on the principal money shall cease from the date of the tender or as soon as the mortgagor or such other person as aforesaid has done all that has to be done by him to enable the mortgagee to take such amount out of court, as the case may be.

Cessation of interest.

Suits for Foreclosure, Sale or Redemption.

Bill III, s. 49.

84. Subject to the provisions of the Code of Civil Procedure, section 437, all persons having an interest in the property comprised in a mortgage must be joined as parties to any suit under this chapter, relating to such mortgage: provided that the plaintiff has notice of such interest.*

Parties to suits for foreclosure, sale and redemption.

Foreclosure and Sale.

Bill III, s. 50.

85. In a suit for foreclosure, if the plaintiff succeed, the Court shall make a decree, ordering that an account be taken of what will be due to the plaintiff for principal and interest on the mortgage and for his costs of the suit, if any, awarded to him, on the day next hereinafter referred to, or declaring the amount so due at the date of such decree,

Decree in foreclosure-suit.

and ordering that, upon the defendant paying to the plaintiff or into court the amount so due, on a day within six months from the date of declaring in court the amount so due, to be fixed by the court, the plaintiff shall deliver up to the defendant, or to such person as he appoints, all documents in his possession or power relating to the mortgaged property, and shall transfer the property to the defendant free from all incumbrances created by the plaintiff or any person claiming under him, or, where the plaintiff claims by derived title, by those under whom he claims; and shall, if necessary, put the defendant into possession of the property; but

that, if the payment is not made on or before the day to be fixed by the Court, the defendant shall be absolutely debarred of all right to redeem the property.

Bill III, s. 51.

86. If payment is made of such amount and of such subsequent costs as are mentioned in section ninety-three, the defendant shall (if necessary) be put into possession of the mortgaged property.

Procedure in case of payment of amount due.

---

* 14 Moo. I. A. 101: 1 W. R. 176: 21 W. R. 428: explained by Macph. 146: Seton i, 442, see Act X of 1877, sec. 32: 5 Bomb. O. C. J. 76 (legal representative of deceased mortgagor): 8 Beng. 104 (purchaser from mortgagor): Marshall 292, claimants of right of redemption, N.-W. P. 1868, p. 144.

If such payment is not so made, the plaintiff may apply to the Court for an order that the defendant and all persons claiming through or under him be debarred absolutely of all right to redeem the mortgaged property, and the Court shall then pass such order, and may, if necessary, deliver possession of the property to the plaintiff.

Order absolute for foreclosure.

W. R. 91.

Provided that the Court may, upon good cause shewn, and upon such terms, if any, as it thinks fit, from time to time postpone the day appointed for such payment.

Power to enlarge time.

On the passing of an order under the second paragraph of this section the debt secured by the mortgage shall be deemed to be discharged.

In the Code of Civil Procedure, schedule IV, No. 129, for the words "Final Decree," the words "Decree absolute" shall be substituted.

Bill III, sec. 52.

87. In a suit for sale, if the plaintiff succeed, the Court shall pass a decree to the effect mentioned in the first and second paragraphs of section eighty-five, and also ordering that, in default of the defendant paying as therein mentioned, the mortgaged property or a sufficient part thereof be sold, and that the proceeds of the sale (after defraying thereout the expenses of the sale) be paid into Court and applied in payment of what is so found due to the plaintiff and that the balance, if any, be paid to the defendant or other persons entitled to receive the same.

Decree for sale.

Power to decree sale at instance of mortgagee.

In a suit for foreclosure, if the plaintiff succeed the Court may at his instance pass a like decree in lieu of a decree for foreclosure.

15 & 16 Vic., c. 86, s. 48.

When the mortgagee sues only for foreclosure, and not for foreclosure or sale, if the Court consider that he will not be damnified by a sale and if the defendant furnishes such security as the Court thinks sufficient for the full and prompt payment of the balance due for the time being by him on the mortgage, the Court may, at the instance of the defendant, pass a like decree.

Power to decree sale in foreclosure-suit at instance of mortgagor.

Bill III, s. 53.

88. If in any case under section eighty-seven the defendant pays to the plaintiff or into court on the day fixed as aforesaid the amount due under the mortgage, the costs, if any, awarded to him and such subsequent costs as are mentioned in section ninety-three, the defendant shall (if necessary) be put in possession of the mortgaged property; but if such payment is not so made, the plaintiff or the defendant, as the case may be, may apply to the Court for an order absolute for sale of the mortgaged property, and the Court shall then pass an order that such property, or a sufficient part thereof, be sold, and that the proceeds of the sale be dealt with as is mentioned in section eighty-seven; and thereupon the defendant's right to redeem and the security shall both be extinguished.

Procedure when defendant pays amount due.

Order absolute for sale.

89. When the nett proceeds of any such sale are insufficient to pay the amount due for the time being on the mortgage, the balance, if legally recoverable from the defendant otherwise than out of the property sold, may be recovered either (if the Court thinks fit) in the same suit in the same manner as under a decree for money, or by any other legal process open to the mortgagee.

Bill III, s. 54: Kent IV. 207.

Recovery of balance due on mortgage.

Redemption.

90. Besides the mortgagor, any of the following persons may redeem, or institute a suit for redemption of, the mortgaged property:—

Bill III, s. 55.

Who may sue for redemption.

(*a*) any person (other than the mortgagee of the interest sought to be redeemed) having any interest in or charge upon the property;

(*b*) any person having any interest in or charge upon the right to redeem the property; 3 W. R. 230; 6 W. R. 230. &c.

(*c*) any surety for the payment of the mortgage-debt or any part thereof; But see 17 W. R. 272.

(*d*) the guardian of the property of a minor mortgagor;

(*e*) the committee or other legal curator of a lunatic or idiot mortgagor;

(*f*) the judgment-creditor of the mortgagor, when he has obtained execution;

(*g*) a creditor of the mortgagor who has, in a suit for the administration of his estate obtained a decree for sale of the mortgaged property. Fisher, 768.

91. In a suit for redemption, if the plaintiff succeed, the Court shall pass a decree— Bill III, s. 56: See Code, C. P., s. 461: N.-W. P., 1870, p. 207.

Decree in redemption-suit.

ordering that an account be taken of what will be due to the defendant for principal and interest on the mortgage, and for his costs of the suit, if any, awarded to him, on the day next hereinafter referred to, or declaring the amount so due at the date of such decree; and

ordering that upon the plaintiff paying to the defendant or into court the amount so due on a day within six months from the date of declaring in court the amount so due, to be fixed by the Court, the defendant shall deliver up to the plaintiff, or to such person as he appoints, all documents in his possession or power relating to the mortgaged property, and shall retransfer it to the plaintiff free from the mortgage and from all incumbrances created by the defendant or any person claiming under him, or, when the defendant claims by derived title, by those under whom he claims, and shall, if necessary, put the plaintiff into possession of the mortgaged property; but

that if such payment is not made on or before the day to be fixed by the Court, the plaintiff shall (unless the mortgage be simple or usufructuary)

be absolutely debarred of all right to redeem the property, or (unless the mortgage be by conditional sale) that the property be sold.

Bill III, s. 57.

92. If payment is made of such amount and of such subsequent costs as are mentioned in section ninety-three, the plaintiff shall, if necessary, be put into possession of the mortgaged property.

In case of redemption, possession.

If such payment is not so made, the defendant may (unless the mortgage is simple or usufructuary) apply to the Court for an order that the plaintiff and all persons claiming through or under him be debarred absolutely of all right to redeem, or (unless the mortgage is by conditional sale) for an order that the mortgaged property be sold.

In default, foreclosure or sale.

If he apply for the former order, the Court shall pass an order that the plaintiff and all persons claiming through or under him be absolutely debarred of all right to redeem the mortgaged property, and may, if necessary, deliver possession of the property to the defendant.

If he apply for the latter order, the Court shall pass an order that such property or a sufficient part thereof be sold, and that the proceeds of the sale (after defraying thereout the expenses of the sale) be paid into Court and applied in payment of what is found due to the defendant and that the balance be paid to the plaintiff or other persons entitled to receive the same.

On the passing of any order under this section the plaintiff's right to redeem and the security shall, as regards the property affected by the order, both be extinguished:

Provided that the Court may upon good cause shewn, and upon such terms, if any, as it thinks fit, from time to time, postpone the day fixed under section ninety-one for payment of the amount due.

Power to enlarge time.

Bill III, s. 59.

93. In finally adjusting the amount to be paid to a mortgagee in case of a redemption or a sale by the Court under this chapter, the Court shall, unless the conduct of the mortgagee has been such as to disentitle him to costs, add to the mortgage-money such costs of suit as have been properly incurred by him since the decree for foreclosure, redemption or sale up to the time of actual payment.

Costs of mortgagee subsequent to decree.

Maeph. 145.

94. Where one of several mortgagors redeems the mortgaged property and obtains possession thereof, he has a charge on the share of each of the other co-mortgagors in the property for his proportion of the costs properly incurred in so redeeming and obtaining possession.

Charge of one of several co-mortgagors who redeems.

Sale of Property subject to prior mortgage.

Bill III, s. 60: Report, s. 25 altered:

95. If any property the sale of which is directed under this chapter is subject to a prior mortgage, the Court may, with the consent of the prior mortgagee, order that the property be sold free from the same, giving to such prior mortgagee the same interest in the proceeds of the sale as he had in the property sold.

Sale of property subject to prior mortgage.

Act X of 1877, s. 295.

Application of proceeds.

96. Such proceeds shall be brought into Court and applied as follows:— Bill III, s. 61: See Act X of 1877, s. 295.

first, in payment of all expenses incident to the sale or properly incurred in any attempted sale;

secondly, if the property has been sold free from any prior mortgage, in payment of whatever is due on account of such mortgage;

thirdly, in payment of all interest due on account of the mortgage in consequence whereof the sale was directed, and of the costs of the suit in which the decree directing the sale was made;

fourthly, in payment of the principal money due on account of that mortgage; and

fifthly, the residue (if any) shall be paid to the person proving himself to be interested in the property sold, or if there be more such persons than one, then to such persons according to their respective interests therein or upon their joint receipt.

Anomalous Mortgages.

97. In the case of a mortgage not being a simple mortgage, a mortgage by conditional sale, an usufructuary mortgage, or an English mortgage, or a combination of the first and third, or the second and third, of such forms, the rights and liabilities of the parties shall be determined by their contract as evidenced in the mortgage-deed, and, so far as such contract does not extend, by local usage: Bill III, s. 62. Bombay Reg. V of 1827, s. 15. 'No precise form is required for a mortgage,' Beng. 272, Couch, C.J.

Mortgages not described in section 56, clauses (*b*), (*c*), (*d*) and (*e*).

Abandonment of security.

98. Where a mortgagee in execution of a decree for the satisfaction of any claim, whether arising under the mortgage or not, attaches and brings to sale the mortgaged property, or the mortgagor's interest therein, he shall be deemed to have abandoned his security thereon, unless before the issue of the proclamation under the Code of Civil Procedure, section 287, he gives notice of such security to the Court executing the decree.

Abandonment of security by mortgagee selling mortgaged property.

Charges.

99. Where immoveable property of one person is by act of parties or operation of law, made security for the payment of money to another, and the transaction does not amount to a mortgage, the latter person is said to have a charge on the property; and all the provisions hereinbefore applied to a mortgagor shall, so far as may be, apply to the owner of such property, and all the provisions hereinbefore applied to a mortgagee instituting a suit for the sale of the mortgaged property shall, so far as may be, apply to the person having such charge. Bill III, s. 63.

Charges.

Nothing in this section applies to the charge of a trustee on the trust-property for expenses properly incurred in the execution of his trust.

Bill III, s. 64: *Swinfen*, v. *Swinfen*, 29 Beav. 199: *Adams* v. *Angell*, 5 Chan. D, 634, 645, 7 Mad. 231: 14 W. R. 491: 3 O'Kin. 184: 5 Beng. 463: 11 Bom. 41.

Extinguishment of charges.

100. Where the owner of a charge or other incumbrance on immoveable property, is or becomes absolutely entitled to that property, the charge or incumbrance shall be extinguished, unless he declares, by express words or necessary implication, that it shall continue to subsist, or such continuance would be for his benefit.

Notice and Tender.

Service or tender on or to agent.

101. Where the person on or to whom any notice or tender is to be served or made under this chapter does not reside in the district in which the mortgaged property or some part thereof is situate, service or tender on or to an agent holding a general power of attorney from such person or otherwise duly authorized to accept such service or tender shall be deemed sufficient.

Where no such person or agent can be found in the said district, or where the person on or to whom such notice or tender should be served or made is unknown to the person required or desiring to serve the notice or make the tender, the latter person may apply to any Court in which a suit might be brought for redemption of the mortgaged property, and such Court shall direct in what manner such notice or tender shall be served or made, and any notice served or tender made in compliance with such direction shall be deemed sufficient.

Notice, &c., to or by person incompetent to contract.

102. Where under the provisions of this chapter a notice is to be served on or by, or tender or deposit made or accepted or taken out of court by any person incompetent to contract, such notice may be served or tender or deposit made, accepted or taken by the legal curator of the property of such person, but where there is no such curator, and it is requisite or desirable in the interests of such person that a notice should be served or tender or deposit made under the provisions of this chapter, application may be made to any Court in which a suit might be brought for the redemption of the mortgage to appoint a guardian *ad litem* for the purpose of serving or receiving service of such notice, or making or accepting such tender, or making or taking out of court such deposit, and for the performance of all consequential acts which could or ought to be done by such person if he were competent to contract; and the provisions of chapter XXXI of the Code of Civil Procedure shall, so far as may be, apply to such application and to the parties thereto and to the guardian appointed thereunder.

CHAPTER V.

OF LEASES OF IMMOVEABLE PROPERTY.

Lease defined.

103. A lease of immoveable property is a transfer of a right to enjoy such property made for a certain time express or implied, or in perpetuity, in consideration of a price paid or promised, or of money, a share of crops, service, or any other thing of value, to be rendered periodically or on specified occasions to the transferor by the transferee, who accepts the transfer on such terms.

Lessor, lessee, premium and rent defined.

The transferor is called the lessor, the transferee is called the lessee, the price is called the premium, and the money, share, service or other thing to be so rendered is called the rent.

Duration of certain leases in absence of written contract or local usage.

104. In the absence of a contract or local law or usage to the contrary, a lease of immoveable property for agricultural or manufacturing purposes shall be deemed to be a lease from year to year, terminable, on the part of either lessor or lessee, by six months' notice expiring with the end of a year of the tenancy; and a lease of immoveable property for any other purpose shall be deemed to be a lease from month to month, terminable, on the part of either lessor or lessee, by fifteen days' notice expiring with the end of a month of the tenancy.

Bill III, s. 68: Report, s. 40: 5 Bom. A. C. J. 179: 6 *ibid.* 31; 7 *ibid.* 111: and see 1 Beng. F. B. 25: 13 W. R. 190. I. L. R. 2 Calc. 146. 4 Beng. Appendix 86 12 Beng. 263. N. W. P., 1873, p. 9. Perry 480.

Notice to determine lease.

Every notice under this section must be in writing signed by or on behalf of the party giving it and tendered or delivered to the party who is intended to be bound by it, or affixed on a conspicuous part of the property.

Leases how made.

105. A lease of immoveable property from year to year, or for any term exceeding one year, or reserving a yearly rent, can be made only by a registered assurance.

All other leases of immoveable property may be made either by assurance or by oral agreement. Bill III, s. 65.

Right and liabilities of lessor and lessee.

106. In the absence of a contract or local usage to the contrary, the lessor and the lessee of immoveable property, as against one another, respectively, possess the rights and are subject to the liabilities mentioned in the rules next following, or such of them as are applicable to the property leased:—

A.—Rights and Liabilities of the Lessor.

(*a*) the lessor is bound to disclose to the lessee any defect in the property, with reference to its intended use, of which the former is, and the latter is not, aware, and which the latter could not with ordinary care discover: Bill III, s. 66. 6 W. R. 314.

(*b*) the lessor is bound on the lessee's request to put him in possession of the property leased: 6 Beng. Appendix 44.

(*c*) the lessor shall be deemed to contract with the lessee that if the latter pays the rent reserved by the lease and performs the contracts binding on the lessee, he may hold the property leased during the time limited by the lease without interruption; 39 (3). 15 W. R. 230. W. R. 121.

(*d*) where an arrear of rent is due from any lessee, the lessor may, instead of suing for the

39 (2) altered: cf. IX of 1872, s. 93: 11 W. R. 278: 12 W. R. 149:

arrear, recover the same by distress and sale of the goods found in or upon the property in respect of which the arrear is due or of the produce of such property, but subject to the local law, if any, for the time being in force relating to distresses.

B.—Rights and Liabilities of the Lessee.

8 Beng. 73. 5 Calc. L. R. 33.

(*e*) if during the continuance of the lease any accession is made to the property leased, such accession (subject to the law relating to alluvion for the time being in force) shall be deemed to be comprised in the lease:

(*f*) if by fire, tempest or flood, or violence of an army or of a mob, or other irresistible force, any material part of the property leased be wholly destroyed or rendered substantially and permanently unfit for the purposes for which it was let, the lease shall, at the option of the lessee, be void:

provided that if the injury be occasioned by the wrongful act or default of the lessee, he shall not be entitled to avail himself of the benefit of this provision:

(*g*) if the lessor neglects to make, within a reasonable time after notice, repairs which he is bound to make to the property leased, the lessee may make the same himself, and deduct the expense of such repairs with interest from the rent, or otherwise recover it from the lessor:

(*h*) if the lessor neglects to make any payment which he is bound to make, and which, if not made by him, is recoverable from the lessee or against the property leased, the lessee may make such payment himself, and deduct it with interest from the rent, or otherwise recover it from the lessor:

Re Thakoor Chunder Paramanick, Beng. F. B. Rulings 595: 8 Beng. 237: 14 Beng. 201, 205: Canadian Code, s. 1640. Cf. Act XIX of 1868, s. 46: Act XVIII of 1873, s. 42.

(*i*) the lessee may remove, at any time during the continuance of the lease, all things which he has attached to the earth; provided he leaves the property leased in the state in which he received it:

(*j*) when a lease of uncertain duration determines by any means except the fault of the lessee, he or his legal representative is entitled to all the crops planted or sown by the lessee and growing upon the property leased for the season current when the lease determines, and to free ingress and egress to reap and carry them:

5 S. D. A. 205: 8 Mad. 120, 127: 7 Beng. 152: 7 W. P. 1875, p. 181: 13 W. R. 451: 16 W. R. 112: 5 S. D. A. 67. 15 W. R. 449.

(*k*) the lessee may transfer absolutely or by way of mortgage or sub-lease the whole or any part of his interest in the property leased, and any transferee of such interest or part may again transfer it. The lessee shall not, by reason only of such transfer, cease to be subject to any of the liabilities attaching to the lease:

8 Beng. 239: 12 Beng. 82.

nothing in this clause shall be deemed to authorize a tenant having an untransferable right of occupancy, the farmer of an estate in respect of which default has been made in paying revenue, or the lessee of an estate under the management of a Court of Wards, to assign his interest as such tenant, farmer or lessee:

(*l*) the lessee is bound to disclose to the lessor any fact as to the nature or extent of the interest which the lessee is about to take, of which the lessee is, and the lessor is not, aware, and which increases the value of such interest:

(*m*) the lessee is bound to pay or tender, at the proper time and place, the premium or rent to the lessor or his agent in this behalf. See 23 W. R. 34.

(*n*) the lessee is bound to keep, and on the termination of the lease to restore, the property leased in as good condition as it was in at the time when he was put in possession, subject only to the changes caused by reasonable wear and tear or irresistible force, and to allow the lessor and his agents, at all reasonable times during the term, to enter into the property leased and inspect the condition thereof and give or leave notice of any defect in such condition, and, when such defect has been caused by any act or default on the part of the lessee, his servants or agents, he is bound to make it good within three months after such notice has been given or left:

(*o*) if the lessee becomes aware of any proceeding to recover the property leased or any part thereof, or of any encroachment made upon, or any interference with, the lessor's rights concerning such property, he is bound to give, with reasonable diligence, notice thereof to the lessor:

5 Beng. 401, 416: 8 Beng. Appendix 70: 10 Beng. Appx. 41, v. 5 S. D. A. 205. 15 W. R. 17 W. R. 23 W. R. W. R. Sp. (1864) 36. 8 Chan. D. 526. 8 Beng. 242 14 & 15 Vic., c. 25, s. 3.

(*p*) the lessee may use the property leased and its products (if any) as a person of ordinary prudence would use them if they were his own; but he must not use, or permit another to use, the property for a purpose other than that for which it was leased, or fell timber, pull down or damage buildings, work mines or quarries not open when the lease was granted, or commit any other act which is destructive or permanently injurious thereto:

(*q*) he must not, without the lessor's consent, erect on the property leased any permanent structure, except for agricultural purposes:

(*r*) on the determination of the lease, the lessee is bound to put the lessor into possession of the property leased.

Rights of lessor's transferee.

107. If the lessor transfers the property leased, or any part thereof, or any part of his interest therein, the transferee in the absence of a contract to the contrary shall possess all the rights, and, if the lessee so elects, be subject to all the liabilities, of the lessor as to the property or part transferred so long as he is the owner of it; but the lessor shall not by reason only of such transfer cease to be subject to any of the liabilities imposed upon him by the lease, unless the lessee elects to treat the transferee as the person liable to him: Bill III, s. clause (*o*). 14 W. R. 83: 24 W. R. 88.

Provided that the transferee is not entitled to arrears of rent due before the transfer, and that if the lessee pay rent to the lessor without having reason to believe that such transfer has been made, Act XI of 1855, s. 1: 4 Anne, c. 16 s. 10.

the lessee shall not be liable to pay such rent over again to the transferee:

Where only a part of the property leased is transferred by the lessor, he may (subject to the provisions of section thirty-eight) determine what proportion of the premium or rent reserved by the lease is payable in respect of the part so transferred.

Bill III, s. 69.

108. Where the time limited by a lease of immoveable property is expressed as commencing from a particular day, in computing that time such day shall be excluded. Where no day of commencement is named, the time so limited begins from the making of the lease.

Exclusion of day on which term commences.

Where the time so limited is a year or a number of years, in the absence of an express agreement to the contrary, the lease shall last during the whole anniversary of the day from which such time commences.

Duration of lease for a year.

Where the time so limited is expressed to be terminable before its expiration, and the lease omits to mention at whose option it is so terminable, the lessee, and not the lessor, shall have such option.

Option to determine lease.

Bill III, s. 70: 7 W. R. 283. 3 Moo. I. A. 261: 16 W. R. 147.

109. A lease of immoveable property determines—

Determination of lease.

(*a*) by efflux of the time limited thereby:

(*b*) where such time is limited conditionally on the happening of some event—by the happening of such event:

Lease by Hindú widow, Marshall 166.

(*c*) where the interest of the lessor in the property leased terminates on, or his power to dispose of the same extends only to, the happening of any event—by the happening of such event:

3 O'Kin. 159. But see per Peacock, C. J., 10 W. R. 15.

(*d*) in case the interests of the lessee and the lessor in the whole of the property leased become vested at the same time in one person in the same right:

Surrender of right to redeem mortgaged lease, N.-W. P. 1869, p. 45; by one of several joint lessees, 9 W. R. 147.

(*e*) by express surrender, that is to say, in case the lessee yields up his interest under the lease to the lessor, by mutual agreement between them:

(*f*) by implied surrender:

Marshall 250: 16 W. R. 103: 25 W. R. 227.

(*g*) by forfeiture, that is to say, (1) in case the lessee breaks an express condition which provides that, on breach thereof, the lessor may re-enter, or the lease shall become void; or (2) in case the lessee renounces his character as such by setting up a title in a third person or by claiming title in himself, and in either case the lessor or his transferee does some act shewing his intention to determine the lease:

18 W. R. 465: But see 22 W. R. 448: 25 W. R. 147.

23 W. R. 238, 271.

(*h*) on the expiration of a notice to determine the lease, or to quit, or of intention to quit, the property leased, duly given by one party to the other.

Illustration to clause (f).

A, the lessee, accepts from the lessor a new lease of the property leased, to take effect during the continuance of the existing lease. This is an implied surrender of the former lease, and such lease determines thereupon.

Bill III, s. 71. W. R. F. B. 10: Marshall 25.

110. A forfeiture under section one hundred and nine, clause (*g*), is waived by acceptance of rent which has become due since the forfeiture, or by distress for such rent, or by any other act on the part of the lessor shewing an intention to treat the lease as subsisting:

Waiver of forfeiture.

Provided that the lessor is aware that the forfeiture has been incurred:

2 Bom. 73.

Provided also that, where rent is accepted after the institution of a suit to eject the lessee on the ground of forfeiture, such acceptance is not a waiver.

Bill III, s. 72.

111. A notice given under section one hundred and nine, clause (*h*), is waived, with the express or implied consent of the person to whom it is given, by any act on the part of the person giving it shewing an intention to treat the lease as subsisting.

Waiver of notice to quit.

Illustrations.

(*a*) A, the lessor, gives B, the lessee, notice to quit the property leased. The notice expires. B tenders, and A accepts, rent which has become due in respect of the property since the expiration of the notice. The notice is waived.

(*b*) A, the lessor, gives B, the lessee, notice to quit the property leased. The notice expires, and B remains in possession. A gives to B as lessee a second notice to quit. The first notice is waived.

Bill III, s. 73, N.-W.P. 1867, Ex. o. c. j. 1. *Timmaréd Puranik* v. *Bayá Kuppagondá*, 2 Bom. 70. 8 W. R. 225, per Peacock, C. J. Act XVIII of 1873, s. 34, cl. (*c*), para. 1.

112. Where a lease of immoveable property has determined by forfeiture for non-payment of rent and the lessor sues to eject the lessee if, at the hearing of the suit, the lessee pays or tenders to the lessor the rent in arrear, together with interest thereon and his full costs of the suit, or gives such security as the Court thinks sufficient for making such payment within fifteen days, the Court may, in lieu of making a decree for ejectment, pass an order relieving the lessee against the forfeiture; and thereupon the lessee shall hold the property leased as if the forfeiture had not occurred.

Relief against forfeiture for non-payment of rent.

Bill III, s. 74: 10 W. R. 384: 13 W. R. 281: N.-W.P. 1874, p. 63.

113. The surrender, express or implied, of a lease of immoveable property does not prejudice an under-lease of the property or any part thereof previously granted by the lessee on terms and conditions substantially the same (except as regards the amount of rent) as those of the original lease; but, unless the surrender is made for the purpose of obtaining a new lease, the rent payable by, and the contracts binding on, the under-lessee shall be respectively payable to, and enforceable by, the lessor.

Effect of surrender and forfeiture on under-leases.

The forfeiture of such a lease annuls all such under-leases, except where such forfeiture has been procured by the lessor in fraud of the under-lessees.

Bill III, s. 75: Report, s. 41: 3 Bom. A. C. J. 27: 12 Beng. 263 N.-W.P. 1870: p. 204. 7 W. R. 152: 16 W. R. 185: 22 W. R. 394, 548: 23 W. R. 271: 25 W. R. 234.

114. If a lessee or under-lessee of property remains in possession thereof after the determination of the lease, and the lessor or his legal representative accepts rent from the lessee or under-lessee, or otherwise assents to his continuing in possession, the lease is, in the absence of an agreement to the contrary, renewed from year to year or from month to month, according to the purpose for which the property is leased, as specified in section one hundred and six.

Effect of holding over.

Illustrations.

(*a*.) A lets a house to B for five years. B underlets the house to C at a monthly rent of Rs. 100. The five years expire, but C continues in possession of the house and pays the rent to A. C's lease is renewed from month to month.

(*b*.) A lets a farm to B for the life of C. C dies, but B continues in possession with A's assent. B's lease is renewed from year to year.

115. None of the provisions of this chapter apply to leases for agricultural purposes, except in so far as the Local Government may by notification in the official Gazette declare all or any of such provisions to be so applicable, together with, or subject to, those of the local law, if any, for the time being in force.

Exemption of leases for agricultural purposes.

CHAPTER VI.

OF EXCHANGES.

Bill III, s. 76: N. Y. Code, ss. 903, 906: 1 Mad. 100.

116. When two persons mutually transfer the ownership of one thing for the ownership of another, neither thing or both things being money only, the transaction is called an "exchange."

"Exchange" defined.

A transfer of property in completion of an exchange can be made only in manner provided for the transfer of such property by sale.

Bill III, s. 77, Code Civil, Art. 1705.

117. In the absence of a contract to the contrary, the party deprived of the thing or part thereof he has received in exchange by reason of any defect in the title of the other party is entitled at his option to compensation or to the return of the thing transferred by him.

Right of party evicted from thing received in exchange.

Bill III, s. 78.

118. Save as otherwise provided in this chapter, each party has the rights and is subject to the liabilities of a seller as to that which he gives, and has the rights and is subject to the liabilities of a buyer as to that which he takes.

Rights and liabilities of parties.

Bill III, s. 79: 1 Morl. 105.

119. On an exchange of money, each party thereby warrants the genuineness of the money given by him.

Exchange of money.

CHAPTER VII.

OF GIFTS.

120. "Gift" is the transfer of certain existing moveable or immoveable property made voluntarily and without consideration, by one person, called the donor, to another, called the donee, and accepted by or on behalf of the donee.

"Gift" defined.

Such acceptance must be made during the lifetime of the donor and while he is still capable of giving.

Acceptance when to be made.

If the donee dies before acceptance, the gift is void.

L. C. 1531.

Act III of 1877, s. 17, cl. (*a*).

121. For the purpose of making a gift of immoveable property, the transfer must be effected by registered assurance signed by or on behalf of the donor, and attested by at least two witnesses.

Transfer how effected.

Act X of 1865, s. 54.

Such assurance shall not be considered as insufficiently attested by reason of any benefit thereby given to any person attesting it, or to his or her wife or husband; but the gift shall be void so far as concerns the person so attesting, or the wife or husband of such person, or any person claiming under either of them.

For the purpose of making a gift of moveable property, the transfer may be effected either by a non-testamentary instrument registered and signed as aforesaid or by delivery.

Act IX of 1872, s. 90.

Such delivery may be made in the same way as goods sold may be delivered.

122. A gift comprising both existing and future property is void as to the latter.

Gifts of existing and future property.

Burge II, 144

123. A gift of a divisible thing to two or more donees, of whom one does not accept it, is void as to the interest which he would have taken had he accepted.

Gift to several, of whom one does not accept.

124. The donor and donee may agree that on the happening of any specified event which does not depend on the will of the donor a gift shall be suspended or revoked; but a gift which the parties agree shall be revocable wholly or in part at the mere will of the donor is void wholly or in part, as the case may be.

When gift may be suspended or revoked.

Canadian Code s. 811.

A gift may also be revoked in any of the cases (save want or failure of consideration) in which, if it were a contract, it might be rescinded.

Save as aforesaid, a gift cannot be revoked.

Nothing contained in this section shall be deemed to affect the rights of transferees for consideration without notice.

Illustrations.

(*a*.) A gives a field to B, reserving to himself, with B's assent, the right to take back the field in case B and his descendants die before A. B dies without descendants in A's lifetime. A may take back the field.

(*b*). A gives a lákh of rupees to B, reserving to himself, with B's assent, the right to take back at pleasure Rs. 10,000 out of the lákh. The gift holds good as to Rs. 90,000, but is void as to Rs. 10,000, which continue to belong to A.

125. If the donee or any person claiming under him is by reason of the invalidity of the donor's title deprived of the thing

Donor not bound to warranty.

given, the donor is not responsible for loss caused thereby.

Act X of 1865, s. 66.

126. Where a gift is in the form of a single transfer to the same person of several things of which one is, and the others are not, burdened by an obligation, the donee can take nothing by the gift unless he accepts it fully.

Onerous gifts.

Act X of 1865, s. 100.

Where a gift is in the form of two or more separate and independent transfers to the same person of several things, the donee is at liberty to accept one of them and refuse the others, although the former may be beneficial and the latter onerous.

A donee not competent to contract and accepting property burdened by any obligation is not bound by his acceptance. But it after becoming competent to contract he retains the property given, he becomes so bound.

Onerous gift to disqualified person.

Illustrations.

(*a*). A has shares in X, a prosperous joint stock company, and also shares in Y, a joint stock company in difficulties. Heavy calls are expected in respect of the shares in Y. A gives B all his shares in joint stock companies. B refuses to accept the shares in Y. He cannot take the shares in X.

(*b*). A, having a lease for a term of years of a house at a rent which he and his representatives are bound to pay during the term, and which is more than the house can be let for, gives to B the lease, and also a sum of money. B refuses to accept the lease. He does not by this refusal forfeit the money.

127. Subject to the provisions of section one hundred and twenty-six, where a gift consists of the donor's whole property, the donee is personally liable for all the debts due by the donor at the time of the gift to the extent of the property comprised therein:

Universal donee.

128. Nothing in this chapter relates to gifts of moveable property made in contemplation of death, or shall be deemed to affect any rule of Muhammadan law.

Saving of donations *mortis causâ* and Muhammadan law.

CHAPTER VIII.

OF TRANSFERS OF ACTIONABLE CLAIMS.

129. A claim is actionable when the civil Courts recognise it as a ground for relief, whether a suit for its enforcement is or is not actually pending or likely to become necessary.

Actionable claims.

Bill III, s. 80: Report, s. 99: 36 & 37 Vic., c. 66, s. 25 (5): 1 Mad. 150. See 5 W. R. 230. But see 10 N.-W. P. 474, 4 Ind. Macph. 122.

130. No transfer of any debt, or any beneficial interest in moveable property, shall have any operation against the debtor or against the person in whom the property is vested, until express notice of the transfer is given to him, unless he is a party to such transfer; and every dealing by such debtor or person, not being a party to, and not having received express notice of, a transfer, with the debt or property shall be valid as against such transfer.

Transfer of debts.

Illustrations.

(*a*) A owes money to B, who transfers the debt to C. B then demands the debt from A, who, having no notice of the transfer, pays B. The payment is valid, and C cannot sue A for the debt.

(*b*) A has jewels deposited with B, a jeweller. A mortgages them to C. A then executes an instrument transferring them to D, who takes it to B and gets the jewels from him before he, B, has received any notice of C's mortgage. B is justified in handing the jewels to D, and C has no remedy against D.

Bill III, s. 81, Report, s. 100.

131. Every such notice must be in writing signed by the person making the transfer, or by his agent duly authorized in this behalf.

Notice to be in writing signed.

Bill III, s. 82. Fisher, 116: *Sichel* v. *Raphael* 10 Jur. N. S. 1165.

132. On receiving such notice, the debtor or person in whom the property is vested shall give effect to the transfer, unless where the debtor resides, or the property is situate, in a foreign country and the title of the person in whose favour the transfer is made is not complete according to the law of such country.

Debtor to give effect to transfer.

133. Where the transferor of a debt warrants the solvency of the debtor the warranty, in the absence of a contract to the contrary, applies only to his solvency at the time of the transfer, and is limited, where the transfer is made for consideration, to the amount of such consideration.

Warranty of solvency of debtor.

134. Where an actionable claim is sold, he against whom it is claimed is wholly discharged by paying to the buyer the price and incidental expenses of the sale, with interest on the price from the day that the buyer paid it.

Discharge of person against whom claim is sold.

Nothing in the former part of this section applies—

(*a*) where the sale is made to the co-heir or co-proprietor of the claim sold;

(*b*) where it is made to a creditor in payment of what is due to him;

(*c*) where it is made to the possessor of a property subject to the actionable claim;

(*d*) where the judgment of a competent Court has been delivered affirming the claim, or where the claim has been made clear by evidence and is ready for judgment.

135. No judge, pleader, clerk, bailiff or other officer connected with Courts of justice can buy any actionable claim falling under the jurisdiction of the Court in which he exercises his functions.

Incapacity of officers connected with Courts of justice.

Bill III, s. 83: *Mangles* v. *Dixon*, 3 H. L. Ca. 702: Fisher, s. 1058.

136. The person to whom a debt or charge is transferred shall take it subject to all the liabilities to which the transferor was subject in respect thereof at the date of the transfer.

Liability of transferee of debt.

Illustration.

A debenture is issued in fraud of a public company to A. A sells and transfers the debenture to B, who has no notice of the fraud. The debenture is invalid in the hands of B.

Bill III, s. 84. Dav. Conv. II, 691, 693.

137. Where a debt is transferred for the purpose of securing an existing or future debt, the original debt, if recovered by either the transferor or transferee, is applicable, first, in payment of the costs of such recovery, secondly, in or towards satisfaction of the amount for the time being secured by the transfer; and the residue, if any, belongs to the transferor.

Mortgaged debt.

Bill III, s. 85.

138. Save as provided by section one hundred and thirty-seven, nothing in this chapter applies to negotiable instruments.

Saving of negotiable instruments.

THE SCHEDULE.

B.

THE MASTER AND SERVANT BILL, 1879.

CONTENTS.

PREAMBLE.

CHAPTER I.—PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
   Exemption of Government servants and seamen,
   and clerks and domestic servants of Natives.
2. Enactments repealed.

CHAPTER II.—OF THE CONTRACT OF SERVICE.

3. Interpretation-clause.
4. Persons competent to enter into contracts of service.
5. Presumption as to wages.
6. Presumption as to term of service.
7. Withdrawal of notice.
8. Termination of contract.
9. Presumption of renewal of contract.

CHAPTER III.—OF THE RIGHTS OF THE MASTER AND THE DUTIES OF THE SERVANT.

10. Master's right to compensation when servant refuses to enter service.
11. Obligations of servant after entry.
12. Time of servant.
13. Master's power to discharge.

CHAPTER IV.—OF THE RIGHTS OF THE SERVANT AND THE DUTIES OF THE MASTER.

14. Servant's right to compensation from master refusing to receive into service.
15. Obligations of master—
    as to retaining servant;
    as to payment of wages;
    as to indemnifying servant;
    as to punishment;
    as to compensating servant for injury caused by master's neglect;
    as to servants employed in dangerous work;
    as to European domestic servants.
16. Servant's right to compensation for breach of duty imposed by section 15, clauses (*e*) and (*f*).

SECTIONS.

17. Compensation for wrongful discharge.
    Measure of compensation.
18. Termination of service by servant.
19. Wages in case of wrongful discharge or termination of contract for master's fault or by death.

CHAPTER V.—OF APPRENTICES.

20. Apprenticing child between ten and eighteen years old.
21. Apprenticing in sea-service.
22. Form and contents of contract.
23. Signatures to contract.
24. Contract not valid unless executed as prescribed and deposited.
    Certified copies.
    Evidence of age.
25. Alteration of terms of service.
26. Assignment of apprentice to new master.
27. Effect of master's death during apprenticeship.
28. Effect of master's insolvency.
29. Rights and duties of master and apprentice.
    Master's powers to chastise.

CHAPTER VI.—JURISDICTION OF MAGISTRATES.

(*A*).—*Artisans, Workmen and Labourers.*

30. Failure to perform work on account of which artisan has received an advance.

(*B*).—*Workmen employed on Public Works.*

31. Disputes between employers and workmen on railways, &c.
32. Punishment for breach of contract to work for fixed term on railway, &c.
    Power to order performance of contract.

(*C*).—*Apprentices.*

33. Complaint by apprentice against master.
34. Appropriation of sum recovered for apprentice on cancellation of contract.
35. Contract not to be cancelled for moderate chastisement.
    Liability of master for assault.
36. Complaint by master against apprentice.
37. Cancellation of contract for misconduct of apprentice.
38. Limitation of complaints.

(*D*).—*Miscellaneous.*

39. "Master," "employer" and "Magistrate."
40. Saving of prosecutions under other laws.
    Saving of civil remedies.

SCHEDULES.

A Bill to define and amend the law relating to Master and Servant.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend the law relating to master and servant and master and apprentice; It is hereby enacted as follows:— (Preamble.)

CHAPTER I.—PRELIMINARY.

Bill, s. 1.

1. This Act may be called "The Master and Servant Act, 1880": (Short title.)

It extends to the whole of British India; (Local extent.)

and it shall come into force on the first day of March, 1880. (Commencement.)

But nothing herein contained applies to servants of Government, as such, or to seamen as defined in Act No. I of 1859 (*for the amendment of the law relating to Merchant Seamen*); and nothing contained in sections three to twenty-five (both inclusive) applies to the Hindú, Jain, Sikh, Muhammadan and Buddhist clerks, and to the domestic and agricultural servants, of Hindús, Jains, Sikhs, Muhammadans and Buddhists. (Exemption of Government servants and seamen, and clerks and domestic servants of Natives.)

Bill, s. 2.

2. The Acts mentioned in the first schedule hereto annexed shall be repealed. But all references in any enactment to any of such Acts shall be deemed to be made to the corresponding part of this Act, and all powers conferred under the second or third of such Acts shall be deemed to have been conferred hereunder. (Enactments repealed.)

CHAPTER II.—OF THE CONTRACT OF SERVICE.

Bill, s. 3.

3. A contract binding one party to employ and remunerate, and the other to do personally any work, in such manner as the former party directs, and otherwise than in pursuit of an independent calling, is called a "contract of service": the remuneration contracted for is called the "wages": the party contracting, by himself or his agent to employ and remunerate is called the "master"; and the party contracting to do the work is called the "servant." (Interpretation-clause. "Contract of service": "Wages": "Master": "Servant.")

A "domestic servant" is a servant who contracts to do household or menial work, and includes also groom, coachman, elephant-driver, porter, cowherd, grass-cutter, gardener, poultry-man, dog-boy, household tailor, washerman, messenger, watchman, boatman, tent-pitcher, sweeper and water-carrier. ("Domestic servant.")

Dhanee Kurmy v. Upendra Mohan. Tagore, 8 Beng. 244.

"Fellow-servants" are servants of one person jointly engaged on his behalf in an employment with a common object. ("Fellow-servants.")

Swainson v. N. E. Railway Co., 3 Exch. Div. 344.

Bill, s. 4.

4. Every person competent to contract may enter into a contract of service. (Persons competent to enter into contracts of service.)

Explanation.—For the purposes of this section a minor is competent to contract; but the contract cannot be enforced against him unless it is beneficial to him.

This modifies Act IX of 1872, s. 11, 3 Q. B. Div. 229.

Bill, s. 5.

5. In the absence of express provision as to the amount of wages, the servant is presumed to contract for the wages ordinarily paid, at the place and time of entering into the contract, by masters of the same class as the master to servants of the same class as the servant. (Presumption as to wages.)

6. In the absence of a contract or local usage to the contrary,— (Presumption as to term of service.)

(*a*) tutors, governesses and managers of tea-gardens, coffee-plantations, indigo-concerns, banks mines, breweries, cotton-mills, jute-mills, paper-mills, rice-mills, saw-mills, sugar-works and pressing-companies are presumed to be hired for a year, and the contract is terminable, on the part of either master or servant, by ninety days' notice of his intention to put an end to the service, or by payment or tender of three months' wages in advance;

(*b*) domestic servants are presumed to be hired for a month, and the contract is terminable, on the part of either master or servant, by fifteen days' notice of his intention to put an end to the service, or by payment or tender of fifteen days' wages in advance;

As to the fortnight's notice, see Bengal Regulation VII of 1819, s. 6, repealed by Act XVII of 1862.

(*c*) agricultural servants are presumed to be hired for the season, and the contract is terminable, on the part of either master or servant, by thirty days' notice of his intention to put an end to the service, or by payment or tender of a month's wages in advance, except in the case of labourers hired under Bengal Act VII of 1873, in which case the contract is terminable, on the part of either master or servant, by ninety days' notice of his intention to put an end to the service, or by payment or tender of three months' wages in advance;

(*d*) artisans and workmen are presumed to be hired for no specific term, and the contract is terminable, at the will of either party, by notice to the other that the service is at an end;

(*e*) persons hired by piecework are presumed to be hired till the job is ended: the contract is not terminable by notice, but either party may terminate it by payment or tender of the wages agreed to be paid for the job;

(*f*) clerks and all other servants not hereinbefore provided for are presumed to be hired for

a month, and the contract is terminable, on the part of either master or servant, by thirty days' notice of his intention to put an end to the service, or by payment or tender of a month's wages in advance.

Chapman's case, L. R. 1 Eq. 346, followed in the case of the *Calcutta Steam-tug Association*, 2 Ind. Jur. 17.

If the master is a public company, the order for winding it up, or where the winding-up is voluntary, the passing of the resolution authorizing the same, shall be deemed to be a notice duly given to the servant under this section, unless where express notice to put an end to the service has been duly given to the servant and is still in force.

Bill, s. 7.

7. Any notice of intention to put an end to service may, with the consent of the party receiving it, be withdrawn by the party giving it, and thereupon the service shall continue as if no such notice had been given.

Withdrawal of notice.

Bill, s. 8.

Termination of contract.

8. A contract of service is terminated—

(*a*) by the death of the master, unless where the contract provides otherwise:

(*b*) by the death of the servant:

(*c*) by mutual consent of the parties:

(*d*) on expiration of the term of service:

(*e*) on expiration of a notice to put an end to the service duly given to the master or the servant:

(*f*) by payment or tender of wages under section six:

(*g*) when the master rightfully discharges the servant:

(*h*) when the servant rightfully quits his master's service.

The provisions of this section as to the death of a master apply, where the master is a private partnership, to its dissolution.

Bill, s. 9.

9. Where, after the termination of a contract of service, the parties continue the relation of master and servant, they are presumed, till the contrary is proved, to have renewed the contract, except as regards the term of service, if any, expressed therein.

Presumption of renewal of contract.

CHAPTER III.—OF THE RIGHTS OF THE MASTER AND THE DUTIES OF THE SERVANT.

Bill, s. 10.

10. When a servant refuses or fails to enter his master's service, the master is entitled to compensation for the injury caused by the refusal or failure, unless the servant is prevented by some cause over which he has no control from performing his contract.

Master's right to compensation when servant refuses to enter service.

Bill, s. 11.

Obligations of servant after entry.

11. When a servant has entered his master's service, he is under the following obligations:—

(*a*) he must obey all reasonable orders relating to his employment given by his master or by any person to whom the master has expressly or impliedly delegated power to give such orders:

(*b*) he must abstain from intoxication during any part of his time belonging to his master:

(*c*) he must be respectful to his master and his master's family, guests, lodgers, visitors and customers:

(*d*) he must be diligent in his master's business:

(*e*) he must run all risks incident to the service:

(*f*) he must take the same care of his master's property entrusted to him as a man of ordinary prudence would, under similar circumstances, take of his own property of the same kind and value; and he must make good any loss which he causes to his master by want of ordinary care or reasonable skill: XI of 1872, s. 115.

(*g*) he must indemnify his master from liability to make compensation for injury caused by any wrongful act or default of the servant:

(*h*) he must use his best endeavours to protect his master against the wrongful acts and defaults of his fellow-servants, if any:

(*i*) he must, as often as he may be reasonably required, account for money or goods received from or on account of his master, or belonging to his master and coming to the servant's hands; and must, without demand, deliver to his master, as soon as, with reasonable diligence, he can find him, everything that he receives on his master's account:

(*j*) he must not set up his own title or the title of any third person to money or goods so received or coming to his hands, in opposition to his master's title thereto, except where the master's title accrued fraudulently or wrongfully, or under a voidable contract which has become void:

(*k*) he must continue in the service during the whole time that he has contracted for, unless the contract has been terminated under section eight; and in the case of a domestic servant,—

(*l*) when he is temporarily disabled by illness from performing his duties, he must provide at his own expense a substitute satisfactory to the master, or, if the master employs and pays a substitute, allow the master to deduct such payment from his wages; and

(*m*) when the master dies leaving a widow or minor children, and the widow or guardian of the children requires the servant to renew his contract for the same wages for a term not exceeding one month from the date of the death, the servant must comply with such request and the widow or guardian (as the case may be) must pay the wages accruing due to the servant during such term.

Nothing in clause (*l*) applies where the servant's illness arises from hurt received in the course of his employment.

Bill, s. 12.

Time of servant.

12. In the absence of an express agreement to the contrary, all the time of domestic servants, not reasonably required for bathing, meals, sleep and religious duties, belongs to the master: the time of other servants belongs to the master to such

extent as is usual in the business in which they serve.

Bill, s. 13.

Master's power to discharge.

13. A master may, without notice or payment or tender of wages, discharge his servant, whether hired for a fixed term or not, for any of the following causes:—

(*a*) wilful breach of the obligation imposed by section eleven, clause (*a*):

(*b*) failure to perform either of the obligations imposed upon the servant by section eleven, clauses (*b*) and (*c*):

(*c*) conduct likely to injure his master's business materially:

Smith 117: *Spondet peritiam artis*, see I. L. R. 2 Calc. 33.

(*d*) claiming to be a partner with his master:

(*e*) want of reasonable skill to discharge the duties for which the servant was hired or gross negligence in their performance:

(*f*) illness disabling him from performing his duties for a continuous period of thirty days:

(*g*) imprisonment in a civil or criminal jail:

(*h*) wilful absence from his master's service without leave:

(*i*) misconduct, before or after the commencement of his service, implying a defect of character which unfits him for such service.

Willets v. *Green*, 3. Car. & K. 59. Injunction not granted to prevent breach by master, Act I of 1877, section 66, clause (*f*): Smith 124.

The existence of any such cause, though not known to the master at the time of the discharge, is sufficient to justify a discharge under this section.

CHAPTER IV.—OF THE RIGHTS OF THE SERVANT AND THE DUTIES OF THE MASTER.

Bill, s. 16.

Servant's right to compensation from master refusing to receive into service.

14. Where a master refuses to receive his servant into his service, the servant is entitled to compensation for the injury caused by such refusal, unless at the date of the refusal a cause exists which, if he had entered the service, would have justified his discharge.

When the service is to begin on a future day, a suit for such compensation may be brought, at the option of the plaintiff, either immediately on the refusal or on or after such future day.

Illustration.

Hochster v. *De La Tour*, E. & B. 678, 691. As to measure of damages, see Explanation to section 73 of Act IX of 1872.

A, in September, engages a servant, B, at Rs. 30 per mensem to accompany him on tour for three months through India, to commence on the first of November. In October, A writes to B saying that he has changed his mind and no longer requires B's services. B thereupon institutes a suit against A for compensation. Afterwards, before the first of November, B obtains another engagement at Rs. 30 per mensem to commence on the first December. There exists no cause which, if B had entered the service, would have justified his discharge. B is entitled to a decree for compensation against A.

Bill, s. 17.

Obligations of master—

15. Where a servant has entered his master's service, the master is under the following obligations:—

as to retaining servant;

(*a*) he must retain the servant during the whole time that he has contracted to do so, unless the contract has been terminated under section eight:

as to payment of wages;

(*b*) he must pay the wages which he has contracted to pay: provided that, where such wages are payable periodically, and the servant is rightfully discharged, or wrongfully quits the service, the servant is not entitled to any wages for his services since the last day on which a payment became due to him under the contract:

Ramji Manor v. *Little*, 10 Bomb. 57.

as to indemnifying servant;

(*c*) he must indemnify the servant from liability for doing any act pursuant to an order of his master which he was bound to obey, or any unlawful act, which the servant, not having reason to believe it to be unlawful, was induced by the conduct of his master to believe to be lawful:

N. Y. Code, § 1005.

Smith 189.

as to punishment;

(*d*) he must not inflict any punishment on the servant, by way of imprisonment, corporal chastisement, forfeiture of wages or otherwise, whether the servant is or is not a minor.

Campbell v. *E. I. Co.*, Bourke 56.

Nothing contained in this clause renders void any agreement under which the master may, in the events therein specified, withhold the whole or any part of the servant's wages:

as to compensating servant for injury caused by master's neglect;

(*e*) where the master personally works along with the servant, he must make compensation to the servant for injury caused to such servant by the master's want of ordinary care or reasonable skill:

as to servants employed in dangerous work;

(*f*) where the servant is employed in a work of danger, the master must (1) use reasonable endeavours to provide proper materials and apparatus for the work, and (2) take all other reasonable precautions so as to protect the servant against unnecessary risk: and where the servant is employed in such work along with fellow-servants, (3) use reasonable endeavours to provide fellow-servants of ordinary care and reasonable skill:

Smith 213, 218 & Sc. 333. App. Ca.

Smith 209, 214.

as to European domestic servants.

(*g*) where the servant is a domestic servant of European birth or parentage, the master must provide him with food of proper description and in sufficient quantity, and, in case of sickness or hurt, with the necessary medical or surgical attendance and medicine.

Illustrations.

Rule that one wrong-doer cannot sue another for contribution does not apply.

(*a*) A, a servant, in obedience to the command of his master, B, commits a trespass on the property of C, not having reason to believe that he is doing any injury. C sues A for damages and recovers Rs. 50. A is entitled to recover the Rs. 50 from B.

(*b*) A hires B, a brick-maker, to make bricks with C's trademark thereon. B, having no reason to believe that the trademark was C's, proceeds to make the bricks accordingly. C sues B to restrain him from using the trademark

and obtains an injunction with costs which B pays. B may recover the amount so paid from A.

Drylls v. Davis, 2 B & Ad. 516.

(*c*) A orders his servant B to sell an unsound mare, but not to warrant her soundness. B sells the mare to C with a warranty of soundness. C sues and recovers damages from B for breach of the warranty. B cannot recover these damages from A.

Ashworth v. Stanwix.

(*d*) A and B are lessees of a coal pit. B acts as banksman at the mouth of the pit, and whilst so acting is guilty of negligence whereby C, a pitman in the service of A and B, is injured. Both A and B are liable for the injury.

Bill, s. 18. Cf. Act IX of 1872, s. 225.

16. When a servant has sustained particular injury by a breach of any of the obligations imposed on his master by section fifteen, clauses (*e*) and (*f*), the servant is entitled to compensation for such injury:

Servant's right to compensation for breach of duty imposed by section 15, clauses (*e*) and (*f*).

If by ordinary care he might have avoided injury, he is the author of his own wrong.

provided that he could not have avoided the injury by the exercise of ordinary care, and at the time of the injury he had no reason to believe that the breach had been committed.

Illustrations.

(*a*) A hires B and C to row, and D to steer, his boat. A has done nothing to ascertain D's competence to act as steersman. Owing to D's want of reasonable skill, the boat collides with a ship in full sail and B and C are injured. B and C may sue A for compensation.

(*b*) A railway company hires A to drive a locomotive, B to be guard of a train and C to regulate the switches. The company has neglected to ascertain that C was ordinarily careful, and owing to his carelessness the train runs off the line and A is killed and B is maimed. A's legal representative and B may sue the company for compensation.

Potts v. Plunkett, Smith 214.

(*e*) A employs B to work as his servant in a mine. Owing to A's negligence the roof of the mine is left unsafe. B, having no reason to believe in the existence of the danger, begins to work in the mine and a stone falls from the roof and breaks B's leg. B may sue A for compensation.

(*d*) A orders his servant, B, to carry a bag of rice up a ladder, which A knows, but B has no reason to believe, to be unsafe. B obeys the order. The ladder breaks and B falls and fractures his thigh. B may sue A for compensation.

Bill, s. 19.

17. When a servant is wrongfully discharged, he is entitled to compensation for the injury caused by the discharge in not being allowed to serve and earn the wages contracted for.

Compensation for wrongful discharge.

The amount of such compensation is subject to the following rules in cases to which they are applicable:—

Measure of compensation.

Sedgwick 163. Act IX of 1872, s. 73.

(*a*) Where the contract is to employ for a specified term, the amount shall be the difference between the wages which the servant would have received under his contract with his master and the wages which he has, or might have, received under another contract of service:

(*b*) Where no term is specified, but the contract is terminable by fifteen days' notice, the amount shall be fifteen days' wages:

(*c*) Where no term is specified, but the contract is terminable by thirty days' notice, the amount shall be a month's wages:

(*d*) Where no term is specified, but the contract is terminable by ninety days' notice, the amount shall be three months' wages.

When a servant is wrongfully discharged at a place other than the place at which he entered the service, he is also entitled to the reasonable expenses of his journey back to the latter place.

18. A servant, whether hired for a fixed term or not, may, without notice or payment or tender of the amount of wages, terminate the contract of service— Bill, s. 20.

Termination of service by servant.

(*a*) if the master wilfully or permanently breaks any of his obligations to the servant;

(*b*) if the master commits against the servant any offence punishable under the Indian Penal Code, chapter XVI (*Of offences against the human body*) or XVII (*Of offences against property*); Acts causing trifling harm are not so punishable, Act XLV of 1860, s. 95.

(*c*) if the servant is prevented by permanent illness or other cause over which he has no control from fulfilling his contract. 1 Q. B. Div. 546.

Illustrations.

(*a*). A contracts to serve B for a year for the monthly sum of Rs. 100. B refuses to pay the amount due to A for the first month. A may thereupon terminate the contract.

(*b*). A contracts to serve B. B voluntarily causes hurt to A. A may thereupon terminate the contract.

19. When the servant is wrongfully discharged, or when the contract of service is terminated otherwise than by his rightful discharge, the servant or his legal representative, as the case may be, is entitled, in addition to the compensation and expenses (if any) recoverable by him under this Act or any other law, to the wages (if any) due for the period during which the servant has actually served the master. Bill, s. 21. N. Y. Code, § 1033. Wages when contract terminated by notice to quit given by servant, N.-W P. Rep., 1867 Misc. Rulings 1.

Wages in case of wrongful discharge or termination of contract for master's fault or by death.

For the purpose of this section all wages shall (in the absence of an express agreement to the contrary) be deemed to accrue due from day to day.

CHAPTER V.—Of Apprentices.

20. Any child above the age of ten and under the age of eighteen years may be bound by the persons or officers hereinafter mentioned in this behalf apprentice in any fit trade, craft or employment for any specified term not exceeding seven years, so that it be not prolonged beyond the term of majority, or, in the case of females, marriage. Act XIX of 1850, s. 7.

Apprenticing child between ten and eighteen years old.

The persons and officers above referred to are as follows:—

(*a*) the father of the apprentice; or

(*b*) if the father is dead, the guardian of the person of the apprentice; or

(*c*) if there is no such father or guardian, or if the father is incompetent to contract or has abandoned his child, any Magistrate; or

(*d*) in the case of a child convicted of any cognizable offence, the convicting Magistrate; or

(*e*) in the case of a child brought up by any public charity, the governors, directors or managers thereof.

21. Where a boy is bound under the last preceding section apprentice in the sea service, the following conditions must be observed:— Act XIX of 1850, s. 8.

Apprenticing in sea service.

(*a*) the person to whom he is bound must be a British subject and the owner of a registered ship belonging to and trading from some port in British India which has been declared to be a registering port under Act No. X of 1841;

(*b*) the ship in which he is to be employed must be such a ship, belonging to such a person, and commanded by a British subject, who must, when the apprentice is of European birth or parentage, be also of European birth or parentage.

The master of any ship in which an apprentice is employed shall, for the purposes of this chapter, be deemed the agent of the person to whom the apprentice is bound.

22. Every contract of apprenticeship shall be according to the form in the second schedule hereto annexed or to the like effect, and in writing, and shall set forth particularly— Act XIX of 1850, s. 8.

Form and contents of contract.

(*a*) the age of the apprentice:

(*b*) the term for which he is bound;

(*c*) what he is to be taught;

(*d*) the pecuniary consideration (if any) on either part.

Act XIX of 1850, s. 9.

23. Every such contract shall be signed as follows:— Signatures to contract.

(*a*) by the person to whom the apprentice is bound:

(*b*) by the person by whom he is bound, or when he is bound by the governors, directors or managers of a public charity, any two of them or their secretary or other officer appointed in this behalf; and

(*c*) by the apprentice, if he is of the age of fourteen years or more at the date of the contract.

Act XIX of 1850, s. 10.

24. No such contract shall be valid unless it is executed in manner aforesaid nor until it has been deposited— Contract not valid unless executed as prescribed and deposited.

(*a*) if it has been executed in any of the towns of Calcutta, Madras or Bombay and the apprentice is not bound to the sea service,—in the Court of a Presidency Magistrate;

(*b*) if it has been executed elsewhere in British India and the apprentice is not bound to the sea service,—in the Court of the District Magistrate;

(*c*) if the apprentice is bound to the sea service,—in the office of the person appointed under the said Act No. X of 1841 to make registry of ships at the port where the apprentice is to begin his service.

The Magistrate or officer in whose Court or office any such contract is deposited shall give to each of the parties a copy thereof certified in manner provided by the Indian Evidence Act, 1872, section 76. Certified copies.

The age set forth in any such contract shall be evidence of the age of the apprentice in all questions arising as to the right of the master to the continuance of the service. Act XIX of 1850, s. 2. Evidence of age.

25. At any time during the apprenticeship the terms of service may be changed or the contract may be determined: provided that such change or determination— Act XIX of 1850, s. 11. Alteration of terms of service.

(*a*) be with the consent of both parties to the contract or their legal representatives and of the apprentice if he is above the age of fourteen years; and

(*b*) be expressed in writing on the original contract with the signature of the proper parties, according to section twenty-three.

The Magistrate or registering officer shall thereupon make under his hand corresponding endorsements on the copies of the contract deposited in his Court or office.

26. The master of any apprentice may, with the consent of the person by whom he was bound or the legal representative of such person, and with the consent of the apprentice, if he is above the age of fourteen years, assign such apprentice to any other person who is willing to take him for the residue of his apprenticeship and subject to the conditions thereof: Act XIX of 1850, s. 12. Assignment of apprentice to new master.

Provided that such assignee shall, by endorsement under his own hand on the contract, declare his acceptance of such apprentice, and acknowledge himself bound by the agreements therein mentioned to be performed on the part of the master: and that the consent of the other parties aforesaid be expressed in writing on the same and signed by them respectively.

Every such assignment shall be certified under the hand of the Magistrate or registering officer on the copy of the contract deposited in his Court or office according to the form given in the second schedule hereto annexed.

27. If the master of any apprentice dies before the end of the apprenticeship, the following results shall ensue:— Effect of master's death during apprenticeship.

(*a*) the contract of apprenticeship shall be thereby determined, and a proportionate part, corresponding to the unexpired portion of the term, of any premium which has been paid to such master on the binding of the apprentice to him, shall be returned out of the estate of the deceased by his legal representative to the person who has paid the same, unless such legal representative continues the business in which such apprentice has been employed, and within three months of the death of the late master offers in writing to keep the apprentice on the terms of the original contract; in which case the estate of Act XIX of 1850, s. 19.

the deceased shall be discharged from all liability in respect of such premium:

XIX of 1850, s. 20. (*b*) every such offer shall be fully expressed and certified by the legal representative on the original contract of apprenticeship, and also by the Magistrate or registering officer on the copy thereof so deposited; and the apprentice shall be bound to the legal representative so keeping him for the remainder of the term of his apprenticeship:

(*c*) the apprentice shall be entitled to be maintained for three months from the master's death out of the assets left by him: provided that during such three months the apprentice continues to live with and serve as an apprentice the master's legal representative, or such person as he appoints.

XIX of 1850, **28.** If the master of any apprentice is during the apprenticeship adjudged to have committed an act of insolvency or declared an insolvent, the apprentice shall be discharged from all obligation under the contract of apprenticeship; and if any premium was paid on binding him apprentice, he or the person by whom he was bound shall be entitled to claim the amount thereof as a debt against the estate of the insolvent.

Effect of master's insolvency.

Penn v. *Ward*, 2 C. M. & R. 338. **29.** The rights and duties of the master as regards the apprentice, and the rights and duties of the apprentice as regards the master, are (subject to the provisions of the contract of apprenticeship) as nearly as may be the same as those set forth in sections eleven, twelve, fifteen and eighteen: provided that if an apprentice is guilty of misbehaviour, his master may chastise him in a moderate manner.

Rights and duties of master and apprentice.

Master's powers to chastise.

CHAPTER VI.—JURISDICTION OF MAGISTRATES.

(*A*).—*Artisans, Workmen and Labourers.*

Bill, s. 26. Act XIII of 1859, which now applies to the Presidency-towns, the Bombay and Madras Mufassal, Massúrí, Landour, Saháranpur, Mirath, Murádábád, Bareilí, Nainí Tál, Sháhjahánpur, Agra, Farrukhábád, Cawnpore, Allahábád, Benares, Mysore, Coorg, Sindh, the Panjáb and the Districts of Nimár, Sylhet and Goálpárá, and probably elsewhere. Gold and silver money given to a goldsmith as raw material wherewith to make an idol has been held an advance within the meaning of Act XIII of 1859, s. 2, 6 Mad. H. C. Rulings, xxiv.

30. When an employer advances to an artisan, workman or labourer money on account of, or to be used as material for, any specific piece of work which the latter has contracted to execute wholly or partly by himself, and such artisan, workman or labourer wilfully and without sufficient excuse neglects or refuses to perform his contract, the employer may complain to a Magistrate, who shall thereupon issue a summons or warrant, as he thinks fit, for bringing such artisan, workman or labourer before him.

Failure to perform work on account of which artisan has received an advance.

If the Magistrate, after hearing such evidence as the parties may adduce, is satisfied of the truth of the complaint, he shall, at the option of the employer, either—

(*a*) order the artisan, workman or labourer, on or before such day as the Magistrate directs, to repay the money advanced or such part thereof as the Magistrate thinks fit, together with any materials delivered by the employer to the artisan workman or labourer for the purpose of the contract, or

(*b*) order him to execute the work according to the terms of the contract.

If the artisan, workman or labourer fails to comply with either of such orders, the Magistrate may sentence him to imprisonment for a term which may extend to three months, or, when the order is for repayment of money, for such term or until such money is sooner repaid.

Where the Magistrate makes an order under clause (*b*), he may also, at the employer's request, require the artisan, workman or labourer to execute a bond, with sufficient sureties, for the due performance of the order; and, in default of his executing such bond, or furnishing such sureties to the satisfaction of the Magistrate, may sentence him to imprisonment for a term which may extend to three months.

Where the bond is executed, but the order under clause (*b*) is not duly performed, payment of the penalty of the bond may be enforced in manner provided by the Code of Criminal Procedure, section 396, or (in the towns of Calcutta, Madras and Bombay) by the Presidency Magistrates Act, 1877, section 77.

Nothing in this section applies to cases where the advance has been, in accordance with the contract, worked off or expended.

(*B*).—*Workmen employed on Public Works.*

Bill, s. 27. Act 1X of 1860, which now applies to the Panjáb, nine Bombay Districts, Nimár, Nadiyá, 24 Parganas and Báráset, part of the Central Provinces and probably elsewhere.

31. Any Magistrate may enquire into and decide disputes as to wages, hire of carriage and price of work between any employers and their workmen employed in the construction of any railway, canal or other public work sanctioned by Government: Provided that the amount in dispute does not exceed two hundred rupees.

Disputes between employers and workmen on railways, &c.

Cases under this section shall be dealt with, so far as may be, as if they were trials under the Code of Criminal Procedure, chapter XVI. But no appeal shall lie from the decision in any such case.

When the Magistrate has heard and decided the case, he shall make an order for the payment, immediately or within such time as he directs, of such sum of money (if any) as appears to him to be justly due, and, if the person ordered to pay fails to pay such sum immediately or within such time as the Magistrate directs, the Magistrate shall issue his warrant to levy the money by distress and sale of the moveable property of the defaulter.

Bill, s. 28. **32.** Whoever contracts to work for a specified term on any such railway, canal or other public work, or to execute any specific work in connection therewith, and who wilfully and without sufficient excuse neglects or refuses to perform such contract, shall be liable, on conviction before a Magistrate, to a fine not exceeding twenty rupees.

Punishment for breach of contract to work for fixed term on railway, &c.

But the Magistrate may, at the request of the employer, instead of punishing the servant so neglecting or refusing, order him by himself or another to execute the work according to the terms of his contract; and if he fail to comply with such order, the Magistrate may sentence him to imprisonment for a term which may extend to two months.

Power to order performance of contract.

(*C*).—*Apprentices.*

Act XIX of 1850, s. 18. **33.** Upon complaint made to any Magistrate by or on behalf of any apprentice of refusal or neglect to provide for him, or to teach him according to the contract of apprenticeship, or of cruelty or other ill-treatment by his master, or by the agent under whom he has been placed by his master, the Magistrate may summon the master or his agent, as the case may be, if he is within his jurisdiction, to appear before him at a reasonable time, to be stated in the summons, to answer the complaint; and at such time, whether the master or his agent be present or not (service of the summons being proved), may examine into the matter of the complaint; and, upon proof thereof, may cancel the contract of apprenticeship, and assess upon the offender, whether he be the master or his agent, a reasonable sum for behoof of the apprentice, not exceeding four times the amount of the premium paid upon the binding, or if no premium or a less premium than fifty rupees was paid, not exceeding two hundred rupees; and, if the offender fails to pay the sum so assessed, may levy the same by distress and sale of his moveable property, and, if the offender is not the master but his agent, by distress and sale of the moveable property of the master also.

Complaint by apprentice against master.

Act XIX of 1850, s. 17. **34.** The Magistrate may order any sum recovered under section thirty-three to be either laid out in binding the apprentice to another master, or otherwise for his benefit, or paid to the person by whom any premium was paid when he was bound apprentice.

Appropriation of sum recovered for apprentice on cancellation of contract.

Act XIX of 1850, s. 14. **35.** No contract of apprenticeship shall be cancelled on account of moderate chastisement for misbehaviour given to any apprentice by his master or the agent of his master; and the provision for enabling the contract of apprenticeship to be cancelled shall not bar any criminal proceeding against any master or his agent for an assault or other offence committed against his apprentice for which he would be liable to be punished, whether or not any proceedings be taken for cancelling the contract of apprenticeship.

Contract not to be cancelled for moderate chastisement.

Liability of master for assault.

Act XIX of 1850, s. 15. **36.** Upon complaint made to any Magistrate by or on behalf of the master of any apprentice of any ill-behaviour of such apprentice, or if such apprentice has absconded, the Magistrate may issue his warrant for apprehending such apprentice, and may hear and determine the complaint, and punish the offender, by an order for keeping the offender, if a boy, in confinement in any suitable place, not being a criminal gaol, for any time not exceeding one month, of which one week may be in solitary confinement, during which time such allowance shall be made for his subsistence by the master or his agent as the Magistrate may order; and, if the offender be a boy of not more than fourteen years of age, may order him to be privately whipped: or, if the offender be a girl, or in the case of any boy the Magistrate deem any such punishment unfit, he may pass an order empowering the master of the apprentice or his agent to keep the offender in close confinement in his own house, or on board the vessel to which he belongs upon bread and water, or such other plain food as may be given without injury to the health of the apprentice, for a period not exceeding one month.

Complaint by master against apprentice.

Act XIX of 1850, s. 16. **37.** Upon complaint of wilful and repeated ill-behaviour on part of the apprentice, and on the demand of the master, the Magistrate may order the contract of apprenticeship to be cancelled, whether or not the charge is proved; but only with the consent of the apprentice and of his father or guardian, if the charge is not proved. Such cancelling shall be with or without refund of the whole or part of any premium paid to the master on binding such apprentice as to the Magistrate seems fit; and all sums so refunded shall be applied under the direction of the Magistrate for behoof of the apprentice.

Cancellation of contract for misconduct of apprentice.

Act XIX of 1850, s. 18. **38.** No Magistrate shall entertain a complaint on the part of a master against an apprentice unless it be brought within one month after the cause of complaint arose; or, if the cause of complaint arose on boardship during a voyage, within one month after the arrival thereof at a port or place in British India;

and no Magistrate shall entertain a complaint on the part of an apprentice against his master or the agent of his master unless it be brought within three months after the cause of complaint arose; or if the cause of complaint arose on boardship during a voyage, within three months after the arrival of the ship at a port or place in British India.

Limitation of complaints.

(*d*).—*Miscellaneous.*

Bill, s. 29. **39.** In this chapter "master" and "employer" include also any person authorized to act on behalf of a master or employer; and "Magistrate" means in the towns of Calcutta, Madras and Bombay a Presidency Magistrate, and elsewhere a Magistrate of the first or second class empowered by the Local Government to act under this chapter.

"Master," "employer" and "Magistrate."

Bill, s. 30.

40. Nothing herein contained shall prevent any person from being prosecuted under any other law for any offence punishable under this chapter: provided that no person shall be punished twice for the same offence;

Saving of prosecutions under other laws.

2. Mad.

and no order made under this chapter for the payment of money shall, while the same remains unpaid, deprive the complainant of any civil remedy which he might have had but for this Act.

Saving of civil remedies.

THE FIRST SCHEDULE.

ENACTMENTS REPEALED.

(*See section 2.*)

Number and year.	Subject.
XIX of 1850 ...	For the binding of Apprentices.
XIII of 1859 ...	For the punishment of breaches of contract by artificers, workmen and labourers in certain cases.
IX of 1860 ...	For the speedy determination of certain disputes between workmen engaged on railway and other public works and their employers.

THE SECOND SCHEDULE.

FORMS.

(*See sections 22 and 26.*)

A.—Form of Agreement.

This agreement, made the day of in the year between A. B. of and C. D. of, witnesseth that the said A. B. doth this day bind E. F., a boy (*or* girl) of the age of years completed, son (*or* daughter) of the said A. B. (*or otherwise describing the relation in which A. B. and E. F. stand*) to dwell with and serve the said C. D., as an apprentice, from this day forth for years (*in the case of a girl add*, "or until the time of her marriage, which shall first happen"), during all which term the said apprentice shall faithfully serve the said C. D. according to his (*or* her) skill and ability in all lawful business, and demean and behave himself (*or* herself) honestly, orderly and obediently, in all things towards the said C. D. and his (*or* her) family. And the said C. D. for himself (*or* herself) and his (*or* her) executors and administrators, in consideration [of the premium or sum of paid by the said A. B. to the said C. D., and] of the faithful service of the said E. F., doth agree with the said A. B., his (*or* her) executors and administrators, that he (*or* she) will teach or cause to be taught to the said E. F., in the best way and manner that he (*or* she) can, the trade (craft or employment) of a during the said term; and will also, during the said term, provide the said apprentice with good, wholesome and sufficient food, clothes, lodging, washing and all other things necessary, fit and reasonable for an apprentice (and further, *here insert any special agreements*).

If there is no premium, the words between brackets may be omitted.

In witness whereof, the parties have hereunto set their hands and seals, the day and year above written.

A. B. L. S.

C. D. L. S.

B.—Form of Order of Assignment.

(To be endorsed on the Agreement.)

Be it known to all men that on the day of in the year personally, appeared before G. H., Magistrate of C. D. of with E. F., his (*or* her) apprentice, and J. K. of, and desired that the agreement of apprenticeship whereby the said E. F. was bound to the said C. D. might be assigned to the said J. K., and the said G. H., having satisfied himself, by personal examination of the said E. F. and by other lawful ways and means, that such assignment is for the benefit of the said E. F., and is made with the consent of [the said E. F., and of] all persons whose consent thereunto by law is required, doth allow such assignment; and the contract of apprenticeship whereby the said E. F. was on the day of in the year bound to the said C. D. as an apprentice to learn the trade (craft *or* employment) of a shall henceforth endure, unto the end of the said term, as if the said J. K. had been originally party to the said deed, and had executed the same, in the place of the said C. D., and shall be bound, for himself (*or* herself), his (*or* her) executors or administrators, to fulfil the agreements by the said C. D. to be performed, and the said E. F. shall henceforth be bound unto the said J. K., in like manner as he (*or* she) was by the said agreement bound unto the said C. D.

If E. F. is not above the age of fourteen years, the words between brackets may be omitted.

C. D. *E. F.* *J. K.*

In witness whereof, the said C. D., E. F. and J. K. have hereunto set their hands before me, the day and year above written.

G. H., Magistrate.

C.

THE EASEMENTS BILL, 1879.

CONTENTS.

PREAMBLE.

PRELIMINARY.

SECTIONS.

1. Short title.
   Local extent.
   Commencement.
2. Savings.
3. Repeal of Act XV of 1877, sections 26 and 27.

CHAPTER I.—OF EASEMENTS GENERALLY.

4. "Easement" defined.
   Dominant and servient heritages and owners.
5. Affirmative easements.
   Negative easements.
6. Continuous and discontinuous, apparent and non-apparent, easements.
7. Easement for limited time or on condition.
8. Easements restrictive of certain rights.
   (*a*) Exclusive right to enjoy:
   (*b*) Rights arising from situation.

CHAPTER II.—THE IMPOSITION, ACQUISITION AND TRANSFER OF EASEMENTS.

9. Who may impose easements.
10. Servient owners.
11. Lessor and mortgagor.
    Lessee.
12. Who may acquire easements.
13. Easements of necessity.
14. Direction of way of necessity.
15. Acquisition by prescription.
16. Exclusion in favour of reversioner of servient heritage.
17. Rights which cannot be acquired by prescription.
18. Customary easements.
19. Transfer of dominant heritage passes easement.

CHAPTER III.—THE INCIDENTS OF EASEMENTS.

20. Rules controlled by contract or title.
    Incidents of customary easements.
21. Bar to use unconnected with enjoyment.
22. Exercise of easement.
    Confinement of exercise of easement.
23. Right to alter mode of enjoyment.
24. Right to do acts to secure enjoyment.
    Accessory rights.
25. Liability for expenses necessary for preservation of easement.
26. Liability for damage from want of repair.
27. Servient owner not bound to do anything.
28. Extent of easements—
    Easement of necessity.
    Other easements.

SECTIONS.

(*a*) Right of way;
(*b*) Right to light or air acquired by grant;
(*c*) Prescriptive right to light or air;
(*d*) Prescriptive right to pollute air and water;
(*e*) Other prescriptive rights.

29. Increase of easement.
30. Partition of dominant heritage.
31. Obstruction in case of excessive user.

CHAPTER IV.—THE DISTURBANCE OF EASEMENTS.

32. Right to enjoyment without disturbance.
33. Suit for disturbance of easement.
34. When cause of action arises for removal of support.
35. Polluting air and water previously impure.
36. Suit for continuing disturbance.
37. Injunction to restrain disturbance.
38. Abatement of obstruction of easement.

CHAPTER V.—THE EXTINCTION, SUSPENSION AND REVIVAL OF EASEMENTS.

39. Extinction by dissolution of right of servient owner.
40. Extinction by release.
41. Extinction by revocation.
42. Extinction on expiration of limited period or happening of dissolving condition.
43. Extinction on termination of necessity.
44. Extinction of useless easement.
45. (*a*) Extinction by substantial change of dominant heritage.
    (*b*) Extinction by material and permanent increase of burden.
46. Extinction on permanent alteration of servient heritage by superior force.
47. Extinction by destruction of either heritage.
48. Extinction by unity of ownership.
49. Extinction by non-user.
50. Extinction of accessory rights.
51. Suspension of easement.
52. Servient owner not entitled to require continuance, nor to compensation for suspension.
53. Revival of easements.

CHAPTER VI.—LICENSES.

54. "License" defined.
55. Who may grant license.
56. Grant may be express or implied.
57. Accessory licenses annexed by law.
58. License when transferable.
59. Grantor's duty to disclose defects.
60. Grantor's duty not to render property unsafe.
61. Grantor's transferee not bound by license.
62. License when revocable.
63. Revocation express or implied.
64. License when deemed revoked.
65. Licensee's rights on revocation.
66. Licensee's rights on eviction.

A Bill to define and amend the law relating to Easements and Licenses.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

WHEREAS it is expedient to define and amend the law relating to Easements and Licenses; It is hereby enacted as follows :—

Preamble.

PRELIMINARY.

Bill, s. 1.

Short title.

1. This Act may be called "The Easements Act, 1880:"

Local extent.

It extends to the whole of British India except the scheduled districts;

Commencement.

and it shall come into force on the first day of *March, 1880.*

Bill, s. 2.

Savings.

2. Nothing herein contained shall be deemed to affect—

(*a*) any right of the Government to regulate the collection, retention and distribution of the water of rivers and streams flowing in natural channels and of natural lakes and ponds; or of water flowing, collected, retained or distributed in or by any channel or other work constructed at the public expense for irrigation;

(*b*) any customary or other right (not being a license) in or over immoveable property which the Government, the public or any person may possess irrespective of other immoveable property; or

(*c*) any right acquired, or arising out of a relation created, before this Act comes into force;

(*d*) any law not hereby expressly repealed.

Bill, s. 3.

Repeal of Act XV of 1877, sections 26 and 27.

3. Sections 26 and 27 of the Indian Limitation Act, 1877, and the definition of 'easement' contained in that Act, are hereby repealed.

All references to the said sections, or to sections 27 and 28 of Act No. IX of 1871, shall be read as made to sections fifteen and sixteen of this Act.

CHAPTER I.—OF EASEMENTS GENERALLY.

Bill, s. 4.

"Easement" defined.

4. An easement is a right which the owner or occupier of certain land possesses as such for the beneficial enjoyment of that land, to do and continue to do something, or prevent and continue to prevent something being done, in, or upon, or in respect of, certain other land not his own.

Dominant and servient heritages and owners.

The land for the beneficial enjoyment of which the right exists is called the dominant heritage, and the owner or occupier thereof the dominant owner: the land on which the liability is imposed is called the servient heritage, and the owner thereof the servient owner.

Explanation.—In the first and second clauses of this section, the expression 'land' includes also things permanently attached to the earth: the expression 'beneficial enjoyment' includes also possible convenience, remote advantage, and even a mere amenity; and the expression 'to do something' includes removal and appropriation by the dominant owner, for the beneficial enjoyment of the dominant heritage, of any part of the soil of the servient heritage or anything growing or subsisting thereon.

Illustrations.

(*a*). A, as the owner of a certain house, has a right of way thither over his neighbour B's land for purposes connected with the beneficial enjoyment of the house. This is an easement.

(*b*). A, as the owner of a certain house, has the right to go on his neighbour B's land, and to take water for the purposes of his household out of a spring therein. This is an easement.

(*c*). A, as the owner of a certain house, has the right to conduct water from B's stream to supply the fountains in the garden attached to the house. This is an easement.

(*d*). A, as the owner of a certain house and farm, has the right to graze a certain number of his own cattle on B's field, or to take, for the purpose of being used in the house, by himself, his family, guests, lodgers and servants, water or fish out of C's tank, or timber out of D's wood, or to use, for the purpose of manuring his land, the leaves which have fallen from the trees on E's land. These are easements.

(*e*). A dedicates to the public the right to occupy the surface of certain land for the purpose of passing and repassing. This right is not an easement.

(*f*). A is bound to cleanse a watercourse running through his land and keep it free from obstruction for the benefit of B, a lower riparian owner. This is not an easement.

Bill, s. 5.

Affirmative easements.

Negative easements.

5. Easements are either affirmative or negative. An affirmative easement is one authorizing the dominant owner to do in, upon or in respect of, the servient heritage, something for the beneficial enjoyment of the dominant heritage. A negative easement is one binding the servient owner to refrain, for the beneficial enjoyment of the dominant heritage, from doing something in, upon or in respect of, the servient heritage.

Illustrations.

The following are affirmative easements :—

(*a*). A right of way annexed to A's house over B's land.

(*b*). An easement annexed to A's land to conduct water across B's land by an artificial watercourse.

(*c*). An easement annexed to A's house to discharge water by a spout or conduit, or projecting eaves, on B's land.

(*d*). An easement annexed to A's farm to go to his neighbour B's tank to water A's cattle, or to B's well to draw water for the use of A's household.

(*e*). An easement annexed to A's land to throw back upon the lands of riparian owners higher up a natural stream water which, unless so thrown back, would pass from such lands.

(*f*). An easement annexed to A's land to discharge the water of a natural stream upon B's land lying lower down the stream, either polluted or with the force of its natural current increased or diminished.

(*g*). An easement annexed to A's dock to place the vessels therein so that their bowsprits project over B's wharf.

(*h*). An easement annexed to A's house to burn corpses on B's land.

(*i*). An easement annexed to A's land to thresh grain on B's field.

The following are negative easements :—

(*j*). An easement annexed to B's house to receive light and air by its windows without obstruction by his neighbour A. This binds A to refrain, for the beneficial enjoyment of B's house, from exercising his right to build on his own land.

(*k*). An easement annexed to A's land encumbered by buildings, to receive the support of his neighbour B's soil. This binds B to refrain, for the beneficial enjoyment of A's land, from exercising his right to excavate his own soil.

(*l*). An easement annexed to A's house to insert beams in, or to place beams on, his neighbour B's wall. This binds B to refrain, for the beneficial enjoyment of A's house, from exercising his right to pull down his own wall.

(*m*). An easement annexed to A's house to discharge the rain running from its roof upon his neighbour B's land. This binds B to refrain, for the beneficial enjoyment of A's house, from exercising his right to build on his own land so as to prevent the discharge.

(*n*). A customary easement annexed to B's house to restrain his neighbour A from opening doors or windows in such a position as to command a view into B's housetop or courtyard. This binds A to refrain, for the beneficial enjoyment of B's house, from exercising his right to make openings in his own walls of such a character as to interfere with B's privacy.

Bill, s. 6.

Continuous and discontinuous, apparent and non-apparent, easements.

6. Easements are either continuous or discontinuous, apparent or non-apparent.

A continuous easement is one whose exercise is or may be continual without the act of man.

A discontinuous easement is one that needs the act of man for its exercise.

An apparent easement is one that has some permanent visible sign of its existence.

A non-apparent easement is one that has no such sign.

Illustrations.

(*a*). A right annexed to B's house to receive light by the windows without obstruction by his neighbour A. This is a continuous easement.

(*b*). A right of way annexed to A's house over B's land. This is a discontinuous easement.

(*c*). Rights annexed to A's land to lead water thither across B's land by an aqueduct and to draw off water thence by a drain. These are apparent easements.

(*d*). A right annexed to A's house to prevent B from building on his own land. This is a non-apparent easement.

Bill, s. 14.

Easement for limited time or on condition.

7. An easement may be permanent, or for a term of years or other limited period, or subject to periodical interruption, or exerciseable only at a certain place, or at certain times, or between certain hours, or for a particular purpose, or on condition that it shall commence or become void or voidable on the happening of a specified event or the performance or non-performance of a specified act.

Bill, s. 7.

Easements restrictive of certain rights.

8. Easements are restrictions of one or other of the following rights (namely) :—

Exclusive right to enjoy.

(*a*). The exclusive right of every owner of immoveable property (subject to any law for the time being in force) to enjoy and dispose of the same and all products thereof and accessions thereto:

Rights arising from situation.

(*b*). The right of every owner of immoveable property (subject to any law for the time being in force) to enjoy without disturbance by another the natural advantages arising from its situation.

Illustrations.

(*a*). The exclusive right of every owner of land in a town to build thereon, subject to any municipal law for the time being in force. — N.-W. P. (1870), pp 169, 182.

(*b*). The right of every owner of land that the air passing thereto shall not be unreasonably polluted by other persons.

(*c*). The right of every owner of a house that his physical comfort shall not be interfered with materially and unreasonably by noise or vibration caused by any other person. — Recognized by the High Court, N.-W. P., No. 1143 of 1878, 28th November, 1878, *Mahadeo Misser* v. *Phatteo Singh.*

(*d*). The right of every owner of land to so much light and air as pass vertically thereto.

(*e*). The right of every owner of land that such land, in its natural condition, shall have the support naturally rendered by the subjacent and adjacent soil of another person.

Explanation.—Land is in its natural condition when it is not excavated and not subjected to artificial pressure; and the "subjacent and adjacent soil" mentioned in this illustration means such soil only as in its natural condition would support the dominant heritage in its natural condition. — *Mayor of Birmingham* v. *Allen*, L. J. Ch.

(*f*). The right of every owner of land that, within his own limits, the water which naturally passes or percolates by, over or through his land, shall not, before so passing or percolating, be unreasonably polluted by other persons.

(*g*). The right of every owner of land to collect, and dispose within his own limits of, all water under the land and all water on its surface which does not pass in a defined channel. — Marshall 508.

(*h*). The right of every owner of land that the water of every natural stream which passes by, through or over his land in a defined natural channel shall be allowed by other persons to flow within such owner's limits without interruption and without material alteration in quantity, direction, force or temperature: the right of every owner of land abutting on a natural lake or pond, into or out of which a natural stream flows, that the water of such lake or pond shall be allowed by other persons to remain within such owner's limits without material alteration in quantity or temperature. — L. R. 6 Ind. App. 33; 3 W. R. 218; 13 W. R. 48; 8 W. R. 525.

(*i*). The right of every owner of upper land that water naturally rising in or falling on such land, and not passing in defined channels, shall be allowed by the owner of adjacent lower land to run naturally thereto. — 20 W. R. 287.

(*j*). The right of every owner of land abutting on a natural stream, lake or pond to use and consume its water for drinking, household purposes, and watering his cattle and sheep; and the right of every such owner to use and consume the water for irrigating such land, and for the purposes of any manufactory situate thereon, provided that he does not thereby cause material injury to other like owners.

Explanation.—A natural stream is a stream, whether permanent or intermittent, tidal or tideless, on the surface of land or underground, which flows by the operation of nature only and in a natural and known course.

CHAPTER II.—THE IMPOSITION, ACQUISITION AND TRANSFER OF EASEMENTS.

Bill, s. 8.

9. An easement may be imposed by any one in the circumstances and to the extent in and to which he may transfer his interest in the servient heritage.

Who may impose easements.

Illustrations.

(*a*). A is tenant of B's land under a lease for an unexpired term of twenty years and has power to transfer his interest under the lease. A may impose an easement on the land to continue during the time that the lease exists or for any shorter period.

(*b*). A is tenant for his life of certain land with remainder to B absolutely. A cannot, unless with B's consent, impose an easement thereon which will continue after the determination of his life-interest.

(*c*). A, B and C are co-owners of certain land. A cannot, without the consent of B and C, impose an easement on the land or on any part thereof.

(*d*). A and B are lessees of the same lessor, A of a field X for a term of five years, and B of a field Y for a term of ten years. A's interest under his lease is transferable; B's is not. A may impose on X, in favour of B, a right of way terminable with A's lease.

(*e*). A is the trustee of certain land for the benefit of B. A cannot, without the consent of B, impose an easement on the trust-property.

Bill, s. 9.

10. Subject to the provisions of section nine, a servient owner may impose on the servient heritage any easement that does not lessen the utility of the existing easement. But he cannot, without the consent of the dominant owner, impose an easement on the servient heritage which would lessen such utility.

Servient owners.

Illustrations.

(*a*). A has, in respect of his mill, a right to the uninterrupted flow thereto, from sunrise to noon, of the water of B's stream. B may grant to C the right to divert the water of the stream from noon to sunset: provided that A's supply is not thereby diminished.

(*b*). A has, in respect of his house, a right of way over B's land. B may grant to C, as the owner of a neighbouring farm, the right to feed his cattle on the grass growing on the way: provided that A's right of way is not thereby obstructed.

Bill, s. 10.

11. Subject to the provisions of section nine, a lessor may impose, on the property leased, any easement that does not derogate from the rights of the lessee as such, and a mortgagor may impose, on the property mortgaged, any easement that does not render the security insufficient within the meaning of the Transfer of Property Act, section 63. But a lessor or mortgagor cannot, without the consent of the lessee or mortgagee, impose any other easement on such property, unless it be to take effect on the termination of the lease or the redemption of the mortgage.

Lessor and mortgagor.

No lessee or other person having a derivative interest may impose on the property held by him as such an easement to take effect after the expiration of his own interest or in derogation of the right of the lessor or the superior proprietor.

Lessee.

Bill, s. 11.

12. An easement may be acquired by the owner of the dominant heritage or, on his behalf, by any person in possession of the same.

Who may acquire easements.

One of two or more co-owners may, with or without the consent of the other or others, acquire an easement for the beneficial enjoyment of the heritage held in co-ownership.

No lessee of immoveable property can acquire for the beneficial enjoyment of other immoveable property of his own an easement in or over the property comprised in his lease. 7 Mad. 64.

13. Where one person transfers or bequeathes immoveable property to another,—

Easements of necessity.

(*a*) if an easement in other immoveable property of the transferor or testator is absolutely necessary for enjoying the subject of the transfer or bequest, the transferee or legatee shall be entitled to such easement, or

(*b*) if such an easement is apparent and continuous and necessary for enjoying the said subject as it was enjoyed when the transfer or bequest took effect, the transferee or legatee shall, unless a different intention is expressed or necessarily implied, be entitled to such easement;

(*c*) if an easement in the subject of the transfer or bequest is absolutely necessary for enjoying other immoveable property of the transferor or testator, the transferor or the legal representative of the testator shall be entitled to such easement, or

(*d*) if such an easement is apparent and continuous and necessary for enjoying the said property as it was enjoyed when the transfer or bequest took effect, the transferor or the legal representative of the testator shall, unless a different intention is expressed or necessarily implied, be entitled to such easement.

Where a partition is made of the joint property of several persons,— 8 Bom. 181.

(*e*) if an easement over the share of one of them is absolutely necessary for enjoying the share of another of them, the latter shall be entitled to such easement, or

(*f*) if such an easement is apparent and continuous and necessary for enjoying the share of the latter, he shall, unless a different intention is expressed or necessarily implied, be entitled to such easement.

The easements mentioned in this section, clauses (*a*), (*c*) and (*e*), are called easements of necessity.

Where immoveable property passes by operation of law, the persons from and to whom it so passes are, for the purpose of this section, to be deemed, respectively, the transferor and transferee.

Illustrations.

(*a*). A sells B a field, inaccessible except by passing over A's adjoining land, or by trespassing on the land of a stranger. B is entitled to a right of way over A's adjoining land to the field sold.

(*b*). A, the owner of two fields, sells one to B, and reserves the other. The field reserved is inaccessible except by passing over the field sold to B. A is entitled to a right of way over B's field to the field reserved.

(*c*). A grants B the minerals under a certain field belonging to A. B is entitled, if there is no other way by which he can lawfully gain the minerals, to dig through the surface of the field and to carry the minerals over it.

(*d*). A sells B a house, with windows overlooking A's land, which A retains. The light which passes over A's land to the windows is necessary for enjoying the house as it was enjoyed when the grant took effect. B is entitled to the light, and A cannot afterwards obstruct it by building on his land.

(*e*). A sells B a house, with windows overlooking A's land. The light passing over A's land to the windows is necessary for enjoying the house as it was enjoyed when the grant took effect. Afterwards A sells the land to C. Here C cannot obstruct the light by building on the land, for he takes it subject to the burdens to which it was subject in A's hands.

(*f*). A is the owner of a house and adjoining land. The house has windows overlooking the land. A simultaneously sells the house to B and the land to C. The light passing over the land is necessary for enjoying the house as it was enjoyed when the sale was made. Here A impliedly grants B a right to the light, and C takes the land subject to the restriction that he may not build so as to obstruct such light.

(*g*). A is the owner of a house and adjoining land. The house has windows overlooking the land. A, retaining the house, sells the land to B, without reserving any easement. The light passing over the land is necessary for enjoying the house as it was enjoyed when the sale took effect. A is entitled to the light, and B cannot build on the land so as to obstruct such light.

(*h*). A sells B a factory. B is entitled, as against A, to pollute the air, when necessary, with smoke and vapours from the factory.

(*i*). A, the owner of two adjoining houses, Y and Z, sells Y to B, and retains Z. B is entitled to the benefit of all the gutters and drains common to the two houses and necessary for enjoying Y as it was enjoyed when the sale was made, and A is entitled to the benefit of all the gutters and drains common to the two houses and necessary for enjoying Z as it was enjoyed when the sale was made.

(*j*). A, the owner of two adjoining buildings, sells one to B, retaining the other. B is entitled to a right to lateral support from A's building, and A is entitled to a right to lateral support from B's building.

(*k*). A, the owner of two adjoining buildings, sells one to B, and the other to C. C is entitled to lateral support from B's building, and B is entitled to lateral support from C's building.

(*l*). A grants land to B for the purpose of building a house thereon. B is entitled to such amount of lateral and subjacent support from A's land as is necessary for the safety of the house.

(*m*). Under the Land Acquisition Act, 1870, the officer of a Railway Company compulsorily acquires a portion of B's land for the purpose of making a siding. The Company is entitled to such amount of lateral support from B's adjoining land as is essential for the safety of the siding.

(*n*). Owing to the partition of joint property, A becomes the owner of an upper room in a building and B becomes the owner of the portion of the building immediately beneath it. A is entitled to such amount of vertical support from B's portion as is essential for the safety of the upper room.

(*o*). A lets a house and grounds to B for a particular business. B has no access to them other than by crossing A's land. B is entitled to a right of way over that land suitable to the business to be carried on by B in the house and grounds.

(*p*). A lets land to B, but excepts all the trees of a certain age growing on the land. A and the intending purchasers of the trees are entitled to a right of way over the land for the purpose of examining the trees. A is also entitled to a right of way over the land for the purpose of felling and removing the trees when they have attained the specified age.

Bill, s. 13.

14. When a right to a way of necessity is created under section thirteen, the transferor, the legal representative of the testator, or the owner of the share in which the right exists, as the case may be, is entitled to set out the way; but it must be reasonably convenient for the dominant owner.

Direction of way of necessity.

When the person so entitled to set out the way refuses or neglects to do so, the dominant owner may set it out.

Bill, s. 15. Act XV of 1877, s. 26.

15. Where the access and use of light or air to and for any building have been peaceably enjoyed therewith, as an easement, and as of right, without interruption, and for twenty years,

Acquisition by prescription.

and where support from one person's land, or things affixed thereto, has been peaceably received by another person's land subjected to artificial pressure, or by things affixed thereto, as an easement, without interruption, and for twenty years,

and where any way or watercourse, or the use of any water, or any other easement (whether affirmative or negative), has been peaceably and openly enjoyed by any person claiming title thereto, as an easement and as of right, without interruption, and for twenty years,

the right to such access and use of light or air, support, way, watercourse, use of water or other easement shall be absolute.

Each of the said periods of twenty years shall be taken to be a period ending within two years next before the institution of the suit wherein the claim to which such period relates is contested.

Explanation I.—Nothing is an enjoyment within the meaning of this section when it has been had in pursuance of an agreement with the owner or occupier of the property over which the right is claimed and it is apparent from the agreement that such right has not been granted as an easement, or if granted as an easement, that it has been granted for a limited period, or subject to a condition on the fulfilment of which it is to cease.

Explanation II.—Nothing is an interruption within the meaning of this section, unless where there is an actual cessation of the enjoyment by reason of an obstruction by the act of some person other than the claimant, and unless such obstruc-

tion is submitted to or acquiesced in for one year after the claimant has notice thereof and of the person making or authorizing the same to be made.

Explanation III.—Suspension of enjoyment in pursuance of a contract between the dominant and servient owners is not an interruption within the meaning of this section.

Explanation IV.—In the case of an easement of support, where the soil of the dominant heritage is subjected to artificial pressure not externally apparent, or where the outward thrust of things affixed thereto is enhanced by causes not externally apparent, the said period of twenty years begins when the circumstance by which the burden on the servient heritage is increased becomes known to the servient owner.

Explanation V.—In the case of an easement to pollute water, the said period of twenty years begins when the pollution first prejudices perceptibly the servient heritage.

Illustrations.

(*a*). A suit is brought in 1881 for obstructing a right of way. The defendant admits the obstruction, but denies the right of way. The plaintiff proves that the right was peaceably and openly enjoyed by him, claiming title thereto as an easement and as of right, without interruption, from first January 1860 to first January 1880. The plaintiff is entitled to judgment.

(*b*). In a like suit also brought in 1881, the plaintiff merely proves that he enjoyed the right in manner aforesaid from 1858 to 1878. The suit shall be dismissed, as no exercise of the right by actual user has been proved to have taken place within two years next before the institution of the suit.

(*c*). In a like suit the plaintiff shows that the right was peaceably and openly enjoyed by him for twenty years. The defendant proves that for a year of that time the plaintiff was entitled to possession of the servient heritage as lessee thereof and enjoyed the right as such lessee. The suit shall be dismissed, for the right of way has not been enjoyed 'as an easement' for twenty years.

(*d*). In a like suit the plaintiff shews that the right was peaceably and openly enjoyed by him for twenty years. The defendant proves that the plaintiff on one occasion during the twenty years had admitted that the user was not of right and asked his leave to enjoy the right. The suit shall be dismissed, for the right of way has not been enjoyed 'as of right' for twenty years.

...ar, s. 16. ...t XV of ...77, s. 27.

Exclusion in favour of reversioner of servient heritage.

16. Provided that, when any land or water upon, over, or from which any easement has been enjoyed or derived has been held under or by virtue of any interest for life or any term of years exceeding three years from the granting thereof, the time of the enjoyment of such easement during the continuance of such interest or term shall be excluded in the computation of the said last-mentioned period of twenty years, in case the claim is, within three years next after the determination of such interest or term, resisted by the person entitled, on such determination, to the said land or water.

Illustration.

A sues for a declaration that he is entitled to a right of way over B's land. A proves that he has enjoyed the right for twenty-five years; but B shews that during ten of these years C had a life-interest in the land, that on C's death B became entitled to the land, and that within two years after C's death he contested A's claim to the right. The suit must be dismissed, as A, with reference to the provisions of this section, has only proved enjoyment for fifteen years.

Rights which cannot be acquired by prescription.

17. Easements acquired under section fifteen are said to be acquired by prescription, and are called prescriptive rights. Bill, s.17.

None of the following rights can be so acquired:—

(*a*) a right which would tend to the total destruction of the servient heritage or the subject of the right;

(*b*) a right which would be inconsistent with, and not subordinate to, an actual and existing grant made by the servient owners;

(*c*) a right to the free passage of light or air to an open space of ground;

(*d*) a right to surface-water not flowing in a stream and not permanently collected in a pool, tank or otherwise;

(*e*) a right to underground water not passing in a defined channel.

Explanation.—In this section the expression 'servient owner' means the person who, in case the acquisition referred to were made, would be the owner of the property on which liability would be imposed; and the expression 'servient heritage' means such property.

Customary easements.

18. An easement may be acquired in virtue of a local custom. Such easements are called customary easements. New

Illustrations.

(*a*). By the custom of a certain village every cultivator of village land is entitled, as such, to graze his cattle on the common pasture. A, having bought a plot of uncultivated land in the village, breaks up and cultivates that plot. He thereby acquires an easement to graze his cattle in accordance with the custom.

(*b*). By the custom of a certain town no owner or occupier of a house can open a new window therein so as substantially to invade his neighbour's privacy. A builds a house in the town near B's house. A thereupon acquires an easement that B shall not open new windows in his house so as to command a view of the portions of A's house which are ordinarily excluded from observation, and B acquires a like easement with respect to A's house.

Transfer of dominant heritage passes easement.

19. Where the dominant heritage is transferred or devolves, by act of parties or by operation of law, the transfer or devolution shall, unless a contrary intention appears, be deemed to pass the easement to the person in whose favour the transfer or devolution takes place. Bill, s. 19.

Illustration.

A has certain land to which a right of way is annexed. A lets the land to B for twenty years. The right of way vests in B and his legal representative so long as the lease continues.

CHAPTER III.—THE INCIDENTS OF EASEMENTS.

Bill, s. 20.

Rules controlled by contract or title.

20. The rules contained in this chapter are controlled by any contract between the dominant and servient owners relating to the subject-matter and by the provisions of the instrument or decree, if any, by which the easement referred to was imposed.

Incidents of customary easements.

And when any incident of any customary easement is inconsistent with such rules, nothing in this chapter shall affect such incident.

Bill, s. 21.

Bar to use unconnected with enjoyment.

21. An easement must not be used for any purpose not connected with the enjoyment of the dominant heritage.

Illustrations.

(*a*). A, as owner of a farm, Y, has a right of way over B's land to Y. Lying beyond Y, A has another farm, Z, the beneficial enjoyment of which is not necessary for the beneficial enjoyment of Y. He must not use the easement for the purpose of passing to and from Z.

(*b*). A, as owner of a certain house, has a right of way to and from it. For the purpose of passing to and from the house, the right may be used, not only by A, but by the members of his family, his guests, lodgers, servants, workmen, visitors and customers, for this is a purpose connected with the enjoyment of the dominant heritage. So if A lets the house, he may use the right of way for the purpose of collecting the rent and seeing that the house is kept in repair.

Bill, s. 22.

Exercise of easement.

22. The dominant owner must exercise his right in the mode which is least onerous to the servient owner; and when the exercise of an easement can without detriment to the dominant owner be confined to a determinate part of the servient heritage, such exercise shall, at the request of the servient owner, be so confined.

Confinement of exercise of easement.

Illustrations.

(*a*). A has a right of way over B's field. A must enter the way at either end, and not at any intermediate point.

(*b*). A has a right annexed to his house to cut thatching-grass in B's swamp. A when exercising his easement must cut the grass so that the plants may not be destroyed.

Bill, s. 23.

Right to alter mode of enjoyment.

23. Subject to the provisions of section twenty-two, the dominant owner may from time to time alter the mode and place of enjoying the easement, provided that he does not thereby impose any additional burden on the servient heritage.

Punjab Record, 1867, p. 156.

Exception.—The dominant owner of a right of way cannot vary his line of passage at pleasure, even though he does not thereby impose any additional burden on the servient tenement.

Illustrations.

(*a*). A, the owner of a saw-mill, has a right to a flow of water sufficient to work the mill. He may convert the saw-mill into a corn-mill, provided that it can be worked by the same amount of water.

(*b*). A has a right to discharge on B's land the rain-water from the eaves of A's house. This does not entitle A to advance his eaves if by so doing he imposes a greater burden on B's land.

(*c*). A, as the owner of a paper-mill, acquires a right to pollute a stream by pouring in the refuse-liquor produced by making in the mill paper from rags. He may pollute the stream by pouring in similar liquor produced by making in the mill paper by a new process from bamboos, provided that he does not substantially increase the amount, or injuriously change the nature, of the pollution.

(*d*). A, a riparian owner, acquires, as against the lower riparian owners, a prescriptive right to pollute a stream by throwing sawdust into it. This does not entitle A to pollute the stream by discharging into it poisonous liquor.

Right to do acts to secure enjoyment.

24. The dominant owner is entitled, as against the servient owner, to do all acts necessary to secure the full enjoyment of the easement; but such acts must be done at such time and in such manner as, without detriment to the dominant owner, to cause the servient owner as little inconvenience as possible; and the dominant owner must repair as far as practicable the damage (if any) caused by the act to the servient tenement. Bill, s. 24.

Accessory rights.

Rights to do acts necessary to secure the full enjoyment of an easement are called accessory rights.

Illustrations.

(*a*). A has an easement to lay pipes in B's land to convey water to A's cistern. A may enter and dig the land in order to mend the pipes, but he must restore the surface to its original state.

(*b*). A has an easement of a drain through B's land. The sewer with which the drain communicates is altered. A may enter upon B's land and alter the drain, to adapt it to the new sewer: provided that he does not thereby impose any additional burden on B's land.

(*c*). A, as owner of a certain house, has a right of way over B's land. The way is out of repair, or a tree is blown down and falls across it. A may enter on B's land and repair the way or remove the tree from it.

(*d*). A, as owner of a certain field, has a right of way over B's land. B renders the way impassable. A may deviate from the way and pass over the adjoining land of B, provided that the deviation is reasonable.

(*e*). A, as owner of a certain house, has a right of way over B's field. A may remove rocks to make the way.

(*f*). A has an easement of support from B's wall. The wall gives way. A may enter upon B's land and repair the wall.

(*g*). A has an easement to have his land flooded by means of a dam in B's stream. The dam is half swept away by an inundation. A may enter upon B's land and repair the dam.

Liability for expenses necessary for preservation of easement.

25. The expenses incurred in constructing works, or making repairs, or doing any other act necessary for the user or preservation of an easement, must be defrayed by the dominant owner. Bill, s. 25.

Liability for damage from want of repair.

26. Where an easement is enjoyed by means of an artificial work, the dominant owner is liable to make compensation for any damage to the servient heritage arising from the want of repair of such work. Bill, s. 26.

Servient owner not bound to do anything.

27. The servient owner is not bound to do anything for the benefit of the dominant heritage, and he is entitled, as against the dominant owner, to use the servient heritage in any way consistent with the enjoyment of the easement; but he must not do any act tending to restrict the easement or to render its exercise more inconvenient. Bill, s. 27. N.-W. P. (1867), p. 1

Illustrations.

(*a*). A as owner of a house has a right to lead water and send sewage through B's land. B is not bound as servient owner to clear the watercourse or scour the sewer.

(*b*). A grants a right of way through his land to B as owner of a field. A may feed his cattle on grass growing on the way, provided that B's right of way is not thereby obstructed; but he must not build a wall at the end of his land so as to prevent B from going beyond it, nor must he narrow the way so as to render the exercise of the right less easy than it was at the date of the grant.

(*c*). A, in respect of his house, is entitled to an easement of support from B's wall. B is not bound as servient owner to keep the wall standing and in repair. But he must not pull down or weaken the wall so as to make it incapable of rendering the necessary support.

(*d*). A, in respect of his mill, is entitled to a watercourse through B's land. B must not drive stakes so as to obstruct the watercourse.

(*e*). A, in respect of his house, is entitled to a certain quantity of light passing over B's land. B must not plant trees, so as to obstruct the passage to A's windows of that quantity of light.

Bill, s. 28.

28. With respect to the extent of easements and the mode of their enjoyment, the following provisions shall take effect :—

Extent of easements.

Easement of necessity. An easement of necessity is co-extensive with the necessity.

Other easements. The extent of any other easement and the mode of its enjoyment must be fixed with reference to the probable intention of the parties and the purpose for which the right was imposed or acquired.

In the absence of evidence as to such intention and purpose—

Right of way. (*a*) a right of way of any one kind does not include any other kind :

Right to light or air acquired by grant. (*b*) the extent of a right to the passage of light or air to a certain window, door or other opening, imposed by assurance or will, is the quantity of light or air that entered the opening at the time the assurance was made or the testator died :

Prescriptive right to light or air. (*c*) the extent of a prescriptive right to the passage of light or air to a certain window, door or other opening, is that quantity of light or air which has been accustomed to enter that opening during the whole of the prescriptive period, irrespectively of the purposes for which it has been used :

Prescriptive right to pollute air and water. (*d*) the extent of a prescriptive right to pollute air or water is the extent of the pollution at the commencement of the period of user on completion of which the right arose; and

Other prescriptive rights. (*e*) the extent of every other prescriptive right and the mode of its enjoyment must be determined by the accustomed user of the right.

Bill, s. 29.

29. The dominant owner cannot, by merely altering or adding to the dominant heritage, substantially increase an easement.

Increase of easement.

Where an easement has been granted or bequeathed so that its extent shall be proportionate to the extent of the dominant heritage, if the dominant heritage is increased by alluvion, the easement is proportionately increased, and if the dominant heritage is diminished by diluvion, the easement is proportionately diminished.

Save as aforesaid, no easement is affected by any change in the extent of the dominant or the servient heritage.

Illustrations.

(*a*). A, the owner of a mill, has acquired a prescriptive right to divert to his mill part of the water of a stream. A alters the machinery of his mill. He cannot thereby increase his right to divert water.

(*b*). A has acquired an easement to pollute a stream by carrying on a manufacture on its banks by which a certain quantity of foul matter is discharged into it. A extends his works and thereby increases the quantity discharged. He is responsible to the lower riparian owners for injury done by such increase.

(*c*). A, as the owner of a farm, has a right to take, for the purpose of manuring his farm, leaves which have fallen from the trees on B's land. A buys a field and unites it to his farm. A is not thereby entitled to take leaves to manure this field.

Bill, s. 30.

30. Where a dominant heritage is divided between two or more persons, the easement becomes annexed to each of the shares, but not so as to increase substantially the burden on the servient heritage: provided that such annexation is consistent with the terms of the instrument or decree (if any) under which the division was made or the easement was imposed and, in the case of prescriptive rights, with the user during the prescriptive period.

Partition of dominant heritage.

Illustrations.

(*a*). A house, to which a right of way by a particular path is annexed, is divided into two parts, one of which is granted to A, the other to B. Each is entitled, in respect of his part, to a right of way by the same path.

(*b*). A house, to which is annexed the right of drawing water from a well to the extent of fifty buckets a day, is divided into two distinct heritages, one of which is granted to A, the other to B. A and B are each entitled, in respect of his heritage, to draw from the well fifty buckets a day, but the amount drawn by both must not exceed fifty buckets a day.

(*c*). A, having in respect of his house an easement of light, divides the house into three distinct heritages. Each of these continues to have the right to have its windows unobstructed.

Bill, s. 31.

31. In case of excessive user of an easement, the servient owner may, without prejudice to any other remedies to which he may be entitled, obstruct the user, but only on the servient heritage: provided that such user cannot be obstructed when the obstruction would interfere with the lawful enjoyment of the easement.

Obstruction in case of excessive user.

Illustration.

A, having a right to the free passage over B's land of light to four windows, six feet by four, increases their size and number. It is impossible to obstruct the passage of light to the new windows without also obstructing the passage of light to the ancient windows. B cannot obstruct the excessive user.

CHAPTER IV.—THE DISTURBANCE OF EASEMENTS.

Bill, s. 32.

32. The owner or occupier of the dominant heritage is entitled to enjoy the easement without disturbance by any other person.

Right to enjoyment without disturbance.

Illustration.

A, as owner of a house, has a right of way over B's land. C unlawfully enters on B's land, and obstructs A in his right of way. A may sue C for compensation, not for the entry, but for the obstruction.

Bill, s. 33.

33. The owner of any interest in the dominant heritage, or the occupier of such heritage, may institute a suit for compensation for the disturbance of the easement or of any right accessory thereto: provided that the disturbance has actually caused substantial damage to the plaintiff.

Suit for disturbance of easement.

Explanation I.—The doing of any act likely to injure the plaintiff by affecting the evidence of the easement, or by materially diminishing the value of the dominant heritage, is substantial damage within the meaning of this section and section thirty-five.

Explanation II.—Where the easement disturbed is a right to the free passage of light passing to the openings in a house, no damage is substantial, within the meaning of this section, unless it falls within the first Explanation, or interferes materially with the physical comfort of the plaintiff, or prevents him from carrying on his accustomed business in the dominant heritage as beneficially as he had done previous to instituting the suit.

Explanation III.—Where the easement disturbed is a right to the free passage of air to the openings in a house, damage is substantial, within the meaning of this section, if it interferes materially with the physical comfort of the plaintiff, though it is not injurious to his health.

Illustrations.

(*a*). A places a permanent obstruction in a path over which B, as tenant of C's house, has a right of way. This is substantial damage to C, for it may affect the evidence of his reversionary right to the easement.

(*b*). A, as owner of a house, has a right to walk along one side of B's house. B builds a verandah overhanging the way about ten feet from the ground and so as not to occasion any inconvenience to foot-passengers using the way. This is not substantial damage to A.

34. The removal of the means of support to which a dominant owner is entitled does not give rise to a right to recover compensation unless and until substantial damage is actually sustained.

When cause of action arises for removal of support.

Bill, s. 35.

35. The circumstance that air or water, the subject of an easement, is already polluted by similar or different means does not, of itself, deprive the dominant owner of his right to recover compensation from any person who adds to the pollution.

Polluting air and water previously impure.

Bill, s. 36.

36. Where the disturbance of an easement is continued after compensation has been recovered for the original act of disturbance, another suit may be instituted for compensation for the continuance; and the decision in the former suit is no bar to the latter.

Suit for continuing disturbance.

Bill, s. 37.

37. Subject to the provisions of the Specific Relief Act, 1877, sections 52 to 57 (both inclusive), an injunction may be granted to restrain the disturbance of an easement—

Injunction to restrain disturbance.

(*a*) if the easement is actually disturbed,—when compensation for such disturbance might be recovered under this chapter :

(*b*) if the disturbance is only threatened or intended,—when the act threatened or intended must necessarily, if performed, disturb the easement.

Bill, s. 38.

38. Notwithstanding the provisions of section twenty-four, the dominant owner cannot himself abate a wrongful obstruction of an easement.

Abatement of obstruction of easement.

7 Mad. H. C. Rulings, XXXV.

CHAPTER V.—THE EXTINCTION, SUSPENSION AND REVIVAL OF EASEMENTS.

Bill, s. 39.

39. When, from a cause which preceded the imposition of an easement, the person by whom it was imposed ceases to have any right in the servient heritage, the easement is extinguished.

Extinction by dissolution of right of servient owner.

Exception.—Nothing in this section applies to an easement lawfully imposed by a mortgagor in accordance with section eleven.

Illustrations.

(*a*). A transfers Sultánpur to B on condition that he does not marry C. B imposes an easement on Sultánpur. Then B marries C. B's interest in Sultánpur ends, and with it the easement is extinguished.

(*b*). A, in 1860, lets Sultánpur to B for thirty years from the date of the lease. B, in 1861, imposes an easement on the land in favour of C, who enjoys the easement peaceably and openly as an easement without interruption for twenty-nine years. B's interest in Sultánpur then ends, and with it C's easement.

(*c*). A and B, tenants of C, have permanent transferable interests in their respective holdings. A imposes on his holding an easement to draw water from a tank for the purpose of irrigating B's land. B enjoys the easement for twenty years. Then A's rent falls into arrear and his interest is sold. B's easement is extinguished.

(*d*). A mortgages Sultánpur to B, and lawfully imposes an easement on the land in favour of C in accordance with the provisions of section eleven. The land is sold to D in satisfaction of the mortgage-debt. The easement is not thereby extinguished.

Bill, s. 40.

40. An easement is extinguished when the dominant owner releases it, expressly or impliedly, to the servient owner.

Extinction by release.

Such release can be made only in the circumstances and to the extent in and to which the dominant owner can alienate the dominant heritage.

An easement may be released as to part only of the servient heritage.

Explanation I.—An easement is impliedly released—

(*a*) where the dominant owner expressly authorizes an act of a permanent nature to be done on the servient heritage, the necessary consequence of which is to prevent his future enjoyment of the easement, and such act is done in pursuance of such authority;

(*b*) where any permanent alteration is made in the dominant heritage of such a nature as to shew that the dominant owner intended to cease to enjoy the easement in future.

Explanation II.—Mere non-user of an easement is not an implied release within the meaning of this section.

Illustrations.

(*a*). A, B and C are co-owners of a house to which an easement is annexed. A, without the consent of B and C, releases the easement. This release is effectual only as against A and his legal representative.

(*b*). A grants B an easement over A's land for the beneficial enjoyment of his house. B assigns the house to C. B then purports to release the easement. The release is ineffectual.

(*c*). A, having the right to discharge his eavesdroppings into B's yard, expressly authorizes B to build over this yard to a height which will interfere with the discharge. B builds accordingly. A's easement is extinguished.

(*d*). A, having an easement of light to a window, builds up that window with bricks and mortar so as to manifest an intention to abandon the easement permanently. The easement is impliedly released.

(*e*). A, having a projecting roof by means of which he enjoys an easement to discharge eavesdroppings on B's land, alters the roof, so as to direct the rain-water into a different channel and discharge it on C's land. The easement is impliedly released.

Bill, s. 41.

41. An easement is extinguished when the servient owner, in exercise of a power reserved in this behalf, revokes the easement.

Extinction by revocation.

Bill, s. 42.

42. An easement is extinguished where it has been imposed for a limited period, or acquired on condition that it shall become void on the performance or non-performance of a specified act, and the period expires or the condition is fulfilled.

Extinction on expiration of limited period or happening of dissolving condition.

Bill, s. 43.

43. An easement of necessity is extinguished when the necessity comes to an end.

Extinction on termination of necessity.

Illustration.

A grants B a field inaccessible except by passing over A's adjoining land. B afterwards purchases a part of that land over which he can pass to his field. The right of way over A's land, which B had acquired, is extinguished.

Bill, s. 44.

44. An easement is extinguished when it becomes incapable of being at any time and under any circumstances beneficial to the dominant owner.

Extinction of useless easement.

Bill, s. 45.

45. An easement is extinguished—

Extinction by substantial change of dominant heritage.

(*a*) where the dominant heritage is substantially changed and it is not proved that the easement was intended to continue annexed thereto nothwithstanding such change, or

Extinction by material and permanent increase of burden.

(*b*) where, by any change in the dominant heritage, the burden on the servient heritage is materially increased, and cannot be reduced to its original limits, and it is not proved that the burden was intended to be increased by such change.

Bill, s. 46.

46. An easement is extinguished where the servient heritage is by superior force so permanently altered that the dominant owner can no longer exercise his right:

Extinction on permanent alteration of servient heritage by superior force.

Provided that, where a way of necessity is destroyed by superior force, the dominant owner has a right to another way over the servient heritage; and the provisions of section fourteen apply to such way.

Illustrations.

(*a*). A grants to B, as the owner of a certain house, a right to fish in a river running through A's land. The river changes its course permanently, and runs through C's land. B's easement is extinguished.

(*b*). Access to a path over which A has a right of way is permanently cut off by an earthquake. A's right is extinguished.

Bill, s. 47.

47. An easement is extinguished when either the dominant or the servient heritage is completely destroyed.

Extinction by destruction of either heritage.

Illustration.

A has a right of way over a road running along the foot of a sea-cliff. The road is washed away by a permanent encroachment of the sea. A's easement is extinguished.

Bill, s. 48.

48. An easement is extinguished when the same person becomes entitled to the absolute ownership of the whole of the dominant and servient heritages.

Extinction by unity of ownership.

Illustrations.

(*a*). A, as the owner of a house, has a right of way over B's field. A mortgages his house, and B mortgages his field, to C. Then C forecloses both mortgages and becomes thereby absolute owner of both house and field. The right of way is extinguished.

(*b*). The dominant owner acquires only part of the servient heritage: the easement is not extinguished, except in the case illustrated in section 43.

(*c*). The servient owner acquires the dominant heritage in common with a third person: the easement is not extinguished.

(*d*). The separate owners of two separate dominant heritages jointly acquire the heritage which is servient to the two separate heritages: the easements are not extinguished.

(*e*). The joint owners of the dominant heritage jointly acquire the servient heritage: the easement is extinguished.

(*f*). A single right of way exists over two servient heritages for the beneficial enjoyment of a single dominant heritage. The dominant owner acquires one only of the servient heritages. The easement is not extinguished.

(*g*). A has a right of way over B's road. B dedicates the road to the public. A's right of way is not extinguished.

9. **49.** A continuous easement is extinguished when it totally ceases to be used as such for an unbroken period of twenty years.

Extinction by non-user.

A discontinuous easement is extinguished when, for a like period, it has not been exercised or the dominant owner has not registered under the Indian Registration Act, 1877, a declaration of his intention to retain the easement.

Such period shall be reckoned, in the case of a continuous easement, from the day on which its exercise was obstructed by the servient owner, or rendered impossible by the dominant owner, and in the case of a discontinuous easement, from the day on which it was last exercised by any person as annexed to the dominant heritage, or the day on which the dominant owner registers the said declaration.

Where an easement is exercisable only at a certain place, or at certain times, or between certain hours, or for a particular purpose, its exercise during the said period at another place, or at other times, or between other hours, or for another purpose, does not prevent its extinction under this section.

The circumstance that, during the said period, no one was in possession of the servient heritage, or that the easement could not be exercised, or that a right accessory thereto was exercised, or that the dominant owner was not aware of its existence, or that he exercised it in ignorance of his right to do so, does not prevent its extinction under this section.

An easement is not extinguished under this section—

(*a*) when the cessation is in pursuance of a contract between the dominant and servient owners;

(*b*) when the dominant heritage is held in co-ownership, and one of the co-owners exercises the easement within the said period, or

(*c*) when the easement is a necessary easement.

Where several heritages are respectively subject to rights of way for the benefit of a single heritage, and the ways are continuous, such rights shall, for the purposes of this section, be deemed to be a single easement.

Illustration.

A has, as annexed to his house, rights of way from the high road thither over the heritages X and Z and the intervening heritage Y. Before the twenty years expire, A exercises his right of way over X. His rights of way over Y and Z are not extinguished.

i. 50. **50.** When an easement is extinguished, the rights (if any) accessory thereto are also extinguished.

Extinction of accessory rights.

Illustration.

A has an easement to draw water from B's well. As accessory thereto, he has a right of way over B's land to and from the well. The easement to draw water is extinguished under section forty-nine. The right of way is also extinguished.

Bill, s. 51.

51. An easement is suspended when the dominant owner becomes entitled to possession of the servient heritage for a limited interest therein, or when the servient owner becomes entitled to possession of the dominant heritage for a limited interest therein.

Suspension of easement.

Bill, s. 52.

52. The servient owner has no right to require that an easement be continued; and, notwithstanding the provisions of section twenty-six, he is not entitled to compensation for damage caused to the servient heritage in consequence of the extinguishment or suspension of the easement, if the dominant owner has given to the servient owner such notice as will enable him, without unreasonable expense, to protect the servient heritage from such damage.

Servient owner not entitled to require continuance, nor to compensation for suspension.

Where such notice has not been given, the servient owner is entitled to compensation for damage done to the servient heritage by such extinguishment or suspension.

Illustration.

A, in exercise of an easement, diverts to his canal the water of B's stream. The diversion continues for many years, and during that time the bed of the stream partly fills up. A then abandons his easement, and restores the stream to its ancient course. B's land is consequently flooded. B sues A for compensation for the damage caused by the flooding. It is proved that A gave B a month's notice of his intention to abandon the easement, and that such notice was sufficient to enable B, without unreasonable expense, to have prevented the damage. The suit must be dismissed.

Bill, s. 53.

53. An easement extinguished under section forty-seven revives (*a*) when the destroyed heritage is, before twenty years have expired, restored by the deposit of alluvion, (*b*) when the destroyed heritage is a servient building and before twenty years have expired such building is rebuilt upon the same site, and (*c*) when the destroyed heritage is a dominant building and before twenty years have expired such building is rebuilt upon the same site and in such a manner as not to impose a greater burden on the servient tenement.

Revival of easements.

An easement extinguished under section forty-eight revives when the grant or bequest by which the unity of ownership was produced is set aside by the decree of a competent Court. A necessary easement extinguished under the same section revives when the unity of ownership ceases from any other cause.

A suspended easement revives if the cause of suspension is removed before the right is extinguished under section forty-nine.

Illustration.

A, as the absolute owner of field Y, has a right of way thither over B's field Z. A obtains from B a lease of Z

for twenty years. The easement is suspended so long as A remains lessee of Z. But when A assigns the lease to C or surrenders it to B, the right of way revives.

CHAPTER VI.—LICENSES.

"License" defined.

54. Where one person grants to another, or to a definite number of other persons, a right to do, or continue to do, in or upon the immoveable property of the grantor, something which would, in the absence of such right, be unlawful, and such right does not amount to an easement or an interest in the property, the right is called a license.

Who may grant license.

55. A license may be granted by any one in the circumstances and to the extent in and to which he may transfer his interest in the property affected by the license.

Grant may be express or implied.

56. The grant of a license may be express or implied from the conduct of the grantor; and an agreement purporting to create an easement, which is ineffectual for that purpose, may operate to create a license.

Accessory licenses annexed by law.

57. All licenses necessary for the enjoyment of any interest or the exercise of any right are implied in the constitution of such interest or right. Such licenses are called accessory licenses.

Illustration.

A sells the trees growing on his land to B. B is entitled to go on the land and take away the trees.

"It is founded on personal confidence," 3 Kent 583.

License when transferable.

58. Unless a different intention is expressed or necessarily implied, a license to attend a place of public entertainment may be transferred by the licensee; but, save as aforesaid, a license cannot be transferred by the licensee or exercised by his servants or agents.

Illustration.

A grants B a right to walk over A's field whenever he pleases. The right is not annexed to any immoveable property of B. The right cannot be transferred.

Grantor's duty to disclose defects.

59. The grantor of a license is bound to disclose to the licensee any defect in the property affected by the license, likely to be dangerous to the person or property of the licensee, of which the grantor is and the licensee is not aware.

Grantor's duty not to render property unsafe.

60. The grantor of a license is bound not to do anything likely to render the property affected by the license unsafe to the licensee.

17 Q. B. 574.

Grantor's transferee not bound by license.

61. When the grantor of the license transfers the property affected thereby, the transferee is not bound by the license.

License when revocable.

62. A license may be revoked by the grantor, unless

Gale 69.

(*a*) it is coupled with a transfer of property and such transfer is in force:

(*b*) the licensee, acting upon the license, has executed a work of a permanent character and incurred expenses in the execution.

Revocation express or implied.

63. The revocation of a license may be express or implied.

Illustrations.

(*a*) A, the owner of a field, grants a license to B to use a path across it. A, with intent to revoke the license, locks a gate across the path. The license is revoked.

(*b*) A, the owner of a field, grants a license to B to stack hay on the field. A lets or sells the field to C. The license is revoked.

Gale 65.

License when deemed revoked.

64. A license is deemed to be revoked—

3 Kent 582.

(*a*) when, from a cause preceding the grant of it, the grantor ceases to have any interest in the property affected by the license:

(*b*) when the licensee releases it, expressly or impliedly, to the grantor or his representative:

(*c*) where it has been granted for a limited period, or acquired on condition that it shall become void on the performance of a specified act, and the period expires or the condition is fulfilled:

(*d*) where the property affected by the license is destroyed or by superior force so permanently altered that the licensee can no longer exercise his right:

(*e*) where the licensee becomes entitled to the absolute ownership of the property affected by the license:

(*f*) where the license is granted for a specified purpose and the purpose is attained, or abandoned, or becomes impracticable:

(*g*) where the license is granted to the licensee as holding a particular office, employment or character, and such office, employment or character ceases to exist:

(*h*) where the license totally ceases to be used as such for an unbroken period of twenty years and such cessation is not in pursuance of a contract between the grantor and the licensee:

(*i*) in the case of an accessory license, when the interest or right to which it is accessory ceases to exist.

Licensee's rights on revocation.

65. Where a license is revoked, the licensee is entitled to a reasonable time to leave the property affected thereby and to remove any goods which he has been allowed to place on such property.

L. R. 5 C. P. 334; L. R. 9 Q. B. 400.

Licensee's rights on eviction.

66. Where a license has been granted for consideration and the licensee without any fault of his own is evicted by the licensor before he has fully enjoyed under the license the right for which he contracted, he is entitled to recover compensation from the licensor.

OF THE CREATION OF TRUSTS.

4. Lawful purpose.
5. Trust of immoveable property.
   Trust of moveable property.
6. Creation of trust.
7. Who may create trusts.
8. Subject of trust.
9. Who may be beneficiary.
   Disclaimer by beneficiary.
10. Who may be trustee.
    No one bound to accept a trust.
    Acceptance of trust.
    Disclaimer of trust.

CHAPTER III.

OF THE DUTIES AND LIABILITIES OF TRUSTEES.

11. Trustee to execute trust.
12. Trustee to inform himself of state of trust-property.
13. Trustee to protect title to trust-property.
14. Trustee not to set-up title adverse to beneficiary.
15. Care required from trustee.
16. Conversion of perishable property.
17. Trustee to be impartial.
18. Trustee to prevent waste.
19. Accounts and information.
20. Investment of trust-money.
    Mortgage of land pledged to Government under Act XXVI of 1871.
    Deposit in Government Savings Bank.
21. Sale by trustee directed to sell within specified time.
22. Transfer to beneficiary on completion of purpose.
23. Liability for breach of trust.

SECTIONS.

24. No set-off allowed to trustee.
25. Non-liability for predecessor's default.
26. Non-liability for co-trustee's default.
    Joining in receipt for conformity.
27. Several liability of co-trustees.
    Contribution as between co-trustees.
28. Non-liability of trustee paying without notice of transfer by beneficiary.
29. Liability of trustee where beneficiary's interest is forfeited to Government.
30. Indemnity of trustees.

CHAPTER IV.

OF THE RIGHTS AND POWERS OF TRUSTEES.

31. Right to title-deeds.
32. Right to reimbursement of expenses.
    Right to recoupment for erroneous overpayment.
33. Right to indemnity from gainer by breach of trust.
34. Right to apply to Court for opinion in management of trust-property.
35. Right to settlement of accounts.
36. General authority of trustee.
37. Power to sell in lots, and either by public auction or private contract.
38. Power to sell under special conditions.
    Power to buy-in and re-sell.
    Time allowed for selling trust-property.
39. Power to convey.
40. Power to vary investments.
41. Power to apply property of minors, &c., for their maintenance, &c.
42. Power to give receipts.
43. Power to several trustees of whom one disclaims or dies.
44. Suspension of trustee's powers by decree.

CHAPTER V.

OF THE DISABILITIES OF TRUSTEES.

45. Trustee cannot renounce after acceptance.
46. Trustee cannot delegate.
47. Co-trustees cannot act singly.
48. Control of discretionary power.
49. Trustee may not charge for services.
50. Trustee may not use trust-property for his own profit.
51. Trustee for sale or his agent may not buy.
52. Trustee may not buy beneficiary's interest without permission.
    Trustee for purchase.
53. Co-trustees may not lend to one of themselves.

CHAPTER VI.

OF THE RIGHTS AND LIABILITIES OF THE BENEFICIARY.

54. Rights to rents and profits.
    Right to transfer of possession.

SECTIONS.

55. Right to specific execution.
Right to compel transfer of possession.
56. Right to inspect and take copies of instrument of trust, accounts, &c.
57. Right to transfer beneficial interest.
58. Right to sue for execution of trust.
59. Right to proper trustees.
60. Right to compel to any act of duty.
61. Wrongful purchase by trustee.
62. Following trust-property—
into the hands of third persons;
into that into which it has been converted.
63. Acquisition by trustee of trust-property wrongfully converted.
64. Wrongful employment of trust-funds in trade.
65. Right in case of blended property.
66. Wrongful employment by partner-trustee of trust-property for partnership purposes.
67. Liability of beneficiary joining in breach of trust.
68. Rights and liabilities of beneficiary's transferee.

CHAPTER VII.

OF VACATING THE OFFICE OF TRUSTEE.

69. Office how vacated.
70. Discharge of trustee.
71. Petition to be discharged from trust.
72. Appointment of new trustees on death, &c.
73. Appointment by Court.
Rule for selecting new trustees.
74. Vesting of trust-property in new trustees.
Powers of new trustees.
75. Survival of trust.

CHAPTER VIII.

OF THE EXTINCTION OF TRUSTS.

76. Trust how extinguished.
77. Revocation of trust.
78. Revocation not to defeat what trustees have duly done.

CHAPTER IX.

OF CERTAIN OBLIGATIONS IN THE NATURE OF TRUSTS.

79. Where obligation in nature of trust is created.
80. Where it appears that transferor did not intend to dispose of beneficial interest.
81. Transfer to one for consideration paid by another.
82. Trust incapable of execution or executed without exhausting trust-property.
83. Transfer for illegal purpose.

SECTIONS.

84. Bequest for illegal purpose.
Bequest of which revocation is prevented by coercion.
85. Transfer pursuant to rescindible contract.
86. Transfer in fraud of transferor's creditors.
87. Debtor becoming creditor's representative.
88. Advantage gained by fiduciary.
89. Advantage gained by exercise of undue influence.
90. Advantage gained by qualified owner.
91. Property acquired with notice of existing contract.
92. Purchase by person contracting to buy property to be held on trust.
93. Advantage secretly gained by one of several compounding creditors.
94. Constructive trusts in cases not expressly provided for.
95. Obligor's duties, liabilities and disabilities.
96. Saving of rights of *bonâ fide* purchasers.

THE SCHEDULE.

A Bill to define and amend the law relating to Private Trusts and Trustees.

[AS REVISED BY THE INDIAN LAW COMMISSION, 1879.]

Trusts in India of various kinds, 18 W. R. (P. C.) 359. Trusts for benefit of creditors, 1 Bomb. 233: 9 Bomb. 249: 10 Bomb. 327. Trustee misapplying trust-funds, Suth. F.B. 60. As to family religious trusts, 10 Beng. 19; Norton, II, 406. As to pagoda-trustees, see 1 Mad. 415: 7 Mad. 77: Act XX of 1863. Property purchased in name of an idol, 15 Beng. 176.

WHEREAS it is expedient to define and amend the law relating to private trusts and trustees; It is hereby enacted as follows:— Preamble.

CHAPTER I.

PRELIMINARY.

1. This Act may be called "The Private Trusts Act, 1879:" and it shall come into force on the first day of March, 1880. Short title. Commencement.

It extends to the whole of British India; but nothing herein contained affects the rules of Muhammadan law as to *waqf*, or the mutual relations of the members of an undivided family as determined by any customary or personal law, or applies to public or private religious or charitable endowments, or to trusts to distribute prizes taken in war among the captors; and nothing in the second chapter of this Act applies to trusts created before the said day. Local extent. Savings.

2. On and from that day the Statutes and Acts mentioned in the schedule hereto annexed shall be repealed to the extent therein mentioned. Repeal of enactments.

Bill, s. 3.

3. A "trust" is an obligation annexed to the ownership of property and arising out of a confidence reposed in and accepted by the owner or declared and accepted by him, for the benefit of another, or of another and the owner: Interpretation-clause. "trust":

the person who reposes or declares the confidence is called the "author of the trust": the person who accepts the confidence is called the "trustee": the person for whose benefit the confidence is accepted is called the "beneficiary": the subject-matter of the trust is called "trust-property", or "trust-money"; the "beneficial interest" or "interest" of the beneficiary is his right against the trustee as owner of the trust-property; and the instrument, if any, by which the trust is declared is called the "instrument of trust": "author of the trust": "trustee": "beneficiary": "trust-property": "beneficial interest": "interest": "instrument of trust":

A breach of any duty imposed on a trustee, as such, by any law for the time being in force, is called a "breach of trust": "breach of trust":

and in this Act, unless there be something repugnant in the subject or context, "registered" means registered under the law for the registration of documents for the time being in force: a person is said to have "notice" of a fact either when he actually knows that fact or when, but for wilful abstention from inquiry or gross negligence, he would have known it, or when information of the fact is given to or obtained by his agent under the circumstances mentioned in the Indian Contract Act, 1872, section 229; and all expressions used herein and defined in the Indian Contract Act, 1872, shall be deemed to have the meanings respectively attributed to them by that Act. "registered": "notice": Expressions defined in Act IX of 1872.

e. g., 'fraud,' s. 27 *infra*.

CHAPTER II.

OF THE CREATION OF TRUSTS.

4. A trust may be created for any lawful purpose. The purpose of a trust is lawful, unless it is (*a*) forbidden by law, or (*b*) is of such a nature that if permitted it would defeat the provisions of any law, or (*c*) is fraudulent, or (*d*) involves or implies injury to the person or property of another, or (*e*) the Court regards it as immoral or opposed to public policy. Lawful purpose.

Bill, s. 10. 9 Beng. 377. Act IX of 1872, s. 23. Beng. Regs. II of 1793, sec. 19, forbids Collectors to make their subordinates their trustees. Perpetuity, 14 Beng. 175. When Court will interfere, L. R. 9 Eq. 475.

Every trust of which the purpose is unlawful is void. And where a trust is created for two purposes, of which one is lawful and the other unlawful, and the two purposes cannot be separated, the whole trust is void.

Explanation:—In this section, the expression "law" includes, where the trust-property is immoveable and situate in a foreign country, the law of such country. See *Nelson v. Bridport*, 8 Beav. 547.

Illustrations.

(*a*) A conveys property to B in trust to apply the profits to the nurture of female foundlings to be trained up as prostitutes. The trust is void.

(*b*) A conveys property to B in trust for C for his life and after his death to D for his life, and after D's death to such of the sons of D as shall first attain the age of 25. A, B, C and D are persons to whom the Indian Succession Act, 1865, applies. The trust after D's death is void. Act X of 1865, s. 101: 2 Spence 441.

(*c*). A bequeathes property to B in trust to employ it in carrying on a smuggling business, and out of the profits thereof to support A's children. The trust is void.

(*d*). A, while in insolvent circumstances, transfers property to B in trust for A during his life, and after his death for B. A is declared an insolvent. The trust for A is invalid as against his creditors.

5. No trust in relation to immoveable property is valid unless declared by a non-testamentary instrument in writing signed by the author of the trust or the trustee and registered, or by the will of the author of the trust or the trustee. Trust of immoveable property.

Bill, s. 5.

No trust in relation to moveable property is valid unless declared as aforesaid, or unless the ownership of the property is transferred to the trustee.

Trust of moveable property.

These rules do not apply where they would operate so as to effectuate a fraud.

Lewin, 7th edition, p. 57: Underhill 37, 40.

Bill, ss. 6, 7. Whether voluntary declaration of trust is binding against Hindú declarant, 4 Mad. 183. Transmutation of possession unnecessary, 2 Bomb. 143 (a Pársi case). Act I of 1877, s. 3: See 7 Bomb. A. C. J. 149. *Harland* v. *Trigly*, 1 Brown, Ch. 134. *Green* v. *Marsden*, 1 Drew. 646. *Palmer* v. *Simmonds*, 2 Drew. 221. *Messenger* v. *Andrews*, 4 Russ. 478.

6. Subject to the provisions of section five, a trust is created when the author of the trust indicates with reasonable certainty, by any words or acts, (*a*) an intention on his part to create thereby a trust, (*b*) the purpose of the trust, (*c*) the beneficiary, and (*d*) the trust-property, and (unless the trust is declared by will, or the author of the trust is himself to be the trustee) transfers the trust-property to the trustee.

Creation of trust.

Illustrations.

(*a*) A bequeathes certain property to B, "having the fullest confidence that he will dispose of it for the benefit of C." This creates a trust so far as regards A and C.

(*b*) A bequeathes certain property to B, "hoping he will continue it in the family." This does not create a trust, as the beneficiary is not indicated with reasonable certainty.

(*c*) A bequeathes certain property to B, requesting him to distribute it amongst such members of C's family as B should think most deserving. This does not create a trust, for the beneficiaries are not indicated with reasonable certainty.

(*d*) A bequeathes certain property to B, desiring him to divide the bulk of it among C's children. This does not create a trust, for the trust-property is not indicated with sufficient certainty.

(*e*) A bequeathes a shop and stock-in-trade to B on condition that he pays A's debts and a legacy to C. This is a condition, not a trust for A's creditors and C.

Bill, s. 8. Act IX of 1872, ss. 11 and 12.

Who may create trusts.

7. A trust may be created—

(*a*) by every person competent to contract, and

(*b*) with the permission of a principal Civil Court of original jurisdiction, by or on behalf of a minor;

but subject in each case to the law for the time being in force as to the circumstances and extent in and to which the author of the trust may dispose of the trust-property.

8. The subject-matter of a trust must be property transferable to the beneficiary.

Subject of trust.

It must not be a merely beneficial interest under a subsisting trust.

Bill, s. 9, para. 1. 'Person' includes 'corporation' (Act I of 1868): but the statutes of Mortmain are not in force in India.

Who may be beneficiary.

9. Every person capable of holding property may be a beneficiary.

A proposed beneficiary may renounce his interest under the trust by disclaimer addressed to the trustee, or by setting up, with notice of the trust, a claim inconsistent therewith.

Disclaimer by beneficiary.

Bill, s. 9, para. 2. *King* v. *Belward*, 1 H. & M. 843: Act IX of 1872, s. 11.

Who may be trustee.

10. Every person capable of holding property may be a trustee; but where the trust involves the exercise of discretion, he cannot execute it unless he is competent to contract.

No one bound to accept a trust.

No one is bound to accept a trust.

Bill, s. 10. Lewin 190. N. Y. Code, § 1174, requires a consideration in case of acknowledgment.

Acceptance of trust.

Subject to the provisions of section five, a trust is accepted by any words or acts of the trustee, indicating with reasonable certainty such acceptance.

Disclaimer of trust.

Instead of accepting a trust, the intended trustee may, within a reasonable period, disclaim it, and such disclaimer shall prevent the trust-property from vesting in him.

Disclaimer may be by parol, *Bingham* v. *Ld. Clanmorris*.

Mucklow v. *Fuller*, Williams Exors., 1287, 1796.

A disclaimer by one of two or more co-trustees vests the trust-property in the other or others and makes him or them sole trustee or trustees from the date of the creation of the trust.

Illustrations.

Sheridan v. *Joyce*, 1 Jones & Lat. 401.

(*a*) A bequeathes certain property to B and C, his executors as trustees for D. B and C prove A's will. This is, in itself, an acceptance of the trust, and B and C hold the property in trust for D.

(*b*) A transfers certain property to B, in trust to sell it and to pay out of the proceeds A's debts. B accepts the trust and sells the property. So far as regards B, a trust of the proceeds is created for A's creditors.

(*c*) A bequeathes a lákh of rupees to B upon certain trusts and appoints him his executor. B severs the lákh from the general assets and appropriates it to the specific purpose. This is an acceptance of the trust.

CHAPTER III.

OF THE DUTIES AND LIABILITIES OF TRUSTEES.

Bill, s. 11. Lewin 190.

Trustee to execute trust.

11. The trustee is bound to fulfil the purpose of the trust, and to obey the directions of the author of the trust given at the time of its creation, except as modified by the consent of all the beneficiaries being competent to contract.

Where the beneficiary is incompetent to contract, his consent may, for the purposes of this section, be given by a principal Civil Court of original jurisdiction.

Nothing in this section shall be deemed to require a trustee to obey any direction when to do so would be impracticable, illegal or manifestly injurious to the beneficiaries.

Explanation.—Unless a contrary intention be expressed, the purpose of a trust for the payment of debts shall be deemed to be (*a*) to pay only the debts of the author of the trust existing and recoverable at the date of the instrument of trust, or, when such instrument is a will, at the date of his death, and (*b*) in the case of debts not bearing interest, to make such payment without interest.

Lewin 471.

Lewin 477.

Illustrations.

(*a*) A, a trustee, is simply authorised to sell certain land by public auction. He cannot sell the land by private contract.

(*b*) A, a trustee for X, Y and Z, is authorised to sell certain land to B for a specified sum. X, Y and Z, being competent to contract, consent that A may sell the land to C for a less sum. A may sell the land to C for the latter sum.

Boss v. *Godsal*, Lewin 291: 2 Spence 926 n. Another case, *Morris* v. *M.*, 4 Jur. N. S. 802.

(*c*) A, a trustee for B and her children, is directed by the author of the trust to lend, on B's request, trust-property to B's husband, C, on the security of his bond. C becomes insolvent, and B requests A to make good the loan. A may refuse to make it.

Bill, s. 12. Lewin 190, 243, 264, 268.

Trustee to inform himself of state of trust-property.

12. A trustee is bound to acquaint himself as soon as possible with the nature and circumstances of the trust-property; to obtain, where necessary, a transfer of the trust-property to himself; and (subject to the provisions of the instrument of trust) to get in trust-moneys invested on insufficient or hazardous security.

Lewin 533: 3 V. & B. 359.

Illustrations.

4 Moo. I. A. 452.

(*a*). The trust-property is a debt outstanding on personal security. The instrument of trust gives the trustee no discretionary power to leave the debt so outstanding. The trustee's duty is to recover the debt without unnecessary delay.

Lewin 216 2 Spence 929: *Bái Jadáv* v. *Tribhuvandás*, 9 Bomb. 333.

(*b*). The trust-property is money in the hands of one of two co-trustees. No discretionary power is given by the instrument of trust. The other co-trustee must not allow the former to retain the money for a longer period than the circumstances of the case require.

Bill, s. 13. Spence 46, 196, 926: Act I of 1877, s. 10, expl. 1.

Trustee to protect title to trust-property.

13. A trustee is bound to maintain and defend all such suits, and (subject to the provisions of the instrument of trust) to take such other steps as, regard being had to the amount or value of the trust-property, may be reasonably requisite for the preservation of the trust-property and the assertion or protection of the title thereto.

Lewin 270.

Illustration.

See *Macnamara* v. *Carey*, 1 Ir. L. R. Eq. 9, cited Lewin 771.

The trust-property is immoveable property which has been given to the author of the trust by an unregistered instrument. Subject to the provisions of the Indian Registration Act, 1877, the trustee's duty is to cause the instrument to be registered.

Bill, s. 13. Lewin 262: Underhill 121.

Trustee not to set up title adverse to beneficiary.

14. The trustee must not for himself or another set up or aid any title to the trust-property adverse to the interest of the beneficiary.

Bill s. 14. Lewin 270: 2 Spence 917, 933: Act IX of 1872, ss. 151, 152: N. Y. Code, s. 1197.

Care required from trustee.

15. A trustee is bound to deal with the trust-property as carefully as a man of ordinary prudence would deal with such property if it were his own; and, in the absence of a contract to the contrary, a trustee so dealing is not responsible for the loss, destruction or deterioration of the trust-property.

Illustrations.

Lewin 284: Burge III, 968.

(*a*). A, living in Calcutta, is a trustee for B, living in Bombay. A remits trust-funds to B, by bills drawn by a person of undoubted credit in favour of the trustee as such, and payable at Bombay. The bills are dishonoured. A is not bound to make good the loss.

2 Spence 933: Grant's *Bankers*, third edition, 551.

(*b*). A, a trustee of leasehold property, directs the tenant to pay the rents on account of trust to a banker, B, then in credit. The rents are accordingly paid to B, and A leaves the money with B only till wanted. Before the money is drawn out, B becomes insolvent, A having had no reason to believe that B was in insolvent circumstances. A is not bound to make good the loss.

(*c*). A, a trustee of two debts for B, releases one and compounds the other, in good faith and reasonably believing that it is for B's interest to do so. A is not bound to make good any loss caused thereby to B.

(*d*). A, a trustee directed to sell the trust-property by auction, sells the same, but does not advertise the sale and otherwise fails in reasonable diligence in inviting competition. A is bound to make good the loss caused thereby to the beneficiary.

Lewin 389: Dart 69.

(*e*). A, a trustee for B, in execution of his trust, sells the trust-property, but from want of due diligence on his part, fails to receive part of the purchase-money. A is bound to make good the loss thereby caused to B.

47 L. J. Ch. 606.

(*f*). A, a trustee for B of a policy of insurance, has funds in hand for payment of the premiums. A neglects to pay the premiums, and the policy is consequently forfeited. A is bound to make good the loss to B.

Lewin 770-1.

(*g*). A bequeathes certain moneys to B and C as trustees, and authorises them to continue trust-moneys upon the personal security of a certain firm in which A had himself invested them. A dies and a change takes place in the firm. B and C must not permit the moneys to remain upon the personal security of the new firm.

Cummins v. *Cummins*, 3 J. & L. 64.

(*h*). A, a trustee for B, allows the trust to be executed solely by his co-trustee C. C misapplies the trust-property. A is personally answerable for the loss resulting to B.

Bill, s. 16. Lewin 274, 280: Dart 59.

Conversion of perishable property.

16. Where the trust is created for the benefit of several persons in succession, and the trust-property is of a wasting nature or a future or reversionary interest, the trustee is bound, unless an intention to the contrary may be inferred from the instrument of trust, to convert the property into property of a permanent and immediately profitable character.

Illustrations.

(*a*). A bequeathes to B all his property in trust for C during his life, and on his death for D, and on D's death for E. A's property consists of three leasehold houses, and there is nothing in A's will to shew that he intended the houses to be enjoyed in specie. B should sell the houses, and invest the proceeds in accordance with section twenty.

(*b*). A bequeathes to B his three leasehold houses in Calcutta and all the furniture therein in trust for C during his life, and on his death for D, and on D's death for E. Here an intention that the houses and furniture should be enjoyed in specie appears clearly, and B should not sell them.

Bill, s. 17. *Ellis* v. *Barker*, 7 Ch. Div. 104.

Trustee to be impartial.

17. Where there are more beneficiaries than one, the trustee is bound to be impartial, and must not execute the trust for the advantage of one at the expense of another.

Where the trustee has a discretionary power, nothing in this section shall be deemed to authorise the Court to control the exercise reasonably and in good faith of such discretion.

Dart 89, citing *Mant* v. *Lewes*, 30 Beav. 269.

Illustration.

A, a trustee for B, C and D, is empowered to choose between several specified modes of investing the trust-property. A in good faith chooses one of these modes. The Court will not interfere, although the result of the choice may be to vary the relative rights of B, C and D.

Bill, s. 15. Kerr 79: but see Lewin 3[illegible] The trustee is not responsible for suffering permissive waste.

Trustee to prevent waste.

18. Where the trust is created for the benefit of several persons in succession and one of them is in possession of the trust-property, if he commits, or threatens to commit, any act which is destructive or permanently injurious

thereto, the trustee must take measures to prevent such act.

Lewin 591: 2 Spence 921.

19. A trustee is bound (*a*) to keep clear and accurate accounts of the trust-property, and (*b*), at all reasonable times, at the request of the beneficiary, to furnish him with full and accurate information as to the amount and state of the trust-property.

Accounts and information.

Lewin 591.

Bill, s. 20. Act XXVIII of 1866, ss. 5 and 32. As to the necessity of some such provisions, see *DeSouza* v. *DeSouza*, 12 Bom. 184.

20. Where the trust-property consists of money and cannot be applied immediately or at an early date to the purposes of the trust, the trustee must (subject to any direction contained in the instrument of trust) invest the money on the following securities and on no others:—

Investment of trust-money.

cf. 23 & 24 Vic., c. 145, s. 25.

(*a*) in promissory notes, debentures, stock or other securities of the Government of India, or of the United Kingdom of Great Britain and Ireland;

(*b*) in bonds, debentures and annuities charged by the Imperial Parliament on the revenues of India;

cf. 32 & 33 Vic., c. 132, s. 2.

(*c*) in stock or debentures of, or shares in, Railway or other Companies, the interest whereon shall have been guaranteed by the Secretary of State for India in Council;

cf. 34 & 35 Vic., c. 47, s. 13.

(*d*) in debentures or other securities for money issued by, or on behalf of, any municipal body, under the authority of any Act of a Legislature established in British India;

Lewin 298: 2 Spence 925: 16 Beav. 600.

(*e*) on a first mortgage of immoveable property situate in British India: provided that the property is not a leasehold for a term of years and that the value of the property exceeds by one-third, or, if consisting of buildings, exceeds by one-half, the mortgage-money; or,

(*f*) on any other security expressly authorised by the instrument of trust:

The Statute excepts investment on Consols.

Provided that, where there is a person competent to contract and entitled in possession to receive the income of the trust-property for his life, or for any greater estate, no investment on any security mentioned or referred to in clauses (*d*), (*e*) and (*f*) shall be made without his consent in writing.

27 & 28 Vic., c. 114, s. 61.

Mortgage of land pledged to Government under Act XXVI of 1871.

Deposit in Government Savings Bank.

Nothing in this section shall be deemed to preclude an investment on a mortgage of immoveable property already pledged as security for an advance under the Land Improvement Act, 1871, or, in case the trust-money does not exceed one thousand rupees, a deposit thereof in a Government Savings Bank.

Bill, s. 21, para. 2. Dart 58.

21. Where a trustee directed to sell within a specified time extends such time as between himself and the beneficiary, the burden of proving that the latter is not prejudiced by the extension lies upon the trustee, unless the extension has been authorised by a principal Civil Court of original jurisdiction.

Sale by trustee directed to sell within specified time.

Illustration.

A bequeathes property to B, directing him, with all convenient speed and within five years, to sell it, and apply the proceeds for the benefit of C. In the exercise of reasonable discretion, B postpones the sale for six years. The sale is not thereby rendered invalid, but C, alleging that he has been injured by the postponement, institutes a suit against B to obtain compensation. In such suit the burden of proving that C has not been injured lies on B.

Lewin 390.

Bill, s. 22. 2 Spence 471: Smith, § 3129.

22. When the purpose of the trust is completely fulfilled, the trustee must on demand transfer the trust-property to his beneficiary, unless the trustee has notice of any title in another which is paramount to the beneficiary's interest and of an intention to assert such title.

Transfer to beneficiary on completion of purpose.

Bill, Lewin 768 2 Spence 936 Williams Exors. 1739.

23. Where the trustee commits a breach of trust, he is liable to make good the loss which the trust-property has thereby sustained, unless the beneficiary has by fraud induced the trustee to commit the breach, or the beneficiary, being competent to contract, has himself, without coercion or undue influence having been brought to bear on him, concurred in the breach, or subsequently acquiesced therein, with full knowledge of the facts of the case and of his rights as against the trustee:

Liability for breach of trust.

Includes a fraudulent minor: L. R. 2 Eq. 538: *Walker* v. *Symonds*, 3 Swanst. 1 W. & T. 175: 2 Spence 936

Illustrations.

(*a*) A trustee improperly leaves trust-property outstanding and it is consequently lost. He is liable to make good the property lost, but he is not liable to pay interest thereon.

Lewin 313: 4 Moo. P. C. 452.

(*b*) A bequeathes a house to B in trust to sell it and pay the proceeds to C. B neglects to sell the house for a great length of time, whereby the house is deteriorated and its market price falls. B is answerable to C for the loss.

Notwithstanding indemnity clause, 29 B. 213.

(*c*) A trustee is guilty of unreasonable delay in investing trust-money in accordance with section twenty or in paying it to the beneficiary. The trustee is liable to pay interest thereon for the period of the delay.

Lewin 310.

(*d*) The duty of the trustee is to invest trust-money in any of the securities mentioned in section twenty, clause (*a*), (*b*), (*c*) or (*d*). Instead of so doing, he retains the money in his hands. He is liable, at the option of the beneficiary, to be charged either with the amount of the principal money and interest, or with the amount of such securities which he might have purchased with the trust-money when the investment should have been made, and the intermediate dividends and interest thereon.

Lewin 307 2 Spence 921.

(*e*) The instrument of trust directs the trustee to invest trust-money in any of such securities, or on mortgage of immoveable property. The trustee does neither. He is liable for the principal-money and interest.

2 Spence 928 *Robinson* v. *Robinson*, 1 DeG. M. & G. 256.

(*f*) The instrument of trust directs the trustee to invest trust-money in any of such securities and to accumulate the dividends thereon. The trustee disregards the direction. He is liable at the option of the beneficiary to be charged either with the amount of the principal-money and compound interest, or with the amount of such securities which he might have purchased with the trust-money when the investment should have been made, together with the amount of the accumulation which would have arisen from a proper investment of the intermediate dividends.

2 Spence 927 *Pride* v. *Fooks*, 2 Beav. 430: Lewin 315: 1 Seton 479.

(*g*) Trust-property is invested in one of the securities mentioned in section twenty, clause (*a*), (*b*), (*c*) or (*d*). The trustee sells such security for some purpose not authorised by the terms of the instrument of trust. He is liable at the option of the beneficiary either to replace the security, with the intermediate dividends and interest thereon, or to account for the proceeds of the sale with interest thereon.

Lewin 308.

Lewin 770.

(*h*) The trust-property consists of land. The trustee sells the land to a purchaser for consideration without notice of the trust. The trustee is liable, at the option of the beneficiary, to purchase other land of equal value to be settled upon the like trust, or to be charged with the proceeds of the sale with interest, or to be charged with the present estimated value of the land sold, after deducting therefrom any decrease of price caused by subsequent improvements.

Bill, s. 24. *Wiles* v. *Gresham*, 2 Drew. 258, 295.

24. A trustee who is liable for a loss occasioned by a breach of trust in respect of one portion of the trust-property cannot set-off against his liability a gain which has accrued to another portion of the trust-property through another and distinct breach of trust.

No set-off allowed to trustee.

Bill, s. 25. *Tebbs* v. *Carpenter*, 1 Mad. 290: Lewin 191.

25. Where a trustee succeeds another, he is not, as such, liable for the acts or defaults of his predecessor.

Non-liability for predecessor's default.

Bill, s. 26. Lewin 240, 251: Smith § 3105: Kent IV. 335: 1 Seton 462.

26. Subject to the provisions of sections thirteen and fifteen, one trustee is not, as such, liable for a breach of trust committed by his co-trustee:

Non-liability for co-trustee's default.

Provided that, in the absence of an express declaration to the contrary in the instrument of trust, a trustee is so liable—

Act I of 1877, s. 54, Ill. (b). 2 Spence 933. See *Wilkins* v. *Hogg*, 3 Giff. 116.

(*a*) where he has delivered trust-property to his co-trustee without seeing to its proper application:

(*b*) where he allows his co-trustee to receive trust-property and fails to make due enquiry as to the co-trustee's dealings therewith, or allows him to retain it longer than the circumstances of the case reasonably require:

(*c*) where he becomes aware of a breach of trust committed or intended by his co-trustee, and either actively conceals it or does not within a reasonable time take proper steps to protect the beneficiary's interest.

Bone v. *Cook*, M'Cle. 168.

A co-trustee who joins in signing a receipt for trust-property and proves that he has not received the same is not answerable, by reason of such signature only, for loss or misapplication of the property by his co-trustee.

Joining in receipt for conformity.

Illustration.

A bequeathes certain property to B and C, and directs them to sell it and invest the proceeds for the benefit of D. B and C accordingly sell the property and the purchase-money is received by B and retained in his hands. C pays no attention to the matter for two years and then calls on B to make the investment. B is unable to do so, becomes insolvent and the purchase-money is lost. C may be compelled to make good the amount.

Bill, s. 27. No primary liability in respect of a breach of trust. *Wilson* v. *Moore*, 1 M. & K. *Lambert* v. *Reilly*, 1 De G. & J. 476. Lewin 776.

27. Where co-trustees jointly commit a breach of trust, or where one of them by his neglect enables the other to commit a breach of trust, each is liable to the beneficiary for the whole of the loss occasioned by such breach.

Several liability of co-trustees.

But as between the trustees themselves, if one be less guilty than another, and has had to refund the loss, the former may compel the latter or his legal representative to make good such loss, and if all be equally guilty, any one or more of the trustees who has had to refund the loss may compel the others to contribute.

Contribution as between co-trustees.

Lingard v. *Bromley*, 1 V. & B. 114.

Nothing in this section shall be deemed to authorise a trustee, who has been guilty of fraud, to contribution.

Bill, s. 29. See Underhill, p. 156.

28. When any beneficiary's interest becomes vested in another person and the trustee, not having notice of the vesting, pays or delivers trust-property to the person who would have been entitled thereto in the absence of such vesting, the trustee is not liable for the property so paid or delivered.

Non-liability of trustee paying without notice of transfer by beneficiary.

New.

29. When the beneficiary's interest is forfeited or awarded by legal adjudication to Government, the trustee is bound to hold the trust-property for the benefit of such person in such manner as the Government may direct in this behalf.

Liability of trustee where beneficiary's interest is forfeited to Government.

Bill, s. 30. Act XXVIII of 1866, s. shortened. See sections 15 & 26 *supra*.

30. Subject to the provisions of the instrument of trust, and of sections twenty-three and twenty-six, trustees shall be respectively chargeable only for such moneys, stocks, funds and securities as they respectively actually receive, and shall not be answerable the one for the other of them, nor for any banker, broker or other person in whose hands any trust-property may be placed, nor for the insufficiency or deficiency of any stocks, funds or securities, nor otherwise for involuntary losses.

Indemnity of trustees.

CHAPTER IV.

OF THE RIGHTS AND POWERS OF TRUSTEES.

Bill, s. 31. 2 Spence 1 Dav.

31. A trustee is entitled to have in his possession the instrument of trust and all the documents of title (if any) relating solely to the trust-property.

Right to title-deeds.

Bill, s. 32. Lewin 506.

32. Every trustee may re-imburse himself, or pay or discharge out of the trust-property, all expenses properly incurred in or about the execution of the trust or the realisation, preservation or benefit of the trust-property, or the protection or support of the beneficiary.

Right to re-imbursement of expenses.

Not interven on costs, *don* v. *Tw* 8 Price,

If he pays such expenses out of his own pocket, he has a first charge upon the trust-property for such expenses and interest thereon; but such charge (unless the expenses have been incurred with the sanction of a principal Civil Court of original jurisdiction) shall be enforced only by prohibiting any disposition of the trust-property without previous payment of such expenses and interest.

Lewin 516: 549: *Balch* v *Hyham*.

If the trust-property fail, the trustee is entitled to recover from the beneficiary personally on whose behalf he acted and at whose request, expressed or implied, he made the payment, the amount of such expenses.

Lewin 324.

Where a trustee has by mistake made an over-payment to the beneficiary, he may re-imburse the trust-property out of the beneficiary's interest. If such interest fail, the trustee is entitled to recover from the beneficiary personally the amount of such over-payment.

Right to recoupment for erroneous overpayment.

Bill, s. 33. Underhill, p. 163.

33. A person other than a trustee who has gained an advantage from a breach of trust must indemnify the trustee to the extent of the amount actually received by such person under the breach; and where he is a beneficiary, the trustee has a charge on his interest for such amount.

Right to indemnity from gainer by breach of trust.

Nothing in this section shall be deemed to entitle a trustee to be indemnified who has in committing the breach of trust been guilty of fraud.

Bill, s. 34. Act XXVIII of 1866, s. 43: 1 Seton 493.

34. Any trustee may, without instituting a suit, apply by petition to a principal Civil Court of original jurisdiction for its opinion, advice or direction on any present questions respecting the management or administration of the trust-property other than questions of detail, difficulty or importance, not proper for summary disposal.

Right to apply to Court for opinion in management of trust-property.

A copy of such petition shall be served upon, and the hearing thereof may be attended by, such of the persons interested in the application as the Court thinks fit.

The trustee stating in good faith the facts in such petition and acting upon the opinion, advice or direction given by the Court shall be deemed, so far as regards his own responsibility, to have discharged his duty as such trustee, in the subject-matter of the application.

The costs of every application under this section shall be in the discretion of the Court to which it is made.

Bill, s. 35. 2 Spence 46: Underhill, p. 184.

35. When the duties of a trustee, as such, are completed, he is entitled to have the accounts of his administration of the trust-property examined and settled, and where nothing is due to the beneficiary under the trust, to an acknowledgment in writing to that effect.

Right to settlement of accounts.

Bill, s. 36. Lewin 504.

36. In addition to the powers expressly conferred by this Act and by the instrument of trust, and subject to the restrictions, if any, contained in such instrument and to the provisions of section seventeen, a trustee may do all acts which are reasonable and proper for the realisation, protection or benefit of the trust-property, and for the protection or support of a beneficiary who is not competent to contract.

General authority of trustee.

7 & 28 Vic., c. 114: Lewin 505.

Every trustee in the actual possession or receipt of the rents and profits of land as defined in the Land Improvement Act, 1871, shall be deemed to be a landlord for the purposes of that Act.

Except with the permission of a principal Civil Court of original jurisdiction, no trustee shall lease trust-property for a term exceeding twenty-one years from the date of executing the lease, nor without reserving the best yearly rent that can be reasonably gotten.

Bill, s. 37. Act XXVIII of 1866, s. 2, extended to moveables.

37. Where the trustee is empowered to sell any trust-property, he may sell the same either together or in lots, and either by public auction or private contract, and either at one time or at several times, unless the instrument of trust otherwise directs.

Power to sell in lots, and either by public auction or private contract.

Bill, s. 38. Act XXVIII of 1866, s. 3. See 1 Dav. Conv. 507.

38. The trustee making any such sale may insert such stipulations, either as to title or evidence of title, or otherwise, in any conditions of sale, or contract for sale, as he thinks fit; and may also buy-in the property or any part thereof at any sale by auction, and rescind or vary any contract for sale, and re-sell the property so bought in, or as to which the contract is so rescinded, without being responsible to the beneficiary for any loss occasioned thereby.

Power to sell under special conditions.

Power to buy-in and re-sell.

Bill, s. 21, para. 1. Lewin 265, 390: Dart 58, 88.

Where a trustee is directed to sell trust-property, or to invest trust-money in the purchase of property, he may exercise a reasonable discretion as to the time of effecting the sale or purchase.

Time allowed for selling trust-property.

Illustrations.

(*a*) A bequeathes property to B, directing him to sell it with all convenient speed and pay the proceeds to C. This does not render an immediate sale imperative.

(*b*) A bequeathes property to B, directing him to sell it at such time and in such manner as he shall think fit and invest the proceeds for the benefit of C. This does not authorise B, as between him and C, to postpone the sale to an indefinite period.

Lewin 390: Dart 59.

Bill, s. 39. Act XXVIII of 1866, s. 4.

39. For the purpose of completing any such sale, the trustee shall have power to convey or otherwise dispose of the property sold in such manner as may be necessary.

Power to convey.

Bill, s. 40. Act XXVIII of 1866, s. 32. See *Waite* v. *Littlewood*, 41 L. J. Ch. 636.

40. A trustee may, at his discretion, call in any trust-property invested in any security and invest the same on any of the securities mentioned in section twenty, and from time to time vary any such investments for others of the same nature:

Power to vary investments.

Provided that, where there is a person competent to contract and entitled at the time to receive the income of the trust-property for his life, or for any greater estate, no such change of investment shall be made without his consent in writing.

Bill, s. 41. Act XXVIII of 1866, s. 33.

41. Where any property is held by a trustee in trust for a minor, such trustee may, at his discretion, pay to the guardians (if any) of such minor, or otherwise apply for or towards his maintenance or education, or advancement in life, or the reasonable expenses of his marriage or funeral, the whole or any part of the income to which he may be entitled in respect of such property; and such trustee shall accumulate all the residue of such income by way of compound interest, by investing the same and the resulting income thereof from time to time in any of the securities mentioned in section twenty for the benefit of the person who shall ultimately become entitled to the property from which such accumulations have arisen: Provided that such trustee may at any time, if he thinks fit, apply the whole or any part of such accumulations as if the same were part of the income arising in the then current year.

Power to apply property of minors, &c., for their maintenance, &c.

Where the income of the trust-property is insufficient for the minor's maintenance or education, or advancement in life, or the reasonable expenses of his marriage or funeral, the trustee may, with the permission of a principal Civil Court of original jurisdiction, but not otherwise, apply the whole or any part of such property for or towards such maintenance, education, advancement or expenses.

See Acts XL of 1858, XX of 1864, and XIII of 1874.

Nothing in this section shall be deemed to affect the provisions of any local law for the time being in force relating to the persons and property of minors.

Bill, s. 42. Act XXVIII of 1866, s. 36, shortened.

42. A trustee may give a receipt in writing for any money paid or property transferred to him by reason or in the exercise of any trust reposed in him, and in the absence of fraud such receipt shall discharge the person paying or transferring the same therefrom, and from seeing to the application thereof, or being accountable for any loss or misapplication thereof.

Power to give receipts.

Bill, s. 43. *Mitchelson* v. *Piper*, 8 Sim. 64.

43. When an authority to deal with the trust-property is given to several trustees and one of them disclaims or dies, the authority may be exercised by the continuing trustees, unless from the terms of the instrument of trust it is apparent that the authority is to be exercised by a number in excess of the number of the remaining trustees.

Power to several trustees of whom one disclaims or dies.

Bill, s. 44. Lewin 280: Smith's L. 1138: Kent IV, 344 n.

44. Where a decree has been made in a suit for the execution of a trust, the trustee must not exercise any of his powers except in conformity with such decree or with the sanction of the Court by which the decree has been made or, where an appeal against the decree is pending, of the Appellate Court.

Suspension of trustee's powers by decree.

CHAPTER V.

OF THE DISABILITIES OF TRUSTEES.

Bill, s. 45. 2 Cale. Rep. Lewin 231: 3 Spence 92. 4 DeG. & J. 259.

45. A trustee who has accepted the trust cannot afterwards renounce it, except (*a*) with the permission of a principal Civil Court of original jurisdiction, or (*b*) if the beneficiary is competent to contract, with his consent, or (*c*) by virtue of a special power in the instrument of trust.

Trustee cannot renounce after acceptance.

46. A trustee cannot delegate his office, or any of his duties, either to a co-trustee or to a stranger, unless (*a*) the instrument of trust so provides, or (*b*) the delegation is in the regular course of business, or, (*c*) the delegation is necessary, or (*d*) the beneficiary, being competent to contract, consents to the delegation.

Bill, s. 46. Lewin 236: Kent IV, 334. N. Y. Code, § 1208.

Trustee cannot delegate.

Explanation.—The appointment of an attorney or proxy to do an act merely ministerial and involving no independent discretion is not a delegation within the meaning of this section.

Illustrations.

(*a*) A bequeathes certain property to B and C on certain trusts to be executed by them or the survivor of them or the assigns of such survivor. B dies. C may bequeath the trust-property to D and E upon the trusts of A's will.

Titley v. *Wolstenholm* 7 Beav. 436.

(*b*) A is a trustee of certain property with power to sell the same. A may employ an auctioneer to effect the sale.

(*c*) A bequeathes to B fifty houses let at monthly rents in trust to collect the rents and pay them to C. B may employ a proper person to collect these rents.

Bill, s. 47. N. Y. Code, § 1204: Lewin 530, 531: 2 Spence 87: Kerr, *Injunctions*, 461: *Re Hodges*, Chan. D. 754.

47. When there are more trustees than one, all must join in the execution of the trust, except where the instrument of trust otherwise provides.

Co-trustees cannot act singly.

Bill, s. 48. Lewin, 253, 258, 540, 542: 2 Spence 946: 1 W. & T. 251: 2 Beng. 278.

48. Where a discretionary power conferred on a trustee is not exercised reasonably and in good faith, such power may be controlled by a principal Court of original civil jurisdiction.

Control of discretionary power.

49. In the absence of express directions to the contrary contained in the instrument of trust, or of a contract to the contrary entered into with the beneficiary or the Court at the time of accepting the trust, a trustee has no right to remuneration for his trouble, skill and loss of time in executing the trust.

Trustee may not charge for services.

Nothing in this section applies to any Official Trustee, Administrator General, Public Curator or person holding a certificate of administration.

As to them, see Acts XVII of 1864, II of 1874, XX of 1858 and XX of 1864.

Bill, s. 49. N. Y. Code, § 1178.

50. A trustee may not use or deal with the trust-property for his own profit or for any other purpose unconnected with the trust.

Trustee may not use trust-property for his own profit.

Bill, s. 50. Lewin 438, 440.

51. No trustee whose duty it is to sell trust-property, and no agent employed by such trustee for the purpose of the sale, may, directly or indirectly, buy the same, or any interest therein, on his own account or as agent for a third person.

Trustee for sale or his agent may not buy.

Bill, s. 51. *Contra* Lewin 441: 2 Spence 943. Dart 43: Rule does not

52. No trustee, and no person who has recently ceased to be a trustee, may, without the permission of a principal Civil Court of original jurisdiction, buy or

Trustee may not buy beneficiary's interest without permission.

apply to pla-tive trustees; Pooley v. Quilter, 4 Drew. 189; Dart 44, Dart 84.

become mortgagee or lessee of the trust-property or any part thereof, and such permission shall not be given unless the purchase, mortgage or lease is manifestly for the advantage of the beneficiary.

Trustee for purchase.

And no trustee whose duty it is to buy or to obtain a mortgage or lease of particular property for his beneficiary may buy it, or obtain a mortgage or lease of it, for himself.

Bill, s. 52. Lewin 298.

Co-trustees may not lend to one of themselves.

53. A trustee or co-trustees whose duty it is to invest trust-money on mortgage or personal security must not invest it on a mortgage by, or on the personal security of, himself or one of themselves.

CHAPTER VI.

OF THE RIGHTS AND LIABILITIES OF THE BENEFICIARY.

Bill, s. 53. 1 Spence 496.

Rights to rents and profits.

54. The beneficiary has a right to the rents and profits of the trust-property; and, where he is exclusively interested in the trust-property and competent to contract, he may require the trustee to transfer the possession of the property to him or to such person as he directs. But where other persons are also interested therein, the Court may, in its discretion, direct, either that the trustee shall remain in possession of the trust-property, or that it shall be transferred to the beneficiary, under such conditions and restrictions as the Court in each case thinks fit.

Lewin 576, 585: 3 Beng. A. C. J. 409: 3 Beng. O. C. J. 92.

Right to transfer of possession.

Bill, s. 54. Lewin 589: Act I of 1877, s. 12, cl. (*a*).

Right to specific execution.

55. The beneficiary is entitled to have the intention of the author of the trust specifically executed to the extent of the beneficiary's interest;

and where there is only one beneficiary and he is competent to contract, or where there are several beneficiaries and they are competent to contract, and all of one mind, he or they may require the trustee to stay execution and transfer the possession of the trust-property: provided that, where the trust is to sell immoveable trust-property and the proceeds are to be divided amongst several persons, particular sharers cannot elect that their own respective undivided shares shall not be sold.

Right to compel transfer of possession.

Bill, s. 67.

Stanley v. Stanley, L. R. 7 Ch. D. 589.

Nothing in the second clause of this section applies to property transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest.

Illustrations.

(*a*). Certain Government securities are given to trustees upon trust to accumulate the interest until A attains the age of 24, and then to transfer the gross amount to him. A on attaining majority may, as the person exclusively interested in the trust-property, require the trustees to transfer it immediately to him.

(*b*). A bequeathes Rs. 10,000 to trustees upon trust to purchase an annuity for B, who has attained his majority and is otherwise competent to contract. B may claim the Rs. 10,000. Lewin 590.

(*c*). A transfers certain property to B and directs him to sell or invest it for the benefit of C, who is competent to contract. C may elect to take the property in its original character.

Bill, s. 55. *Exp. Holdsworth*, 4 Ding. N. C. Lewin [illegible].

Right to inspect and take copies of instrument of trust, accounts, &c.

56. The beneficiary has a right as against the trustee and all persons claiming under him with notice of the trust to inspect and take copies of the instrument of trust, the documents of title relating solely to the trust-property, the accounts of the trust-property and the vouchers (if any) by which they are supported, and the cases submitted and opinions taken by the trustee for his guidance in the discharge of his duty.

Bill, s. 56. Lewin 593.

Right to transfer beneficial interest.

57. The beneficiary, if competent to contract, may transfer his interest, but subject to the law for the time being in force as to the circumstances and extent in and to which he may dispose of such interest:

Provided that when property is transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest, nothing in this section shall authorise her to transfer such interest during her marriage.

Bill, s. 57. N. Y. Code, § 1215.

Right to sue for execution of trust.

58. Where no trustees are appointed or all the trustees die, disclaim or are discharged, or where for any other reason the execution of a trust by the trustee is or becomes impracticable, the beneficiary may institute a suit for the execution of the trust, and the trust shall, so far as may be possible, be executed by the Court until the appointment of a trustee or new trustee.

Bill, s. 58. Lewin 718.

Right to proper trustees.

59. The beneficiary has a right (subject to the provisions of the instrument of trust) that the trust-property shall be properly protected and held and administered by proper persons and by a proper number of such persons.

Lewin 32—39 718.

Explanation I.—The following are not proper persons within the meaning of this section:—

A person domiciled abroad: an alien enemy: a person having an interest inconsistent with that of the beneficiary: a person in insolvent circumstances; and, unless the personal law of the beneficiary provides otherwise, a married woman and a minor.

Explanation II.—When the administration of the trust involves the receipt and custody of the money, the number of trustees should be two at least.

Illustrations.

(*a*). A, one of several beneficiaries, proves that B, the trustee, has improperly disposed of part of the trust-property, or that the property is in danger from B's being in insolvent circumstances, or that he is incapacitated from acting as trustee. A may obtain a receiver of the trust-property.

Brown v. *Higgs*, 8 Ves. 561.

(*b*). A bequeathes certain jewels to B in trust for C. B dies during A's lifetime; then A dies. C is entitled to have the property conveyed to a trustee for him.

(*c*). A conveys certain property to four trustees in trust for B. Three of the trustees die. B may institute a suit to have three new trustees appointed in the place of the deceased trustees.

(*d*). A conveys certain property to three trustees in trust for B. All the trustees disclaim. B may institute a suit to have three trustees appointed in place of the trustees so disclaiming.

(*e*). A, a trustee for B, refuses to act, or goes to reside permanently out of British India, or is declared an insolvent, or compounds with his creditors, or suffers a co-trustee to commit a breach of trust. B may institute a suit to have A removed and a new trustee appointed in his room.

Bill, s. 60. Lewin 724: Act I of 1877, s. 54. Kerr 170.

Right to compel to any act of duty.

60. The beneficiary has a right that his trustee shall be compelled to perform any particular act of his duty as such, and restrained from committing any contemplated or probable breach of trust.

Illustrations.

(*a*) A contracts with B to pay him monthly Rs. 100 for the benefit of C. B writes and signs a letter declaring that he will hold in trust for C the money so to be paid. A fails to pay the money in accordance with his contract. C may compel B, on a proper indemnity, to allow C to sue on the contract in B's name.

Act I of 1877, s. 64, ill. (*f*).

(*b*). A is trustee of certain land, with a power to sell the same and pay the proceeds to B and C equally. A is about to make an improvident sale of the land. B may sue on behalf of himself and C for an injunction to restrain A from making the sale.

Bill, s. 61. 1 W. & T. L. C. 172: Lewin 444.

Wrongful purchase by trustee.

61. Where a trustee has wrongfully bought trust-property, the beneficiary has a right to have the property declared subject to the trust or re-transferred by the trustee, if it remains in his hands unsold, or, if it has been bought from him by any person with notice of the trust, by such person. But in such case the beneficiary must repay the purchase-money paid by the trustee, with interest and such other expenses (if any) as he has properly incurred in the preservation of the property; and the trustee or purchaser must (*a*) account for the nett profits of the property, (*b*) be charged with an occupation-rent, if he has been in actual possession of the property, and (*c*) allow the beneficiary to deduct a proportionate part of the purchase-money, if the property has been deteriorated by the acts or omissions of the trustee or purchaser.

Nothing in this section—

(*a*) impairs the rights of lessees and others who, before the institution of a suit to have the property declared subject to the trust or retransferred, have contracted in good faith with the trustee or purchaser; or

(*b*) entitles the beneficiary to have the property declared subject to the trust or retransferred where he, being competent to contract, has himself, without coercion or undue influence having been brought to bear on him, ratified the sale to the trustee with full knowledge of the facts of the case and of his rights as against the trustee.

Following trust-property—

into the hands of third persons;

62. Where trust-property comes into the hands of a third person inconsistently with the trust, the beneficiary may require him to admit formally, or may institute a suit for a declaration, that the property is comprised in the trust. [illegible] Bomb. [illegible] 4 D. R. [illegible] 372: Lewin 762: Dart 989 Smith § 814.

into that into which it has been converted.

Where the trustee has disposed of trust-property, and the money or other property which he has received therefor can be traced in his hands, or the hands of his legal representative, or legatee, the beneficiary has, in respect thereof, rights as nearly as may be the same as his rights in respect of the original trust-property.

As to movables, see Act IX of 1872, s. 108.

Exception I.—Nothing in this section entitles the beneficiary to any right in respect of property in the hands of—

5 W. R. [illegible] W. R. [illegible] P. 225.

(*a*) a transferee in good faith for consideration without having notice of the trust, either when the purchase-money was paid, or when the conveyance was executed, or

(*b*) a transferee for consideration from such a transferee.

Brace v. *Duchess of Marlborough*, 2 P. W. 491; and see Story, § 977.

A judgment-creditor attaching trust-property is not a transferee for consideration within the meaning of this exception.

Exception II.—Nothing in this section applies to money, currency-notes and negotiable instruments in the hands of a *bonâ fide* holder to whom they have passed in circulation, or shall be deemed to affect the Indian Contract Act, 1872, section 108, or the Transfer of Property Act, section 136.

Illustrations.

(*a*) A, a trustee for B of Rs. 10,000, wrongfully invests the Rs. 10,000 in the purchase of certain land. B is entitled to the land.

(*b*) A, a trustee, wrongfully purchases land, in his own name, partly with his own money, partly with money subject to a trust for B. B is entitled to a charge on the land for the amount of the trust-money so misemployed. Lewin [illegible]

Bill, s. 63. *Kennedy* v. *Daly*, 1 [illegible] & Lef. 377.

Acquisition by trustee of trust-property wrongfully converted.

63. Where a trustee wrongfully sells or otherwise transfers trust-property and afterwards himself becomes the owner of the property, the property again becomes subject to the trust, notwithstanding any want of notice on the part of intervening transferees in good faith for consideration.

Bill, s. 64. Lewin 813. *Docker* v. *Somes*, 2 [illegible] & K. 655. *Vyse* v. *Foster*, L. R. 8 Ch. [illegible] Lewin 81[illegible] 1 Seton [illegible]

Wrongful employment of trust-funds in trade.

64. Where a trustee wrongfully sells trust-property and employs the proceeds in trade or business, the beneficiary may, at his option, charge him either with the principal-money and the actual profits arising from such employment or with the principal-money and compound interest.

Bill, s. [illegible] Lewin [illegible] 784. cf. Ch[illegible] Act, s. Underhill, Art. 68.

Right in case of blended property.

65. Where the trustee wrongfully mingles the trust-property with his own, the beneficiary is entitled to a charge on the whole fund for the amount due to him.

Bill, s. 66. Pollock, Ptp. § 25, altered as to notice.

66. If a partner, being a trustee, wrongfully employs trust-property in the business or on the account of the partnership, no other partner is liable therefor in his personal capacity to the beneficiaries, unless he had notice of the breach of trust.

Wrongful employment by partner-trustee of trust-property for partnership purposes.

The partners having such notice are jointly and severally liable for the breach of trust.

Illustrations.

Lewin 255, 764.

(*a*). A and B are partners. A dies, having bequeathed all his property to B in trust for Z, and appointed B his sole executor. B, instead of winding-up the affairs of the partnership, retains all the assets in the business. Z may compel him, as partner, to account for so much of the profits as are derived from A's share of the capital. B is also answerable to Z for the improper employment of A's assets.

Flockton v. *Bunning*, 8 Ch. 323 n.: Pollock, Ptp. p. 90.

(*b*). A, a trader, bequeathes his property to B in trust for C, appoints B his sole executor, and dies. B enters into partnership with X and Y in the same trade and employs A's assets in the partnership-business. B gives an indemnity to X and Y against the claims of C. Here X and Y are jointly liable with B to C, as having knowingly become parties to the breach of trust committed by B.

Bill, s. 68. *Raby* v. *Ridehalgh*, 7 D. M. G. 104. Lewin 777: See sec. 39 *supra*.

67. Where one of several beneficiaries—

Liability of beneficiary joining in breach of trust.

(*a*) joins in committing a breach of trust; or

(*b*) knowingly obtains any advantage therefrom, without the consent of the other beneficiaries; or

(*c*) becomes aware of a breach of trust committed or intended to be committed, and either actually conceals it, or does not within a reasonable time take proper steps to protect the interests of the other beneficiaries; or

(*d*) has deceived the trustee and thereby induced him to commit a breach of trust,

the other beneficiaries are entitled to have all his beneficial interest impounded as against him and all who claim under him (otherwise than as transferees for consideration without notice of the breach) until the loss caused by the breach has been compensated.

Nothing in this section applies to property transferred or bequeathed for the benefit of a married woman so that she shall not have power to deprive herself of her beneficial interest.

Bill, s. 69.

68. Every person to whom a beneficiary transfers his interest has the rights, and is subject to the liabilities, of the beneficiary in respect of such interest at the date of the transfer.

Rights and liabilities of beneficiary's transferee.

CHAPTER VII.

OF VACATING THE OFFICE OF TRUSTEE.

Bill, s. 70.

69. The office of a trustee is vacated by his death or by his discharge from his office.

Office how vacated.

Bill, s. 71. 3 Spence 620.

70. A trustee may be discharged from his office only as follows:—

Discharge of trustee.

(*a*) by the extinction of the trust;

(*b*) by the completion of his duties under the trust;

(*c*) by such means as may be prescribed by the instrument of trust;

(*d*) by appointment under this Act of a new trustee in his place;

(*e*) by consent of himself and the beneficiary, or, where there are more beneficiaries than one, all the beneficiaries, being competent to contract, or

(*f*) by the Court to which a petition for his discharge is presented under this Act.

Bill, s. 72. Lewin 573, 574.

71. Notwithstanding the provisions of section eleven, every trustee may apply by petition to a principal Civil Court of original jurisdiction to be discharged from his office; and if the Court finds that there is sufficient reason for such discharge, it may discharge him accordingly, and direct his costs to be paid out of the trust-property. But where there is no such reason, the Court shall not discharge him, unless a proper person can be found to take his place.

Petition to be discharged from trust.

See *Ardill* v. *Savage*, 1 Ir. Eq. Rep. 79, as to capricious retirement.

Bill, s. 73. Act XXVIII of 1866, s. 34. 23 & 24 Vic., c. 145, s. 27. *Re Roche*, Dr. & War. 287: Lewin 466, 467.

72. Whenever any person appointed a trustee disclaims, or any trustee dies or is for a continuous period of six months absent from British India, or leaves British India for the purpose of residing abroad, or is declared an insolvent, or desires to be discharged from the trust, or refuses or becomes in the opinion of a principal Civil Court of original jurisdiction unfit or personally incapable to act in the trust, or accepts an inconsistent trust, a new trustee may be appointed in his place by—

Appointment of new trustees on death, &c.

(*a*) the person nominated for that purpose by the instrument of trust (if any), or

(*b*) if there be no such person, or no such person able and willing to act, the author of the trust, if he be alive and competent to contract, or the surviving or continuing trustees or trustee for the time being, or legal representative of the last surviving and continuing trustee, or the retiring trustees, if they all retire simultaneously, or the last retiring trustee.

5 Beng. 184.

Every such appointment shall be by writing under the hand of the person making it.

The Official Trustee may, with his consent and by the order of the Court, be appointed under this section in any case in which only one trustee is to be appointed and such trustee is to be the sole trustee.

For the purpose of this section, any refusing or retiring trustee shall, if willing to act in the execution of the power, be considered a continuing trustee.

Bill, s. 74. Insolvency trustee, 32 & 33 Vic., c. 71, s. 117.

73. Whenever any such vacancy or disqualification occurs, and it is found impracticable to appoint a new trustee under section seventy-two, the beneficiary may, without instituting a suit, apply by petition to a principal Civil Court of original jurisdiction for the appointment of a trustee or a new trustee, and the Court may appoint a trustee or a new trustee accordingly.

Appointment by Court.

Lewin 720: Smith, § 3153: 7 Hare 106: Bill, s. 59.

In appointing new trustees, the Court shall have regard (*a*) to the wishes of the author of the trust, as expressed in, or to be inferred from, the instrument of trust, (*b*) to the wishes of the person, if any, empowered to appoint new trustees, (*c*) to the question whether the appointment will promote or impede the execution of the trust, and (*d*) where there are more beneficiaries than one, to the interests of all such beneficiaries.

Rule for selecting new trustees.

Re Tempest, L. R. 1 Ch. Ap. 84.

Bill s. 73, paras. 3 and 4.

74. Whenever any new trustee is appointed under section seventy-two or section seventy-three, all the trust-property for the time being vested in the surviving or continuing trustees or trustee, or in the legal representative of any trustee, shall become vested in such new trustee, either solely or jointly with the surviving or continuing trustees or trustee, as the case may require.

Vesting of trust-property in new trustees.

Every new trustee so appointed, and every trustee appointed by a Court either before or after the passing of this Act, shall have the same powers, authorities and discretions, and shall in all respects act, as if he had been originally nominated a trustee by the author of the trust.

Powers of new trustees.

Bill s. 75. As to discretion of surviving trustee, L. R. 11 Eq. 489.

75. On the death or discharge of one of several co-trustees, the trust survives, and the trust-property passes to the others, unless the instrument of trust expressly declares otherwise.

Survival of trust.

CHAPTER VIII.

OF THE EXTINCTION OF TRUSTS.

Bill s. 76. N. Y. Code, §1208 altered: *Frith* v. *Cartland*, 34 L. J. Ch. 301.

76. A trust is extinguished—

Trust how extinguished.

(*a*) when its purpose is completely fulfilled; or

(*b*) when its purpose becomes unlawful; or

(*c*) when the fulfilment of its purpose becomes impossible, by destruction of the trust-property, or otherwise; or

(*d*) when the trust, being revocable, is expressly revoked.

Bill s. 77. N. Y. Code, §1209, altered: *Bycroft* v. *Christie*, 3 Beav. 238.

77. A trust constituted by will may be revoked at the pleasure of the testator.

Revocation of trust.

A trust otherwise constituted can be revoked only—

Jijibhai v. *Sonabhai*, Bom. 139. N.-W. P. 1874 p. 420.

(*a*) where all the beneficiaries are competent to contract—by their consent; or

(*b*) where the trust has been declared by a non-testamentary instrument or by word of mouth—in exercise of a power of revocation expressly reserved to the author of the trust.

Illustration.

8 Chan. D. 749.

A conveys property to B in trust to sell the same and pay out of the proceeds the claims of A's creditors. A reserves no power of revocation. If no communication has been made to the creditors, A may revoke the trust. But if the creditors are parties to the arrangement, the trust cannot be revoked without their consent.

New. Lewin 486.

78. No trust can be revoked by the author of the trust so as to defeat or prejudice what the trustees may have duly done in execution of the trust.

Revocation not to defeat what trustees have duly done.

CHAPTER IX.

OF CERTAIN OBLIGATIONS IN THE NATURE OF TRUSTS.

Bill s. 78.

79. An obligation in the nature of a trust is created in the following cases.

Where obligation in nature of trust is created.

Bill s. 79, cl. (*a*). Lewin [illegible] 2 Spence [illegible]

80. Where the owner of property transfers or bequeathes it and it cannot be inferred consistently with the attendant circumstances that he intended to dispose of the beneficial interest therein, the transferee or legatee must hold the property for the benefit of the owner or his legal representative.

Where it appears that transferor did not intend to dispose of beneficial interest.

Illustrations.

(*a*). A conveys land to B without consideration and declares no trust of any part. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in the land. B holds the land for the benefit of A.

(*b*). A conveys to B two fields, Y and Z, and declares a trust of Y, but says nothing about Z. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in Z. B holds Z for the benefit of A.

Powell v. *Powell*, 10 Ch. App. 351.

(*c*). A transfers certain stock into the joint names of himself and B. It cannot, consistently with the circumstances under which the transfer is made, be inferred that A intended to transfer the beneficial interest in the stock during his life. A and B hold the stock for the benefit of A during his life.

(*d*). A makes a gift of certain land to his wife B. She takes the beneficial interest in the land free from any trust in favour of A, for it may be inferred from the circumstances that the gift was for B's benefit.

Bill s. [illegible] cl. (*b*).

81. Where property is transferred to one person for a consideration paid or provided by another person, and it appears that such other person did not intend to pay or provide such consideration for the benefit of the transferee, the transferee must hold the property for the benefit of the person paying or providing the consideration.

Transfer to one for consideration paid by another.

Bill s. [illegible] Smith, [illegible] Jarman, [illegible] Bomb. [illegible]

82. Where a trust is incapable of being executed, or where the trust is completely executed without exhausting the trust-property, the trustee, in the absence of a direction to the contrary, must hold the trust-property, or so much thereof as [illegible] unexhausted, for the benefit of the author of the trust or his legal representative.

Trust incapable of execution or executed without exhausting trust-property.

Illustrations.

Lewin 134: Spence 33.

(*a*) A conveys certain land to B—

"upon trust," and no trust is declared; or

"upon trusts to be thereafter declared," and no such declaration is ever made; or

upon trusts that are too vague to be executed; or

upon trusts that become incapable of taking effect:

In each of these cases B holds the land for the benefit of A.

(*b*) A transfers Rs. 10,000 in the four per cents. to B in trust to pay the interest annually accruing due to C for her life. A dies. Then C dies. B holds the fund for the benefit of A's legal representative.

Contra in England. But see Lewin 148.

(*c*) A conveys land to B upon trust to sell it and apply one moiety of the proceeds for certain charitable purposes and the other for the maintenance of the worship of an idol. B sells the land, but the charitable purposes wholly fail, and the maintenance of the worship does not exhaust the second moiety of the proceeds. B holds the first moiety and the part unapplied of the second moiety for the benefit of A or his legal representative.

(*d*) A bequeathes Rs. 10,000 to B, to be laid out in buying land to be conveyed for purposes which either wholly or partially fail to take effect. B holds for the benefit of A's legal representative the undisposed of interest in the money or land if purchased.

Bill s. 78, cl. (*c*). L. R. 9 Eq. 475: 16 Eq. 283.

83. Where the owner of property transfers it to another for an illegal purpose and such purpose is not carried into execution, or the transferor is not as guilty as the transferee, or the effect of permitting the transferee to retain the property might be to defeat the provisions of any law, the transferee must hold the property for the benefit of the transferor.

Transfer for illegal purpose.

Transfer of Property Bill, s. 8: Kent IV, 332: Smith, § 711.

84. Where a testator bequeathes certain property upon trust and the purpose of the trust appears on the face of the will to be unlawful, or during the testator's lifetime the legatee agrees with him to apply the property for an unlawful purpose, the legatee must hold the property for the benefit of the testator's legal representative.

Bequest for illegal purpose.

Where property is bequeathed and the revocation of the bequest is prevented by coercion, the legatee must hold the property for the benefit of the testator's legal representative.

Bequest of which revocation is prevented by coercion.

See Act I of 1877, s. 35.

85. Where property is transferred in pursuance of a contract which is liable to rescission or induced by fraud or mistake, the transferee must, on receiving notice to that effect, hold the property for the benefit of the transferor subject to repayment by the latter of the consideration actually paid.

Transfer pursuant to rescindible contract.

Bill s. 78, cl. (*e*). 4 Mad. 88: 6 Mad. 474: 2 Ind. Jur. O. S. 7: 13 Eliz., c. 5.

86. Where the effect of a transfer of property is to defraud or delay the present or future creditors of the transferor, or co-owners or other persons interested in such property, and the transfer is gratuitous or the transferee has notice of the intended fraud, the transferee must hold the property for their benefit to the extent necessary to satisfy their just demands.

Transfer in fraud of transferor's creditors.

Bill s. 78, cl. (*f*). See sec. 13, ill. (*a*), *supra*.

87. Where a debtor becomes the executor or other legal representative of his creditor, he must hold the debt for the benefit of the persons interested therein.

Debtor becoming creditor's representative.

Bill s. 78, cl. (*g*). Act I of 1877 s. 3, ills. (*b*), (*c*), (*e*), (*f*): L. R. 2 Ind. App. 18: 2 Spence 299: Lewin 165, 171: Story, § 323.

88. Where a trustee, executor, partner, agent, director of a company, legal adviser, or other person bound in a fiduciary character to protect the interests of another person, by availing himself of his character, gains for himself any pecuniary advantage or where any person so bound enters into any dealings under circumstances in which his own interests are, or may be, adverse to those of such other person and thereby gains for himself a pecuniary advantage, he must hold for the benefit of such other person the advantage so gained.

Advantage gained by fiduciary.

Illustrations.

(*a*) A, an executor, buys at an undervalue from B, a legatee, his claim under the will. B is ignorant of the value of the bequest. A must hold for the benefit of B the difference between the price and value.

(*b*) A, a trustee, uses the trust-property for the purpose of his own business. A holds for the benefit of his beneficiary the profits arising from such user.

(*c*) A, a trustee retires from his trust in consideration of his successor paying him a sum of money. A holds such money for the benefit of his beneficiary.

(*d*) A, a partner, buys land in his own name with funds belonging to the partnership. A holds such land for the benefit of the partnership.

Fawcett v. Whitehouse, 1 R. & M. 132.

(*e*) A, a partner, employed on behalf of himself and his co-partners in negotiating the terms of a lease, clandestinely stipulates with the lessor for payment to himself of a lákh of rupees. A holds the lákh for the benefit of the partnership.

(*f*) A and B are partners. A dies. B, instead of winding up the affairs of the partnership, retains all the assets in the business. B must account to A's legal representative for the profits arising from A's share of the capital.

(*g*) A, an agent employed to obtain a lease for B, obtains the lease for himself. A holds the lease for the benefit of B.

(*h*) A, a guardian, buys up for himself incumbrances on his ward B's estate at an undervalue. A holds for the benefit of B the incumbrances so bought, and can only charge him with what he has actually paid.

89. Where by the exercise of undue influence any advantage is gained in derogation of the interests of another, the person gaining such advantage without consideration or with notice that such influence has been exercised must hold the advantage for the benefit of the person whose interests have been so prejudiced.

Advantage gained by exercise of undue influence.

Bill s. 78, cl. (*h*). Lewin 166, 725: 2 Spence 299, 301: Act I of 1877, ill. (*d*). cf. 5 Beng. 458, mortgagee buying equity of redemption.

90. Where a tenant for life, co-owner, mortgagee, or other qualified owner of any property, by availing himself of his position as such, gains an advantage in derogation of the rights of the other persons interested in the property, or where any such owner, as representing all persons interested in such property, gains any advantage, he must hold, for the benefit of all persons so interested, the advantage so gained, but subject to repayment by such persons of their due share of the expenses properly incurred, and to an indemnity by the same persons against liabilities properly contracted, in gaining such advantage.

Advantage gained by qualified owner.

Illustrations.

(*a*). A, the tenant for life of leasehold property, renews the lease in his own name and for his own benefit. A holds the renewed lease for the benefit of all those interested in the old lease.

(*b*). A village belongs to a Hindú family. A, one of its members, pays nazráná to Government and thereby procures his name to be entered as the inámdár of the village. A holds the village for the benefit of himself and the other members.

10 Moo. I. A. 322: 14 Moo. I. A. 305.

(*c*). A mortgages land to B, who enters into possession. B allows the Government revenue to fall into arrear with a view to the land being put up for sale and his becoming himself the purchaser of it. The land is accordingly sold to B. Subject to the repayment of the amount due on the mortgage, and of his expenses properly incurred as mortgagee, B holds the land for the benefit of A.

Bill s. 78, cl. (*i*). 2 Spence 295: Lewin 128, 729: Smith § 725: Act I of 1877, s. 3, ills. (*g*), (*h*).

91. Where a person acquires property with notice that another person has entered into an existing contract affecting that property, of which specific performance could be enforced, the former must hold the property for the benefit of the latter to the extent necessary to give effect to the contract.

Property acquired with notice of existing contract.

Bill, s. 78, cl. (*j*). Smith § 728.

92. Where a person contracts to buy property to be held on trust for certain beneficiaries and buys the property accordingly, he must hold the property for their benefit to the extent necessary to give effect to the contract.

Purchase by person contracting to buy property to be held on trust.

Story Eq. Jur. § 378.

93. Where creditors compound the debts due to them, and one of such creditors, by a secret arrangement with the debtor, gains an undue advantage over his co-creditors, he must hold for the benefit of such creditors the advantage so gained.

Advantage secretly gained by one of several compounding creditors.

Bill, s. 78, cl. (*k*. *eg.*, Panjáb co-sharer absentees.

94. In any case not coming within the scope of any of the preceding sections, where there is no trust, but the person having possession of property has not the whole beneficial interest therein, he must hold the property for the benefit of the persons having such interest, or the residue thereof (as the case may be), to the extent necessary to satisfy their just demands.

Constructive trusts in cases not expressly provided for.

Illustrations.

2 Spence 297.

(*a*) A, an executor, distributes the assets of his testator B to the legatees without having paid the whole of B's debts. The legatees hold for the benefit of B's creditors, to the extent necessary to satisfy their just demands, the assets so distributed.

(*b*). A by mistake assumes the character of a trustee for B, and under colour of the trust receives certain monies. B may compel him to account for such monies.

(*c*). A makes a gift of a lákh of rupees to B, reserving to himself, with B's assent, power to revoke at pleasure the gift as to Rs. 10,000. The gift is void as to Rs. 10,000, and B holds that sum for the benefit of A.

Bill, s. 79.

95. The person holding property in accordance with any of the preceding sections of this chapter must, so far as may be, perform the same duties, and is subject, so far as may be, to the same liabilities and disabilities, as if he were a trustee of the property for the person for whose benefit he holds it:

Obligor's duties, liabilities and disabilities.

Underhill, p. 128.

Provided that, (*a*) where he rightfully cultivates the property or employs it in trade or business, he is entitled to reasonable remuneration for his trouble, skill and loss of time in such cultivation or employment; and (*b*) where he holds the property by virtue of a contract with the person for whose benefit he holds it, or with any one through whom such person claims, he may, without the permission of the Court, buy or become lessee or mortgagee of the property or any part thereof.

Bill, s. 80. L. R. 8 Ch. 747.

96. Nothing contained in this chapter shall impair the rights of transferees in good faith for consideration, or create an obligation in evasion of any law for the time being in force.

Saving of rights of *bonâ fide* purchasers.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

SUKKUR—QUETTA STATE RAILWAY.

No. 045R.C., dated Fort William, the 21st January 1880.

The following papers are published for general information :—

The last report from Sir Richard Temple indicates the promtitude with which His Excellency has applied the means, placed at his disposal by the Government of India, in the advancement of this important Railway.

ALEX. FRASER, *Major-Genl., R. E.,*
Secretary to the Govt. of India.

RAILWAY LINE THROUGH MOUNTAINS BETWEEN THE VALLEY OF THE INDUS AND SOUTHERN AFGHANISTAN.

Minute by the Governor of Bombay, dated 25th November 1879.

It now becomes necessary for me to state an opinion, and consequent recommendation, regarding the line of country whereby the Railway from the Valley of the Indus and the plain of Cutchi can be best conducted up to the plateau of Beluchistan with a view to further extension into Southern Afghanistan.

2. In September last we were directed by the Government of India to cause a broad gauge surface railway to be laid down from a point near Sukkur on the Indus to some point near the mouth of the Bolan Pass; though afterwards we were instructed that this railway was to be carried by a narrow (metre) gauge up to Quetta. Next, in October, we were required to furnish a staff for surveying an extension to Candahar.

3. The surface railway has now been laid down through the basin of the Indus, and its alignment has been fixed across the desert plain of Cutchi to Mithri on the bank of the Nari river close to the foot of the outer chain of the Beluchistan mountain system.

4. The question immediately arises by what line shall the railway be carried onwards? This important question I have been considering for the past month, inspecting the country in company or in communication with the chief political authority, namely, the Agent to the Governor General Sir Robert Sandeman, and the Engineer authorities, Colonel Lindsay, R. E., Engineer-in-Chief of this Railway, and Colonel deBourbel, R. E., Superintending Engineer in Beluchistan.

5. In September last we were requested by the Government of India to have the old road by the Bolan Pass professionally examined with a view to the construction of a temporary, if not a permanent, railway. It was known, however, that an alternative route *viâ* the eastward side by Sibi and the valley of the Nari might perhaps be found preferable, and in October we were requested to take that alternative route into definite consideration. It is indeed manifest that the choice lies between these two routes, namely, first, the Bolan Pass; secondly, the Nari valley by Sibi.

6. First, then, in respect to the Bolan Pass, I append a memorandum by Colonel Lindsay, in which Colonel deBourbel concurs, on the capabilities of this celebrated and long-used pass for a railway.

7. Before describing the Pass I should premise by observing that the line must at the outset be carried by a considerable bridge over the river Nari near Mithri; after which it would run without any difficulty to the mouth of the Pass beyond Dadur.

8. Then the Pass itself is found to be virtually impracticable for a permanent and regular railway, that is, either impossible absolutely, or possible only at an unreasonable and prohibitory outlay. Nor is there any well-grounded hope, so far as is known at present, of any favourable line being discovered in the neighbourhood of the Bolan. By the term permanent and regular railway, I mean a railway that could be worked at all times without interruption, at

the ordinary rates of speed, with the usual loads of traffic, and with the same engines and carriages (rolling-stock) as the rest of the line below and above the Pass.

9. The Pass from its mouth near Dadur to its head near Darwaza is 70 miles in length, of which 26 miles are characterized by difficulties of sorts more or less serious; while the remaining 44 miles are either easy, or practicable without excessive cost. The Pass, it will be remarked, is one of unusual length even for these regions. It is permeated for three-fourths of its length by a stream of great beauty. In some places it opens out like the body of a water vessel; in other places it closes up like the neck of the vessel, leaving just enough room for the stream to escape through.

10. In brief general terms the difficulties of the Pass for a railway may be described as consisting of the winding gorge walled in by overhanging cliffs, just above Kundilani, so famous for its picturesqueness; the river crossing below Much; and beyond Much another gorge, even worse than the gorge last named, consisting of the steep ravine up to Dozan where a military road has recently been carried, for which work General Phayre and the Bombay Brigade will be long and gratefully remembered. Some of these difficulties, consisting of virtually impossible curves and gradients, the former 70 feet radius or worse, the latter 1 in 20 or worse, for a railway as above defined,—are pronounced by every Engineer who has seen them to be insuperable; with the proviso that almost any difficutly may ultimately prove superable with science and capital if these shall be expended without stint, especially the capital. But even with unlimited expense it is hard to say how the Engineers would ever overcome the natural gradients of the ravine below Dozan.

11. On the other hand, what may be termed a "temporary" railway could be constructed without excessive cost in the Bolan Pass, or perhaps what would be called by some persons a "tramway." In exact language a metre-gauge railway could be constructed having at certain points excessive gradients about 1 in 20, and at other points excessive curves of about 70 feet radius. Consequently, it could be worked only at very low rates of speed, and with very light loads of traffic. Moreover, for these sharp curves specially constructed engines, carriages and trucks would have to be provided, as ordinary rolling-stock would not be suitable. This circumstance might render necessary a separate set of rolling-stock for the railway above and beyond the Pass; on the assumption that the railway below the Pass were provided with rolling-stock from the Indian railway system. Further, the line would at certain points be below the level of ordinary high floods of the Bolan River, the waters of which would occasionally sweep over the railway with a volume rolling on waves of at least 25 feet high, and capable in a few minutes of submerging the rails under that depth of water, causing damage of course, but not producing any destructive effect. There would, however, ensue for a very brief time some interruption to traffic. Though the region is comparatively rainless, still clouds gather in the spring and in the summer, discharging rain which is drained off with extreme rapidity from the precipitous sides of naked mountains, and accumulates with corresponding force. Such floods do not, however, last long and may be described as occasional rather than frequent; nor are they constant at any one season. There would also be at times some liability to accidents from this cause,—beyond the power of vigilance or system to prevent altogether. During the winter, too, the climate at the head of the Pass is inclement in a high degree, even for Europeans; and for natives is tolerable only under necessity. The wintry storms (snow or sleet) in this locality cannot be faced by any one without danger; and on their approach being observed shelter must be resorted to.

12. During the time of its construction the railway in the Bolan Pass would have all the advantages of a good military line of communication alongside, consisting of roadway for wheeled carriage, of regular halting places, and other staging conveniences for man and beast. The Pass is at all seasons very deficient in food and fodder, and in the winter season is utterly inhospitable. Supplies, therefore, would have to be obtained from the districts above or below the Pass for the railway work-people, just as they are now obtained for the soldiers and camp-followers. The Pass, too, is wholly destitute of fuel

—a serious consideration in the case of a railway—and this article would have to be imported from the districts below.

13. From the head of the Bolan Pass, near Darwaza to Quetta, 30 miles, and from Quetta to Gulistan Kariz, in the Pishin Valley, a further distance of 40 miles, in all 70 miles, the line may be carried with ease. It is to be remembered that Gulistan Kariz is the principal place in the Pishin Valley, one of the districts assigned to the British Government by the treaty of Gundamuk; is at the base of the Khwaja Amran mountain range which separates these assigned districts from Afghanistan; and is situated conveniently in respect to the three Passes crossing the range.

14. Thus having regard to the high national importance, from a military, a political, and a commercial point of view, of carrying a railway into the Beluchistan Uplands on its way to Southern Afghanistan, I would most gladly recommend the construction of a "temporary" railway (as above defined) up the Bolan Pass, notwithstanding the disadvantages of slow speed, light loads, provision of special and separate rolling-stock, short interruptions of traffic periodically, and liability to occasional accidents;—provided always that no better alternative route could be found. The railway thus constructed would not indeed be worked satisfactorily in the Indian acceptation of the term; and never could be made a first-rate work worthy of so important a line of through communication. Still it would, at the worst, be worked sufficiently to become a vast advantage, on the whole, nationally. And doubtless by experience year after year, the railway Engineers would learn how to mitigate these several disadvantages in practice, though unable to overcome them altogther. But the question immediately arises as to whether some better alternative route cannot be found? And to this we must address ourselves. If such a route cannot be found then the Bolan temporary railway must necessarily be recommended. If such a route can be, or has been, found, then the Bolan railway ought certainly *not*, I submit, to be recommended.

15. Before adverting to the alternative route I must ask remembrance of the circumstance that the route by the Bolan Pass and onwards through Shal or Shalkot, the Valley of Quetta, to the border of Pishin passes through foreign territory, namely, the dominion of His Highness the Khan of Khelat. This circumstance is by no means a formidable disadvantage, but it is a disadvantage to some appreciable extent. The occupation by a British railway, which is really complete British occupation, of a celebrated Pass on which the Native Sovereigns have always levied transit dues, would be viewed with some regret by the Khelat State. Though that State is so loyal that it would surrender the Pass cheerfully enough, if by no other means could the railway be carried on, still the practical cession of the Pass would constitute a certain sort of obligation on the part of the British Government, and would involve some slight complications with the Khan and with some of his Chiefs regarding compensation for loss of transit dues in the Pass,—all which might as well be avoided. Again, as the line would pass through foreign territory, the outlay expended on it on the security (for interest) of Indian revenues would fructify partly to the benefit of a foreign State, which benefit would have accrued to territories under British management had the line passed through those territories. I need not stop to shew the advantage of carrying the railway through districts under British administration, if such a route can be found.

16. Secondly, then, I have to advert to the alternative route *viâ* Sibi and onwards.

17. It has already been mentioned that the railway has been aligned as far as the left bank of the Nari River, nearly opposite Mithri. The line would proceed, without crossing the river, to Sibi, about 12 miles distant, along the plain, and would approach the Pass whereby the river finally debouches from the hills into the plains of Cutchi. It is proposed that the line should follow the course of this river or of its affluents right up to the plateau of Beluchistan and Pishin. I must here pause for a moment to indicate the river system of the Nari.

18. This system comprises the north-eastern drainage of Beluchistan and the south-eastern drainage of Pishin. Its branches run from the well-known mountains of Zerghun, Takatu and Adina flanking the plateau of Beluchistan,

and from the almost equally well-known mountains of Pila and Kalipat flanking the plateau of Pishin,—mountains ranging from 8,000 to 11,000 feet above the sea and from 7,000 to 10,000 feet above the plains. The streams rise in these plateaux near the flanks; but find their way through the flanking mountains, by passes, gorges or rifts, down into valleys, which broaden out among lower ranges of hills, and are largely cultivated. These several streams after watering their respective valleys, converge into one stream which finally issues by the Pass above mentioned into the plain near Sibi, which may be called the Nari Pass.

19. When we were instructed in September last to carefully consult the political authorities regarding the selection of the line in this quarter, the Agent to the Governor General, Sir R. Sandeman, urgently drew our attention to the advantages of the line by the Nari River system. During my visit to Beluchistan last season, January 1879, I had myself heard much regarding this line. The Engineer-in-Chief, Colonel Lindsay, was accordingly directed to examine the line, two Officers, Lieutenants Jennings, R.E., and Barnet, R.E., being also ordered to assist him in this examination. This general preliminary examination has now been made leading to satisfactory and favourable results.

20. Shortly after leaving Sibi the line would enter the Nari Pass, which is 14 miles in length. This Pass is somewhat similar to the lower portion of the Bolan Pass between Dadur and Kundilani, but is easier in character. The hill sides are generally, though not always, shelving; the rocks and clayey formations are soft and workable with facility. Along the Nari Pass, then, a railway could be constructed permanently above the reach of floods, with suitable curves and gradients at a considerable, though not excessive, cost. Emerging from the Pass the railway would be conducted between the low hills through open spaces to the important village and well cultivated valley of Hurnai, on one of the main affluents of the Nari. After Hurnai, it would be taken over open and partly cultivated spaces between the hills to the banks of an affluent of the Nari near the village of Khost. It would then follow the course of that affluent, near the base of the Kalipat Mountain, to the village of Dargai at the foot of the Chapar Hill, which is a short and comparatively low connecting range between the two high mountains of Kalipat and Adina.

21. Up to this point good gradients are obtainable without difficulty, indeed, with comparative facility, considering the hilly nature of the country. It is near the foot of the Chapar Hill that the only obstacle occurs to the gradual ascent to the high plateau of Beluchistan and Pishin, and that the river passage from the plateau commences. As already mentioned, the river rises in this plateau and wends its way towards the flank of the plateau through a comparatively open valley with sloping and easily workable sides. It then finds its way through the ranges of limestone near the base of Chapar by a remarkable rift or narrow gorge, which has been fully examined by Lieutenant Jennings, R. E., and has been seen in part by Colonel Lindsay and myself. We may call it the Chapar Rift. It has a length of about two miles, without any insuperable curves, but with a difference of about 350 feet in level between its upper and lower end, representing a gradient of 1 in 30 approximately. The sides of the gorge are precipitous at certain points only, which could be overcome by blasting, otherwise the sides admit generally of a railway being securely carried above reach of floods. The real difficulty would be in the gradient, but Colonel Lindsay is inclined to think that by some works of no excessive magnitude at the entrance of the gorge, this gradient might be reduced to 1 in 40. If the first impression of the practicability of this passage should be confirmed by survey, then a great advantage would be gained. The railway would follow the river through the remarkable rift at the base of the Chapar Hill into the valley above, which may be called the Upper Chapar Valley. And once that valley is gained an excellent line is undoubtedly obtainable to the border between the valley of Quetta and Pishin. To this part of the line I will revert presently.

22. But if the Chapar Rift should not prove altogether suitable for the passage of the railway, then there is an alternative proposal which undoubtedly will answer quite well, which is this: The Adina Mountain adjoins the Chapar Hill and bounds one side of the Upper Chapar Valley; it also rises gradually

from the river bed at the village of Dargai. The railway can be then carried by excellent gradients along the sides, slopes and spurs of the Adina Mountain to the Upper Chapar Valley. I have myself carefully looked at this mountain, and have seldom seen a mountain apparently more suited for the carrying of a railway by an easy incline to a considerable height. The mountain has been separately looked at by Colonel Lindsay and Colonel deBourbel; and again by both those officers in company with me, Sir R. Sandeman and Major Rivett-Carnac, my Military Secretary. It really possesses all the points required for the alignment of a railway, such as a continuous ridge almost without break, and free from any scarp except near the summit, broad sloping sides, long gently-extending spurs, easily workable material, such as earth and stones, without any large rocky formation.

23. Both the Engineer authorities, Colonels Lindsay and deBourbel, express a very favourable opinion of the capabilities of this Adina Mountain, and, if the rift should fail to afford a still better line with some saving of distance, here at least is a good line afforded by the Adina Mountain.

24. The railway having thus gained the Upper Chapar Valley would pass along the sloping sides of this valley for about 15 miles, till it reached a low ridge easily surmounted; and crossing that, it would enter the valley of Gwal in Pishin. From Gwal it would follow the bank of the Kakar Lora River near the base of the Takatu Mountain by a very easy line near to the village of Kachlak, which is a well-known stage on the road between Quetta and Gulistan Kariz. From Kachlak it would pass on to Gulistan Kariz without any obstacle save the main stream of the Lora River, which must under any circumstances be bridged, whatever line be selected for a railway towards Candahar.

25. Kachlak above mentioned is distant 12 miles by level valley ground from Quetta (irrespective of a short cut over the spur of a hill unsuitable for a railway). I concur with the Agent to the Governor General in thinking that this point is quite near enough to Quetta for practical purposes; the main point being to reach Gulistan Kariz direct on the way to Candahar.

26. Here, then, is a railway route which by the map runs nearly straight from Mithri by Sibi to Gulistan Kariz; which, as Colonel Lindsay advises me, is very favourable and suitable from an engineering point of view, considering the nature of the country and the height to be gained, especially too in comparison with the Bolan line, and which, as Sir R. Sandeman, the Officer in charge of this part of the country, advises me, is excellent in a political and administrative point of view. Indeed, Colonel Lindsay describes the Sibi route as incomparably superior to the Bolan route for a railway. In this description Sir R. Sandeman and I concur. So various and numerous indeed are the advantages of the Sibi route that, even if the disadvantages of the Bolan had been superable, or if a favourable line in that neighbourhood had been discovered, we should still have recommended the Sibi route.

27. The comparative distance by the two lines, namely, Mithri to Gulistan Kariz by Dadur and Quetta, or Mithri to Gulistan Kariz by Sibi, Chapar and Gwal, may be stated approximately as below,—I say approximately, because until the surveys are completed it is impossible to give the distances by railway exactly: distances always differing by road and by rail:—

Bolan Route.

	Miles.
Mithri to Dadur	18
Dadur to Quetta	100
Quetta to Gulistan Kariz	45
	163

Sibi Route.

	Miles.
Mithri to mouth of Nari Pass near Sibi	20
Mouth of Nari Pass to Dargai at foot of Chapar Hill	87
Dargai to Gwal	25
Gwal by Kachlak to Gulistan Kariz	55
	187

Thus the difference between 163 and 187, or 24 miles constitutes a difference of distance in favour of the Bolan route as compared with the Sibi route. *Per contra*, it is to be remembered that the Sibi route has fairly good gradients throughout, either existing naturally or obtainable by moderate deflexions from the straight course, which the Bolan route has not; the maximum height being in each case about the same, namely, an ascent from a plain 700 feet above the sea to a plateau of 5,500 feet. But this difference in distance is the only point in favour of the Bolan route. In all other respects Colonel Lindsay advises me that from an engineering point of view there is no comparison at all between the two routes, the Sibi route being so incomparably superior.

28. The Bolan route, as we have seen, does not admit of a permanent line being constructed at all; and if a temporary line be constructed, it can be worked only at slow speed, with light loading, and with specially constructed rolling-stock, at the best with occasional interruption from floods, and with some liability to accident from the same cause. The Sibi route admits of a permanent railway being constructed to be worked throughout without interruption at the ordinary speed and with ordinary loading without any unusual liability to accident.

29. By the Sibi route there is much of convenience for constructive purposes which does not exist on the Bolan route. Out of the distance between Dadur and Quetta, 100 miles, full 90 miles pass through, as already seen, tracts destitute of everything save water, a circumstance necessitating constant importation of supplies (including fuel) during construction of the railway. On the Sibi route there are only two such tracts of limited length,—one the Nari Pass, 14 miles, the other, the Upper Chapar Valley about 15 miles. The rest of the way lies through tracts all more or less culturable or cultivated and possessing fair resources in wood and fuel; while some valleys, such as that of Hurnai, where we are now encamped, are even highly cultivated,—circumstances which obviate the necessity of importing supplies, and facilitate construction in many respects. Indeed, the possibility of augmenting indefinitely by conservation the resources of wood and fuel all along the Sibi route, is a circumstance of some value and interest.

30. The advantage has been already indicated which the Bolan Pass possesses in its new military cart-road so well made by General Phayre and the Bombay Brigade of sepoys. An equal advantage is easily and speedily obtainable on the Sibi route; of this we have no doubt from personal inspection. The only doubtful point was the side of the Chapar Hill. But along that side a roadway fit for beasts of burden, by which my whole camp and escort, passed, was made by two companies of Bombay sepoys in a few hours under Major Trench, and close by, Sir R. Sandeman, Colonel Lindsay and myself found a mountain road whereby we walked from the Upper Chapar Valley down to Dargai, passing by the way laden animals with goods of private trade.

31. I may add here that the head of the ascent by the Sibi route, say the Upper Chapar Valley and the Gwal Valley, is free in winter from that extreme inclemency of climate to which the head of the Bolan ascent is subject; while a good and salubrious residence in summer could be found near Chapar or Gwal for the European officers or servants of the railway.

32. Whereas the Bolan route, as already seen, passes through foreign territory, the Sibi route passes through the heart of the districts recently assigned to the British Government by the treaty of Gundamuk. The capital outlay would thereby fructify to the development of territories for which British administrators are responsible. The material resources hereby developed would be virtually British resources available for every purpose of strategy or of policy. The campaign in Southern Afghanistan of 1878-79 has forcibly shewn the importance of having supplies of all sorts at hand all along the line of military communication.

33. Whereas by the Bolan route there would be nothing but through traffic between Dadur and Quetta and no local traffic at all, also no local labour—there would, by the Sibi route, be considerable local traffic station to station, besides the through traffic, also some local labour.

34. In the Sibi assigned district extending from the plain of Cutchi to the uplands of Pishin, there is a sparse but growing population of Pathan moun-

taineers, capable as cultivators, adepts at utilizing the streams and streamlets for irrigation, and possessing pastoral wealth in sheep and goats—but heretofore retarded in development from want of that sort of protection which is afforded by a settled Government, and frequently harried, and sometimes even subjected to murder, rapine and devastation, from the Murri and other tribes that inhabit the hill ranges on the east which lie between the Sibi district and the Indus valley. The watch-towers with which the fields all over the Sibi district are studded, and into which the husbandman can shut himself at shortest notice to save his person, while his crops, grain and cattle are swept away by the marauders, attest the depressing circumstance that hitherto the cultivators have carried their lives in their hands whenever they went to plough or to reap. This abiding sense of insecurity has sharpened and embittered the character of the people; and many lawless or violent persons may be found.

35. All this will of course be, indeed already is being, beneficently altered by Sir R. Sandeman's vigorous administration. But the assistance which would be afforded by the railway to British administrators in a task for the completion of which their government has made itself answerable is too manifestly important to need description, and indeed would be difficult to describe adequately.

36. But further the railway by the Sibi route would serve as a barrier to the depredations of the Murri tribe westwards, which depredations have spread not only across the Sibi district, but to the neighbourhood of the Bolan Pass itself. The raids of the Murris eastwards towards the Indus Valley, that is towards the British territory, have long been known and checked. But these depredations are now found to have been much worse westwards over the Sibi territory—circumstances which could be understood imperfectly only while the territory was Afghan, but which are fully patent now that the territory has come under British management.

37. Moreover, this railway would run near the western and southern boundaries of the Murri hills, and would open up communications with the Thal plateau which is distant 45 miles from Hurnai already mentioned as a point on the railway line, and which is on the northern boundary of the Murris—their remaining or eastern boundary facing towards British dominion on the Indus. Thus by means of this railway this heretofore dreaded and mischievous tribe, who have so long preyed on their neighbours, will be environed by a system which they cannot resist. Having had these Murri Chiefs introduced to me by Sir Robert Sandeman, I perceive that they themselves are beginning to feel that resistance is hopeless on their part, and that they must divert their energies from rapine to industry.

38. Similar remarks are applicable to several tribes of Pathans who dwell in the hills to the north of the Thal plateau.

39. Thus, irrespective of its engineering merits, the Sibi route has great administrative and economic advantages, and is capable of producing a considerable political effect.

40. It follows a line, too, which was evidently intended by nature to be the highway of communication, but which has become disused owing to the unsettled state of Afghan administration and the incursions of neighbouring tribes.

41. We were instructed at the outset by the Government of India to consider carefully the opinions of the political authorities in selecting the line for this railway. The Agent to the Governor General, Sir Robert Sandeman, the Officer in political charge of the Khan of Khelat and His Highness' territories, also of the Western Murris, and in civil charge of the assigned districts, has a decided opinion in favour of the Sibi route. The opinion of so high an officer, who has so much local experience and who has done so much for this part of the country, will doubtless carry great weight.

42. I feel bound, however, to record a similar opinion formed by me after independent enquiry and observation on the spot.

43. I presume that up to the mouth of the Nari Pass near Sibi the broad gauge would be carried, and that from this point onwards the narrow (metre) gauge would be used.

44. It is to be borne in mind that in either case, that is whether on the Bolan route, or on the Sibi route, there will be considerable expense incurred

in making the roadway for the rails. The military road made in the Bolan Pass by General Phayre and his sepoys is excellent for its own purposes, and would be collaterally of service to those engaged in making a railway. But it would form no part of the roadway for the rails. No doubt if the Engineers had surveyed and marked out a line for a railway, the sepoys under General Phayre's vigorous and practised supervision would be of the utmost assistance in making a roadway especially in such difficult places as the ravine between Much and Dozan. But this particular work if it ever be undertaken has yet to be begun. Therefore the question remains whether this valuable and disciplined labour should be applied to an inferior route or to a superior route. I have understood from the Lieutenant-General at Candahar that there no longer remains any absolute military necessity for the Reserve Brigade remaining in the Bolan Pass. If the Brigade remain in the field, as is doubtless desirable, it may just as well be placed on the Sibi route as on the Bolan route. And its head-quarters would have in the Upper Chapar Valley even a better residence than they now have at Dozan. But besides military labour much other labour under any circumstances and by either route would have to be employed at some cost and for immediate financial effect it is the same whether the funds be disbursed on the Bolan route or the Sibi route. But for ultimate financial advantage and for administrative effect it makes all the difference to the public interest whether the expense be incurred on a route like the Bolan which at the best would be a makeshift and never quite satisfactory, or on a route like that of Sibi which is satisfactory in every respect. In the Bolan the money would be spent on what would always be regarded as a temporary work. On the Sibi route it would be spent on a permanent and excellent line worthy of the through communication between India and Afghanistan.

45. I am authorised to state that Sir Robert Sandeman concurs entirely in this Minute, and that Colonel Lindsay concurs in all those parts of it which relate to engineering and constructive points, subject always to detailed survey.

46. The joint recommendation of us three is, that the Sibi route, as above described, be adopted, and that our surveying and pioneering resources be immediately concentrated on that route. It appears open to me within the margin of the various instructions received from the Government of India, to instruct Colonel Lindsay to the above effect, and he has made, and is further making, arrangements accordingly. I have instructed the Director of Transport to afford aid to the railway officers with all the carriage that can be made available from the transport train. The two companies of Bombay Sappers which the Bombay Government despatched in October last (at the request of the Government of India) to help Colonel Lindsay's operations, have arrived at Mithri under Colonel Hills, R.E., and are there awaiting orders. I have directed them to proceed to such point or points on the Sibi route as Colonel Lindsay may settle in communication with Colonel Hills. As the route is not yet altogether safe for isolated surveying parties, the presence of sappers, who are effective combatants as well as workmen, will have a good effect.

47. * * * * *

48. This arrangement, is of course independent of any arrangements which may have been, or may yet be, made in the interior of the Murri country for controlling that tribe, or other neighbouring tribes, to which I need not here advert.

49. In conclusion, it will have been seen that we contemplate Gulistan Kariz being the obligatory place for which the railway is to make. This place is at the foot of the Gwaja Pass by which we hope to see the rail carried onward to Candahar. The old Gwaja Pass, as we all see, runs during a part of its course through a granitic formation quite impracticable for a railway. But parallel to the Gwaja Pass, and answering all its purposes, is the Durra Pass to which my attention was drawn by Colonel deBourbel, and which I have visited in company with Lieutenant Whiteford, R.E. There seems to be no doubt that the Durra Pass is very well suited for a railway in respect to gradients and curves and will answer very well, if no pass still better shall be found. It is scarcely to be hoped that a better passage will be found, as the main pass, the Khojuk, is, as we all see, manifestly inferior, and as the remaining pass, the Roghani, is believed to be worse still. I merely mention this to explain why

we indicate Gulistan Kariz as the point to which the survey is directed for the railway from the Indus Valley to Southern Afghanistan.

* * * * *

RICHARD TEMPLE.

NOTE ON THE BOLAN PASS ROUTE.

Director General of Railways' letter No. 9C. of 4th October informs me that the Government of India has decided on laying metre gauge permanent way up the Upper Bolan Pass to Pishin at one side of a road which General Phayre has undertaken to construct, with limiting gradients of 1 in 20, and curves of 70 feet radius, and I am desired to make a reconnoissance of General Phayre's road and ascertain the probable ruling gradients and curves upon the different sections of it.

2. I am not aware what information regarding General Phayre's road the Director General of Railways is in possession of, and as I cannot feel certain regarding the improvements contemplated, I am somewhat at a loss to know whether it is in the curves and gradients of the present road or on those of an improved section that I am to report. I consider therefore that I had better describe, very briefly, the road as it now is.

3. From the mouth of the Pass near Dadur to Kundilani a track has been cleared of stones and boulders along the bed of the river, but above the ordinary low water stream. The track crosses the present channel frequently and is 5 feet above it on an average; the high flood level is probably 10 feet above the present water level. Except where slight descents are made at the river crossings the gradients are easy and so are the curves, with two exceptions. Kundilani is 9 miles from Dadur.

4. From Kundilani to Kirta the track is of a similar description, but for three miles the limiting curves would apparently be necessary: it frequently crosses the low water channel, and the ramps into it have inclinations of about 1 in 15. The gorge is subject to floods of about 25 feet of water above the present channel and is flooded on those occasions from one side where the rocks are perpendicular to similar vertical rocks on the other. The distance from Kundilani to the Kirta plain is 8 miles. After emerging from the Kundilani ravine on to the Kirta plain the line of the present route is approximately straight, and, excepting where it crosses some old channels of the Bolan river, it has a gradual and easy ascent without any break of importance to New Bibinani, near which it however descends considerably. From Bibinani past Abigum to the left bank of the Bolan near Much the track ascends considerably and crosses the beds of two deep nullahs. All along this length the track is only subject to occasional floods of two or three feet in depth: the watercourses of course have a considerable depth of water.

5. From the left bank of the Bolan the road descends to the river bed, a depth of about 200 feet; a causeway, at present damaged, slants across the river, and a slight ascent brings the road to the high ground on the right bank where the camp of Much is formed.

6. From Much the road immediately descends again to the level of the river bed, crosses it, and ascends again with gradients of 1 in 6 and 1 in 10 to the Hirok plateau on the left bank of the Bolan river. Here again for about 3 miles the route is easy with a gradually ascending gradient, and the road is free from all but trifling floods: the direction is nearly straight. After the third mile from Much the road crosses the beds of two deep nullahs, the descents being steep and tortuous, and for the rest of the way to the summit of the Bolan Pass the road is of the same description: it crosses the bed of the stream constantly, the ramps down having slopes of about 1 in 15. The intermediate lengths, between the crossings, are free from unimportant floods, are straight in direction, average about 5 feet above the river bed, and have ascending gradients of about 1 in 20. Near Dozan a particularly tortuous rocky gorge is met with; it is about 2 miles long, is extremely narrow and has vertical cliffs from 200 feet to 300 feet high on either side. The route is subject to occasional floods, which are variously estimated at from 10 feet to 25 feet above the ordinary channel. From the summit of the Pass the descent is sharp for 200 or 300 feet; then the Dust plain is reached, and the route is open and easy

to Quetta. The total fall in a length of 24 miles from Darwaza Bungalow to Quetta is 300 feet exactly as ascertained trigonometrically.

7. My opinion is not asked for as to whether a railway can be brought up the Bolan Pass by General Phayre's road, or by any alternative route along the Pass, but I may perhaps be permitted to interpret the spirit of the instructions given to mean that, under the circumstances, my opinion is required.

8. From Dadur to Kundilani a line can be made on a raised embankment without excessive labour and above ordinary high floods with easy gradients and moderate curves. At, and for 4 miles beyond, Kundilani a survey can alone show whether curves suitable for a broad gauge line are obtainable. The line there would have easy gradients, but would be subject to floods of about 25 feet in depth. A line with curves of a minimum radius of 70 feet is, I believe, obtainable. It may be possible to avoid the Bolan gorge near Kundilani altogether by taking the line up the Kundilani or Poostul ravine and then turning up through the Gokoort valley. An examination of this bit of country will occupy very little time. If the Kundilani gorge can be turned, which is uncertain, I apprehend little difficulty in bringing a railway of either gauge to Much with a maximum gradient of 1 in 40. The line would leave the present track, avoid the descent to New Bibinani, and keeping to the east of the Kirta valley would gradually ascend the sloping ground to the left bank of the Bolan River at Much. At Much I think I may say that a broad guage line would have to terminate. From that point there seems to me to be no alternative between an enormously expensive permanent line and a purely temporary one with gradients of 1 in 20 and curves of 70 feet radius: this line would be subject to heavy floods, but they are of short duration, and their effects, though damaging and certainly risky, would not be utterly destructive. I am given to understand that floods do not occur here without ample warning, and that if proper arrangements are made for giving proper telegraphic notice of impending rainfall, the risk of a disaster is small.

9. If it be determined to construct a metre gauge railway I would recommend that the construction work should be as slight as possible: for instance, at Much, where it is necessary to cross the river twice, I would accept the maximum gradients and provide short sidings at the top of each ascent, so that trains could be divided and taken up wagon by wagon if necessary.

10. The Hirok plain should be taken advantage of, but after that I see no object in leaving the bed of the Bolan; the chance of occasional floods must be faced, and if the bed has constantly to be crossed, it may as well be adopted as the line. I do not mean that the bed of the river would be constantly kept to throughout, but that it would be kept to when its line was advantageous; assuming that no improvement on the Kundilani gorge can be found, a temporary line of railway up the Bolan Pass would present the following features:—

	Miles.	Gradients.	Curves.	Floods.
Dadur to Kundilani . .	10	Easy.	Easy.	Above.
Kundilani to Kirta Plain . .	8	Easy.	70 feet.	Below.
Kirta Plain to Much . .	30	1 in 40.	Easy.	Above.
Much to summit of Pass . .	22	1 in 20.	70 feet.	Below.
Summit to Quetta . .	30	Easy.	Easy.	Above.
	100			

11. Thus out of a total length of 100 miles (longer than the present road in order to ease the ascent), 65 miles may be said to be comparatively easy and to be free from extreme floods, and 26 miles with the maximum gradient and minimum curves are subject to complete inundation when great floods take place.

12. Regarding the floods I regret to say I can obtain no reliable information; we know that in 1839 a great flood took place in the Pass, and that a detachment of cavalry only escaped by riding at full speed to a place of safety, while all the followers were lost. Sirdar Alludina, who lives near the summit of the Pass, declares that no such heavy flood has since taken place. It must be allowed that floods of extraordinary might and violence do occur

from time to time, and that although no warning, save the sound of the approaching water, is given to travellers down the Pass, the gathering of clouds and rainfall in the high hills give time for information being given by observers on the summit to those stationed down below.

13. In the case of a temporary road or line of railway which it is allowed cannot be raised above flood level, I do not think that it matters much whether the floods are 10 or 20 feet above the road.

14. My observations in this Pass have been made simply during a march up to Quetta, as time did not admit of my halting or examining alternative routes: I went, however, in company with Lieutenant-Colonel deBourbel, R.E., who has had other opportunities of inspecting the route, and I am authorised to state that he agrees with me in all that I have written about it with the following exceptions:—Lieutenant-Colonel deBourbel is not hopeful about the possibility of taking a broad gauge line nearly up to Much, and he does not think that any precautions in the way of signalling the fact of rain falling in the upper hills would save a disaster in the lower gorges.

J. G. LINDSAY, *Lieut.-Col. R.E.,*
Engineer-in-Chief, Sukkur-Quetta State Railway.

POSSIBLE TIME WITHIN WHICH A RAILWAY COULD BE OPENED FOR MILITARY TRANSPORT AND FOR TRAFFIC FROM THE PLAINS OF CUTCHI TO THE PLATEAU OF PISHIN.

Minute by the Governor of Bombay, dated 10th December 1879.

Having had the advantage of conferring with the Director General of Railways (Major-General Trevor, R.E.) on the subject of my Minute of last month (November), recommending, in concurrence with Sir Robert Sandeman and Colonel Lindsay, the Sibi route for the new railway from the plains of Cutchi to the plateau of Pishin, I deem it desirable to state approximately, in continuation, the probable time within which this railway could be opened for at least the transport of troops and materials of war, in view of military and political exigencies now existing. As this statement must depend on the topographical details given in my former Minute, I must beg that it may be read in connection with that Minute.

2. In the first place the broad gauge surface line has advanced 67 miles from its starting point at Rukh near Sukkur, besides which length there have been 10 miles of sidings laid down—including formation of roadway and laying down of rails—and is now in the heart of the Cutchi Desert. It is about 55 miles from Mithri opposite the mouth of the Bolan, and about 69 miles from Sibi. At first, and for some time in the Indus Valley, its progress was at the rate of one mile a day. But now the rate of one mile and a half a day has been established. It was hoped that by the present time a rate of two miles daily would be established; but this has not been found practicable owing to the great difficulty of watering arrangements for so large an establishment (3,500 men and 1,500 animals) in the midst of the desert, many miles away from any natural water-supply. It is intended, however, to make some further arrangements calculated to accelerate the progress to two miles daily. If all goes well, the rails may reach the point opposite Mithri by the second week in January, and Sibi by the 20th of that month—say by the 25th, in order to allow a margin of a few days for contingencies. Thus the end of the broad gauge railway would be reached; as Sibi is opposite the mouth of the Nari gorge, where the hill country begins, and where, as I understand, the narrow (metre) gauge is to begin also.

3. I learn from General Trevor that we may hope to see the narrow gauge materials begin to arrive, from England by sea, at Kurrachee early in January, and to continue arriving there during January and February. If that hope be realized, then the first consignment of metre gauge rails would reach Sibi by the new railway on the 25th January. Then the rails might be carried on through the Nari gorge, in advance by carts; it being important that the carting arrangements should commence on or about that date for reasons which I must pause to explain—again asking that remembrance may be had of the topography set forth in my former Minute.

4. It will be remembered, then, that near the village of Dargai at the foot of the Chapar Hill, and the base of the Adina range, the railway line leaves the lower valleys of the Nari River system and enters on the upper plateau leading to Pishin—the distance, Sibi to Dargai by the proposed line, being about 85 or 90 miles—the exact distance being subject always to detailed survey. Intermediately the principal place is Hurnai. Below Hurnai one of the affluents of the Nari breaks through a wall of rock, by an opening or natural gateway of some interest and beauty, which we call Spin Tangi; the local name being Tangi (or narrow opening) and Spin being a village near at hand. This Spin Tangi is the place which the Engineers have (very properly as I think) chosen for the passage of the railway. Indeed no visitor can fail to be struck by the remarkable facilities (the nature of the surrounding country being considered) which the opening affords for this purpose. It constitutes also a sort of natural division in this part of the line (Sibi to Dargai), because the climate below Spin Tangi is very severe from heat in the spring and summer; while above Spin Tangi it becomes comparatively moderate; and because below Spin Tangi the spill and overflow of the Nari and its affluents are troublesome occasionally for short periods towards the end of summer; while there is no appreciable trouble of this sort above Spin Tangi. Below Spin Tangi, although no serious obstacle exists, much work will be required for the permanent line, while a temporary line could be constructed rapidly; above Spin Tangi the country to Dargai is comparatively easy and admits of a permanent line being taken in hand at once.

5. The first step will, of course, be to survey fully the line from Sibi to Spin Tangi; indeed, this is being done already by a strongly organized staff, and the plans and sections will be ready by an early date. But, though the surveys will be done, we cannot promise that much will be done for actual construction on this piece during this working season, that is, during the first half of 1880; because on this piece the work will be heavy while the heat sets in with severity during spring and lasts throughout summer. Something towards construction may be done, but nothing very considerable.

6. Under the circumstances, as regards both the season of the year and the character of the country, and with a view to political and military exigencies, I propose, after carefully consulting the Engineer-in-Chief, Colonel Lindsay, to begin on or about 25th January, say by the end of January, to send on the metre gauge materials (rails, sleepers and fastenings) by carts from Sibi to Spin Tangi. The road is not as yet passable for carts, but will be made so by the 25th January by means of the Sappers (of whom we have arranged to employ four companies) and some local labour. Supplies are procurable in the neighbourhood, and water is at all points procurable, while it is at most points abundantly excellent. Upon a precise calculation of the carrying power of the carts and bullocks, which we either possess or can obtain, I find that 45 miles length of metre gauge materials can be thus sent from Sibi to Spin Tangi in three months, that is during February, March and April next (1880), it being important to complete the carting work before the very hot weather sets in at Sibi; for this work fifteen hundred carts would be required. Of this number a portion would be available from the present transport cart service between Sind and Pishin—which service will be to some extent relieved by the opening of the railway to the point opposite Mithri—the remaining carts required would be easily collected, and the business would be entrusted to the organized Military Transport Department which we already have. Thus by the beginning of the hot season of 1880 the railway materials for the piece between Spin Tangi and Dargai would be stored at Spin Tangi.

7. Meanwhile the Engineers would have surveyed and aligned the permanent railway line just above Spin Tangi onwards to Hurnai, and beyond that again as far as might be practicable towards Dargai. Then it is hoped that the formation of the roadway, which is not difficult in that quarter, and the laying down of the rails, which it will be remembered are to have been stored at Spin Tangi, may go on during the summer, the climate thereabouts being comparatively moderate, or less severe,—the Sapper force being available and some local labour being obtainable—supplies being procurable in sufficient quantities and the water being both excellent and abundant. If all goes well, the line will

be made and the rails laid down from Spin Tangi to Dargai during next summer (1880) for the most part permanently and for the remainder temporarily, that is, with temporay diversions near unfinished bridges and the like, or say by September of next year.

8. Meanwhile, again, that is, during the cold season at the beginning of 1880, say during the months of January, February and March, the Engineers will have surveyed and planned the line between Sibi and Spin Tangi, completing that operation before the setting in of the hot season, so that this piece may be ready for actual works when the weather begins to moderate in October. During the working season of 1880-81, that is, by April 1881, this piece would be opened for traffic, partly by permanent line and partly by temporary line. Thus the engines would begin to work from Sibi to Dargai by April 1881.

9. Meanwhile, again, another important work would, according to my proposals, have been going on, which I must pause to explain. The reserve brigade (consisting of Bombay troops) might be moved from their present position in the Bolan Pass, where they have done so excellently well in military road-making, under the able and experienced guidance of General Phayre, to the south-eastern end of the Pishin plateau, where the railway is to go, that is, to Gwal, which was indicated in my former Minute as one of the obligatory points to which the railway is to be directed. These experienced troops would then be occupied in preparing the roadway for the rails, according to any alignment which the Engineers might give, from Gwal downwards to the Chapar Hill immediately over Dargai above mentioned, a distance of about 30 miles, together with an ordinary cart-road alongside the railway line for the service of the railway works. All this would not be a difficult task for a brigade which made a military road up the Bolan Pass in three months. The climate of Gwal is quite temperate in the summer and very moderate between Gwal and Chapar; very suitable for the head-quarters of a brigade, water being excellent and supplies available; so that men could work there during the summer season. If then the railway staff shall have been strong enough to survey and align the roadway for the rails from Gwal to Chapar during 1880, and if General Phayre and his brigade shall have been stationed there to make it, then, on the opening of the line from Sibi to Dargai early in 1881, the laying of the rails onwards from Dargai by Chapar to Gwal might immediately proceed, and might be completed to Gwal by May of that year.

10. It is of course to be remembered that at the base of the Chapar Hill there is the difficult passage of the railway through the Chapar Rift, described in my former Minute, or the alternative of winding round the side of the Adina Mountain. The permanent construction of the line hereabouts will take some time, but a temporary line could be soon made to connect the work below Dargai with the work above Chapar. At this point, as well as at the Spin Tangi point, the assistance of the Sappers already alluded to will be most valuable.

11. By this combination of resources, and by this utilization of all opportunities afforded by time and circumstance, the railway engine would arrive at Gwal in Pishin by May 1881 by a line permanently aligned though constructed permanently in part only, the remainder being a temporary construction indeed, but in fair way of being rendered permanent within the ensuing twelve months. The railway would reach Dargai at the base of the Pishin plateau within 30 or 35 miles by a somewhat earlier date, that is, January 1881. In other words, by January or February 1881 the engine would reach Dargai, within 35 miles of the eastern end of Pishin plateau, with a military transport road (as above described) up to the plateau; and by May of that year would be at Gwal in Pishin. In either case the political and military advantages would be great, and would have been attained with some degree of rapidity.

12. If the railway having thus reached the border of Pishin were to stop there for a time, it would be quite easy to establish a base at Dargai or Gwal, preferably Gwal, by the cart-road already mentioned, whence the military transport train of carts, camels, mules, &c., could move onwards to Candahar or any intermediate places. Such a transport train line would pass within an easy distance too of Quetta.

13. But having got the line to Gwal in Pishin we ought certainly to carry it one step further, namely, along the easy bank of the Kakar Lora river (as explained in my former Minute) to Kachlak near Quetta, a distance of about 30 miles: Kachlak is within a short distance of Quetta, only one day's march, by a line easily admitting of a short branch railway being made to Quetta if desired hereafter. Again, Kachlak is on the high road either to Gulistan Kariz at the foot of the Gwaja Pass, or to Kila Abdoolah at the foot of the Khojuk Pass, which are of course the two main Passes over the Khwaja Amran range of hills on the way to Candahar. The piece of railway from Gwal to Kachlak could be opened in about two months after the opening of the line to Gwal.

14. It is to be borne in mind that the line thus proposed to be opened to the Pishin plateau by the middle of 1881 would be constructed beyond the reach of floods, or spills, for the greater part of its length, that is, from Spin Tangi to Gwal, about 70 miles. But for the remainder from Sibi to Spin Tangi, 40 miles, also for the short piece at the base of the Chapar Hill, say a very few miles, it would be in some places within the reach of floods and spills, and would be liable to interruption for a day or two occasionally towards the end of summer. But, as already explained, the railway being on a line suited for permanent construction, these periodical interruptions would be apprehended only so long as the permanent work might remain incomplete, that is, for a year or two.

15. I am authorized to say that Colonel Lindsay entirely concurs in this Minute, subject always to detailed surveys.

16. I offer this general programme of operations (in view of military and political exigencies) which will be carried out if all goes well; and if the materials arrive from England in due time. I duly remember that delays or disappointments may supervene. Still the Government may rely on every effort being put forth, by myself and by all concerned, to perform what is required.

RICHARD TEMPLE.

Telegram, dated 18th December 1879.

From—Calcutta,	*To—Bombay.*
From—Works,	*To—Governor.*

It has been decided, after consideration of Your Excellency's Minutes, to adopt the route by Sibi, Hurnai and Gwal for the railway to Candahar. Steps can be taken to proceed with the works in accordance with Your Excellency's proposals, dated the 10th instant.

Orders in regard to the disposition of the troops required for the protection of the people engaged on the works will be issued from the Military Department.

Telegram, dated 15th January 1880.

From—Malabar Point,	*To—Calcutta.*
From—Governor,	*To—General Fraser.*

Construction of railway to Sibi was as follows: 133½ miles in 101 days.

GOVERNMENT OF INDIA.

HOME, REVENUE AND AGRICULTURAL DEPARTMENT.

PROPOSALS FOR A BILL FOR REGISTERING PARTNERSHIPS.

No. 2583, dated Fort William, the 13th October 1874.
From—A. C. LYALL, Esq., Secretary to the Govt. of India, HOME DEPT.,
To—The Secretary to the Government of Bombay.

I am directed to acknowledge the receipt of your letter No. 4081, dated 17th July, submitting copy of a communication from the Bombay Chamber of Commerce, in which they request a reconsideration of the decision of the Government of India that it is at present undesirable to pass a law making the registration of partnerships compulsory.

2. The practical impediments in the way of giving effect to the measure, which were pointed out by the Government of India in my letter No. 2962, dated 15th September 1873, were two in number, *viz.*, (1) the interference with trade which would be caused on the one hand by compelling registration of every species of partnership however transitory and restricted; and, on the other, the difficulty of distinguishing between partnerships of greater or less extent or duration; (2) the existence of a vast mass of unregistered interests which the law must either recognize, and thereby render the register very imperfect if not misleading, or refuse to recognize, to the great hardship of the persons so interested. It was also observed that, looking to the two grounds upon which the Chamber of Commerce specifically based their application, the facts described pointed rather to incaution on the part of the creditor than to defects in the existing law.

3. The letter now communicated from the Chamber of Commerce does not remove the objections felt by the Government of India. As regards the first impediment, the Chamber of Commerce now explain that they never contemplated the registration of partnerships for special ventures, but only the registration of "regular standing firms." They do not point out what legal distinction can be taken between partnerships varying only in the extent and duration of their business. But their opinion is understood to be that no difficulty need be apprehended in distinguishing between partnerships, so as to exempt from the operation of the compulsory law of registry trading ventures of the kind illustrated by my former letter.

4. His Excellency the Governor General desires me to reply that the opinion on such a subject of the Chamber of Commerce will always command due consideration; but that, after giving careful attention to the case again presented, he is convinced that such a distinction is not founded on any principle of law, and that an attempt to create it will only lead to embarrassment.

5. Moreover, assuming for the sake of argument that the distinction is practicable, it would then become necessary to consider whether the exemption of partnerships for special ventures from any established system of compulsory registration ought to be made. It might be argued that this is precisely the class of partnerships for which compulsory registration, if useful at all, would act most beneficially. A permanently established firm is before the community, it announces itself as a trading partnership, its dealings and style of business become known, and it is open to all to make the usual precautionary enquiries alluded to in the 5th paragraph of my preceding letter; but with temporary partnerships, such as those with which the Chamber declare they would not interfere, the case is different. These spring up suddenly; the parties to them are not necessarily even known in business circles; there is no knowledge how long they are meant to last, and yet, for the purposes of the particular transaction or set of transactions for which they are formed, their legal properties and incidents are precisely the same as those of other partnerships. Now, if legislation is to be called in to aid merchants and traders in deciding to whom they will or will not give credit, it seems hardly reasonable to lay this obligation upon permanently established firms and to exempt that class of partnerships regarding which information through the ordinary channels would probably be more difficult to obtain, and therefore compulsory information all the more valuable.

6. If then registration is to be compulsory for any partnerships other than Joint Stock Companies, which stand on a totally distinct legal footing, it must, in the opinion of the Government of India, be compulsory for all. But this has been before objected to as a serious interference with the ordinary transactions of trade—an objection from which it would seem that the Chamber of Commerce is not prepared to dissent.

7. The second practical impediment relates to unregistered interests, and presents itself everywhere, but with peculiar force in India because of the system of undivided families. It is to be observed, in the first place, that the Chamber of Commerce have not formed an opinion on the question whether or no all members of a family should be registered. They only say that it is not impossible so to register them. It appears, however, to the Government of India that, though to do so may not be impossible, it would be attended, first, with the necessity of observing a number of forms that would be found very vexatious, and, secondly, with a risk or rather certainty of errors and omissions which would produce much litigation and hardship.

8. If, however, the whole are not registered, the Chamber appear to contemplate a mode of registry by which some person shall be taken as representing and binding the whole family. But before members of families can be bound by entries in registers not made by themselves, very carefully considered provisions would be required, lest the action of a representative, or of one who claims to be such, should have the effect of depriving of their rights, or of burdening with liabilities, persons who might know nothing about the matter. It is clear that in order to obtain a registration of partnerships the Chamber of Commerce now suggest a substantial modification of the law respecting undivided Hindoo families which they can hardly have contemplated when they made their original proposal. On such an alteration the Government of India is not prepared to embark. It would require to be considered on its own merits and would require careful and extensive enquiry.

9. As regards the mischief arising from defects in the existing law, I am to observe that my letter of the 15th September 1873 dealt with the specific representations of evils needing remedy, upon which the Chamber's letter of the 28th February 1867 was founded. It does not appear that anything has been added, under this head, to what was specified in 1867. The Chamber of Commerce indeed affirm again that neither precaution nor care avails to protect persons from imposition and loss in dealing with Native firms. But even if the great practical impediments in the way of compulsory registration could be removed or avoided, the Government of India, before passing a law involving such widespread interests as the measure proposed, would still require more definite information as to the nature of the mischief to be cured, and as to the probable working, from every point of view, and upon commercial interests generally, of the remedy proposed. The Government would need to learn in detail such particulars, as, for instance, what are the frauds in question from which commerce especially suffers, how they are effected, how far they are favoured by the absence of registries, and in what way the establishment of a registry would prevent them. And, with advertence to the precedent which the Chamber draw from the fact that registration of firms is required by the law of some European States, I am to remark, first, that no arguments drawn from European practice would apply to the system of conducting business which is described in the 8th paragraph of the Chamber's letter; and, secondly, that the practice in question does not prevail in England, whose institutions have not been found unfavourable to commercial enterprise and success.

10. His Excellency the Governor General in Council observes that the Government of Bombay, in forwarding the two last letters received from the Chamber of Commerce, have not gone beyond a general opinion that a measure of the character suggested would be advantageous. On the whole, therefore, the Government of India adhere to the reply conveyed by the last paragraph of my letter of 15th September 1873, namely, that they are not prepared to support any system of compulsory registration until the want of it has been shown to be causing mischief to people of ordinary prudence, and until a system shall have been devised which will not embarrass ordinary commercial business, or interfere with ordinary family arrangements.

No. 5376, dated Bombay Castle, the 6th September 1879.

From—J. NUGENT, Esq., Acting Secretary to the Govt. of Bombay, Judicial Dept.,

To—The Officiating Secretary to the Government of India.

I am directed to forward herewith, for submission to the Government of India, copy of a letter, with its accompaniments, dated the 22nd ultimo, from the Chairman and Secretary of the Bombay Chamber of Commerce, addressed to this Government on the subject of a proposed legislative enactment having in view the compulsory registration of partnerships.

2. The facts mentioned and arguments adduced by the Chamber of Commerce clearly establish, in the opinion of this Government, the necessity for the adoption of measures in the direction indicated. The subject is one of the greatest importance to the merchants and bankers of Bombay, Native as well as European, affecting as it does the existence of credit itself and consequently the very basis on which trade rests. Not only are the European banking and mercantile firms fully impressed with the necessity for the legislation suggested, but the leading Native merchants of Bombay are also strongly in favour of the passing of a law which shall render compulsory the registrations of partnerships as will be perceived from the letter addressed to the Secretary to the Chamber of Commerce, signed by 32 of the principal Native gentlemen engaged in trade in Bombay, the majority of the signataries being Hindus, members of the Bania and Bhattia castes.

3. His Excellency the Governor in Council, I am desired to state, concurs in the views expressed by the Chamber of Commerce. He considers legislation of the nature proposed to be highly desirable, and in fact essential to the welfare of the entire mercantile community of Bombay, and he would most earnestly solicit the favourable consideration of the Government of India to the request preferred by the Chamber of Commerce.

Dated Bombay, the 22nd August 1879.

From—M. MOWATT, Esq., Chairman, and JOHN GORDON, Esq., Secretary to the Bombay Chamber of Commerce.

To—The Secretary to the Government of Bombay, Judicial Department.

I am directed by the Committee of the Chamber of Commerce to forward herewith, for the information of His Excellency the Governor in Council, two memorials addressed to the Chamber—one annexure marked A, by the European bankers and merchants in Bombay, and the other, annexure marked B, by the principal Native bankers and merchants, suggesting the desirability of again bringing before Government the necessity which exists for a legislative enactment for the compulsory registration of partnerships.

An application for such an enactment was made to Government on the 28th of February 1867. The proposals then made by the Chamber were supported by the Government of Bombay, and by the Chambers of Commerce of Bengal and Madras; and His Excellency the Governor General in Council, in his reply dated Simla, 31st July 1867, remarked that, from the arguments adduced and the state of things disclosed in the Chamber's representation, a measure requiring the registration of partnerships might then be introduced into the Council with a reasonable prospect of its ultimate adoption, provided it were confined to purely commercial partnerships, and if its operation were limited, at all events, in the first instance, to the Presidency towns.

Nothing further, however, was heard on the subject until the 15th of September 1873, when, in answer to the repeated inquiries of the Chamber the Government of India announced that they had arrived at the conclusion that it was not advisable to undertake at that time any legislation in this direction, nor to support any system of compulsory registration until the want of it was shown to be causing mischief to people of ordinary prudence, and until a system should have been devised which would not embarrass ordinary commercial business, or interfere with ordinary family arrangements. To this communication the Chamber replied in a letter addressed to the Secretary to Government, Judicial Department, on the 30th June 1874, in which the Chamber entered fully into the objections urged by the Government of India; but the Government of India, in their letter dated 13th October 1874, maintained their objections to the measure, and no further steps have since been taken.

In the representation made by the Chamber in 1867 it was stated, among the reasons for the measure, that the numerous insolvencies of Native firms which had taken place in Bombay within the previous ten months had revealed a very scandalous state of things in respect to the manner in which Native copartneries were commonly carried on. It had been proved, when investigating the facts connected with some of the insolvencies under Act XXVIII of 1865, that Native merchants had been carrying on business under several different names, and had thus obtained credit and advances from English merchants and bankers which would never have been accorded to them had the actual state of affairs regarding the constitution of those Native firms been known. Cases were known to the Chamber where men had regularly bought and sold for Native firms, signed the names of the firms, and were always supposed to be members of the firms; yet, when insolvency afterwards ensued, they denied that they were partners, and were thus enabled to get rid of their liability because it was almost impossible to prove their statements to be untrue.

The object of a compulsory registration of partnerships, as advocated by the Chamber, was to reduce the risk attendant on the transaction of business on the part of European houses with Native firms, by placing it within the power of such houses to find out the individuals with whom they were actually trading, and to ascertain exactly whom they could hold responsible in any transaction, and to afford a ready mode of proving who were the parties responsible. The Chamber was of opinion that all that would be necessary or desirable in a compulsory registration of partnerships would be the names, ages, and residences of the persons composing the firm, and the style of the firm, and place or places of business. But, as a very large amount of the business of Native firms was carried on in Bombay by moonims or mehtas authorized to sign the firm, the Chamber recommended, in addition to the registration of partners, the registration of the names, ages, and residences of all persons authorized, by power of attorney or otherwise, to sign the names of firms. Further details of the measure then proposed will be found in the Chamber's letter addressed to the Secretary to Government in the Judicial Department on the 25th of January 1868.

The Chamber in again asking that a law similar to the one which it applied for in 1867 be passed, desires to avail itself of the opportunity of answering the objections taken to the measure by the Government of India in their last communications on the subject.

The Government of India, in their letters to the Government of Bombay of the 15th September 1873 and 13th October 1874, consider that there are two practical impediments in the way of giving effect to the measure, *viz.*, (1) the interference with trade which would be caused on the one hand by compelling registration of every species of partnership, however transitory and restricted, and a supposed case of two or three persons combining to send a cargo of merchandise from Bombay to Bushire and to bring it back was adduced to show that it would not be desirable that they should be obliged to register themselves or else be liable to legal disabilities; and, on the other hand, the difficulty of distinguishing between partnerships of greater or less extent or duration; (2) the existence of a vast mass of unregistered interests which the law must either recognize, and thereby render the register very imperfect, if not misleading, or refuse to recognize, to the great hardship of the persons so interested.

With regard to the first of these impediments, the Chamber respectfully submits that private partnerships formed for special ventures should be exempted from the operation of the compulsory law of registry, but that all other partnerships of greater extent or duration should be registered. The Chamber has already in its letter of 30th June 1874 expressed its opinion that no difficulty need be apprehended on the point whether the partnership is one which may continue only at the will of the parties, or whether it is one for a fixed term of years according to agreement between them: in either case there is a partnership, and all that is asked for is that there should be a registration of the partners while the partnership lasts, and an announcement noted in the books of the Registrar of any change, when changes are made, or when the partnership is dissolved. The principle on which this distinction is founded is that, while in a single venture

the interest and credit of the party or parties might be ascertained, bankers and merchants are unable without the aid of legislation to protect themselves against the fraudulent representations of persons who, in conducting the business of Native firms, admit that they are partners, and act as such, but who, when insolvency ensues, deny that they are partners. His Excellency the Governor General in Council says that he understands that if the person dealt with is an ostensible partner, or has so dealt with others that credit has been reasonably given to him, he is liable. But his liability can in many cases only be established by means of a costly and uncertain suit, rendered still more tedious and vexatious by the enormous difficulty of procuring proof in all such cases. If there existed a law compelling registration of partnerships, litigation would seldom be necessary. The Chamber is wholly at a loss to conceive how the introduction of such a law would lead to embarrassment: on the contrary, it is convinced that it would result in great moral good, and in the removal of many of the difficulties and losses which bankers and merchants now suffer, not from incaution, but from fraud and misrepresentation.

With regard to the second practical impediment relating to unregistered interests, the Government of India state that, though it may not be impossible to register all the members of an undivided Hindu family, it would be attended, first, with the necessity of observing a number of forms that would be found very vexatious, and, secondly, with a risk, or rather certainty, of errors and omissions which would produce much litigation and hardship. They then proceed to remark—"If, however, the whole are not registered, the Chamber appear to contemplate a mode of registry by which some person shall be taken as representing and binding the whole family. But, before members of families can be bound by entries in registers not made by themselves, very carefully considered provisions would be required, lest the action of a representative, or of one who claims to be such, should have the effect of depriving of their rights, or of burdening with liabilities, persons who might know nothing about the matter. It is clear that, in order to obtain a registration of partnerships, the Chamber of Commerce now suggest a substantial modification of the law respecting undivided Hindu families, which they can hardly have contemplated when they made their original proposal."

The Chamber, I am desired to say, had not overlooked the difficulties to which compulsory registration in the case of an undivided Hindu family might give rise, but it stated that such difficulties did not appear to be insuperable. "For the registration of all the members of a Hindu family," the Chamber added, "would not be impossible; or a system might be applied to them similar to that of limited liability companies, which are always represented by an individual who is authorized in a valid manner to act; and he should be bound to file a list of the names and interests of all those for whom he is acting, when registering his own name as managing member of the family, and its representative in the firm. Hindu families might, moreover, be dealt with as 'commanditaires,' in which case the undivided property would only be liable, or only liable to a certain extent. By adopting these measures anything in the shape of confusion or hardship would be avoided; and, as the various members of undivided Hindu families are all benefited by the profits of the business conducted by their representative, it is only fair and reasonable that they should be liable for losses when these are incurred, and not allowed, as is now the case, to escape payment of just debts simply because no documentary evidence of any kind is in existence to prove the liability of the whole family." The Chamber, however, has referred this question to its legal advisers, Messrs. Craigie, Lynch, and Owen, more particularly with reference to the objection of the Government of India that the proposal would have the effect of causing a substantial modification of the law respecting Hindu families. Messrs. Craigie, Lynch, and Owen state that they cannot see that the objection has any real foundation; inasmuch as they cannot imagine a case in which the law respecting undivided Hindu families would of necessity become seriously modified or altered in any important respect by reason of the proposed legislation. A copy of Messrs. Craigie, Lynch, and Owen's opinion, marked C, is appended hereto, to which the attention of Government is respectfully requested; and, with reference to their remarks under the fourth example given by them, namely, the case of an

individual member of an undivided Hindu family, carrying on business professedly on account of the family, but really on his own account, I am directed to say that the Chamber approves of their suggestion that registration should be merely *primâ facie* proof that the persons registered have a share or interest in the business.

The Government of India, moreover, observe that, looking to the two grounds upon which the Chamber specifically based its application in 1867, the facts described pointed rather to incaution on the part of the creditor than to defects in the existing law. The evils then represented remain in equal force at the present day, but the ground upon which the Chamber desires more particularly to base its present application are the frauds perpetrated by persons conducting the business of Native firms, who sign the names of the firms and admit, as it suits them, that they are partners, who are generally supposed to be partners, but who, when disasters afterwards arise, deny their partnership. The Government of India, however, continued that even if the great practical impediments in the way of compulsory registration could be removed or avoided, they would, before passing such a law, need to learn in detail what were the frauds in question from which commerce especially suffered, how they were effected, how far they were favoured by the absence of registries, and in what way the establishment of a registry would prevent them. The Chamber has accordingly the honour to submit the following cases which illustrate the necessity for such a law being passed:—

1. At the Criminal Sessions of the High Court of Bombay, held 12th July 1876, Lulloobhoy Gopal Dass, Vullubbhoy Gopal Dass, Manocklall Gopaldass and Nanabhoy Cursondass were charged as follows: Lulloobhoy with having on the 5th, 6th and 24th April 1875 intentionally given false evidence in a judicial proceeding—*viz.*, suit 141 of 1875, by stating, under a solemn affirmation when legally bound to state the truth, that he never carried on business in partnership with Vullubbhoy Gopaldass, and that, before any transaction was made under a certain partnership agreement dated 20th February 1871 with Bhanjee Ludha, the arrangement for partnership ceased to be acted on a few days after execution, and Bhanjee Ludha was informed of the same, knowing and having reason to believe such statement to be false; and the other prisoners were charged with abetting the said Lulloobhoy Gopaldass to give false evidence by entering into a conspiracy to represent, in certain legal proceedings taken against Vullubbhoy Gopaldass, that they were not in partnership with Vullubbhoy Gopaldass in the business carried on under his name.

After a trial which lasted four days, all the four prisoners were convicted by the jury, and respectively sentenced to two years' rigorous imprisonment.

2. At the Criminal Sessions of the High Court of Bombay, held 30th November 1878, Motichund Phoolchund was charged with giving false evidence in a case heard before Mr. Justice Bayley on the 1st September last, in having falsely stated on solemn affirmation that he was not a partner of Leera Phoolchund in the firm of Poput Leera, but was only a goomosta in the employ of the firm.

Mr. Starling briefly stated the facts of the case to be these. A suit having been filed against prisoner and another in the High Court, he denied in his written statement, and also in the witness-box, that he was a partner in the firm of Poput Leera. In 1875, the firm of Dyabhoy Dosabhoy had dealings with the prisoner's firm known by the name of Leera Phoolchund; and in respect of those dealings the former firm had a guarantee from a third party. After some time prisoner got an account opened in the name of Poput Leera, representing that he and his brother were the partners in it. Leera was never in Bombay, and the prisoner managed all the transactions of the firm, always giving himself out as a partner. After some time prisoner's firm became indebted to the other firm to the amount of Rs. 24,000; the prisoner was about

to leave the jurisdiction; and the prosecutor, a partner in the firm of Dyabhoy Dosabhoy, filed a suit against him, which was heard before Mr. Justice Bayley. Prisoner was arrested on a warrant before judgment; and he denied that he was a partner in the firm of Poput Leera. In his written statement and in his evidence he denied that he was a partner. The judge disbelieved him and gave a judgment against him, at the same time giving sanction that he should be prosecuted for false swearing.

The sanction given by Mr. Justice Bayley was put in.

At the close of the trial the jury found the prisoner guilty, and he was sentenced to be imprisoned for six months.

3. Nagurdass Permanundass failed in 1874. Vizboocundass Nagurdass, an active member in the conduct of the business here, denied his partnership. Luckmidass Khimjee filed a suit, No. 161 of 1876, in the High Court of Judicature at Bombay, and Vizboocundass was held to be a partner.

4. In one of the leading Banks, a Native constituent who had, with his own hand, signed the name of his firm to a deed involving a considerable sum of money, afterwards, in the Board room of the Bank, attempted, when it suited his purpose, to evade his liability as a partner by denying that he was one. He has recently admitted in the Police Court that he is a partner.

5. Gungaram Hurruckchund failed in 1878. A European house who did business with them was assured that the insolvent's firm consisted of four wealthy partners. At the time of the failure the European house only found one to acknowledge the debts due by the firm, and the wealthiest member of all was said to have retired some years ago.

These cases fairly illustrate the kind of frauds from which the commerce of this city suffers, and which the establishment of a registry would, the Chamber believes, in a great measure prevent. Other cases might be taken from the Law Reports and many others from the numerous instances of similar frauds which are never prosecuted, the merchant preferring to submit to the first loss rather than to engage in expensive and tedious litigation. The Chamber, however, hopes that the cases adduced are sufficient to prove that persons of ordinary prudence can have no protection from the fraudulent character of the transactions which these cases disclose. Had there been a compulsory Registration Act many of the frauds which have been perpetrated would have been impracticable. The Chamber considers that it would be quite feasible to frame an enactment which would be of great value and assistance to those engaged in mercantile business, and would nevertheless leave the law as it at present exists respecting undivided Hindu families practically unaltered; and, in renewing its application for such an enactment, I am directed to suggest that, if it should be found undesirable to extend the operation of the Act to the whole of India, it might, as a tentative measure, be confined to the Presidency of Bombay. It is deeply impressed with the necessity of some measure of the kind being introduced for the protection of the mercantile community, and it desires respectfully to express its hope that His Excellency the Governor in Council will take it into his early consideration, and press it upon the attention of the Government of India with a view to legislation at an early date. Should the Government of India, however, still decline to undertake any legislation in this direction, the Chamber hopes that His Excellency will be pleased to favour the Chamber by asking the Government of India to state their objections in specific, instead of in general, terms.

A

Dated Bombay, the 19th June 1879.

To—JOHN GORDON, Esq., Secretary, Chamber of Commerce, Bombay.

The numerous failures which have of late taken place, particularly amongst Native traders, suggest the desirability of again bringing before Government

the necessity which exists for a legislative enactment for the enforcement of a registration of partnerships. We are quite aware that the Chamber some years ago brought this important matter to the notice of Government, and also forwarded a petition from several of the leading Native merchants and bankers praying for the registration of deeds of trust or gifts in addition to the registration of partnerships. We now beg that you will be good enough to bring this matter to the notice of the Committee, and ask them to be pleased to move Government again on the subject. In making the fresh appeal, the registration of partnerships alone might be asked for, and if it should be found undesirable to extend the operations of an Act to the whole of India, a trial might in the first instance be confined to the Bombay Presidency. The arguments advanced by the Government of India against the Bill are, in our opinion, susceptible of a satisfactory reply, and we would ask the Committee of the Chamber to be good enough to undertake this duty. We have no desire that parties entering into a partnership for a single venture should be compelled to register; and in cases where an undivided Hindu family have an interest in a firm it would be quite sufficient to give the name of the family.

We are, Sir,

Your most obedient Servants,

For BANK OF BOMBAY,
M. BALFOUR,
Secretary and Treasurer.

RITCHIE, STEUART & Co.

For THE CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA,
H. W. JONES,
Agent, Bombay.

For THE ORIENTAL BANK CORPORATION,
R. D. CAIRNS,
For Agent, Bombay.

For THE COMPTOIR D'ESCOMPTE DE PARIS,

W. A. BAKER,
Manager.

For THE AGRA BANK,
W. S. D. BLACKHALL.
AND 41 OTHERS.

B

Dated Bombay, the 30th June 1879.

To—J. GORDON, Esq., Secretary to the Chamber of Commerce, Bombay.

We have heard with much pleasure that the bankers and principal European merchants of Bombay addressed to you last week a letter on the subject of the desirability of a legislative measure for the compulsory registration of partnerships, and this fact gives us the opportunity of recalling to the attention of the members of your Chamber the representation made to them by many of us in February 1867 on the same subject.

We think that, after the circumstance of the recent failures among Native dealers, the time has come for bringing again to the notice of Government the undoubted necessity which exists of a legislative enactment for the compulsory registration of partnerships. If Government is indisposed to pass an Act with this object for the whole of India, or the whole of this Presidency, the boon

can be granted at first to the city of Bombay alone, as a trial. The effects of it, we have no doubt, will be beneficial to trade and to commercial morality.

We have the honour to be,

Dear Sir,

Your most obedient Servants,

VURJEEVUNDASS MADOWDASS.
DINSHAW MANOCKJEE PETIT.
CURRUMCHUND PREMCHUND, by
PREMCHUND LULLOOBHOY.
AND 29 OTHERS.

C

Dated Bombay, the 30th July 1879.

To—JOHN GORDON, Esq., Secretary to the Chamber of Commerce, Bombay.

With reference to your interview with us on the 24th instant, on the subject of the registration of partnerships, when you directed our attention to certain passages in the correspondence between the Government of India and the Chamber, we beg, as requested, to offer the following observations.

The Chamber, we understand, propose that every man trading in partnership with another or others should be compelled to register the names of all the partners in the concern. One of the principal objections of the Government of India to this proposal is that it would have the effect of causing "a substantial modification of the law respecting undivided Hindu families," and you wish us to state whether we can suggest any means by which this objection can be removed.

We cannot see that the objection has any real foundation; inasmuch as we cannot imagine a case in which the law respecting undivided Hindu families would of necessity become seriously modified or altered in any important respect by reason of the proposed legislation.

Take for example the four following cases:—

1.—An individual member of an undivided Hindu family carrying on business in his own name on his own account.

2.—An individual member of an undivided Hindu family carrying on business in his own name professedly on his own account, but really on account of the family.

3.—An individual member of an undivided Hindu family carrying on business both professedly and really on account of the family.

4.—An individual member of an undivided Hindu family carrying on business professedly on account of the family, but really on his own account.

In the first case the individual member of the family would, as the law stands at present, be alone responsible for the debts of his business, and only his share of the family property would be liable to satisfy his debts. We do not know whether under the proposed legislation it is intended that a man trading solely on his own account and in his own name should be compelled to register his name as the sole proprietor of the concern, but whether this be or be not intended, the law would, so far as the rights of the other members of his family are cencerned, be the same.

We assume either that no name at all is registered, or that the name of the individual is alone registered.

In the second case, as the law stands at present, all the members of the family, and the whole of the family property, would be liable to satisfy the debts of the business, and under the proposed legislation the law would so far be the same; but each member—or at any rate each adult member—of the family would, we presume, be liable to some penalty for having failed to register their names as partners, and further those members whose names were not registered would, we presume, under the proposed law be debarred from establishing their claim to any share in the profits of the concern. In this latter respect a change in the law respecting undivided Hindu families would no doubt be effected; but it cannot be described as a "substantial modification,"

nor can it, we should think, be considered an undesirable or inconvenient change. It would be impossible for any member of an undivided family to carry on business with the family property and on behalf of the family without the other members being aware of it; and if, being aware of it, they neglect to register their names as partners, they have only themselves to blame if they are debarred from sharing the profits.

In the third case the names of all parties would, we assume, be registered, and all the members of the family, and the whole of the family property, would, as at present, be liable to satisfy the debts of the business.

In the last case we also assume that the names of all the members of the family are registered as partners; and if the effect of such registration were to be that they thereby became in law partners, a very substantial modification of the law respecting undivided Hindu families would no doubt be effected. But we do not understand that the Chamber propose that registration should have this effect. If, however, we are wrong, and the Chamber do intend that such should be the effect of registration, we would suggest, as a modification of their views, that registration in the case mentioned should be merely *primâ facie* proof that the persons registered have a share or interest in the business. The onus of proof that they were not partners in the concern would thus be thrown on the persons whose names were registered, and to this extent also a modification, but not a substantial or important one, would be effected in the law as it stands at present, for if the persons whose names appeared on the register should prove that they were not partners, not only they, but their shares in the family property, would be discharged from all liability to satisfy the debts of the concern.

We have endeavoured to deal with the objection of the Government of India by suggesting hypothetical cases, but it is of course impossible to state every imaginable case, and it is also very difficult to meet satisfactorily an objection which is stated in such general terms as this one has been.

We think, however, that it would be quite feasible to frame an enactment which would be of great value and assistance to those engaged in mercantile business, and which would nevertheless leave the law as it at present exists respecting undivided Hindu families practically unaltered.

We return herewith the two volumes of reports of the Chamber.

We are, dear Sir,

Yours truly,

CRAIGIE, LYNCH AND OWEN.

Dated Madras, the 29th October 1879.

From—The Hon'ble P. MACFADYEN, Chairman, Chamber of Commerce, Madras,

To—The Secy. to the Government of India, LEGISLATIVE DEPARTMENT.

With reference to the Proceedings of the Madras Government, No. 2567, dated 4th October 1879, copy of which is annexed, I have the honour to forward herewith, for the consideration of the Government of India in the Legislative Department, a copy of this Chamber's letter, dated 17th September 1879, on the subject of the registration of native partnerships in India. The Chamber venture to hope that the Government of India will give their serious attention to this important question.

Extract from the Proceedings of the Madras Government, Judicial Department, No. 2567, dated Madras, 4th October 1879.

Read the following letter—

Dated Madras, the 17th September 1879.

From—The Hon'ble P. MACFADYEN, Chairman, Chamber of Commerce, Madras,

To—The Chief Secy. to the Government of Madras.

The Chamber have desired me to direct the attention of the Madras Government to their Proceedings in the Judicial Department, dated 19th July 1867, wherein will be found a letter from this Chamber urging upon the Government

the necessity of some legal measure for making the registration of Native partnerships compulsory under penalties.

The Bombay and Bengal Chambers of Commerce and a considerable number of Native bankers and merchants in the former Presidency were unanimous in asking the Government of India to legislate in this direction, and the Government were pleased to observe that the state of things brought to notice in the appeals from the Bombay Chamber of Commerce let the Governor General in Council to think "that a measure requiring the registration of partnerships might now be introduced to the Council with a reasonable prospect of its ultimate adoption, provided it were confined to purely commercial partnerships, and if its operations were limited, at all events in the first instance, to the Presidency towns."

Having been requested to report on the details necessary for registration, this Chamber (21st October 1867) recommended that the following particulars should be recorded in any registration of partnerships :—

1.—The style of the firm.

2.—The name and residences of partners.

3.—The places of business and the names and residences of the agents when they are the immediate servants of the firm, and not independent traders.

4.—Every change in the constitution of the firm involving the retirements or introduction of a partner.

The Chamber pointed out that the chief object of registration is to enable those who have dealings with a Native firm to ascertain who are liable for its debts; and they added that the position of persons who become partners by construction for the purpose of sharing the liabilities of insolvent firms should be protected against interference by any enactment for compulsory registration.

The Chamber do not appear to have been informed why the Government did not proceed with the legislative measure which seems to have been contemplated, but they assume that the proposed registration of trust deeds and gifts may, to use the words of Mr. Stokes' letter of 31st July 1867, have been found to involve "so many grave political difficulties" that it was deemed expedient to let it stand over for further consideration. With regard to this part of the proposed law, this Chamber would, as pointed out in 1867, be satisfied with such a measure as would tend to check fraudulent dealing with property to the injury of others; nor do they understand that there should be unsuperable difficulties in the way of passing a law containing provisions of so reasonable a character.

They trust therefore that the question of compulsory registration may be carefully reconsidered by the Government of India in the Legislative Department. The Chamber do not doubt that the Madras Government will agree with them that the enclosed correspondence between the Bombay Chamber of Commerce and the Bombay Government clearly demonstrates the necessity of legislation in the direction urged by the Indian Chambers of Commerce twelve years ago.

Order thereon by the Madras Government.

His Grace the Governor in Council is of opinion that the Chamber of Commerce should address the Government of India direct on the subject of their letter recorded above.

No. 2099, dated Simla, the 3rd November 1879.

From—F. C. DAUKES, Esq., Under Secretary to the Govt. of India, HOME, REVENUE AND AGRICULTURAL DEPT.,

To—The Secretary to the Govt. of Bombay.

I am directed to acknowledge the receipt of your letter No. 5376, dated the 6th September last, forwarding copy of a letter, with its accompaniments, from the Chairman and Secretary of the Bombay Chamber of Commerce on the subject of a proposed legislative enactment to provide for the compulsory registration of partnerships.

2. In reply, I am to say that the Governor General in Council has little doubt but that the difficulty described by the Bombay Chamber of Commerce is a real one; and the question for consideration is whether it is practicable to remove or remedy it by legislation in the direction indicated. The objections which have appeared to the Government of India to exist to such legislation have been fully set forth in the previous correspondence ending with the letter from this Office, No. 2583, dated 13th October 1874. Since then a large body of representative Native merchants have signified their concurrence in the recommendation of the Chamber: and the Bombay Government have given their support to the measure proposed in the enclosures of your present letter. If, as appears to be the case, the Bombay Chamber of Commerce and their legal advisers consider it practicable to frame an enactment which, while avoiding the objections which have been taken by the Government of India, would nevertheless tend to effect the desired object, the most convenient course would perhaps be to invite the Chamber of Commerce to prepare and submit through the Government of Bombay, for the consideration of the Governor General in Council, a draft of such a measure as they would wish to see enacted. If the Bombay Government see no objection to this course, His Excellency in Council authorizes its adoption.

3. In framing this draft it will be necessary clearly to distinguish between transitory and standing partnerships, and to avoid the difficulties arising from the existence, in the case of Native mercantile and banking firms, of members belonging to undivided families, His Excellency in Council is further of opinion that the scope of the Bill should, in the first instance, be limited to the Presidency towns, and that in this view it should provide that no firm having its sole or principal place of business in a Presidency town, and not being registered, should be allowed to sue third parties, and no member of such a firm should be allowed to sue his co-partners on the Original Side of the High Court, or in the local Court of Small Causes.

4. I am to add that the Governor General in Council cannot give any pledge that a draft Bill, if submitted, will be accepted by the Government of India; but His Excellency in Council will be prepared to give his careful consideration thereto, and will endeavour, so far as may be practicable, to give effect to the wishes of the mercantile community of Bombay, as expressed through the Bombay Chamber of Commerce, in the matter, so far as they may be supported by the Bombay Government.

No. 82, dated Fort William, the 14th January 1880.

From—C. BERNARD, Esq., Offg. Secy. to the Government of India, HOME, REVENUE AND AGRICULTURAL DEPT.,

To—The Secretary to the Govt. of Madras.

I am directed to forward copy of a letter from the Honorable P. Macfadyen, expressing the views of the Madras Chamber of Commerce, on the subject of the proposal for making the registration of partnerships in India compulsory.

2. I am to request that, with the sanction of His Grace the Governor in Council, the Chamber may be informed that the Government of India are anxious to give their best consideration to any practical proposal that can be made for effecting the proposed registration and at the same time avoiding interference with the Indian custom whereby members of Native firms often belong to undivided families. A copy* of the enclosed letter, which conveys to the Government of Bombay the views of His Excellency the Governor General in Council on the matter, might, I am to suggest, be communicated to the Chamber of Commerce.

* No. 2099, dated 3rd November 1879.

Corresponding period of last year ...	...	...	2890·0	2442·64	...	...	.....	106,677	...	...	.....	106,677	
Western Jumna Canal. Karnál Division ...	4·33	4·29	2,546	365	...	42,285 kurris, bullies, &c., 6,504 mds. fuel.	Umballa ...	437	0·05	...	Wheat ...	18,341	The volume entering the Western Jumna Canal at Dadupur was 2,528 cubic feet per second, of which 43 cubic feet passed out at the escapes leaving 2,485 cubic feet as utilized. More water could have been sent down, but there was no demand and there is a very large decrease in the area irrigated. The reasons for decrease generally given are— (1). Sickness amongst cultivators. (2). Large and late kharif crop still being cut. (3). Plentiful rain allowing of crops being put in without canal water. (4). Removal of enhanced land revenue, and substitution of owner's rate, allows men to make the experiment of growing crops without canal water. A good deal of rain-sown land is being irrigated, and an improvement is expected in the next report.

P. W. Dept., Irrigation Branch.

The 12th January 1880.

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

REPORT ON DISTRICT SAVINGS BANKS IN BENGAL FOR 1878-79.

Fort William, the 24th January 1880.

No. 309.—Read the following:—

No. 64, dated Calcutta, the 24th December 1879.

From—W. WATERFIELD, Esq., Officiating Comptroller General,

To—The Secretary to the Government of India, DEPARTMENT OF FINANCE AND COMMERCE.

I have the honor to forward, for submission to Government, my annual report on the working and progress of District Savings Banks in the Bengal Presidency for the year 1878-79. I have also, as last year, included in this report the transactions of the Presidency Savings Banks at Calcutta, Madras, and Bombay, and of the Regimental Banks in India.

During the past year four new banks, as per margin, were opened, and one, *viz.*, at Sironcha, was abolished. There was therefore a net addition of three banks to those existing at the end of the year 1877-78, and the total number stood at 170 on the 31st March last. No business, however, was transacted in five of these, *viz.*, Tura (Garo Hills), Mergui, Thongzai, Rohtak and Morar, and the reason assigned for this inaction at Mergui, Thongzai and Rohtak is that the people get a higher rate of interest—more than 6 per cent.—by private investment, and therefore they do not like to deposit their savings in the Savings Bank at such a low rate as $3\frac{3}{4}$ per cent. There were therefore 165 working banks at the end of the year under report. The banks at Tura and Morar have, however, begun to work in the current year.

1 at Thongzai.
1 at Morar (Gwalior).
1 at Hyderabad.
1 at Indore.

There are three Presidency Savings Banks—one in each of the three Presidencies. In 1877-78 there were 173 Regimental Savings Banks, but in the year under review the number was reduced to 165, owing to some regiments leaving India. Thus the total number of Savings Banks in India, both Civil and Military, amounted to 338 at the end of the past year. The following table shows the number of District Savings Banks open in each province, and the total number of Presidency and Regimental Savings Banks in India:—

	1877-78.	1878-79.
District Savings Banks—		
Bengal	45	45
Assam	11	11
North-Western Provinces and Oudh	47	47
Punjab	24	24
Central Provinces	19	18
British Burmah	14	15
Berar	2	2
India	5	8
	167	170
Presidency Savings Banks	3	3
Regimental Savings Banks	173	165
TOTAL	343	338

The number of depositors in the District Savings Banks on the 31st March 1878 was 12,254, which rose to 13,040 at the end of the past year, showing an increase of 786, or about $6\frac{1}{2}$ per cent. In the Presidency Savings Banks the number of depositors rose from 53,332 in 1877-78 to 54,819 in 1878-79, the increase being 1,487, or nearly 3 per cent. The number of depositors in the Regimental Savings Banks shows a decrease of 1,288, since there were 17,932 depositors in 1877-78 and 16,644 in 1878-79. The decrease is, as stated above, owing to the departure of regiments from India.

Taking all the Banks together, the total number of accounts was 83,518 on the 31st March 1878, and 84,503 at the end of the past year, with an increase of 985. In the following statement is given the number of depositors

in the District Savings Banks in each province and that in the Presidency and Regimental Savings Banks:—

Provinces.	Number of working Banks, 1877-78.	Number of working Banks, 1878-79.	Number of depositors, 1877-78.	Number of depositors, 1878-79.	Percentage of increase in number of depositors.	Average of Depositors per Bank. 1877-78.	Average of Depositors per Bank. 1878-79.

* Decrease.

In 1877-78 the balance of deposits at credit of the accounts in the District Savings Banks was Rs. 28,43,462, which increased to Rs. 32,87,537 at the close of the past year. The increase amounts to Rs. 4,44,075, or about 15½ per cent. There was, however, a falling off in the Presidency and Regimental Savings Banks. The decrease in the Presidency Savings Banks was Rs. 5,72,497 from Rs. 1,44,43,435 in 1877-78 to Rs. 1,38,70,938 in 1878-79. In the Regimental Banks the decrease was Rs. 53,926, as the amount at the close of 1877-78 was Rs. 22,74,678, and that at the close of the past year Rs. 22,20,752. The falling off in the Presidency Savings Banks is, as far as has been ascertained, due partly to a more strict observance of the Rule regarding limit of deposit, and partly to the extension of the District Savings Bank system to the mofussil treasuries. The cause of the decrease in the balances of the Regimental Savings Banks has been explained above.

The total net decrease in the balance at credit of the depositors in all the Civil and Military Banks is Rs. 1,82,348; the amount on the 31st March 1878 was Rs. 1,95,61,575 and at the end of the past year Rs. 1,93,79,227.

The following table shows the balance of deposits at credit of depositors in the District Savings Banks in each province and that at credit of the accounts in the Presidency and Regimental Banks in India. It also gives the average balance in each Bank and at credit of each depositor:—

Provinces.	Balance of deposits. 1877-78.	Balance of deposits. 1878-79.	Increase.	Percentage of increase.	Average balance in each Bank. 1877-78.	Average balance in each Bank. 1878-79.	Average balance at credit of each depositor. 1877-78.	Average balance at credit of each depositor. 1878-79.

Decrease	5	...	1,13,291	25,129	668	69,057	2,380	...	1,82,348	27,509

It will be seen from the above table that the sum of Rs. 6,90,250 was passed to the depositors on account of interest at the close of the year under report against Rs. 7,17,759 in 1877-78.

The security deposit accounts numbered 1,070 on the 31st March last. This, in comparison with the previous year, shows an increase of 249. The balance at credit of these accounts has also increased from Rs. 2,00,304 to Rs. 2,50,617.

From the facts and figures given above it will be observed that the District Savings Banks continue to show progress, and that the Presidency and Regimental Banks have worked well.

The subjoined table shows at one view what progress the District Savings Banks have made during the past nine years :—

Ordered, that this report be published in the Supplement to the *Gazette of India* for general information.

R. B. CHAPMAN,
Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 20th JANUARY 1880.

GENERAL REMARKS.—Slight rain fell during the week in the eastern districts of Bengal, in Assam, and in the Punjab; in the North-Western Provinces, there was a slight shower in Meerut, and plentiful rain in Kumaun. Rain is in most provinces wanted for the spring crops. Agricultural prospects remain good on the whole. Public health good save in the Deccan.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Jan. 17th)	...	*Ragi* 25·43; standing crops in good condition; early dry crops being harvested; second crop paddy being sown.
Kurnool („ „)	...	*Ragi* 29·7; paddy and *cholum* being harvested, former withered in one taluk from want of rain, latter injured by blight in another; pasture and water abundant.
Ganjam („ „)	...	*Ragi* 30·92.
Kistna ...	...	*Ragi* 30·84; standing dry crops good; wet paddy being harvested, outturn ½ to full; 18 inches water over anicut.
Chingleput (Jan. 17th) (Madras)	...	*Ragi* 22·45; cultivation of second crop paddy in progress in four taluks, *ragi* in two; standing crops somewhat injured by insects; harvest of paddy and other crops progressing, outturn ½ to ⅝; pasture sufficient.
Coimbatore („ „)	...	*Ragi* 24·05; dry crops withering in four taluks and parts of four others; wet crops in fair condition; harvest of paddy and a few dry grains, outturn ½ to full.
Tanjore („ „)	...	*Ragi* 29·82; crops in good condition, but want of rain felt in two taluks; harvest of paddy and a few dry grains, outturn ⅜ to full.
Madura („ „)	...	*Ragi* 24·45.
Malabar („ „)	...	*Ragi* 23·87; harvesting of second crop paddy completed.
Travancore („ „)	...	State of food market generally unchanged.
		General Remarks.—General prospects good except in Trichinopoly, North Arcot, and western parts of South Arcot, where want of rain is still much felt.
Bombay— (Jan. 21st)		
Kurrachee ...	...	River on 16th 1 foot 10 inches against 1½ feet on same date last year; *rabi* crop coming on well; locusts about two tapas in Kotri taluka, some damage in one; disease in sheep and goats in Tatta; fever prevalent.
Hyderabad ...	...	Weather sultry, clouds gathering; *rabi* promising; small-pox continues in Naushahro taluka; mortality amongst camels and horses in taluka Badin and amongst camels in taluka Mohbatdero; locusts slightly damaged crops in Hyderabad taluka.
Ahmedabad ...	...	Weather foggy; public health good.
Baroda ...	...	All *rabi* crops in good condition; cotton healthy; sugarcane planting in progress; prices stationary.
Surat ...	...	Crops generally healthy; fever in five talukas.
Násik ...	...	Ague in four talukas; cattle disease disappeared; *rabi* crops fair.
Colaba (Bombay) ...	...	Abnormal temperature *nil* till 17th, afterwards gradually fell to 2 degrees cool; vapour in air slightly excessive; wind normal.
Poona (Jan. 18th)	...	Cholera in Poona city, 96 cases, 79 deaths.
Ahmednagar ...	...	Crops in inferior soil withering but good elsewhere; injury by rats in Kopergaon.
Sholapore ...	...	Prospects unchanged; public health good.
Dharwar ...	...	Slight fever in seven talukas; exotic cotton somewhat damaged.
Kánara ...	...	Second crop plants sprouting on coast; fever very prevalent; cattle disease less.
Rajkot ...	...	Report not received.
		General Remarks.—*Rabi* crops doing well throughout presidency; some damage by locusts in Sind; fever in Kanara, Dharwar, and Surat; 79 deaths from cholera in Poona city.
Bengal— (Jan. 20th)		
Chittagong ...	0·06	Weather seasonable; state of winter crops good; cholera still prevailing in south; cattle disease in some parts of district.
Dacca ...	*Nil*	Prospects of crops favourable; public health good.
24-Pergunnahs (Alipore)	*Nil*	Winter crops promising; *amun* has yielded an average crop; reaping of *amun* continues on low lands in few places; sporadic cases of cholera in Baripore; public health generally good.
Moorshedabad ...	*Nil*	Prospects of crops good; transplantation of *boro* paddy going on; fever in a mitigated form still prevalent in thana Burwa; cholera still prevails in Berhampore town, but in a milder type.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Rajshahye ...	*Nil*	Weather cool and foggy in mornings at close of week; cutting of winter rice nearly completed, outturn generally good; spring crops thriving; public health good.
Burdwan ...	*Nil*	Rain wanted everywhere, especially in Raneegunge for *rabi* crops; health good.
Rungpore ...	1·18	Weather cool; crops favourable; public health good.
Bhágalpur ...	*Nil*	Weather cloudy, prospects of crops and general health good.
Purneah ...	*Nil*	Paddy harvested, good crop; fever prevalent.
Patna ...	*Nil*	Rain wanted for *rabi* crops.
Durbhanga ...	0·36	Prospects of *rabi* crops continue promising; harvesting of *aghani* rice finished; prices stationary; public health good,
Hazáribágh ...	*Nil*	Weather seasonable; rain wanted for *rabi* crops; district health good.
Cuttack ...	*Nil*	Rice being still harvested; winter crops good; small-pox still prevalent.
		General Remarks.—Slight rain during week in Rungpore, Darjeeling, Jalpáiguri, Duárs, Durbhanga, and Chittagong; rain wanted in places in Behar and Chota Nagpore, and in Burdwan, Nuddea, and Jessore; elsewhere *rabi* prospects excellent; *amun* all harvested, except in low lands in a few places; outturn in most districts good; pulses being gathered and sugarcane cut and pressed in some districts; fever, cholera, and small-pox still reported in places; general health on the whole good.
N.-W. Provinces and Oudh—		
Benares (Jan. 20th)	*Nil*	Rain wanted; prospects and health good.
Allahabad („ „)	*Nil*	Wind easterly during the last two days; heavy clouds but with no result; wind changed this morning and clouds dispersed; crops looking well though rain wanted; general health good; prices stationary.
Jhánsi („ 21st)	*Nil*	Rain would be beneficial; prices stationary.
Gorakhpur („ „)	*Nil*	*Rabi* thriving; health good.
Agra („ „)	...	*Rabi* crops thriving favourably; cloudy; health improving.
Bareilly („ 21st)	...	Weather clear and cold; prospects good.
Meerut („ „)	Slight rain on 19th, ·1 yesterday.	Prospects pood; health improving; prices falling slightly.
Kumaun (Jan. 20th)	13·0	Rain plentiful and seasonable.
Lucknow („ 21st)	...	Weather seasonable; prospects good; *dhan* 30 seers.
Partabgarh („ 19th)	...	Sky clouded; rain wanted; crops promising.
Sitapur („ 21st)	...	East wind; rain breaking; prospects good.
Fyzabad ...	*Nil*	Prospects good.
		General Remarks.—Prospects good, but rain wanted in places; health improving.
Punjab—(Jan. 20th)		
Delhi ...	...	Prospects good; health improving.
Hissar ...	...	Weather cloudy; crops thriving; prices falling; health improving.
Umballa ...	·5	Health and crops fair.
Jullundur ...	·6	Agricultural prospects much improved; health good.
Lahore ...	Slight rain	Health and crops good.
Ferozepore ...	...	Agricultural prospects fair; prices steady.
Siálkot ...	...	Harvest prospects fair.
Ráwalpindi ...	·7	Agricultural prospects good.
Peshawar ...	...	Prospects fairly good; health good.
Mooltan ...	...	Crops and health good; prices steady.
Dera Ismail Khan ...	...	Crops and health good.
		General Remarks.—Rain in several districts has still further improved prospects.
Central Provinces—		
Nágpur (Jan. 21st)	...	Getting warmer; prospects of *rabi* favourable; prices stationary.
Jubbulpore ...	...	Somewhat cloudy at intervals; *rabi* doing well; small-pox slight; prices stationary.
Saugor	...	Cloudy; *rabi* healthy and in ear; prospects good; prices stationary.
Seoni	...	Cloudy; rain required for *rabi* which is favourable for the present; slight small-pox.
Hoshangabad ...	...	*Rabi* doing well; health good; prices stationary.
Raipur (Jan. 17th)	...	Clear and cool; prospects of *rabi* good; cattle disease continues; prices unchanged.
Sambalpur („ 16th)	...	Clear and cold; harvest completed; health good; prices stationary.
		General Remarks.—Clear at the commencement of the week; cloudy now; *rabi* generally good; *kharif* threshing continues in some districts.
British Burma— (Jan. 21st)		
Akyab ...	...	Public health good; crop outturn excellent.
Rangoon	...	A few cases of small-pox; small-pox and fever continue in Hanthawaddy district; otherwise public health good; health of cattle good; reaping nearly finished.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—*contd.*		
Bassein	...	Public health good; slight cattle disease.
Prome	...	Small-pox in Prome town and in portion of district.
Amherst (Moulmein) ...	...	Public health good; crops nearly gathered.
Toungoo	...	A few cases of small-pox, otherwise public health fair.
		General Remarks.—General health good; small-pox somewhat prevalent; some cholera and fever; slight cattle disease; favourable accounts of harvest.
Assam—(Jan. 21st)		
Gauháti	·46	Weather cool and chilly; reaping of *sali* crop completed; prospects of other crops favourable.
Sylhet	·05 Heavy rain last night.	Prospects still good.
Cachar	*Nil*	Weather cold; no rice crops on the ground; outturn good; common rice at 13 $\frac{5}{8}$ seers a rupee; public health good.
Dibrugarh	·65	Ploughing for *asu* crops going on; cloudy, damp weather; district healthy.
Mysore and Coorg— (Jan. 21st)		
Bangalore ...	...	Paddy and sugarcane being harvested; standing crops in good condition; prospects favourable; fever prevalent in some places, otherwise health good; prices continue to fall.
Mysore ...	...	No report received.
Mercara ...	...	
Berar & Hyderabad— (Jan. 21st)		
Amráoti	...	*Rabi* crops favourable; cotton below average.
Akola	...	*Rabi* crops promising well.
Hyderabad ...	...	*Rabi* sowing progressing in some and finished in other places; no sickness.
Central India States— (Jan. 21st)		
Indore	...	Health and prospects good.
Morar (Gwalior) ...	...	Sky cloudy.
Sutna ...	...	Prospects good; *jowar* 29 seers.
Rutlam ...	...	Prospects and public health good.
Neemuch ...	...	Health and crops good.
Goona ...	...	Crops and health good; wheat 14 seers.
Bhopal ...	...	Public health good.
Agar ...	...	Health good; prospects favourable.
Nowgong ...	...	Public health still suffering from fever; general prospects good.
Mánpur ...	...	Weather fine; wheat, gram and opium crops good.
Rajputana—		
Abu ...	...	No report received.
Sirohee (Jan. 11th)	...	Wells full; tanks drying; malarious fever declining; crops fair; much warmer.
Marwar („ 10th)	...	Wells almost full; a month's water in tanks; health good; crops excellent; seasonable.
Meywar ...	...	No report received.
Harowtee (Jan. 17th)	...	Cloudy and close; health and prospects good.
Jhallawar ...	...	Cloudy; prospects excellent.
Ajmere (Jan. 21st)	...	Cloudy; prospects and health good.
Jeypore ...	...	No report received.
Bhurtpore ...	...	
Ulwur (Jan. 20th)	...	Prospects good; health improving.

SUPPLEMENT TO

The Gazette of India.

Nº 5. } CALCUTTA, SATURDAY, JANUARY 31, 1880.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 23rd January, 1880.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
The Hon'ble Sir J. Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble Mahárájá Jotíndra Mohan Tagore, C.S.I.
The Hon'ble G. H. M. Batten.
The Hon'ble C. Grant.
The Hon'ble E. C. Morgan.
The Hon'ble J. Pitt-Kennedy.

BURMA SURVEY BILL.

The Hon'ble MR. RIVERS THOMPSON moved that the Bill to provide for the demarcation and survey of land in British Burma be referred to a Select Committee consisting of the Hon'ble Messrs. Stokes, Colvin and Grant and the Mover.

The Motion was put and agreed to.

The Hon'ble MR. RIVERS THOMPSON also moved that the Bill be published in the *British Burma Gazette* in English and in such other languages as the Local Government thinks fit.

The Motion was put and agreed to.

BOMBAY CIVIL COURTS ACT, 1869, AMENDMENT BILL.

The Hon'ble MR. STOKES introduced the Bill to amend the Bombay Civil Courts Act, 1869, and moved that it be circulated for the purpose of eliciting opinion thereon.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill be published in the *Bombay Government Gazette* in English.

The Motion was put and agreed to.

BURMA DISTRICT CESSES AND RURAL POLICE BILL.

The Hon'ble MR. RIVERS THOMPSON moved that the Report of the Select Committee on the Bill to amend the law relating to District Cesses and Rural Police in British Burma be taken into consideration. He said that it would be seen from the Report of the Select Committee that since the introduction of the Bill very few changes had been made in its provisions. The only material changes were in connection with the 9th section of the Bill, which referred to the purposes for which these district-funds were to be applied. An addition had been made in the list of purposes for which local funds might be used, by adding "the improvement of river-channels." As communications in British Burma were as much by water as by land, it was considered desirable that power should be taken for using local cesses for the improvement of these water-channels.

In connection with this section, he desired to refer to the principle which was affected by the amendment which the Select Committee had introduced. In the Bill, as it originally stood, power was conferred upon the Chief Commissioner to transfer funds from one district to another for all general purposes. As such cesses were levied by a percentage upon the land-revenue, it would always be the result that in backward districts, where cultivation had not advanced from paucity of population or other causes, the amount realized by local cesses for local purposes was small; and thus, while richer districts found themselves at the end of the year with a surplus which they could not utilise for local purposes within their own jurisdiction, the poorer district in the neighbourhood was unable to carry out any work of real utility. The Chief Commissioner had, accordingly, represented the desirability of taking power to use these funds generally throughout the province, and that their use should not be restricted to the particular districts in which the cesses were levied. The principle of course was right, in a Bill of this kind, that local cesses should be used in the districts where they were raised; and this was more especially the case where the appropriation of the funds was in the hands of the Government and not of a local Committee; and, so far as was reasonable, the Select Committee desired to maintain the principle that local funds should be expended in the districts to which they belonged. While, then, the general power to transfer funds from one district to another had been abandoned by the Select Committee in considering this particular section, it had been thought desirable to provide that, as regards two of the purposes to which local funds might be applied, namely, the maintenance of a local postal service and the construction and maintenance of district-roads and other communications, the Chief Commissioner should have power to transfer at the end of a year the surplus-funds of one district to any other district *in the same division*. Perhaps the one thing which Burma more essentially required than any other was the more rapid development of the resources of its less advanced districts by the opening out of communications. As matters stood, a well-to-do district might be able from its funds to carry out a road within its own limits, but to go no further; while a backward district, which had no funds to complete the communication between itself and the adjoining district, or from one centre to another part of the division, remained without the means of carrying out projects the most advantageous for itself. It had, therefore, been considered by the Select Committee desirable to modify the general rule in that respect as regards roads, and as a consequence as regards the improvement of the local postal service; and, by the proviso to the 9th section of the Bill, power had been given to the Chief Commissioner to utilise, at the end of a year, the surplus-funds of a richer district for continuing such works in connection with other districts in the same division. He (MR. RIVERS THOMPSON) thought such limited powers might safely be entrusted to the local administration with a prospect of much benefit to the province.

The Motion was put and agreed to.

The Hon'ble MR. RIVERS THOMPSON also moved that the Bill as amended be passed.

The Motion was put and agreed to.

MILITARY CANTONMENTS ACT AMENDMENT BILL.

The Hon'ble MR. STOKES presented the final Report of the Select Committee on the Bill to provide for the revision of proceedings in trials held under the Military Cantonments Act, 1864, section 20.

KÁZÍ BILL.

The Hon'ble SAYYAD AHMAD KHÁN moved for leave to introduce a Bill for the appointment of persons to the office of Kází. He said:—"MY LORD,—In asking leave to introduce a Bill into the Council relating to the appointment of Kázís, I am supported by a sincere conviction that I am recommending a piece of legislation which will do no more than meet a long-felt want of the Muhammadan subjects of Her Imperial Majesty in some parts of the Empire.

"Before the advent of British rule in this country, a Kází was appointed for each pargana, and a Kází-ul-Kuzát for each great centre. The duties of these functionaries are stated at length in the law-books of both the Shía and Sunni sects, from which it appears that the Kází held a judicial office, and was invariably appointed by the State. His ultimate connection with the performance of certain ceremonial duties, and some other rites which may be said to be ceremonial from one point of view and social from another, arose from his recognised credit as the nominee of the Government, and from his supposed knowledge of the Muhammadan law. A large portion of the judicial powers of the Kází had already been transferred to other officials before the introduction of British rule, while the appointment of Judges and Magistrates under the British Government deprived him altogether of the last remnant of his functions as a judicial officer. The British Government, though no longer recognizing the judicial functions of the Kází, invariably accorded a legal sanction to his appointment for three-quarters of a century until the passing of Act XI of 1864. At the time of the passing of this Act the duties of the Kází did not extend beyond (1) celebrating marriages and presiding at divorces, and (2) performing various other rites and ceremonies. The performance of these duties by the Kázís was partly due to the fact that the practice had acquired the force of a social custom by the lapse of time, partly to the recognized acquaintance of the Kázís with the law, and partly to the fact that the presence of a duly appointed Kází was considered necessary at the performance of certain rites and ceremonies.

"Now, it was exceedingly doubtful whether a Kází not appointed by the State could be said to be a duly appointed Kází. Some of the highest Courts in this country have held that he could not. Accordingly, my Lord, although it is expressly stated in Act XI of 1864 that nothing contained in that Act 'shall be construed so as to prevent a Kází-ul-Kuzát or other Kází from performing, when required to do so, any duties or ceremonies prescribed by the Muhammadan law,' yet, when the State divested itself of the power of appointment, it was felt that no duly appointed Kází could be found for the performance of those rites and ceremonies.

"My Lord, the absence of a duly appointed Kází on occasions on which the Muhammadans regard his presence as necessary from their social or ceremonial point of view is the source of much inconvenience to them, as has been represented on several occasions by members of that community, and more particularly by the Muhammadans of the Madras Presidency. To undertake, therefore, the appointment of Kázís will be but a reasonable concession on the part of Government to the wants of a large section of Her Imperial Majesty's subjects, and will prove a most acceptable relief to them.

"My Lord, as the want of duly appointed Kázís has been chiefly felt in the Presidency of Madras, the Bill I ask leave to introduce is intended to extend, in the first instance, only to that Presidency; but it is proposed to add a clause to it empowering any other Local Government to extend its provisions to the territories administered by it, should the Muhammadans in those territories hereafter desire its extension.

"My Lord, the object of the present motion is nothing more than the creation of duly appointed Kázís to satisfy the social and ceremonial wants of the Muhammadan population. A detail of the duties to be devolved on the Kázís does not come under the scope of the proposed Bill. The use to be made of these functionaries will depend on the customary practice of the parties concerned. The Bill in question will simply provide for the appointment of Kázís

by Government, leaving their position and duties, whatever they may be, just as they now are, and conferring no judicial or other powers on them; and, in order to prevent any possible misapprehension as to the object of the proposed Bill, a saving clause will be added to that effect.

"My Lord, in conclusion, I beg to express once more my strong conviction that such a wholesome piece of legislation will prove highly beneficial to a large section of the population of India, and will be welcomed by the Muhammadan subjects of Her Imperial Majesty with feelings of gratefulness and satisfaction."

The Motion was put and agreed to.

The Council adjourned to Friday, the 30th January, 1880.

D. FITZPATRICK,
Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 23rd January, 1880.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 27th JANUARY 1880.

General Remarks.—Slight rain fell during the week in most of the districts of Madras, Bengal, Assam, Mysore and Coorg, and also in parts of the North-Western Provinces and Oudh and the Punjab. These showers have benefited the spring crops, but rain is still wanted in several districts of Upper India. Agricultural prospects and the public health continue good on the whole.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Jan. 24th)	...	*Ragi* 27·16; standing crops in good condition; harvest of Bengal and horse gram; second crop paddy being sown.
Kurnool („ „)	...	*Ragi* 29·7; paddy and *cholum* being harvested; paddy withered in one taluk; dry crops affected with disease in another; pasture and water abundant.
Ganjam („ „)	...	*Ragi* 31·37.
Kistna („ „)	...	*Ragi* 30·97; later dry crops affected by insects in two taluks, elsewhere doing well; wet paddy and *varagu* being harvested; 16 inches water over anicut.
Chingleput („ „) (Madras)	·63 (average of 6 stations).	*Ragi* 22·55; cultivation of second crop paddy, *kar*, and *varagu* in progress in two taluks; standing crops suffering from want of water in one taluk, and somewhat injured by insects in all; harvest of wet and dry crops progressing, outturn ½ to ¾; pasture insufficient, except in one taluk.
Coimbatore („ „)	·24 (average of 10 stations).	*Ragi* 23·19; dry crops withering in five taluks and parts of the other five; wet crops in fair condition; harvest of paddy and a few dry crops, outturn paddy ¼ to full, others ⅛ to ¾.
Tanjore („ „)	·35 (average of 5 stations).	*Ragi* 30·03; crops in good condition, but require rain in parts of two taluks; harvest of paddy and a few dry grains, outturn ⅜ to full.
Madura („ „)	·08 (average of 9 stations).	*Ragi* 23·63.
Malabar („ „)	·05 (average of 1 station).	*Ragi* 20·36; harvest of second crop almost completed.
Travancore („ „)	·93	Paddy crop very good, being harvested; pasture sufficient. *General Remarks.*—General prospects good.
Bombay— (Jan. 28th)		
Kurrachee ...	...	Weather cloudy and sultry; river 1 foot 5 inches against 3 feet 2 inches on same date last year; cattle disease prevalent everywhere; much fever still in places.
Hyderabad ...	...	Wheat in southern talukas injured by southerly winds and mists; mortality amongst camels and horses continues; small-pox in taluka Naushahro continues; weather cloudy; rain would benefit *rabi* crops.
Ahmedabad ...	...	Crops promising; public health good.
Baroda ...	...	All crops thriving; pressing of last sugarcane crop and planting of new sugarcane continue.
Surat ...	...	Crops generally healthy; fever in four talukas.
Násik ...	...	Ague in four talukas; cattle disease re-appeared in Dindori; *rabi* crops fair.
Colaba (Bombay) ...	...	Average abnormal temperature 1 degree cool till 23rd, 3 degrees warm from 24th to 26th, and 1 degree warm on 27th; vapour in air slightly excessive till 22nd, afterwards largely in defect.
Poona (Jan. 25th)	...	Cholera in Poona city, cases 31, deaths 14.
Ahmednagar ...	...	*Rabi* crops good, except in inferior soil; rats still destructive in Kopergaon.
Sholapore ...	...	Crops generally good; cold has injured them in places; public health good.
Kánara ...	...	*Rice* plants healthy on coast; fever prevalent; cattle disease subsiding.
Rajkot ...	...	Weather cold; cotton-picking in some places; wheat crops promising; health good.
		General Remarks.—Rabi crops good everywhere; public health bad in Sind; cattle disease in Sind and Násik.
Bengal— (Jan. 27th)		
Chittagong ...	*Nil*	Cold-weather crops progressing well; cholera in cyclone-tracts abating; cattle disease continues in some parts of district.
Dacca ...	0·12	Prospects of crops good; public health good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
24-Pergunnahs (Alipore)	0·05	Rice has yielded an average crop; winter crops promising; *boro dhan* being transplanted and pulses gathered; public health good.
Moorshedabad ...	0·68	Prospects of crops good; rain of 23rd will do good to winter crops; fever in a mitigated form still prevalent in thana Burwa; cholera in a milder type in Sujagunge and Kaliagunge police stations.
Rajshahye ...	0·30	Weather cool and foggy in mornings; cutting of winter rice nearly completed; outturn generally good; spring crops thriving; public health good.
Burdwan ...	*Nil*	*Rabi* crops promise well, but rain wanted; health good.
Culna ...	0·6	
Cutwa ...	0·13	
Rungpore ...	0·28	Weather cool; crops progressing; public health good.
Bhágalpur ...	*Nil*	Weather cold again; prospects of crops and general health good.
Purneah ...	0·48	Crops benefited by rain; prospects favourable; prices stationary.
Patna ...	0·09	More rain now wanted.
Durbhanga ...	Slight rain with hail-stones.	*Rabi* crops progressing very well; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; *rabi* crops suffering for want of rain; general health good.
Cuttack ...	*Nil*	Rice being still harvested; winter crops good; small-pox still continues.
		General Remarks.—Slight but beneficial rain in most districts, accompanied with hailstones in some; prospects generally favourable, but rain wanted for *rabi* crops in parts of Chota Nagpore and Patna Divisions, and in Burdwan, Jessore, and Bhágalpur; cultivation of spring rice going on; harvesting of winter rice still continues in low lands in a few places; cases of small-pox and cholera still reported from some districts, but public health generally good; prices in some districts falling, and in some stationary, while in a few slightly rising owing to exportation.
N.-W. Provinces and Oudh—		
Benares (Jan. 27th)	*Nil*	Health and prospects good; but rain is wanted.
Allahabad („ „)	...	Weather still fine; crops looking fairly well, but badly in want of water; general health good; prices unchanged.
Gorakhpur („ 26th)	*Nil*	*Rabi* prospects good.
Jhánsi („ 29th)	*Nil*	*Rabi* fair; prices stationary.
Agra („ 27th)	...	*Rabi* crops good; weather cloudy; sickness disappearing.
Bareilly („ 28th)	Slight rain on 23rd.	
Meerut („ „)	...	Weather clear; wind west; prospects good.
Kumaun („ 26th)	4·0 on 22nd	Sky cloudy.
Lucknow („ 28th)	·4 on 23rd	Prospects good
Partabgarh („ 26th)	...	Prospects good; rain wanted.
Sitapur („ 28th)	...	West wind; rain wanted.
Fyzabad („ „)	...	Prospects satisfactory; wheat and barley coming into ear.
		General Remarks.—*Rabi* prospects fair and health good; rain has fallen in Kumaun and slight rain in Bareilly and Lucknow; rain is wanted in Meerut, Allahabad, Partabgarh, and Sitapur.
Punjab—(Jan. 27th)		
Delhi ...	·1	Prospects good; health much improved; slight fall in prices.
Hissar ...	...	Weather cloudy; crops doing well; prices improving; general health good.
Umballa ...	...	Rain wanted; crops and health fair.
Jullundur ...	...	Prices falling; health and crops good.
Lahore ...	...	Crops and health good.
Ferozepore ...	...	Agricultural prospects fair; prices falling.
Siálkot ...	...	Agricultural prospects fair; rain needed.
Ráwalpindi ...	...	Agricultural prospects fair; fever prevalent.
Pesháwar ...	...	Prospects fair.
Mooltan ...	...	Crops and health good; rain required; prices steady.
Dera Ismail Khan ...	·4	More wanted; health and prospects fair.
		General Remarks.—Prospects and health generally good and prices of food-grains falling in most districts.
Central Provinces—		
Nágpur (Jan. 28th)	...	Cool and slightly cloudy; *rabi* favourable; health good.
Jubbulpore ...	...	Cold; *rabi* promising; small-pox decreasing; prices stationary.
Saugor ...	...	Cloudy at times; pulses slightly damaged by late frost; prices unchanged.
Seoni ...	...	Very cold; pulses injured by frost; wheat flourishing.
Hoshangabad ...	...	Cold; pulses slightly injured by frost; *rabi* doing well and full outturn anticipated; health good; prices unchanged.
Raipur (Jan. 24th)	...	Clear and cool; *rabi* favourable; cattle disease continues; prices stationary.
Sambalpur („ 23rd)	...	Warm; no crops on the ground; health good; prices steady.
		General Remarks.—Cold; threshing of *kharif* crops continues in some districts; *rabi* prospects generally good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma—(Jan. 28th)		
Akyab ...	...	Public health good; harvesting concluded.
Rangoon	...	A few deaths from small-pox reported in Rangoon town; fever still continues to a small extent in the Hanthawaddy district, otherwise public health good; health of cattle good; reaping nearly completed.
Bassein	...	Public health good; a few deaths from small-pox; slight cattle disease in one township.
Prome	...	Small-pox continues in town, otherwise public health fair.
Amherst (Moulmein) ...	...	Small-pox prevalent in Thatone township, otherwise public health good; crops gathered.
Toungoo	...	Slight small-pox, otherwise public health fair.
		General Remarks.—Fever and small-pox more or less prevalent in Pegu and Tenasserim; harvest nearly over; weather seasonable.
Assam—(Jan. 28th)		
Gauháti	*Nil*	Weather settled, dry, and cold; outturn of *sali* crop favourable.
Sylhet	·71	*Bura dhan* being planted out; ploughing for *aman* and *aus* and harvesting of winter crops going on.
Cachar	·39	Weather seasonable; no rice crops on the ground; common rice 14½ seers per rupee; public health good.
Dibrugarh ...	·85	Lands being ploughed for *aus* crops; district healthy; weather fine.
Mysore and Coorg—(Jan. 28th)		
Bangalore ...	·63	Standing crops in good condition; planting of *vaisakh* paddy continues; general prospects favourable; health good; prices falling.
Mysore ...	...	
Mercara ...	·12	
Berar & Hyderabad—(Jan. 28th)		
Amráoti	...	*Rabi* crops doing well; cotton-picking completed.
Akola	...	*Rabi* prospects favourable.
Hyderabad ...	...	Prospects continue somewhat unfavourable; price of wheat 6, rice 11, and white *jowar* 14 seers per rupee.
Central India States—(Jan. 28th)		
Indore	...	Cloudy; rain would do good.
Morar (Gwalior) ...	*Nil.*	
Sutna ...	...	Prospects good; *jowar* 29 seers.
Rutlam ...	...	Prospects and health good.
Neemuch ...	...	Health good; opium crops affected by cold weather.
Goona ...	...	Health good; wheat 14 seers.
Bhopal ...	...	Health good.
Agar ...	...	Health and agricultural prospects good.
Nowgong ...	...	Report not received.
Mánpur ...	...	Weather cloudy; *rabi* prospects good.
Rajputana—		
Abu ...	...	Report not received.
Sirohee (Jan. 18th)	...	Tanks drying; wells full; fever subsiding; measles prevalent; prospects fair; unseasonably warm.
Marwar („ 17th)	...	One month's supply in tanks; wells almost full; health good; crops excellent; cold mild; winds sharp.
Meywar ...	...	Report not received.
Harowtee (Jan. 24th)	...	Health and prospects good.
Jhallawar ...	...	
Ajmere (Jan. 28th)	...	Still cloudy; prospects good; small-pox prevalent.
Jeypore ...	...	Report not received.
Bhurtpore ...	...	
Ulwur ...	...	Prospects good, but rain wanted; health improving; cattle disease appearing.

SUPPLEMENT TO

The Gazette of India.

Nº 6. } CALCUTTA, SATURDAY, FEBRUARY 7, 1880.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Friday, the 30th January, 1880.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I *presiding.*
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
His Excellency the Commander-in-Chief, G.C.B., G.C.S.I., C.I.E.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I., C.I.E.
The Hon'ble Sir J. Strachey, G.C.S.I., C.I.E.
General the Hon'ble Sir E. B. Johnson, R.A., K.C.B., C.I.E.
The Hon'ble Whitley Stokes, C.S.I., C.I.E.
The Hon'ble Rivers Thompson, C.S.I.
The Hon'ble Sayyad Ahmad Khán Bahádur, C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble B. W. Colvin.
The Hon'ble C. Grant.
The Hon'ble E. C. Morgan.
The Hon'ble J. Pitt Kennedy.
The Hon'ble G. C. Paul, C.I.E.
The Hon'ble H. J. Reynolds.

NEW MEMBER.

The Hon'ble H. J. Reynolds took his seat as an Additional Member.

CANTONMENTS ACT AMENDMENT BILL.

The Hon'ble MR. STOKES moved that the Reports of the Select Committee on the Bill to provide for the revision of proceedings in trials held under the

Military Cantonments Act, 1864, section 20, be taken into consideration. He said that the Committee had made both substantial and formal changes in this Bill. The substantial changes consisted in the introduction of a power to the Local Government to impose, for local purposes, in any cantonment, taxes of the same description as were commonly imposed in municipalities, and a power to extend any portion of the Cantonment Act to any place without extending the whole. The Governments of Madras and Bombay, having Cantonment Acts of their own, would probably desire to extend to some of their cantonments the new taxation-sections.

The principal formal change consisted in the conversion of the Bill from a mere piece of patchwork into a measure repealing and re-enacting the law on the subject. That this was desirable would appear from the fact that the present Cantonment Act had been already twice amended, namely, by the Small Cause Court Act, XI of 1865, and by the Code of Criminal Procedure, Act X of 1872; that four of its sections had been repealed by Acts XIV of 1870 and VIII of 1871; and that parts of three of the remaining sections (39, 43 and 44) were, according to the opinion held by the Government of India during the last ten or twelve years, *ultra vires* of this legislature, as purporting to enable the Government to deal with cantonments situate in foreign territory. That power, MR. STOKES need hardly say, the Government possessed in its executive capacity, and to confer it by an Act was, therefore, not only illegal, but useless. Moreover, the arrangement of the present Cantonment Act was somewhat obscure; and, considering the class of officers who had to administer it, the Select Committee thought it especially desirable that the law should be compact and clear. The result of the Committee's labours was now before the Council. The Bill contained no section corresponding with the interpretation-clause of the present Act, because the expressions there defined were defined by the General Clauses Act, I of 1868, for all subsequent enactments. It gave no power to the Local Governments to establish Small Cause Courts within cantonment-limits, for the Local Governments had this power under Act XI of 1865. It omitted the provision in section 22 of the present Act that simple imprisonment for breach of cantonment-rules might be in the civil jail. The reason was that several local authorities had recently represented that imprisonment in the civil jail (commonly a ward in the ordinary jail set apart for persons imprisoned by order of Civil Courts and Revenue-officers) was, to most Natives, little or no punishment. The Bill did not declare (as was done by the present Act, section 27) that Courts should take judicial notice of cantonment-rules; for, as these rules had the force of law, section 57 of the Evidence Act would apply. It would be seen that the Select Committee had not altered the puzzling and incomplete provisions as to the occupation by private persons of Government-lands in cantonments, and the right to claim houses built on such lands. The reason was that the Committee did not quite know what to put in the place of those provisions. The whole subject was now under discussion by the executive departments concerned, and would, no doubt, be further discussed by all the Local Governments. When that discussion was ended,—possibly in three or four years,—if a comprehensive cantonment-law were then determined on, a law extending (not merely extendible) to the whole of British India, the then Viceroy would say *rumpe moras*, and the task of our successors would be facilitated by the present Bill.

The Motion was put and agreed to.

The Hon'ble MR. STOKES also moved that the Bill as amended be passed.

The Motion was put and agreed to.

KÁZÍ BILL.

The Hon'ble SAYYAD AHMAD KHÁN introduced the Bill for the appointment of persons to the office of Kází, and moved that it be referred to a Select Committee consisting of the Hon'ble Sir A. J. Arbuthnot, the Hon'ble Messrs. Stokes, Colvin and Batten and the Mover. He said that he did not wish to take up the time of the Council by commenting on its provisions, as they were explained in the Statement of Objects and Reasons.

The Motion was put and agreed to.

The Hon'ble SAYYAD AHMAD KHÁN also moved that the Bill be published in the local official Gazettes in English and in such other languages as the Local Governments might think fit.

The Motion was put and agreed to.

PORTUGUESE TREATY BILL.

The Hon'ble MR. HOPE moved for leave to introduce a Bill to give effect to the Convention between the Governors General of British India and Portuguese India regarding the Extradition of Criminals, and to the twentieth article of the Treaty between Her Majesty and the King of Portugal and the Algarves. He said that in the course of the last year Her Majesty concluded a Treaty with the King of Portugal. The nineteenth article of that Treaty dealt with the subject of extradition; and it was provided that the details under which extradition should be conducted should be embodied in a Convention, to be executed between the Governors General of British India and Portuguese India. That Convention had already been concluded. Article 20 of the same Treaty provided for the issue of commissions in criminal trials and inquiries. He had now the honour to ask permission to introduce a Bill, which was considered desirable to give effect to those two provisions.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also introduced the Bill.

The Hon'ble MR. HOPE also applied to His Excellency the President to suspend the Rules for the Conduct of Business, in consequence of the Convention taking effect from the 1st proximo.

The PRESIDENT declared the Rules suspended.

The Hon'ble MR. HOPE then moved that the Bill be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. HOPE also moved that the Bill be passed.

The Motion was put and agreed to.

The Council adjourned to Friday, the 13th February, 1880.

D. FITZPATRICK,
Secy. to the Govt. of India,
Legislative Department.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

COMPARATIVE STATEMENT OF IRRIGATION AND RAINFALL IN THE DECCAN AND GUJARAT FOR 1878-79.

No. 3586, dated Poona, the 14th August 1879.

MEMORANDUM—By J. Hart, Esq., C.E., Acting Chief Engineer for Irrigation, Bombay.

The accompanying comparative statement of area irrigated and rainfall on new works in the Deccan and Gujarat for the year 1878-79 is submitted for the information of Government.

2. The total area irrigated and average rainfall for four years are as follows:—

	Area irrigated.	Rainfall.
	Acres.	Inches.
1875-76	7,296	29·88
1876-77	17,059	14·65
1877-78	25,362	22·01
1878-79	17,286	32·69

The rainfall shown is the average of 18 stations in each case.

There was a falling off in area in 1878-79, as compared with the previous year, of 8,076 acres.

3. Broadly it may be stated that this decrease is due to the heavy and favourable rainfall during the year in the districts in which the works are situated. The fall in some cases was quite unprecedented. The falling off was entirely in the inferior crops paying low rates, and the total assessment of water rates shows no decrease, which indicates considerable improvement in the area of better classes of crops.

4. The area in 1878-79 compares favourably with the area irrigated in the first famine year (1876-77), and shows great improvement as compared with the years preceding the famine.

5. In 1878-79 the area irrigated formed 7·91 or nearly 8 per cent. of the irrigable area under command, 218,439 acres.

6. In 1875-76, when the rainfall was slightly less favourable than in 1878-79, the area irrigated formed only 4·8 per cent. of the irrigable area under command in that year, 150,725 acres.

7. Proceeding to details, the falling off is comprised as follows:—

	Acres.
Kharíf	6,795
Rabi	1,281
TOTAL	8,076

The decrease was thus principally in the area irrigated during the kharíf season. The season was a late one, and the rainfall in June was deficient, followed in July, August, and September by unusually plentiful rain. These conditions are unfavourable to extensive irrigation, because the people defer sowing until heavy rain falls, and seldom take water for the purpose of enabling them to sow. In the previous year, 1877-78, heavy rain fell in June; while the fall in July was deficient. This was favourable to extensive irrigation. Taking advantage of the early rain, the people sowed their crops, and, when drought followed in July, were only too glad to take water to save their crops from failure. These remarks apply, of course, only to the inferior monsoon crops.

8. The decrease in area of kharíf was greatest on the Jamda and Krishna Canals and the Ekruk Tank. In the case of the first and last the rainfall throughout the season was very heavy, and rendered irrigation of all the ordinary crops unnecessary; the rainfall in both cases was very evenly distributed: at Jamda the total fall from June to September was the heaviest registered for the past 10 years; while the fall at Sholapur on the Ekruk Tank was quite unprecedented, the total having been 54·18 inches as compared with an average of 23 inches. In the case of the Krishna Canal the decrease was due to the better distribution of the fall, and is an instance to which the remarks in the preceding para. apply in particular, as will be seen from the following comparison of the rainfall:—

	1877-78.	1878-79.
	Inches.	Inches.
June	9·70	1·80
July	1·28	9·94
August	4·00	7·89
September.	9·89	6·39
TOTAL	24·87	26·02

9. Under rabi the decrease was principally on the Jamda, Ojhar, and Lakh Canals, and is explained by the favourable late kharíf and early rabi rainfall. There was a large increase in rabi irrigation on the Hathmati, Krishna, and Palkher Canals, notwithstanding the favourable rainfall of the year. In the case of the Hathmati, the increase is due to the more plentiful supply of water available in consequence of the good fall of rain.

10. Viewing the figures of column 14 of the statement showing the decrease in total area on each work, and bearing in mind the very favourable rainfall of the season, the only work which exhibits seriously disappointing results is the Lákh Canal. In almost every other case the figures exhibit a considerable improvement as compared with previous years, disregarding the two famine years.

11. For comparison with the table given in para. 17 of Revenue Report, 1877-78, the following figures are given:—

	1877-78.			1878-79.		
	Kharif.	Rabi.	TOTAL.	Kharif	Rabi.	TOTAL.
Area irrigated.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
I.—Works having an unfailing supply.	9,684	10,229	19,913	4,323	7,977	12,300
II.—Works dependent on local rainfall.	3,231	2,218	5,449	1,797	3,189	4,986
TOTAL	12,915	12,447	25,362	6,120	11,166	17,286
Rainfall.	Inches.	Inches.	Inches.	Inches.	Inches.	Inches.
I.—Works having an unfailing supply.	16·14	4·84	20·98	26·39	3·26	29·65
II.—Works dependent on local rainfall.	17·65	5·40	23·05	29·73	5·98	35·71

Owing to the inclusion of the Mukti reservoir and Ojhar Tambat Canal in the statement herewith submitted, the figures of area differ somewhat from those of the Revenue Report.

It will be observed that the works dependent for their supply on local rainfall show a considerable increase in rabi area and only a slight falling off in the total, as compared with the previous year. This is explained by the fact that the supply of water was greater by reason of the plentiful rainfall, and was made use of for the better classes of rabi crops.

12. A table is attached showing the distribution of the fall in each of the past four years.

J. HART, C.E.,
Acting Chief Engineer for Irrigation.

Table showing Distribution of Rainfall each year from 1875-76 to 1878-79 (inclusive.)

	YEARS.	KHARIF.					RABI.					TOTAL.
		June.	July.	August.	September	Total.	October.	November	December.	January.	Total.

No. 143 W. I.—462, dated Bombay Castle, the 19th September 1879.

RESOLUTION—By the Government of Bombay, Public Works Department.

Read—

Memorandum from the Chief Engineer for Irrigation, No. 3586, dated 14th August 1879.—Forwards comparative statement of irrigation and rainfall in the Deccan and Gujarat for the year 1878-79.

RESOLUTION.—It is satisfactory to notice that, although, owing to heavier and better distributed rainfall, the area irrigated in 1878-79 was much less than in 1877-78, still there was no decrease of revenue, the area of superior classes of crops having considerably increased. The area irrigated, moreover, compares very favourably with the year previous to the famine, 1876.

2. The statement, with the Acting Chief Engineer's report, should be printed and circulated.

3. Copies should also, as usual, be forwarded to the Government of India.

C. J. MERRIMAN, *Col., R.E.*,
Acting Secretary to Government.

Remarks.

Ganges Canal.

The returns for November show a considerable decrease in traffic as compared with the same period last year. This is accounted for principally by the fact that, owing to severe illness among the boating class, it was difficult to get a full complement of men for boats' crews.

During the early part of the month Someyrah lock, in the Aligarh division, had to be closed for repairs.

Agra Canal.

The Agra Navigation Channel was closed during the month for the purpose of silt clearance.

D. B. HORN,
Asst. Secy. to the Govt. of Bengal,
P. W. Dept., Irrigation Branch.

The 27th January 1880.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

IRRIGATION OPERATIONS IN THE PUNJAB OF FASL RABI OF 1879-80 UP TO 31st DECEMBER 1879.

Canal Division.	Water distributed during December 1879.				Navigation return canal.		Land irrigated (approximate).		Rainfall.		Chief crops (approximate).		Remarks.
	Depth in Canal at Regulating Gauge.		Gross Consumption, cubic feet per second.		Principal items of Traffic.		Zila.	Acres.	Average.	During month.	Name.	Area in acres.	
	Full supply.	Actual throughout.	Estimated full supply.	Actual average throughout.	Up.	Down.							
Bari Doab Canal. 1st Division	4·9	3·34	3073·6	619·09	...	...	Gurdáspur ...	11,149	1·15	1·54	Wheat ...	146,974	The volume entering the head of the Bari Doab Canal was 1747·77 cubic feet per second; 33·97 cubic feet per second passed out at the various escapes, and the balance, 1,713·80 cubic feet per second, was utilized. There is an increase of 33,553 acres irrigated up to end of the month as compared with the corresponding period of last year, and of 48,002 acres as compared with the same period of 1877-78.
2nd Division, Main Branch, Lower	4·6	2·05		542·82	...	...	Amritsar ...	83,435	0·94	1·55	Barley ...	4,644

Western Jumna Canal. Karnál Division	4·33	4·07	2,546	299	...	49,893 kurris, bullies, &c., 3,943 mds. of fuel and 4,563 mds. of timber.	Umballa ...	1,921	0·79	0·38	Wheat ...	71,027	The volume entering the head of the Western Jumna Canal at Dadupur was 2,368 cubic feet per second; of this 17 cubic feet per second escaped at Budha Khera and 32 cubic feet per second passed out at the tail of the Delhi Canal. The amount utilized was 2,319 cubic feet per second. There is a decrease in area irrigated, as compared with the same period of last year of 29,587 acres, which is stated by the Superintending Engineer to be due to— 1. Sickness amongst the cultivators. 2. Late Kharif crop occupying the land. 3. Sufficient rainfall at time of sowing, and again at first watering. 4. Settlement operations inducing men to grow inferior rain crops.

(*k*)—From 15th November 1879.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY CONSTRUCTION.

PROGRESS MADE IN THE CONSTRUCTION OF THE SUKKUR-QUETTA STATE RAILWAY.

Nos. 079-080 R. C., dated Fort William, the 6th February 1880.

RESOLUTION—By the Government of India, PUBLIC WORKS DEPARTMENT.

Read again—

Public Works Department letter No. 045R.C., dated 21st January 1880, publishing in the *Gazette of India* certain papers in connection with the rapid construction of this line.

OBSERVATIONS.—The Government of India has viewed with great satisfaction the remarkable progress that has been made in the prosecution of this important work. Platelaying was commenced at Rukh, the junction of the Sukkur-Quetta State Railway with the Indus Valley State Railway, on 5th October 1879, and the line was brought into Sibi on 14th January 1880—a length of 133½ miles having been laid in 101 days. This rate of progress is unprecedented in the annals of Indian Railways; and when it is considered that at the time the work was commenced there was little permanent-way material in Sind, that all the rest had to be drawn from the various broad gauge lines in India, and that most of this material had to be carried through about 100 miles of country devoid of water, there are perhaps few, if any, other instances in the world where rail-laying has been pushed along with such rapidity against such impediments.

RESOLUTION.—The thanks of the Governor General in Council are due to His Excellency the Governor of Bombay, but for whose personal supervision, cordial and influential co-operation, as well as warm interest in the work, the officers charged with this undertaking could not possibly have accomplished their task in so short a time.

His Excellency the Governor General in Council desires also to record his high appreciation of the excellent services rendered by Lieutenant-Colonel J. G. Lindsay, R.E., Engineer-in-Chief; Mr. J. R. Bell, Superintendent of Works; and Messrs. Monk, Peel, Tait, Baxter, Moyle and Roberts, the Engineers employed under their orders. In consideration of the severe labour and hardships undergone by these officers in the discharge of their duties, the Government of India sanctions the grant to them of three months' special leave on full pay, to be taken between the months of June and October, when their services can be spared. The only restriction on this leave is that it cannot be taken in continuation of other leave, or *vice versâ*. Should the leave, however, not be desired, the immediate grant of a bonus of one month's pay in lieu thereof is hereby sanctioned. These privileges are also to be extended to three Upper Subordinates to be named by the Engineer-in-Chief of the line.

ORDER.—Ordered, that this Resolution be communicated to the Government of Bombay and the Director General of Railways for information and guidance, and be published in the Supplement to the *Gazette of India*.

ALEX. FRASER, *Major-Genl., R.E.*,
Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 3rd FEBRUARY 1880.

GENERAL REMARKS.—Slight rain fell in the Madras Presidency and in parts of Sind and the Punjab. The want of rain is felt in parts of Madras, Bengal, and Upper India. The general prospects of the spring crops remain good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Jan. 31st)	...	*Ragi* 26·53; standing crops in good condition; harvest of Bengal gram and horse-gram; second crop paddy being sown.
Kurnool („ „)	...	*Ragi* 29·30; harvest of paddy nearly completed; of *cholum* continues; paddy withered in one taluk; dry crops affected with disease in another; pasture and water ample.
Ganjam („ „)	...	*Ragi* 31·21.
Kistna („ „)	...	*Ragi* 31·15; later dry crops slightly affected by insects in 3 taluks; elsewhere doing well; harvesting of *cholum* and *varagu*; *ragi* being planted under wells; 8 inches water over anicut.
Chingleput („ „) (Madras)	·92 (average of 11 stations).	*Ragi* 22·54; cultivation of second crop paddy and *kar* in progress in 2 taluks; standing crops suffering from want of water in one taluk, and somewhat injured by insects in all except one; harvest of wet and dry crops progressing, outturn ½ to ¾; pasture sufficient.
Coimbatore („ „)	·02 (average of 2 stations).	*Ragi* 23·21; dry crops withering in 4 taluks, and parts of other four; wet crops in fair condition; harvest of paddy and some dry crops, outturn paddy ½ to full, others ⅛ to full.
Tanjore („ „)	·58 (average of 11 stations).	*Ragi* 29·24; standing crops require rain in parts of one taluk, elsewhere in good condition; harvest of paddy and a few dry grains, outturn ⅝ to full.
Madura („ „)	·53 (average of 6 stations).	*Ragi* 23·83.
Malabar („ „)	...	*Ragi* 19·37; harvest of second crop completed.
Travancore („ „)	·43	State of crops and food market same as last week.
		General Remarks.—General prospects good.
Bombay— (Feb. 4th)		
Kurrachee ...	Slight rain in Dadu and Sehwan.	Fever prevalent; cattle disease in 3 talukas; one case of small-pox in Dadu; *rabi* crops looking well.
Hyderabad ...	...	Rice lands being ploughed; *rabi* promising in 9 talukas; mortality amongst camels and horses continues; small-pox in taluka Naushahro continues; cold has set in afresh; strong northerly winds and dust.
Ahmedabad ...	...	Crops promising; public health good.
Baroda ...	...	*Rabi* crops healthy; cotton thriving; pressing of sugarcane of the last season and replanting of new sugarcane in progress.
Surat ...	...	Crops generally healthy; cotton-picking commenced.
Násik ...	...	Ague in 4 talukas; cattle disease in 2; cholera at Igatpuri; *rabi* crops fair.
Poona (Feb. 1st)	...	Cholera in Poona city, cases 7, deaths 6.
Ahmednagar ...	...	*Rabi* crops generally good; cold injured potatoes in Nagar; harvesting of *rabi* commenced; injury by rats in Kopergaon.
Sholapore ...	...	*Rabi* being harvested; public health good.
Dharwar ...	...	Fever decreasing; wheat harvest commenced; exotic cotton damaged.
Kánara ...	...	Sowing of second crop continues above ghât; fever prevails; small-pox in Honore.
Rajkot ...	...	Weather cold; wheat crops nearly ready for harvesting; health generally good.
		General Remarks.—Crop prospects continue good; fever in Kanara, Násik, and Kurrachee districts; six deaths from cholera in Poona.
Bengal— (Feb. 3rd)		
Chittagong ...	*Nil*	Weather fair; state of cold weather crops good; cholera disappearing in south; cattle disease still prevails in some parts of Cox's Bazar sub-division.
Dacca ...	*Nil*	Prospects of crops good; public health good.
24-Pergunnahs (Alipore)	*Nil*	Winter crops good; a fair outturn expected; peas and pulses being gathered; sporadic cholera in Bussirhat; public health fair.
Moorshedabad ...	*Nil*	Prospects of crops good; fever in a mitigated form still in Burwa and Dowlatabad police stations; cholera not yet disappeared from Kaliamgunge police station.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—*contd.*		
Rajshahye ...	*Nil*	Weather cool in mornings and fine; cutting of winter rice completed; outturn generally good; spring crops thriving; public health good.
Burdwan ...	*Nil*	Crops fair; health good.
Rungpore ...	*Nil*	Weather cool and dry; state and prospects of winter crops good; public health good.
Bhágalpur ...	*Nil*	Weather clear and cold; prospects of *rabi* crops good; general health good.
Purneah ...	*Nil*	Prospects of crops good all round; ploughing progressing; prices falling; small-pox prevalent; rivers higher than usual.
Patna ...	*Nil*	Rain wanted for *rabi*.
Durbhanga ...	*Nil*	*Rabi* promises to yield well; a little rain would improve prospects; tobacco good; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; outturn of *rabi* crop will be four annas less than average yield for want of rain; general health good.
Cuttack ...	*Nil*	Rice harvest completed; winter crops good; small-pox still prevalent. *General Remarks.*—General prospects continue favourable; rice still being reaped in Pooree; elsewhere harvest over, outturn on the whole a good average one; *rabi* crops generally promising, but still want rain in places in Behar and Chota Nagpore; early *rabi* ripening, and being reaped generally with good outturn; spring rice doing well, land being ploughed for early rice; general health good, but small-pox and cholera in places, and fever still prevails in Pooree.
N.-W. Provinces and Oudh—		
Benares (Feb. 3rd)	*Nil*	Prospects good.
Allahabad („ „)	...	Weather still fine; health good; general crop prospects favourable, except in unirrigable lands, where rain is badly wanted; prices almost unaltered.
Gorakhpur („ 2nd)	*Nil*	*Rabi* prospects good; health good.
Jhánsi („ 5th)	...	Prospects good; prices falling; health improving.
Agra (Feb. 3rd)	...	*Rabi* prospects good; *wheat*, *barley*, and *sarson* coming into ear; sky cloudy; sickness disappearing; cattle disease in Jarar and Pinahat has appeared.
Bareilly („ 4th)	...	Weather cloudy; harvest prospects good.
Meerut („ „)	...	Weather cloudy; wind east; prospects good.
Kumaun (Feb. 2nd)	...	Sky cloudy.
Lucknow („ 4th)	...	Prospects good; *dhan* 31 seers.
Partabgarh (Feb. 2nd)	...	*Wheat* and *barley* have come into ear and *peas* are in blossom; *rabi* is promising and plentiful, but there has been no rain in December or January to give it an impetus.
Sitapur („ 4th)	...	Sky cloudy; prospects favourable.
Fyzabad („ „)	*Nil*	Prospects satisfactory. *General Remarks.*—No rain during the week; health good and *rabi* prospects fair; rain is wanted for unirrigated land, especially in Allahabad and Partabgarh; cattle disease has appeared in Agra.
Punjab—(Feb. 3rd).		
Delhi ...	...	Prospects good; health still improving; further fall in prices.
Hissar ...	...	Weather still cloudy; *rabi* prospects good; prices steady; health good.
Umballa ...	...	Rain wanted; crops and health fair.
Jullundur ...	...	Prices falling; health and crops good.
Lahore ...	...	Crops and health good.
Ferozepore ...	...	Agricultural prospects fair; slight fall in prices.
Siálkot ...	Slight shower of rain.	Prospects fair; weather cloudy.
Ráwalpindi ...	...	No report received.
Peshawar ...	2	Prospects average; slight fall in prices.
Mooltan ...	...	Crops and health good; rain required; slight fall in prices.
Dera Ismail Khan ...	...	Health good; prospects fair; prices stationary. *General Remarks.*—Prospects and health generally good, and prices of food grains falling in most districts.
Central Provinces—		
Nágpur (Feb. 4th)	...	Clear; *rabi* good; *kharif* threshing continues; health good; prices stationary.
Jubbulpore („ „)	...	Cloudy; warm; *rabi* promising; small-pox slight; prices stationary.
Saugor	...	Cloudy at times; *rabi* favourable; health good; prices unchanged.
Seoni	...	Clear and cool; *rabi* fair; few cases of small-pox.
Hoshangabad ...	...	*Rabi* promising; pulses slightly injured by frost; prices unchanged.
Raipur (Jan. 31st)	...	Clear and cool; *rabi* favourable; cattle disease prevalent; prices stationary.
Sambalpur („ 30th)	...	Cool; *sugarcane* cutting and pressing continue; no other crops on the ground; small-pox prevalent; prices steady. *General Remarks.*—Clear and cool; *kharif* threshing continues in some districts; *rabi* generally good; prices stationary.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
British Burma— (Feb. 4th)		
Akyab	...	Public health good; cattle disease very slight.
Rangoon	...	Nine fatal cases of small-pox in town; a few cases of small-pox and fever in Hanthawaddy district, otherwise public health good; slight cattle disease; reaping finished in all but two townships.
Bassein	...	Public health good; slight small-pox.
Prome	...	Small-pox very prevalent in Prome town; a few fatal cases also in district.
Amherst (Moulmein) ...	...	Public health good; crops threshed and winnowed.
Toungoo	...	Public health fair; small-pox very slight. *General Remarks.*—Small-pox still prevalent, otherwise general health of province satisfactory.
Assam—(Feb. 4th)		
Gauháti	*Nil*	Weather seasonable; mustard-gathering going on; land ploughing for *aus* cultivation; prospect of tea favourable.
Sylhet	*Nil*	Bumper crop of mustard; cold weather crops generally good.
Cachar	*Nil*	Weather seasonable; no rice crops on the ground; common rice 14½ seers per rupee; public health good.
Dibrugarh ...	...	No crops now on the ground; land being prepared for *aus* crop; cattle disease still prevalent.
Mysore and Coorg— (Feb. 4th)		
Bangalore ..	...	Standing crops in good condition; prospects generally favourable; fever prevalent in parts, otherwise health good; prices stationary.
Mysore ...	...	No reports received.
Mercara ...	...	
Berar & Hyderabad— (Feb. 4th)		
Amráoti	...	*Rabi* crops progressing favourably.
Akola	...	Crops doing well; prospects good.
Hyderabad ...	...	Agricultural prospects still unfavourable; weather fair; no disease.
Central India States— (Feb. 4th)		
Indore	...	Health and prospects good.
Morar (Gwalior) ...	...	Prospects good; *jowar* 29 seers.
Sutna ...	...	Prospects good; *jowar* 29 seers.
Rutlam ...	...	Health and agricultural prospects good.
Neemuch ...	...	Health good; crops thriving.
Goona ...	...	Health good; wheat 13 seers.
Bhopal ...	...	Public health good.
Agar ...	...	Health and prospects good.
Nowgong ...	...	Fever prevailing; *rabi* crops good.
Mánpur ...	...	Health good; *rabi* crops doing well.
Rajputana—		
Abu ...	...	Report not received.
Sirohee (Jan. 25th)	...	Wells pretty full; tanks drying; fever less; crops fair; suddenly much colder.
Marwar („ 24th)	...	Little water in tanks; wells almost full; health good; crops excellent; *kharif* almost gathered.
Meywar ...	...	Report not received.
Harowtee (Jan. 31st)	...	Colder; occasional clouds; health and prospects good.
Jhallawar ...	...	Health and prospects good.
Ajmere (Feb. 4th)	...	Clouds still about; prospects good.
Jeypore ...	...	Report not received.
Bhurtpore ...	...	
Ulwur (Feb. 3rd)	...	Rain wanted; cloudy; health good.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 10th FEBRUARY 1880.

GENERAL REMARKS.—Rain fell in most of the districts of the North-Western Provinces Oudh and the Punjab, and also in Assam, doing much good to the spring crops. There was some rain also in Madras, and there were slight showers in Bengal, but more rain is wanted in both of these provinces. Agricultural prospects continue generally good.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Bellary (Feb. 7th)	...	*Ragi* 27·28; standing crops generally good; harvest of Bengal gram and horse gram; second crop paddy being sown.
Kurnool („ „)	...	*Ragi* 28·75; harvest of *cholum*, outturn ½ to full; cotton affected with disease in one taluk; pasture and water ample.
Ganjam („ „)	...	*Ragi* 31·39.
Kistna („ „)	...	*Ragi* 31·58; standing dry crops affected by insects in three taluks; oilseeds and maize sown in three taluks; 5 inches water over anicut.
Chingleput (Madras) („ „)	·7 (in one station).	*Ragi* 22·29; cultivation of second crop, and a few kinds of first crop paddy and also *ragi* in progress in three taluks; standing crops somewhat injured by insects in all taluks except one; withering in one taluk; harvest of wet and dry crops progressing, outturn ½ to ¾; pasture sufficient.
Coimbatore („ „)	...	*Ragi* 22·8; dry crops withering in five taluks and parts of other five; wet crops in fair condition; harvest of paddy ⅓ to full, a few dry crops ⅙ to ¾.
Tanjore („ „)	1·28 (in one station).	*Ragi* 29·14; wet crops generally good, require rain in one taluk; harvest of paddy and a few dry grains, outturn ¾ to full.
Madura („ „)	·66 (average of 5 stations).	*Ragi* 23·81.
Malabar („ „)	...	*Ragi* 20·29.
Travancore („ „)	...	Paddy crop good, being harvested; state of food market unchanged. *General Remarks.*—General prospects good, except in parts of South Arcot, North Arcot, Trichinopoly and Tinnevelly, where crops have suffered from deficiency of rain.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—(Feb. 11th)		
Kurrachee ...	Slight shower in Kurrachee and Kotri.	Weather cloudy; small-pox in Dodu Taluq; *rabi* crops coming into ear; preparations for *kharif* in Jerruck and Shâhbandar Districts; cattle disease generally prevalent.
Hyderabad ...	...	Small-pox and disease amongst horned cattle in two talukas; mortality amongst camels and horses in Badin, and amongst camels in Mohbatdero continues; *rabi* crops promising, would be better for rain.
Ahmedabad ...	...	Crops progressing; prices falling.
Baroda ...	...	All crops, including cotton, good; cotton-picking commenced; prices slightly lower.
Surat ...	...	Cotton-picking and *rabi* harvest commenced in Olpád; crops healthy in other talukas.
Násik ...	...	Report not received.
Poona (Feb. 8th)	...	Cholera in Poona city, cases 5, deaths 3.
Ahmednagar ...	...	Crops generally good; harvesting continues.
Sholapore ...	...	Report not received.
Dharwar ...	...	Wheat harvest in progress; exotic cotton damaged; fever prevalent.
Kánara ...	...	Sand crop plants thriving on coast; fever general; small-pox in Honore.
Rajkot ...	...	Weather cold; cotton-picking commenced; wheat crops ready for harvest; heath good.
		General Remarks.—*Rabi* crops, including cotton, generally promising; exotic cotton damaged in Dharwar; fever in Dharwar and Kanara.
Bengal—		
Chittagong ...	*Nil*	Prospects of cold-weather crops good; cholera died out, except in Moiscal.
Dacca ...	*Nil*	Prospects of crops good; public health good.
24-Pergunnahs (Alipore)	*Nil*	Prospects good; peas and pulses being gathered; some cholera cases in Busseerhat; health in general good.
Moorshedabad ...	*Nil*	Prospects of crops good; both fever and cholera in mitigated form in some thanas of sudder circle; small-pox not yet disappeared from Jungypore Town.
Rajshahye ...	*Nil*	Weather cool in mornings and fine; cutting of winter rice completed; outturn generally good; spring crops thriving; public health good.
Burdwan ...	*Nil*	Crops fair; rain wanted; health good.
Rungpore ...	·07	Rain benefited winter crops; public health good; price of rice low.
Bhágalpur ...	·45	Weather cloudy and cold; *rabi* crops promising; general health very good.
Purneah ...	*Nil*	Prospects of crops good; many cases of small-pox.
Patna ...	·04	Rain too late.
Durbhanga ...	·52	Weather cloudy; *rabi* continues well; prices stationary; public health good.
Hazáribágh ...	*Nil*	Weather seasonable; now cloudy; sun becoming hot in day; *rabi* crops somewhat suffered for want of rain; general health good.
Cuttack ...	*Nil*	Rain wanted for ploughing; winter crops good; small-pox still prevalent; prices stationary.
		General Remarks.—Slight rain in Durbhunga, Bhágalpur, Chumparun, Patna, and Rungpore; rain still wanted for *rabi* crops in places in Behar, and also for ploughing in some districts; *rabi* crops in Chota Nagpore suffered somewhat for want of rain; *rabi* prospects, however, on the whole promising; pulses, mustard, and other earlier *rabi* crops being reaped; a good outturn generally expected; sugarcane also being cut and pressed; small-pox and cholera still in some places.
N.-W. Provinces and Oudh—		
Benares (Feb. 10th)	·6	Prospects good.
Allahabad („ „)	·2 at Manjhanpur; about ·5 at Sadr.	Prospects favourable; prices stationary.
Gorakhpur („ „)	Steady rain falling in North.	Rain not needed for *rabi* crops which are excellent; health good.
Jhánsi („ 11th)	Slight shower on the 4th.	Prices stationary; health good.
Agra („ 10th)	Average in 3 parganas ·1, in others partial.	*Rabi* prospects favourable; sickness disappearing; cattle disease in Jarar has appeared.
Bareilly („ 11th)	Slight rain.	
Meerut („ „)	*Nil*	Cloudy; prices slightly falling.
Kumaun („ 10th)	Slight rain on the 9th.	Sky generally cloudy.
Lucknow („ 11th)	·2 on 5th	Prospects good.
Partabgarh („ 9th)	...	Prospects good; fields are being irrigated; ears have come out in wheat and barley.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
N.-W. Provinces and Oudh—*contd.*		
Sitapur (Feb. 11th)	·1	Sky cloudy.
Fyzabad („ „)	·3	Prospects satisfactory.
		General Remarks.—Slight rain everywhere (except Meerut and Partabgarh) which has been of great benefit to the crops; prospects fair; health good; cattle disease has appeared in Agra.
Punjab—(Feb. 10th)		
Delhi ...	*Nil*	Prospects good; prices steady; health fair.
Hissar ...	·2	Prospects good; prices favourable.
Umballa ...	·8	Crops and health good.
Jullundur ...	·2	Prices falling; crops and health good.
Lahore ...	·2	State of crops and health good.
Ferozepore ...	·2	Agricultural prospects fair; prices firm.
Siálkot ...	1·0	Prospects good.
Ráwalpindi ...	...	No report received.
Pesháwar ...	·3	Harvest prospects fair; price of barley lower.
Mooltan ...	*Nil*	Crops and health good, but rain wanted.
Dera Ismail Khan ...	*Nil*	Prospects fair; health good.
		General Remarks.—Reports still favourable; the late rain which has fallen over a considerable portion of the province promises well for the crops.
Central Provinces—		
Nágpur (Feb. 11th)	...	Cloudy, close; linseed and wheat in high lands being gathered; health good; prices stationary.
Jubbulpore ...	...	Cloudy and warm; grain slightly damaged by frost; other *rabi* crops good; few cases of small-pox; prices slightly fallen.
Saugor (Feb. 11th)	...	Cloudy; *rabi* favourable; health good; prices stationary.
Seoni	...	Clear; *rabi* fair; no further cases of small-pox.
Hoshangabad ...	...	Occasionally cloudy; *rabi* promising; health good; prices slightly fallen.
Raipur (Feb. 7th)	...	Warm; *rabi* good; cattle disease continues; prices stationary.
Sambalpur („ 6th)	...	Clear; land being prepared for sugarcane plantation; small-pox continues.
		General Remarks.—Cloudy, close; *rabi* crops being gathered in some districts; prospects generally good; prices stationary.
British Burma—(Feb. 11th)		
Akyab ...	...	A few deaths from cholera in Rathaidoung and Myohoung townships and Akyab town, otherwise public health fair; slight cattle disease.
Rangoon	...	Fourteen fatal cases of small-pox; a few cases of cholera and small-pox in the Hanthawaddy district; fever somewhat severe in Hmawbee sub-division; slight cattle disease; reaping nearly completed.
Bassein	...	Cholera in Ngathinegyoung sub-division, otherwise public health generally good.
Prome	...	Small-pox very prevalent in Prome town; some cases also in Mahathaman.
Amherst (Moulmein) ...	...	A few cases of cholera in the district, otherwise public health good.
Toungoo	...	Small-pox very slight, otherwise public health fair.
		General Remarks.—Cholera, small-pox, and measles prevalent in parts of province; slight cattle disease here and there, otherwise public health fair; harvest all but finished.
Assam—(Feb. 11th)		
Gauháti	·2	Weather seasonable; mustard almost gathered; land being ploughed for *aus* cultivation; prospects of tea favourable.
Sylhet	·08 reported from Karimganj.	Weather growing hot; cold-weather crops excellent; *bura* being transplanted.
Cachar	·17	Weather unchanged; no rice crops on the ground; common rice at $13\frac{8}{16}$ seers a rupee; public health good.
Dibrugarh ...	1·72	Land preparing for *aus* crop; cattle disease prevalent.
Mysore and Coorg—(Feb. 11th)		
Bangalore ...	...	Harvesting of sugarcane continued; standing crops in good condition; prospects favourable; health generally good, but fever prevalent in parts; prices falling.
Mysore ...	...	No report received.
Mercara ...	...	
Berar & Hyderabad—(Feb. 11th)		
Amráoti	...	Reaping of *rabi* crops commenced.
Akola	...	*Rabi* crops thriving; prospects good.
Hyderabad ...	...	Agricultural prospects still unfavourable; weather fair; no disease.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Central India States— (Feb. 11th)		
Indore	...	Health good ; prospects of crops favourable.
Morar (Gwalior) ...	...	Health and prospects of crops good ; weather cloudy ; wheat 12 and *bajra* 27 seers per rupee.
Sutna ...	...	Cloudy ; prospects good ; *jowar* 30 seers.
Rutlam ...	...	Weather clear ; health and prospects good.
Neemuch ...	Slight showers on Friday.	Weather cloudy ; health and crops good.
Goona ...	...	Crops and health good ; wheat 13 seers.
Bhopal ...	...	Health and prospects good.
Agar ...	...	
Nowgong ...	...	No report received.
Mánpur ...	...	Weather cloudy ; *rabi* crops good.
Rajputana—		
Abu ...	...	No report received.
Sirohee (Feb. 8th)	...	Tanks drying ; wells fairly full ; health normal ; crops fair ; much colder.
Marwar (Jan. 30th)	...	Very little water in tanks ; wells almost full ; crops flourishing ; health good ; cold mild ; *kharif* almost gathered.
Meywar ...	...	No report received.
Harowtee (Feb. 7th)	...	Health and prospects good.
Jhallawar ...	...	
Ajmere ...	...	No report received.
Jeypore ...	...	
Bhurtpore ...	...	
Ulwur (Feb. 10th)	Slight showers	Small benefit ; rain much wanted ; health good.

The Gazette of India.

Nº 8. } CALCUTTA, SATURDAY, FEBRUARY 21, 1880.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1878-79.

Nos. 52—59 T, dated Fort William the 2nd February 1880.

RESOLUTION—By the Government of India, PUBLIC WORKS DEPARTMENT.

Read—

Letter from the Director-in-Chief, Indo-European Telegraph Department, No. 1267, dated 28th August 1879, submitting the above report and enclosures.

OBSERVATIONS.—Beyond the ordinary working of the Department, the only important event of the year is the purchase of the new specially designed steam ship *Patrick Stewart* for cable service in the Persian Gulf.

CAPITAL.

2. The Capital account at the close of the year is stated to stand approximately at £ 1,164,001-10-2.

REVENUE.

3. The earnings of the year amounted to £ 68,791-3-6, or about 71 per cent. over those of the previous year, which is very satisfactory.

4. The working expenses were £ 62,522-15-7 inclusive of a sum of Rs. 44,820 for cable supplied to the Military Department for torpedo purposes, so that the net gain amounts to £ 6,268-7-11.

5. Including other miscellaneous receipts (Appendix B), the net revenue amounts to £ 7,328-19-4; compared with the previous year's working which exhibited a loss of £ 40,182-16-0, the improvement is very great.

6. The expenditure is augmented by certain charges in connection with the telegraph station at Henjam, and the Political Agency at Gwadur, the necessity of continuing the debits under these heads to the Telegraph Department are at present under consideration by the Government of India.

7. No new construction was undertaken during the year, so that the length of lines worked by the Department remained the same as in the previous year.

8. The maintenance and repairs have been satisfactorily performed.

INTERRUPTIONS.

9. The interruptions causing stoppage to traffic on the Persian Section amounted to a total interval of 1 day 14 hours and 20 minutes.

In the Persian Gulf Section there was no interruption causing stoppage to traffic.

The interruptions on the lines of the Indo-European Company, working in connection with this system, amounted to 9 days 3 hours 53 minutes.

10. The proposals made in paragraph 16 of the report for printing only the summary of interruptions is approved.

TRAFFIC.

11. The improvement shown in speed and accuracy of transmission of messages is noted with satisfaction.

12. The proposal to omit from the report in future certain traffic tables, and to retain only the principal ones as explained in para. 25 of the report, is approved.

INSPECTIONS, BUILDINGS AND STORES.

13. With the exception of the station buildings at Jask, all other buildings are reported to be in a satisfactory condition.

14. The attention of the Government of Bombay will be invited to the further repairs, &c., said to be necessary to the buildings at Jask.

15. The heavy loss in working referred to in the 11th paragraph of the Resolution on the report for the previous year has disappeared at a much earlier date than could have been anticipated, while the political, administrative and commercial advantages derived are of great importance.

16. The discrepancies between the figures shown in this report as compared with the annual accounts submitted by the Examiner, as detailed in the note by the Accountant General, which accompanies, should be explained.

17. The debit of Rs. 1,01,441 and a subsequent item on the same account of Rs. 57,718-0, make a serious burden on the accounts of the year, but they do not affect the working of the period under review. These charges were rendered necessary to clear the unadjusted balance at debit of "Remittance Account, London," appertaining to the years prior to 1869-70.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Director-in-Chief, Indo-European Telegraph Department, for information and guidance.

Also, that copies of the Report and Resolution be forwarded to the Department of Finance and Commerce and to the Foreign, Marine, and Home, Revenue and Agricultural Departments, for information.

To the Government of Bombay, in the Public Works Department, for information, and with reference to paras. 13 and 14 of the Resolution, and para. 27 of the Report.

To the Director General of Telegraphs for information. and to the Publisher of the *Gazette of India* for publication in the Supplement to the *Gazette of India*.

Ordered further, that the Report and Resolution be forwarded to the Secretary of State for information of Her Majesty's Government.

ALEX. FRASER, *Major-Genl., R.E.*,
Secretary to the Government of India.

No. 1267, dated 28th August 1879.

From—Lieut.-Col. J. U. Bateman-Champain, R. E., Director-in-Chief, Indo-European Govt. Tel. Dept.,

To—Secretary to the Government of India, P. W. Dept.

I have the honour to submit the Administration Report of my Department for 1878-79, in the preparation of which I have, in accordance with the orders of Government, dated 28th December 1878, endeavoured to condense as much as possible the several observations which I have to lay before you.

Preliminary observations.

2. In the present case this should prove no very difficult task, for the history of the Indo-European Telegraph during the year just over has been exceptionally devoid of incident.

3. We have had 12 months' experience of the new system of account, known as the Common Purse Arrangement, with the Eastern and Indo-European Telegraph Companies, a system, the principles of which have already been fully described, and we have provided a new and specially designed steam ship for cable service in the Persian Gulf. On these two subjects I will submit a few remarks further on in this letter.

CAPITAL.

4. The Capital Account of the Department which stood at £1,153,751-15-5 at the commencement of the year was raised to £1,164,001-10-2. At the close the increase being almost entirely due to expenditure incurred on account of the new steamer just mentioned.

Departmental Capital Account.

REVENUE.

5. Our traffic receipts are obtained partly in India and partly in Europe, and they are derived in all cases from tariffs framed on the basis of the international monetary unit—the francs. In India the francs are reduced to rupees which are converted into sterling at the rate of Rs. 10=£ 1, and in Europe the francs are converted into sterling at the rate of francs 25=£ 1. So far therefore as the Indian receipts are concerned, the exchange followed makes them appear, as was the case in previous years, somewhat higher than they really are. But as the expenditure is dealt with at the same rate of exchange, the result exhibited in the balance sheet is less favourable to the Department than would have been the case had the market rate of exchange been followed on both sides of the Account.

Explanation of the manner in which the revenue is calculated.

6. The plan followed is in accordance with the ruling of Government, and is the one which has been adhered to since the commencement of our operations.

Financial result of the first year's working of "the Common Purse".

7. Owing to the beneficial effect of the Common Purse Arrangement the total net traffic receipts of the Department reached the sum of £68,791-3-6, a higher figure than they have ever yet attained since the opening of the Red Sea line, except in the year 1875-76 when the rival route was seriously interrupted.

8. On the other hand, the amount recorded as expenditure was only £52,522-15-7, being nearly £18,000 less than that recorded in 1877-78. But as I pointed out in my last year's report, the expenditure then brought to account comprised outlay previously incurred.

Diminution of expenditure.

9. In like manner I feel it now my duty to state that the present amount is arrived at after a deduction by the Examiner of the large sum of Rs. 1,17,139 for credits under the suspense heads of stores, the principal item of which is Rs. 44,820 for cable supplied to the Military Department for torpedo purposes.

Credit for some cable made over to the Military authorities.

10. The satisfactory excess of receipts over expenditure would have been appreciably larger but for the debits against my Department of charges not, I venture to think, strictly required for administrative purposes. These extra departmental debits, if I may so term them, are for the maintenance of a telegraph station at Henjam, not now required for signalling purposes, and a heavy contribution towards the expenses of the Political Officer at Gwadur. I have lately submitted to Government special proposals for economy under both these heads.

Remarks on certain annual charges which might possibly be avoided or reduced.

LINES, MAINTENANCE AND REPAIRS.

11. No new works or extensions were necessary during the year, the lengths of the different sections in Persia and the Persian Gulf remain therefore as printed in my last report.

No new construction during past year.

Making due allowance for an additional year of age, the condition of the cable and land lines was, generally speaking, the same at the close of 1878-79 as at the close of 1877-78.

12. The repairs effected in Persia were few and slight; on the Mekran land line they were more extensive. Owing to heavy rainfalls alterations were carried out at 12 rivers and two salt swamps, while on the line, as a whole, 236 posts and 42 miles of wire were replaced.

Repairs to lines in Persia very slight. Those on Mekran Coast more important.

13. The ends of the main cable at Faô and Manora were also renewed, as were several lengths in the short cables in Kurrachee Harbour.

Repairs to cables.

INTERRUPTIONS.

14. In Persia the interruptions were as follows :—

PARTIAL NOT STOPPING TRAFFIC.		TOTAL STOPPING TRAFFIC.
1 wire broken or 2 in contact.	2 wires broken or 3 in contact.	All wires disabled.
D. H. M.	D. H. M.	D. H. M.
21 19 46	5 18 30.	1 14 20.

15. These figures compare favourably with those in my report for the last year, the improvement being due to the fact, that the winter in Persia was, on the whole, less severe than in 1877-78. It shows perhaps as favourable a state of working as we can fairly hope to attain both in respect of the number and duration of the interruptions, nearly all of which were attributable to ordinary causes, cases of wilful damage being unprecedentedly rare.

Causes of interruptions which occurred on the Persian lines during the official year 1878-79.

16. Full particulars of the interruptions are given in the attached tables numbered 1 to 4, but I think it would be sufficient for record in my report if the summary only were printed which I have underlined in red ink and marked C on No. 4.

Reference to tabular statements of interruptions.

PERSIAN GULF TELEGRAPHS.

17. The interruptions on these lines though not more frequent than in former years were of unusually long duration, as the old repairing steamer, the *Amberwitch*, happened unfortunately to be on her way to be docked when the principal break occurred. Communication either by land line or cable was however maintained throughout the year except on the Turkish route between Faô and Bushire, which was interrupted 1¼ day for repairs.

Remarks on delay in repairing cable.

18. The interruptions in the Persian Gulf may be summarised as follows :—

Total length of interruption to Persian Gulf lines.

TEHERAN ROUTE. *Persian Gulf Section.*			TURKISH ROUTE. *Persian Gulf Section.*								
On cables between Bushire and Kurrachee.			On land line between Jask and Kurrachee.			Simultaneous interruption of cable and land line.			Interruptions on Faô-Bushire cable.		
D.	H.	M.	D.	H.	M.	D.	H.	M.	D.	H.	M.
110	21	30	28	14	50	0	0	0	1	6	0

19. The causes of the four interruptions in the cables were, (1) the development of a fault in manufacture, (2, 4), the corrosion of the iron guards, and (3) the chafing through of the iron guards. The interruptions on the land lines were mainly due to violent floods from exceptionally heavy rains, the extent of which may be inferred from the fact, that whereas the usual annual rainfall in Sind is about 7 inches, the rainfall registered in 1878-79 was 25 inches.

Reasons given for the different breaks.

20. Tables D to G prepared by Mr. Mance are attached, showing the dates of the different faults in the cables and their repair, the amount of cable expended from stock in the operations, and the insulation of the different sections at the end of the year. A table, H, prepared by Mr. Ffinch is also attached, giving the details of the interruptions and repairs of the land line.

Tables explanatory of condition of cables, &c., attached to report.

21. The interruptions stopping traffic on the Company's section between London and Teheran amounted to 9 days 3 hours 53 minutes, which, added to the interruptions of a similar nature in Persia of 1 day 14 hours and 20 minutes, makes a gross total 10 days 18 hours and 13 minutes, during which the Teheran route was incapacitated from carrying messages.

Interruptions on Indo-European Company's lines during year.

TRAFFIC.

22. The year ending the 31st March 1879 will be noteworthy as the first year of our participation in the Common Purse Arrangement originated between the Eastern and Indo-European Telegraph Companies in September 1877 for the division of net traffic receipts on Indian and Trans-Indian messages. This Common Purse System was fully explained in my previous Administration Report and accompaniment. It will therefore be sufficient here to state that, as shown in the Renenue Account, the financial result of our first year's working was a net gain of £ 20,000, as the amount credited by us to the Common Purse was £ 42,264 and the amount received from it was £ 62,252.

Remarks on the operation of the Common Purse Arrangement.

Net gain of £ 20,000 in consequence.

23. It is deserving of record that this gain was obtained without any increase of departmental expenditure whatever, in fact, with decreased expenditure, as the outlay for advertising and agencies was much reduced during the year.

Reduced outlay on agencies and advertising owing to new system.

24. The work entailed by the Common Purse Arrangement is performed by the London Office, and it will, I hope, be possible to carry it on without any increase of establishment. The accounts exchanged between the contracting Administrations, and the check exercised, will be found described in the accompanying memorandum B on which I am awaiting the orders of the India Office.

Reference to appended memorandum on proposed plan of checking accounts.

25. The speed of the Indo-European route was, as a whole, highly satisfactory, and the accuracy of the sections under my charge was, according to the percentage lists attached, also satisfactory. A number of tables prepared by Mr. Herbage are given in the Appendix. These tables are interesting as exhibiting the traffic from many different points of view, but as their preparation entails considerable labour, I would recommend, with a view to future economy in the Traffic Branch, that only the principal tables lettered in red ink be printed.

Rapidity and accuracy of working generally satisfactory.

Reference to appended traffic tables.

Proposal to diminish the number of these returns.

26. The rules and tariffs of the St. Petersburg Convention were in force during the year.

St. Petersburg Convention in force.

INSPECTION.

27. The stations in the Persian Gulf were twice inspected during the year, once by the Acting Engineer, and, with the exception of Fâo, once by the Deputy Director, who reports that the internal arrangements of the offices and the state of the records and stores were satisfactory. With regard to the buildings, I extract the following remarks by Mr. Ffinch :—

Yearly inspections of lines and stations.

Fâo.

"*Fâo.*—Wooden building in a satisfactory state. The roof of the godown fell in during the year, but has since been repaired."

"*Bushire.*—Only two out of the five houses to be built for the staff and for offices are completed, and a third is expected to be ready by the 1st of May. The finished buildings are all that could be desired, and as other houses can easily be rented in the close vicinity, no inconvenience is experienced from the remaining houses not being ready. The contract time has now expired, but the Political Resident, Bushire, is of opinion that extra time should be allowed. A wooden cable house is in use here, but it is proposed to build a stone one after sanction of the Persian authorities has been obtained; this the Resident has applied for."

Bushire.

"*Henjam.*—A wooden building in good order; it has been painted on the outside and oiled on the inside during the year. The mat outoffices are a constant source of expense, and will perhaps be replaced by stone and mud ones during the ensuing year. The wooden cable house will also be removed and a stone one substituted."

Henjam.

"*Jask.*—Rupees 3,000 have just been spent on the absolutely necessary repairs to these buildings, and I regret to say that the Public Works Department estimate some Rs. 10,000 more are required to complete the repairs; within the last five years Rs. 24,659 have been spent on the Jask buildings, but much of the work done has turned out ineffective; this is partly attributable to the only water obtainable for the work being slightly brackish.

Jask.

"*Charbar.*—The buildings have been repaired and are now in a satisfactory state. The native town is now again established on its former site near the fort and away from the telegraph buildings."

Charbar.

"*Gwadur.*—These buildings have also been repaired and are now in fair order. As the staff at this station has been so reduced, it is a matter for consideration whether the present three blocks of buildings should be maintained; but a separate report will be addressed to you on this subject. The place still continues unhealthy."

Gwadur.

"*Ormara.*—The building here has just been repaired by the Public Works Department, but as the money available was only sufficient for absolutely necessary repairs, such as turning the tiles and repairing the roof, a further expenditure will have to be incurred this year for white-washing, &c."

Ormara.

"*Manora.*—The buildings and sheds are in good order. During the year a house was built for the engine foreman, and the lascars' lines were added to."

Manora.

"KURRACHEE.—The usual annual repairs have been carried out. These buildings still leak badly whenever rain falls."

Kurrachee.

"The buildings at Pusnee and Sonmeanee have also been repaired, the latter is now being occupied by an Officer of the Commissariat connected with the Afghanistan Campaign, and by a Post Master."

Pusnee and Sonmeanee.

28. Lieutenant Colonel Smith, Director of the Persian Section of the Telegraph, had but just returned from an extended tour of inspection at the beginning of the year now under report, and it was not deemed necessary for him to take the usual annual journey between Teheran and Bushire in 1878-79. Nor did I myself leave England, as it fell to my lot to carry out the orders of the Government of India in connection with the purchase of a new cable vessel, and this work occupied my attention from August 1878 till April 1879.

29. The circumstances which rendered it necessary to provide a new ship to replace the *Amberwitch* have been already so fully recapitulated that I need only here repeat the main facts. The *Amberwitch* after 16 years' work required very extensive and costly repairs if she were to be retained as our cable-repairing ship. The Government of India approved, for reasons given in my letter No. 1000 of the 7th January 1877, of my suggestion that, instead of repairing the old vessel, a new and more suitable one should be procured in England, and Lieutenant Stiffe was authorized to join me in London to help in taking the necessary action. With the advice and assistance of the Admiralty we selected an iron vessel just begun by Messrs. Key, Ship Builders and Engineers of Kirkcaldy. To complete her with 4 cable tanks and all the special apparatus required for a telegraph ship was a tedious business, and the weather being exceptionally adverse to the builders' operations, the launch was not effected till the 5th April 1879. The new ship which has been fully described in my letter No. 1073 of the 6th March 1879 was, agreeably to the orders of the Secretary of State, named the *Patrick Stewart* in memory of the distinguished originator of the Indo-European Telegraph. She is a much larger, faster and better ship in every way than the *Amberwitch*, and is, of course, very much more completely equipped. She sailed from England on the 4th May, and, commanded by Lieutenant Stiffe, arrived in Bombay early in June.

Purchase of new steamer *Patrick Stewart*.

30. A tabular statement attached to this report and marked S shews how the *Amberwitch* steam ship has been employed during the past year.

STORES.

31. Appendix T indicates the nature of the stores received and issued in the Persian Gulf Section. It does not appear to call for any special remark.

32. In the Persian Section the consumption of stores by the Director and staff was as usual very moderate.

33. Lieutenant Colonel Smith and Mr. Ffinch have as heretofore carried on the duties of their divisions with most creditable efficiency, and both of them write in high terms of the conduct of the Officers and men under their orders. The general behaviour of the staff, without an exception worthy of note, has been thoroughly satisfactory.

Conduct of staff.

34. Mr. Brasher's assistance and co-operation have, as always, been most valuable to me, and to his intimate acquaintance with the details of telegraphic traffic and accounts the satisfactory result of the joint purse is largely due.

ADMINISTRATION REPORT.

1878-1879.

KURRACHEE, 9TH APRIL 1879.

The electrical condition of the core of the different sections as indicated by the tests observed during March last is shewn in the attached statement A, and compared with the insulation of each section during the corresponding months of 1878 and 1863, or the year of submersion.

HISTORY OF THE CABLES.

FAO-BUSHIRE CABLE.

2. The insulation of this section is not so high as in March last year; during the recent repairs I observed that the cable on the Bushire side of the ship tested much lower than that towards Fao. The decrease in insulation is probably due either to the Bushire shore end, or to the joints inserted during the diversion of 1877 and the recent repairs. I am of opinion that it is extremely difficult, if not absolutely impossible, to make joints at sea, or even in the tanks at Manora, as perfect as in the factory when the core is first manufactured. I am however equally certain that, except in cases of very bad workmanship, the joints are sufficiently reliable for all practical purposes. It is somewhat singular that the two faults cut out of this section within the last two years should be defects of manufacture which have remained unsuspected for 15 years, in spite of their existence; the insulation of the cable has been preserved probably by a thin film of gutta percha, and the resistance per knot has until quite recently been higher than that of any other section on the line. The sheathing of this section at the locality of the recent repairs was in excellent condition.

BUSHIRE-HENJAM CABLE.

3. The intermittent fault so frequently referrred to in previous reports on this section still exists, but its resistance has on no occasion been sufficiently low to permit of its being localized. As there is no danger of its affecting the working, it has not been considered advisable to submit the cable to prolonged electrification with a battery sufficiently powerful to break it down. The Bushire-Henjam cable has been repaired twice during the year, and I am of opinion that the cause of the interruption has on each occasion been the fact of the cable not resting evenly on the bottom. On the second occasion the guards and copper conductor parted while the percha remained unbroken. A fault of this description is of most unusual occurrence. I regret to say that the sheathing of the cable wherever it has been lifted within 70 miles of Henjam has been found to be in very indifferent condition. The low insulation in March last is due to the unsteadiness of the intermittent fault which gave much anxiety and trouble at the time of the recent repairs. Previous to the last fault the insulation of this section was 200 megohms per knot; it is now slowly recovering itself, and at the present moment is over 100 megohms.

HENJAM-JASK CABLE.

4. The electrical condition of this section is satisfactory. No repairs of any kind have been necessary during the year.

BUSHIRE-JASK INDIA RUBBER CABLE.

5. The minute fault in this section has increased in resistance, and the cable now tests better than it did during March last year. It has not been necessary to disturb this section in any way.

JASK-GWADUR CABLE.

6. One repair has been necessary on this section, about 74 miles from Jask. The electrical condition of the cable is now quite satisfactory. The fault in this case appears to have been caused by the iron guards chafing through on a hard patch and then cutting into the core, thereby destroying the insulation, but not altogether interrupting the communication.

GWADUR-MANORA.

7. This section has given no trouble, and its present electrical condition is quite satisfactory.

HARBOUR CABLES 1, 2 AND 3.

8. Renewals have been effected to the extent of nearly three miles during the year and the line considerably strengthened throughout. An additional cable house has been erected in the immediate vicinity of the only point where damage by native craft is apprehended. Several of the sections have been entirely relaid and the ends of all the old ones renewed throughout. The route between Kurrachee office and cable house No. 1 has been changed and pieces of core substituted for the ordinary cable. These are laid in a continuous culvert constructed at a trifling expense and arranged so that the whole can be easily flooded whenever desired.

9. The particulars of the different faults which have occurred on each section of the main and harbour cables will be found in the following statements B. and C.; no interruption to the traffic was experienced in consequence of the repairs on the sections east of Bushire, the work being transmitted by the second cable or land line. The Turkish route between Faô and Bushire was necessarily interrupted during the actual time occupied in the repairs of the Faô cable, but I am not aware that any inconvenience was experienced.

RECORDS.

10. Upwards of thirty large sheets of line diagrams have been prepared during the year showing the date and extent of every repair which has been effected since the submersion of the cable, the exact distance of the splices from each other, and the electrical tests taken from them to the stations on either side. The positions of the original mile marks on the cable are also marked off, and altogether these diagrams form a most convenient means for placing prominently on record much useful information which cannot fail to be of the highest value to the officers entrusted with future repairs.

CABLE IN STOCK.

11. **The stock of serviceable main gutta-percha cable amounted on the 31st March last to 71·4 knots, or 2·86 knots less than the quantity on hand at the close of the last official year. Nearly the whole of this 2·86 miles was expended on the two repairs on the Bushire-Henjam section and one repair on the Gwadur-Jask cable. Most of the cable picked up on these occasions was unfit for re-use and had to be transferred to the unserviceable class. An expenditure of cable from stock was therefore necessary to replace that disturbed. Fortunately** the tests were unusually accurate, and the quantity expended is consequently comparatively small to what it would have been had it been found necessary to under-run the average amount of cable disturbed in former repairs.

12. The stock of unserviceable short pieces of cable has been decreased by 7·82 knots. More than three miles of this has been expended in renewals to harbour cables, while 4½ miles of the worst of it, consisting of about 60 pieces brought in from repairs during the previous year, have been stripped as useless for any purpose and the core carefully preserved.

13. The amount of each kind of cable in stock on the 31st March is shewn in Appendix D.

14. The decrease of India-rubber main cable in stock is due to the transfer to the torpedo service of 16·5 knots, but as we have still more than ten miles left on hand, I have thought we might prudently defer for a time incurring the large expenditure necessary to replace the quantity transferred. In the event of extensive repairs being necessary on the India-rubber section, which I have no reason to anticipate, I should be prepared to insert as a temporary measure some of our gutta-percha main cable. There is therefore but little risk in postponing action in this matter. It is desirable to reduce the quantity of cable in stock to the lowest limits consistent with prudence. The cable machinery recently sanctioned will, I trust, be in working order before the close of the year, and if the materials necessary for the manufacture of ten miles of cable are always kept in stock at Manora, there will not be the slightest difficulty at any time in sheathing that quantity of core in less than a month.

15. I quite concur with the remarks of Lieutenant Stiffe, the Engineer and Electrician, as expressed in his annual report for 1877-78, to the effect that extensive renewals may be expected to be necessary in the course of the next four years, by which time the cable will have been submerged for upwards of 20 years, but it must not be forgotten that in no commercial undertaking does the element of luck enter so largely as in telegraphic enterprise. Out of 1,700 miles of cable now connecting Faô and Kurrachee, the greater portion of which has been down for more than sixteen years, only about 200 have been touched on account of repairs to faults. Taking into consideration the average quantity of cable disturbed for each repair about six or seven miles, which in future repairs, by reason of the corroded state of the guards, would probably represent cable expended as far as its use for deep-sea work is concerned, and assuming that there will not be less than an average of four repairs per annum, the gutta-percha cable in stock will be ample for the next two years to meet all the requirements of the service for diversions or repairs, and also allow of our complying with petty requisitions from other Departments.

TAPING MACHINERY.

16. The introduction of this machinery at Manora has proved a complete success. Whether the stock of cable in hand be large or small, no reasonable expense should be spared to protect the iron sheathing as far as possible from the corrosion to which it is as liable in the tanks as when submerged at sea. A short length of retaped cable has been put down in the creek near Manora in order that the durability of the serving material may be reported on from time to time. Experience has shown that so long as this outer covering remains attached to the cable, it exercises a most protective influence on the iron guards.

During the picking up of cable which has been for some years submerged, the original outer serving drops away from the cable as it passes into the tanks. In future, if serving material is available, no cable will be relaid without first having this outer serving renewed. This not only preserves the iron, but lessens the risk of accidents through broken wires, renders it less springy, and altogether much easier to handle.

WORKING AND TESTING.

17. No change has been made in the systems of testing or working observed in the Department. Numerous trials have been made with the "Brown Allan" relay with the view of establishing direct Morse working between Bushire and Kurrachee without the assistance of translation at Jask. The possibility of working at a speed of six words per minute through 1,050 miles of cable was clearly shown, but as this speed is not sufficient to meet the requirements of the service, efforts are being made to obtain one of the more sensitive relays manufactured expressly for long cables.

STEAM BARGE 'ROSE'.

18. The steam barge has been placed at the disposal of the Port Department since the 1st November last for the purpose of assisting in the disembarkation of troops and stores for the Quetta column. As she is always available whenever required for telegraph work, the arrangement is very convenient to both Departments, and at the same time beneficial to this.

MECHANICAL CONDITION OF THE CABLE.

19. **Wherever the cable appears to rest on an even bottom of mud or sand, the outer serving of hemp and pitch still adheres to the cable, and beneath this protecting covering the iron sheathing is comparatively perfect. On the other hand, when the cable has been resting on patches of hard or uneven ground, the outer serving has disappeared, the guards are badly corroded, and in many cases almost entirely wanting. The weakness of the cable at these points is, of course, aggravated by its passage round the drum during the operation** of picking up, and every time the cable is turned over in the tanks for the purpose of repairs additional weak places develop themselves. Cable in this state deteriorates very rapidly in the tanks, but is materially strengthened by the application of the new tape serving. The cable in the Faô-Bushire section appears to be in a better state of preservation than that of any other portion of the line which has come under observation, while that in the vicinity of Henjam is by far the worst.

20. The durability of the serving between the core and the guards has been found to vary in different sections of cable. In the annual reports of 1873 and 1874 it is spoken of as being quite rotten, but, judging from the specimen now before me, which has remained for more than 15 years undisturbed at the bottom of the sea, there is every reason to expect that the hemp when originally of good quality will retain its substance sufficiently long to last out the guards.

HENRY C. MANCE,

Actg. Engineer and Electrician,

Persian Gulf Telegraphs.

Memo. by A. Brasher, Esq., Indo-European Telegraph Department, dated 24th January 1879.

COMMON PURSE ACCOUNTS,

Checking of.

Under the Common Purse arrangement which came into force on April 1st, 1878, the revenue of the Indo-European Telegraph Department consists of—

1.—The receipts on messages exchanged between Departmental stations or passed beyond, but which do not touch India. The value of these is small, being estimated at about £1,000 per annum.

2.—A percentage from the Common Purse estimated at about £64,000 per annum.

2. It may not be out of place here to remark that while the London Office Monthly Reports show, in estimate, the value of the receipts actually earned by the Department, and the value of the percentage claimed from the Common Purse in exchange for them, the difference cannot be taken as an exact measure of the gain to the Department from the Common Purse arrangement. The gain would be as great were there no difference at all, and it is in fact the constant aim of the Department to reduce the difference as much as possible by recovering from the public the same amount of traffic to transmit as it had before the Russo-Turkish war, and on which its present percentage of receipts is based. If it succeeds in doing this, and so performing full work for its Revenue, it will be because the Common Purse arrangement has rendered the Eastern Company's grasp on Indian and Trans-Indian traffic slightly less tenacious than before. The true measure of gain from the Common Purse arrangement is to be found by comparing our present revenue with what it would have been had we held aloof and declined to become parties to it.* The difficulties of recovering the lost traffic *vid* Teheran have been increased by the discontinuance of the system of agencies and advertising formerly carried on by the Indo-European Company and Department. On the other hand, the discontinuance has saved us an outlay of about £800 per annum.

3. As the Departmental revenue now consists almost entirely of a percentage out of the Common Purse, it is obviously indispensable that a sufficient check should be kept upon the total contents of that purse in order to insure that the percentage represents all that is due to us.

4. Provision for such check is made in Section C, Article XIX, of the Heads of Agreement, and the object of this memorandum is to report the extent of check at present exercised by the three contracting administrations; and in the case of the Department to obtain an authoritative decision as to whether the check is considered sufficient.

5. Under the Heads of Agreement, the three administrations engage to credit the Common Purse with their gross receipts on Indian and Trans-Indian messages, less "paid-outs."

6. The importance of "paid-outs" will be apparent when it is explained that they form about 50 per cent. of the gross receipts of the three administrations.

7. The gross and net receipts of the three administrations on Indian and Trans-Indian messages are thus made up:—

INDO-EUROPEAN GOVERNMENT TELEGRAPH DEPARTMENT.

Persian Gulf Section.

8. The gross receipts of this section consist of the total sums received at the junctions of Faô, Bushire and Kurrachee, and at intermediate stations. The "paid-outs" are the proper sums transferred to other lines or persons.

9. The balance constitutes the net receipts which, in the case of this section, can also be arrived at by multiplying the number of words of each class transmitted by its corresponding rate in the Convention in force for the time being.

10. The profits obtained by the London Office in working the mean tariff system, *vid* Turkey, are also credited to the Common Purse. Properly speaking, the mean tariffs by this route should be adjusted chiefly by the Turkish Administration; but at the request of the latter, the Department has undertaken the work, which is thus carried out. The London Office having a mean rate to deal with for each message sent *vid* Turkey, passes to each Section of the line engaged in its transmission a credit for the exact rate specified in the Convention, and enters the difference in a profit and loss account. Before the Russo-Turkish war there was a profit at the rate of about £250 per annum which was duly taken into account in calculating the percentage from the Common Purse allotted to the Department.

* During the seven months before we joined, our revenue averaged £3,500 per mensem. During the last ten months, it has been £5,180. The general depression of trade has prevented its quite reaching the amount at first anticipated, *viz.*, £5,417.

PERSIAN SECTION.

Line Teheran-Bushire.

11. The gross receipts of this section, managed between the Indo-European Company and the Department, consist of the total sums received at each end or point of it. The "paid-outs" are the proper sums transferred to other lines or persons, and—

(*a*). The sum of £400 per mensem representing one-twelfth of the Royalty of £4,800 per annum, due to the Persian Government according to Article VIII, Anglo-Persian Treaty of December 2, 1872, and

(*b*). Two-thirds of the Teheran-Bushire rate on terminal messages according to Article VIII of the same Treaty.

INDO-EUROPEAN TELEGRAPH COMPANY.

Line London-Teheran.

12. The net receipts of this line cannot, as in the case of the Gulf Section of the Department, be obtained by multiplying the words transmitted by the corresponding conventional rates; or, as in the case of the Teheran-Bushire Section, by making the multiplication and deducting certain lump sums.

13. One reason is, that the Indo-European Company works the mean tariff system between India and Europe by crediting each State with the exact conventional or concessional rate out of the mean tariff, and crediting its own line with the remainder, which remainder necessarily varies according to the number of different countries concerned in the transmission of each message. Another reason is, its scale of Royalties with Germany.

14. The gross receipts are, as in the previous cases, the total sums received. The "paid-outs" are—

(*a*). The proper sums transferred to other lines or persons.

(*b*). A Royalty to Russia of fcs. 0·1705 per word on Indian messages. Fcs. 0·118 on Trans-Indian messages. 3·10 per cent. of the collections on the *Times* messages.

(*c*). A Royalty to Germany of fcs. 1·25 per message of 10 words and under; of fcs. 2·50 for messages between 10 and 20 words; of fcs. 0·625 for each additional 5 words; and of 2·50 per cent. on the *Times* messages.

EASTERN TELEGRAPH COMPANY.

Line London-Bombay.

15. This Company follows the same system in dealing with the mean tariff between India and Europe as the Indo-European Company; but as it has inlets and outlets at Lisbon, Marseilles, Malta, and other places, the resulting rates due to the London-Bombay Line are much more variable than those due to the London-Teheran Line.

16. The Eastern Company charges no Royalties against its collections—

The gross receipts are the total sums received.

The "paid-outs" are the proper sums transferred to other lines or persons.

17. In the case of the three lines, the sums transferred to "persons" are amounts deposited by senders of messages for prepaid replies, for porterage, special conveyance, or postage.

ACCOUNTS, RETURNS, &c.

General.

18 Each of the three contracting administrations renders to the other two—

A weekly estimate of the net receipts of its line, with the total divided into the percentages due to each administration, according to the Heads of Agreement; a monthly abstract of the number of words of each class transmitted with the net receipts on each class, and the total on all classes divided as above.

A quarterly summary of the preceding abstracts.

Special.

19. The Indo-European Company sends periodically to the Eastern Company, and subsequently to the Department, its account books containing detailed returns of all messages transmitted *viâ* Teheran.

20. The Eastern Company checks these returns so far as it considers necessary, and as they embody the Indian and Trans-Indian traffic transmitted by the Indo-European Telegraph Department by the above route, the Department has not yet been called upon to produce its own books for the above traffic.

21. The Department furnishes to the Eastern and Indo-European Companies a detailed account of all tariff transmitted *viâ* Turkey, including profit and loss on working the mean rate system, also an account of Perso-Indian messages, and of messages between the Gulf stations and India.

22. It will be seen from the above that the Eastern Company is in a position to effect a complete check upon the accounts of the Indo-European Company and Indo-European Department.

23. But the latter have not the same facilities for checking the Eastern Company's accounts, firstly, because they only exist in the form in which they are received in the Eastern Company's Head Office, London, from its numerous stations between England and India; and secondly, because in these numerous returns, they are mixed up with Mediterranean, Egyptian and other messages, which latter are twice as numerous as the messages exchanged with India and Trans-India.

24. To thoroughly check the traffic transmitted by the Eastern Company would necessitate the picking out and examination of each Indian and Trans-Indian message separately in order to insure that it has been properly charged for, and that the proper "paid-out" had been deducted; but to perform this checking it would be necessary to locate two clerks permanently at the Eastern Company's Office, which could not be done without employing two additional men at salaries of £100 to £150 per annum each.

25. The present Departmental check consists of a detailed examination of one month's account in each half-year of the traffic by the Indo-European Company's Line, and a partial examination of the other five months' accounts; and, in the case of the Eastern Line, a detailed examination of one day's complete message returns in each month, from two or three principal junction stations and one or two minor stations, and a comparison of the monthly abstracts furnished by the Company, with statements from the Indian Telegraph Department of the total number of words of each class exchanged between India and the Eastern Company at Bombay during the same period.

26. The Indo-European Company has also its system of partial check on the Eastern Company's accounts; and it would be to its interest to communicate any error of importance to the Department.

27. I am personally of opinion that the system in force is sufficient to protect the interests of the Department, but I should be glad if the responsibility of deciding were undertaken by higher authority.

28. So far as the checking has gone, the results have been as follows:—

The errors of detail discovered have been very few, and they have been at once corrected.

The alleged and proved errors of principle have been—

1. An alleged excessive rate allowed as a "paid-out" by the Department for transmission between Constantinople and France.

RESULT.—The Department has shown that although messages could go at a lower rate, it advisedly allowed the rate for the dearest route to render all lines available. Explanation admitted.

2. An insufficient gross charge collected by the Indo-European Company on Trans-Indian messages from Russia.

RESULT.—Corrected.

3. A system followed by the Eastern Company of crediting India its message accounts with "paid-outs" calculated in pounds, shillings and pence, whereby, for the sake of dealing with round figures, fractions ranging from $\frac{999}{1000}$ of a penny to three pence per word were deducted from the gross receipts in excess of the conventional amounts in francs. The actual "paid-outs" were made in francs, or the Indian equivalents; the excess has consequently been estimated, and the total amount (about £2,000 during the nine months ending December 31, 1878) has been claimed as due to the Common Purse for division.

RESULT.—Claim admitted and system altered.

APPENDIX J.

INDO-EUROPEAN GOVERNMENT TELEGRAPH DEPARTMENT.

TEHERAN-BUSHIRE DIVISION.

Showing the average rate of transmission of messages in their transit through the lines between Teheran and Bushire for 1878-79, as compared with that of the previous year.

Acting Engineer and Electrician,
Persian Gulf Telegraph.

STATEMENT S.

STEAMER "AMBERWITCH."

The Steamer "Amberwitch" attached to this Department was employed as follows during the year.

Date. From		Date. To		Particulars.
April 1878 ...	1	June 1878...	8	Lying at Kurrachee.
June " ...	9	" " ...	11	Proceeded to sea to render assistance to the Barque "Carlotta" aground on the Indus banks.
" " ...	12	September " ...	7	Lying at Kurrachee.
September " ...	8	" " ...	11	On passage to Bombay.
" " ...	12	November " ...	2	Docked, cleaned and painted and the necessary repairs effected to the boiler.
November " ...	3	" " ...	5	On passage to Kurrachee.
" " ...	6	" " ...	13	Lying at Kurrachee.
" " ...	14	December " ...	11	Proceeded to Persian Gulf with passengers, &c., for all the Telegraph Stations and to repair cables.
December " ...	12	" " ...	22	Lying at Kurrachee, repairing boiler.
" " ...	23	" " ...	29	Proceeded to Persian Gulf, repaired Gwadur-Jask cable and returned.
" " ...	30	February 1879...	15	Lying at Kurrachee.
February 1879 ...	16	" " ...	19	Proceeded with His Excellency the Governor of Bombay and Staff to Ketti Bunder and Nowa Nugga and returned.
" " ...	20	" " ...	21	Lying at Kurrachee. Slight repair effected to the boiler.
" " ...	22	March " ...	11	Proceeded to Persian Gulf, repaired cable between Henjam and Bushire, calling on way up to land stores, passengers, &c, at Telegraph Stations, Sonmeanee, Gwadur and Jask, and at Bunder Abbas to meet Deputy Director, conveyed him to Henjam. On down trip visited Henjam, Jask, Charbar, Gwadur and Ormara.
March " ...	12	" " ...	23	Lying at Kurrachee, effected repair to boiler.
" " ...	24	" " ...	26	Proceeded to Sonmeanee with Commissariat stores for convey, proceeding from that port to Quetta.
" " ...	27	" " ...	31	Lying at Kurrachee.

Amount charged against the grant of the Indo-European Telegraph Department 1,01,441

2. The report shows Rs. 29,612 in excess of the sum entered in annual accounts as receipts on Revenue Account.

3. The receipts on Capital Account as entered in the report are Rs. 4,000 in excess of the sum shewn in the accounts. It is believed that this item represents a recovery of Persian Government debt which does not appear to have been shewn in the annual accounts.

4. A sum of Rs. 364 is shewn in the Report under the head Revenue Expenditure which does not appear in the accounts. This item represents the loss by exchange on francs 72,685·28¾ paid by the Ottoman Administration, and is not traceable in the annual accounts.

5. These differences noted in paras. 2, 3 and 4 should be explained.

6. The items noted in the margin are special adjustment entries in connection with the old accounts of the Department which have been carried out under orders passed in the Department of Finance and Commerce, Nos. 2736 and 3709, dated respectively 11th September and 7th November 1879.

Rs. 1,01,441 and Rs. 57,718.

7. These items could not have been included in the Administration Report, as the adjustments referred to were effected after that document was prepared and submitted to the Government of India.

A. J. FILGATE, Major, R. E.,
Offg. Accountant General.

GOVERNMENT OF INDIA.

HOME, REVENUE, AND AGRICULTURAL DEPARTMENT.

THE GOLD MINES OF THE SOUTH-EASTERN PORTION OF THE WYNAAD AND THE CARCOOR GHAT.

Dated Ootacamund, the 30th October 1879.

From—R. BROUGH SMYTH, Esq., Mining Engineer,

To—The Acting Secretary to the Government of Madras, Revenue Department.

I have the honor to submit the following report for the consideration of His Grace the Governor in Council.

REPORT ON THE GOLD MINES OF THE SOUTH-EASTERN PORTION OF THE WYNAAD AND THE CARCOOR GHAT.

Areas examined.

The areas which have been examined are as follow :—

(*a*) The country drained by the western tributaries of the Pandi river, east of the dividing range, from the sources of the Keilakahpoya to Marpanmadi North Peak.

(*b*) That drained by the southern tributaries of an affluent of the Noogoo river, from Hadiahbetta to Marpanmadi North Peak.

(*c*) The country between Cherambádi and Vellirymulla.

(*d*) The basin of the Keilakahpoya from Devála to a point below Eddakurra.

(*e*) Nanjanad, Avalanche and Sispara.

Physical character of the Nílgiris.

The most elevated portion of the Nílgiris has a mean height of 7,400 feet and an area of 420 square miles. On the south-east the descent to the low country is very rapid, there being in a distance of nine miles a fall of 4,500 feet.

On the margin of the plateau the heights of the peaks vary from 5,600 feet to 8,500 feet ; and near the centre of the tract, Dodabetta, the culminating point, attains an altitude of 8,642 feet. On the north the descent to the country drained by the Moyaar river (which for some distance has a course nearly parallel to, and at a distance of five or seven miles from, the edge of the plateau) is rapid ; and on the south the precipitous declivities seem almost to approach the

banks of the Bhovâni river. On the west the physical character of the country is different; there is a gradual decrease of elevation towards the Pykara river and onwards to Neddivattum, and thence a sudden drop of 2,700 feet to a plateau which has a mean height of 3,000 feet. The rugged rocky margin of this lower plateau trends from south-east to north-west, and the fall to the area drained by the Beypore river is in some parts for hundreds of feet almost perpendicular, and even where tracks have been made, the difference of level is, in a distance of no more than five miles, as much as 2,800 feet.

The upper as well as the lower plateau presents a series of rounded well-grassed hills with masses of rock protruding in places. In the sheltered hollows and narrow valleys there is usually a growth of shrubs with a few moderately straight but rarely large trees. On the main ranges and on the margins of the plateau extending into the low country, the forests are dense and much of the timber is excellent.

The country between Devâla and northwards for some distance, and that between Devâla and Moopenaad, is generally rather lightly timbered, and there are numerous bare grassy hills and well-grassed swamps. In various places there are good forests to be seen in travelling westward, and near Vellirymulla there are magnificent trees in the jungles; and wood suitable for fuel is everywhere abundant.

Near Ootacamund exotics, represented mainly by *Eucalyptus globulus*, *Acacia melanoxylon*, *Acacia dealbata*, *Acacia decurrens*, *Acacia pycnantha*, some species of cinchona, and willows and pines grow generally luxuriantly. On the lower plateau neither Acacias nor Eucalyptus are common, and it is at least doubtful whether they would live in a situation where the rainfall is so great.

The character of the vegetation of the Wynaad, as far as has been observed, gives no help to the gold seeker. In Australia the several geological formations are marked by forms of vegetation of distinct types; the dry Silurian ranges which are intersected by quartz veins are clothed with forests in which the iron bark (*E. Sideroxylon*) is often a feature; the granitic areas carry sparsely she-oaks (*Casuarina*); the tertiaries near the coast support the honeysuckle (*Banksia*) and the she-oak; the areas occupied by carbonaceous sandstones, and porphyries in most places are covered with dense forests of various species of gum; a thick scrub composed of *Eucalyptus dumosa* and *Eucalyptus oleosa* with some species of *Frenela* covers the tertiaries bordering on the river Murray; and the wide basaltic plains are treeless. The miner accordingly, in a country with a vegetation so well marked and so closely corresponding to the areas differing geologically, had some rough guides in his explorations: in Southern India there are none of the like kind, because the soils derived from the rocks intersected by quartz veins are throughout very similar in composition, and situation and climate alone are the influences at work in promoting or retarding vegetation.

Features of the country in the southern parts of the Nambulukod and Munanad Amshoms.

The chief physical feature in that portion of South-East Wynaad, which has been examined, is the dividing range extending from Hadiahbetta on the south-west to Marpanmadi North Peak on the north-east. This range separates the waters of the Pandi river from those flowing to an affluent of the Noogoo river, and for a portion of its length forms the boundary between the Nambulukod and Munanad Amshoms.

The ridge from the edge of the Carcoor ghât to a rocky eminence near Needle Rock is covered with thick jungle. The lower slopes have been cleared and are now planted with coffee.

The culminating points of this part of the range are Hadiahbetta about 4,000 feet, Needle Rock 4,600 feet, and Marpanmadi North Peak 4,650 feet.* The lowest "saddle" in that part of the range near Devâla is approximately 300 feet below the general level of the summit.

On the east and west side of the range there are lower ranges—the boundaries of distinct small drainage areas—but they are not continuous, well-defined even ridges; they consist of rounded hills having smooth contours and connected with each other by low saddles, thus reminding one rather of

* The figures here given are approximations only.

those areas in which granitoid rocks prevail than of those in which, in other auriferous regions, the even symmetrical, almost rectangular, ranges of the lower Silurian rocks offer so many facilities for sketching the country with accuracy and comprehending rapidly its systems of drainage.

At the foot of the hills and at levels varying but slightly, there are numerous swamps and flats (usually intersected by small water-courses) which are in part cultivated by natives.

The summits of the hills forming the subordinate ranges are from 100 feet to 400 feet and more above the level of these swampy flats. The swamps are natural water-reservoirs, the water being stored in the strata overlying the bed-rock. They are generally well grassed, but some are mere bogs or, where well sheltered, densely covered with screw-pines or, where partially drained, supporting a thick growth of thorny plants and scrub.

The streams, having their sources in the hills, after the burst of the south-west monsoon and generally during the months of June, July, August and September, are torrents rushing over rocky beds, which on reaching the low flat lands unite to form perennial streams. In October there are often heavy showers sufficient to swell the brooks; but in November, December, January, and February many of the sources are almost dried up, the waters of the main streams decrease in volume; and in March, April and May, the hot season, when dry harsh winds are not infrequent, and when the grass in the earlier part of the season is on fire on the hills, the tributaries of all the rivers exhibit a marked difference of character.

The smaller tributaries, the sources of the streams, have cut rather deep channels in the sides of the main range and the hills; the descent is rapid and the direction of each nearly straight; it is only when they unite and flow through the low level lands that they have a tortuous course.

The soils on the slopes are, where protected, moderately good and deep. In color they are light reddish brown, brown, dark brown, and nearly black, the latter having a fair proportion of decomposing vegetable matter. Elsewhere they are very thin resting on hard rock or on strong tenacious clays derived from the decomposition of the country rock *in situ*. These clays are but little affected by the heavy rains: the surface of them becomes glazed, and running water does not cut into them as it would do if they were arenaceous. Where cuttings are made the clays stand for a height of fifteen feet or more perpendicularly, and, in some parts, even for a vertical height of fifty feet, the rains scarcely affecting the surfaces at all.

Clays however that have been moved, carried down by the rains, and redeposited are, in comparison, rather easily disintegrated and washed away.

On the lower parts of many of the steep slopes the soil and stones carried down during the monsoons form distinct but irregular layers and (though rarely) strata somewhat resembling alluvial deposits. Heaps of gravel and partially water-worn stones accumulate in the beds of the torrents, where there is a sudden change of level, caused by a hard bar of rock or a fall of rock, and the torrents, as their beds are deepened and the courses are changed, have these loosely-formed beds as walls on one side or other, rarely at the same spot on both.

It is observable that on the lower slopes of the ranges the plants in the coffee gardens are usually more luxuriant and exhibit finer forms and better foliage than on the higher parts of the ranges. This may be accounted for by the larger accumulation of soil and the greater moisture in such situations. Where, however, the hills are low and there is no such accumulation of soil, the plants are generally weakly.

The numerous roads in the Wynaad at various heights and in many cases nearly parallel to each other, whether made by the Government for the purposes of general traffic or by the planters for convenient access to various parts of their estates, are invariably well made and the traces are good. They are sideling roads: the bank on one side of the hill is cut away and the excavated earth and rock are made to form a part of the road.

They are necessarily, in a hilly country like that of the Wynaad, contour lines, and the maps which accompany this report show in what directions they

run; and, in the absence of a correct orographic map, give some hints as to the general features of the country.

In cutting these roads very many fair sections of the rocks and some quartz veins have been exposed; and the mineralogist and geologist find at numerous points as they travel along them much that instructs both as regards the character of the country rock, its modes of decomposition and its conservation, as well as the rather peculiar character of the "leaders," "strings," and small veins which are, as it were, thrown off from the main reefs of quartz.

Climate.

Though the climate of the Wynaad has been represented as unhealthy, it is not uncommon for Europeans employed in connection with coffee gardens to remain in the district with their families throughout the whole year. Fever is prevalent in March, April and May, and some of the residents become seriously ill. But it must be borne in mind that a coffee planter who attends carefully to his business is subjected to exposure to the sun during the hot months and to the heavy rains during the monsoon. He has to walk or ride for many hours each day when the solar radiation is at its maximum, and during the monsoon his clothes are rarely dry.

From August to the end of September the moisture is excessive, and the temperature in the room of a bungalow is often above 70°; yet during this season, fires are lighted at night, and, notwithstanding the high temperature, the warmth is enjoyable. The moisture and heat injuriously affect everything that is manufactured. Boots, portmanteaus covered with leather, and books are quickly and plentifully covered with down-like fungi, and instruments of all kinds are irretrievably ruined unless they are well protected, and constantly cleaned. Clothes suffer in like manner; and the cost of a visit to the Wynaad during the monsoon is not to be measured by the charges for living, horses, servants or the like. Slight neglect or ignorance of the effects of the weather may result in heavy losses if the visitant has provided himself with instruments for scientific observations. During the monsoon the very early morning may perhaps be clear and give promise of fine weather, and a stranger is easily tempted under such favorable aspects to prepare for a day's work and to proceed for three or four miles in the hope that work may be done; but by eight or nine o'clock the clouds come up the ghâts, the south-west monsoon moves in its great strength athwart the hills, the rain descends in torrents, the mists or fogs are dense, features not fifty yards away become invisible, and the day's work, if surveying or geological investigations are the pursuits, is finished.

The rainfall at Devála during the years 1869 to 1875 varied from 158·10 inches to 208 inches per annum; at Cherambádi during the years 1871-72, 1873-74, and 1875 from 109·10 inches to 117 97 inches; and at Vellirymulla during four years from 100·04 inches to 139·47 inches. As much as nine inches of rain sometimes falls in one day, and a fall of one inch of rain in one hour is not uncommon. Still, as already remarked, these heavy rains have comparatively little denuding power, the rocks even where decomposed, resisting the action of the water to a degree that to one accustomed to view other formations is at first almost inexplicable. Such rains would wash away and carry to the sea mountains composed of other more perishable rocks.

The rains are yet not without destructive effects. In many places there have been extensive landslips. The sides of lofty hills have slidden down to the valleys beneath, and nature nowhere has rapidly hidden the evidences of great changes of this description.

Rocks.

The granitoid schists or gneissoid rocks of South-East Wynaad are, it is probable, as will be shown hereafter, only completely metamorphosed sedimentary strata. The minerals observable are felspar, quartz, hornblende, mica, talc, chlorite, pholerite, and magnetic iron. The ordinary foliated rock is usually massive or composed of thin compact layers of quartz and felspar, or of quartz and hornblende. Magnetic iron takes the place of one or other of these constituents, or accompanies them in some places; and at and in the neighbourhood of Marpanmadi North Peak magnetic iron is largely present in the rock, the decomposed surface stone exhibiting layers and reniform and nodular masses of sesquioxide of iron. Some specimens are composed almost entirely of quartz and magnetic iron, and in others the iron occurs with quartz and felspar; and again there is a variety

composed of translucent quartz, magnetic iron, and an asbestiform mineral resembling iron amphibole.

Bands also have been observed in which the proportion of iron pyrites in disseminated crystals is very large.

Massive hornblende rock is found on the south-east and garnetiferous foliated gneissoid rock is common towards the north and east.

In many places the country rock, besides being intersected by large persistent reefs of quartz, is seamed and veined throughout with threads and strings of quartz, not in any way conformable to the lines of foliation; and where a section of the rock decomposed *in situ* is laid bare these threads and strings are clearly traceable through the red, reddish brown, and dark brown of the kaolin-like clays resulting from the decomposition of the stone. These veins vary from one-eighth of an inch or less to six inches or more in thickness, and they consist either of white opaque or blue opaline quartz, the latter not unlike that which forms thin layers in the foliated country rock.

In more than one locality near Devála the harder rocks consisting of dense quartzite or quartz with magnetic iron and a little felspar appear as large rhombohedral blocks or as symmetrical hexagonal or square prisms; and the faces of the planes are not seldom covered with thin layers of rather dark blue opaline quartz. Many of the forms are of singular interest, and a stranger might without examination suppose that some of the masses were of igneous origin. It is perhaps needless to say that the shape of these blocks is due to the direction of the several systems of divisional planes or joints.

The modes of decomposition of the several varieties of gneissoid rocks in the Wynaad give hints as to the degree of metamorphism to which they have been subjected. For instance, where not intensely metamorphosed, they do not weather into spheroids nor exhibit concentric layers around a hard core of rock, such as one sees in tracts occupied by granitic, trappean, and the older igneous rocks. Where, however, there is a greater development of the crystalline structure, as in some parts of the country west of Devála, this well-marked feature presents itself.

East of Needle Rock and east of Harewood thin micaceous shales occur which remind one of the typical micaceous lower Silurian rocks; and the lines of lamination in the former might well seem to correspond with the cleavage planes of the latter. The strike of these thinly-laminated micaceous shales east of Needle Rock is N. 55° W., being nearly at right angles to the general direction of the folia of the gneissoid rocks. It is perhaps correct to say that observation has shown that the most productive auriferous belts in the Wynaad are those in which these micaceous and chloritic rocks occur; and that as a rule where the hard dense massive quartzo-hornblendic strata are found, and where the foliation is indistinct, the veins are either absent, or, where present, consist of saccharoid quartz with large and small plates of mica.

The foliation of the rocks in that part of South-East Wynaad already described preserves throughout a nearly uniform strike, namely, N. 54° E.—S. 54° W. There are curves however where the direction varies from N. 40° E. to nearly east and west. The dip is southerly and south-easterly from 60° to vertical.

Only an extended examination of the country, such as would be made in the course of a minute geological survey, would enable the observer to offer suggestions as to the probable origin of these metamorphic and metamorphosed rocks. It is apparent wherever they are well exposed that there is one system of planes very like strike-joints which, but for the direction of the dip, might be supposed to represent planes of original deposition. The direction of these in some degree accords with the general direction of the main quartz veins, and it might be surmised on a first view that the formation of the latter was due to the same forces which operated in altering the strata they intersect; that, in other words, the quartz in the veins was segregated during the enormous period which elapsed from the time of the first slight alteration of the original sedimentary rocks until they were metamorphosed as we see them now.

In the *Manual of the Geology of India* it is stated that "this Nílgiri strike is noted as distinctly that of the lamination and bedding of the gneiss

as well as of the foliation,"* and therefore it is the more difficult to conjecture to what forces the direction of the quartz veins is due, coinciding as it does, not with the foliation, but rather with the system of joints above referred to.

While the strike of the rocks over a large part of Australia is nearly meridional, the reefs also have generally a north and south direction.

The stronger and more persistent veins as they appear at present may represent what were once lines of least resistance, and some speculations of a strictly geological character might follow this suggestion if this report were not confined to questions of a practical character.

Much valuable information is to be obtained respecting these rocks from the reports and map prepared by Mr. King. A sketch of a geological map of South-East Wynaad on the scale of four miles to one inch, published with the records of the Geological Survey of India (May 1875), and which I had not the opportunity of seeing until after much of this report was written, shows alternating bands of felspathic gneiss and chloritic gneiss running north-easterly and south-westerly, as well as a large area occupied by quartzo-hornblendic gneiss (Nílgiris) and the smaller areas of granitoid gneiss at Yeddakilmullay and Munnaymulla.

There is an absence of intrusive rocks in South-East Wynaad. There are no dykes or masses of porphyry, no basalts or recent volcanic rocks; and it is only at one point, as far as is known, where greenstone occurs, namely, on the Hamsluck estate. The rock consists mainly of hornblende with a small proportion of felspar (oligoclase).

Near the spot where this rock is exposed there are veins of granite or perhaps, to speak more correctly, veins of quartz which are essentially granitic. In several places, more particularly at Gúdalúr, Cherambádi, Moopenaad, and Vellirymulla there are masses of quartz with large transparent plates of mica. The micacisation of the quartz is observed most frequently (but not invariably) where the veins are very thick; and from the observations which have been made up to the present time it might be inferred that gold, in such proportions as it is found in veins which are free from mica, is rarely present in these micacised reefs.

It is not yet certain that the "country rock" is commonly less silicious in those places where the quartz veins are numerous, but this peculiarity is to be noted in the neighbourhood of Devála.

General character of the auriferous quartz veins.

The quartz veins of the Wynaad differ in some respects from those intersecting the almost unaltered lower Silurian rocks of Australia, but they are usually as thick, or thicker, and quite as persistent. The auriferous veins, those which have yielded well both on the large scale and by tests in the laboratory, are laminated and more or less pyritous, and those which up to the present time are regarded as less auriferous are composed of saccharoid, often snow-white opaque quartz with transparent particles of quartz impacted, and have generally an obscurely granular appearance—more indeed like quartzite than vein-quartz, and in many places, as already stated, they exhibit a tendency to become granitic, large plates of muscovite and apparently a hydrated muscovite in smaller plates with here and there a little felspar giving them a character which separates them at once from the well-known rich pyritous veins near Devála. Some of the massive quartz near Moopenaad and Vellirymulla micacised and in structure simulating granite, or partaking of the character of the country rock, might well be supposed to be bedded and not vein-quartz, and contemporaneous with the gneissoid rocks with which it is associated. There was no true quartzite seen in these places, but it may be conjectured that the induration and alterations of composition and structure, which have resulted in the formation of the foliated gneissoid rocks, would not be without influence on purely silicious granular interbedded masses.

From the larger (true) veins "leaders" are thrown off, most commonly to the westward. The leaders usually dip at a low angle, but in some places they are so large and of such a form as almost to give the character of "saddle" reefs to the masses of quartz.

* *A Manual of the Geology of India*, by H. B. Medlicott and W. T. Blanford, 2 Vols., 1879.

The ordinary "casing" of the reefs is a talcose schist (easily separable into thin laminæ) with oxyd of iron and the minerals ordinarily therewith associated; and gold in small flat particles, visible to the eye, is not rare in the casing. The casing of many of the larger auriferous reefs is quartzose and ferruginous rudely laminated and with scales of ripidolite and talc scattered through the mass.

The average thickness of the true quartz veins is about five feet. Some are less than two feet in thickness and others again exceed fourteen feet. The greater number, however, vary from four to seven feet. The direction of the veins is usually N. 30° W.—S. 30° E., and some are nearly due north and south; and the dip, though nearly always easterly, is irregular. On the summits of the steep hills the veins are commonly almost flat or with a very slight dip to the eastward, but at a little depth from the surface the dip is, as might be expected, very different. It is not seldom as much as 30°, 40°, and 60°.

These sudden variations may be due partly to the changes produced on the surface by the heavy rains which fall yearly. Much decomposed and almost solid rock is moved in masses, and "the action of gravitation on substances loosened by weathering, or the 'weight of the hill' as it has been called,"* would account for the difference of dip as measured near the surface and at some depth from the surface.

The direction or strike of the quartz veins is, in a district like the Wynaad, broken up, as it is, into rounded hills of varying height not easy to trace, unless regard be had to the elevation of each point where an outcrop of quartz is seen. An outcrop on a hill is thrown to the westward and the same reef outcropping in a valley is necessarily eastward of the line which would appear if the ground were of the mean level.

It is not yet possible to say what number of separate veins of quartz there are in the area which has been examined, but there are at least two hundred outcrops—not necessarily distinct reefs.

From Moopenaad to Cherambádi, a distance of eleven miles and-a-half by the road, twenty-three outcrops were observed, many of them indicating reefs of great thickness; from Cherambádi to near Nadukani in a straight line south-easterly, twelve miles, there are at least eighteen separate veins; and east and south-easterly of Devála the reefs are from 5, 5½, 7, 10, 16 and 23 chains apart.

Between Moopenaad and Cherambádi the rocks are in places arenaceous.

Distribution of gold.

As will be seen from the detailed reports which follow, gold is almost universally distributed throughout the soils and quartz veins of the Wynaad. It occurs also in the sands and soils both on the east, west, north and south.

In South-East Wynaad, on washing a few dishes of the surface-soil anywhere, a few specks of very fine gold will be found; in the vicinity of the reefs rather heavy gold is often got by sluicing; and if a suitable spot be selected the native miners will obtain, even by their methods, sufficient gold to remunerate them for their labor.

The character of the rocks, the nature of the climate, and the formation of the country have all contributed to prevent the accumulation of drifts such as are found in California and Australia. There are here no gullies having in their beds shallow deposits with a well-defined auriferous stratum, no "deep *leads*" covered and protected by layers of volcanic rock: there are only, as a rule, in the district now under consideration "surfacing" and "quartz-mining."

On the Seeputtee river there is an accumulation of well-rounded boulders of quartz and gneissoid rock imbedded in hard clay and sandy soil which may be regarded almost as a "cement." It is no more than the old bed of the river which owing to the "cutting back" action of the water has lowered its level and left this drift on its banks. It is probable that, as in other similar cases, the "cement" will be found in patches on both sides of the river, in places which were formerly bends of the old stream. The bed-rock on which the gravel, clay, and boulders lie is at no great height above the level of the existing water-course; and the part of the drift which has been worked is about thirty feet in thickness.

* *Manual of Geology*.—Beete, Jukes and Geikie, 1872, page 224.

This drift and those which are to be found in the beds of the swamps may be said to represent the alluvial deposits of the Wynaad. Some of these are probably rich in gold, but it is only under favorable conditions that they could remunerate the miner.

It would be extremely difficult and costly, and in many cases almost impracticable, to drain the swamps by artificial channels, and the expense of pumping the water from a shaft would be very great. Still, if the lowest stratum should prove to be highly auriferous, it might be found remunerative to resort even to pumping, care being taken to carry off the surface water from the swamps by constructing races.

Below the Wynaad plateau and bordering on the tertiaries there are in the beds of the streams rather deep deposits of drift. At Karambaut the water-worn gravels and rounded blocks of country rock and quartz are of considerable thickness.

Below Eddacurra the bed rock is covered with quite recent deposits and tertiary strata (laterite). It is not known whether the stratum immediately overlying the bed-rock is generally auriferous; but wherever the latter is intersected by quartz veins more or less gold will be found in the disintegrated rocks.

Mining for gold in Malabar in former times.

From the appearance of the mines and the soils on the slopes of the hills it is almost certain, as stated elsewhere, that gold was worked in Malabar at a very early period. This, however, is only conjecture. The industry has no history. The wealth of the native rulers in former times, the buildings erected by them, and the records relating to their wars all point however to the conclusion that gold was derived in large quantities either from the Peninsula or perhaps from some neighbouring country.

It is stated that "in the year 1293, A.D., Alláhu'd-din, afterwards Emperor of Delhi, took the city of Deogarh, but the citadel still held out. Subsequently, Allah raised the siege on receiving a ransom, the amount of which may well appear incredible; 15,000 lbs. of pure gold, 175 lbs. of pearls, 50 lbs. of diamonds, and 25,000 lbs. of silver being enumerated among the items. So much, at least, appears certain that Alláhu'd-din levied an enormous sum upon Deogarh, and that consequently it must at that time have been a very great city and a rich emporium."*

In a letter to the *Times* (London) of January 2nd, 1879, signed Edward B. Eastwick, there is the following interesting statement:—After calling attention to the probable occurrence in the south of India of gold fields far richer than those recently discovered, the writer says—"The learned Dr. Burnell, in his 'Note on the great Temple of Shiva at Tanjore' tells us that 'in the eleventh century, A.D., nearly all the great temples to Shiva in Southern India were built, and in the twelfth and thirteenth centuries the great temples to Vishnu were erected;' and it has always been a puzzle whence the great wealth came which enabled the Rajahs of Southern India to construct such enormous works, which, collectively, must have cost millions. The marvel is increased by the fact that, so far from these Indian princes having been impoverished by this expenditure, they were still possessed of vast treasures which fell into the hands of the Moslems in the fourteenth century and were carried away to Delhi. But the famous inscription on the Tanjore Temple, the deciphering of which (an astonishing feat) has been effected by the same authority, sheds some light on the matter." Dr. Burnell writes:—

"The full importance in Indian History of Vira Cola's reign is only to be gathered from this inscription; but it contains other information also of great value. It proves, *e.g.*, that in the eleventh century gold was the most common precious metal in India, and stupendous quantities of it are mentioned here. Silver on the other hand is little mentioned, and it thus appears that the present state of things, which is exactly the reverse, was only brought about by the Portuguese in the 16th century.

"I submit that the great abundance of gold spoken of in the inscription can have arisen only from mines, and that in the terrible convulsions caused by the irruption of Moslem invaders from the north and Europeans from the west, the position of these gold fields was lost sight of * * * * *."

* *A Hand Book for India, Madras.*—John Murray, 1859, page 94.

The full significance of this statement as affecting Southern India can be understood only when taken in connection with the large areas which are now known to have been worked by the natives. It seems to leave little room for doubt that the reefs and soils when first opened up were extremely rich, and that the soils as we find them now have been impoverished by repeated washings.

Mr. Sheffield, Principal Collector of Malabar, stated in a letter referred to by the Committee which reported to the Government on the character and prospects of the gold fields of Malabar in 1833, that the collecting of gold had been farmed out in Wynaad and the Nilambúr Valley for fifty years previously.

Tippoo Sultan procured large quantities of gold from some source and was possessed of great wealth.* It is stated in *Maxwell's Life of Wellington* that amongst other conditions exacted from Tippoo by Lord Cornwallis, he was to pay three crores and thirty lakhs of rupees in gold mohurs, pagodas, and bullion: equal to nearly £3,300,000. On one occasion Tippoo sent thirty-eight camel-loads of money to Scindiah with the hope of securing him as an ally; and from the estimate of treasure and property taken at Seringapatam in 1799 there appear two items that clearly show to what extent the Sultan, in a comparatively short space of time and notwithstanding very heavy demands on his treasury, had been able to accumulate wealth. Of specie there was 16,740,350 Star Pagodas, and of jewels, gold, and silver bullion 25,000,000 Star Pagodas. His throne was sold unbroken for about £2,500, the gold not included in the purchase producing nearly £25,000. These facts and the knowledge we have of the enormous costs incurred by this Prince in supporting armies, constructing forts, and in procuring munitions of war and stores, sufficiently support the conclusion that he must have had ready means of procuring gold; but whether to any large extent from the mines of Southern India can only be conjectured.

In the reports of a joint Commission from Bengal and Bombay appointed to inspect into the state and condition of the Province of Malabar in the years 1792 and 1793, the Commissioners refer very briefly to the occurrence of gold. In treating the subject of the royalties claimed by the Rajahs mention is made of "all gold ore" and also of "compositions of gold * * * * *, of which last article some is found in the Nilambúr District."

About the same time the gold mines had attracted the attention of the Government. In 1793, the Honorable Mr. Duncan, Governor of Bombay, took some steps to ascertain the value and extent of them.

In 1802-3 the auriferous rocks of the Nilambúr valley are again mentioned; and in a work by Dr. Whitelow Ainslie, published in 1813, an account is given of the localities where gold is found in India. The Committee of 1833 quote from his work as follows:—

"Gold dust has been found in the bed of the Godávari, and in Malabar in the bed of the river which passes Nilambúr in the Irnadi District. It has moreover been procured in very small quantities in Wynaad, in the Arcot District, and in the sand of the Beypore river near Calicut. Though the sources are evidently numerous from which this valuable metal can be obtained in the Indian Peninsula, it would seem from the little interest they have hitherto excited that none of them promised to be very productive."

Prior to the year 1831, Mr. W. Sheffield, the Principal Collector of Malabar, had been purchasing gold for the Government, and on the 10th January 1831 he furnished a very interesting report on the several localities where gold was known to occur and on the methods of mining employed by the natives.

On the 15th February 1831, Lieutenant W. Nicolson was appointed by the Government to search for gold "in the mountains on the Malabar Coast," and with him was associated Mr. Henry Louis Hugenin. The latter in his agreement with the Government stipulated that he should receive one-half of the gold he might assist in finding and raising during a period of twelve months and the

* The Committee who reported on the gold mines of Malabar in 1833 state that "it is pretty certain Tippoo attempted to make them a source of revenue during his possession of the country." He no doubt employed slaves, and these would have to be fed. What was the cost during the period of Tippoo's rule of maintaining a slave? The Committee mention that at the time they reported, a cooley could be hired for a pagoda a-month (say Rs. 3-11-8, or 2 annas 6 pie per diem nearly) and food was cheap. When Lieutenant Nicolson was in the Wynaad twenty seers of rice could be bought at Nadagani for one rupee, and thirty seers of rice for one rupee at Sultan's Battery; and the cost of a sheep at Ootacamund varied from eight to twelve annas. Rice at Devála at the present time is sold at the rate of eight seers for one rupee and the price of a sheep is from three to four rupees. When food was to be obtained at such low rates as those which were current some fifty years ago, the washing of very poor auriferous soils would have given a profit to the proprietor of the slaves.

same proportion of all gold he might collect from the mountain streams, &c., by washing; the Government having the right to take such share of the produce at the market price of gold.

The party was formed apparently for the two-fold purpose of "prospecting" for gold fields and for procuring gold for the Government. Lieutenant Nicolson had under his directions a Havildar's party of pioneers, and he employed natives to teach the pioneers to wash for gold and to assist him in his explorations. In his first report, dated 18th April 1831, Lieutenant Nicolson states that he met Mr. Hugenin at Devalacottah on the 16th April, and that they forthwith commenced their explorations.

The localities visited by this exploring party are shown approximately on a tracing accompanying this report, which is a copy of a map drawn and furnished to the Government by Lieutenant Nicolson on the 15th July 1832.

See page 501.

Lieutenant Nicolson and the members of his party suffered much from fever; and in the letters and reports detailing their proceedings at various places there are numerous complaints of the misconduct of servants, the want of a sufficient number of assistants, bad tools, and an irregular supply of necessaries for the men. The petty Rajahs too, Lieutenant Nicolson states, incited the natives over whom they had control to obstruct their proceedings. They felled trees to stop paths; they filled in shafts and also misled the party by misstating facts as to the value of the mines.

After the Government received the report of the Committee appointed to examine the gold mines of Malabar (25th May 1833), the Right Honorable the Governor in Council, being convinced of the inexpediency of working the mines on account of Government, the services of Lieutenant Nicolson were replaced at the disposal of His Excellency the Commander-in-Chief.

It seems from the absence of any records relating to the mines of the Wynaad that the search for gold, and indeed even any interest in the questions which had engaged the attention of the Government in 1831—33, had completely ceased.

In October 1857, the Acting Collector of Malabar drew attention to the arrears of taxes payable by the Rajahs for the right to mine, and in his letters there is some information given respecting the gold workings. He says, in a report dated 4th December 1858, that "it is difficult to define the exact locality in which the gold is quarried and washed; for it is obtained in very many places interspersed through a tract of country extending for some thirty or forty miles along the western face of the ghâts and in parts along their summits. * * * * *. Along the whole of this extensive tract gold-diggings and washings have been, and are, I dare say, now being carried on in many parts. But circumstances have altered so much within the last ten years that the trade has gone down very much, and many of those who understood the art have betaken themselves to other employments and have carried away with them the knowledge of the localities richest in ore. The only persons who seemed to have any acknowledged right to the gold are the parties against whom the present balances are outstanding. They collected the ore entirely through the agency of their Chermars and Panniars, or slaves;* and I am given to understand that whole families of these have betaken themselves to Western Wynaad, where good wages and fair treatment are to be had at the hands of the various coffee planters."

Many persons, besides those who became planters, were attracted to the Wynaad as soon as the country was opened up anew, and amongst them were a few persons from Australia. Two whose names are now well known in the district were miners or acquainted with mining. In July 1865, Mr. H. L. Sterne, who had had six years' experience as a gold-digger, made application to the Government for leave to search for gold and other metals on Government land in the Madras Presidency; and on permission being granted he prospected in various places, but with what results is not accurately known. Mr. G. E. Withers commenced to prospect about the same time, or subsequently, and in pursuing his labors became convinced that the reefs were auriferous and

* Lieutenant Nicolson makes mention of the mines being worked by slaves. He says the people were "most inhumanly and barbarously treated." See appendix to this report.

deserving of attention. It seems that it was owing partly to his labors, but mainly to the enterprise of Mr. J. W. Minchin of Hamslade near Devála, that machinery was erected for reducing the quartz found in the veins at the Skull Reef and the reefs within the Wynaad Prospecting Company's area. Mr. W. E. Schmidt and Mr. J. W. Ryan were applicants for the right to mine on their estates in April 1866, and they were also active in promoting the new industry. The results of the operations of the Companies who commenced quartz crushing in 1875 and 1876 are referred to in another place in this report.

Other applications for land for gold-mining purposes were made in 1876, and it seemed at that time that the gold fields would be re-opened and worked with suitable machinery, but the trials made were unsatisfactory and the works were brought to a standstill.

Gold-washing as practised by the natives.

The methods employed by the natives in washing the auriferous earths, whether by "ground-sluicing" or by *pautties* (puddling troughs), their system of mining in quartz veins, if mining it can be called, their plan of grinding the quartz as well as their final operation of "washing off" in the wooden dish (*murriya*) are of the highest interest, representing as they do operations that were carried on in all probability exactly in the same manner some thousands of years ago. The old gold fields of the Western World were certainly worked more than five hundred years before the Christian era in the same manner and with the same appliances as those used now by the Korumbars and Moplahs.

Their various methods are tedious, they involve the expenditure of much labor, and the results are no fair criteria of the value of the earths or rocks which they treat. By any system of "ground-sluicing" some gold is lost, but, working as the Korumbars do, it is questionable whether they collect more than a small proportion of the fine gold contained in the soil. By using the puddling trough they may have saved a little more gold, but not much more. The *murriya*, however, in the hands of an experienced native is nearly as perfect for "washing off" as the tin dish of the Californian and Australian miner.

The tribes which are mentioned as supplying men commonly employed in gold-mining are the Korumbars, Moplahs, Panniars, Nairs and Tiers. The Korumbars and Moplahs are said to have worked the quartz veins, and there is reason to believe that their systems of excavating the reefs were different, though their treatment of the stone was in all likelihood the same.

Ground-sluicing.

In getting gold by "ground-sluicing" the Korumbars display much ingenuity. One old miner usually directs the operations. Having fixed on a spot where he thinks there is a probability of finding gold he "prospects" the area, using the *murriya* for washing the earth.

On a site being chosen, if it is not actually in the bed of a stream, a supply of water is directed to the spot by a race, and work is commenced. The men excavate the earth with their mamooties, the water all the while flowing over the space in which they are working. One man stands behind the other at such a distance as to permit of his using his mamooty, and in a short time three or four men are laboring knee-deep in water: the large stones are put aside so that finally a wall is formed. The men are usually careful in washing the stones, and they exhibit no little skill in turning every slight advantage to account. The soil is stripped to the bed rock, every crevice is scraped with the mamooties, and at length the resulting heavy material having been concentrated by being raked up against the stream, the old miner steps into the channel with his *murriya* in his hand and fills it with the sand, &c., piling the stuff as high as he can on the dish. A little pool meanwhile having been made he places the wooden vessel with its weight of sand in that and "puddles" the sand, always scrupulously washing and examining the small stones before he throws them away. By tilting the dish and adroitly moving the stuff with one hand as the water flows over it he finally obtains a black, heavy, iron sand, and on this being sufficiently concentrated the vessel is filled with water, a swinging motion is given to it so as to throw the gold into or a little above the hollow in the centre, and then again tilting the *murriya*, he takes water in one hand and allows it to fall through his fingers on to the sand in the lower part of the dish, and thus in

a little time clears the dish of the refuse and at length is able to show the gold almost completely separated from the black sand.

The washing is continued dish after dish until all the material concentrated in the sluice has been treated. The Korumbar's skill in manipulation is very great and he is also patient and painstaking.

When the gold is got together it is put into a leaf, and any black sand in it is washed off.

The operation of washing a dish of stuff usually occupies half-an-hour or more.

The *murriya* is made of hard, heavy wood. It is from eighteen to twenty-two inches in length, sixteen inches in breadth, and from two to three inches or more in depth. There is a projecting pin at one end and a knob at the other. It becomes smooth and black by use and shows the smallest particle of gold quite clearly.

In many parts of the Wynaad District the remains of the walls built by the miners when ground-sluicing, the lines of their races, now almost obliterated, and heaps of rubble extending in some places over many acres, are to be seen; and in the jungles on cutting into the earth on a hill side one finds that the soil has been disturbed. Indeed the evidences of the patient labors of the native miners are so numerous and are found in so many localities that one pauses to consider the length of time which must have elapsed since gold-washing first became an established industry in this part of India. The soil and rubble made to yield its gold in times long past is now again consolidated, covered with herbage, and supporting large jungle trees.

Washing with the *pautty*.

The box used by the natives for washing auriferous earth more resembles a puddling trough than a sluice. The *pautty* is a trough made of wood. It is from six to seven feet in length and one foot or more in breadth. On discovering a spot where there was a sufficient quantity of auriferous earth these boxes were employed; and it would seem from the report of a Committee appointed, under date 14th December 1832, to examine the gold mines in the Zilla of Malabar, that when they visited the mines near Mambat (Beypore river) there were fifty or sixty Moplahs at work.

The Committee state that the *pautties* were placed over a running stream; or water was conveyed to them in races. The boxes were placed in a sloping position. At the lower end small pieces of bamboo were laid across which acted as "riffles." Two men, the Committee state, were required to work one *pautty*. One day they collected the earth and the next day they washed it. The earth was carried to the *pautty* in the *murriya* and the men stirred the earth with their hands, removing the stones, &c., until only heavy sand remained. This residuum was washed in the ordinary way in the *murriya*, and quicksilver was used to collect the gold, the amalgam being afterwards wrapped in a rag and placed between two pieces of burning charcoal until the heat volatilised the mercury and left the gold clean.

The *pautties* were used during the wet season on the higher lands and in the dry season in the beds of the streams.

Working veins.

Throughout South-East Wynaad and at several places in the low country of Malabar the quartz veins have been worked by the natives. The appearance of the workings indicate the following methods of getting out stone:—

(1) Quarrying on the outcrop of the veins (surface workings).
(2) Vertical shafts.
(3) Adits.
(4) Vertical shafts with adits therefrom.
(5) Shafts on the underlie.

Quarrying on the outcrop of the veins was undoubtedly followed in the first instance. Gold was seen in the stone, and blocks were broken in order to procure fragments with gold visible. It is believed that no stone was crushed which did not show gold.

Subsequently vertical shafts were sunk, but by what tribe is not known. Many of them are well formed, always round, and as deep as seventy feet or more. Some are in solid quartz, others in country rock interseeted by "leaders" and thin veins of quartz. How the miners could possibly have sunk such

shafts in hard dense quartz with the tools they had is hard to guess. They are plumb and the sides are quite smooth. It is not uncommon to find a number of shafts very close together, not more than a few feet apart. The adits in most cases were evidently constructed long subsequent to the sinking of the vertical shafts; where the latter are found on the summit of a hill they are undercut by adits; and in some places care has been taken to block up the shafts so as to prevent stones and earth falling in on the miners below. It is unreasonable to suppose that several vertical shafts would have been sunk close together after the adit was driven. They could not have served any useful purpose. And the miners who constructed the adits did not generally sink vertical shafts in following the reefs downwards from their adits; they sunk shafts on the underlie or foot-wall, and these are to be seen in various places.

Towards the north-west another system was employed. In mining on the steep slope of a hill a vertical shaft was sunk to the depth of six or eight feet so as to cut the reef, and an adit was driven therefrom. With what object this method was adopted is not known; but it may be supposed that in some situations difficulties were found in protecting an open cutting from the rains. A cutting necessary to get a "face" in the solid rock would present surfaces which would be to some extent affected by the rains; whereas by sinking a shaft (at all times easily protected) the miners were able to penetrate the hill with safety, though the additional labor involved in getting out stone would be great. There are, as already stated, not a few shafts sunk on the underlie in several localities near Devála. The reefs were mined in this manner, it is almost certain, by the same class of miners as made the adits.

It was not unusual for them to penetrate to the depth of sixty or seventy feet, but where the reefs were flat or had a low dip these underlie shafts were only inclined adits, rising where they worked at the casing of the hanging wall and falling again as they followed the foot-wall.

In what manner soever the auriferous quartz was procured the after-treatment was in all cases nearly the same. The quartz broken into small pieces was given to the women to grind. Each woman was provided with a muller or hand-stone, and the fragments of quartz were either ground on a suitable piece of stone *in situ* or on a large flat stone procured for the purpose. The pounded stone was subsequently washed in the *murriya* and the gold got by amalgamation with mercury.

The auriferous stone was sometimes roasted. Whether merely to effect its disintegration more easily and rapidly, or whether from a knowledge that the pyrites in it were auriferous, has not been quite satisfactorily ascertained.

It is probable, however, that some of the miners knew that the pyrites contained gold though it was not visible to the eye, and that by roasting the mineral they would get it. In one locality it was usual for the miners to procure blocks of pyrites, divide them, and take the pieces to their homes for treatment.

In breaking up blocks of quartz too on the outcrops of the reefs, it is said that they used fire. In one place, according to information given to me, the trees of the jungle were felled, the timber piled in heaps on the quartz and there burnt, and on the outcrop of one reef an excavation in the solid rock was found which appeared to have been constructed for and used as a kiln.

Where the quartz miners have labored there are to be seen usually large heaps of broken quartz, the pieces rejected, because they did not show gold; and on the outcrops of the reefs are found the smooth hollows in the rocks worn by long hand-grinding, while in the jungles, the flat stones and mullers, covered with moss, are occasionally met with.

It may be interesting to remark that these flat stones and mullers are very similar in form to those used by the Australian natives for grinding seeds, &c.

The miners who worked in the adits seem to have had more knowledge of mining and of the modes of occurrence of gold than those who formerly got out quartz by sinking vertical shafts. The former followed the run of gold wherever they were able to do so, sometimes taking out the foot-wall and "casing" and sometimes the hanging wall.

The Korumbars, skilful as they are, have no knowledge of the manner in which the gold has been distributed. They are acquainted with the "run"

of the reefs and show great intelligence in selecting spots likely to yield gold, but they do not believe that the gold in the soils has been derived from the disintegration of the reefs. They say that it is found in some places in the reefs, in other places in the soils, but that its occurrence in the latter is in no manner connected with the former.

There is no record of any large pieces of gold having been found in the Wynaad. In the pamphlet entitled *Gold Prospecting in the Wynaad* it is mentioned that one fragment was got within the last few years which weighed over seven pennyweights, but some quartz was mixed with it. Other pieces, weighing respectively 11 grains and 21·9 grains, are named as having been washed out of the soil near Devála and Glenrock. The natives have made many statements and have some curious traditions respecting the finding of nuggets of gold in former times.*

Number of native miners employed.

Even in those gold-mining countries where there is a very complete system of registration of "claims," and efficient machinery for collecting statistics relating to the number of miners employed, the mechanical appliances in use, and the yield of gold, few returns are regarded as more than approximations.

If extensive mining operations were carried on by the natives in Southern India, it would be impossible to arrive at any results, except by making rough calculations of the probable average yield per man per diem based on such information as might be afforded by the miners and the purchasers of the gold in any given area; and it is not surprising therefore that the Committee appointed to make investigations in the Province of Malabar in 1832 write with much caution when dealing with the statistics afforded by the shroffs, cultivators, and others examined by them.

* When at Devála I was told that a lump of gold weighing about 9 lbs. had been unearthed a long time ago in a valley not far from the bazaar. Again, when at Sullumllai, "Kooty" Maistry informed me that a piece of gold as large as his hand had been found in the Pandi river on the way to Paria Shola, and that the largest piece he, "Kooty," had ever washed out was worth Rs. 25. He added that on the slope of the Needle Rock range towards Devála a nugget of gold was found in his grandfather's time which was as large as two hands could compass, and that it was taken away by the Adagherry of Nelliallum. At the same time when talking with Kooty Maistry it was stated by some of the men that one "Koolamby," a Pannier who was employed in cutting the district road near the Monarch Reef, found a piece of gold of some weight. Mr. Minchin corroborated the statement of Kooty Maistry, when he said that it proved of sufficient value to support Koolamby for three years. Kooty Maistry was inclined to be communicative. He told me that the old workings about Devála were made by people called Bordah, very small people who alone could have made the small adits and holes we see. Kooty said he had found their implements, small things between mamooties and pickaxes, so small as to show that only small men could have used them. On the other hand, Korumbar Carlah declared that the miners in ancient times were very large men, and he inquired how the large stones could have been moved if the miners themselves had not been large? Kooty rejoined how could large men enter the small holes we see? This discussion was not without interest.

Subsequently I received an account of mining operations on the Pandi river below the Peria Shola crossing. There, they say, a party of forty or more natives sank down to the bed rock through the overlying strata (on or nigh the bed of the stream) making coffer-dams, using, in constructing them, fascines filled with clay, and on penetrating to some depth, after working for four or six months, finally reached a layer of gold one inch in thickness! It appears, however, that they seldom touched this layer. Floods, too, often carried away their dams. Their statements may perhaps be more reliable than their traditions. All the natives in the neighbourhood of Devála firmly believe in the following story, and it is given as nearly as a translation of their words can convey their meaning:—
